CITY OF ONTARIO

Regular City Council/Housing Authority Meeting
AUGUST 20, 2024

City Hall
303 East B Street, Ontario, CA 91764

MAYOR PAUL S. LEON • MAYOR PRO TEM DEBRA DORST-PORADA
COUNCIL MEMBERS ALAN D. WAPNER, JIM W. BOWMAN AND RUBEN VALENCIA

CITY CLERK SHEILA MAUTZ • TREASURER JAMES R. MILHISER
CITY MANAGER SCOTT OCHOA • CITY ATTORNEY RUBEN DURAN

WELCOME TO A MEETING OF THE ONTARIO CITY COUNCIL

All documents for public review are on file with the Records Management/City Clerk's Department located at 303 East B Street, Ontario, CA 91764.

Anyone wishing to speak in person during public comment or on a particular item will be required to fill out a blue slip. Blue slips must be turned in prior to public comment beginning or before an agenda item is taken up. The Clerk will not accept blue slips after that time. To comment by email, submit your comments no later than 4:00 p.m. on the day of the meeting by emailing your name, agenda item you are commenting on and your comments to publiccomments@ontarioca.gov. All comments received by the deadline will be forwarded to the City Council for consideration before action is taken on the matter and will be entered into the record.

Comments will be limited to 3 minutes. Speakers will be alerted when they have 1 minute remaining and when their time is up. Speakers are then to return to their seats and no further comments will be permitted.

In accordance with State Law, remarks during public comment are to be limited to subjects within Council's jurisdiction. Remarks on other agenda items will be limited to those items.

Remarks from those seated or standing in the back of the chamber will not permitted. All those wishing to speak including Council and Staff need to be recognized by the Chair before speaking.

ACCOMODATIONS

If you need special assistance or accommodations to participate in this meeting, please contact the City Clerk's office at 909-395-2009. Notification of 48 hours prior to the meeting will help the City make reasonable arrangements. Equipment for the hearing impaired is available in the Records Management Office.

ORDER OF BUSINESS

The regular City Council and Housing Authority meeting begins with Closed Session and Closed Session Comment at 6:00 p.m., Public Comment at 6:30 p.m. immediately followed by the Regular Meeting and Public Hearings. No agenda item will be introduced for consideration after 10:00 p.m. except by majority vote of the City Council.

CALL TO ORDER *(OPEN SESSION)*

ROLL CALL

Porada, Wapner, Bowman, Valencia, Mayor/Chairman Leon

CLOSED SESSION PUBLIC COMMENT

The Closed Session Public Comment portion of the Council/Housing Authority meeting is limited to a maximum of 3 minutes for each speaker and comments will be limited to matters appearing on the Closed Session. Additional opportunities for further Public Comment will be given during and at the end of the meeting.

Pastor Daniel Ventura, Ontario United Reformed Church

REPORT ON CLOSED SESSION

City Attorney

PUBLIC COMMENTS 6:30 P.M.

The Public Comment portion of the Council/Housing Authority meeting is limited to 30 minutes with each speaker given a maximum of 3 minutes. An opportunity for further Public Comment may be given at the end of the meeting. Under provisions of the Brown Act, Council is prohibited from taking action on oral requests.

To comment by email, submit your comments by email no later than 4:00 p.m. on the day of the meeting by emailing your name, agenda item you are commenting on and your comment to publiccomments@ontarioca.gov. All Comments received by the deadline will be forwarded to the City Council for consideration before action is taken on the matter and entered into the record. As previously noted -- if you wish to address the Council, fill out one of the blue slips at the rear of the chambers and give it to the City Clerk.

AGENDA REVIEW/ANNOUNCEMENTS

The City Manager will go over all updated materials and correspondence received after the Agenda was distributed to ensure Council Members have received them. He will also make any necessary recommendations regarding Agenda modifications or announcements regarding Agenda items to be considered.

INFORMATION RELATIVE TO POSSIBLE CONFLICT OF INTEREST

Agenda item contractors, subcontractors and agents may require member abstentions due to conflict of interests and financial interests. Council Member abstentions shall be stated under this item for recordation on the appropriate item.

CONSENT CALENDAR

All matters listed under CONSENT CALENDAR will be enacted by one motion in the form listed below – there will be no separate discussion on these items prior to the time Council votes on them, unless a member of the Council requests a specific item be removed from the Consent Calendar for a separate vote.

Each member of the public wishing to address the City Council on items listed on the Consent Calendar will be given a total of 2 minutes.

1. APPROVAL OF MINUTES

Minutes for the regular meetings of the City Council, Housing Authority, and Ontario Public Financing Authority of July 16, 2024, and approving same as on file in the Records Management Department.

ATTACHMENT: 20240716 Meeting Minutes (Not Official Until Approved)

JOINT MEETINGS

The regular meetings of the Ontario City Council and the Housing Authority were held on Tuesday, July 16, 2024 at Ontario City Hall, 303 E. B Street Ontario, California.

OPEN MEETING CALLED TO ORDER

Mayor Leon called the joint meetings to order at 6:33 p.m.

ROLL CALL

PRESENT:	Mayor/Chairman:	Paul S. Leon
	Mayor pro Tem/Vice Chair:	Debra Porada
	Council/Authority Members:	Alan D. Wapner, Jim W. Bowman and Ruben Valencia
ABSENT:	Council/Authority Members:	None

Also present were City Manager / Executive Director Scott Ochoa, City Attorney/Legal Counsel Ruben Duran, and City Clerk / Secretary Sheila Mautz.

INFORMATION RELATIVE TO POSSIBLE CONFLICTS OF INTEREST

There were no conflicts of interest announced by the City Council.

PLEDGE OF ALLEGIANCE

The Pledge of Allegiance was led by Council Member Wapner.

INVOCATION

The invocation was led by Pastor Kennedy, Mt. Zion Church of Ontario.

SPECIAL CEREMONIES

PROCLAMATION OF JULY 2024 AS PARKS AND RECREATION MONTH

The City Council proclaimed the month of July 2024 as Parks and Recreation Month in the City of Ontario.

Mayor Leon reorganized the meeting to the benefit of the public by moving Public Hearing Item Nos. 27 and 28 to be considered prior to Agenda Review/Announcements.

PUBLIC HEARING

27. A PUBLIC HEARING TO CONSIDER A RESOLUTION FOR THE CANCELLATION OF WILLIAMSON ACT CONTRACT NO. 72-384

The City Council considered and adopted a Resolution approving the Tentative Cancellation of Land Conservation Contract No. 72-384, File No. PWIL23-001.

RESOLUTION NO. 2024-131 A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF ONTARIO, CALIFORNIA, APPROVING FILE NO. PWIL23-001, A TENTATIVE CANCELLATION OF LAND CONSERVATION CONTRACT NUMBER 72-384 FOR 23.2 ACRES OF LAND GENERALLY LOCATED ON THE WEST SIDE OF ARCHIBALD AVENUE, APPROXIMATELY 893 FEET SOUTH OF RIVERSIDE DRIVE, AT 13150 SOUTH ARCHIBALD AVENUE, WITHIN NEIGHBORHOODS 2A, 2B AND 2C OF THE COUNTRYSIDE SPECIFIC PLAN AND MAKING FINDINGS IN SUPPORT THEREOF; APNS: 0218-111-60 AND 0218-111-61.

Notice of public hearing was duly given and affidavits of compliance are on file in the Records Management Department. There was one written communication from Marven E. Norman in opposition.

Mayor Leon opened the public hearing and inquired whether persons were present who wished to speak to the item. Hearing no one, Mayor Leon closed the public hearing and entertained council discussion.

MOTION: Moved by Council Member Bowman, seconded by Council Member Wapner and carried by a unanimous vote 5-0, to adopt Resolution No. 2024-131.

28. A PUBLIC HEARING TO CONSIDER CERTIFICATION OF THE ONTARIO REGIONAL SPORTS COMPLEX FINAL ENVIRONMENTAL IMPACT REPORT (STATE CLEARINGHOUSE NO. 2023110328) AND THE ASSOCIATED GENERAL PLAN AMENDMENT PGPA23-002 AND ZONE CHANGE PZC23-004.

The City Council took the following actions:

A. Considered and adopted a Resolution certifying the Ontario Regional Sports Complex (ORSC) Environmental Impact Report (State Clearinghouse No. 2023110328) including a Mitigation Monitoring and Reporting Program and Statement of Overriding Considerations; and
B. Considered and adopted a Resolution approving the General Plan Amendment (File No. PGPA23-002); and
C. Introduced and waived further reading of an Ordinance approving the Zone Change (File No. PZC23-004).

RESOLUTION NO. 2024-132 A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF ONTARIO, CALIFORNIA, CERTIFYING THE ENVIRONMENTAL IMPACT REPORT (STATE CLEARINGHOUSE NO. 2023110328) FOR THE ONTARIO REGIONAL SPORTS COMPLEX (ORSC) FOR FILE NOS. PGPA23-002 AND PZC23-004 AND ADOPT ENVIRONMENTAL FINDINGS PURSUANT TO THE CALIFORNIA ENVIRONMENTAL QUALITY ACT, INCLUDING A STATEMENT OF OVERRIDING CONSIDERATIONS, AND A MITIGATION MONITORING AND REPORTING PROGRAM.

RESOLUTION NO. 2024-133 A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF ONTARIO, CALIFORNIA, APPROVING FILE NO. Chris Gonzalez, spoke in favor and asked that developers use union workers for the project.
David Hanson, spoke in opposition.
Brian Fish, spoke in opposition.
Chase Preciano, spoke in opposition.

Hearing no one else, Mayor Leon closed the public hearing and entertained council discussion. City Council discussed their support of the item to maintain a balanced community.

MOTION: Moved by Mayor pro Tem Porada, seconded by Council Member Wapner and carried by a unanimous vote 5-0, adopt Resolution Nos. 2024-132 and 2024-133 and introduce Ordinance No. 3281.

Mayor Leon recessed the meetings at 7:30 p.m. and reconvened at 7:42 p.m.

AGENDA REVIEW/ANNOUNCEMENTS

City Manager Ochoa announced updated materials of the Exhibits to the Resolution being considered under agenda Item No. 11. The update reflected any payments received from property owners up to 1:00pm on Monday, July 15, 2024. The updated materials reflect a revised and reduced amount for assessments totaling $572,192.25 related to 530 parcels, which means that $102,953.38 for 226 parcels was collected or postponed since the public agenda was prepared. The updated materials provided were incorporated into the public record.

CITY OF ONTARIO *Agenda Report* **August 20, 2024**	**SECTION:** **CONSENT CALENDAR**
Department: Financial Services Prepared By: William B Quan Staff Member Presenting: Armen Harkalyan, Executive Director of Finance Reviewed By: Doreen Nunes Approved By:	Submitted To: Council/OHA Approved: _____ Continued To: _____ Denied: _____ Item No: 3

SUBJECT: A PROFESSIONAL SERVICES AGREEMENT FOR INVESTMENT MANAGEMENT AND ADVISORY SERVICES

RECOMMENDATION: That the City Council authorize the City Manager or designee to execute a Professional Services Agreement with Chandler Asset Management, Inc., for investment management and advisory services, for a period of three years, with two optional one-year extensions.

THE FOLLOWING COUNCIL GOALS ARE BEING ACHIEVED:
Operate in a Businesslike Manner

FISCAL IMPACT: The increased revenue generated from the investment rate of return will offset the fees incurred for the investment management and advisory services.

BACKGROUND & ANALYSIS: As of June 30, 2024, the City of Ontario's investment portfolio was $1.2 billion dollars, which consisted of the following categories: Bonds funds held with fiscal agents, OPEB funds with trustees, LAIF (Local Agency Investment Fund), CAMP (California Asset Management Program), Cash, and Investment securities. The investment securities represented $679 million dollars of the portfolio. Per California Government Code Sections 53600 et seq. and the City's Investment Policy, the City shall invest in a manner that provides for the safety of principal and sufficient liquidity while providing a suitable investment return. The City has been managing its investments internally. The size and complexity of the City's portfolio are sufficient to require a reasonably high level of portfolio management skills and resources from a professional investment adviser.

The City issued a Request for Proposal (RFP) number 1807 on May 17, 2024, for investment management and advisory services. The RFP was posted on PlanetBids and eight proposals were received by the submission deadline of June 14, 2024. The RFP review committee for the procurement consisted of three Financial Services Agency members, including the City's Chief Investment Officer (CIO). The evaluation criteria included qualifications of the advisory firm and personnel, technical competence and experience, references, project understanding and approach, completeness of responses, and reasonableness of the cost of services. Following a detailed review

and evaluation of the submitted proposals, all ratings were tabulated, and the top two firms were invited to a final interview with the City Treasurer and Executive Director of Finance. The City Treasurer, Executive Director of Finance along with the CIO selected Chandler Asset Management, Inc. ("Chandler") to provide investment management and advisory services to the City.

Chandler's service fees are calculated in two tiers. Assets under management for the first $300 million is calculated at 4 basis points (0.04 of 1%), which equates to 0.0004 and assets above $300 million is calculated at 3 basis points (0.03 of 1%), which equates to 0.0003. Based on the June 30, 2024 securities value of $679 million, the estimated service fee for the month of June is $19,491. The estimated annual service fee based on the prior year is $250,092. The investment earnings for the prior year were $21,592,203. The increase in investment earnings will offset the fees incurred for these services. The fee schedule is included in Exhibit C of the Professional Services Agreement between the City and Chandler.

Chandler is a local investment adviser based in San Diego, CA, focusing on the management of high-quality fixed income portfolios for local governments and special districts guided by the objectives of safety, liquidity, and return. Chandler has served public agency clients for over 36 years and currently manages $35.4 billion in assets for over 200 local government clients, including 158 public agency clients in California. Some of their local municipal clients include the City of Riverside, City of Corona, City of Chino Hills, City of Moreno Valley, and City of Palm Springs. Chandler has been a partner with the City of Ontario since 1993 providing portfolio reporting services and annual investment policy reviews. They have been a valuable resource to the City providing market commentary, policy update recommendations, and best practices.

Pursuant to the Professional Services Agreement, Chandler will be providing all-inclusive services including full-time, non-discretionary investment advisory and portfolio management services, comprehensive reporting, quarterly investment advisory meetings, online access to the Chandler client portal, as well as providing additional treasury support services such as cash flow analysis, portfolio accounting, compliance monitoring and fixed income education and training. Chandler's full scope of services is included in Exhibit A of the Professional Services Agreement between the City and Chandler.

CITY OF ONTARIO
PROFESSIONAL SERVICES AGREEMENT

1. PARTIES AND DATE.

This Agreement is made and entered as of _____, by and between the City of Ontario, a municipal corporation organized under the laws of the State of California with its principal place of business at 303 East "B" Street, Ontario, California 91764-4196, County of San Bernardino, State of California ("City") and **Chandler Asset Management, Inc**, a Corporation, with its principal place of business at **9255 Towne Centre Drive, Suite 600 San Diego, CA 92121** ("Consultant"). City and Consultant are sometimes individually referred to herein as "Party" and collectively as "Parties."

2. RECITALS.

2.1 Consultant.

Consultant desires to perform and assume responsibility for the provision of certain professional services required by the City on the terms and conditions set forth in this Agreement. Consultant represents that it is experienced in providing **Investment Management and Advisory Services** to public clients, is licensed in the State of California, and is familiar with the plans of City.

2.2 Project.

City desires to engage Consultant to render such professional services for the **Investment Management and Advisory Services** project ("Project") as set forth in this Agreement.

3. TERMS.

3.1 Scope of Services and Term.

3.1.1 General Scope of Services. Consultant promises and agrees to furnish to the City all labor, materials, tools, equipment, services, and incidental and customary work necessary to fully and adequately supply the professional consulting services necessary for the Project ("Services"). The Services are more particularly described in Exhibit "A" attached hereto and incorporated herein by reference. All Services shall be subject to, and performed in accordance with, this Agreement, the exhibits attached hereto and incorporated herein by reference, and all applicable local, state and federal laws, rules and regulations.

3.1.2 Term. The term of this Agreement shall be from **October 1, 2024 to September 30, 2027**, unless earlier terminated as provided herein. The City shall have the unilateral option, at its sole discretion, to renew this Agreement automatically for no more than two additional one-year terms. Consultant shall complete the Services within the term of this Agreement, and shall meet any other established schedules and deadlines. The Parties may, by mutual, written consent, extend the term of this Agreement if necessary to complete the Services.

3.2 Compensation.

3.2.1 Compensation. Consultant shall receive compensation, including authorized reimbursements, for all Services rendered under this Agreement at the rates set forth in Exhibit "C" attached hereto and incorporated herein by reference. The total compensation shall not exceed **Annual Asset Management Fee referenced in Exhibit "C"** without written approval of the City Council or City Manager, as applicable. Extra Work may be authorized, as described below, and if authorized, will be compensated at the rates and manner set forth in this Agreement.

3.2.2 Payment of Compensation. Consultant shall submit to City a monthly invoice which indicates work completed and hours of Services rendered by Consultant. The invoice shall describe the amount of Services provided since the initial commencement date, or since the start of the subsequent billing periods, as appropriate, through the date of the invoice. City shall, within 30 days of receiving such invoice, review the invoice and pay all non-disputed and approved charges. If the City disputes any of Consultant's fees, the City shall give written notice to Consultant within thirty (30) days of receipt of an invoice of any disputed fees set forth therein. Payment shall not constitute acceptance of any Services completed by Consultant. The making of final payment shall not constitute a waiver of any claims by the City for any reason whatsoever.

3.2.3 Reimbursement for Expenses. Consultant shall not be reimbursed for any expenses unless authorized in writing by City, or included in Exhibit "C" of this Agreement.

3.2.4 Extra Work. At any time during the term of this Agreement, City may request that Consultant perform Extra Work. As used herein, "Extra Work" means any work which is determined by City to be necessary for the proper completion of the Project, but which the Parties did not reasonably anticipate would be necessary at the execution of this Agreement. Consultant shall not perform, nor be compensated for, Extra Work without written authorization from the City.

3.3 Responsibilities of Consultant.

3.3.1 Independent Contractor; Control and Payment of Subordinates. The Services shall be performed by Consultant or under its supervision. Consultant will determine the means, methods and details of performing the Services subject to the requirements of this Agreement. City retains Consultant on an independent contractor basis and not as an employee. Any personnel performing the Services on behalf of Consultant shall not be employees of City and shall at all times be under Consultant's exclusive direction and control. Neither City, or any of its officials, officers, directors, employees or agents shall have control over the conduct of Consultant or any of Consultants officers, employees or agents, except as set forth in this Agreement. Consultant shall pay all wages, salaries, and other amounts due such personnel in connection with their performance of Services under this Agreement and as required by law. Consultant shall be responsible for all reports and obligations respecting such additional personnel, including, but not limited to: social security taxes, income tax withholding, unemployment insurance, disability insurance, and workers' compensation insurance.

3.3.2 Schedule of Services. Consultant shall perform the Services in a prompt and timely manner and in accordance with the Schedule of Services set forth in Exhibit "B" attached hereto and incorporated herein by reference. Consultant represents that it has the professional and technical personnel required to perform the Services expeditiously. Upon request of City, Consultant shall provide a more detailed schedule of anticipated performance to meet the Schedule of Services.

3.3.3 Conformance to Applicable Requirements. All work prepared by Consultant shall be subject to the approval of City.

3.3.4 Substitution of Key Personnel. Consultant has represented to City that certain key personnel will perform and coordinate the Services under this Agreement. Should one or more of such personnel become unavailable, Consultant may substitute other personnel of at least equal competence upon written approval of City. In the event that City and Consultant cannot agree as to the substitution of key personnel, City shall be entitled to terminate this Agreement for cause. The key personnel for performance of this Agreement are as follows: **Nicole Dragoo, Chief Executive Officer.**

3.3.5 City's Representative. The City hereby designates **Armen Harkalyan, Executive Director of Finance**, or his/her designee, to act as its representative in all matters pertaining to the administration and performance of this Agreement ("City's Representative"). City's Representative shall have the power to act on behalf of the City for review and approval of all products submitted by Consultant but not the authority to enlarge the Scope of Services or change the total compensation due to Consultant under this Agreement. The City Manager shall be authorized to act on City's behalf and to execute all necessary documents which enlarge the Scope of Services or change the Consultant's total compensation subject to the provisions contained in this Agreement. Consultant shall not accept direction or orders from any person other than the City Manager, City's Representative or his/her designee.

3.3.6 Consultant's Representative. Consultant hereby designates **Nicole Dragoo, Chief Executive Officer**, or his/her designee, to act as its representative for the performance of this Agreement ("Consultant's Representative"). Consultant's Representative shall have full authority to represent and act on behalf of the Consultant for all purposes under this Agreement. The Consultant's Representative shall supervise and direct the Services, using his/her best skill

and attention, and shall be responsible for all means, methods, techniques, sequences, and procedures and for the satisfactory coordination of all portions of the Services under this Agreement.

3.3.7 Coordination of Services. Consultant agrees to work closely with City staff in the performance of Services and shall be available to City's staff, consultants and other staff at all reasonable times.

3.3.8 Standard of Care; Performance of Employees. Consultant shall perform all Services under this Agreement in a skillful and competent manner, consistent with the standards generally recognized as being employed by professionals in the same discipline in the State of California. Consultant represents and maintains that it is skilled in the professional calling necessary to perform the Services. Consultant warrants that all employees and subconsultants shall have sufficient skill and experience to perform the Services assigned to them. Consultant represents that it, its employees and subconsultants have all licenses, permits, qualifications and approvals of whatever nature that are legally required to perform the Services, and that such licenses and approvals shall be maintained throughout the term of this Agreement. Consultant shall perform, at its own cost and expense and without reimbursement from the City, any services necessary to correct errors or omissions which are caused by the Consultant's failure to comply with the standard of care provided for herein. Any employee of the Consultant or its subconsultants who is determined by the City to be uncooperative, incompetent, a threat to the adequate or timely completion of the Project, a threat to the safety of persons or property, or any employee who fails or refuses to perform the Services in a manner acceptable to the City, shall be promptly removed from the Project by the Consultant and shall not be re-employed to perform any of the Services or to work on the Project.

3.3.9 Period of Performance.

3.3.9.1 Consultant shall perform and complete all Services under this Agreement within the term set forth in Section 3.1.2 above ("Performance Time"). Consultant shall also perform the Services in strict accordance with any completion schedule or Project milestones described in Exhibits "A" or "B" attached hereto, or which may be separately agreed upon in writing by the City and Consultant ("Performance Milestones"). Consultant agrees that if the Services are not completed within the aforementioned Performance Time and/or pursuant to any such Performance Milestones developed pursuant to provisions of this Agreement, it is understood, acknowledged and agreed that the City will suffer damage.

3.3.9.2 Neither City nor Consultant shall be considered in default of this Agreement for delays in performance caused by circumstances beyond the reasonable control of the non-performing Party. For purposes of this Agreement, such circumstances include a Force Majeure Event. A Force Majeure Event shall mean an event that materially affects a Party's performance and is one or more of the following: (1) Acts of God or other natural disasters; (2) terrorism or other acts of a public enemy; (3) orders of governmental authorities (including, without limitation, unreasonable and unforeseeable delay in the issuance of permits or approvals by governmental authorities that are required for the services); (4) strikes and other organized labor action occurring at the site and the effects thereof on the services, only to the extent such strikes and other organized labor action are beyond the control of Consultant and its subcontractors, and to the extent the effects thereof cannot be avoided by use of replacement workers; and (5) pandemics, epidemics or quarantine restrictions. For purposes of this section, "orders of governmental authorities," includes ordinances, emergency proclamations and orders, rules to

protect the public health, welfare and safety, and other actions of a public agency applicable to the services and Agreement.

3.3.9.3 Should a Force Majeure Event occur, the non-performing Party shall, within a reasonable time of being prevented from performing, give written notice to the other Party describing the circumstances preventing continued performance and the efforts being made to resume performance of this Agreement. Force Majeure Events and/or delays, regardless of the Party responsible for the delay, shall not entitle Consultant to any additional compensation. Notwithstanding the foregoing in this section, the City may still terminate this Agreement in accordance with the termination provisions of this Agreement.

3.3.10 Laws and Regulations; Employee/Labor Certification.

3.3.10.1 Compliance with Laws. Consultant shall keep itself fully informed of and in compliance with all local, state and federal laws, rules and regulations in any manner affecting the performance of the Project or the Services, including all Cal/OSHA requirements, and shall give all notices required by law. Consultant shall be liable for all violations of such laws and regulations in connection with the Services and this Agreement. All violations of such laws and regulations shall be grounds for the City to terminate the Agreement for cause.

3.3.10.2 Employment Eligibility; Consultant. Consultant certifies that it fully complies with all requirements and restrictions of state and federal law respecting the employment of undocumented aliens, including, but not limited to, the Immigration Reform and Control Act of 1986, as may be amended from time to time and shall require all subconsultants and sub-subconsultants to comply with the same. Consultant certifies that it has not committed a violation of any such law within the five (5) years immediately preceding the date of execution of this Agreement, and shall not violate any such law at any time during the term of the Agreement.

3.3.10.3 Equal Opportunity Employment. Consultant represents that it is an equal opportunity employer and it shall not discriminate against any subconsultant, employee or applicant for employment because of race, religion, color, national origin, handicap, ancestry, sex or age. Such non-discrimination shall include, but not be limited to, all activities related to initial employment, upgrading, demotion, transfer, recruitment or recruitment advertising, layoff or termination. Consultant shall also comply with all relevant provisions of City's Minority Business Enterprise program, Affirmative Action Plan or other related programs or guidelines currently in effect or hereinafter enacted.

3.3.10.4 Air Quality. To the extent applicable, Consultant must fully comply with all applicable laws, rules and regulations in furnishing or using equipment and/or providing services, including, but not limited to, emissions limits and permitting requirements imposed by the South Coast Air Quality Management District (SCAQMD) and/or California Air Resources Board (CARB). Consultant shall indemnify City against any fines or penalties imposed by SCAQMD, CARB, or any other governmental or regulatory agency for violations of applicable laws, rules and/or regulations by Consultant, its subconsultants, or others for whom Consultant is responsible under its indemnity obligations provided for in this Agreement.

3.3.10.5 Water Quality Management and Compliance. Consultant shall keep itself and all subcontractors, staff, and employees fully informed of and in compliance with all local, state and federal laws, rules and regulations that may impact, or be implicated by the performance of the Services including, without limitation, all applicable provisions of the City's

ordinances regulating water quality and storm water; the Federal Water Pollution Control Act (33 U.S.C. § 1251, *et seq.*); the California Porter-Cologne Water Quality Control Act (Water Code § 13000 *et seq*.); and any and all regulations, policies, or permits issued pursuant to any such authority. Consultant must additionally comply with the lawful requirements of the City, and any other municipality, drainage district, or other local agency with jurisdiction over the location where the Services are to be conducted, regulating water quality and storm water discharges. City may seek damages from Consultant for delay in completing the Services caused by Consultant's failure to comply with the laws, regulations and policies described in this Section, or any other relevant water quality law, regulation, or policy.

3.3.10.6 Safety. Consultant shall execute and maintain its work so as to avoid injury or damage to any person or property. In carrying out its Services, the Consultant shall at all times be in compliance with all applicable local, state and federal laws, rules and regulations, and shall exercise all necessary precautions for the safety of employees appropriate to the nature of the work and the conditions under which the work is to be performed.

3.3.11 Insurance.

3.3.11.1 Time for Compliance. Consultant shall not commence work under this Agreement until it has provided evidence satisfactory to the City that it has secured all insurance required under this section. In addition, Consultant shall not allow any subconsultant to commence work on any subcontract until it has provided evidence satisfactory to the City that the subconsultant has secured all insurance required under this section. Failure to provide and maintain all required insurance shall be grounds for the City to terminate this Agreement for cause.

3.3.11.2 Types of Insurance Required. As a condition precedent to the effectiveness of this Agreement for work to be performed hereunder, and without limiting the indemnity provisions of the Agreement, the Consultant, in partial performance of its obligations under such Agreement, shall procure and maintain in full force and effect during the term of the Agreement the following policies of insurance. If the existing policies do not meet the insurance requirements set forth herein, Consultant agrees to amend, supplement or endorse the policies to do so.

(A) Commercial General Liability: Commercial General Liability Insurance which affords coverage at least as broad as Insurance Services Office "occurrence" form CG 00 01, or the exact equivalent, with limits of not less than $2,000,000 per occurrence and no less than $4,000,000 in the general aggregate. Defense costs shall be paid in addition to the limits. The policy shall contain no endorsements or provisions (1) limiting coverage for contractual liability; (2) excluding coverage for claims or suits by one insured against another (cross-liability); (3) products/completed operations liability; or (4) containing any other exclusion(s) contrary to the terms or purposes of this Agreement.

(B) Automobile Liability Insurance: Automobile Liability Insurance with coverage at least as broad as Insurance Services Office Form CA 00 01 covering "Any Auto" (Symbol 1), or the exact equivalent, covering bodily injury and property damage for all activities with limits of not less than $2,000,000 combined limit for each occurrence.

(C) Workers' Compensation: Workers' Compensation Insurance, as required by the State of California and Employer's Liability Insurance with a limit of not less than $1,000,000 per accident for bodily injury and disease.

(D) Professional Liability (Errors & Omissions): Professional Liability insurance or Errors & Omissions insurance appropriate to Consultant's profession with limits of not less than $2,000,000. Covered professional services shall specifically include all work to be performed under the Agreement and delete any exclusions that may potentially affect the work to be performed (for example, any exclusions relating to lead, asbestos, pollution, testing, underground storage tanks, laboratory analysis, soil work, etc.). If coverage is written on a claims-made basis, the retroactive date shall precede the effective date of the initial Agreement and continuous coverage will be maintained or an extended reporting period will be exercised for a period of at least five (5) years from termination or expiration of this Agreement.

3.3.11.3 Insurance Endorsements. Required insurance policies shall contain the following provisions, or Consultant shall provide endorsements on forms approved by the City to add the following provisions to the insurance policies:

(A) Commercial General Liability: (1) Additional Insured: The City, its officials, officers, employees, agents, and volunteers shall be additional insureds with regard to liability and defense of suits or claims arising out of the performance of the Agreement. Additional Insured Endorsements shall not (1) be restricted to "ongoing operations"; (2) exclude "contractual liability"; (3) restrict coverage to "sole" liability of Consultant; or (4) contain any other exclusions contrary to the terms or purposes of this Agreement. For all policies of Commercial General Liability insurance, Consultant shall provide endorsements in the form of ISO CG 20 10 10 01 and 20 37 10 01 (or endorsements providing the exact same coverage) to effectuate this requirement. (2) Cancellation: Required insurance policies shall not be canceled or the coverage reduced until a thirty (30) day written notice of cancellation has been served upon the City except ten (10) days shall be allowed for non-payment of premium.

(B) Automobile Liability: (1) Additional Insured: The City, its directors, officials, officers, employees, agents, and volunteers shall be covered as additional insureds with respect to the ownership, operation, maintenance, use, loading or unloading of any auto owned, leased, hired or borrowed by the Vendor or for which the Vendor is responsible. (2) Cancellation: Required insurance policies shall not be canceled or the coverage reduced until a thirty (30) day written notice of cancellation has been served upon the City except ten (10) days shall be allowed for non-payment of premium.

(C) Professional Liability (Errors & Omissions): (1) Cancellation: Required insurance policies shall not be canceled or the coverage reduced until a thirty (30) day written notice of cancellation has been served upon the City except ten (10) days shall be allowed for non-payment of premium. (2) This insurance shall be written on a policy form coverage specifically designed to protect against acts, errors or omissions of the Consultant. "Covered Professional Services" as designated in the policy must specifically include work performed under this Agreement. The policy must "pay on behalf of" the insured and include a provision establishing the insurer's duty to defend.

(D) Workers' Compensation: (1) Cancellation: Required insurance policies shall not be canceled or the coverage reduced until a thirty (30) day written notice of cancellation has been served upon the City except ten (10) days shall be allowed for non-payment of premium. (2) Waiver of Subrogation: A waiver of subrogation stating that the insurer waives all rights of subrogation against the City, its officials, officers, employees, agents, and volunteers.

3.3.11.4 Primary and Non-Contributing Insurance. All policies of Commercial General Liability and Automobile Liability insurance shall be primary and any other insurance, deductible, or self-insurance maintained by the City, its officials, officers, employees, agents, or volunteers shall not contribute with this primary insurance. Policies shall contain or be endorsed to contain such provisions.

3.3.11.5 Waiver of Subrogation. All required insurance coverages, except for the professional liability coverage, shall contain or be endorsed to waiver of subrogation in favor of the City, its officials, officers, employees, agents, and volunteers or shall specifically allow Consultant or others providing insurance evidence in compliance with these specifications to waive their right of recovery prior to a loss. Consultant hereby waives its own right of recovery against City, and shall require similar written express waivers and insurance clauses from each of its subconsultants.

3.3.11.6 Deductibles and Self-Insured Retentions. Any deductible or self-insured retention must be approved in writing by the City and shall protect the City, its officials, officers, employees, agents, and volunteers in the same manner and to the same extent as they would have been protected had the policy or policies not contained a deductible or self-insured retention.

3.3.11.7 Evidence of Insurance. The Consultant, concurrently with the execution of the Agreement, and as a condition precedent to the effectiveness thereof, shall deliver either certified copies of the required policies, or original certificates on forms approved by the City, together with all endorsements affecting each policy. Required insurance policies shall not be in compliance if they include any limiting provision or endorsement that has not been submitted to the City for approval. The certificates and endorsements for each insurance policy shall be signed by a person authorized by that insurer to bind coverage on its behalf. At least fifteen (15 days) prior to the expiration of any such policy, evidence of insurance showing that such insurance coverage has been renewed or extended shall be filed with the City. If such coverage is cancelled or reduced and not replaced immediately so as to avoid a lapse in the required coverage, Consultant shall, within ten (10) days after receipt of written notice of such cancellation or reduction of coverage, file with the City evidence of insurance showing that the required insurance has been reinstated or has been provided through another insurance company or companies.

3.3.11.8 Acceptability of Insurers. Each such policy shall be from a company or companies with a current A.M. Best's rating of no less than A:VII and authorized to transact business of insurance in the State of California, or otherwise allowed to place insurance through surplus line brokers under applicable provisions of the California Insurance Code or any federal law.

3.3.11.9 Enforcement of Agreement Provisions (non estoppel). Consultant acknowledges and agrees that actual or alleged failure on the part of the City to inform Consultant of non-compliance with any requirement imposes no additional obligation on the City nor does it waive any rights hereunder.

3.3.11.10 Requirements Not Limiting. Requirement of specific coverage or minimum limits contained in this Section are not intended as a limitation on coverage, limits, or other requirement, or a waiver of any coverage normally provided by any insurance.

3.3.11.11 Additional Insurance Provisions

(A) The foregoing requirements as to the types and limits of insurance coverage to be maintained by Consultant, and any approval of said insurance by the City, is not intended to and shall not in any manner limit or qualify the liabilities and obligations otherwise assumed by the Consultant pursuant to this Agreement, including but not limited to, the provisions concerning indemnification.

(B) If at any time during the life of the Agreement, any policy of insurance required under this Agreement does not comply with these specifications or is canceled and not replaced, City has the right but not the duty to obtain the insurance it deems necessary and any premium paid by City will be promptly reimbursed by Consultant or City will withhold amounts sufficient to pay premium from Consultant payments. In the alternative, City may cancel this Agreement.

(C) The City may require the Consultant to provide complete copies of all insurance policies in effect for the duration of the Project.

(D) Neither the City nor any of its officials, officers, employees, agents or volunteers shall be personally responsible for any liability arising under or by virtue of this Agreement.

(E) The limits set forth herein shall apply separately to each insured against whom claims are made or suits are brought, except with respect to the limits of liability. Further the limits set forth herein shall not be construed to relieve the Consultant from liability in excess of such coverage, nor shall it limit the Consultant's indemnification obligations to the City and shall not preclude the City from taking such other actions available to the City under other provisions of the Agreement or law.

(F) Consultant shall report to the City, in addition to Consultant's insurer, any and all insurance claims submitted by Consultant in connection with the Services under this Agreement.

3.3.11.12 Insurance for Subconsultants. Consultant shall include all subconsultants engaged in any work for Consultant relating to this Agreement as additional insureds under the Consultant's policies, or the Consultant shall be responsible for causing subconsultants to purchase the appropriate insurance in compliance with the terms of these Insurance Requirements, including adding the City, its officials, officers, employees, agents, and volunteers as additional insureds to the subconsultant's policies. All policies of Commercial General Liability insurance provided by Consultant's subconsultants performing work relating to this Agreement shall be endorsed to name the City, its officials, officers, employees, agents and volunteers as additional insureds using endorsement form ISO CG 20 38 04 13 or an endorsement providing equivalent coverage. Consultant shall not allow any subconsultant to commence work on any subcontract relating to this Agreement until it has received satisfactory evidence of subconsultant's compliance with all insurance requirements under this Agreement, to the extent applicable. The Consultant shall provide satisfactory evidence of compliance with this section upon request of the City.

3.4 Labor Code Requirements.

3.4.1 Prevailing Wages. Consultant is aware of the requirements of California Labor Code Section 1720, et seq., and 1770, et seq., as well as California Code of Regulations, Title 8, Section 16000, et seq., ("Prevailing Wage Laws"), which require the payment of prevailing wage rates and the performance of other requirements on "public works" and "maintenance" projects. If the Services are being performed as part of an applicable "public works" or "maintenance" project, as defined by the Prevailing Wage Laws, and if the total compensation is $1,000 or more, Consultant agrees to fully comply with such Prevailing Wage Laws. City shall provide Consultant with a copy of the prevailing rates of per diem wages in effect at the commencement of this Agreement. Consultant shall make copies of the prevailing rates of per diem wages for each craft, classification or type of worker needed to execute the Services available to interested parties upon request, and shall post copies at the Consultant's principal place of business and at the project site. It is the intent of the parties to effectuate the requirements of sections 1771, 1774, 1775, 1776, 1777.5, 1813, and 1815 of the Labor Code within this Agreement, and Consultant shall therefore comply with such Labor Code sections to the fullest extent required by law. Consultant shall defend, indemnify and hold the City, its officials, officers, employees, agents, and volunteers free and harmless from any claim or liability arising out of any failure or alleged failure to comply with the Prevailing Wage Laws.

3.4.2 Registration/DIR Compliance. If the Services are being performed on a public works project of over $25,000 when the project is for construction, alteration, demolition, installation, or repair work, or a public works project of over $15,000 when the project is for maintenance work, in addition to the foregoing, then pursuant to Labor Code sections 1725.5 and 1771.1, the Consultant and all subconsultants must be registered with the Department of Industrial Relations (“DIR”). Consultant shall maintain registration for the duration of the Project and require the same of any subconsultants.

3.4.3 Compliance Monitoring. This Project may also be subject to compliance monitoring and enforcement by the DIR. It shall be Consultant’s sole responsibility to comply with all applicable registration and labor compliance requirements, including the submission of payroll records directly to the DIR. Any stop orders issued by the DIR against Consultant or any subconsultant that affect Consultant’s performance of services, including any delay, shall be Consultant’s sole responsibility. Any delay arising out of or resulting from such stop orders shall be considered Consultant caused delay and shall not be compensable by the City. Consultant shall defend, indemnify and hold the City, its officials, officers, employees and agents free and harmless from any claim or liability arising out of stop orders issued by the DIR against Consultant or any subconsultant.

3.4.4 Labor Certification. By its signature hereunder, Consultant certifies that it is aware of the provisions of Section 3700 of the California Labor Code which require every employer to be insured against liability for Worker's Compensation or to undertake self-insurance in accordance with the provisions of that Code, and agrees to comply with such provisions before commencing the performance of the Services.

3.5 Termination of Agreement.

3.5.1.1 Grounds for Termination. City may, by written notice to Consultant, terminate the whole or any part of this Agreement at any time and without cause by giving written notice to Consultant of such termination, and specifying the effective date thereof,

at least seven (7) days before the effective date of such termination. Upon termination, Consultant shall be compensated only for those Services which have been adequately rendered to City, and Consultant shall be entitled to no further compensation. Consultant may not terminate this Agreement except for cause. The rights and remedies of the City provided in this section shall not be exclusive and are in addition to any other rights and remedies provided by law, equity or under this Agreement.

3.5.1.2 Effect of Termination. If this Agreement is terminated as provided herein, City may require Consultant to provide all finished or unfinished Documents and Data and other information of any kind prepared by Consultant in connection with the performance of Services under this Agreement. Consultant shall be required to provide such document and other information within fifteen (15) days of the request.

3.5.1.3 Additional Services. In the event this Agreement is terminated in whole or in part as provided herein, City may procure, upon such terms and in such manner as it may determine appropriate, services similar to those terminated.

3.6 Indemnification.

3.6.1 To the fullest extent permitted by law, Consultant shall defend (with counsel of City's choosing), indemnify and hold the City, its officials, officers, employees, volunteers, and agents free and harmless from any and all claims, demands, causes of action, costs, expenses, liability, loss, damage or injury of any kind, in law or equity, to property or persons, including wrongful death, in any manner arising out of, pertaining to, or incident to any acts, errors or omissions, or willful misconduct of Consultant, its officials, officers, employees, subcontractors, consultants or agents in connection with the performance of the Consultant's Services, the Project or this Agreement, including without limitation the payment of all damages, expert witness fees and attorney's fees and other related costs and expenses except such loss or damage caused by the sole negligence or willful misconduct of the City. Consultant's obligation to indemnify shall survive expiration or termination of this Agreement and shall not be restricted to insurance proceeds, if any, received by Consultant, the City, its officials, officers, employees, agents, or volunteers.

3.6.2 If Consultant's obligation to defend, indemnify, and/or hold harmless arises out of Consultant's performance as a "design professional" (as that term is defined under Civil Code section 2782.8), then, and only to the extent required by Civil Code section 2782.8, which is fully incorporated herein, Consultant's indemnification obligation shall be limited to claims that arise out of, pertain to, or relate to the negligence, recklessness, or willful misconduct of the Consultant, and, upon Consultant obtaining a final adjudication by a court of competent jurisdiction, Consultant's liability for such claim, including the cost to defend, shall not exceed the Consultant's proportionate percentage of fault.

3.7 General Provisions.

3.7.1 Accounting Records. Consultant shall maintain complete and accurate records with respect to all costs and expenses incurred under this Agreement. All such records shall be clearly identifiable. Consultant shall allow a representative of City during normal business hours to examine, audit, and make transcripts or copies of such records and any other documents created pursuant to this Agreement. Consultant shall allow inspection of all work, data, documents, proceedings, and activities related to the Agreement for a period of three (3) years

from the date of final payment under this Agreement.

3.7.2 Independent Contractors and Subcontracting.

3.7.2.1 Use of Consultants. Consultant is aware of statutory and case law regarding classification of workers as independent contractors, including California Labor Code Section 2750.3 and Dynamex Operations West, Inc. v. Superior Court, 4 Cal. 5th 903 (2018). To ensure that Consultant is in compliance with the California Labor Code, Consultant shall only utilize its employees to provide the Services. Consultant may not provide the services through any independent contractor, subcontractor or subconsultant ("Subcontractor(s)") unless approved by the City as set forth in Section 3.7.2.2 below. Consultant represents and warrants that all personnel who perform the Services on Consultant's behalf are Consultant's employees, and that Consultant complies with all applicable laws, rules and regulations governing its employees, including, but not limited to, the California Labor Code, Unemployment Insurance Code and all applicable Industrial Welfare Commission Wage Orders.

3.7.2.2 Prior Approval Required. Consultant shall not use any Subcontractor to provide the Services, or any portion of the work required by this Agreement, without prior written approval of City. In the event that City authorizes Consultant to use a Subcontractor, Consultant shall enter into a written agreement with the Subcontractor, which must include all provisions of the Agreement, including a restriction on the Subcontractor's use of further independent contractors, subcontractors or subconsultants without the City's prior written consent.

3.7.3 Delivery of Notices. All notices permitted or required under this Agreement shall be given to the respective parties at the following address, or at such other address as the respective parties may provide in writing for this purpose:

Consultant:

Chandler Asset Management, Inc
9255 Towne Centre Drive, Suite 600
San Diego, CA 92121
ATTN: Nicole Dragoo, Chief Executive Officer

City:

City of Ontario
303 East "B" Street
Ontario, CA 91764
ATTN: Armen Harkalyan, Executive Director of Finance

Such notice shall be deemed made when personally delivered or when mailed, forty-eight (48) hours after deposit in the U.S. Mail, first class postage prepaid and addressed to the party at its applicable address. Actual notice shall be deemed adequate notice on the date actual notice occurred, regardless of the method of service.

3.7.4 Ownership of Materials and Confidentiality.

3.7.4.1 Documents & Data; Licensing of Intellectual Property. This Agreement creates a non-exclusive and perpetual license for City to copy, use, modify, reuse, or sublicense any and all copyrights, designs, and other intellectual property embodied in plans, specifications, studies, drawings, estimates, and other documents or works of authorship fixed in any tangible medium of expression, including but not limited to, physical drawings or data magnetically or otherwise recorded on computer diskettes, which are prepared or caused to be prepared by Consultant under this Agreement ("Documents & Data"). All Documents & Data shall be and remain the property of City, and shall not be used in whole or in substantial part by Consultant on other projects without the City's express written permission. Within thirty (30) days following the completion, suspension, abandonment or termination of this Agreement, Consultant shall provide to City reproducible copies of all Documents & Data, in a form and amount required by City. City reserves the right to select the method of document reproduction and to establish where the reproduction will be accomplished. The reproduction expense shall be borne by City at the actual cost of duplication. In the event of a dispute regarding the amount of compensation to which the Consultant is entitled under the termination provisions of this Agreement, Consultant shall provide all Documents & Data to City upon payment of the undisputed amount. Consultant shall have no right to retain or fail to provide to City any such documents pending resolution of the dispute. In addition, Consultant shall retain copies of all Documents & Data on file for a minimum of fifteen (15) years following completion of the Project, and shall make copies available to City upon the payment of actual reasonable duplication costs. Before destroying the Documents & Data following this retention period, Consultant shall make a reasonable effort to notify City and provide City with the opportunity to obtain the documents.

3.7.4.2 Subconsultants. Consultant shall require all subconsultants to agree in writing that City is granted a non-exclusive and perpetual license for any Documents & Data the subconsultant prepares under this Agreement. Consultant represents and warrants that Consultant has the legal right to license any and all Documents & Data. Consultant makes no such representation and warranty in regard to Documents & Data which were prepared by design professionals other than Consultant or its subconsultants, or those provided to Consultant by the City.

3.7.4.3 Right to Use. City shall not be limited in any way in its use or reuse of the Documents and Data or any part of them at any time for purposes of this Project or another project, provided that any such use not within the purposes intended by this Agreement or on a project other than this Project without employing the services of Consultant shall be at City's sole risk. If City uses or reuses the Documents & Data on any project other than this Project, it shall remove the Consultant's seal from the Documents & Data and indemnify and hold harmless Consultant and its officers, directors, agents and employees from claims arising out of the negligent use or re-use of the Documents & Data on such other project. Consultant shall be responsible and liable for its Documents & Data, pursuant to the terms of this Agreement, only with respect to the condition of the Documents & Data at the time they are provided to the City upon completion, suspension, abandonment or termination. Consultant shall not be responsible or liable for any revisions to the Documents & Data made by any party other than Consultant, a party for whom the Consultant is legally responsible or liable, or anyone approved by the Consultant.

3.7.4.4 Indemnification. Consultant shall defend, indemnify and hold the City, its directors, officials, officers, employees, volunteers and agents free and harmless,

pursuant to the indemnification provisions of this Agreement, for any alleged infringement of any patent, copyright, trade secret, trade name, trademark, or any other proprietary right of any person or entity in consequence of the use on the Project by City of the Documents & Data, including any method, process, product, or concept specified or depicted.

3.7.4.5 Confidentiality. All ideas, memoranda, specifications, plans, procedures, drawings, descriptions, computer program data, input record data, written information, and other Documents & Data either created by or provided to Consultant in connection with the performance of this Agreement shall be held confidential by Consultant. Such materials shall not, without the prior written consent of City, be used by Consultant for any purposes other than the performance of the Services. Nor shall such materials be disclosed to any person or entity not connected with the performance of the Services or the Project. Nothing furnished to Consultant which is otherwise known to Consultant or is generally known, or has become known, to the related industry shall be deemed confidential. Consultant shall not use City's name or insignia, photographs of the Project, or any publicity pertaining to the Services or the Project in any magazine, trade paper, newspaper, television or radio production or other similar medium without the prior written consent of City.

3.7.4.6 Confidential Information. The City shall refrain from releasing Consultant's proprietary information ("Proprietary Information") unless the City's legal counsel determines that the release of the Proprietary Information is required by the California Public Records Act or other applicable state or federal law, or order of a court of competent jurisdiction, in which case the City shall notify Consultant of its intention to release Proprietary Information. Consultant shall have five (5) working days after receipt of the release notice to give City written notice of Consultant's objection to the City's release of Proprietary Information. Consultant shall indemnify, defend and hold harmless the City, and its officers, directors, employees, and agents from and against all liability, loss, cost or expense (including attorney's fees) arising out of a legal action brought to compel the release of Proprietary Information. City shall not release the Proprietary Information after receipt of an objection notice unless either: (1) Consultant fails to fully indemnify, defend (with City's choice of legal counsel), and hold City harmless from any legal action brought to compel such release; and/or (2) a final and non-appealable order by a court of competent jurisdiction requires that City release such information.

3.7.5 Cooperation; Further Acts. The Parties shall fully cooperate with one another, and shall take any additional acts or sign any additional documents as may be necessary, appropriate or convenient to attain the purposes of this Agreement.

3.7.6 Entire Agreement. This Agreement contains the entire agreement of the Parties with respect to the subject matter hereof, and supersedes all prior negotiations, understandings or agreements.

3.7.7 Attorneys' Fees. If either party commences an action against the other party, either legal, administrative or otherwise, arising out of or in connection with this Agreement, the prevailing party in such litigation shall be entitled to have and recover from the losing party reasonable attorneys' fees and all costs of such action.

3.7.8 Governing Law. This Agreement shall be governed by the laws of the State of California. Venue shall be in San Bernardino County. In addition to any and all contract requirements pertaining to notices of and requests for compensation or payment for extra work, disputed work, claims and/or changed conditions, Consultant must comply with the claim

procedures set forth in Government Code sections 900 et seq. prior to filing any lawsuit against the City. Such Government Code claims and any subsequent lawsuit based upon the Government Code claims shall be limited to those matters that remain unresolved after all procedures pertaining to extra work, disputed work, claims, and/or changed conditions have been followed by Consultant. If no such Government Code claim is submitted, or if any prerequisite contractual requirements are not otherwise satisfied as specified herein, Consultant shall be barred from bringing and maintaining a valid lawsuit against the City.

3.7.9 Time of Essence. Time is of the essence for each and every provision of this Agreement.

3.7.10 City's Right to Employ Other Consultants. City reserves right to employ other consultants in connection with this Project.

3.7.11 Successors and Assigns. This Agreement shall be binding on the successors and assigns of the parties.

3.7.12 Assignment or Transfer. Consultant shall not assign, sublet, or transfer this Agreement or any rights under or interest in this Agreement without the written consent of the City, which may be withheld for any reason. Any attempt to so assign or so transfer without such consent shall be void and without legal effect and shall constitute grounds for termination. Consultant shall not subcontract any portion of the Services required by this Agreement, except as expressly stated herein, without prior written approval of City. Subcontracts, if any, shall contain a provision making them subject to all provisions stipulated in this Agreement.

3.7.13 Construction; References; Captions. Since the Parties or their agents have participated fully in the preparation of this Agreement, the language of this Agreement shall be construed simply, according to its fair meaning, and not strictly for or against any Party. Any term referencing time, days or period for performance shall be deemed calendar days and not work days. All references to Consultant include all personnel, employees, agents, and subconsultants of Consultant, except as otherwise specified in this Agreement. All references to City include its elected officials, officers, employees, agents, and volunteers except as otherwise specified in this Agreement. The captions of the various articles and paragraphs are for convenience and ease of reference only, and do not define, limit, augment, or describe the scope, content, or intent of this Agreement.

3.7.14 Amendment; Modification. No supplement, modification, or amendment of this Agreement shall be binding unless executed in writing and signed by both Parties.

3.7.15 Waiver. No waiver of any default shall constitute a waiver of any other default or breach, whether of the same or other covenant or condition. No waiver, benefit, privilege, or service voluntarily given or performed by a Party shall give the other Party any contractual rights by custom, estoppel, or otherwise.

3.7.16 No Third-Party Beneficiaries. There are no intended third party beneficiaries of any right or obligation assumed by the Parties.

3.7.17 Invalidity; Severability. If any portion of this Agreement is declared invalid, illegal, or otherwise unenforceable by a court of competent jurisdiction, the remaining provisions shall continue in full force and effect.

3.7.18 Prohibited Interests. Consultant maintains and warrants that it has not employed nor retained any company or person, other than a bona fide employee working solely for Consultant, to solicit or secure this Agreement. Consultant warrants that it has not paid nor has it agreed to pay any company or person, other than a bona fide employee working solely for Consultant, any fee, commission, percentage, brokerage fee, gift or other consideration contingent upon or resulting from the award or making of this Agreement. Consultant further agrees to file, or shall cause its employees or subconsultants to file, a Statement of Economic Interest with the City's Filing Officer as required under state law in the performance of the Services. For breach or violation of this warranty, City shall have the right to rescind this Agreement without liability. For the term of this Agreement, no member, officer or employee of City, during the term of his or her service with City, shall have any direct interest in this Agreement, or obtain any present or anticipated material benefit arising therefrom.

3.7.19 Authority to Enter Agreement. Consultant has all requisite power and authority to conduct its business and to execute, deliver, and perform the Agreement. Each Party warrants that the individuals who have signed this Agreement have the legal power, right, and authority to make this Agreement and bind each respective Party.

3.7.20 Counterparts. This Agreement may be signed in counterparts, each of which shall constitute an original.

3.7.21 Survival. All rights and obligations hereunder that by their nature are to continue after any expiration or termination of this Agreement, including, but not limited to, the indemnification obligations, shall survive any such expiration or termination.

EXHIBIT "A"
SCOPE OF SERVICES

Chandler Asset Management is pleased to offer the City of Ontario the following services:

1. Actively manage the City's investment portfolio pursuant to specific, stated investment objectives in a non-discretionary manner. Place all orders for the purchase and sale of securities. Execute all approved trades through competitive bidding processes when possible.

2. Develop and implement an investment strategy that will maintain or enhance portfolio quality and performance within the parameters of the City's Investment Policy and cash flow requirements.

3. Ensure portfolio compliance with applicable laws and the City's Investment Policy including ordinances and resolutions relating to the investment of public funds.

4. Provide the City with investment reports that shall include, but not be limited to the following:

a. Monthly statements with all the information required by the California Government Code and Governmental Accounting Standards Board (GASB). These reports must include, but not limited to: detailed portfolio holdings including a complete description of the portfolio, the type of investments, the issuers, purchase price, accrued interest, amortized cost, market and book values, purchase date, maturity date, next upcoming potential call date, assigned security ratings by a nationally recognized statistical rating organization (NRSRA), principal and interest payments, effective earnings rate, yield to maturity, days to maturity, and portfolio summary statistics.

b. Quarterly investment reports including a description of market conditions, investment strategies employed, performance, and suggested changes to investment strategy.

5. Perform broker/dealer due diligence and maintain relations with the broker/dealer community.

6. Continually monitor market conditions and report on any recommended changes to policies, strategies, and specific positions.

7. Annually, or as needed, review the City's Investment Policy and provide recommended changes per California Government Code or to incorporate best practices as provided by relevant statewide and national organizations.

8. Attending Quarterly Investment Advisory meetings to present investment performance and market conditions. Attend City Council or ad-hoc meetings on an as needed basis.

9. Serve as a general resource to the City's staff for information, advice, and training regarding fixed-income investments. Communicate as necessary with City staff to understand the City's investment operations.

EXHIBIT "B"
SCHEDULE OF SERVICES

Implementation Tasks

Investment Program Implementation from Notice of Award – Timing dependent on contracting process

SUBJECT: **AN ORDINANCE APPROVING FILE NO. PUD23-004, A PLANNED UNIT DEVELOPMENT FOR 21.58 ACRES OF LAND GENERALLY LOCATED SOUTH OF E STREET, NORTH OF HOLT BOULEVARD, WEST OF EUCLID AVENUE, EAST OF PALM AVENUE AND THE NORTHERN PORTION OF THE BLOCK BETWEEN FERN AND PALM AVENUES AND C AND D STREETS**

RECOMMENDATION: That the City Council consider and adopt an Ordinance approving File No. PUD23-004, the Downtown West Planned Unit Development (PUD), to establish a set of planning and design principles, development regulations and performance standards to govern future development of 21.58 acres, generally located south of E Street, north of Holt Boulevard, west of Euclid Avenue, east of Palm Avenue and the northern portion of the block between Fern and Palm Avenues and C and D Streets, within the LUA-1 (Euclid Avenue Entertainment) of the MU-1 (Downtown Mixed Use) zoning district.

THE FOLLOWING COUNCIL GOALS ARE BEING ACHIEVED:
Invest in the Growth and Evolution of the City's Economy
Operate in a Businesslike Manner
Focus Resources in Ontario's Commercial and Residential Neighborhoods

FISCAL IMPACT: There is not a direct fiscal impact associated with this action. Implementation of the Planned Unit Development would result in an increase in property taxes from future development and the one-time payment to the City for plan check fees and development impacts fees.

BACKGROUND & ANALYSIS: On July 16, 2024, the City Council introduced and waived further reading of an Ordinance for File No. PUD23-004. The City has initiated a PUD to facilitate the revitalization of downtown Ontario, streamline development, encourage historic preservation and adaptive reuse, and provide development flexibility to achieve the City's goals to economically revitalize and aesthetically enhance the Project area. The MU-1 (Downtown Mixed-Use) zoning district requires the preparation and approval of a PUD to establish a set of planning and design principles, development regulations and performance standards to govern future development. The proposed Downtown West Planned Unit Development is appended to the attached Ordinance as "Attachment A." The Project area is envisioned as a district with a mixture of retail, office, and

residential uses in a pedestrian friendly atmosphere, with the most intensive uses envisioned along Euclid Avenue and Holt Boulevard. A maximum intensity of 2.0 Floor Area Ratio and a density range of 25.0 to 75.0 dwelling units per acre is allowed as provided by the MU-1 (Downtown Mixed-Use) zoning district.

The District and Block Plans of the PUD establishes three land use subdistricts and includes context sensitive development standards that are specific to each block and location. The Downtown Mixed-Use Retail Core (MU-RC) zone is comprised of four City blocks (Blocks A through D) that front onto Euclid Avenue from Holt Boulevard to D Street and is envisioned as an 18-hour entertainment, shopping, and dining destination. Holt Boulevard, a future multi-modal corridor, is envisioned as the primary east-west connection from the Ontario International Airport/Hospitality district to the downtown. The goals of the MU-RC zone are to enable a mixture of commercial uses with strategic multiple-family residential infill development to activate storefronts to generate pedestrian foot traffic, create an enhanced, vibrant, and active public realm and streetscape along Euclid Avenue, create mid-block connections along Euclid Avenue to increase walkability and activity where public art and outdoor dining are encouraged, and to transform the north-south running public alley into a pedestrian-friendly enhanced connection with entrances, outdoor dining, and "greening" (landscape and enhanced paving) that collectively creates a lively and dynamic atmosphere.

The Downtown Mixed-Use Transitional (MU-T) zone is comprised of 4 City blocks (Blocks E thru H), bordered by Laurel Avenue to the east, Palm Avenue to the west, D Street to the north and Holt Boulevard to the south and is envisioned to enable a mix of commercial uses, multiple-family residential housing types, and mixed-use development. The goals of the MU-T zone are to support development flexibility by allowing variations in building heights to respond to the surrounding context, identifying B Street as an extension of Euclid Avenue as a more walkable retail "Main Street" atmosphere, enhancing the public realm with decorative crosswalks, "bulb out" curb extensions, public art, bicycle infrastructure, and introducing new "placemaking" elements such as suspended lighting and parklets.

The Downtown Residential (DR) zone is a half city block (Block I) located west of Palm Avenue, east of Fern Avenue, south of D Street and north of the public alley. The primary goal of the DR zone is to ensure compatible housing types with the existing surrounding residential neighborhood and create an appropriate transition of land uses and building scale.

COMMUNITY MEETINGS: Community and stakeholder engagement for the PUD included three rounds of community outreach conducted through in-person pop-up events as part of existing community events, two rounds of targeted stakeholder conversations via roundtable sessions and one in-person showcase. The community and participants displayed overall support for the vision and goals, highlighting the unique character of Ontario's historic downtown. In addition, they advocated for mobility options to promote accessibility, active transportation infrastructure for safer connections, and public realm enhancements.

PLANNING COMMISSION REVIEW AND ACTION: On May 28, 2024, the Planning Commission conducted a public hearing to consider the proposed PUD. Upon conclusion of the public hearing, the Planning Commission voted unanimously (5-0) to approve Resolution No. PC24-015, recommending the City Council approve the proposed PUD.

COMPLIANCE WITH THE ONTARIO PLAN: The proposed Project is consistent with the principles, goals and policies contained within the Vision, Governance, Policy Plan (General Plan), and City Council Priorities components of TOP. Goals and policies of TOP that are furthered by the proposed PUD are addressed in the attached Planning Commission backup material.

AIRPORT LAND USE COMPATIBILITY PLAN (ALUCP) COMPLIANCE: The California State Aeronautics Act (Public Utilities Code Section 21670 et seq.) requires that an Airport Land Use Compatibility Plan be prepared for all public use airports in the State; and requires that local land use plans and individual development proposals must be consistent with the policies set forth in the adopted Airport Land Use Compatibility Plan. On April 19, 2011, the City Council of the City of Ontario approved and adopted the Ontario International Airport Land Use Compatibility Plan ("ONT ALUCP"), establishing the Airport Influence Area for Ontario International Airport, which encompasses lands within parts of San Bernardino, Riverside, and Los Angeles Counties, and limits future land uses and development within the Airport Influence Area, as they relate to noise, safety, airspace protection, and overflight impacts of current and future airport activity. Staff has reviewed and considered the facts and information contained in the Application and supporting documentation against the ONT ALUCP compatibility factors, including [1] Safety Criteria (ONT ALUCP Table 2-2) and Safety Zones (ONT ALUCP Map 2-2), [2] Noise Criteria (ONT ALUCP Table 2-3) and Noise Impact Zones (ONT ALUCP Map 2-3), [3] Airspace protection Zones (ONT ALUCP Map 2-4), and [4] Overflight Notification Zones (ONT ALUCP Map 2-5). As a result, staff has concluded that the proposed PUD is consistent with the policies and criteria set forth within the ONT ALUCP.

ENVIRONMENTAL REVIEW: The proposed PUD is a “project” pursuant to the California Environmental Quality Act (Public Resources Code Section 21000 et seq.) ("CEQA") and an initial study has been prepared to determine possible environmental impacts. On the basis of the initial study, which indicated that all potential environmental impacts from the Project were less than significant or could be mitigated to a level of insignificance, a Mitigated Negative Declaration was prepared pursuant to CEQA, the State CEQA Guidelines and the City of Ontario Local CEQA Guidelines. Furthermore, to ensure that the mitigation measures are implemented, a Mitigation Monitoring and Reporting Program has been prepared for the Project pursuant to CEQA Guidelines Section 15097, which specifies responsible agencies/departments, monitoring frequency, timing and method of verification and possible sanctions for non-compliance with mitigation measures. The environmental documentation for this Project is available for review at the Planning Department.

ORDINANCE NO. _____

AN ORDINANCE OF THE CITY COUNCIL OF THE CITY OF ONTARIO, CALIFORNIA, APPROVING FILE NO. PUD23-004, A PLANNED UNIT DEVELOPMENT TO ESTABLISH PLANNING AND DESIGN PRINCIPLES, DEVELOPMENT REGULATIONS AND PERFORMANCE STANDARDS TO GOVERN FUTURE DEVELOPMENT OF 21.58 ACRES OF LAND, GENERALLY LOCATED SOUTH OF E STREET, NORTH OF HOLT BOULEVARD, WEST OF EUCLID AVENUE, EAST OF PALM AVENUE, AND THE NORTHERN PORTION OF THE BLOCK BETWEEN FERN AND PALM AVENUES AND C AND D STREETS, WITHIN THE LUA-1 (EUCLID AVENUE ENTERTAINMENT) OF THE MU-1 (DOWNTOWN MIXED USE) ZONING DISTRICT, AND MAKING FINDINGS IN SUPPORT THEREOF—APNS: 1048-566-08, 1048-566-09, 1048-566-10, 1048-566-02, 1048-566-01, 1048-566-03, 1048-566-04, 1048-566-06, 1048-566-07, 1048-561-07, 1048-561-08, 1048-561-09, 1048-561-10, 1048-561-12, 1048-561-13, 1048-562-01, 1048-562-02, 1048-565-01, 1048-565-04, 1048-565-05, 1048-565-06, 1048-566-06, 1048-566-07, 1048-354-04, 1048-354-05, 1048-354-06, 1048-354-07, 1048-354-08, 1048-353-13, 1048-353-14, 1048-354-01, 1048-354-02, 1048-354-03, 1048-565-14, 1048-566-05, 1048-566-11, 1048-561-11, 1048-562-03, 1048-562-06, 1048-562-07, 1048-563-01, 1048-563-02, 1048-563-03, 1048-563-04, 1048-563-05, 1048-576-01, 1048-576-02, 1048-563-07, 1048-563-08, 1048-564-07, 1048-564-11, 1048-564-12, 1048-564-13, 1048-564-14, 1048-565-02, 1048-565-03, 1048-563-06, 1048-563-07, 1048-563-08, 1048-563-09, 1048-563-10, 1048-565-07, 1048-565-08, 1048-565-09, 1048-565-10, 1048-565-11, 1048-565-12, 1048-565-13, 1048-563-11, 1048-564-01, 1048-564-02, 1048-564-03, 1048-564-04, 1048-564-05, 1048-564-06, 1048-564-08, 1048-564-09, 1048-564-10.

WHEREAS, the City of Ontario ("Applicant") has initiated approval of a Planned Unit Development (PUD), File No. PUD23-004, as described in the title of this Resolution (hereinafter referred to as "Application" or "Project"); and

WHEREAS, the Application applies to 21.58 acres of land (8.5 City Blocks) generally located south of E Street, north of Holt Boulevard, west of Euclid Avenue, east of Palm Avenue, and the northern portion of the block between Fern and Palm Avenues and C and D Streets within the LUA-1 (Euclid Avenue Entertainment) of the MU-1 (Downtown Mixed Use) zoning district, and is presently improved with a mixture of retail, residential, and office land uses and paved surface parking lots; and

WHEREAS, the properties to the north of the Project site is within the OL (Office Low Intensity) and MU-1(Mixed Use Downtown) zoning districts and is developed with office, retail and residential uses. The properties to the east and south are within the MU-1 (Mixed Use Downtown) zoning district which are developed with office, retail and

residential. The properties to the west are located within the MDR-11 (Medium Density Residential) HDR-45 (High Density Residential) and are developed with a school, church, and multiple-family and single family residential; and

WHEREAS, an existing bus stop is located on the northeast corner of Euclid Avenue and D Street for Omnitrans Route 83. Additionally, located near Euclid Avenue on Holt Boulevard is Omnitrans Route 61 which has been identified as the future West Valley Connector Bus Rapid Transit (BRT); and

WHEREAS, the purpose of the PUD is to facilitate the revitalization of downtown Ontario, streamline development, encourage historic preservation and adaptive reuse, and provide development flexibility to achieve the City's goals to economically revitalize and aesthetically enhance the Project area; and

WHEREAS, the PUD includes components that regulate land use, urban design, development and design standards for new (infill) construction, redevelopment of underutilized sites, and adaptive reuse of historic and existing buildings, architectural character and design and historic preservation; and

WHEREAS, the LUA-1/MU-1 (Downtown Mixed Use) zoning district is envisioned as an intensive vertical and horizontal district with a mixture of retail, office, and residential uses in a pedestrian friendly atmosphere, with the most intensive uses envisioned along Euclid and Holt Avenues. Consistent with the LUA-1/MU-1 zoning district and TOP Downtown District Place Type, the Downtown West PUD grants a maximum intensity of 2.0 Floor Area Ratio and a density range of 25.0 to 75.0 dwelling units per acre; and

WHEREAS, the PUD establishes the Downtown Mixed-Use Retail Core (MU-RC) zone that is comprised of 4 city blocks (Blocks A-D) that front onto Euclid Avenue from Holt Boulevard to D Street and is envisioned as an 18-hour entertainment, shopping, and dining destination, whereas Holt Boulevard, a future multi-modal corridor, is envisioned as the primary west-east connection from the Ontario International Airport/Hospitality district to the downtown; and

WHEREAS, the goals of the MU-RC zone are to enable a mixture of commercial uses with strategic multiple-family residential infill development, activate storefronts to generate pedestrian foot traffic, such as retail, restaurant, and entertainment, as well as design treatments that support a lively and comfortable public realm, create an enhanced, vibrant, and active public realm and streetscape along Euclid Avenue, create mid-block connections along Euclid Avenue to increase walkability and activity where public art and outdoor dining is encouraged, and to transform the north-south running public alley into a pedestrian-friendly enhanced alley with entrances, outdoor dining, and "greening" (landscape and enhanced paving) that collectively creates a lively and dynamic atmosphere; and

WHEREAS, the Downtown Mixed-Use Transitional (MU-T) zone is comprised of 4 city blocks (Blocks E- H), bordered by Laurel Avenue to the east, Palm Avenue to the

west, D street to the north and Holt Boulevard to the south and is envisioned to enable a mix of commercial uses, a variety of multiple-family residential housing types, and mixed use development; and

WHEREAS, the goals of the MU-T zone is to support development flexibility with allowing a variation of building heights to respond to the surrounding context, identifying B street as an extension of Euclid Avenue as a more walkable retail "Main Street" atmosphere, enhancing the public realm with decorative crosswalks, "bulb out" curb extensions, public art, bicycle infrastructure, and introducing new "placemaking" elements such as suspended lighting and parklets; and

WHEREAS, the Downtown Residential (DR) zone is a half city block (Block I) located west of Palm Avenue, east of Fern Avenue, south of D street and north of the public alley. The primary goal of the DR zone to ensure compatible housing types with the surrounding residential; and

WHEREAS, the PUD includes Block-specific standards created to respond to place-based conditions and goals which include allowable range of building heights of 40 feet (3 stories) to 65 feet (5 stories), 0 to 10 feet of building setbacks, 10 and 15 feet of stepbacks for upper level additions to existing buildings at certain locations, and parking requirements; and

WHEREAS, the PUD requires a minimum of 1 resident parking space per bedroom, 0.20 guest parking per dwelling unit, and 1 parking space per 250 square feet of Gross Floor Area of commercial; and

WHEREAS, in order to achieve the preferred density and building intensities, the PUD allows for a combination of on-site and on-street parking to provide an adequate parking supply to meet the anticipated parking demand for the Project. All resident parking is provided on site, while guest parking and retail visitor spaces are allowed on-street; and

WHEREAS, the PUD includes architectural design standards and guidelines, specific to the downtown location and variety of building types, and establishes the following design principles:

(a) Create an architectural character that reflects the various styles within the historic downtown. New buildings should appear to fit in contextually with existing historic buildings by using similar proportions, articulation, building details and building material.

(b) The overall character should feel like a modern interpretation of a traditional American small town.

(c) Create compatibility between the mixed-use, residential and commercial architecture within the downtown area; the introduction of unifying elements

such as similar materials and colors should be considered; however, “sameness” is discouraged; and

WHEREAS, the PUD requires a Certificate of Appropriateness, in conjunction with a Development Plan, in order to safeguard identified historic resources listed on the Ontario Register of Historic Places and any unknown historic resources yet to be discovered; and

WHEREAS, the PUD relies upon the Secretary of Interior Standards, for the Treatment of Historic Properties, the Ontario Development Code (Certified Local Government), Ontario Downtown Design Guidelines, and best practices for preservation to guide appropriate design for new (infill) construction, redevelopment of underutilized sites, and adaptive reuse of historic and existing buildings; and

WHEREAS, the Application is a project pursuant to the California Environmental Quality Act (Public Resources Code Section 21000 et seq.) ("CEQA") and an initial study has been prepared to determine possible environmental impacts; and

WHEREAS, on the basis of the initial study, which indicated that all potential environmental impacts from the Project were less than significant or could be mitigated to a level of insignificance, an Initial Study/Mitigated Negative Declaration and Mitigation Monitoring and Reporting Program were prepared pursuant to CEQA, the State CEQA Guidelines and the City of Ontario Local CEQA Guidelines; and

WHEREAS, the MND was made available to the public and to all interested agencies for review and comment pursuant to CEQA, the State CEQA Guidelines and the City of Ontario Local CEQA Guidelines; and

WHEREAS, Ontario Development Code Table 2.02-1 (Review Matrix) grants the City Council the responsibility and authority to review and act on the subject Application; and

WHEREAS, the Project is located within the Airport Influence Area of Ontario International Airport ("ONT"), which encompasses lands within parts of San Bernardino, Riverside, and Los Angeles Counties, and is subject to, and must be consistent with, the policies and criteria set forth in the Ontario International Airport Land Use Compatibility Plan (ALUCP), which applies only to jurisdictions within San Bernardino County, and addresses the noise, safety, airspace protection, and overflight impacts of current and future airport activity; and

WHEREAS, City of Ontario Development Code Division 2.03 (Public Hearings) prescribes the manner in which public notification shall be provided and hearing procedures to be followed, and all such notifications and procedures have been completed; and

WHEREAS, on May 28, 2024, the Planning Commission of the City of Ontario conducted a hearing to consider the MND, MMRP, and the Project, and concluded said hearing on that date, voting to issue Resolution No. PC24-015 recommending the City Council approve the Application; and

WHEREAS, on July 2, 2024, the City Council of the City of Ontario conducted a hearing to consider the MND, MMRP, and the Project, and concluded said hearing on that date and continued the item to the July 16, 2024, City Council meeting; and

WHEREAS, as the first action on the Project, on July 16, 2024, the City Council approved a resolution adopting MND and MMRP prepared pursuant to CEQA, the State CEQA Guidelines, and the City of Ontario Local CEQA Guidelines, which indicated that all potential environmental impacts from the Project were less than significant or could be mitigated to a level of significance, and concluded said hearing on that date; and

WHEREAS, all legal prerequisites to the adoption of this Ordinance have occurred.

NOW, THEREFORE, IT IS HEREBY FOUND, DETERMINED, AND ORDAINED by the City Council of the City of Ontario, as follows:

SECTION 1: ***Environmental Determination and Findings.*** As the decision-making body for the Project, the City Council has reviewed and considered the information contained in the Initial Study/Mitigated Negative Declaration and the administrative record for the Project, including all written and oral evidence provided during the comment period. Based upon the facts and information contained in the MND, MMRP, and the administrative record, including all written and oral evidence presented to the City Council, the City Council finds as follows:

(1) The MND, MMRP, and the administrative record, have been completed in compliance with CEQA, the State CEQA Guidelines and the City of Ontario Local CEQA Guidelines; and

(2) The MND and MMRP contain a complete and accurate reporting of the environmental impacts associated with the Project, and reflects the independent judgment of the Planning Commission; and

(3) There is no substantial evidence in the administrative record supporting a fair argument that the project may result in significant environmental impacts; and

(4) All environmental impacts of the Project are either insignificant or can be mitigated to a level of insignificance pursuant to the mitigation measures outlined in the MND and MMRP.

SECTION 2: ***Airport Land Use Compatibility Plan ("ALUCP") Compliance.*** The California State Aeronautics Act (Public Utilities Code Section 21670 et seq.) requires

that an Airport Land Use Compatibility Plan be prepared for all public use airports in the State; and requires that local land use plans and individual development proposals must be consistent with the policies set forth in the adopted Airport Land Use Compatibility Plan.

(1) On April 19, 2011, the City Council of the City of Ontario approved and adopted the Ontario International Airport Land use Compatibility Plan, establishing the Airport Influence Area for Ontario International Airport, which encompasses lands within parts of San Bernardino, Riverside, and Los Angeles Counties, and limits future land uses and development within the Airport Influence Area, as they relate to noise, safety, airspace protection, and overflight impacts of current and future airport activity. As the decision-making body for the Project, the City Council has reviewed and considered the facts and information contained in the Application and supporting documentation against the ONT ALUCP compatibility factors, including [1] Safety Criteria (ONT ALUCP Table 2-2) and Safety Zones (ONT ALUCP Map 2-2), [2] Noise Criteria (ONT ALUCP Table 2-3) and Noise Impact Zones (ONT ALUCP Map 2-3), [3] Airspace protection Zones (ONT ALUCP Map 2-4), and [4] Overflight Notification Zones (ONT ALUCP Map 2-5). As a result, the DAB, therefore, finds and determines that the Project, when implemented in conjunction with the conditions of approval, will be consistent with the policies and criteria set forth within the ONT ALUCP; and

SECTION 3: ***Concluding Facts and Reasons.*** Based upon the substantial evidence presented to the City Council during the above-referenced hearing, and upon the specific findings set forth in Sections 1 through 2 above, the City Council hereby concludes as follows:

(1) ***The proposed PUD, or amendment thereto, is consistent with the goals, policies, plans and exhibits of the Vision, Policy Plan (general plan), and City Council Priorities components of The Ontario Plan.*** The Project is consistent with Vision, Policy Plan (general plan), and City Council Priorities components of The Ontario Plan. Section 1.1, The Ontario Plan Objectives of the Downtown West Planned Unit Development, describes the manner in which the PUD complies with the Policy Plan goals and policies.

(2) ***The proposed PUD, or amendment thereto, would not be detrimental to the public interest, health, safety, convenience, or general welfare of the City.*** The Planning Commission has required certain safeguards through conditions of approval, which have been established to ensure that: [i] the purposes of the Planned Unit Development are maintained; [ii] the project will not endanger the public health, safety or general welfare; [iii] the project will not result in any significant environmental impacts; [iv] the project will be in harmony with the area in which it is located; and [v] the

project will be in full conformity with the Vision, City Council Priorities and Policy Plan components of The Ontario Plan.

(3) ***In the case of an application affecting specific property(ies), the proposed PUD, or amendment thereto, will not adversely affect the harmonious relationship with adjacent properties and land uses.*** The Downtown West PUD area is situated in the heart of Ontario's downtown and is adjacent to residential and commercial land uses and development. The surrounding development supports the objective of the Downtown West PUD further commercial, residential and mixed-use development. The Project does not affect the harmonious relationship with adjacent properties and land use.

(4) ***In the case of an application affecting specific property(ies), the subject site is physically suitable, including, but not limited to, parcel size, shape, access, and availability of utilities, for the request and anticipated development.*** In preparing the proposed Downtown West PUD, a thorough review and analysis of the proposed Project and the subject site's physical suitability for the Project was completed, including analysis of the project size, shape, intensity of development, building height, building setbacks, site access, site landscaping and drainage, fences and walls, vehicle circulation, pedestrian connections, availability of mass transit, necessary street dedication and easements, public right-of-way improvements, availability of utilities and other infrastructure needs, off-street parking and circulation, building orientation and streetscapes, architectural character, building materials and color, and site signage. Based upon this review and analysis, the subject site has been deemed physically suitable, including but not limited to parcel size, shape, access, and availability of utilities, for the proposed Planned Unit Development and the proposed development.

(5) ***The proposed PUD is superior to that which could be obtained through the application of the Development Code or a specific plan.*** The Downtown West PUD will establish minimum building setbacks, parking and open space requirements, allow on-street parking, and establish a planting palette. These standards will facilitate the commercial, residential, and mixed-use development. The proposed Downtown West PUD will allow for subsequent development that is superior to that which could be obtained through the application of the Development Code by itself.

SECTION 4: ***City Council Action.*** Based upon the findings and conclusions set forth in Sections 1 through 3, above, the City Council hereby APPROVES the herein described Application.

SECTION 5: ***Indemnification.*** The Applicant shall agree to defend, indemnify and hold harmless, the City of Ontario or its agents, officers, and employees from any

claim, action or proceeding against the City of Ontario or its agents, officers or employees to attack, set aside, void, or annul this approval. The City of Ontario shall promptly notify the applicant of any such claim, action, or proceeding, and the City of Ontario shall cooperate fully in the defense.

SECTION 6: ***Custodian of Records.*** The documents and materials that constitute the record of proceedings on which these findings have been based are located at the City of Ontario City Hall, 303 East "B" Street, Ontario, California 91764. The custodian for these records is the City Clerk of the City of Ontario.

SECTION 7: ***Severability.*** If any section, sentence, clause or phrase of this Ordinance or the application thereof to any entity, person or circumstance is held for any reason to be invalid or unconstitutional, such invalidity or unconstitutionality shall not affect other provisions or applications of this Ordinance which can be given effect without the invalid provision or application, and to this end the provisions of this Ordinance are severable. The People of the City of Ontario hereby declare that they would have adopted this Ordinance and each section, sentence, clause or phrase thereof, irrespective of the fact that any one or more section, subsections, sentences, clauses or phrases be declared invalid or unconstitutional.

SECTION 8: ***Effective Date.*** This Ordinance shall become effective 30 days following its adoption.

SECTION 9: ***Publication and Posting.*** The Mayor shall sign this Ordinance and the City Clerk shall certify as to the adoption and shall cause a summary thereof to be published at least once, in a newspaper of general circulation in the City of Ontario, California within 15 days following the adoption. The City Clerk shall post a certified copy of this ordinance, including the vote for and against the same, in the Office of the City Clerk, in accordance with Government Code Section 36933.

PASSED, APPROVED, AND ADOPTED this 20th day of August, 2024.

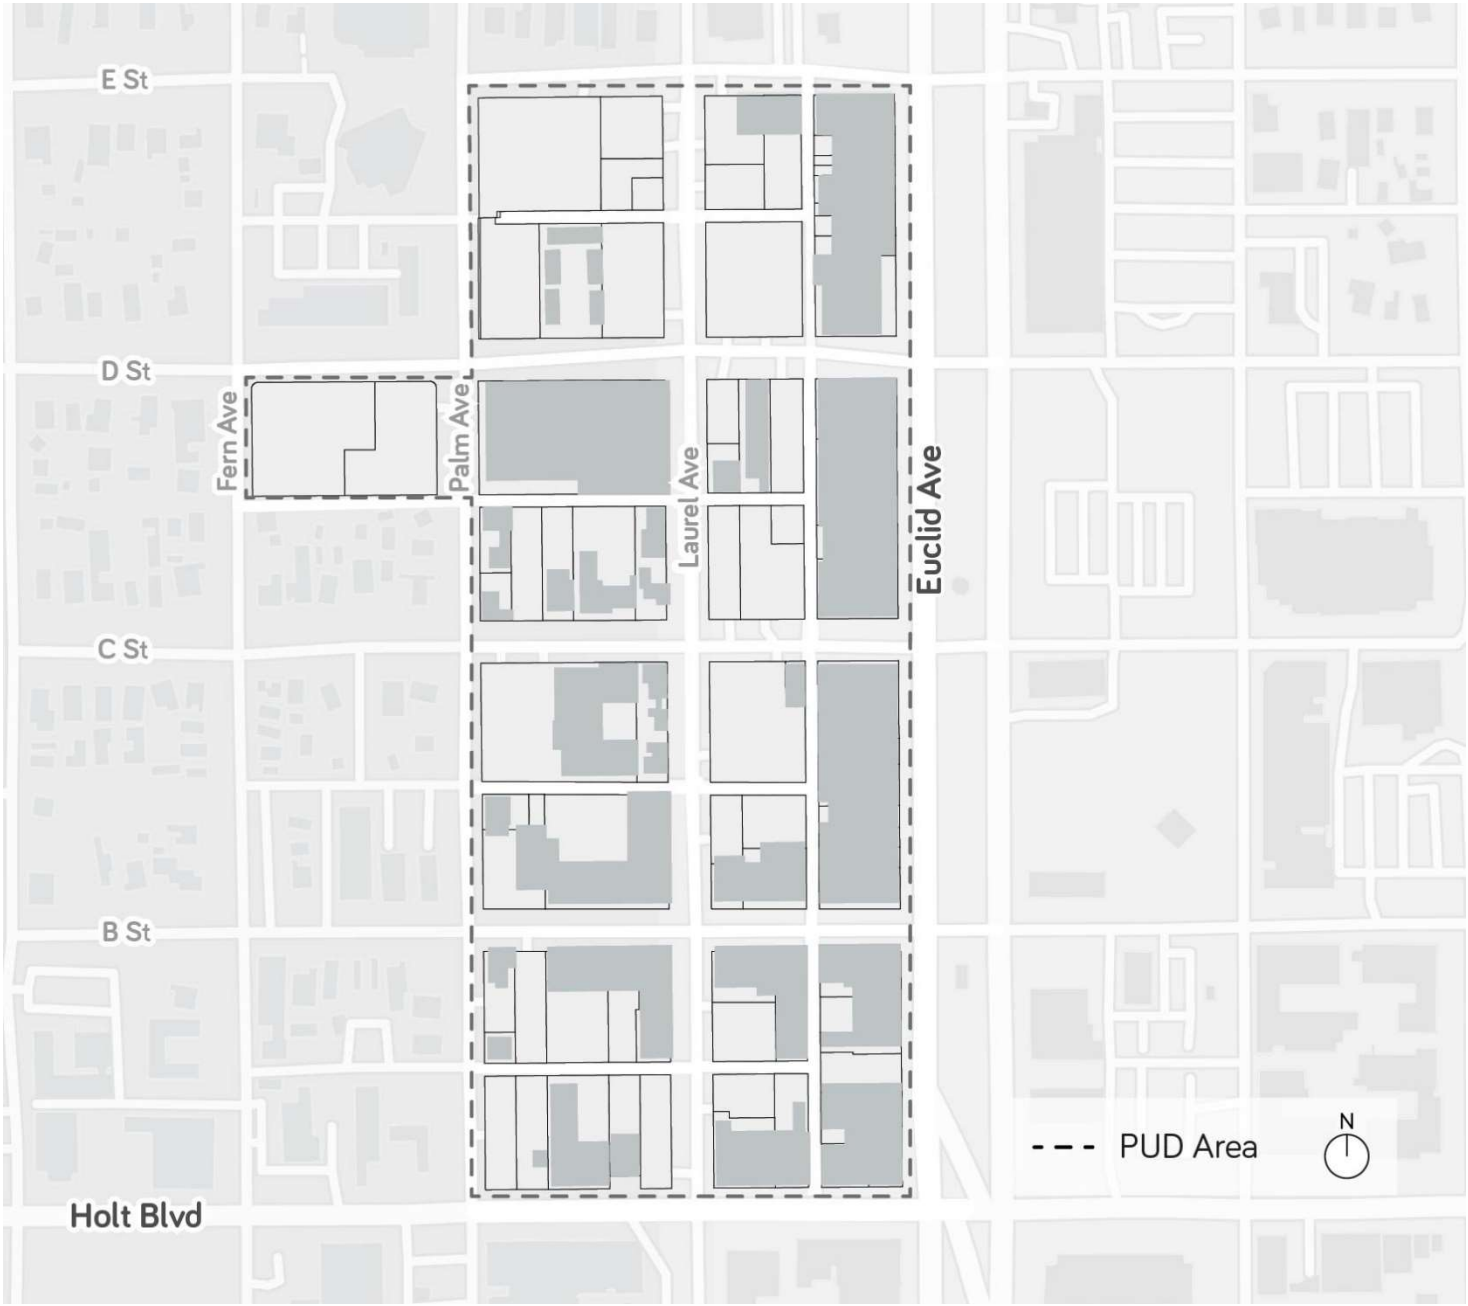
1 Introduction

The Downtown West Planned Unit Development (PUD) is intended to function as a set of planning and design principles, development regulations, and performance standards to guide and govern the development of the blocks between E Street to the north and Holt Boulevard to the south, and between Palm Avenue to the west and Euclid Avenue to the east, in addition to the portion of the block between D Street and the alley connecting Fern Avenue and Palm Avenue (PUD area). The PUD area is situated within the City of Ontario's historic downtown and is adjacent to the City's Civic Center, as shown in **Map 1 (PUD Area Vicinity Map) and Map 2 (PUD Area Location Map).** This PUD will facilitate the revitalization of downtown Ontario, streamline development, emphasize historic preservation and adaptive reuse, and provide development flexibility to achieve the City's goals to economically revitalize and aesthetically enhance the project area.



This document is organized to fulfill the requirements for a PUD, as set forth in the Ontario Development Code. As such, this PUD will replace the existing zone district designations and zoning standards that apply to the affected properties. Unless otherwise defined herein, definitions and interpretations contained in the Development Code shall apply.

City staff and private developers will rely upon this PUD to determine whether precise plans for development (Development Plans) will adequately meet the City's land use and design objectives for this key part of Ontario's original downtown. The objectives have been defined through The Ontario Plan (TOP) (2020), summarized in the following sub-section.

Map 1: PUD Area Vicinity Map

Map 2: PUD Area Location Map

1.1 The Ontario Plan (TOP) 2050 Objectives

The Downtown West PUD builds upon the vision and development and design principles for Downtown Ontario as outlined in The Ontario Plan (TOP). The Ontario Plan (TOP) Community Design Element establishes “Districts” that have been categorized as “Place Types,” which are geographically large, culturally unique, and regionally significant areas of the city that fulfill different but complementary roles in creating a complete community. As regional destinations, districts serve as the “face of the city.” Each district has a distinct identity that reflects its role within the city context and establishes a defined sense of place through the creation of an amenity-rich, transit-accessible, mixed-use environments where people can live, work, shop, dine, and have many of their daily needs met within a comfortable and convenient walk or bike ride from their residence, transit stop, or parked vehicle.

The PUD area is located within the “Downtown District,” which is envisioned as the placed-based, people-focused, commercial, and cultural "heart" of the city and features several designated historic districts and landmarks. Downtown will support a variety of businesses, housing opportunities for residents with a variety of income levels, creative spaces, entertainment options, and institutional and civic uses, while preserving its historic character, buildings, neighborhoods, and places. Complementing the wide mix of uses are designs, layouts and public spaces that give residents, visitors, and businesses a strong sense of connection and creates a place where people want to spend time.

The TOP land use designation for the PUD area is Mixed-Use - Downtown (MU-Downtown) as shown in Map 3 (TOP 2050 Land Use Mixed Use – Downtown District Place Type) and summarized in **Table 2-1 (TOP 2050 Land Use Designations Summary –Mixed-Use – Downtown)**. MU-Downtown is envisioned as an intensive vertical and horizontal district with a mixture of retail, office, and residential uses in a pedestrian friendly atmosphere, with the most intensive uses envisioned along Euclid and Holt Avenues. In addition, in MU-Downtown, there is an intention to enhance historic character. Maximum intensity is 2.0 Floor Area Ratio and allowed density is 25.0 to 75 dwelling units per acre.

Map 3: TOP 2050 Land Use Mixed Use – Downtown District Place Type

Table 2-1: TOP 2050 Land Use Designations Summary – High-Density Residential and Mixed-Use - Downtown

Land Use Designation	Residential Density & Non-Residential Intensity	Intention
Mixed-Use - Downtown (MU - Downtown)	25.0 to 75.0 dwelling units per acre 2.0 FAR for retail and office uses	Envisioned as an intensive vertical and horizontal mixture of retail, office, and residential uses in a pedestrian friendly atmosphere. The historic character is enhanced. The most intensive uses are envisioned along Euclid and Holt Avenues.

The TOP Plan Policy Plan (General Plan) establishes a long-term vision for Ontario: "a sustained, community-wide prosperity which continuously adds value and yields benefits." In addition to this overarching vision, the following four components establish by City Council serve as the basic building blocks that set the foundation for a unified and prosperous community:

- A **Dynamic Stability** that enables our community to confront the continued dynamic growth of the region and technological change with confidence and a sense of opportunity.
- A **Prosperous Economy** that sustains the perception and reality of prosperity across our entire community that positively impacts all the people of Ontario and is broadly – though not uniformly – shared.
- **Distinctive Development** that integrates our varied and diverse focal points, districts, centers, corridors, and neighborhoods to provide a feeling of coherence without sacrificing uniqueness.
- **Recognized Leadership** in local governance that stimulates excellence and serves to unify the people of Ontario in support of best practices in conducting public endeavors.

The Downtown West PUD is consistent with the principles, goals and policies contained within the Vision, Governance, Policy Plan (General Plan), and City Council Priorities components of The Ontario Plan ("TOP"). More specifically, the goals and policies of TOP that are furthered by this PUD are as follows:

City Council Goals
▪ Invest in the Growth and Evolution of the City's Economy ▪ Operate in a Businesslike Manner ▪ Focus Resources in Ontario's Commercial and Residential Neighborhoods
Governance
▪ Decision Making: - Goal G1: Sustained decision-making that consistently moves Ontario towards its Vision by using The Ontario Plan as a framework for assessing choices. - G 1-2. Long-term Benefit. We require decisions to demonstrate and document how they add value to the community and support the Ontario Vision.
Vision: Distinctive Development - Commercial and Residential Development
▪ Development quality that is broadly recognized as distinctive and not exclusively tied to the general suburban character typical of much of Southern California. ▪ A system of vibrant retail, town, and neighborhood centers responsive to market demands and woven into the fabric of the community. ▪ A demonstrated ability to attract housing in pursuit of our acknowledged responsibility to balance housing with the job growth that drives our quality of life. ▪ One of the most comprehensive and diverse housing stocks in the region that offers broad choices for its diverse workforce and their families, ranging from entry level housing to executive level development; from semi-rural to highly urban.

- Distinctive and well-maintained neighborhoods that offer exceptional variety in lifestyles, with convenient access to schools, recreation and cultural facilities, places of worship, places of employment and shopping.

Vision: Distinctive Development - Development Quality

- Unique and authentic districts, centers, and corridors of varied scales that establish Ontario as one of the most vital and diverse locales in Southern California.
- Superior quality and design of the built environment and open spaces through careful attention to detail at every scale, including public and private spaces and structures.

Vision: Distinctive Development - Leisure and Cultural Activities

- Strong historic districts and cultural resources matching interests of a population with diverse cultural backgrounds, as well as offering a range of arts and entertainment venues of international significance.

Policy Plan (General Plan)

Land Use Element

- Goal LU-1 Balance: A community that has a spectrum of housing types and price ranges that match the jobs in the City and that make it possible for people to live and work in Ontario and maintain a quality of life.
  - LU-1.1 Strategic Growth. We concentrate growth in strategic locations that help create place and identity, maximize available and planned infrastructure, foster the development of transit, and support the expansion of the active and multimodal transportation networks throughout the City.
  - LU-1.6 Complete Community. We incorporate a variety of land uses and building types in our land use planning efforts that result in a complete community where residents at all stages of life, employers, workers, and visitors have a wide spectrum of choices of where they can live, work, shop and recreate within Ontario.
- Goal LU-2 Compatibility: Compatibility between a wide range of uses and a resultant urban patterns and forms.
  - LU-2.6 Infrastructure Compatibility. We require infrastructure to be aesthetically pleasing and in context with the community character.
- Goal LU-3: Flexibility: Staff, regulations, and processes that support and allow flexible response to conditions and circumstances in order to achieve the Vision.
  - LU-3.1: Development Standards. We maintain clear development standards which allow flexibility to achieve our Vision and provide objective standards that ensure predictability and deliver the intended physical outcomes.
  - LU-3.2: Design Incentives. We offer design incentives to help projects achieve the Vision.
  - LU-3.3: Land Use Flexibility. We consider uses not typically permitted within a land use category if doing so improves livability, reduces vehicular trips, creates community gathering places and activity nodes, and helps create identity.
- Goal LU-4 Phased Growth: Development that provides short-term value only when the opportunity to achieve our Vision can be preserved.
  - LU-4.4: Shared Infrastructure. We encourage and facilitate the use of shared infrastructure (including shared or managed parking) in urban, mixed use, and transit-oriented Place Types.

Housing Element

- Goal H-2 Housing Supply & Diversity: Diversity of types of quality housing that are affordable to a range of household income levels, accommodate changing demographics, and support and reinforce the economic sustainability of Ontario.
  - H-2.1: Corridor Housing. We revitalize transportation corridors by encouraging the production of higher density residential and mixed-uses that are architecturally, functionally, and aesthetically suited to corridors.
  - H-2.2: Historic Downtown. We foster a vibrant historic downtown through facilitating a wide range of housing types and affordability levels for households of all ages, housing preferences, and income levels.
  - H-2.5: Housing Design. We require architectural excellence through adherence to City design guidelines, thoughtful site planning, environmentally sustainable practices, and other best practices.
  - H-2.6: Infill Development. We support the revitalization of neighborhoods through the construction of higher-density residential developments on underutilized residential and commercial sites.
- Goal H-3 Government Regulations: A City regulatory environment that balances the need for creativity and excellence in residential design, flexibility and predictability in the project approval process, and the provision of an adequate supply and prices of housing.
  - H-3.1: Incentives. We maintain incentive programs that can be offered to projects that provide benefits to the community such as exceptional design quality, economic advantages, environmental sustainability, or other benefits that would otherwise be unrealized.
  - H-3.2: Flexible Standards. We allow flexibility in the application of residential and mixed-use development standards in order to gain benefits such as exceptional design quality, economic advantages, sustainability, or other benefits that would otherwise be unrealized.
  - H-3.3: Development Review. We maintain a residential development review process that provides certainty and transparency for project stakeholders and the public yet allows for the appropriate review to facilitate quality housing development.
  - H-3.4: Financial Incentives. We consider financial incentives to facilitate and encourage the production, rehabilitation or improvement of housing, or provision of services where such activity furthers housing and community-wide goals.
- Goal H-5 Special Needs: A full range of housing types and community services that meet the special housing needs for all individuals and families in Ontario, regardless of income level, age, or other status.
  - H-5.1: Senior Housing. We support the development of accessible and affordable senior housing and provide financial assistance for seniors to maintain and improve their homes.
  - H-5.2: Family Housing. We support the development of larger rental apartments that are appropriate for families with children, including, as feasible, the provision of services, recreation, and other amenities.

Parks and Recreation Element

- Goal PR-1 Planning & Design: A system of safe and accessible parks that meets the needs of the community.
  - PR-1.1: Access to Parks. In all new residential development areas, we strive to provide a park and/or recreational facility within walking distance (¼ mile) of every residence and prioritize the establishment of parks in environmental justice areas that do not have adequate access to parks.

    PR-1.14: Multi-family Residential Developments. We require that new multi-family residential developments of five or more units provide recreational facilities or open space, in addition to paying adopted impact fees.

Community Economics Element

- Goal CE-1 Complete Community: A complete community that provides for all incomes and stages of life.
  - CE-1.6: Diversity of Housing. We collaborate with residents, housing providers, and the development community to provide housing opportunities for every stage of life; we plan for a variety of housing types and price points to encourage the development of housing supportive of our efforts to attract business in growing sectors of the community while being respectful of existing viable uses.
  - CE-1.7: Retail Goods and Services. We seek to ensure a mix of retail businesses that provide the full continuum of goods and services for the community.
- Goal CE-2 Placemaking: A City of distinctive neighborhoods, districts, corridors, and centers where people choose to be.
  - CE-2.1: Development Projects. We require new development and redevelopment to create unique, high-quality places that add value to the community.
  - CE-2.2: Development Review. We require those proposing new development and redevelopment to demonstrate how their projects will create appropriately unique, functional, and sustainable places that will compete well with their competition within the region.
  - CE-2.4 Protection of Investment. We require that new development and redevelopment project existing investment by providing architecture and urban design of equal or greater quality.

Safety Element

- Goal S-1 Seismic & Geologic Hazards: Minimized risk of injury, loss of life, property damage, and economic and social disruption caused by earthquake-induced and other geologic hazards.
  - S-1.1 Implementation of Regulations and Standards. We require that all new habitable structures be designed in accordance with the most recent California Building Code adopted by the City, including provisions regarding lateral forces and grading.

Community Design Element

- Goal CD-1 Complete Community: A dynamic, progressive city containing distinct and complete places that foster a positive sense of identity and belonging among residents, visitors, and businesses.
  - CD-1.2: Place Types. We establish Place Types in urban, mixed use, and transit-oriented areas to foster the City's identity as a premier community and require new development within each Place Type to incorporate prescribed urban patterns, forms, and placemaking priorities.
  - CD-1.3: Existing Neighborhoods. We require the existing character of viable residential and non-residential neighborhoods be preserved, protected, and enhanced.
  - CD-1.4: Transportation Corridors. We will enhance our major transportation corridors within the City through landscape, hardscape, signage and lighting. The extent of enhancement should be appropriate to the use, type, and context of each corridor.
- Goal CD-2 Design Quality: Goal: A high level of design quality resulting in neighborhoods, commercial areas, public spaces, parks, and streetscapes that are attractive, safe, functional, human- scale, and distinct.
  - CD-2.1: Quality Building Design and Architecture. We encourage all development projects to convey visual interest and character through:
    - Building volume, massing, and height to provide context-appropriate scale and proportion;

- A true architectural style which is carried out in plan, section, and elevation through all aspects of the building and site design and appropriate for its setting; and
- Exterior building materials that are articulated, high quality, durable, and appropriate for the architectural style.

- CD-2.4: Urban, Mixed Use, and Transit-oriented Areas. We establish Place Types to require mixed use, urban, and transit-oriented areas to be designed and developed as pedestrian oriented areas that are integrated with adjacent neighborhoods and promote a vibrant, comfortable, and functional environment, as defined for each Place Type.
- CD-2.5: Streetscapes. We design new and, when necessary, retrofit existing streets to improve walkability, bicycling and transit integration, strengthen connectivity, and enhance community identity through improvements to the public right-of-way such as sidewalks, street trees, parkways, curbs, street lighting and street furniture.
- CD-2.7: Sustainability. We collaborate with the development community to design and build neighborhoods, streetscapes, sites, outdoor spaces, landscaping, and buildings to reduce energy demand through solar orientation, maximum use of natural daylight, passive solar and natural ventilation, building form, mechanical and structural systems, building materials, and construction techniques.
- CD-2.8: Safe Design. We incorporate defensible space design into new and existing developments to ensure the maximum safe travel and visibility on pathways, corridors, and open space and at building entrances and parking areas by avoiding physically and visually isolated spaces, maintaining visibility and accessibility, and using lighting.
- CD-2.9: Landscape Design. We encourage durable, sustainable, and drought-tolerant landscaping materials and designs that enhance the aesthetics of structures, create and define public and private spaces, and provide shade and environmental benefits.
- CD-2.10: Parking Areas. We require all development, including single-family residential, to minimize the visual impact of surface, structured, and garage parking areas visible from the public realm in an aesthetically pleasing, safe and environmentally sensitive manner. Examples include:
  - Surface parking: Shade trees, pervious surfaces, urban run-off capture and infiltration, and pedestrian paths to guide users through the parking field.
  - Structured parking: facade articulation, screening, appropriate lighting, and landscaping.
  - Garage parking: providing access to single-family residential garages through alley access, recessing garages from the frontage to emphasize front doors or active living spaces.
- CD-2.11: Entry Statements. We encourage the inclusion of amenities, signage, and landscaping at the entry to neighborhoods, commercial centers, mixed use areas, industrial developments, and public places that reinforce them as uniquely identifiable places.
- CD-2.12: Site and Building Signage. We encourage the use of sign programs that utilize complementary materials, colors, and themes. Project signage should be designed to effectively communicate and direct users to various aspects of the development and complement the character of the structures.

▪ Goal CD-3 Urban, Mixed Use, and Transit-Oriented Place Types: Vibrant urban environments that are organized around intense buildings, pedestrian and transit areas, public plazas, and linkages between and within developments that are conveniently located, visually appealing and safe during all hours.

- CD-3.1: Unique Identity. We promote development that heightens the unique character and identity of each Place Type by requiring compatible land uses and land planning, site design, and building design that promotes an active public realm.

- CD-3.2: Comfortable, Human-Scale Public Realm. We require that public spaces, including streets, parks, and plazas on both public and private property be designed to maximize safety, comfort and aesthetics and connect to the citywide pedestrian, vehicular, and bicycle networks.
- CD-3.3: Complete and Connected Network. We require that pedestrian, vehicular, and bicycle circulation on both public and private property be coordinated to provide connections internally and externally to adjacent neighborhoods and properties (existing and planned) through a system of local roads and trails that promote walking and biking to nearby destinations (including existing and planned parks, commercial areas, and transit stops) and are designed to maximize safety, comfort, and aesthetics.
- CD-3.4: Context-Aware and Appropriate Design. We require appropriate building and site design that complements existing development, respects the intent and identity of the Place Type, and provides appropriate transitions and connections between adjacent uses to ensure compatibility of scale, maintain an appropriate level of privacy for each use, and minimize potential conflicts.
- CD-3.5: Active Frontages. We create lively pedestrian streetscapes by requiring primary building, business, and residential entrances, outdoor dining, and storefronts be located on ground floors adjacent to sidewalks or public spaces and designed to maximize safety, comfort, aesthetics, and the intended functionality (as defined by the Place Type).
- CD-3.6: Managed Infrastructure. We collaborate with developers and property owners to facilitate development that realizes the envisioned character and functionality of the Place Type through the use of green and shared infrastructure within each Place Type.

▪ Goal CD-4 Historic Preservation: Historic buildings, streets, landscapes, and neighborhoods, as well as the story of Ontario's people, businesses, and social and community organizations, have been preserved and serve as a focal point for civic pride and identity.

- CD-4.5: Adaptive Reuse. We actively promote and support the adaptive reuse of historic sites and buildings to preserve and maintain their viability.

1.2 Background and Related Efforts

In addition to the TOP, there are several previous plans and efforts focused on Downtown Ontario that served as background for the development of this PUD, shaping the vision and guiding principles. These previous plans and efforts are summarized in the following section. In addition, the City of Ontario's ongoing focus on the Downtown area has resulted in several related efforts that seek to improve the historic character, urban design, mobility conditions, among others, all of which strengthens Downtown Ontario and complements this PUD. These efforts are summarized in Chapter 7 (Administration and Implementation) as part of the implementation of the PUD.

1.2.1 Downtown Ontario Design Guidelines

The Downtown Ontario Design Guidelines, adopted by City Council in 1998 as reference to the Development Code, establishes a set of architectural, graphic, and lighting design principles, to provide guidance to business owners, homeowners, City staff, and design professionals, for the development and/or rehabilitation of properties within the City's historic original downtown area. The PUD area is encompassed within the Downtown Design Guidelines project area and straddles the Historic Retail and the Residential Districts as defined in the guidelines. This PUD aims to reinforce the concept plan and associated guidelines included in the Downtown Design Guidelines and further strengthen Downtown Ontario's identity and character. The Downtown Ontario Design Guidelines should continue to be used as a guide for the PUD area to ensure that properties continue to enhance the City's historic original downtown area.

The Euclid Avenue median divides the west side of Euclid Avenue, shown on the left and part of this PUD area, and the east side of Euclid Avenue, shown on the right and part of the Downtown Civic Center Planned Unit Development area.

1.2.2 Downtown Civic Center Planned Unit Development

The Civic Center Planned Unit Development, adopted in 2006 and amended in 2011 and 2021, includes planning and design principles, development regulations, and performance standards to guide and govern the development of a 6-block area of the City of Ontario, which consists of a portion of the City's original downtown and its current civic center area. The PUD area lies directly west of the Civic Center Planned Unit Development project location, as shown in Map 1, creating opportunities to define complementary regulations, standards, and guidelines along Euclid Avenue to ensure a cohesive corridor experience.

1.2.3 West Euclid Activation

The West Euclid Activation effort, which concluded in Spring 2022, focused on defining activation goals for West Euclid Avenue and developing strategies for the activation of properties in the Downtown area, many of which are City-acquired, to help achieve the long-term goal of re-visioning the area as the cultural and entertainment heart of Ontario. Goals for the effort that influence this PUD include: (1) A vibrant and walkable district with rich historic and architectural

character, (2) a regional tourist destination, (3) the heartbeat of Ontario's thriving arts and culture scene, and (4) an 18-hour downtown with a variety of uses that support residents, visitors, and business owners. As part of the effort, existing and proposed projects were identified and focused projects for further study were determined. Several urban design studies were also included to re-envision specific sites within the downtown area, which are also located within the PUD area, including:

- **Gemmel's Pharmacy,** a historic building with an opportunity to be subdivided into multiple tenants to activate the Euclid Avenue and B Street ground floor frontage through active uses such as a café or entertainment club with upper floor residential units. The design study envisions façade improvements that enhance the existing historic character as well as a parklet along B Street to support adjacent restaurants, in addition to a suite of other placemaking strategies.
- **Granada Theater**, a 1926 historic theater, envisioned as an anchor of a revitalized Downtown with an opportunity to be restored and infused with new uses, such as retail shops, creative offices, and arts-related uses. The design study envisions active ground floor design treatments and façade improvements.
- **123 W D Street,** an Art Deco style building with an opportunity for adaptive reuse into a quasi-industrial use such as a brewery or other maker-space operation, or entertainment venue. The design study envisions reuse of existing surface parking lot as outdoor space with enhancements like shade, lighting, and art.

A new concept for B Street is also included, which envisions the street as an active, pedestrian-focused street with a variety of placemaking elements, in addition to a concept to transform existing alleys in into activated, pedestrian-focused alleyways. The vision and activation concepts from the West Euclid Activation document serve as background and context for the development of the PUD guiding principles and the land use and urban design concepts, discussed in Chapter 2-4.

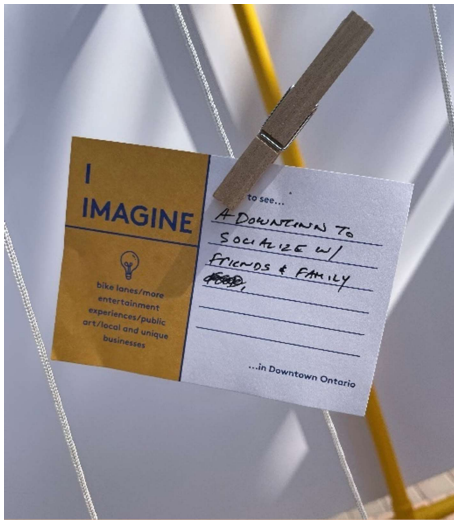
1.2.4 Euclid Avenue Relinquishment and Historic Property Treatment and Management Plan

In 2020, the City approached the California Department of Transportation (Caltrans) and formally initiated the relinquishment of State Route 83 (Euclid Avenue) to the City. Caltrans conducted and approved Relinquishment Assessment Reports in 2023 to determine if relinquishment is appropriate from a state transportation perspective and found that Euclid Avenue does not serve regional or statewide transportation needs, thereby allowing the City the control in the operation of the transportation system to better represent community interests.

As part of the relinquishment of Euclid Avenue, Caltrans and the City prepared a Historic Property Treatment and Management Plan (HPTMP) which fulfills regulatory compliance for the relinquishment of the historic segment of Euclid Avenue. The public right-of-way from Philadelphia Street to the I-10 was designated as Local Landmark No. 67 by City Council on January 16, 2001. On August 10, 2005, the public right-of-way from Philadelphia Street in Ontario to 24th Street in Upland was listed on the National Register of Historic Places as a significant cultural landscape. Contributing character-defining features of the resource include the 60-foot wide median, historic rock curb, scored sidewalks, King standard light posts, double planting of California pepper trees (Schinus molle), silk oaks trees (Grevillea robusta), and other mature vegetation such as deodar trees (Cedrus deodara) and Canary Island palms (Phoenix canariensis). The HPTMP provides guidance to the City on appropriate maintenance practices and future improvements in a manner that is consistent with the Secretary of the Interior's Standards for the Treatment of Historic Properties. Implementation of the HPTMP will preserve, protect and enhance the historic character and quality of Euclid Avenue, streamline environmental review for future improvement projects, and safeguard Euclid Avenue's position on the National Register of Historic Places.

1.3 Community and Stakeholder Engagement

Community and stakeholder engagement for the Downtown West PUD included three rounds of community outreach and two rounds of targeted stakeholder conversations via roundtable sessions. The community outreach was conducted through in-person pop-up events as part of existing community events and online via virtual workshops. The roundtable sessions consisted of key stakeholders, including property and business owners, residents, representatives from the downtown Ontario Improvement Association, developers, and others.



An overview of the three rounds of engagement is summarized in the following pages, along with a summary of the feedback shared by the community and stakeholders:

- **Round 1 Visioning and Goals** aimed to share the PUD vision and goals, as well as capture community ideas, aspirations, and priorities.
  - **Feedback from broader community:** The community displayed overall support for the vision and goals, highlighting the unique character of Ontario's historic downtown. In addition, they advocated for mobility options to promote accessibility and active transportation infrastructure for safer connections.
  - **Feedback from the stakeholder roundtable:** Discussions highlighted the Granada Theater as an important historical asset, emphasizing the need for consistent programming to activate it. Stakeholders stressed the importance of effective waste management systems and ample parking to support local businesses in downtown Ontario. Suggestions from stakeholders included the enhancement of community parking accessibility and reimagining alleys to facilitate social activities. Moreover, leveraging the West Valley Connector Bus Rapid Transit (BRT) Project, a 19-mile zero emission BRT that is estimated to open in 2026 connecting the Ontario International Airport (ONT) to two Metrolink lines (San Bernardino and Riverside), and multiple major activity centers, including Downtown Ontario via Holt Boulevard, would promote connectivity to mass transit and encourage the use of alternative transportation methods, reducing car-dependence in the area.

The community engaged with a pop-up art installation to provide their input on the vision and goals for the PUD. The pop-up was part of the larger State of the City event in March 2023.

- **Round 2 Land Use and Urban Design Concept** focused on capturing community feedback for preliminary land use and urban design concepts.
  - **Feedback from the stakeholder roundtable:** Stakeholders tasked the PUD with providing clarity on design standards for private development and recommendations for improvements for alley enhancements and public art. In addition, the PUD should provide recommendations for the location and management of the trash facility. Furthermore, to enhance connectivity, stakeholders suggested the exploration of an east-west connection on the block between B and C street along Euclid Avenue.
  - **Feedback from broader community:** The community was enthusiastic about a comprehensive and interconnected network, particularly with enhancements to the public realm, pedestrian safety, and landscaping. The concept of an open garden with pop-up food vendors was well liked due to its potential to establish family-friendly spaces. There was continued support for the adaptive reuse of historic buildings on B Street and Laurel Avenue to promote more active uses. Community members enjoyed the idea of transforming alleyways into a pedestrian-centric area that would potentially create shopping and dining destinations downtown. To accommodate for the influx of people, they recommended extending business hours and increasing the frequency of public transportation.

Common Themes across Engagement

- Maintain historic character.
- Adaptive reuse of historic structures with active uses, such as shopping and dining.
- Pedestrian infrastructure to make it safer and more comfortable to get around.
- Prioritize the success of local businesses through improved waste management and ample parking.
- Enhanced transportation infrastructure that supports mobility options and makes it easier to get around in the district by foot or bike.

The community responded to the Land Use and Urban Design Concept and conceptual illustrations for key sites within the downtown. The pop-up was part of summer concert series in the park in July 2023.

- **Round 3 Draft PUD Showcase** focused on sharing the draft contents of the PUD with the community and answering questions. The Showcase was designed as an open house with topical stations, including:
    1. **About the Project,** which covered the PUD area, about PUDs, project timeline, and relationship to the TOP.
    2. **Vision and Guiding Principles,** which highlighted the overall vision and the six guiding principles for the project, as well as the land use, urban design, and public realm concept for the PUD area. The concept also included corridor-specific concepts for Euclid Avenue, Laurel Avenue, Holt Boulevard, B Street, and the Alley.
    3. **Historic Overview,** which covered the historic-focused components of the PUD, including key standards, relationship to the Downtown Ontario Design Guidelines, and the PUD-specific Historic Architectural Guidelines.
    4. **Height and Setbacks,** which highlighted allowed heights and setback standards in the PUD area.
    5. **Land Use and Ground Floor Environment,** which included a map of zoning districts with intent statements, a summary of ground floor use standards for B Street, Holt Boulevard, and Euclid Avenue, and ground floor design standards.
    6. **Next Steps,** which highlighted key projects that address mobility, historic preservation, culture, wayfinding, and future development that are separate from the PUD and will be implemented over the next few years.

2 Vision and Guiding Principles

The Downtown West PUD vision describes the future of the PUD area to provide direction for how the area will grow and evolve over time. The vision is consistent with the TOP and builds off the West Euclid Activation effort, discussed in Section 1.2. The vision is supported by guiding principles that aim to provide additional detail on how to achieve the vision.

Downtown West PUD Vision

As the historic center of Ontario, Downtown West, is envisioned as the placed-based, people-focused, commercial, and cultural "heart" of the city and features several designated historic buildings and landmarks.

Downtown West will support a variety of businesses, housing opportunities for residents with a variety of income levels, creative spaces, entertainment options, and institutional uses while preserving its historic character, buildings, neighborhoods, and places.

Complementing the wide mix of uses are designs, layouts and public spaces that give residents, visitors, and businesses a strong sense of connection and creates a place where people want to spend time.

GUIDING PRINCIPLES

To support the vision, the following guiding principles apply:

UNIQUE IDENTITY

Downtown Ontario is the economic, cultural, and civic hub of Ontario, organized by a simple, walkable network of tree-lined streets, laid out as a new "Model Colony" in the 1880s. Downtown West's history, historic buildings, and distinct urban form define downtown's unique identity. This is especially true on the west side of Euclid Avenue where a continuous streetwall of quality buildings, many of which are historic resources, create an irreplaceable sense of place and history. Downtown's historic character and architectural styles should be celebrated and enhanced through appropriate infill development and adaptive re-use of historic and non-historic structures to reinforce the area's identity.

HUMAN SCALE PUBLIC REALM

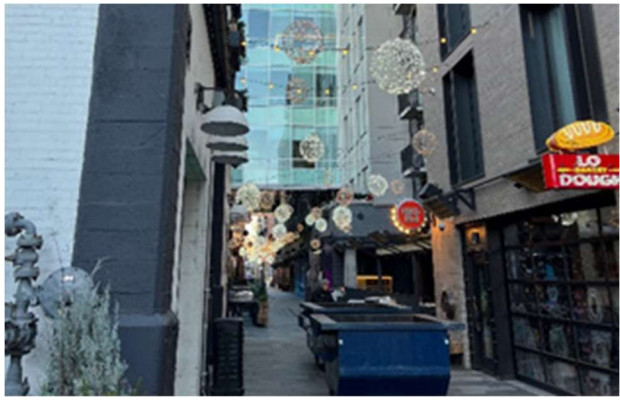
Downtown West's public realm is a traditional network of sidewalks and public open spaces that are lined with a rich variety of buildings. The district's streets, sidewalks, and alleys should be enhanced as "outdoor rooms of community," providing an attractive, comfortable, safe, and lively environment to walk, explore, shop, dine, meet friends and neighbors, and participate in community events. Each new public and private public realm improvement should reinforce a "pedestrians first" intent, and complement existing character, with a focus on strengthening the public realm character along Euclid Avenue through an enhanced sidewalk environment with elements that match the east side of the street.

COMPLETE & CONNECTED NETWORK

Downtown West's robust grid pattern network connects the retail core seamlessly to surrounding neighborhoods, Holt Boulevard, and the future Bus Rapid Transit (BRT) station for the West Valley Connector. The layout of the street system provides for a variety of choices across travel routes and modes for each trip. Downtown West's simple, open network of pedestrian-friendly streets and blocks is the ideal built environment and framework for any urban, mixed use, or transit-oriented area, and the existing block structure should be maintained and enhanced through mid-block paseos and improved alleys.

APPROPRIATE CONTEXTUAL BUILDING DESIGN & PRESERVATION

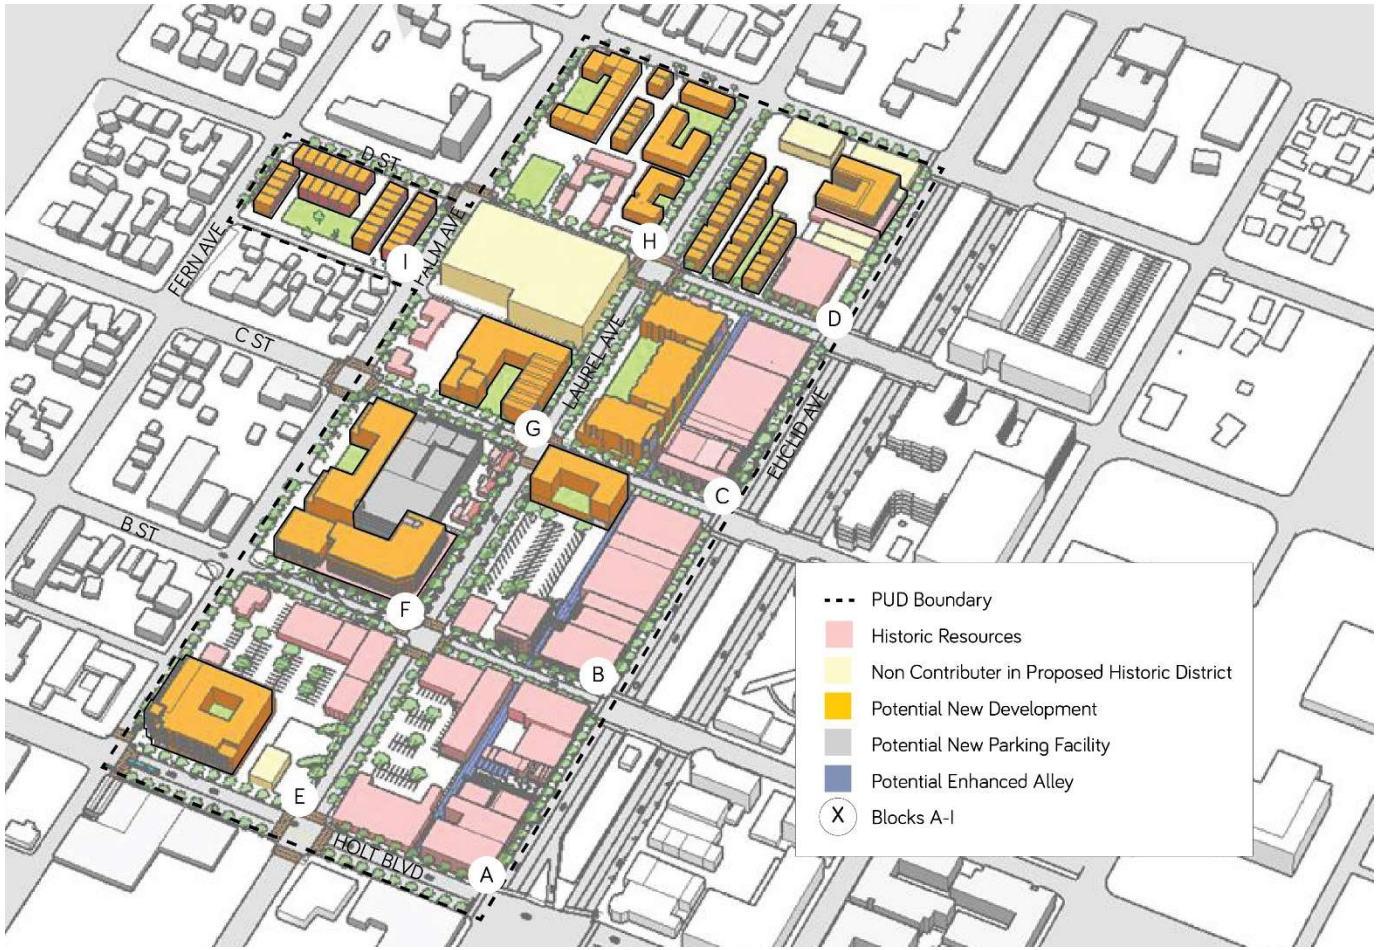
Within Downtown West, historic buildings from various time periods comfortably mix with newer buildings. Along Euclid Avenue, buildings are unified by active ground floors with transparent storefronts and accessible pedestrian entries from the sidewalk aligned with a historic "main street" character. Across the district, new buildings are well-designed, with appropriate height based on location, with façade enhancements that also provide opportunities for public art. Future infill development and renovations should respect and reflect established facade patterns to preserve Downtown's historic character. The architecture of new buildings should not try and replicate historic styles, but be contemporary while harmonizing with the scale, rhythm, and character of their historic predecessors.



ACTIVE & CONTEXT-SENSITVE FRONTAGES

Within the heart of Downtown West, a variety of active uses built right up to the sidewalk "blur the line" between the outdoor public realm and the indoor private businesses. Restaurants, cafes, and shops enliven the sidewalk environment through activities and outdoor dining. On side streets and as one moves toward surrounding residential neighborhoods, frontages are designed with ground floor commercial uses and residences that quitter in nature and promote privacy from passersby. Buildings here are set back from the sidewalk, reducing visibility into the residence or office, while offering views outward to the street and other public spaces, improving public safety and pedestrian comfort.

MANAGED INFRASTRUCTURE



Successful downtowns require active and coordinated management of infrastructure, services, and activities, including parking, trash, public realm maintenance, special events, business recruitment, and on-going promotional activities. For Downtown Ontario, the active and coordinated management of the area's variety of infrastructure and services can help the district to remain competitive. Of note is a managed system of trash collection along the north-south alley between Euclid Avenue and Laurel Avenue within Downtown West that seeks to balance the desire for an enhanced, pedestrian alley with the opportunity to consolidate trash collection across tenants.

2.1 Land Use, Urban Design, and Public Realm Concept

The Downtown West PUD vision and guiding principles are visualized in **Figure 2-1** (Land Use, Urban Design, and Public Realm Concept) with a focus on demonstrating land use, urban design, public realm-related possibilities, and potential development opportunities within the PUD area. As a companion to the overall concept for the PUD area as shown in **Figure 2-1**, the following section highlights several illustrative concepts showcasing development opportunities for the PUD area focused on the following key corridors: (1) Euclid Avenue, (2) Holt Boulevard, (3) B Street, (4) the Alley, and (5) Laurel Avenue. These concepts aim to provide additional detail around future conditions and on-the-ground views of the PUD area to illustrate the implementation of land use, urban design, future development, and public realm-related outcomes of the project. It is important to note that participation by a variety of City of Ontario departments is needed to fully implement the land use, urban design, and public realm concepts for the PUD.

Figure 2-1: Land Use, Urban Design, and Public Realm Concept for the PUD Area

2.1.1 Euclid Avenue

As the historic and preeminent boulevard in the city, as well as the north-south major spine and eastern boundary of the PUD area, the future vision for Euclid Avenue is centered on protecting and strengthening this important corridor through promoting a diverse array of destinations where residents and visitors can comfortably walk, shop, explore, dine, and meet friends. Historic buildings fronting Euclid Avenue are protected with additional opportunities for new development through adaptive reuse to further infuse the street with a mix of retail shops, restaurants, and entertainment venues, as well as new housing opportunities, as shown in **Figure 2-2** (Conceptual Illustration for Euclid Avenue). The continuous street edge and urban form is preserved, ensuring that any new development complements and enhances historic resources to further celebrate the unique identity of downtown.

Existing Public Realm along Euclid Avenue

Historic Euclid Avenue

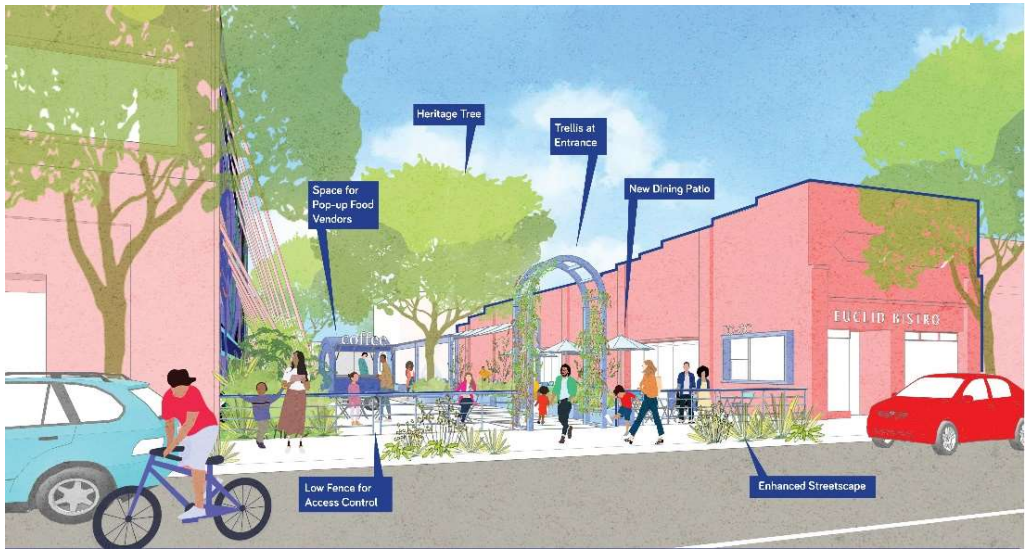
Euclid Avenue plays an important role in Ontario's historic downtown and the overall character of the PUD area. Euclid Avenue is a major scenic and historic resource of the city given its status as Local Landmark No. 67 with character defining features, such as the 60-foot-wide landscaped median, scored sidewalks, King standard light posts, and a California pepper tree and silk oak tree canopy. Additionally, the right-of-way and median from 24th Street in Upland to Philadelphia Street in Ontario are listed on the National Register of Historic Places as a significant cultural landscape historic district. Many buildings that line Euclid Avenue within the downtown are historic resources with a

Euclid Avenue is a major scenario and historic resource in the city.

Continuous commercial uses and active storefronts fronting Euclid Avenue generate a constant flow of pedestrian traffic and are complemented by a vibrant and welcoming public realm with generous sidewalks, street trees, and streetscape furniture that reflects the existing street character on the east side of Euclid Avenue.

Euclid Avenue seamlessly blends indoor and outdoor public spaces to create a series of "outdoor rooms" and green spaces for the community, allowing activities, events, temporal programming and kiosks, and outdoor dining to spill out onto sidewalks and into plazas, blurring the line between the public and private spaces. Landscaping along Euclid Avenue is designed to achieve harmony and unity between the indoor and outdoor spaces and softens hardscape areas, enhancing the pedestrian experience. Mid-block paseos provide connections between Euclid Avenue and the alley to promote greater pedestrian access and connectivity within downtown, as shown in **Figure 2-3** (Conceptual Illustration for Euclid Avenue).

The public right-of-way of Euclid Avenue has an opportunity to be enhanced with the relinquishment of the historic corridor from California Department of Transportation to City of Ontario's ownership, as discussed in Section 1.2, allowing the street to transform into a multi-modal corridor, with mid-block pedestrian connections, high-visibility crosswalks, on-street parking, and bicycle lanes.



Local businesses with active storefronts along Euclid Avenue

Figure 2-2: Conceptual Illustration for Euclid Avenue

Figure 2-3: Conceptual Illustration for Euclid Avenue

Existing open space, referred to as the Cactus Garden, that fronts Euclid Avenue

Precedent Imagery for Euclid Avenue

2.1.2 Holt Boulevard

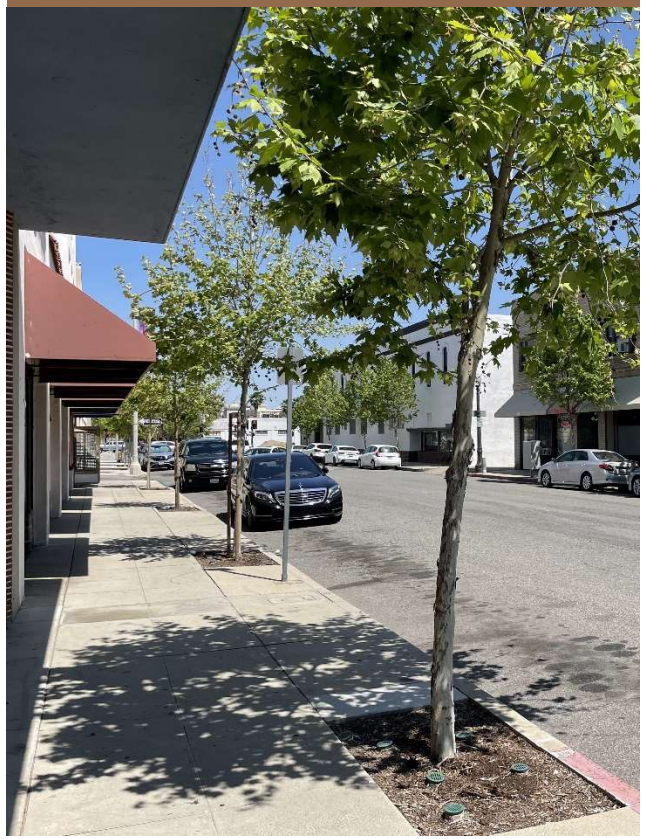
The future vision for Holt Boulevard, which serves as a key east-west corridor for the downtown and the southern boundary of PUD area, is centered on further establishing it as the southern gateway to downtown. To further define a sense of arrival to the downtown from Holt Boulevard, transit-oriented development and taller buildings frame the street and contribute to a distinctive skyline, serving as a visual beacon. The facades of the buildings are canvases for public art and murals, highlighting the rich history and identity of Ontario, as shown in **Figure 2-4** (Conceptual Illustration for Holt Boulevard).

With the future Bus Rapid Transit (BRT) station for the West Valley Connector at the intersection of Holt Boulevard and Lemon Avenue, Holt Boulevard is transformed into a multi-modal corridor that provides connections between downtown Ontario and major activity centers within San Bernardino County. First-last mile improvements, such as enhanced crosswalks, are in place to promote safe and convenient access for pedestrians, cyclists, and public transit users. Holt Boulevard also has a comfortable public realm with streetscape elements, such as pedestrian-scaled lighting, landscaping, and a mature tree canopy.

Figure 2-4: Conceptual Illustration for Holt Boulevard

Precedent Imagery for Holt Boulevard

2.1.3 B Street



B Street serves as pedestrian-oriented, east-west corridor within the PUD area, with a future vision as a vibrant “main street” where local businesses thrive. Historic facades and enhanced storefronts offer a setting for a diverse range of community-serving uses and amenities and housing. The upper floors of buildings fronting B Street, whether existing or new, create versatile spaces that can accommodate commercial and residential uses, as shown in Figure 2-5 (Conceptual illustration for B Street).

B Street has a unique public realm with overhead lighting spanning the street to create a pedestrian-scaled environment, parklets to provide outdoor dining to support restaurants, landscaped bulb-outs, enhanced crosswalks, and signage to guide visitors to the alley and Euclid Avenue. B Street is also lined with mature street trees that frame the street and offer shade for pedestrians. Pedestrian and bicycle mobility and safety are enhanced on B Street as a bicycle boulevard with intersection improvements.

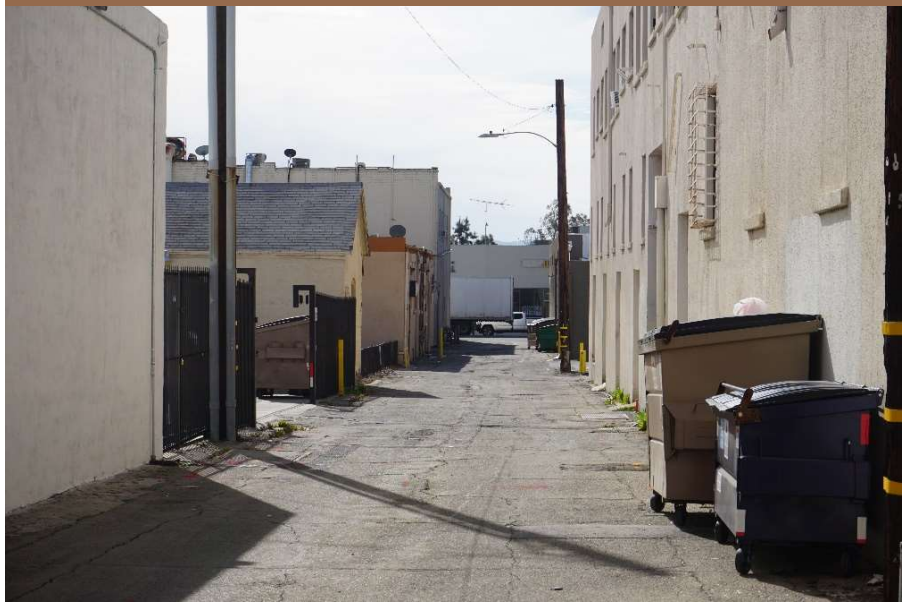
Existing Condition of B Street

Existing Public Realm on B Street

Precedent Imagery for B Street

Figure 2-5: Conceptual Illustration for B Street

Figure 2-6: Conceptual Illustration for B Street

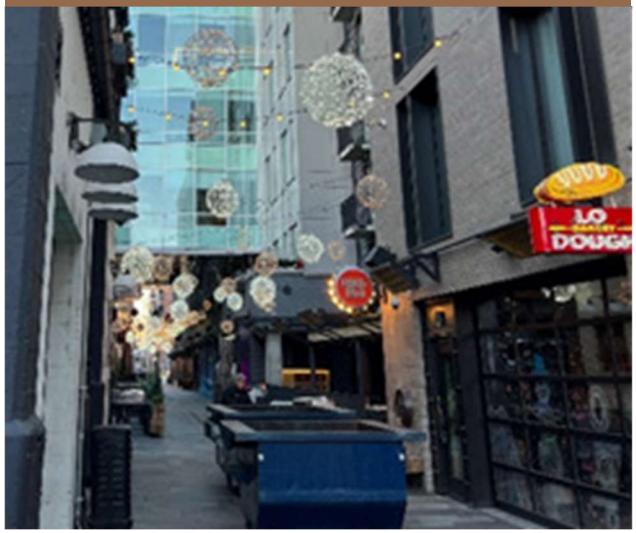


2.1.4 The Alley

The alley provides north-south access in the PUD area as a parallel path to Euclid Avenue, connecting east-west streets between E Street and Holt Avenue. The mix of active ground floor uses fronting Euclid Avenue extend their vibrancy to the enhanced alley with entrances, storefronts, outdoor dining, and greening that collectively create a lively and dynamic atmosphere, as shown in **Figure 2-7** (Conceptual illustration for the Alley). The enhanced alley features a special asphalt treatment to create a sense of place and human-scale and lighting that helps to distinguish it from other walkways. The alley also creates a flexible venue that can be temporarily closed to vehicular traffic to accommodate a variety of uses and activities, such as entertainment and music, cultural events, and community programming. Downtown Ontario's cultural identity is represented through interactive public art installations, murals, and sculptures that line the alley.

A pedestrian-focused and enhanced alley serves many purposes for the project area, depending on its specific block and the needs of the surrounding context. The alley is a space that integrates shared infrastructure, such as waste and trash services that are centrally located and accessible to support local commercial businesses. The alley is a preferred green and walkable path for pedestrians, connecting residents and visitors to parking, housing, and other destinations. To support this balanced and flexible vision, the alley segment between A block and B block is envisioned to support more functional alley infrastructure, while the segment between D block and C block adjacent to the Granada Theater is envisioned as a vibrant, active pedestrian-focused alley.

Existing Condition of the Alley

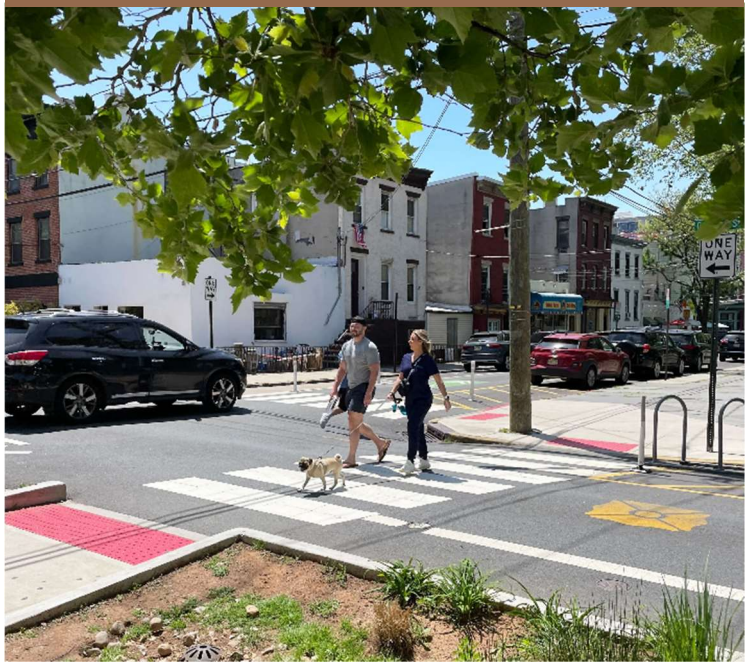


Existing Alley Gateway at Holt Avenue

Figure 2-7: Conceptual Illustration for the Alley

Precedent Imagery for the Alley

Precedent Imagery for the Alley



2.1.5 Laurel Avenue

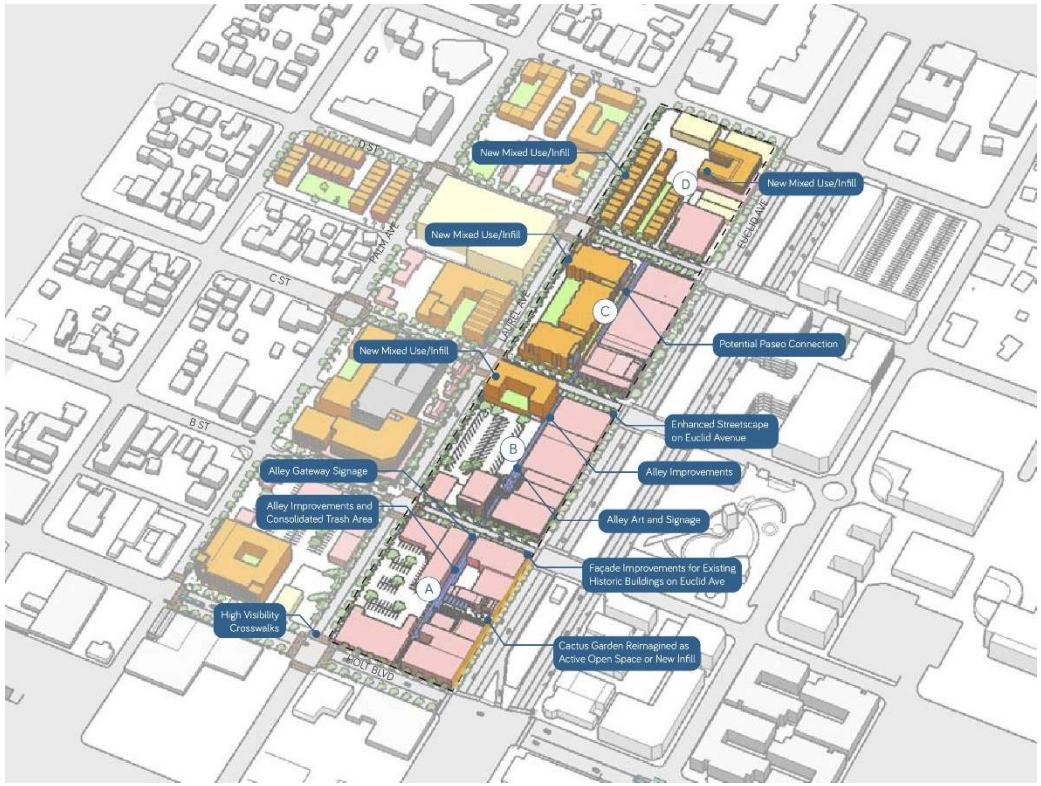
As a neighborhood greenway, Laurel Avenue is focused on the comfort and safety of pedestrians and cyclists by providing a local connection and route from the Mixed-Use Retail Core and Mixed-Use Transitional subdistricts to the heart of downtown. Laurel Avenue's public realm design includes improvements of pedestrian-friendly features such as enhanced crosswalks, a mature tree canopy, pedestrian lighting, and landscaping, as shown in **Figure 2-8** (Conceptual illustration for Laurel Avenue). Laurel Avenue has a mix of three to four story mixed-use or residential buildings with active ground floor uses that contribute to the character of the street.

Figure 2-8: Conceptual Illustration for Laurel Avenue

Precedent Imagery for Laurel Avenue

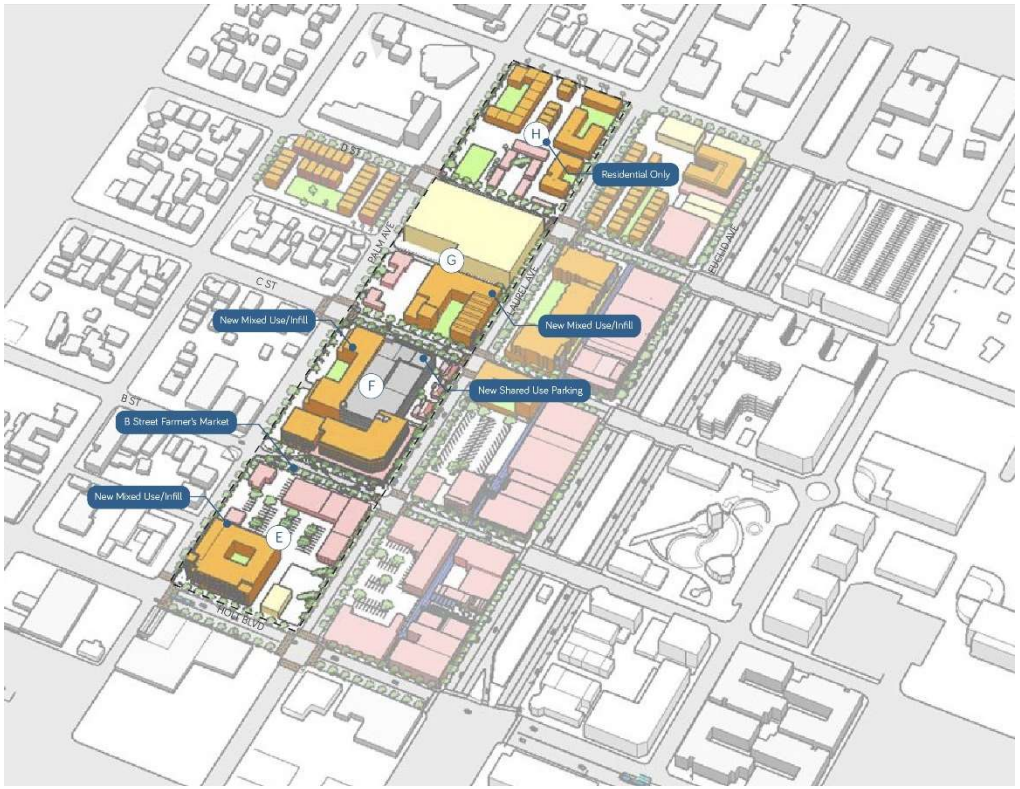
3 District and Block Plan

The District and Block Plan for the PUD area establishes the following sub-districts and blocks as shown in **Map 4 (PUD Sub-Districts and Blocks)** and described in the following subsection:



- **Downtown Mixed-Use Retail Core** sub-district encompasses Blocks A-D located between E Street to the north, Holt Boulevard to the south, Euclid Avenue to the east, and Laurel Avenue to the west.
- **Downtown Mixed-Use Transitional** sub-district encompasses Blocks E-H located between E Street to the north, Holt Boulevard to the south, Laurel Avenue to the east, and Palm Avenue to the west.
- **Downtown Residential** sub-district includes Block I located between D Street to the north, an alley connecting Palm Avenue and Fern Avenue to the south, Palm Avenue to the east, and Fern Avenue to the west.

Map 4: PUD Sub-Districts and Blocks



3.1 Downtown Mixed-Use Retail Core (Blocks A-D)

The Downtown Mixed-Use Retail Core sub-district encompasses Blocks A–D located between E Street to the north, Holt Boulevard to the south, Euclid Avenue to the east, and Laurel Avenue to the west. This sub-district includes blocks that front Euclid Avenue, the major north–south corridor within the PUD area that is envisioned as an 18-hour entertainment, shopping, and dining destination, and Holt Boulevard, a future multi-modal corridor. The purpose of the sub-district is to:

- **Enable a mix of commercial uses with strategic multi-family residential infill development** to support the creation of a vibrant mixed-use district where people can walk to a variety of neighborhood destinations.
- **Require active uses and active frontages along Euclid Avenue, B Street, Holt Boulevard, and the north–south alley** located between Euclid Avenue and Laurel Avenue through uses that generate pedestrian foot traffic, such as retail, restaurant, and entertainment, as well as design treatments that support a lively and comfortable public realm.
- **Along Euclid Avenue,** maintain **the visual character and development scale** of up to 45 feet (4 stories)not to exceed the height of historic buildings, such as the Granada Theatre to further protect and enhance the corridor as a major scenic and historic resource of the city.
- **Create an enhanced, vibrant, and active public realm and streetscape along Euclid Avenue** that is consistent with the existing elements located on the east side.
- **Promote safe and convenient multi-modal access** with enhanced public and private right-of-way that improves pedestrian and bicycle connectivity and encourages car-independent visits to and within downtown.
- **Provide a southern gateway on Holt Boulevard** and first-last mile improvements to support connections from the West Valley Connector Bus Rapid Transit (BRT) station at Holt Boulevard and Lemon Avenue to downtown.
- **Integrate shared infrastructure facilities,** such as parking, trash services, and open space opportunities to support new development and uses downtown.
- **Transform the north–south alley located between Euclid Avenue and Laurel Avenue, and the open space fronting Euclid Avenue on Block A referred to as the "cactus garden"** into publicly accessible open spaces for downtown users with activation, public art, and programming.
- **Create mid-block connections** along Euclid Avenue to provide greater porosity and pedestrian access to the alley.
- **Orient public artwork as part of new development within the public realm** to be visually and/or physically accessible to the public to showcase the culture and identity of downtown Ontario.

3.2 Downtown Mixed-Use Transitional (Blocks E-H)

The Downtown Mixed-Use Transitional sub-district encompasses Blocks E–H located between E Street to the north, Holt Boulevard to the south, Laurel Avenue to the east, and Palm Avenue to the west. The purpose of the sub-district is to:

- **Enable a mix of commercial uses and multi-family residential infill development that accommodates various housing typologies** that support the creation of a complete community and act as a transition from Downtown Mixed-Use Retail Core to existing residential neighborhood west of Palm Avenue. Support residential-only, multi-family infill housing in Block H.
- **Support development flexibility** by allowing vertical and horizontal mixed-use projects, as well as commercial and entirely residential projects. **Allow for variations in building height that respond to the surrounding context,** including lower heights along Palm Avenue in proximity to existing residential uses.
- **Enable greater height within the core of the sub-district** along Laurel Avenue of up to 50 feet (4 stories).
- **Encourage the transformation of Laurel Avenue into a neighborhood greenway** with pedestrian-scaled lighting, crosswalks and bicycle infrastructure, enhanced landscaping, and tree canopy to provide a safe and local connection for residents to downtown.
- **Introduce placemaking elements**, such as new suspended lighting, parklets, signage, landscape bulbouts, and enhanced crosswalks on B Street to enhance the sub-district and create an east–west "main street" with retail shops and services.
- **Orient public artwork as part of new development within the public realm** to be visually and/or physically accessible to the public to showcase the culture and identity of downtown Ontario.
- **Integrate shared infrastructure facilities, s**uch as parking and open space opportunities to support new development and uses in downtown.
- **Designate Block H exclusively for residential uses** to support additional multi-family housing that accommodates a variety of housing typologies.
- **Provide first-last mile improvements along Holt Boulevard** to support pedestrian and bicycle connections from the West Valley Connector Bus Rapid Transit (BRT) station at Holt Boulevard and Lemon Avenue to downtown.

3.3 Downtown Residential (Block I)

The Downtown Residential sub-district includes Block I located between D Street to the north, an alley connecting Palm Avenue and Fern Avenue to the south, Palm Avenue to the east, and Fern Avenue to the west. The purpose of the sub-district is to:

- **Support additional multi-family infill housing** that accommodates various housing typologies.
- **Ensure compatible development with surrounding low-scale residential neighborhood** through development and design standards.
- **Create height districts that respond to the surrounding residential neighborhood** and create transitions between new and existing development.

4 Zoning and Land Use Plan

The Land Use Plan for the PUD is organized by zoning districts which use the same boundary as the sub-districts established in Chapter 2. Zoning districts are defined and described in the following sub-section and shown in **Map 5 (Zoning Districts).**

4.1 Zoning Districts

4.1.1 Downtown Mixed-Use Retail Core (MU-RC)

The MU-RC Zone intends to:

a. Provide a variety of shopping, restaurant, entertainment, cultural offerings, and multi-family housing options within a mixed-use setting that promotes a vibrant district and pedestrian activity.

b. Reinforce and enhance Euclid Avenue's historic commercial character within Downtown Ontario through tailored ground floor uses that also support an active pedestrian environment, including retail, restaurant, and entertainment.

c. Support a diverse ground floor environment along Laurel Avenue through a mix of residential units and commercial uses, including residential units directly accessible from the sidewalk along all streets, except Euclid Avenue.

4.1.2 Downtown Mixed-Use Transitional (MU-T)

The MU-T Zone intends to:

a. Provide for a variety of neighborhood services and amenities and multi-family housing options within a mixed-use setting that promotes pedestrian activity.

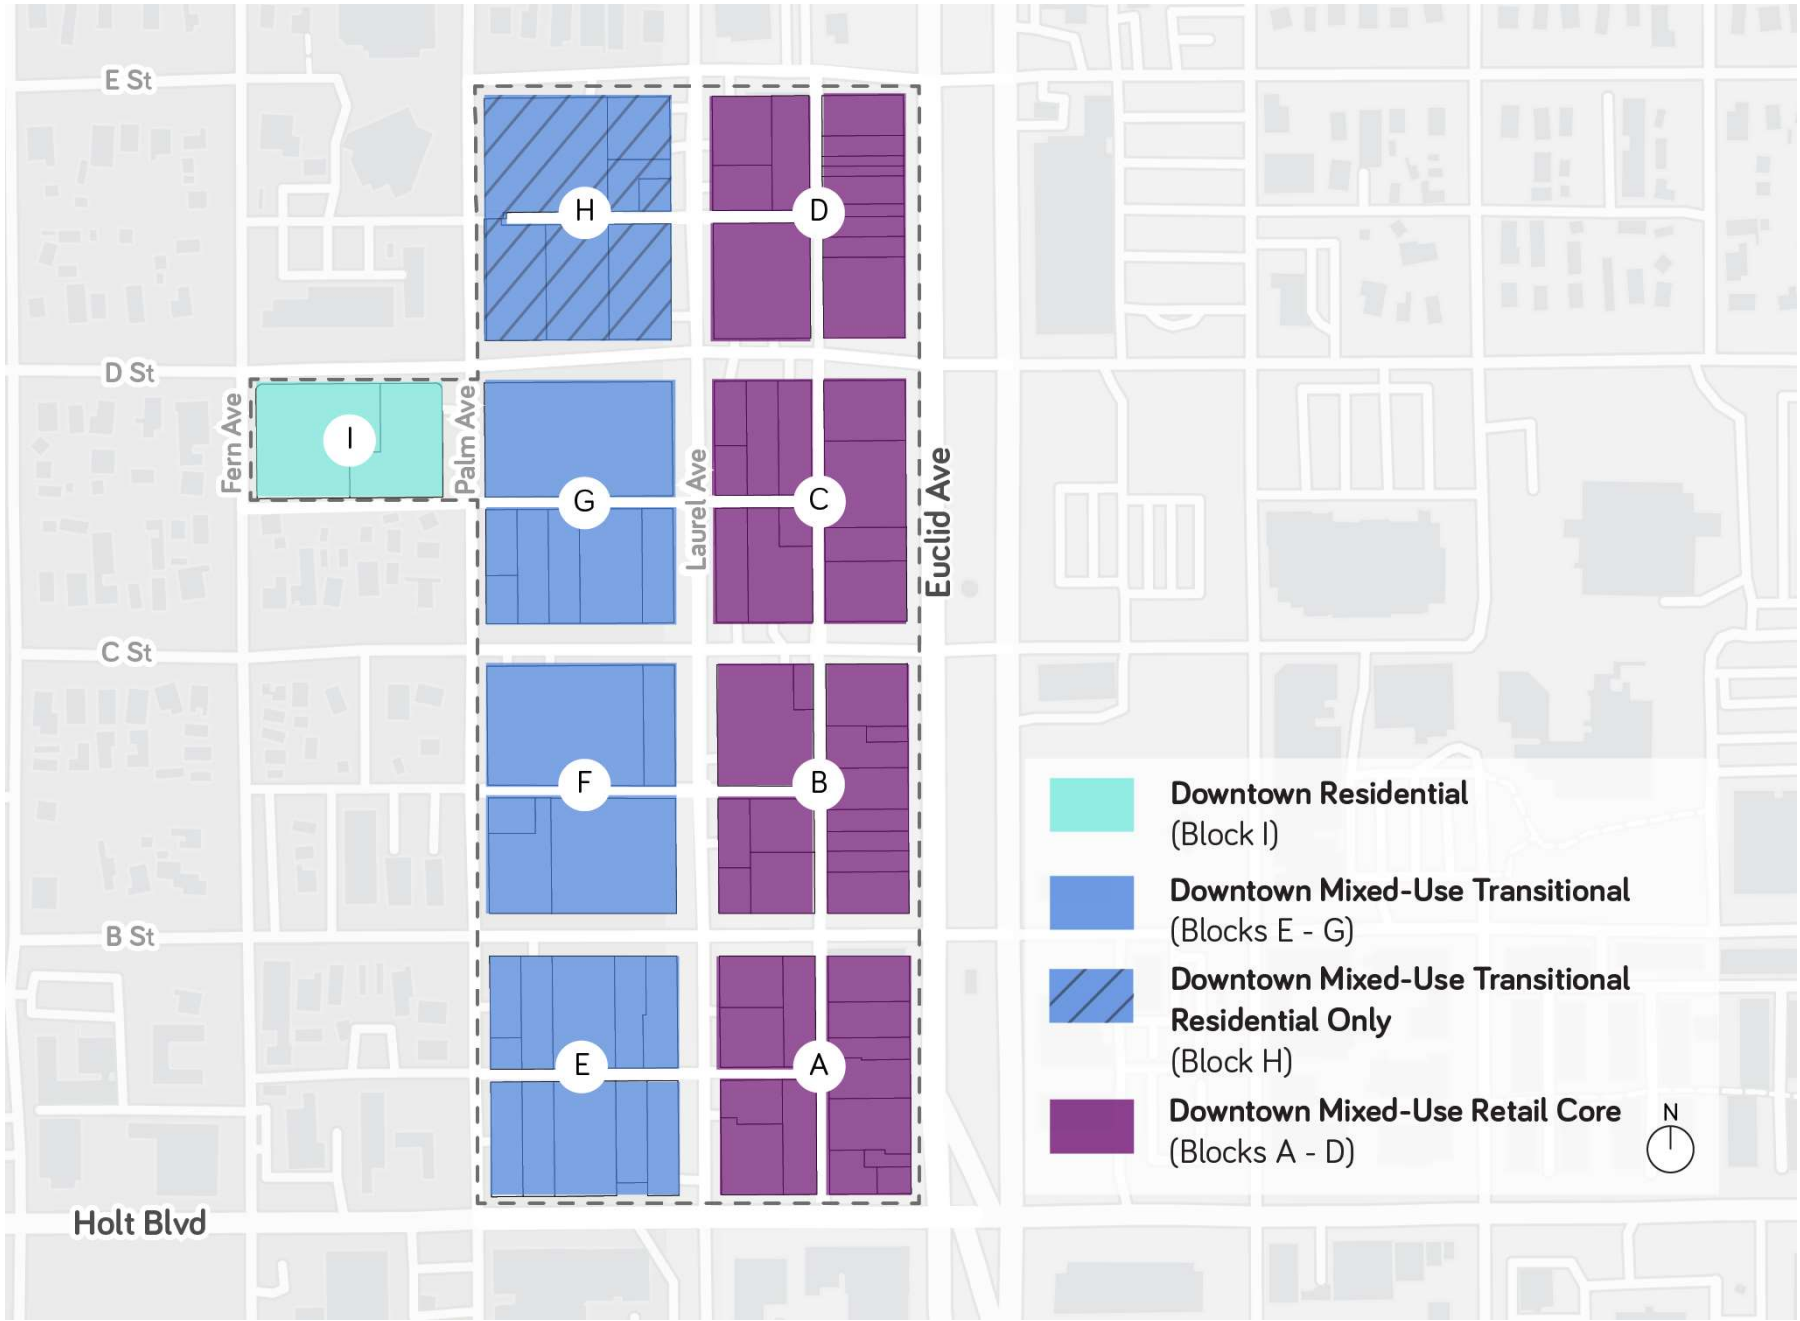
b. Support a diverse ground floor environment through a mix of residential units and commercial uses that focus on the provision of community-serving uses that support a complete neighborhood.

c. Support projects that are entirely commercial, entirely multi-family, or a mix of the two, either horizontally or vertically configured.

d. Require new development on Block H to be residential-only projects through the establishment of a distinct subarea to support more multi-family housing in downtown within walking distance to destinations and amenities.

4.1.3 Downtown Residential (DR)

The DR Zone intends to:



a. Provide a variety of multi-family residential housing options that create additional housing opportunities within Downtown Ontario and support residents who are within walking distance of services and amenities.

Map 5: Zoning Districts

4.2 Permitted Land Uses

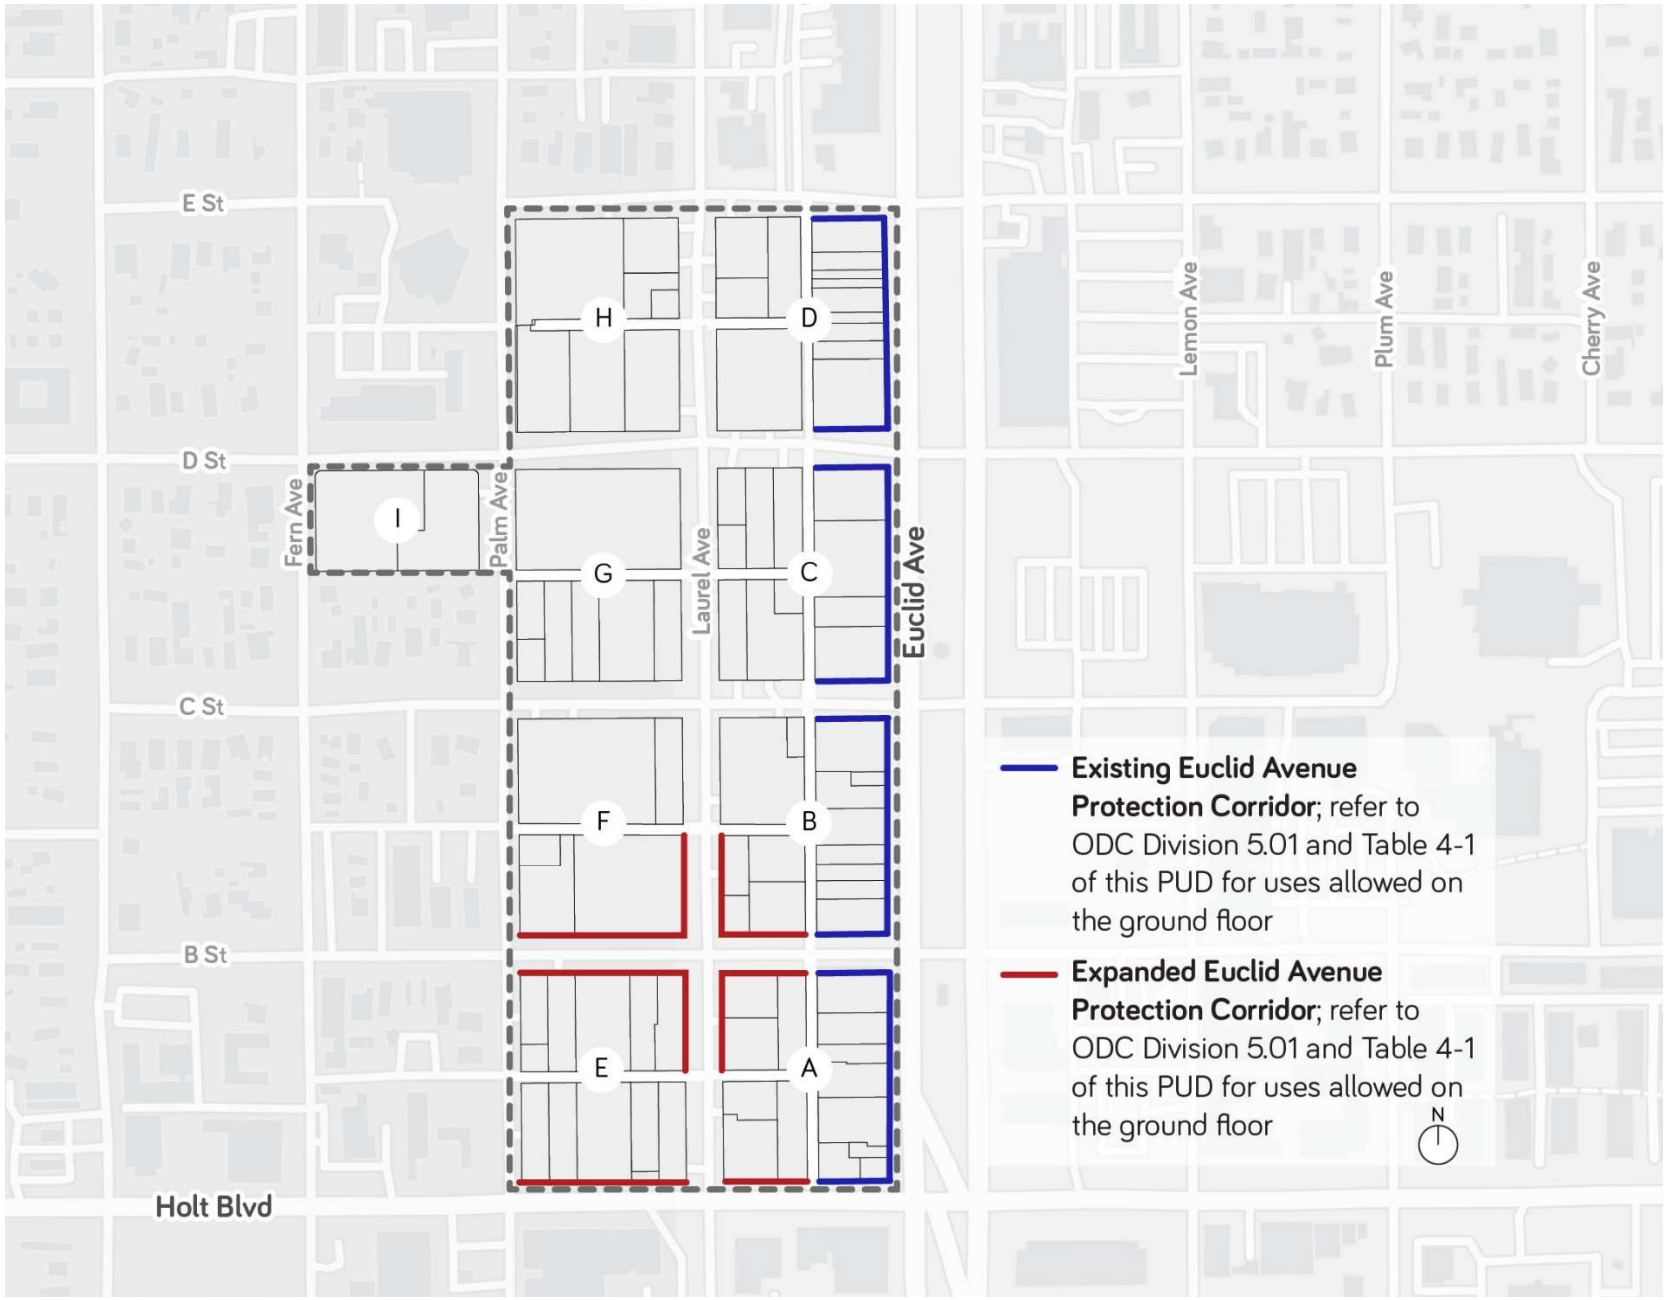
Permitted land uses, activities, and facilities in the PUD area which are not addressed in the Ontario Development Code are listed in **Table 4-1** (Permitted Land Uses by Zoning District). Details and full descriptions of specific land uses, activities, and facilities within each land use category are found in the Ontario Development Code Section 5.01 Land Use Matrix; definitions are included in Division 9.01 (Definitions) of the Ontario Development Code.

The Downtown West PUD defers to existing allowed land uses, activities, and facilities for those parcels located within the boundaries of the LUA-1 (Euclid Avenue Entertainment) sub-district of the MU-1 (Downtown Mixed Use) and Euclid Avenue (EA) Overlay Zoning Districts established by the Ontario Development Code. The EA Overlay District is established to protect Euclid Avenue as a major scenic and historic resource of the City. Within LUA-1/MU-1, the Euclid Avenue Protection Corridor is established by the Ontario Development Code to restrict ground floor uses fronting Euclid Avenue to retail, restaurant, and entertainment uses per Table 5.02 Land Use Matrix and Figure 5.01-2: MU-1 (Downtown Mixed Use) Zoning District Land Use Map of the Ontario Development Code. Uses not allowed on the ground floor along Euclid Avenue but permitted within the MU-1 Zoning District may occupy the upper floors to create a mixed-use corridor.

This PUD extends the Euclid Avenue Protection Corridor ground floor use restrictions per Table 5.02 Land Use Matrix of the Ontario Development Code to B Street, Holt Boulevard, and sections of Laurel Avenue as identified in **Map 6**. In addition, this PUD establishes a ground floor use restriction for residential uses as listed in Table 4-1.

The symbols shown in **Table 4-1** have the following meanings:

Symbol	Description	ODC Section
P	Permitted	-
C	Conditionally Permitted	Section 4.02.025 (Conditional Use Permits) of the Ontario Development Code
L1	Residential land uses are not permitted on the ground floor within 35 feet of the property line in specific locations indicated by Map 6. Entries to upper floor or ground floor spaces behind the 35 feet are allowed.	-



Promoting Ground Floor Land Use Flexibility

Aligned with the Euclid Avenue Protection Corridor, allowed ground floor uses along Euclid Avenue are limited to retail, restaurant, and entertainment uses per the Ontario Development Code. To further support and complement Euclid Avenue, this PUD establishes the same ground floor use allowances to portions of B Street, Holt Boulevard, and Laurel Avenue as shown in Map 6. However, to promote additional residential development in the PUD area and flexibility, this PUD establishes an additional ground floor restriction, L1, which indicates that residential uses are allowed on the ground floor beyond 35 feet of the property line as indicated in Table 4-1. L1 is intended to support development flexibility while ensuring that uses lining the sidewalk encourage pedestrian

Table 4-1: Permitted Land Uses by Zoning District

5 Development Regulations and Guidelines

This chapter sets forth standards to govern the placement, height and bulk of permitted buildings and other structures, and to establish requirements for vehicular access, parking and loading, open space, landscaping, and signs for commercial uses to be incorporated into Development Plans. Unless otherwise stated herein, all development within the PUD area shall meet the applicable standards and requirements of the Ontario Development Code.

Guidelines and informational text are woven throughout this chapter to communicate design principles and desired features for the PUD area for relevant topic areas. Guidelines, which are recommendations, are listed in a separate box adjacent to the relevant development regulations, which are required, to provide guidance to business owners, property owners, homeowners, City staff, and design professionals for the development and/or rehabilitation of properties in the PUD area. The design guidelines included in this chapter are complementary to the Downtown Ontario Design Guidelines, which are included as Reference "C" of the Ontario Development Code, which establishes a set of architectural, graphic, and lighting design principles within the City's historic original downtown area, which includes the PUD area.

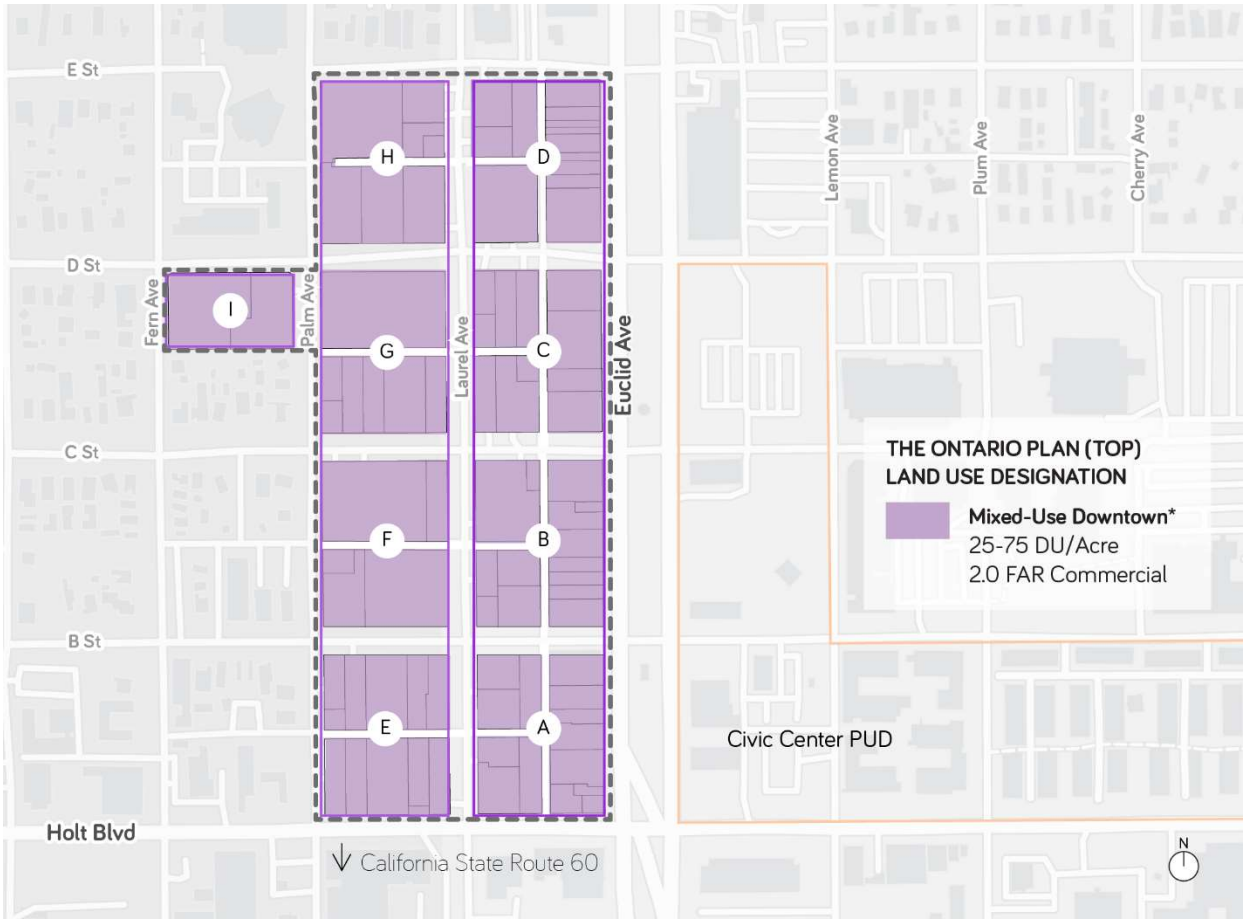
5.1 Applicability

The standards and guidelines established by this chapter shall apply to Development Projects (Project) within the PUD area for any new construction, addition, remodel, or reallocation requiring a building permit, encroachment permit, or other similar entitlement by the City.

Table 5-1 (Development Regulations Summary) provides an overview of development standards for the PUD area with references to specific sections, where applicable, for more detailed regulations and information.

Table 5-1: Development Regulations Summary Table

Standard	Zoning District		
	MU-RC	MU-T	DR
Density and Intensity			
Dwelling Units per Acre	25–75 DU/Acre		
Floor Area Ratio	2.0 FAR Commercial		
Building Height			
Allowed Height	**Map 8**		
Upper-Level Stepbacks	See Section 5.3.1		
Setbacks			
Street Setbacks	**Map 9**		
Other Setbacks			
Block A-G	None required		
Block H and Block I	**Table 5-2** (Minimum Setbacks)		
Minimum Building Separation	Individual buildings on the same lot must have a minimum separation of 10’ clear between structures. Other requirements for clearance between buildings as regulated by the Uniform Building Code.		
Allowable Encroachments into Required Setbacks	-	ODC Sec. 6.01-D.2 (Block H only)	ODC Sec. 6.01-D.2
Building Design			
Entrances			
Entrances			
Commercial	Along Euclid Avenue, Holt Boulevard, and B Street, all primary entrances for commercial uses shall be distinguished by architectural features or overhead projections, such as an awning or canopy.		
Residential	See Section 5.151		
Modulation			
Modulation	Projects shall provide a horizontal change in plane in the building façade of at least 1.5’ every 50’ linear.		
Transparency			
Blank Walls	Windowless expanses of walls shall not exceed 20’ length.		
Façade Articulation			
Façade Articulation	See Section 5.5.4		
Ground Floor			



Materials	A durable base material (12- 15 inches high min./max.) such as brick, tile, exterior cement plaster, or pre-cast architectural concrete shall be used.
Transparency	
Commercial	Glazing shall be clear glass to permit clear views into the interior space for a minimum of 70% of the ground floor.
Residential	Glazing shall be clear glass to permit clear views into the interior space for a minimum and 15% for residential units on the ground floor.
Doors	All glass doors are prohibited. Glass doors with kickplates are required. No part of any open doors shall extend into the public right-of-way.
Varied Roofline	
Varied Roofline	See Section 5.156
Roof Decks	
Roof Decks	Shall be stepped back a min. depth of 5' from the roof edge.
Open Space	
Private and Common Open Space	
Minimum Average Amounts	Min. average 200 sq. ft. combined open space per residential unit required through a combination of either private open space or common open space. At least 90 percent of residential units shall provide private open space at a minimum of 40 square feet.
Types	**Private open space**: balconies, patios, and rooftops decks with direct access from residential unit. **Common open space**: passive and active, indoor, and outdoor spaces, open landscaped and hardscaped areas, and roof decks and patios if available to building community.
Minimum Dimensions	**Private open space**: 40 sq. ft., min. of 6' for any dimension thereof. **Common open space**: 15 sq. ft.
Paseos	
Requirements	See Section 5.158 (2)
Landscaping	
Requirements	Detailed Landscape and Irrigation Plan required for each Development Plan; see Section 5.5.9.
Vehicle Access and Parking	
Vehicle Access	
Vehicle Access	Driveway locations shall be consistent with the City of Ontario's Traffic and Transportation Guidelines. Max. of 1 vehicle access point permitted per parcel as approved by the City Engineer unless required by the Fire Department. No vehicle access shall be taken from Euclid Avenue, B Street, or Holt Boulevard.
Off-street Parking and Loading	
Surface Parking	Setback a min. of 20' from primary frontage, 10' from open space, and 7' from back of sidewalk
Layout and Design	See Section 5.1.11 (2.a.i)
Required Number of Parking Spaces	**Table 5-4** (Parking Requirements)

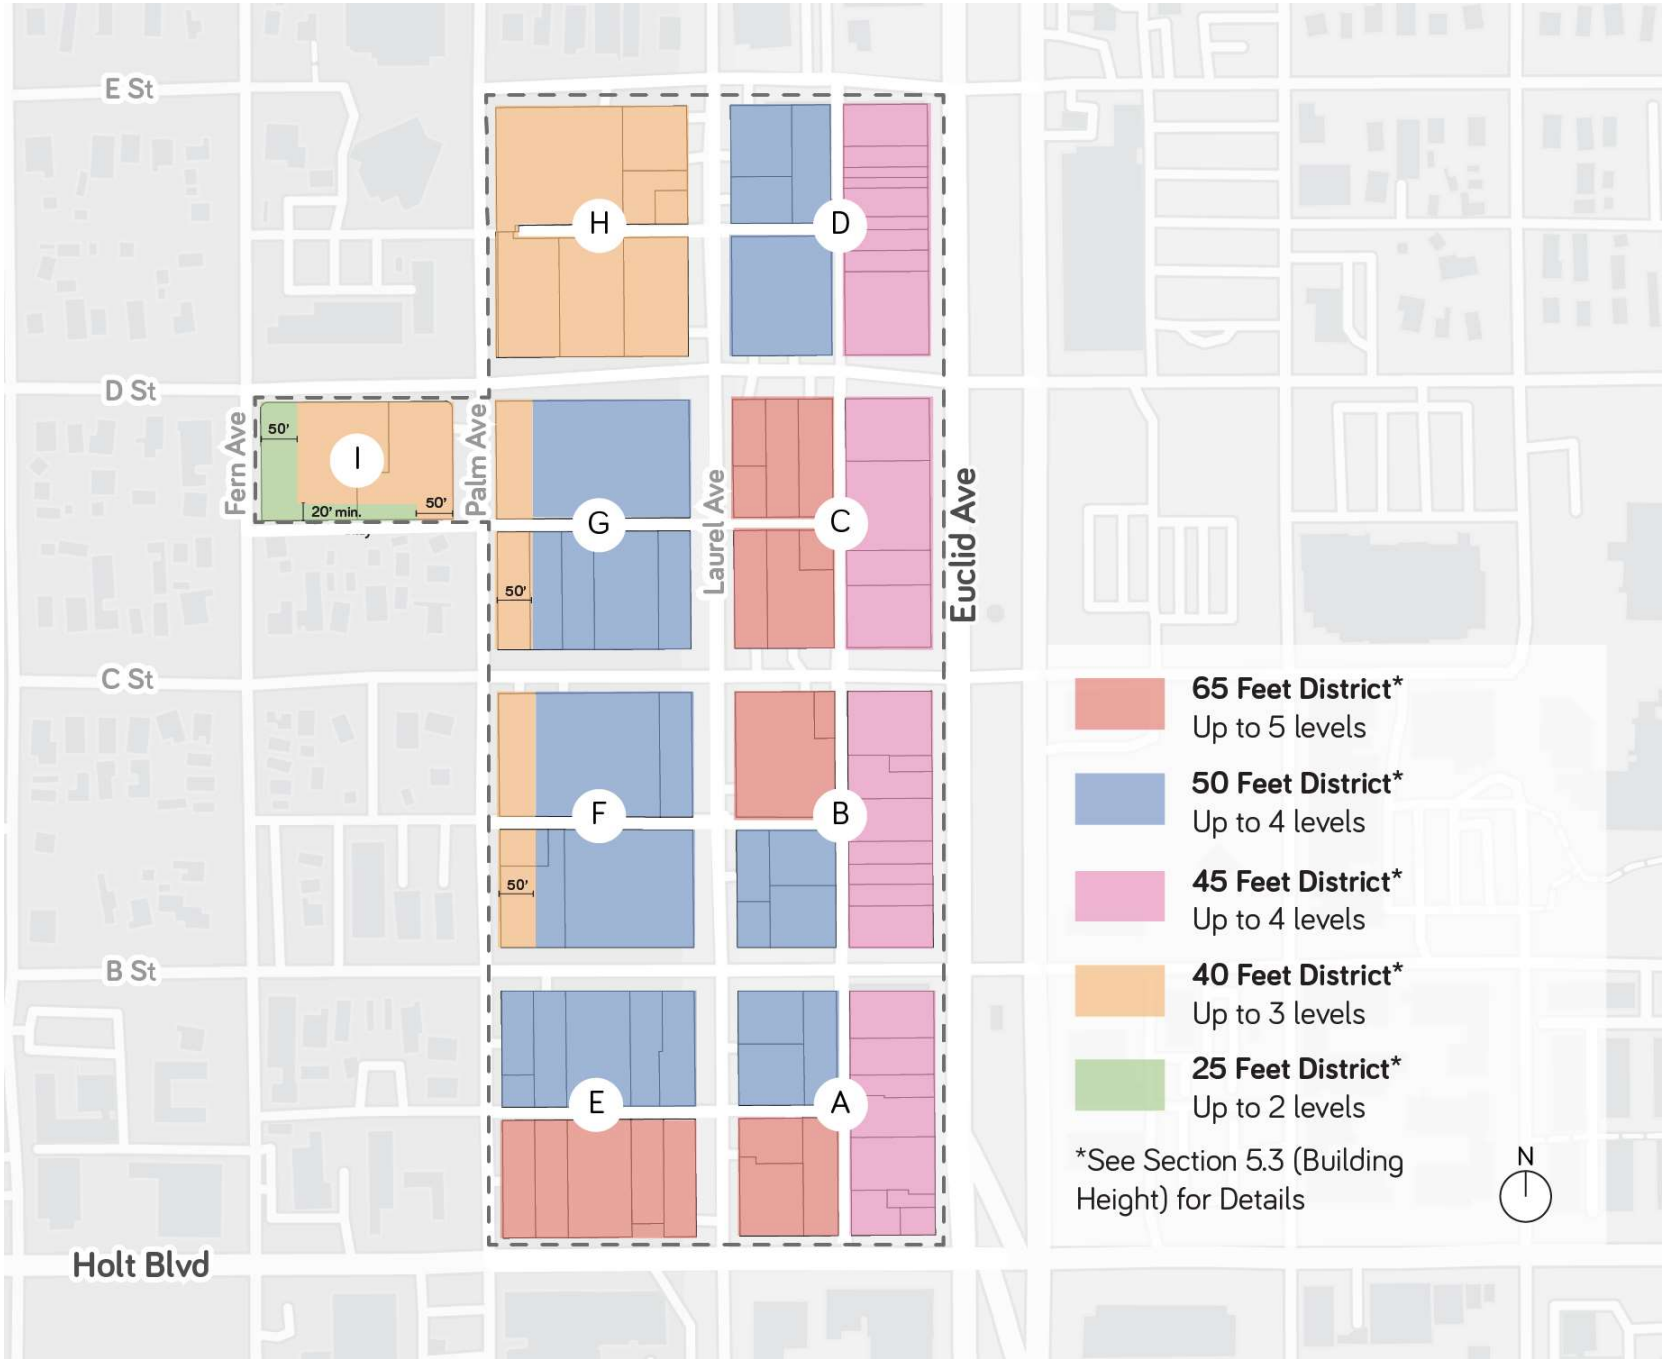
5.2 Density and Intensity

1. Density and Intensity. Residential densities (dwelling units per acre [du/ac]) and Floor Area Ratio (FAR) are defined for the PUD area by The Ontario Plan and designated as follows by zoning district, and shown in **Map 7 (Allowed Density and FAR):**

    a. Within the MU-RC, MU-T and DR Zones, the residential density range shall be 25–75 du/ac and maximum FAR shall be 2.0 for commercial uses; residential uses are only permitted on Block H and I.

Map 7: Allowed Density and FAR

5.3 Building Height



1. **Allowed Heights.** Total building height (to flat roofline or eave of roof) shall not exceed the heights specified in **Map 8 (Allowed Heights)** above the highest existing sidewalk elevation.
   a. **Architectural Projections.** Architectural projections, such as parapets, roofed towers and gable roofs, or elevator towers may extend up to 15 feet above the highest permitted height.
      i. **Rooftop Equipment.** Any rooftop mechanical, venting or communications equipment shall be built within or otherwise screened by the roof structure, so that they do not project above parapets and are not visible from any public rights- of-way or neighboring buildings.
   b. **Temporary Construction and/or Maintenance Machinery.** Temporary construction and/or maintenance machinery shall not exceed a height of 122 feet, measured from existing grade, unless approved by the Federal Aviation Administration.

Context Sensitive Building Heights

To implement the TOP and support the established maximum densities and intensities, block-specific height districts were created, which also respond to place-based conditions and goals. They include:

- Up to 65 feet (5 stories) along Holt Boulevard to create a southern gateway and enable additional height along this future multi-modal transit corridor to promote housing near transit, as well as along Laurel Avenue and west of the alley, between B Street (north of east-west running alley) and D Street, to focus height within the downtown core of the PUD area.
- Up to 50 feet (4 stories) along Laurel Avenue in strategic areas to focus height within the downtown core of the PUD area while responding to the existing scale and character.
- Up to 45 feet (4 stories) along Euclid Avenue with required 15’ upper story stepbacks to promote additions to historic resources while maintaining existing character.
- Up to 40 feet (3 stories) west of Laurel Avenue and north of D Street (Block H), as well as along Palm Avenue to support mid-rise multi-family residential projects and respect neighboring lower-scale residential.
- Transitional height districts are in place to reduce height of development surrounding residential neighborhood to the west of the PUD boundary for parcels fronting Palm and Fern Avenues.

Map 8: Allowed Heights

5.3.1 Upper-Level Stepbacks

1. **Upper-Level Stepbacks.**
   a. **Alley.** Projects with property lines that front the alley between C Street and D Street, connecting Palm Avenue and Fern Avenue, shall not exceed the height established in **Map 8 (Allowed Height)** before stepping back a minimum depth of 10 feet as measured from the existing façade.
   b. Uses allowed within the stepback include:
      i. Private Open Space (e.g., balconies, terraces);
      ii. Shade structures, trellises, and similar;
      iii. Green roofs and photovoltaic panels (screened by parapet roof); and
      iv. Other open space features per the Approving Authority.
2. **Upper-level Additions to Designated Historic Buildings.** Upper-level additions to buildings that have been identified as historic resources shall stepback a minimum depth of 15 feet as measured from the existing façade. See **Section 5.3.1 (1.b)** for the list of uses allowed with the stepback.

5.4 Setbacks

1. **Street Setbacks.** Projects shall comply with the street setbacks set in **Map 9 (Street Setbacks).** Street setback ranges establish a minimum and a maximum. Street setbacks are measured from the property line (back of sidewalk) to the building or structure. Property line(s) along public streets are subject to right of way dedication as required per the City Master Plan of Streets and Highways and Street Standard Drawings.

    a. **Minimum Setback for Ground Floor Residential Units.** Where residential units on the ground floor are allowed per **Table 4-1 (Permitted Land Uses by Zoning District**), a minimum setback of 5 feet is required.

    b. **Setback Features.** Features allowed within the street setback may include:

        i. Landscaping and planters;
        ii. Hardscape (e.g. stoops, patios);
        iii. Shade structures;
        iv. Arcades and galleries;
        v. Walls and fences per ODC Sections 6.02.020 and 6.02.025;
        vi. Seating and furniture;
        vii. Outdoor dining; and
        viii. Other open space amenities per the Approving Authority.

Street Setbacks

Street setbacks are established as ranges to support flexibility while responding to sub-district visions and the allowed uses on each block. They include:

- 0-3 feet setback to support existing commercial-only ground floor character and active public realm while promoting some variation.
- 3-10 feet min/max setbacks to support a commercial or residential ground floor character while promoting some variation.
- 5-10 feet min/max setbacks to support a residential-only ground floor character.

2. **Other Setbacks.**

    a. **Blocks A-G.** None required.

    b. **Blocks H and I.** All other required setbacks are listed in **Table 5-2 (Minimum Setbacks and Building Separation).**

3. **Minimum Building Separation.** Discrete buildings on the same lot must have a minimum separation of 10’ clear between structures. Other requirements for clearance between buildings as regulated by the Uniform Building Code.

Table 5-2: Minimum Setbacks

Location	Requirement
All Blocks	
Street Setbacks	See **Map 9 (Street Setbacks)**
Blocks A-G	
Other Setbacks	None required
Block H and Block I	
Interior Side	5’
Rear Setback	5’
Porches, Patio Covers, and Similar Architectural Projections[1]	See ODC Sec. 6.01 (Exceptions to Development Standards – Encroachments into Required Setback Areas)
Private Drives/Alleyways (from edge of drive aisle)	
Living Area	10’
Garages and other Nonhabitable Structures	5’
Dwellings to Parking Spaces	
Living Area	10’
Garages and other Nonhabitable Structures	5’
Parking Space or Drive Aisle to Wall or Fence	5’

[1] No projection may encroach into any required easements.

Map 9: Street Setbacks

5.5 Building Design

5.5.1 Entrances

1. **Entrances.** A minimum of one primary entrance shall be located on the primary frontage of each building and open onto a sidewalk or other public space. All primary entrances shall include a minimum of one lighting fixture designed to provide illumination of pathways for pedestrians.

    a. **Commercial**. Along Euclid Avenue, Holt Boulevard, and B Street, all primary entrances for commercial uses shall be distinguished by architectural features or overhead projections, such as an awning or canopy.

    b. **Residential.** In locations where dwelling units are allowed on the ground floor abutting a public or private street per **Table 4-1 (Permitted Land Uses by Zoning District)** and **Map 6 (Ground Floor Land Use),** the primary entryway (front door) shall be oriented toward the street. Where there is a physical site constraint, provide a clearly identifiable pedestrian entry to the site from the street.

        i. **Upper Floor Entries.** Entries to upper floor residential uses shall not front Euclid Avenue. When located on other street frontages with ground floor use restrictions per **Table 4-1 (Permitted Land Uses by Zoning District)** and Map 6 **(Ground Floor Land Use)**, the visible entry shall be no wider than 15 feet to avoid disturbing the rhythm of the retail spaces.

Designing Visual Interest and Complementary Building Materials

Building façades that articulate a mixture of horizontal and vertical projections help to visually break up the building mass into varying modulations and identified clusters to create visual interest.

Building exterior treatments including brick and smooth stucco finishes that complement the historic character of the PUD area are encouraged.

5.5.2 Modulation

1. **Modulation.** Projects shall provide a horizontal change in plane in the building façade of at least 1.5 feet every 50 linear feet. The Approving Authority may approve alternate exterior building designs that achieve the City's desired variation in building massing.

5.5.3 Transparency

1. **Blank Walls.** Windowless expanses of walls shall not exceed 20 feet in length.

5.5.4 Building Façades

1. **Window Treatments.** All windows shall have a recess minimum of 2 inches from the building wall plane. Window trim shall not be counted towards recessed minimum.

2. **Façade Articulation.** Façades facing a public or private street, the project perimeter, and all portions of exterior building elevations shall provide a minimum of two (2) of the following façade articulation techniques:

   a. Change in exterior building materials to include at least two high quality building façade materials that accentuate or correspond to variations in building massing. Building materials may include, but are not limited to wood, glass, brick, metal spandrel, cement board siding, tile, or other material acceptable to the Approving Authority.

   b. Porticos, awnings, terraces, balconies, eyebrows, or trellises of at least 12 inches in depth that provide variations in the building plane.

   c. A break in the façade plane of at least 8 inches in depth, which is applied to at least 10 vertical feet of the facade.

   d. Other additional architectural enhancements that create a human scale to the building. Examples include handrails, fixed planters, and ornamental details such as lighting, molding, tiles, or other similar design elements acceptable to the Approving Authority.

   e. **Encroachment.** Awnings, canopies, residential balconies, commercial signs, and decorative architectural elements may encroach into the public rights-of-way for a maximum of 4 feet.

Traditional Building Style

Traditional building styles are common in Downtown Ontario. To align with this traditional style, glass doors with a kickplate are encouraged for new development.

5.5.5 Ground Floor

1. **Materials.** A durable base material (12- 15 inches high min./max.) such as brick, tile, exterior cement plaster, or pre-cast architectural concrete shall be used.

2. **Transparency.**

   a. **Commercial.** Glazing shall be clear glass to permit clear views into the interior space for a minimum of 70% of the ground floor to create a traditional storefront. Display windows shall be kept free from all visual obstructions into the store itself, reflective tinting and mirrored glass is prohibited. Even if the business is a non-retail business, the windows shall be kept unobstructed to maintain appearance of facade and retail continuity along the sidewalk. To manage heat, glare, and Ultraviolet light (UV) energy, window tinting with 70% Visible Light Transmission (ULT) or greater may be allowed with approval from the Planning Department. Roll up window shades, or similar, may also be used during day light peak hours and for no

more than 4 hours per day. Installation of security gates over storefronts are prohibited. Installation of security gates behind storefronts located within the interior may be considered with approval from the Planning Department.

b. **Residential.** Glazing shall be clear glass to permit clear views into the interior space for a minimum 15% for residential units on the ground floor.

3. **Doors.**

a. All glass doors are prohibited.

b. No part of any open doors shall extend into the public right-of-way.

5.5.6 Varied Roofline

1. Any Project with a façade exceeding two stories in height, which faces a public or private street, shall be provided with an articulated roofline incorporating at least two of the following design elements:

a. A roof with a slope equal to or greater than 3 inches of rise for every 12 inches of run, including but not limited to a sloped or curved roofline at the top of the dwelling.

b. An open deck having a minimum clear area of 6 feet in depth and 8 feet in width.

c. A flat roof with a minimum of 2 feet vertical height difference for a minimum of 10 horizontal feet along the roofline of each building façade.

d. A vertical break in the façade plane of at least 1.5 feet in depth, which extends up and through the roofline.

e. Any form of roofline variation incorporating a change or break in roof plane, such as horizontal recesses, incorporation of dormers, or other similar design elements acceptable to the Approving Authority.

5.5.7 Roof Decks

1. Roof decks shall be stepped back a minimum depth of 5 feet from the roof edge to prevent direct views of abutting residential neighbors.

5.5.8 Open Space

1. **Private and Common Open Space.** Private and common open space shall be provided for passive and active recreation opportunities within each project site intended for the use of the on-site residents and their guests.

a. **Minimum Average Amounts.** A minimum average of 200 square feet of open space per residential unit is required through a combination of either private open space or common open space. At least 90 percent of residential units shall provide private open space at a minimum of 40 square feet.

i. Off-street parking spaces, drive aisles, driveways, loading areas, service areas, or street setbacks shall not be included in minimum open space calculations.

b. **Types.**

i. Private open space may include balconies, screened patios, and rooftop decks or in any combination thereof, and shall have direct access from each residential unit, intended for the exclusive use by the occupant of the residential unit and their guests.

i. Common open space may include passive and active, indoor, and outdoor spaces, recreational spaces, open landscaped and hardscaped areas with fountains, seating, fire pits, or play structures, pool, and indoor fitness center. Other open space provided can include roof-top decks and patios available to the building community.

c. **Minimum Dimensions.**

i. A minimum area of 40 square feet with a minimum dimension of 6 feet in each direction shall be required for private open space.

ii. A minimum dimension of 15 feet in each direction shall be required for common open space.

2. Paseos.

a. **Dimensions.** Paseos shall have an average width of 22 feet, a minimum width of 15 feet, and a minimum clear pedestrian path of 5 feet.

b. **Access.** Paseos shall be physically and visually accessible from the connecting public sidewalk.

c. **Elevation.** Paseos shall be at ground level and ADA accessible.

d. **Blank Walls.** Windowless expanses of walls lining paseos shall not exceed 20 feet in length, or be mitigated using one the following techniques:

i. Green wall, vines, or other vertical landscaping element that covers a minimum of 75 percent of the non-conforming blank wall area.

ii. Public art, including but not limited to, murals.

Residential Paseos

Paseos are encouraged for townhomes in the PUD area to provide internal access for pedestrians and break up building massing.

5.5.9 Landscaping

1. **Detailed Landscape and Irrigation Plan.** A detailed Landscape and Irrigation Plan, fulfilling the requirements listed in the City of Ontario Landscape Development Guidelines and the Ontario Development Code, shall be submitted with each Development Plan. The plan shall specify all landscape and hardscape elements of the common open space area, as well as the perimeter yards abutting the street rights-of-way and all street trees and irrigation. The final plan shall also show the location of all ground level utility boxes and mechanical equipment, along with methods of screening such devices from the public right-of-way and adjacent residences, where possible. A detailed Landscape and Irrigation plan shall be required prior to the issuance of building permits.

    a. Water Conservation in Landscaping Act Requirement. The detailed Landscape and Irrigation Plan shall comply with the Water Conservation in Landscaping Act of 2006 (AB 1881), commencing with the California Government Code Section 65591.

5.5.10 Vehicle Access and Parking

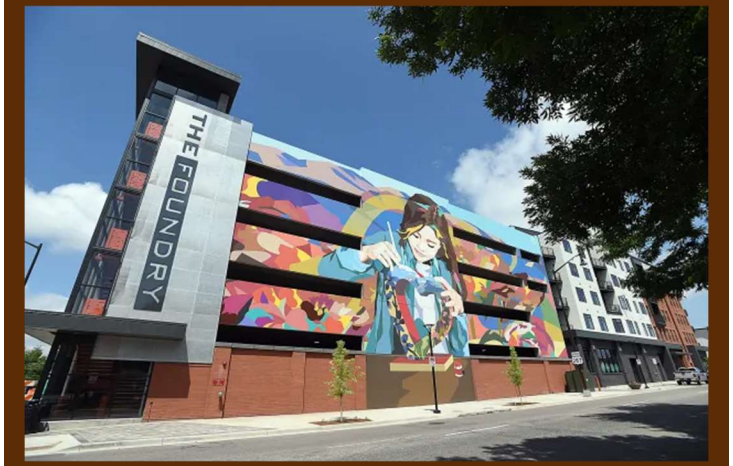
1. **Vehicular Access.** A maximum of 1 vehicular access point is permitted per parcel per the City of Ontario's Traffic and Transportation Guidelines as approved by the City Engineer unless required by the Fire Department.
    a. No vehicular access shall be taken from Euclid Avenue, B Street, or Holt Boulevard.
2. **Off-Street Parking and Loading.** Off-street parking and loading shall conform to the standards set forth in Division 6.03 (Off-Street Parking and Loading) of the Ontario Development Code.
    a. **Exceptions:**
        i. **Layout and Design.**
            1. **Surface Parking.**
                a. **Location.** Off-street surface parking shall be located to the rear of the interior side of a building and away from public streets.
                b. **Screening and Landscaping.** Parking areas shall be screened from public streets and adjacent parcels, except for access and driveways, using one or any combination of the methods listed below:
                    i. Walls and fences. Low profile walls or fences consisting of brick, stone, or stucco for a minimum of 3 feet and a maximum of 3.5 feet in height. Plain concrete blocks, chain-link, or vinyl fencing are prohibited for screening purposes.
                    ii. Planting. Plant materials consisting of compact evergreen plants that form an opaque screen that achieves a minimum height of 2 feet within 18 months after initial installation.
            2. **Structured Parking.** All off-street and above ground parking structures shall be screened from public streets and designed to be compatible with the architectural character and quality of adjacent buildings.
                a. **Ground Floor.** The ground floor level of any off-street and above ground parking structure shall use one or any combination of the methods listed below:

i. **Wrap.** Wrapped by habitable floor area, except for permitted entrances and exits, so that no portion of such facility is visible from adjacent public sidewalks or publicly accessible areas. Such habitable floor area shall have a minimum depth of 35 feet, as measured from the building façade.

ii. **Landscaping.** Landscaping for a minimum of 60 percent of the ground floor level of the structure's street frontage, excluding areas occupied by driveways and portions occupied by habitable floor area.

iii. **Screening.** Screening for a total of at least 50 percent of the ground floor façade, including permitted signs, graphic or sculptural art, decorative screening or latticework.

b. **Utility Transfer Boxes.** Placement of utility transfer boxes within a parking structure is prohibited.



3. **Residential Tandem Parking.** Allow up to 50% tandem spaces for required parking for residential uses. Tandem parking shall be limited to a two (2) car maximum. Both spaces in the tandem arrangement shall be assigned to the same dwelling unit. Handicapped and guest parking spaces shall not be in tandem.

ii. **Required Number of Parking Spaces.** The number of off-street automobile parking spaces required are listed in **Table 5-3 (Parking Requirements)** based on general use classification, and subject to the following requirements:

1. All required residential parking spaces shall be provided on-site.
2. Commercial and visitor parking may be considered for off-site location within a public facilities or on-street with a parking demand and supply study approved by the Planning Director.
3. Parking for dwellings shall be provided on-site and guest parking may be provided on-street and off-site.
   a. Off-site parking requirements are subject to the following conditions:

Parking Structure Design

Design standards for parking structures are intended to minimize the visual impact on the public realm. Treatments such as landscaping and screening, as well as wrapping the parking structure with active uses, such as retail or restaurants, can help to activate the ground floor of the structure adjacent to the sidewalk. Parking structures can also include decorative screening and art, such as murals, to complement the building design.

Source: Loveland Reporter-Herald

i. On-street parking shall not be used for required resident parking.

ii. On-street parking shall only be counted along the public streets that are within approximately four blocks from the project site.

iii. On-street parallel parking spaces shall be calculated by the length of unobstructed curb adjacent to the project site.

iii. Parking Management Plan: A parking management plan shall be submitted to the Planning Director for approval to ensure that tandem parking spaces will be assigned to residents of the same dwelling unit.

Parking in Downtown Ontario

A park once strategy is encouraged in Downtown Ontario in which business patrons and visitors park in a single location and make multiple trips on foot, given the pedestrian-oriented nature of the area. Public transit is also available in Downtown Ontario, with an existing bus stop located in the northeast corner of Euclid Avenue and D Street for Omnitrans Route 83. Additionally, located near Euclid Avenue on Holt Boulevard is Omnitrans Route 61 which has been identified as the future West Valley Connector Bus Rapid Transit (BRT).

Table 5-3: Parking Requirements

Use	Number of Spaces Required
Residential	1 space per bedroom up to two bedrooms 2 spaces per unit for three bedrooms and above 0.20 spaces per unit for guest/visitor parking
Commercial	1 space per 250 square feet gross floor area for all permitted or conditionally permitted use

5.6 Signs

1. **Master Sign Program.** A Master Sign Program shall be submitted for approval by the Planning Department, prior to issuance of a building permit, for new development or adaptive reuse projects. The sign program should be consistent with the Downtown Ontario Design Guidelines and the Development Code, and shall include tenant signs, pedestrian signs, directional signs, historical markers, etc. as needed.

Signs for Downtown Ontario

Sign programs that utilize complementary materials, colors, and themes that draw from existing buildings and Downtown Ontario, and consistent with the Downtown Ontario Design Guidelines, are encouraged. Specifically, themes for sign programs should be aligned with the Downtown Ontario Design Guideline's Historic Preservation Retail Subdistrict for the PUD area. Signage should be designed to effectively communicate and direct users to various aspects of the development, including amenities, such as publicly accessible open space or paseo connections, and complement the overall character of the buildings. Examples of existing buildings and signs that represent the existing character of Downtown are shown below for reference.

5.7 Service Facilities

1. **Electrical Equipment.** Electrical equipment shall be mounted on the interior of a building or mitigated through being enclosed and screened from public streets with walls, fencing, and/or landscaping that allows for sufficient ventilation or buried in vaults.
2. **Antenna Pole or Dish.** No antenna pole or dish shall be placed on any structure so that it is visible from ground level.
3. **Service and Storage Areas.**
    a. Locations, sizes and design of service and storage areas shall be readily accessible by trash disposal company equipment and work crews, as reviewed and approved through the Development Plan Approving Authority.
        i. **Commercial.** Trash receptables/recyclable container storage areas shall be provided for all commercial uses. When located within the ground floor parking structure area, storage areas may be partially enclosed.
        ii. **Residential.** Trash receptacles/recyclable container storage areas shall be provided for all residential uses, within the ground floor parking area or within an enclosed room inside the buildings. When located within the ground floor parking structure area, storage areas shall be full enclosed.

5.8 Infrastructure

It is important that projects maintain and enhance the quality of life for residents and consumer alike, and that new projects enhance the community within which it is built. To that end, all projects constructed within the City shall be properly served by a full array of utilities – water, sanitary sewer, storm drain, electrical, gas, telecoms, data, etc. The properties within the boundary of this PUD shall be served by existing water lines and wastewater flows and/or upgraded to satisfy the required capacities as determined by the City and its service purveyors/agencies, including the Fire Department. If existing utilities do not exist to service the project, the project may be required to install new utilities and/or extend existing utilities as needed to provide service. Existing utilities are also subject to improvement, such as removal and replacement or upsizing, to meet demand. On-site stormwater drainage facilities shall be provided consistent with the San Bernardino County Stormwater Program's Water Quality Management Plan (WQMP) requirements for new development projects. Stormwater capture and infiltration facilities may include the utilization of vegetated swales, depressed landscaped basins, pervious concrete pavement, and/or underground stormwater retention/infiltration vaults.

The properties within the boundary of this PUD are considered a Priority Land Use (PLU). A PLU shall comply with the statewide Trash Provisions adopted by the State Water Resources Control Board (SWRCB) and trash requirements in the most current San Bernardino County Area-Wide MS4 Permit. Drainage from the PLU shall be designed with conveyance tributary to a Full Trash Capture System which has been approved by the SWRCB.

5.9 Historic Preservation

5.9.1 Brief Development History of Ontario and the PUD Area

Downtown Ontario and Euclid Avenue - 1885

The City of Ontario was established in 1881 when George and William Chaffey purchased 6,218 acres of land to develop a community called the Ontario Colony. Initially the colony was surrounded by undeveloped land, Southern Pacific Railroad tracks to the south, and the Kincaid Ranch and San Antonio Canyon to the north. The two-hundred-foot-wide Euclid Avenue and landscaped parkway were developed along eight miles through the community from San Antonio Heights at the base of the San Gabriel Mountains south to the Southern Pacific Railroad Tracks. The median was landscaped Pepper trees and Palm trees and the street and curb were made of granite cobble stones. Likewise, miles of cement pipes were laid to provide water to the town. Land in the community became available for purchase by November 1882. Settlers were given a provision of water that is proportional to their land acreage, an innovation in city planning that alleviated problems settlers faced elsewhere. By 1886, the Chaffey brothers sold their interest in Ontario to Charles Frankish and moved to Australia to develop similar planned community. Frankish expanded the town and formed the Ontario Land and Improvement Company. The Downtown Area of Ontario encompassing the PUD area developed as an extension of the original irrigation system and subdivision grid established by the Chaffey Brothers in 1881 (City of Ontario 2023a; City of Ontario 2013: 1; Arroyo Group 1998: 4).

In 1891, Ontario was incorporated as a city and adopted a City Council. The City's industry was primarily focused on agriculture and much of the area contained citrus groves. In addition to citrus, the harvest of peaches, walnuts, and grapes were prominent in Ontario (City of Ontario 2023a). The City's location included a gradual incline that provided the ideal landscape for gravity irrigation that supported the areas agricultural. As an Act of Congress of the Unites States, Ontario was declared the "Model Colony" in 1903 because of its high standard of urban development and innovative planning (City of Ontario 2023b).

5.9.1.1 Commercial Development

The majority of Ontario was agricultural during the late 1880s into the 1930s, when much of the city was undergoing large-scale residential, commercial, manufacturing and civic development. Commercial buildings from this period, such as the Old City Hall (built in 1937), Citizens Bank Block (built in 1895) and the Frankish Building (built in 1916), display the Period Revival styles such as the Italianate and Mediterranean style as well as brick commercial buildings (City of Ontario Planning Department 2012). The major commercial throughfares running east to west or north to south through the community were established to accommodate the infrastructure needs of a growing population and the inhabitants of the new single-family residential tracts, to the north, east and west of the downtown, constructed during the 1920s, to the 1940s.

Development of the city's downtown and the PUD area during the 1950s saw the construction of single-story Modern style commercial buildings or facade rehabilitation of existing storefronts to "modernize" the aesthetics in downtown in an attempt to compete with new low-rise strip commercial style centers

located outside of the downtown. Some of the former residential buildings constructed in the Victorian style were converted to commercial use. It was common that styles typical for residential buildings were used for the new construction of commercial buildings. Commercial buildings located near residential neighborhoods often exhibit a small scale, one-story height, a front yard setback, low-pitched roof, and large windows (City of Ontario 2013: 2).

5.9.1.2 Residential Development

Early residential development in Ontario began with the establishment of the Ontario Colony in 1881. After land became available for purchase in 1882, a purchaser would buy a lot within the tract and construct residences in whatever architectural style and size of their choosing. Often these rural residences were associated with agricultural property as well, and an electric railway along Euclid Avenue provided efficient travel between the scattered properties (City of Ontario 2023a; City of Ontario 2013: 1; City of Ontario 2005: 1).

After the Ontario Land and Improvement Company in 1886, the development of Victorian style large single-family residences occurred along Euclid Avenue, Holt Boulevard (A Street), and on Emporia Avenue (known as Developer's Row). During the early 1900s, small and large sized Victorian style homes were constructed in the neighborhoods located north and west of the project area. Soon the Craftsman style homes became the predominant style until 1920. The boom of the 1920s saw an increase in residential development further away from the downtown core as the oil, citrus, and tourism industries increased. During the Great Depression, homes were generally constructed with less decoration in a more modest style. Although jobs associated with construction funded by the WPA spurred population growth during the late 1930s, the 1940s saw a decline in construction until 1944 when the city's industry shifted to post-war production. Nearly 743 new residences were constructed by 1946 often in the Early Post War Tract, Minimal Traditional, and Ranch styles (City of Ontario 2013: 2).

By the 1950s, development of the city's downtown saw the demolition and replacement of many of the Victorian style residences along Euclid Avenue, the retail corridor. Some homes were converted to commercial uses while other were replaced with mid-century modern commercial buildings or relocated elsewhere in the city (City of Ontario 2013: 2). However, many of the historic Victorian and Craftsman homes located in the Downtown West neighborhood have been preserved and are present today.

5.9.2 Relevant Regulatory and Guidance Document References

The following section provides an overview of the relevant documents that are utilized by the City to determine findings related to the suitability of construction activities in the plan area. To ensure that any proposed project within the plan area involving new construction (infill), addition, alteration or demolition (full or partial), a Certificate of Appropriateness is required to ensure the preservation of the historic resource and any surrounding resources including their character defining features and integrity (see section 6.9.3.3 below). Additional reference documents and resources for historic preservation guidance are provide in **Section 8.1.**

5.9.2.1 Local Historic Preservation Ordinance

Ontario's Historic Preservation Program seeks to preserve and protect the significant architectural, historical, and cultural resources, which reflect Ontario's unique character and heritage. Planning staff along with the Historic Preservation (HP) Commission and the Historic Preservation Sub-Committee, who are appointed from the HP Commission, review all historic preservation applications, including proposed alterations to the exterior of historic buildings and alterations to public improvements, such as street trees that are located within Ontario's historic neighborhoods. The Historic Preservation Program implements the Historic Preservation Ordinance by processing Certificates of Appropriateness or Waivers for minor alterations, restoration, and rehabilitation, Landmark Designations for

local, state, and national registers, historic property evaluations, historic property surveys, and ensuring environmental compliance. The Program offers incentives for historic preservation such as the Mills Act Contract (Preservation Agreements), bronze plaques, the use of the California Historic Building Code, and the City Council hosted Model Colony Awards for historic resources within the City. Staff is currently preparing an Adaptive Reuse Ordinance (ARO) to further incentive preservation of historic buildings. Additionally, the City coordinates and collaborates with the local non-profit Ontario Heritage and other organizations to promote, inform, educate, and celebrate historic preservation and the program.

In 1983, a group of volunteer citizens, under the leadership of a qualified historic resource consultant, and funded by the State of California Office of Historic Preservation, surveyed nearly three thousand properties within the City that were at least fifty years of age at the time. Intensive level surveys and nominations were completed and submitted to the Office of Historic Preservation and the National Register of Historic Places for hundreds of properties thought to be historically eligible for designation. In 1991, the City Council had adopted the City's first Ordinance intended to preserve historic resources through identifying processes for nomination, designation and appropriate treatment for alterations and additions of historic resources. Through the mid-1990s, a few amendments to the Ordinance were approved which further developed the program. During the late 1990s, the Planning Commission was assigned the duties of the Historic Preservation Commission and the Planning Department allocated staff to the historic preservation program. During this period, the program grew at a rapid rate designating nearly 60 landmarks and 5 historic districts. Additional updates were made in 2001, 2003 and in 2015, with a comprehensive Development Code update dividing the Ordinance into 2 sections. The Ontario Development Code Chapters 4 and 7 establish the City's scope of historic preservation activities and is the primary body of local law relating to historic preservation. Division 7.01 includes the purpose and authority for historic preservation, and Division 4.02 includes criteria for local historic designation and procedures for the alteration or demolition of historic properties.

On August 7, 2001, the City became a Certified Local Government (No. 46) by the State of California. To date, there are approximately 69 local governments within the State of California that participate in the CLG program. Pursuant to the National Preservation Act of 1966 and as amended in 1980, the Certified Local Government (CLG) program encourages the preservation of cultural resources by promoting a partnership among local governments, the State of California Office of Historic Preservation (OHP), and the National Park Service. Becoming a CLG, through the development and implementation of the local historic preservation program which is based on federal (The Secretary of Interior Standards) and state standards, provides the local jurisdiction the tools, technical training, and more meaningful leadership roles in the preservation of the community's cultural heritage. The six (6) basic requirements to maintain certification are listed below:

1. Maintain a comprehensive local historic preservation plan that identifies the preservation mission, goals, and priorities of the local government.
2. Enforce appropriate local legislation for designation and protection of historic properties.
3. Establish and maintain an adequate and qualified historic preservation review commission and non-commissioned staff.
4. Maintain a system for the survey and inventory of historic properties.
5. Provide for adequate public participation in the local historic preservation program.
6. Review and recommendation of historic properties within the local jurisdiction to the National Register of Historic Places.

The State of California conducts the annual review from each period beginning October 1st and ending September 30th to ensure that each CLG continues to meet the minimal requirements for participation and is satisfactorily performing its responsibilities. Pursuant to the CLG requirements, the HP Program oversees reconnaissance and intensive level surveys and is responsible for maintaining a Historic Resource Inventory (HRI) which includes surveyed properties, potential, proposed, designated and eligible properties. Staff works directly with the Historic Preservation Subcommittee, who are the keepers of the Ontario Register of Historic Properties, to review surveys and determine levels of historic significance and eligibility to the Ontario Register.

5.9.2.2 Downtown Design Guidelines

The Downtown Design Guidelines (adopted in 1998) feature a set of architectural, graphic, and lighting design principles that provide guidance on rehabilitation of historic resources and makes recommendations on new infill construction that is located within the City's historic original downtown area. The Guidelines were prepared to recognize and enhance the character of downtown. The recommendations are grounded in best practices and are consistent with the Secretary of the Interior Standards for the Treatment of Historic Properties. Section 1. Concept Plan identifies seven element districts, including the Euclid Avenue median, Historic Retail District, Civic Center, Museum/Transit Center, Education center, Residential neighborhoods, and Neighborhood commercial, within the downtown area. The PUD area straddles the Historic Retail District and the Residential Neighborhoods areas defined in the guidelines, each of which are summarized below, and shown in **Figure 5-1**. The Guidelines should be referred to throughout project development.

5.9.2.2.1 Historic Retail District

Section 2A. Architectural Design Guidelines: Retail Districts, establishes three subdistricts within the Historic Retail District based on the ages of buildings in the subdistrict as they relate to major architectural development periods within the overall area:

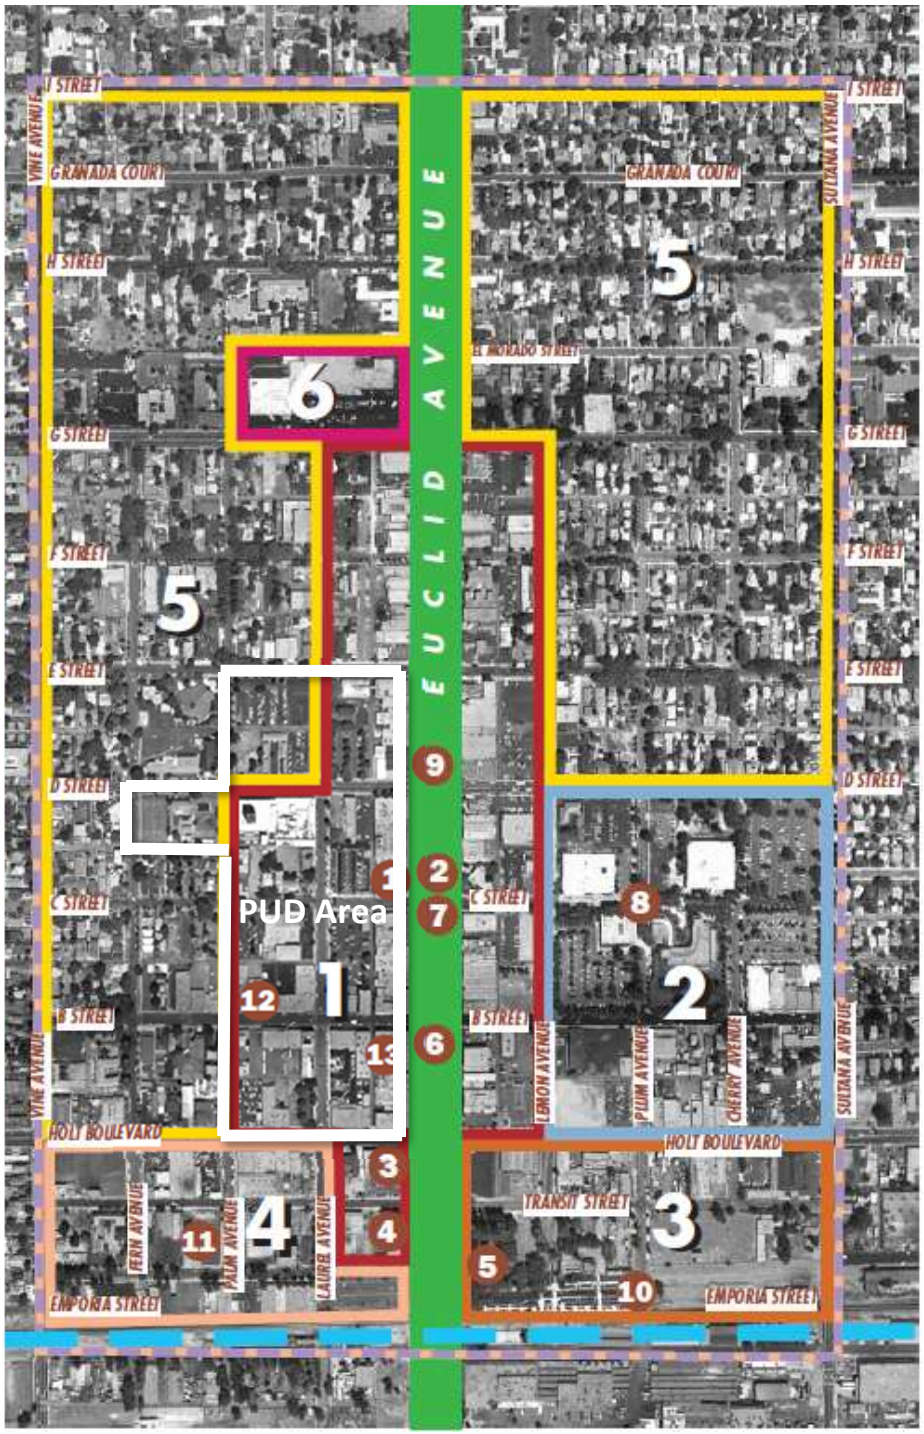
1 **Historic Turn-of-the-Century Subdistrict** (1880s to 1910s),

2 **Historic 1920s -1940s Subdistrict**, and the

3 Historic 1950s Subdistrict

The section also establishes three categories of buildings that appear throughout the each of the subdistricts within the Historic Retail District, and specific guidelines that should be followed for the preservation, rehabilitation, and restoration of the buildings within each category:

- **Designated Buildings**: Presently Listed on the Ontario Historic Building List and maintain a high degree of historic integrity,
- **Significant Buildings**: Buildings constructed before 1950 for which historical development information is available. The original architectural features and elements of the building are intact but may be obscured by new additions, and
- **Context Buildings**: Buildings constructed before 1950 for which no historical development information is available and/or no original architectural features and elements remain.



For Designated and Significant Buildings within the Historic Retail District, the guidelines provide architectural design guidelines in the areas of design, materials, color, signage, and lighting.

For Context Buildings and new infill construction within the Historic Retail District, the architectural design guidelines are discussed in terms of their associated subdistrict in the areas of building usage, massing, setbacks, storefront modulation, entrances, roof design, mechanical equipment, building elements, awnings, materials, and colors.

Additional guidelines are provided for projects related to alley walkways, mid-block pass-throughs in private structures, outdoor dining areas, adding leasable area to existing buildings in the historic retail area, and landscape design.

Figure 5-1: Downtown Ontario Design Guidelines Boundary

5.9.2.2.2 Residential Neighborhoods

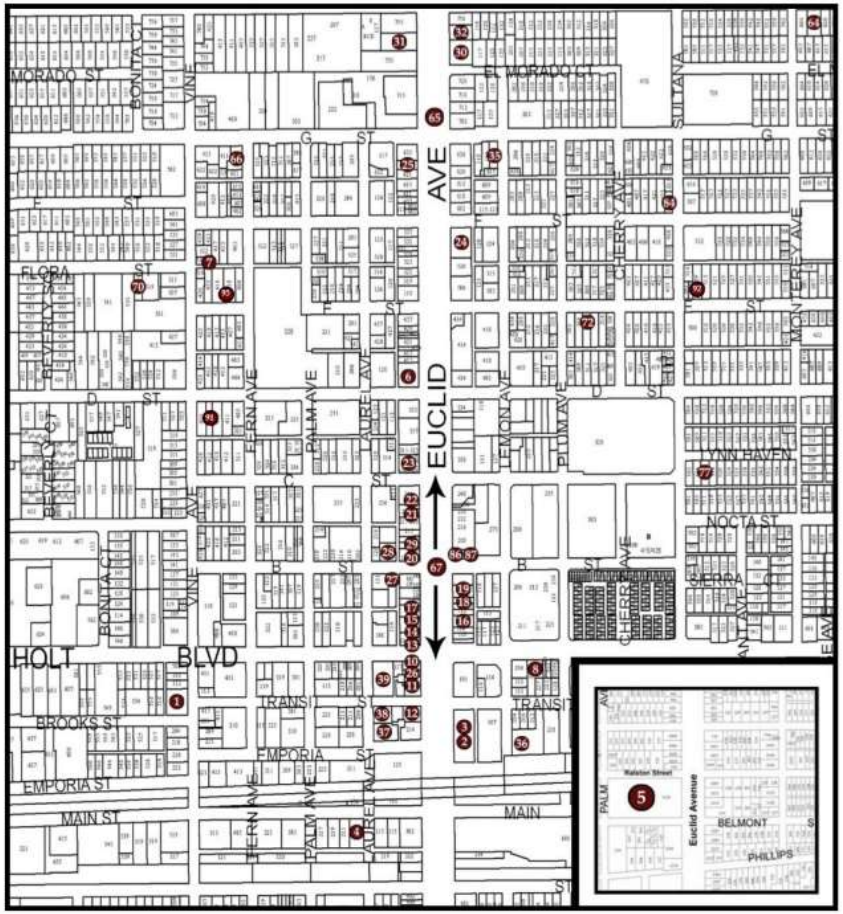
Section 4. Residential Design Guidelines establishes the process and objectives for residential properties within the residential neighborhoods in the guideline area. The section asserts that there are roughly 17 architectural styles present within the residential neighborhoods and no dominant style overall. The section provides general guidelines that pull from the Secretary of the Interior's Standards for Rehabilitation (see section 5.14.4.1 below) and are applicable for "additions, renovations, or restorations of all existing homes (154)" within the guideline area. The section also provides specific design guidelines for properties displaying the Craftsman Bungalow, Second Empire, Queen Anne, Colonial Revival, Tudor Revival, Wood Framed Farm or Grove House, Spanish Colonial Revival, and Mediterranean Revival architectural styles, and closes with guidance for non-historic and infill structures and landscape design guidelines.

5.9.2.3 Secretary of the Interior's Standards for the Treatment of Historic Properties

The Secretary of the Interior's Standards for the Treatment of Historic Properties (the Standards) are historic preservation principles which promote best practices for the treatment of historic properties. The Standards include four approaches for the treatment of historic properties – Preservation, Rehabilitation, Restoration, and Reconstruction – and the choice of which approach best suits a project is dependent on the historical significance, physical condition, proposed use, and the intended interpretation of the historic property. Each approach includes guidelines that assist with the application of the approach to a wide range of property types. The following section provides a brief description of each of the four approaches and their application as quoted from the Standards (NPS 2017:2-3):

> ***Preservation*** *is defined as the act or process of applying measures necessary to sustain the existing form, integrity, and materials of an historic property. Work, including preliminary measures to protect and stabilize the property, generally focuses upon the ongoing maintenance and repair of historic materials and features rather than extensive replacement and new construction. The limited and sensitive upgrading of mechanical, electrical, and plumbing systems and other code-required work to make properties functional is appropriate within a preservation project. However, new exterior additions are not within the scope of this treatment.* The Standards for Preservation require retention of the greatest amount of historic fabric along with the building's historic form.
>
> ***Rehabilitation*** *is defined as the act or process of making possible a compatible use for a property through repair, alterations, and additions while preserving those portions or features which convey its historical, cultural, or architectural values.* The Rehabilitation Standards acknowledge the need to alter or add to a historic building to meet continuing or new uses while retaining the building's historic character.
>
> ***Restoration*** *is defined as the act or process of accurately depicting the form, features, and character of a property as it appeared at a particular period of time by means of the removal of features from other periods in its history and reconstruction of missing features from the restoration period. The limited and sensitive upgrading of mechanical, electrical, and plumbing systems and other code-required work to make properties functional is appropriate within a restoration project.* The Restoration Standards allow for the depiction of a building at a particular time in its history by preserving materials, features, finishes, and spaces from its period of significance and removing those from other periods.
>
> ***Reconstruction*** *is defined as the act or process of depicting, by means of new construction, the form, features, and detailing of a non-surviving site, landscape, building, structure, or object for the purpose of replicating its appearance at a specific period of time and in its historic location.*

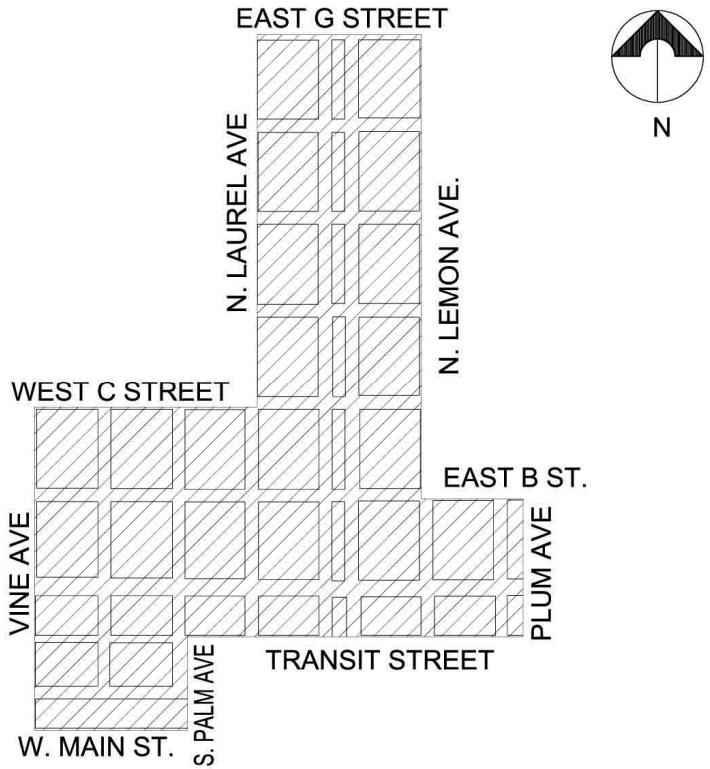
The Reconstruction Standards establish a limited framework for recreating a vanished or non-surviving building with new materials, primarily for interpretive purposes.



The selection of an appropriate treatment is dependent on the building's individual historic significance, character-defining features, and the proposed new use. The Standards encourage consideration of the building's level of significance (National, State, and/or Local level), existing physical condition, proposed new use, and code compliance needs when selecting an appropriate treatment approach (NPS 2017: 3).

5.9.3 Review of Resources in the PUD Area

5.9.3.1 Summary of Survey Activities and the Ontario Register of Historic Resources



The State of California awarded a grant to fund a citywide survey between 1983 and 1984 to identify potentially historic resources located within the City. Between 1986 and 1987, the City of Ontario continued the survey efforts which resulted in documentation and evaluation of historic significance of nearly 3,000 properties, and the creation of Ontario's Historic Resource Inventory (HRI) in which 835 properties were formally listed. In 1991, the City retained Architectural Resources Group (ARG) to further analyze historic properties located within the downtown, a former Redevelopment Area, and recommend an improvement strategy to revitalize the area. Shortly thereafter, 65 local landmarks were designated. An additional survey was conducted in 2003 that updated information on buildings within the downtown. The City currently has 100 designated local landmarks, 14 of which are located within the downtown, 8 designated historic districts, 2 potential historic districts located in the downtown, 5 historic properties listed on the National Register of Historic Places and contains nearly 1,500 historic resources on the Ontario Register (HRI). See Figure 5-2 and the City of Ontario Historic Preservation Program for more details.

Figure 5-2: Historic Landmarks Map - South Section

The 2003 survey identified a potential district, District 3, that is associated with the core commercial development in the City. District 3 was divided into geographic regions, or subdistricts, that were identified as they were related to observed patterns of historic urban development, as shown in Figure 5-3. Two of these subdistricts overlap the plan area, District 3-A and 3-D. The overall district record describes the primary architectural character of District 3 as a commercial area where the predominant styles are, "Twentieth Century Vernacular Commercial. These buildings tend to be modest and pragmatic in style. They rarely exceed two-stories and primarily possess one-part commercial block façade compositions. Wood frames, brick, and masonry are the main materials used to construct the buildings. Some notable architectural styles include commercial buildings in an Art Moderne, International Style, Contemporary, and Googie Style."

Figure 5-3: District 3

5.9.3.2 List of Designated/Nominated/Eligible Historic Resources in the PUD Area as of 2023

As of November 2023, the PUD area contains the following designated, nominated, and eligible historic resources. In addition to the high concentration of historic and potentially historic resources within the PUD area, there are a number of properties that have reached 45 years of age since the last survey effort in 2003. The following map and table provides a list of the Designated (Purple), Nominated (Magenta), and Eligible (Pink) historic resources within the plan area, as well as the properties over 45 years of age that have not been previously surveyed (Green).

Figure 5-4: Historic Resources

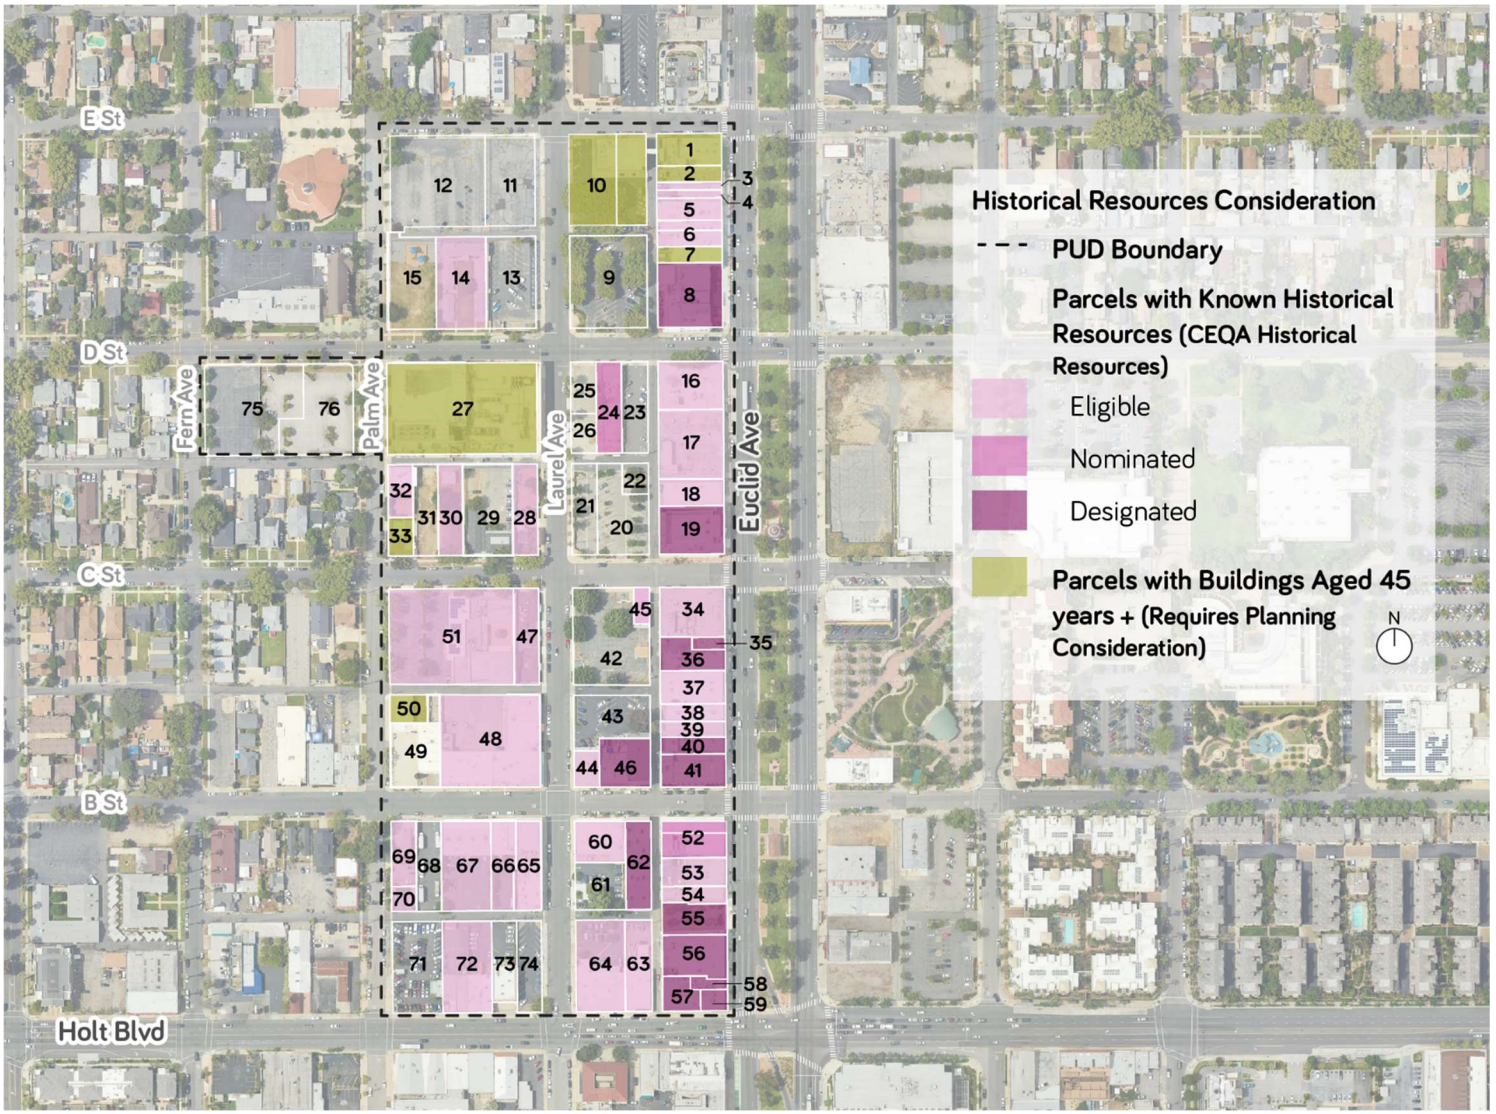


Table 5-4: Historic Resources

	Address	Parcel Number	Current Use/ Description	Year Built	Architectural Style	Current Historic Status	Local Landmark Name
1	437 N. Euclid Ave.	104835403	Unicare Community Health Center	1967	-	Not Surveyed	
2	429 N. Euclid Ave.	104835404	Immigration Attorney	c.1948 (NETR)	-	Not Surveyed	
3	427 N. Euclid Ave.	104835405	Aktiva Nutrition	1946	Commercial	Eligible	
4	425 N. Euclid Ave.	104835406	Downtown Ontario Improvement Association	1948	Commercial	Eligible	
5	421 N. Euclid Ave.	104835407	Work Boot Warehouse	c. 1930	Commercial	Eligible	
6	417 and 419 N. Euclid Ave.	104835408, -09	Optometrist	c. 1950	Commercial	Eligible	
7	413 and 415 N. Euclid Ave.	104835410	Rogers Flower Shop and Barber Shop	c. 1930	-	Not Surveyed	
8	401 N. Euclid Ave.	104835411	Gloria's Cocina Mexicana	1937	Moderne	Designated Landmark	Ontario Laundry Co.
10	123 W. E St. and 420 N. Laurel Ave.	104835401,-02, 104835413	Unicare Community Health Center, Parking	c. 1960		Not Surveyed	
14	210-220 W. D St.	104835309	Multiple-family residential	1946	Minimal Traditional	Eligible	
16	331 and 333 N. Euclid Ave.	104856604	U.S. Bank Branch	1965	-	Eligible	
17	317 N. Euclid	104856605	Treasure Banquet Hall	1950		Eligible	

	Address	Parcel Number	Current Use/ Description	Year Built	Architectural Style	Current Historic Status	Local Landmark Name
18	311, 313, 315 N. Euclid Ave.	104856606	Cancha Verde/Strum Brewing	c. 1931	Brick Commercial	Eligible	
19	108 W. C St.. 301/303 N. Euclid	104856607	Emmon's Building/ Granada Theater	1926	Moderne/Art Deco	Designated Landmark	Emmon's Building (Granada Theater)
24	(123 W. D St) 121 W. D St.	104856602	Associated Telephone Company Building	1936	Art Deco	Nominated	
27	211 W. D St./ 207 W. D St.	104856113	Frontier Communications	c.1959 (NETR)	-	Not Surveyed	
28	303-305 and 311-315 N. Laurel Ave.	104856107	Multiple-family residential	c. 1920	Craftsman Bungalow	Eligible	
30	218 W. C St.	104856109	Single Family residence	1908	Craftsman Bungalow	Eligible	
32	312 N. Palm Ave.	104856112	Single Family residence and commercial building	1920	Minimal Traditional	Eligible	
33	228 W. C St.	104856111	Superior Justice Law Group	1955	-	Not Surveyed	
34	245 N. Euclid Ave.	104856503	Valley Dept Store	1950	Mid-Century Modern	Eligible	
35	233 N. Euclid Ave. 223 N. Euclid Ave. 235 N Euclid Ave.	104856504	The Golden Web Boutique store	1916	Brick Commercial (Mediterranean Revival)	Designated Landmark	People's Mutual Building and Loan
36	231 N. Euclid Av.	104856505	Unique Café	1904	Brick Commercial	Designated Landmark	Masonic Hall

	Address	Parcel Number	Current Use/ Description	Year Built	Architectural Style	Current Historic Status	Local Landmark Name
37	219 N. Euclid Ave.	104856506	Herradura De Oro	1948	Colonial Revival	Eligible	
38	215 N. Euclid Ave.	104856507	Newsboy books	1946	Brick Commercial	Eligible	
39	211 N. Euclid Ave.	104856508	Euclid Family Dentistry	c.1925	Brick Commercial	Eligible	
40	207 N. Euclid Ave.	104856509	Vacant Commercial Building	1910	Brick Commercial	Designated Landmark	W.W. Smith Grocery
41	106 W. B St. 203 N. Euclid Ave.	104856510	Furniture Dreams (Residential on second floor)	1908	Brick Commercial	Designated Landmark	Ostran's Department Store
44	126 W. B St.	104856512	Beautiful Smiles Ontario	1906	Brick Commercial	Eligible	
45	108 W. C St. 115 W St.	104856502	Vacant Bank	1936	Brick Commercial	Eligible	
46	120 W. B St. 112 W. B St.	104856511	Nightmare on B Street/ Dance Studio/ Odd fellows - Eligible (Aria Kabob, Electric Beauty Salon - Historic LL)	1922	Commercial	Designated Landmark	Intl Order of Odd Felows (I.O.O.F)
47	223, 225, 229, 235 N. Laurel Ave.	104856202	Centro Legal De Accidentes & Cedar Pointe Chiropractic	1947	Minimal Traditional	Eligible	
48	206 ,208, 210, 214, 216, 218, 220 W. B St./ 205, 207, 209, 211, 213, 215 N Laurel Ave	104856203	Multiple shops including barber, Fitness, beauty	1947	Commercial	Eligible	

	Address	Parcel Number	Current Use/ Description	Year Built	Architectural Style	Current Historic Status	Local Landmark Name
50	212, 214, 216, 218 N. Palm Ave.	104856206	Small shops (Tax services and fitness)	1957	-	Surveyed	
51	215 W. C St.	104856201	Great Commission Church International (Christian Church)	1948 (additions 1955,1959,1966	Mid-Century Modern	Eligible	
52	137, 139, 143, 141 N. Euclid Ave. and 105 W. B St.	104856403	Old Gemmel's Pharmacy	1889	Brick Commercial	Nominated	
53	129 and133 N. Euclid Ave.	104856404	DolEx Financial Services	c. 1907	Brick Commercial	Eligible	
54	125 N. Euclid Ave.	104856405	Bravo's Store	1910	Brick Commercial	Eligible	Friend Block / O.O.F. Sommerest Hall/ People's Store
55	121 and 123 N. Euclid Ave.	104856406	Demolished - Vacant	1894	Commercial	Designated Landmark	Friend Block / O.O.F. Sommerest Hall/ People's Store
56	105, 109, 111, 115, 117 N. Euclid Av.	104856407	Verizon, Bally Spa, Night club, Motorcycle run	1889	Commercial	Designated Landmark	Rose Block
57	104,108, 110 & 112 W. Holt Blvd.	104856410	Botanica, Sabor Honduren, Beauty and Barber	1895	Commercial	Designated Landmark	Citizens Bank Block
58	105 N. Euclid Av.	104856408	Xolos Birria	1888	Brick Commercial	Designated Landmark	Holbrook Block

	Address	Parcel Number	Current Use/ Description	Year Built	Architectural Style	Current Historic Status	Local Landmark Name
59	101 N. Euclid Av.	104856409	T Mobile	1895	Commercial	Designated Landmark	Citizens Bank Block
60	121, 123, 125,127 W. B St	104856401	B St. Professional Bldg.; Document Preparation Services Inc., Logan's Candies, Isaprint,	c. 1930		Eligible	
62	115 W. B St.. 117 & 119 W. B St..	104856402	Income Tax office and residential upper floor	1922	Brick Commercial	Designated Landmark	Ontario Herald Building
63	114, 116, 118 W. Holt Blvd	104856411	Pirate staffing, Ontario Boxing Club	c. 1915	Brick Commercial	Eligible	
64	108 N. Laurel Ave./ 120, 122, 124, 126 W. Holt Blvd.	104856412	Jobs, Insurance, Pawnshop, paved parking	C 1910 (addition c. 1950)	Brick Commercial	Eligible	
65	203 W. B St./ 123, 127, 129 N. Laurel Ave	104856313	Body X Beauty, Pet grooming, Spa, Karate	1922 (retail commercial addition c. 1940)	Brick Commercial	Eligible	
66	207 W. B St.	104856312	Iglesia Fuente and paved parking	1949	Commercial	Eligible	
67	211, 213, 215, 217 W. B St.	104856303	Majestic Trophy, Boxing Club, Mary Kay, office	1953	Commercial	Eligible	

	Address	Parcel Number	Current Use/ Description	Year Built	Architectural Style	Current Historic Status	Local Landmark Name
69	225-227-229 W. B St. and 128-130 N Palm Ave	104856301	Evc Insurance & Services and the Vault Barbershop and Home	c. 1915 (commercial additions c. 1950)	Vernacular wood frame	Eligible	
70	120 N. Palm Ave.	104856311	House	c. 1915	Craftsman Bungalow	Eligible	
72	210, 212, 214, 216, 218 W. Holt Blvd.	104856308	Eagles Aere and Sams Liquor	1920	Brick Commercial	Eligible	

5.9.4 Historic Preservation - Certificates of Appropriateness and Demolition

To ensure that a proposed project involving new construction (infill), addition, alteration or demolition (full or partial) of a historic resource protects the historic character and integrity of the resource and any surrounding resources, an application for a Historic Preservation - Certificate of Appropriateness must be filed pursuant to section *4.02.050: Historic Preservation—Certificates of Appropriateness and Demolition of Historic Resources* of the Development Code. Issuance of a Waiver by the Planning Director or a Certificate of Appropriateness approved by the Historic Preservation Subcommittee or the Historic Preservation Commission shall be required for projects involving any of the following (4.02.050:B.2):

- Alteration, addition, restoration, rehabilitation, remodeling, relocation, repainting, and/or resurfacing of an historic resource.
- For any work to the exterior of any noncontributing historic resource located within the PUD area.
- Infill development within the PUD area; and
- Any demolition, whether in whole or in part, of a historic resource or a noncontributor within the PUD area.

The following findings need to be met for the Historic Preservation-Certificate of Appropriateness application to be acted upon (4.02.050:D.1):

- The proposed alteration, restoration, relocation, or construction will not detrimentally change, destroy or adversely affect any significant architectural feature of the resource;
- The proposed alteration, restoration, relocation, or construction will not detrimentally change, destroy or adversely affect the historic character or value of the resource;
- The proposed alteration, restoration, relocation, or construction will be compatible with the exterior character-defining features of the historic resource; and
- The proposed alteration, restoration, relocation, or construction will not adversely affect or detract from the character of the historic district.

The following findings need to be met for the Historic Preservation-Certificate of Appropriateness and Demolition application to be acted upon (4.02.050:D.2):

- The proposed demolition is necessary because all efforts to restore, rehabilitate, and/or relocate the resource have been exhausted;
- The proposed demolition is necessary because restoration/rehabilitation is not practical because the extensive alterations required would render the resource not worthy of preservation;
- The proposed demolition is necessary because failure to demolish the resource would adversely affect or detract from the character of the District; and
- The resource proposed to be demolished has been assigned a Tier III designation.

For approval of a Historic Preservation-Certificate of Appropriateness related to infill development within the PUD area, the following infill guidelines need to be incorporated into the design of all new buildings and structures (4.02.050:G.2; 4.02.050:I.1-4):

- New buildings, structures, or improvements constructed shall be designed to be compatible with the architectural style, features, and historic character of the properties within the PUD plan area.
- New buildings shall be compatible with the original style of the contributing buildings within the PUD plan area. The design of the new buildings shall therefore incorporate the following considerations:
    - The design features and details of contributing structures;
    - The height, width, and length of the new construction shall be consistent with the original characteristic of the contributing structures; and
    - The exterior materials and treatment shall be similar to the contributing structures.
- New buildings, structures, and/or improvements constructed on a historic property shall be designed to be compatible with the architectural style and features of contributing historic buildings and/or structures located on the historic property; and
- New buildings/structures shall be compatible with the original architectural style of the contributing historic buildings on the historic property. The design of the new construction shall incorporate the following considerations:
    - The design shall incorporate the design features and details of the historic structure;
    - The height, width, and length of the new building shall be consistent with the original characteristic of the historic building; and
    - The exterior materials and treatment shall be similar to the historic building.

5.9.5 Historic Architectural Guidelines

Section *7.01.065: Guidelines for the Treatment of Historic Properties* of the Development Code, which are supported by the Secretary of the Interior Standards for the Treatment of Historic Properties (Standards), is intended to provide appropriate design solutions that avoid adverse impacts to historic resources located within the PUD area. The guidelines provided in Section 7.01.065 of the Development Code should be used for any project in the PUD area.

To recognize and protect the historic significance of an architectural resource, it is important to understand the physical characteristics that are associated with various architectural styles to ensure that appropriate treatment approaches are used during any project involving a historic building, or when developing new buildings on or adjacent to a historic property. The City maintains a list of architectural styles with corresponding descriptions of the features that define each style on the Historic Preservation Program website. See the References and Resources at the end of this section for information on accessing the architectural style list.

New development that promotes context-sensitive and complementary buildings relative to the existing range of historic architectural buildings in Downtown West can help to create a cohesive district. Representative examples of existing historic buildings and their architectural styles in Downtown West and their associated characteristics are included below and on the following pages to help guide developers and architects in understanding the architectural styles and specific features present in the PUD area. While this is not an exhaustive list of the architectural styles present within the PUD area, the architectural styles referenced in the following pages constitute the primary styles present in the PUD area. To promote a cohesive district, new infill in the PUD area should use materials that are appropriate for and found within the district, such as glass, metal, siding, and brick.

Best practices for historic preservation propose that the architecture of new buildings and additions should not exactly replicate historic architectural styles, but rather be obviously differentiated while harmonizing with the scale, rhythm, and character of historic predecessors. Adjacent new construction, if it is not related to the property, should include clear differentiation. In addition, new construction should incorporate appropriate massing, scale, and buffers when located adjacent to a historic resource. Buffers may include setbacks and upper story stepbacks, for example. If construction is physically attached or located on a historic property, it should be reviewed for conformance with the Secretary of Interior's Standards.

5.10 Public Art

As the City of Ontario continues to define itself as a desirable destination, the arts have taken on a greater role in enriching the lives of residents and enhancing the visitor experience. Public art may serve to delight and surprise, reflect upon the natural world, explore local history, express identity, or celebrate the contributions of important citizens. Ontario's vision is to expand this dialogue and interaction through site-specific, distinctive landmarks designed by professional artists. With this in mind, in 2022 the City established a new Public Art Program for private and civic development under Title 5 Chapter 33 of the Ontario Municipal Code. For a public art program to be successful, careful consideration must be given to the selection of artists and artwork concepts, materials, locations, and length of display. While the following typologies and applications listed below are intended for the PUD, planning will ultimately be governed by a comprehensive citywide master planning effort which will equitably address all regions and be developed in consultation with the Department of Museum, Arts & Culture's staff and the Public Art Advisory Commission.

5.10.1 Landmark Sculptures

Iconic and permanent large-scale outdoor works become inextricably linked with a district or city, and, over time, serve as enduring and cherished landmarks that are immediately recognizable. Portals, parklets, plazas and medians warrant special consideration as prime locations. Lighting helps showcase the artwork, while also making the space appear larger, safer, and more welcoming. Lighting can also serve as an integral part of the sculpture to captivate pedestrians in evening hours.

Cliff Garten. Zuckerberg Medical Center.

Ralph Helmick. Pasadena.

David Byrne. NYC.

5.10.2 Murals

Murals add immediate vibrancy and vitality to facades, setbacks, and blank walls. While murals may appear relatively easy and inexpensive to commission, careful planning needs to be in place in property-owner agreements, site selection, surface preparation, material quality, maintenance responsibilities, and the level of security in vulnerable areas such as alleys. Murals may be painted directly on to a surface or mounted on panels, or fabricated from tile or mosaic, depending on anticipated length of display.

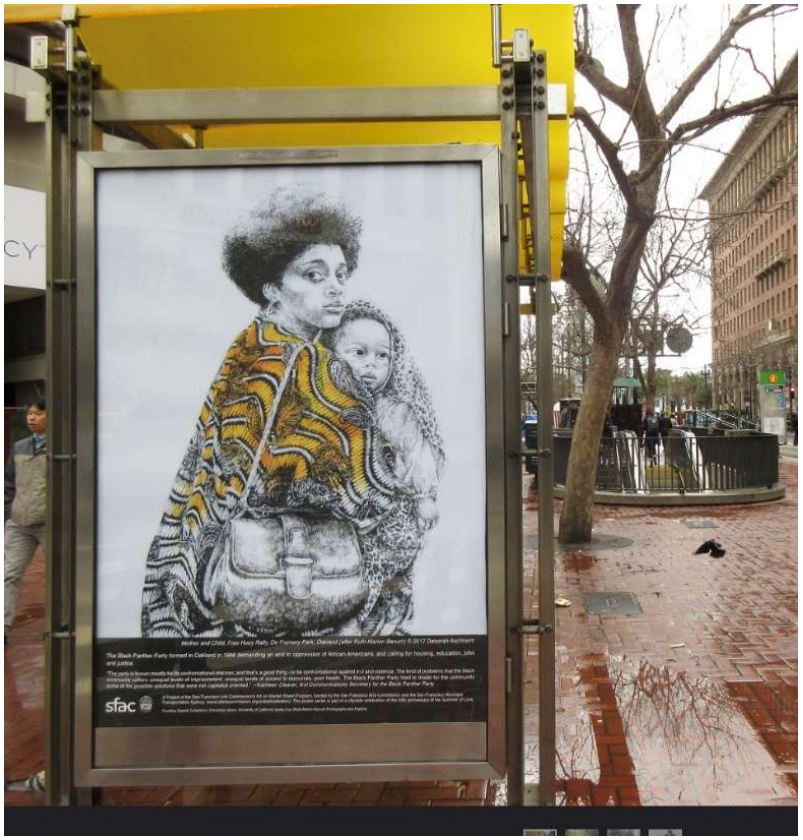
5.10.3 Streetscape Amenities

Artists bring a unique and original perspective to design. The City can take advantage of this expertise and talent to beautify and energize the pedestrian environment through artist-designed enhancements to functional furnishings such as bike racks, bollards, benches, street poles and transit shelters.

5.10.4 Private Development

Artists bring a unique and original perspective to design. The City can take advantage of this expertise and talent to beautify and energize the pedestrian environment through artist-designed enhancements to functional furnishings such as bike racks, bollards, benches, street poles and transit shelters.

5.10.5 Temporary Programming



Artists bring a unique and original perspective to design. The City can take advantage of this expertise and talent to beautify and energize the pedestrian environment through artist-designed enhancements to functional furnishings such as bike racks, bollards, benches, street poles and transit shelters.

6 Public Realm Standards and Guidelines

6.1 Overview

Chapter 6 provides standards and guidelines for the public realm aimed at improving the sidewalk experience for all users. The public realm is defined as any publicly owned space, including streets, sidewalks, passageways, plazas, and other spaces that are accessible by everyone. An accessible, comfortable, and well-designed public realm is a crucial component to creating a sense of place, encouraging new development, and supporting the community.

This section will cover the following:

- Design standards for sidewalk clearance and outdoor dining to ensure that the sidewalk space throughout the PUD area can properly accommodate the multiple and simultaneous uses.
- Design guidelines for street furniture, pedestrian connections, signage and wayfinding, street trees, and parkways.

6.2 Design Standards

6.2.1 Sidewalk Clearance

1. **Minimum Sidewalk Clear Area.** A minimum clear area shall be maintained for pedestrian circulation within the public sidewalk zone. This minimum clear area may be reduced to 4 feet in width adjacent to City-approved outdoor dining facilities or tree grates per review authority. Exceptions include:

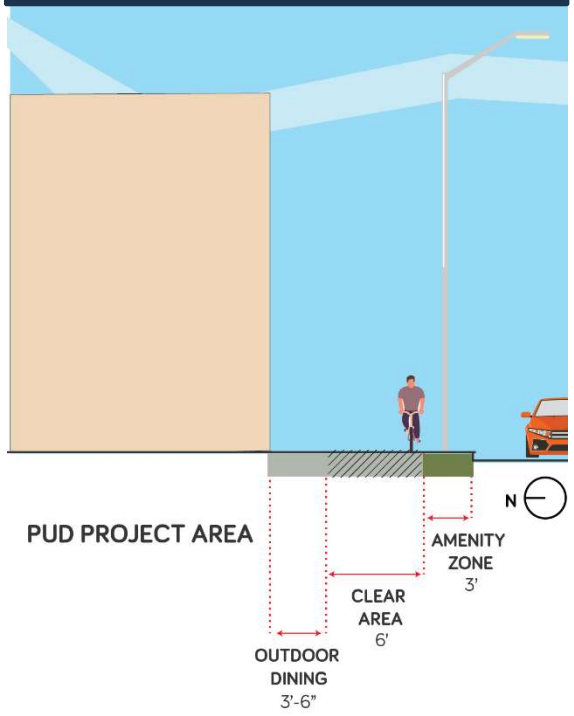
    a. **Euclid Avenue.** A minimum clear area of 6 feet shall be maintained for pedestrian movement.

    b. **B Street.** A minimum clear area of 4 feet on the southside of B Street shall be maintained for pedestrian movement.

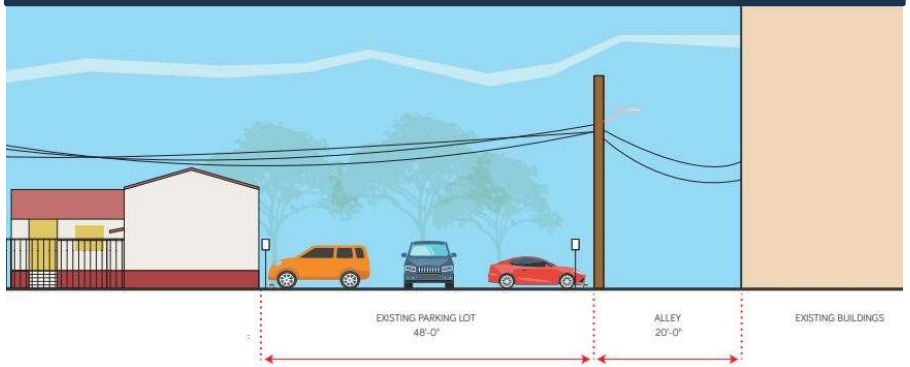
    c. **Laurel Avenue.** A minimum clear area of 5 feet shall be maintained for pedestrian movement.

    d. **Holt Boulevard.** A minimum clear area of 6 feet shall be maintained for pedestrian movement.

    e. **The Alley** A minimum clear area of 5 feet shall be maintained for pedestrian movement.



EXISTING SECTION THROUGH B STREET

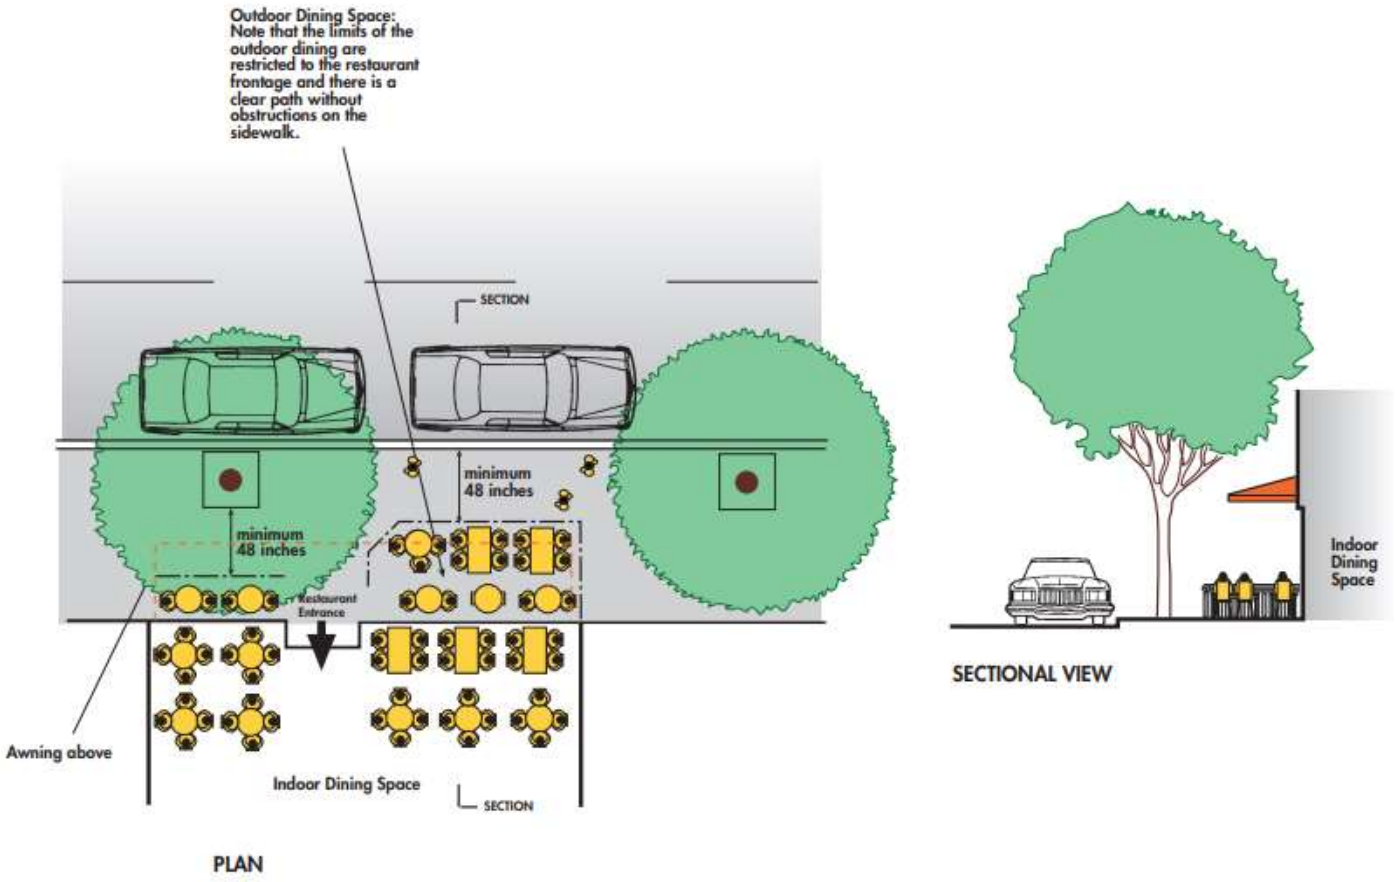


EXISTING SECTION THROUGH LAUREL AVENUE

EXISTING SECTION THROUGH HOLT BOULEVARD

EXISTING SECTION THROUGH THE ALLEY LOOKING NORTH TOWARDS D STREET

6.2.2 Outdoor Dining



1. **Outdoor Dining.** Outdoor Dining areas adjacent to a street level eating or drinking establishment along any street frontage will require a permit to ensure sidewalk clearance and ADA requirements. Any such areas shall be designed in accordance with the provisions set forth in **Section 2A.7 of the Downtown Ontario Design Guidelines,** plus any additional features that may be required as part of a Conditional Use Permit for on-sale alcoholic beverages. Typical layout of outdoor sidewalk dining space is shown in Figure 6-1 from the Downtown Ontario Design Guidelines.

Outdoor Dining to Promote a Vibrant Euclid Avenue

Outdoor dining along Euclid Avenue is encouraged to promote a vibrant street. Outdoor dining along the sidewalk contributes to an active public realm with "eyes on the street" throughout the day. Providing a clear area on any public sidewalk is critical to ensuring that pedestrian movement is maintained, while allowing sidewalk dining and other uses on the sidewalk, such as street trees, benches, and other amenities.

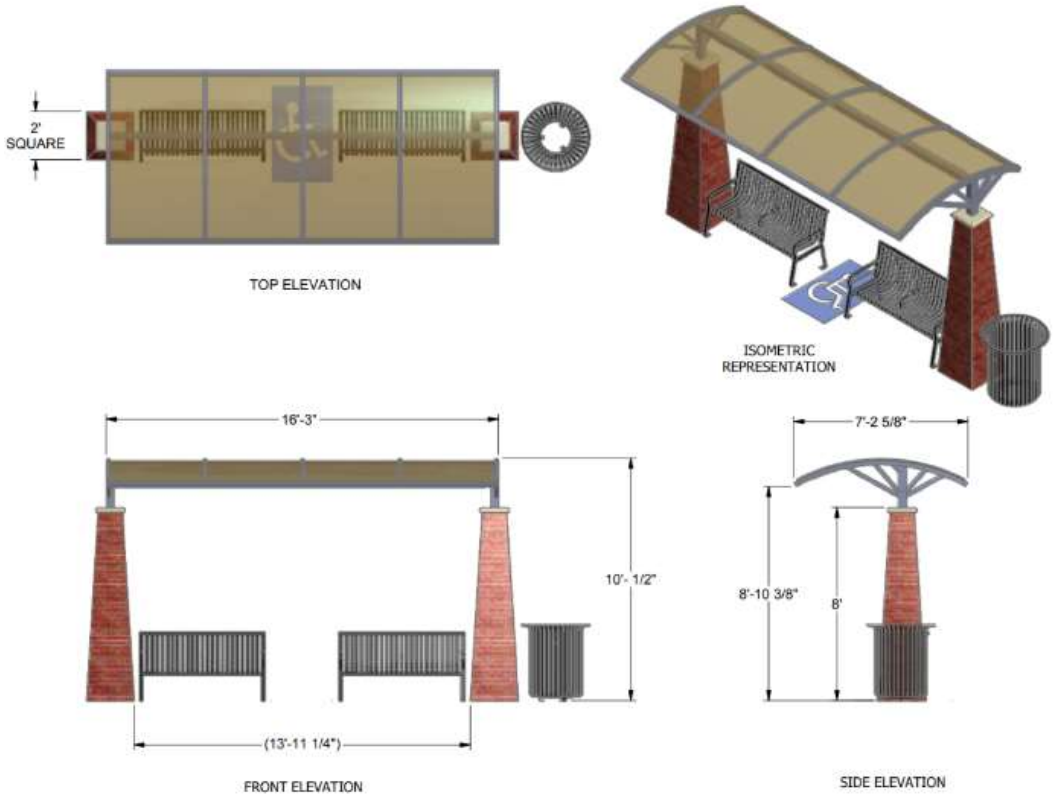


Figure 6-1: Typical Layout of Outdoor Sidewalk Dining Space (Downtown Design Guidelines)

Source: Downtown Design Guidelines

6.3 Design Guidelines

6.3.1 Street Furniture

1. **Street Furniture.** Incorporate a high level of street furniture including lighting, bus shelters, benches, tree grates, bike racks, and trash receptables.

    a. **Location.** The selection of appropriate elements should consider those streets with the heaviest foot traffic, such as Euclid Avenue, Holt Avenue and B Street, as well as existing sidewalk widths, size and spacing of trees, proximity to store entrances, etc.

    b. **Identity.** Street furniture should reflect the special character and theme of downtown Ontario to create a district identity. The use of repetitive materials and textures will create a rhythm and consistency that will bring continuity to the Districts and Blocks within the PUD area. Bus shelter furniture shall be constructed with decorative brick,.

    c. **ADA.** All street furniture shall comply with American with Disabilities Act of 1990.

    d. **Lighting.** Incorporate pedestrian-scaled lighting fixtures that emit a warm light along the streets and sidewalks; the sidewalks should be well-lit.

        i. **Euclid Avenue.** A combination of standard concrete and "King" standard post-top streetlights (Standard Drawing #5103) with LED lamps should be placed within the public sidewalk zone.

        ii. **Holt Boulevard.** A "King" standard post-top streetlights with LED lamps should be placed within the public sidewalk zone.

        iii. **Local Streets.** King standard post-top lights should be placed within the public sidewalk zone.

    e. **Glare.** Direct lighting along sidewalks and pedestrian pathways to produce a minimal glare.

i. All post-top lamps should incorporate shielding within the luminaire and/or globe to prevent glare into upper-level residential windows.

f. **Overhead Lighting.** Provide a minimum clearance height as required by City Services and the Fire Department for overhead lighting above local streets, such as B Street and The Alley to accommodate commercial trucks, service and maintenance vehicles, and emergency vehicles.

g. **Furniture Requirements.**

i. Benches should have arms and backs.

ii. A powder-coated, dark finish should be applied to all fixtures and furniture.

iii. Bollards may be placed at entrances to bicycle/pedestrian pathways and where controlled emergency, or maintenance access is required or desired. A bottom locking mechanism shall be provided to enable easy removal by authorized City personnel.

iv. Litter receptacles should have a fixed top.

v. Design of bus stop benches and shelters should satisfy the criteria specified by the City and local transit agency (currently Omnitrans).

vi. Bike racks should be located adjacent to parking areas or bicycle/pedestrian pathways.

Street Benches

Trash Receptacles

Street furniture in the PUD area is intended to match those identified in the Downtown Civic Center Planned Unit Development, shown at left, to create a consistent streetscape identity along the west and east sides of Euclid Avenue

6.3.2 Pedestrian Connections

1. **Pedestrian Pathways**. Regard sidewalks and paseos as unifying elements throughout the PUD area. Design and locate enhanced pathways and connections to promote walkability within Downtown.

2. **Euclid Avenue Pedestrian Paseos.** Provide mid-block paseos, where appropriate for clear and comfortable pedestrian circulation between Euclid Avenue and The Alley. Provide mid-block paseos and connections between Euclid Avenue to public outdoor spaces and public parking garages. See **Section 5.6.2** for required paseo dimensions.

3. **Traffic Calming.** Where applicable, implement traffic calming measures throughout the PUD area, including bulb-outs, enhanced crosswalks, and others to facilitate safe and comfortable pedestrian connections.

6.3.3 Public Realm Signage and Wayfinding

1. **The Alley Gateways.** Points of entry to the alley should include gateway elements or signage to create a sense of "welcoming" and wayfinding into the space.

2. **Signage.** Utilize signage and/or environmental graphics to aid in pedestrian orientation and wayfinding.

Signs and Wayfinding in the Public Realm to Promote Identity

Signs and wayfinding within the public realm can provide many functions in a downtown area and can be oriented for pedestrians or vehicles. The types that are encouraged for the PUD area include district markers, banners, monument signage, pedestrian signage (eye level or on the ground), important places, such as historic or cultural resources, and alleys. Themes for signs and wayfinding in the public realm should be aligned with the Downtown Ontario Design Guideline's Historic Preservation Retail Subdistrict for the PUD area.

6.3.4 Parkways and Street Trees

1. **Parkways and Street Trees.** Parkways and street trees in the PUD area are subject to the City of Ontario Landscape Development Guidelines, the Master Street Tree Plan, and the City of Ontario Development Code. Tree plantings and design, such as tree sizes, irrigation methods, and tree wells require flexibility in the PUD area.

    a. **Euclid Avenue and Laurel Avenue Street Trees.** Appropriate street tree species and recommended sizes for Euclid Avenue is provided in **Table 6-1.**

Table 6-1: Recommended Street Trees in the PUD Area

Botanical Name	Common Name	Recommended Size	Comments
Euclid Avenue			
Brachychiton Populneus	Bottle Tree	24” Box	Standard
Pinus Elderica	Afghan Pine	24” Box	Standard
Laurel Avenue			
Eucalyptus Torquata	Coral Gum	24” Box	Standard

Importance of Street Trees and Parkways

Street trees and parkways are important components of the public realm, and help to contribute to shade, a sense of place, and overall pedestrian comfort. The consistent use of tree species, size, and spacing along a street can help to create a pleasant rhythm and identify for an area. Species choices should consider access to both shade and sun along sidewalks.

7 Administration and Implementation

7.1 Development Code

Any terms not defined herein and any issues affecting the design and development of Projects in the PUD area that not specifically addressed in this PUD shall be governed by the provisions of the Ontario Development Code and the City's Standard Conditions of Approval Resolution No. R2017-027 for development.

7.2 Development Applications

Development Plan approval, pursuant to the requirements of Ontario Development Code Section 4.02.025 (Development Plans), shall be required for any Project that entails the physical alteration of any lot, construction of a building, or addition or significant alteration of an existing building in the PUD area as required by the Ontario Development Code. For each Project, a Development Plan application shall be submitted to the Planning Department on a City application form pursuant to the requirements of Ontario Development Code Division 2.02 (Application Filing and Processing), commencing with Subsection B (Discretionary Permits and Actions) of Section 2.02.015 (Application Processing Procedures).

7.3 Certificate of Appropriateness

To ensure proper implementation of the historic resource preservation and mitigation measures established in the Mitigated Negative Declaration for the PUD, an application for a Certificate of Appropriateness ("C of A") shall be submitted and approved in conjunction with each private or public improvement in the PUD area. Application requirements and required findings for approval of a C of A are pursuant to Section 4.02.050 (Historic Preservation—Certificates of Appropriateness and Demolition of Historic Resources) of the Ontario Development Code.

7.4 Exceptions

Deviation from the development standards set forth in this PUD document may be granted up to a maximum of 10 percent by the Zoning Administrator. Any deviation that is greater than 10 percent shall require an amendment to this PUD.

7.5 CEQA Compliance

The Downtown West PUD Mitigated Negative Declaration was prepared in coordination with the City and in compliance with the City's Guidelines for the Implementation of the "California Environmental Quality Act (CEQA)" (See Appendix B). In 2022 The Ontario Plan or the City's General Plan was approved and the SEIR certified which approved updated land use designations through the City. Preparation of this Planned Unit Development or PUD has demonstrated that a Mitigated Negative Declaration for the approval of the PUD should be prepared. The Ontario Plan Final SEIR serves as a guide and many of the policies from the plan have been incorporated by reference. The Mitigated Negative Declaration for this project includes programmatic and project-level analysis of future land use intensities and changes to the public realm. Issues identified included historic resources, transportation, and aesthetics. No unmitigated impacts were present.

The City will be responsible for implementation of the Mitigation Monitoring and Reporting Program approved for the Downtown West Planned Unit Development project. This may involve application of one or more mitigation measures to implement this PUD, or fair-share proportions thereof.

7.6 Implementation

Implementation of the PUD will be primarily through the adoption of the new land use and development regulations. However, implementation of the holistic vision and guiding principles for the PUD area will require coordination across City departments and regional agencies, as well as funding to plan, design, and construct supportive investments in the public realm. These next steps will be implemented over time and will complement the land use and development regulations included in this PUD.

Integrated shared infrastructure facilities, such as parking, trash services, and open space opportunities to support new development and uses in the downtown area.

Traffic calming and public realm enhancements, such as bulb outs, crosswalk improvements, new street trees, and others.

Downtown Historic Designation which will be determined through a survey of Ontario's historic district using the themes of early commerce and settlement.

Downtown Wayfinding and Signage Program can help to create a consistent image for the city; improve navigation for all modes of travel; guide visitors to landmarks, facilities, and services; and promote walking, bicycling, and mass transit.

Active transportation improvements, such as the planned bike boulevard on Vine Avenue and B Street that will connect Ontario's historic downtown with De Anza Community & Teen Center and park, funded through the State's Active Transportation Program (ATP). Additional ATP grants can be explored to fund future active transportation improvements that benefit the PUD area.

Public transit investments, such as the West Valley Connector (WVC) project, which will be a 100% zero-emission Bus Rapid Transit (BRT) system that will upgrade a portion of existing Route 61 which runs along Holt Boulevard, additional approximately 3.5 miles of center running, dedicated bus-only lanes, and provide an improved transit connection to Ontario International Airport, two Metrolink lines, and multiple major activity centers.

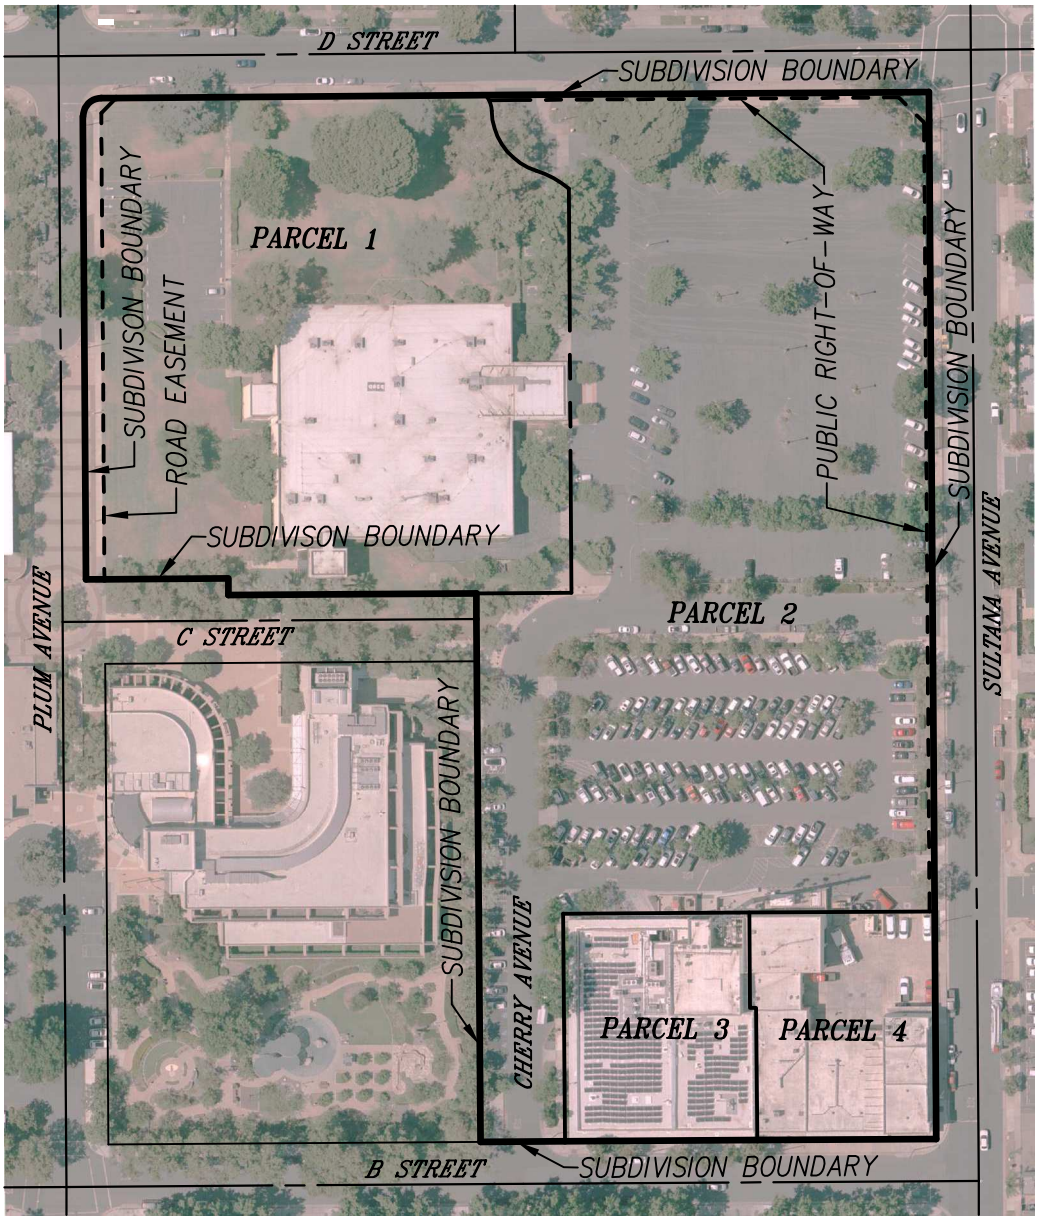
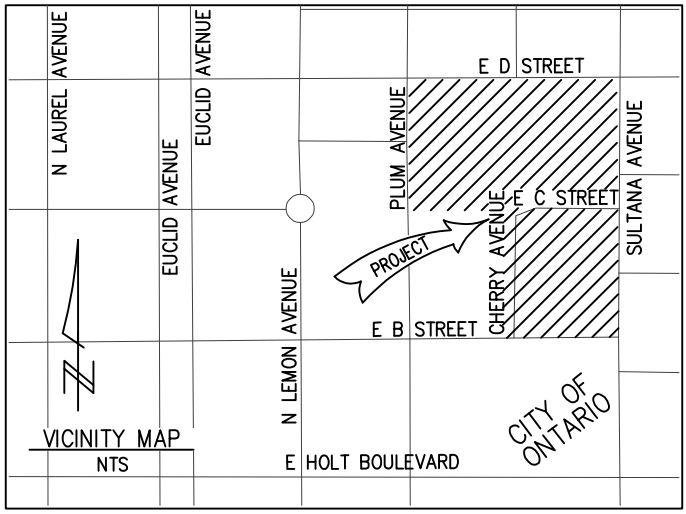
CITY OF ONTARIO *Agenda Report* **August 20, 2024**	**SECTION:** **CONSENT CALENDAR**
Department: Engineering Prepared By: Jeffrey Tang Staff Member Presenting: Scott Murphy, Executive Director Community Development Reviewed By: Raymond Lee, Khoi Do Approved By:	Submitted To: Council/OHA Approved: _____ Continued To: _____ Denied: _____ Item No: 5

SUBJECT: **A RESOLUTION APPROVING FINAL PARCEL MAP NO. 20683, LOCATED NEAR THE SOUTHWEST CORNER OF SULTANA AVENUE AND D STREET**

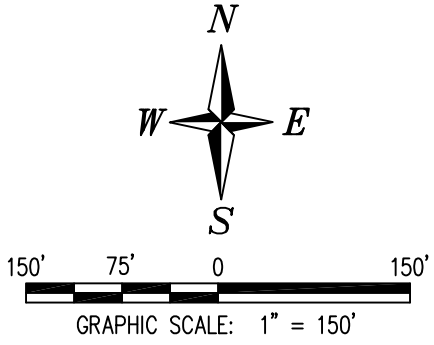
RECOMMENDATION: That the City Council adopt a Resolution approving Final Parcel Map No. 20683 located near the southwest corner of Sultana Avenue and D Street.



THE FOLLOWING COUNCIL GOALS ARE BEING ACHIEVED:
Invest in the Growth and Evolution of the City's Economy
Focus Resources in Ontario's Commercial and Residential Neighborhoods
Invest in the City's Infrastructure (Water, Streets, Sewers, Parks, Storm Drains and Public Facilities)



FISCAL IMPACT: There is not a direct fiscal impact associated with this action. All public infrastructure improvements required have already been constructed.



BACKGROUND & ANALYSIS: Final Parcel Map No. 20683, consisting of four numbered lots on approximately nine acres of land, as shown on Exhibit A, has been submitted by the City of Ontario, a Municipal Corporation, and the University of La Verne, a California Nonprofit Public Benefit Corporation. Tentative Parcel Map No. 20683 was approved by the Planning Commission on March 28, 2023.

This map meets all conditions of the Subdivision Map Act and the Ontario Municipal Code. All public improvements were previously installed, and the map has been reviewed and approved by the City Engineer.

RESOLUTION NO. _____

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF ONTARIO, CALIFORNIA, APPROVING FINAL PARCEL MAP NO. 20683, LOCATED NEAR THE SOUTHWEST CORNER OF SULTANA AVENUE AND D STREET.

WHEREAS, Tentative Parcel Map No. 20683 submitted for approval by the City of Ontario, a Municipal Corporation and the University of La Verne, a California Nonprofit Public Benefit Corporations, was approved by the Planning Commission of the City of Ontario on March 28, 2023; and

WHEREAS, Tentative Parcel Map No. 20683 consists of four numbered lots, being a subdivision of Parcel 1 of Parcel Map No. 15245 as per map recorded in book 188, pages 93 through 95, and all of Lots 1 through 12 of Block 33 and portions of Cherry Avenue and C Street as per map recorded in book 9, page 43, of official records in the Office of the County Recorder of the County of San Bernardino, State of California;

NOW, THEREFORE, BE IT RESOLVED, by the City Council of the City of Ontario, California, that Final Parcel Map No. 20683 be approved and that the City Clerk be authorized to execute the statement thereon on behalf of said City.

The City Clerk of the City of Ontario shall certify as to the adoption of this Resolution.

PASSED, APPROVED, AND ADOPTED this 20th day of August, 2024.

CITY OF ONTARIO *Agenda Report* **August 20, 2024**	**SECTION:** **CONSENT CALENDAR**
Department: Economic Development Prepared By: Peter Pallesen Department: Prepared By: Peter Pallesen Staff Member Presenting: Jennifer McLain Hiramoto, Economic Development Director Reviewed By: Charity Hernandez Approved By:	Submitted To: Council/OHA Approved: _____ Continued To: _____ Denied: _____ Item No: 6

SUBJECT: **AN AMENDMENT TO THE DESIGN SERVICES AGREEMENT WITH THIRTIETH STREET ARCHITECTS, INC. FOR THE ADAPTIVE REUSE PROJECT AT 121-143 NORTH EUCLID AVENUE.**

RECOMMENDATION: That the City Council authorize the City Manager or his designee to execute Amendment No. 6 to the Design Services Agreement with Thirtieth Street Architects, Inc., of Costa Mesa, California for the Adaptive Reuse Project at 121-143 North Euclid Avenue in the amount of $100,000 for a total not-to-exceed contract amount of $806,600; and to extend the contract termination date by one year to December 31, 2025.

THE FOLLOWING COUNCIL GOALS ARE BEING ACHIEVED:
Invest in the Growth and Evolution of the City's Economy
Operate in a Businesslike Manner
Focus Resources in Ontario's Commercial and Residential Neighborhoods

FISCAL IMPACT: The Fiscal Year 2024-25 Adopted Budget includes, and any subsequent Proposed Budget will include, appropriations from the General Fund for these services, as necessary. The proposed Amendment No. 6 increases the Agreement amount by $100,000 for a revised total not-to-exceed amount of $806,600.

BACKGROUND & ANALYSIS: The City of Ontario is investing significant resources in revitalizing the historic downtown into a vibrant, 18-hour destination. It is doing this in several ways, including: acquiring underutilized or dilapidated buildings, with an emphasis on historic properties; partnering with experience developers capable of infusing new housing, offices, and/or retail into Downtown, and; investing in strategic infrastructure projects, such as improving sewer drains, lighting, wayfinding, and parking.

On August 8, 2023, the City of Ontario entered into an exclusive negotiating agreement with LAB-CO LLC ("Developer") whereas the Developer is interested in acquiring certain real property currently owned by the City located at 121 North Euclid Avenue, 125-127 North Euclid Avenue, 129-133 North

Euclid Avenue, and 137-143 North Euclid Avenue for the purposes of an adaptive reuse project ("Project"). The Project will consist of restoring the historic properties along Euclid and creating 18 separate retail opportunities for food and beverage operators as well as outdoor garden and patio space. Throughout the City and Developer's negotiations and due diligence period, it has been mutually agreed upon that an in-depth Historic Structures Report ("HSR") shall be commissioned in order to fully understand the buildings' existing conditions, historical contexts, and what an engineer's cost estimate would be to structurally retrofit the buildings as well as any structural limitations there may be that could affect the Project's design.

As such, the City has engaged with Thirtieth Street Architects to commission the necessary HSR's. As experts in their field and with an existing knowledge of Downtown Ontario, the City's Historic Preservation codes, and previous experience working directly with the Developer on previous projects, they are the preferred consultant to perform this work.

Staff recommends authorizing Amendment No. 6 to the Design Services Agreement with Thirtieth Street Architects, Inc. in the amount of $100,000 for a new total not-to-exceed contract amount of $806,600 and to extend the term of the agreement through December 31, 2025.

AGREEMENT

Agreement made today between the City of Ontario, 303 “B” Street Ontario, CA 91764, hereinafter referred to as the Client; and Thirtieth Street Architects, Inc., 2821 Newport Blvd. Newport Beach, CA 92663, John C. Loomis and James C. Wilson, the Architects. It is the intention of the City to have the existing Historic Structures Report previously prepared by TSA for 143 N. Euclid Avenue, Street, Ontario, CA updated to include specific recommendations for the adaptive reuse project concept created by the LAB, and to have new Historic Structures Reports prepared for 129-131 N. Euclid Ave., 125 N. Euclid Ave and the vacant lot to the south. This report will evaluate the condition of the existing buildings/site and make recommendations for improvements necessary for the adaptive use project created by the LAB.

BASIC SERVICES

The Architect's Basic Services consist of the phases described below, including a Preservation Architect, Architectural Historian, Structural and MEP Engineering assessments

Project Team

Architect	Thirtieth Street Architects, Inc. 2821 Newport Blvd. Newport Beach, CA 92663

	John Loomis, Principal in Charge c. (949) 274-1092
Historian	Daly and Associates Portland, Oregon
Structural Engineer Contact info…	Grimm & Chen Irvine, CA
Mechanical, Electrical and Plumbing Engineering	NV5 Irvine, CA
LiDAR Consultant	Precision Property Measurements Los Angeles, CA

The following services/consultants are not included in this Agreement and shall be provided by the Owner if needed:

- Geotechnical Engineering
- Hazardous Materials Study
- Termite Study
- Mold and Mildew Report

Scope of Work

Phase I, Field Reconnaissance

The Preservation Architect, Architectural Historian, Structural and MEP Engineers shall review the existing construction drawing and other miscellaneous documents.

The Preservation Architect, Architectural Historian, Structural and MEP Engineers shall conduct an intense on-site field reconnaissance to assess conditions of the existing building including:

Identification of character defining and historically significant features, materials and finishes
Sequence of Construction and Change
Prior uses of the buildings
Evaluation of the Condition of Exterior and Interior Finishes and Features
Review of structural condition and determination if there is any evidence of prior seismic retrofit improvements.
Identification of existing MEP building systems and their age and condition
Evaluation of historic significance
Condition of historic fabric

The Architect shall photo document existing conditions.
The Team shall summarize in writing its findings from the Field Reconnaissance.

Phase I Products

Field Notes
Photo Documentation

Summary of Field Recon

Phase I Products

Written summary of findings

Phase II, Evaluation of Existing Conditions and Make Repair Treatment Recommendations

Based on the Field Reconnaissance, the Team shall assess and evaluate existing conditions and make protection, maintenance and repair treatment recommendations for the proposed adaptive reuse project as prepared by the LAB including:

Code Compliance
ADA Compliance
Exiting and Life Safety
Identification of Hazardous Conditions
MEP systems recommendations
Evaluation of Condition of Exterior and Interior Finishes and Features
Existing Hazards
Fire ratings of wall, floor and roof assemblies
Accessibility Improvements
Seismic Retrofit
Energy Efficiency Improvements

The Team shall summarize its findings and recommendations in writing.

The Team shall prepare a Statement of Probable Cost for Repair Treatment Recommendations

Phase II Products

Written summary of evaluation of existing conditions and maintenance and repair treatment recommendations.

Statement of Probable Cost for Repair Treatment Recommendations

III, Preparation of "As-Builts" Drawings

The Team shall engage a LiDAR Consultant to prepare CAD as built drawings of all three buildings including:

A site plan
Floor plans of all levels
Roof plan
Exterior elevation of all façades
Two building Sections, one N/S and one E/W

Phase III Products

As-Built CAD drawings

ADDITIONAL SERVICES

The following services are not included in Basic Services.

Providing services and consultants for other than normal Architectural, Architectural Historian and MEP and Structural Engineering Services. Hazardous Material Study, Mold and Mildew Inspection and Termite

Inspection, Civil and Geotechnical Engineering are also not a part of this Agreement.

Providing detailed estimates or analysis of owning and operating costs, or detailed quantity surveys or inventories of material, equipment and labor.

Providing legal services for the preparation of partywall agreements, easements or right of ways.

Preparing to serve or serving as an expert witness in connection with any public hearing, arbitration proceeding or legal proceeding.

Providing any other services not otherwise included in this Agreement or not customarily furnished in accordance with generally accepted Architectural practice.

OWNER'S RESPONSIBILITIES

The Owner shall provide full information regarding his requirements for the Project. The Owner shall designate, when necessary, a representative authorized to act in his behalf with respect to the Project. The Owner or his representative shall examine documents submitted by the Architect and shall render decisions pertaining thereto promptly, to avoid unreasonable delay in the progress of the Architect.

COST ESTIMATE

Construction Cost does not include the fees of the Architect and consultants, the cost of land, rights of way, or other costs, which are the responsibility of the Owner.

Cost Estimates prepared by the Architect represent his best judgment as a design professional familiar with the construction industry. It is

recognized, however, that neither the Architect nor the Owner has any control over the cost of labor, materials, or equipment, over the Contractor's methods of determining bid prices, or over competitive bidding or market conditions. Accordingly, the Architect cannot and does not guarantee that bids will not vary from any cost estimate prepared by him.

PROFESSIONAL FEES

The Professional Fees for Phase I through III shall be as listed below, plus reimbursable expenses.

Phase	Fee
Base Services	
Phase I, Field Reconnaissance	A lump sum of $25,000
Phase II Evaluation of Existing Conditions and Make Repair Treatment Recommendations.	A lump sum of $50,000
Phase III, Preparation of As-Builts	A lump sum of $20,000
Total:	$95,000
Reimbursable Allowance:	$5,000 Max

Additional Services, if requested by the Owner in writing, shall be billed at the following hourly rates:

HOURLY FEE SCHEDULE:

ARCHITECT

Principal	$225/hr.
Licensed Architect	$190/hr.
Draftsperson	$155/hr.

Architectural Historian

Structural Engineer	$240/hr.

MEP Engineer	$220/hr.

Lydar Technician	$155/hr.

Once the contract is approved, we will begin work immediately. Billings shall be made to the Owner monthly in proportion to the Work completed plus reimbursable expenses.

Reimbursable expenses include blueprinting and any unusual expenses incurred and shall be in addition to any fees above. Reimbursable expenses shall be billed at the multiple of 1.1 times cost to cover processing and bookkeeping per the following reimbursable schedule:

Reimbursable Cost Schedule

Item	Cost
Blueprinting	Invoice
Copying	.25/page

In-house Blueprints	$1/sheet
In-house color copies	$1/sheet
Other Expenses*	Cost

The the hourly rates listed are subject to a cost of living increase two years from the date of this Agreement.

Time of Performance

We estimate the following time frames to complete each phase of work:

Phase	Time to Complete
Base Services	
Phase I, Field Reconnaissance	2-3week
Phase II Evaluation of Existing Conditions and Make Repair Treatment Recommendations.	4-8 weeks
Phase III Preparation of As-Builts	Concurrent with Phase II
Total	6-11 weeks

No deductions shall be made from the Architect's compensation on account of penalty, liquidated damages or other sums withheld from payments to Contractors.

If the Project is suspended by the Owner or abandoned in whole or in part, the Architect shall be paid his compensation for services performed prior to receipt of written notice from the Owner of such suspension or abandonment, together with reimbursable expenses then due.

DEFAULT

In the event Owner fails to pay the Architect within thirty (30) days after invoices are rendered, Owner agrees that the Architect shall have the right to consider said default a total breach of this Agreement and, upon written notice, the duties, obligations and responsibilities of the Architect under this Agreement are terminated. In such event, Owner shall then promptly pay the Architect all of the fees and charges for services rendered by the Architect.

DELAYS

Neither party shall hold the other responsible for damages or delay in performance caused by acts of God, strikes, lockouts, accidents, or other events beyond the other's control.

TERMINATION

This Agreement may be terminated by either party upon seven days written notice should the other party fail substantially to perform in accordance with its terms through no fault of the other. In the event of termination due to the fault of others than the Architect, the Architect shall be paid his compensation for services performed to termination date, including reimbursable expenses then due and all terminal expenses.

OWNERSHIP OF DRAWINGS

Drawings and Specifications as Instruments of Service are and shall remain the property of the Architect whether the Project for which they are made is executed or not. They are not to be used by the Owner on other projects or extensions to this Project except by agreement in writing and with appropriate compensation to the Architect. The Owner has rights to blueprint copies or sepias.

TERMITE DAMAGE, MOLD/MILDEW AND HAZARDOUS MATERIALS ABATEMENT

The Owner hereby assumes all responsibility for the discovery, identification and abatement of all termite damage, mold, mildew or

hazardous materials in the existing structure. The Owner shall hold he Architect harmless from any and all liabilities resulting from same.

SEISMIC

Structural Engineering services are observational only and intended to identify Seismic Retrofit issues and make general recommendations for repairs. The preparation of construction documents and structural calculations is not included.

SUCCESSORS AND ASSIGNS

The Owner and Architect each binds himself, his partners, successors, assigns and legal representatives to the other party to this Agreement. Neither the Owner or the Architect shall assign, sublet, or transfer his interest in this Agreement without the written consent of the other.

LIMITATION OF LIABILITY

The Owner agrees to limit the Architect's liability to the Owner and to all Contractors and Subcontractors on the Project, due to professional negligent acts, errors or omissions of the Architect, to the sum of $50,000. or the Architect's fee, whichever is smaller.

CLAIMS BY PARTIES

All claims, disputes, and other matters in question arising out of or relating to, this Agreement or the breach thereof, shall be decided by arbitration in accordance with the Construction Industry Arbitration

rules of the American Arbitration Association then obtaining. This Agreement so to arbitrate shall be specifically enforceable under the prevailing arbitration law.

Notice of the demand for arbitration shall be filed in writing with the other party to the contract and with the American Arbitration Association. The demand shall be made within a reasonable time after the claim, dispute or other matter in question has arisen. In no event shall the demand for arbitration be made after institution of legal or equitable proceedings based on such claim, dispute or other matter in question would be barred by the applicable statute of limitations.

Should arbitration occur between the two parties relating to the provisions of this Agreement, or any act arising out of the performance of this Agreement, all expenses, collection expenses, witness fees, court costs and attorney's fees shall be paid by the non-prevailing party to the prevailing party.

The Owner agrees that the Architect can not be joined with any other person that is not a party to this Agreement either by joiner or consolidation except by the Architect's written consent.

APPLICABLE LAW

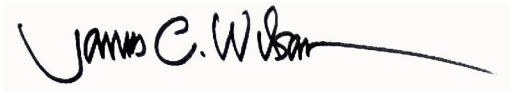
Unless otherwise specified, this Agreement shall be governed by the law of the principal place of business of the Architect.

WARRANTY OF AUTHORITY TO SIGN

The person signing this Agreement warrants he has authority to sign as, and on behalf of, the Owner for whom or for whose benefit Thirtieth Street Architect's services are rendered. If such person does not have such authority, he agrees that he is personally liable for all breaches of this Agreement, and that in any action against him for breach of such warranty a reasonable attorney's fee shall be included in any judgment rendered.

The undersigned hereby acknowledges that he or she has reviewed and accepts all provisions of this Agreement including the payment schedule.

The confirmation is valid for a period of thirty (30) days from the date shown above. If not accepted within thirty (30) days it is void.



This Agreement executed on the day and year first written above.

AMENDMENT NO. 6 TO THE DESIGN SERVICES AGREEMENT BETWEEN THE CITY OF ONTARIO AND THIRTIETH STREET ARCHITECTS, INC.

1. Parties and Date.

This Amendment No. 6 to the Agreement (as defined herein) is made and entered as of _____, by and between the City of Ontario ("City") and Thirtieth Streets Architects, Inc. a Corporation ("Consultant"). City and Consultant are sometimes individually referred to as "Party" and collectively as "Parties."

2. Recitals.

2.1 Agreement. The City and Consultant have entered into an agreement entitled "Design Services Agreement" dated February 15, 2021 ("Agreement"). ("Agreement").

2.2 Amendment Purpose. The City and Consultant desire to amend the Agreement to revise the scope of services for the Adaptive Reuse Project at 121-143 North Euclid Avenue set forth in Amendment No. 6 – Attachment "A" and increase the not-to-exceed compensation amount by **One Hundred Thousand Dollars ($100,000)**. The City and Consultant desire to amend the Agreement to extend the Agreement term through December 31, 2025. The Parties have heretofore entered into Amendment No. 1 dated April 19,2022, Amendment No. 2 dated March 21, 2023, Amendment No. 3 dated November 1, 2023, Amendment No. 4 dated March 19, 2024, and Amendment No. 5 dated June 6, 2024.

2.3 Amendment Authority. This Amendment No. 6 is authorized pursuant to Section 3.8.1 of the Agreement.

3. Terms.

3.1 Amendment. Section 3.10.1 of the Agreement is hereby amended in its entirety to read as follows:

> "3.10.1 Consultant's Compensation for Basic Services. City shall pay to consultant, for the performance of all Services rendered under this Agreement, with the total not to exceed amount of **Eight Hundred**

Thousand Six Hundred Dollars ($806,000) ("Total Compensation"). This Total Compensation amount shall be based upon, and may be adjusted according to, the fee schedule and related terms and conditions attached hereto as Exhibit "A" and incorporated herein by reference. The Total Compensation, as may be adjusted upon mutual agreement, shall constitute complete and adequate payment for Services under this Agreement."

Exhibit A is hereby deleted in its entirety and replaced with Attachment A attached hereto and incorporated herein by reference.

3.2 Continuing Effect of Agreement. Except as amended by this Amendment No. 6, all other provisions of the Agreement remain in full force and effect and shall govern the actions of the parties under this Amendment No. 6. From and after the date of this Amendment No. 6, whenever the term "Agreement" appears in the Agreement, it shall mean the Agreement as amended by this Amendment No. 6.

3.3 Adequate Consideration. The Parties hereto irrevocably stipulate and agree that they have each received adequate and independent consideration for the performance of the obligations they have undertaken pursuant to this Amendment No. 6.

3.4 Severability. If any portion of this Amendment No. 6 is declared invalid, illegal, or otherwise unenforceable by a court of competent jurisdiction, the remaining provisions shall continue in full force and effect.

3.5 Integration. This Amendment represents the entirety of the Parties' understanding relating to the subject of this Amendment, including written or verbal communications between the Parties, which shall have no relevance unless expressly incorporated herein. This is an integrated amendment.

CITY OF ONTARIO *Agenda Report* **August 20, 2024**	**SECTION:** **CONSENT CALENDAR**
Department: Planning Prepared By: Edmelynne V Hutter Department: Prepared By: Edmelynne V Hutter Staff Member Presenting: Scott Murphy, Executive Director Community Development Approved By:	Submitted To: Council/OHA Approved: _____ Continued To: _____ Denied: _____ Item No: 7

SUBJECT: **AN AMENDMENT TO THE PROFESSIONAL SERVICES AGREEMENT WITH KIMLEY-HORN AND ASSOCIATES, INC., TO PROVIDE ENVIRONMENTAL SERVICES FOR PHASE 2 OF THE ONTARIO ARENA ENTERTAINMENT DISTRICT PROJECT**

RECOMMENDATION: That the City Council approve and authorize the City Manager or designee to execute Amendment No. 1 to a Professional Services Agreement with Kimley-Horn and Associates, Inc., of Riverside, California, to increase the project funding by $152,000 for a total authorized expenditure of $264,000, to provide environmental services for Phase 2 of the Ontario Arena Entertainment District Project.

THE FOLLOWING COUNCIL GOALS ARE BEING ACHIEVED:
Operate in a Businesslike Manner
Invest in the Growth and Evolution of the City's Economy
Encourage, Provide or Support Enhanced Recreational, Educational, Cultural and Healthy City Programs, Policies and Activities

FISCAL IMPACT: Any potential long-term fiscal impact and project expenditures to the City will be offset by revenue sources such as development impact fees and property and sales tax revenues generated by future developments. If approved, additional zero impact appropriations will be requested at the first quarter budget adjustment.

BACKGROUND & ANALYSIS: On June 11, 2024, the City executed a Professional Services Agreement with Kimley-Horn and Associates, Inc., for the preparation of an Environmental Impact Report (EIR) Addendum to the Certified Ontario Center Specific Plan EIR. The approved budget for this project was $112,000. An amendment to the executed Professional Services Agreement with Kimley-Horn and Associates, Inc., is proposed in the amount of $128,000, plus ten percent (10%) contingency of Twenty-four Thousand Dollars ($24,000), for a total authorized expenditure amount of $264,000. The additional funds will be used to prepare additional studies including: [1] Traffic Impact Study, and [2] Parking Study for the Ontario Center Entertainment District.

AMENDMENT NO. 1 TO THE PROFESSIONAL SERVICES AGREMEENT BETWEEN THE CITY OF ONTARIO AND KIMLEY-HORN AND ASSOCIATES, INC.

1. Parties and Date.

This Amendment No. 1 to the Agreement (as defined herein) is made and entered as of _____, by and between the City of Ontario ("City") and Kimley Horn and Associates, Inc., a corporation. The City and Kimley Horn and Associates, Inc. are sometimes individually referred to as "Party" and collectively as "Parties."

2. Recitals.

2.1 Agreement. The City and Kimley Horn and Associates, Inc. have entered into an agreement entitled "Professional Services Agreement" dated June 11, 2024, ("Agreement").

2.2 Amendment Purpose. The City and Kimley Horn and Associates, Inc. desire to amend the Agreement to revise the scope of services for the Environmental Impact Report (EIR) Addendum in the amount of $112,000., to amend the Certified Ontario Center Specific Plan EIR and the not-to-exceed compensation amount by One Hundred Twenty-Eight Thousand Dollars ($128,000) for a total contract amount not-to-exceed Two Hundred Forty Thousand Dollars ($240,000).

2.3 Amendment Authority. This Amendment No. 1 is authorized pursuant to Section 3.7.14 of the Agreement.

3. Terms.

3.1 Amendment. Section 3.2.1 of the Agreement is hereby amended in its entirety to read as follows:

> "Consultant shall receive compensation, including authorized reimbursements, for all Services rendered under this Agreement at the rates set forth in Exhibit "C" attached hereto and incorporated in by reference. The total compensation shall not exceed **Two Hundred Forty Thousand Dollars** (**$240,000.00**) without written approval of the City Council or City Manager, or designee, as applicable. Extra Work may be authorized, as described below, and if authorized, will be compensated at the rates and manner set forth in this Agreement."

Exhibit A is hereby deleted in its entirety and replaced with Attachment A attached hereto and incorporated herein by reference.

Exhibit B is hereby deleted in its entirety and replaced with Attachment B attached hereto and incorporated herein by reference.

Exhibit C is hereby deleted in its entirety and replaced with Attachment C attached hereto and incorporated herein by reference.

3.2 Continuing Effect of Agreement. Except as amended by this Amendment No. 1, all other provisions of the Agreement remain in full force and effect and shall govern the actions of the parties under this Amendment No. 1. From and after the date of this Amendment No. 1, whenever the term "Agreement" appears in the Agreement, it shall mean the Agreement as amended by this Amendment No. 1.

3.3 Adequate Consideration. The Parties hereto irrevocably stipulate and agree that they have each received adequate and independent consideration for the performance of the obligations they have undertaken pursuant to this Amendment No. 1.

3.4 Severability. If any portion of this Amendment No. 1 is declared invalid, illegal, or otherwise unenforceable by a court of competent jurisdiction, the remaining provisions shall continue in full force and effect.

3.5 Integration. This Amendment represents the entirety of the Parties' understanding relating to the subject of this Amendment, including written or verbal communications between the Parties, which shall have no relevance unless expressly incorporated herein. This is an integrated amendment.

Ontario, CA 91764

RE: Preparation of a California Environmental Quality Act (CEQA) Environmental Impact Report (EIR) Addendum to Amend the Adopted Certified Ontario Center Specific Plan EIR Previously Approved for the Phase 2 of the Ontario Arena Entertainment District Project

Dear Mr. Zeledon:

Kimley-Horn and Associates, Inc. (Kimley-Horn) appreciates the opportunity to submit this proposal to provide environmental services to the City of Ontario (“Client” or "City"), for the preparation of an EIR Addendum to the Adopted Certified Ontario Center Specific Plan EIR (“the Project”). The EIR Addendum will be prepared in accordance with City policy and procedures as directed by City staff, for compliance with the California Environmental Quality Act (CEQA). Based on direction provided by the City, it is assumed that an EIR Addendum is the appropriate CEQA document for this Project.

Background

The City of Ontario approved the Ontario Center Specific Plan (Specific Plan) in August 1981. As adopted in 1981, the Specific Plan provided for up to 1,530 residential units, close to seven million square feet of commercial development, and nearly two million square feet of industrial uses on approximately 600 acres. Several amendments to the 1981 Specific Plan, along with appropriate environmental review, have been approved by the City since its adoption.

Project Understanding

The proposed Project consists of the amendment of the Piemonte Overlay for the Ontario Center Specific Plan EIR for the Phase 2 portion of the Project. The scope of the project for Phase 2 will include the addition of 402,500 square feet (350,000 SF, plus 15%) of commercial entertainment uses, plus a 300-room hotel, 2,500 seat performance arts theater. Phase 2 will be located within Subareas 4 (proposed parking structure) and 19 (currently developed with parking lot) of the Piemonte Overlay of the Ontario Center Specific Plan (see attached conceptual site plan). Phase 2 does not require an Amendment to the Piemonte Overlay; however, the Piemonte Overlay states that future development within improved parking of Subarea 19, will require additional environmental review.

We have also made certain assumptions noted below regarding the frequency and nature of internal team meetings, internal/legal team review, and City staff coordination and review processes. Although City staff could provide much of the CEQA administrative support, we have included typical CEQA administrative support tasks in this proposal.

ADDENDUM EIR SCOPE OF WORK

Task 1: Mobilization

The Kimley-Horn environmental team will utilize available project information, plans and will utilize the technical studies prepared by Kimley-Horn, as well as other available relevant information. Kimley-Horn will confirm the overall approach and schedule with the City. Kimley-Horn will conduct a site visit to review existing conditions on the property and surrounding environment.

Task 2: Prepare Project Description

The Kimley-Horn environmental team will use information obtained in Task 1 and work closely with City staff and Applicant to prepare a draft Project Description (PD) for the CEQA document. The PD will be prepared to the level of detail required by the City for the entitlement approvals being sought. The draft PD will be sent to the City for review and will be used as the basis for the EIR Addendum.

Task 3: Prepare EIR Addendum

This task assumes preparation of the EIR Addendum and incorporation of findings from the technical studies. State CEQA Guidelines Section 15164 provides general guidance regarding Addendums; however, it defers to Section 15162 to determine whether circumstances warrant preparation of a Subsequent EIR. In other words, if the project fails to meet Section 15162 criteria, an Addendum may be appropriate. This finding must consider factors such as changes in the scope of the proposed Project relative to the approved Project, changes in surrounding circumstances that have occurred since the Final EIR was certified, and the discovery of new information that was not known at the time the previous EIR was prepared. The Addendum test is the ability to provide substantial evidence showing that the proposed Project would not create new significant adverse impacts or increase the severity of a significant adverse impact identified in the previous EIR.

For the environmental analysis, it is important to demonstrate that adequate consideration has been given to all the environmental topics previously analyzed as part of the Certified Ontario Center Specific Plan EIR and sufficient documentation is provided to support the determination that the Addendum is the appropriate CEQA documentation. Therefore, Kimley-Horn proposes to use the CEQA Environmental Checklist as the basis for the analysis. For each topic on the checklist, a summary of the findings from the Final EIR will be provided. Kimley-Horn anticipates

that the results of the technical studies will conclude that the proposed Project's impacts are consistent with the Certified Ontario Center Specific Plan EIR. The EIR Addendum will rely upon graphics provided by the Applicant or others.

The State CEQA Guidelines do not specify the content or format for an EIR Addendum. Kimley-Horn recommends the Addendum consist of the following: (1) Purpose of the Addendum; (2) Project Background; (3) Project Description, which would provide a project setting discussion; (4) Environmental Analysis; and (5) Conclusions. A Mitigation Monitoring and Reporting Plan (MMRP) will be provided as an Appendix to the Addendum. The MMRP will identify those measures from the Specific Plan Final EIR that would be applicable to the proposed Project as well as any modifications to measures and standard conditions of approval that are applicable based on regulatory and City requirements. The MMRP is assumed to be simply an update of the existing approved MMRP.

Task 4: Address City Comments on Admin Draft Addendum EIR

This task assumes up to two (2) rounds of comments from the City. Once comments have been addressed, Kimley-Horn will prepare a final EIR Addendum for the City's records. If necessary, up to 5 hard copies of the Addendum will be printed with all technical studies on CD. Per CEQA Guidelines Section15164 (c), an EIR Addendum does not need to be circulated for public review.

This task excludes preparation of updated findings, all public notices, or other administrative CEQA support services, which could be provided on a time and materials basis if desired.

Task 5: Project Meetings

The Kimley-Horn Project Manager will attend meetings on a time and materials (T&M) basis, assumed to be up to three (3) meetings with the Client or City staff. If desired by the City, Kimley-Horn will make a presentation of CEQA findings to the City at one public meeting.

Task 6: Project Management

The Kimley-Horn team will be led by Mr. Ruben Salas, with support by Mr. Kevin Thomas, CEP, ENV SP. Ruben has over 9 years of experience and Kevin has over 35 years of experience in CEQA/NEPA compliance. Kevin will personally review the CEQA documentation and related analyses for compliance with CEQA. Ruben and Kevin will provide regular updates to the Client.

TECHNICAL STUDIES

Task 7: Air Quality and Greenhouse Gas Emissions Analysis

The project specific technical analysis will evaluate air quality impacts associated with the proposed project relative to impacts identified in the Ontario Center Specific Plan EIR. The

significance of air quality and greenhouse gas impacts will be determined in comparison to applicable significance thresholds and to the findings of the Specific Plan EIR.

Kimley-Horn will assess air quality emissions in accordance with the South Coast Air Quality Management District's (SCAQMD's) recommended methodologies set forth in the SCAQMD *CEQA Air Quality Handbook*. The analysis will be prepared in accordance with the criteria, standards, and provisions of the California Environmental Quality Act (CEQA) and will respond to the applicable checklist items within Appendix G of the CEQA Guidelines. The analysis will evaluate if the project would result in any new or substantially more severe significant environmental impacts as compared to the conclusions discussed in the certified EIR. The analysis will include the following:

- Construction emissions (equipment exhaust and fugitive dust) will be quantitatively evaluated using the California Emissions Estimator Model (CalEEMod).
- Operational emissions (i.e., area, mobile, and energy source) will be quantified with CalEEMod.
- Modeled construction and operational emissions will also be compared to the SCAQMD Localized Significance Thresholds to determine whether the localized impacts would occur. Construction health risks will be evaluated qualitatively. If necessary, a construction health risk can be provided under a separate scope and fee.
- Project consistency with the SCAQMD's latest Air Quality Management Plan (AQMP) will be addressed.
- Kimley-Horn will provide a qualitative odor analysis from the construction and operation of the proposed project.

Kimley-Horn will analyze the project's consistency with the City of Ontario Community Climate Action Plan (CCAP). The analysis will use the CCAP Screening Tables to determine if the project can garner 100 points by including enough GHG reduction strategies in order to be consistent with the CCAP and result in a less than significant GHG impact. The analysis will evaluate if the project would result in any new or substantially more severe significant environmental impacts as compared to the conclusions discussed in the certified EIR. The significance of GHG impacts will be determined in comparison to applicable significance thresholds and to the findings of the Specific Plan EIR.

Task 8: Noise and Vibration Assessment

Kimley-Horn will prepare a noise and vibration assessment that will quantify both construction and operational noise levels. Pursuant to CEQA Guidelines Section 15164, the noise analysis will compare the potential impacts of the current proposal with the previous impacts identified for

the Specific Plan EIR. The analysis will examine whether the project noise would generate a substantial temporary or permanent increase in ambient noise levels in the vicinity of the project in excess of applicable standards. The following outlines our approach:

- **Existing Conditions and Regulatory Setting.** Noise standards regulating noise impacts will be discussed for land uses on and adjacent to the project site. A site visit will be conducted, and short-term noise level measurements will be taken along the project area. Up to six short-term (10-minute) noise measurements will be taken at various locations to establish ambient noise levels at various land uses and areas in the project vicinity.

- **Construction Noise.** Noise impacts from construction sources will be analyzed based on the anticipated equipment to be used, length of a specific construction task, equipment power type (gasoline or diesel engine), horsepower, load factor, and percentage of time in use. The construction noise impacts will be evaluated in terms of maximum levels (L_{max}) and hourly equivalent continuous noise levels (L_{eq}) and the frequency of occurrence at adjacent sensitive locations.

- **Vibration.** An analysis of construction vibration impacts will be based on the Federal Transit Administration's (FTA's) vibration analysis guidance. Analysis requirements will be based on the sensitivity of the area, specific construction activities, and Noise Ordinance specifications. The analysis will examine whether the project would generate excessive groundborne vibration.

- **Operational Noise.** On-site noise generating activities will be addressed and analyzed for potential impacts to the adjacent uses and will be assessed against the applicable Land Use Noise and Compatibility Matrix and Interior/Exterior Noise Guidelines. Stationary noise sources will be quantitatively assessed. On- and off-site noise impacts from vehicular traffic will be assessed using the U.S. FHWA Traffic Noise Prediction Model (FHWA-RD-77-108). The 24-hour weighted Community Noise Equivalent Levels (CNEL) will be presented in a tabular format.

Noise and vibration effects during construction and operation will be compared to the applicable significance criteria, and then compared to the findings of the Specific Plan EIR. Applicable mitigation consistent with the Specific Plan EIR will be identified.

Task 9: Water Supply Assessment

Kimley-Horn will prepare the Phase II of the Original Model Colony Adept Project WSA. The WSA will demonstrate if there will be a sufficient water supply for the proposed developments detailed in Phase 2 of the Ontario Arena Entertainment District. A WSA is required to prepare in compliance with the California Environmental Quality Act (CEQA). The Phase II WSA will be a full,

comprehensive assessment, building on the findings from the Phase l WSA conducted by Placeworks, Inc.

Kimley-Horn will provide the services specifically set forth below.

Data Collection

This task assumes consultant will research and acquire the following data:

- 2020 City of Ontario Urban Water Management Plan,
- 2020 Chino Basin Desalter Authority Urban Water Management Plan,
- 2020 Inland Empire Utilities Agency Urban Water Management Plan,
- 2020 San Antonio Water Company Urban Water Management Plan,
- Water System Master Plan,
- Water Distribution System Computer Model (if available),
- Information on water supply sources including water supplies available during normal, single dry, and multiple dry water years during a 20-year period, and
- Water infrastructure in the Phase 2 of the Ontario Arena Entertainment District Project Plan

Water Demand Projections

Based on the land use information provided by the Client, Kimley-Horn will project water demand using acceptable unit water demand duty factors per the local standards, for the proposed development. The developed water demand information will form the basis for the WSA.

Water Supply Assessment

Kimley-Horn will perform a WSA using information presented in the UWMP that examines existing water supply entitlements, water rights, and water service contracts relevant to the water supply for the proposed Specific Plan, as well as water received in prior years pursuant to those entitlements and any proposed additional water supplies planned by the City to assess whether sufficient water supplies would be available for the future project.

The WSA will address whether the City of Ontario's water system's total projected water supplies available during normal, single dry, and multiple dry water years during a 20-year projection would meet the projected water demand associated with the proposed Project in addition to the public water system's existing and planned future uses.

Draft and Final Report Presentation

Following the WSA analysis, Kimley-Horn will prepare Draft and Final reports that includes the following:

1. Introduction
2. Project Description
3. Project Location
4. Existing Land Uses
5. Proposed Land Uses
6. Identification of Public Water System
7. Project Water Demand
8. Urban Water Management Plan Review which addresses the following:
    a. Recycled Water Use
    b. Groundwater
    c. Water Conservation Act of 2009
    d. Water Supply Reliability
    e. Water Shortage Contingency Planning
    f. Demand Management Measures
9. Conclusions and Recommendations

Kimley-Horn will submit the Draft Report to the Client for review and comments. Kimley-Horn will incorporate two rounds of review comments and prepare a Final Report.

Task 10: Traffic Impact Study

Kimley-Horn will prepare a Traffic Study based on the City of Ontario traffic study requirements and the San Bernardino County Transportation Authority (SBCTA) *Recommended Traffic Impact Analysis Guidelines for Vehicle Miles Traveled (VMT) and Level of Service (LOS) Assessment* (SBCTA Guidelines; February 2020).

Sub-Task 10.1: Scoping Agreement and VMT Screening

Kimley-Horn will obtain a copy of the Project site plan for the proposed Project, including building square footages and uses, site layout, site driveways, parking supply, and any other site features that will affect the traffic analysis.

Kimley-Horn will prepare a Traffic Study Scoping Agreement, identifying the Project trips, trip distribution, and recommended study locations for submittal to City of Ontario Traffic Engineering staff. One (1) conference call with City staff is assumed; to discuss and resolve the Scoping Agreement.

Kimley-Horn will run initial VMT screening based the City of Ontario VMT requirements and the San Bernardino County Transportation Authority (SBCTA) Guidelines. Kimley-Horn will coordinate with the lead agency regarding their planned approach to establishing thresholds and methodologies for the VMT analysis. Should the City require a quantitative VMT analysis, a quantitative VMT scope is provided below.

Sub-Task 10.2: LOS Analysis

Kimley-Horn will conduct a site visit to observe and document existing traffic conditions in the Project vicinity, including site access points, surrounding street system and traffic control, and surrounding land uses.

Based on discussion with City Staff, Kimley-Horn assumes that the traffic analysis will evaluate Project-related effects at up to twenty-seven (27) study intersections and up to twenty-four (24) roadway segments, as noted below:

1. Fourth Street at Haven Avenue
2. Fourth Street at Shopping Center Driveway
3. Fourth Street at Duesendberg Drive/Utica Avenue
4. Fourth Street at Via Asti
5. Fourth Street at Via Piemonte
6. Fourth Street at Empire Court
7. Fourth Street at Milliken Avenue
8. Fourth Street at Franklin Avenue
9. Fourth Street at I-15 SB Ramps/Ontario Mills Drive
10. Fourth Street at I-15 NB Ramps
11. Concours Street at Haven Avenue
12. Concours Street at Shopping Center Driveway
13. Concours Street at Mercedes Lane/Ontario Center (West)
14. Concours Street at Mian Driveway
15. Concours Street at Ferrari Lane
16. Concours Street at Ontario Center (East)
17. Concours Street at Milliken Avenue
18. Inland Empire Boulevard at Haven Avenue
19. Inland Empire Boulevard at Porsche Way/Mercedes Lane
20. Inland Empire Boulevard at Ferrari Lane
21. Inland Empire Boulevard at Milliken Avenue
22. Haven Avenue at I-10 WB Ramps
23. Haven Avenue at I-10 EB Ramps
24. Milliken Avenue at I-10 WB Ramps/Ontario Mills Parkway
25. Milliken Avenue at I-10 EB Ramps
26. Ontario Center at Via Asti
27. Ontario Center at Via Piemonte (West)

Study Roadway Segments:

1. Fourth Street: West of Haven Avenue

2. Fourth Street: Haven Avenue to Duesendberg Drive/Utica Avenue
3. Fourth Street: Duesendberg Drive/Utica Avenue to Via Asti
4. Fourth Street: Via Piemonte to Milliken Avenue
5. Fourth Street: Milliken Avenue to Franklin Avenue
6. Fourth Street: Franklin Avenue to I-15 SB Ramps/Ontario Mills Drive
7. Concours Street: Haven Avenue to Mercedes Lane/Ontario Center (West)
8. Concours Street: Mercedes Lane/Ontario Center (West) to Main Driveway
9. Concours Street: Main Driveway to Ferrari Lane
10. Concours Street: Ferrari Lane to Ontario Center (East)
11. Concours Street: Ontario Center (East) to Milliken Avenue
12. Inland Empire Boulevard: Haven Avenue to Porsche Way/Mercedes Lane
13. Inland Empire Boulevard: Porsche Way/Mercedes Lane to Ferrari Lane
14. Inland Empire Boulevard: Ferrari Lane to Milliken Avenue
15. Haven Avenue: North of Fourth Street
16. Haven Avenue: Fourth Street to Concours Street
17. Haven Avenue: Concours Street to Inland Empire Boulevard
18. Haven Avenue: Inland Empire Boulevard to I-10 WB Ramps
19. Haven Avenue: I-10 WB Ramps to I-10 EB Ramps
20. Milliken Avenue: North of Fourth Street
21. Milliken Avenue: Fourth Street to Concours Street
22. Milliken Avenue: Concours Street to Inland Empire Boulevard
23. Milliken Avenue: Inland Empire Boulevard to I-10 WB Ramps
24. Milliken Avenue: I-10 WB Ramps to I-10 EB Ramps

Kimley-Horn will collect weekday daily, morning, and evening peak hour traffic count data for the agreed upon study locations.

Kimley-Horn will develop Project trip generation estimates, using the Institute of Transportation Engineers (ITE) Trip Generation Manual (11th Edition) trip rates.

Kimley-Horn will develop trip distribution assumptions for the Project traffic, based on likely origins and destinations of employees and patrons, as well as current traffic patterns in the area. Project traffic will be distributed through the study intersections, and the Project traffic contribution to each intersection will be identified.

Kimley-Horn will summarize operating conditions at the study intersections for the following scenarios:

1. Existing Conditions
2. Opening Year Cumulative (Existing Plus Ambient Growth Plus Cumulative Projects
3. Opening Year Cumulative Plus Project

4. Horizon Year 2050
5. Horizon Year 2050 Plus Project

Kimley-Horn will work with City staff and surrounding cities to identify approved and pending projects and ambient growth rates, to develop cumulative conditions traffic forecasts for the Project Opening Year.

Kimley-Horn will develop Horizon Year forecast volumes based on SBTAM model plots and the B-turns methodology.

Kimley-Horn will identify Project-related effects and recommended improvements, if necessary.

Sub-Task 10.3: Documentation and Response to Comments

Kimley-Horn will prepare a stand-alone traffic study to document the methods and results of the analyses performed in Tasks 10.1 and 10.2.

Kimley-Horn will revise the traffic study to respond to one (1) round of City review comments, to the extent that the revisions are within the approved scope of services and that no new data collection or additional analysis is required.

The traffic study will address the impacts of a single development scenario. Analysis of Project alternatives, phased development, additional analysis scenarios, or revised analysis to address revisions to the site plan will require fee augmentation.

Task 11: Shared Parking Study

Kimley-Horn will prepare a shared parking study for the proposed Project.

Kimley-Horn will obtain a copy of the Project site plan showing the site layout, with proposed building uses and square footages, and all parking areas with the number of parking spaces enumerated.

Kimley-Horn will prepare a parking summary table for the Project, showing the City's parking requirements based on the Project land uses and the City's parking code. The table will provide the square footage of each of the uses associated with the Project, and the parking requirement per the City's municipal code. The table will compare the parking requirement based on the City's code to the proposed parking supply and will determine if there is a parking surplus or deficit.

Kimley-Horn will obtain and review existing parking information from the applicant regarding parking occupancy in different existing parking lots for both an Event and Non-Event days.

Kimley-Horn will conduct a shared parking analysis for the development, using the latest Urban Land Institute (ULI) Shared Parking (3rd Edition) procedures to identify the amount of parking relief that can be justified due to mixed-use shared parking synergies within the overall property.

Kimley-Horn will evaluate the parking demand based on the following two (2) scenarios:

1. Event Day
2. Non-Event Day

Kimley-Horn will prepare a parking study summarizing the findings, regarding the adequacy of the parking supply for the proposed Project based on the shared parking analysis.

Kimley-Horn will revise the parking study to respond to one (1) round of comments, to the extent that the revisions are within the approved scope of services and that no new data collection or additional analysis is required.

The shared parking study will address the parking for a single development phase. If analysis of Project alternatives, a phased development, revised development plans is requested, a fee augmentation will be necessary.

Kimley-Horn will attend up to two (2) conference calls with City staff and/or applicant is assumed to discuss methodology and results of the shared parking analysis.

Task 12: Quantitative VMT Analysis

Kimley-Horn will code land use into the Project's representative Traffic Analysis Zone (TAZ) within the SBTAM travel demand model (TDM). The SBTAM TDM uses the SCAG TransCad model. The resultant VMT output and interim model files will be used to determine the Home-based VMT per service population for the proposed Project. Note that this will require deconstructing the model output sufficiently so that both the trip purposes and trip lengths for each contributing part of the Project's VMT from other sources can be completed. The process undertaken will be consistent with OPR guidance as described in the most recent release of its guidance.

Kimley-Horn will identify applicable mitigation measures for reducing VMT impacts determined to be potentially significant, if necessary.

Kimley-Horn will prepare a VMT Study summarizing the results of the quantitative VMT analysis.

Kimley-Horn will revise the VMT Study to respond to up-to one (1) round of City review comments, to the extent that the revisions are within the approved scope of services and that no new data collection or additional analysis is required.

Assumptions/Limitations

Air Quality/GHG/Noise Assumptions

- Kimley-Horn will be provided the following project detail to support the analysis:
  - Site plans and grading plans.
  - Project narrative identifying type of development, land use designations, off-site improvements, and any other relevant project details.
  - Traffic data will include daily trip generation and VMT data for the currently entitled land use and the proposed project.
  - Construction phasing and grading/excavation/paving quantities.
  - Energy/water conservation measures and sustainable project features that will be incorporated into the design.
- This scope accommodates revisions based on one consolidated set of comments. Additional comments can be addressed on a time and materials basis.
- This scope assumes the baseline conditions, project description, and approach will not change once Client issues the Authorization to Proceed (ATP).
- Revisions or changes to the project that require re-analysis are excluded.
- We will provide our services as expeditiously as practicable with the goal of providing a draft report within six weeks of receipt of the requested data.
- Deliverables will be provided electronically.
- This scope excludes meetings/hearings.
- Fees and timeframes stated herein are valid for sixty (60) days after the date of this scope of work.

WSA Assumptions

- No water system modeling included within the WSA scope.
- Up to one (1) review cycle with the City of Ontario
- Up to one (1) meeting with the City of Ontario
- Project description and proposed uses are based on the City of Ontario and the subsequent new developments proposed in the Phase 2 of the Ontario Arena Entertainment District Project.
- Phase I WSA prepared by Placeworks, Inc, has been approved and does not require verification of findings.
- The City of Ontario is the only agency reviewing the WSA and requiring coordination with.
- Preparation of this WSA assumes the City of Ontario has adequate supply planned for in the UWMP. This Project will not require a demand greater than allowable within the UWMP. If demand is in excess of the available supply in the UWMP and a new supply is required - research/meetings/and coordination pertaining to develop a new supply are not included within this scope of work.
- A Draft WSA can be anticipated within twelve weeks of receiving notice to proceed.

Traffic Study/VMT/and Parking Analysis Assumptions

- Attendance at project team meetings and attendance at public meetings and public hearings will be extra services and will be billed on a time-and-materials basis in accordance with the standard hourly billing rate schedule in effect at the time the meetings are requested.
- Services not outlined above would constitute extra effort, to be performed for an additional fee, to be agreed upon prior to performing the work.

Addendum EIR Schedule

Kimley-Horn can submit the Project Description within three weeks of receipt of the Project information including the site plan and requested City approval applications. The Administrative Draft Addendum EIR can be submitted within three weeks of completion of all necessary technical studies.

The schedule is highly dependent on timely review and responses from City staff. If a separate review process by the applicant or City third party CEQA reviewer or legal counsel is desired, the schedule and fee estimate may be increased to allow for additional coordination and review/revision time. Kimley-Horn will expedite the schedule to the extent practical.

Fees and Expenses

Kimley-Horn will perform the Scope of Services outlined above on a labor fee plus expense basis with the maximum labor fee shown on the Fee and Expenses Table presented below, except those additional efforts associated with Tasks 4, 5 and 6 which will be performed on a T&M basis. Kimley-Horn will not exceed the total maximum labor fee shown without authorization from the Client. Individual Task amounts are provided for budgeting purposes only. Kimley-Horn reserves the right to reallocate amounts among Tasks, as necessary.

Labor fee will be billed on an hourly basis according to our then-current rates. As to these Tasks, direct reimbursable expenses such as express delivery services, fees, air travel, and other direct expenses will be billed at 1.10 times cost. A percentage of labor fee will be added to each invoice to cover certain other expenses as to these Tasks such as telecommunications, in-house reproduction, postage, supplies, project related computer time, and local mileage. Administrative time related to the project may be billed hourly. All permitting, application, and similar Project fees will be paid directly by the City. Should the City request Kimley-Horn to advance any such Project fees on City's behalf, a separate invoice for such fees, with a ten percent (10%) markup, will be immediately issued to and paid by the City.

Task 1: Mobilization	$2,000
Task 2: Project Description	$3,000
Task 3: Preparation of Addendum EIR	$24,000
Task 4: Address Comments on Admin Draft (T&M)	$8,000
Task 5: Project Meetings (T&M)	$6,000
Task 6: Project Management (T&M)	$6,000
Task 7: Air Quality and GHG Studies	$18,000
Task 8: Noise and Vibration Study	$15,000
Task 9: Water Supply Assessment	$30,000
Task 10: Traffic Impact Study	$86,000
Task 11: Parking Study	$13,500
Task 12: Quantitative VMT Analysis and Coord.	$18,000
Expenses	$10,500
Total Labor Fee	**$240,000**

Note:

- A 4.6% percentage of labor fee is added to each invoice to cover certain other expenses such as telecommunications, in-house reproduction, postage, supplies, project related computer time, and local mileage.
- Total fee estimate excludes reimbursable expenses, which will be invoiced at cost plus 15%.
- Hourly tasks will be invoiced using then current hourly rates.
- Lump sum tasks will be invoiced on a percentage complete basis.
- Kimley-Horn reserves the right to reallocate budgets among tasks.

Closure

We look forward to the opportunity to work with the City of Ontario on this Project. Should you have any questions or require additional information, please contact Project Manager Ruben Salas at (951) 335-8282 or via email at ruben.salas@kimley-horn.com and or Project Director Kevin Thomas can be reached at (951) 543-9875, or kevin.thomas@kimley-horn.com.

Sincerely,

KIMLEY-HORN AND ASSOCIATES, INC.

Attachment: Standard Agreement Provisions

Approved:

City of Ontario

By:

(signature) _____ Title:_____

(print name) _____ Date:_____

KIMLEY-HORN AND ASSOCIATES, INC.

STANDARD PROVISIONS

1) Kimley-Horn's Scope of Services and Additional Services. Kimley-Horn will perform only the services specifically described in this Agreement. If requested by the Client and agreed to by Kimley-Horn, Kimley-Horn will perform Additional Services, which shall be governed by these provisions. Unless otherwise agreed to in writing, the Client shall pay Kimley-Horn for any Additional Services an amount based upon Kimley-Horn's then-current hourly rates plus an amount to cover certain direct expenses including telecommunications, in-house reproduction, postage, supplies, project related computer time, and local mileage. Other direct expenses will be billed at 1.15 times cost.

2) Client's Responsibilities. In addition to other responsibilities herein or imposed by law, the Client shall:

a. Designate in writing a person to act as its representative, such person having complete authority to transmit instructions, receive information, and make or interpret the Client's decisions.

b. Provide all information and criteria as to the Client's requirements, objectives, and expectations for the project and all standards of development, design, or construction.

c. Provide Kimley-Horn all available studies, plans, or other documents pertaining to the project, such as surveys, engineering data, environmental information, etc., all of which Kimley-Horn may rely upon.

d. Arrange for access to the site and other property as required for Kimley-Horn to provide its services.

e. Review all documents or reports presented by Kimley-Horn and communicate decisions pertaining thereto within a reasonable time so as not to delay Kimley-Horn.

f. Furnish approvals and permits from governmental authorities having jurisdiction over the project and approvals and consents from other parties as may be necessary.

g. Obtain any independent accounting, legal, insurance, cost estimating, and feasibility services required by Client.

h. Give prompt written notice to Kimley-Horn whenever the Client becomes aware of any development that affects Kimley-Horn's services or any defect or noncompliance in any aspect of the project.

3) Period of Services. Unless otherwise stated herein, Kimley-Horn will begin work after receipt of a properly executed copy of this Agreement. This Agreement assumes conditions permitting continuous and orderly progress through completion of the services. Times for performance shall be extended as necessary for delays or suspensions due to circumstances that Kimley-Horn does not control. If such delay or suspension extends for more than six months, Kimley-Horn's compensation shall be renegotiated.

4) Method of Payment. Client shall pay Kimley-Horn as follows:

a. Invoices will be submitted periodically for services performed and expenses incurred. Payment of each invoice will be due within 25 days of receipt. The Client shall also pay any applicable sales tax. All retainers will be held by Kimley-Horn and applied against the final invoice. Interest will be added to accounts not paid within 25 days at the maximum rate allowed by law. If the Client fails to make any payment due under this or any other agreement within 30 days after Kimley-Horn's transmittal of its invoice, Kimley-Horn may, after giving notice to the Client, suspend services and withhold deliverables until all amounts due are paid.

b. If the Client relies on payment or proceeds from a third party to pay Kimley-Horn and Client does not pay Kimley-Horn's invoice within 60 days of receipt, Kimley-Horn may communicate directly with such third party to secure payment.

c. If the Client objects to an invoice, it must advise Kimley-Horn in writing giving its reasons within 14 days of receipt of the invoice or the Client's objections will be waived, and the invoice shall conclusively be deemed due and owing. If the Client objects to only a portion of the invoice, payment for all other portions remains due.

d. If Kimley-Horn initiates legal proceedings to collect payment, it may recover, in addition to all amounts due, its reasonable attorneys' fees, reasonable experts' fees, and other expenses related to the proceedings. Such expenses shall include the cost, at Kimley-Horn's normal hourly billing rates, of the time devoted to such proceedings by its employees.

e. The Client agrees that the payment to Kimley-Horn is not subject to any contingency or condition. Kimley-Horn may negotiate payment of any check tendered by the Client, even if the words "in full satisfaction" or words intended to have similar effect appear on the check without such negotiation being an accord and satisfaction of any disputed debt and without prejudicing any right of Kimley-Horn to collect additional amounts from the Client.

5) Use of Documents. All documents and data prepared by Kimley-Horn are related exclusively to the services described in this Agreement and may be used only if the Client has satisfied all of its obligations under this Agreement. They are not intended or represented to be suitable for use or reuse by the Client or others on extensions of this project or on any other project. Any modifications by the Client to any of Kimley-Horn's documents, or any reuse of the documents without written authorization by Kimley-Horn will be at the Client's sole risk and without liability to Kimley-Horn, and the Client shall indemnify, defend and hold Kimley-Horn harmless from all claims, damages, losses and expenses, including but not limited to attorneys' fees, resulting therefrom. Kimley-Horn's electronic files and source code remain the property of Kimley-Horn and shall be provided to the

Client only if expressly provided for in this Agreement. Any electronic files not containing an electronic seal are provided only for the convenience of the Client and use of them is at the Client's sole risk. In the case of any defects in the electronic files or any discrepancies between them and the hardcopy of the documents prepared by Kimley-Horn, the hardcopy shall govern.

6) Intellectual Property. Kimley-Horn may use or develop its proprietary software, patents, copyrights, trademarks, trade secrets, and other intellectual property owned by Kimley-Horn or its affiliates ("Intellectual Property") in the performance of this Agreement. Unless explicitly agreed to in writing by both parties to the contrary, Kimley-Horn maintains all interest in and ownership of its Intellectual Property and conveys no interest, ownership, license to use, or any other rights in the Intellectual Property to Client. Any enhancements of Intellectual Property made during the performance of this Agreement are solely owned by Kimley-Horn and its affiliates. If Kimley-Horn's services include providing Client with access to or a license for Kimley-Horn's (or its affiliates') proprietary software or technology, Client agrees to the terms of the Software License Agreement set forth at https://www.kimley-horn.com/khts-software-license-agreement ("the License Agreement") which terms are incorporated herein by reference.

7) Opinions of Cost. Because Kimley-Horn does not control the cost of labor, materials, equipment or services furnished by others, methods of determining prices, or competitive bidding or market conditions, any opinions rendered as to costs, including but not limited to the costs of construction and materials, are made solely based on its judgment as a professional familiar with the industry. Kimley-Horn cannot and does not guarantee that proposals, bids or actual costs will not vary from its opinions of cost. If the Client wishes greater assurance as to the amount of any cost, it shall employ an independent cost estimator. Kimley-Horn's services required to bring costs within any limitation established by the Client will be paid for as Additional Services.

8) Termination. The obligation to provide further services under this Agreement may be terminated by either party upon seven days' written notice in the event of substantial failure by the other party to perform in accordance with the terms hereof, or upon thirty days' written notice for the convenience of the terminating party. Kimley-Horn shall be paid for all services rendered and expenses incurred to the effective date of termination, and other reasonable expenses incurred by Kimley-Horn as a result of such termination.

9) Standard of Care. The standard of care applicable to Kimley-Horn's services will be the degree of care and skill ordinarily exercised by consultants performing the same or similar services in the same locality at the time the services are provided. No warranty, express or implied, is made or intended by Kimley-Horn's performance of services, and it is agreed that Kimley-Horn is not a fiduciary with respect to the Client.

10) LIMITATION OF LIABILITY. In recognition of the relative risks and benefits of the Project to the Client and Kimley-Horn, the risks are allocated such that, to the fullest extent allowed by law, and notwithstanding any other provisions of this Agreement or the existence of applicable insurance coverage, that the total liability, in the aggregate, of Kimley-Horn and Kimley-Horn's officers, directors, employees, agents, and subconsultants to the Client or to anyone claiming by, through or under the Client, for any and all claims, losses, costs or damages whatsoever arising out of or in any way related to the services under this Agreement from any causes, including but not limited to, the negligence, professional errors or omissions, strict liability or breach of contract or any warranty, express or implied, of Kimley-Horn or Kimley-Horn's officers, directors, employees, agents, and subconsultants, shall not exceed twice the total compensation received by Kimley-Horn under this Agreement or $50,000, whichever is greater. Higher limits of liability may be negotiated for additional fee. This Section is intended solely to limit the remedies available to the Client or those claiming by or through the Client, and nothing in this Section shall require the Client to indemnify Kimley-Horn.

11) Mutual Waiver of Consequential Damages. In no event shall either party be liable to the other for any consequential, incidental, punitive, or indirect damages including but not limited to loss of income or loss of profits.

12) Construction Costs. Under no circumstances shall Kimley-Horn be liable for extra costs or other consequences due to unknown conditions or related to the failure of contractors to perform work in accordance with the plans and specifications. Kimley-Horn shall have no liability whatsoever for any costs arising out of the Client's decision to obtain bids or proceed with construction before Kimley-Horn has issued final, fully approved plans and specifications. The Client acknowledges that all preliminary plans are subject to substantial revision until plans are fully approved and all permits obtained.

13) Certifications. All requests for Kimley-Horn to execute certificates, lender consents, or other third-party reliance letters must be submitted to Kimley-Horn at least 14 days prior to the requested date of execution. Kimley-Horn shall not be required to execute certificates, consents, or third-party reliance letters that are inaccurate, that relate

to facts of which Kimley-Horn does not have actual knowledge, or that would cause Kimley-Horn to violate applicable rules of professional responsibility.

14) Dispute Resolution. All claims arising out of this Agreement or its breach shall be submitted first to mediation in accordance with the American Arbitration Association as a condition precedent to litigation. Any mediation or civil action by Client must be commenced within one year of the accrual of the cause of action asserted but in no event later than allowed by applicable statutes.

15) Hazardous Substances and Conditions. Kimley-Horn shall not be a custodian, transporter, handler, arranger, contractor, or remediator with respect to hazardous substances and conditions. Kimley-Horn's services will be limited to analysis, recommendations, and reporting, including, when agreed to, plans and specifications for isolation, removal, or remediation. Kimley-Horn will notify the Client of unanticipated hazardous substances or conditions of which Kimley-Horn actually becomes aware. Kimley-Horn may stop affected portions of its services until the hazardous substance or condition is eliminated.

16) Construction Phase Services.

a. If Kimley-Horn prepares construction documents and Kimley-Horn is not retained to make periodic site visits, the Client assumes all responsibility for interpretation of the documents and for construction observation, and the Client waives any claims against Kimley-Horn in any way connected thereto.

b. Kimley-Horn shall have no responsibility for any contractor's means, methods, techniques, equipment choice and usage, equipment maintenance and inspection, sequence, schedule, safety programs, or safety practices, nor shall Kimley-Horn have any authority or responsibility to stop or direct the work of any contractor. Kimley-Horn's visits will be for the purpose of endeavoring to provide the Client a greater degree of confidence that the completed work of its contractors will generally conform to the construction documents prepared by Kimley-Horn. Kimley-Horn neither guarantees the performance of contractors, nor assumes responsibility for any contractor's failure to perform its work in accordance with the contract documents.

c. Kimley-Horn is not responsible for any duties assigned to it in the construction contract that are not expressly provided for in this Agreement. The Client agrees that each contract with any contractor shall state that the contractor shall be solely responsible for job site safety and its means and methods; that the contractor shall indemnify the Client and Kimley-Horn for all claims and liability arising out of job site accidents; and that the Client and Kimley-Horn shall be made additional insureds under the contractor's general liability insurance policy.

17) No Third-Party Beneficiaries; Assignment and Subcontracting. This Agreement gives no rights or benefits to anyone other than the Client and Kimley-Horn, and all duties and responsibilities undertaken pursuant to this Agreement will be for the sole benefit of the Client and Kimley-Horn. The Client shall not assign or transfer any rights under or interest in this Agreement, or any claim arising out of the performance of services by Kimley-Horn, without the written consent of Kimley-Horn. Kimley-Horn reserves the right to augment its staff with subconsultants as it deems appropriate due to project logistics, schedules, or market conditions. If Kimley-Horn exercises this right, Kimley-Horn will maintain the agreed-upon billing rates for services identified in the contract, regardless of whether the services are provided by in-house employees, contract employees, or independent subconsultants.

18) Confidentiality. The Client consents to the use and dissemination by Kimley-Horn of photographs of the project and to the use by Kimley-Horn of facts, data and information obtained by Kimley-Horn in the performance of its services. If, however, any facts, data or information are specifically identified in writing by the Client as confidential, Kimley-Horn shall use reasonable care to maintain the confidentiality of that material.

19) Miscellaneous Provisions. This Agreement is to be governed by the law of the State where the Project is located. This Agreement contains the entire and fully integrated agreement between the parties and supersedes all prior and contemporaneous negotiations, representations, agreements, or understandings, whether written or oral. Except as provided in Section 1, this Agreement can be supplemented or amended only by a written document executed by both parties. Any conflicting or additional terms on any purchase order issued by the Client shall be void and are hereby expressly rejected by Kimley-Horn. If Client requires Kimley-Horn to register with or use an online vendor portal for payment or any other purpose, any terms included in the registration or use of the online vendor portal that are inconsistent or in addition to these terms shall be void and shall have no effect on Kimley-Horn or this Agreement. Any provision in this Agreement that is unenforceable shall be ineffective to the extent of such unenforceability without invalidating the remaining provisions. The non-enforcement of any provision by either party shall not constitute a waiver of that provision nor shall it affect the enforceability of that provision or of the remainder of this Agreement.

EXHIBIT "B"
SCHEDULE OF SERVICES

Kimley-Horn can submit the Project Description within three weeks of receipt of the Project information including the site plan and requested City approval applications. The Administrative Draft Addendum EIR can be submitted within three weeks of completion of all necessary technical studies.

The schedule is highly dependent on timely review and responses from City staff. If a separate review process by the applicant or City third party CEQA reviewer or legal counsel is desired, the schedule and fee estimate may be increased to allow for additional coordination and review/revision time. Kimley-Horn will expedite the schedule to the extent practical.

EXHIBIT "C"
COMPENSATION

Kimley-Horn will perform the Scope of Services outlined above on a labor fee plus expense basis with the maximum labor fee shown on the Fee and Expenses Table presented below, except those additional efforts associated with Tasks 4, 5 and 6 which will be performed on a T&M basis. Kimley-Horn will not exceed the total maximum labor fee shown without authorization from the Client. Individual Task amounts are provided for budgeting purposes only. Kimley-Horn reserves the right to reallocate amounts among Tasks, as necessary.

Task 1: Mobilization	$2,000
Task 2: Project Description	$3,000
Task 3: Preparation of Addendum EIR	$24,000
Task 4: Address Comments on Admin Draft (T&M)	$8,000
Task 5: Project Meetings (T&M)	$6,000
Task 6: Project Management (T&M)	$6,000
Task 7: Air Quality and GHG Studies	$18,000
Task 8: Noise and Vibration Study	$15,000
Task 9: Water Supply Assessment	$30,000
Task 10: Traffic Impact Study	$86,000
Task 11: Parking Study	$13,500
Expenses	$10,500
Total Labor Fee	**$222,000**
Optional Task	
Task 12: Quantitative VMT Analysis and Coord.	$18,000

Note:

- A 4.6% percentage of labor fee is added to each invoice to cover certain other expenses such as telecommunications, in-house reproduction, postage, supplies, project related computer time, and local mileage.
- Total fee estimate excludes reimbursable expenses, which will be invoiced at cost plus 15%.
- Hourly tasks will be invoiced using then current hourly rates.
- Lump sum tasks will be invoiced on a percentage complete basis.
- Kimley-Horn reserves the right to reallocate budgets among tasks.

CITY OF ONTARIO *Agenda Report* **August 20, 2024**	**SECTION:** **CONSENT CALENDAR**
Department: Housing Prepared By: Katryna Gonzalez Staff Member Presenting: Helen McAlary, Executive Director Community Life and Culture Reviewed By: Lacey A Rightmer Approved By:	Submitted To: Council/OHA Approved: _____ Continued To: _____ Denied: _____ Item No: 8

SUBJECT: A RESOLUTION AUTHORIZING THE SETTLEMENT AGREEMENT WITH KROGER CO.

RECOMMENDATION: That the City Council take the following actions:

A. Adopt a Resolution authorizing the City Manager to opt into a Settlement Agreement with opioid distributor, Kroger Co.;
B. Authorize the City Manager, or his designee, to execute any documents or agreements needed to implement the action; and
C. Ratify the previous actions taken by the City Manager in order to opt into the Kroger Settlement.

THE FOLLOWING COUNCIL GOALS ARE BEING ACHIEVED:
Invest in the Growth and Evolution of the City's Economy
Maintain the Current High Level of Public Safety
Operate in a Businesslike Manner

FISCAL IMPACT: The City of Ontario will receive approximately $125,000 in additional funding if it opts into the Settlement Agreement as recommended. The funds will be paid over a period of 11 years.

BACKGROUND & ANALYSIS: Many states and cities across the United States have sued the three largest opioid painkiller distributors (Amerisource Bergen, Cardinal Health, and McKesson) and the opioid manufacturer Janssen (owned by Johnson & Johnson). These lawsuits resulted in two settlements totaling approximately $26 billion. Additional parties joined these settlements in late 2022. The City of Ontario has opted into every round of opioid settlements and has begun receiving payments as of November 2022.

On June 7, 2024, Kroger Co. reached a tentative $1.2 billion settlement for opioid distribution claims, payable over 11 years. California is scheduled to receive roughly $122 million. The State will distribute 15% of the funds to the State Fund, 70% to the California Abatement Accounts Fund, and 15% to the California Subdivision Fund.

Local subdivisions, such as the City of Ontario, will receive their share from the California Abatement Accounts Fund. Ontario will receive approximately $125,000 distributed over 11 years, starting in late 2024. Cities can use the funds directly, following State reporting requirements, or allow the county to use the funds. Cities can also opt out and pursue independent legislation.

Funds received from this settlement must be used for future opioid remediation or abatement efforts. Currently, the City is using other opioid settlement funds to help support the COAST team, providing education, and providing treatment to prevent overdose. Any funds that remain unused or uncommitted within five years of receipt must be returned to the State. The City must complete an annual report that details fund usage until fully expended, plus one additional year. The California Department of Health Care Services ("DHCS") has the authority to review these reports for compliance.

Staff recommends that the City Council opt into the settlement and elect to receive payments directly by releasing its claims against Kroger Co. The attached Resolution authorizes the City Manager to execute the necessary agreements to opt in.

RESOLUTION NO. ____

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF ONTARIO, CALIFORNIA, AUTHORIZING THE CITY MANAGER TO ENTER INTO THE SETTLEMENT AGREEMENT WITH KROGER CO., AGREE TO THE TERMS OF THE STATE-SUBDIVISION AGREEMENT, AUTHORIZE ENTRY INTO THE STATE-SUBDIVISION AGREEMENT WITH THE ATTORNEY GENERAL, AND RATIFY PREVIOUS ACTIONS TAKEN BY THE CITY MANAGER WITH RESPECT TO THE KROGER SETTLEMENT

WHEREAS, the United States is facing an ongoing public health crisis of opioid abuse, addiction, overdose, and death, forcing the State of California and California counties and cities to spend billions of dollars each year to address the direct consequences of this crisis; and,

WHEREAS, pending in the U.S. District Court for the Northern District of Ohio is a multidistrict litigation ("MDL") being pursued by numerous public entity plaintiffs against the manufacturers and distributors of various opioids based on the allegation that the defendants' unlawful conduct caused the opioid epidemic; and,

WHEREAS on or about June 7, 2024, a proposed nationwide tentative settlement was reached between the plaintiffs in the MDL and Kroger Co. ("Kroger"); and,

WHEREAS, Kroger shall be referred in this Resolution as the "Settling Defendant"; and

WHEREAS, as part of the settlement with the Settling Defendant, local subdivisions, including certain cities, that are not plaintiffs in the MDL may participate in the Settlement in exchange for a release of the Settling Defendants; and,

WHEREAS, copies of the proposed terms of this proposed nationwide settlement have been set forth in the Master Settlement Agreements with the Settling Defendant; and,

WHEREAS, copies of the Master Settlement Agreement are on file with the City Clerk; and,

WHEREAS, the Settlement Agreement provides, among other things, for the payment of a certain sum to settling government entities in California including to the State of California and Participating Subdivisions upon occurrence of certain events as defined in the Settlement Agreement ("California Opioid Funds"); and,

WHEREAS, California local governments in the MDL have engaged in extensive discussions with the State Attorney General's Office ("AGO") as to how the California Opioid Funds will be allocated, which has resulted in the Proposed California State-Subdivision Agreements Regarding Distribution and Use of Settlement Funds ("Allocation Agreement") from the Settlement with the Settling Defendant; and,

WHEREAS, the Allocation Agreements allocate the California Opioid Funds as follows: 15% to the State Fund; 70% to the Abatement Accounts Fund; and 15% to the Subdivision Fund. For the avoidance of doubt, all funds allocated to California from the Settlement shall be combined pursuant to the Allocation Agreements, and 15% of the total from the Settlement shall be allocated to the State of California (the "State of California Allocation"), 70% to the California Abatement Accounts Fund ("CA Abatement Accounts Fund"), and 15% to the California Subdivision Fund ("CA Subdivision Fund"); and,

WHEREAS, under the Master Settlement Agreement, certain local subdivisions that did not file a lawsuit against the Settlement Defendant may qualify to participate in the Settlement and obtain funds from the Abatement Account Fund; and,

WHEREAS, the City is eligible to participate in the Settlement and become a CA Participating Subdivision; and,

WHEREAS, the funds in the CA Abatement Accounts Fund (the 70% allocation) will be allocated based on the allocation model developed in connection with the proposed negotiating class in the National Prescription Opiate Litigation (MDL No. 2804), as adjusted to reflect only those cities and counties that are eligible, based on population or litigation status, to become a CA Participating Subdivision (those above 10,000 in population). The percentage from the CA Abatement Accounts Fund allocated to each CA Participating Subdivision is set forth in Appendix 1 to the Allocation Agreements. The City's share of the CA Abatement Accounts Fund will be a product of the total in the CA Abatement Accounts Fund multiplied by the City's percentage set forth in Appendix 1 of the Allocation Agreements (the "Local Allocation"); and,

WHEREAS, a CA Participating Subdivision that is a city will be allocated its Local Allocation share as of the date on which it becomes a Participating Subdivision. The Local Allocation share for a city that is a CA Participating Subdivision will be paid to the county in which the city is located, unless the city elects to take a direct election of the settlement funds, so long as: (a) the county is a CA Participating Subdivision, and (b) the city has not advised the Settlement Fund Administrator that it requests direct payment at least 60 days prior to a Payment Date; and,

WHEREAS, it the intent of this Resolution is to authorize the City to enter into the Master Settlement Agreement with the Settling Defendant by executing the Participation Agreement and to enter into the Allocation Agreement by executing the signature pages to those agreements.

NOW THEREFORE, be it resolved by the City Council of the City of Ontario hereby finds, determines, and resolves as follows:

SECTION 1. The above recitals are true and correct and are incorporated herein by this reference.

SECTION 2. The City Manager is authorized to settle and release the City's claims against the Settling Defendant in exchange for the consideration set forth in the Settlement Agreement and Allocation Agreement. The following actions of the City Manager are hereby ratified by the City Council:

1. The execution of the Participation Agreement with the Settling Defendant and any and all documents ancillary thereto.

2. The execution of the Proposed California State-Subdivision Agreement Regarding Distribution and Use of Settlement Funds with the Settling Defendant by executing the signature pages to the Allocation Agreement.

3. Notification of the Settlement Fund Administrator that the City requests a direct payment under the Allocation Agreement at least 60 days prior to the Payment Date in the Settlement Agreement.

SECTION 3. CEQA. That the City Council finds this Resolution is not subject to the California Environmental Quality Act (CEQA) in that the activity is covered by the general rule that CEQA applies only to projects which have the potential for causing a significant effect on the environment. Where it can be seen with certainty, as in this case, that there is no possibility that the activity in question may have a significant effect on the environment, the activity is not subject to CEQA.

SECTION 4. Severability. If any provision of this Resolution or the application thereof to any person or circumstance is held invalid, such invalidity shall not affect other provisions or applications, and to this end the provisions of this Resolution are declared to be severable.

SECTION 5. Effective Date. This Resolution shall become effective immediately.

The City Clerk of the City of Ontario shall certify as to the adoption of this Resolution.

PASSED, APPROVED, AND ADOPTED this 20th day of August, 2024.

Proposed California State-Subdivision Agreement
Regarding Distribution and Use of
Settlement Funds – Kroger Settlement

1. Introduction

Pursuant to the Kroger Settlement Agreement, dated as of March 22, 2024, and any revision thereto as well as any modification thereto entered into by the State of California and Kroger (the "Kroger Settlement Agreement"), including Section V and Exhibit O, the State of California proposes this agreement (the "CA Kroger Allocation Agreement") to govern the allocation, distribution, and use of Settlement Fund payments made to California pursuant to Sections IV and V of the Kroger Settlement Agreement. For the avoidance of doubt, this agreement does not apply to payments made pursuant to Section IX of the Kroger Settlement Agreement.

Pursuant to Exhibit O, Paragraph 4, of the Kroger Settlement Agreement, acceptance of this CA Kroger Allocation Agreement is a requirement to be an Initial Participating Subdivision.

2. Definitions

a) *CA Participating Subdivision* means a Participating Subdivision that is also (a) a Plaintiff Subdivision and/or (b) a Primary Subdivision with a population equal to or greater than 10,000. For the avoidance of doubt, eligible CA Participating Subdivisions are those California subdivisions listed in Exhibit C (excluding Litigating Special Districts) and/or Exhibit I to the Kroger Settlement Agreement.

b) *Allergan Settlement Agreement* means the Allergan Settlement Agreement dated November 22, 2022, and any revision thereto.

c) *CVS Settlement Agreement* means the CVS Settlement Agreement dated December 9, 2022, and any revision thereto as well as any modification thereto entered into by the State of California and CVS.

d) *Distributor Settlement Agreement* means the Distributor Settlement Agreement dated July 21, 2021, and any revision thereto.

e) *Janssen Settlement Agreement* means the Janssen Settlement Agreement dated July 21, 2021, and any revision thereto.

f) *Teva Settlement Agreement* means the Teva Settlement Agreement dated November 22, 2022, and any revision thereto.

g) *Walgreens Settlement Agreement* means the Walgreens Settlement Agreement dated December 9, 2022, and any revision thereto.

h) *Walmart Settlement Agreement* means the Walmart Settlement Agreement dated November 14, 2022, and any revision thereto.

i) *CA Litigating Special District* means a Litigating Special District located in California. CA Litigating Special Districts include Downey Unified School District,

Elk Grove Unified School District, Kern High School District, Montezuma Fire Protection District (located in Stockton, California), Santa Barbara San Luis Obispo Regional Health Authority, Inland Empire Health Plan, Health Plan of San Joaquin, San Leandro Unified School District, Pleasant Valley School District Board, and LA Care Health Plan.

j) *Plaintiff Subdivision* means a Subdivision located in California, other than a CA Litigating Special District, that filed a lawsuit, on behalf of the Subdivision and/or through an official of the Subdivision on behalf of the People of the State of California, against one or more Opioid Defendants prior to October 1, 2020.

k) *Opioid Defendant* means any defendant (including but not limited to Kroger Co., Walgreen Co., Teva Pharmaceutical Industries Ltd., Allergan Finance, LLC, Allergan Limited, CVS Health Corporation, CVS Pharmacy, Inc., Walmart Inc., Johnson & Johnson, Janssen Pharmaceuticals, Inc., Purdue Pharma L.P., Cardinal Health, Inc., AmerisourceBergen Corporation, and McKesson Corporation) named in a lawsuit seeking damages, abatement, or other remedies related to or caused by the opioid public health crisis in any lawsuit brought by any state or local government on or before October 1, 2020.

3. General Terms

This agreement is subject to the requirements of the Kroger Settlement Agreement, as well as applicable law, and the Kroger Settlement Agreement governs over any inconsistent provision of this CA Kroger Allocation Agreement. Terms used in this CA Kroger Allocation Agreement have the same meaning as in the Kroger Settlement Agreement unless otherwise defined herein.

Pursuant to Section V(D)(1) of the Kroger Settlement Agreement, (a) all Settlement Fund payments will be used for Opioid Remediation, except as allowed by Section V(B)(2) of the Kroger Settlement Agreement; and (b) at least seventy percent (70%) of Settlement Fund payment amounts will be used solely for future Opioid Remediation.

4. State Allocation

The Settlement Fund payments to California,[1] pursuant to the Kroger Settlement Agreement, shall be allocated as follows: 15% to the State Fund; 70% to the Abatement Accounts Fund; and 15% to the Subdivision Fund. For the avoidance of doubt, all funds allocated to California from the Settlement Fund shall be combined pursuant to this CA Kroger Allocation Agreement, and 15% of that total shall be allocated to the State of California (the "State of California Allocation"), 70% to the California Abatement Accounts Fund ("CA Abatement Accounts Fund"), and 15% to the California Subdivision Fund ("CA Subdivision Fund").

[1] For purposes of clarity, use of the term "California" refers to the geographic territory of California and the state and its local governments therein. The term "State" or "State of California" refers to the State of California as a governmental unit.

A. State of California Allocation

Fifteen percent of the total Settlement Fund payments will be allocated to the State and used by the State for future Opioid Remediation.

B. CA Abatement Accounts Fund

i. Allocation of CA Abatement Accounts Funds

a) Seventy percent of the total Settlement Fund payments will be allocated to the CA Abatement Accounts Fund. The funds in the CA Abatement Accounts Fund will be allocated based on the allocation model developed in connection with the proposed negotiating class in the National Prescription Opiate Litigation (MDL No. 2804), as adjusted to reflect only those cities and counties that are eligible, based on population or litigation status, to become a CA Participating Subdivision. The percentage from the CA Abatement Accounts Fund allocated to each CA Participating Subdivision is set forth in Appendix 1 in the column entitled abatement percentage (the "Local Allocation"). For the avoidance of doubt, CA Litigating Special Districts and California towns, cities, and counties with a population less than 10,000 are not eligible to receive an allocation of CA Abatement Accounts Funds.

b) A CA Participating Subdivision that is a county, or a city and county, will be allocated its Local Allocation share as of the date on which it becomes a Participating Subdivision, and will receive payments as provided in the Kroger Settlement Agreement.

c) A CA Participating Subdivision that is a city will be allocated its Local Allocation share as of the date on which it becomes a Participating Subdivision. The Local Allocation share for a city that is a CA Participating Subdivision will be paid to the county in which the city is located, rather than to the city, so long as: (a) the county is a CA Participating Subdivision, and (b) the city did not elect to receive its share of funds in the National Opioids Settlement with Distributors AmerisourceBergenCorporation, Cardinal Health, Inc., and McKesson Corporation (the "Distributors Settlement"). If a city later changes or has already changed its distribution election in the Distributors Settlement, that change in election will apply here, provided that the change in election is received by the settlement administrator at least 60 days prior to a Payment Date. A Local Allocation share allocated to a city but paid to a county is not required to be spent exclusively for abatement activities in that city, but will become part of the county's share of the CA Abatement Accounts Funds, which will be used in accordance with Section 4.B.ii (Use of CA Abatement Accounts Funds) and reported on in accordance with Section 4.B.iii (CA Abatement Accounts Fund Oversight).

d) A city within a county that is a CA Participating Subdivision may opt in or out of direct payment at any time, and it may also elect direct payment of only a portion of its share, with the remainder going to the county, by providing notice to the Settlement Fund Administrator at least 60 days prior to a Payment Date. For purposes of this CA Kroger Allocation Agreement, the Cities of Los Angeles, Oakland, San Diego, San Jose and

Eureka will be deemed to have elected direct payment if they become Participating Subdivisions.

e) The State will receive the Local Allocation share of any payment to the Settlement Fund that is attributable to a county or city that is eligible to become a CA Participating Subdivision, but that has not, as of the date of that payment to the Settlement Fund, become a Participating Subdivision.

f) Funds received by a CA Participating Subdivision, and not expended or encumbered within five years of receipt and in accordance with the Kroger Settlement Agreement and this CA Kroger Allocation Agreement shall be transferred to the State; provided however, that CA Participating Subdivisions have seven years to expend or encumber CA Abatement Accounts Funds designated to support capital outlay projects before they must be transferred to the State. This provision shall not apply to the Cost Reimbursement Funds, which shall be controlled by Appendix 2.

ii. Use of CA Abatement Accounts Funds

a) The CA Abatement Accounts Funds will be used for future Opioid Remediation in one or more of the areas described in the List of Opioid Remediation Uses, which is Exhibit E to the Kroger Settlement Agreement.

b) In addition to this requirement, no less than 50% of the funds received by a CA Participating Subdivision from the Abatement Accounts Fund in each calendar year will be used for one or more of the following High Impact Abatement Activities:

(1) the provision of matching funds or operating costs for substance use disorder facilities within the Behavioral Health Continuum Infrastructure Program;

(2) creating new or expanded Substance Use Disorder ("SUD") treatment infrastructure;

(3) addressing the needs of communities of color and vulnerable populations (including sheltered and unsheltered homeless populations) that are disproportionately impacted by SUD;

(4) diversion of people with SUD from the justice system into treatment, including by providing training and resources to first and early responders (sworn and non-sworn) and implementing best practices for outreach, diversion and deflection, employability, restorative justice, and harm reduction;

(5) interventions to prevent drug addiction in vulnerable youth, including but not limited to, youth in foster care, juvenile justice-impacted youth, youth experiencing adversities related to socioeconomic status, and unhoused youth; and/or

(6) the purchase of naloxone for distribution and efforts to expand access to naloxone for opioid overdose reversals.

c) The California Department of Health Care Services ("DHCS") may add to this list (but not delete from it) by designating additional High Impact Abatement Activities. DHCS will make reasonable efforts to consult with stakeholders, including the CA Participating Subdivisions, before adding additional High Impact Abatement Activities to this list.

d) For the avoidance of doubt, and subject to the requirements of the Kroger Settlement Agreement and applicable law, CA Participating Subdivisions may form agreements or ventures, or otherwise work in collaboration with, federal, state, local, tribal or private sector entities in pursuing Opioid Remediation activities funded from the CA Abatement Accounts Fund. Further, provided that all CA Abatement Accounts Funds are used for Opioid Remediation consistent with the Kroger Settlement Agreement and this CA Kroger Allocation Agreement, a county and any cities or towns within the county may agree to reallocate their respective shares of the CA Abatement Accounts Funds among themselves, provided that any direct distribution may only be to a CA Participating Subdivision and any CA Participating Subdivision must agree to their share being reallocated.

iii. CA Abatement Accounts Fund Oversight

a) Pursuant to Section 5 below, CA Participating Subdivisions receiving settlement funds must prepare and file reports annually regarding the use of those funds. DHCS may regularly review the reports prepared by CA Participating Subdivisions about the use of CA Abatement Accounts Funds for compliance with the Kroger Settlement Agreement and this CA Kroger Allocation Agreement.

b) If DHCS determines that a CA Participating Subdivision's use of CA Abatement Accounts Funds is inconsistent with the Kroger Settlement Agreement or this CA Kroger Allocation Agreement, whether through review of reports or information from any other sources, DHCS shall send a request to meet and confer with the CA Participating Subdivision. The parties shall meet and confer in an effort to resolve the concern.

c) If the parties are unable to reach a resolution, DHCS may conduct an audit of the Subdivision's use of the CA Abatement Accounts Funds within one year of the request to meet and confer, unless the parties mutually agree in writing to extend the meet and confer time frame.

d) If the concern still cannot be resolved, the State may bring a motion or action in the court where the State has filed its Consent Judgment to resolve the concern or otherwise enforce the requirements of the Kroger Settlement Agreement or this CA Kroger Allocation Agreement. However, in no case shall any audit be conducted, or motion be brought, as to a specific expenditure of funds, more than five years after the date on which the expenditure of the funds was reported to DHCS, in accordance with this agreement.

e) Notwithstanding the foregoing, this Agreement does not limit the statutory or constitutional authority of any state or local agency or official to conduct audits, investigations, or other oversight activities, or to pursue administrative, civil, or criminal enforcement actions.

C. CA Subdivision Fund

i. Fifteen percent of the total Settlement Fund payments will be allocated to the CA Subdivision Fund. All funds in the CA Subdivision Fund will be allocated among the Plaintiff Subdivisions that are Initial Participating Subdivisions. The funds will be used, subject to any limits imposed by the Kroger Settlement Agreement and this CA Kroger Allocation Agreement, to fund future Opioid Remediation and reimburse past opioid-related expenses, which may include fees and expenses related to litigation, and to pay the reasonable fees and expenses of the Special Master as set forth in Appendix 2.

The CA Subdivision Funds will be allocated as follows:

a) First, funds in the CA Subdivision Fund shall be used to pay the Special Master's reasonable fees and expenses in accordance with the procedures and limitations set forth in Appendix 2 to this document;

b) Second, funds will be allocated to Plaintiff Subdivisions that are Initial Participating Subdivisions that have been awarded Costs, as defined by and in accordance with the procedures and limitations set forth in Appendix 2 to this document.

c) Funds remaining in the CA Subdivision Fund, which shall consist of no less than 50% of the total CA Subdivision Fund received in any year pursuant to Appendix 2, Section 2.c.v, will be distributed to Plaintiff Subdivisions that are Initial Participating Subdivisions, in relative proportion to the Local Allocation. These funds shall be used to fund future opioid-related projects and to reimburse past opioid-related expenses, which may include fees and expenses related to litigation against any Opioid Defendant.

D. Provision for State Back-Stop Agreement

On August 6, 2021, Judge Dan Polster of the U.S. District Court, Northern District of Ohio, Eastern Division, issued an order (ECF Docket Number 3814) ("MDL Fees Order") in the National Prescription Opiate Litigation (MDL No. 2804) "cap[ping] all applicable contingent fee agreements at 15%." Private counsel representing Plaintiff Subdivisions should seek its contingency fees and costs from the Attorney Fee Fund or Cost Funds under the Kroger Settlement Agreement, and, if applicable, the Teva Settlement Agreement, Allergan Settlement Agreement, CVS Settlement Agreement, Distributor Settlement Agreement, Janssen Settlement Agreement, and Walmart Settlement Agreement.

A Plaintiff Subdivision may separately agree to use its share of the CA Subdivision Fund to pay for fees or costs incurred by its contingency-fee counsel ("State Back-Stop Agreement"),

pursuant to Exhibit R, section I(CC), of the Kroger Settlement Agreement and the MDL Fees Order, so long as such contingency fees do not exceed a total contingency fee of 15% of the total gross recovery of the Plaintiff Subdivision pursuant to the Kroger Settlement, inclusive of contingency fees from the national Attorney Fee Fund and this State Back-Stop Agreement. Before seeking fees or litigation costs and expenses from a State Back-Stop Agreement, private counsel representing Plaintiff Subdivisions must first seek contingency fees and costs from the Attorney Fee Fund or Cost Funds created under the Kroger Settlement Agreement. Further, private counsel may only seek reimbursement for litigation fees and costs that have not previously been reimbursed through prior settlements or judgments.

To effectuate a State Back-Stop Agreement pursuant to this section, an agreement in the form of Appendix 3 may be entered into by a Plaintiff Subdivision, private counsel, and the California Office of the Attorney General. The California Office of the Attorney General shall, upon the request of a Plaintiff Subdivision, execute any agreement executed by a Plaintiff Subdivision and its private counsel if it is in the form of Appendix 3. The California Office of the Attorney General will also consider requests from Plaintiff Subdivisions to execute and enter into agreements presented in other forms.

For the avoidance of doubt, this agreement does not require a Plaintiff Subdivision to request or enter into a State Back-Stop Agreement, and no State Back-Stop Agreement shall impose any duty or obligation on the State of California or any of its agencies or officers, including without limitation the Attorney General.

5. State and Subdivision Reporting

a) DHCS will prepare an annual written report regarding the State's use of funds from the settlement until those funds are fully expended and for one year thereafter. These reports will be made publicly available on the DHCS web site.

b) Each CA Participating Subdivision that receives payments of funds from the settlement will prepare written reports at least annually regarding the use of those funds, until those funds are fully expended and for one year thereafter. These reports will also include a certification that all funds that the CA Participating Subdivision has received through the settlement have been used in compliance with the Kroger Settlement Agreement and this CA Kroger Allocation Agreement. The report will be in a form reasonably determined by DHCS. Prior to specifying the form of the report DHCS will confer with representatives of the Plaintiff Subdivisions.

c) The State and all CA Participating Subdivisions receiving CA Abatement Accounts Funds will track all deposits and expenditures. Each such subdivision is responsible solely for the CA Abatement Accounts Funds it receives. A county is not responsible for oversight, reporting, or monitoring of CA Abatement Accounts Funds received by a city within that county that receives direct payment. Unless otherwise exempt, Subdivisions' expenditures and uses of CA Abatement Accounts Funds and other Settlement Funds will be subject to the normal budgetary and expenditure process of the Subdivision.

d) Each Plaintiff Subdivision receiving CA Subdivision Funds will track all deposits and expenditures, as required by the Kroger Settlement Agreement and this CA Kroger Allocation Agreement. Among other things, Plaintiff Subdivisions using monies from the CA Subdivision Fund for purposes that do not qualify as Opioid Remediation must identify and include in their annual report, the amount and how such funds were used, including if used to pay attorneys' fees, investigation costs, or litigation costs. Pursuant to Section V(B)(2) of the Kroger Settlement Agreement, such information must also be reported to the Settlement Fund Administrator and Kroger.

e) In each year in which DHCS prepares an annual report DHCS will also host a meeting to discuss the annual report and the Opioid Remediation activities being carried out by the State and Participating Subdivisions.

6. Miscellaneous

a) The State or any CA Participating Subdivision may bring a motion or action in the court where the State has filed its Consent Judgment to enforce the requirements of this CA Kroger Allocation Agreement. Before filing such a motion or action the State will meet and confer with any CA Participating Subdivision that is the subject of the anticipated motion or action, and vice versa.

b) Except as provided in the Kroger Settlement Agreement, this CA Kroger Allocation Agreement is not enforceable by any party other than the State and the CA Participating Subdivisions. It does not confer any rights or remedies upon, and shall not be enforceable by, any third party.

c) Except as provided in the CA Kroger Allocation Agreement, if any provision of this agreement or the application thereof to any person, entity, or circumstance shall, to any extent, be invalid or unenforceable, the remainder of this agreement, or the application of such provision to persons, entities, or circumstances other than those as to which it is invalid or unenforceable, will not be affected thereby, and each other provision of this agreement will be valid and enforceable to the fullest extent permitted by law.

d) Except as provided in the Kroger Settlement Agreement, this agreement shall be governed by and interpreted in accordance with the laws of California.

APPENDIX 1

DISCLAIMER: The allocation percentages herein are estimates only and should not be relied on for decisions regarding legal rights, releases, waivers, or other decisions affecting current or potential legal claims. Percentages shown in the Plaintiff Subdivision Percentage column may change pursuant to Section 4.C. of the California State-Subdivision Agreement Regarding Distribution and Use of Settlement Funds—Kroger Settlement, whereas the percentages shown in the Abatement Percentage column should not change. Participating Subdivisions, underlying calculations, and the calculated allocation percentages are subject to change. Regarding the column herein entitled "Abatement Percentage," pursuant to Section 4.B.e., the State of California will receive the Local Allocation share of any payment to the Settlement Fund that is attributable to a county or city that is eligible to become a CA Participating Subdivision, but that has not, as of the date of that payment to the Settlement Fund, become a Participating Subdivision. Regarding the column herein entitled "Plaintiff Subdivision Percentage," payments allocated to a Plaintiff Subdivision, which is not an Initial Participating Subdivision, will be re-allocated among the Plaintiff Subdivisions that are Initial Participating Subdivisions. Regarding the column herein entitled "Abatement Percentage," the annotation of "100%" refers to one-hundred percent (100%) of the California Abatement Account Funds received, pursuant to Section 4.B. Regarding the column herein entitled "Plaintiff Subdivision Percentage," the annotation of "100%" refers to one-hundred percent (100%) of the California Subdivision Funds received, pursuant to Section 4.C. Regarding the column herein entitled "Weighted Allocation Percentage," the annotation of "100%" refers to one-hundred percent (100%) of the combined and weighted allocation of the Abatement Percentage and the Plaintiff Subdivision Percentage.

APPENDIX 2

Cost Reimbursement Procedure

1. Additional defined terms:

a) *Costs* means the reasonable amounts paid for the attorney and other City Attorney and County Counsel staff time for individuals employed by a Plaintiff Subdivision at the contractual rate, inclusive of benefits and overhead, together with amounts paid for court reporters, experts, copying, electronic research, travel, vendors, and the like, which were not previously reimbursed and which were paid or incurred (i) prior to December 31, 2022 in litigation against any Opioid Defendant and/or (ii) in negotiating and drafting any CA Allocation Agreement(s) concerning a settlement with any Opioid Defendant(s). *Costs* does not include attorneys' fees, costs, or expenses incurred by private contingency fee counsel. No part of the CA Abatement Accounts Fund will be used to reimburse Costs.

b) *First Claims Date* means October 1, 2023 or when all applications for reimbursement of Costs, in whole or in part, from funds available under Section IX and Exhibit R of the Walgreens Settlement Agreement, Section XIV and Exhibit R of the Teva Settlement Agreement, Section XIII and Exhibit R of the Allergan Settlement Agreement, Section X and Exhibit R of the Distributor Settlement Agreement, Section XI and Exhibit R of the Janssen Settlement Agreement, Section X and Exhibit R of the CVS Settlement Agreement, or Section IX and Exhibit R of the Walmart Settlement Agreement, have been finally determined under the provisions of those agreements, whichever comes first.

c) *Special Master* means a retired judicial officer or former public lawyer, not presently employed or retained by a Plaintiff Subdivision, who will aggregate, review, and determine the reasonable Costs to be awarded to each Plaintiff Subdivision that submits a claim for reimbursement of Costs. The Special Master will be selected by a majority vote of the votes cast by Plaintiff Subdivisions, with each such subdivision having one vote.

d) *Plaintiff Subdivision Committee* means the committee of Plaintiff Subdivisions that will review and approve the invoices submitted by the Special Master reflecting his or her reasonable time and expenses.

2. Cost Reimbursement to Plaintiff Subdivision

a) Purpose. Substantial resources have been expended to hold Opioid Defendants accountable for creating and profiting from the opioid crisis, and this effort has been a significant catalyst in creating National Opioid Settlements with various manufacturers, distributors, and chain pharmacies.

///

b) Claims Procedure.

i. If a Plaintiff Subdivision is eligible to seek reimbursement of Costs, in whole or in part, from funds available under Section IX and Exhibit R of the Kroger Settlement Agreement, Section IX and Exhibit R of the Walgreens Settlement Agreement, Section XIV and Exhibit R of the Teva Settlement Agreement, Section XIII and Exhibit R of the Allergan Settlement Agreement, Section X and Exhibit R of the CVS Settlement Agreement, Section IX and Exhibit R of the Walmart Settlement Agreement, Section X or Exhibit R of the Distributor Settlement Agreement, or Section XI or Exhibit R of the Janssen Settlement Agreement, it must first make a timely application for reimbursement from such funds. To allow sufficient time for determination of those applications, no claim for Costs to the CA Subdivision Fund under this Agreement may be made before the First Claims Date.

ii. A Plaintiff Subdivision that wishes to be reimbursed from the CA Subdivision Fund must submit a claim to the Special Master no later than forty-five (45) days after the First Claims Date. The Special Master will then compile and redistribute the aggregated claim totals for each Plaintiff Subdivision via email to representatives of all the Plaintiff Subdivisions. A claim for attorney and staff time must list, for each attorney or staff member included in the claim, the following information: name, title, total hours claimed, hourly rate (including, if sought, benefits and share of overhead), and narrative summarizing the general nature of the work performed by the attorney or staff member. For reimbursement of "hard" costs, the subdivision may aggregate across a category (e.g., total for travel costs). It is the intention of the Plaintiff Subdivisions that submission of documents related to reimbursement of Costs does not waive any attorney-client privilege or exemptions to the California Public Records Act.

iii. The Special Master may request, at his or her sole option, additional documents or details to assist in the final award of Costs.

iv. The Special Master will review claims for reasonableness and will notify each Plaintiff Subdivision of the final determination of its claim, and will provide a list of all final awards to all Plaintiff Subdivisions by email or, upon request, via First Class U.S. Mail. Any Plaintiff Subdivision may ask the Special Master to reconsider any final award within twenty-one (21) days. The Special Master will make a final determination on any such reconsideration request within thirty (30) days of receipt.

v. Any decision of the Special Master is final and binding, and will be considered under the California Arbitration Act, Code of Civil Procedure section 1280 et seq. as a final arbitration award. Nothing in this agreement is intended to expand the scope of judicial review of the final award for errors of fact or law, and the Parties agree that they may only seek to vacate the award if clear and convincing evidence demonstrates one of the factors set forth in Code of Civil Procedure, section 1286.2, subdivision (a). Plaintiff Subdivisions will have fourteen (14) days after all final awards are made, together with any final determination of a request for

reconsideration, to seek review in the Superior Court of California, pursuant to Code of Civil Procedure, section 1285, where the State has filed its Consent Judgment.

vi. The Special Master will prepare a report of Costs that includes his or her fees and expenses at least ninety (90) days before the Payment Date for each Annual Payment. The Special Master's preparation of a report of Costs does not discharge a Plaintiff Subdivision's reporting requirement under Section V(B)(2) of the Kroger Settlement Agreement.

vii. A member of the Plaintiff Subdivision Committee, which is a CA Participating Subdivision, will submit to the Settlement Fund Administrator and Kroger a report of the fees and expenses incurred by the Special Master pursuant to Section V(B)(2) of the Kroger Settlement Agreement.

c) Claims Priority and Limitation.

i. The Special Master will submit invoices for compensation of reasonable fees and expenses to the Plaintiff Subdivision Committee no later than ninety (90) days prior to the Payment Date for each Annual Payment. The Plaintiff Subdivision Committee will promptly review and, if reasonable, approve the Special Master's invoice for compensation. The Plaintiff Subdivision Committee will submit approved invoices to the Settlement Fund Administrator for payment. The Special Master's approved invoices have priority and will be paid first from the CA Subdivision Fund before any award of Costs, subject to the limitation in Section 2.c.v below.

ii. Final Awards of Costs that do not exceed seventy-five thousand dollars ($75,000.00) will be paid next in priority after the Special Master's approved invoices.

iii. Final Awards of Costs in excess of seventy-five thousand dollars ($75,000.00) will be paid proportionally from the funds remaining in that year's Annual Payment.

iv. Any claim for Costs that is not paid in full will be allocated against the next year's distribution from the CA Subdivision Fund, until all approved claims for Costs are paid in full.

v. In no event will more than 50% of the total CA Subdivision Fund received in any year be used to pay Costs or the Special Master's approved invoices.

vi. In no event shall more than $28 million of the total CA Subdivision Funds paid pursuant to the Kroger Settlement Agreement, Walgreens Settlement Agreement, Teva Settlement Agreement, Allergan Settlement Agreement, Distributor Settlement Agreement, CVS Settlement Agreement, Janssen Settlement Agreement, and the Walmart Settlement Agreement be used to pay Costs.

d) Collateral Source Payments and Third-Party Settlement.

i. In the event a Plaintiff Subdivision is awarded compensation, in whole or in part, by any source of funds created as a result of litigation against an Opioid Defendant for its reasonable Costs, it will reduce its claim for Costs from the CA Subdivision Fund by that amount. If a Plaintiff Subdivision has already received a final award of Costs from the CA Subdivision Fund, it will repay the fund up to the prior award of Costs via a payment to the Settlement Fund Administrator or notify the Settlement Fund Administrator that its allocation from the next and subsequent Annual Payments should be reduced accordingly. If the Plaintiff Subdivision is repaying any prior award of Costs, that repayment will occur as soon as is feasible after the Plaintiff Subdivision's receipt of Cost funds from the collateral source, but no more than 90 days after its receipt from the collateral source. The Settlement Fund Administrator will add any repaid Costs to the CA Subdivision Fund. Any Plaintiff Subdivision that has submitted for reimbursement to any national fund and has not received a final determination by the First Claims Date may request that the settlement administrator withhold some or all of its payment from the CA Subdivision Fund in order to avoid repayment.

ii. In the event a Plaintiff Subdivision reaches a monetary settlement or compromise against any Opioid Defendant outside of the National Opioid Settlement, the monetary portion of such settlement, net of fees paid to outside contingency fee counsel and of funds earmarked strictly for abatement, will be credited against its Costs and the subdivision will be ineligible to recover those credited Costs from the CA Subdivision Fund. Plaintiff Subdivisions negotiating monetary settlements or compromises against any Opioid Defendant outside of the National Opioid Settlement will negotiate for funds to repay any Costs it previously received from the CA Subdivision Fund or for Costs it otherwise might be eligible to claim from the CA Subdivision Fund. If such a settlement is paid after all final approved claims for Costs by all Plaintiff Subdivisions are satisfied in full, the settling subdivision will reimburse the CA Subdivision Fund in that amount by making payment to the Settlement Fund Administrator to add to the CA Subdivision Fund in a manner consistent with the repayments described in section 2.d.i above.

APPENDIX 3

CALIFORNIA-SUBDIVISION BACKSTOP AGREEMENT

On August 6, 2021, Judge Polster of the US District Court for the Northern District of Ohio issued an Order (the Order), docket number 3814, in In Re National Prescription Opiate Litigation, MDL 2804, addressing contingent attorney fee contracts between political subdivisions eligible to participate in the Kroger Settlement and their counsel.

In light of the Order, and at the request of [SUBDIVISION], the [SUBDIVISION], its counsel [COUNSEL], and the California Attorney General, on behalf of the State of California, are entering into this California-Subdivision Backstop Agreement (Backstop Agreement).

[SUBDIVISION] and [COUNSEL] intend this Backstop Agreement to constitute a State Back-Stop Agreement as that term is used in the Order and in Exhibit R (Agreement on Attorneys' Fees, Costs, and Expenses) of the Kroger Settlement Agreement.

Pursuant to this Backstop Agreement, [SUBDIVISION] may, subject to the limitations of the Kroger Settlement Agreement and CA Kroger Allocation Agreement, as well as any other limitations imposed by law, use funds that it receives from the Kroger Settlement CA Subdivision Fund to pay a contingent fee to [COUNSEL]. Any such payment from [SUBDIVISION] to [COUNSEL], together with any contingency fees that [COUNSEL] may receive from the national Attorney Fee Fund, will not exceed a total contingency fee of [PERCENTAGE NOT TO EXCEED 15%] of the total gross recovery of [SUBDIVISION] from the Kroger Settlement.

[COUNSEL] certify that they first sought fees and costs from the Attorney Fee Fund created under the Kroger Settlement Agreement before seeking or accepting payment under this backstop agreement. [COUNSEL] further certify that they are not seeking and will not accept payment under this backstop agreement of any litigation fees or costs that have been reimbursed through prior settlements or judgments.

The Attorney General is executing this agreement solely because the definition of "State Back-Stop Agreement" in Exhibit R of the Kroger Settlement Agreement requires such agreements to be between "a Settling State" and private counsel for a participating subdivision. Neither the California Attorney General nor the State of California have any obligations under this Backstop Agreement, and this Backstop Agreement does not require the payment of any state funds to [SUBDIVISION], [COUNSEL], or any other party.

Subdivision Participation and Release Form

Governmental Entity:	State:
Authorized Official:	
Address 1:	
Address 2:	
City, State, Zip:	
Phone:	
Email:	

The governmental entity identified above ("*Governmental Entity*"), in order to obtain and in consideration for the benefits provided to the Governmental Entity pursuant to the Settlement Agreement dated March 22, 2024 ("*Kroger Settlement*"), and acting through the undersigned authorized official, hereby elects to participate in the Kroger Settlement, release all Released Claims against all Released Entities, and agrees as follows.

1. The Governmental Entity is aware of and has reviewed the Kroger Settlement, understands that all terms in this Participation and Release Form have the meanings defined therein, and agrees that by executing this Participation and Release Form, the Governmental Entity elects to participate in the Kroger Settlement and become a Participating Subdivision as provided therein.

2. The Governmental Entity shall promptly, and in any event no later than 14 days after the Reference Date and prior to the filing of the Consent Judgment, dismiss with prejudice any Released Claims that it has filed. With respect to any Released Claims pending in *In re National Prescription Opiate Litigation*, MDL No. 2804, the Governmental Entity authorizes the Plaintiffs' Executive Committee to execute and file on behalf of the Governmental Entity a Stipulation of Dismissal with Prejudice substantially in the form found at *https://nationalopioidsettlement.com/*.

3. The Governmental Entity agrees to the terms of the Kroger Settlement pertaining to Participating Subdivisions as defined therein.

4. By agreeing to the terms of the Kroger Settlement and becoming a Releasor, the Governmental Entity is entitled to the benefits provided therein, including, if applicable, monetary payments beginning after the Effective Date.

5. The Governmental Entity agrees to use any monies it receives through the Kroger Settlement solely for the purposes provided therein.

6. The Governmental Entity submits to the jurisdiction of the court in the Governmental Entity's state where the Consent Judgment is filed for purposes limited to that court's role as provided in, and for resolving disputes to the extent provided in, the Kroger Settlement. The Governmental Entity likewise agrees to arbitrate before the National Arbitration Panel

as provided in, and for resolving disputes to the extent otherwise provided in, the Kroger Settlement.

7. The Governmental Entity has the right to enforce the Kroger Settlement as provided therein.

8. The Governmental Entity, as a Participating Subdivision, hereby becomes a Releasor for all purposes in the Kroger Settlement, including without limitation all provisions of Section XI (Release), and along with all departments, agencies, divisions, boards, commissions, districts, instrumentalities of any kind and attorneys, and any person in their official capacity elected or appointed to serve any of the foregoing and any agency, person, or other entity claiming by or through any of the foregoing, and any other entity identified in the definition of Releasor, provides for a release to the fullest extent of its authority. As a Releasor, the Governmental Entity hereby absolutely, unconditionally, and irrevocably covenants not to bring, file, or claim, or to cause, assist or permit to be brought, filed, or claimed, or to otherwise seek to establish liability for any Released Claims against any Released Entity in any forum whatsoever. The releases provided for in the Kroger Settlement are intended by the Parties to be broad and shall be interpreted so as to give the Released Entities the broadest possible bar against any liability relating in any way to Released Claims and extend to the full extent of the power of the Governmental Entity to release claims. The Kroger Settlement shall be a complete bar to any Released Claim.

9. The Governmental Entity hereby takes on all rights and obligations of a Participating Subdivision as set forth in the Kroger Settlement.

10. In connection with the releases provided for in the Kroger Settlement, each Governmental Entity expressly waives, releases, and forever discharges any and all provisions, rights, and benefits conferred by any law of any state or territory of the United States or other jurisdiction, or principle of common law, which is similar, comparable, or equivalent to § 1542 of the California Civil Code, which reads:

> **General Release; extent.** A general release does not extend to claims that the creditor or releasing party does not know or suspect to exist in his or her favor at the time of executing the release that, if known by him or her would have materially affected his or her settlement with the debtor or released party.

A Releasor may hereafter discover facts other than or different from those which it knows, believes, or assumes to be true with respect to the Released Claims, but each Governmental Entity hereby expressly waives and fully, finally, and forever settles, releases and discharges, upon the Effective Date, any and all Released Claims that may exist as of such date but which Releasors do not know or suspect to exist, whether through ignorance, oversight, error, negligence or through no fault whatsoever, and which, if known, would materially affect the Governmental Entities' decision to participate in the Kroger Settlement.

11. Nothing herein is intended to modify in any way the terms of the Kroger Settlement, to which Governmental Entity hereby agrees. To the extent this Participation and Release Form is interpreted differently from the Kroger Settlement in any respect, the Kroger Settlement controls.

I have all necessary power and authorization to execute this Participation and Release Form on behalf of the Governmental Entity.

CITY OF ONTARIO *Agenda Report* **August 20, 2024**	**SECTION:** **CONSENT CALENDAR**
Department: Economic Development Prepared By: Jennifer Hiramoto Department: Economic Development Prepared By: Jennifer Hiramoto Staff Member Presenting: Jennifer McLain Hiramoto, Economic Development Director Approved By:	Submitted To: Council/OHA Approved: _____ Continued To: _____ Denied: _____ Item No: 9

SUBJECT: **CONSIDER A RESOLUTION APPROVING, PURSUANT TO THE CERTIFIED FINAL ONTARIO REGIONAL SPORTS COMPLEX ENVIRONMENTAL IMPACT REPORT (SCH NO. 2023110328) AND APPROVED MITIGATION MONITORING AND REPORTING PROGRAM, A STADIUM VENUE AGREEMENT BETWEEN THE CITY OF ONTARIO AND RANCHO BASEBALL, LLC AND MAKING CERTAIN CEQA FINDINGS IN CONNECTION THEREWITH**

RECOMMENDATION: That the City Council take the following actions:

A. Consider and Adopt a Resolution Approving pursuant to the Certified Final Ontario Regional Sports Complex Environmental Impact Report (SCH No. 2023110328) and approved Mitigation Monitoring And Reporting Program, A Stadium Venue Agreement between the City And Rancho Baseball, LLC and Making Certain CEQA Findings In Connection Therewith; and
B. Authorize the City Manager, or his designee, to execute a Stadium Venue Agreement with Rancho Baseball, LLC on behalf of the City.

THE FOLLOWING COUNCIL GOALS ARE BEING ACHIEVED:
Invest in the Growth and Evolution of the City's Economy
Focus Resources in Ontario's Commercial and Residential Neighborhoods
Encourage, Provide or Support Enhanced Recreational, Educational, Cultural and Healthy City Programs, Policies and Activities

FISCAL IMPACT: This Agreement will generate revenue to the City through a combination of sources, including a license fee, parking revenue, concession sales, and advertising and sponsorship sales. These revenues will emanate from both baseball operations and non-baseball operations.

Per the terms of the Agreement, the base license fee to be paid to the City by Rancho Baseball, LLC ("User") is $400,000 per year in five equal payments between April to August. This amount will increase by $25,000 every five years. City representatives will closely coordinate with the User to leverage each other's efforts and maximize revenue. Combined with the variety of other revenue

sources, staff expects baseball operations to break even or better with additional, non-baseball events and activities allowing the City to generate net revenue.

BACKGROUND & ANALYSIS: The City of Ontario is in the process of developing 200 acres of land generally located between the Cucamonga Creek Channel and Vineyard Avenue, between Riverside Drive and Chino ("Site") as the future Ontario Regional Sportsplex. At build out, it will be one of the largest of its kind in Southern California. While designs are still underway, the Regional Sportsplex is envisioned to contain the following:

- Soccer and football fields
- Baseball and softball fields
- Tennis and pickleball courts
- Basketball, volleyball and badminton courts
- Competitive and recreational aquatics center
- A youth sports training facility

While this project will provide much-desired public athletic amenities, it is also anticipated to be an economic development catalyst. It is estimated that this facility will attract 1.2 million new visitors per year to Ontario and, as such, additional retail and hospitality uses will be required to support this increased number of visitors.

In addition to these public sports amenities and supporting retail facilities, the City is also designing a Minor League Baseball Stadium ("Stadium") with capacity to host 6,500 fans on 10- 12 acres in the northeast portion of the Site.

The proposed anchor user of the Stadium is Rancho Baseball, LLC ("User"), which currently owns and operates a professional baseball club affiliated with Major League Baseball's Los Angeles Dodgers. The User intends to relocate its operations to the City of Ontario and use the Stadium as its home field. A new name for the baseball club- featuring “Ontario"- will be released at a future date. The User would activate the stadium for 80 days a year. In the remaining days, the Stadium will be programmed by the City with such uses as concerts, expositions, graduations, and other sporting events.

In August 2023, the City Council approved a Memorandum of Understanding Regarding Baseball Development and Proposed Lease ("MOU") with Rancho Baseball, LLC, and authorized the City Manager to Negotiate a Lease Agreement with the User. Over the past year, the City and Rancho Baseball have negotiated terms, detailed in the attached Stadium Venue Agreement. A highlight of these terms include:

- The City will deliver a 4,000-5,000 seat stadium, plus grass berm seating in the outfield for 500 to 1,500 fans by March 1, 2026.
- The annual base license of $400,000 plus increases of $25,000 every five years. Other revenue shares pertaining to merchandise, concessions, stadium signage, advertising, sponsorships and parking revenue are detailed in the Agreement.
- City shall design, install and improve the Site with parking. During the baseball season, the City will receive 40 percent of any parking revenues collected by the User.

- The initial term of the Agreement shall be 20 years, plus options for extensions.
- The Project is subject to Prevailing Wage standards.

California Environmental Quality Act (CEQA)

Pursuant to State CEQA Guidelines section 15087(e), the Ontario Regional Sports Complex Draft Environmental Impact Report ("DEIR") was circulated for at least a 45-day public review and comment period. The City prepared a Final Environmental Impact Report ("FEIR") in compliance with CEQA (Pub. Resources Code § 21000 et seq.). On July 16, 2024, the City Council conducted a noticed public hearing on the FEIR and Mitigation Monitoring and Reporting Program ("MMRP,"), received testimony from all parties. On July 16, 2024, pursuant to Resolution No . 2024-132, the City Council certified the FEIR, which considered the relocation of the Club to the Stadium, adopted environmental findings, and a Statement of Overriding Considerations, approved the MMRP, and the Project.

Staff has determined that all environmental impacts of the Stadium Venue Agreement have been addressed within the FEIR, and that there is no substantial evidence in the administrative record that the Stadium Venue Agreement may result in any significant environmental impacts beyond those analyzed in the FEIR. Given this, pursuant to State CEQA section 15189 through 15190, staff recommends that the City Council finds that the preparation of a subsequent or supplemental CEQA document is not required for the Stadium Venue Agreement and that, after approving the Agreement, a Notice of Determination be filed pursuant to the FEIR.

RESOLUTION NO. _____

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF ONTARIO, CALIFORNIA, APPROVING PURSUANT TO THE CERTIFIED FINAL ONTARIO REGIONAL SPORTS COMPLEX ENVIRONMENTAL IMPACT REPORT (SCH NO. 2023110328) AND APPROVED MITIGATION MONITORING AND REPORTING PROGRAM, A STADIUM VENUE AGREEMENT BETWEEN THE CITY AND RANCHO BASEBALL, LLC AND MAKING CERTAIN CEQA FINDINGS IN CONNECTION THEREWITH.

WHEREAS, the City of Ontario ("City") is the fee interest owner of certain real property, identified with Assessor's Parcel Numbers 0218-101-05, 0218-101-06, 0218-101-07, 0218-102-10 and 0218-102-11, bounded to the north by Riverside Drive, to the south by Chino Avenue, to the west by the unimproved right-of-way for Vineyard Avenue, and to the east by the Cucamonga Creek Flood Control Channel, located in the City of Ontario, County of San Bernardino, California, consisting of approximately 199 gross acres of land, (the "City Property"), upon which the CITY intends to improve the Site with municipal sports complex facilities ("Sports Complex"); and

WHEREAS, the City is willing to construct a professional baseball stadium, which includes, among other things, related baseball and ancillary facilities with baseball fields and associated structures on an approximately 16 acre portion of the City Property ("Stadium"); and

WHEREAS, the City desires to enter into a Stadium Venue Agreement with Rancho Baseball, LLC ("Rancho") whereby Rancho's Minor League professional baseball team (the "Club") would relocate to and use the Stadium as its home field for preseason, regular season, postseason home games and other Club events generally during the months of April through September; and

WHEREAS, the City will also have the rights to schedule other events, such as civic, holiday or entertainment events at the Stadium during each year and intends to select a Stadium Manager to operate, maintain and manage the Stadium on behalf of the City; and

WHEREAS, Stadium Venue Agreement is considered a "Project" as defined by the California Environmental Quality Act ("CEQA"); and

WHEREAS, pursuant to State CEQA Guidelines section 15087(e), the Ontario Regional Sports Complex Draft Environmental Impact Report ("DEIR") was circulated for at least a 45-day public review and comment period; and

WHEREAS, the City prepared a Final Environmental Impact Report ("FEIR") in compliance with CEQA (Pub. Resources Code § 21000 et seq.). For the purposes of this Resolution, the "EIR" shall refer to the DEIR, as revised by the FEIR, together with the other sections of the FEIR; and

WHEREAS, on July 16, 2024, the City Council conducted a noticed public hearing on the FEIR and Mitigation Monitoring and Reporting Program ("MMRP,"), received testimony from all parties; and

WHEREAS, on July 16, 2024, pursuant to Resolution No. 2024-132, the City Council certified the FEIR, which considered the relocation of the Club to the Stadium, adopted environmental findings, and a Statement of Overriding Considerations, approved the MMRP, and the Project; and

WHEREAS, pursuant to the foregoing, the City Council has determined that a Notice of Determination for approval of the Stadium Venue Agreement should be filed pursuant to CEQA, the State CEQA Guidelines, and the City's Local CEQA Guidelines.

NOW, THEREFORE, THE CITY COUNCIL FOR THE CITY OF ONTARIO DOES HEREBY RESOLVE AND DECLARE AS FOLLOWS:

Section 1. Recitals. The Recitals set forth above are true and correct and are incorporated into this Resolution by this reference.

Section 2. CEQA. Having considered the certified FEIR and all written and oral evidence presented to the City Council, the Council finds that all environmental impacts of the Stadium Venue Agreement have been addressed within the FEIR, and that there is no substantial evidence in the administrative record that the Stadium Venue Agreement may result in any significant environmental impacts beyond those analyzed in the FEIR. Therefore, pursuant to State CEQA section 15189 through 15190, the City Council finds that the preparation of a subsequent or supplemental CEQA document is not required for the Stadium Venue Agreement.

Section 3. Findings. The City Council finds that the Stadium Venue Agreement for the City Property pursuant to the Agreement will further the goals and purposes of the City, and is in the common interest of the City and its residents.

Section 4. Approval of the Agreement. The City Council hereby approves the Stadium Venue Agreement in substantially the form attached hereto as Exhibit A, subject to any non-substantive revisions which do not increase the City's liability and are approved by the City Attorney, and authorizes the City Manager to sign and enter into the Agreement and perform the obligations of the City under the Agreement.

Section 5. Notice of Determination. The Executive Director, or designee, is hereby directed to file a Notice of Determination for the Stadium Venue Agreement under CEQA.

Section 6. Severability. If any provision of this Resolution or the application of any such provision to any person or circumstance is held invalid, such invalidity shall not affect other provisions or applications of this Resolution that can be given effect without the invalid provision or application, and to this end the provisions of

this Resolution are severable. The City declares that the City would have adopted this Resolution irrespective of the invalidity of any particular portion of this Resolution.

Section 7. Effective Date. This Resolution shall become effective immediately upon its adoption.

The City Clerk of the City of Ontario shall certify as to the adoption of this Resolution.

PASSED, APPROVED, AND ADOPTED this 20th day of August, 2024.

STADIUM VENUE AGREEMENT
BY AND BETWEEN
THE CITY OF ONTARIO
AND
RANCHO BASEBALL, LLC

This **STADIUM VENUE AGREEMENT** ("**Agreement**") is dated _____, for reference purposes only, and entered into by and between the **CITY OF ONTARIO**, a California municipal corporation and general law city ("**CITY**") and **RANCHO BASEBALL, LLC**, a Washington limited liability company ("**TEAM**"). TEAM and CITY are sometimes collectively referred to herein as the "Parties," and each of TEAM and CITY individually is sometimes referred to as a "Party."

RECITALS

A. The CITY is the owner of that certain real property consisting of approximately 199 gross acres of land, bounded to the north by Riverside Drive, to the south by Chino Avenue, to the west by the unimproved right-of-way for Vineyard Avenue, and to the east by the Cucamonga Creek Flood Control Channel, located in the City of Ontario, County of San Bernardino, California, as depicted in **Exhibit A, SITE MAP**, attached hereto and by this reference incorporated herein (the "**Site**"), upon which the CITY intends to improve the Site with municipal sports complex facilities (the "**Sports Complex**").

B. The CITY is willing to construct a professional baseball stadium, which includes, among other things, related baseball and ancillary facilities with baseball fields and associated structures as depicted in **Exhibit B**, **DEPICTION OF STADIUM PLAN**, attached hereto and by this reference incorporated herein, on a portion of the Site owned by the City of Ontario which shall conform with applicable facility standards put in place by MLB PDL, in effect as of the effective date of this Agreement, to support the TEAM'S operations, subject to the conditions set forth herein in this Agreement. The City agrees to maintain the stadium to the MLB PDL facility standards in effect as of the effective date of this Agreement. In the event the MLB PDL facility standards change after the effective date of this Agreement, the City and TEAM agree to work together in good faith to remain in compliance with those revised PDL Facility Standards.

C. The TEAM desires to relocate TEAM'S operations to the City of Ontario and use the Stadium to be located on the Premises (as defined below) as its home stadium on the terms and conditions set forth herein. The City and the TEAM executed a Memorandum of Understanding ("**MOU**") between the CITY and the TEAM on December 27, 2023 that provides, among other things, for 1) the negotiation and execution of a new agreement between the Parties and responsibilities of the Parties for the funding, location, construction and operation of a Minor League Baseball stadium that contains fan and player amenities; and 2) the parties acknowledgement and agreement that this Agreement will not be executed and cannot be considered and approved by the City Council until such time that certain conditions are completed

and the environmental review and clearance requirements of the California Environmental Quality Act (Public Resources Code Section 21000 et seq., "CEQA") have been satisfied by the City, including but not limited to, receiving related CEQA approvals pertaining to the development of the Stadium and Sports Complex.

D. The TEAM and the CITY desire to enter into this Stadium Venue Agreement for the license of a portion of the Site which will consist of a baseball stadium for the TEAM'S operation of a PDL Club pursuant to the terms and conditions set forth below.

NOW, THEREFORE, in consideration of the mutual promises, covenants, conditions, contingencies and undertakings as more particularly set forth below, the above recitals are true and correct and incorporated herein, and for other good and valuable consideration, the receipt, adequacy and sufficiency of which are hereby acknowledged, the Parties hereto do hereby agree as follows:

VENUE AGREEMENT

ARTICLE 1
DEFINITIONS

Unless the context otherwise requires, the capitalized terms used in this Agreement have the meanings set forth below in this Agreement.

1.1 **"Agreement Effective Date"** is the date on which the last of CITY and TEAM execute and deliver this Agreement.

1.2 **"Baseball Season"** is the time in which the Club plays its Home Games generally during the months of April through September, subject to the PDL Rules and Regulations.

1.3 **"Club**" means the professional baseball club, currently a Single A affiliate of the Los Angeles Dodgers, owned by Rancho Baseball LLC, whose future official team name will be modified to have "Ontario" included.

1.4 **"Commissioner"** means the Commissioner of Baseball as elected under the Major League Constitution or, in the absence of a Commissioner, any person or body succeeding to the powers and duties of the Commissioner pursuant to the Major League Constitution.

1.5 **"Expiration Date"** means the last date at 11:59 p.m. of the Term of the Agreement, which is the Initial Term Expiration Date or, if options to extend the Term are exercised, the last date at 11:59 p.m. of any extension periods confirmed by the Parties as described in Section 3.1.4.

1.6 **"Home Games"** means all baseball games, including preseason, regular season and postseason games, played where the Club is designated as the "home team."

1.7 **"License Commencement Date"** is as defined in Section 3.1.1.

1.8 **"License Fee Commencement Date"** is the same date as the License

Commencement Date.

1.9 **"Major League Baseball"** or "**MLB"** means, depending on the context, any or all of (a) the Office of the Commissioner of Baseball, each other MLB PDL Entity and/or all boards and committees thereof and/or (b) the Major League Clubs acting collectively.

1.10 **"Major League Baseball Club"** or "**Major League Club"** means any professional baseball club that is entitled to the benefits, and bound by the terms, of the Major League Constitution.

1.11 **"Major League Constitution"** means the Major League Constitution adopted by the Major League Clubs as the same may be amended, supplemented or otherwise modified from time to time in the manner provided therein and all replacement or successor agreements that may in the future be entered into by the Major League Clubs.

1.12 **"MLB PDL"** means, depending on the context, any or all of (i) MLB Professional Development Leagues, LLC, a Delaware limited liability company, and/or (ii) the boards, committees and subcommittees related thereto.

1.13 **"MLB PDL Entity"** means each of MLB PDL, the Office of the Commissioner of Baseball, MLB Advanced Media, L.P. and/or any of their respective present or future affiliates, assigns or successors.

1.14 **"Non-Ontario Professional Baseball Event"** is any event scheduled by the CITY, or its Stadium Manager in the event the CITY elects to hire and engage a contractor to serve as the Stadium Manager, as described in Section 7.3.1.

1.15 **"Ontario PDL License Agreement"** means that certain player development license agreement entered into between TEAM and MLB PDL pursuant to which the Club has been granted the right to participate in the Professional Development League System.

1.16 **"Outside License Commencement Date"** is March 1, 2026, unless this Agreement is terminated earlier per the terms herein or mutually agreed to amended by the parties and subject to Force Majeure events.

1.17 **"PDL Approval"** means, any approval, consent or no-objection letter required to be obtained from MLB PDL or any other MLB PDL Entity pursuant to the PDL Rules and Regulations.

1.18 **"PDL Club"** means a professional baseball club participating in the Professional Development League System pursuant to a player development license agreement between the owner of such club and MLB PDL pursuant to which such owner has been granted the right to participate in the Professional Development League System.

1.19 **"PDL Governance Agreement"** means that certain Professional Development Leagues Governance Agreement, effective as of February 12, 2021 by and between MLB PDL and each PDL Club, as may be amended, modified, supplemented or restated from time to time.

1.20 **"PDL Governing Documents"** means the following documents as in effect from time to time and any amendments, supplements or other modifications thereto and all replacement or successor documents thereto that may in the future be entered into: (i) the Major League Constitution, (ii) the Major League Rules (and all attachments thereto), (iii) the PDL Operating Guidelines, (iv) the PDL Governance Agreement and (v) the PDL License Agreements.

1.21 **"PDL License Agreement"** means each player development license agreement entered into between a PDL Club and MLB PDL pursuant to which such PDL Club has been granted the right to participate in the Professional Development League System, including, without limitation, the Ontario PDL License Agreement.

1.22 **"PDL Rules and Regulations"** means (i) the PDL Governing Documents, (ii) any present or future agreements or arrangements entered into by, or on behalf of, MLB PDL or any other MLB PDL Entity or the Major League Clubs acting collectively that are specifically related to or generally applicable to the Professional Development League System or the PDL Clubs, including, without limitation, agreements or arrangements entered into pursuant to the PDL Governing Documents, and (iii) the present and future mandates, rules, regulations, policies, practices, bulletins, by-laws, directives or guidelines issued or adopted by, or on behalf of, the Commissioner, MLB PDL or any other MLB PDL Entity as in effect from time to time that are specifically related to or generally applicable to the Professional Development League System or one or more of the PDL Clubs.

1.23 **"Premises"** is as defined in Section 2.1 below.

1.24 **"Professional Development League System"** means a system of professional baseball leagues comprised of professional baseball clubs that compete at different levels and serve to assist with the development of players for Major League Baseball Clubs.

1.25 **"Relocation"** means that the TEAM shall relocate the Club to the Stadium and shall, subject to the PDL Rules and Regulations, hold its Home Games in such Stadium commencing with the 2026 PDL championship season and continuing for a minimum period of twenty (20) years, with an option to extend such period for two (2) additional periods of five (5) years each option period.

1.26 **"Site"** shall also include parking facilities, if any, appurtenant structures necessary for operations of the Stadium and the Sports Complex facilities, landscaping and other improvements to the Site.

1.27 **"Stadium"** means that part of the Premises upon which a state-of-the-art baseball stadium reasonably necessary for the proper playing of professional baseball, which shall include permanent seating for approximately 4,000 to 5,000 fans, plus grass berm seating for between 500 and 1,500 fans, the playing field, home and visiting team locker rooms, umpires' dressing rooms, ticket sales facilities, press facilities, radio and television broadcast facilities, stadium offices, concession/merchandise stands, reasonable storage and maintenance areas, and other elements required for use and operation of the Stadium and all areas of the Stadium normally made available to spectators.

1.28 **"Substantial Completion"** of the Stadium is the date when the certificate of

occupancy has been issued.

ARTICLE 2
LICENSE

2.1 **License of the Premises.** In consideration of, and subject to, the terms, covenants, conditions and agreements set forth herein the Agreement, CITY hereby licenses to TEAM, and TEAM hereby licenses from CITY, a portion of the Site, consisting of approximately 11.33 acres, and portions of parcels identified with Assessor's Parcel Numbers 0218-101-05, 0218-101-06, 0218-101-07, 0218-102-10 and 0218-102-11, to be improved with a not to exceed 6,000 seats/capacity Minor League Baseball stadium facility, stadium related and ancillary facilities (which, collectively, shall constitute the "**Premises**"), as more particularly described in **Exhibit C**, **DEPICTION OF PREMISES**, attached hereto and by this reference incorporated herein.

2.2 **Delivery of Possession and Acceptance**. On the License Commencement Date, the Premises shall be ready for use by the TEAM. CITY will deliver the Premises to TEAM for TEAM its use and occupancy of the Premises and TEAM hereby accepts the Premises in the conditions existing as of the License Commencement Date of the Agreement and TEAM will be deemed to have commenced its use of the Premises as of the License Commencement Date. TEAM hereby accepts this Agreement subject to all Applicable Requirements and to all matters disclosed hereby and by any exhibits attached hereto. TEAM represents and warrants to CITY that TEAM has made such investigation as it deems necessary regarding such Applicable Requirements, matters and exhibits, is satisfied with reference thereto and assumes all responsibility therefor as the same relates to the Premises and/or this Agreement, except as expressly provided otherwise in this Agreement. CITY represents and warrants that as of the License Commencement Date, CITY will deliver the Stadium in compliance with the PDL Rules and Regulations.

2.3 **Covenant of Quiet Enjoyment.** CITY covenants for the Term that TEAM, upon paying the License Fee and upon keeping, observing and performing the terms, covenants and conditions of the Agreement to be kept, observed and performed by TEAM, shall and may quietly and peaceably occupy, use, and enjoy the Premises for the duration of the Term, without ejection or interference by or from CITY or any other Person (other than Persons claiming by, through or under TEAM), subject to Force Majeure events.

ARTICLE 3
TERM

3.1 **License Term**.

3.1.1 **Initial License Term.** The Term of the Agreement shall be for an initial term of twenty (20) years ("Initial Term"), commencing on the License Commencement Date, and ending at 11:59 p.m. on the date which is twenty (20) years later ("**Initial Term Expiration Date**"), unless this Agreement is sooner terminated or extended as hereinafter provided. When the License Commencement Date has been ascertained, the Parties shall promptly execute a **CONFIRMATION OF LICENSE DATES** form, substantially in the form attached hereto as **Exhibit D** and by this reference incorporated herein. The "**License Commencement Date**" shall mean the date that is the earlier to occur of (i) five (5) days after Substantial Completion, or (ii) the

date TEAM occupies or uses the Premises with employees for office use or baseball practice or other related uses, including any TEAM Event.

3.1.2 **Agreement Prevails**. Upon the date the Agreement is fully executed by the Parties, the Agreement shall supersede the MOU and release the Parties from any further obligations under the MOU.

3.1.3 **Options to Extend**. TEAM shall have two (2) options (each an "**Option**", collectively the "**Options**") to extend the Term for a period of five (5) years each (An "**Extension Term**"). The Initial Term and any Extension Terms are herein, collectively, referred to as the "Term". The Term, as extended by the Options, shall be on all of the same terms and conditions set forth in this Agreement.

3.1.4 **Exercise of Options to Extend**. TEAM may exercise the first Option by providing written notice to the CITY no later than sixty (60) days before the Initial Term Expiration Date of the Initial Term of TEAM'S intention to extend the Term. If the first Option is timely exercised, the Parties shall promptly execute a Confirmation of License Dates for the first extension period and Expiration Date of the Term. If TEAM had timely exercised the first Option, then TEAM may exercise the second Option by providing written notice to the CITY no later than sixty (60) days before the Expiration Date of the first extended Term of TEAM'S intention to exercise the second option to extend the Term. If the second Option is timely exercised, the Parties shall promptly execute a Confirmation of License Dates for the second extension period and Expiration Date of the Term.

ARTICLE 4
STADIUM FUNDING, DESIGN AND CONSTRUCTION

4.1 **Funding for Construction of Stadium**. As express consideration for the TEAM relocating the Club to the Stadium and subject to the satisfaction of the conditions precedent set forth herein, CITY agrees to fund and construct the Stadium on the Site, located generally south of East Riverside Drive and between South Vineyard Avenue and South Archibald Avenue in Ontario, California, with an estimated construction cost of approximately $95,000,000.00.

4.2 **PDL Rules and Regulations**. The Stadium shall be constructed in accordance with the PDL Rules and Regulations.

4.3 **Design and Construction of Stadium**. Subject to the conditions and required approvals by TEAM and MLB PDL as further described in Sections 4.4, 4.5, and Article 22, the CITY will have the Stadium constructed in accordance with the design, plans and specifications of the Stadium prepared by and for the CITY, that have been deemed to comply with all applicable PDL Rules and Regulations.

4.4 **Contingencies**. The Parties acknowledge that Relocation to the Stadium is contingent upon receiving PDL Approval, including all design and construction plans for the Stadium. Accordingly, the Parties agree to work in good faith to determine the design and construction of the Stadium to meet all applicable PDL Rules and Regulations, and to ensure the Stadium is aesthetically pleasing, operationally and economically efficient, technologically friendly, and comfortable and fun for fans and baseball personnel. The TEAM and CITY will

mutually agree on the specialists and consultants (e.g., planning, architectural, engineering, construction and interior design) to be engaged, and the time frames upon which each specialist and consultant must be engaged.

4.5 **PDL Approval**. The Team shall have obtained all necessary PDL Approvals for this Agreement.

4.6 **Stadium Standards**. Subject to the conditions precedent set forth herein, the Stadium shall be built to comply with all applicable PDL Rules and Regulations, in addition to the following standards set forth below:

(a) Baseball capacity to not exceed 6,000 fans. This includes permanent seating for approximately 4,000 to 5,000 (including group areas and premium seating) plus grass berm seating for 500 to 1,500 fans;

(b) Group entertainment areas;

(c) Premium seating suites;

(d) Premium seating club areas;

(e) Concessions sales, operations and storage facilities as well as concessions equipment;

(f) Merchandise sales, operations and storage facilities;

(g) Press box and media production space and equipment;

(h) Parking sufficient for the anticipated capacity of the Stadium;

(i) Videoboard and other signage facilities;

(j) TEAM offices for a minimum of 32 full-time front-office staff members;

(k) Other features as appropriate for a stadium of this type; and

(l) Appropriate transportation infrastructure for fans to travel to the Stadium including appropriate roadside identification and directional signs leading up to and into the Stadium.

4.7 **TEAM Responsibilities for Furniture, Fixtures and Equipment**. The TEAM shall pay for all furniture, fixtures and equipment ("FF&E") (except for those affixed to the building such as lockers, showers, etc.) in its areas of 365-day access (office, team store and home clubhouse). TEAM shall pay for other furniture, fixtures and equipment in non-365 day access areas if that FF&E is necessary for the TEAM'S Events, not affixed to the building and exclusive for the TEAM'S use.

4.8 **CITY Responsibilities for Furniture, Fixtures and Equipment**. Equipment that is non-exclusive to the TEAM (such as the rolling batting cage, baseball field screens, field tarp, etc.) will be a CITY expense. All FF&Es for the provision of concessions and catering will be the responsibility of the CITY.

4.9 **Parking Facilities**. CITY shall design, install and improve the Site with a parking area/facility ("**On-Site Parking**") sufficient to serve the Stadium which will not be part of the

Premises. On-Site Parking shall be controlled by CITY, and shall not be used for parking for events not held at the Stadium without CITY'S consent. Some parking for the Stadium may be available off-site, and shall be subject to separate agreements between TEAM and/or CITY with other parties. CITY makes no representation about the availability of other parking rights or the suitability, adequacy, size or capacity of such off-site parking and the sufficiency to serve the Stadium parking needs, nor is CITY obligated under this Agreement or any other agreement to provide sufficient off-site parking for TEAM Events, or for any events held at the Stadium, whether held by CITY or TEAM.

4.10 **Completion Date**. Subject to the terms in Articles 4 and 22, the Parties agree to work in good faith to ensure the Stadium is designed, constructed and will achieve Substantial Completion and ready for use and occupancy by the TEAM on or before the Outside License Commencement Date of March 1, 2026.

ARTICLE 5
USE

5.1 **Events**. CITY and TEAM contemplate that events and use of the Premises shall be categorized in three ways: TEAM Events, CITY Events, and Other Events. A "CITY Event" is as defined in Section 5.4. Any event, such as promotional events (subject to the provisions of Article 10 below), clinics and other similarly-constituted events which relate to the Professional Development League System or the TEAM, to be located at the Premises, or any other event which is hosted or otherwise arranged by TEAM or its affiliates, shall be considered a "TEAM Event" (but for the avoidance of doubt, activities related to and occurring on the same day as a Club game shall not be considered a separate and distinct "TEAM Event"). Any other event or use of the Premises, which includes events open to the public, generates attendance and/or parking revenue and incurs expenses, that is not a CITY Event or TEAM Event shall be an "Other Event." With the intent to coordinate dates and to establish a yearly calendar of events ("Stadium Master Calendar"), the Stadium Manager will create and manage a Stadium Master Calendar for each calendar year that will include anticipated or regularly occurring events, subject to the terms and conditions provided herein this Article 5.

5.2 **Quarterly Meetings**. TEAM and CITY representatives shall meet at least quarterly to set dates and manage the Stadium Master Calendar. For scheduling priority purposes, paid attendance events shall take priority over free attendance events. CITY or its Stadium Manager shall manage all CITY Events. No License Fee shall be paid by CITY, nor credited to TEAM, for CITY Events or Other Events.

5.3 **TEAM'S Use of the Premises**. TEAM shall use and occupy the Premises only for the purposes specified in this Agreement or any other legal use which is reasonably comparable to such use, and for no other purpose. During the Term of this Agreement, the TEAM shall have access to use the Premises with scheduling priority for all regular season and postseason baseball home game days plus up to twenty (20) non-game day events each year. Except for dates required for Home Games or other TEAM Events previously scheduled or as may be required pursuant to the PDL Rules and Regulations, and subject to the provisions of this Section 5.3 and Section 5.4, CITY or Stadium Manager retains the right to reserve dates to allow for other programming at the Stadium, including dates for concerts, family shows, or other sporting events, during the Term.

Except as otherwise provided herein, during the presentation of Home Games, TEAM shall have the right to use the Stadium Facilities in a manner consistent with the presentation of minor league baseball games. TEAM shall not unreasonably interfere with the use by others of the areas of the Sports Complex that are not Stadium Facilities. The TEAM shall have 365-day exclusive access to TEAM offices, merchandise, sales facilities and the home and visiting clubhouses. Except as otherwise provided in Article 6 for payment of License Fee by the TEAM, Stadium Manager shall not charge TEAM any License Fee or other Fees in connection with such TEAM Events; provided however, TEAM shall be responsible for paying reasonable incremental out-of-pocket staffing and other direct event-related expenses incurred by Stadium Manager in connection with such TEAM Events and any of TEAM'S costs described in Section 7.2.1 herein. For purposes of clarity, "incremental out-of-pocket staffing and other costs" means those costs beyond what would be incurred during a typical Club game, and prior to incurring the same, the Stadium Manager shall meet and confer with the Team to discuss the proposed magnitude of such incremental out-of-pocket staffing and other costs with respect to the TEAM Event in question.

5.3.1 **No Relocation**. During the Term, except as provided by PDL Rules and Regulations, or in the event that the Stadium is unusable due to a Force Majeure Event, TEAM agrees to cause the Club to play all pre-season, regular season, and postseason home games for the TEAM at the Premises. TEAM shall not relocate the Club during the Term ("**No Relocation Requirement**"); provided, however, if the Stadium is not useable due to a Force Majeure Event, the Club may play in an alternate location until the Stadium is restored without such temporarily relocated Club play being a breach of the No Relocation Requirement. If TEAM relocates the TEAM'S Club in breach of the No Relocation Requirement, the License Fee for the remaining, unexpired Term shall be immediately due and payable by TEAM to CITY. Subject to the prior receipt of all necessary PDL Approvals, the official TEAM name will be modified to include the word "Ontario" in its name.

5.3.2 **Scheduling of Dates During Regular Baseball Season**. TEAM will provide the schedule of Home Games and possible postseason dates for the upcoming MLB PDL championship season no later than December 1 of the prior year. For non-game day events, the TEAM will be granted their desired date upon their written request to the CITY or its Stadium Manager to the extent that date has not been previously scheduled for a CITY Event or Other Event. Within forty-eight (48) hours after TEAM receives its final, complete schedule from the MLB PDL for the ensuing season, TEAM shall submit its final, complete schedule to Stadium Manager for the ensuing season at which point all unscheduled available dates shall be released to Stadium Manager without further notice or action and TEAM will have no priority for use of the Stadium on such dates. In the event that Stadium Manager has the opportunity to schedule a significant event (such as a major concert, family show or sporting event that is not a baseball game) at the Stadium and such opportunity arises prior to December 1 of the prior year and before the TEAM has provided its schedule of Home Games and possible postseason dates for the upcoming Baseball Season, Stadium Manager will submit a request to TEAM to reserve that date and TEAM agrees to consider and work with CITY and Stadium Manager in good faith to accommodate such request and at no cost would be due to the TEAM by the Stadium Manager or the CITY.

5.3.3 **Scheduling of Dates During Postseason**. For each Baseball Season during the Term, in accordance with Section 5.3.2, TEAM will provide CITY or its Stadium Manager

with possible postseason dates to be reserved ("Postseason Dates"). Stadium Manager agrees to reserve such Postseason Dates unless and until the Club is eliminated from qualification for the postseason. Within twenty-four (24) hours after TEAM receives notice from MLB PDL of which Postseason Dates will not be used for the Club's postseason games, TEAM shall notify Stadium Manager of such released dates, which dates shall be released to Stadium Manager without further notice or action and TEAM will have no priority for use of the Stadium on such dates.

5.4 **CITY'S Use of the Premises**. The CITY or its Stadium Manager shall have the right to schedule events at the Stadium for its own purposes or initiative that are not related to professional baseball ("**CITY Events**") or otherwise referred to as Non-Ontario Professional Baseball events, including such regularly occurring events each calendar year (like the State of the City, civic events or certain holiday celebrations). If the CITY Events are to be held during the Baseball Season, PDL Approval is required, and the TEAM agrees to work with the CITY in an effort to obtain PDL Approval for each event. The CITY will ensure that the baseball playing field is restored to compliance prior to any Club games, or other TEAM baseball event that has been scheduled more than thirty (30) days in advance, if an event temporarily alters the condition of the playing field. Subject to Sections 7.3.6 and 9.3.4, CITY will retain concessions rights for all CITY Events or non-Ontario Professional Baseball events, or Other Events.

CITY may reserve and set dates for its events up to one year in advance, so long as such CITY dates do not conflict with the TEAM'S schedule of Home Games or any previously scheduled other TEAM Events, by sending notice to TEAM. Once reserved, TEAM may not set a TEAM Event on such date without CITY'S consent if such TEAM Event would interfere with such CITY Event in the reasonable discretion of CITY.

5.5 **Stadium Manager's Use of the Premises**. TEAM acknowledges that Stadium Manager may schedule any CITY Events on behalf of the CITY and may schedule Other Events, such as concerts, family shows, or other sporting events during each calendar year, including during each Baseball Season, subject to (i) the provisions contained in Sections 5.3, 5.3.2, 5.3.3 and 5.4, and (ii) obtaining PDL Approval if such CITY Event or Other Event is otherwise scheduled to occur during the Baseball Season (including the postseason).

5.6 **CITY Compliance with Laws**. CITY shall comply with all federal, state, county, city or local governmental agency laws, statutes, codes, ordinances, standards, rules, regulations, requirements and orders, including without limitation Environmental Laws (as defined in Article 21 and the Americans with Disabilities Act of 1990, 42 U.S.C. § 12101 *et seq*., as amended ("**ADA**"), covenants and restrictions of record, life and fire safety and similar requirements and requirements of any fire insurance underwriters or rating bureaus, now in effect or which may come into effect at any time during the Term (collectively "**Applicable Requirements**"), relating in any manner to the Premises or made applicable to the Premises by (i) the Stadium improvements completed by CITY, (ii) any alterations, additions or improvements in the Premises made by CITY, or (iii) the presence of one or more persons with a particular disability within the Premises during any CITY Event. CITY warrants that the Premises, will be in compliance with all applicable laws, including all Title 24 requirements and ADA, as of the License Commencement Date.

5.7 **TEAM Compliance with Laws**. As of the License Commencement Date, TEAM shall comply with all federal, state, county, city or local governmental agency laws, statutes, codes,

ordinances, standards, rules, regulations, requirements and orders, including without limitation Environmental Laws (as defined in the **ADA** and the Applicable Requirements, relating in any manner to the Premises or made applicable to the Premises by (i) TEAM'S occupation or use of the Premises, (ii) any alterations, additions or improvements made to the Stadium or in the Premises made by TEAM, or (iii) the presence of one or more persons with a particular disability within the Premises during any TEAM Event; however, TEAM shall (y) comply with all Applicable Requirements with respect to any alterations, additions or improvements to the Stadium or in the Premises made by TEAM, and (z) not be required to take any action under this Section to the extent related to or arising as a result of the Discretionary Capital Improvements (See Section 8.2 below) but shall promptly notify CITY of the need to do so.

5.8 **Inspection by Certified Access Specialist**. CITY discloses that the Premises have not undergone inspection by a Certified Access Specialist as referenced in California Civil Code Section 1938 subsection (e) which provides: "A Certified Access Specialist (CASp) can inspect the subject premises and determine whether the subject premises comply with all of the applicable construction-related accessibility standards under state law. Although state law does not require a CASp inspection of the subject premises, the commercial property owner or lessor may not prohibit any potential lessee or tenant from obtaining a CASp inspection of the subject premises for the occupancy or potential occupancy of a lessee or tenant, if requested by a lessee or tenant. The parties shall mutually agree on the arrangements for the time and manner of the CASp inspection, the payment of the fee for the CASp inspection, and the cost of making any repairs necessary to correct violations of construction-related accessibility standards within the premises." Pursuant to the foregoing Section 1938(e), CITY acknowledges and agrees that, if at any time during the Term, TEAM wishes to have the Premises inspected by a CASp: (i) TEAM must notify CITY on or before the date when TEAM executes this Agreement pursuant to the election below; (ii) the inspection will be at CITY'S sole cost and expense; (iii) the inspection must be scheduled through CITY and in coordination with the Stadium's property manager; (iv) any repairs or modifications necessary to correct any violation of construction-related accessibility standards that is noted in the CASp report shall be CITY'S responsibility; and (v) TEAM must provide a copy of the CASp report to CITY on completion.

ARTICLE 6
LICENSE FEE

6.1 **Base License Fee**. TEAM shall pay to CITY, as base rent for the Premises, without notice, demand, offset or deduction, except as may be otherwise expressly provided in this Agreement, an annual base license payment of Four Hundred Thousand Dollars and 00/100 ($400,000.00) per year ("**Base License Fee**") payable with five (5) equal monthly payments of Eighty Thousand Dollars and 00/100 ($80,000) in advance on or before the first of each of the following months of April through August. In the event that the License Fee Commencement Date shall fall within the months of April through August, TEAM'S obligation to pay the total annual Base License Fee amount for that Term year shall be prorated based upon a fraction, the numerator of which shall be the number of days in the regular season that TEAM is able to occupy the Stadium for TEAM'S intended use, and the denominator of which is the total number of days in the regular season. The annual Base License Fee amount will increase by Twenty Five Thousand Dollars and 00/100 ($25,000) every five (5) years, including during the Options periods. All rent shall be payable in lawful money of the United States to CITY at the address stated herein or to such other

persons or at such other places as CITY may designate from time-to-time in writing.

6.2 **Additional License Fees**. All monetary obligations of TEAM under this Agreement that are in addition to the Base License Fee will be deemed as "Additional License Fees". Base License Fee and Additional License Fees herein are sometimes collectively referred to in this Agreement as "Fees".

6.3 **Late Charges**. If any Fees payment is not received by CITY or CITY'S designee within ten (10) days after that Fees is due, TEAM shall pay to CITY a late charge of six percent (6%) of the Fees amount due as liquidated damages, in lieu of actual damages (other than interest under section 6.3 and attorney fees and costs under Section 23.8). The Parties agree that this late charge represents a reasonable estimate of the expenses that CITY will incur because of any late payment of Fees (other than interest and attorney fees and costs). TEAM shall pay the late charge as Additional License Fees with the next installment of Fees. In the event that the late charge assessed is for the August payment of any given License year, the TEAM shall pay the late charge on or before September 1 of that year.

6.4 **Interest**. If any Fees payment is not received by CITY or CITY'S designee within ten (10) days after that Fees is due, TEAM shall pay to CITY annual interest on the past-due amount, from the date due until paid, at the rate of twelve percent (12%) per year.

6.5 **Credit Against Base License Fee**. If at any time the CITY, county or state imposes a ticket tax, facility charge, or increases the CITY parking tax that the TEAM is required to pay, those taxes or facility charges will be credited against the Base License Fee.

6.6 **License Fee Commencement Date**. TEAM'S obligation to pay Fees shall commence upon the License Commencement Date.

ARTICLE 7
OPERATIONS AND MANAGEMENT

7.1 **TEAM Business Operations**. The CITY will work with the TEAM to provide, at no cost to the TEAM, adequate office space for the business operations of the TEAM from March 2024 until offices at the Stadium are available for use. Upon completion of the Stadium, CITY will provide TEAM with office space solely for TEAM to conduct administrative services with respect to the Club operations. TEAM shall provide all furnishings and equipment for such office space.

7.2 **TEAM Obligations**.

7.2.1 **Personnel**. The TEAM shall provide and pay for ushers, ticket takers, and box office personnel consistent with Minor League Baseball industry standards. The TEAM will be responsible for paying all personnel it employs and other expenses related to its games and events.

7.3 **CITY Obligations**.

7.3.1 **Stadium Management Duties**. During the Term, CITY shall serve as

manager of the Premises ("**Stadium Manager**") and, except as otherwise provided and assigned, shall manage all duties associated with operations and management of the Premises, including but not limited to maintenance and repair, property management, contracting for services, janitorial, employee management/labor relations, general concessions, parking, advertising, signage, accounting, banking, collections, net revenue reporting, master Stadium scheduling, and any other duty necessary to appropriately and professionally manage the Stadium. Stadium Manager shall have the right to book Other Events to maximize revenue and operating efficiency of the Stadium. Because the Stadium is to be considered a community resource (as well as the TEAM home location), the parties agree to use commercially reasonable efforts to maximize Stadium revenue while providing the community with a reasonably priced venue for sporting events and other public activities such as concerts and civic events. CITY may contract with a third party to serve as the Stadium Manager and, in its sole discretion, shall have the choice of the Stadium Manager and the principal representative of the selected Stadium Manager. CITY intends to engage a qualified venue operator to act as the City's agent and to serve as the Stadium Manager pursuant to a separate management agreement and assign, in whole or in part, CITY'S rights, duties and obligations of the CITY under this Agreement with respect to the operation, management and maintenance of the Stadium and related facilities.

7.3.2 **Operating Expenses**. "**Operating Expenses**" is defined as all of the costs and expenses paid or incurred in connection with the ownership, operation, repair, restoration, maintenance and management of the Premises, as determined by generally accepted accounting principles. Except as otherwise set forth herein, "Operating Expenses" include the following costs by way of illustration, but shall not be limited to: Real Property Taxes (as defined in Section 13.1 below); water and sewer charges; insurance premiums; any deductible portion of an insured loss concerning the Site, the Stadium or Premises or any items or matters described in this Section 7.3.2 (except for earthquake deductibles); utilities; refuse disposal; lighting; fire detection systems including monitoring, maintenance and repair; security; janitorial services; reasonable costs incurred in the management of the Stadium, if any, but not the salaries, benefits or overhead of TEAM; maintenance (but not installation) of air-conditioning and heating; supplies, materials, equipment and tools, including maintenance and repair costs and service contracts; costs of licenses, permits and inspections; ordinary maintenance and repair of the Premises, and other items that are stated elsewhere in this Agreement to be "Operating Expenses." No financing costs, administrative costs, vendor enforcement costs, rent taxes, gross receipt taxes (whether assessed against CITY or assessed against TEAM and collected by CITY, or both) or capital expenditures shall be included in Operating Expenses, even if amortized or depreciated over a period of time.

7.3.3 **Utilities**. During the Term, the CITY shall be responsible for the payment of utilities that service the Premises. The costs associated for the provision of utilities is considered as part of the Operating Expenses.

7.3.4 **Personnel**. The CITY shall provide Municipal Services to all Stadium events. Municipal services include police, security personnel, traffic control, fire prevention and protection, emergency medical technicians, street cleaning/trash removal, and other CITY based services ("**Municipal Services**"). CITY will pay for the Municipal Services at TEAM Events and CITY Events unless any such services are provided by and paid for by a third party. CITY will provide any of the Municipal Services at Other Events and may charge for the provision of such services. The CITY is responsible for paying for all event-related staff for CITY Events.

7.3.5 **Parking Operations**. The CITY will operate the parking facilities and shall be responsible for the collection of parking fees (except in some cases the TEAM may sell parking as an "add-on" to a ticket purchase) and traffic direction. The TEAM and CITY will mutually agree upon the parking fee amount for TEAM Events and agree upon the specific lots to be included.

7.3.6 **Concessions**. The CITY shall have the right to manage the Stadium concessions in accordance with the provisions of this Article 7. "**Concessions**" shall mean the serving of food, beverage (including beer, wine and spirits), catering and picnic food packages. A "**Concessions Director**" shall mean the individual responsible for running the operations of the Concessions during the TEAM Events. The CITY will ensure that the concessions operation is managed at the highest levels of quality and customer service consistent with the best of the Professional Development League System. The TEAM will have the right to approve concessions pricing, and menus used during TEAM Events, and have the right to approve the on-site Concessions Director during TEAM Events (such approval not to be unreasonably withheld, conditioned or delayed). The TEAM will have the right to create concessions related promotions and sell group/company picnic packages at TEAM-approved pricing and consistent with the Minor League Baseball industry. The CITY will cooperate on such concessions promotions and packages. The CITY will select a concessionaire to run the stadium concessions for three-year periods throughout the Agreement starting with the first year of the Agreement. The TEAM must approve the selection of the concessionaire before the concessionaire is finalized for each three-year period (such approval not to be unreasonably withheld, conditioned or delayed).

7.4 **Regular Meetings**. The Parties and their respective agents and representatives agree to hold regularly scheduled meetings, at least on a quarterly basis, to review the performance of the concessionaire, terms and the status of the operations of the Stadium.

ARTICLE 8
MAINTENANCE, REPAIRS, IMPROVEMENTS AND ALTERATIONS

8.1 **CITY Responsibilities**. The CITY shall, or cause its Stadium Manager to:

8.1.1 Maintain the Stadium and Premises, including but not limited to, the playing surface, in a neat, sanitary condition and in good state of repair during the Term, so that the Stadium and Premises will be a first class, Professional Development League System facility and ensure the Stadium, playing surface, and affixed facility equipment remains in compliance with the PDL Rules and Regulations; and

8.1.2 Pay for all Operating Expenses, and costs associated with routine maintenance, including janitorial and garbage removal, and repair of the Premises except where such conditions that prompted the need for repairs was caused by the TEAM employees, associates, agents and representatives. The routine maintenance and repair costs shall be considered as part of the Operating Expenses; and

8.1.3 Perform all Capital Repairs or cause the performance of all Capital Repairs necessary to keep and maintain the Premises in a manner reasonably consistent with the industry standard for such facilities and the PDL Rules and Regulations. "**Capital Repairs**" shall mean

any and all repairs, replacements and improvements that are necessary or desirable to maintain the Premises to the condition that existed upon the beginning of the Term.

8.2 **CITY Discretionary Non-TEAM Related Capital Improvements**. CITY shall have the right, in CITY'S sole reasonable discretion and at its sole cost and expense, from time to time to perform and pay for any discretionary capital improvements to the Premises (the "**Discretionary Capital Improvements**"), so long as such Discretionary Capital Improvements (including the timing and performance of alterations to complete the Discretionary Capital Improvements as well as the Discretionary Capital Improvements themselves, once installed) do not materially impact TEAM'S ability to use the Premises or host TEAM Events, and in such case, may make such Discretionary Capital Improvements so long as CITY obtains TEAM'S prior written approval, not to be unreasonably withheld, conditioned, delayed or denied. In requesting such consent, CITY shall provide detailed plans and specifications of the Discretionary Capital Improvements, including a timeline and a budget.

8.3 **Improvements or Alterations by TEAM**. TEAM shall have the right to make reasonable alterations, additions, improvements in, on or about the Premises, at TEAM's sole cost, during the Term up to twenty five thousand dollars ($25,000) per occurence, so long as it does not adversely affect the exterior or interior appearance of the Premises in the reasonable opinion of the CITY or is not a Capital Repair or improvement, with prior consent by the CITY, such consent not to be unreasonably withheld, conditioned or delayed. Except for any work which CITY performs pursuant to this Agreement, as a condition to consenting to such work at the time CITY approves of the same, CITY may require that TEAM remove any or all alterations, additions, improvements installed or made by TEAM at the expiration or sooner termination of the Term, and restore the Premises and the Stadium to their prior condition, at TEAM'S sole cost.

8.3.1 Any alterations, additions, improvements in or about the Premises that TEAM desires to make and which require the consent of CITY shall be presented to CITY in written form, with proposed reasonably detailed plans, and TEAM'S request to either remove or leave installed such work at the expiration or termination of the Term. If CITY gives its consent, the consent shall be deemed conditioned upon TEAM'S obtaining all required permits and approvals from appropriate governmental authorities, furnishing complete copies thereof to CITY prior to the commencement of the work and TEAM'S compliance with all conditions of said permits and approvals and other Applicable Requirements in a prompt and expeditious manner. Any alterations, additions, improvements shall be performed in a workmanlike manner with good and sufficient materials with all applicable permits and completed in a diligent and timely manner. TEAM shall not allow or permit any liens to be filed or recorded against the Site or the Premises. In the event that a lien is filed or recorded against the Site or the Premises, TEAM shall promptly take all actions necessary to have such lien released and removed.

8.3.2 TEAM shall pay, when due, all claims for labor or materials furnished to or for TEAM at or for use in, on or about the Premises, the Stadium and/or the Site, which claims are or may be secured by any mechanic's or materialmen's lien against the Premises, the Stadium and/or the Site, or any interest therein, which were not agreed to be paid for by CITY. TEAM shall give CITY not less than ten (10) days' notice prior to the commencement of any work, and CITY shall have the right to post notices of non-responsibility in or on the Premises as provided by Applicable Requirements

8.4 **TEAM Reimbursement for Repairs**. TEAM shall be responsible for reimbursement to CITY for any maintenance and repair costs to the Stadium, the Premises or any of the systems which result solely and directly from TEAM'S use of the Premises that is beyond normal and customary stadium facility use and operations, including but not limited to, for any damages caused to the Stadium and facilities, the Premises or the Sports Complex property by TEAM employees, associates, and representatives.

8.5 **Labor Code Requirements.**

8.5.1 **Prevailing Wages**. TEAM is aware of the requirements of California Labor Code Section 1720, et seq., and 1770, et seq., as well as California Code of Regulations, Title 8, Section 16000, et seq., ("**Prevailing Wage Laws**"), which require the payment of prevailing wage rates and the performance of other requirements on "public works" and "maintenance" projects. If any work or services being performed as part of an applicable "public works" or "maintenance" project, as defined by the Prevailing Wage Laws, and if the total compensation is $1,000 or more, TEAM agrees to fully comply with such Prevailing Wage Laws. CITY shall provide TEAM with a copy of the prevailing rates of per diem wages in effect at the commencement of this Agreement. TEAM shall make copies of the prevailing rates of per diem wages for each craft, classification or type of worker needed to execute the work or services available to interested parties upon request, and shall post copies at the TEAM'S principal place of business and at the Premises. It is the intent of the parties to effectuate the requirements of sections 1771, 1774, 1775, 1776, 1777.5, 1813, and 1815 of the California Labor Code within this Agreement, and TEAM shall therefore comply with such California Labor Code sections to the fullest extent required by law. TEAM shall defend, indemnify and hold the CITY, its officials, officers, employees, agents, and representatives free and harmless from any claim or liability arising out of any failure or alleged failure by TEAM to comply with the Prevailing Wage Laws.

8.5.2 **Registration/DIR Compliance**. If the work or services are being performed on a public works project of over $25,000 when the project is for construction, alteration, demolition, installation, or repair work, or a public works project of over $15,000 when the project is for maintenance work, in addition to the foregoing, then pursuant to California Labor Code sections 1725.5 and 1771.1, the TEAM and all sublicensees must be registered with the Department of Industrial Relations ("**DIR**"). TEAM shall maintain registration for the duration of the work or services to be completed and require the same of any sublicensees.

8.5.3 **Compliance Monitoring**. The work or services may also be subject to compliance monitoring and enforcement by the DIR. It shall be TEAM'S sole responsibility to comply with all applicable registration and labor compliance requirements, including the submission of payroll records directly to the DIR. Any stop orders issued by the DIR against TEAM or any sublicensee that affect the performance of work or services, including any delay, shall be TEAM'S sole responsibility. Any delay arising out of or resulting from such stop orders shall be considered TEAM caused delay and shall not be compensable by the CITY. TEAM shall defend, indemnify and hold the CITY, its officials, officers, employees and agents free and harmless from any claim or liability arising out of stop orders issued by the DIR against TEAM.

8.5.4 **Labor Certification**. By its signature hereunder, TEAM certifies that it is aware of the provisions of Section 3700 of the California Labor Code which require every

employer to be insured against liability for Worker's Compensation or to undertake self-insurance in accordance with the provisions of that Code, and agrees to comply with such provisions before commencing the performance of the Services.

ARTICLE 9
REVENUE

9.1 **Operating Revenue**. Except as otherwise expressly provided in this Agreement, "**Operating Revenue**" shall include all ticket sales revenue, ticket fees, service fees or charges, handling fees, concession revenue, naming/advertising rights revenue, merchandise revenue, sponsorship revenue, or other revenue derived from attendance or ticket sales, concession, merchandise, sponsorship, naming, advertising, parking, for all operations and/or events held in the Stadium (including all TEAM Events, Other Events and CITY Events)**.** The Parties have agreed to the percentage share each Party would receive from the sources of revenue further described in this Agreement. All Operating Revenue collected by CITY or its Stadium Manager will be distributed to the Parties pursuant to the terms herein, and all Operating Revenue collected by TEAM will be distributed to the Parties pursuant to the terms herein.

9.2 **CITY Revenue**.

9.2.1 Except as otherwise expressly provided herein, CITY shall be entitled to receive and retain any revenues generated or collected by CITY or from any sources not provided herein.

9.2.2 The CITY will receive 40% of any parking revenues collected by the TEAM.

9.2.3 TEAM shall pay to CITY One Dollar ($1) for every ticket sold over Two Hundred Twenty Five Thousand (225,000) tickets for its baseball events each year. A “sold” ticket is defined as any sold, traded or comped game ticket.

9.3 **TEAM Revenue**.

9.3.1 The TEAM shall receive all ticket, merchandise, and advertising revenue generated (except as otherwise provided in Articles 9, 10 and 12 herein) during and connected to its games and events. The TEAM will select and manage the ticketing vendor.

9.3.2 The TEAM shall receive 60% of the parking revenue (gross revenue minus the parking tax, which will be retained by the CITY) received from CITY-owned or operated lots within the vicinity of the Stadium on game days starting three (3) hours before game time until the end of the game.

9.3.3 The TEAM shall receive 50% of all gross revenues amount (before sales commissions or other expenses, if any) from in-stadium concessions related sponsorship and pouring/serving rights from the In-Stadium Concessions Related Sponsors referenced in Section 10.3 below to be applied toward mutually agreed upon advertising and hospitality package.

9.3.4 The CITY shall pay the TEAM on a monthly basis an amount equal to thirty five percent (35%) of the total net concessions and catering revenue during baseball games and TEAM Events, and ten percent (10%) of the total net concession and catering revenue for any CITY Events (CITY-sponsored non-baseball events) taking place during the Baseball Season. Net concessions and catering revenue is defined as total concessions revenue minus applicable state and local sales tax.

ARTICLE 10
STADIUM SIGNAGE, ADVERTISING AND SPONSORSHIPS

10.1 **CITY and TEAM Collaboration**. The CITY and TEAM shall collaborate on the sale and marketing of CITY-led sponsorships and advertising. A regular meeting of CITY and TEAM representatives shall occur no less than once per quarter to coordinate and leverage the CITY'S and TEAM'S effort.

10.2 **CITY Advertising Time**. The CITY shall have twenty-five percent (25%) of advertising time on the stadium electric signs (i.e., scoreboard, ribbons) which will run intermittently between the time the gates open until fifteen (15) minutes before the scheduled start of the game.

10.3 **In-Stadium Concessions Related Sponsors**. Subject to the PDL Rules and Regulations, the CITY, or its assignee, will have the right to sell non-exclusive pouring or serving rights agreements to In-Stadium Concessions Related Sponsors. "**In-Stadium Concessions Related Sponsors**" is defined as any company whose product will be sold in the Stadium as a part of the food and beverage menu. Examples would be beer, soda or hot dog companies. If an In-Stadium Concessions Related Sponsor purchases a neighborhood/concourse sponsorship, that will count as one of the CITY'S four (4) neighborhood/concourse sponsorships and be subject to the same stipulations.

10.4 **Revenue from Signage**. Except for as detailed in Section 10.2 above, the TEAM controls the rights to sell and receive all revenue from all other signage as well as digital and stadium advertising inventory.

10.4.1 **Stadium Title Sponsorship**. The CITY shall have the right to sell the Stadium title sponsorship, subject to the approval of the TEAM (such approval not to be unreasonably withheld, conditioned or delayed), the applicable PDL Rules and Regulations and the receipt of all necessary PDL Approvals. Any title sponsorship agreement shall be for a term of no less than ten (10) years. The CITY, or its assigned agent, and TEAM will coordinate on these efforts. In exchange for foregoing any revenue directly from the title sponsorship agreement, the CITY will pay the TEAM two hundred thousand dollars ($200,000) per year for the first ten (10) years of this agreement. In subsequent years, this amount paid to the TEAM will increase to two hundred and twenty five thousand dollars ($225,000) per year. If the sponsor wishes to have access to additional TEAM advertising inventory or hospitality items, those items may be purchased from the TEAM at an additional cost to the sponsor. The CITY will facilitate coordination between the TEAM and sponsors related to this additional TEAM inventory.

10.4.2 **Neighborhood/Concourse Sponsorships**. The CITY shall have the right

to set up four (4) neighborhood/concourse sponsorships at locations that are mutually agreed upon between the TEAM and CITY. Sponsors shall be non-exclusive, and subject to the approval of the TEAM (such approval not to be unreasonably withheld conditioned or delayed) and the receipt of all necessary PDL Approvals. The TEAM will receive 50% of the gross neighborhood/concourse sponsorship amount (before sales commissions or other expenses, if any) for the TEAM to use the sponsored neighborhood names in its communications and game operations. If the sponsor wishes to have additional TEAM advertising inventory or hospitality items, those items may be purchased from the TEAM at an additional cost to the sponsor. The CITY will facilitate coordination between the TEAM and sponsors related to this additional TEAM inventory.

10.5 **Off-Premises Advertising**. TEAM and Stadium name shall be featured with permanent signage on the CITY'S existing sport complex digital sign on the 60 freeway. TEAM shall receive reader board inventory to promote its events. The amount of inventory is to be determined by and between the Parties.

ARTICLE 11
ASSIGNMENT AND SUBLETTING

11.1 **Assignment by CITY**. CITY may assign any or all of its rights, duties and obligations under this Agreement to a third party of its selection in respects to the operations, management and maintenance, repairs, improvements and alternations of the Stadium, provided such assignment resulting in an operating and management agreement with a third party is subject to the terms of this Agreement. CITY agrees to seek input from TEAM in its selection process for a third party to operate and manage the Stadium as the Stadium Manager; however, the final selection of the Stadium Manager is in the CITY'S sole discretion. CITY will provide notice to TEAM when such assignment has been made by CITY. Notwithstanding the foregoing, (i) the selection of an on-site Concessions Director during TEAM Events is subject to the terms in Section 7.3.6; and (ii) no such assignment by CITY shall relieve CITY from its obligations to TEAM under this Agreement.

11.2 **CITY'S Consent Required**. Subject to the provisions of Section 11.3 (which provisions shall supersede this Section 11.2), TEAM shall not voluntarily or by operation of law assign or otherwise transfer (collectively "assign") or sublet all or any part of TEAM'S interest in this Agreement or in the Premises, or permit the use of the Premises by any party other than TEAM, without CITY'S prior written consent, which will not be unreasonably conditioned, withheld or delayed and the prior receipt of all necessary PDL Approvals. TEAM shall not mortgage or encumber the Site, this Agreement or TEAM'S interest in the Premises, nor ever have any right hereunder to do so. Each request for consent to an assignment or sublicense shall be in writing, accompanied by information relevant to CITY'S determination as to the financial and operational responsibility and appropriateness of the proposed assignee or sublicensee, including but not limited to the intended use and any required modification of the Premises. TEAM agrees to provide CITY with such additional or different information and documents as CITY may reasonably request. CITY shall respond to TEAM'S request for consent to an assignment or sublicense within fifteen (15) days after CITY receives all of the information and documents TEAM is required to provide. Any attempted assignment or subletting in violation of this Section 11.2 without CITY'S prior written consent shall be void, and shall constitute a default of this

Agreement without the need for notice to TEAM under Section 18.1 hereof.

11.3 **Assignment to TEAM'S Successor**. Subject to the prior receipt of all necessary PDL Approvals, the TEAM may assign their interest in this Agreement to a Successor without the consent of the CITY. For purposes of this Agreement, a "**Successor**" is an organization or other entity that (i) is affiliated with the TEAM, (ii) will assume the operations of the Ontario PDL License Agreement in the Stadium in connection with the transfer of the Ontario PDL License Agreement, and/or (iii) is a PDL Club. The terms and provisions of this Agreement shall be binding upon and shall inure to the benefit of the parties to the Agreement and their respective successors and assigns. TEAM shall deliver an assignment and assumption agreement entered into between TEAM and Successor which contains terms that the Successor assumes all the obligations, terms and conditions of this Agreement. If TEAM assigns this Agreement to a Successor, upon the assumption by such Successor of all obligations of TEAM under this Agreement, TEAM shall be released from all obligations under this Agreement as of the effective date of such assignment and assumption agreement.

ARTICLE 12
OWNERSHIP RIGHTS OF LAND, STADIUM AND FIXTURES

12.1 **Site**. The CITY is the sole owner of the Site and retains all rights pertaining to ownership of a fee interest in real property. CITY to consult with TEAM regarding commercial (retail, restaurant, multi-family housing and other development) at or adjacent to the ballpark site, provided, however, CITY shall retain full discretion with respect to any such proposed development.

12.2 **Right To Operate Separate Facility(ies)**. CITY reserves to itself, or to its affiliates, the right to operate the Stadium, or any other new or existing facility(ies), that would accommodate concerts, family shows, sporting events, theater or other community entertainment events. Further, nothing in this Agreement shall prevent CITY from opening or operating entertainment or sports facilities, movie theaters, or other development activities within the City of Ontario. In other words, in no way does this Agreement grant TEAM an exclusive right to entertainment or sports facilities within the City of Ontario.

12.3 **Premises**. The CITY shall be the sole owner and landlord of the Premises, Stadium, and all improvements made thereon, including but not limited to the FF&Es affixed to the Site by CITY or left on or at the Premises by TEAM after the Expiration Date or earlier termination of the Agreement, Stadium and any building on the Premises.

ARTICLE 13
TAXES AND ASSESSMENTS

13.1 **Real Property Taxes/Assessments/Possessory Interest Taxes**. The CITY may be responsible for the payment of any ad valorem property taxes or special assessments, if such taxes are assessed against the fee interest in the Site. TEAM hereby recognizes and understands that this Agreement may create a possessory interest subject to property taxation under California Revenue and Tax Code Section 107.6, and that TEAM may be subject to the payment of property taxes levied on such interest. Any such imposition of a possessory interest tax shall be a tax

liability of TEAM solely, and shall be paid for by TEAM; and any such tax payment shall not reduce any Fees due to CITY. TEAM shall also pay all interest and penalties any government entity assesses for late payment of any possessory interest taxes that this Agreement requires TEAM to pay. TEAM is responsible for the timely payment of any possessory interest taxes that may be assessed against the TEAM's interest under this Agreement.

13.2 **Other Taxes**. TEAM shall pay all other required taxes and fees, other than concessions, related to the operation of the TEAM'S games and events at the Stadium.

13.3 **Parking Tax**. The CITY'S Parking Tax shall be collected and remitted to the CITY, regardless of whether the TEAM (as an add-on to the ticket) or the CITY (at public parking facilities) collect parking fees.

ARTICLE 14
SURRENDER OF PREMISES

14.1 **Surrender of Premises**. TEAM shall, on or before the Expiration Date, or upon the earlier termination of this Agreement, peaceably and quietly leave, surrender and yield up to CITY in good and operable condition, reasonable wear and tear excepted, (i) the Premises, free of sublicensees and in a clean condition and free of debris, (ii) the FF&E installed, affixed, attached or supplied by CITY pursuant to this Agreement or any FF&E paid for by CITY or paid for out of the any funds on behalf of CITY and all replacements of and substitutions therefor, (iii) all remaining spare parts on hand for the Premises, (iv) all keys for the Premises, and (v) any other items or property which are necessary to operate as a baseball facility which is not specifically and previously owned and brought on the Premises by TEAM excluding such items of property as TEAM is entitled to remove pursuant to Section 4.7. Upon such expiration or termination of this Agreement, and provided that the same are assignable, TEAM shall assign to CITY all of its right, title and interest in and any service contracts, and equipment leases, subject to TEAM'S rights with respect to any claims pending thereunder.

14.2 **Removal of Personalty**.

14.2.1 **TEAM'S Obligations to Remove**. All trade fixtures, appliances, furniture, equipment (including exercise and field maintenance equipment), furnishings, and other personal Property purchased by the TEAM that is not part of the Premises (as provided in Section 4.7) shall be removed by TEAM within thirty (30) days after the Expiration Date or earlier termination of this Agreement, provided that TEAM shall promptly repair any damage to the Premises caused by such removal.

14.2.2 **CITY'S Right to Remove**. Any trade fixtures, furniture, equipment or other personal property of TEAM which remains in the Premises beyond thirty (30) days after the Expiration Date or earlier termination of this Agreement may, at the option of CITY, be deemed to have been abandoned by TEAM and either may be retained by CITY as its property or be disposed of, without accountability, in such a manner as CITY may determine necessary, desirable or appropriate, and TEAM, upon demand, shall pay the cost of such disposal, together with interest thereon at the interest rate provided in Section 6.4 herein from the date such costs were incurred until reimbursed by TEAM, together with reasonable attorney's fees, charges and costs.

14.3 **Holding Over**. In the case of any holding over by TEAM after the Expiration Date or earlier termination of this Agreement without the consent of CITY, TEAM shall pay CITY Fees at one hundred fifty percent (150%) of the Base License Fee amount. Further, in the event TEAM shall hold over beyond any date for surrender of the Premises set forth in CITY'S written demand for possession therefor, TEAM shall reimburse CITY for all actual expenses and losses incurred by CITY by reason of CITY'S inability to deliver use of the Premises to a successor licensee, together with interest on such expenses at the interest rate provided in Section 6.4 herein from the date such expenses are incurred until reimbursed by TEAM, together with CITY'S reasonable attorneys' fees, charges and costs. The acceptance of Fees under this Section 14.3 by CITY shall not constitute an extension of the term of this Agreement or afford TEAM any right to use of the Premises beyond any date through which such Fees has been paid by TEAM and accepted by CITY. Such Fees shall be due to CITY for the period of such holding over, whether or not CITY is seeking to evict TEAM and, unless CITY otherwise then agrees in writing, such holding over shall be, and shall be deemed construed to be, without the consent of CITY, whether or not CITY accepted any sum due pursuant to this Section 14.3.

14.4 **Survival**. The provisions contained in this Article 14 shall survive the expiration or earlier termination of this Agreement.

ARTICLE 15
INSURANCE AND INDEMNIFICATION

15.1 **Insurance - TEAM**. During the Term, and without limiting or diminishing the TEAM'S obligation to indemnify the CITY or hold the CITY harmless as provided elsewhere in this Agreement, TEAM, at its own expense, shall procure and maintain in full force and effect the following policies of insurance during the Term of this Agreement including any Options periods, against claims for injuries to persons or damages to property which may arise from or in connection with the Agreement of the Stadium and the Premises and the activities of the TEAM, the Club, its guests, agents, representatives, employees or subcontractors. In respect to any of the insurance requirements imposed upon the TEAM herein, the CITY herein refers to the City of Ontario, its agencies and departments, directors, officers, City Council, employees, elected or appointed officials, volunteers, agents or representatives.

15.1.1 **Commercial General Liability ("CGL") Insurance**. A policy of commercial general liability insurance insuring against all claims, demands, actions or liability for injury to or death of any persons, and for damage to property arising from or related to the use or occupancy of the Premises or the operation of TEAM'S business and the business operated by TEAM [and sublicensees and concessionaires of TEAM] in the Premises. Coverage shall be at least as broad as Insurance Services Form CG 00 01, including coverage for property damage, bodily injury, personal injury, advertising injury, premises/operations, contractual liability (including TEAM'S indemnity under this Agreement), independent contractors, product/completed operations, and, if applicable, liquor liability insurance. The insurance shall be written on an occurrence basis with coverage not less than $2,000,000.00 per occurrence and at least $5,000,000.00 general aggregate limit. These limits may be evidenced by any combination of primary and excess policies. Defense costs shall be paid in addition to the limits. If the use of the Premises includes athletic activities, TEAM shall provide evidence of that the CGL includes coverage for injuries to athletic participants. If the TEAM maintains broader coverage and/or

higher limits than the minimums shown above, the CITY requires and shall be entitled to the broader coverage and/or higher limits maintained by the TEAM. Any available insurance proceeds in excess of the specified minimum limits of insurance and coverage shall be available to the CITY. The policy shall contain no endorsements or provisions (1) limiting coverage for contractual liability; (2) excluding coverage for claims or suits by one insured against another (cross-liability); (3) products/completed operations liability; or (4) containing any other exclusion(s) contrary to the terms or purposes of this Agreement. No deductible in excess of $10,000.00 will be carried under this coverage without the prior written consent of the CITY.

15.1.2 **Property Insurance**. TEAM shall obtain and keep in force during the term of this Agreement a policy or policies of insurance for the benefit of the TEAM for its interest in this Agreement covering loss or damage to the TEAM'S personal property, fixtures, equipment, and any other improvements made on the Premises by TEAM for which it is responsible at the full replacement cost thereof, with no coinsurance penalty provision, and providing protection against all perils included within the classification of fire, extended coverage, vandalism, malicious mischief, flood and earthquake, special extended perils ("all risk," as such term is used in the insurance industry). During the period of early access and construction of the Stadium, CITY shall provide, or cause for it to be provided, property insurance covering course of construction insurance for the Stadium until Substantial Completion.

15.1.3 **Automobile Liability**. Automobile Liability Insurance covering owned, leased, hired and non-owned vehicles used by the TEAM with coverage at least as broad as Insurance Services Office Form CA 00 01 covering "Any Auto" (Symbol 1), or the equivalent, covering bodily injury and third party property damage in an amount not less than $2,000,000 per occurrence combined single limit.

15.1.4 **Workers' Compensation**. If TEAM has employees as defined by the State of California, TEAM shall also maintain Worker's Compensation Insurance as required by the applicable laws and Employer's Liability Insurance in an amount of at least $1,000,000 per person per accident.

15.1.5 **Waiver of Subrogation**. All required insurance coverages shall allow for a waiver of subrogation in favor of the CITY, its officials, officers, employees, agents, representatives and volunteers or shall specifically allow TEAM or others providing insurance evidence in compliance with these specifications to waive their right of recovery prior to a loss. TEAM hereby waives its own right of recovery against CITY, and shall require similar written express waivers and insurance clauses from each of its sublicensees.

15.1.6 **Deductibles and Self-Insured Retentions**. Any deductible in excess of $10,000 or self-insured retention must be approved in writing by the CITY and shall protect the CITY, its officials, officers, employees, agents, and volunteers in the same manner and to the same extent as they would have been protected had the policy or policies not contained a deductible in excess of $10,000 or self-insured retention.

15.1.7 **Enforcement of License Provisions (non estoppel)**. TEAM acknowledges and agrees that actual or alleged failure on the part of the CITY to inform TEAM of non-compliance with any requirement imposes no additional obligation on the CITY nor does

it waive any rights hereunder.

15.1.8 **Requirements Not Limiting**. Requirement of specific coverage or minimum limits contained in Section 15.1 are not intended as a limitation on coverage, limits, or other requirement, or a waiver of any coverage normally provided by any insurance. If the TEAM maintains broader coverage and/or higher limits than the minimums shown above, the CITY requires and shall be entitled to the broader coverage and/or higher limits maintained by the TEAM. Any available insurance proceeds in excess of the specified minimum limits of insurance and coverage shall be available to the CITY. Periodically during the Term, but no more often than annually, the Parties may meet and confer to discuss whether higher policy limits should be implemented with respect to each Party's respective insurance obligations under this Agreement.

15.1.9 **Additional Insurance Provisions**. All liability insurance policies shall name the CITY as described in Section 15.1 above and any person, firms or corporations designated by CITY as Additional Insureds with respect to liability arising out of the license granted under this Agreement and in connection with the operations of TEAM. No additional insured shall be liable for any payment for premiums. All Additional Insureds shall be entitled to recovery for any loss occasioned to them, their representatives, agents or employees by reason of negligence of TEAM, its officers, agents or employees. All policies will not be canceled without the TEAM first giving CITY thirty (30) days' prior written notice. All insurance shall be issued by an insurance company qualified to do business in the State of California and having an overall rating of A-:VIII or better and a financial rating of Class V as rated in the most current available Best's Key Rating Guide. Certificates of insurance required hereunder shall be delivered to CITY as a condition to TEAM'S entry onto the Premises. All liability insurance policies shall be written as primary policies, not contributing with and not in excess of coverage which CITY may carry under this Agreement.

15.2 **Liability Insurance–CITY**.

15.2.1 **Commercial General Liability (CGL) Insurance**. CITY shall obtain and keep in force, or cause its Stadium Manager to procure and maintain, during the Term of this Agreement, a policy of Commercial General Liability insurance insuring CITY and Stadium Manager against all claims, demands, actions or liability for injury to or death of any persons, and for damage to property arising from or related to CITY'S ownership of the Premises, the CITY and Stadium Manager's use, occupancy or maintenance of the Premises and naming TEAM as an additional insured. Coverage shall be at least as broad as Insurance Services Form CG 00 01 covering CGL on an "occurrence" basis, including coverage for property damage, bodily injury, personal & advertising injury, premises/operations, contractual liability (including CITY'S indemnity under this Agreement), independent contractors, personal injury, product/completed operations, owned and non-owned automobiles, and, if applicable, liquor liability insurance. The insurance shall be written on an occurrence basis with coverage in a minimum amount of $2,000,000.00 per occurrence and at least $5,000,000.00 general aggregate limit. Defense costs shall be paid in addition to the limits. Any available insurance proceeds in excess of the specified minimum limits of insurance and coverage shall be available to the CITY. The policy shall contain no endorsements or provisions (1) limiting coverage for contractual liability; (2) excluding coverage for claims or suits by one insured against another (cross-liability); (3) products/completed operations liability; or (4) containing any other exclusion(s) contrary to the

terms or purposes of this Agreement. No deductible in excess of $10,000.00 will be carried under this coverage without the prior written consent of the TEAM.

15.2.2 **Property Insurance**. CITY shall obtain and keep in force, or cause its Stadium Manager to obtain and keep in force, a policy or policies of insurance covering loss or damage to the Stadium, with loss payable to CITY and to any lenders having a lien on the Site or any part of it, in the amount of 100% of the replacement value thereof, against all perils included within the classification of fire, extended coverage, vandalism, malicious mischief, flood, sprinkler leakage and other perils normally covered in an "all risk" policy, as such term is used in the insurance industry; provided, however, that CITY or Stadium Manager shall have no obligation to insure against earthquakes.

15.2.3 **Additional Insurance**. In addition, CITY shall obtain and keep in force during the term of this Agreement, a policy of rental value insurance covering the loss of the full rent and other charges payable by all licensees of the Site to CITY for a period of one year, in the name of CITY with loss payable to CITY.

15.3 **Indemnification**.

15.3.1 **Indemnification - TEAM**. TEAM shall indemnify, protect, defend and hold harmless CITY, CITY'S agents, its agencies and departments, directors, officers, City Council, employees, elected or appointed officials, volunteers, agents or representatives (each a "**CITY'S Party**," collectively "**CITY Parties**"), from and against any and all claims, and/or damages, losses, costs, liens, judgments, penalties, loss of permits, reasonable attorneys' and consultants' fees, expenses and/or liabilities (collectively "Claims") arising out of, involving, or in connection with: (i) TEAM'S use or occupancy of the Premises and the Stadium; (ii) the conduct of TEAM'S business operations at the Premises; (iii) any act, omission, fault or neglect of TEAM, its agents, employees, representatives, contractors, customers, sublicensees, licensees, invitees or other visitors; and (iv) any default or breach by TEAM in the performance in a timely manner of any obligation on TEAM'S part to be performed under this Agreement including, without limitation, TEAM'S violation of or failure to comply with Applicable Requirements; excepting only to the extent such Claims are caused by CITY'S use of the Premises or Stadium, any CITY Event, CITY'S breach of this Agreement, or the negligent or willful acts or omissions of CITY, its agents, employees, representatives, contractors, customers, licensees, invitees or other visitors.

15.3.2 **Indemnification - CITY**. CITY shall indemnify, protect, defend and hold harmless TEAM, each MLB PDL Entity, and their respective agents, employees, affiliates, and the respective members, managers, officers, directors, owners, partners, trustees, agents and employees of each of these parties (each a "**TEAM Party**," collectively "**TEAM Parties**"), from and against any and all Claims arising out of, involving, or in connection with (i) CITY'S use of the Premises and the Stadium; (ii) the conduct of any CITY Event at the Premises; (iii) any act, omission, fault or neglect of CITY, its agents, employees, representatives, contractors, or licensees; and (iv) any default or breach by CITY in the performance in a timely manner of any obligation on CITY'S part to be performed under this Agreement; excepting only to the extent such Claims are caused by TEAM'S use or occupancy of the Premises or the Stadium, any TEAM Event, TEAM'S breach of this Agreement or the negligent or willful acts or omissions of TEAM, its agents, employees, representatives, contractors, customers, sublicensees, licensees, invitees or

other visitors.

15.3.3 **Defense**. The foregoing indemnities shall include, but not be limited to, the defense or pursuit of any claim or any action or proceeding involved therein, and whether or not litigated and/or reduced to judgment. In case any action or proceeding is brought against an indemnified party by reason of any of the foregoing matters, the applicable party upon notice from the indemnified party shall defend the same at its expense by counsel reasonably satisfactory to the indemnified party. The indemnified party need not have first paid any such claim in order to be so indemnified. The obligations under Section 15.3 shall survive the expiration or termination of this Agreement.

15.4 **Indemnification Obligations Not limiting**. The indemnity obligations under Section 15.3 are not intended to, and shall not, (i) restrict or modify any party's insurance and other obligations under this Agreement, or (ii) be restricted, limited or modified by compliance with such insurance and other obligations under this Agreement.

15.5 **Exculpation**. Except as otherwise expressly provided herein, including the Parties' mutual indemnity obligations in Section 15.4 above, each Party agrees that in no event shall the other Party ever be responsible or liable to such Party on any theory for any injury to such Party's business, loss of profits or rents, loss of income or any other form of consequential damage in any claim arising out of this Agreement. The clauses of this Section 15.5 shall survive the expiration or earlier termination of this Agreement until all claims within the scope of this Section 15.5 are fully, finally and absolutely barred by applicable statutes of limitations. Each party acknowledges that this Section 15.5 was negotiated with the other party, that the consideration for it is fair and adequate, and that such party had a fair opportunity to negotiate, accept, reject, modify or alter it.

ARTICLE 16
DAMAGE OR DESTRUCTION

16.1 **Partial Damage or Destruction**. In the event that the Stadium or Premises is partially damaged or destroyed by fire or other casualty and can be repaired or restored to sufficient condition in a time period so that it does not render the Stadium facilities unusable or unfit for its intended purpose (i.e. home games can be played in the Stadium with fans in attendance in approximately the same number and degree of comfort as existed prior to the casualty event), the Agreement remains in full force and effect. The CITY shall rebuild or repair the Stadium or Premises damaged or destroyed (except for TEAM fixtures and other TEAM improvements) as soon as reasonably possible, with the right to use any insurance proceeds covering such loss events.

16.2 **Total Destruction**. In the event that the Stadium is substantially or totally destroyed by fire or other casualty, and after consulting with the TEAM, the CITY may elect whether to rebuild or restore the Stadium or to terminate the Agreement by giving written notice thereof to the TEAM. If the CITY elects to terminate, the Agreement is terminated and shall have no further force and effect except as otherwise provided herein this Agreement. If the CITY elects to repair and restore the Stadium, then the TEAM shall have a period of thirty (30) days after notice of the CITY'S decision (which CITY'S notice shall include reasonable detail regarding the anticipated construction plans, scope of work, contractors and timing for completion), which decision must be delivered to TEAM in writing within thirty (30) days of the casualty event, in

which TEAM may terminate this Agreement. If the TEAM does not so terminate, the CITY shall proceed to repair and restore the Stadium diligently to its condition existing immediately prior to the casualty or in a condition agreed upon in writing by the Parties.

16.3 **Interim Facilities**. During any period that the Premises are partially or totally unsuitable for use by the TEAM (as determined by the TEAM in its reasonable discretion), the CITY shall not be liable for interim facilities or replacement facilities, and the TEAM shall, at its option, be relieved of its obligations under this Agreement when the Premises is not usable for the purposes intended by this Agreement for all or any part of the Baseball Season by reason of such damage or destruction. Notwithstanding anything contained herein, in the event that the Premises, or any part thereof, is damaged or destroyed to an extent that the TEAM, in its reasonable discretion, determines that the Premises is unsuitable for use by the TEAM during any regular season game, postseason game, or scheduled non-game day event, then the TEAM shall have the right to conduct all or a portion of the TEAM'S games or non-game day events at any other facility in any other location, whereby the TEAM shall be relieved of its obligations under this Agreement during the time frame the Stadium is unusable and, if possible or desired, continue to utilize such portion of the Premises that remains suitable for use by the TEAM.

ARTICLE 17
CONDEMNATION

17.1 **Total Condemnation**. In the event all of the Stadium is taken from the CITY pursuant to any right of eminent domain exercised by a governmental agency superior to the CITY or pursuant to any other superior governmental order, then at the election of the TEAM this Agreement may be terminated and payment due from the TEAM hereunder shall cease as of the date title to the Stadium is vested in such governmental entity. For purposes of this Agreement, a "**Superior Governmental Agency**" means a county of the State of California, the State of California or a federal agency of the United States of America.

17.2 **Partial Condemnation**. If any portion of the Premises is taken under the power of eminent domain, or sold under the threat of the exercise of said power (all of which are herein called "**Condemnation**"), this Agreement shall terminate as to the part of the Premises taken as of the date the condemning Superior Governmental Agency who takes title or possession, whichever first occurs of said portion of the Premises. If such portions of the Stadium or the Premises is taken by Condemnation so as to cause the Premises to be noncompliant with PDL Rules and Regulations, TEAM may, at TEAM'S option, to be exercised in writing only within ten (10) days after CITY shall have given TEAM written notice of such taking (or, in the absence of such notice, within 10 days after the condemning authority shall have taken title or possession, whichever first occurs) terminate this Agreement as of the date the condemning Superior Governmental Agency takes such title or possession. If TEAM does not terminate this Agreement in accordance with the foregoing, this Agreement shall remain in full force and effect as to the portion of the Premises remaining, except that the Base License Fee shall be reduced in the proportion that the floor area of the Premises taken bears to the total floor area of the Premises. No reduction of rent shall occur if the condemnation does not include any portion of the Stadium provided that the Premises is otherwise compliant with PDL Rules and Regulations. Any award for the taking of all or any part of the Premises under the power of eminent domain or any payment made under threat of the exercise of such power shall be the property of CITY, whether such award shall be made as

compensation for diminution in value of the interest or for the value of the part taken, or for severance damages; provided, however, that TEAM shall be entitled to any compensation separately awarded to TEAM for loss of or damage to TEAM'S FF&E collateral, other personal property brought on Premises by TEAM, and/or TEAM'S relocation expenses. If this Agreement is not terminated by reason of such Condemnation, CITY shall repair any damage to the Premises caused by such condemnation, except to the extent that TEAM has been reimbursed therefor by the condemning authority.

17.3 **Notice of Condemnation**. In the event CITY or TEAM shall receive notice of any proposed or pending Condemnation action affecting the Premises, the party receiving such notice shall promptly notify the other Party hereto.

17.4 **Survival**. The provisions contained in this Article 17 shall survive the expiration or earlier termination of this Agreement, but only insofar as such provisions relate to any Condemnation actions or any Condemnation awards that arose prior to the expiration or earlier termination of this Agreement.

ARTICLE 18
DEFAULTS AND REMEDIES

18.1 **Default by TEAM**. The occurrence of any one or more of the following events ("**Events of Default**") shall constitute a default of this Agreement by TEAM:

18.1.1 The vacating or abandonment of the Premises by TEAM.

18.1.2 The failure by TEAM to make any payment of rent or any other payment required to be made by TEAM hereunder, as and when due, where such failure continues for a period of 10 days after written notice thereof from CITY to TEAM. In the event that CITY serves TEAM with a notice to pay rent or quit pursuant to applicable unlawful detainer statutes, such notice to pay rent or quit shall also constitute the notice required by this Section 18.1.

18.1.3 TEAM, whether by action or inaction, fails to observe or timely perform any of the terms, covenants, conditions or provisions of this Agreement to be observed or performed by TEAM, where such failure continues for a period of 30 days after written notice thereof from CITY to TEAM; provided, however, that if the nature of TEAM'S noncompliance is such that more than 30 days is reasonably required for its cure, then TEAM shall not be deemed to be in default if TEAM commences such cure within said 30 day period and thereafter diligently prosecutes such cure to completion. To the extent permitted by law, such 30 day notice shall constitute the sole and exclusive notice required to be given to TEAM under applicable unlawful detainer statutes.

18.1.4 (i) The making by TEAM of any general arrangement or general assignment for the benefit of creditors; (ii) TEAM'S becoming a "debtor" as defined in 11 U.S.C. § 101 or any successor statute thereto (unless, in the case of a petition filed against TEAM, the same is dismissed within 60 days); (iii) the appointment of a trustee or receiver to take possession of substantially all of TEAM'S assets located at the Premises or of TEAM'S interest in this Agreement, where use is not restored to TEAM within 60 days; or (iv) the attachment, execution or other judicial seizure of substantially all of TEAM'S assets located at the Premises or of TEAM'S interest in this

Agreement, where such seizure is not discharged within 60 days. In the event that any provision of this Section 13.1(d) is contrary to any Applicable Requirements, such provision shall be of no force or effect, and shall not affect the validity of the remaining provisions hereof.

18.1.5 The Ontario PDL License Agreement is terminated due to TEAM'S failure to comply with PDL Rules and Regulations, or an Event of Default (as defined therein)under the Ontario PDL License Agreement has occurred.

18.1.6 The relocation of the Club by TEAM or a violation of the No Relocation Requirement.

18.2 **CITY Remedies**. Upon an Event of Default by TEAM under Section 18.1 and after expiration of the applicable cure period and subject to Section 23.17, CITY shall have the right to terminate this Agreement at any time prior to TEAM'S cure of such Event of Default by written notice to TEAM, in which event CITY may also bring an action to recover from TEAM:

18.2.1 The worth at the time of award of any unpaid Fees that had been earned at the time of termination of this Agreement;

18.2.2 Damages in an amount equal to Fees and other sums that would have been owing by TEAM under this Agreement for the balance of the Term plus all of CITY'S relicensing expenses, less the net proceeds, if any, of any relicensing of the Premises by CITY subsequent to the termination;

18.2.3 Any other amount reasonably necessary to compensate CITY for all detriment caused by TEAM'S failure to pay Fees under this Agreement.

18.2.4 Upon an Event of Default under Section 18.1 above, CITY may elect to continue this Agreement in full force and effect for so long as CITY does not terminate TEAM'S right to use the Premises as provided in this Section 18.2, and CITY may enforce all its rights and remedies under this Agreement, including the right to recover Fees as it becomes due under this Agreement. In such event, CITY may exercise all of the rights and remedies of a landlord under California Civil Code Section 1951.4, or any successor statute. Acts of maintenance or preservation or efforts to re-license the Premises or the appointment of a receiver upon initiative of CITY to protect CITY'S interest under this Agreement shall not constitute a termination of TEAM'S right to use the Premise.

18.3 **Default by CITY**. On and after the date that the TEAM commences use of the Premises, the occurrence of the CITY'S failure to observe or perform any material terms, conditions, or provisions of this Agreement to be observed or performed by CITY under this Agreement within thirty (30) days after receipt of notice of default from TEAM (provided, that if the cure of such CITY Default reasonably requires more than thirty (30) days to complete, then CITY is not in default if CITY promptly commences the cure of such CITY Default and diligently pursues such cure to completion). TEAM'S notice must give in reasonable detail the nature and extent of the failure and identify the Agreement provisions containing CITY'S obligations. If CITY defaults and fails to cure the same within the time provided, TEAM shall have all rights to which TEAM is entitled at law for damages and/or for specific performance as described in Section 18.4.

18.4 **TEAM Remedies**. In the event that CITY fails to perform and observe the same, that shall entitle TEAM, at TEAM'S sole option, to terminate the Agreement if after a thirty (30) day written notice to CITY, calling attention to such default, CITY fails to correct the same or commence to correct the same and prosecute such correction to completion, and in such event TEAM shall have the right to exercise any and all legal remedies available to TEAM, including the right to specific performance and injunctive relief. The remedies described in this Section 18.4 do not apply if the event of default by CITY falls under the terms described in Section 18.5.

18.5 **CITY Failure to Deliver Stadium**. The Parties agree that if CITY fails to deliver the Stadium by the times described herein this Section 18.5, it will be impracticable or extremely difficult to determine the damages suffered by the TEAM. It is therefore agreed that in the event CITY fails to deliver the Stadium as required by the Agreement, (i) by the Outside License Commencement Date, CITY shall pay TEAM liquidated damages in the amount of Twenty Thousand Dollars ($20,000) per day for each day past the License Commencement Date that the Stadium is delayed, up to a maximum of Two and a Half Million Dollars ($2,500,000) for the 2026 season; and (ii) by March 1, 2027, CITY shall pay additional liquidated damages in the sum of $10 million and the TEAM shall have the election to terminate the Agreement (collectively, the "**Stadium Liquidated Damages**"). Each Party acknowledges the Stadium Liquidated Damages amount is not a penalty and is a reasonable estimation of the actual damages TEAM would suffer upon the CITY'S inability to deliver the Stadium by the Outside License Commencement Date or March 1, 2027, as the case may be, based upon the inherent uncertainty and difficulty in calculating and quantifying damages caused by the CITY'S failure.

18.6 **TEAM'S Failure to Occupy and Use the Stadium in Compliance with the Agreement**. From and after the License Commencement Date, if TEAM fails to occupy and use the Stadium in compliance with the Agreement, CITY shall have the remedies set forth in the Agreement for non-compliance and as described in Section 18.2 herein.

18.7 **Non-Relocation Requirement**. Except as set forth in Section 5.3.1, TEAM shall not relocate the Club during the Term. If the TEAM relocates in breach of the Non-Relocation Requirement, the Base Rent for the remaining Term shall be immediately due and payable by TEAM to CITY.

18.8 **Survival**. The provisions of this Article 18 shall survive the expiration or earlier termination of this Agreement.

ARTICLE 19
DISPUTE RESOLUTION

19.1 **Resolution by Mutual Agreement**. In the event any dispute, controversy or claim between or among the Parties arises under this Agreement or is connected with or related in any way to this Agreement or any right, duty or obligation arising here from or the relationship of the Parties hereunder (a "**Dispute or Controversy**"), including, but not limited to, a Dispute or Controversy relating to the effectiveness, validity, interpretation, implementation, termination, cancellation or enforcement of this Agreement, the Parties shall first attempt in good faith to settle and resolve such Dispute or Controversy by mutual agreement in accordance with the terms of this Section 19. In the event a Dispute or Controversy arises, either Party shall have the right to notify the other that it has elected to implement the procedures set forth in this Article 19. Within fifteen

(15) days after delivery of any such notice by one Party to the other regarding a Dispute or Controversy, the CITY Representative and TEAM Representative shall meet at a mutually agreed time and place to attempt, with diligence and good faith, to resolve and settle such Dispute or Controversy. Should a mutual resolution and settlement not be obtained at the meeting of the CITY Representative and TEAM Representative for such purpose or should no such meeting take place within such fifteen (15) day period, then either Party may by notice to the other Party submit the Dispute or Controversy to confidential non-binding mediation in accordance with the terms of this Article 19 without regard to the justiciable character or executory nature of such Dispute or Controversy.

19.2 **Non-Binding Mediation**. The Parties agree to cooperate in good faith with respect to their respective rights and obligations under this Agreement and further agree that if they cannot resolve any dispute or claim between themselves, after attempting to resolve a Dispute or Controversy utilizing the procedures in Section 19.1 above and before resorting to judicial remedy, they will in good faith attempt to resolve any such dispute or claim through non-binding mediation. All expenses of the mediation shall be borne by the parties equally; however, each party shall bear the expense of its own counsel, experts, witnesses, and preparation and presentation of proofs. If either party commences litigation without first attempting to settle the Dispute or Controversy through good faith mediation, such party shall not be entitled to reasonable attorneys' fees and costs in connection with this Agreement, even where it may be so entitled by law or contract as the prevailing party. In the event that the Parties are still unable to resolve the Dispute or Controversy, then the Parties may pursue all remedies available to the Party at law or in equity (except in the instance where Stadium Liquidated Damages apply as further described in Section 18.5).

ARTICLE 20
REPRESENTATIONS AND WARRANTIES

20.1 **Power and Authority**. Each individual executing and delivering this Agreement on behalf of a Party hereto hereby represents to the other Party hereto that such individual has all requisite power and authority to execute and deliver the same and to bind such Party hereunder.

20.2 **CITY'S Representations**. As an inducement to TEAM to enter into this Agreement, CITY hereby represents and warrants to TEAM that CITY is a duly created and in good standing a California municipal corporation and general law city with all the necessary power and authority to carry on its present operations, to enter into this Agreement and to consummate the transactions herein contemplated.

20.3 **TEAM'S Representations**. As an inducement to CITY to enter into this Agreement, TEAM hereby represents and warrants to CITY, as follows:

20.3.1 TEAM is a limited liability company duly formed, validly existing and in good standing under the laws of the State of Washington, with all necessary corporate power and authority to carry on its present business, to enter into this Agreement and to consummate the transactions herein contemplated.

20.3.2 Neither the execution and delivery of this Agreement by TEAM nor the

performance by TEAM of its obligations hereunder will (i) violate any statute, regulation, rule, judgment, order, decree, stipulation, injunction, charge, or other restriction of any Governmental Authority, or court to which TEAM is subject or any provision of the charter or bylaws of TEAM, or (ii) result in a breach of, constitute a default under, result in the acceleration of, create in any party the right to accelerate, terminate, modify, or cancel, or require any notice under any contract, lease, sublease, license, sublicense, franchise, permit, indenture, agreement or mortgage for borrowed money, instrument of indebtedness, security interest, or other agreement to which TEAM is a party or by which TEAM or its assets are bound.

20.3.3 All proceedings required to be taken by or on behalf of TEAM to authorize TEAM to execute and deliver this Agreement and to perform the covenants, obligations and agreements of TEAM hereunder have been duly taken. No consent to the execution and delivery of this Agreement by TEAM or the performance by TEAM of its covenants, obligations, and agreements hereunder is required from any partner, board of directors, shareholder, creditor, investor, judicial, legislative or administrative body, Governmental Authority or other Person, other than any such consent which already has been unconditionally given.

20.3.4 This Agreement constitutes the valid and legally binding obligation of TEAM, enforceable in accordance with its terms and conditions, except as such enforcement may be limited by bankruptcy, insolvency, reorganization, moratorium or other similar law presently or hereafter in effect, affecting the enforcement of creditors' rights generally and by general principles of equity whether applied in a proceeding at law or in equity.

20.3.5 To the best knowledge of TEAM, there is no action, suit, claim, proceeding or investigation pending or currently threatened against TEAM that questions the validity of this Agreement or the transactions contemplated herein or that could either individually or in the aggregate have a material adverse effect on the assets, conditions, affairs, or prospects of TEAM, financially or otherwise.

ARTICLE 21
HAZARDOUS MATERIALS

21.1 **Compliance with Hazardous Materials Laws**. The Parties at all times and in all respects shall comply with all federal, state and local laws, ordinances and regulations ("**Hazardous Materials Laws**") relating to industrial hygiene, environmental protection or the use, generation, manufacture, storage, disposal or transportation of any hazardous, toxic, contaminated or polluting materials, substances or wastes, including, without limitation, oil or other petroleum products, flammable explosives, asbestos, or any "hazardous substances," "hazardous wastes," "hazardous materials" or "toxic substances" regulated under any Hazardous Material Law (collectively, "**Hazardous Materials**"). TEAM at its own expense shall procure, maintain in effect and comply with all conditions of any and all permits, licenses and other governmental and regulatory approvals required for TEAM'S use of the Premises. In all respects, each Party shall handle, treat, deal with, manage and dispose of any and all Hazardous Materials in total conformity with all applicable Hazardous Materials Laws and prudent industry practices. Upon expiration or earlier termination of the term of the Agreement, TEAM shall cause all Hazardous Materials that are introduced to the Premises by TEAM to be removed from the Premises and transported for use, storage or disposal in accordance and compliance with all

applicable Hazardous Materials Laws. If TEAM fails to do so, CITY may remove such Hazardous Materials at TEAM'S expense.

21.2 **Adequate Insurance**. If at any time it reasonably appears to CITY that TEAM is not maintaining sufficient insurance or other means of financial capacity to enable TEAM to fulfill its obligations to CITY in connection with this Article 21, whether or not then accrued, liquidated, conditional or contingent, TEAM shall procure and thereafter maintain in full force and effect such insurance or other form of financial assurance, with or from companies or persons and in forms reasonably acceptable to CITY, as CITY may from time to time reasonably request.

ARTICLE 22
DELAY, APPROVALS AND CONSENTS

22.1 **Delays.**

22.1.1 **Force Majeure**. Any act of the CITY or TEAM required by this Agreement to be done within a specified time shall be subject to Force Majeure Event. If the performance of any act required by this Agreement to be performed by either TEAM or CITY is prevented or delayed by reason of or due to any act of God, fire, flood, hurricane, tornado, earthquake, the elements of nature (including rain), casualties, inability to secure materials, pandemic, state or federal restrictive governmental actions or regulations, shortages of materials or supplies, or any other cause similar to the foregoing, (except financial inability) not the fault of the Party required to perform the act, or beyond the reasonable control of CITY or TEAM which affects the performance of CITY or TEAM under this Agreement, then the time for performance of the act will be extended for a period equivalent to the period of delay and performance of the act during the period of delay will be excused.

22.1.2 **TEAM Delays**. In the event that TEAM'S actions or inactions cause a delay in the ability for CITY to timely perform its obligations pertaining to the design, construction and delivery of the Stadium to the TEAM, CITY shall not be deemed as in default under the Agreement, then the time for performance of the act and the Outside License Commencement Date will be extended for a period equivalent to the period of delay and performance of the act during the period of delay will be excused.

22.2 **Approvals and Consents**. In this Agreement whenever the approval or consent of one party is required to an act of the other party, such consent shall not be unreasonably withheld, conditioned or delayed. No consent shall constitute acknowledgement that no default exists under this Agreement, or be deemed a waiver of any default then existing.

ARTICLE 23
MISCELLANEOUS PROVISIONS

23.1 **Covenants Running with the Estates in Land**. The Parties covenant and agree that all of the conditions, covenants, restrictions, exclusives, agreements, rights, privileges, obligations, duties, specifications, and recitals contained in this Agreement, except as otherwise expressly stated therein, shall be construed as covenants running with title to the Premises and any interests thereunder, respectively, which shall extend to, inure to the benefit of and bind, CITY and TEAM, and their permitted successors and assigns, to the same extent as if such successors

and assigns were named as original Parties to this Agreement, such that this Agreement shall, at all times after the Agreement Effective Date hereof, bind the owner and holder of any fee or interest in or to the Premises, or any portion thereof, and shall bind predecessors thereof, except as otherwise expressly provided therein.

23.2 **Relationship of the Parties.** The relationship of TEAM and CITY under this Agreement shall be that of independent parties, each acting in its own best interests, and notwithstanding anything in the Agreement to the contrary, no partnership or joint venture shall be established or intended thereby between TEAM and CITY.

23.3 **Notices**. Unless otherwise specified by statute, any and all notices which are required under the terms and conditions of this Agreement or which either CITY or TEAM desire to serve upon the other, shall be in writing and shall be deemed served when delivered personally, or when deposited in the United States mail or by private courier service, postage prepaid, return receipt requested, addressed as follows:

Any notice so given shall be considered served on the other party (i) on the date of personal delivery, (ii) three (3) days after deposit in the U.S. mail, first class postage prepaid, return receipt requested, and addressed to the party at its applicable address, and (iii) on the date of receipt by the other party in the case of delivery by private courier service. Actual notice shall be deemed adequate notice on the date actual notice occurred regardless of the method of service.

23.4 **Non-Merger of Estates**. The interests of CITY and TEAM in the Premises shall at all times be separate and apart, and shall in no event be merged, notwithstanding the fact that this Agreement or any interest herein, may be held directly or indirectly by or for the account of the same person who shall own the fee title to the Premises or any portion thereof; and no such merger of estates shall occur by operation of law, or otherwise, unless and until all persons at the

time having any interest in the Premises, shall join in the execution of a written instrument effecting such merger of estates.

23.5 **Survival**. Except as may be expressly set forth in this Agreement to the contrary, if CITY or TEAM elects to exercise any right to terminate this Agreement set forth therein, this Agreement shall, on the effective date of such termination, terminate with respect to all future rights and obligations of performance thereunder by the Parties (except for the rights and obligations therein that expressly are to survive such termination thereof). Termination of this Agreement shall not alter the then existing claims, if any, of either Party for breaches of this Agreement occurring prior to such termination and the obligations of the Parties with respect thereto shall survive termination.

23.6 **No Waiver**. No failure or delay of any Party, in any one or more instances, (a) in exercising any power, right or remedy under this Agreement or (b) in insisting upon strict performance by the other Party of such other Party's covenants, obligations or agreements under this Agreement, shall operate as a waiver, discharge or invalidation, thereof, nor shall any single or partial exercise of any such right, power or remedy or insistence on strict performance, or any abandonment or discontinuance of steps to enforce such a right, power or remedy or to enforce strict performance, preclude any other or future exercise thereof or insistence thereupon or the exercise of any other right, power or remedy. The covenants, obligations, and agreements of a defaulting Party and the rights and remedies of the other Party upon a default shall continue and remain in full force and effect with respect to any subsequent breach, act or omission.

23.7 **Severability**. If any term or provision of this Agreement, or the application thereof to any Person or circumstances, shall to any extent be invalid or unenforceable in any jurisdiction, as to such jurisdiction, the remainder of this Agreement, or the application of such term or provision to the Persons or circumstances other than those as to which such term or provision is held invalid or unenforceable in such jurisdiction, shall not be affected thereby, and each term and provision of this Agreement shall be valid and enforceable to the fullest extent permitted by Applicable Laws and any such invalidity or unenforceability in any jurisdiction shall not invalidate or render unenforceable such provision in any other jurisdiction.

23.8 **Attorneys' Fees**. If either party named herein shall bring an action or proceeding to enforce the terms hereof or declare rights hereunder, the prevailing party in any such action or proceeding, on trial or appeal, shall be entitled to its reasonable attorneys' fees and actual costs to be paid by the non-prevailing party.

23.9 **No Broker's Fees or Commissions**. Each Party hereby represents to the other Party that such Party has not created any liability for any broker's fee, broker's or agent's commission, finder's fee or other fee or commission in connection with this Agreement.

23.10 **Governing Law and Choice of Venue**. The Parties acknowledge and agree that this Agreement was negotiated, entered into and is to be fully performed in the City of Ontario, California. This Agreement and the actions of the Parties hereunder shall in all respects be governed by, interpreted under, and construed and enforced in accordance with, the laws of the State of California (excluding principles of conflict of laws). The Parties further agree that any judicial action brought by either Party to enforce or interpret this Agreement shall be initiated in a

state or federal court in the County of San Bernardino.

23.11 **Counterparts**. This Agreement may be executed by the Parties in separate counterparts, each of which when so executed and delivered shall be an original, but all such counterparts shall together constitute one and the same Agreement. All signatures need not be on the same counterpart.

23.12 **Incorporation of Exhibits; Recitals**. All Exhibits attached to this Agreement shall be incorporated herein by reference in their entirety and made a part hereof for all purposes. By this reference, the recitals of this Agreement are incorporated into this Agreement as binding agreements of the Parties, the terms and conditions of which are made a part hereof for all purposes.

23.13 **Table of Contents; Headings**. The table of contents, if any, and headings, if any, of the various articles, sections and other subdivisions of this Agreement shall be for convenience of reference only and shall not modify, define or limit any of the terms or provisions hereof.

23.14 **Interpretation; Rules of Construction**. Headings at the beginning of each section and sub-section of this Agreement are solely for the convenience of reference of CITY and TEAM and are not a part of this Agreement. Whenever required by the context of this Agreement, the singular shall include the plural and the masculine shall include the feminine and vice versa. This Agreement shall not be construed as if it had been prepared by one or the other of CITY or TEAM, but rather as if both CITY and TEAM prepared this Agreement. If the date on which CITY or TEAM is required to take any action pursuant to the terms of this Agreement is not a business day of CITY, the action shall be taken on the next succeeding business day of CITY.

23.15 **Entire Agreement; Amendment**. This Agreement, along with any exhibits and attachments attached hereto and incorporated herein by reference, constitute the entire agreement between CITY and TEAM relative to the Premises, hereby supersede any and all prior oral or written agreements or understandings, and may only be modified by a writing signed by both Parties. This Agreement constitutes the entire agreement between the CITY and the TEAM and may not be amended or modified except (i) by an instrument in writing signed by the parties with the same formality as this Agreement and (ii) upon the prior receipt of all necessary PDL Approvals.

23.16 **Non-Discrimination**. TEAM will not discriminate against any employee or applicant for employment because of race, color, religion, creed, national origin, ancestry, disability, actual and perceived, medical condition, age, marital status, sex, sexual orientation, Acquired Immune Deficiency Syndrome (AIDS), actual or perceived, or retaliation for having filed a discrimination complaint ("**Nondiscrimination Factors**"). TEAM will take affirmative steps to ensure that its employees are treated without regard to the Nondiscrimination Factors during employment, including, but not limited to, activities of: upgrading, demotion or transfer; layoff or termination; or rates of pay or other forms of compensation.

23.17 **PDL Required Provisions**.

23.17.1 This Agreement and any rights granted to CITY or TEAM hereunder shall in all respects be subordinate to the PDL Rules and Regulations, as long as TEAM is party

to the Ontario PDL License Agreement that is in effect. The issuance, entering into, amendment or implementation of any of the PDL Rules and Regulations shall be at no cost or liability to any MLB PDL Entity or to any individual or entity related thereto. The territory within which CITY is granted rights under this Agreement is limited to, and nothing herein shall be construed as conferring on CITY rights in areas outside of, the PDL Club Marketing Territory (as defined in the Ontario PDL License Agreement). No rights, exclusivities or obligations involving the Internet or any interactive or on-line media (as defined in the applicable PDL Rules and Regulations) are conferred by this Agreement, except as are specifically approved in writing by MLB PDL.

23.17.2 CITY agrees that if the date upon which any termination or suspension of this Agreement falls during the Baseball Season or postseason, the effective date of such termination or suspension shall be the first day of the month following the final home game of such season, and, in no event, shall CITY terminate or suspend TEAM'S rights under this Agreement during any Baseball Season or postseason.

23.17.3 If, at any time prior to the expiration of the Term of this Agreement, this Agreement is terminated by CITY for any reason (and any legal action challenging the right of CITY to terminate this Agreement and seeking specific performance has either been (i) finally adjudicated by a court of competent jurisdiction as evidenced by a final non-appealable order or (ii) settled, withdrawn or otherwise concluded, in either case solely with respect to the request for specific performance) and the Ontario PDL License Agreement has been terminated, CITY agrees to consider entering into an agreement with substantially similar terms to this Agreement with any replacement PDL Club identified by MLB PDL to the extent that such PDL Club is reasonably acceptable to CITY, subject to approval by the City Council for the CITY. To the extent that such agreement is not entered into, CITY agrees to meet promptly with MLB PDL to work together to ascertain whether a replacement PDL Club can be identified, and if such a PDL Club is so identified, CITY shall offer to license the Stadium to such PDL Club. For the avoidance of doubt, this Section 23.17.3 shall survive the termination of this Agreement.

23.17.4 As long as TEAM is party to the Ontario PDL License Agreement that is in effect, MLB PDL is an intended third party beneficiary of the provisions of this Section 23.17 and each other provision in this Agreement that prohibits action without first obtaining PDL Approval and, in addition to its right to waive or enforce the provisions of this Section 23.17, MLB PDL shall be entitled and have the right to waive or enforce such other provisions that prohibit action without first obtaining PDL Approval directly against any party hereto (or their successors and permitted assigns) to the extent that any such other provision is for the explicit benefit of MLB PDL or any other MLB PDL Entity.

23.17.5 Neither MLB PDL nor any other MLB PDL Entity shall have any liability whatsoever to any Person for actions taken pursuant to this Section 23.17 (other than for fraudulent acts or willful misconduct with respect to this Section 23.17 by MLB PDL), and CITY hereby releases MLB PDL and each other MLB PDL Entity from any and all claims arising out of or in connection with any such actions. Nothing contained in this Agreement shall create any duty on behalf of MLB PDL or any other MLB PDL Entity to any other Person.

CITY OF ONTARIO *Agenda Report* **August 20, 2024**	**SECTION:** **CONSENT CALENDAR**
Department: Police Department Prepared By: Nicole Alvarez Department: Prepared By: Nicole Alvarez Staff Member Presenting: Mike Lorenz, Chief of Police Approved By:	Submitted To: Council/OHA Approved: _____ Continued To: _____ Denied: _____ Item No: 10

SUBJECT: ACCEPTANCE OF GRANT FROM THE CALIFORNIA OFFICE OF TRAFFIC SAFETY (OTS) FY24/25 SELECTIVE TRAFFIC ENFORCEMENT PROGRAM (STEP) GRANT

RECOMMENDATION: That City Council authorize the City Manager or his designee to execute all documents necessary to accept a 12-month grant in the amount of $705,000 from the California Office of Traffic Safety (OTS) for participation in the FY24/25 Selective Traffic Enforcement Program (STEP) Grant.

THE FOLLOWING COUNCIL GOALS ARE BEING ACHIEVED:
Maintain the Current High Level of Public Safety
Pursue City's Goals and Objectives by Working with Other Governmental Agencies

FISCAL IMPACT: Grant awards were announced in July 2024 and the funds will be used to cover eligible costs incurred from October 1, 2024 to September 30, 2025. These grants are reimbursable every quarter and fund police overtime, education, equipment, supplies, and training to conduct DUI saturation patrols, special traffic enforcement, field enforcement, street racing enforcement and training, education, and sobriety checkpoints. The department is approved for $705,000 in grant funding and the City is not required to provide matching funds for the grants. The associated revenues and appropriations for the approved grant amount will be included in a subsequent quarterly budget report to the City Council.

BACKGROUND & ANALYSIS: The California Office of Traffic Safety (OTS), through the National Highway Traffic Safety Administration (NHTSA), offers local law enforcement agencies overtime grants to mitigate traffic safety program deficiencies, expand ongoing activities, develop new programs, and conduct sobriety checkpoints. The grant period includes two "National Impaired Driving Campaign" mobilization periods: the Winter Mobilization which occurs around Christmas and New Year's Eve and Summer Mobilization which occurs around Labor Day. Sobriety checkpoints, DUI saturation patrols and special traffic enforcement will be scheduled during each of the highly publicized mobilization periods. Additional operations will continue to be conducted outside the mobilization periods. Each overtime operation and checkpoint will be conducted according to each operation's specific needs, which may require supervisors, officers, technicians,

and/or clerical/other staff members. The goal of the OTS grant program includes: (1) reducing the number of people killed in alcohol-involved crashes through the combined efforts of local law enforcement agencies, California Highway Patrol, and OTS; (2) reducing the total number of traffic collisions that occur within the City; (3) through press releases, inform citizens of increased enforcement and educate drivers that the only way to “avoid” arrest, injury, and/or death is to drive sober; and (4) network with regional law enforcement agencies to conduct multiple joint operations to decrease alcohol related issues such as DUI’s and underage drinking.

Nicole Alvarez

To: Nicole Alvarez
Subject: OTS Tentatively Approved Your Application 25-005699

Follow Up Flag: Follow up
Flag Status: Flagged

Congratulations! Through a competitive process, the Office of Traffic Safety (OTS) has tentatively approved your application 25-005699 in the amount of $705,000 with the proposal titled "Selective Traffic Enforcement Program (STEP)." This tentative award is contingent on approval from the National Highway Traffic Safety Administration. Please do not publicly announce this tentative award until the grant agreement is fully negotiated and signed by the OTS.

Your OTS Coordinator will contact you to discuss your proposal and explain the grant development process. It is our goal to have grants start the first of October. Costs incurred and accrued prior to the grant start date are not reimbursable. Please notify your coordinator if approval from a City Council or the Board of Supervisors is required. You should begin that process now to avoid a delay in executing your grant.

Thank you for prioritizing traffic safety so that everyone traveling on California roadways can go safely.

Again, congratulations on the success of your application.

Sincerely,
Barbara L. Rooney
Director

CITY OF ONTARIO *Agenda Report* **August 20, 2024**	**SECTION:** **CONSENT CALENDAR**
Department: Public Works Prepared By: Blaine M Ishii Staff Member Presenting: Tito Haes, Executive Director Public Works Reviewed By: Andrea Ampig, Bonnie Tam Approved By:	Submitted To: Council/OHA Approved: _____ Continued To: _____ Denied: _____ Item No: 11

SUBJECT: **AN AMENDMENT TO THE PROFESSIONAL SERVICES AGREEMENT WITH ROUTEWARE, INC. FOR RECURRING SUBSCRIPTION AND LICENSE COSTS FOR INTEGRATED WASTE COLLECTION ROUTING SOFTWARE**

RECOMMENDATION: That the City Council authorize the City Manager or his designee to execute Amendment No. 2 to the Professional Services Agreement with Routeware, Inc., of Portland, Oregon, for recurring costs for subscriptions, licenses, and ongoing technical support for Integrated Waste Collection Routing Software, exercising the two (2) additional one-year terms and increasing the contract amount by $536,190 for a total contract amount not-to-exceed $1,657,182 over the five-year term.

THE FOLLOWING COUNCIL GOALS ARE BEING ACHIEVED:
Operate in a Businesslike Manner

FISCAL IMPACT: Amendment No. 2 to the Professional Services Agreement with Routeware, Inc. (Routeware) is in the amount of $243,723 per year plus a 10% contingency of $24,372 per year for a total not-to-exceed contract amount of $1,657,182 over the five-year term. The Fiscal Year 2024-25 Adopted Budget includes partial appropriations in the Integrated Waste Fund for the Professional Services Agreement with Routeware, Inc. If approved, additional appropriations will be included in future quarterly budget updates to the City Council for approval.

BACKGROUND & ANALYSIS: On October 19, 2021, the City Council approved a one-year Professional Services Agreement with Routeware for routing optimization and service confirmation software. Amendment No. 1 was executed on August 15, 2023 to amend the project scope to include additional video software. With the continuous growth in the Ontario Ranch area and new development in the existing Old Model Colony, there was a need to optimize routing efficiency and streamline periodic adjustments to refuse, organics, and recycling routes. Daily route optimization increases collection productivity and saves on fuel and vehicle maintenance costs.

The proposed Amendment with Routeware will allow the Integrated Waste Department to continue utilizing the previously approved services and will add additional services for camera installation and integration to the City's existing customer service system. The software and cameras installed

on collection vehicles will work together to aide in service confirmation, incident investigations and improve routing and service efficiency.

AMENDMENT NO. 2 TO THE PROFESSIONAL SERVICES AGREEMENT BETWEEN THE CITY OF ONTARIO AND ROUTEWARE, INC.

1. Parties and Date.

This Amendment No. 2 to the Agreement (as defined herein) is made and entered as of _____, by and between the City of Ontario ("City") and Routeware, Inc., a Corporation ("Consultant"). City and Consultant are sometimes individually referred to as "Party" and collectively as "Parties."

2. Recitals.

2.1 Agreement. The City and Consultant have entered into an agreement entitled "PROFESSIONAL SERVICES AGREEMENT" dated October 19, 2021 ("Agreement").

2.2 Amendment Purpose. The City and Consultant desire to amend the Agreement to extend the contract term, revise the scope of work, and increase the contract amount by **$487,446 (Four Hundred Eighty-Seven Thousand Four Hundred Forty-Six Dollars)**. The Parties have heretofore entered into that Amendment No. 1 dated August 15, 2023.

2.3 Amendment Authority. This Amendment No. 2 is authorized pursuant to Section 3.7.15 of the Agreement.

3. Terms.

3.1 Amendment. Section 3.1.2 and 3.2.1 of the Agreement is hereby amended in its entirety to read as follows:

"3.1.2 Term. The term of this Agreement shall be from November 1, 2021 to October 31, 2026, unless earlier terminated as provided herein. Consultant shall complete the Services within the term of this Agreement, and shall meet any other established schedules and deadlines. The Parties may, by mutual, written consent, extend the term of this Agreement if necessary to complete the Service."

"3.2.1 Compensation. Consultant shall receive compensation, including authorized reimbursements, for all Services rendered under this Agreement at the rates set forth in Exhibits "C," "C-2," and "C-3," attached hereto and incorporated herein by reference. The total compensation shall not exceed **$1,608,438 (One Million Six Hundred Eight Thousand Four Hundred Thirty-Eight Dollars)** without written approval of the City Council or City Manager, as applicable. Extra Work may be

authorized, as described below, and if authorized, will be compensated at the rates and manner set forth in this Agreement."

Exhibits C, C-2, and C-3 are hereby deleted in its entirety and replaced with Attachment A attached hereto and incorporated herein by reference.

3.2 Continuing Effect of Agreement. Except as amended by this Amendment No. 2, all other provisions of the Agreement remain in full force and effect and shall govern the actions of the parties under this Amendment No. 2. From and after the date of this Amendment No. 2, whenever the term "Agreement" appears in the Agreement, it shall mean the Agreement as amended by this Amendment No. 2.

3.3 Adequate Consideration. The Parties hereto irrevocably stipulate and agree that they have each received adequate and independent consideration for the performance of the obligations they have undertaken pursuant to this Amendment No. 2.

3.4 Severability. If any portion of this Amendment No. 2 is declared invalid, illegal, or otherwise unenforceable by a court of competent jurisdiction, the remaining provisions shall continue in full force and effect.

3.5 Integration. This Amendment represents the entirety of the Parties' understanding relating to the subject of this Amendment, including written or verbal communications between the Parties, which shall have no relevance unless expressly incorporated herein. This is an integrated amendment.

SUBJECT: **AMENDMENTS TO THE PROFESSIONAL SERVICES AGREEMENTS WITH GO2ZERO STRATEGIES, LLC AND GHD, INC. FOR ON-CALL SOLID WASTE CONSULTING SERVICES**

RECOMMENDATION: That the City Council take the following actions:

A. Authorize the City Manager or his designee to execute Amendment No. 2 to the Professional Services Agreement with Go2Zero Strategies, LLC, of Irwindale, California, for on-call Solid Waste Consulting Services exercising the two (2) additional one-year extensions and increasing the contract amount by $100,000 per year for a total not-to-exceed contract amount of $500,000 over the five-year term; and
B. Authorize the City Manager or his designee to execute Amendment No. 1 to the Professional Services Agreement with GHD, Inc., of Irvine, California, for on-call Solid Waste Consulting Services exercising the two (2) additional one-year extensions and increasing the contract amount by $100,000 per year for a total not-to-exceed contract amount of $300,000 over the five-year term.

THE FOLLOWING COUNCIL GOALS ARE BEING ACHIEVED:
Operate in a Businesslike Manner
Focus Resources in Ontario's Commercial and Residential Neighborhoods

FISCAL IMPACT: The Fiscal Year 2024-25 Adopted Budget includes appropriations in the Integrated Waste Fund for on-call Solid Waste Consulting Services. The recommended Amendment No. 2 to the Professional Services Agreement with Go2Zero Strategies, LLC increases the authorized contract amount by $100,000 for Fiscal Year 2024-25 for a total not-to-exceed contract amount of $400,000. The second additional option year will increase the contract amount by $100,000 for Fiscal Year 2025-26 for a total not-to-exceed contract amount of $500,000.

The recommended Amendment No. 1 to the Professional Services Agreement with GHD, Inc. increases the authorized contract amount by $100,000 for Fiscal Year 2024-25 for a total not-to-exceed contract amount of $200,000. The second additional option year will increase the contract

amount by $100,000 for Fiscal Year 2025-26 for a total not-to-exceed contract amount of $300,000.

BACKGROUND & ANALYSIS: California Senate Bill (SB) 1383 was signed into law in September 2016. The law requires communities to reduce organic waste disposal in landfills, such as food waste, by 75% by January 1, 2025. On January 1, 2022, the SB 1383 regulations to meet the organic waste reduction and edible food recovery targets took effect, including penalties for non-compliance issued by the State. Go2Zero provides a SMART tracking system for SB1383 which entails optimization of all data collection, contamination documentation, analytics, recordkeeping, and reporting functions for SB1383 compliance. They also provide additional guidance on State mandates created by CalRecycle such as procurement targets, capacity planning, edible food recovery, and compliance reviews.

The City collects all waste materials generated citywide, serving the commercial sector, industrial sector, and approximately 30,000 single-family homes. GHD, Inc. will provide consulting services for the City's collection, hauling, processing, and disposal of solid waste, recyclables, organics, and other materials which can be diverted from landfills. The consultant will also conduct activities related to transfer station design and build oversight.

AMENDMENT NO. 2 TO THE PROFESSIONAL SERVICES AGREEMENT BETWEEN THE CITY OF ONTARIO AND GO2ZERO STRATEGIES

1. Parties and Date.

This Amendment No. 2 to the Agreement (as defined herein) is made and entered as of this _____, by and between the City of Ontario ("City") and Go2Zero Strategies, an LLC, Limited Liability Company ("Consultant"). City and Consultants are sometimes individually referred to as "Party" and collectively as "Parties."

2. Recitals.

2.1 Agreement. The City and Consultant have entered into an agreement entitled "Professional Service Agreement" dated December 13, 2021 ("Agreement").

2.2 Amendment Purpose. The City and Consultant desire to amend the Agreement to exercise the first additional one-year term and increase total compensation by One Hundred Thousand Dollars ($100,000) for a total compensation of Four Hundred Thousand Dollars ($400,000).

2.3 Amendment Authority. This Amendment No. 2 is authorized pursuant to Section 3.7.14 of the Agreement.

3. Terms.

3.1 Amendment. Section 3.2.1 of the Agreement is hereby amended in its entirety to read as follows:

"3.1.2 Term. The term of this Agreement shall be from November 16, 2021 to November 15, 2025, unless earlier terminated as provided herein. The City shall have the unilateral option, at its sole discretion, to renew this Agreement automatically for no more than one (1) additional one-year term. Consultant shall complete the Services within the term of this Agreement, and shall meet any other established schedules and deadlines. The Parties may, by mutual, written consent, extend the term of this Agreement if necessary to complete the Services."

"3.2.1 Compensation. Consultant shall receive compensation, including authorized reimbursement, for all Services rendered under this Agreement at the rates set forth in Exhibit "C"

attached hereto and incorporated herein by reference. The total compensation shall not exceed Four Hundred Thousand Dollars ($400,000) without written approval of the City Council or City Manager, as applicable. Extra Work may be authorized, as described below, and if authorized, will be compensated at the rate and manner set forth in this agreement."

3.2 Continuing Effect of Agreement. Except as amended by this Amendment No. 2, all other provisions of the Agreement remain in full force and effect and shall govern the actions of the parties under this Amendment No. 2. From and after the date of this Amendment No. 2, whenever the term "Agreement" appears in the Agreement, it shall mean the Agreement as amended by this Amendment No. 2.

3.3 Adequate Consideration. The Parties hereto irrevocably stipulate and agree that they have each received adequate and independent consideration for the performance of the obligations they have undertaken pursuant to this Amendment No. 2.

3.4 Severability. If any portion of this Amendment No. 2 is declared invalid, illegal, or otherwise unenforceable by a court of competent jurisdiction, the remaining provisions shall continue in full force and effect.

3.5 Integration. This Amendment represents the entirety of the Parties' understanding relating to the subject of this Amendment, including written or verbal communications between the Parties, which shall have no relevance unless expressly incorporated herein. This is an integrated amendment.

AMENDMENT NO. 1 TO THE PROFESSIONAL SERVICES AGREEMENT BETWEEN THE CITY OF ONTARIO AND GHD, INC.

1. Parties and Date.

This Amendment No. 1 to the Agreement (as defined herein) is made and entered as of _____, by and between the City of Ontario ("City") and GHD Inc., a Corporation ("Consultant"). City and Consultants are sometimes individually referred to as "Party" and collectively as "Parties."

2. Recitals.

2.1 Agreement. The City and Consultant have entered into an agreement entitled "Professional Service Agreement" dated December 10, 2021 ("Agreement").

2.2 Amendment Purpose. The City and Consultant desire to amend the Agreement to exercise the first additional one-year term and increase total compensation by One Hundred Thousand Dollars ($100,000) for a total compensation not-to-exceed Two Hundred Thousand Dollars ($200,000).

2.3 Amendment Authority. This Amendment No. 1 is authorized pursuant to Section 3.7.14 of the Agreement.

3. Terms.

3.1 Amendment. Section 3.2.1 of the Agreement is hereby amended in its entirety to read as follows:

"3.1.2 Term. The term of this Agreement shall be from November 16, 2021 to November 15, 2025, unless earlier terminated as provided herein. The City shall have the unilateral option, at its sole discretion, to renew this Agreement automatically for no more than one (1) additional one-year term. Consultant shall complete the Services within the term of this Agreement, and shall meet any other established schedules and deadlines. The Parties may, by mutual, written consent, extend the term of this Agreement if necessary to complete the Services."

"3.2.1 Compensation. Consultant shall receive compensation, including authorized reimbursement, for all Services rendered under this Agreement at the rates set forth in Exhibit "C" attached hereto and incorporated herein by reference. The total compensation shall not exceed Two Hundred Thousand Dollars ($200,000) without written approval of the City Council or City Manager, as applicable. Extra Work may be authorized, as described below, and if authorized, will be compensated at the rate and manner set forth in this agreement."

3.2 Continuing Effect of Agreement. Except as amended by this Amendment No. 1, all other provisions of the Agreement remain in full force and effect and shall govern the actions of the parties under this Amendment No. 1. From and after the date of this Amendment No. 1, whenever the term "Agreement" appears in the Agreement, it shall mean the Agreement as amended by this Amendment No. 1.

3.3 Adequate Consideration. The Parties hereto irrevocably stipulate and agree that they have each received adequate and independent consideration for the performance of the obligations they have undertaken pursuant to this Amendment No. 1.

3.4 Severability. If any portion of this Amendment No. 1 is declared invalid, illegal, or otherwise unenforceable by a court of competent jurisdiction, the remaining provisions shall continue in full force and effect.

3.5 Integration. This Amendment represents the entirety of the Parties' understanding relating to the subject of this Amendment, including written or verbal communications between the Parties, which shall have no relevance unless expressly incorporated herein. This is an integrated amendment.

CITY OF ONTARIO *Agenda Report* **August 20, 2024**	**SECTION:** **CONSENT CALENDAR**
Department: Police Department Prepared By: Zina Hullings Department: Prepared By: Zina Hullings Staff Member Presenting: Mike Lorenz, Chief of Police Approved By:	Submitted To: Council/OHA Approved: _____ Continued To: _____ Denied: _____ Item No: 13

SUBJECT: **AN AMENDMENT TO THE GOODS AND SERVICES AGREEMENT WITH HELITENDER, INC. FOR SCHEDULED AND UNSCHEDULED REPAIRS, INSPECTION SERVICES, PARTS AND MAINTENANCE SERVICES**

RECOMMENDATION: That the City Council authorize the City Manager, or his designee, to execute Amendment No. 2 to the Goods and Services Agreement with Helitender, Inc. of Pacoima, CA, for scheduled and unscheduled repairs, inspection services, parts and maintenance services for Police Department helicopters in the amount of $150,000 for a total not-to-exceed contract amount of $800,000 and extend the agreement to June 30, 2027.

THE FOLLOWING COUNCIL GOALS ARE BEING ACHIEVED:
Maintain the Current High Level of Public Safety
Operate in a Businesslike Manner

FISCAL IMPACT: The recommended amendment increases the authorized contract amount of $650,000 by $150,000, for a new not-to-exceed total contract amount of $800,000 and extend the agreement to June 30, 2027. Appropriations are included in the Fiscal Year 2024-25 Adopted Operating Budget for scheduled and unscheduled repairs, inspection services, parts and maintenance services for helicopters.

BACKGROUND & ANALYSIS: The Police Department Air Support Unit maintains three (3) Airbus Helicopters for air patrol. To ensure the helicopters are safe to operate and readily available (to support police, fire and departmental services) maintenance and repairs are necessary on a regular basis and undue time delays affect the City's ability to provide services to the community. Due to specialized maintenance services and parts used on the helicopters, there is a limited number of authorized vendors that can provide these services. In many cases, there is a single authorized vendor that is qualified or authorized to provide the part or service.

On May 3, 2022, the City Council approved Helitender, Inc. as a sole source, pre-authorized vendor for scheduled and unscheduled helicopter repairs, inspection services, parts, and maintenance services. Establishing this pre-authorized list of vendor(s) facilitates the following:

- Ensure that the helicopters are serviced and repaired when needed;
- Service is performed by qualified vendors familiar with Airbus helicopters; and
- Better maintenance because vendors are familiar with the service and repair history of the helicopters.

AMENDMENT NO. 2

TO THE GOODS & SERVICES AGREEMENT

BETWEEN

THE CITY OF ONTARIO

AND

HELITENDER

1. Parties and Date.

This Amendment No. 2 to the Agreement (as defined herein) is made and entered into as of this __MM-DD-YYYY__, by and between the City of Ontario ("City") and **HELITENDER**, a corporation with its principal place of business at 10300 Airpark Way, Hangar 3, Pacoima, California 91331 ("Contractor"). City and Contractor are sometimes individually referred to as "Party" and collectively as "Parties."

2. Recitals.

2.1 Agreement. The City and Contractor have entered into an agreement entitled "Goods & Services Agreement" dated July 1, 2019 ("Agreement").

2.2 Amendment Purpose. The City and Contractor desire to amend the Agreement for the purpose of extending the services of Contractor from July 1, 2019 through June 30, 2027 to continue to provide scheduled and unscheduled helicopter maintenance, repairs and inspections and to increase the compensation amount by One Hundred Fifty Thousand Dollars ($150,000).

2.3 Amendment Authority. This Amendment No. 2 is authorized pursuant to Section 3.4 of the Agreement.

3. Terms.

3.1 Amendment. **Section 1.3** and **Section 2.2** of the Agreement is hereby amended in its entirety to read as follows:

1.3 "The term of this Agreement shall be from July 1, 2019 to June 30, 2027 unless earlier terminated as provided herein."

2.2 "The City of Ontario will accept an escalation in a not to exceed 5% in year one, and not to exceed 5% in year two and not exceed 5% in year three, with 30 days written notice. **Previous Exhibit A, B & C** is hereby deleted in its entirety and replaced with new **Exhibit A, B & C** (attached) hereto and incorporated herein by reference. Vendor shall receive compensation, including authorized reimbursements, for all Services rendered under this Agreement at the rates set forth in Exhibit "A", "B", and "C" attached hereto and incorporated herein by reference. The total compensation shall not exceed Eight Hundred Thousand Dollars ($800,000) without written approval of City's City Manager. Extra Work may be authorized, as described below, and if authorized, will be compensated at the rates and manner set forth in this Agreement.

3.2 Continuing Effect of Agreement. Except as amended by this Amendment No. 2, all other provisions of the Agreement remain in full force and effect and shall govern the actions of the parties under this Amendment No. 2. From and after the date of this Amendment No.2, whenever the term "Agreement" appears in the Agreement, it shall mean the Agreement as amended by this Amendment No. 2.

3.3 Adequate Consideration. The Parties hereto irrevocably stipulate and agree that they have each received adequate and independent consideration for the performance of the obligations they have undertaken pursuant to this Amendment No. 2.

3.4 Severability. If any portion of this Amendment No. 2 is declared invalid, illegal, or otherwise unenforceable by a court of competent jurisdiction, the remaining provisions shall continue in full force and effect.

3.5 Integration. This Amendment represents the entirety of the Parties' understanding relating to the subject of this Amendment, including written or verbal communications between the Parties, which shall have no relevance unless expressly incorporated herein. This is an integrated amendment.

EXHIBIT "A"

SCOPE OF SERVICES

Perform scheduled and unscheduled maintenance, repairs and inspections on Airbus AS350B3/H125 helicopters per the aircraft manufacturer's specifications and F.A.A. regulations including but not limited to:

100 - Hour Inspections

150 – Hour Inspections

300 - Hour Inspections

750 – Hour Inspections

1500- Hour Inspections

Engine inspections and maintenance

Track and balance main rotor assembly, tail rotor driveshaft

Airframe maintenance and inspections

Annual Inspections

Any repairs to the aircraft

Any maintenance is required to comply with Airworthiness Directives, mandatory service bulletins, service bulletins, and/or modifications as required by the aircraft manufacturer or the F.A.A.

EXHIBIT “B”

SCHEDULE OF SERVICES

The schedule and unscheduled of maintenance services will be determined by the type and scope of the aircraft maintenance or inspection to be performed. Any unscheduled maintenance will be scheduled at a mutually acceptable time with both the Contractor and the city. Those instances where the primary aircraft is not flyable, or "AOG" (aircraft on ground), the City will be given consideration in the priority of scheduling maintenance due to the loss of emergency services to the community.

The Contractor agrees to perform maintenance services at the Ontario Police Department Air Support Facility as necessary when the aircraft is not able to be flown to the Contractor's facility. Otherwise, maintenance services will be performed at the Contractor's facility.

CITY APPROVED PILOTS ARE THE ONLY PERSONNEL AUTHORIZED TO FLY CITY AIRCRAFT.

EXHIBIT "C"

COMPENSATION

Contractor will be paid $120.00 per hour or current shop rate, for labor and will support all invoices with appropriate hourly documentation.

The City will provide parts and materials to the Contractor. Otherwise, the Contractor at the expense of the City will provide parts and materials. The City reserves the right to provide any part or material through a City authorized vendor for the maintenance and/or repair of the City's helicopters.

CITY OF ONTARIO *Agenda Report* **August 20, 2024**	**SECTION:** **CONSENT CALENDAR**
Department: Public Works Prepared By: Adrian Escamilla Staff Member Presenting: Tito Haes, Executive Director Public Works Reviewed By: Andrea Ampig, Bonnie Tam Approved By:	Submitted To: Council/OHA Approved: _____ Continued To: _____ Denied: _____ Item No: 14

SUBJECT: **AN AMENDMENT TO THE PROFESSIONAL SERVICES AGREEMENT WITH TRANSTECH, INC. FOR CONSTRUCTION MANAGEMENT FOR THE VINEYARD PARKING STRUCTURE AT THE ONTARIO SPORTS COMPLEX**

RECOMMENDATION: That the City Council authorize the City Manager or his designee to execute Amendment No. 4 to the Professional Services Agreement with Transtech, Inc. (Transtech), of Chino, California, for on-call Construction Management Services for the Vineyard Parking Structure in the amount of $1,361,750 for a total not-to-exceed contract amount of $2,657,750.

THE FOLLOWING COUNCIL GOALS ARE BEING ACHIEVED:
Invest in the City's Infrastructure (Water, Streets, Sewers, Parks, Storm Drains and Public Facilities)

FISCAL IMPACT: The proposed Amendment No. 4 will increase the contract amount by $1,361,750 for a total not-to-exceed contract amount of $2,657,750. The total not-to-exceed contract amount includes on-call work performed for various citywide projects. Additional appropriations in the Capital Projects-Measure Q fund will be included in future quarterly budget updates to the City Council for approval for on-call Construction Management Services for the Vineyard Parking Structure.

BACKGROUND & ANALYSIS: On April 4, 2023, the City entered into the current Professional Services Agreement with Transtech for on-call Project Management Services after participating in a competitive RFP process. On January 16, 2024, Amendment No. 1 with Transtech was approved for the Proposed Minor League Baseball Stadium and Parking Structure Expedited Plan Check, Building Official, and Building Inspection Services. On March 5, 2024, Amendments No. 2 and No. 3 were approved for Project Management Services for the Concession Stand Remodel at Latimer field and to increase the total not-to-exceed contract amount for various on-call projects.

The proposed Vineyard Parking Structure will provide the necessary public parking for the Regional Sports Complex located in the Ontario Ranch Community. The sports fields will include approximately 13 multi-use fields, eight multi-use baseball/softball fields and open space. The proposed Amendment No. 4 to the Professional Services Agreement with Transtech includes the

preparation of the bridging documents and plans, construction management services and overall project coordination between the City and awarded General Contractor. If approved, Staff anticipates the Vineyard Parking Structure to be operational by June 2026.

AMENDMENT NO. 4 TO THE PROFESSIONAL SERVICES AGREEMENT BETWEEN THE CITY OF ONTARIO AND TRANSTECH ENGINEERS, INC.

1. Parties and Date.

This Amendment No. 4 to the Agreement (as defined herein) is made and entered as of _____, by and between the City of Ontario ("City") and **Transtech Engineers, Inc**., a Corporation ("Consultant"). City and Consultant are sometimes individually referred to as "Party" and collectively as "Parties."

2. Recitals.

2.1 Agreement. The City and Consultant have entered into an agreement entitled "Professional Services Agreement" dated April 4, 2023 ("Agreement").

2.2 Amendment Purpose. The City and Consultant desire to amend the Agreement to increase the contract amount by **One Million Three Hundred Sixty-One Thousand Seven Hundred Fifty Dollars ($1,361,750)** to include the following services for the Vineyard Parking Structure bridging document preparation. Please see Attachment "A". The parties have heretofore entered into Amendment No. 1 dated January 16, 2024, Amendment No. 2 dated March 5, 2024, and Amendment No. 3 dated March 5, 2024.

2.3 Amendment Authority. This Amendment No. 4 is authorized pursuant to Section 3.7.14 of the Agreement.

3. Terms.

3.1 Amendment. Section 3.2.1 of the Agreement is hereby amended in its entirety to read as follows:

> "3.2.1 Compensation. Consultant shall receive compensation, including authorized reimbursements for all Services rendered under this Agreement in Exhibit "C" at the attached hereto and incorporated herein by reference. The total compensation shall not exceed **Two Million Six Hundred Fifty-Seven Thousand Seven Hundred Fifty Dollars ($2,657,750)** without City Manager's written approval. Extra work may be

authorized, as described below, and if authorized, will be compensated at the rates and manner set forth in this Agreement."

Exhibit C is hereby deleted in its entirety and replaced with Attachment A attached hereto and incorporated herein by reference.

3.2 Continuing Effect of Agreement. Except as amended by this Amendment No. 4, all other provisions of the Agreement remain in full force and effect and shall govern the actions of the parties under this Amendment No. 4. From and after the date of this Amendment No. 4, whenever the term "Agreement" appears in the Agreement, it shall mean the Agreement as amended by this Amendment No. 4.

3.3 Adequate Consideration. The Parties hereto irrevocably stipulate and agree that they have each received adequate and independent consideration for the performance of the obligations they have undertaken pursuant to this Amendment No. 4.

3.4 Severability. If any portion of this Amendment No. 4 is declared invalid, illegal, or otherwise unenforceable by a court of competent jurisdiction, the remaining provisions shall continue in full force and effect.

3.5 Integration. This Amendment represents the entirety of the Parties' understanding relating to the subject of this Amendment, including written or verbal communications between the Parties, which shall have no relevance unless expressly incorporated herein. This is an integrated amendment.

Attention: Adrian Escamilla, Design & Construction – Project Manager

Project: **Vineyard DB (Design-Build) Parking Structure**

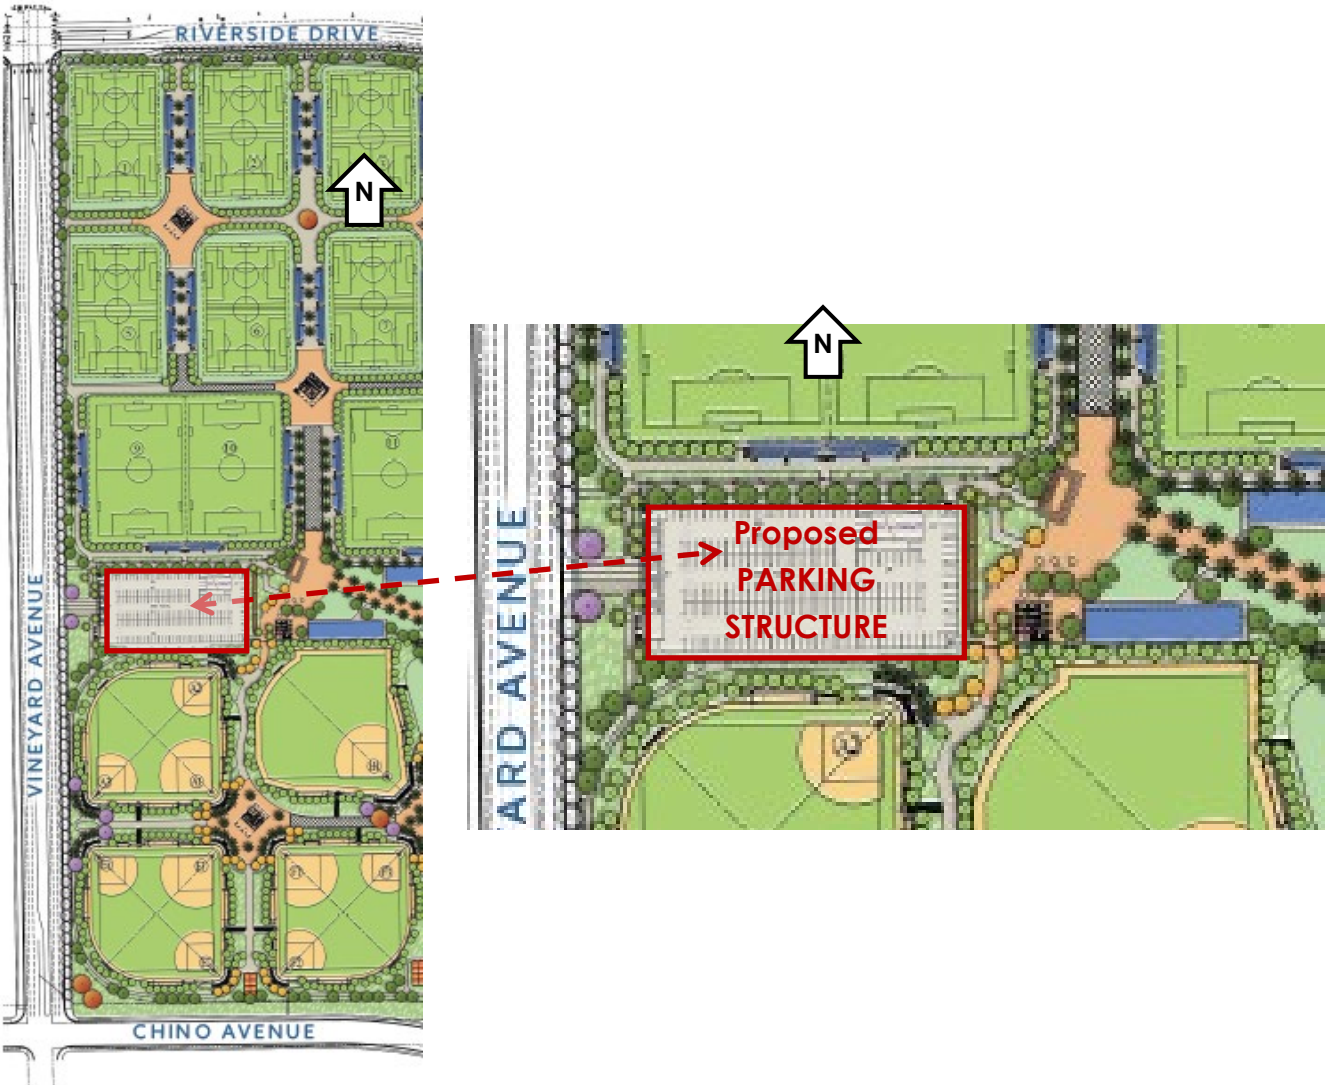
Services: **Bridging document preparation**

DB RFPQ/RFP package preparation

Project management during selection of the DB team

Construction management/owner representative services during design and construction (design and construction by selected DB Team)

Dear Mr. Escamilla:



Transtech is pleased to submit this Task Order Proposal for the subject project under our Master Contract with the City.

This Task Order is submitted for the Vineyard DB (Design-Build) Parking Structure to provide the following services.

- Bridging document preparation
- DB RFPQ/RFP package preparation
- Project management during selection of the DB team

- Construction management/owner representative services during design and construction (design and construction by selected DB Team)

Location of the proposed Parking Structure is shown below:

It is our understanding that the City desires approx. 620 parking spaces

Proposed Services by Transtech:

SERVICES DURING SELECTION OF THE DB TEAM/ENTITY, INCLUDING PREPARATION OF DB BRIDGING DOCUMENTS, RFPQ/RFP PACKAGES

Preparation of bridging documents and plans. The bridging documents and plans will graphically convey necessary core parking structure requirements including, but not limited to, size, shape, circulation, parking space count, disabled access compliance, electric vehicle charging requirements, entrance/exit location, stairs, elevator, site access, path of travel from right-of-way, exterior façade improvements, etc.

SERVICES DURING DESIGN DEVELOPMENT AND CONSTRUCTION DOCUMENT PREPARATION BY THE SELECTED DB TEAM/ENTITY

Management services provided during design development and construction document preparation by the successful DB Team specifically include, but are not limited to, the following:

Overall project coordination between City [as Owner], City [as Authority Having Jurisdiction ('AHJ')], the successful DB Team, utility purveyors, and other vested stakeholders.

Project performance review, specifically including cost and schedule monitoring. This task assumes that the DB Team will be required to design to the budget.

Assistance with payment processing.

Assistance with utility coordination.

Coordination and approval monitoring from all AHJs having jurisdiction over any portion of this project.

Attendance as Owner's Representative at design related meetings.

Monitoring and filing of all Project Record Documents developed during design.

Review of the plans for conformance with the requirements of the City's RFP and the Contract Documents where not directly related to code compliance. (Transtech assumes that all AHJ services will be provided by others, but Transtech will identify observed deficiencies where appropriate during development of the design documents.)

Coordination assistance between DB Team and City during City review as AHJ. This scope includes both plan review and permit issuance.

Assistance during scoping, selection, and contract award for special inspection services.

Request for Information ('RFI') coordination between DB Team, the City (as Owner), the City (as AHJ), and identified stakeholders.

SERVICES DURING CONSTRUCTION AND PROJECT CLOSE OUT

Construction management and coordination between City (as Owner), City (as AHJ), the DB Team and other stakeholders.

Project performance review, specifically including cost and schedule monitoring.

Assistance with payment processing.

Assistance with utility coordination and issues involving closure and/or use of public right of way.

Coordination and approval monitoring from all AHJs having jurisdiction over any portion of this project.

Attendance as Owner's Representative at construction related meetings.

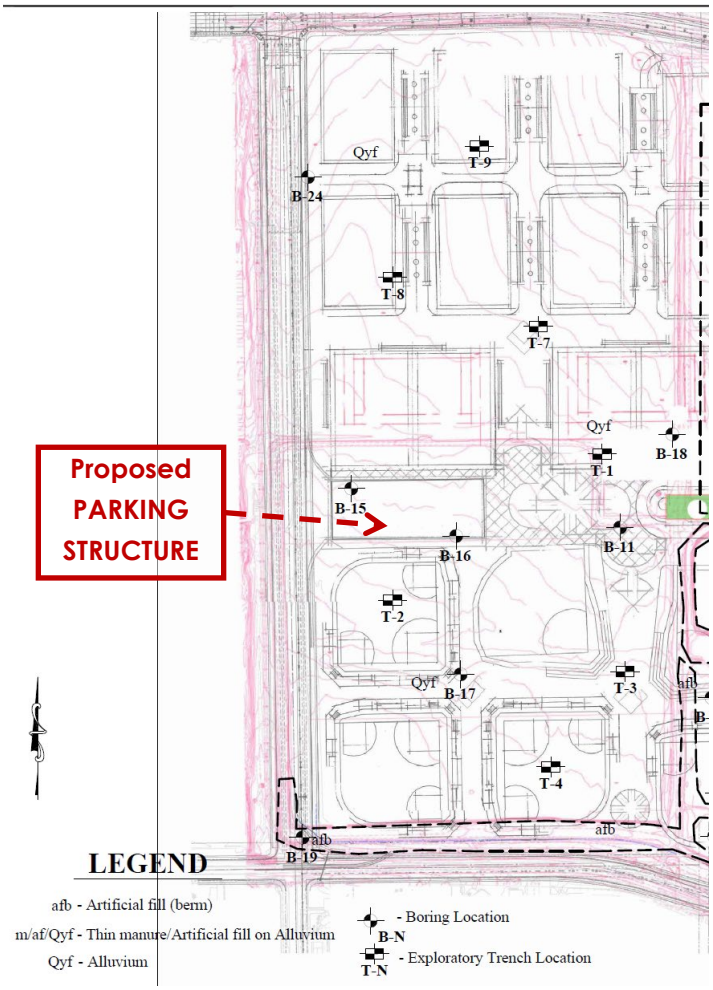
Monitoring and filing of all Project Record Documents developed during construction.

Verification of subcontractor compliance with State Contractor License Board and Department of Industrial Relations requirements for valid license and registration for each subcontract let during construction.

Assistance with special inspection and testing services and coordination of special inspection and testing efforts during construction. These services will be provided by a separate consultant under a separate contract to the City.

Transtech will monitor the construction for conformance with the requirements of the City's RFP and the Contract Documents where not directly related to code compliance.

Notes:



Transtech will not perform plan review or inspection in the capacity of 'Authority Having Jurisdiction' ('AHJ') over the work of this project. Transtech anticipates that AHJ services will be provided by various City Departments and/or Divisions or other City forces, which would include processing, plan review, permit issuance, and inspection by Building and Safety, Public Works, Engineering, OMUC, and Planning.

City will provide Phase 1 Environmental Site Assessment ('ESA').

City will provide Geological and Soils Investigation ('Soils Report'). We have received a Soils report for the entire site from te City. The report I prepared by RMA Group.

The report shows that 2 borings were made within the proposed parking structure area (Boring B-15 and B-16).

We contacted Ken Dowell, PE, PE, the engineer who prepared the report to make sure these 2 borings ae sufficient. He indicated that RMA di several borings within the site and conditions within the site are similar and 2 borings should be sufficient for the parking structure.

City will provide any soils and existing conditions reports showing the site does not contain any hazardous materials.

City will provide plans for overall site, access, roads, traffic signals, adjacent areas improvements, main utility service lines and connection points (connection points assumed to be provided within approx. 20' of PS footprint), and all other site improvements plans, etc. The scope of DB will be limited to vertical construction within the foot print of the Parking Structure plus utility laterals to service connection points and sidewalk, landscape improvements within the 20' perimeter area of PS footprint, plus driveway connection to proposed Vineyard Ave being designed by City's design consultant (Vineyard Ave will be constructed by others.) City will provide any utility plans and any utility relocation plans.

City will provide ALTA survey and site plans.

Anticipated Compensation for Transtech's Proposed Services:

Tasks	Position	Av. Hrs/Month	Approx. Duration (Months)	Tot. Hrs	Av. Rate	Budget

CITY OF ONTARIO *Agenda Report* **August 20, 2024**	**SECTION:** **CONSENT CALENDAR**
Department: Management Services Prepared By: Brandi Belmontes Staff Member Presenting: Darlene M. Sanchez, Assistant City Manager Reviewed By: Jordan T Villwock Approved By:	Submitted To: Council/OHA Approved: _____ Continued To: _____ Denied: _____ Item No: 15

SUBJECT: DESIGNATION OF VOTING DELEGATES FOR THE LEAGUE OF CALIFORNIA CITIES ANNUAL CONFERENCE GENERAL ASSEMBLY MEETING

RECOMMENDATION: That the City Council designate Mayor pro Tem Debra Porada as the City's voting delegate and Mayor Paul Leon as an alternate for the League of California Cities Annual Conference General Assembly scheduled for October 16 through October 18, 2024.

THE FOLLOWING COUNCIL GOALS ARE BEING ACHIEVED:
Pursue City's Goals and Objectives by Working with Other Governmental Agencies

FISCAL IMPACT: There is no direct fiscal impact by taking this action; however, representation and participation in the League of California Cities upcoming business meeting will help establish League policy on matters that may affect the City's finances.

BACKGROUND & ANALYSIS: The League has scheduled its General Assembly Meeting for October 16 through October 18, 2024, during the Annual League of California Cities Conference & Expo in Long Beach, California. At that meeting, the League membership will consider and take action on resolutions that establish Cal Cities policy.

Consistent with Cal Cities bylaws, a city's voting delegate and alternate must be designated by City Council action.

LEAGUE OF CALIFORNIA CITIES

Council Action Advised by September 25, 2024

DATE: Wednesday, July 10, 2024

TO: Mayors, Council Members, City Clerks, and City Managers

RE: DESIGNATION OF VOTING DELEGATES AND ALTERNATES
League of California Cities Annual Conference and Expo, Oct. 16-18, 2024
Long Beach Convention Center

Every year, the League of California Cities convenes a member-driven General Assembly at the Cal Cities Annual Conference and Expo. The General Assembly is an important opportunity where city officials can directly participate in the development of Cal Cities policy.

Taking place on Oct. 18, the General Assembly is comprised of voting delegates appointed by each member city; every city has one voting delegate. Your appointed voting delegate plays an important role during the General Assembly by representing your city and voting on resolutions.

To cast a vote during the General Assembly, your city must designate a voting delegate and up to two alternate voting delegates, one of whom may vote if the designated voting delegate is unable to serve in that capacity. Voting delegates may either be an elected or appointed official.

Action by Council Required. Consistent with Cal Cities bylaws, a city's voting delegate and up to two alternates must be designated by the city council. Please note that designating the voting delegate and alternates **must** be done by city council action and cannot be accomplished by individual action of the mayor or city manager alone.

Following council action, please submit your city's delegates through the online submission portal by Wed., Sept. 25. When completing the Voting Delegate submission form, you will be asked to attest that council action was taken. You will need to be signed in to your My Cal Cities account when submitting the form.

Submitting your voting delegate form by the deadline will allow us time to establish voting delegate/alternate records prior to the conference and provide pre-conference communications with voting delegates.

Conference Registration Required. The voting delegate and alternates must be registered to attend the conference. They need not register for the entire conference; they may register for Friday only. Conference registration is open on the Cal Cities website.

For a city to cast a vote, one voter must be present at the General Assembly and in possession of the voting delegate card and voting tool. Voting delegates and alternates need to pick up their conference badges before signing in and picking up the voting delegate card at the voting delegate desk. This will enable them to receive the special sticker on their name badges that will admit the voting delegate into the voting area during the General Assembly.

Please view Cal Cities' event and meeting policy in advance of the conference.

Transferring Voting Card to Non-Designated Individuals Not Allowed. The voting delegate card may be transferred freely between the voting delegate and alternates, but *only* between the voting delegate and alternates. If the voting delegate and alternates find themselves unable to attend the General Assembly, they may *not* transfer the voting card to another city official.

Seating Protocol during General Assembly. At the General Assembly, individuals with a voting card will sit in a designated area. Admission to the voting area will be limited to the individual in possession of the voting card and with a special sticker on their name badge identifying them as a voting delegate.

The voting delegate desk, located in the conference registration area of the Long Beach Convention Center in Long Beach, will be open at the following times: Wednesday, Oct. 16, 8:00 a.m.-6:00 p.m. and Thursday, Oct. 17, 7:30 a.m.-4:00 p.m. On Friday, Oct. 18, the voting delegate desk will be open at the General Assembly, starting at 7:30 a.m., but will be closed during roll calls and voting.

The voting procedures that will be used at the conference are attached to this memo. Please share these procedures and this memo with your council and especially with the individuals that your council designates as your city's voting delegate and alternates.

Once again, thank you for submitting your voting delegate and alternates by Wednesday, Sept. 25. If you have questions, please contact Zach Seals at zseals@calcities.org.

- Information Sheet: Cal Cities Resolutions and the General Assembly

LEAGUE OF CALIFORNIA CITIES

General Assembly Voting Guidelines

1. **One City One Vote.** Each member city has a right to cast one vote on matters pertaining to Cal Cities policy.

2. **Designating a City Voting Representative.** Prior to the Cal Cities Annual Conference and Expo, each city council may designate a voting delegate and up to two alternates; these individuals are identified on the voting delegate form provided to the Cal Cities Credentials Committee.

3. **Registering with the Credentials Committee.** The voting delegate, or alternates, may pick up the city's voting card at the voting delegate desk in the conference registration area. Voting delegates and alternates must sign in at the voting delegate desk. Here they will receive a special sticker on their name badge and thus be admitted to the voting area at the General Assembly.

4. **Signing Initiated Resolution Petitions**. Only those individuals who are voting delegates (or alternates), and who have picked up their city's voting card by providing a signature to the credentials committee at the voting delegate desk, may sign petitions to initiate a resolution.

5. **Voting.** To cast the city's vote, a city official must have in their possession the city's voting card and voting tool; and be registered with the credentials committee. The voting card may be transferred freely between the voting delegate and alternates but may not be transferred to another city official who is neither a voting delegate nor alternate.

6. **Voting Area at General Assembly.** At the General Assembly, individuals with a voting card will sit in a designated area. Admission to the voting area will be limited to the individual in possession of the voting card and with a special sticker on their name badge identifying them as a voting delegate.

7. **Resolving Disputes**. In case of dispute, the credentials committee will determine the validity of signatures on petitioned resolutions and the right of a city official to vote at the General Assembly.

LEAGUE OF CALIFORNIA CITIES

How it works: Cal Cities Resolutions and the General Assembly

Developing League of California Cities policy is a dynamic process that engages a wide range of members to ensure Cal Cities represents cities with one voice. These policies directly guide Cal Cities' advocacy to promote local decision-making, and lobby against statewide policies that erode local control.

The resolutions process and General Assembly is one way that city officials can directly participate in the development of Cal Cities policy. If a resolution is approved at the General Assembly, it becomes official Cal Cities policy. Here's how resolutions and the General Assembly work.

Prior to the Annual Conference and Expo

General Resolutions

Sixty days before the Annual Conference and Expo, Cal Cities members may submit policy proposals on issues of importance to cities. The resolution must have the concurrence of at least five additional member cities or individual members.

Policy Committees

The Cal Cities President assigns general resolutions to policy committees where members review, debate, and recommend positions for each policy proposal. Recommendations are forwarded to the Resolutions Committee.

During the Annual Conference and Expo

Petitioned Resolutions

The petitioned resolution is an alternate method to introduce policy proposals during the annual conference. The petition must be signed by voting delegates from 10% of member cities, and submitted to the Cal Cities President at least 24 hours before the beginning of the General Assembly.

Resolutions Committee

The Resolutions Committee considers all resolutions. General Resolutions approved[1] by either a policy committee or the Resolutions Committee are next considered by the General Assembly. General resolutions not approved, or referred for further study by both a policy committee and the Resolutions Committee do not go to the General Assembly. All Petitioned Resolutions are considered by the General Assembly, unless disqualified.[2]

General Assembly

During the General Assembly, voting delegates debate and consider general and petitioned resolutions forwarded by the Resolutions Committee. Potential Cal Cities bylaws amendments are also considered at this meeting.

Who's who

Cal Cities policy development is a member-informed process, grounded in the voices and experiences of city officials throughout the state.

The **Resolutions Committee** includes representatives from each Cal Cities diversity caucus, regional division, municipal department, and policy committee, as well as individuals appointed by the Cal Cities president.

Voting delegates are appointed by each member city; every city has one voting delegate.

The **General Assembly** is a meeting of the collective body of all voting delegates —one from every member city.

Seven **policy committees** meet throughout the year to review and recommend positions to take on bills and regulatory proposals. Policy committees include members from each Cal Cities diversity caucus, regional division, and municipal department, as well as individuals appointed by the Cal Cities president.

[1] The Resolution Committee can amend a general resolution prior to sending it to the General Assembly.
[2] Petitioned Resolutions may be disqualified by the Resolutions Committee according to Cal Cities Bylaws Article VI. Sec. 5(f).

CITY OF ONTARIO *Agenda Report* **August 20, 2024**	**SECTION:** **CONSENT CALENDAR**
Department: Utilities Prepared By: Andy Marquez Staff Member Presenting: Scott Burton, Utilities General Manager Reviewed By: Dennice Raygoza, Albert G Gastelum, Michael Sigsbee Approved By:	Submitted To: Council/OHA Approved: _____ Continued To: _____ Denied: _____ Item No: 16

SUBJECT: PURCHASE OF WATER METERS AND REPAIR PARTS FROM HYDROPRO SOLUTIONS

RECOMMENDATION: That the City Council approve and authorize the sole source purchase of new water meters and repair parts for a total not-to-exceed amount of $2,900,000 from HydroPro Solutions of Ontario, California, and authorize the City Manager or designee to execute a Goods and Equipment Agreement.

THE FOLLOWING COUNCIL GOALS ARE BEING ACHIEVED:
Invest in the City's Infrastructure (Water, Streets, Sewers, Parks, Storm Drains and Public Facilities)
Pursue City's Goals and Objectives by Working with Other Governmental Agencies

FISCAL IMPACT: The actual cost of meters to be purchased will be determined based on unit pricing for the various sizes of meters and actual meter repair, replacement, and new installation needs. The Fiscal Year 2024-25 Water Operating and Capital Improvement Program Budgets include $2,900,000 for the purchase of new and replacement meters and repair parts. Development projects pay for new meter installations while the cost of meter testing, repair, and replacement is included in the rates the City bills for water service. There is no impact on the General Fund.

BACKGROUND & ANALYSIS: There are over 44,000 water meters citywide, which serve residential, industrial, and commercial businesses as well as landscape areas; this includes recycled water connections. The accuracy of meters has a direct relationship to accounting and billing for water service. To maintain accuracy and functionality, meters need to be replaced approximately every twelve years, and they are repaired as needed. Meter repair and replacements ensure accurate meter reads and accurate billing to our residents and customers. In Fiscal Year 2023-24, approximately 2,900 residential meters were replaced, and 750 new meters were installed in the Ontario Ranch area.

In the Fiscal Year 2024-25, approximately 2,700 meters are planned to be installed to replace

existing meters as part of the annual meter replacement program, and approximately 700 new meters are planned to be installed for development projects in the Old Model Colony and Ontario Ranch.

The recommended Master Meter brand meters are set up for Advanced Meter Infrastructure (AMI), which will allow Customer Service Staff the capabilities to connect remotely and have access to meter data in real-time without drive-by meter readings. This real-time data retrieval process will assist OMUC in the effort to maintain up-to-date meter data, identify water waste, and aid in the early detection process of potential leaks or breaks in consumer onsite lines. AMI Antenna tower construction has been ongoing to expand remote read coverage. Phase I included retrofit of one antenna and installation of 2 antennas, and construction was completed in July 2024. Phase II will include the construction of two additional antennas and is anticipated to be completed in June 2025.

The City currently utilizes these meters to provide the remote collection of water use data in real-time; approximately sixty percent of the City’s remote read meters now have this AMI technology. The purchase of these Master Meter brand meters can only be made directly through the manufacturer. Section 2-6.11 (b) (2) of the Ontario Municipal Code states that sole source purchases are authorized if there is only one procurement source; HydroPro Solutions is the exclusive distributor in California for these water meters and has uniform pricing for water agencies utilizing its products. Additionally, pricing is competitive with industry type products. HydroPro's local presence offers several advantages to the City, ensuring immediate and effective responses to various needs. HydroPro's quick response for repairs, ongoing staff training and updates, efficient order fulfillment, and troubleshooting support has added value in maintaining and improving the City's meter reading infrastructure and operations. Staff has reviewed pricing and recommends this sole-source award to HydroPro Solutions.

CITY OF ONTARIO
GOODS AND EQUIPMENT PURCHASE AGREEMENT

This Goods and Equipment Purchase Agreement ("Agreement") is made and entered as of _____, by and between the City of Ontario, a municipal corporation organized under the laws of the State of California with its principal place of business at 303 East "B" Street, Ontario, California 91764-4196, County of San Bernardino, State of California ("City"), and HYDROPRO SOLUTION, a LLC with its principal place of business at 1180 E Francis St Suite F, Ontario, CA 91761 ("Supplier"). City and Supplier are sometimes individually referred to as "Party" and collectively as "Parties" in this Agreement.

Section 1. DEFINITIONS.

A. "Goods" means all machinery, equipment, supplies, items, parts, materials, labor or other services, including design, engineering and installation services, provided by Supplier as specified in Exhibit "A," attached hereto and incorporated herein by reference.

B. "Delivery Date(s)" means that date or dates upon which the Goods is to be delivered to City, ready for approval, testing and/or use as specified in Exhibit "B."

Section 2. MATERIALS AND WORKMANSHIP.

When Exhibit "A" specifies machinery, equipment or material by manufacturer, model or trade name, no substitution will be made without City's written approval. Machinery, equipment or material installed in the Goods without the approval required by this Section 2 will be deemed to be defective material for purposes of Section 4. Where machinery, equipment or materials are referred to in Exhibit "A" as equal to any particular standard, City will decide the question of equality. When requested by City, Supplier will furnish City with the name of the manufacturer, the performance capabilities and other pertinent information necessary to properly determine the quality and suitability of any machines, equipment and material to be incorporated in the Goods. Material samples will be submitted at City's request.

Section 3. INSPECTIONS AND TESTS.

City shall have the right to inspect and/or test the Goods prior to acceptance. If upon inspection or testing the Goods or any portion thereof are found to be nonconforming, unsatisfactory, defective, of inferior quality or workmanship, or fail to meet any requirements or specifications contained in Exhibit "A," then without prejudice to any other rights or remedies, City may reject the Goods or exercise any of its rights under Section 4.C. The inspection, failure to make inspection, acceptance of goods, or payment for goods shall not impair City's right to reject nonconforming goods, irrespective of City's failure to notify Supplier of a rejection of nonconforming goods or revocation of acceptance thereof or to specify with particularity any defect in nonconforming goods after rejection or acceptance thereof.

Section 4. WARRANTY.

A. Supplier warrants that the Goods will be of merchantable quality and free from defects in design, engineering, material, and workmanship for a period of two (2) years, or such longer period as provided by a manufacturer's warranty or as agreed to by Supplier and City, from the date of final written acceptance of the Goods by City as required for final payment under Section 7. Supplier further warrants that any services provided in connection with the Goods will be performed in a professional and workmanlike manner and in accordance with the highest industry standards.

B. Supplier further warrants that all machinery, equipment, or process included in the Goods will meet the performance requirements and specifications specified in Exhibit "A" and shall be fit for the purpose intended. City's inspection, testing, approval, or acceptance of any such machinery, equipment, or process will not relieve Supplier of its obligations under this Section 4.B.

C. For any breach of the warranties contained in Section 4.A and Section 4.B, Supplier will, immediately after receiving notice from City, at the option of City, and at Supplier's own expense and without cost to City:

1. Repair the defective Goods;

2. Replace the defective Goods with conforming Goods, F.O.B. City's plant, office or other location of City where the Goods was originally performed or delivered; or

3. Repay to City the purchase price of the defective Goods.

If City selects repair or replacement, any defects will be remedied without cost to City, including but not limited to, the costs of removal, repair, and replacement of the defective Goods, and reinstallation of new Goods. All such defective Goods that is so remedied will be similarly warranted as stated above. In addition, Supplier will repair or replace other items of the Goods which may have been damaged by such defects or the repairing of the same, all at its own expense and without cost to City.

D. Supplier also warrants that the Goods is free and clear of all liens and encumbrances whatsoever, that Supplier has a good and marketable title to same, and that

Supplier owns or has a valid license for all of the proprietary technology and intellectual property incorporated within the Goods. Supplier agrees to indemnify, defend, and hold City harmless against any and all third party claims resulting from the breach or inaccuracy of any of the foregoing warranties.

E. In the event of a breach by Supplier of its obligations under this Section 4, City will not be limited to the remedies set forth in this Section 4, but will have all the rights and remedies permitted by applicable law, including without limitation, all of the rights and remedies afforded to City under the California Commercial Code.

Section 5. PRICES.

Unless expressly provided otherwise, all prices and fees specified in Exhibit "C," attached hereto and incorporated herein by reference, are firm and shall not be subject to change without the written approval of City. No extra charges of any kind will be allowed unless specifically agreed to in writing by City's authorized representative. The total price shall include (i) all federal, state and local sales, use, excise, privilege, payroll, occupational and other taxes applicable to the Goods furnished to City hereunder; and (ii) all charges for packing, freight and transportation to destination.

Section 6. CHANGES.

City, at any time, by a written order, and without notice to any surety, may make changes in the Goods, including but not limited to, City's requirements and specifications. If such changes affect the cost of the Goods or time required for its performance, an equitable adjustment will be made in the price or time for performance or both. Any change in the price necessitated by such change will be agreed upon between City and Supplier and such change will be authorized by a change order document signed by City and accepted by Supplier.

Section 7. PAYMENTS.

A. Terms of payment, are net thirty (30) days, less any applicable retention, after receipt of invoice, or completion of applicable Progress Milestones. Final payment shall be made by City after Supplier has satisfied all contractual requirements. Payment of invoices shall not constitute acceptance of Goods.

B. If Progress Milestones have been specified in Exhibit "B," then payments for the Goods will be made as the requirements of such Progress Milestones are met. Progress payments for the Goods will be made by City upon proper application by Supplier during the progress of the Goods and according to the terms of payment as specified in Exhibit "B." Supplier's progress billing invoice will include progress payments due for the original scope of work and changes. Each "Item for Payment" shown in Exhibit "B" and each change order will be itemized on the invoice. Invoices for cost plus work, whether part of Exhibit "B" or a change order, must have subcontractor and/or supplier invoices attached to Supplier's invoice. Other format and support documents for invoices will be determined by City in advance of the first invoice cycle.

C. Payments otherwise due may be withheld by City on account of defective Goods not remedied, liens or other claims filed, reasonable evidence indicating probable filing of liens or

other claims, failure of Supplier to make payments properly to its subcontractors or for material or labor, the failure of Supplier to perform any of its other obligations under the Agreement, or to protect City against any liability arising out of Supplier's failure to pay or discharge taxes or other obligations. If the causes for which payment is withheld are removed, the withheld payments will be made promptly. If the said causes are not removed within a reasonable period after written notice, City may remove them at Supplier's expense.

D. Payment of the final Progress Milestone payment or any retention will be made by City upon:

1. Submission of an invoice for satisfactory completion of the requirements of a Progress Milestone as defined in Exhibit "B" and in the amount associated with the Progress Milestone;

2. Written acceptance of the Goods by City;

3. Delivery of all drawings and specifications, if required by City;

4. Delivery of executed full releases of any and all liens arising out of this Agreement; and

5. Delivery of an affidavit listing all persons who might otherwise be entitled to file, claim, or maintain a lien of any kind or character, and containing an averment that all of the said persons have been paid in full.

If any person refuses to furnish an actual release or receipt in full, Supplier may furnish a bond satisfactory to City to indemnify City against any claim or lien at no cost to City.

E. Acceptance by Supplier of payment of the final Progress Milestone payment pursuant to Section 7.D will constitute a waiver, release and discharge of any and all claims and demands of any kind or character which Supplier then has, or can subsequently acquire against City, its successors and assigns, for or on account of any matter or thing arising out of, or in any manner connected with, the performance of this Agreement. However, payment for the final Progress Milestone by City will not constitute a waiver, release or discharge of any claims or demands which City then has, or can subsequently acquire, against Supplier, its successors and assigns, for or on account of any matter or thing arising out of, or in any manner connected with, the performance of this Agreement.

Section 8. SCHEDULE FOR DELIVERY.

A. The time of Supplier's performance is of the essence for this Agreement. The Goods will be delivered in accordance with the schedule set forth in Exhibit "B." Supplier must immediately notify City in writing any time delivery is behind schedule or may not be completed on schedule. In addition to any other rights City may have under this Agreement or at law, Supplier shall pay City the sum of $0.00 per item of Goods for each calendar day for which the item of Goods is unavailable beyond the scheduled delivery date(s) specified in Exhibit "B."

B. In the event that the Goods is part of a larger project or projects that require the coordination of multiple contractors or suppliers, then Supplier will fully cooperate in scheduling the delivery so that City can maximize the efficient completion of such project(s).

Section 9. TAXES.

A. Supplier agrees to timely pay all sales and use tax (including any value added or gross receipts tax imposed similar to a sales and use tax) imposed by any federal, state or local taxing authority on the ultimate purchase price of the Goods provided under this Agreement.

B. Supplier will withhold, and require its subcontractors, where applicable, to withhold all required taxes and contributions of any federal, state or local taxing authority which is measured by wages, salaries or other remuneration of its employees or the employees of its subcontractors. Supplier will deposit, or cause to be deposited, in a timely manner with the appropriate taxing authorities all amounts required to be withheld.

C. All other taxes, however denominated or measured, imposed upon the price of the Goods provided hereunder, will be the responsibility of Supplier. In addition, all taxes assessed by any taxing jurisdiction based on Supplier property used or consumed in the provision of the Goods such as and including ad valorem, use, personal property and inventory taxes will be the responsibility of Supplier.

D. Supplier will, upon written request, submit to City written evidence of any filings or payments of all taxes required to be paid by Supplier hereunder.

Section 10. INDEPENDENT CONTRACTOR.

Supplier enters into this Agreement as an independent contractor and not as an employee of City. Supplier shall have no power or authority by this Agreement to bind City in any respect. Nothing in this Agreement shall be construed to be inconsistent with this relationship or status. All employees, agents, contractors or subcontractors hired or retained by the Supplier are employees, agents, contractors or subcontractors of the Supplier and not of City. City shall not be obligated in any way to pay any wage claims or other claims made against Supplier by any such employees, agents, contractors or subcontractors or any other person resulting from performance of this Agreement.

Section 11. SUBCONTRACTS.

Unless otherwise specified, Supplier must obtain City's written permission before subcontracting any portion of the Goods. Except for the insurance requirements in Section 13.A, all subcontracts and orders for the purchase or rental of supplies, materials or equipment, or any other part of the Goods, will require that the subcontractor be bound by and subject to all of the terms and conditions of the Agreement. No subcontract or order will relieve Supplier from its obligations to City, including, but not limited to Supplier's insurance and indemnification obligations. No subcontract or order will bind City.

Section 12. TITLE AND RISK OF LOSS.

Unless otherwise agreed, City will have title to, and risk of loss of, all completed and partially completed portions of the Goods upon delivery, as well as materials delivered to and stored on City property which are intended to become a part of the Goods. However, Supplier will be liable for any loss or damage to the Goods and/or the materials caused by Supplier or its subcontractors, their agents or employees, and Supplier will replace or repair said Goods or materials at its own cost to the complete satisfaction of City. Notwithstanding the foregoing, in the event that the City has paid Supplier for all or a portion of the Goods which remains in the possession of Supplier, then City shall have title to, and the right to take possession of, such Goods at any time following payment therefor. Risk of loss for any Goods which remains in the possession of Supplier shall remain with Supplier until such Goods has been delivered or City has taken possession thereof. Supplier will have risk of loss or damage to Supplier's property used in the construction of the Goods but which does not become a part of the Goods.

Section 13. INDEMNIFICATION.

A. Supplier shall defend, indemnify and hold the City, its officials, officers, employees, volunteers and agents free and harmless from any and all claims, demands, causes of action, costs, expenses, liability, loss, damage or injury, in law or equity, to property or persons, including wrongful death, in any manner arising out of or incident to any alleged acts, omissions, negligence or willful misconduct of Supplier, its officials, officers, employees, agents, subcontractors and subconsultants arising out of or in connection with the Goods or the performance of this Agreement, including without limitation the payment of all consequential damages and attorneys' fees and other related costs and expenses except such loss or damage which was caused by the sole negligence or willful misconduct of the City.

B. Supplier's defense obligation for any and all such aforesaid suits, actions or other legal proceedings of every kind that may be brought or instituted against the City, its officials, officers, employees, agents, or volunteers shall be at Supplier's own cost, expense, and risk. Supplier shall pay and satisfy any judgment, award, or decree that may be rendered against City or its officials, officers, employees, agents, or volunteers, in any such suit, action, or other legal proceeding. Supplier shall reimburse City and its officials, officers, employees, agents, and/or volunteers, for any and all legal expenses and costs incurred by each of them in connection therewith or in enforcing the indemnity herein provided.

C. Supplier's obligation to indemnify shall not be restricted to insurance proceeds, if any, received by the City, its officials, officers, employees, agents or volunteers.

Section 14. INSURANCE.

A. General. Supplier shall take out and maintain:

1. Commercial General Liability Insurance, of at least $2,000,000 per occurrence/ $4,000,000 aggregate for bodily injury, personal injury and property damage, at least as broad as Insurance Services Office Commercial General Liability most recent Occurrence Form CG 00 01;

2. Automobile Liability Insurance for bodily injury and property damage including coverage for owned, non-owned and hired vehicles, of at least $2,000,000 per accident for bodily injury and property damage, at least as broad as most recent Insurance Services Office Form Number CA 00 01 covering automobile liability, Code 1 (any auto);

3. Workers' Compensation in compliance with applicable statutory requirements and Employer's Liability Coverage of at least $1,000,000 per occurrence; and

4. Pollution Liability Insurance of at least $2,000,000 per occurrence shall be provided by the Supplier if transporting hazardous materials.

5. If Supplier is also the manufacturer of any equipment included in the Goods, Supplier shall carry Product Liability and/or Errors and Omissions Insurance which covers said equipment with limits of not less than $1,000,000.

B. Additional Insured; Primary; Waiver of Subrogation; No Limitation on Coverage. The policies required under this Section shall give City, its officials, officers, employees, agents or volunteers additional insured status on commercial general liability and automobile liability insurance with the endorsements. Such policies shall contain a provision stating that Supplier's policy is primary insurance and that any insurance, deductible, or self-insurance maintained by the City or any additional insureds shall not be called upon to contribute to any loss, and shall contain or be endorsed with a waiver of subrogation in favor of the City, its officials, officers, employees, agents, and volunteers. The limits set forth herein shall apply separately to each insured against whom claims are made or suits are brought, except with respect to the limits of liability. Requirements of specific coverage or limits contained in this section are not intended as a limitation on coverage, limits, or other requirement, or a waiver of any coverage normally provided by any insurance. Any available coverage shall be provided to the parties required to be named as additional insured pursuant to this Agreement.

C. Cancellation. Each insurance policy required by this Agreement shall be endorsed to state that: (A) coverage shall not be suspended, voided, reduced or canceled except after thirty (30) days (10 days for nonpayment of premium) prior written notice by certified mail, return receipt requested, has been given to the City; and (B) any failure to comply with reporting or other provisions of the policies, including breaches of warranties, shall not affect coverage provided to the City, its directors, officials, officers, employees, agents, and volunteers. Any failure to comply with reporting or other provisions of the policies including breaches of warranties shall not affect coverage provided to the City, its officials, officers, employees, agents and volunteers, or any other additional insureds

D. Insurance Carrier. All insurance required under this Section is to be placed with insurers with a current A.M. Best's rating no less than A-:VII, licensed to do business in California, and satisfactory to the City.

E. Evidence of Insurance. Supplier shall furnish City with original certificates of insurance and endorsements effecting coverage required by the Agreement. The certificates and endorsements for each insurance policy shall be signed by a person authorized by that insurer to bind coverage on its behalf, and shall be on forms supplied or approved by the City. All certificates and endorsements must be received and approved by the City before delivery commences. The

City reserves the right to require complete, certified copies of all required insurance policies, at any time.

F. Subcontractors. All subcontractors shall meet the requirements of this Section before commencing work. In addition, Supplier shall include all subcontractors as insureds under its policies or shall furnish separate certificates and endorsements for each subcontractor. All coverages for subcontractors shall be subject to all of the requirements stated herein.

G. Freight. Supplier shall ensure that third party shippers contracted by Supplier have adequate insurance coverage for the shipped Goods.

Section 15. LIENS.

A. Supplier, subcontractors and suppliers will not make, file or maintain a mechanic's or other lien or claim of any kind or character against the Goods, for or on account of any labor, materials, fixtures, tools, machinery, equipment, or any other things furnished, or any other work done or performance given under, arising out of, or in any manner connected with the Agreement (such liens or claims referred to as "Claims"); and Supplier, subcontractor and suppliers expressly waive and relinquish any and all rights which they now have, or may subsequently acquire, to file or maintain any Claim and Supplier, subcontractor and suppliers agree that this provision waiving the right of Claims will be an independent covenant.

B. Supplier will save and hold City harmless from and against any and all Claims that may be filed by a subcontractor, supplier or any other person or entity and Supplier will, at its own expense, defend any and all actions based upon such Claims and will pay all charges of attorneys and all costs and other expenses arising from such Claims.

Section 16. TERMINATION OF AGREEMENT BY CITY.

A. Should Supplier at any time refuse or fail to deliver the Goods with promptness and diligence, or to perform any of its other obligations under the Agreement, City may terminate Supplier's right to proceed with the delivery of the Goods by written notice to Supplier. In such event City may obtain the Goods by whatever method it may deem expedient, including the hiring of another contractor or other contractors and, for that purpose, may take possession of all materials, machinery, equipment, tools and appliances and exercise all rights, options and privileges of Supplier. In such case Supplier will not be entitled to receive any further payments until the Goods is delivered. If City's cost of obtaining the Goods, including compensation for additional managerial and administrative services, will exceed the unpaid balance of the Agreement, Supplier will be liable for and will pay the difference to City.

B. City may, for its own convenience, terminate Supplier's right to proceed with the delivery of any portion or all of the Goods by written notice to Supplier. Such termination will be effective in the manner specified in such notice, will be without prejudice to any claims which City may have against Supplier, and will not affect the obligations and duties of Supplier under the Agreement with respect to portions of the Goods not terminated.

C. On receipt of notice under Section 16.B, Supplier will, with respect to the portion of the Goods terminated, unless the notice states otherwise,

1. Immediately discontinue such portion of the Goods and the placing of orders for materials, facilities, and supplies in connection with the Goods,

2. Unless otherwise directed by City, make every reasonable effort to procure cancellation of all existing orders or contracts upon terms satisfactory to City; and

3. Deliver only such portions of the Goods which City deems necessary to preserve and protect those portions of the Goods already in progress and to protect material, plant and equipment at the Goods site or in transit to the Goods site.

D. Upon termination pursuant to Section 16.B, Supplier will be paid a pro rata portion of the compensation in the Agreement for any portion of the terminated Goods already delivered, including material and services for which it has made firm contracts which are not canceled, it being understood that City will be entitled to such material and services. Upon determination of the amount of said pro rata compensation, City will promptly pay such amount to Supplier upon delivery by Supplier of the releases of liens and affidavit, pursuant to Section 7.C.

Section 17. FORCE MAJEURE

A. Supplier shall not be held responsible for failure or delay in shipping nor City for failure or delay in accepting goods described herein if such failure or delay is due to a Force Majeure Event.

B. A Force Majeure Event shall mean an event that materially affects a Party's performance and is one or more of the following: (1) Acts of God or other natural disasters occurring at the project site; (2) terrorism or other acts of a public enemy; (3) orders of governmental authorities (including, without limitation, unreasonable and unforeseeable delay in the issuance of permits or approvals by governmental authorities that are required for the work); (4) pandemics, epidemics or quarantine restrictions; and (5) strikes and other organized labor action occurring at the project site and the effects thereof on the work, only to the extent such strikes and other organized labor action are beyond the control of Supplier and its subcontractors, of every tier, and to the extent the effects thereof cannot be avoided by use of replacement workers. For purposes of this section, "orders of governmental authorities," includes ordinances, emergency proclamations and orders, rules to protect the public health, welfare and safety, and other actions of the City in its capacity as a municipal authority.

C. In the event of any such excused interference with shipments, City shall have the option either to reduce the quantity provided for in the order accordingly or to exercise its right of cancellation as set forth in this Agreement.

Section 18. MISCELLANEOUS PROVISIONS.

A. Delivery of Notices. All notices permitted or required under this Agreement shall be given to the respective parties at the following address or at such other address as the respective parties may provide in writing for this purpose:

CITY: SUPPLIER:

City of Ontario
303 East "B" Street
Ontario, CA 91764
Attn: Andy Marquez -
Utilities Operations Manager

HYDROPRO SOLUTIONS
1180 E Francis St Suite F Ontario, CA 91761
Derek Chester - President

Such notice shall be deemed made when personally delivered or when mailed, forty-eight (48) hours after deposit in the U.S. Mail, first class postage prepaid and addressed to the party at its applicable address. Actual notice shall be deemed adequate notice on the date actual notice occurred, regardless of the method of service.

B. Assignment or Transfer. Supplier shall not assign or transfer any interest in this Agreement whether by assignment or novation, without the prior written consent of the City, which will not be unreasonably withheld. Provided, however, that claims for money due or to become due Supplier from the City under this Agreement may be assigned to a financial institution or to a trustee in bankruptcy, without such approval. Notice of any assignment or transfer, whether voluntary or involuntary, shall be furnished promptly to the City.

C. Successors and Assigns. This Agreement shall be binding on the successors and assigns of the Parties.

D. Amendment; Modification. No supplement, modification, or amendment of this Agreement shall be binding unless executed in writing and signed by both Parties.

E. Waiver. No waiver of any default shall constitute a waiver of any other default or breach, whether of the same or other covenant or condition. No waiver, benefit, privilege, or service voluntarily given or performed by a Party shall give the other Party any contractual rights by custom, estoppel or otherwise.

F. Governing Law. This Agreement shall be governed by the laws of the State of California. Venue shall be in San Bernardino County.

G. Attorneys' Fees and Costs. If any action in law or equity, including an action for declaratory relief, is brought to enforce or interpret the provisions of this Agreement, each Party shall pay its own attorneys' fees.

H. Interpretation. Since the Parties or their agents have participated fully in the preparation of this Agreement, the language of this Agreement shall be construed simply, according to its fair meaning, and not strictly for or against any Party.

I. No Third Party Beneficiaries. There are no intended third party beneficiaries of any right or obligation assumed by the Parties.

J. Authority to Enter Agreement. Each Party warrants that the individuals who have signed this Agreement have the legal power, right and authority to make this Agreement and bind each respective Party.

K. Invalidity; Severability. If any portion of this Agreement is declared invalid, illegal, or otherwise unenforceable by a court of competent jurisdiction, the remaining provisions shall continue in full force and effect.

L. Counterparts. This Agreement may be signed in counterparts, each of which shall constitute an original.

M. City's Right to Employ Other Suppliers. City reserves its right to employ other contractors in connection with the Goods.

N. Entire Agreement. This Agreement constitutes the entire agreement between the Parties relative to the Goods specified herein. There are no understandings, agreements, conditions, representations, warranties or promises with respect to this Agreement, except those contained in or referred to in the writing.

CITY OF ONTARIO *Agenda Report* **August 20, 2024**	**SECTION:** **CONSENT CALENDAR**
Department: Public Works Prepared By: Adrian Escamilla Staff Member Presenting: Tito Haes, Executive Director Public Works Reviewed By: Andrea Ampig, Bonnie Tam Approved By:	Submitted To: Council/OHA Approved: _____ Continued To: _____ Denied: _____ Item No: 17

SUBJECT: **AN AMENDMENT TO THE MAINTENANCE SERVICES AGREEMENT WITH BAY ALARM COMPANY FOR THE ONTARIO POLICE DEPARTMENT FIRE ALARM NOTIFICATION SYSTEM AND A CONSTRUCTION CONTRACT WITH WAKECO, INC. FOR THE ONTARIO POLICE DEPARTMENT REAL TIME INFORMATION CENTER & TENANT IMPROVEMENT PROJECT**

RECOMMENDATION: That the City Council take the following actions:

A. Authorize the City Manager, or his designee, to execute Amendment No. 9 to the Maintenance Services Agreement with Bay Alarm Company, of Concord, California, for the Ontario Police Department (OPD) Fire Alarm Notification System installation in an amount of $422,629 and a 10% contingency of $42,262 for a total not-to-exceed contract amount of $1,487,163, and
B. Reject Optima RPM, Inc.'s protest against Wakeco, Inc. for D&C23-014 OPD Real Time Information Center (RTIC) and Tenant Improvement (TI) Project; and
C. Authorize the City Manager, or his designee, to execute Construction Contract No. D&C23-014 with Wakeco, Inc., of Temecula, California, for the OPD RTIC and TI Project in the amount of $3,611,000 and authorize a 10% contingency of $361,100 for a new contract value of $3,972,100 to address any unforeseen issues that arise during construction.

THE FOLLOWING COUNCIL GOALS ARE BEING ACHIEVED:
Invest in the City's Infrastructure (Water, Streets, Sewers, Parks, Storm Drains and Public Facilities)
Maintain the Current High Level of Public Safety

FISCAL IMPACT: The proposed Amendment No. 9 to Bay Alarm Company increases the contract amount by $422,629 plus a 10% contingency of $42,262 for a total not-to-exceed contract amount of $1,487,163. The Fiscal Year 2024-25 includes appropriations in the Facilities Maintenance Fund for the OPD Fire Alarm Notification System installation.

The proposed Construction Contract with Wakeco, Inc. for the OPD RTIC and TI project is in an

amount of $3,611,000 plus a 10% contingency of $361,100 for a total not-to-exceed contract amount of $3,972,100. The Fiscal Year 2024-25 Adopted Budget includes partial appropriations for this project in the Capital Projects-Measure Q Fund. If approved, additional appropriations will be included in future quarterly budget updates to the City Council for approval.

BACKGROUND & ANALYSIS: The Ontario Police Department is set to significantly enhance its operational capabilities with the remodeling of its RTIC. This facility will serve as a central hub for the City of Ontario, integrating various streams of data, including video surveillance, audio feeds, and real-time information from multiple sources. By consolidating these resources into one centralized location, the RTIC will allow OPD to monitor and respond to incidents more efficiently and effectively. Additional key aspects of the project include repairing existing conditions to improve accessibility, such as enhancing assessable parking, correcting the concrete walkway leading to the department's entrance, and updating general building amenities and signage. All of the improvements are designed to comply with the 2019 Building Code and the 2010 ADA Guidelines, ensuring that the facility meets the highest standards of accessibility and safety.

On June 14, 2024, Staff solicited bids for the Bid No. 1810 OPD RTIC and TI Improvements Project. Staff received seven (7) construction bids ranging from $3,611,000 to $5,148,000. All the bids received are listed below:

Vendor	Location	Amount
Wakeco, Inc.	Temecula, CA	$3,611,000
Optima RPM, Inc.	Irvine, CA	$3,688,041
Royal Construction Corp	Arcadia, CA	$3,898,000
Dalke & Sons Construction, Inc.	Riverside, CA	$3,988,680
R.J. Daum Construction Company	Garden Grove, CA	$4,369,331
BCM Group, Inc.	Rancho Cucamonga, CA	$4,950,000
PCN3, Inc.	Los Alamitos, CA	$5,148,000

Wakeco, Inc., of Temecula, California, was the apparent lowest responsible bidder. On July 25, 2024, the City received a protest letter from Optima RPM, Inc. stating that Wakeco, Inc. submitted a non-responsive bid because they failed to provide a list of completed safety construction projects under the minimum qualification list included in the bid documents. The City responded to Optima RPM, Inc. in a letter dated July 30, 2024, stating that the bid protest is meritless because Wakeco, Inc. did not constitute as an irresponsible bidder and that all irregularities are waived.

Wakeco, Inc., of Temecula, California, submitted the lowest responsible bid that met all the required specifications with a cost of $3,611,000. Based on credentials, pricing, and favorable reference checks, Staff recommends awarding Construction Contract No. D&C23-014 to Wakeco, Inc. The project's estimated completion date is November 2025.

As part of the broader improvements to the OPD facilities, the recently completed Gym Expansion project revealed that the existing fire alarm notification system did not meet current Fire Code

Regulations. As Wakeco Inc. embarks on the construction of the RTIC and the associated T.I. improvement areas, Bay Alarm, a trusted provider of fire protection services, will be responsible for the installation of the appropriate fire alarm devices throughout the department. These devices will be selected and installed based on the specific occupancy type of each area, ensuring that the entire facility meets Fire Code Regulations. At the request of the City Building Department, both projects will run concurrently to adhere to City inspection services to ensure this project complies with all applicable municipal and state code requirements.

This comprehensive approach to safety will safeguard both the personnel and the critical infrastructure of the OPD, including the newly renovated RTIC. Together, these initiatives reflect the OPD's commitment to innovation, safety, and operational excellence.

AMENDMENT NO. 9 TO THE MAINTENANCE SERVICES AGREEMENT BETWEEN THE CITY OF ONTARIO AND BAY ALARM COMPANY

1. Parties and Date.

This Amendment No. 9 to the Agreement (as defined herein) is made and entered into as of _____, by and between the City of Ontario ("City") and **Bay Alarm Company**, a Corporation ("Contractor"). City and Contractor are sometimes individually referred to as "Party" and collectively as "Parties."

2. Recitals.

2.1 Agreement. The City and Contractor have entered into an agreement entitled "Maintenance Service Agreement" dated July 1, 2020 ("Agreement").

2.2 Amendment Purpose. The City and Contractor desire to amend the Agreement to include the following work in the locations listed on Exhibit "A". The scope of work includes the supply and install of wiring, devices, and program the system to be monitored by the Bay Alarm supervising station for an amount not-to-exceed **Four Hundred Twenty-Two Thousand Six Hundred Twenty-Nine Dollars ($422,629)**. The Parties have heretofore entered into that Amendment No. 1 dated April 6, 2021, Amendment No. 2 dated November 15, 2021, Amendment No. 3 dated June 20, 2022, Amendment No. 4 dated November 15, 2022, Amendment No. 5 dated February 21, 2023, Amendment No. 6 dated July 1,2023, Amendment No. 7 dated October 17, 2023, and Amendment No. 8. Dated June 6, 2024.

2.3 Amendment Authority. This Amendment No. 9 is authorized pursuant to Section 3.5.18 of the Agreement.

3. Terms.

3.1 Amendment. Section 3.1.1 and 3.3.1 of the Agreement is hereby amended in its entirety to read as follows:

> "3.1.1 General Scope of Service. Contractor promises and agrees to furnish to the City all labor, materials, tools, equipment, services, and incidental and customary work necessary to fully and adequately supply the professional Security and Fire Alann Monitoring services necessary for the Project ("Services"). The Services are

more particularly described in Exhibit "A" attached hereto and Incorporated herein by reference. All Services shall be subject to. and performed in accordance with, this Agreement, the exhibits attached hereto and incorporated herein by reference, and all applicable local, state and federal laws, rules and regulations."

"3.3.1 Compensation. Contractor shall receive compensation, including authorize reimbursement, for all services rendered under this Agreement as described throughout this Agreement, including Exhibit "C" attached hereto and incorporated herein by reference. The total compensation shall not exceed **One Million Four Hundred Forty-Four Thousand Nine Hundred and One Dollars ($1,444,901)** ("Total Compensation") without the City Manager's written approval. Extra Work may be authorized, as described under task list Exhibit "A", and if authorized, will be compensated at the rates and manner set forth in this Agreement."

Exhibit "A" is hereby revised adding Attachment A and incorporated herein by reference.

3.2 Continuing Effect of Agreement. Except as amended by this Amendment No. 9, all other provisions of the Agreement remain in full force and effect and shall govern the actions of the parties under this Amendment No. 9. From and after the date of this Amendment No. 9, whenever the term "Agreement" appears in the Agreement, it shall mean the Agreement as amended by this Amendment No. 9.

3.3 Adequate Consideration. The Parties hereto irrevocably stipulate and agree that they have each received adequate and independent consideration for the performance of the obligations they have undertaken pursuant to this Amendment No. 9.

3.4 Severability. If any portion of this Amendment No. 9 is declared invalid, illegal, or otherwise unenforceable by a court of competent jurisdiction, the remaining provisions shall continue in full force and effect.

3.5 Integration. This Amendment represents the entirety of the Parties' understanding relating to the subject of this Amendment, including written or verbal communications between the Parties, which shall have no relevance unless expressly incorporated herein. This is an integrated amendment.

Ontario CA 91761

Dear Adrian,

Thank you for the opportunity to submit this Fire Alarm System proposal for your review and approval. The proposed System is based upon the applicable National Fire Protection Association (NFPA) and local codes and standards. I've outlined my recommendation for your installation and service investment into the following sections.

- Scope of Work Overview
- Equipment Requirements
- Customer Responsibility
- Financial Terms and Conditions
- Estimated Time Considerations

Bay Alarm has been protecting businesses for over 75 years. We take pride in partnering with our customers to protect their people, property, and businesses. Providing you with excellent service is my top priority – please let me know if I can answer any of your questions.

Sincerely,

Jacqueline Donahue

FIRE ALARM SYSTEM PROPOSAL

SCOPE OF WORK OVERVIEW

Intent of System

Bay Alarm proposes to prepare fire alarm shop drawings for City of Ontario review and approval for an existing fire alarm system located at **2500 S. Archibald Ave Ontario CA 91761.** This is an existing 2 story building undergoing tenant improvements. The tenant of the building will be the Ontario Police Department. The building information, occupancy type, and occupancy load is as follows:

Construction Type:	Occupancy Type:	Occupant Load:	Sq. Footage:
III-B (Fully Sprinklered)	A, B, I		

The intent of this system is to:

1. Provide annunciation to the fire alarm system for the Police Department

Installation Notes

Bay Alarm will install the wiring, devices, and program the system to be monitored by our UL Listed Supervising Station. All work is to be performed Mon-Fri 8a-5p, unless specifically stated otherwise. After the system has received the final sign off by the local AHJ (Authority Having Jurisdiction), Bay Alarm will provide ongoing monitoring and NFPA 72 testing per the Service Agreement. Monthly billing will commence and is due as soon as the system is being monitored by our Central Station, that is typically prior to final inspection.

Wiring from the control panel to the field devices and appliances will be concealed where possible (without opening walls, painting, or patching). If access to open framing, above T-bar ceiling or other easily accessible spaces are not an option, exposed red wiring may be required.

Testing will be required before and during the final inspection; this includes sounding the Notification Appliances which will disrupt standard business operation. Bay Alarm will provide notice to the owners, but all testing will be performed during normal business hours. If after hour or weekend testing is required, this needs to be pre-arranged and is subject to additional charges.

Bay Alarm will remove the old fire alarm devices. Conduit will be surface mounted and not painted. Wire mold is not included. Bay Alarm to connect to duct smoke detectors furnished and installed by others. The units shall be powered by others (Electrical Contractor). If required by local AHJ, the units shall be wired for global shut down. Bay Alarm will provide monitoring of any installed units. If units are located on the roof, owner or owner's contractor to provide roof penetrations for cabling access. Bay Alarm does not include roof penetrations in its scope of work unless specifically noted.

Access to all areas needing equipment and/or wiring is to be the responsibility of the contracted party. Any issues or time lost due to accessibility issues are ground for additional labor charges and might delay original project timelines.

Unless specifically noted in the agreement, charges for testing are calculated using normal business hour timeframes (M-F, 8a-5p). If the contracted party wishes to change this, after hour charges will apply.

CUSTOMER RESPONSIBILITY

You agree to provide access to the work site and to perform and bear the cost of any work necessary to afford access and to close up after Bay Alarm has performed its Scope of Work.

- Customer to supply a dedicated 120v circuit run in conduit from service panel to any Fire Alarm Control Units and any Remote Power Supply Units in the field. All circuits must be dedicated to the fire alarm system and also must have a Red Breaker.
- Customer to provide dedicated circuit in IDF room
- Fan, dampers, HVAC controls for interfaces should be considered an extra unless specifically mentioned and outlined above. (Provided and installed by Mechanical Contractor).
- Troubleshooting of problems associated with installation activities by others will be billed at current billing rate.
- Changes to plans after submittal to the Architect that require reengineering of system, will result in additional charges.
- All required CAD files are to be provided and shall be clean, free of excessive details and 1/8” scale. All XREFS and fonts must be provided. If multiple XREFS are used per drawing, all XREFS must be bound to a single drawing. If files are not clean, additional charges may be required for drawing clean up.
- Electrical contractor to provide all necessary conduits for devices required.
- This quotation is based on our best assessment/understanding of the needs for this project. Additional items, devices, controls or services, which may be required by others or to comply with codes, should be considered an extra unless specifically agreed to in writing.
- This quotation includes only those devices and services listed above.
- All warranty activity will be between the hours of 8:00am – 5:00pm Monday through Friday (except Holidays) only.
- Bay Alarm has no control over other trades and will not be responsible for any delays in construction or liquidated damages.

WE GOT YOU.

SECTION 00500 – CONTRACT FOR CONSTRUCTION

This Contract for Construction ("Contract"), No. D&C3-014 OPD RTIC & TI Improvements is made and entered as of _____, by and between City of Ontario, with its principal place of business at 303 East "B" Street, Ontario, CA 91764, sometimes hereinafter called the "City" and **Wakeco, Inc.** sometimes hereinafter called "Contractor."

WITNESSETH: That the parties hereto have mutually covenanted and agreed, and by these presents do covenant and agree with each other as follows:

ARTICLE 1. SCOPE OF WORK.

The Contractor shall perform all Work within the time stipulated in the Contract, and shall provide all labor, materials, equipment, tools, utility services, and transportation to complete all of the Work required in strict compliance with the Contract Documents as specified in Article 5, below, for the following Project:

D&C 23-014 OPD RTIC & T.I. Improvements

Contractor is an independent contractor and not an agent of the City. The Contractor and its surety shall be liable to the City for any damages arising as a result of the Contractor's failure to comply with this obligation.

ARTICLE 2. TIME FOR COMPLETION.

Time is of the essence in the performance of the Work. The Work shall be commenced on the date stated in the City's Notice to Proceed. The Contractor shall complete all Work required by the Contract Documents within 365 calendar days from the commencement date stated in the Notice to Proceed. By its signature hereunder, Contractor agrees the time for completion set forth above is adequate and reasonable to complete the Work.

ARTICLE 3. CONTRACT PRICE.

The City shall pay to the Contractor as full compensation for the performance of the Contract, subject to any additions or deductions as provided in the Contract Documents, and including all applicable taxes and costs, the sum of **Three Million Six Hundred Eleven Thousand Dollars**

(**$ 3,611,000**). Payment shall be made as set forth in the General Conditions. The City will pay to Contractor compensation based upon the prices set forth in the Bid Schedule.

ARTICLE 4. LIQUIDATED DAMAGES.

Contractor acknowledges that the City will sustain actual damages for each and every Day completion of the Project is delayed beyond the Contract Time. Because of the nature of the Project, it would be impracticable or extremely difficult to determine the City's actual damages. Accordingly, in accordance with Government Code section 53069.85, it is agreed that the Contractor will pay the City the sum of $500.00 for each and every calendar day of delay beyond the time prescribed in the Contract Documents for finishing the Work, as Liquidated Damages and not as a penalty or forfeiture. In the event this is not paid, the Contractor agrees the City may deduct that amount from any money due or that may become due the Contractor under the Contract. This Section does not exclude recovery of other damages specified in the Contract Documents. Liquidated damages may be deducted from progress payments due Contractor, Project retention or may be collected directly from Contractor, or from Contractor's surety. These provisions for liquidated damages shall not prevent the City, in case of Contractor's default, from terminating the Contractor.

Consistent with Public Contract Code Section 7102, Contractor will be compensated for damages incurred due to delays for which the City is responsible. The parties agree that determining Contractor's exact delay damages is and will continue to be impracticable and extremely difficult. As such, for each calendar day in excess of the Contract Time, the City shall pay to the Contractor $250.00 per day as Reverse Liquidated Damages and not as a penalty or forfeiture. Such amount shall constitute the only payment allowed for any City caused delays and shall necessarily include all overhead, all profits, all administrative costs, all bond costs, all labor, materials, equipment and rental costs and any other costs, expenses and fees incurred or sustained as a result of such delays. Notice of requests for delay damages and additional days shall be provided to the City within five (5) Days from the discovery of the circumstances giving rise to any delay or three (3) Days from the discovery of any latent or subsurface conditions giving rise to a delay.

ARTICLE 5. COMPONENT PARTS OF THE CONTRACT.

The "Contract Documents" include the following

Notice Inviting Bids
Instructions to Bidders
Bid Forms
Bid Acknowledgement
Bid Schedule
Bid Guarantee
Designation of Subcontractors
Information Required of Bidders
Non-Collusion Declaration Form
Iran Contracting Act Certification
Public Works Contractor DIR Registration Certification
Performance Bond
Payment (Labor and Materials) Bond
Contract for Construction

General Conditions
Special Conditions
Specifications
Addenda
Construction Plans and Drawings
Standard Specifications for Public Works Construction “Greenbook”, latest edition, Except Sections 1-9
Applicable Local Agency Standards and Specifications, as last revised
Reference Specifications
Any other documents contained in or incorporated into the Contract

The Contractor shall complete the Work in strict accordance with all of the Contract Documents.

All of the Contract Documents are intended to be complementary. Work required by one of the Contract Documents and not by others shall be done as if required by all. In the event of conflict, the various Contract Documents will be given effect in the order set forth in the General Conditions. This Contract shall supersede any prior agreement of the parties.

ARTICLE 6. PROVISIONS REQUIRED BY LAW AND CONTRACTOR COMPLIANCE.

Each and every provision of law required to be included in these Contract Documents shall be deemed to be included in these Contract Documents. The Contractor shall comply with all requirements of applicable federal, state and local laws, rules and regulations, including, but not limited to, the provisions of the California Labor Code and California Public Contract Code which are applicable to this Work.

ARTICLE 7. INDEMNIFICATION.

Contractor shall provide indemnification and defense as set forth in the General Conditions.

ARTICLE 8. PREVAILING WAGES.

Contractor shall be required to pay the prevailing rate of wages in accordance with the Labor Code which such rates shall be made available at the City’s Office or may be obtained online at http://www.dir.ca.gov and which must be posted at the job site.

ARTICLE 9. FALSE CLAIMS.

Contractor acknowledges that if a false claim is submitted to the City, it may be considered fraud and Contractor may be subject to criminal prosecution. Contractor acknowledges that the False Claims Act, California Government Code sections 12650, et seq., provides for civil penalties where a person knowingly submits a false claim to a public entity. These provisions include within their scope false claims made with deliberate ignorance of the false information or in reckless disregard of the truth or falsity of the information. In the event the City seeks to recover penalties pursuant to the False Claims Act, it is entitled to recover its litigation costs, including attorneys’ fees. Contractor hereby acknowledges that the filing of a false claim may the Contractor to an administrative debarment proceeding wherein Contractor may be prevented from further bidding on public contracts for a period of up to five (5) years.

[REMAINDER OF PAGE LEFT INTENTIONALLY BLANK]

SECTION 00610 – BOND FORMS

Performance Bond

KNOW ALL PERSONS BY THESE PRESENTS:

THAT WHEREAS, the City of Ontario, with its principal place of business at 303 East "B" Street, Ontario, CA 91764, (hereinafter referred to as the "City") has awarded to _____, (hereinafter referred to as the "Contractor") an agreement for **Contract No.**_____, (hereinafter referred to as the "Project").

WHEREAS, the work to be performed by the Contractor is more particularly set forth in the Contract Documents for the Project dated _____, (hereinafter referred to as "Contract Documents"), the terms and conditions of which are expressly incorporated herein by reference; and

WHEREAS, the Contractor is required by said Contract Documents to perform the terms thereof and to furnish a bond for the faithful performance of said Contract Documents.

NOW, THEREFORE, we, _____, the undersigned Contractor and _____ as Surety, a corporation organized and duly authorized to transact business under the laws of the State of California, are held and firmly bound unto the City in the sum of _____ DOLLARS, ($_____), said sum being not less than one hundred percent (100%) of the total amount of the Contract, for which amount well and truly to be made, we bind ourselves, our heirs, executors and administrators, successors and assigns, jointly and severally, firmly by these presents.

THE CONDITION OF THIS OBLIGATION IS SUCH, that, if the Contractor, his or its heirs, executors, administrators, successors or assigns, shall in all things stand to and abide by, and well and truly keep and perform the covenants, conditions and agreements in the Contract Documents and any alteration thereof made as therein provided, on its part, to be kept and performed at the time and in the manner therein specified, and in all respects according to their intent and meaning; and shall faithfully fulfill all obligations including the one (1) year guarantee of all materials and workmanship; and shall indemnify and save harmless the City, its officials, officers, employees, and authorized volunteers, as stipulated in said Contract Documents, then this obligation shall become null and void; otherwise it shall be and remain in full force and effect.

As a part of the obligation secured hereby and in addition to the face amount specified therefore, there shall be included costs and reasonable expenses and fees including reasonable attorney's fees, incurred by the City in enforcing such obligation.

As a condition precedent to the satisfactory completion of the Contract Documents, unless otherwise provided for in the Contract Documents, the above obligation shall hold good for a period of one (1) year after the acceptance of the work by the City, during which time if Contractor shall fail to make full, complete, and satisfactory repair and replacements and totally protect the City from loss or damage resulting from or caused by defective materials or faulty workmanship. The obligations of Surety hereunder shall continue so long as any obligation of Contractor remains. Nothing herein shall limit the City's rights or the Contractor or Surety's obligations under

the Contract, law or equity, including, but not limited to, California Code of Civil Procedure Section 337.15.

Whenever Contractor shall be, and is declared by the City to be, in default under the Contract Documents, the Surety shall remedy the default pursuant to the Contract Documents, or shall promptly, at the City's option:

i. Take over and complete the Project in accordance with all terms and conditions in the Contract Documents; or

ii. Obtain a bid or bids for completing the Project in accordance with all terms and conditions in the Contract Documents and upon determination by Surety of the lowest responsive and responsible bidder, arrange for a Contract between such bidder, the Surety and the City, and make available as work progresses sufficient funds to pay the cost of completion of the Project, less the balance of the contract price, including other costs and damages for which Surety may be liable. The term "balance of the contract price" as used in this paragraph shall mean the total amount payable to Contractor by the City under the Contract and any modification thereto, less any amount previously paid by the City to the Contractor and any other set offs pursuant to the Contract Documents.

iii. Permit the City to complete the Project in any manner consistent with California law and make available as work progresses sufficient funds to pay the cost of completion of the Project, less the balance of the contract price, including other costs and damages for which Surety may be liable. The term "balance of the contract price" as used in this paragraph shall mean the total amount payable to Contractor by the City under the Contract and any modification thereto, less any amount previously paid by the City to the Contractor and any other set offs pursuant to the Contract Documents.

Surety expressly agrees that the City may reject any contractor or subcontractor which may be proposed by Surety in fulfillment of its obligations in the event of default by the Contractor.

Surety shall not utilize Contractor in completing the Project nor shall Surety accept a bid from Contractor for completion of the Project if the City, when declaring the Contractor in default, notifies Surety of the City's objection to Contractor's further participation in the completion of the Project.

The Surety, for value received, hereby stipulates and agrees that no change, extension of time, alteration or addition to the terms of the Contract Documents or to the Project to be performed thereunder shall in any way affect its obligations on this bond, and it does hereby waive notice of any such change, extension of time, alteration or addition to the terms of the Contract Documents or to the Project.

END OF PERFORMANCE BOND

Payment Bond (Labor and Materials).

KNOW ALL MEN BY THESE PRESENTS That

WHEREAS, the City of Ontario , with its principal place of business at 303 East "B" Street, Ontario, CA 91764 (hereinafter designated as the "City"), by action taken or a resolution passed _____ , 20_____, has awarded to _____ hereinafter designated as the "Principal," a contract for the work described as follows: **Contract No.**_____ (the "Project"); and

WHEREAS, the work to be performed by the Contractor is more particularly set forth in the Contract Documents for the Project dated _____, (hereinafter referred to as "Contract Documents"), the terms and conditions of which are expressly incorporated herein by reference; and

WHEREAS, said Principal is required to furnish a bond in connection with said contract; providing that if said Principal or any of its Subcontractors shall fail to pay for any materials, provisions, provender, equipment, or other supplies used in, upon, for or about the performance of the work contracted to be done, or for any work or labor done thereon of any kind, or for amounts due under the Unemployment Insurance Code or for any amounts required to be deducted, withheld, and paid over to the Employment Development Department from the wages of employees of said Principal and its Subcontractors with respect to such work or labor the Surety on this bond will pay for the same to the extent hereinafter set forth.

NOW THEREFORE, we, the Principal and _____ as Surety, are held and firmly bound unto the City in the penal sum of _____ Dollars ($_____) lawful money of the United States of America, for the payment of which sum well and truly to be made, we bind ourselves, our heirs, executors, administrators, successors and assigns, jointly and severally, firmly by these presents.

THE CONDITION OF THIS OBLIGATION IS SUCH that if said Principal, his or its subcontractors, heirs, executors, administrators, successors or assigns, shall fail to pay any of the persons named in Civil Code Section 9100, fail to pay for any materials, provisions or other supplies, used in, upon, for or about the performance of the work contracted to be done, or for any work or labor thereon of any kind, or amounts due under the Unemployment Insurance Code with respect to work or labor performed under the contract, or for any amounts required to be deducted, withheld, and paid over to the Employment Development Department or Franchise Tax Board from the wages of employees of the contractor and his subcontractors pursuant to Revenue and Taxation Code Section 18663, with respect to such work and labor the Surety or Sureties will pay for the same, in an amount not exceeding the sum herein above specified, and also, in case suit is brought upon this bond, all litigation expenses incurred by the City in such suit, including reasonable attorneys' fees, court costs, expert witness fees and investigation expenses.

This bond shall inure to the benefit of any of the persons named in Civil Code Section 9100 so as to give a right of action to such persons or their assigns in any suit brought upon this bond.

It is further stipulated and agreed that the Surety on this bond shall not be exonerated or released from the obligation of this bond by any change, extension of time for performance, addition, alteration or modification in, to, or of any contract, plans, specifications, or agreement pertaining or relating to any scheme or work of improvement herein above described, or pertaining or relating

to the furnishing of labor, materials, or equipment therefore, nor by any change or modification of any terms of payment or extension of the time for any payment pertaining or relating to any scheme or work of improvement herein above described, nor by any rescission or attempted rescission or attempted rescission of the contract, agreement or bond, nor by any conditions precedent or subsequent in the bond attempting to limit the right of recovery of claimants otherwise entitled to recover under any such contract or agreement or under the bond, nor by any fraud practiced by any person other than the claimant seeking to recover on the bond and that this bond be construed most strongly against the Surety and in favor of all persons for whose benefit such bond is given, and under no circumstances shall Surety be released from liability to those for whose benefit such bond has been given, by reason of any breach of contract between the owner or the City and original contractor or on the part of any obligee named in such bond, but the sole conditions of recovery shall be that claimant is a person described in Civil Code Section 9100, and has not been paid the full amount of his claim.

The Surety, for value received, hereby stipulates and agrees that no change, extension of time, alteration or addition to the terms of the Contract to be performed thereunder, shall in any way affect its obligations on this bond, and it does hereby waive notice of any such change, extension of time, alteration or addition to the terms of Contract, including but not limited to, the provisions of Sections 2819 and 2845 of the California Civil Code.

END OF PAYMENT BOND

SECTION 00700 – GENERAL CONDITIONS

ARTICLE 1 -TERMS; DEFINITIONS

1.1 Defined Terms

A. Whenever used in the Contract Documents and printed with initial capital letters, the terms listed below will have the meanings indicated which are applicable to both the singular and plural thereof. In addition to terms specifically defined below, terms with initial capital letters in the Contract Documents include references to identified articles and paragraphs, and the titles of other documents or forms.

1. Act of God – An earthquake of magnitude of 3.5 or higher on the Richter scale or a tidal wave.

2. Addenda -- Written or graphic instruments issued prior to the submission of Bids which clarify, correct, or change the Contract Documents.

3. Additional Work -- New or unforeseen work will be classified as "Additional Work" when the Engineer determines that it is not covered by the Contract.

4. Applicable Laws -- The laws, statutes, ordinances, rules, codes, regulations, permits, and licenses of any kind, issued by local, state or federal governmental authorities or private authorities with jurisdiction (including utilities), to the extent they apply to the Work.

5. Bid -- The offer or proposal of a Bidder submitted on the prescribed form setting forth the prices and other terms for the Work to be performed.

6. Bid Guarantee -- The Bid Bond, cashier's check, or certified check to be made by the Bidder, which is to accompany the Bid as a guaranty of good faith to enter into a written contract.

7. Bidder -- The individual or entity who submits a Bid directly to the City.

8. Change Order ("CO") -- A document that authorizes an addition, deletion, or revision in the Work or an adjustment in the Contract Price or the Contract Times, issued on or after the Effective Date of the Contract, in accordance with the Contract Documents and in the form contained in the Contract Documents.

9. Change Order Request ("COR") -- A request made by the Contractor for an adjustment in the Contract Price and/or Contract Times as the result of a Contractor-claimed change to the Work.

10. City's Representative – The City of Ontario, and acting through properly authorized agents, such as the Engineer or such other agents acting within the scope of the particular duties entrusted to them. Also sometimes referred to as the "City's Representative" or "Representative" in the Contract Documents. The terms the City and Owner may be used interchangeably

11. Claim -- A demand or assertion by the City or Contractor seeking an adjustment of Contract Price or Contract Times, or both, or other relief with respect to the terms of the Contract. A demand for money or services by a third party is not a Claim.

12. Contract -- The entire integrated written agreement between the City and Contractor concerning the Work. “Contract” may be used interchangeably with “Agreement” in the Contract Documents. The Contract supersedes prior negotiations, representations, or agreements, whether written or oral, and includes all Contract Documents.

13. Contract Documents -- The documents listed in Section 00 52 13, Article 5 of the Contract for Construction. Some documents provided by the City to the Bidders and Contractor, including but not limited to reports and drawings of subsurface and physical conditions are not Contract Documents.

14. Contract Price -- Amount to be paid by the City to the Contractor as full compensation for the performance of the Contract and completion of the Work, subject to any additions or deductions as provided in the Contract Documents, and including all applicable taxes and costs.

15. Contract Time -- The number of days or the dates stated in the Contract Documents to: achieve defined milestones, if any; and to complete the Work so that it is ready for final payment.

16. Contractor -- The individual or entity with which the City has contracted for performance of the Work.

1. Contractor’s Designated On-Site Representative -- The Contractor’s Designated On-Site Representative will be identified by the Contractor and shall not be changed without prior written consent of the City.

2. Critical Supply Shortage -- An unusual shortage in materials that is (a) supported by documented proof that Contractor made every effort to obtain such materials from all available sources; (b) such shortage is due to the fact that such materials are not physically available from single or multiple sources or could have been obtained only at exorbitant prices entirely inconsistent with current and standard rates taking into account the quantities involved and the usual industry practices in obtaining such quantities; and (c) such shortages and the difficulties in obtaining alternate sources of materials could not have been known or anticipated by Contractor at the time it submitted its bid or entered the Contract. Market fluctuations in prices of materials, whether or not resulting from a Force Majeure Event, does not constitute a Critical Supply Shortage.

3. Day -- A calendar day of 24 hours measured from midnight to the next midnight.

4. Defective Work -- Work that is unsatisfactory, faulty, or deficient; or that does not conform to the Contract Documents; or that does not meet the requirements of any inspection, reference standard, test, or approval referenced in the Contract Documents.

5. Demobilization -- The complete dismantling and removal by the Contractor of all of the Contractor's temporary facilities, equipment, and personnel at the Site.

6. Drawings -- That part of the Contract Documents prepared by of the Engineer of Record which graphically shows the scope, extent, and character of the Work to be performed by Contractor. Shop Drawings and other Contractor Submittals are not Drawings as so defined.

7. Effective Date of the Contract -- The date indicated in the Contract on which it becomes effective, but if no such date is indicated, it means the date on which the Contract is signed and delivered by the last of the two parties to sign and deliver.

8. Engineer -- Whenever not qualified, shall mean the City Engineer or the Engineer authorized to act for and in behalf of the City, acting either directly or through properly authorized agents, such agents acting severally within the scope of the particular duties entrusted to them.

9. Force Majeure Event -- An event that materially affects a party's performance and is one or more of the following: (1) Acts of God or other natural disasters occurring at the Site; (2) terrorism or other acts of a public enemy; (3) orders of governmental authorities (including, without limitation, unreasonable and unforeseeable delay in the issuance of permits or approvals by governmental authorities that are required for the Work); (4) pandemics, epidemics or quarantine restrictions; (5) strikes and other organized labor action occurring at the Site and the effects thereof on the Work, only to the extent such strikes and other organized labor action are beyond the control of Contractor and its Subcontractors, of every Tier, and to the extent the effects thereof cannot be avoided by use of replacement workers; and (6) a Critical Supply Shortage. For purposes of this section, "orders of governmental authorities," includes ordinances, emergency proclamations and orders, rules to protect the public health, welfare and safety, and other actions of the City in its capacity as a municipal authority.

10. Hazardous Waste -- The term "Hazardous Waste" shall have the meaning provided in Section 104 of the Solid Waste Disposal Act (42 U.S.C. § 6903) as amended from time to time, or any substance or material identified as hazardous under any state or federal statute governing handling, disposal and/or cleanup of any such substance or material, whichever is more restrictive.

11. Holiday – Holidays occur on:

    New Year's Day - January 1
    President's Day – Third Monday in February
    Memorial Day - Last Monday in May
    Independence Day - July 4
    Labor Day - First Monday in September
    Veteran's Day - November 11
    Thanksgiving Day - Fourth Thursday in November
    Friday after Thanksgiving
    Christmas Eve – December 24

Christmas Day - December 25
Day After Christmas – December 26
New Year's Eve – December 31

If any Holiday listed above falls on a Saturday, Saturday and the preceding Friday are both Holidays. If the Holiday should fall on a Sunday, Sunday and the following Monday are both Holidays.

12. Notice of Award -- The written notice by the City to the Successful Bidder stating that upon timely compliance by the Successful Bidder with the conditions precedent listed therein, the City will sign and deliver the Contract.

13. Notice of Completion -- The form which may be executed by the City constituting final acceptance of the Project.

14. Notice to Proceed -- A written notice given by the City to Contractor fixing the date on which the Contractor may proceed with the Work and when Contract Times will commence to run.

15. Project -- The total construction of which the Work to be performed under the Contract Documents may be the whole, or a part.

16. Record Drawings – The record set of as-builts prepared by the Contractor during the Work in accordance with the requirements of the General Conditions.

17. Recyclable Waste Materials -- Materials removed from the Site which are required to be diverted to a recycling center rather than an area landfill. Recyclable Waste Materials include, but are not limited to, asphalt, concrete, brick, concrete block, and rock.

18. Sample -- A physical example furnished by the Contractor to illustrate materials, equipment or workmanship; to establish standards by which the Work will be judged.

19. Schedule of Submittals -- A schedule, prepared and maintained by Contractor, of required submittals and the time requirements to facilitate scheduled performance of related construction activities.

20. Shop Drawings -- All drawings, diagrams, illustrations, schedules, and other data or information which are specifically prepared or assembled by or for Contractor and submitted by Contractor to illustrate some portion of the Work.

21. Site -- Lands or areas indicated in the Contract Documents as being furnished by the City upon which the Work is to be performed, including rights-of-way and easements for access thereto, and such other lands furnished by the City which are designated for the use of Contractor.

22. Specifications -- That part of the Contract Documents consisting of written requirements for materials, equipment, systems, standards and workmanship as

applied to the Work, and certain administrative requirements and procedural matters applicable thereto.

23. Stop Payment Notice -- A written notice as defined in Civil Code section 8044.

24. Subcontractor -- An individual or entity other than a Contractor having a contract with any other entity than the City for performance of any portion of the Work at the Site.

25. Submittal -- Written and graphic information and physical samples prepared and supplied by the Contractor demonstrating various portions of the Work.

26. Successful Bidder -- The responsible Bidder submitting a responsive Bid to whom the City makes an award.

27. Supplier -- A manufacturer, fabricator, supplier, distributor, material man, or vendor having a direct contract with Contractor or with any Subcontractor to furnish materials or equipment used in the performance of the Work or to be incorporated in the Work.

28. Underground Facilities -- All underground pipelines, conduits, ducts, cables, wires, manholes, vaults, tanks, tunnels, or other such facilities or attachments, and any encasements containing such facilities, including those that convey electricity, gases, steam, liquid petroleum products, telephone or other communications, cable television, water, wastewater, storm water, other liquids or chemicals, or traffic or other control systems.

29. Unit Price Work -- Work to be paid for on the basis of unit prices as provided by the Contractor in its Bid or as adjusted in accordance with the Contract Documents.

30. Warranty -- A guarantee provided to the City by the Contractor that the Work will remain free of defects and suitable for its intended use for the period required by the Contract Documents or the longest period permitted by the law of this state, whichever is longer.

31. Work -- The entire construction or the various separately identifiable parts thereof required to be provided under the Contract Documents. Work includes and is the result of performing or providing all labor, services, and documentation necessary to produce such construction, and furnishing, installing, and incorporating all materials and equipment into such construction, all as required by the Contract Documents.

1.2 Terminology.

A. The words and terms below are not defined but, when used in the Contract Documents, have the indicated meaning.

1. The word “furnish,” when used in connection with services, materials, or equipment, shall mean to supply and deliver said services, materials, or equipment

to the Site (or some other specified location) ready for use or installation and in usable or operable condition.

2. The word “install,” when used in connection with services, materials, or equipment, shall mean to put into use or place in final position said services, materials, or equipment complete and ready for intended use.

3. The words “perform” or “provide,” when used in connection with services, materials, or equipment, shall mean to furnish and install said services, materials, or equipment complete and ready for intended use.

4. Regardless of whether “furnish,” “install,” “perform,” or “provide” is used in connection with services, materials, or equipment, an obligation of Contractor is implied.

B. Unless stated otherwise in the Contract Documents, words or phrases that have a well-known technical or construction industry or trade meaning are used in the Contract Documents in accordance with such recognized meaning.

ARTICLE 2 -PRELIMINARY MATTERS

2.1 Delivery of Contract Documents

A. Within ten (10) Days after receipt of the Notice of Award and before the City will execute the Contract, the Contractor shall furnish and file with the City a signed Contract and the necessary Performance Bond, Payment Bond, and Certificates of Insurance and Endorsements, as well as any other documents specified in the Contract Documents.

2.2 Bonds

A. Contractor shall submit the bonds on the forms provided with the Contract Documents, duly executed by a responsible corporate surety admitted to transact surety business in the State of California, as defined in Code of Civil Procedure section 995.120, and listed in the United States Department of the Treasury circular entitled "Companies Holding Certificates of Authority as Acceptable Sureties on Federal Bonds and as Acceptable Reinsuring Companies," authorized to do business in the State of California and acceptable to the City conditioned upon the faithful performance by the Contractor of all requirements of the Contract Documents. Each of the bonds shall be in a sum no less than one hundred percent (100%) of the Contract Price. Bonds shall be delivered to the City within ten (10) Days after receipt of the Notice of Award and before execution of the Contract by the City.

2.3 Evidence of Insurance

A. Prior to commencing any Work but no later than ten (10) Days after receipt of the Notice of Award, the Contractor shall submit or cause to be submitted any and all Certificates of Insurance and Endorsements, showing that the Contractor has the required insurance, to the attention of the City. Such insurance is to be provided at

the sole cost and expense of the Contractor. No Work shall be performed until all of the required insurance has been received and approved.

2.4 Execution of the Contract

A. Upon receipt of the required Contract Documents, the City will execute the Contract, establishing the Effective Date of the Contract.

2.5 Contractor's Failure to Perform

A. Should Contractor fail to comply with timelines provided above, the City shall retain the right to enforce and collect on the Contractor's Bid Guarantee, rescind award to the Contractor and award the Contract to the next lowest responsive, responsible bidder as determined by the City. If the City elects to accept bonds and insurance submitted late, the Contract Times will begin to run as of the date stated in the Notice to Proceed. However, the number of days beyond the original ten (10) Days it took to receive the properly executed Contract and related items may be deducted from the Contract Times.

2.6 Commencement of Contract Times; Notice to Proceed

A. The City will not issue a Notice to Proceed until after the Effective Date of the Contract. Work shall commence within ten (10) Days of the date stated in the Notice to Proceed. The Contract Times begin to run on the date specified in the Notice to Proceed. No Work shall be done at the Site prior to the issuance of the Notice to Proceed.

2.7 Copies of Documents

A. Contractor will be furnished, free of charge, five (5) copies of the Contract Documents. Additional copies may be obtained at cost of reproduction. Contractor shall maintain a clean, undamaged set of Contract Documents, including Submittals, at the Project site.

2.8 Substitution Requests, Schedule of Submittals, and Schedule

A. Substitution Requests. Within thirty-five (35) days of Contract award (unless otherwise specified in the Contract Documents), Contractor shall provide all substitution requests as further described in the General Conditions.

B. Schedule of Submittals. Within five (5) Days after the issuance of the Notice of Proceed (unless otherwise specified in the Contract Documents), Contractor shall submit to the City a Schedule of Submittals that conforms with the requirements of Section 00 72 00, Article 5.21.

C. Schedule. Within ten (10) days after the issuance of the Notice of Proceed (unless otherwise specified in the Contract Documents), the Contractor shall submit a construction schedule that conforms with the requirements of Section 00 72 00, Article 8.2.

2.9 Preconstruction Conference; Designation of Authorized Representatives.

A. Before any Work at the Site is started, a conference attended by the City, Contractor, Engineer, and others as appropriate will be held to establish a working understanding among the parties as to the Work and to discuss the schedules referred to herein, procedures for handling Submittals and Shop Drawings, processing applications for payment, and maintaining required records.

B. At this conference the City and Contractor each shall designate, in writing, a specific individual to act as its authorized representative with respect to the services and responsibilities under the Contract. Such individuals shall have the authority to transmit instructions, receive information, render decisions relative to the Contract, and otherwise act on behalf of each respective party.

2.10 Subcontractor Mobilization Meeting.

A. Prior to the start of each major Subcontractor's Site Work, the Contractor, the involved Subcontractor, and Engineer shall attend a pre-start meeting to discuss the schedule, coordination, procedures, and other administrative issues.

2.11 Authority of Council; Engineer

A. The City Council has the final authority in all matters affecting the Work. Within the scope of the Contract, the Engineer has the authority to enforce compliance with the Contract Documents. The Contractor shall promptly comply with instructions from the Engineer.

B. The decision of the Engineer is final and binding on all questions relating to:

1. quantities;

2. acceptability of material, equipment, or work;

3. execution, progress or sequence of work;

4. interpretation of the Plans, Specifications, or other Contract Documents; and

5. Any other areas specifically identified in the Contract Documents or under the law.

C. Compliance with instructions from the Engineer shall be a condition precedent to any payment under the Contract, unless otherwise ordered by the City Council.

2.12 Mobilization

A. When a Bid item is included in the Bid Schedule for mobilization, the costs of Work in advance of construction operations and not directly attributable to any specific bid item will be included in the progress estimate. When no bid item is provided for mobilization payment for such costs will be deemed to be included in the other items of the Work.

B. Payment for mobilization based on the lump sum provided in the Bid Schedule, shall constitute full compensation for all such Work. No payment for mobilization will be made until all of the listed items have been completed to the satisfaction of the Engineer. The scope of the Work included under mobilization shall include, but shall not be limited to, the following principal items:

1. Obtaining and paying for all bonds, insurance, and permits.

2. Moving on to the Project Site of all Contractor's plant and equipment required for the first month's operations.

3. Installing temporary construction power, wiring, and lighting facilities, as applicable.

4. Establishing fire protection system, as applicable.

5. Developing and installing a construction water supply, as applicable.

6. Providing and maintaining the field office trailers for the Contractor, if necessary, and the Engineer (if specified), complete, with all specified furnishings and utility services.

7. Providing on-site sanitary facilities and potable water facilities as specified per Cal-OSHA and these Contract Documents.

8. Furnishing, installing, and maintaining all storage buildings or sheds required for temporary storage of products, equipment, or materials that have not yet been installed in the Work. All such storage shall meet manufacturer's specified storage requirements, and the specific provisions of the specifications, including temperature and humidity control, if recommended by the manufacturer, and for all security.

9. Arranging for and erection of Contractor's work and storage yard.

10. Posting all OSHA required notices and establishment of safety programs per Cal-OSHA.

11. Full-time presence of Contractor's superintendent at the job Site as required herein.

12. Submittal of construction schedule as required by the Contract Documents.

ARTICLE 3 -CONTRACT DOCUMENTS; INTENT

3.1 Examination of Drawings, Specifications, and Site of Work

A. Examination of Contract Documents; Site. Before commencing any portion of the Work, Contractor shall again carefully examine all applicable Contract Documents, the Project Site, and other information given to Contractor as to materials and methods of construction and other Project requirements. Contractor shall

immediately notify the Engineer of any potential error, inconsistency, ambiguity, conflict, or lack of detail or explanation. If Contractor performs, permits, or causes the performance of any Work which is in error, inconsistent or ambiguous, or not sufficiently detailed or explained, Contractor shall bear any and all resulting costs, including, without limitation, the cost of correction. In no case shall the Contractor or any Subcontractor proceed with Work if uncertain as to the applicable requirements.

B. Additional Instructions. After notification of any error, inconsistency, ambiguity, conflict, or lack of detail or explanation, the Engineer will provide any required additional instructions, by means of drawings or other written direction, necessary for proper execution of Work.

C. Quality of Parts, Construction and Finish. All parts of the Work shall be of the best quality of their respective kinds and the Contractor must use all diligence to inform itself fully as to the required construction and finish.

D. Contractor's Variation from Contract Document Requirements. If it is found that the Contractor has varied from the requirements of the Contract Documents including the requirement to comply with all Applicable Laws, the Engineer may at any time, before or after completion of the Work, order the improper Work removed, remade or replaced by the Contractor at the Contractor's expense.

3.2 Intent of Contract Documents

A. The Contract Documents are complementary; what is required by any one will be binding as if required by all. It is the intent of the Contract Documents to describe a functionally complete Project (or part thereof) to be constructed in accordance with the Contract Documents. Any labor, documentation, services, materials, or equipment that reasonably may be inferred from the Contract Documents or from prevailing custom or trade usage as being required to produce the indicated result will be provided whether or not specifically called for, at no additional cost to the City.

B. The Contractor shall furnish, unless otherwise provided in the Contract Documents, all materials, implements, machinery, equipment, tools, supplies and labor necessary to the prosecution and completion of the Project.

C. Clarifications and interpretations of the Contract Documents shall be issued by the Engineer as provided in these General Conditions.

D. If utilities to equipment/fixtures are not shown but are necessary to operate the equipment/fixtures, the utilities service installation is considered to be part of the Work. The implied Work will conform to the appropriate sections of the Contract Documents.

E. Organization of the Contract Documents into divisions, sections, and articles, and arrangement of drawings shall not control the Contractor in dividing Work among Subcontractors or in establishing the extent of Work to be performed by any trade.

3.3 Reference Standards.

A. Standards, Specifications, Codes, Laws, and Regulations.

1. Reference to federal specifications, federal standards, other standards, specifications, manuals, or codes of any technical society, organization, or association, or to Applicable Laws, whether such reference be specific or by implication, shall mean the standard, specification, manual, code, or Applicable Laws in effect at the time of opening of Bids (or on the Effective Date of the Contract if there were no Bids), except as may be otherwise specifically stated in the Contract Documents.

2. No provision of any such standard, specification, manual, or code, or any instruction of a Supplier, shall be effective to change the duties or responsibilities of the City, Contractor, or any of their Subcontractors, consultants, agents, or employees, from those set forth in the Contract Documents. No such provision or instruction shall be effective to assign to the City, or any of their officers, directors, members, partners, employees, agents, consultants, or subcontractors, any duty or authority to supervise or direct the performance of the Work or any duty or authority to undertake responsibility inconsistent with the provisions of the Contract Documents.

3.4 Reporting and Resolving Discrepancies; Order of Precedence.

A. Reporting Discrepancies.

1. The Contract Documents are intended to be fully cooperative and complementary. Before undertaking each part of the Work, Contractor shall carefully study and compare the Contract Documents and check and verify pertinent figures therein and all applicable field measurements. Contractor shall promptly report in writing to the City any conflict, error, ambiguity, or discrepancy which Contractor discovers, should have discovered, or has actual knowledge of, and shall obtain a written interpretation or clarification from the City before proceeding with any Work affected thereby. If, during the performance of the Work, Contractor discovers any conflict, error, ambiguity, or discrepancy within the Contract Documents, or between the Contract Documents and (i) any Applicable Law, (ii) any standard, specification, manual, or code, or (iii) any instruction of any Supplier, then Contractor shall promptly submit a written Request for Information (RFI) to the City. Contractor shall not proceed with the Work affected thereby (except in an emergency) until an amendment or supplement to the Contract Documents has been issued by one of the methods indicated in the Contract Documents, and any Work performed by Contractor before receipt of an amendment or supplement shall be at Contractor's own risk.

B. Order of Precedence.

1. In case of conflicts between the Contract Documents, the order of precedence shall be as follows:

a. Permits from other agencies as may be required by law

b. Change Orders, most recent first

c. Contract

d. Addenda, most recent first

e. Special Conditions

f. Specifications

g. Construction Plans and Drawings(Contract Drawings)

h. General Conditions

i. Instructions to Bidders

j. Notice Inviting Bids

k. Contractor's Bid (Bid Forms)

l. Standard Specifications for Public Works Construction "Greenbook" latest edition (Sections 1-9 Excluded)

m. Applicable Local Agency Standards and Specifications

n. Standard Drawings

o. Reference Documents

2. With reference to the Drawings the order of precedence shall be as follows:

a. Figures govern over scaled dimensions

b. Detail drawings govern over general drawings

c. Addenda/Change Order drawings govern over Drawings

d. Contract Drawings govern over Standard Drawings

e. Contract Drawings govern over Shop Drawings

3. Notwithstanding the orders of precedence established above, in the event of conflicts, the higher standard, higher quality and most expensive shall always apply.

3.5 Amending and Supplementing Contract Documents.

A. The Contract Documents may be amended to provide for additions, deletions, and revisions in the Work or to modify the terms and conditions thereof only by Change Order or written amendment to the Contract duly executed by the parties.

B. The requirements of the Contract Documents may be supplemented, and minor variations and deviations in the Work may be authorized at no cost to the City, by one or more of the following ways:

1. The City's review of a Submittal, Shop Drawing, Sample or substitution request without exception (subject to the provisions of the Contract Documents); or

2. The City's issuance of a response to an RFI.

C. However, no review or RFI response will reduce or modify the Contractor's obligation to fully satisfy and comply with the requirements of the Contract Documents.

3.6 Reuse of Documents.

A. Contractor and any Subcontractor or Supplier shall not:

1. have or acquire any title to or ownership rights in any of the Drawings, Specifications, or other documents (or copies of any thereof) prepared by or bearing the seal of Engineer of Record or its consultants, including electronic media editions; or

2. reuse any such Drawings, Specifications, other documents, or copies thereof on extensions of the Project or any other project without written consent of the City and Engineer of Record and specific written verification or adaptation by Engineer of Record.

B. The prohibitions of this Article will survive final payment, or termination of the Contract. Nothing herein shall preclude Contractor from retaining copies of the Contract Documents for record purposes.

ARTICLE 4 -INDEMNIFICATION; INSURANCE

4.1 Indemnification

A. To the fullest extent permitted by law, Contractor shall immediately defend (with counsel of the City's choosing), indemnify and hold harmless the City, its officials, officers, agents, employees, and representatives, and each of them from and against:

1. Any and all claims, demands, causes of action, costs, expenses, injuries, losses or liabilities, in law or in equity, of every kind or nature whatsoever, but not limited to, injury to or death, including wrongful death, of any person, and damages to or destruction of property of any person, arising out of, related to, or in any manner directly or indirectly connected with the Work or this Contract, including claims made by subcontractors for nonpayment, including without limitation the payment of all consequential damages and attorney's fees and other related costs and expenses, however caused, regardless of whether the allegations are false, fraudulent, or groundless, and regardless of any negligence of the City or its officers, employees, or authorized volunteers (including passive negligence),

except the sole negligence or willful misconduct or active negligence of the City or its officials, officers, employees, or authorized volunteers.

2. Contractor's defense and indemnity obligation herein includes, but is not limited to damages, fines, penalties, attorney's fees and costs arising from claims under the Americans with Disabilities Act (ADA) or other federal or state disability access or discrimination laws arising from Contractor's Work during the course of construction of the improvements or after the Work is complete, as the result of defects or negligence in Contractor's construction of the improvements.

3. Any and all actions, proceedings, damages, costs, expenses, fines, penalties or liabilities, in law or equity, of every kind or nature whatsoever, arising out of, resulting from, or on account of the violation of any governmental law or regulation, compliance with which is the responsibility of Contractor;

4. Any and all losses, expenses, damages (including damages to the Work itself), attorney's fees, and other costs, including all costs of defense which any of them may incur with respect to the failure, neglect, or refusal of Contractor to faithfully perform the Work and all of Contractor's obligations under Contract. Such costs, expenses, and damages shall include all costs, including attorney's fees, incurred by the indemnified parties in any lawsuit to which they are a party.

B. Contractor shall immediately defend, at Contractor's own cost, expense and risk, with the counsel of the City choosing, any and all such aforesaid suits, actions or other legal proceedings of every kind that may be brought or instituted against the City, its officials, officers, agents, employees and representatives. Contractor shall pay and satisfy any judgment, award or decree that may be rendered against the City, its officials, officers, employees, agents, employees and representatives, in any such suit, action or other legal proceeding. Contractor shall reimburse the City, its officials, officers, agents, employees and representatives for any and all legal expenses and costs incurred by each of them in connection therewith or in enforcing the indemnity herein provided. The only limitations on this provision shall be those imposed by Civil Code section 2782.

C. The provisions of this Article shall survive the termination of this Contract howsoever caused, and no payment, partial payment, or acceptance of occupancy in whole or part of the Work shall waive or release any of the provisions of this Article.

4.2 Insurance

The Contractor shall obtain, and at all times during performance of the Work of Contract, maintain all of the insurance described in this Article. Contractor shall not commence Work under this Contract until it has provided evidence satisfactory to the City that it has secured all insurance required hereunder. Contractor shall not allow any Subcontractor to commence work on any subcontract until it has provided evidence satisfactory to the City that the subcontractor has secured all insurance required under this Article. Failure to provide and maintain all required insurance shall be grounds for the City to terminate this Contract for cause. Contractor shall furnish the City with original certificates of insurance and endorsements effective coverage required by this Contract on forms satisfactory to the City. The certificates and endorsements for

each insurance policy shall be signed by a person authorized by that insurer to bind coverage on its behalf, and shall be on forms acceptable to the City. All certificates and endorsements must be received and approved by the City before Work commences.

A. **Additional Insureds; Waiver of Subrogation**. The City, its officials, officers, employees, agents and authorized volunteers shall be named as Additional Insureds on Contractor's All Risk policy and on Contractor's and its subcontractors' policies of Commercial General Liability and Automobile Liability insurance using, for Contractor's policy/ies of Commercial General Liability insurance, ISO CG forms 20 10 and 20 37 (or endorsements providing the exact same coverage, including completed operations), and, for subcontractors' policies of Commercial General Liability insurance, ISO CG form 20 38 (or endorsements providing the exact same coverage). Notwithstanding the minimum limits set forth in this Contract for any type of insurance coverage, all available insurance proceeds in excess of the specified minimum limits of coverage shall be available to the parties required to be named as Additional Insureds hereunder. All insurance coverage maintained or procured pursuant to this Contract shall be endorsed to waive subrogation against the City, its officers, officials**,** agents, employees or volunteers or shall specifically allow Contractor - or others providing insurance evidence in compliance with these specifications - to waive their right of recovery prior to a loss. Contractor hereby waives its own right of recovery against the City, and shall require similar written express waivers and insurance clauses from each of its subcontractors. Copies of these waivers shall be submitted to the City prior to commencement of work.

B. **Workers' Compensation Insurance**. The Contractor shall provide workers' compensation insurance for all of the employees engaged in Work under this Contract, on or at the Site, and, in case of any sublet Work, the Contractor shall require the subcontractor similarly to provide workers' compensation insurance for all the latter's employees as prescribed by State law. Any class of employee or employees not covered by a subcontractor's insurance shall be covered by the Contractor's insurance. In case any class of employees engaged in work under this Contract, on or at the Site, is not protected under the Workers' Compensation Statutes, the Contractor shall provide or shall cause a subcontractor to provide, adequate insurance coverage for the protection of such employees not otherwise protected. The Contractor is required to secure payment of compensation to his employees in accordance with the provisions of section 3700 of the Labor Code. The Contractor shall file with the City certificates of his insurance protecting workers. Company or companies providing insurance coverage shall be acceptable to the City, if in the form and coverage as set forth in the Contract Documents.

C. **Employer's Liability Insurance**. Contractor shall provide Employer's Liability Insurance, including Occupational Disease, in the amount of at least one million dollars ($1,000,000.00) per person per accident. Contractor shall provide the City with a certificate of Employer's Liability Insurance. Such insurance shall comply with the provisions of the Contract Documents. The policy shall be endorsed, if applicable, to provide a Borrowed Servant/Alternate Employer Endorsement and contain a Waiver of Subrogation in favor of the City.

D. **Commercial General Liability Insurance**. Contractor shall provide "occurrence" form Commercial General Liability insurance coverage at least as broad as the most current ISO CGL Form 00 01, including but not limited to, premises liability, contractual liability, products/completed operations, personal and advertising injury which may arise from or out of Contractor's operations, use, and management of the Site, or the performance of its obligations hereunder. The policy shall not contain any exclusion contrary to this Contract including but not limited to endorsements or provisions limiting coverage for (1) contractual liability (including but not limited to ISO CG 24 26 or 21 39); or (2) cross-liability for claims or suits against one insured against another. Policy limits shall not be less than $2,000,000 per occurrence for bodily injury, personal injury and property damage. If Commercial General Liability Insurance or other form with a general aggregate limit is used, either the general aggregate limit shall apply separately to this project/location or the general aggregate limit shall be twice the required occurrence limit. Defense costs shall be paid in addition to the limits.

1. Such policy shall comply with all the requirements of this Article. The limits set forth herein shall apply separately to each insured against whom claims are made or suits are brought, except with respect to the limits of liability. Further the limits set forth herein shall not be construed to relieve the Contractor from liability in excess of such coverage, nor shall it limit Contractor's indemnification obligations to the City, and shall not preclude the City from taking such other actions available to the City under other provisions of the Contract Documents or law.

2. All general liability policies provided pursuant to the provisions of this Article shall comply with the provisions of the Contract Documents.

3. All general liability policies shall be written to apply to all bodily injury, including death, property damage, personal injury, owned and non-owned equipment, blanket contractual liability, completed operations liability, explosion, collapse, under-ground excavation, removal of lateral support, and other covered loss, however occasioned, occurring during the policy term, and shall specifically insure the performance by Contractor of that part of the indemnification contained in these General Conditions relating to liability for injury to or death of persons and damage to property.

4. If the coverage contains one or more aggregate limits, a minimum of 50% of any such aggregate limit must remain available at all times; if over 50% of any aggregate limit has been paid or reserved, the City may require additional coverage to be purchased by Contractor to restore the required limits. Contractor may combine primary, umbrella, and as broad as possible excess liability coverage to achieve the total limits indicated above. Any umbrella or excess liability policy shall include the additional insured endorsement described in the Contract Documents.

5. All policies of general liability insurance shall permit and Contractor does hereby waive any right of subrogation which any insurer of Contractor may acquire from Contractor by virtue of the payment of any loss.

E. **Automobile Liability Insurance**. Contractor shall provide Automobile Liability Insurance at least as broad as ISO CA 00 01 (Any Auto) in the amount of, at least, two million dollars ($2,000,000) per accident for bodily injury and property damage. Such insurance shall provide coverage with respect to the ownership, operation, maintenance, use, loading or unloading of any auto owned, leased, hired or borrowed by Contractor or for which Contractor is responsible, in a form and with insurance companies acceptable to the City. All policies of automobile insurance shall permit and Contractor does hereby waive any right of subrogation which any insurer of Contractor may acquire from Contractor by virtue of the payment of any loss.

1. The named insureds shall be Contractor, all Subcontractors of any tier (excluding those solely responsible for design work), suppliers, and the City, its elected officials, officers, employees, agents and authorized volunteers, as their interests may appear. Contractor shall not be required to maintain property insurance for any portion of the Work following acceptance by the City.

2. Policy shall be provided for replacement value on an "all risk" basis. There shall be no coinsurance penalty provision in any such policy. Policy must include: (1) coverage for any ensuing loss from faulty workmanship, nonconforming work, omission or deficiency in design or specifications; (2) coverage against machinery accidents and operational testing; (3) coverage for removal of debris, and insuring the buildings, structures, machinery, equipment, materials, facilities, fixtures and all other properties constituting a part of the Project; (4) transit coverage, including ocean marine coverage (unless insured by the supplier), with sub-limits sufficient to insure the full replacement value of any key equipment item; and (5) coverage with sub-limits sufficient to insure the full replacement value of any property or equipment stored either on or off the Site. Such insurance shall be on a form acceptable to the City to ensure adequacy and sublimit.

3. In addition, the policy shall meet the following requirements:

a. Insurance policies shall be so conditioned as to cover the performance of any extra work performed under the Contract.

b. Coverage shall include all materials stored on site and in transit.

c. Coverage shall include Contractor's tools and equipment.

d. Insurance shall include boiler, machinery and material hoist coverage.

F. Contractor shall require all tiers of Subcontractors working under this Contract to provide the insurance required under this Article unless otherwise agreed to in writing by the City. Contractor shall make certain that any and all Subcontractors hired by Contractor are insured in accordance with this Contract. If any Subcontractor's coverage does not comply with the foregoing provisions, Contractor shall indemnify and hold the City harmless from any damage, loss, cost, or expense, including attorneys' fees, incurred by the City as a result thereof.

G. Notwithstanding the minimum limits set forth in this Contract for any type of insurance coverage, if Contractor maintains higher limits than the minimums shown above, the City requires and shall be entitled to coverage for the higher limits maintained by the Contractor. Any available insurance proceeds in excess of the specified minimum limits of insurance and coverage shall be available to the City.

H. **Form and Proof of Carriage of Insurance**

1. Any insurance carrier providing insurance coverage required by the Contract Documents shall be admitted to and authorized to do business in the State of California unless waived, in writing, by the City's Risk Manager. Carrier(s) shall have an A.M. Best rating of not less than an A:VII. Insurance deductibles or self-insured retentions must be declared by the Contractor. At the election of the City the Contractor shall either 1) reduce or eliminate such deductibles or self-insured retentions, or 2) procure a bond which guarantees payment of losses and related investigations, claims administration, and defense costs and expenses. If umbrella or excess liability coverage is used to meet any required limit(s) specified herein, the Contractor shall provide a "follow form" endorsement satisfactory to the City indicating that such coverage is subject to the same terms and conditions as the underlying liability policy.

2. Each insurance policy required by this Contract shall be endorsed to state that: (1) coverage shall not be suspended, voided, reduced or cancelled except after thirty (30) days prior written notice by certified mail, return receipt requested, has been given to the City; and (2) any failure to comply with reporting or other provisions of the policies, including breaches of warranties, shall not affect coverage provided to the City, its officials, officers, agents, employees, and volunteers.

3. The Certificates(s) and policies of insurance shall contain or shall be endorsed to contain the covenant of the insurance carrier(s) that it shall provide no less than thirty (30) days written notice be given to the City prior to any material modification or cancellation of such insurance. In the event of a material modification or cancellation of coverage, the City may terminate the Contract or stop the Work in accordance with the Contract Documents, unless the City receives, prior to such effective date, another properly executed original Certificate of Insurance and original copies of endorsements or certified original policies, including all endorsements and attachments thereto evidencing coverage's set forth herein and the insurance required herein is in full force and effect. Contractor shall not take possession, or use the Site, or commence operations under this Contract until the City has been furnished original Certificate(s) of Insurance and certified original copies of endorsements or policies of insurance including all endorsements and any and all other attachments as required in this Article. The original endorsements for each policy and the Certificate of Insurance shall be signed by an individual authorized by the insurance carrier to do so on its behalf.

4. The Certificate(s) of Insurance, policies and endorsements shall so covenant and shall be construed as primary, and the City's insurance and/or deductibles and/or self-insured retentions or self-insured programs shall not be construed as contributory.

5. The City reserves the right to adjust the monetary limits and types of insurance coverages during the term of this Contract including any extension thereof if, in the City's reasonable judgment, the amount or type of insurance carried by the Contractor becomes inadequate.

6. Contractor shall report to the City, in addition to the Contractor's insurer, any and all insurance claims submitted by the Contractor in connection with the Work under this Contract.

7. Products/completed operations coverage shall extend a minimum of three years after the project completion. Coverage shall be included on behalf of the insured for covered claims arising out of the actions of independent contractors. If the insured is using subcontractors, the policy must include work performed "by or on behalf" of the insured. Policy shall contain no language that would invalidate or remove the insurer's duty to defend or indemnify for claims or suits expressly excluded from coverage. Policy shall specifically provide for a duty to defend on the part of the insurer. The City, its officers, officials, agents employees, and volunteers shall be included as insureds under the policy.

ARTICLE 5 -CONTRACTOR RESPONSIBILITIES; REGULATORY REQUIREMENTS

5.1 Applicable Laws

A. Contractor shall give all notices required by and shall comply with all Applicable Laws applicable to the performance of the Work. Except where otherwise expressly required by Applicable Laws, neither the City nor the City's Representative shall be responsible for monitoring Contractor's compliance with any Applicable Laws. If Contractor performs any Work knowing or having reason to know that it is contrary to Applicable Laws, Contractor shall bear all claims, costs, losses, and damages (including but not limited to all fees and charges of engineers, architects, attorneys, and other professionals and all court or arbitration or other dispute resolution costs) arising out of or relating to such Work.

5.2 Permits and Licenses

A. Permits and licenses necessary for prosecution of the Work shall be secured and paid for by Contractor, including, but not limited to, excavation permit, for plumbing, mechanical and electrical work and for operations in or over public streets or right of way under jurisdiction of public agencies other than the City, unless otherwise specified in the Contract Documents.

B. The Contractor shall arrange and pay for all off-site inspection of the Work related to permits and licenses, including certification, required by the specifications, drawings, or by governing authorities, except for such off-site inspections delineated as the City's responsibility pursuant to the Contract Documents.

C. Before acceptance of the Work, the Contractor shall submit all licenses, permits, certificates of inspection and required approvals to the City.

5.3 Taxes

A. Contractor shall pay all sales, consumer, use, and other similar taxes required to be paid in accordance with the Applicable Laws of the place of the Project which are applicable during the performance of the Work. In accordance with Revenue and Taxation Code section 107.6, the Contract Documents may create a possessory interest subject to personal property taxation for which Contractor will be responsible.

5.4 Traffic Control

A. Traffic control plans, if required, shall be prepared at Contractor's expense. Traffic control shall be performed at Contractor's expense in accordance with the requirements of the City and/or the local agency with jurisdiction. Costs for traffic control plans, implementation of traffic control, or traffic signal services required by the City shall be included in the Contractor's Bid.

B. All warning signs and safety devices used by the Contractor to perform the Work shall conform to the requirements contained in the State of California, Department of Transportation's current edition of "Manual of Traffic Controls for Construction and Maintenance Work Zones" or to the requirements of the local agency. The Contractor shall also be responsible for all traffic control required by the agency having jurisdiction over the Project on the intersecting streets. Contractor must submit a traffic control plan to the agency having jurisdiction over the Project for approval prior to starting Work.

C. The Contractor's representative on the site responsible for traffic control shall produce evidence that he/she has completed training acceptable to the California Department of Transportation for safety through construction zones. All of the streets in which the Work will occur shall remain open to traffic and one lane of traffic maintained at all times unless otherwise directed by the agency of jurisdiction. Businesses and residences adjacent to the Work shall be notified forty-eight (48) hours in advance of closing of driveways. The Contractor shall make every effort to minimize the amount of public parking temporarily eliminated due to construction in areas fronting businesses. No stockpiles of pipe or other material will be allowed in traveled right-of-ways after working hours unless otherwise approved by the Engineer.

5.5 Safety

A. Contractor shall be solely responsible for all safety precautions and programs in connection with the Work. Such responsibility does not relieve Subcontractors of their responsibility for the safety of persons or property in the performance of their work, nor for compliance with applicable safety laws. Contractor shall comply with all Applicable Laws relating to the safety of persons or property, or to the protection of persons or property from damage, injury, or loss; and shall erect and maintain all necessary safeguards for such safety and protection. Contractor shall notify owners of adjacent property and of Underground Facilities and other utility owners when

prosecution of the Work may affect them, and shall cooperate with them in the protection, removal, relocation, and replacement of their property.

B. The Contractor shall maintain emergency first aid treatment for his employees which complies with the Federal Occupational Safety and Health Act of 1970 (29 U.S.C. § 651 *et seq*.), and California Code of Regulations, Title 8, Industrial Relations Division 1, Department of Industrial Relations, Chapter 4. The Contractor shall ensure the availability of emergency medical services for its employees in accordance with California Code of Regulations, Title 8, Section 1512. The Contractor shall submit an Illness and Injury Prevention Program and a Project Site specific safety program to the City prior to beginning Work. Contractor shall maintain a confined space program that meets or exceeds the City's standards. Contractor needs to make themselves aware of the City's safety policies and procedures, and shall meet or exceed all City standards in areas where the City must enter to perform inspections.

C. Hazard Communication Programs. Contractor shall be responsible for coordinating any exchange of material safety data sheets or other hazard communication information required to be made available to or exchanged between or among employers at the Site in accordance with Applicable Laws.

5.6 Hazardous Materials

A. The City shall not be responsible for any Hazardous Waste brought to the site by the Contractor. If the Contractor: (i) introduces and/or discharges a Hazardous Waste onto the site in a manner not specified by the Contract Documents; and/or (ii) disturbs a Hazardous Material identified in the Contract Documents, the Contractor shall hire a qualified remediation contractor at Contractor's sole cost to eliminate the condition as soon as possible. Under no circumstance shall the Contractor perform Work for which it is not qualified. The City, in its sole discretion, may require the Contractor to retain at Contractor's cost an independent testing laboratory.

B. If the Contractor encounters a Hazardous Waste which may cause foreseeable injury or damage, Contractor shall immediately: (i) secure or otherwise isolate such condition; (ii) stop all Work in connection with such material or substance (except in an emergency situation); and (iii) notify the City (and promptly thereafter confirm such notice in writing).

C. Subject to Contractor's compliance with this Article 5.6(B), the City shall verify the presence or absence of the Hazardous Waste reported by the Contractor, except as qualified under Article 5.6(A) and Article 5.6(B) in the event such material or substance is found to be present, verify that the levels of the hazardous material are below OSHA Permissible Exposure Levels and below levels which would classify the material as a state of California or federal hazardous waste. When the material falls below such levels, Work in the affected area shall resume upon direction by the City.

D. Contractor shall indemnify and hold harmless the City from and against claims, damages, losses and expenses, arising from a Hazardous Waste on the Project Site, if such Hazardous Waste exceeded OSHA Permissible Exposure Levels or levels

which would classify the material as a state of California or federal hazardous waste, and was either i) shown on the Contract Documents or information available to bidders; or (ii) brought to the site by Contractor. Nothing in this paragraph shall obligate the Contractor to indemnify the City in the event of the sole or active negligence or willful misconduct of the City, its officers, agents, or employees.

5.7 Sanitary Facilities.

A. Contractor shall provide sanitary temporary toilet buildings and hand washing facilities for the use of all workers. All toilets and hand washing facilities shall comply with local codes and ordinances. Toilets shall be placed inside sealed secondary containment devices installed on a flat, level surface. Accumulated liquids in the secondary containment devices shall be properly removed and legally disposed without spillage onto the ground. Toilets shall be kept supplied with toilet paper and shall have workable door fasteners. Toilets and hand washing facilities shall be serviced no less than once weekly and shall be present in a quantity of not less than 1 per 20 workers as required by Cal/OSHA regulations. The toilets and hand washing facilities shall be maintained in a sanitary condition at all times. Use of toilet and hand washing facilities in the Work under construction shall not be permitted. Any other sanitary facilities required by Cal/OSHA shall be the responsibility of the Contractor.

5.8 Dust Control

A. Contractor, at its expense, shall maintain all excavations, embankments, haul roads, permanent access roads, plant sites, waste disposal areas, borrow areas, and all other work areas free from dust. Industry accepted methods of dust control suitable for the area involved, such as sprinkling, chemical treatment, light bituminous treatment or similar methods, will be permitted.

5.9 Air Pollution Control

A. Contractor shall comply with all air pollution control rules, regulations, ordinances and statutes. All containers of paint, thinner, curing compound, solvent or liquid asphalt shall be labeled to indicate that the contents fully comply with the applicable material requirements.

B. Without limiting the foregoing, Contractor must fully comply with all applicable laws, rules and regulations in furnishing or using equipment and/or providing services, including, but not limited to, emissions limits and permitting requirements imposed by the Air Quality Management District with jurisdiction over the Project and/or California Air Resources Board (CARB). Contractor shall specifically be aware of the application of these limits and requirements to "portable equipment", which definition includes any item of equipment with a fuel-powered engine. Contractor shall indemnify the City against any fines or penalties imposed by the air quality management district, CARB, or any other governmental or regulatory agency for its violations of Applicable Laws as well as those of its subcontractors or others for whom Contractor is responsible under its indemnity obligations provided for in the Contract Documents.

5.10 Water Quality Management and Compliance

A. Storm, surface, ground, nuisance, or other waters may be encountered at various times during construction of the Work. The Contractor hereby acknowledges that it has investigated the risk arising from such waters, has prepared its Bid accordingly, and assumes any and all risks and liabilities arising therefrom.

B. Contractor shall keep itself and all subcontractors, staff, and employees fully informed of and in compliance with all local, state and federal laws, rules and regulations that may impact, or be implicated by the performance of the Work including, without limitation, all applicable provisions regulating discharges of storm water; the Federal Water Pollution Control Act (33 U.S.C. § 13000 et seq.); the California Porter-Cologne Water Quality Control Act (Cal Water Code §§ 13000-14950); and any and all regulations, policies, or permits issued pursuant to any such authority. These include, but are not limited to California State Water Resources Control Board Order Number 2009-0009-DWQ (NPDES Permit No. CAS000002), as amended by Order Numbers 2010-0014-DWQ, 2012-0006-DWQ, and any subsequent amendment to or renewal thereof, State Water Resources Control Board Order No. 2013-0001-DWQ (NPDES Order No. CAS000004), Santa Ana Regional Water Quality Control Board No. R8-2010-0036 (NPDES No. CAS618036), and any amendment or renewal thereof.

C. Contractor shall comply with all conditions of the State Water Resources Control Board ("State Water Board") National Pollutant Discharge Elimination System General Permit for Waste Discharge Requirements for Discharges of Storm Water Runoff Associated with Construction Activity ("Construction General Permit") for all construction activity which results in the disturbance of in excess of one acre of total land area or which is part of a larger common area of development or sale. Contractor shall comply with the lawful requirements of the City, and any other applicable municipality, drainage district, or other local agency with jurisdiction over the location where the Work is to be conducted, regarding discharges of storm water to separate storm drain systems or other watercourses under their jurisdiction, including applicable requirements in municipal storm water management programs.

D. Unless otherwise specified in the Special Conditions or other portion of the Contract Documents, the City has not prepared a Storm Water Pollution Prevention Plan ("SWPPP") or other storm water compliance plan for the Project Site. Contractor shall be responsible for filing the Notice of Intent ("NOI") and for obtaining coverage under the Construction General Permit. This includes filing all necessary documentation including the Permit Registration Documents ("PRDs") through the Stormwater Multiple Applications and Report Tracking System ("SMARTS"); preparing and implementing a SWPPP for the Work site; implementing all other provisions, and monitoring and reporting requirements required by the Construction General Permit; and providing a Qualified SWPPP Developer ("QSD") and Qualified SWPPP Practitioner ("QSP"), as necessary for all Work site activities, including but not limited to preparation and submittal of all reports, plans, inspections, and monitoring information in compliance with the Construction General Permit. All submittals shall be coordinated with the City's Legally Responsible Person and Authorized Signatory as those terms are defined in the Construction General Permit.

Before any NOI, PRD, SWPPP, or other Construction General Permit-related document may be submitted to the State Water Board or implemented on the Project site, it must first be reviewed and approved by the City and/or City's designee. Contractor shall include all costs of compliance with specified requirements in the Contract Price.

E. The City retains the right to develop its own documentation for the Project site, including but not limited to the SWPPP, and in the alternative may require Contractor to adopt and implement portions of the City developed SWPPP. The City expressly reserves the right to procure coverage under the Construction General Permit for the Work site if Contractor fails to draft satisfactory PRDs or SWPPP or otherwise fails to proceed in a manner that complies with the requirements of the Construction General Permit. The City additionally reserves the right to hire additional contractors to maintain compliance at the Work site. Whether Contractor has adequately maintained compliance with the Construction General Permit shall be the City's sole determination. Any costs incurred by the City in procuring coverage under the Construction General Permit, or drafting and/or implementing a SWPPP for the Work site shall be paid by Contractor.

F. Notwithstanding the above, for those Work sites where construction activity results in the disturbance of less than one acre of total land area and/or do not need coverage under the Construction General Permit, the Contractor shall be responsible for preparing and implementing an Erosion and Sediment Control Plan in accordance with State Water Resources Control Board Order No. 2013-0001-DWQ (NPDES Order No. CAS000004) and any amendment to or renewal thereof.

G. Failure to comply with the Construction General Permit, laws, regulations, and ordinances listed in this Article is a violation of federal and state law. Notwithstanding any other indemnity contained in these Contract Documents, Contractor agrees to indemnify and hold harmless the City, its officials, officers, agents, employees and authorized volunteers from and against any and all claims, demands, fees, costs, expenses, or losses or liabilities of any kind or nature which the City, its officials, officers, agents, employees and authorized volunteers may sustain or incur for noncompliance with the Permit, laws, regulations, and ordinances listed above, arising out of or in connection with the Work, except for liability resulting from the sole established negligence, willful misconduct or active negligence of the City, its officials, officers, agents, employees or authorized volunteers.

H. The City reserves the right to defend any enforcement action or civil action brought against the City for Contractor's failure to comply with any applicable water quality law, regulation, or policy. Contractor hereby agrees to be bound by, and to reimburse the City for the costs associated with, any settlement reached between the City and any relevant enforcement entity.

5.11 Environmental Quality Protection

A. The Contractor shall comply with all requirements of applicable federal, state, and local environmental rules and regulations. Any infractions of said rules and regulations by the Contractor during the term of the Contract, which result in

penalties, will be the responsibility of the Contractor. The City operates under a number of environmental permits issued by various agencies. If due to an action, inaction, or negligence by the Contractor, the City becomes subject to non-compliance penalties, the cost of such penalties shall be borne by the Contractor.

B. The Contractor shall exercise care to preserve the natural landscape and vegetation, and shall conduct operations so as to prevent unnecessary destruction, scarring, or defacing of the natural surroundings in the vicinity of the Work. Movement of crews and equipment within the rights-of-way and over routes provided for access to the Work shall be performed in a manner to prevent damage to property. When no longer required, construction roads shall be restored to original contours. Upon completion of the Work, and following removal of construction facilities and required cleanup, land used for construction purposes and not required for the completed installation shall be scarified and regraded, as required, so that all surfaces are left in a condition that will facilitate natural revegetation, provide for proper drainage, and prevent erosion.

C. If, in the performance of the Work, evidence of the possible occurrence of any Federally listed threatened or endangered plant or animal is discovered, the Contractor shall notify the City Representative immediately, giving the location and nature of the findings. Written confirmation of the evidence, location and nature of the findings shall be forwarded to City within two (2) Days. The Contractor shall immediately cease all construction activities in the immediate area of the discovery to the extent necessary to protect the endangered plant or animal. If directed by the City Representative, Contractor will refrain from working in the immediate area, suspend the Work in its entirety, or alter its performance to ensure full compliance with all applicable permits, laws and regulations. Any City directed changes to the Work as a result of a siting will be pursuant to the Contract Documents. Any costs or delays incurred by City or the Contractor due to unreasonable or false notification of an endangered plant or animal will be borne by the Contractor.

D. If, in the performance of the Work, Contractor should unearth cultural resources (for example, human remains, animal bones, stone tools, artifacts and/or midden deposits) through excavation, grading, watering or other means, the Contractor shall notify the construction/archeological monitor and/or the City Representative immediately, giving the location and nature of the findings. Written confirmation of the evidence, location and nature of the findings shall be forwarded to the construction/archeological monitor and/or City within two (2) Days. The Contractor shall immediately cease all construction activities in the immediate area of the discovery to the extent necessary to protect the cultural resource. If directed by the City Representative, Contractor will refrain from working in the immediate area, suspend the Work in its entirety, or re-sequence and/or alter its performance to ensure full compliance with all applicable permits, laws and regulations. Should the presence of cultural resources be confirmed, the Contractor will assist the City Representative and the construction/archeological monitor in the preparation and implementation of a data recovery plan. The Contractor shall provide such cooperation and assistance as may be necessary to preserve the cultural resources for removal or other disposition. Any City directed changes to the Work as a result of the cultural resource will be pursuant to the Contract Documents. Should

Contractor, without permission, injure, destroy, excavate, appropriate, or remove any cultural resource on or adjacent to the Site, it will be subject to disciplinary action, arrest and penalty under applicable law. The Contractor shall be principally responsible for all costs of mitigation and/or restoration of cultural resources related to the unauthorized actions identified above. Contractor shall be required to pay for unauthorized damage and mitigation costs to cultural resources (historical and archeological resources) as a result of unauthorized activities that damage cultural resources and shall indemnify City pursuant to the Contract Documents.

5.12 Excessive Noise

A. Contractor shall use only such equipment on the Work and in such state of repair so that the emission of sound therefrom is within the noise tolerance level of that equipment as established by Cal/OSHA. Contractor shall comply with the most restrictive of the following: (1) local sound control and noise level rules, regulations and ordinances and (2) the requirements contained in these Contract Documents, including hours of operation requirements.

B. No internal combustion engine shall be operated on the Project without a muffler of the type recommended by the manufacturer. Should any muffler or other control device sustain damage or be determined to be ineffective or defective, the Contractor shall promptly remove the equipment and shall not return said equipment to the job until the device is repaired or replaced. Said noise and vibration level requirements shall apply to all equipment on the job or related to the job, including but not limited to, trucks, transit mixers or transit equipment that may or may not be owned by the Contractor.

5.13 Diversion of Recyclable Waste Material

A. In compliance with the applicable City's waste reduction and recycling efforts, Contractor shall divert all Recyclable Waste Materials to appropriate recycling centers as required for compliance with the local jurisdiction's waste diversion ordinances. Contractor will be required to submit weight tickets and written proof of diversion with its monthly progress payment requests. Contractor shall complete and execute any certification forms required by the City or other applicable agencies to document Contractor's compliance with these diversion requirements. All costs incurred for these waste diversion efforts shall be the responsibility of the Contractor.

5.14 Inspector's Field Office.

A. If required by the City, the Contractor shall be responsible for providing the inspector's field office. The office shall be a substantial waterproof construction with adequate natural light and ventilation by means of stock design windows. Door shall have a key type lock or padlock clasp. The office shall have heating and air conditioning and shall be equipped with a telephone, a telephone answering machine, an ability to connect to the internet, and a fax machine at Contractor's expense. The field office shall be provided within 20 Days of the Notice to Proceed.

B. A table satisfactory for the study of plans and two chairs shall be provided by Contractor. Contractor shall provide and pay for adequate electric lights, local

telephone service, and adequate heat and air conditioning for the field office until authorized removal.

5.15 Contractor's Supervision.

A. Contractor shall continuously keep at the Project site, a competent and experienced full-time Project superintendent acceptable to the City. Superintendent must be able to proficiently speak, read and write in English and shall have the authority to make decisions on behalf of the Contractor. Contractor shall continuously provide efficient supervision of the Project.

5.16 Workers.

A. Contractor shall at all times enforce strict discipline and good order among its employees. Contractor shall not employ on the Project any unfit person or any one not skilled in the Work assigned to him or her.

B. Any person in the employ of the Contractor whom the City may deem incompetent or unfit shall be dismissed from the Work and shall not be employed on this Project.

5.17 Independent Contractors.

A. Contractor shall be an independent contractor for the City and not an employee. Contractor understands and agrees that it and all of its employees shall not be considered officers, employees, or agents of the City and are not entitled to benefits of any kind normally provided employees of the City, including but not limited to, state unemployment compensation or workers' compensation. Contractor assumes full responsibility for the acts and omissions of its employees or agents related to the Work.

5.18 Verification of Employment Eligibility.

A. By executing the Contract, Contractor verifies that it fully complies with all requirements and restrictions of state and federal law respecting the employment of undocumented aliens, including, but not limited to, the Immigration Reform and Control Act of 1986, as may be amended from time to time, and shall require all subcontractors, sub-subcontractors and consultants to comply with the same. Each person executing this Contract on behalf of Contractor verifies that he or she is a duly authorized officer of Contractor and that any of the following shall be grounds for the City to terminate the Contract for cause: (1) failure of the Contractor or its Subcontractors, sub-subcontractors or consultants to meet any of the requirements provided for in this Article; (2) any misrepresentation or material omission concerning compliance with such requirements; or (3) failure to immediately remove from the Work any person found not to be in compliance with such requirements.

5.19 Labor.

A. Hours of Work

1. As provided in Article 3 (commencing at section 1810), Chapter 1, Part 7, Division 2 of the Labor Code, Contractor stipulates that eight (8) hours of labor shall constitute a legal day's work. The time of service of any worker employed at any time by the Contractor or by any subcontractor on any subcontract under this Contract upon the Work or upon any part of the Work contemplated by this Contract is limited and restricted to eight (8) hours during any one calendar day and 40 hours during any one calendar week, except as hereinafter provided. Notwithstanding the provisions herein above set forth, work performed by employees of Contractor in excess of eight (8) hours per day, and 40 hours during any one week, shall be permitted upon this public work upon compensation for all hours worked in excess of eight (8) hours per day at not less than one and one-half times the basic rate of pay.

2. The Contractor and every Subcontractor shall keep an accurate record showing the name of and actual hours worked each calendar day and each calendar week by each worker employed in connection with the Work or any part of the Work contemplated by this Contract. The record shall be kept open at all reasonable hours to the inspection of the City and to the Division of Labor Law Enforcement, Department of Industrial Relations of the State of California.

3. The Contractor shall pay to the City a penalty of twenty-five dollars ($25.00) for each worker employed in the execution of this Contract by the Contractor or by any subcontractor for each calendar day during which such worker is required or permitted to work more than eight (8) hours in any calendar day and 40 hours in any one calendar week in violation of the provisions of Article 3 (commencing at section 1810), Chapter 1, Part 7, Division 2 of the Labor Code.

4. Any work necessary to be performed after regular working hours, or on Saturdays and Sundays or other holidays, shall be performed without additional expense to the City.

5. If Contractor gives notice of an inspection pursuant to the Contract Documents, the City will provide inspection during normal working hours from 7:00 a.m. to 3:30 p.m. Monday through Friday. Requested inspections before or after this time will be charged to the Contractor as reimbursable inspection time. Inspections on weekends requires two (2) Days' notice for review and approval. Upon written request and approval the 8.5 hour working day may be changed to other limits subject to city/county ordinance.

6. It shall be unlawful for any person to operate, permit, use, or cause to operate any of the following at the Project Site, other than between the hours of 7:00 a.m. to 5:00 p.m., Monday through Friday, with no Work allowed on City-observed Holidays, unless otherwise approved by the City:

a. Powered Vehicles

b. Construction Equipment

c. Loading and Unloading Vehicles

d. Domestic Power Tools

B. Payroll Records; Labor Compliance

1. Pursuant to Labor Code section 1776, Contractor and all subcontractors shall maintain weekly certified payroll records, showing the names, addresses, Social Security numbers, work classifications, straight time and overtime hours worked each day and week, and the actual per diem wages paid to each journeyman, apprentice, worker, or other employee employed by them in connection with the Work under this Contract. Contractor shall certify under penalty of perjury that records maintained and submitted by Contractor are true and accurate. Contractor shall also require Subcontractor(s) to certify weekly payroll records under penalty of perjury.

2. In accordance with Labor Code section 1771.4, the Contractor and each Subcontractor shall furnish the certified payroll records directly to the Department of Industrial Relations ("DIR") on the specified interval and format prescribed by the DIR, which may include electronic submission. Contractor shall comply with all requirements and regulations from the DIR relating to labor compliance monitoring and enforcement. The requirement to submit certified payroll records directly to the Labor Commissioner under Labor Code section 1771.4 shall not apply to work performed on a public works project that is exempt pursuant to the small project exemption specified in Labor Code Section 1771.4.

3. Any stop orders issued by the DIR against Contractor or any Subcontractor that affect Contractor's performance of Work, including any delay, shall be Contractor's sole responsibility. Any delay arising out of or resulting from such stop orders shall be considered Contractor caused delay subject to any applicable liquidated damages and shall not be compensable by the City. Contractor shall defend, indemnify and hold the City, its officials, officers, employees and agents free and harmless from any claim or liability arising out of stop orders issued by the DIR against Contractor or any Subcontractor.

4. The payroll records described herein shall be certified and submitted by the Contractor at a time designated by the City. The Contractor shall also provide the following:

a. A certified copy of the employee's payroll records shall be made available for inspection or furnished to such employee or his or her authorized representative on request.

b. A certified copy of all payroll records described herein shall be made available for inspection or furnished upon request of the DIR.

5. Unless submitted electronically, the certified payroll records shall be on forms provided by the Division of Labor Standards Enforcement ("DLSE") of the DIR or shall contain the same information as the forms provided by the DLSE.

6. Any copy of records made available for inspection as copies and furnished upon request to the public or any public agency, the City, the Division of Apprenticeship Standards or the Division of Labor Standards Enforcement shall be marked or

obliterated in such a manner as to prevent disclosure of an individual's name, address and social security number. The name and address of the Contractor awarded the Contract or performing the Contract shall not be marked or obliterated.

7. In the event of noncompliance with the requirements of this Article, the Contractor shall have ten (10) Days in which to comply subsequent to receipt of written notice specifying in what respects the Contractor must comply with this Article. Should noncompliance still be evident after such 10-day period, the Contractor shall pay a penalty of one hundred dollars ($100.00) to the City for each calendar day, or portion thereof, for each worker, until strict compliance is effectuated. Upon the request of the Division of Apprenticeship Standards or the Division of Labor Standards Enforcement, such penalties shall be withheld from progress payment then due.

8. The responsibility for compliance with this Article shall rest upon the Contractor.

C. Prevailing Rates of Wages

1. The Contractor is aware of the requirements of Labor Code sections 1720 *et seq.* and 1770 *et seq.*, as well as California Code of Regulations, Title 8, Section 16000 *et seq.* ("Prevailing Wage Laws"), which require the payment of prevailing wage rates and the performance of other requirements on certain "public works" and "maintenance" projects. Since this Project involves an applicable "public works" or "maintenance" project, as defined by the Prevailing Wage Laws, and since the total compensation is $1,000 or more, Contractor agrees to fully comply with such Prevailing Wage Laws. The Contractor shall obtain a copy of the prevailing rates of per diem wages at the commencement of this Contract from the website of the Division of Labor Statistics and Research of the Department of Industrial Relations located at www.dir.ca.gov. In the alternative, the Contractor may view a copy of the prevailing rate of per diem wages which are on file at the City's Administration Office and shall be made available to interested parties upon request. Contractor shall make copies of the prevailing rates of per diem wages for each craft, classification, or type of worker needed to perform work on the Project available to interested parties upon request, and shall post copies at the Contractor's principal place of business and at the Project site. Contractor shall defend, indemnify and hold the City, its officials, officers, employees and authorized volunteers free and harmless from any claims, liabilities, costs, penalties or interest arising out of any failure or allege failure to comply with the Prevailing Wage Laws.

2. The Contractor shall forfeit as a penalty to the City not more than Two Hundred Dollars ($200.00), pursuant to Labor Code section 1775, for each calendar day, or portion thereof, for each worker paid less than the prevailing wage rate as determined by the Director of the DIR for such work or craft in which such worker is employed for any public work done under the Contract by it or by any Subcontractor under it. The difference between such prevailing wage rate and the amount paid to each worker for each calendar day or portion thereof, for which each worker was paid less than the prevailing wage rate, shall be paid to each worker by the Contractor.

3. Contractor shall post, at appropriate conspicuous points on the Project Site, a schedule showing all determined general prevailing wage rates and all authorized deductions, if any, from unpaid wages actually earned.

D. Public Works Contractor Registration

1. Pursuant to Labor Code sections 1725.5 and 1771.1, the Contractor and its Subcontractors must be registered with the DIR prior to the execution of a contract to perform public works. By entering into this Contract, Contractor represents that it is aware of the registration requirement and is currently registered with the DIR. Contractor shall maintain a current registration for the duration of the Project. Contractor shall further include the requirements of Labor Code sections 1725.5 and 1771.1 in any subcontract and ensure that all Subcontractors are registered at the time this Contract is entered into and maintain registration for the duration of the Project. Notwithstanding the foregoing, the contractor registration requirements mandated by Labor Code Sections 1725.5 and 1771.1 shall not apply to work performed on a public works project that is exempt pursuant to the small project exemption specified in Labor Code Sections 1725.5 and 1771.1.

E. Employment of Apprentices

1. Contractor and all Subcontractors shall comply with the requirements of Labor Code sections 1777.5 and 1777.6 in the employment of apprentices.

2. Information relative to apprenticeship standards, wage schedules, and other requirements may be obtained from the Director of Industrial Relations, ex officio the Administrator of Apprenticeship, San Francisco, California, or from the Division of Apprenticeship Standards and its branch offices.

3. Knowing violations of Labor Code section 1777.5 will result in forfeiture not to exceed one hundred dollars ($100.00) for each calendar day of non-compliance pursuant to Labor Code section 1777.7.

F. Nondiscrimination/Equal Employment Opportunity

1. Pursuant to Labor Code section 1735 and other applicable provisions of law, the Contractor and its Subcontractors shall not discriminate against any employee or applicant for employment because of race, religious creed, color, national origin, ancestry, physical disability, mental disability, medical condition, marital status, sex, age, sexual orientation, or any other classifications protected by law on this Project. The Contractor will take affirmative action to insure that employees are treated during employment or training without regard to their race, religious creed, color, national origin, ancestry, physical disability, mental disability, medical condition, marital status, sex, age, sexual orientation, or any other classifications protected by law.

G. Debarment of Contractors and Subcontractors

1. Contractors or Subcontractors may not perform work on a public works project with a subcontractor who is ineligible to perform work on a public project pursuant to

Labor Code section 1777.1 or 1777.7. Any contract on a public works project entered into between a contractor and a debarred subcontractor is void as a matter of law. A debarred subcontractor may not receive any public money for performing work as a subcontractor on a public works contract. Any public money that is paid, or may have been paid to a debarred subcontractor by a contractor on the project shall be returned to the City. The Contractor shall be responsible for the payment of wages to workers of a debarred subcontractor who has been allowed to work on the Project.

5.20 Subcontracts.

A. Contractor agrees to bind every Subcontractor to the terms of the Contract Documents as far as such terms are applicable to Subcontractor's portion of the Work. Contractor shall be as fully responsible to the City for the acts and omissions of its subcontractors and of persons either directly or indirectly employed by its subcontractors, as Contractor is for acts and omissions of persons directly employed by Contractor. Nothing contained in these Contract Documents shall create any contractual relationship between any subcontractor and the City.

B. The City reserves the right to accept all subcontractors. The City's acceptance of any Subcontractor under this Contract shall not in any way relieve Contractor of its obligations in the Contract Documents.

C. Prior to substituting any Subcontractor listed in the Bid Forms, Contractor must comply with the requirements of the Subletting and Subcontracting Fair Practices Act pursuant to California Public Contract Code section 4100 et seq.

5.21 Progress Meetings

A. The Contractor shall schedule and hold regular progress meetings at least weekly and at other times as requested by Engineer or as required by progress of the Work. The Contractor, City, and all Subcontractors active on the Site shall attend each meeting. Contractor may at its discretion request attendance by representatives of its Suppliers, manufacturers, and other Subcontractors. The City will preside at the progress meetings and will arrange for keeping and distributing the minutes. The purpose of the meetings is to review the progress of the Work, maintain coordination of efforts, discuss changes in scheduling, and resolve other problems which may develop. During each meeting, the Contractor shall present any issues which may impact its progress with a view to resolve these issues expeditiously.

5.22 Submittals

A. Schedule of Submittals. Within five (5) Days after the Notice to Proceed (unless otherwise specified in the Contract Documents), Contractor will prepare and deliver a Schedule of Submittals to the City that has been fully integrated with the progress schedule and identifies each Submittal required by the Contract Documents as well as the date on which Contractor will deliver each Submittal to the City. Each Submittal must be delivered to the City at least thirty (30) Days prior to the date the material or equipment is scheduled to be incorporated into the Work. The Contractor is responsible for any schedule delays resulting from the Submittal process.

B. Submittal Procedures.

1. Contractor will follow the following procedures for each Submittal, Shop Drawing and Sample required by the Contract Documents:

   a. Submittals must be transmitted electronically.

   b. Transmittals will be sequentially numbered. Contractor to mark revised Submittals with original number and sequential alphabetic suffix.

   c. Each Submittal will identify the Project, Contractor, Subcontractor and Supplier, pertinent Drawing and detail number, and Specification Section number appropriate to Submittal.

   d. By transmitting a Submittal, Contractor certifies it has reviewed and approved each Submittal, verified products required, field dimensions, adjacent construction Work, and that coordination of information is according to requirements of the Work and Contract Documents.

   e. Identify variations in Contract Documents and product or system limitations that may differ and/or be detrimental to successful performance of completed Work.

   f. When Submittal is revised for resubmission, Contractor shall promptly address the City's comments and resubmit. Contractor shall identify changes made since previous submission.

   g. The City's review of Shop Drawings shall not relieve Contractor from responsibility for deviations from the Contract Documents unless Contractor has, in writing, called the City's attention to such deviations at time of submission and the City has taken no exception to the deviation. The City's review of Shop Drawings shall not relieve Contractor from responsibility for errors in Shop Drawings.

   h. Submittals not required by the Contract Documents or requested by the City will not be acknowledged or processed.

   i. Incomplete Submittals will not be reviewed by the City. Delays resulting from incomplete Submittals are not the responsibility of the City.

   j. Contractor shall not be entitled to any extension of the Contract Times as a result of the Submittal process.

   k. Contractor shall allow a minimum of 20 working days for review of Submittals unless otherwise specified in the Contract Documents.

2. Where a Submittal, Shop Drawing or Sample is required by the Contract Documents or the Schedule of Submittals, any related Work performed prior to the City review and approval of the pertinent submittal will be performed at the sole risk and expense and responsibility of Contractor.

C. Schedule Milestone for Submittals. Contractor must submit all Submittals required by the Contract Documents in accordance with the Schedule of Submittals. If Contractor fails to submit the Submittals in accordance with the Schedule of Submittals, Contractor will be solely liable for any delays or impacts caused by the delayed Submittal, whether direct or indirect. Contractor will be liable for the time calculated from the date the Submittal is due until the date a compliant Submittal is made. A compliant Submittal will be one that is complete and satisfies the requirements of the Contract Documents.

5.23 Shop Drawings and Sample Submittal Procedures.

A. Before submitting each Shop Drawing or Sample, Contractor shall have:

1. Reviewed and coordinated each Shop Drawing or Sample with other Shop Drawings and Samples and with the requirements of the Work and the Contract Documents;

2. Determined and verified all field measurements, quantities, dimensions, specified performance and design criteria, installation requirements, materials, catalog numbers, and similar information with respect thereto;

3. Determined and verified the suitability of all materials offered with respect to the indicated application, fabrication, shipping, handling, storage, assembly, and installation pertaining to the performance of the Work; and

4. Determined and verified all information relative to Contractor's responsibilities for means, methods, techniques, sequences, and procedures of construction, and safety precautions and programs incident thereto.

B. With each Submittal, Contractor shall give the City specific written notice of any variations that the Shop Drawing or Sample may have from the requirements of the Contract Documents. This notice shall be both a written communication separate from the Shop Drawings or Sample Submittal and, in addition, a specific notation made on each Shop Drawing or Sample submitted to the City for review and approval of each such variation.

C. Shop Drawings.

1. Data shown on the Shop Drawings will be complete with respect to quantities, dimensions, specified performance and design criteria, materials, and similar data to show the City the services, materials, and equipment Contractor proposes to provide and to enable the City to review the information for assessing conformance with information given and design concept expressed in Contract Documents.

2. When required by individual Specification sections, provide Shop Drawings signed and sealed by a professional engineer responsible for designing components shown on Shop Drawings. Shop Drawings must include signed and sealed calculations to support design in a form suitable for submission to and approval by authorities having jurisdiction.

3. Shop Drawings for steel structures shall consist of shop details, erection and other working Drawings showing details, dimensions, sizes of members and other information necessary for the complete fabrication and erection of the metal work.

4. Shop Drawings of concrete structures shall consist of such detailed drawings as may reasonably be required for the successful prosecution of the Work and which are not included in the Drawings furnished by the Engineer. These may include drawings for false work, bracing, centering and form work, masonry layout diagrams, and diagrams for bent reinforcement.

5. Contractor shall make revisions and provide additional information when required by authorities having jurisdiction.

D. Samples. Clearly identify each Sample as to material, Supplier, pertinent data such as catalog numbers, the use for which intended and other data as required to enable the City to review the submittal for assessing conformance with information given and design concept expressed in Contract Documents. Samples should be of appropriate size and detail to assess functional, aesthetic, color, texture, patterns and finish selection.

E. City's Review.

1. The City will review Shop Drawings and Samples in accordance with the Schedule of Submittals. The City's review and acceptance will be only to determine if the items covered by the Submittals will, after installation or incorporation in the Work, conform to the information given in the Contract Documents and be compatible with the design concept of the completed Project as a functioning whole as indicated by the Contract Documents.

2. The City review and approval will not extend to means, methods, techniques, sequences, or procedures of construction (except where a particular means, method, technique, sequence, or procedure of construction is specifically and expressly called for by the Contract Documents) or to safety precautions or programs incident thereto. The review and approval of a separate item as such will not indicate approval of the assembly in which the item functions.

3. The City's review and acceptance shall not relieve Contractor from responsibility for any variation from the requirements of the Contract Documents unless the City has given written approval of each such variation by specific written notation thereof incorporated in or accompanying the Shop Drawing or Sample.

F. Resubmittal Procedures. Contractor shall make corrections required by the City and shall return corrected Shop Drawings and submit, as required, new Samples for review and approval. Contractor shall direct specific attention in writing to revisions other than the corrections called for by the City on previous Submittals.

5.24 Record ("As-Built") Drawings.

A. The Contractor shall maintain one record set of Contract Documents at the Site or digitally in an acceptable format. On these, it shall mark all Project conditions, locations, configurations, and any other changes or deviations which may vary from

the information represented in the original Contract Documents, including buried or concealed construction and utility features which are revealed during the course of construction. Special attention shall be given to recording the horizontal and vertical location of all buried utilities that differ from the locations indicated, or which were not indicated on the Drawings. For all Projects involving the installation of any pipeline, Contractor shall survey and record the top of the pipe at a minimum of every 100 linear feet, and at each bend, recording both the horizontal and vertical locations. Said Drawings shall be supplemented by any detailed sketches as necessary or directed to fully indicate the Work as actually constructed. Any required as-built drawings of civil engineering elements of the Work shall be prepared by a registered civil engineer.

B. These master Record Drawings of the as-built conditions, including all revisions made necessary by Addenda and Change Orders, shall be maintained up-to-date during the progress of the Project. Red ink shall be used for alterations and notes. Notes shall identify relevant Change Orders by number and date. Record Drawings shall be accessible to the Engineer at all times during the construction period. Failure on the Contractor's part to keep Record Drawings current could result in withholding partial payment.

C. Upon completion of the Project and as a condition of final acceptance, the Contractor shall finalize and deliver a complete set of Record Drawings to the Engineers. The information submitted by the Contractor will be assumed to be correct, and the Contractor shall be responsible for, and liable to the City, for the accuracy of such information, and for any errors or omissions which may or may not appear on the Record Drawings.

D. Unless otherwise called for by the Contract Documents, the cost of all material, equipment, and labor required to complete the Record Drawings shall be included in Contractor's bid and distributed in the Bid Schedule. No additional compensation shall be made to the Contractor for this Work.

5.25 Layout and Field Engineering.

A. The Contractor shall utilize a properly licensed surveyor to perform all layout surveys required for the control and completion of the Work, and all necessary surveys to compute quantities of Work performed.

5.26 Separate Contracts and Cooperation.

A. Separate Contracts. The City reserves the right to let other contracts in connection with this Work or on the Project site. Contractor shall permit other contractors reasonable access and storage of their materials and execution of their work and shall properly connect and coordinate its Work with theirs. To ensure proper execution of its subsequent Work, Contractor shall immediately inspect work already in place and shall at once report to the Engineer any problems with the Work in place or discrepancies with the Contract Documents.

B. Cooperation. Contractor shall ascertain to its own satisfaction the scope of the Project and nature of any other contracts that have been or may be awarded by the

City in prosecution of the Project to the end that Contractor may perform this Contract in the light of such other contracts, if any. Nothing herein contained shall be interpreted as granting to Contractor exclusive occupancy at site of the Project. Contractor shall not cause any unnecessary hindrance or delay to any other contractor working on the Project. If simultaneous execution of any contract for the Project is likely to cause interference with performance of some other contract or contracts, the Engineer shall decide which Contractor shall cease Work temporarily and which contractor shall continue or whether work can be coordinated so that contractors may proceed simultaneously. The City shall not be responsible for any damages suffered or for extra costs incurred by Contractor resulting directly or indirectly from award, performance, or attempted performance of any other contract or contracts on the Project Site.

5.27 Work Site.

A. Limitation of Use of Site and Other Areas. Rights-of-way, easements, or rights-of-entry for the Work will be provided by the City. Unless otherwise specified in the Special Provisions, the Contractor shall make arrangements, pay for, and assume all responsibility for acquiring, using, and disposing of additional work areas and facilities temporarily required. The Contractor shall indemnify and hold the City harmless from all claims for damages caused by such actions. Contractor shall confine construction equipment, the storage of materials and equipment, and the operations of workers to the Site and other areas permitted by Applicable Laws, and shall not unreasonably encumber the Site and other areas with construction equipment or other materials or equipment. Contractor shall assume full responsibility for any damage to any such land or area, or to City or occupant thereof, or of any adjacent land or areas resulting from the performance of the Work.

B. Site Maintenance. During the progress of the Work, Contractor shall keep the Site and other areas free from accumulations of waste materials, rubbish, and other debris. Removal and disposal of such waste materials, rubbish, and other debris shall conform to Applicable Laws. The Contractor shall furnish trash bins for all debris from construction. All debris shall be placed in trash bins daily. Forms and false-work that are to be re-used shall be stacked neatly concurrently with their removal. Forms and false-work that are not to be re-used shall be disposed of concurrently with their removal.

C. Cleaning. Prior to Completion of the Work, Contractor shall clean the Site and make it ready for utilization by the City. At the completion of the Work Contractor shall remove from the Site all tools, appliances, construction equipment and machinery, and surplus materials and shall restore to original condition all property not designated for alteration by the Contract Documents.

5.28 Utility Usage.

A. All temporary utilities, including but not limited to electricity, water, gas, and telephone, used on the Work shall be furnished and paid for by Contractor. Contractor shall provide necessary temporary distribution systems, including meters, if necessary, from distribution points to points on the Work where the utility is

needed. Upon completion of the Work, Contractor shall remove all temporary distribution systems. Contractor shall provide necessary and adequate utilities and pay all costs for water, electricity, gas, oil, and sewer charges required for completion of the Work, including but not limited to startup and testing required in the Contract Documents. All permanent meters installed shall be listed in the Contractor's name until the Work is accepted. For Work to be performed in existing City facilities, Contractor may use the City's existing utilities, provided such use is reasonable under the circumstances. If Contractor uses the City utilities, it will not need to compensate the City for reasonably consumption of utilities, but Contractor will be responsible for any excessive, unreasonable or wasteful utility usage. Amounts due the City under this section may be deducted from progress payments.

5.29 Protection of Work and Property.

A. The Contractor shall digitally record video and take photographs of the Project site and adjacent improvements in a manner and quality that clearly depicts the existing condition of the Project Site and adjacent improvements immediately prior to the start of Work (minimum 1080p video and 4MP photo). All videos and photographs shall be date and time stamped. The Contractor shall submit the video and photos in digital format on a memory stick before the commencement of Work, along with a map outlining the route and locations of the videos and/or photographs. The Contractor shall be responsible for all damages to persons or property that occur as a result of the Work. Contractor shall be responsible for the proper care and protection of all materials delivered and Work performed until completion and final acceptance by the City. All Work shall be solely at the Contractor's risk.

B. Contractor shall adequately protect adjacent property from settlement or loss of lateral support as necessary. Contractor shall comply with all applicable safety laws and building codes to prevent accidents or injury to persons on, about, or adjacent to the Project site where Work is being performed. Contractor shall erect and properly maintain at all times, as required by field conditions and progress of work, all necessary safeguards, signs, barriers, lights, and watchmen for protection of workers and the public, and shall post danger signs warning against hazards created in the course of construction.

C. Contractor shall provide such heat, covering, and enclosures as are necessary to protect all Work, materials, equipment, appliances, and tools against damage by weather conditions.

D. Contractor shall take adequate precautions to protect existing sidewalks, curbs, pavements, utilities, and other adjoining property and structures, and to avoid damage thereto, and Contractor shall repair any damage thereto caused by the Work operations. Contractor shall:

1. Enclose the working area with a substantial barricade, and arrange work to cause minimum amount of inconvenience and danger to the public.

2. Provide substantial barricades around any shrubs or trees indicated to be preserved.

3. Deliver materials to the Site over a route designated by the City.

4. Provide any and all dust control required and follow the applicable air quality regulations as appropriate. If the Contractor does not comply immediately with a notice from the City or a public agency responsible for air quality, the City shall have the authority to provide dust control and deduct the cost from payments to the Contractor.

5. Confine Contractor's apparatus, the storage of materials, and the operations of its workers to limits required by law, ordinances, permits, or directions of the City. Contractor shall not unreasonably encumber the Site with its materials.

6. Take care to prevent disturbing or covering any survey markers, monuments, or other devices marking property boundaries or corners. If such markers are disturbed by accident, they shall be replaced by a civil engineer or land surveyor acceptable to the City, at no cost to the City.

7. Ensure that existing facilities, fences and other structures are all adequately protected and that, upon completion of all Work, all facilities that may have been damaged are restored to a condition acceptable to the City.

8. Preserve and protect from injury all buildings, pole lines and all directional, warning and mileage signs that have been placed within the right-of-way.

9. At the completion of work each day, leave the Work and the Site in a clean, safe condition.

10. Comply with any stage construction and/or traffic handling plans. Access to residences and businesses shall be maintained at all times, except with the City's written approval. Any request for approval to reduce or restrict access to residences and business must be submitted to the City at least seven (7) Days in advance, and the City may issue or withhold approval in its sole discretion.

E. These precautionary measures will apply continuously and not be limited to normal working hours. Full compensation for the work involved in the protection and preservation of life, safety and property as above specified shall be considered as included in the prices paid for the various contract items of Work, and no additional allowance will be made therefor.

F. Should damage to persons or property occur as a result of the Work, Contractor shall promptly notify the City, in writing. Contractor shall be responsible for proper investigation, documentation, including video or photography, to adequately memorialize and make a record of what transpired. The City shall be entitled to inspect and copy any such documentation, video, or photographs.

G. Contractor shall maintain all investigation documentation including video and/or photographs for a minimum of four (4) years following completion of the Project.

5.30 Emergencies.

A. In emergencies affecting the safety or protection of persons or the Work or Property at the Site or adjacent thereto, the Contractor, without special instruction or authorization from the City or the Engineer, is obligated to act to prevent threatened damage, injury or loss. The Contractor shall give the Engineer prompt written notice if the Contractor believes that any significant changes in the Work or variations from the Contract Documents have been caused thereby.

ARTICLE 6 -MATERIALS; INSPECTION

6.1 Access to Work.

A. The City, Engineer, their consultants and other representatives and personnel, independent testing laboratories, and governmental agencies with jurisdictional interests will have access to the Site and the Work at reasonable times for their observation, inspection, and testing. Contractor shall provide them proper and safe conditions for such access and advise them of Contractor's safety procedures and programs.

6.2 Materials.

A. Except as otherwise specifically stated in the Contract Documents, Contractor shall provide and pay for all materials, labor, tools, equipment, water, lights, power, transportation, superintendence, temporary constructions of every nature, and all other services and facilities whatsoever necessary to execute and complete this Contract within the Contract Time. Unless otherwise specified, all materials, parts, and equipment furnished by the Contractor in the Work shall be new, the best of their respective kinds and grades as noted and/or specified, and workmanship shall be of good quality.

B. No materials, supplies, or equipment for Work under this Contract shall be purchased subject to any chattel mortgage or under a conditional sale or other agreement by which an interest therein or in any part thereof is retained by the seller or supplier. Contractor warrants good title to all material, supplies, and equipment installed or incorporated in the Work and agrees upon completion of all work to deliver the Project, to the City free from any claims, liens, or charges.

C. Materials shall be furnished in ample quantities and at such times as to ensure uninterrupted progress of the Work and shall be stored properly and protected as required by the Contract Documents. Contractor shall be entirely responsible for damage or loss by weather or other causes to materials or Work. Materials shall be stored on the Project Site in such manner so as not to interfere with any operations of the City or any independent contractor.

D. Contractor shall verify all measurements, dimensions, elevations, and quantities before ordering any materials or performing any Work, and the City shall not be liable for Contractor's failure to so. Except for an adjustment to Unit Price Work for item overruns and underruns in accordance with the Contract Documents, no additional compensation, over and above payment for the actual quantities at the prices set

out in the Bid Schedule, will be allowed because of differences between actual measurements, dimension, elevations and quantities and those indicated on the Plans and in the Specifications. Any difference therein shall be submitted to the Engineer for consideration before proceeding with the Work.

6.3 Test and Inspections.

A. Inspection and Testing of Work and Materials

1. If the Contract Documents, the Engineer, or any instructions, laws, ordinances, or public authority requires any part of the Work to be tested or approved, Contractor shall provide the Engineer at least two (2) working days' notice of its readiness for observation or inspection. If inspection is by a public authority other than the City, Contractor shall promptly inform the City of the date fixed for such inspection. Required certificates of inspection (or similar) shall be secured by Contractor. Costs for City testing and inspection shall be paid by the City. Costs of tests for Work found not to be in compliance shall be paid by the Contractor.

2. The Contractor shall pay for the cost of any minimum "show up" costs of a materials testing technician that was called for by the Contractor but ultimately the Contractor work was not ready for the inspection. Any such costs shall be deducted from any amounts due to the Contractor.

3. If any Work is done or covered up without the required testing or approval, the Contractor shall uncover or deconstruct the Work, and the Work shall be redone after completion of the testing at the Contractor's cost in compliance with the Contract Documents.

4. Where inspection and testing are to be conducted by an independent laboratory or agency, materials or samples of materials to be inspected or tested shall be selected by such laboratory or agency, or by the City, and not by Contractor. Unless otherwise stated and as provided by the Contract Documents, the City shall employ and pay for the services of an independent testing laboratory to perform all inspections, tests, or approvals required by the Contract Documents. All tests or inspections of materials shall be made in accordance with the commonly recognized standards of national organizations.

5. Reexamination of Work may be ordered by the City. If so ordered, Work must be uncovered or deconstructed by Contractor. If Work is found to be in accordance with the Contract Documents, the City shall pay the costs of reexamination and reconstruction. If such work is found not to be in accordance with the Contract Documents, Contractor shall pay all costs.

B. Testing of Materials

1. In advance of manufacture of materials to be supplied by Contractor which must be tested or inspected, Contractor shall notify the City so that the City may arrange for testing at the source of supply. Any materials which have not satisfactorily passed such testing and inspection shall not be incorporated into the Work.

2. If the manufacture of materials to be inspected or tested will occur in a plant or location greater than sixty (60) miles from the City, the Contractor shall pay for any excessive or unusual costs associated with such testing or inspection, including but not limited to excessive travel time, standby time and required lodging.

3. Unless otherwise specified in the Special Provisions, all initial testing and a reasonable amount of retesting will be performed under the direction of the Engineer, and at no expense to the Contractor. The Contractor shall notify the Engineer in writing, at least 15 days in advance, of its intention to use materials for which tests are specified, to allow sufficient time to perform the tests. The notice shall name the proposed supplier and source of material. If the notice of intent to use is sent before the materials are available for testing or inspection, or is sent so far in advance that the materials on hand at the time will not last but will be replaced by a new lot prior to use on the Work, it will be the Contractor's responsibility to re-notify the Engineer when samples which are representative may be obtained.

4. A Certificate of Compliance shall be furnished to the Engineer prior to the use of any material or assembled material for which these Specifications so require or if so required by the Engineer. The Engineer may waive the materials testing requirements and accept a Certificate of Compliance. Material test data may be required by the Engineer to be included with the submittal. Materials used on the basis of a Certificate of Compliance may be sampled and tested at any time. The submission of a Certificate of Compliance shall not relieve the Contractor of responsibility for incorporating material into the Work which conforms to the requirements of the Contract Documents, and any material not conforming to the requirements will be subject to rejection by the Engineer whether in place or not.

5. Copies of mill certificates of composition and quality of all component materials (reinforcing steel, structural steel, lumber, etc.) incorporated in the construction of the Work shall be provided to the City at the time of delivery. City shall retain the right to reject any raw material not provided with a mill certificate at the time of delivery.

6. If, after incorporating such materials into the Work, it is found that sources of supply that have been approved do not furnish a uniform product, or if the product from any source proves unacceptable at any time, the Contractor shall furnish approved material from other approved sources. If any product proves unacceptable after improper storage, handling or for any other reason it shall be rejected, not incorporated into the Work, and shall be removed from the Project Site all at the Contractor’s expense.

6.4 Requests for Substitutions.

A. For the purposes of this provision, the term “substitution” shall mean the substitution of any material, method or service substantially equal to or better in every respect to that indicated in the Standard Specifications or otherwise referenced herein.

B. Pursuant to Public Contract Code section 3400(b), the City may make a finding that is described in the Notice Inviting Bids that designates certain products, things, or services by specific brand or trade name.

C. Unless specifically designated in the Special Conditions, whenever any material, process, or article is indicated or specified by grade, patent, or proprietary name or by name of manufacturer, such specifications shall be deemed to be used for the purpose of facilitating the description of the material, process, or article desired and shall be deemed to be followed by the words "or equal." Contractor may, unless otherwise stated, offer for substitution any material, process, or article which may be substantially equal to or better in every respect to that so indicated or specified in the Contract Documents. However, the City has adopted uniform standards for certain materials, processes, and articles.

D. The Contractor shall submit substitution requests, together with substantiating data, for substitution of any "or equal" material, process, or article no later than thirty-five (35) calendar days after award of Contract. Provisions regarding submission of substitution requests shall not in any way authorize an extension of time for the performance of this Contract. If a substitution request is rejected by the City, the Contractor shall provide the material, method or service specified herein. The City shall not be responsible for any costs incurred by the Contractor associated with substitution requests. The burden of proof as to the equality of any material, process, or article shall rest with the Contractor. The Engineer has the complete and sole discretion to determine if a material, process, or article is substantially equal to or better than that specified and to approve or reject all substitution requests.

E. Substantiating data as described above shall include, at a minimum, the following information:

1. A signed affidavit from the Contractor stating that the material, process, or article proposed as a substitution is substantially equal to or better than that specified in every way except as may be listed on the affidavit.

2. Illustrations, specifications, catalog cut sheets, and any other relevant data required to prove that the material, process, or article is substantially equal to or better than that specified.

3. A statement of the cost implications of the substitution being requested, indicating whether and why the proposed substitution will reduce or increase the amount of the contract.

4. Information detailing the durability and lifecycle costs of the proposed substitution.

F. Failure to submit all the required substantiating data detailed above in a timely manner so that the substitution request can be adequately reviewed may result in rejection of the substitution request. The Engineer is not obligated to review multiple submittals related the same substitution request resulting from the Contractor's failure to initially submit a complete package.

G. Time limitations within this Article shall be strictly complied with and in no case will an extension of time for completion of the contract be granted because of Contractor's failure to provide substitution requests at the time and in the manner described herein.

H. The Contractor shall bear the costs of all the City work associated with the review of substitution requests.

I. If substitution requests approved by the Engineer require that Contractor furnish materials, methods or services more expensive than that specified, the increased costs shall be borne by Contractor.

ARTICLE 7 -SUBSURFACE AND PHYSICAL CONDITIONS; UTILITIES

7.1 Soils Investigations.

A. When a soils investigation report for the Site is available, such report is provided for informational purposes only. Any information obtained from such report as to subsurface soil condition, or to elevations of existing grades or elevations of underlying rock, is approximate only and is not guaranteed. Contractor acknowledges that any soils investigation report (including any borings) was prepared for purposes of design only and Contractor is required to examine the Site before submitting its Bid and must make whatever tests it deems appropriate to determine the condition of the so

7.2 Ownership of Site Materials Found.

A. The title to water, soil, rock, gravel, sand, minerals, timber and any other materials developed or obtained in the excavation or other operations of Contractor or any of its Subcontractors in the performance of the Contract, and the right to use said items in carrying out the Contract, or to dispose of same, is hereby expressly reserved by the City. Neither Contractor nor any of its Subcontractors nor any of their representatives or employees shall have any right, title, or interest in said materials, nor shall they assert or make any claim thereto. Contractor will, as determined by the City's Representative, be permitted to use in the Work without charge, any such materials which meet the requirements of the Contract Documents, provided the City shall have the right to use or consume these materials without payment to a third party.

7.3 Existence of Utilities at the Work Site.

A. Existing Utilities

1. The location of known existing utilities and pipelines are shown on the Plans in their approximate locations. However, nothing herein shall be deemed to require the City to indicate the presence of existing service laterals or appurtenances whenever the presence of such utilities on the site of the project can be inferred from the presence of other visible facilities, such as buildings, cleanouts, meter and junction boxes, on or adjacent to the Site of the Project.

2. The City will assume the responsibility for the timely removal, relocation, or protection of existing main or trunk line utility facilities located on the Project site if such utilities are not identified by the City in the Contract Documents or which cannot reasonably be inferred from the presence of other visible facilities.

B. Utility Location

1. It shall be the Contractor's responsibility to determine the exact location and depth of all utilities, including service connections, which have been marked by the respective utility owners and which the Contractor believes may affect or be affected by the Contractor's operations. The Contractor shall not be entitled to additional compensation nor time extensions for work necessary to avoid interferences nor for repair to damaged utilities if the Contractor does not expose all such existing utilities as required by this Article.

2. The locating of utilities shall be in conformance with Government Code Section 4216 et seq. except for the City's utilities located on the City's property and not on public right-of-way.

3. A "High Priority Subsurface Installation" is defined in Government Code Section 4216 (j) as "high-pressure natural gas pipelines with normal operating pressures greater than 415kPA gauge (60psig) or greater than six inches nominal pipe diameter, petroleum pipelines, pressurized sewage pipelines, high-voltage electric supply lines, conductors, or cables that have a potential to ground of greater than or equal to 60kv, or hazardous materials pipelines that are potentially hazardous to workers or the public if damaged."

4. A "Subsurface Installation" is defined in Government Code Section 4216 (s) as "any underground pipeline, conduit, duct, wire, or other structure, except nonpressurized sewer lines, nonpressurized storm drains, or other nonpressurized drain lines."

5. Pursuant to Government Code Section 4216.2 the Contractor shall contact the appropriate regional notification center at least two (2) working days but not more than 14 Days before performing any excavation. The date of the notification shall not count as part of the two-working-day notice. Before notifying the appropriate regional notification center, the Contractor shall delineate the area to be excavated. The Contractor shall request that the utility owners conduct a utility survey and mark or otherwise indicate the location of their service. The Contractor shall furnish to the Engineer written documentation of its contact(s) with the regional notification center prior to commencing excavation at such locations.

6. After the utility survey is completed, the Contractor shall commence "potholing" or hand digging to determine the actual location of the pipe, duct, or conduit and in accordance with Government Code Section 4216.4 if the excavation within the "tolerance zone" of a subsurface installation. The Engineer shall be given notice prior to commencing potholing operations. The Contractor shall uncover all piping and conduits, to a point one (1) foot below the pipe, where crossings, interferences, or connections are shown on the Drawings, prior to trenching or excavating for any

pipe or structures, to determine actual elevations. New pipelines shall be laid to such grade as to clear all existing facilities, which are to remain in service for any period subsequent to the construction of the run of pipe involved.

7. The Contractor's attention is directed to the requirements of Government Code Section 4216.2 (c) which provides: "When the excavation is proposed within 10 feet of a high priority subsurface installation, the operator of the high priority subsurface installation shall notify the excavator of the existence of the high priority subsurface installation to set up an onsite meeting prior to the legal excavation start date and time or at a mutually agreed upon time to determine actions or activities required to verify the location and prevent damage to the high priority subsurface installation. As part of the meeting, the excavator shall discuss with the operator the method and tools that will be used during the excavation and the information the operator will provide to assist in verifying the location of the subsurface installation. The excavator shall not begin excavating until after the completion of the onsite meeting." The Contractor shall notify the Engineer in advance of this meeting.

C. Utility Relocation and Repair

1. If interferences occur at locations other than those indicated in the Contract Documents with reasonable accuracy, the Contractor shall notify the Engineer in writing. The Engineer will supply a method for correcting said interferences in accordance with the responsibilities of this section and Government Code Section 4215. To the extent any delay is caused thereby, Contractor shall submit a notice of delay within five (5) Days of discovery of the circumstances giving rise to the delay in accordance with Article 9.1 Change Orders and Time Extensions.

2. Care shall be exercised by the Contractor to prevent damage to adjacent existing facilities and public or private works; where equipment will pass over these obstructions, suitable planking shall be placed. If high priority subsurface installations are damaged and the operator cannot be contacted, the Contractor shall call 911 emergency services.

3. The City will compensate the Contractor for the costs of locating and repairing damage not due to the failure of the Contractor to exercise reasonable care, and for removing or relocating such main or trunk line utility facilities not indicated in the Contract Documents with reasonable accuracy, and for the cost of equipment on the Project necessarily idled during such work. The payment for such costs will be made as provided in Article 9.1 Change Orders and Time Extensions. The Contractor shall not be assessed liquidated damages for delay in completion of the Project, when such delay is caused by the failure of the City or utility company to provide for removal or relocation of such utility facilities. Requests for extensions of time arising out of utility relocation or repair delays shall be filed in accordance with Article 9.1 Change Orders and Time Extensions and Article 9.3 Time for Completion and Liquidated Damages.

4. The public utility, where it is the owner of the affected utility, shall have the sole discretion to perform repairs or relocation work or permit the Contractor to do such

repairs or relocation work at a reasonable price. The right is reserved to the City and the owners of utilities or their authorized agents to enter upon the Work area for the purpose of making such changes as are necessary for the rearrangement of their facilities or for making necessary connections or repairs to their properties. The Contractor shall cooperate with forces engaged in such work and shall conduct its operations in such a manner as to avoid any unnecessary delay or hindrance to the work being performed by such forces and shall allow the respective utilities time to relocate their facility.

5. When the Contract Documents indicate that a utility is to be relocated, altered or constructed by others, the City will conduct all negotiations with the utility company and the work will be done at no cost to the Contractor, unless otherwise stipulated in the Contract Documents.

6. Temporary or permanent relocation or alteration of utilities desired by the Contractor for its own convenience shall be the Contractor's responsibility and it shall make arrangements and bear all costs for such work.

D. Construction at Existing Utilities

1. Where the Work to be performed crosses or otherwise interferes with water, sewer, gas, or oil pipelines; buried cable; or other public or private utilities, the Contractor shall perform construction in such a manner so that no damage will result to either public or private utilities. It shall be the responsibility of the Contractor to determine the actual locations of, and make accommodates to maintain, all utilities.

2. Before any utility is taken out of service, permission shall be obtained by the Contractor from the owner. The owner, any impacted resident or business owner and the City Representative will be advised of the nature and duration of the utility outage as well as the Contractor's plan for providing temporary utilities if required by the owner. The Contractor shall be liable for all damage which may result from its failure to maintain utilities during the progress of the Work, and the Contractor shall indemnify City as required by the Contract Documents from all claims arising out of or connected with damage to utilities encountered during construction; damages resulting from disruption of service; and injury to persons or damage to property resulting from the negligent, accidental, or intentional breaching of utilities.

3. Unless otherwise called for by the Contract Documents, the cost of all material, equipment, and labor required to complete this work, shall be included in Contractor's bid and distributed in the schedule of pay Items. No additional compensation shall be made to the Contractor for this work.

7.4 Trenches

A. Trenches Five Feet or More in Depth.

1. Contractor shall submit to the Engineer at the preconstruction meeting, a detailed plan showing the design of shoring, bracing, sloping or other provisions to be made for worker protection from hazards of caving ground during the excavation of any

trench or trenches five feet or more in depth. If such plan varies from shoring system standards established by the Construction Safety Orders of the California Code of Regulations, Department of Industrial Relations, the plan shall be prepared by a California registered civil or structural engineer. The plan shall not be less effective than the shoring, bracing, sloping, or other provisions of the Construction Safety Orders, as defined in the California Code of Regulations. The Contractor shall designate in writing the "competent person" as defined in Title 8, California Code of Regulations, who shall be present at the Work Site each day that trenching/excavation is in progress. The "competent person" shall prepare and provide daily trenching/excavation inspection reports to the Engineer. Contractor shall also submit a copy of its annual California Occupational Safety and Health Administration (Cal/OSHA) trench/excavation permit.

B. Excavations Deeper than Four Feet.

1. If the Work involves excavating trenches or other excavations that extend deeper than four (4) feet below the surface, Contractor shall promptly within three (3) Days, and before the excavation is further disturbed, notify the City in writing of any of the following conditions:

a. Material that the Contractor believes may be material that is hazardous waste, as defined in section 25117 of the Health and Safety Code, that is required to be removed to a Class I, Class II, or Class III disposal site in accordance with provisions of existing law.

b. Subsurface or latent physical conditions at the site differing from those indicated.

c. Unknown physical conditions at the site of any unusual nature, different materially from those ordinarily encountered and generally recognized as inherent in work of the character provided for in the Contract

2. The City shall promptly investigate the conditions, and if it finds that the conditions do so materially differ, or do involve hazardous waste, and cause a decrease or increase in Contractor's cost of, or the time required for, performance of any part of the Work, shall issue a Change Order under the procedures described in Article 9.1 Change Orders and Time Extensions.

3. In the event that a dispute arises between the City and the Contractor as to whether the conditions materially differ, or involve hazardous waste, or cause a decrease or increase in the Contractor's cost of, or time required for, performance of any part of the Work, the Contractor shall not be excused from any scheduled completion date provided for by the Contract, but shall proceed with all Work to be performed under the Contract. Contractor shall retain any and all rights provided either by contract or by law which pertain to the resolution of disputes and protests between the parties.

ARTICLE 8 -PROSECUTION OF THE WORK

8.1 Contractor's Means and Methods.

A. Contractor is solely responsible for the means and methods utilized to perform the Work. In no case shall the Contractor's means and methods deviate from commonly used industry standards.

8.2 Construction Schedule.

A. General Requirements. The schedule shall be prepared in a Critical Path Method ("CPM") format and in an electronic scheduling program acceptable to the City and as specified in the Contract Documents. Contractor shall deliver the schedule and all updates to the City in both paper and electronic form. The electronic versions shall be in the format and include all data used to prepare the schedule. Copies are not acceptable.

B. Schedule. The receipt or approval of any schedules by the City shall not in any way relieve the Contractor of its obligations under the Contract Documents. The Contractor is fully responsible to determine and provide for any and all staffing and resources at levels which allow for good quality and timely completion of the Project. Contractor's failure to incorporate all elements of Work required for the performance of the Contract or any inaccuracy in the schedule shall not excuse the Contractor from performing all Work required for a completed Project within the specified Contract Time. If the required schedule is not received by the time the first payment under the Contract is due, Contractor shall not be paid until the schedule is received, reviewed and accepted by the City.

C. Schedule Contents. The schedule shall allow enough time for inclement weather. The schedule shall indicate the beginning and completion dates of all phases of construction; critical path for all critical, sequential time related activities; and "float time" for all "slack" or "gaps" in the non-critical activities. The schedule shall include appropriate time allowances and constraints for submittals, items of interface with Work performed by others, and specified construction, start-up and performance tests. All float shall be owned by the Project. Schedules indicating early or late completion shall not modify or have any effect on the Contract Time, regardless of whether the schedules are reviewed and/or accepted by the City. For purposes of determining Liquidated Damages, the Contract Time shall control and may only be altered by a duly authorized Change Order.

D. Schedule Updates. Contractor shall continuously update its construction schedule. Contractor shall submit an updated and accurate construction schedule to the City: (1) prior to the start of construction, if there are any changes to the initial schedule; (2) with each progress payment request; and (3) whenever requested to do so by the City. The City may withhold progress payments or other amounts due under the Contract Documents if Contractor fails to submit an updated and accurate construction schedule. Upon the City's request, Contractor shall submit any schedules or updates to the City in the native electronic format of the software used to create the schedule. Contractor shall also submit schedules showing a two-week

detailed look-ahead at weekly meetings conducted with the City. The two-week look-ahead schedule shall clearly identify all staffing and other resources which in the Contractor's judgment are needed to complete the Work within the Contract Time, and it shall clearly state the number of staff to be used on each daily segment of the Work.

E. Acceptance. Acceptance of the schedules by the City will not impose on responsibility for accuracy, for sequencing, scheduling, or progress of the Work, or compliance with the Contract Documents. Acceptance will not interfere with or relieve Contractor from Contractor's full responsibility therefor.

F. Recovery Schedule.

1. Should any of the following conditions exist, City may require Contractor to prepare, at no extra cost to City, a plan of action and a recovery schedule for completing the Work and achieving all contractual milestones within the allotted Contract Time:

a. The Contractor's monthly progress report indicates delays that are, in the opinion of City, of sufficient magnitude that City questions the Contractor's ability to complete the Work;

b. The schedule shows the Contractor to be thirty (30) or more days behind the critical path at any time during construction;

c. The Contractor desires to make changes in the logic or the planned duration of future activities of the schedule which, in the opinion of City, are major in nature.

2. The recovery schedule shall include proposed revisions to the Construction Schedule, demonstrating how Contractor intends to achieve all contractual milestones including Contract completion within the allotted Contract Time. The submittal shall include a narrative describing the actions planned by the Contractor to recover the schedule.

3. Contractor shall submit the Recovery Schedule within seven (7) Days of City's request. If Contractor asserts that City is responsible for the delay, failure to submit the recovery schedule within seven (7) Days of City's request, will be considered a concurrent delay event attributable to Contractor, and Contractor shall only be entitled to non-compensable adjustments to Contract Times. If Contractor is responsible for the delay, this provision will not limit or affect Contractor's liability and failure to submit the recovery schedule with seven (7) Days of City's request may result in City withholding progress payments or other amounts due under the Contract Documents.

4. Contractor is responsible for all costs associated with the preparation and execution of the recovery schedule, including any necessary recovery actions, which may include, but are not limited to, assignment of additional labor, and/or equipment, shift or overtime work, expediting of submittals or deliveries, overlapping of activities or sequencing changes to increase activity concurrence. Regardless of whether City directs Contractor to prepare a recovery schedule pursuant to this Section, Contractor shall promptly undertake appropriate action at

no additional cost to City to recover the schedule whenever the current construction schedule shows that the Contractor will not achieve a milestone and/or complete the Work within the allotted Contract Time.

8.3 Time for Completion and Liquidated Damages

A. Time for Completion. The time for completion set forth in Article 2 of the Contract for Construction shall commence: (1) on the date stated in the Notice to Proceed, or (2) if the Notice to Proceed does not specify a commencement date, then on the date of the Notice to Proceed and shall be completed by Contractor in the time specified in the Contract Documents. The City is under no obligation to consider early completion of the Project; and the Contract completion date shall not be amended by the City's receipt or acceptance of the Contractor's proposed earlier completion date. Any difference in time between the Contractor's early completion and the Contract Time shall be considered a part of the Project float. Contractor shall not be entitled to compensation, and the City will not compensate Contractor, for delays which impact early completion. Contractor shall not, under any circumstances, receive additional compensation from the City (including but not limited to indirect, general, administrative or other forms of overhead costs) for the period between the time of earlier completion proposed by the Contractor and the Contract completion date.

B. Liquidated Damages. If the Work is not completed within the Contract Time(s), it is understood that the City will suffer damage. In accordance with Government Code section 53069.85 and Public Contract Code section 7102, being impractical and infeasible to determine the amount of actual damage, it is agreed that Contractor shall pay to the City as fixed and liquidated damages, and not as a penalty, the sum stipulated in the Contract for each calendar day of delay until the Work is fully completed. Contractor and its surety shall be liable for any liquidated damages. Any money due or to become due the Contractor may be retained to cover liquidated damages.

C. Inclement Weather. Contractor shall abide by the City's determination of what constitutes inclement weather. Time extensions for inclement weather shall only be granted when the Work stopped during inclement weather is on the critical path of the Project schedule. Contractor shall not be entitled to reverse liquidated damages for time extensions resulting from inclement weather.

D. Extension of Time. Contractor's entitlement to an extension of the Contract Time is limited to a City-caused extension of the critical path, reduced by the Contractor's concurrent delays, and established by a proper time impact analysis. Contractor shall not be charged liquidated damages because of any delays in completion of the Work due to unforeseeable causes beyond the control and without the fault or negligence of Contractor (or its Subcontractors or Suppliers). The City shall ascertain the facts and extent of delay and grant extension of time for completing the Work when, in its judgment, the facts justify such an extension. Contractor shall not be entitled to an adjustment in the Contract Times for delays within the control of Contractor. Delays attributable to and within the control of a Subcontractor or Supplier shall be deemed to be delays within the control of Contractor.

E. Reverse Liquidated Damages. Consistent with Public Contract Code Section 7102, Contractor will be compensated for damages incurred due to unreasonable delays to the critical path for which the City is responsible. The parties agree that determining Contractor's exact delay damages are and will continue to be impracticable and extremely difficult. As such, for each calendar day in excess of the time for completion set forth in Article 2 of the Contract for Construction, the City shall pay to the Contractor the sum stipulated in the Contract per day. Such amount shall constitute the only payment allowed for any City-caused delays and shall necessarily include all overhead, all profits, all administrative costs, all bond costs, all labor, materials, equipment and rental costs and any other costs, expenses and fees incurred or sustained as a result of such delays. Contractor shall not be entitled to reverse liquidated damages for any change in the Work in which Contractor is compensated for overhead and profit through a change in Unit Price Work or a Change Order resulting in a lump sum or allowed mark-up for the additional Work. The amount of reverse liquidated damages shall be reduced by Contractor's concurrent delays.

F. Force Majeure. In accordance with subparagraphs "D" and "E" above, the Contractor shall not be charged liquidated damages, and the City shall not be responsible, for any delays resulting from a Force Majeure Event. If a delay to the critical path results from a Force Majeure Event, the Contractor will be entitled to a time extension but will not receive an adjustment to the Contract Price or any other compensation. Such a non-compensable adjustment shall be Contractor's sole and exclusive remedy for such delays.

G. No Damages for Reasonable Delay. The City's liability to Contractor for delays for which the City is responsible shall be limited to only an extension of time unless such delays were unreasonable under the circumstances. In no case shall the City be liable for any costs which are borne by the Contractor in the regular course of business, including, but not limited to, home office overhead and other ongoing costs. Damages caused by unreasonable City delay shall be based on actual costs only, no proportions or formulas shall be used to calculate any delay damages.

H. Procedure for Time Extensions and Delay Damages. Contractor shall not be entitled to any extension of time or any reverse liquidated damages unless Contractor properly notices the delay and adjustment to compensation and requests a Change Order in accordance with Article 9.1 Change Orders and Time Extensions. Contractor's failure to timely and fully comply with the Change Order procedures in the Contract Documents shall constitute a waiver of Contractor's right to a time extension or reverse liquidated damages.

8.4 Contractor's Responsibility for Work.

A. Until the acceptance of the Work by the Engineer as evidenced in writing, it shall be under the charge and care of the Contractor. The Contractor shall take every necessary precaution against injury or damage to any part thereof by the action of the elements or from any cause whether arising from the execution or non-execution of the Work. The Contractor shall rebuild, repair, restore and make good at its own expense all injuries or damages to any portion of the Work before its completion and

acceptance. In the event of damage proximately caused by an Act of God, as defined by Section 7105 of the Public Contract Code, the City will pay for repair or restoration to damaged Work in excess of 5% of the total Bid.

8.5 Occupancy.

A. The City reserves the right to occupy or utilize any portion of the Work at any time before completion, and such occupancy or use shall not constitute acceptance of any part of Work covered by this Contract. This use shall not relieve the Contractor of its responsibilities under the Contract.

8.6 Securities for Money Withheld

A. Pursuant to section 22300 of the Public Contract Code of the State of California, Contractor may request the City to make retention payments directly to an escrow agent or may substitute securities for any money withheld by the City to ensure performance under the contract. At the request and expense of Contractor, securities equivalent to the amount withheld shall be deposited with the City or with a state or federally chartered bank as the escrow agent who shall return such securities to Contractor upon satisfactory completion of the contract. Deposit of securities with an escrow agent shall be subject to a written agreement substantially in the form provided in section 22300 of the Public Contract Code.

8.7 The City's Right to Suspend/Terminate the Contract

A. Suspension of Work by the City

1. The City may, at its sole option, decide to suspend at any time the performance of all or any portion of the Work by notice in writing to Contractor. Such notice of suspension of Work will designate the amount and type of plant, labor, and equipment to be committed to the Project during the period of suspension. Contractor shall use its best efforts to utilize its plant, labor, and equipment in such a manner as to minimize costs associated with suspension.

2. Upon receipt of any such notice, Contractor shall, unless the notice requires otherwise:

a. Immediately discontinue Work on the date and to the extent specified in the notice;

b. Place no further orders or subcontracts for material, services, or facilities with respect to suspended Work other than to the extent required in the notice;

c. Promptly make every reasonable effort to obtain suspension upon terms satisfactory to the City's Representative of all orders, subcontracts, and rental agreements to the extent they relate to performance of Work suspended; and

d. Continue to protect and maintain the Work including those portions on which Work has been suspended.

3. Except as provided by this Article, as full and complete compensation for such suspension, Contractor shall be granted an adjustment in the Contract Price based on a negotiated daily rate that reflects the Contractor's actual costs associated with the demobilized condition of the Site and an extension of the Contract Times equal to the number of days performance of Work is suspended; provided, however, that no adjustment of Contract Price or extension of Contract Times shall be granted if the suspension results from Contractor's non-compliance with the requirements of the Contract.

B. Termination for Cause by the City:

1. In the sole estimation of the City, if the Contractor refuses or fails to prosecute the Work or any separable part thereof with such diligence as will insure its completion within the time specified by the Contract Documents, or any extension thereof, or fails to complete such Work within such time, or if the Contractor should be adjudged a bankrupt, or if it should make a general assignment for the benefit of its creditors, or if a receiver should be appointed on account of its insolvency, or the Contractor or any of its subcontractors should violate any of the provisions of this Contract, the City may serve written notice upon the Contractor and its surety of the City's intention to terminate this Contract. This notice of intent to terminate shall contain the reasons for such intention to terminate this Contract, and a statement to the effect that the Contractor's right to perform this Contract shall cease and terminate upon the expiration of ten (10) Days unless such violations have ceased and arrangements satisfactory to the City have been made for correction of said violations.

2. After expiration of the ten (10) Day period, the City may terminate the Contract by providing a Notice of Termination to the Contractor. The City may take over and complete the Work by any method it may deem appropriate, including enforcement of the Project performance bond. Contractor and its surety shall be liable to the City for any excess costs or other damages incurred by the City to complete the Work. If the City takes over the Work, the City may, without liability for so doing, take possession of and utilize in completing the Work such materials, appliances, plant, and other property belonging to the Contractor as may be on the Site.

3. Upon termination, Contractor shall not be entitled to receive any further payment from the City, except for Work which was duly performed prior to the effective date of the Notice of Termination. Contractor shall submit an invoice for final payment within thirty (30) Days of the effective date of the Notice of Termination. The City may withhold from final payment up to 150% of any disputed amounts, including any amounts which may be necessary to repair defective Work, complete unfinished Work, or are otherwise occasioned by Contractor's failure to perform its duties under the Contract.

C. Termination for Convenience by the City:

1. The City may terminate performance of the Work called for by the Contract Documents in whole or, from time to time, in part, upon ten (10) Days written notice if the City determines that a termination is in the City's interest.

2. The Contractor shall terminate all or any part of the Work upon delivery to the Contractor of a Notice of Termination specifying that the termination is for the convenience of the City, the extent of termination, and the effective date of such termination.

3. After receipt of Notice of Termination, and except as directed by the City's Representative, the Contractor shall, regardless of any delay in determining or adjusting any amounts due under this termination for convenience clause, immediately proceed with the following obligations:

a. Stop Work as specified in the Notice.

b. Complete any Work specified in the Notice of Termination in a least cost/shortest time manner while still maintaining the quality called for under the Contract Documents.

c. Leave the property upon which the Contractor was working and upon which the facility (or facilities) forming the basis of the Contract Document is situated in a safe and sanitary manner such that it does not pose any threat to the public health or safety.

d. Terminate all subcontracts to the extent that they relate to the portions of the Work terminated.

e. Place no further subcontracts or orders, except as necessary to complete the continued portion of the Contract.

f. Submit to the City's Representative, within ten (10) Days from the effective date of the Notice of Termination, all of the usual documentation called for by the Contract Documents to substantiate all costs incurred by the Contractor for labor, materials and equipment through the effective date of the Notice of Termination. Any documentation substantiating costs incurred by the Contractor solely as a result of the City's exercise of its right to terminate this Contract pursuant to this clause, which costs the contractor is authorized under the Contract documents to incur, shall: (1) be submitted to and received by the Engineer no later than 30 Days after the effective date of the Notice of Termination; (2) describe the costs incurred with particularity; and (3) be conspicuously identified as “Termination Costs occasioned by the City's Termination for Convenience.” If the City rejects any costs, Contractor shall be deemed to waive the rejected costs unless Contractor files a Claim within thirty (30) Days of the rejection pursuant to Article 9.2.

g. Contractor shall be entitled to receive only the amounts payable under this Article, and Contractor specifically waives any claim for any other amounts or damages, including, but not limited to, any claim for consequential damages or lost profits. The provisions in this Article are in addition to and not in limitation of any other rights or remedies available to the City.

4. Termination of the Contract shall not relieve surety of its obligation for any just claims arising out of or relating to the Work performed.

5. Notwithstanding any other provision of this Article, when immediate action is necessary to protect life and safety or to reduce significant exposure or liability, the City may immediately order Contractor to cease Work on the Project until such

safety or liability issues are addressed to the satisfaction of the City or the Contract is terminated.

6. If the City terminates Contractor for cause, and if it is later determined that the termination was wrongful, such default termination shall automatically be converted to and treated as a termination for convenience. In such event, Contractor shall be entitled to receive only the amounts payable under this section, and Contractor specifically waives any claim for any other amounts or damages, including, but not limited to, any claim for consequential damages or lost profits.

8.8 Completion and Acceptance of Work

A. Final Inspection. Upon written notice from Contractor that the entire Work is complete, the Engineer will promptly make a final inspection with the City and Contractor and will notify Contractor in writing of all particulars in which this inspection reveals that the Work is incomplete or defective. Contractor shall immediately take such measures as are necessary to complete such Work or remedy such deficiencies.

B. Final Acceptance. The acceptance of the Work on behalf of the City will be made by the Engineer. Such acceptance by the City shall not constitute a waiver of defects. After Contractor has, in the opinion of the Engineer, satisfactorily completed all corrections identified during the final inspection and has delivered, in accordance with the Contract Documents, all maintenance and operating instructions, schedules, guarantees, bonds, certificates or other evidence of insurance, certificates of inspection, Record Documents, and other documents required by the Contract Documents, the City shall execute a Notice of Completion, constituting final acceptance and completion of the Project, except as may be expressly noted.

8.9 Warranty and Guaranty of Work.

A. Contractor hereby warrants that materials and Work shall be completed in conformance with the Contract Documents and that the materials and Work provided will fulfill the requirements of this Warranty. Contractor hereby agrees to repair or replace, at the discretion of the City, any or all Work that may prove to be defective in its workmanship, materials furnished, methods of installation or fail to conform to the Contract Document requirements together with any other Work which may be damaged or displaced by such defect(s) within a period of one (1) year (or as otherwise indicated in the Contract Documents or in any guarantee or warranty provided by any manufacturer or supplier of equipment or materials incorporated into the Work, whichever is later) from the date of the Notice of Completion of the Project without any expense whatever to the City, ordinary wear and tear and unusual abuse and neglect excepted. Contractor shall be required to promptly repair or replace defective equipment or materials, at Contractor's option. All costs associated with such corrective actions and testing, including the removal, replacement, and reinstitution of equipment and materials necessary to gain access, shall be the sole responsibility of the Contractor.

B. For any Work so corrected, Contractor's obligation hereunder to correct defective Work shall be reinstated for an additional one (1) year period, commencing with the date of acceptance of such corrected Work. The reinstatement of the one (1) year warranty shall apply only to that portion of work that was corrected. Contractor shall perform such tests as the City may require to verify that any corrective actions, including, without limitation, redesign, repairs, and replacements comply with the requirements of the Contract. In the event of Contractor's failure to comply with the above-mentioned conditions within ten (10) Days after being notified in writing of required repairs, to the reasonable satisfaction of the City, the City shall have the right to correct and replace any defective or non-conforming Work and any work damaged by such work or the replacement or correction thereof at Contractor's sole expense. Contractor shall be obligated to fully reimburse the City for any expenses incurred hereunder immediately upon demand.

C. In addition to the warranty set forth in this Article, Contractor shall obtain for the City all warranties that would be given in normal commercial practice and assign to the City any and all manufacturer's or installer's warranties for equipment or materials not manufactured by Contractor and provided as part of the Work, to the extent that such third-party warranties are assignable and extend beyond the warranty period set forth in this Article. Contractor shall furnish the City with all warranty and guarantee documents prior to final acceptance of the Project by the City as required.

D. When specifically indicated in the Contract Documents or when directed by the Engineer, the City may furnish materials or products to the Contractor for installation. In the event any act or failure to act by Contractor shall cause a warranty applicable to any materials or products purchased by the City for installation by the Contractor to be voided or reduced, Contractor shall indemnify the City from and against any cost, expense, or other liability arising therefrom, and shall be responsible to the City for the cost of any repairs, replacement or other costs that would have been covered by the warranty but for such act or failure to act by Contractor.

E. The Contractor shall remedy at its expense any damage to City-owned or controlled real or personal property.

F. The City shall notify the Contractor, in writing, within a reasonable time after the discovery of any failure, defect, or damage. The Contractor shall within ten (10) Days after being notified commence and perform with due diligence all necessary Work. If the Contractor fails to promptly remedy any defect or damage, the City shall have the right to replace, repair or otherwise remedy the defect, or damage at the Contractor's expense.

G. In the event of any emergency constituting an immediate hazard to health, safety, property, or licensees, when caused by Work of the Contractor not in accordance with the Contract requirements, the City may undertake at Contractor's expense, and without prior notice, all Work necessary to correct such condition.

H. <u>Acceptance of Defective Work.</u>

1. If, instead of requiring correction or removal and replacement of defective Work, the City prefers to accept it, the City may do so. Contractor shall pay all claims, costs, losses, and damages (including but not limited to all fees and charges of engineers, architects, attorneys, and other professionals and all court or arbitration or other dispute resolution costs) attributable to the City's evaluation of and determination to accept such defective Work and for the diminished value of the Work. If any acceptance of Defective Work occurs prior to release of the Project retention, a Change Order will be issued incorporating the necessary revisions in the Contract Documents with respect to the Work, and the City shall be entitled to an appropriate decrease in the Contract Price, reflecting the diminished value of Work and all costs incurred by the City. If the acceptance of defective occurs after release of the Project retention, an appropriate amount will be paid by Contractor to the City.

I. The City May Correct Defective Work

1. If Contractor fails within a reasonable time after written notice from the City to correct Defective Work, or to remove and replace rejected Work as required by the City, or if Contractor fails to perform the Work in accordance with the Contract Documents, or if Contractor fails to comply with any other provision of the Contract Documents, the City may, after seven (7) Days written notice to Contractor, correct, or remedy any such deficiency.

2. In connection with such corrective or remedial action, the City may exclude Contractor from all or part of the Site, take possession of all or part of the Work and suspend Contractor's services related thereto, take possession of Contractor's tools, appliances, construction equipment and machinery at the Site, and incorporate in the Work all materials and equipment stored at the Site or for which the City has paid Contractor but which are stored elsewhere. Contractor shall allow the City, and the agents, employees, other contractors, and consultants of each of them, access to the Site to enable the City to exercise the rights and remedies to correct the Defective Work.

3. All claims, costs, losses, and damages (including but not limited to all fees and charges of engineers, architects, attorneys, and other professionals and all court or arbitration or other dispute resolution costs) incurred or sustained by the City correcting the Defective Work will be charged against Contractor, and a Change Order will be issued incorporating the necessary revisions in the Contract Documents with respect to the Work; and the City shall be entitled to an appropriate decrease in the Contract Price. Such claims, costs, losses and damages will include but not be limited to all costs of repair, or replacement of work of others destroyed or damaged by correction, removal, or replacement of defective Work.

4. If the Change Order is executed after all payments under the Contract have been paid by the City and the Project Retention is held in an escrow account as permitted by the Contract Documents, Contractor will promptly alert the escrow holder, in writing, of the amount of Retention to be paid to the City. If the Change Order is executed after release of the Project retention, an appropriate amount will

be paid by Contractor to the City. Contractor shall not be allowed an extension of the Contract Times because of any delay in the performance of the Work attributable to the City correcting Defective Work.

J. Nothing in the warranty or in the Contract Documents shall be construed to limit the rights and remedies available to the City at law or in equity, including, but not limited to, Code of Civil Procedure section 337.15.

ARTICLE 9 -CHANGE ORDERS; DISPUTE RESOLUTION

9.1 Change Orders and Time Extensions

All changes to the Contract, including compensation increases and time extensions, shall be through a written Change Order in accordance with this Article. The City, without invalidating the Contract, may order changes in the Work consisting of additions, deletions or other revisions, and Contractor's compensation and the time for completion shall be adjusted accordingly. Whenever any change is made as provided for herein, such change shall be considered and treated as though originally included in the Contract, and shall be subject to all terms, conditions, and provisions of the original Contract. Contractor shall not be entitled to claim or bring suit for damages, whether for loss of profits or otherwise, on account of any decrease or omission of any item or portion of Work to be done. No dispute, disagreement, or failure of the parties to reach agreement on the terms of the Change Order shall relieve the Contractor from the obligation to proceed with performance of the Work, including Additional Work, promptly and expeditiously. Any alterations, extensions of time, Additional Work, or any other changes may be made without securing consent of the Contractor's surety or sureties.

A. Change in Contract Procedures

1. City Directive. The City may direct changes in the Work by delivering a written directive. To the extent the work directive results in a change to compensation or time, Contractor must timely request a Change Order and comply with all Change Order procedures in accordance with this Article. Notwithstanding issuance of a work directive, Contractor's failure to timely request a Change Order shall constitute a waiver by Contractor of any adjustment to compensation or time extension for Work performed under the directive. The City shall not be liable to Contractor for Work performed or omitted by Contractor in reliance on verbal orders.

2. Contractor's Notice of Change/Delay. If Contractor intends to initiate a Change Order Request, then Contractor shall provide the City with written notice of the underlying facts and circumstances that gave rise to the proposed change within the following times:

a. If due to unknown subsurface or latent physical conditions, within three (3) Days from the discovery date or prior to the alterations of the conditions, whichever is earlier.

b. If due to a Force Majeure Event, as soon as reasonably practicable under the conditions, which shall be no longer than three (3) Days from the date the Contractor discovers that the Force Majeure Event gives rise to a change, unless that the conditions are such that notice within three (3) Days is not possible or practicable.

c. If due to any other matter that may involve an adjustment to the Contract Time or the Contract Price, within seven (7) days from the discovery date.

To be considered valid and complete, the notice of change/delay shall include a general statement of the circumstances giving rise to the notice of change/delay and a reasonable order of magnitude estimate of the additional costs and/or time. If the circumstances give rise to both a cost adjustment and time extension, Contractor shall submit the notice of change and notice of delay concurrently.

3. Request for Change in Compensation and/or Extension of Time. Contractor shall submit a Change Order Request for any adjustment to Contractor's compensation and/or any extension of time. The Change Order Request shall be made prior to incurring any expense and within fourteen (14) Days from either Contractor's notice of change/delay or the City's directive ordering the change. The Change Order Request shall include all of the following information (unless inapplicable to the change):

a. A detailed description of the circumstances giving rise to the request;

b. A complete itemized cost proposal, including itemized pricing for first tier Subcontractors;

c. Supporting documentation for all costs;

d. A time impact analysis showing the impact of the delay to the critical path to completion;

e. If any added costs or information cannot be determined at the time of the Change Order Request, the reason the costs or information cannot be determined at the time; and

f. Certification to the accuracy of the Change Order Request under penalty of perjury.

The time impact analysis shall be in the critical path method format and shall show the sequencing of all critical and non-critical new activities and/or activity revisions affected by the delay, with logic ties to all affected existing activities noted on the schedule.

The City may demand, and Contractor shall provide, any additional information supporting the Change Order Request, including but not limited to native electronic format version of schedules and time impact analyses. Contractor shall provide the requested additional information within five (5) Days of the request.

For any costs or information that cannot be determined at the time Contractor submits the Change Order Request, Contractor shall submit to the City notice of the costs or information and all supporting documentation within five (5) Days of when the costs or other information become subject to determination.

4. City's Final Decision on Change Order; Ordered Changes. If the City denies the Change Order Request or disagrees with the proposal submitted by Contractor, it will notify the Contractor, and the City will provide its opinion of the appropriate price and/or time extension. If no agreement can be reached, the City shall have

the right to order the Work performed on a time and materials basis or to issue a unilateral Change Order setting forth the City's determination of the reasonable additions or savings in costs and time attributable to the extra or deleted work. The City shall also have the right to order changes in the Work to be performed promptly by the Contractor on a time and materials basis or to issue a unilateral Change Order setting forth the City's determination of the reasonable additions or savings in costs and time attributable to the extra or deleted work. The City's determination shall become final and binding if the Contractor fails to submit a Claim in writing to the City within fourteen (14) Days of the issuance of the unilateral Change Order, disputing the terms of the unilateral Change Order and providing such supporting documentation for its position as the City may reasonably require.

5. Contractor's Waiver of Further Relief. **CONTRACTOR'S FAILURE TO PROVIDE A COMPLETE AND TIMELY NOTICE OF CHANGE/DELAY AND/OR CHANGE ORDER REQUEST, OR TO COMPLY WITH ANY OTHER REQUIREMENT OF THIS ARTICLE, SHALL CONSTITUTE A WAIVER BY CONTRACTOR OF THE RIGHT TO A CONTRACT ADJUSTMENT ON ACCOUNT OF SUCH CIRCUMSTANCES AND A WAIVER OF ANY RIGHT TO FURTHER RECOURSE OR RECOVERY BY REASON OF OR RELATED TO SUCH CHANGE BY MEANS OF THE CLAIMS DISPUTE RESOLUTION PROCESS OR BY ANY OTHER LEGAL PROCESS OTHERWISE PROVIDED FOR UNDER APPLICABLE LAWS.**

   Contractor recognizes and acknowledges that timely submission of a formal written notice of change/delay and Change Order Request, whether or not the circumstances of the change may be known to the City or available to the City through other means, is not a mere formality but is of crucial importance to the ability of the City to promptly identify, prioritize, evaluate and mitigate the potential effects of changes. Any form of informal notice, whether verbal or written (including, without limitation, statements in requests for information, statements in Submittals, statements at any job meeting or entries on monthly reports, daily logs or job meeting minutes), that does not strictly comply with the formal requirements of this Article, shall accordingly be insufficient.

6. Change Order Format

a. A Change Order signed by the Contractor indicates the Contractor's agreement therewith, including any adjustment in compensation or extension of time, and the full and final settlement of all costs (direct, indirect and overhead) related to the Work authorized by the Change Order.

b. The City may designate the forms to be used for notices, requests, and Change Orders. If so designated, Contractor may only use such forms. Contractor shall not reserve a right to assert impact costs, extended job site costs, extended overhead, constructive acceleration and/or actual acceleration beyond what is stated in the Change Order. No Claims shall be allowed for impact, extended overhead costs, constructive acceleration and/or actual acceleration due to a multiplicity of changes and/or clarifications. The

Contractor may not change or modify the City's Change Order form in an attempt to reserve additional rights.

B. Determining Adjustments to Compensation.

1. Limitation on Costs. Contractor shall not be entitled to any compensation for Work subject to a Change Order except as expressly set forth in this Article. The mark-up added in instances of Additional Work shall constitute the entire amount of profit, any mark-ups, any field or home office overhead costs, including personnel, equipment or office space, any materials, or any costs of equipment idle time for such Work.

2. Unit Price Change Orders. When the actual quantity of a Unit Price Work item varies from the Bid Schedule, compensation for the change in quantity will be calculated by multiplying the actual quantity by the unit price. This calculation may result in either an additive or deductive Change Order. Bid items included on the Bid Schedule may be deducted from the Work in their entirety without any negotiated extra costs. Because Unit Price Work includes overhead and profit as determined by Contractor at the time of its Bid submission, no mark up or deduction for overhead and profit will be allowed.

3. Lump Sum Change Orders. Whenever possible, any changes affecting compensation shall be in a lump sum mutually agreed by the Contractor and the City.

4. Time and Materials Change Orders. The City may direct the Contractor to proceed with the Additional Work with payment to be made on the basis of actual cost of the labor and materials required to complete the Additional Work. If the Project is federally funded, a time and materials Change Order shall only be issued after a determination that no other Change Order is suitable and the Change Order shall include a ceiling price that the Contractor exceeds at its own risk.

5. Federally Funded Projects. For any change in price to the Contract, general and administrative expenses shall be negotiated and must conform to the cost principles set forth under at 2 C.F.R. Part 200, subpart E, and profit shall be negotiated as a separate element of the cost. To establish a fair and reasonable profit, consideration must be given to the complexity of the Additional Work to be performed, the risk borne by the Contractor, the Contractor's investment, the amount of subcontracting, the quality of its record of past performance, and industry profit rates in the surrounding geographical area for similar work.

6. Allowed Costs. Estimates for lump sum quotations and accounting for time-and-material work shall be limited to direct expenditures necessitated specifically by the change and shall be segregated as follows:

a. Labor. The costs of labor will be the actual cost for wages prevailing locally for each craft or type of worker at the time the Additional Work is done, plus employer payments of payroll taxes and insurance, health and welfare, pension, vacation, apprenticeship funds, and other direct costs resulting from federal, state or local laws, as well as assessment or benefits required by lawful collective bargaining agreements. The use of a labor

classification which would increase the Additional Work cost will not be permitted unless the Contractor establishes the necessity for such additional costs. Labor costs for equipment operators and helpers shall be reported only when such costs are not included in the invoice for equipment rental.

b. Materials. The cost of materials reported shall be at the lowest current price at which such materials are locally available in the quantities involved, plus sales tax, freight and delivery. Materials costs shall be based upon supplier or manufacturer's invoice.

c. Tool and Equipment Use. Regardless of ownership, the rates to be used in determining equipment use shall not exceed listed rates prevailing locally at equipment rental agencies, or distributors, at the time the work is performed. The Contractor shall furnish cost data supporting the establishment of the rental rate. The rental rate to be applied for use of each items of equipment shall be the rate resulting in the least total cost to the City for the total period of use. The City shall the make the final determination as to an equitable rental rate for the equipment. No payment will be made for the use of small tools, which have a replacement value of $1,000 or less.

    (i) The rental time to be paid for equipment shall be the time the equipment is in productive operation on the Additional Work being performed. Rental time will not be allowed while equipment is inoperative due to breakdowns.

    (ii) All equipment shall, in the opinion of the City, be in good working condition and suitable for the purpose for which the equipment is to be used. Equipment with no direct power unit shall be powered by a unit of at least the minimum rating recommended by the manufacturer.

    (iii) Before construction equipment is used on any Additional Work, the Contractor shall plainly stencil or stamp an identifying number thereon at a conspicuous location, and shall furnish to the City, in duplicate, a description of the equipment and its identifying number.

    (iv) When hourly rates are listed, any part of an hour less than 30 minutes of operation shall be considered to be 1/2-hour of operation, and any part of an hour greater than 30 minutes will be considered one hour of operation. When daily rates are listed, any part of a day less than 4 hours operation shall be considered to be 1/2-day of operation.

d. Allowed Mark-up. The allowed mark-up for any and all overhead (including supervision and home and field office costs) and profit on work added to the Contract shall be determined in accordance with the following provisions:

    (i) "Net Cost" is defined as the actual costs of labor, materials and tools and equipment only, excluding overhead and profit. The costs of applicable insurance and bond premium will be reimbursed to the Contractor and Subcontractors at cost only, without mark-up. Contractor shall provide the City with documentation of the costs, including but not limited to payroll records, invoices, and such other information as the City may reasonably request.

(ii) For Work performed by the Contractor's forces the allowed mark-up shall not exceed fifteen (15%) percent of labor costs, ten percent (10%) of material costs, and ten percent (10%) of the cost of tools and equipment use.

(iii) For Work performed by a Subcontractor, the added cost for overhead and profit shall not exceed fifteen percent (15%) of the Subcontractor's Net Cost of the Work to which the Contractor may add up to five percent (5%) of the Subcontractor's Net Cost.

(iv) For Work performed by a sub-subcontractor, the added cost for overhead and profit shall not exceed fifteen percent (15%) of the sub-subcontractor's Net Cost for Work to which the Subcontractor and Contractor may each add up to an additional five percent (5%) of the Net Cost of the lower tier subcontractor.

(v) No additional mark-up will be allowed for lower tier subcontractors, and in no case shall the added cost for overhead and profit payable by the City exceed twenty-five percent (25%) of the Net Cost as defined herein, of the party that performs the Work.

(vi) Calculation of the mark-up will be subject to the limitations above and to calculation as further detailed in (b)(B)(5) above.

e. Documentation of Time-and-Material Costs.

(i) T&M Daily Sheets. Contractor must submit timesheets, materials invoices, records of equipment hours, and records of rental equipment hours to the City's for an approval signature each day that Work is performed on a time-and-material basis. The Engineer's signature on time sheets only serves as verification that the Work was performed and is not indicative of the City's agreement to Contractor's entitlement to the cost.

(ii) T&M Summary Sheet. Contractor shall submit a T&M Summary Sheet, which shall include total actual costs, within five (5) Days following completion of Additional Work on a time-and-material basis. Contractor's total actual cost shall be presented in a summary table in an electronic spreadsheet file by labor, material, equipment, and any other costs, along with documentation supporting the costs. Contractor's failure to submit the T&M Summary Sheet within five (5) Days of completion of the Additional Work will result in Contractor's waiver for any reimbursement of any costs associated with the Additional Work.

f. Excluded Costs. The following costs or any other home or field office overhead costs, all of which are to be considered administrative costs covered by the Contractor's mark-up, shall not be allowed costs and shall not be included in any lump sum proposals or time-and-materials invoices:

(i) Overhead Cost. Payroll costs and other compensation of Contractor's officers, executives, principals, general managers, engineers, architects, estimators, attorneys, auditors, accountants, purchasing and contracting agents, timekeepers, clerks, and other personnel employed by Contractor whether at the Site or in

Contractor's principal office or any branch office, material yard, or shop for general administration of the Work;

(ii) Office Expenses. Expenses of Contractor's principal and branch offices;

(iii) Capital Expenses. Any part of Contractor's capital expenses, including interest on Contractor's capital employed for the Additional Work and charges against Contractor for delinquent payments;

(iv) Negligence. Costs due to the negligence of Contractor or any Subcontractor or Supplier, or anyone directly or indirectly employed by any of them or for whose acts any of them may be liable, including without limitation the correction of Defective Work, disposal of materials or equipment wrongly supplied, and making good any damage to property;

(v) Small Tools. Cost of small tools valued at less than $1,000 and that remain the property of Contractor;

(vi) Administrative Costs. Costs associated with the preparation of Change Orders (whether or not ultimately authorized), cost estimates, or the preparation or filing of Claims;

(vii) Anticipated Lost Profits. Expenses of Contractor associated with anticipated lost profits or lost revenues, lost income or earnings, lost interest on earnings, or unpaid retention;

(viii) Home Office Overhead. Costs derived from the computation of a "home office overhead" rate by application of the *Eichleay, Allegheny*, burden fluctuation, or other similar methods;

(ix) Special Consultants and Attorneys. Costs of special consultants or attorneys, whether or not in the direct employ of Contractor, employed for services specifically related to the resolution of a Claim, dispute, or other matter arising out of or relating to the performance of the Additional Work.

(x) Other. Other overhead or general expense costs of any kind and the cost of any item not specifically and expressly included in the Contract Documents; including but not limited to: submittals, drawings, field drawings, shop drawings, including submissions of drawings; field inspection; general superintendence; computer services; reproduction services; salaries of project engineer, superintendent, timekeeper, storekeeper, and secretaries; janitorial services; small tools, incidentals and consumables; temporary on-site facilities (offices, telephones, high speed internet access, plumbing, electrical power, lighting; platforms, fencing, water); surveying; estimating; protection of work; handling and disposal fees; final cleanup; other incidental work; related warranties; insurance and bond premiums.

(xi) Compliance with Federal Cost Principles. If the Project is federally funded, any costs that are not allowable, reasonable and allocable to the Project, under generally accepted accounting principles and the applicable federal requirements.

9.2 Procedure for Resolving Claims.

Contractor shall timely comply with any and all requirement of the Contract Documents pertaining to notices and requests for changes to the Contract Time or Contract Price, including but not limited to all requirements of Article 9.1, as a prerequisite to filing any claim governed by this Article. The failure to timely submit a notice of delay or notice of change, or to timely request a change to the time for completion or Contractor's compensation, or to timely provide any other notice or request required herein shall constitute a waiver of the right to further pursue the claim under the Contract or at law.

A. Intent. Effective January 1, 1991, Section 20104 et seq., of the California Public Contract Code prescribes a process utilizing informal conferences, non-binding judicial supervised mediation, and judicial arbitration to resolve disputes on construction claims of $375,000 or less. Effective January 1, 2017, Section 9204 of the Public Contract Code prescribes a process for negotiation and mediation to resolve disputes on construction claims. The intent of this Article is to implement Sections 20104 et seq. and Section 9204 of the California Public Contract Code. This Article shall be construed to be consistent with all applicable law, including but not limited to these statutes.

B. Claims. For purposes of this Article, "Claim" means a separate demand by the Contractor for:

1. An adjustment to the time for completion including, without limitation, for relief from damages or penalties for delay assessed by the City;

2. Payment by the City of money or damages arising from Work done by or on behalf of the Contractor pursuant to the Contract, payment for which is not otherwise expressly provided or to which the Contractor is not otherwise entitled; or

3. An amount the payment of which is disputed by the City.

A "Claim" does not include any demand for payment for which the Contractor has failed to provide notice, request a Change Order, or otherwise failed to follow any procedures contained in the Contract Documents.

C. Filing Claims. Claims governed by this Article may not be filed unless and until the Contractor completes any and all requirements of the Contract Documents pertaining to notices and requests for changes to the Contract Time or Contract Price, and Contractor's request for a change has been denied in whole or in part. Claims governed by this Article must be filed no later than thirty (30) Days after a request for change has been denied in whole or in part or after any other event giving rise to the Claim. The Claim shall be submitted in writing to the City and shall include on its first page the following words in 16 point capital font: "THIS IS A CLAIM." The Claim shall include the all information and documents necessary to substantiate the Claim, including but not limited to those identified below. Nothing in this Article is intended to extend the time limit or supersede notice requirements otherwise provided by Contract Documents. Failure to follow such contractual requirements shall bar any Claims or subsequent proceedings for compensation or payment thereon.

D. **Documentation.** The Contractor shall submit all Claims in the following format:

1. Summary description of Claim including basis of entitlement, merit and amount of time or money requested, with specific reference to the Contract Document provisions pursuant to which the Claim is made

2. List of documents relating to Claim:

a. Specifications

b. Drawings

c. Clarifications (Requests for Information)

d. Schedules

e. Other

3. Chronology of events and correspondence

4. Narrative analysis of Claim merit

5. Analysis of Claim cost, including calculations and supporting documents

6. Time impact analysis in the form required by the Contract Documents or, if the Contract Documents do not require a particular format, CPM format, if an adjustment of the Contract Time is requested

E. City's Response. Upon receipt of a Claim pursuant to this Article, the City shall conduct a reasonable review of the Claim and, within a period not to exceed 45 Days, shall provide the Contractor a written statement identifying what portion of the Claim is disputed and what portion is undisputed. Any payment due on an undisputed portion of the Claim will be processed and made within 60 Days after the City issues its written statement.

1. If the City needs approval from its governing body to provide the Contractor a written statement identifying the disputed portion and the undisputed portion of the Claim, and the City's governing body does not meet within the 45 Days or within the mutually agreed to extension of time following receipt of a Claim sent by registered mail or certified mail, return receipt requested, the City shall have up to three (3) Days following the next duly publicly noticed meeting of the City's governing body after the 45-Day period, or extension, expires to provide the Contractor a written statement identifying the disputed portion and the undisputed portion.

2. Within 30 Days of receipt of a Claim, the City may request in writing additional documentation supporting the Claim or relating to defenses or Claims the City may have against the Contractor. If additional information is thereafter required, it shall be requested and provided pursuant to this subdivision, upon mutual agreement of the City and the Contractor. The City's written response to the Claim, as further

documented, shall be submitted to the Contractor within 30 Days (if the Claim is less than $50,000, within 15 Days) after receipt of the further documentation, or within a period of time no greater than that taken by the Contractor in producing the additional information or requested documentation, whichever is greater.

F. Meet and Confer. If the Contractor disputes the City's written response, or the City fails to respond within the time prescribed, the Contractor may so notify the City, in writing, either within 15 Days of receipt of the City's response or within 15 Days of the City's failure to respond within the time prescribed, respectively, and demand in writing an informal conference to meet and confer for settlement of the issues in dispute. Upon receipt of a demand, the City shall schedule a meet and confer conference within 30 Days for settlement of the dispute.

G. Mediation. Within 10 business days following the conclusion of the meet and confer conference, if the Claim or any portion of the Claim remains in dispute, the City shall provide the Contractor a written statement identifying the portion of the Claim that remains in dispute and the portion that is undisputed. Any payment due on an undisputed portion of the Claim shall be processed and made within 60 Days after the City issues its written statement. Any disputed portion of the Claim, as identified by the Contractor in writing, shall be submitted to nonbinding mediation, with the City and the Contractor sharing the associated costs equally. The public entity and Contractor shall mutually agree to a mediator within 10 business days after the disputed portion of the Claim has been identified in writing, unless the parties agree to select a mediator at a later time.

1. If the parties cannot agree upon a mediator, each party shall select a mediator and those mediators shall select a qualified neutral third party to mediate with regard to the disputed portion of the Claim. Each party shall bear the fees and costs charged by its respective mediator in connection with the selection of the neutral mediator.

2. For purposes of this Article, mediation includes any nonbinding process, including, but not limited to, neutral evaluation or a dispute review board, in which an independent third party or board assists the parties in dispute resolution through negotiation or by issuance of an evaluation. Any mediation utilized shall conform to the timeframes in this Article.

3. Unless otherwise agreed to by the City and the Contractor in writing, the mediation conducted pursuant to this section shall excuse any further obligation under Section 20104.4 to mediate after litigation has been commenced.

4. The mediation shall be held no earlier than the date the Contractor completes the Work or the date that the Contractor last performs Work, whichever is earlier. All unresolved Claims shall be considered jointly in a single mediation, unless a new unrelated Claim arises after mediation is completed.

H. Procedures After Mediation. If following the mediation, the Claim or any portion remains in dispute, the Contractor must file a Claim pursuant to Chapter 1 (commencing with Section 900) and Chapter 2 (commencing with Section 910) of

Part 3 of Division 3.6 of Title 1 of the Government Code prior to initiating litigation. For purposes of those provisions, the running of the period of time within which a Claim must be filed shall be tolled from the time the Contractor submits his or her written Claim pursuant to subdivision (a) until the time the Claim is denied, including any period of time utilized by the meet and confer conference.

I. Civil Actions. The following procedures are established for all civil actions filed to resolve Claims of $375,000 or less:

1. Within 60 Days, but no earlier than 30 Days, following the filing or responsive pleadings, the court shall submit the matter to non-binding mediation unless waived by mutual stipulation of both parties or unless mediation was held prior to commencement of the action in accordance with Public Contract Code section 9204 and the terms of this Contract. The mediation process shall provide for the selection within 15 Days by both parties of a disinterested third person as mediator, shall be commenced within 30 Days of the submittal, and shall be concluded within 15 Days from the commencement of the mediation unless a time requirement is extended upon a good cause showing to the court.

2. If the matter remains in dispute, the case shall be submitted to judicial arbitration pursuant to Chapter 2.5 (commencing with Section 1141.10) of Title 3 of Part 3 of the Code of Civil Procedure, notwithstanding Section 1114.11 of that code. The Civil Discovery Act of 1986 (Article 3 (commencing with Section 2016) of Chapter 3 of Title 3 of Part 4 of the Code of Civil Procedure) shall apply to any proceeding brought under this subdivision consistent with the rules pertaining to judicial arbitration. In addition to Chapter 2.5 (commencing with Section 1141.10) of Title 3 of Part 3 of the Code of Civil Procedure, (A) arbitrators shall, when possible, be experienced in construction law, and (B) any party appealing an arbitration award who does not obtain a more favorable judgment shall, in addition to payment of costs and fees under that chapter, also pay the attorney's fees on appeal of the other party.

J. Government Code Claim Procedures.

1. This Article does not apply to tort claims and nothing in this Article is intended nor shall be construed to change the time periods for filing tort claims or actions specified by Chapter 1 (commending with Section 900) and Chapter 2 (commencing with Section 910) of Part 3 of Division 3.5 of Title 1 of the Government Code.

2. In addition to any and all requirements of the Contract Documents pertaining to notices of and requests for adjustment to the Contract Time, Contract Price, or compensation or payment for Additional Work, disputed Work, construction claims and/or changed conditions, the Contractor must comply with the claim procedures set forth in Government Code Section 900, et seq. prior to filing any lawsuit against the City.

3. Such Government Code claims and any subsequent lawsuit based upon the Government Code claims shall be limited to those matters that remain unresolved

after all procedures pertaining to adjustment of the Contract Time or Contract Price for Additional Work, disputed Work, construction claims, and/or changed conditions have been followed by Contractor. If Contractor does not comply with the Government Code claim procedure or the prerequisite contractual requirements, Contractor may not file any action against the City.

4. **A Government Code claim must be filed no earlier than the date the Work is completed or the date the Contractor last performs Work on the Project, whichever occurs first. A Government Code claim shall be inclusive of all unresolved Claims known to Contractor or that should reasonably by known to Contractor excepting only new unrelated Claims that arise after the Government Code claim is submitted.**

K. Non-Waiver. The City's failure to respond to a Claim from the Contractor within the time periods described in this Article or to otherwise meet the time requirements of this Article shall result in the Claim being deemed rejected in its entirety, and shall not constitute a waiver of any rights under this Article.

ARTICLE 10 - MEASUREMENT; PAYMENT

10.1 Cost Breakdown.

A. Lump Sum Work.

1. Contractor shall furnish on forms approved by the City within ten (10) Days of the Notice to Proceed, a schedule of values allocating the entire Contract Price to the various portions of the Work and prepared in such a form and supported by such data to substantiate its accuracy as the Engineer may require. This schedule of values, unless objected to by the Engineer, shall be used as a basis for reviewing the Contractor's applications for payment. Contractor shall submit the schedule of values prior to submitting its first application for payment, and the City will not issue any payment until it receives and approves the schedule of values.

B. Unit Price Work.

1. Where the Contract Documents provide that all or part of the Work is to be Unit Price Work, initially the Contract Price will be deemed to include for all Unit Price Work an amount equal to the sum of the unit price for each separately identified item of Unit Price Work multiplied by the estimated quantity of each item as indicated in the Contract. The estimated quantities of items of Unit Price Work are not guaranteed and are solely for the purpose of comparison of Bids and determining an initial Contract Price. Each unit price will be deemed to include an amount considered by Contractor to be adequate to cover Contractor's overhead and or profit for each separately identified item.

2. Unless otherwise specified, payment will be based on the actual quantities of Work as verified and approved by the Engineer, based on the price per unit as set forth in the Bid.

3. The City or Contractor may initiate a Change Order or Change Order Request to adjust the Contract Price in accordance with Contractor Documents based on actual quantities of Unit Price Work. The City or Contractor may make a claim for an adjustment in the Unit Price in accordance with the Contract Documents if:

a. the quantity of any item of Unit Price Work performed by Contractor differs by twenty-five percent (25%) or more from the estimated quantity of such item indicated in the Contract; and

b. there is no corresponding adjustment with respect to any other item of Work; and

c. Contractor believes that Contractor is entitled to an increase in unit price as a result of having incurred additional expense or the City believes that the City is entitled to a decrease in unit price and the parties are unable to agree as to the amount of any such increase or decrease.

10.2 Progress Estimates and Payment.

A. By the tenth (10th) Day of the following calendar month, Contractor shall submit to Engineer a payment request which shall set forth in detail the value of the Work done for the period beginning with the date Work was first commenced and ending on the end of the calendar month for which the payment request is prepared. Contractor shall include an adjusted list of actual quantities, verified by the Engineer, for unit price items listed, if any, in the Bid. Contractor shall include any amount earned for authorized Additional Work. Contractor shall certify under penalty of perjury, that all cost breakdowns and periodic estimates accurately reflect the Work on the Project.

B. From the total thus computed, a deduction shall be made in the amount of five percent (5%) for retention, except where the City has adopted a finding that the Work done under the Contract is substantially complex, and then the amount withheld as retention shall be the percentage specified in the Notice Inviting Bids. From the remainder a further deduction may be made in accordance with Section C below. The amount computed, less the amount withheld for retention and any amounts withheld as set forth below, shall be the amount of the Contractor's payment request.

C. The City may withhold a sufficient amount or amounts of any payment or payments otherwise due to Contractor, as in its judgment may be necessary to cover:

1. Payments which may be past due and payable for just claims against Contractor or any Subcontractors for labor or materials furnished in and about the performance of work on the Project under this Contract.

2. Defective work not remedied.

3. Failure of Contractor to make proper payments to his Subcontractor or for material or labor.

4. Completion of the Contract if there is a reasonable doubt that the Work can be completed for balance then unpaid.

5. Damage to another contractor or a third party.

6. Amounts which may be due the Count for claims against Contractor.

7. Failure of Contractor to keep the Record Drawings up to date.

8. Failure to provide update on construction schedule as required herein.

9. Site cleanup.

10. Failure to comply with Contract Documents.

11. Liquidated damages.

12. Legally permitted penalties.

D. The City may apply such withheld amount or amounts to payment of such claims or obligations at its discretion with the exception of subsections (C)(1), (3), and (5) of this Article, which must be retained or applied in accordance with applicable law. In so doing, the City shall be deemed the agent of Contractor and any payment so made by the City shall be considered as a payment made under contract by the City to Contractor and the City shall not be liable to Contractor for such payments made in good faith. Such payments may be made without prior judicial determination of claim or obligations. The City will render Contractor a proper accounting of such funds disbursed on behalf of Contractor.

E. Upon receipt, the Engineer shall review the payment request to determine whether it is undisputed and suitable for payment. If the payment request is determined to be unsuitable for payment, it shall be returned to Contractor as soon as practicable but not later than seven (7) Days after receipt, accompanied by a document setting forth in writing the reasons why the payment request is not proper. The City shall make the progress payment within 30 Days after the receipt of an undisputed and properly submitted payment request from Contractor, provided that a release of liens and claims has been received from the Contractor pursuant to Civil Code section 8132. The number of days available to the City to make a payment without incurring interest pursuant to this paragraph shall be reduced by the number of Days by which the Engineer exceeds the seven (7) Day requirement.

F. A payment request shall be considered properly executed if funds are available for payment of the payment request and payment is not delayed due to an audit inquiry by the financial officer of the City.

G. The City shall have the right to adjust any estimate of quantity and to subsequently correct any error made in any estimate for payment.

10.3 Final Acceptance and Payment

A. Following the City's acceptance of the Work, the Contractor shall submit to the City a written statement of the final quantities of unit price items for inclusion in the final

payment request. The City shall have the right to adjust any estimate of quantity and to correct any error made in any estimate for payment.

B. When the Work has been accepted there shall be paid to Contractor a sum equal to the Contract Price less any amounts previously paid Contractor and less any amounts withheld by the City from Contractor under the terms of the Contract. The final five percent (5%), or the percentage specified in the Notice Inviting Bids where the City has adopted a finding of substantially complete, shall not become due and payable until as required by Public Contract Code section 7107. If the Contractor has placed securities with the City as described herein, the Contractor shall be paid a sum equal to one hundred percent (100%) of the Contract Price less any amounts due the City under the terms of the Contract.

C. Unless Contractor advises the City in writing prior to acceptance of the final five percent (5%) or the percentage specified in the Notice Inviting Bids where the City has adopted a finding of completion, or the return of securities held as described herein, said acceptance shall operate as a release to the City of all claims and all liability to Contractor for all things done or furnished in connection with this Work and for every act of negligence of the City and for all other claims relating to or arising out of this Work. If Contractor advises the City in writing prior to acceptance of final payment or return of the securities that there is a dispute regarding the amount due the Contractor, the City may pay the undisputed amount contingent upon the Contractor furnishing a release of all undisputed claims against the City with the disputed claims in stated amounts being specifically excluded by Contractor from the operation of the release. No payments, however, final or otherwise, shall operate to release Contractor or its sureties from the Faithful Performance Bond, Labor and Material Payment Bond, or from any other obligation under this Contract.

D. In case of suspension of the Contract any unpaid balance shall be and become the sole and absolute property of the City to the extent necessary to repay the City any excess in the cost of the Work above the Contract Price.

E. Final payment shall be made no later than 60 Days after the date of acceptance of the Work by the City or the date of occupation, beneficial use and enjoyment of the Work by the City including any operation only for testing, start-up or commissioning accompanied by cessation of labor on the Work, provided that a release of liens and claims has been received from the Contractor pursuant to Civil Code section 8136. In the event of a dispute between the City and the Contractor, the City may withhold from the final payment an amount not to exceed 150% of the disputed amount.

F. Within ten (10) Days from the time that all or any portion of the retention proceeds are received by Contractor, Contractor shall pay each of its Subcontractors from whom retention has been withheld each Subcontractor's share of the retention received. However, if a retention payment received by Contractor is specifically designated for a particular Subcontractor, payment of the retention shall be made to the designated Subcontractor if the payment is consistent with the terms of the subcontract.

ARTICLE 11 -MISCELLANEOUS

11.1 Patents.

A. Contractor shall hold and save the City, officials, officers, employees, and authorized volunteers harmless from liability of any nature or kind of claim therefrom including costs and expenses for or on account of any patented or unpatented invention, article or appliance manufactured, furnished or used by Contractor in the performance of this Contract.

11.2 Document Retention & Examination

A. In accordance with Government Code section 8546.7, records of both the City and the Contractor shall be subject to examination and audit by the State Auditor General for a period of three (3) years after final payment.

B. Contractor shall make available to the City any of the Contractor's other documents related to the Project immediately upon request of the City.

C. In addition to the State Auditor rights above, the City shall have the right to examine and audit all books, estimates, records, contracts, documents, bid documents, subcontracts, and other data of the Contractor (including computations and projections) related to negotiating, pricing, or performing the modification in order to evaluate the accuracy and completeness of the cost or pricing data at no additional cost to the City, for a period of four (4) years after final payment.

11.3 Notice.

A. All notices shall be in writing and either served by personal delivery or mailed to the other party. Written notice to the Contractor shall be addressed to Contractor's principal place of business unless Contractor designates another address in writing for service of notice. Notice to the City shall be addressed to the City as designated in the Notice Inviting Bids unless the City designates another address in writing for service of notice. Notice shall be effective upon receipt or five (5) Days after being sent by first class mail, whichever is earlier. Notice given by facsimile shall not be effective unless acknowledged in writing by the receiving party.

11.4 Notice of Third Party Claims

A. Pursuant to Public Contract Code section 9201, the City shall provide the Contractor with timely notification of the receipt of any third-party claims relating to the Contract. The City is entitled to recover reasonable costs incurred in providing such notification.

11.5 State License Board Notice

A. Contractors are required by law to be licensed and regulated by the Contractors' State License Board which has jurisdiction to investigate complaints against contractors if a complaint regarding a patent act or omission is filed within four (4) years of the date of the alleged violation. A complaint regarding a latent act or

omission pertaining to structural defects must be filed within ten (10) years of the date of the alleged violation. Any questions concerning a contractor may be referred to the Registrar, Contractors' State License Board, P.O. Box 26000, Sacramento, California 95826.

11.6 Assignment of Contract

A. Contractor shall not assign, transfer, convey, sublet or otherwise dispose of the rights or title of interest of any or all of this contract without the prior written consent of the City. Any assignment or change of Contractor's name of legal entity without the written consent of the City shall be void. Any assignment of money due or to become due under this Contract shall be subject to a prior lien for services rendered or material supplied for performance of Work called for under the Contract Documents in favor of all persons, firms, or corporations rendering such services or supplying such materials to the extent that claims are filed pursuant to the Civil Code, the Code of Civil Procedure or the Government Code.

11.7 Change In Name And Nature Of Contractor's Legal Entity.

A. Should a change be contemplated in the name or nature of the Contractor's legal entity, the Contractor shall first notify the City in order that proper steps may be taken to have the change reflected on the Contract and all related documents. No change of Contractor's name or nature will affect the City's rights under the Contract, including but not limited to the bonds.

11.8 Prohibited Interests

A. No City official or representative who is authorized in such capacity and on behalf of City to negotiate, supervise, make, accept, or approve, or to take part in negotiating, supervising, making, accepting or approving any engineering, inspection, construction or material supply contract or any subcontract in connection with construction of the project, shall be or become directly or indirectly interested financially in the Contract.

11.9 Controlling Law

A. Notwithstanding any subcontract or other contract with any subcontractor, supplier, or other person or organization performing any part of the Work, this Contract shall be governed by the law of the State of California excluding any choice of law provisions.

11.10 Jurisdiction; Venue

A. Contractor and any subcontractor, supplier, or other person or organization performing any part of the Work agrees that any action or suits at law or in equity arising out of or related to the bidding, award, or performance of the Work shall be maintained in the Superior Court of San Bernardino County, California, and expressly consent to the jurisdiction of said court, regardless of residence or domicile, and agree that said court shall be a proper venue for any such action.

11.11 Cumulative Remedies.

A. The duties and obligations imposed by these General Conditions and the rights and remedies available hereunder to the parties hereto are in addition to, and are not to be construed in any way as a limitation of, any rights and remedies available to any or all of them which are otherwise imposed or available by Applicable Laws, by special warranty or guarantee, or by other provisions of the Contract Documents. The provisions of this Article will be as effective as if repeated specifically in the Contract Documents in connection with each particular duty, obligation, right, and remedy to which they apply.

11.12 Survival of Obligations.

A. All representations, indemnifications, warranties, and guarantees made in, required by, or given in accordance with the Contract Documents, as well as all continuing obligations indicated in the Contract Documents, will survive final payment, completion, and acceptance of the Work or termination or completion of the Contract or termination of the services of Contractor.

11.13 Headings.

A. Article and paragraph headings are inserted for convenience only and do not constitute parts of these General Conditions.

11.14 Assignment of Antitrust Actions

A. In accordance with §7103.5(b) of the California Public Contract Code, Contractor and Subcontractors must conform to the following requirements:

1. In entering into a public works contract or a subcontract to supply goods, services, or materials pursuant to a public works contract, Contractor or Subcontractor offer and agree to assign to the awarding body all rights, title, and interest in and to all causes of action it may have under §4 of the Clayton Act (15 U.S.C. Sec. 15) or under the Cartwright Act (Chapter 2 (commencing with §16700) of Part 2 of Division 7 of the Business and Professions Code) arising from purchases of goods, services, or materials pursuant to the public works contract or the subcontract.

2. This assignment must be made and become effective at the time the awarding body tenders to Contractor, without further acknowledgment by the parties.

11.15 All Legal Provisions Included

A. Contractor shall give all notices and comply with all federal, state and local laws, ordinances, rules and regulations bearing on conduct of work as indicated and specified by their terms. References to specific laws, rules or regulations in this Contract are for reference purposes only, and shall not limit or affect the applicability of provisions not specifically mentioned. If Contractor observes that drawings and specifications are at variance therewith, he shall promptly notify City in writing and any necessary changes shall be adjusted as provided for in this Contract for changes in Work. If Contractor performs any Work knowing it to be contrary to such laws,

ordinances, rules and regulations, and without such notice to City, he shall bear all costs arising therefrom.

B. Contractor shall be responsible for familiarity with the Americans with Disabilities Act ("ADA") (42 U.S.C. § 12101 et seq.). The Work will be performed in compliance with ADA laws, rules and regulations. Contractor shall comply with the Historic Building Code, including, but not limited to, as it relates to the ADA, whenever applicable.

C. Contractor acknowledges and understands that, pursuant to Public Contract Code section 20676, sellers of "mined material" must be on an approved list of sellers published pursuant to Public Resources Code section 2717(b) in order to supply mined material for this Contract.

D. No City official or representative who is authorized in such capacity and on behalf of City to negotiate, supervise, make, accept, or approve, or to take part in negotiating, supervising, making, accepting or approving any engineering, inspection, construction or material supply contract or any subcontract in connection with construction of the Work, shall be or become directly or indirectly interested financially in the Contract.

E. All provisions of law required to be inserted in the Contract or Contract Documents pursuant to any Applicable Laws shall be and are inserted herein. If through mistake, neglect, oversight, or otherwise, any such provision is not herein inserted or inserted in improper form, upon the application of either party, the Contract or Contract Documents shall be changed by City, at no increase in Contract Price or extension in Contract Times, so as to strictly comply with the Applicable Laws and without prejudice to the rights of either party hereunder.

SECTION 00750 – SPECIAL CONDITIONS

ARTICLE 1 -SCOPE OF WORK

1.1 Location of the Project.

A. Ontario Police Department 2500 S Archibald Ave Ontario Ca 91761

1.2 Scope of Work.

A. The Scope of Work is outlined in the following documents:

1. Technical Specifications
2. OPD RTIC & TI Improvements permitted plans B202401312
3. Contractor will communicate and coordinate with Bay Alarm Fire for phasing of the scheduled fire notification system installation.
4. Contractor to provide noise impact management or after hours for high decibel tear out construction tasks and areas impacted by MEP work.
5. All Submittals delivered to City Project Manager 30 days prior to mobilization.
6. Contractor to coordinate live scan background check for all employees including subs 4-to-6-weeks prior to receiving “Notice to Proceed”.

END OF SPECIAL CONDITIONS

PLANS AND DRAWINGS

"THE FOLLOWING PLANS AND DRAWINGS ARE INCORPORATED HEREIN BY REFERENCE AS IF SET FORTH IN THEIR ENTIRETY:

1. Specifications prepared by Holt Architect “Uploaded on Planetbids”

2. OPD RTIC & TI Improvements permitted plans B202401312 “Uploaded on Planetbids”

CITY OF ONTARIO *Agenda Report* **August 20, 2024**	**SECTION:** **CONSENT CALENDAR**
Department: Public Works Prepared By: Philip Marino Staff Member Presenting: Tito Haes, Executive Director Public Works Reviewed By: Gina Gomez, Bonnie Tam Approved By:	Submitted To: Council/OHA Approved: _____ Continued To: _____ Denied: _____ Item No: 18

SUBJECT: **MAINTENANCE SERVICES AGREEMENTS WITH MERCHANTS LANDSCAPE SERVICES, INC. FOR WEED ABATEMENT SERVICES IN THE QUIET HOME AREA (PART 150) AND THE ONTARIO RANCH AREA**

RECOMMENDATION: That the City Council take the following actions:

A. Authorize the City Manager, or his designee, to execute a Maintenance Services Agreement for Contract No. PM 2425-17 Quiet Home Area (Part 150) for Weed Abatement services with Merchants Landscape Services, Inc., of Rancho Cucamonga, California, for a total contract amount not-to-exceed $681,348 for up to five (5) years; and
B. Authorize the City Manager, or his designee, to execute a Maintenance Services Agreement for Contract No. PM 2425-18 Ontario Ranch Weed Abatement Services with Merchants Landscape Services, Inc., of Rancho Cucamonga, California, for a total contract amount not-to-exceed $805,386 for up to five (5) years.

THE FOLLOWING COUNCIL GOALS ARE BEING ACHIEVED:
Invest in the City's Infrastructure (Water, Streets, Sewers, Parks, Storm Drains and Public Facilities)
Ensure the Development of a Well Planned, Balanced, and Self-Sustaining Community in Ontario Ranch

FISCAL IMPACT:
Quiet Home Area (Part 150)
The recommended contract award to Merchants Landscape Services, Inc., is for $387,000 plus urgency services in an amount of $14,760 for a total not-to-exceed contract amount of $401,760 over the three-year term. Two (2) one-year extensions may be exercised at the City's sole discretion for an additional contract amount of $269,748 plus urgency services in an amount of $9,840 for a total contract amount not-to-exceed $681,348. The Fiscal Year 2024-25 Adopted Budget includes appropriations in the General Fund for the Maintenance Services Agreement with Merchants Landscape Services, Inc.

Ontario Ranch Weed Abatement

The recommended contract award to Merchants Landscape Services, Inc., is for $459,000 plus urgency services in an amount of $15,840, for a total not-to-exceed contract amount of $474,840 over the three-year term. Two (2) one-year extensions may be exercised at the City's sole discretion for an additional contract amount of $319,986 plus urgency services in an amount of $10,560 for a total contract amount not-to-exceed $805,386. The Fiscal Year 2024-25 Adopted Budget includes appropriations in the General Fund for the Maintenance Services Agreement with Merchants Landscape Services, Inc.

BACKGROUND & ANALYSIS:

Quiet Home Area (Part 150)

The City-owned Quiet Home Area (Part 150) consists of undeveloped parcels that require regular weed abatement services. These services also include removal of trash and tree maintenance. The Economic Development Department has acquired these properties, and they require maintenance until they are sold or developed.

In July 2024, the City solicited proposals for Bid No. 1815, Landscape Maintenance Services for the Quiet Home Area (Part 150). The four (4) proposals received met the bid criteria and standards necessary to perform this work.

Vendor	**Location**
BrightView Landscape Services, Inc.	Upland, CA
Mariposa Landscapes, Inc.	Irwindale, CA
Merchants Landscape Services, Inc.	Rancho Cucamonga, CA
Pest Options, Inc.	Fullerton, CA

Merchants Landscape Services, Inc., of Rancho Cucamonga, California, submitted a proposal that met all the required specifications with a total contract cost of $387,000 over a three-year term. Based on their proposal, credentials, pricing, and favorable reference checks, Staff recommends awarding the Maintenance Services Agreement to Merchants Landscape Services, Inc.

Ontario Ranch Weed Abatement

The Ontario Ranch Weed Abatement involves maintaining undeveloped City right-of-way in the Ontario Ranch area that requires routine weed abatement services. These areas receive regular maintenance until there is development in the right-of-way.

In July 2024, the City solicited proposals for Bid No. 1816, Landscape Maintenance Services for the Ontario Ranch Weed Abatement. The four (4) proposals received met the bid criteria and standards necessary to perform this work.

Vendor	**Location**
BrightView Landscape Services, Inc.	Upland, CA
Mariposa Landscapes, Inc.	Irwindale, CA
Merchants Landscape Services, Inc.	Rancho Cucamonga, CA
Pest Options, Inc.	Fullerton, CA

Merchants Landscape Services, Inc., of Rancho Cucamonga, California, submitted a proposal that met all the required specifications with a total contract cost of $459,000 over a three-year term. Based on their proposal, credentials, pricing, and favorable reference checks, Staff recommends awarding the Maintenance Services Agreement to Merchants Landscape Services, Inc.

CITY OF ONTARIO
MAINTENANCE SERVICES AGREEMENT

1. PARTIES AND DATE.

This Agreement is made and entered as of _____, by and between the City of Ontario, a municipal corporation organized under the laws of the State of California with its principal place of business at 303 East "B" Street, Ontario, California 91764-4196, County of San Bernardino, State of California ("City") and **Merchants Landscape Services, Inc.**, a **Corporation** with its principal place of business at **1510 S. Lyon St. Santa Ana, CA 92705 ("Contractor").** City and Consultant are sometimes individually referred to herein as "Party" and collectively as "Parties."

2. RECITALS.

2.1 Contractor.

Contractor desires to perform and assume responsibility for the provision of certain maintenance services required by the City on the terms and conditions set forth in this Agreement. Contractor represents that it is experienced in providing **Landscape Maintenance Services for Ontario Ranch Weed Abatement** services to public clients, that it and its employees or subcontractors have all necessary licenses and permits to perform the Services in the State of California, and that is familiar with the plans of City.

2.2 Project.

City desires to engage Contractor to render such services for **Landscape Maintenance Services for Ontario Ranch Weed Abatement** project ("Project") as set forth in this Agreement.

3. TERMS.

3.1 Scope of Services and Term.

3.1.1 General Scope of Services. Contractor promises and agrees to furnish to the City all labor, materials, tools, equipment, services, and incidental and customary work necessary to fully and adequately supply the maintenance services necessary for the Project ("Services"). The Services are more particularly described in Exhibit "A" attached hereto and incorporated herein by reference. All Services shall be subject to, and performed in accordance with, this Agreement, the exhibits attached hereto and incorporated herein by reference, and all applicable local, state and federal laws, rules and regulations.

3.1.2 Term. The term of this Agreement shall be from **September 1, 2024** to **June 30, 2027**, unless earlier terminated as provided herein. The City shall have the unilateral option, at its sole discretion, to renew this Agreement automatically for no more than two (2) additional one-year terms. Contractor shall complete the Services within the term of this Agreement, and shall meet any other established schedules and deadlines.

The Parties may, by mutual, written consent, extend the term of this Agreement if necessary to complete the Services.

3.2 Compensation.

3.2.1 Compensation. Contractor shall receive compensation, including authorized reimbursements, for all Services rendered under this Agreement at the rates set forth in Exhibit "C" attached hereto and incorporated herein by reference. The total compensation shall not exceed **Four Hundred Fifty-Nine Thousand Dollars with Zero Cents ($459,000)** without written approval of City's **City Manager**. Extra Work may be authorized, as described below, and if authorized, will be compensated at the rates and manner set forth in this Agreement.

3.2.2 Payment of Compensation. Contractor shall submit to City a monthly itemized statement which indicates work completed and hours of Services rendered by Contractor. The statement shall describe the amount of Services and supplies provided since the initial commencement date, or since the start of the subsequent billing periods, as appropriate, through the date of the statement. City shall, within 45 days of receiving such statement, review the statement and pay all approved charges thereon.

3.2.3 Deductions. City may deduct or withhold, as applicable, from each progress payment an amount necessary to protect City from loss because of: (1) stop payment notices as allowed by state law; (2) unsatisfactory prosecution of the Services by Contractor; (3) sums representing expenses, losses, or damages as determined by the City, incurred by the City for which Contractor is liable under the Agreement; and (4) any other sums which the City is entitled to recover from Contractor under the terms of the Agreement or pursuant to state law, including Section 1727 of the California Labor Code. The failure by the City to deduct any of these sums from a progress payment shall not constitute a waiver of the City's right to such sums.

3.2.4 Reimbursement for Expenses. Contractor shall not be reimbursed for any expenses unless authorized in writing by City.

3.2.5 Extra Work. At any time during the term of this Agreement, City may request that Contractor perform Extra Work. As used herein, "Extra Work" means any work which is determined by City to be necessary for the proper completion of the Project, but which the parties did not reasonably anticipate would be necessary at the execution of this Agreement. Contractor shall not perform, nor be compensated for, Extra Work without written authorization from City's Representative.

3.3 Responsibilities of Contractor.

3.3.1 Control and Payment of Subordinates; Independent Contractor. The Services shall be performed by Contractor or under its supervision. Contractor will determine the means, methods and details of performing the Services subject to the requirements of this Agreement. City retains Contractor on an independent contractor basis and not as an employee. Contractor retains the right to perform similar or different services for others during the term of this Agreement. Any additional personnel performing the Services under this Agreement on behalf of Contractor shall also not be employees of City and shall at all times be under Contractor's exclusive direction and control. Contractor shall pay all wages, salaries, and other amounts due such personnel in connection with their performance of Services under this Agreement and as required by law. Contractor shall be responsible for all reports and obligations respecting such additional personnel, including, but not limited to: social security taxes, income

tax withholding, unemployment insurance, disability insurance, and workers' compensation insurance.

3.3.2 Schedule of Services. Contractor shall perform the Services expeditiously, within the term of this Agreement, and in accordance with the Schedule of Services set forth in Exhibit "B" attached hereto and incorporated herein by reference. Contractor represents that it has the professional and technical personnel required to perform the Services in conformance with such conditions. In order to facilitate Contractor's conformance with the Schedule, City shall respond to Contractor's submittals in a timely manner. Upon request of City, Contractor shall provide a more detailed schedule of anticipated performance to meet the Schedule of Services.

3.3.3 Conformance to Applicable Requirements. All work prepared by Contractor shall be subject to the approval of City.

3.3.4 City's Representative. The City hereby designates **Philip Marino, Urban Forestry Manager**, or his or her designee, to act as its representative for the performance of this Agreement ("City's Representative"). City's Representative shall have the power to act on behalf of the City for all purposes under this Agreement except for increasing compensation. Contractor shall not accept direction or orders from any person other than the City's Representative or his or her designee.

3.3.5 Contractor's Representative. Contractor hereby designates **Mark Brower, President**, or his or her designee, to act as its representative for the performance of this Agreement ("Contractor's Representative"). Contractor's Representative shall have full authority to represent and act on behalf of the Contractor for all purposes under this Agreement. The Contractor's Representative shall supervise and direct the Services, using his best skill and attention, and shall be responsible for all means, methods, techniques, sequences and procedures and for the satisfactory coordination of all portions of the Services under this Agreement.

3.3.6 Coordination of Services. Contractor agrees to work closely with City staff in the performance of Services and shall be available to City's staff, consultants and other staff at all reasonable times.

3.3.7 Standard of Care; Performance of Employees. Contractor shall perform all Services under this Agreement in a skillful and competent manner, consistent with the standards generally recognized as being employed by professionals in the same discipline in the State of California. Contractor represents and maintains that it is skilled in the professional calling necessary to perform the Services. Contractor warrants that all employees and subcontractors shall have sufficient skill and experience to perform the Services assigned to them. Finally, Contractor represents that it, its employees and subcontractors have all licenses, permits, qualifications and approvals of whatever nature that are legally required to perform the Services, including a City Business License, and that such licenses and approvals shall be maintained throughout the term of this Agreement. As provided for in the indemnification provisions of this Agreement, Contractor shall perform, at its own cost and expense and without reimbursement from the City, any services necessary to correct errors or omissions which are caused by the Contractor's failure to comply with the standard of care provided for herein. Any employee of the Contractor or its sub-contractors who is determined by the City to be uncooperative, incompetent, a threat to the adequate or timely completion of the Project, a threat to the safety of persons or property, or any employee who fails or refuses to perform the Services in a manner acceptable to

the City, shall be promptly removed from the Project by the Contractor and shall not be re-employed to perform any of the Services or to work on the Project.

3.3.8 Period of Performance

3.3.8.1 Contractor shall perform and complete all Services under this Agreement within the term set forth in Section 3.1.2 above ("Performance Time"). Contractor shall perform the Services in strict accordance with any completion schedule or Project milestones described in Exhibits "A" or "B" attached hereto, or which may be provided separately in writing to the Contractor. Contractor agrees that if the Services are not completed within the aforementioned Performance Time and/or pursuant to any such completion schedule or Project milestones developed pursuant to provisions of this Agreement, it is understood, acknowledged and agreed that the City will suffer damage. Pursuant to Government Code Section 53069.85, Contractor shall pay to the City as fixed and liquidated damages, and not as a penalty, the sum of **Two Hundred Ten Dollars with Zero Cents ($210)** per day for each and every calendar day of delay beyond the Performance Time or beyond any completion schedule or Project milestones established pursuant to this Agreement.

3.3.8.2 Neither City nor Contractor shall be considered in default of this Agreement for delays in performance caused by circumstances beyond the reasonable control of the non-performing Party. For purposes of this Agreement, such circumstances include a Force Majeure Event. A Force Majeure Event shall mean an event that materially affects a Party's performance and is one or more of the following: (1) Acts of God or other natural disasters; (2) terrorism or other acts of a public enemy; (3) orders of governmental authorities (including, without limitation, unreasonable and unforeseeable delay in the issuance of permits or approvals by governmental authorities that are required for the Services); (4) strikes and other organized labor action occurring at the site and the effects thereof on the Services, only to the extent such strikes and other organized labor action are beyond the control of Contractor and its subconsultants, and to the extent the effects thereof cannot be avoided by use of replacement workers; and (5) pandemics, epidemics or quarantine restrictions. For purposes of this section, "orders of governmental authorities," includes ordinances, emergency proclamations and orders, rules to protect the public health, welfare and safety, and other actions of a public agency applicable to the Services and Agreement.

3.3.8.3 Should a Force Majeure Event occur, the non-performing Party shall, within a reasonable time of being prevented from performing, give written notice to the other Party describing the circumstances preventing continued performance and the efforts being made to resume performance of this Agreement. Force Majeure Events and/or delays, regardless of the Party responsible for the delay, shall not entitle Contractor to any additional compensation. Notwithstanding the foregoing in this section, the City may still terminate this Agreement in accordance with the termination provisions of this Agreement.

3.3.9 Disputes. Should any dispute arise respecting the true value of any work done, of any work omitted, or of any extra work which Contractor may be required to do, or respecting the size of any payment to Contractor during the performance of this Contract, Contractor shall continue to perform the Work while said dispute is decided by the City. If Contractor disputes the City's decision, Contractor shall have such remedies as may be provided by law.

3.3.10 Laws and Regulations; Employee/Labor Certifications.

3.3.10.1 Compliance with Laws. Contractor shall keep itself fully informed of and in compliance with all local, state and federal laws, rules and regulations in any manner affecting the performance of the Project or the Services, including all Cal/OSHA requirements, and shall give all notices required by law. Contractor shall be liable for all violations of such laws and regulations in connection with Services. If the Contractor performs any work knowing it to be contrary to such laws, rules and regulations and without giving written notice to the City, Contractor shall be solely responsible for all costs arising therefrom. City is a public entity of the State of California subject to certain provisions of the Health & Safety Code, Government Code, Public Contract Code, and Labor Code of the State. It is stipulated and agreed that all provisions of the law applicable to the public contracts of a municipality are a part of this Agreement to the same extent as though set forth herein and will be complied with. These include but are not limited to the payment of prevailing wages, the stipulation that eight (8) hours' labor shall constitute a legal day's work and that no worker shall be permitted to work in excess of eight (8) hours during any one calendar day except as permitted by law. Contractor shall defend, indemnify and hold City, its officials, directors, officers, employees and agents free and harmless, pursuant to the indemnification provisions of this Agreement, from any claim or liability arising out of any failure or alleged failure to comply with such laws, rules or regulations.

3.3.10.2 Employment Eligibility; Contractor. By executing this Agreement, Contractor verifies that it fully complies with all requirements and restrictions of state and federal law respecting the employment of undocumented aliens, including, but not limited to, the Immigration Reform and Control Act of 1986, as may be amended from time to time. Such requirements and restrictions include, but are not limited to, examination and retention of documentation confirming the identity and immigration status of each employee of the Contractor. Contractor also verifies that it has not committed a violation of any such law within the five (5) years immediately preceding the date of execution of this Agreement, and shall not violate any such law at any time during the term of the Agreement. Contractor shall avoid any violation of any such law during the term of this Agreement by participating in an electronic verification of work authorization program operated by the United States Department of Homeland Security, by participating in an equivalent federal work authorization program operated by the United States Department of Homeland Security to verify information of newly hired employees, or by some other legally acceptable method. Contractor shall maintain records of each such verification, and shall make them available to the City or its representatives for inspection and copy at any time during normal business hours. The City shall not be responsible for any costs or expenses related to Contractor's compliance with the requirements provided for in Section 3.3.10 or any of its sub-sections.

3.3.10.3 Employment Eligibility; Subcontractors, Sub-subcontractors and Consultants. To the same extent and under the same conditions as Contractor, Contractor shall require all of its subcontractors, sub-subcontractors and consultants performing any work relating to the Project or this Agreement to make the same verifications and comply with all requirements and restrictions provided for in Section 3.3.10.1.

3.3.10.4 Employment Eligibility; Failure to Comply. Each person executing this Agreement on behalf of Contractor verifies that they are a duly authorized officer of Contractor, and understands that any of the following shall be grounds for the City to terminate the Agreement for cause: (1) failure of Contractor or its subcontractors, sub-subcontractors or consultants to meet any of the requirements provided for in Sections 3.3.10.1 or 3.3.10.2; (2) any misrepresentation or material omission concerning compliance with such requirements (including in those verifications provided to the Contractor under Section 3.3.10.2); or (3) failure to

immediately remove from the Project any person found not to be in compliance with such requirements.

3.3.10.5 Equal Opportunity Employment. Contractor represents that it is an equal opportunity employer and it shall not discriminate against any subcontractor, employee or applicant for employment because of race, religion, color, national origin, handicap, ancestry, sex or age. Such non-discrimination shall include, but not be limited to, all activities related to initial employment, upgrading, demotion, transfer, recruitment or recruitment advertising, layoff or termination. Contractor shall also comply with all relevant provisions of City's Minority Business Enterprise program, Affirmative Action Plan or other related programs or guidelines currently in effect or hereinafter enacted.

3.3.10.6 Air Quality. Contractor must fully comply with all applicable laws, rules and regulations in furnishing or using equipment and/or providing services, including, but not limited to, emissions limits and permitting requirements imposed by the California Air Resources Board (CARB). Contractor shall specifically be aware of the CARB limits and requirements' application to "portable equipment", which definition is considered by CARB to include any item of equipment with a fuel-powered engine. Contractor shall indemnify City against any fines or penalties imposed by CARB or any other governmental or regulatory agency for violations of applicable laws, rules and/or regulations by Contractor, its subcontractors, or others for whom Contractor is responsible under its indemnity obligations provided for in this Agreement.

3.3.10.7 Water Quality.

(A) To the extent applicable, Contractor's Services must account for, and fully comply with, all local, state and federal laws, rules and regulations that may impact water quality compliance, including, without limitation, all applicable provisions of the Federal Water Pollution Control Act (33 U.S.C. §§ 1300); the California Porter-Cologne Water Quality Control Act (Cal Water Code §§ 13000-14950); laws, rules and regulations of the Environmental Protection Agency, the State Water Resources Control Board and the Colorado River Regional Water Quality Control Board; the City's ordinances regulating discharges of storm water; and any and all regulations, policies, or permits issued pursuant to any such authority regulating the discharge of pollutants, as that term is used in the Porter-Cologne Water Quality Control Act, to any ground or surface water in the State.

(B) Liability for Non-Compliance. Failure to comply with the laws, regulations and policies described in this Section is a violation of law that may subject Contractor or City to penalties, fines, or additional regulatory requirements. Contractor shall defend, indemnify and hold the City, its directors, officials, officers, employees, volunteers and agents free and harmless, pursuant to the indemnification provisions of this Agreement, from and against any and all fines, penalties, claims or other regulatory requirements imposed as a result of Contractor's non-compliance with the laws, regulations and policies described in this Section, unless such non-compliance is the result of the sole established negligence, willful misconduct or active negligence of the City, its officials, officers, agents, employees or authorized volunteers.

(C) Training. In addition to any other standard of care requirements set forth in this Agreement, Contractor warrants that all employees and subcontractors shall have sufficient skill and experience to perform the Services assigned to them without impacting water quality in violation of the laws, regulations and policies described in this Section. Contractor further warrants that it, its employees and subcontractors will receive adequate training, as determined by City, regarding the requirements of the laws, regulations and

policies described in this Section as they may relate to the Services provided under this Agreement. Upon request, City will provide Contractor with a list of training programs that meet the requirements of this paragraph.

3.3.11 Insurance.

3.3.11.1 Time for Compliance. Contractor shall not commence Services under this Agreement until it has provided evidence satisfactory to the City that it has secured all insurance required under this Section. In addition, Contractor shall not allow any subcontractor to commence work on any subcontract until it has provided evidence satisfactory to the City that the subcontractor has secured all insurance required under this Section.

3.3.11.2 Minimum Requirements. Contractor shall, at its expense, procure and maintain for the duration of the Agreement insurance against claims for injuries to persons or damages to property which may arise from or in connection with the performance of the Agreement by the Contractor, its agents, representatives, employees or subcontractors. Contractor shall also require all of its subcontractors to procure and maintain the same insurance for the duration of the Agreement. Such insurance shall meet at least the following minimum levels of coverage:

(A) Minimum Scope of Insurance. Coverage shall be at least as broad as the latest version of the following: (1) *General Liability*: Insurance Services Office Commercial General Liability coverage (occurrence form CG 0001); (2) *Automobile Liability*: Insurance Services Office Business Auto Coverage form number CA 0001, code 1 (any auto); and (3) *Workers' Compensation and Employer's Liability*: Workers' Compensation insurance as required by the State of California and Employer's Liability Insurance. The policy shall not contain any exclusion contrary to the Agreement, including but not limited to endorsements or provisions limiting coverage for (1) contractual liability (including but not limited to ISO CG 24 26 or 21 29); or (2) cross liability for claims or suits by one insured against another.

(B) Minimum Limits of Insurance. Contractor shall maintain limits no less than: (1) *General Liability:* $2,000,000 per occurrence for bodily injury, personal injury and property damage. If Commercial General Liability Insurance or other form with general aggregate limit is used including, but not limited to, form CG 2503, either the general aggregate limit shall apply separately to this Agreement/location or the general aggregate limit shall be twice the required occurrence limit; (2) *Automobile Liability:* $2,000,000 per accident for bodily injury and property damage; and (3) *Workers' Compensation and Employer's Liability:* Workers' Compensation limits as required by the Labor Code of the State of California. Employer's Liability limits of $1,000,000 per accident for bodily injury or disease. Defense costs shall be paid in addition to the limits.

(C) Notices; Cancellation or Reduction of Coverage. At least fifteen (15) days prior to the expiration of any such policy, evidence showing that such insurance coverage has been renewed or extended shall be filed with the City. If such coverage is cancelled or materially reduced, Contractor shall, within ten (10) days after receipt of written notice of such cancellation or reduction of coverage, file with the City evidence of insurance showing that the required insurance has been reinstated or has been provided through another insurance company or companies. In the event any policy of insurance required under this Agreement does not comply with these specifications or is canceled and not replaced, the City has the right but not the duty to obtain the insurance it deems necessary and any premium paid by the City will be

promptly reimbursed by Contractor or the City may withhold amounts sufficient to pay premium from Contractor payments. In the alternative, the City may suspend or terminate this Agreement.

(D) Additional Insured. The City, its directors, officials, officers, employees, agents, and volunteers shall be named as additional insureds on Contractor's and its subcontractors' policies of commercial general liability and automobile liability insurance using the endorsements and forms specified herein or exact equivalents.

3.3.11.3 Insurance Endorsements. The insurance policies shall contain the following provisions, or Contractor shall provide endorsements on forms supplied or approved by the City to add the following provisions to the insurance policies:

(A) General Liability. The general liability policy shall include or be endorsed (amended) to state that: (1) using ISO CG forms 20 10 and 20 37, or endorsements providing the exact same coverage, the City of Ontario, its directors, officials, officers, employees, agents, and volunteers shall be covered as additional insured with respect to the Services or ongoing and complete operations performed by or on behalf of the Contractor, including materials, parts or equipment furnished in connection with such work; and (2) using ISO form 20 01, or endorsements providing the exact same coverage, the insurance coverage shall be primary insurance as respects the City, its directors, officials, officers, employees, agents, and volunteers, or if excess, shall stand in an unbroken chain of coverage excess of the Contractor's scheduled underlying coverage. Any excess insurance shall contain a provision that such coverage shall also apply on a primary and noncontributory basis for the benefit of the City, before the City's own primary insurance, deductible, or self-insurance shall be called upon to protect it as a named insured. Any insurance, deductible, or self-insurance maintained by the City, its directors, officials, officers, employees, agents, and volunteers shall be excess of the Contractor's insurance and shall not be called upon to contribute with it in any way. Notwithstanding the minimum limits set forth in Section 3.3.11.2(B), any available insurance proceeds in excess of the specified minimum limits of coverage shall be available to the parties required to be named as additional insureds pursuant to this Section 3.3.11.3(A).

(B) Automobile Liability. The automobile liability policy shall include or be endorsed (amended) to state that: (1) the City, its directors, officials, officers, employees, agents, and volunteers shall be covered as additional insureds with respect to the ownership, operation, maintenance, use, loading or unloading of any auto owned, leased, hired or borrowed by the Contractor or for which the Contractor is responsible; and (2) the insurance coverage shall be primary insurance as respects the City, its directors, officials, officers, employees, agents, and volunteers, or if excess, shall stand in an unbroken chain of coverage excess of the Contractor's scheduled underlying coverage. Any insurance, deductible, or self-insurance maintained by the City, its directors, officials, officers, employees, agents, and volunteers shall be excess of the Contractor's insurance and shall not be called upon to contribute with it in any way. Policy shall contain or be endorsed to contain such provisions. Notwithstanding the minimum limits set forth in Section 3.3.11.2(B), any available insurance proceeds in excess of the specified minimum limits of coverage shall be available to the parties required to be named as additional insureds pursuant to this Section 3.3.11.3(B).

(C) Workers' Compensation and Employer's Liability Coverage. The insurer shall agree to waive all rights of subrogation against the City, its directors, officials, officers, employees, agents, and volunteers for losses paid under the terms of the insurance policy which arise from work performed by the Contractor.

(D) All Coverages. Each insurance policy required by this Agreement shall be endorsed to state that: (A) coverage shall not be suspended, voided, reduced or canceled except after thirty (30) days (10 days for nonpayment of premium) prior written notice by certified mail, return receipt requested, has been given to the City; and (B) any failure to comply with reporting or other provisions of the policies, including breaches of warranties, shall not affect coverage provided to the City, its directors, officials, officers, employees, agents, and volunteers. Any failure to comply with reporting or other provisions of the policies including breaches of warranties shall not affect coverage provided to the City, its officials, officers, employees, agents and volunteers, or any other additional insureds.

3.3.11.4 Separation of Insureds; No Special Limitations; Waiver of Subrogation. All insurance required by this Section shall contain standard separation of insureds provisions. In addition, such insurance shall not contain any special limitations on the scope of protection afforded to the City, its directors, officials, officers, employees, agents, and volunteers. Requirement of specific coverage or minimum limits contained in this Section are not intended as a limitation on coverage, limits, or other requirement, or a waiver of any coverage normally provided by any insurance. All policies shall waive any right of subrogation of the insurer against the City, its officials, officers, employees, agents, and volunteers, or any other additional insureds, or shall specifically allow Contractor or others providing insurance evidence in compliance with these specifications to waive their right of recovery prior to a loss. Contractor hereby waives its own right of recovery against City, its officials, officers, employees, agents, and volunteers, or any other additional insureds, and shall require similar written express waivers and insurance clauses from each of its subcontractors.

3.3.11.5 Deductibles and Self-Insurance Retentions. Any deductibles or self-insured retentions must be declared to and approved by the City. Contractor shall guarantee that, at the option of the City, either: (1) the insurer shall reduce or eliminate such deductibles or self-insured retentions as respects the City, its directors, officials, officers, employees, agents, and volunteers; or (2) the Contractor shall procure a bond guaranteeing payment of losses and related investigation costs, claims and administrative and defense expenses.

3.3.11.6 Subcontractor Insurance Requirements. Contractor shall not allow any subcontractors to commence work on any subcontract relating to the work under the Agreement until they have provided evidence satisfactory to the City that they have secured all insurance required under this Section. If requested by Contractor, the City may approve different scopes or minimum limits of insurance for particular subcontractors. The Contractor and the City shall be named as additional insureds on all subcontractors' policies of Commercial General Liability using ISO form 20 38, or coverage at least as broad.

3.3.11.7 Acceptability of Insurers. Insurance is to be placed with insurers with a current A.M. Best's rating no less than A:VIII, licensed to do business in California, and satisfactory to the City.

3.3.11.8 Verification of Coverage. Contractor shall furnish City with original certificates of insurance and endorsements effecting coverage required by this Agreement on forms satisfactory to the City. The certificates and endorsements for each insurance policy shall be signed by a person authorized by that insurer to bind coverage on its behalf, and shall be on forms provided by the City if requested. All certificates and endorsements must be received and approved by the City before work commences. The City reserves the right to require complete, certified copies of all required insurance policies, at any time.

3.3.11.9 Reporting of Claims. Contractor shall report to the City, in addition to Contractor's insurer, any and all insurance claims submitted by Contractor in connection with the Services under this Agreement.

3.3.12 Safety. Contractor shall execute and maintain its work so as to avoid injury or damage to any person or property. In carrying out its Services, the Contractor shall at all times be in compliance with all applicable local, state and federal laws, rules and regulations, and shall exercise all necessary precautions for the safety of employees appropriate to the nature of the work and the conditions under which the work is to be performed. Safety precautions as applicable shall include, but shall not be limited to: (A) adequate life protection and lifesaving equipment and procedures; (B) instructions in accident prevention for all employees and subcontractors, such as safe walkways, scaffolds, fall protection ladders, bridges, gang planks, confined space procedures, trenching and shoring, equipment and other safety devices, equipment and wearing apparel as are necessary or lawfully required to prevent accidents or injuries; and (C) adequate facilities for the proper inspection and maintenance of all safety measures.

3.3.13 Bonds.

3.3.13.1 Performance Bond. If required by law or otherwise specifically requested by City in Exhibit "C" attached hereto and incorporated herein by reference, Contractor shall execute and provide to City concurrently with this Agreement a Performance Bond in the amount of the total, not-to-exceed compensation indicated in this Agreement, and in a form provided or approved by the City. If such bond is required, no payment will be made to Contractor until it has been received and approved by the City.

3.3.13.2 Payment Bond. If required by law or otherwise specifically requested by City in Exhibit "C" attached hereto and incorporated herein by reference, Contractor shall execute and provide to City concurrently with this Agreement a Payment Bond in the amount of the total, not-to-exceed compensation indicated in this Agreement, and in a form provided or approved by the City. If such bond is required, no payment will be made to Contractor until it has been received and approved by the City.

3.3.13.3 Bond Provisions. Should, in City's sole opinion, any bond become insufficient or any surety be found to be unsatisfactory, Contractor shall renew or replace the affected bond within 10 days of receiving notice from City. In the event the surety or Contractor intends to reduce or cancel any required bond, at least thirty (30) days prior written notice shall be given to the City, and Contractor shall post acceptable replacement bonds at least ten (10) days prior to expiration of the original bonds. No further payments shall be deemed due or will be made under this Agreement until any replacement bonds required by this Section are accepted by the City. To the extent, if any, that the total compensation is increased in accordance with the Agreement, the Contractor shall, upon request of the City, cause the amount of the bonds to be increased accordingly and shall promptly deliver satisfactory evidence of such increase to the City. To the extent available, the bonds shall further provide that no change or alteration of the Agreement (including, without limitation, an increase in the total compensation, as referred to above), extensions of time, or modifications of the time, terms, or conditions of payment to the Contractor, will release the surety. If the Contractor fails to furnish any required bond, the City may terminate this Agreement for cause.

3.3.13.4 Surety Qualifications. Only bonds executed by an admitted surety insurer, as defined in Code of Civil Procedure Section 995.120, shall be accepted. The

surety must be a California-admitted surety with a current A.M. Best's rating no less than A:VIII and satisfactory to the City. If a California-admitted surety insurer issuing bonds does not meet these requirements, the insurer will be considered qualified if it is in conformance with Section 995.660 of the California Code of Civil Procedure, and proof of such is provided to the City.

3.3.14 Work Site.

3.3.14.1 Inspection Of Site. Contractor shall visit sites where Services are to be performed and shall become acquainted with all conditions affecting the Services prior to commencing the Services. Contractor shall make such examinations as it deems necessary to determine the condition of the work sites, its accessibility to materials, workmen and equipment, and to determine Contractor's ability to protect existing surface and subsurface improvements. No claim for allowances–time or money–will be allowed as to such matters after commencement of the Services.

3.3.14.2 Field Measurements. Contractor shall make field measurements, verify field conditions and shall carefully compare such field measurements and conditions and other information known to Contractor with the Contract Documents, including any plans, specifications, or scope of work before commencing Services. Errors, inconsistencies or omissions discovered shall be reported to the City immediately and prior to performing any Services or altering the condition.

3.3.15 Loss and Damage. Contractor shall be responsible for all loss and damage which may arise out of the nature of the Services agreed to herein, or from the action of the elements, or from any unforeseen difficulties which may arise or be encountered in the prosecution of the Services until the same is fully completed and accepted by City.

3.3.16 Warranty. Contractor warrants all Services under the Contract (which for purposes of this Section shall be deemed to include unauthorized work which has not been removed and any non-conforming materials incorporated into the work) to be of good quality and free from any defective or faulty material and workmanship. Contractor agrees that for a period of one year (or the period of time specified elsewhere in the Contract or in any guarantee or warranty provided by any manufacturer or supplier of equipment or materials incorporated into the work, whichever is later) after the date of final acceptance, Contractor shall within ten (10) days after being notified in writing by the City of any defect in the Services or non-conformance of the Services to the Contract, commence and prosecute with due diligence all Services necessary to fulfill the terms of the warranty at its sole cost and expense. Contractor shall act sooner as requested by the City in response to an emergency. In addition, Contractor shall, at its sole cost and expense, repair and replace any portions of the work (or work of other contractors) damaged by its defective Services or which becomes damaged in the course of repairing or replacing defective work. For any work so corrected, Contractor's obligation hereunder to correct defective work shall be reinstated for an additional one year period, commencing with the date of acceptance of such corrected work. Contractor shall perform such tests as the City may require to verify that any corrective actions, including, without limitation, redesign, repairs, and replacements comply with the requirements of the Contract. All costs associated with such corrective actions and testing, including the removal, replacement, and reinstitution of equipment and materials necessary to gain access, shall be the sole responsibility of the Contractor. All warranties and guarantees of subcontractors, suppliers and manufacturers with respect to any portion of the work, whether express or implied, are deemed to be obtained by Contractor for the benefit of the City, regardless of whether or not such warranties and guarantees have been

transferred or assigned to the City by separate agreement and Contractor agrees to enforce such warranties and guarantees, if necessary, on behalf of the City. In the event that Contractor fails to perform its obligations under this Section, or under any other warranty or guaranty under this Contract, to the reasonable satisfaction of the City, the City shall have the right to correct and replace any defective or non-conforming work and any work damaged by such work or the replacement or correction thereof at Contractor's sole expense. Contractor shall be obligated to fully reimburse the City for any expenses incurred hereunder upon demand.

3.4 Labor Code Requirements.

3.4.1 Prevailing Wages. Contractor is aware of the requirements of California Labor Code Section 1720, et seq., and 1770, et seq., as well as California Code of Regulations, Title 8, Section 16000, et seq., ("Prevailing Wage Laws"), which require the payment of prevailing wage rates and the performance of other requirements on "public works" and "maintenance" projects. If the Services are being performed as part of an applicable "public works" or "maintenance" project, as defined by the Prevailing Wage Laws, and if the total compensation is $1,000 or more, Contractor agrees to fully comply with such Prevailing Wage Laws. City shall provide Contractor with a copy of the prevailing rates of per diem wages in effect at the commencement of this Agreement. Contractor shall make copies of the prevailing rates of per diem wages for each craft, classification or type of worker needed to execute the Services available to interested parties upon request, and shall post copies at the Contractor's principal place of business and at the project site. Contractor shall defend, indemnify and hold the City, its elected officials, officers, employees and agents free and harmless from any claim or liability arising out of any failure or alleged failure to comply with the Prevailing Wage Laws. It shall be mandatory upon the Contractor and all subcontractors to comply with all California Labor Code provisions, which include but are not limited to prevailing wages (Labor Code Sections 1771, 1774 and 1775), employment of apprentices (Labor Code Section 1777.5), certified payroll records (Labor Code Sections 1771.4 and 1776), hours of labor (Labor Code Sections 1813 and 1815) and debarment of contractors and subcontractors (Labor Code Section 1777.1). The requirement to submit certified payroll records directly to the Labor Commissioner under Labor Code section 1771.4 shall not apply to work performed on a public works project that is exempt pursuant to the small project exemption specified in Labor Code Section 1771.4.

3.4.2 Registration/DIR Compliance. If the Services are being performed as part of an applicable "public works" or "maintenance" project, and if the total compensation is $15,000 or more, then pursuant to Labor Code Sections 1725.5 and 1771.1, the Contractor and all subcontractors performing such Services must be registered with the Department of Industrial Relations. Contractor shall maintain registration for the duration of the Project and require the same of any subcontractors, as applicable.

3.4.3 Registration/DIR Compliance. This Project may also be subject to compliance monitoring and enforcement by the Department of Industrial Relations. It shall be Contractor's sole responsibility to comply with all applicable registration and labor compliance requirements. Any stop orders issued by the Department of Industrial Relations against Contractor or any subcontractor that affect Contractor's performance of Services, including any delay, shall be Contractor's sole responsibility. Any delay arising out of or resulting from such stop orders shall be considered Contractor caused delay and shall not be compensable by the City. Contractor shall defend, indemnify and hold the City, its officials, officers, employees and agents free and harmless from any claim or liability arising out of stop orders issued by the Department of Industrial Relations against Contractor or any subcontractor.

3.4.4 Labor Certification. By its signature hereunder, Consultant certifies that it is aware of the provisions of Section 3700 of the California Labor Code which require every employer to be insured against liability for Worker's Compensation or to undertake self-insurance in accordance with the provisions of that Code, and agrees to comply with such provisions before commencing the performance of the Services.

3.5 Termination of Agreement.

3.5.1 Grounds for Termination. City may, by written notice to Contractor, terminate the whole or any part of this Agreement at any time and without cause by giving written notice to Contractor of such termination, and specifying the effective date thereof, at least seven (7) days before the effective date of such termination. Upon termination, Contractor shall be compensated only for those services which have been adequately rendered to City, and Contractor shall be entitled to no further compensation. Contractor may not terminate this Agreement except for cause. The rights and remedies of the City provided in this section shall not be exclusive and are in addition to any other rights and remedies provided by law, equity or under this Agreement.

3.5.2 Effect of Termination. If this Agreement is terminated as provided herein, City may require Contractor to provide all finished or unfinished Documents and Data and other information of any kind prepared by Contractor in connection with the performance of Services under this Agreement. Contractor shall be required to provide such document and other information within fifteen (15) days of the request.

3.5.3 Additional Services. In the event this Agreement is terminated in whole or in part as provided herein, City may procure, upon such terms and in such manner as it may determine appropriate, services similar to those terminated.

3.6 Indemnification.

3.6.1 Scope of Indemnity. To the fullest extent permitted by law, Contractor shall defend, indemnify and hold the City, its officials, employees, agents and volunteers free and harmless from any and all claims, demands, causes of action, suits, actions, proceedings, costs, expenses, liability, judgments, awards, decrees, settlements, loss, damage or injury of any kind, in law or equity, regardless of whether the allegations are false, fraudulent, or groundless, to property or persons, including wrongful death, (collectively, “Claims”) in any manner arising out of, pertaining to, or incident to any acts, errors or omissions, or willful misconduct of Contractor, its officials, officers, employees, subcontractors, consultants or agents in connection with the performance of the Contractor’s Services, the Project or this Agreement, including without limitation the payment of all expert witness fees, attorneys’ fees and other related costs and expenses. Notwithstanding the foregoing, to the extent required by Civil Code section 2782, Contractor’s indemnity obligation shall not apply to such loss or damage which is caused by the sole or active negligence or willful misconduct of the City.

3.6.2 Additional Indemnity Obligations. Contractor shall defend, with counsel of City’s choosing and at Contractor’s own cost, expense and risk, any and all Claims covered by this section that may be brought or instituted against City or its officials, employees, agents and volunteers. In addition, Contractor shall pay and satisfy any judgment, award or decree that may be rendered against City or its officials, employees, agents and volunteers as part of any such claim, suit, action or other proceeding. Contractor shall also reimburse City for the cost of any settlement paid by City or its officials, employees, agents and volunteers as part of any such

claim, suit, action or other proceeding. Such reimbursement shall include payment for City's attorney's fees and costs, including expert witness fees. Contractor shall reimburse City and its officials, employees, agents and volunteers, for any and all legal expenses and costs incurred by each of them in connection therewith or in enforcing the indemnity herein provided. Contractor's obligation to indemnify shall survive expiration or termination of this Agreement, and shall not be restricted to insurance proceeds, if any, received by the City, its officials, employees, agents and volunteers.

3.7 General Provisions.

3.7.1 Accounting Records. Contractor shall maintain complete and accurate records with respect to all costs and expenses incurred under this Agreement. All such records shall be clearly identifiable. Contractor shall allow a representative of City during normal business hours to examine, audit, and make transcripts or copies of such records and any other documents created pursuant to this Agreement. Contractor shall allow inspection of all work, data, documents, proceedings, and activities related to the Agreement for a period of three (3) years from the date of final payment under this Agreement.

3.7.2 Independent Contractors and Subcontracting.

3.7.2.1 Use of Contractors. Contractor is aware of statutory and case law regarding classification of workers as independent contractors, including California Labor Code Section 2750.3 and Dynamex Operations West, Inc. v. Superior Court, 4 Cal. 5th 903 (2018). To ensure that Contractor is in compliance with the California Labor Code, Contractor shall only utilize its employees to provide the Services. Contractor may not provide the services through any independent contractor, subcontractor or subconsultant ("Subcontractor(s)") unless approved by the City as set forth in Section 3.7.2.2 below. Contractor represents and warrants that all personnel who perform the Services on Contractor's behalf are Contractor's employees, and that Contractor complies with all applicable laws, rules and regulations governing its employees, including, but not limited to, the California Labor Code, Unemployment Insurance Code and all applicable Industrial Welfare Commission Wage Orders.

3.7.2.2 Prior Approval Required. Contractor shall not use any Subcontractor to provide the Services, or any portion of the work required by this Agreement, without prior written approval of City. In the event that City authorizes Contractor to use a Subcontractor, Contractor shall enter into a written agreement with the Subcontractor, which must include all provisions of the Agreement, including a restriction on the Subcontractor's use of further independent contractors, subcontractors or subconsultants without the City's prior written consent.

3.7.3 Delivery of Notices. All notices permitted or required under this Agreement shall be given to the respective parties at the following address, or at such other address as the respective parties may provide in writing for this purpose:

Contractor:

Merchants Landscape Services, Inc.
1510 S. Lyon St.
Santa Ana, CA 92705
Attn: Mark Brower, President

City:

City of Ontario
303 East "B" Street
Ontario, CA 91764
Attn: Philip Marino, Urban Forestry Manager

Such notice shall be deemed made when personally delivered or when mailed, forty-eight (48) hours after deposit in the U.S. Mail, first class postage prepaid and addressed to the party at its applicable address. Actual notice shall be deemed adequate notice on the date actual notice occurred, regardless of the method of service.

3.7.4 Governing Law; Government Code Claim Compliance. This Agreement shall be governed by the laws of the State of California. Venue shall be in San Bernardino County. In addition to any and all contract requirements pertaining to notices of and requests for compensation or payment for extra work, disputed work, claims and/or changed conditions, Contractor must comply with the claim procedures set forth in Government Code sections 900 et seq. prior to filing any lawsuit against the City. Such Government Code claims and any subsequent lawsuit based upon the Government Code claims shall be limited to those matters that remain unresolved after all procedures pertaining to extra work, disputed work, claims, and/or changed conditions have been followed by Contractor. If no such Government Code claim is submitted, or if any prerequisite contractual requirements are not otherwise satisfied as specified herein, Contractor shall be barred from bringing and maintaining a valid lawsuit against the City.

3.7.5 Attorneys' Fees. If either Party commences an action against the other party, either legal, administrative or otherwise, arising out of or in connection with this Agreement, the prevailing party in such litigation shall be entitled to have and recover from the losing party reasonable attorneys' fees and all other costs of such action.

3.7.6 Time of Essence. Time is of the essence for each and every provision of this Agreement.

3.7.7 City's Right to Employ Other Contractors. City reserves right to employ other contractors in connection with this Project.

3.7.8 Successors and Assigns. This Agreement shall be binding on the successors and assigns of the parties.

3.7.9 Assignment or Transfer. Contractor shall not assign, hypothecate or transfer, either directly or by operation of law, this Agreement or any interest herein without the prior written consent of the City. Any attempt to do so shall be null and void, and any assignees, hypothecates or transferees shall acquire no right or interest by reason of such attempted assignment, hypothecation or transfer.

3.7.10 Construction; References; Captions. Since the Parties or their agents have participated fully in the preparation of this Agreement, the language of this Agreement shall be construed simply, according to its fair meaning, and not strictly for or against any Party. Any term referencing time, days or period for performance shall be deemed calendar days and not work days. All references to Contractor include all personnel, employees, agents, and subcontractors of Contractor, except as otherwise specified in this Agreement. All references to City include its elected officials, officers, employees, agents, and volunteers except as otherwise specified in this Agreement. The captions of the various articles and paragraphs are for convenience and ease

of reference only, and do not define, limit, augment, or describe the scope, content or intent of this Agreement.

3.7.11 Amendment; Modification. No supplement, modification or amendment of this Agreement shall be binding unless executed in writing and signed by both Parties.

3.7.12 Waiver. No waiver of any default shall constitute a waiver of any other default or breach, whether of the same or other covenant or condition. No waiver, benefit, privilege, or service voluntarily given or performed by a Party shall give the other Party any contractual rights by custom, estoppel or otherwise.

3.7.13 No Third Party Beneficiaries. Except to the extent expressly provided for in Section 3.5.7, there are no intended third party beneficiaries of any right or obligation assumed by the Parties.

3.7.14 Invalidity; Severability. If any portion of this Agreement is declared invalid, illegal, or otherwise unenforceable by a court of competent jurisdiction, the remaining provisions shall continue in full force and effect.

3.7.15 Prohibited Interests. Contractor maintains and warrants that it has not employed nor retained any company or person, other than a bona fide employee working solely for Contractor, to solicit or secure this Agreement. Further, Contractor warrants that it has not paid nor has it agreed to pay any company or person, other than a bona fide employee working solely for Contractor, any fee, commission, percentage, brokerage fee, gift or other consideration contingent upon or resulting from the award or making of this Agreement. Contractor further agrees to file, or shall cause its employees or subcontractors to file, a Statement of Economic Interest with the City's Filing Officer as required under state law in the performance of the Services. For breach or violation of this warranty, City shall have the right to rescind this Agreement without liability. For the term of this Agreement, no member, officer or employee of City, during the term of his or her service with City, shall have any direct interest in this Agreement, or obtain any present or anticipated material benefit arising therefrom.

3.7.16 Cooperation; Further Acts. The Parties shall fully cooperate with one another, and shall take any additional acts or sign any additional documents as may be necessary, appropriate or convenient to attain the purposes of this Agreement.

3.7.17 Authority to Enter Agreement. Contractor has all requisite power and authority to conduct its business and to execute, deliver, and perform the Agreement. Each Party warrants that the individuals who have signed this Agreement have the legal power, right, and authority to make this Agreement and bind each respective Party.

3.7.18 Counterparts. This Agreement may be signed in counterparts, each of which shall constitute an original.

3.7.19 Entire Agreement. This Agreement contains the entire Agreement of the parties with respect to the subject matter hereof, and supersedes all prior negotiations, understandings or agreements. This Agreement may only be modified by a writing signed by both parties.

SCOPE OF SERVICES

1. SCOPE OF WORK

A. The intent of this Agreement is to secure a contractor(s) who shall provide Landscape Maintenance Services for Ontario Ranch Weed Abatement PM 2425-18

B. The Contractor shall furnish all labor, tools, materials, and equipment to provide the landscape maintenance and repairs as set forth in this Agreement.

C. All Work shall be done in a professional, thorough, and workman like manner to the satisfaction of the Parks and Maintenance Director, or his/her authorized agent, and comply with all legal construction and landscape maintenance practices. The premises shall always be maintained at the level of service provided for in these specifications. The Contractor shall have the duty to provide complete landscape maintenance of all the project areas, including, but not limited to, the following: Fertilize, under-trim trees and shape shrubs, trim ground cover areas, mow, and edge turf grass areas. Consistently maintain the project areas with horticulturally acceptable growth and color. Consistently maintain the project areas to be devoid of weeds. Consistently maintain the project areas to be devoid of weeds five (5) feet out into the curb, gutter and street. Consistently maintain the project areas to be devoid of diseases, rodents and pests. Consistently maintain the project areas to be devoid of litter. Consistently maintain the project areas to be devoid of safety hazards. Consistently maintain the project areas to be devoid of unsafe walkways. Consistently maintain the project areas to be devoid of blocked drainage systems. Consistently maintain the project areas to be devoid of malfunctioning irrigation systems. Consistently maintain the project areas to be devoid of graffiti and paper like signs. Program, monitor, adjust and maintain all irrigation system clocks, and perform extra work as directed and approved.

D. The Contractor shall be available twenty-four (24) hours a day, seven (7) days a week to respond to all emergencies within two (2) hours of notification. Emergencies that involve maintenance work included in these general conditions shall not be compensated.

E. The Contractor shall perform a weekly maintenance inspection, during daylight hours, of all areas. Such inspection shall be both visual and operational. It shall include, but not be limited

to, the operation of all irrigation and/or other mechanical systems to check for proper condition and reliability.

2. WORK SITE

Work sites may include parks, medians, trails, weed abatement areas, and parkways.

The City reserves the right to make additions or deletions under this contract with written notice to the Contractor. The monthly compensation shall be adjusted by the monthly unit cost per square foot if any changes result in an increase or reduction in square footage maintained. Compensation shall be based on a-per unit cost (bid schedule form submitted) of work completed.

3. LENGTH OF CONTRACT

This **PRIMARY** contract shall begin **September 1, 2024 and shall terminate on June 30, 2027.**

The **FIRST** optional extension may be granted for a term of **TWELVE (12) MONTHS, from July 1, 2027, through June 30, 2028,** and any proposed increase shall be no greater than the CPI (Consumer Price Index) for the Ontario area, measured performance of the contractor and funding renewal.

The **SECOND** optional extension may be granted for a term of **TWELVE (12) MONTHS, from July 1, 2028, through June 30, 2029,** and any proposed increase shall be no greater than the CPI (Consumer Price Index) for the Ontario area, measured performance of the contractor and funding renewal.

All optional extensions of the contract are subject to approval by the City Manager, or his authorized agent and are contingent upon funding and performance by the Contractor.

4. DEFINITIONS

Where "as directed", "as required", "as permitted", "approved", "acceptance", or words of similar importance are used, it shall be understood that the direction, requirement, permission, approval or acceptance of the Parks and Maintenance Director, or his authorized agent, is intended unless otherwise stated.

The use of the word "Contractor" shall be held to mean the Contractor and/or any person employed by the City of Ontario, Parks and Maintenance Director, or his/her authorized agent and working under this contract.

The use of the words "shall" and "may" shall be held to mean "mandatory" and "permissive" respectively.

The use of the words "his" or "him" shall be construed to mean either gender, as appropriate. The use of the words " Parks and Maintenance Director " shall be construed to mean either the Parks and Maintenance Director or his authorized agent(s).

The words "City working day" refers to Monday-Friday, 6:30 a.m. to 4:00 p.m.

5. VANDALISM/THEFT/DAMAGE

Contractor shall be responsible for performing maintenance, repairs, and replacement of existing landscaped areas which are maintained under this contract and damaged or altered in any way as a result of theft, vandalism or mysterious damages that do not result from the performance of the Contractor.

In the case of vandalism to the maintained areas (Damage by Unknown Circumstances), Contractor shall notify the City within 24 hours using the free myOntario App. Graffiti will be entered under the “graffiti “Tab. All other Vandalism will be entered under the “Parks” Tab. In addition, EXCEPT in the case of graffiti, a text or email must be sent to the City’s Representative within 24 Hours detailing the Vandalism.

The use of red "Danger" tape shall be used when an area is unsafe for the public by the end of workday.

The repairs shall be made within 24 hours of receiving a notice to proceed by text or email. At no time shall damage by unknown sources remain unrepaired for a period exceeding 72 hours.

Additional compensation will be provided only for costs that are directly related to the theft and/or vandalism.

The following conditions shall be met prior to the Contractor being reimbursed for "Damage by Unknown Circumstances".

6. VANDALISM/THEFT/DAMAGE BIDS

Contractor shall submit an itemized EWA (Extra Work Authorization) within 24 hours to the City's Representative. Contractor shall secure written authorization for the repairs by the Parks and Maintenance Director, or his authorized agent within twenty-four (24) hours by e- mail or text. For emergencies regarding public safety, a verbal or text approval by the Parks and Maintenance Director, or his authorized agents, may be obtained.

7. COMPLETION OF PROPOSED VANDALISM/THEFT/DAMAGE WORK

A. Work is to commence within twenty-four (24) hours after receiving City approval.

B. The work shall be inspected and released as complete by the City representative, and then invoiced as specified in section (8).

8. INVOICING OF PROPOSED VANDALISM/THEFT/DAMAGE WORK

A. Contractor shall submit on business letterhead, a photocopy of the original EWA describing individual material costs and an invoice with line items for material costs, labor costs and administrative costs. The cost estimate for additional work shall consist of the following elements: **Base cost of labor plus Fifteen percent (15%) for overhead and profit. Actual cost of materials plus fifteen percent (15%) for overhead and profit.** City reserves the right to ask for payroll records and vendor invoice if discrepancies on the bid exist. Materials may be provided by the City of Ontario.

B. Contractor shall submit a copy of a report filed with the City of Ontario Police Department, which relates to the specific incident if required by the Parks and Maintenance Director or his authorized agent.

9. ADDITIONAL (EXTRA) WORK (EXTRA WORK AUTHORIZATION or EWA)

A. The Parks and Maintenance Director, or his authorized agent, may, at his discretion, authorize the Contractors to perform additional work. Additional work (work not related to "Damages by Unknown Circumstances") shall be defined as work not included in this Agreement.

B. Prior to the Contractor performing any additional work, the Contractor shall prepare and submit a written description of why the additional work is required, what type of work is proposed, and a cost estimate for the additional work as stated. No work shall commence

without written authorization from the Parks and Maintenance Director, or his authorized agent. Notwithstanding the above authorization, when a condition exists where there is imminent danger of injury to the public or damage to property, the Parks and Maintenance Director, or his authorized agent may verbally authorize the work to be performed upon receiving a verbal estimate from the Contractor. However, within twenty-four (24) hours after receiving a verbal authorization, the Contractor shall submit a written estimate to the Parks and Maintenance Director, or his authorized agent, for approval.

C. The cost estimate for additional work shall consist of the following elements:

Base cost of labor plus fifteen percent (15%) for overhead and profit.

Actual cost of materials plus fifteen percent (15%) for overhead and profit (invoice from vendor shall be attached to each invoice turned in for payment).

City reserves the right to ask for payroll records. Materials may be provided by the City of Ontario.

D. Written authorization from the Parks and Maintenance Director, or his authorized agent, shall be by the issuance of a change order or signed bid. This change order or signed bid shall be considered an amendment to this Agreement and approved by the Parks and Maintenance Director, or his authorized agent, and Contractor.

E. All additional work shall commence on the agreed date and shall diligently proceed until completion. Contractor could use the labor force assigned to the contractual maintenance tasks to perform additional work if prior approval has been granted by the City representative.

F. Upon completion of the additional work, the Parks and Maintenance Director, or his authorized agent, shall be notified so that the work may be verified.

G. The Contractor shall submit an invoice for compensation with attached photocopies of original invoices for materials and a copy of signed bid. Compensation shall not exceed the written estimate. The Contractor's invoice shall be subject to audit and review by the City prior to payment.

H. The City of Ontario reserves the right to repair or contract with a third Party to perform such additional work (if bids are not received within 72 hours of official request and or if the proposed costs do not concur with contractor's labor rates and cost of materials)

10. CONTRACTOR LIABILITY

A. All damage to existing improvements located within areas and adjacent to areas under construction, which in the opinion of the Parks and Maintenance Director, or his authorized agent, are due to the Contractor's operation, shall be repaired or replaced at the Contractor's expense with exact (existing) materials and in an approved manner.

B. Such repairs or replacements shall be performed by the Contractor at no cost to the City and shall be accomplished as directed by the Parks and Maintenance Director or his/her authorized agent. Repairs shall be made immediately after damage or alteration occurs. Deductions shall be made from the Contractor's payments in the amount necessary to compensate the City for such repairs in the event such repair work is done by City forces, or another source.

C. Irrigation damage shall be repaired or replaced within the following time limits: Irrigation entities such as, but not limited to, (risers, heads, backflow device and cages, controllers, basket strainers, pressure regulators, irrigation wires and valves, valve boxes, irrigation pumps, ET gagues, rain buckets, antennas, flow sensors, and landscape lighting equipment) that are damaged during regular routine maintenance and become non- functional or non-efficient shall be replaced immediately. Mainline irrigation breaks shall be repaired within two (2) hours of being notified. All other irrigation repair and/or replacement shall be completed within 24 hours of being notified. (In the event that the mainline repairs require specialized parts and or materials, the contractor shall be responsible to request from the City additional time to complete the repair/s)

D. All damage to turf grass, groundcover, shrubs or trees, shall be repaired or replaced within three (3) working days of being notified. Damage to turf shall be repaired by replacement with the appropriate variety of bermudagrass sod or seeded with warm season seed and topper added. Damage to groundcover shall be repaired by replacement with the appropriate variety of plant material. Size and spacing shall be determined by the Parks and Maintenance Director, or his authorized agent. Damage to shrubs may be corrected by appropriate pruning; however, if in the opinion of the Parks and Maintenance Director, or his authorized agent, the damage is severe, the shrub (in its entirety) shall be removed and replaced with a similar variety and size.

E. Damage to trees shall be repaired in the following manner:

Minor damage, such as bark lost from mechanical equipment shall be remedied by a certified Arborist. If the damage results in the loss of the tree, or, if in the opinion of the Parks and Maintenance Director or his authorized agent, the damage is severe, the damaged tree shall be removed and replaced with a similar variety and size. All damage resulting from chemical application and/or operation, either by spray-drift, improper application, lateral leaching, or other means shall be corrected in accordance with the previous provisions and the soil conditioned to ensure its ability to support plant life. All work shall be inspected, verified, and completed to the satisfaction of the Parks and Maintenance Director, or his authorized agent.

11. INSPECTION/DRIVE

The City and an appointed representative of the Contractor shall conduct a once a month walkthrough to inspect each individual work area. It is the responsibility of the Contractor to set up the inspection time(s) five (5) working days prior to the walkthrough/inspection. It is a requirement that a six to twelve (6-12) month master calendar be set up within 30 days of the award of the contract to insure coordinated dates of inspection. This inspection is to ensure adequacy of maintenance, methods of performing the work are in compliance with the contract and allow all deficiencies to be corrected prior to invoice submission and payment. However, this shall not be construed to relieve the Contractor of the duty to provide continuous inspection of individual work areas. Discrepancies and deficiencies in the Contractor's work shall be brought to the attention of the Contractor and corrected in the manner prior to invoicing and payment.

12. HAZARDOUS CONDITIONS

It shall be the Contractor's responsibility to inspect, and identify, any condition(s) that renders any areas within this Agreement unsafe, as well as any unsafe practices occurring thereon. The Parks and Maintenance Director, or his authorized agent, shall be notified immediately using the myOntario App, as well as text or phone call, of any unsafe condition that requires major correction.

The Contractor shall be responsible for making minor corrections including, but not limited to, filling holes in landscaped areas, diverting water sheet flow, using barricades, danger tape or traffic cones to alert persons of the existence of hazards and replacing valve box covers so as to protect all persons from injury.

The Contractor shall inspect all work sites for hazards, or potential hazards in the contractual areas daily.

During the required inspection of all work sites for hazards, or potential hazards, the Contractor shall immediately contact the City representative (either e-mail or text) indicating the condition, date, and the area that was inspected and a work order should be created using the myOntario App.

The Contractor shall cooperate fully with the City of Ontario in the investigation of any accidental injury or death occurring on the premises, including the submission of a complete written report thereof to the Parks and Maintenance Director within three (3) days following the occurrence.

13. REMOVING OBSTRUCTION AND MAINTENANCE OF EXISTING IMPROVEMENTS

Where the work is to be constructed in, or adjacent to, areas which have been improved by lawns, trees, shrubs, or gardens, the Contractor shall remove such trees or plants as may be necessary for the prosecution of the work and give them proper care and attention until the work has been satisfactorily completed, after which the Contractor shall replace them in as nearly the original condition and location as is reasonably possible. Where it is necessary to deposit the excavated materials on lawns during the process of construction, the Contractor shall first lay burlap or canvas on the lawn to prevent contact between the excavated material and turf grass. Unless otherwise indicated in the contract documents, all utility lines, conduits, wires, or structures shall be maintained by the Contractor and shall not be disturbed, disconnected or damaged by them during the progress of the work, provided, that should the Contractor in the performance of the work disturb, disconnect, or damage any of the above, all expense, arising from such disturbance, or in the replacement or repair thereof, shall be borne by the Contractor. However, in accordance with Section 4215 of the California Government Code, the Contractor shall be compensated 1) for the cost of locating and repairing damage to main or trunk line utility facilities located on the job site, not due to the failure of the Contractor or exercise reasonable care; 2) for costs of removing or relocating such utility facilities not indicated in the contract documents with reasonable accuracy; and 3) for the operation cost for equipment on the project necessarily idled such work.

At least two (2) working days prior to commencing any excavation pursuant to this Contract, the Contractor shall contact Underground Service Alert at (800) 422-4133 or other appropriate regional notification center if the excavation will be conducted in an area which is known, or reasonably should be known, to contain subsurface installations.

14. CONTRACTOR STAFF

The contractor shall provide the manpower as a minimum staffing requirement to comply with the performance of the landscape/irrigation maintenance specifications and requirements of the site.

The Contractor shall furnish one (1) supervisor with a minimum of 5 years of landscape and irrigation maintenance experience and sufficient supervisory and working personnel capable of promptly accomplishing all tasks on schedule, to the satisfaction of the Parks and Maintenance Director, or his authorized agent, all work required under this contract during the prescribed hours (6:30 AM to 4:00 pm). **Staffing shall be as needed plus any additional workforce to complete the maintenance/construction tasks required on the frequency page.** Payment will be based upon completed, acceptable work, Irrigation technician and spray technician to be provided as needed (personnel needs do not address the alternates per bid forms). Incomplete or unacceptable work will result in a delay or reduction of billing payment.

The Contractor shall have a competent supervisor, who is capable of communicate effectively both in written and oral English and discuss matters pertaining to this contract. Supervisor must be able to demonstrate to the satisfaction of the Parks and Maintenance Director, or his authorized agent, that they possess an adequate technical background. Adequate and competent supervision shall be provided for all work done by the Contractor's employees to ensure accomplishment of high-quality work, which will be acceptable to the Parks and Maintenance Director or his authorized agent.

Any order or communication given to the supervisor shall be deemed as delivered to the Contractor. The contractor shall use the free myOntario App. The use of a Smart phone will be required.

The contractor shall provide the minimum staffing requirements to comply with the performance of the landscape maintenance specifications and requirements of the site. Personnel shall be on site ready to work no later than 6:30am.

The Contractor, and their employees, shall always conduct themselves in a proper and efficient manner and shall cause the least possible annoyance to the public. The Parks and Maintenance Director or his authorized agent, may require a Contractor to remove from the work site any employee(s) deemed careless, incompetent, or otherwise objectionable, whose continued employment on the job is considered to be contrary to the best interest of the City of Ontario.

The Contractor shall require each of his employees to wear basic public works working attire. These are basically proper shoes, and other gear required by State Safety Regulation, and proper wearing of the clothing. Shirts shall be worn and always buttoned; safety vests "Type II" are required when indicated by the Work Area Traffic Control Handbook, the Parks and Maintenance Director or his authorized agent.

The Contractor shall establish an identification system for personnel assigned to the maintenance/construction site, which clearly indicates to the public the name of the Contractor and individual responsible for the construction/maintenance work. The identification system shall be furnished at the Contractor's expense and may include appropriate attire and name badges.

Contractor shall be responsible for traffic control (where needed) and shall be done per "WATCH" standards. Failure to comply with proper "WATCH" standards shall result in stoppage of all work until the proper traffic control is set up and could result in a fine. 1st violation $500.00, 2nd. Violation $ 1000.00, 3rd. violation and thereafter $ 3000.00 and/or possible cancellation of contract.

Inclement Weather

During inclement weather, (rainstorms, windstorms etc.) the contractor shall be required to contact the City representative prior to 7:00 am to receive clear direction of their assignments for the day. A minimum of two staff members shall be at the disposition of the City.

15. LOCAL OFFICE

A. The Contractor shall maintain an office with a telephone and provide at all times the following:

A responsible person(s), employed by the Contractor, which shall have the ability to take necessary action regarding all inquiries and/or complaints received from the Parks and Maintenance Director, or his authorized agent. This person(s) shall be accessible twenty-four (24) hours per day and seven (7) days per week. An answering service shall be considered an acceptable substitute to full-time coverage, outside of prescribed working hours, provided the Contractor is notified of any communication within one (1) hour after receipt of said communication. The telephone number(s) of the Contractor or responsible person(s) of the Contractor shall be a toll-free number for the City of Ontario.

B. During normal working hours, the Contractor's supervisors, who are responsible for providing contractual services, shall be available for notification through a landline or cellular telephone communication. This will allow the city to access the contractor at any time during City working hours.

16. STORAGE FACILITIES

The City of Ontario will not be providing storage facilities throughout the duration of this contract.

A. SIGNS

Contractor shall not post signs or advertising matter upon the areas under maintenance or improvements thereon, unless prior written approval is obtained from the Parks and Maintenance Director, or his authorized agent.

Contractor shall, always, remove all unauthorized signs and advertising matter such as, but not limited to, garage sale signs, yard sale signs, campaign signs and personal business signs in the area under maintenance.

17. LOCK AND KEYS

A. Where City of Ontario locks and keys are required as part of this contract, the Contractor shall:

Not duplicate any coded City key furnished by the city.

Surrender all keys furnished by the Parks and Maintenance Director or his authorized agent promptly at the end of the contract period, or at any time-deemed necessary by the Parks and Maintenance Director, or his authorized agent, to prevent loss to the City of Ontario.

Protect the security of City property by keeping controller cabinets and enclosure doors always locked.

Contact the City immediately if a security lock is non-functional and needs repair. Refrain from using premises behind locked doors for storage of materials, supplies or tools except as approved by the Parks and Maintenance Director or his authorized agent. In the event that the contractor staff who has been assigned keys to the facilities resigns from his position, it is the

sole responsibility of the contractor to retrieve the keys assigned to such staff member and return to the City.

18. UTILITIES

The City of Ontario shall pay for the maintenance related to water and electrical utilities.

When needed, water usage shall not exceed the budgeted amount to comply with the City Water Conservation efforts. A water budget may be provided by the City and shall be reviewed and adhered to by the Contractor. Water budget shall be approved by the Parks and Maintenance Director, or his authorized agent.

The Contractor may be charged for all excessive utility usage (using the current utility rate) due to the contractor's failure to manage and or monitor irrigation system malfunctions or unauthorized increases in water usage. The excess cost will be determined by comparing the current utility usage with historical usage data for the same period.

The excess cost factor shall be deducted from payments to the Contractor. However, the Contractor will be allowed three (3) working days, upon receiving notice, to explain in written documentation the cause of the increase in utility usage in question. A final determination (after review of Contractor's explanation) of the deduction will be assessed by the Parks and Maintenance Director or his authorized agent.

19. NON-INTERFERENCE

The Contractor shall not interfere with the public use of the premises and shall conduct their operations so as to offer the least possible obstruction and inconvenience to the public, nor disrupt the peace and quiet of the area within which the services are performed.

20. PARKING

A. The Contractor shall park their vehicles and equipment within designated parking areas or in such a location to ensure normal vehicular traffic.

B. The Contractor's vehicles and equipment shall not be parked or set in such a manner that they block pedestrian access or vehicular right-of-way except as required to comply with all safety standards of OSHA or CAL-OSHA. Failure to perform proper traffic control will result in a formal warning (first time), deduction of $500.00 per instance after formal warning has been given and contractor fails to comply.

21. EMERGENCY CALLS

A. The Contractor shall have the capability to receive and respond immediately to calls of an emergency nature during normal working hours and outside of normal working hours. Calls of an emergency nature received by the Parks and Maintenance Director or his authorized agent, shall be referred to the worksite Contractor for immediate disposition. If the work site Contractor cannot be reached within two (2) hours, the City will deduct from the monthly billing the cost of City forces, or other sources, used to repair the emergency. The Contractor shall not receive additional compensation for responding to emergencies for work included in these general conditions at contract work sites.

22. EXTRAORDINARY SERVICES

A. The Contractor shall be responsible for providing extraordinary maintenance and/or repairs to existing landscape and new landscape areas outside of their contract areas. Extraordinary services shall be defined as work not included in these general conditions or work required at a site for which there is no contract. Extraordinary maintenance shall include answering emergency calls as required. Contractors shall respond to an emergency call within two (2) hours. Contractors shall maintain a 24 hours per day, seven days per week, on-call service for emergency calls. The Contractor shall notify the Parks and Maintenance Director, or his authorized agent, by telephone within 24 hours of any emergency extraordinary work that is performed. Non-emergency extraordinary work requires written approval before the work is performed. Submission of an EWA and approval by the Parks and Maintenance Director, or his authorized agent will be necessary. The Contractor shall be compensated for extraordinary work as defined in Section 9.

B. In situations involving emergency repair work after normal work hours, Contractors shall dispatch qualified personnel and equipment to reach the site within two (2) hours. The Contractor's vehicle shall carry sufficient equipment to effect safe control of traffic. When the work site Contractor arrives at the site, the Contractor shall set up traffic warning and control devices, if deemed necessary and proceed to repair on a temporary/permanent basis.

C. If a City Representative is still at the site when the work site contractor arrives, the Contractor shall quickly evaluate the situation and discuss it with the City Representative. If the repair will take only a few minutes, the City Representative may stay to continue to direct traffic while the Contractor makes the repairs. If the repair will take longer than the City Representative

can wait, the Contractor shall immediately set up temporary traffic control devices and all other necessary warning devices and relieve the City Representative.

D. An emergency may be called by the following individuals or agencies at anytime for extraordinary services involving repair work:

1. City Manager
2. Police Department
3. Fire Department
4. Parks and Maintenance Director

E. The following emergency phone numbers are listed for the convenience of the Contractors:

Fire Department (Dispatch)	(909) 983-5911
Fire Department (Emergency)	911
Police Department (Dispatch)	(909) 986-6711
Police Department (Emergency)	911
Southern California Edison	(800) 655-4555
Southern California Gas	(800) 427-2200
Dig Alert	(800) 422-4133

23. REPORTING DAMAGE OR MALFUNCTION

Any damage to, or malfunction of, any facility not specifically stated in this Agreement shall be promptly reported to the Parks and Maintenance Director, or his authorized agent.

24. COMPENSATION FOR ROUTINE MAINTENANCE

The City shall compensate Contractors based upon the total dollar amount of a bid or the total dollar amount of a combination of bids, if applicable, in monthly installments beginning 30 days after the commencement of work. Billing adjustments may be made where authorized by this Agreement.

25. ADDITION OR DELETION OF LANDSCAPE AREAS

The Contractors shall maintain, at a unit price comparable to other existing landscape areas and subject to the Parks and Maintenance Director approval or his authorized agent's approval, additional landscape areas that the city adds to this contract. If notification is made of a new installation other than at the beginning of a monthly period, the unit cost negotiated and agreed upon by the parties, shall be prorated from the day the Contractor is notified to start maintenance. The City may elect to delete work sites, or portions thereof, within this Agreement at a unit price comparable to the bid price of said work sites.

26. DISCREPANCIES OR OMISSIONS

Should a bidder find discrepancies or omissions in the specifications or other documents, or be in doubt as to their true meaning, he may request a written interpretation from the Parks and Maintenance Director, or his authorized agent. Any interpretation, or change in the proposed documents, will be made only by addendum issued to each person to whom bid forms have been issued and shall become a part of the bid.

27. MINOR MODIFICATION

The Parks and Maintenance Director, or his authorized agent, may modify these specifications with the joint approval of the Contractor.

28. CONTRACTOR NON-COMPLIANCE

If the Parks and Maintenance Director, or his authorized agent, determines that there are deficiencies in the performance of this Agreement, the Parks and Maintenance Director, or his authorized agent, will provide a written inspection notice to the Contractor stating the deficiencies and specifying a time frame to correct the specified deficiencies. This time frame shall be reasonable, as determined by the Parks and Maintenance Director, or his authorized agent, to correct the specified deficiencies but not to exceed five 5 working days from the day of the inspection punch list. If the site(s) show obvious signs of non-performance, the Parks and Maintenance Director, or his authorized agent shall have the ability to immediately enforce partial or full deduction for the site in question. Should the Contractor fail to correct all deficiencies within the stated time frame, the Parks and Maintenance Director, or his authorized agent, may exercise the following measures:

A. Deduct from the Contractor's payment the amount necessary to correct the deficiency, including City overhead and impose a deficiency deduction.

B. Withhold the entire or partial payment.

C. Utilize City forces, or an alternate source, to correct the deficiency and deduct from the Contractor's payment the total cost, including City overhead. The Parks and Maintenance Director, or his authorized agent, shall decide all questions which arise as to the manner of performance and completion per schedule, acceptable fulfillment of the contract by the Contractor, interpretation of the specifications, and compensation to include completion of work by alternate sources. In addition to the provisions of Section 3.3, Contract Documents and Section 28 (B), in event of a failure to correct a deficiency, or for any other breach of this Agreement by the Contractor, the City of Ontario may immediately terminate this Agreement. If the contractor requires extra time to complete the deficiency list due to materials/parts shortage, the contractor shall request in writing only the time needed to be added and the reasons why. The City representative will review the request and shall respond to the contractor in writing of the decision made. Contractor shall present the request for extension within the first five (5) working days of the deficiency list.

29. PAYMENTS WITHHELD

The city may withhold entire or partial payment for reasons as follows:

A. Work required in the specifications, which is defective, incomplete, or not performed. Claims filed or reasonable evidence indicating probable filing of claims.
B. Failure of the Contractor to make payments properly to subcontractors, or for materials and/or labor. A reasonable doubt that the contract cannot be completed for the remaining balance.
C. Reports, logs, or other contractual written documentation required of the Contractor to be delivered to the Parks and Maintenance Director, or his authorized agent, which is/are incomplete or not performed.

30. WITHHELD CONTRACT FUNDS

The Contractors may, at his sole cost and expense, substitute securities equivalent to any monies withheld by the City to insure performance under the contract. Such securities shall be deposited with the City or with a State or Federally Chartered Bank as escrow agent who shall pay such monies to the Contractors upon satisfactory completion of the contract. The Contractor

shall be the beneficial owner of any securities substituted for monies withheld and shall receive any interest thereon. Securities eligible for investment under this section shall include those listed in Public Contract Code Section 22300. One definition of just cause for immediate contract termination is, if in the opinion of the Parks and Maintenance Director, or his authorized agent, the contract cannot or will not be completed by the Contractor in its entirety. In the event of such termination, the bonds required shall remain in effect for six (6) months after the date of termination to provide surety that any remedial work required at the time of termination will be completed.

If the Contractor fails to meet the specifications of this contract for any fifteen (15) consecutive or non-consecutive days, the Parks and Maintenance Director, or his authorized agent, may at his option terminate the balance of this contract by written notice of termination to the Contractor. Notice of such termination shall take effect three (3) days after such notice is mailed.

31. COMPLAINTS FROM CITY

The Contractor shall maintain an on-the-job a written log of all complaints which includes the date and time received and the action taken or the reason for non-action. The on-the-job log of complaints shall be available upon request from the City Representative. All complaints shall be abated as soon as possible after notification; but in all cases within 24 hours, to the satisfaction of the Parks and Maintenance Director, or his authorized agent. If any complaint is not abated within 24 hours, the Parks and Maintenance Director, or his authorized agent, shall be notified immediately of the reason for not abating the complaint, followed by a written report to the Parks and Maintenance Director or his authorized agent, within four (4) City working days.

If the complaints are not abated within the time specified, or to the satisfaction of the Parks and Maintenance Director or his authorized agent, the Parks and Maintenance Director, or his authorized agent, may correct the specific complaint and the total cost incurred by the City of Ontario shall be deducted and forfeited from the payments owing to the Contractor from the City of Ontario.

32. CONTRACTOR IS AN INDEPENDENT CONTRACTOR, INDEMNIFICATION

Contractor shall act under the contract as an Independent Contractor thorough the City of Ontario and will not be an agent, or employee of the City. Contractor shall not represent or otherwise hold out itself, or any of its subcontractors, directors, officers, partners, employees, or

agents, to be an agent or employee of the City. Contractors shall indemnify and otherwise hold harmless the City, its officials, officers, directors, employees, agents and other representatives, from all liability, loss, or damage, including reasonable attorney's fees and other costs of defense resulting from damage or injury to persons or property caused, or claimed to have been caused, by acts or omissions of the Contractor, or of any of its subcontractors, directors, officers, partners, employees, or agents in the course of, or in connection with the Contractor's performance under the contract. The Parties agree to cooperate fully in the resolution of any claims for such liability, loss, or damage.

33. SUBCONTRACTOR/ASSIGNMENT OF CONTRACT

Reference is hereby made to the provisions of The Subletting and Subcontracting Fair Practices Act (Government Code Sections 4100, et. seq.), which are incorporated herein and made a part hereof by this reference.

A copy of each subcontract, if in writing, or if not in writing, then a written statement signed by the Contractor, giving the name of the subcontractor, and the terms and conditions of such subcontract, shall be filed with the City before the subcontractor begins work. Each subcontract shall contain a reference to this agreement between the City and the Contractor, and the terms of that agreement between the City and the Contractor and all parts thereof shall be made a part of such subcontract insofar as applicable to the work covered thereby. Each subcontractor shall provide for its annulment by the Contractor at the order of the City, if, in the City's opinion, the subcontractor fails to comply with the requirements of the principal contract insofar as the same may be applicable to his work. Nothing herein contained shall create any contractual relation between any subcontractor and the City or relieve the Contractor of any liability or obligation hereunder.

Contractor shall not assign, transfer, convey or otherwise dispose of this contract, or of his rights of interests in or to the same or any part hereof, without the previous consent in writing of the Parks and Maintenance Director, or his authorized agent. If the Contractor, without such previous written consent assigns, transfers, conveys, or otherwise disposes of the contract, or of his rights or interests therein, the contract may, at the option of the City, be terminated and revoked, and the City shall there upon be relieved and discharged from all liability and obligations arising out of the same to the Contractor, and to his assignee or transferee. No right under the contract, nor any right to any money to become due hereunder, shall be asserted against the City in law or equity by reason of any so-called assignment of the contract, or any

part thereof unless authorized by the written consent of the Parks and Maintenance Director, or his authorized agent.

34. COMPLIANCE WITH THE LAW

Contractor agrees that their performance under this contract shall comply with all applicable laws of the United States of America, the State of California, the county of San Bernardino, the City of Ontario and any other political entity having jurisdiction over the activities of the Contractors. The Contractor State License Board for the State of California has administratively determined in writing that a C-27 Contractor License is required to provide the service as set forth in the contract and specifications. Therefore, each bidder will be required to hold a valid C-27 Contractor License.

35. PAYROLL

Section 1776, Chapter 1 of Division 2, from the California Labor Code requires that each Contractor and Subcontractor keep an accurate payroll record, showing the name, address, social security number, work classification, straight time and overtime hours worked each day and each week, and the actual per diem wages paid each journeyman, apprentice or worker employed by him.

The employee's own payroll records shall be available for inspection, and a copy shall be made available to the employee or his authorized representative, the Division of Labor Standards Enforcement and the Division of Apprenticeship Standard.

Pursuant to Labor Code Section 1778.8, the Contractor agrees to pay travel and subsistence payments to each workman needed to execute the work in accordance with the applicable collective bargaining agreements filed with the Department of Industrial Relations.

36. LABOR STRIKE

It shall be the responsibility of each contractor to provide continuous contractual services, without any interruption.
In case of any labor strikes, the Contractor shall provide other means, as its own cost, to provide a comparable continuous contractual service as if there were no strike.
Failing to do so will cause the Parks and Maintenance Director, or his authorized agent, to take whatever action is deemed necessary to provide such service and the cost will be borne by the Contractor.

37. DEBRIS DISPOSAL

Blowing and disposing of any debris into the Storm Drain system and/or streets shall not be permitted. If found, Contractor will face liquidating damages as follows; 1st violation $ 500.00, 2nd. violation $1000.00, 3rd. violation and thereafter $3000.00 and/or possible cancellation of contracts.

38. TREE CARE

A. Tree Trimming

The Contractor shall be responsible for all tree under-trimmings, including the removal of palm fronds and flower stalks (if present). All trees are to be under-trimmed to ensure public and vehicle safety or as directed by the Parks and Maintenance Director, or his authorized agent. Contractor shall have a Certified Arborist on staff to meet the following criteria:

Contractor shall prune palm trees at no extra cost to the City (dead fronds and flower stalks) annually, removal of fruit (dates) if present shall be done twice per year as designated by the Parks and Maintenance Director or his authorized agent.

All trees in the work site shall be maintained in their natural shapes. This work shall be accomplished in a manner which will ensure that each individual tree is under-trimmed carefully to promote the tree's health and appearance.

All work shall be of the highest quality and performed in accordance with City approved tree trimming standards.

All trees shall be continually maintained free of all dead, diseased and damaged branches back to the point of breaking. In cases where the dead, diseased or damaged branches are beyond the reach of a tree pruning pole saw being operated from ground level, the Contractor is to notify the City within 24 hours. Cuts must be made flush with the collar to promote proper healing. Pruning tools shall be adequately sharpened to provide clean cuts and shall be properly sterilized to reduce spread of disease.

All sucker growth is to be removed from trees as it occurs.

The Contractor shall maintain all branches which encroach on or over sidewalks at a minimum height of ten feet (10') clearance. The Contractor shall notify the city within 24 hours of any

branches encroaching beyond the curb line into the street that cannot be reached with a pole saw.

All branches which encroach over private property, shall be removed as directed.

The Contractor shall not remove or disturb any tree central leader without prior written approval from the Parks and Maintenance Director, or his authorized agent.

39. WEED CONTROL

Weeds are defined in the dictionary as:
“A wild plant growing where it is not wanted and in competition with cultivated plants."
When classified by their gross morphological features, weeds are broken down into three major categories: grasses, sedges, and broadleaf weeds.
Full control of these 3 categories of weeds will be achieved with a combination of selective and non-selective herbicides as well as mechanical removal. **Weeds should not be visible.**
All areas within the specified maintenance area, including but not limited to, turf grass, shrub and ground cover areas, planters, tree wells, landscape areas, and softball/baseball infields shall be kept free of weeds at all times. At no time shall any weed be over 4” tall.

Weed removal shall consist of complete removal of all weeds, including top growth and roots.
Weed control shall be performed as needed.
Weeds shall be controlled either by hand, mechanical or chemical methods; however, the Parks and Maintenance Director, or his authorized agent, may restrict the use of chemical weed control in certain areas.

40. USE OF CHEMICALS

The Contractor shall submit a list of all chemical herbicides, pesticides, and rodenticides proposed for use under this contract for approval by the Parks and Maintenance Director or his authorized agent with the signed contract. Materials included on this list shall be limited to chemicals approved by the State of California Department of Food and Agriculture, and shall include the exact brand name and generic formulation. The use of any chemical on the list shall be based on the recommendations of a California State Licensed Pest Control Advisor where required by law.

The use of chemicals shall conform to the current San Bernardino County Agriculture Commissioner regulations. No chemical herbicide, rodenticide or pesticide shall be applied until

its use is approved, in writing, by the Parks and Maintenance Director, or his authorized agent as appropriate for the purpose and area proposed.

Required spray equipment will consist of at least one (1) medium spray rig of 100-gallon (minimum) capacity or more and backpack sprayers provided for each crew performing chemical landscape maintenance.

41. LITTER

All areas in the work sites shall be kept free of, but not limited to, the following items: bottles, glass, broken glass, cans, paper, cardboard, metallic items, feces, leaves, tumbleweeds and other debris on a daily basis.

The Contractor shall promptly remove from the work area, all debris generated by their performance and dispose of the debris in a legal manner. The City does not allow any dumping of debris generated by your daily work in City facilities. Illegal dumping picked up by contractors shall be brought up to the City yard for proper disposal. Excessive dumping (above and beyond reasonable) after long holiday weekends and special events shall be reported immediately to the City Representative.

Hazardous waste as well as homeless belongings shall not be picked up. Contractor shall contact City Representative to arrange proper disposal by City forces. A myOntario App service request shall be created to report the hazardous conditions.

42. GENERAL

A. Trash Removal

Remove all trash and accumulated debris from the work sites daily. In addition, any type of feces is also to be removed from the walkways, turf or ground cover areas and dumpster areas.

B. Policing of Areas

All maintained areas shall be policed based on frequencies.

C. Curb and Gutter Maintenance

The Contractor is responsible for removal of all weeds and grass growing in and around the curb and gutter area monthly. The Contractor is responsible for insuring the roadway is cleared

of all dirt and debris within four (4) feet of the curb and gutter in all areas adjacent to maintenance responsibilities.

D. Walkway Maintenance

Walkways shall be cleaned immediately following mowing and edging and cleaned by use of power sweeping or blower equipment. All walkway cracks and expansion joints shall be maintained weed and grass free at all times.

E. Drain Maintenance

All drains and catch basins shall be kept free of siltation and debris at all times. All V-ditches and drainage areas shall be kept clean and edged weekly by the Contractor. Cleaning of drain basins shall be done monthly, Contractor shall inspect weekly to make sure that grates are secured, if missing, Contractor shall replace at City's expense. Damaged grates due to Contractor's operations shall be replaced at Contractors expense.

F. Removal of Leaves

Accumulation of leaves shall be removed from all designated landscape areas on a monthly basis and under trees once per month or more as needed.

G. Hardscape Power Wash

All concrete areas shall be cleaned using a power washer (hot steam cleaning washer) to remove soda spills, gum and other stains that might be present. The City Representative will make the final determination if the service is needed.

The use of a biodegradable cleaner (soap) is required and permitted. Containment of contaminated soapy water shall be the responsibility of the Contractor.

43. REPAIR AND SERVICE OF WALKWAYS AND MISCELLANEOUS IMPROVEMENTS

Walkways and Service Roads - All walkways and service roads, if any, shall be maintained by the Contractor so as to keep the integrity of the walking or driving surface in a safe, unimpaired condition.

The Contractor will not be responsible for total replacement of roadways or walkways as a result of normal deterioration but will be required to replace all improvements damaged by his negligence.

It will be the responsibility of the Contractor to repair or replace miscellaneous improvements such as signs and mowing strips, or any other structural improvements within the work sites, unless otherwise specified. The Contractor shall be entitled to additional compensation for these services as stated. The contractor shall communicate any improvements needed prior to repairs to the Parks and Maintenance Director or his authorized agent for proper approvals.

44. CITY OF ONTARIO myOntario App (FREE)

Contractor shall download the free myOntario App for the purpose of tracking completed specialty tasks (mulching, vandalism, vehicular damage, rose trimming, fertilizations, chemical applications, illegal dumping, hazardous waste, pruning shrubs, downed branches and rodent control, restroom issues). All specialty tasks shall be recorded as a service request using the app order system and shall be reported to the city representative when completed. City staff will close the service request.

NOTICES

Any notice, demand, request, consent, approval, or communication that either Party desires, or is required to give to the other Party or any other person, shall be in writing and either served personally, sent by prepaid, first-class mail, or by email followed by mailing of said notice.

PERFORMANCE/PAYMENT BONDS ON THE NEXT PAGE

PERFORMANCE BOND

KNOW ALL PERSONS BY THESE PRESENTS:

THAT WHEREAS, the City of Ontario (hereinafter referred to as "City") has awarded to _____, (hereinafter referred to as the "Contractor") _____ an agreement for _____ (hereinafter referred to as the "Project").

WHEREAS, the work to be performed by the Contractor is more particularly set forth in the Contract Documents for the Project dated _____, (hereinafter referred to as "Contract Documents"), the terms and conditions of which are expressly incorporated herein by reference; and

WHEREAS, the Contractor is required by said Contract Documents to perform the terms thereof and to furnish a bond for the faithful performance of said Contract Documents.

NOW, THEREFORE, we, _____, the undersigned Contractor and _____ as Surety, a corporation organized and duly authorized to transact business under the laws of the State of California, are held and firmly bound unto the City in the sum of _____ DOLLARS, ($_____), said sum being not less than one hundred percent (100%) of the total amount of the Contract, for which amount well and truly to be made, we bind ourselves, our heirs, executors and administrators, successors and assigns, jointly and severally, firmly by these presents.

THE CONDITION OF THIS OBLIGATION IS SUCH, that, if the Contractor, his or its heirs, executors, administrators, successors or assigns, shall in all things stand to and abide by, and well and truly keep and perform the covenants, conditions and agreements in the Contract Documents and any alteration thereof made as therein provided, on its part, to be kept and performed at the time and in the manner therein specified, and in all respects according to their intent and meaning; and shall faithfully fulfill all obligations including the one-year guarantee of all materials and workmanship; and shall indemnify and save harmless the City, its officers and agents, as stipulated in said Contract Documents, then this obligation shall become null and void; otherwise it shall be and remain in full force and effect.

As a condition precedent to the satisfactory completion of the Contract Documents, unless otherwise provided for in the Contract Documents, the above obligation shall hold good for a period of one (1) year after the acceptance of the work by City, during which time if Contractor shall fail to make full, complete, and satisfactory repair and replacements and totally protect the City from loss or damage resulting from or caused by defective materials or faulty workmanship, Surety shall undertake and faithfully fulfill all such obligations. The obligations of Surety hereunder shall continue so long as any obligation of Contractor remains. Nothing herein shall limit the City's rights or the Contractor or Surety's obligations under the Contract, law or equity, including, but not limited to, California Code of Civil Procedure section 337.15.

Whenever Contractor shall be, and is declared by the City to be, in default under the Contract Documents, the Surety shall remedy the default pursuant to the Contract Documents, or shall promptly, at the City's option:

(1) Take over and complete the Project in accordance with all terms and conditions in the Contract Documents; or

(2) Obtain a bid or bids for completing the Project in accordance with all terms and conditions in the Contract Documents and upon determination by Surety of the lowest responsive and responsible bidder, arrange for a Contract between such bidder, the Surety and the City, and make available as work progresses sufficient funds to pay the cost of completion of the Project, less the balance of the contract price, including other costs and damages for which Surety may be liable. The term "balance of the contract price" as used in this paragraph shall mean the total amount payable to Contractor by the City under the Contract and any modification thereto, less any amount previously paid by the City to the Contractor and any other set offs pursuant to the Contract Documents.

(3) Permit the City to complete the Project in any manner consistent with local, California and federal law and make available as work progresses sufficient funds to pay the cost of completion of the Project, less the balance of the contract price, including other costs and damages for which Surety may be liable. The term "balance of the contract price" as used in this paragraph shall mean the total amount payable to Contractor by the City under the Contract and any modification thereto, less any amount previously paid by the City to the Contractor and any other set offs pursuant to the Contract Documents.

Surety expressly agrees that the City may reject any contractor or subcontractor which may be proposed by Surety in fulfillment of its obligations in the event of default by the Contractor.

Surety shall not utilize Contractor in completing the Project nor shall Surety accept a bid from Contractor for completion of the Project if the City, when declaring the Contractor in default, notifies Surety of the City's objection to Contractor's further participation in the completion of the Project.

The Surety, for value received, hereby stipulates and agrees that no change, extension of time, alteration or addition to the terms of the Contract Documents or to the Project to be performed thereunder shall in any way affect its obligations on this bond, and it does hereby waive notice of any such change, extension of time, alteration or addition to the terms of the Contract Documents or to the Project, including but not limited to the provisions of sections 2819 and 2845 of the California Civil Code.

PAYMENT BOND

KNOW ALL MEN BY THESE PRESENTS That

WHEREAS, the City of Ontario (hereinafter designated as the "City"), has awarded to _____ hereinafter designated as the "Principal," a contract for the work described as follows:

_____ (the "Project"); and

WHEREAS, the work to be performed by the Principal is more particularly set forth in the Contract Documents for the Project dated _____ ("Contract Documents"), the terms and conditions of which are expressly incorporated by reference; and

WHEREAS, said Principal is required to furnish a bond in connection with said contract; providing that if said Principal or any of its Subcontractors shall fail to pay for any materials, provisions, provender, equipment, or other supplies used in, upon, for or about the performance of the work contracted to be done, or for any work or labor done thereon of any kind, or for amounts due under the Unemployment Insurance Code or for any amounts required to be deducted, withheld, and paid over to the Employment Development Department from the wages of employees of said Principal and its Subcontractors with respect to such work or labor the Surety on this bond will pay for the same to the extent hereinafter set forth.

NOW THEREFORE, we, the Principal and _____ as Surety, are held and firmly bound unto the City in the penal sum of _____ _____ Dollars ($_____) lawful money of the United States of America, for the payment of which sum well and truly to be made, we bind ourselves, our heirs, executors, administrators, successors and assigns, jointly and severally, firmly by these presents.

THE CONDITION OF THIS OBLIGATION IS SUCH that if said Principal, his or its subcontractors, heirs, executors, administrators, successors or assigns, shall fail to pay any of the persons named in Section 9100 of the Civil Code, fail to pay for any materials, provisions or other supplies, used in, upon, for or about the performance of the work contracted to be done, or for any work or labor thereon of any kind, or amounts due under the Unemployment Insurance Code with respect to work or labor performed under the contract, or for any amounts required to be deducted, withheld, and paid over to the Employment Development Department or Franchise Tax Board from the wages of employees of the contractor and his subcontractors pursuant to Section 18663 of the Revenue and Taxation Code, with respect to such work and labor the Surety or Sureties will pay for the same, in an amount not exceeding the sum herein above specified.

This bond shall inure to the benefit of any of the persons named in Section 9100 of the Civil Code so as to give a right of action to such persons or their assigns in any suit brought upon this bond.

It is further stipulated and agreed that the Surety on this bond shall not be exonerated or released from the obligation of this bond by any change, extension of time for performance, addition, alteration or modification in, to, or of any contract, plans, specifications, or agreement pertaining or relating to any scheme or work of improvement herein above described, or pertaining or relating to the furnishing of labor, materials, or equipment therefore, nor by any change or modification of any terms of payment or extension of the time for any payment pertaining or relating to any scheme or work of improvement herein above described, nor by any rescission or

attempted rescission of the contract, agreement or bond, nor by any conditions precedent or subsequent in the bond attempting to limit the right of recovery of claimants otherwise entitled to recover under any such contract or agreement or under the bond, nor by any fraud practiced by any person other than the claimant seeking to recover on the bond and that this bond be construed most strongly against the Surety and in favor of all persons for whose benefit such bond is given, and under no circumstances shall Surety be released from liability to those for whose benefit such bond has been given, by reason of any breach of contract between the owner or City and original contractor or on the part of any obligee named in such bond, but the sole conditions of recovery shall be that claimant is a person described in Section 9100 of the Civil Code, and has not been paid the full amount of his claim and that Surety does hereby waive notice of any such change, extension of time, addition, alteration or modification herein mentioned and the provisions of sections 2819 and 2845 of the California Civil Code.

CITY OF ONTARIO
MAINTENANCE SERVICES AGREEMENT

1. PARTIES AND DATE.

This Agreement is made and entered as of _____, by and between the City of Ontario, a municipal corporation organized under the laws of the State of California with its principal place of business at 303 East "B" Street, Ontario, California 91764-4196, County of San Bernardino, State of California ("City") and **Merchants Landscape Services, Inc.,** a **Corporation** with its principal place of business at **1510 S. Lyon St., Santa Ana, CA 92705 ("Contractor").** City and Consultant are sometimes individually referred to herein as "Party" and collectively as "Parties."

2. RECITALS.

2.1 Contractor.

Contractor desires to perform and assume responsibility for the provision of certain maintenance services required by the City on the terms and conditions set forth in this Agreement. Contractor represents that it is experienced in providing **Landscape Maintenance Services for Quiet Home Weed Abatement** services to public clients, that it and its employees or subcontractors have all necessary licenses and permits to perform the Services in the State of California, and that is familiar with the plans of City.

2.2 Project.

City desires to engage Contractor to render such services for the **Landscape Maintenance Services for Quiet Home Weed Abatement PM 2425-17** project ("Project") as set forth in this Agreement.

3. TERMS.

3.1 Scope of Services and Term.

3.1.1 General Scope of Services. Contractor promises and agrees to furnish to the City all labor, materials, tools, equipment, services, and incidental and customary work necessary to fully and adequately supply the maintenance services necessary for the Project ("Services"). The Services are more particularly described in Exhibit "A" attached hereto and incorporated herein by reference. All Services shall be subject to, and performed in accordance with, this Agreement, the exhibits attached hereto and incorporated herein by reference, and all applicable local, state and federal laws, rules and regulations.

3.1.2 Term. The term of this Agreement shall be from **September 1, 2024** to **June 30, 2027** unless earlier terminated as provided herein. The City shall have the unilateral option, at its sole discretion, to renew this Agreement automatically for no more than two (2) additional one-year terms. Contractor shall complete the Services within the term of this Agreement, and shall meet any other established schedules and deadlines. The Parties may, by mutual, written consent, extend the term of this Agreement if necessary to complete the Services.

3.2 Compensation.

3.2.1 Compensation. Contractor shall receive compensation, including authorized reimbursements, for all Services rendered under this Agreement at the rates set forth in Exhibit "C" attached hereto and incorporated herein by reference. The total compensation shall not exceed **Three Hundred Eighty-Seven Thousand Dollars with Zero Cents ($387,000)** without written approval of City's **City Manager**. Extra Work may be authorized, as described below, and if authorized, will be compensated at the rates and manner set forth in this Agreement.

3.2.2 Payment of Compensation. Contractor shall submit to City a monthly itemized statement which indicates work completed and hours of Services rendered by Contractor. The statement shall describe the amount of Services and supplies provided since the initial commencement date, or since the start of the subsequent billing periods, as appropriate, through the date of the statement. City shall, within 45 days of receiving such statement, review the statement and pay all approved charges thereon.

3.2.3 Deductions. City may deduct or withhold, as applicable, from each progress payment an amount necessary to protect City from loss because of: (1) stop payment notices as allowed by state law; (2) unsatisfactory prosecution of the Services by Contractor; (3) sums representing expenses, losses, or damages as determined by the City, incurred by the City for which Contractor is liable under the Agreement; and (4) any other sums which the City is entitled to recover from Contractor under the terms of the Agreement or pursuant to state law, including Section 1727 of the California Labor Code. The failure by the City to deduct any of these sums from a progress payment shall not constitute a waiver of the City's right to such sums.

3.2.4 Reimbursement for Expenses. Contractor shall not be reimbursed for any expenses unless authorized in writing by City.

3.2.5 Extra Work. At any time during the term of this Agreement, City may request that Contractor perform Extra Work. As used herein, "Extra Work" means any work which is determined by City to be necessary for the proper completion of the Project, but which the parties did not reasonably anticipate would be necessary at the execution of this Agreement. Contractor shall not perform, nor be compensated for, Extra Work without written authorization from City's Representative.

3.3 Responsibilities of Contractor.

3.3.1 Control and Payment of Subordinates; Independent Contractor. The Services shall be performed by Contractor or under its supervision. Contractor will determine the means, methods and details of performing the Services subject to the requirements of this Agreement. City retains Contractor on an independent contractor basis and not as an employee. Contractor retains the right to perform similar or different services for others during the term of this Agreement. Any additional personnel performing the Services under this Agreement on behalf of Contractor shall also not be employees of City and shall at all times be under Contractor's exclusive direction and control. Contractor shall pay all wages, salaries, and other

amounts due such personnel in connection with their performance of Services under this Agreement and as required by law. Contractor shall be responsible for all reports and obligations respecting such additional personnel, including, but not limited to: social security taxes, income tax withholding, unemployment insurance, disability insurance, and workers' compensation insurance.

3.3.2 Schedule of Services. Contractor shall perform the Services expeditiously, within the term of this Agreement, and in accordance with the Schedule of Services set forth in Exhibit "B" attached hereto and incorporated herein by reference. Contractor represents that it has the professional and technical personnel required to perform the Services in conformance with such conditions. In order to facilitate Contractor's conformance with the Schedule, City shall respond to Contractor's submittals in a timely manner. Upon request of City, Contractor shall provide a more detailed schedule of anticipated performance to meet the Schedule of Services.

3.3.3 Conformance to Applicable Requirements. All work prepared by Contractor shall be subject to the approval of City.

3.3.4 City's Representative. The City hereby designates **Philip Marino, Urban Forestry Manager**, or his or her designee, to act as its representative for the performance of this Agreement ("City's Representative"). City's Representative shall have the power to act on behalf of the City for all purposes under this Agreement except for increasing compensation. Contractor shall not accept direction or orders from any person other than the City's Representative or his or her designee.

3.3.5 Contractor's Representative. Contractor hereby designates **Mark Brower, President**, or his or her designee, to act as its representative for the performance of this Agreement ("Contractor's Representative"). Contractor's Representative shall have full authority to represent and act on behalf of the Contractor for all purposes under this Agreement. The Contractor's Representative shall supervise and direct the Services, using his best skill and attention, and shall be responsible for all means, methods, techniques, sequences and procedures and for the satisfactory coordination of all portions of the Services under this Agreement.

3.3.6 Coordination of Services. Contractor agrees to work closely with City staff in the performance of Services and shall be available to City's staff, consultants and other staff at all reasonable times.

3.3.7 Standard of Care; Performance of Employees. Contractor shall perform all Services under this Agreement in a skillful and competent manner, consistent with the standards generally recognized as being employed by professionals in the same discipline in the State of California. Contractor represents and maintains that it is skilled in the professional calling necessary to perform the Services. Contractor warrants that all employees and subcontractors shall have sufficient skill and experience to perform the Services assigned to them. Finally, Contractor represents that it, its employees and subcontractors have all licenses, permits, qualifications and approvals of whatever nature that are legally required to perform the Services, including a City Business License, and that such licenses and approvals shall be maintained throughout the term of this Agreement. As provided for in the indemnification provisions of this Agreement, Contractor shall perform, at its own cost and expense and without reimbursement from the City, any services necessary to correct errors or omissions which are caused by the Contractor's failure to comply with the standard of care provided for herein. Any employee of the Contractor or its sub-contractors who is determined by the City to be uncooperative, incompetent,

a threat to the adequate or timely completion of the Project, a threat to the safety of persons or property, or any employee who fails or refuses to perform the Services in a manner acceptable to the City, shall be promptly removed from the Project by the Contractor and shall not be re-employed to perform any of the Services or to work on the Project.

3.3.8 Period of Performance

3.3.8.1 Contractor shall perform and complete all Services under this Agreement within the term set forth in Section 3.1.2 above ("Performance Time"). Contractor shall perform the Services in strict accordance with any completion schedule or Project milestones described in Exhibits "A" or "B" attached hereto, or which may be provided separately in writing to the Contractor. Contractor agrees that if the Services are not completed within the aforementioned Performance Time and/or pursuant to any such completion schedule or Project milestones developed pursuant to provisions of this Agreement, it is understood, acknowledged and agreed that the City will suffer damage. Pursuant to Government Code Section 53069.85, Contractor shall pay to the City as fixed and liquidated damages, and not as a penalty, the sum of **One Hundred Seventy-Seven Dollars with Zero Cents ($177)** per day for each and every calendar day of delay beyond the Performance Time or beyond any completion schedule or Project milestones established pursuant to this Agreement.

3.3.8.2 Neither City nor Contractor shall be considered in default of this Agreement for delays in performance caused by circumstances beyond the reasonable control of the non-performing Party. For purposes of this Agreement, such circumstances include a Force Majeure Event. A Force Majeure Event shall mean an event that materially affects a Party's performance and is one or more of the following: (1) Acts of God or other natural disasters; (2) terrorism or other acts of a public enemy; (3) orders of governmental authorities (including, without limitation, unreasonable and unforeseeable delay in the issuance of permits or approvals by governmental authorities that are required for the Services); (4) strikes and other organized labor action occurring at the site and the effects thereof on the Services, only to the extent such strikes and other organized labor action are beyond the control of Contractor and its subconsultants, and to the extent the effects thereof cannot be avoided by use of replacement workers; and (5) pandemics, epidemics or quarantine restrictions. For purposes of this section, "orders of governmental authorities," includes ordinances, emergency proclamations and orders, rules to protect the public health, welfare and safety, and other actions of a public agency applicable to the Services and Agreement.

3.3.8.3 Should a Force Majeure Event occur, the non-performing Party shall, within a reasonable time of being prevented from performing, give written notice to the other Party describing the circumstances preventing continued performance and the efforts being made to resume performance of this Agreement. Force Majeure Events and/or delays, regardless of the Party responsible for the delay, shall not entitle Contractor to any additional compensation. Notwithstanding the foregoing in this section, the City may still terminate this Agreement in accordance with the termination provisions of this Agreement.

3.3.9 Disputes. Should any dispute arise respecting the true value of any work done, of any work omitted, or of any extra work which Contractor may be required to do, or respecting the size of any payment to Contractor during the performance of this Contract, Contractor shall continue to perform the Work while said dispute is decided by the City. If Contractor disputes the City's decision, Contractor shall have such remedies as may be provided by law.

3.3.10 Laws and Regulations; Employee/Labor Certifications.

3.3.10.1 Compliance with Laws. Contractor shall keep itself fully informed of and in compliance with all local, state and federal laws, rules and regulations in any manner affecting the performance of the Project or the Services, including all Cal/OSHA requirements, and shall give all notices required by law. Contractor shall be liable for all violations of such laws and regulations in connection with Services. If the Contractor performs any work knowing it to be contrary to such laws, rules and regulations and without giving written notice to the City, Contractor shall be solely responsible for all costs arising therefrom. City is a public entity of the State of California subject to certain provisions of the Health & Safety Code, Government Code, Public Contract Code, and Labor Code of the State. It is stipulated and agreed that all provisions of the law applicable to the public contracts of a municipality are a part of this Agreement to the same extent as though set forth herein and will be complied with. These include but are not limited to the payment of prevailing wages, the stipulation that eight (8) hours' labor shall constitute a legal day's work and that no worker shall be permitted to work in excess of eight (8) hours during any one calendar day except as permitted by law. Contractor shall defend, indemnify and hold City, its officials, directors, officers, employees and agents free and harmless, pursuant to the indemnification provisions of this Agreement, from any claim or liability arising out of any failure or alleged failure to comply with such laws, rules or regulations.

3.3.10.2 Employment Eligibility; Contractor. By executing this Agreement, Contractor verifies that it fully complies with all requirements and restrictions of state and federal law respecting the employment of undocumented aliens, including, but not limited to, the Immigration Reform and Control Act of 1986, as may be amended from time to time. Such requirements and restrictions include, but are not limited to, examination and retention of documentation confirming the identity and immigration status of each employee of the Contractor. Contractor also verifies that it has not committed a violation of any such law within the five (5) years immediately preceding the date of execution of this Agreement, and shall not violate any such law at any time during the term of the Agreement. Contractor shall avoid any violation of any such law during the term of this Agreement by participating in an electronic verification of work authorization program operated by the United States Department of Homeland Security, by participating in an equivalent federal work authorization program operated by the United States Department of Homeland Security to verify information of newly hired employees, or by some other legally acceptable method. Contractor shall maintain records of each such verification, and shall make them available to the City or its representatives for inspection and copy at any time during normal business hours. The City shall not be responsible for any costs or expenses related to Contractor's compliance with the requirements provided for in Section 3.3.10 or any of its sub-sections.

3.3.10.3 Employment Eligibility; Subcontractors, Sub-subcontractors and Consultants. To the same extent and under the same conditions as Contractor, Contractor shall require all of its subcontractors, sub-subcontractors and consultants performing any work relating to the Project or this Agreement to make the same verifications and comply with all requirements and restrictions provided for in Section 3.3.10.1.

3.3.10.4 Employment Eligibility; Failure to Comply. Each person executing this Agreement on behalf of Contractor verifies that they are a duly authorized officer of Contractor, and understands that any of the following shall be grounds for the City to terminate the Agreement for cause: (1) failure of Contractor or its subcontractors, sub-subcontractors or consultants to meet any of the requirements provided for in Sections 3.3.10.1 or 3.3.10.2; (2) any misrepresentation or material omission concerning compliance with such requirements (including

in those verifications provided to the Contractor under Section 3.3.10.2); or (3) failure to immediately remove from the Project any person found not to be in compliance with such requirements.

3.3.10.5 Equal Opportunity Employment. Contractor represents that it is an equal opportunity employer and it shall not discriminate against any subcontractor, employee or applicant for employment because of race, religion, color, national origin, handicap, ancestry, sex or age. Such non-discrimination shall include, but not be limited to, all activities related to initial employment, upgrading, demotion, transfer, recruitment or recruitment advertising, layoff or termination. Contractor shall also comply with all relevant provisions of City's Minority Business Enterprise program, Affirmative Action Plan or other related programs or guidelines currently in effect or hereinafter enacted.

3.3.10.6 Air Quality. Contractor must fully comply with all applicable laws, rules and regulations in furnishing or using equipment and/or providing services, including, but not limited to, emissions limits and permitting requirements imposed by the California Air Resources Board (CARB). Contractor shall specifically be aware of the CARB limits and requirements' application to "portable equipment", which definition is considered by CARB to include any item of equipment with a fuel-powered engine. Contractor shall indemnify City against any fines or penalties imposed by CARB or any other governmental or regulatory agency for violations of applicable laws, rules and/or regulations by Contractor, its subcontractors, or others for whom Contractor is responsible under its indemnity obligations provided for in this Agreement.

3.3.10.7 Water Quality.

(A) To the extent applicable, Contractor's Services must account for, and fully comply with, all local, state and federal laws, rules and regulations that may impact water quality compliance, including, without limitation, all applicable provisions of the Federal Water Pollution Control Act (33 U.S.C. §§ 1300); the California Porter-Cologne Water Quality Control Act (Cal Water Code §§ 13000-14950); laws, rules and regulations of the Environmental Protection Agency, the State Water Resources Control Board and the Colorado River Regional Water Quality Control Board; the City's ordinances regulating discharges of storm water; and any and all regulations, policies, or permits issued pursuant to any such authority regulating the discharge of pollutants, as that term is used in the Porter-Cologne Water Quality Control Act, to any ground or surface water in the State.

(B) Liability for Non-Compliance. Failure to comply with the laws, regulations and policies described in this Section is a violation of law that may subject Contractor or City to penalties, fines, or additional regulatory requirements. Contractor shall defend, indemnify and hold the City, its directors, officials, officers, employees, volunteers and agents free and harmless, pursuant to the indemnification provisions of this Agreement, from and against any and all fines, penalties, claims or other regulatory requirements imposed as a result of Contractor's non-compliance with the laws, regulations and policies described in this Section, unless such non-compliance is the result of the sole established negligence, willful misconduct or active negligence of the City, its officials, officers, agents, employees or authorized volunteers.

(C) Training. In addition to any other standard of care requirements set forth in this Agreement, Contractor warrants that all employees and subcontractors shall have sufficient skill and experience to perform the Services assigned to them without impacting water quality in violation of the laws, regulations and policies described in this Section. Contractor further warrants that it, its employees and subcontractors will receive

adequate training, as determined by City, regarding the requirements of the laws, regulations and policies described in this Section as they may relate to the Services provided under this Agreement. Upon request, City will provide Contractor with a list of training programs that meet the requirements of this paragraph.

3.3.11 Insurance.

3.3.11.1 Time for Compliance. Contractor shall not commence Services under this Agreement until it has provided evidence satisfactory to the City that it has secured all insurance required under this Section. In addition, Contractor shall not allow any subcontractor to commence work on any subcontract until it has provided evidence satisfactory to the City that the subcontractor has secured all insurance required under this Section.

3.3.11.2 Minimum Requirements. Contractor shall, at its expense, procure and maintain for the duration of the Agreement insurance against claims for injuries to persons or damages to property which may arise from or in connection with the performance of the Agreement by the Contractor, its agents, representatives, employees or subcontractors. Contractor shall also require all of its subcontractors to procure and maintain the same insurance for the duration of the Agreement. Such insurance shall meet at least the following minimum levels of coverage:

(A) Minimum Scope of Insurance. Coverage shall be at least as broad as the latest version of the following: (1) *General Liability*: Insurance Services Office Commercial General Liability coverage (occurrence form CG 0001); (2) *Automobile Liability*: Insurance Services Office Business Auto Coverage form number CA 0001, code 1 (any auto); and (3) *Workers' Compensation and Employer's Liability*: Workers' Compensation insurance as required by the State of California and Employer's Liability Insurance. The policy shall not contain any exclusion contrary to the Agreement, including but not limited to endorsements or provisions limiting coverage for (1) contractual liability (including but not limited to ISO CG 24 26 or 21 29); or (2) cross liability for claims or suits by one insured against another.

(B) Minimum Limits of Insurance. Contractor shall maintain limits no less than: (1) *General Liability:* $2,000,000 per occurrence for bodily injury, personal injury and property damage. If Commercial General Liability Insurance or other form with general aggregate limit is used including, but not limited to, form CG 2503, either the general aggregate limit shall apply separately to this Agreement/location or the general aggregate limit shall be twice the required occurrence limit; (2) *Automobile Liability:* $2,000,000 per accident for bodily injury and property damage; and (3) *Workers' Compensation and Employer's Liability:* Workers' Compensation limits as required by the Labor Code of the State of California. Employer's Liability limits of $1,000,000 per accident for bodily injury or disease. Defense costs shall be paid in addition to the limits.

(C) Notices; Cancellation or Reduction of Coverage. At least fifteen (15) days prior to the expiration of any such policy, evidence showing that such insurance coverage has been renewed or extended shall be filed with the City. If such coverage is cancelled or materially reduced, Contractor shall, within ten (10) days after receipt of written notice of such cancellation or reduction of coverage, file with the City evidence of insurance showing that the required insurance has been reinstated or has been provided through another insurance company or companies. In the event any policy of insurance required under this Agreement does not comply with these specifications or is canceled and not replaced, the City has the right but not the duty to obtain the insurance it deems necessary and any premium paid by the City will be

promptly reimbursed by Contractor or the City may withhold amounts sufficient to pay premium from Contractor payments. In the alternative, the City may suspend or terminate this Agreement.

(D) Additional Insured. The City, its directors, officials, officers, employees, agents, and volunteers shall be named as additional insureds on Contractor's and its subcontractors' policies of commercial general liability and automobile liability insurance using the endorsements and forms specified herein or exact equivalents.

3.3.11.3 Insurance Endorsements. The insurance policies shall contain the following provisions, or Contractor shall provide endorsements on forms supplied or approved by the City to add the following provisions to the insurance policies:

(A) General Liability. The general liability policy shall include or be endorsed (amended) to state that: (1) using ISO CG forms 20 10 and 20 37, or endorsements providing the exact same coverage, the City of Ontario, its directors, officials, officers, employees, agents, and volunteers shall be covered as additional insured with respect to the Services or ongoing and complete operations performed by or on behalf of the Contractor, including materials, parts or equipment furnished in connection with such work; and (2) using ISO form 20 01, or endorsements providing the exact same coverage, the insurance coverage shall be primary insurance as respects the City, its directors, officials, officers, employees, agents, and volunteers, or if excess, shall stand in an unbroken chain of coverage excess of the Contractor's scheduled underlying coverage. Any excess insurance shall contain a provision that such coverage shall also apply on a primary and noncontributory basis for the benefit of the City, before the City's own primary insurance, deductible, or self-insurance shall be called upon to protect it as a named insured. Any insurance, deductible, or self-insurance maintained by the City, its directors, officials, officers, employees, agents, and volunteers shall be excess of the Contractor's insurance and shall not be called upon to contribute with it in any way. Notwithstanding the minimum limits set forth in Section 3.3.11.2(B), any available insurance proceeds in excess of the specified minimum limits of coverage shall be available to the parties required to be named as additional insureds pursuant to this Section 3.3.11.3(A).

(B) Automobile Liability. The automobile liability policy shall include or be endorsed (amended) to state that: (1) the City, its directors, officials, officers, employees, agents, and volunteers shall be covered as additional insureds with respect to the ownership, operation, maintenance, use, loading or unloading of any auto owned, leased, hired or borrowed by the Contractor or for which the Contractor is responsible; and (2) the insurance coverage shall be primary insurance as respects the City, its directors, officials, officers, employees, agents, and volunteers, or if excess, shall stand in an unbroken chain of coverage excess of the Contractor's scheduled underlying coverage. Any insurance, deductible, or self-insurance maintained by the City, its directors, officials, officers, employees, agents, and volunteers shall be excess of the Contractor's insurance and shall not be called upon to contribute with it in any way. Policy shall contain or be endorsed to contain such provisions. Notwithstanding the minimum limits set forth in Section 3.3.11.2(B), any available insurance proceeds in excess of the specified minimum limits of coverage shall be available to the parties required to be named as additional insureds pursuant to this Section 3.3.11.3(B).

(C) Workers' Compensation and Employer's Liability Coverage. The insurer shall agree to waive all rights of subrogation against the City, its directors, officials, officers, employees, agents, and volunteers for losses paid under the terms of the insurance policy which arise from work performed by the Contractor.

(D) All Coverages. Each insurance policy required by this Agreement shall be endorsed to state that: (A) coverage shall not be suspended, voided, reduced or canceled except after thirty (30) days (10 days for nonpayment of premium) prior written notice by certified mail, return receipt requested, has been given to the City; and (B) any failure to comply with reporting or other provisions of the policies, including breaches of warranties, shall not affect coverage provided to the City, its directors, officials, officers, employees, agents, and volunteers. Any failure to comply with reporting or other provisions of the policies including breaches of warranties shall not affect coverage provided to the City, its officials, officers, employees, agents and volunteers, or any other additional insureds.

3.3.11.4 Separation of Insureds; No Special Limitations; Waiver of Subrogation. All insurance required by this Section shall contain standard separation of insureds provisions. In addition, such insurance shall not contain any special limitations on the scope of protection afforded to the City, its directors, officials, officers, employees, agents, and volunteers. Requirement of specific coverage or minimum limits contained in this Section are not intended as a limitation on coverage, limits, or other requirement, or a waiver of any coverage normally provided by any insurance. All policies shall waive any right of subrogation of the insurer against the City, its officials, officers, employees, agents, and volunteers, or any other additional insureds, or shall specifically allow Contractor or others providing insurance evidence in compliance with these specifications to waive their right of recovery prior to a loss. Contractor hereby waives its own right of recovery against City, its officials, officers, employees, agents, and volunteers, or any other additional insureds, and shall require similar written express waivers and insurance clauses from each of its subcontractors.

3.3.11.5 Deductibles and Self-Insurance Retentions. Any deductibles or self-insured retentions must be declared to and approved by the City. Contractor shall guarantee that, at the option of the City, either: (1) the insurer shall reduce or eliminate such deductibles or self-insured retentions as respects the City, its directors, officials, officers, employees, agents, and volunteers; or (2) the Contractor shall procure a bond guaranteeing payment of losses and related investigation costs, claims and administrative and defense expenses.

3.3.11.6 Subcontractor Insurance Requirements. Contractor shall not allow any subcontractors to commence work on any subcontract relating to the work under the Agreement until they have provided evidence satisfactory to the City that they have secured all insurance required under this Section. If requested by Contractor, the City may approve different scopes or minimum limits of insurance for particular subcontractors. The Contractor and the City shall be named as additional insureds on all subcontractors' policies of Commercial General Liability using ISO form 20 38, or coverage at least as broad.

3.3.11.7 Acceptability of Insurers. Insurance is to be placed with insurers with a current A.M. Best's rating no less than A:VIII, licensed to do business in California, and satisfactory to the City.

3.3.11.8 Verification of Coverage. Contractor shall furnish City with original certificates of insurance and endorsements effecting coverage required by this Agreement on forms satisfactory to the City. The certificates and endorsements for each insurance policy shall be signed by a person authorized by that insurer to bind coverage on its behalf, and shall be on forms provided by the City if requested. All certificates and endorsements must be received and approved by the City before work commences. The City reserves the right to require complete, certified copies of all required insurance policies, at any time.

3.3.11.9 Reporting of Claims. Contractor shall report to the City, in addition to Contractor's insurer, any and all insurance claims submitted by Contractor in connection with the Services under this Agreement.

3.3.12 Safety. Contractor shall execute and maintain its work so as to avoid injury or damage to any person or property. In carrying out its Services, the Contractor shall at all times be in compliance with all applicable local, state and federal laws, rules and regulations, and shall exercise all necessary precautions for the safety of employees appropriate to the nature of the work and the conditions under which the work is to be performed. Safety precautions as applicable shall include, but shall not be limited to: (A) adequate life protection and lifesaving equipment and procedures; (B) instructions in accident prevention for all employees and subcontractors, such as safe walkways, scaffolds, fall protection ladders, bridges, gang planks, confined space procedures, trenching and shoring, equipment and other safety devices, equipment and wearing apparel as are necessary or lawfully required to prevent accidents or injuries; and (C) adequate facilities for the proper inspection and maintenance of all safety measures.

3.3.13 Bonds.

3.3.13.1 Performance Bond. If required by law or otherwise specifically requested by City in Exhibit "C" attached hereto and incorporated herein by reference, Contractor shall execute and provide to City concurrently with this Agreement a Performance Bond in the amount of the total, not-to-exceed compensation indicated in this Agreement, and in a form provided or approved by the City. If such bond is required, no payment will be made to Contractor until it has been received and approved by the City.

3.3.13.2 Payment Bond. If required by law or otherwise specifically requested by City in Exhibit "C" attached hereto and incorporated herein by reference, Contractor shall execute and provide to City concurrently with this Agreement a Payment Bond in the amount of the total, not-to-exceed compensation indicated in this Agreement, and in a form provided or approved by the City. If such bond is required, no payment will be made to Contractor until it has been received and approved by the City.

3.3.13.3 Bond Provisions. Should, in City's sole opinion, any bond become insufficient or any surety be found to be unsatisfactory, Contractor shall renew or replace the affected bond within 10 days of receiving notice from City. In the event the surety or Contractor intends to reduce or cancel any required bond, at least thirty (30) days prior written notice shall be given to the City, and Contractor shall post acceptable replacement bonds at least ten (10) days prior to expiration of the original bonds. No further payments shall be deemed due or will be made under this Agreement until any replacement bonds required by this Section are accepted by the City. To the extent, if any, that the total compensation is increased in accordance with the Agreement, the Contractor shall, upon request of the City, cause the amount of the bonds to be increased accordingly and shall promptly deliver satisfactory evidence of such increase to the City. To the extent available, the bonds shall further provide that no change or alteration of the Agreement (including, without limitation, an increase in the total compensation, as referred to above), extensions of time, or modifications of the time, terms, or conditions of payment to the Contractor, will release the surety. If the Contractor fails to furnish any required bond, the City may terminate this Agreement for cause.

3.3.13.4 Surety Qualifications. Only bonds executed by an admitted surety insurer, as defined in Code of Civil Procedure Section 995.120, shall be accepted. The

surety must be a California-admitted surety with a current A.M. Best's rating no less than A:VIII and satisfactory to the City. If a California-admitted surety insurer issuing bonds does not meet these requirements, the insurer will be considered qualified if it is in conformance with Section 995.660 of the California Code of Civil Procedure, and proof of such is provided to the City.

3.3.14 Work Site.

3.3.14.1 Inspection Of Site. Contractor shall visit sites where Services are to be performed and shall become acquainted with all conditions affecting the Services prior to commencing the Services. Contractor shall make such examinations as it deems necessary to determine the condition of the work sites, its accessibility to materials, workmen and equipment, and to determine Contractor's ability to protect existing surface and subsurface improvements. No claim for allowances–time or money–will be allowed as to such matters after commencement of the Services.

3.3.14.2 Field Measurements. Contractor shall make field measurements, verify field conditions and shall carefully compare such field measurements and conditions and other information known to Contractor with the Contract Documents, including any plans, specifications, or scope of work before commencing Services. Errors, inconsistencies or omissions discovered shall be reported to the City immediately and prior to performing any Services or altering the condition.

3.3.15 Loss and Damage. Contractor shall be responsible for all loss and damage which may arise out of the nature of the Services agreed to herein, or from the action of the elements, or from any unforeseen difficulties which may arise or be encountered in the prosecution of the Services until the same is fully completed and accepted by City.

3.3.16 Warranty. Contractor warrants all Services under the Contract (which for purposes of this Section shall be deemed to include unauthorized work which has not been removed and any non-conforming materials incorporated into the work) to be of good quality and free from any defective or faulty material and workmanship. Contractor agrees that for a period of one year (or the period of time specified elsewhere in the Contract or in any guarantee or warranty provided by any manufacturer or supplier of equipment or materials incorporated into the work, whichever is later) after the date of final acceptance, Contractor shall within ten (10) days after being notified in writing by the City of any defect in the Services or non-conformance of the Services to the Contract, commence and prosecute with due diligence all Services necessary to fulfill the terms of the warranty at its sole cost and expense. Contractor shall act sooner as requested by the City in response to an emergency. In addition, Contractor shall, at its sole cost and expense, repair and replace any portions of the work (or work of other contractors) damaged by its defective Services or which becomes damaged in the course of repairing or replacing defective work. For any work so corrected, Contractor's obligation hereunder to correct defective work shall be reinstated for an additional one year period, commencing with the date of acceptance of such corrected work. Contractor shall perform such tests as the City may require to verify that any corrective actions, including, without limitation, redesign, repairs, and replacements comply with the requirements of the Contract. All costs associated with such corrective actions and testing, including the removal, replacement, and reinstitution of equipment and materials necessary to gain access, shall be the sole responsibility of the Contractor. All warranties and guarantees of subcontractors, suppliers and manufacturers with respect to any portion of the work, whether express or implied, are deemed to be obtained by Contractor for the benefit of the City, regardless of whether or not such warranties and guarantees have been

transferred or assigned to the City by separate agreement and Contractor agrees to enforce such warranties and guarantees, if necessary, on behalf of the City. In the event that Contractor fails to perform its obligations under this Section, or under any other warranty or guaranty under this Contract, to the reasonable satisfaction of the City, the City shall have the right to correct and replace any defective or non-conforming work and any work damaged by such work or the replacement or correction thereof at Contractor's sole expense. Contractor shall be obligated to fully reimburse the City for any expenses incurred hereunder upon demand.

3.4 Labor Code Requirements.

3.4.1 Prevailing Wages. Contractor is aware of the requirements of California Labor Code Section 1720, et seq., and 1770, et seq., as well as California Code of Regulations, Title 8, Section 16000, et seq., ("Prevailing Wage Laws"), which require the payment of prevailing wage rates and the performance of other requirements on "public works" and "maintenance" projects. If the Services are being performed as part of an applicable "public works" or "maintenance" project, as defined by the Prevailing Wage Laws, and if the total compensation is $1,000 or more, Contractor agrees to fully comply with such Prevailing Wage Laws. City shall provide Contractor with a copy of the prevailing rates of per diem wages in effect at the commencement of this Agreement. Contractor shall make copies of the prevailing rates of per diem wages for each craft, classification or type of worker needed to execute the Services available to interested parties upon request, and shall post copies at the Contractor's principal place of business and at the project site. Contractor shall defend, indemnify and hold the City, its elected officials, officers, employees and agents free and harmless from any claim or liability arising out of any failure or alleged failure to comply with the Prevailing Wage Laws. It shall be mandatory upon the Contractor and all subcontractors to comply with all California Labor Code provisions, which include but are not limited to prevailing wages (Labor Code Sections 1771, 1774 and 1775), employment of apprentices (Labor Code Section 1777.5), certified payroll records (Labor Code Sections 1771.4 and 1776), hours of labor (Labor Code Sections 1813 and 1815) and debarment of contractors and subcontractors (Labor Code Section 1777.1). The requirement to submit certified payroll records directly to the Labor Commissioner under Labor Code section 1771.4 shall not apply to work performed on a public works project that is exempt pursuant to the small project exemption specified in Labor Code Section 1771.4.

3.4.2 Registration/DIR Compliance. If the Services are being performed as part of an applicable "public works" or "maintenance" project, and if the total compensation is $15,000 or more, then pursuant to Labor Code Sections 1725.5 and 1771.1, the Contractor and all subcontractors performing such Services must be registered with the Department of Industrial Relations. Contractor shall maintain registration for the duration of the Project and require the same of any subcontractors, as applicable.

3.4.3 Registration/DIR Compliance. This Project may also be subject to compliance monitoring and enforcement by the Department of Industrial Relations. It shall be Contractor's sole responsibility to comply with all applicable registration and labor compliance requirements. Any stop orders issued by the Department of Industrial Relations against Contractor or any subcontractor that affect Contractor's performance of Services, including any delay, shall be Contractor's sole responsibility. Any delay arising out of or resulting from such stop orders shall be considered Contractor caused delay and shall not be compensable by the City. Contractor shall defend, indemnify and hold the City, its officials, officers, employees and agents free and harmless from any claim or liability arising out of stop orders issued by the Department of Industrial Relations against Contractor or any subcontractor.

3.4.4 Labor Certification. By its signature hereunder, Consultant certifies that it is aware of the provisions of Section 3700 of the California Labor Code which require every employer to be insured against liability for Worker's Compensation or to undertake self-insurance in accordance with the provisions of that Code, and agrees to comply with such provisions before commencing the performance of the Services.

3.5 Termination of Agreement.

3.5.1 Grounds for Termination. City may, by written notice to Contractor, terminate the whole or any part of this Agreement at any time and without cause by giving written notice to Contractor of such termination, and specifying the effective date thereof, at least seven (7) days before the effective date of such termination. Upon termination, Contractor shall be compensated only for those services which have been adequately rendered to City, and Contractor shall be entitled to no further compensation. Contractor may not terminate this Agreement except for cause. The rights and remedies of the City provided in this section shall not be exclusive and are in addition to any other rights and remedies provided by law, equity or under this Agreement.

3.5.2 Effect of Termination. If this Agreement is terminated as provided herein, City may require Contractor to provide all finished or unfinished Documents and Data and other information of any kind prepared by Contractor in connection with the performance of Services under this Agreement. Contractor shall be required to provide such document and other information within fifteen (15) days of the request.

3.5.3 Additional Services. In the event this Agreement is terminated in whole or in part as provided herein, City may procure, upon such terms and in such manner as it may determine appropriate, services similar to those terminated.

3.6 Indemnification.

3.6.1 Scope of Indemnity. To the fullest extent permitted by law, Contractor shall defend, indemnify and hold the City, its officials, employees, agents and volunteers free and harmless from any and all claims, demands, causes of action, suits, actions, proceedings, costs, expenses, liability, judgments, awards, decrees, settlements, loss, damage or injury of any kind, in law or equity, regardless of whether the allegations are false, fraudulent, or groundless, to property or persons, including wrongful death, (collectively, “Claims”) in any manner arising out of, pertaining to, or incident to any acts, errors or omissions, or willful misconduct of Contractor, its officials, officers, employees, subcontractors, consultants or agents in connection with the performance of the Contractor’s Services, the Project or this Agreement, including without limitation the payment of all expert witness fees, attorneys’ fees and other related costs and expenses. Notwithstanding the foregoing, to the extent required by Civil Code section 2782, Contractor’s indemnity obligation shall not apply to such loss or damage which is caused by the sole or active negligence or willful misconduct of the City.

3.6.2 Additional Indemnity Obligations. Contractor shall defend, with counsel of City’s choosing and at Contractor’s own cost, expense and risk, any and all Claims covered by this section that may be brought or instituted against City or its officials, employees, agents and volunteers. In addition, Contractor shall pay and satisfy any judgment, award or decree that may be rendered against City or its officials, employees, agents and volunteers as part of any such claim, suit, action or other proceeding. Contractor shall also reimburse City for the cost of any settlement paid by City or its officials, employees, agents and volunteers as part of any such

claim, suit, action or other proceeding. Such reimbursement shall include payment for City's attorney's fees and costs, including expert witness fees. Contractor shall reimburse City and its officials, employees, agents and volunteers, for any and all legal expenses and costs incurred by each of them in connection therewith or in enforcing the indemnity herein provided. Contractor's obligation to indemnify shall survive expiration or termination of this Agreement, and shall not be restricted to insurance proceeds, if any, received by the City, its officials, employees, agents and volunteers.

3.7 General Provisions.

3.7.1 Accounting Records. Contractor shall maintain complete and accurate records with respect to all costs and expenses incurred under this Agreement. All such records shall be clearly identifiable. Contractor shall allow a representative of City during normal business hours to examine, audit, and make transcripts or copies of such records and any other documents created pursuant to this Agreement. Contractor shall allow inspection of all work, data, documents, proceedings, and activities related to the Agreement for a period of three (3) years from the date of final payment under this Agreement.

3.7.2 Independent Contractors and Subcontracting.

3.7.2.1 Use of Contractors. Contractor is aware of statutory and case law regarding classification of workers as independent contractors, including California Labor Code Section 2750.3 and Dynamex Operations West, Inc. v. Superior Court, 4 Cal. 5th 903 (2018). To ensure that Contractor is in compliance with the California Labor Code, Contractor shall only utilize its employees to provide the Services. Contractor may not provide the services through any independent contractor, subcontractor or subconsultant ("Subcontractor(s)") unless approved by the City as set forth in Section 3.7.2.2 below. Contractor represents and warrants that all personnel who perform the Services on Contractor's behalf are Contractor's employees, and that Contractor complies with all applicable laws, rules and regulations governing its employees, including, but not limited to, the California Labor Code, Unemployment Insurance Code and all applicable Industrial Welfare Commission Wage Orders.

3.7.2.2 Prior Approval Required. Contractor shall not use any Subcontractor to provide the Services, or any portion of the work required by this Agreement, without prior written approval of City. In the event that City authorizes Contractor to use a Subcontractor, Contractor shall enter into a written agreement with the Subcontractor, which must include all provisions of the Agreement, including a restriction on the Subcontractor's use of further independent contractors, subcontractors or subconsultants without the City's prior written consent.

3.7.3 Delivery of Notices. All notices permitted or required under this Agreement shall be given to the respective parties at the following address, or at such other address as the respective parties may provide in writing for this purpose:

Contractor:

Merchants Landscape Services, Inc.
1510 S. Lyon St.
Santa Ana, CA 92705
Attn: Mark Brower, President

City:

City of Ontario
303 East "B" Street
Ontario, CA 91764
Attn: Philip Marino, Urban Forestry Manager

Such notice shall be deemed made when personally delivered or when mailed, forty-eight (48) hours after deposit in the U.S. Mail, first class postage prepaid and addressed to the party at its applicable address. Actual notice shall be deemed adequate notice on the date actual notice occurred, regardless of the method of service.

3.7.4 Governing Law; Government Code Claim Compliance. This Agreement shall be governed by the laws of the State of California. Venue shall be in San Bernardino County. In addition to any and all contract requirements pertaining to notices of and requests for compensation or payment for extra work, disputed work, claims and/or changed conditions, Contractor must comply with the claim procedures set forth in Government Code sections 900 et seq. prior to filing any lawsuit against the City. Such Government Code claims and any subsequent lawsuit based upon the Government Code claims shall be limited to those matters that remain unresolved after all procedures pertaining to extra work, disputed work, claims, and/or changed conditions have been followed by Contractor. If no such Government Code claim is submitted, or if any prerequisite contractual requirements are not otherwise satisfied as specified herein, Contractor shall be barred from bringing and maintaining a valid lawsuit against the City.

3.7.5 Attorneys' Fees. If either Party commences an action against the other party, either legal, administrative or otherwise, arising out of or in connection with this Agreement, the prevailing party in such litigation shall be entitled to have and recover from the losing party reasonable attorneys' fees and all other costs of such action.

3.7.6 Time of Essence. Time is of the essence for each and every provision of this Agreement.

3.7.7 City's Right to Employ Other Contractors. City reserves right to employ other contractors in connection with this Project.

3.7.8 Successors and Assigns. This Agreement shall be binding on the successors and assigns of the parties.

3.7.9 Assignment or Transfer. Contractor shall not assign, hypothecate or transfer, either directly or by operation of law, this Agreement or any interest herein without the prior written consent of the City. Any attempt to do so shall be null and void, and any assignees, hypothecates or transferees shall acquire no right or interest by reason of such attempted assignment, hypothecation or transfer.

3.7.10 Construction; References; Captions. Since the Parties or their agents have participated fully in the preparation of this Agreement, the language of this Agreement shall be construed simply, according to its fair meaning, and not strictly for or against any Party. Any term referencing time, days or period for performance shall be deemed calendar days and not work days. All references to Contractor include all personnel, employees, agents, and subcontractors of Contractor, except as otherwise specified in this Agreement. All references to City include its elected officials, officers, employees, agents, and volunteers except as otherwise specified in this Agreement. The captions of the various articles and paragraphs are for convenience and ease

of reference only, and do not define, limit, augment, or describe the scope, content or intent of this Agreement.

3.7.11 Amendment; Modification. No supplement, modification or amendment of this Agreement shall be binding unless executed in writing and signed by both Parties.

3.7.12 Waiver. No waiver of any default shall constitute a waiver of any other default or breach, whether of the same or other covenant or condition. No waiver, benefit, privilege, or service voluntarily given or performed by a Party shall give the other Party any contractual rights by custom, estoppel or otherwise.

3.7.13 No Third Party Beneficiaries. Except to the extent expressly provided for in Section 3.5.7, there are no intended third party beneficiaries of any right or obligation assumed by the Parties.

3.7.14 Invalidity; Severability. If any portion of this Agreement is declared invalid, illegal, or otherwise unenforceable by a court of competent jurisdiction, the remaining provisions shall continue in full force and effect.

3.7.15 Prohibited Interests. Contractor maintains and warrants that it has not employed nor retained any company or person, other than a bona fide employee working solely for Contractor, to solicit or secure this Agreement. Further, Contractor warrants that it has not paid nor has it agreed to pay any company or person, other than a bona fide employee working solely for Contractor, any fee, commission, percentage, brokerage fee, gift or other consideration contingent upon or resulting from the award or making of this Agreement. Contractor further agrees to file, or shall cause its employees or subcontractors to file, a Statement of Economic Interest with the City's Filing Officer as required under state law in the performance of the Services. For breach or violation of this warranty, City shall have the right to rescind this Agreement without liability. For the term of this Agreement, no member, officer or employee of City, during the term of his or her service with City, shall have any direct interest in this Agreement, or obtain any present or anticipated material benefit arising therefrom.

3.7.16 Cooperation; Further Acts. The Parties shall fully cooperate with one another, and shall take any additional acts or sign any additional documents as may be necessary, appropriate or convenient to attain the purposes of this Agreement.

3.7.17 Authority to Enter Agreement. Contractor has all requisite power and authority to conduct its business and to execute, deliver, and perform the Agreement. Each Party warrants that the individuals who have signed this Agreement have the legal power, right, and authority to make this Agreement and bind each respective Party.

3.7.18 Counterparts. This Agreement may be signed in counterparts, each of which shall constitute an original.

3.7.19 Entire Agreement. This Agreement contains the entire Agreement of the parties with respect to the subject matter hereof, and supersedes all prior negotiations, understandings or agreements. This Agreement may only be modified by a writing signed by both parties.

SCOPE OF SERVICES

1. SCOPE OF WORK

A. The intent of this Agreement is to secure a contractor(s) who shall provide Landscape Maintenance Services for Quite Home Weed Abatement PM 2425-17.

B. The Contractor shall furnish all labor, tools, materials, and equipment to provide the landscape maintenance and repairs as set forth in this Agreement.

C. All Work shall be done in a professional, thorough, and workman like manner to the satisfaction of the Parks and Maintenance Director, or his/her authorized agent, and comply with all legal construction and landscape maintenance practices. The premises shall always be maintained at the level of service provided for in these specifications. The Contractor shall have the duty to provide complete landscape maintenance of all the project areas, including, but not limited to, the following: Fertilize, under-trim trees and shape shrubs, trim ground cover areas, mow, and edge turf grass areas. Consistently maintain the project areas with horticulturally acceptable growth and color. Consistently maintain the project areas to be devoid of weeds. Consistently maintain the project areas to be devoid of weeds five (5) feet out into the curb, gutter and street. Consistently maintain the project areas to be devoid of diseases, rodents and pests. Consistently maintain the project areas to be devoid of litter. Consistently maintain the project areas to be devoid of safety hazards. Consistently maintain the project areas to be devoid of unsafe walkways. Consistently maintain the project areas to be devoid of blocked drainage systems. Consistently maintain the project areas to be devoid of malfunctioning irrigation systems. Consistently maintain the project areas to be devoid of graffiti and paper like signs. Program, monitor, adjust and maintain all irrigation system clocks, and perform extra work as directed and approved.

D. The Contractor shall be available twenty-four (24) hours a day, seven (7) days a week to respond to all emergencies within two (2) hours of notification. Emergencies that involve maintenance work included in these general conditions shall not be compensated.

E. The Contractor shall perform a weekly maintenance inspection, during daylight hours, of all areas. Such inspection shall be both visual and operational. It shall include, but not be limited

to, the operation of all irrigation and/or other mechanical systems to check for proper condition and reliability.

2. WORK SITE

Work sites may include parks, medians, trails, weed abatement areas, and parkways.

The City reserves the right to make additions or deletions under this contract with written notice to the Contractor. The monthly compensation shall be adjusted by the monthly unit cost per square foot if any changes result in an increase or reduction in square footage maintained. Compensation shall be based on a-per unit cost (bid schedule form submitted) of work completed.

3. LENGTH OF CONTRACT

This **PRIMARY** contract shall begin **September 1, 2024 and shall terminate on June 30, 2027.**

The **FIRST** optional extension may be granted for a term of **TWELVE (12) MONTHS, from July 1, 2027, through June 30, 2028,** and any proposed increase shall be no greater than the CPI (Consumer Price Index) for the Ontario area, measured performance of the contractor and funding renewal.

The **SECOND** optional extension may be granted for a term of **TWELVE (12) MONTHS, from July 1, 2028, through June 30, 2029,** and any proposed increase shall be no greater than the CPI (Consumer Price Index) for the Ontario area, measured performance of the contractor and funding renewal.

All optional extensions of the contract are subject to approval by the City Manager, or his authorized agent and are contingent upon funding and performance by the Contractor.

4. DEFINITIONS

Where "as directed", "as required", "as permitted", "approved", "acceptance", or words of similar importance are used, it shall be understood that the direction, requirement, permission, approval or acceptance of the Parks and Maintenance Director, or his authorized agent, is intended unless otherwise stated.

The use of the word "Contractor" shall be held to mean the Contractor and/or any person employed by the City of Ontario, Parks and Maintenance Director, or his/her authorized agent and working under this contract.

The use of the words "shall" and "may" shall be held to mean "mandatory" and "permissive" respectively.

The use of the words "his" or "him" shall be construed to mean either gender, as appropriate. The use of the words " Parks and Maintenance Director " shall be construed to mean either the Parks and Maintenance Director or his authorized agent(s).

The words "City working day" refers to Monday-Friday, 6:30 a.m. to 4:00 p.m.

5. VANDALISM/THEFT/DAMAGE

Contractor shall be responsible for performing maintenance, repairs, and replacement of existing landscaped areas which are maintained under this contract and damaged or altered in any way as a result of theft, vandalism or mysterious damages that do not result from the performance of the Contractor.

In the case of vandalism to the maintained areas (Damage by Unknown Circumstances), Contractor shall notify the City within 24 hours using the free myOntario App. Graffiti will be entered under the “graffiti “Tab. All other Vandalism will be entered under the “Parks” Tab. In addition, EXCEPT in the case of graffiti, a text or email must be sent to the City’s Representative within 24 Hours detailing the Vandalism.

The use of red "Danger" tape shall be used when an area is unsafe for the public by the end of workday.

The repairs shall be made within 24 hours of receiving a notice to proceed by text or email. At no time shall damage by unknown sources remain unrepaired for a period exceeding 72 hours.

Additional compensation will be provided only for costs that are directly related to the theft and/or vandalism.

The following conditions shall be met prior to the Contractor being reimbursed for "Damage by Unknown Circumstances".

6. VANDALISM/THEFT/DAMAGE BIDS

Contractor shall submit an itemized EWA (Extra Work Authorization) within 24 hours to the City's Representative. Contractor shall secure written authorization for the repairs by the Parks and Maintenance Director, or his authorized agent within twenty-four (24) hours by e- mail or text. For emergencies regarding public safety, a verbal or text approval by the Parks and Maintenance Director, or his authorized agents, may be obtained.

7. COMPLETION OF PROPOSED VANDALISM/THEFT/DAMAGE WORK

A. Work is to commence within twenty-four (24) hours after receiving City approval.

B. The work shall be inspected and released as complete by the City representative, and then invoiced as specified in section (8).

8. INVOICING OF PROPOSED VANDALISM/THEFT/DAMAGE WORK

A. Contractor shall submit on business letterhead, a photocopy of the original EWA describing individual material costs and an invoice with line items for material costs, labor costs and administrative costs. The cost estimate for additional work shall consist of the following elements: **Base cost of labor plus Fifteen percent (15%) for overhead and profit. Actual cost of materials plus fifteen percent (15%) for overhead and profit.** City reserves the right to ask for payroll records and vendor invoice if discrepancies on the bid exist. Materials may be provided by the City of Ontario.

B. Contractor shall submit a copy of a report filed with the City of Ontario Police Department, which relates to the specific incident if required by the Parks and Maintenance Director or his authorized agent.

9. ADDITIONAL (EXTRA) WORK (EXTRA WORK AUTHORIZATION or EWA)

A. The Parks and Maintenance Director, or his authorized agent, may, at his discretion, authorize the Contractors to perform additional work. Additional work (work not related to "Damages by Unknown Circumstances") shall be defined as work not included in this Agreement.

B. Prior to the Contractor performing any additional work, the Contractor shall prepare and submit a written description of why the additional work is required, what type of work is proposed, and a cost estimate for the additional work as stated. No work shall commence

without written authorization from the Parks and Maintenance Director, or his authorized agent. Notwithstanding the above authorization, when a condition exists where there is imminent danger of injury to the public or damage to property, the Parks and Maintenance Director, or his authorized agent may verbally authorize the work to be performed upon receiving a verbal estimate from the Contractor. However, within twenty-four (24) hours after receiving a verbal authorization, the Contractor shall submit a written estimate to the Parks and Maintenance Director, or his authorized agent, for approval.

C. The cost estimate for additional work shall consist of the following elements:

Base cost of labor plus fifteen percent (15%) for overhead and profit.

Actual cost of materials plus fifteen percent (15%) for overhead and profit (invoice from vendor shall be attached to each invoice turned in for payment).

City reserves the right to ask for payroll records. Materials may be provided by the City of Ontario.

D. Written authorization from the Parks and Maintenance Director, or his authorized agent, shall be by the issuance of a change order or signed bid. This change order or signed bid shall be considered an amendment to this Agreement and approved by the Parks and Maintenance Director, or his authorized agent, and Contractor.

E. All additional work shall commence on the agreed date and shall diligently proceed until completion. Contractor could use the labor force assigned to the contractual maintenance tasks to perform additional work if prior approval has been granted by the City representative.

F. Upon completion of the additional work, the Parks and Maintenance Director, or his authorized agent, shall be notified so that the work may be verified.

G. The Contractor shall submit an invoice for compensation with attached photocopies of original invoices for materials and a copy of signed bid. Compensation shall not exceed the written estimate. The Contractor's invoice shall be subject to audit and review by the City prior to payment.

H. The City of Ontario reserves the right to repair or contract with a third Party to perform such additional work (if bids are not received within 72 hours of official request and or if the proposed costs do not concur with contractor's labor rates and cost of materials)

10. CONTRACTOR LIABILITY

A. All damage to existing improvements located within areas and adjacent to areas under construction, which in the opinion of the Parks and Maintenance Director, or his authorized agent, are due to the Contractor's operation, shall be repaired or replaced at the Contractor's expense with exact (existing) materials and in an approved manner.

B. Such repairs or replacements shall be performed by the Contractor at no cost to the City and shall be accomplished as directed by the Parks and Maintenance Director or his/her authorized agent. Repairs shall be made immediately after damage or alteration occurs. Deductions shall be made from the Contractor's payments in the amount necessary to compensate the City for such repairs in the event such repair work is done by City forces, or another source.

C. Irrigation damage shall be repaired or replaced within the following time limits: Irrigation entities such as, but not limited to, (risers, heads, backflow device and cages, controllers, basket strainers, pressure regulators, irrigation wires and valves, valve boxes, irrigation pumps, ET gagues, rain buckets, antennas, flow sensors, and landscape lighting equipment) that are damaged during regular routine maintenance and become non- functional or non-efficient shall be replaced immediately. Mainline irrigation breaks shall be repaired within two (2) hours of being notified. All other irrigation repair and/or replacement shall be completed within 24 hours of being notified. (In the event that the mainline repairs require specialized parts and or materials, the contractor shall be responsible to request from the City additional time to complete the repair/s)

D. All damage to turf grass, groundcover, shrubs or trees, shall be repaired or replaced within three (3) working days of being notified. Damage to turf shall be repaired by replacement with the appropriate variety of bermudagrass sod or seeded with warm season seed and topper added. Damage to groundcover shall be repaired by replacement with the appropriate variety of plant material. Size and spacing shall be determined by the Parks and Maintenance Director, or his authorized agent. Damage to shrubs may be corrected by appropriate pruning; however, if in the opinion of the Parks and Maintenance Director, or his authorized agent, the damage is severe, the shrub (in its entirety) shall be removed and replaced with a similar variety and size.

E. Damage to trees shall be repaired in the following manner:

Minor damage, such as bark lost from mechanical equipment shall be remedied by a certified Arborist. If the damage results in the loss of the tree, or, if in the opinion of the Parks and Maintenance Director or his authorized agent, the damage is severe, the damaged tree shall be removed and replaced with a similar variety and size. All damage resulting from chemical application and/or operation, either by spray-drift, improper application, lateral leaching, or other means shall be corrected in accordance with the previous provisions and the soil conditioned to ensure its ability to support plant life. All work shall be inspected, verified, and completed to the satisfaction of the Parks and Maintenance Director, or his authorized agent.

11. INSPECTION/DRIVE

The City and an appointed representative of the Contractor shall conduct a once a month walkthrough to inspect each individual work area. It is the responsibility of the Contractor to set up the inspection time(s) five (5) working days prior to the walkthrough/inspection. It is a requirement that a six to twelve (6-12) month master calendar be set up within 30 days of the award of the contract to insure coordinated dates of inspection. This inspection is to ensure adequacy of maintenance, methods of performing the work are in compliance with the contract and allow all deficiencies to be corrected prior to invoice submission and payment. However, this shall not be construed to relieve the Contractor of the duty to provide continuous inspection of individual work areas. Discrepancies and deficiencies in the Contractor's work shall be brought to the attention of the Contractor and corrected in the manner prior to invoicing and payment.

12. HAZARDOUS CONDITIONS

It shall be the Contractor's responsibility to inspect, and identify, any condition(s) that renders any areas within this Agreement unsafe, as well as any unsafe practices occurring thereon. The Parks and Maintenance Director, or his authorized agent, shall be notified immediately using the myOntario App, as well as text or phone call, of any unsafe condition that requires major correction.

The Contractor shall be responsible for making minor corrections including, but not limited to, filling holes in landscaped areas, diverting water sheet flow, using barricades, danger tape or traffic cones to alert persons of the existence of hazards and replacing valve box covers so as to protect all persons from injury.

The Contractor shall inspect all work sites for hazards, or potential hazards in the contractual areas daily.

During the required inspection of all work sites for hazards, or potential hazards, the Contractor shall immediately contact the City representative (either e-mail or text) indicating the condition, date, and the area that was inspected and a work order should be created using the myOntario App.

The Contractor shall cooperate fully with the City of Ontario in the investigation of any accidental injury or death occurring on the premises, including the submission of a complete written report thereof to the Parks and Maintenance Director within three (3) days following the occurrence.

13. REMOVING OBSTRUCTION AND MAINTENANCE OF EXISTING IMPROVEMENTS

Where the work is to be constructed in, or adjacent to, areas which have been improved by lawns, trees, shrubs, or gardens, the Contractor shall remove such trees or plants as may be necessary for the prosecution of the work and give them proper care and attention until the work has been satisfactorily completed, after which the Contractor shall replace them in as nearly the original condition and location as is reasonably possible. Where it is necessary to deposit the excavated materials on lawns during the process of construction, the Contractor shall first lay burlap or canvas on the lawn to prevent contact between the excavated material and turf grass. Unless otherwise indicated in the contract documents, all utility lines, conduits, wires, or structures shall be maintained by the Contractor and shall not be disturbed, disconnected or damaged by them during the progress of the work, provided, that should the Contractor in the performance of the work disturb, disconnect, or damage any of the above, all expense, arising from such disturbance, or in the replacement or repair thereof, shall be borne by the Contractor. However, in accordance with Section 4215 of the California Government Code, the Contractor shall be compensated 1) for the cost of locating and repairing damage to main or trunk line utility facilities located on the job site, not due to the failure of the Contractor or exercise reasonable care; 2) for costs of removing or relocating such utility facilities not indicated in the contract documents with reasonable accuracy; and 3) for the operation cost for equipment on the project necessarily idled such work.

At least two (2) working days prior to commencing any excavation pursuant to this Contract, the Contractor shall contact Underground Service Alert at (800) 422-4133 or other appropriate regional notification center if the excavation will be conducted in an area which is known, or reasonably should be known, to contain subsurface installations.

14. CONTRACTOR STAFF

The contractor shall provide the manpower as a minimum staffing requirement to comply with the performance of the landscape/irrigation maintenance specifications and requirements of the site.

The Contractor shall furnish one (1) supervisor with a minimum of 5 years of landscape and irrigation maintenance experience and sufficient supervisory and working personnel capable of promptly accomplishing all tasks on schedule, to the satisfaction of the Parks and Maintenance Director, or his authorized agent, all work required under this contract during the prescribed hours (6:30 AM to 4:00 pm). **Staffing shall be as needed plus any additional workforce to complete the maintenance/construction tasks required on the frequency page.** Payment will be based upon completed, acceptable work, Irrigation technician and spray technician to be provided as needed (personnel needs do not address the alternates per bid forms). Incomplete or unacceptable work will result in a delay or reduction of billing payment.

The Contractor shall have a competent supervisor, who is capable of communicate effectively both in written and oral English and discuss matters pertaining to this contract. Supervisor must be able to demonstrate to the satisfaction of the Parks and Maintenance Director, or his authorized agent, that they possess an adequate technical background. Adequate and competent supervision shall be provided for all work done by the Contractor's employees to ensure accomplishment of high-quality work, which will be acceptable to the Parks and Maintenance Director or his authorized agent.

Any order or communication given to the supervisor shall be deemed as delivered to the Contractor. The contractor shall use the free myOntario App. The use of a Smart phone will be required.

The contractor shall provide the minimum staffing requirements to comply with the performance of the landscape maintenance specifications and requirements of the site. Personnel shall be on site ready to work no later than 6:30am.

The Contractor, and their employees, shall always conduct themselves in a proper and efficient manner and shall cause the least possible annoyance to the public. The Parks and Maintenance Director or his authorized agent, may require a Contractor to remove from the work site any employee(s) deemed careless, incompetent, or otherwise objectionable, whose continued employment on the job is considered to be contrary to the best interest of the City of Ontario.

The Contractor shall require each of his employees to wear basic public works working attire. These are basically proper shoes, and other gear required by State Safety Regulation, and proper wearing of the clothing. Shirts shall be worn and always buttoned; safety vests "Type II" are required when indicated by the Work Area Traffic Control Handbook, the Parks and Maintenance Director or his authorized agent.

The Contractor shall establish an identification system for personnel assigned to the maintenance/construction site, which clearly indicates to the public the name of the Contractor and individual responsible for the construction/maintenance work. The identification system shall be furnished at the Contractor's expense and may include appropriate attire and name badges.

Contractor shall be responsible for traffic control (where needed) and shall be done per "WATCH" standards. Failure to comply with proper "WATCH" standards shall result in stoppage of all work until the proper traffic control is set up and could result in a fine. 1st violation $500.00, 2nd. Violation $ 1000.00, 3rd. violation and thereafter $ 3000.00 and/or possible cancellation of contract.

Inclement Weather

During inclement weather, (rainstorms, windstorms etc.) the contractor shall be required to contact the City representative prior to 7:00 am to receive clear direction of their assignments for the day. A minimum of two staff members shall be at the disposition of the City.

15. LOCAL OFFICE

A. The Contractor shall maintain an office with a telephone and provide at all times the following:

A responsible person(s), employed by the Contractor, which shall have the ability to take necessary action regarding all inquiries and/or complaints received from the Parks and Maintenance Director, or his authorized agent. This person(s) shall be accessible twenty-four (24) hours per day and seven (7) days per week. An answering service shall be considered an acceptable substitute to full-time coverage, outside of prescribed working hours, provided the Contractor is notified of any communication within one (1) hour after receipt of said communication. The telephone number(s) of the Contractor or responsible person(s) of the Contractor shall be a toll-free number for the City of Ontario.

B. During normal working hours, the Contractor's supervisors, who are responsible for providing contractual services, shall be available for notification through a landline or cellular telephone communication. This will allow the city to access the contractor at any time during City working hours.

16. STORAGE FACILITIES

The City of Ontario will not be providing storage facilities throughout the duration of this contract.

A. SIGNS

Contractor shall not post signs or advertising matter upon the areas under maintenance or improvements thereon, unless prior written approval is obtained from the Parks and Maintenance Director, or his authorized agent.

Contractor shall, always, remove all unauthorized signs and advertising matter such as, but not limited to, garage sale signs, yard sale signs, campaign signs and personal business signs in the area under maintenance.

17. LOCK AND KEYS

A. Where City of Ontario locks and keys are required as part of this contract, the Contractor shall:

Not duplicate any coded City key furnished by the city.

Surrender all keys furnished by the Parks and Maintenance Director or his authorized agent promptly at the end of the contract period, or at any time-deemed necessary by the Parks and Maintenance Director, or his authorized agent, to prevent loss to the City of Ontario.

Protect the security of City property by keeping controller cabinets and enclosure doors always locked.

Contact the City immediately if a security lock is non-functional and needs repair. Refrain from using premises behind locked doors for storage of materials, supplies or tools except as approved by the Parks and Maintenance Director or his authorized agent. In the event that the contractor staff who has been assigned keys to the facilities resigns from his position, it is the

sole responsibility of the contractor to retrieve the keys assigned to such staff member and return to the City.

18. UTILITIES

The City of Ontario shall pay for the maintenance related to water and electrical utilities.

When needed, water usage shall not exceed the budgeted amount to comply with the City Water Conservation efforts. A water budget may be provided by the City and shall be reviewed and adhered to by the Contractor. Water budget shall be approved by the Parks and Maintenance Director, or his authorized agent.

The Contractor may be charged for all excessive utility usage (using the current utility rate) due to the contractor's failure to manage and or monitor irrigation system malfunctions or unauthorized increases in water usage. The excess cost will be determined by comparing the current utility usage with historical usage data for the same period.

The excess cost factor shall be deducted from payments to the Contractor. However, the Contractor will be allowed three (3) working days, upon receiving notice, to explain in written documentation the cause of the increase in utility usage in question. A final determination (after review of Contractor's explanation) of the deduction will be assessed by the Parks and Maintenance Director or his authorized agent.

19. NON-INTERFERENCE

The Contractor shall not interfere with the public use of the premises and shall conduct their operations so as to offer the least possible obstruction and inconvenience to the public, nor disrupt the peace and quiet of the area within which the services are performed.

20. PARKING

A. The Contractor shall park their vehicles and equipment within designated parking areas or in such a location to ensure normal vehicular traffic.

B. The Contractor's vehicles and equipment shall not be parked or set in such a manner that they block pedestrian access or vehicular right-of-way except as required to comply with all safety standards of OSHA or CAL-OSHA. Failure to perform proper traffic control will result in a formal warning (first time), deduction of $500.00 per instance after formal warning has been given and contractor fails to comply.

21. EMERGENCY CALLS

A. The Contractor shall have the capability to receive and respond immediately to calls of an emergency nature during normal working hours and outside of normal working hours. Calls of an emergency nature received by the Parks and Maintenance Director or his authorized agent, shall be referred to the worksite Contractor for immediate disposition. If the work site Contractor cannot be reached within two (2) hours, the City will deduct from the monthly billing the cost of City forces, or other sources, used to repair the emergency. The Contractor shall not receive additional compensation for responding to emergencies for work included in these general conditions at contract work sites.

22. EXTRAORDINARY SERVICES

A. The Contractor shall be responsible for providing extraordinary maintenance and/or repairs to existing landscape and new landscape areas outside of their contract areas. Extraordinary services shall be defined as work not included in these general conditions or work required at a site for which there is no contract. Extraordinary maintenance shall include answering emergency calls as required. Contractors shall respond to an emergency call within two (2) hours. Contractors shall maintain a 24 hours per day, seven days per week, on-call service for emergency calls. The Contractor shall notify the Parks and Maintenance Director, or his authorized agent, by telephone within 24 hours of any emergency extraordinary work that is performed. Non-emergency extraordinary work requires written approval before the work is performed. Submission of an EWA and approval by the Parks and Maintenance Director, or his authorized agent will be necessary. The Contractor shall be compensated for extraordinary work as defined in Section 9.

B. In situations involving emergency repair work after normal work hours, Contractors shall dispatch qualified personnel and equipment to reach the site within two (2) hours. The Contractor's vehicle shall carry sufficient equipment to effect safe control of traffic. When the work site Contractor arrives at the site, the Contractor shall set up traffic warning and control devices, if deemed necessary and proceed to repair on a temporary/permanent basis.

C. If a City Representative is still at the site when the work site contractor arrives, the Contractor shall quickly evaluate the situation and discuss it with the City Representative. If the repair will take only a few minutes, the City Representative may stay to continue to direct traffic while the Contractor makes the repairs. If the repair will take longer than the City Representative

can wait, the Contractor shall immediately set up temporary traffic control devices and all other necessary warning devices and relieve the City Representative.

D. An emergency may be called by the following individuals or agencies at anytime for extraordinary services involving repair work:

1. City Manager
2. Police Department
3. Fire Department
4. Parks and Maintenance Director

E. The following emergency phone numbers are listed for the convenience of the Contractors:

Fire Department (Dispatch)	(909) 983-5911
Fire Department (Emergency)	911
Police Department (Dispatch)	(909) 986-6711
Police Department (Emergency)	911
Southern California Edison	(800) 655-4555
Southern California Gas	(800) 427-2200
Dig Alert	(800) 422-4133

23. REPORTING DAMAGE OR MALFUNCTION

Any damage to, or malfunction of, any facility not specifically stated in this Agreement shall be promptly reported to the Parks and Maintenance Director, or his authorized agent.

24. COMPENSATION FOR ROUTINE MAINTENANCE

The City shall compensate Contractors based upon the total dollar amount of a bid or the total dollar amount of a combination of bids, if applicable, in monthly installments beginning 30 days after the commencement of work. Billing adjustments may be made where authorized by this Agreement.

25. ADDITION OR DELETION OF LANDSCAPE AREAS

The Contractors shall maintain, at a unit price comparable to other existing landscape areas and subject to the Parks and Maintenance Director approval or his authorized agent's approval, additional landscape areas that the city adds to this contract. If notification is made of a new installation other than at the beginning of a monthly period, the unit cost negotiated and agreed upon by the parties, shall be prorated from the day the Contractor is notified to start maintenance. The City may elect to delete work sites, or portions thereof, within this Agreement at a unit price comparable to the bid price of said work sites.

26. DISCREPANCIES OR OMISSIONS

Should a bidder find discrepancies or omissions in the specifications or other documents, or be in doubt as to their true meaning, he may request a written interpretation from the Parks and Maintenance Director, or his authorized agent. Any interpretation, or change in the proposed documents, will be made only by addendum issued to each person to whom bid forms have been issued and shall become a part of the bid.

27. MINOR MODIFICATION

The Parks and Maintenance Director, or his authorized agent, may modify these specifications with the joint approval of the Contractor.

28. CONTRACTOR NON-COMPLIANCE

If the Parks and Maintenance Director, or his authorized agent, determines that there are deficiencies in the performance of this Agreement, the Parks and Maintenance Director, or his authorized agent, will provide a written inspection notice to the Contractor stating the deficiencies and specifying a time frame to correct the specified deficiencies. This time frame shall be reasonable, as determined by the Parks and Maintenance Director, or his authorized agent, to correct the specified deficiencies but not to exceed five 5 working days from the day of the inspection punch list. If the site(s) show obvious signs of non-performance, the Parks and Maintenance Director, or his authorized agent shall have the ability to immediately enforce partial or full deduction for the site in question. Should the Contractor fail to correct all deficiencies within the stated time frame, the Parks and Maintenance Director, or his authorized agent, may exercise the following measures:

A. Deduct from the Contractor's payment the amount necessary to correct the deficiency, including City overhead and impose a deficiency deduction.

B. Withhold the entire or partial payment.

C. Utilize City forces, or an alternate source, to correct the deficiency and deduct from the Contractor's payment the total cost, including City overhead. The Parks and Maintenance Director, or his authorized agent, shall decide all questions which arise as to the manner of performance and completion per schedule, acceptable fulfillment of the contract by the Contractor, interpretation of the specifications, and compensation to include completion of work by alternate sources. In addition to the provisions of Section 3.3, Contract Documents and Section 28 (B), in event of a failure to correct a deficiency, or for any other breach of this Agreement by the Contractor, the City of Ontario may immediately terminate this Agreement. If the contractor requires extra time to complete the deficiency list due to materials/parts shortage, the contractor shall request in writing only the time needed to be added and the reasons why. The City representative will review the request and shall respond to the contractor in writing of the decision made. Contractor shall present the request for extension within the first five (5) working days of the deficiency list.

29. PAYMENTS WITHHELD

The city may withhold entire or partial payment for reasons as follows:

A. Work required in the specifications, which is defective, incomplete, or not performed. Claims filed or reasonable evidence indicating probable filing of claims.
B. Failure of the Contractor to make payments properly to subcontractors, or for materials and/or labor. A reasonable doubt that the contract cannot be completed for the remaining balance.
C. Reports, logs, or other contractual written documentation required of the Contractor to be delivered to the Parks and Maintenance Director, or his authorized agent, which is/are incomplete or not performed.

30. WITHHELD CONTRACT FUNDS

The Contractors may, at his sole cost and expense, substitute securities equivalent to any monies withheld by the City to insure performance under the contract. Such securities shall be deposited with the City or with a State or Federally Chartered Bank as escrow agent who shall pay such monies to the Contractors upon satisfactory completion of the contract. The Contractor

shall be the beneficial owner of any securities substituted for monies withheld and shall receive any interest thereon. Securities eligible for investment under this section shall include those listed in Public Contract Code Section 22300. One definition of just cause for immediate contract termination is, if in the opinion of the Parks and Maintenance Director, or his authorized agent, the contract cannot or will not be completed by the Contractor in its entirety. In the event of such termination, the bonds required shall remain in effect for six (6) months after the date of termination to provide surety that any remedial work required at the time of termination will be completed.

If the Contractor fails to meet the specifications of this contract for any fifteen (15) consecutive or non-consecutive days, the Parks and Maintenance Director, or his authorized agent, may at his option terminate the balance of this contract by written notice of termination to the Contractor. Notice of such termination shall take effect three (3) days after such notice is mailed.

31. COMPLAINTS FROM CITY

The Contractor shall maintain an on-the-job a written log of all complaints which includes the date and time received and the action taken or the reason for non-action. The on-the-job log of complaints shall be available upon request from the City Representative. All complaints shall be abated as soon as possible after notification; but in all cases within 24 hours, to the satisfaction of the Parks and Maintenance Director, or his authorized agent. If any complaint is not abated within 24 hours, the Parks and Maintenance Director, or his authorized agent, shall be notified immediately of the reason for not abating the complaint, followed by a written report to the Parks and Maintenance Director or his authorized agent, within four (4) City working days.

If the complaints are not abated within the time specified, or to the satisfaction of the Parks and Maintenance Director or his authorized agent, the Parks and Maintenance Director, or his authorized agent, may correct the specific complaint and the total cost incurred by the City of Ontario shall be deducted and forfeited from the payments owing to the Contractor from the City of Ontario.

32. CONTRACTOR IS AN INDEPENDENT CONTRACTOR, INDEMNIFICATION

Contractor shall act under the contract as an Independent Contractor thorough the City of Ontario and will not be an agent, or employee of the City. Contractor shall not represent or otherwise hold out itself, or any of its subcontractors, directors, officers, partners, employees, or

agents, to be an agent or employee of the City. Contractors shall indemnify and otherwise hold harmless the City, its officials, officers, directors, employees, agents and other representatives, from all liability, loss, or damage, including reasonable attorney's fees and other costs of defense resulting from damage or injury to persons or property caused, or claimed to have been caused, by acts or omissions of the Contractor, or of any of its subcontractors, directors, officers, partners, employees, or agents in the course of, or in connection with the Contractor's performance under the contract. The Parties agree to cooperate fully in the resolution of any claims for such liability, loss, or damage.

33. SUBCONTRACTOR/ASSIGNMENT OF CONTRACT

Reference is hereby made to the provisions of The Subletting and Subcontracting Fair Practices Act (Government Code Sections 4100, et. seq.), which are incorporated herein and made a part hereof by this reference.

A copy of each subcontract, if in writing, or if not in writing, then a written statement signed by the Contractor, giving the name of the subcontractor, and the terms and conditions of such subcontract, shall be filed with the City before the subcontractor begins work. Each subcontract shall contain a reference to this agreement between the City and the Contractor, and the terms of that agreement between the City and the Contractor and all parts thereof shall be made a part of such subcontract insofar as applicable to the work covered thereby. Each subcontractor shall provide for its annulment by the Contractor at the order of the City, if, in the City's opinion, the subcontractor fails to comply with the requirements of the principal contract insofar as the same may be applicable to his work. Nothing herein contained shall create any contractual relation between any subcontractor and the City or relieve the Contractor of any liability or obligation hereunder.

Contractor shall not assign, transfer, convey or otherwise dispose of this contract, or of his rights of interests in or to the same or any part hereof, without the previous consent in writing of the Parks and Maintenance Director, or his authorized agent. If the Contractor, without such previous written consent assigns, transfers, conveys, or otherwise disposes of the contract, or of his rights or interests therein, the contract may, at the option of the City, be terminated and revoked, and the City shall there upon be relieved and discharged from all liability and obligations arising out of the same to the Contractor, and to his assignee or transferee. No right under the contract, nor any right to any money to become due hereunder, shall be asserted against the City in law or equity by reason of any so-called assignment of the contract, or any

part thereof unless authorized by the written consent of the Parks and Maintenance Director, or his authorized agent.

34. COMPLIANCE WITH THE LAW

Contractor agrees that their performance under this contract shall comply with all applicable laws of the United States of America, the State of California, the county of San Bernardino, the City of Ontario and any other political entity having jurisdiction over the activities of the Contractors. The Contractor State License Board for the State of California has administratively determined in writing that a C-27 Contractor License is required to provide the service as set forth in the contract and specifications. Therefore, each bidder will be required to hold a valid C-27 Contractor License.

35. PAYROLL

Section 1776, Chapter 1 of Division 2, from the California Labor Code requires that each Contractor and Subcontractor keep an accurate payroll record, showing the name, address, social security number, work classification, straight time and overtime hours worked each day and each week, and the actual per diem wages paid each journeyman, apprentice or worker employed by him.

The employee's own payroll records shall be available for inspection, and a copy shall be made available to the employee or his authorized representative, the Division of Labor Standards Enforcement and the Division of Apprenticeship Standard.

Pursuant to Labor Code Section 1778.8, the Contractor agrees to pay travel and subsistence payments to each workman needed to execute the work in accordance with the applicable collective bargaining agreements filed with the Department of Industrial Relations.

36. LABOR STRIKE

It shall be the responsibility of each contractor to provide continuous contractual services, without any interruption.
In case of any labor strikes, the Contractor shall provide other means, as its own cost, to provide a comparable continuous contractual service as if there were no strike.
Failing to do so will cause the Parks and Maintenance Director, or his authorized agent, to take whatever action is deemed necessary to provide such service and the cost will be borne by the Contractor.

37. DEBRIS DISPOSAL

Blowing and disposing of any debris into the Storm Drain system and/or streets shall not be permitted. If found, Contractor will face liquidating damages as follows; 1st violation $ 500.00, 2nd. violation $1000.00, 3rd. violation and thereafter $3000.00 and/or possible cancellation of contracts.

38. TREE CARE

A. Tree Trimming

The Contractor shall be responsible for all tree under-trimmings, including the removal of palm fronds and flower stalks (if present). All trees are to be under-trimmed to ensure public and vehicle safety or as directed by the Parks and Maintenance Director, or his authorized agent. Contractor shall have a Certified Arborist on staff to meet the following criteria:

Contractor shall prune palm trees at no extra cost to the City (dead fronds and flower stalks) annually, removal of fruit (dates) if present shall be done twice per year as designated by the Parks and Maintenance Director or his authorized agent.

All trees in the work site shall be maintained in their natural shapes. This work shall be accomplished in a manner which will ensure that each individual tree is under-trimmed carefully to promote the tree's health and appearance.

All work shall be of the highest quality and performed in accordance with City approved tree trimming standards.

All trees shall be continually maintained free of all dead, diseased and damaged branches back to the point of breaking. In cases where the dead, diseased or damaged branches are beyond the reach of a tree pruning pole saw being operated from ground level, the Contractor is to notify the City within 24 hours. Cuts must be made flush with the collar to promote proper healing. Pruning tools shall be adequately sharpened to provide clean cuts and shall be properly sterilized to reduce spread of disease.

All sucker growth is to be removed from trees as it occurs.

The Contractor shall maintain all branches which encroach on or over sidewalks at a minimum height of ten feet (10') clearance. The Contractor shall notify the city within 24 hours of any

branches encroaching beyond the curb line into the street that cannot be reached with a pole saw.

All branches which encroach over private property, shall be removed as directed.

The Contractor shall not remove or disturb any tree central leader without prior written approval from the Parks and Maintenance Director, or his authorized agent.

39. WEED CONTROL

Weeds are defined in the dictionary as:
“A wild plant growing where it is not wanted and in competition with cultivated plants."
When classified by their gross morphological features, weeds are broken down into three major categories: grasses, sedges, and broadleaf weeds.
Full control of these 3 categories of weeds will be achieved with a combination of selective and non-selective herbicides as well as mechanical removal. **Weeds should not be visible.**
All areas within the specified maintenance area, including but not limited to, turf grass, shrub and ground cover areas, planters, tree wells, landscape areas, and softball/baseball infields shall be kept free of weeds at all times. At no time shall any weed be over 4” tall.

Weed removal shall consist of complete removal of all weeds, including top growth and roots.
Weed control shall be performed as needed.
Weeds shall be controlled either by hand, mechanical or chemical methods; however, the Parks and Maintenance Director, or his authorized agent, may restrict the use of chemical weed control in certain areas.

40. USE OF CHEMICALS

The Contractor shall submit a list of all chemical herbicides, pesticides, and rodenticides proposed for use under this contract for approval by the Parks and Maintenance Director or his authorized agent with the signed contract. Materials included on this list shall be limited to chemicals approved by the State of California Department of Food and Agriculture, and shall include the exact brand name and generic formulation. The use of any chemical on the list shall be based on the recommendations of a California State Licensed Pest Control Advisor where required by law.

The use of chemicals shall conform to the current San Bernardino County Agriculture Commissioner regulations. No chemical herbicide, rodenticide or pesticide shall be applied until

its use is approved, in writing, by the Parks and Maintenance Director, or his authorized agent as appropriate for the purpose and area proposed.

Required spray equipment will consist of at least one (1) medium spray rig of 100-gallon (minimum) capacity or more and backpack sprayers provided for each crew performing chemical landscape maintenance.

41. LITTER

All areas in the work sites shall be kept free of, but not limited to, the following items: bottles, glass, broken glass, cans, paper, cardboard, metallic items, feces, leaves, tumbleweeds and other debris on a daily basis.

The Contractor shall promptly remove from the work area, all debris generated by their performance and dispose of the debris in a legal manner. The City does not allow any dumping of debris generated by your daily work in City facilities. Illegal dumping picked up by contractors shall be brought up to the City yard for proper disposal. Excessive dumping (above and beyond reasonable) after long holiday weekends and special events shall be reported immediately to the City Representative.

Hazardous waste as well as homeless belongings shall not be picked up. Contractor shall contact City Representative to arrange proper disposal by City forces. A myOntario App service request shall be created to report the hazardous conditions.

42. GENERAL

A. Trash Removal

Remove all trash and accumulated debris from the work sites daily. In addition, any type of feces is also to be removed from the walkways, turf or ground cover areas and dumpster areas.

B. Policing of Areas

All maintained areas shall be policed based on frequencies.

C. Curb and Gutter Maintenance

The Contractor is responsible for removal of all weeds and grass growing in and around the curb and gutter area monthly. The Contractor is responsible for insuring the roadway is cleared

of all dirt and debris within four (4) feet of the curb and gutter in all areas adjacent to maintenance responsibilities.

D. Walkway Maintenance

Walkways shall be cleaned immediately following mowing and edging and cleaned by use of power sweeping or blower equipment. All walkway cracks and expansion joints shall be maintained weed and grass free at all times.

E. Drain Maintenance

All drains and catch basins shall be kept free of siltation and debris at all times. All V-ditches and drainage areas shall be kept clean and edged weekly by the Contractor. Cleaning of drain basins shall be done monthly, Contractor shall inspect weekly to make sure that grates are secured, if missing, Contractor shall replace at City's expense. Damaged grates due to Contractor's operations shall be replaced at Contractors expense.

F. Removal of Leaves

Accumulation of leaves shall be removed from all designated landscape areas on a monthly basis and under trees once per month or more as needed.

G. Hardscape Power Wash

All concrete areas shall be cleaned using a power washer (hot steam cleaning washer) to remove soda spills, gum and other stains that might be present. The City Representative will make the final determination if the service is needed.

The use of a biodegradable cleaner (soap) is required and permitted. Containment of contaminated soapy water shall be the responsibility of the Contractor.

43. REPAIR AND SERVICE OF WALKWAYS AND MISCELLANEOUS IMPROVEMENTS

Walkways and Service Roads - All walkways and service roads, if any, shall be maintained by the Contractor so as to keep the integrity of the walking or driving surface in a safe, unimpaired condition.

The Contractor will not be responsible for total replacement of roadways or walkways as a result of normal deterioration but will be required to replace all improvements damaged by his negligence.

It will be the responsibility of the Contractor to repair or replace miscellaneous improvements such as signs and mowing strips, or any other structural improvements within the work sites, unless otherwise specified. The Contractor shall be entitled to additional compensation for these services as stated. The contractor shall communicate any improvements needed prior to repairs to the Parks and Maintenance Director or his authorized agent for proper approvals.

44. CITY OF ONTARIO myOntario App (FREE)

Contractor shall download the free myOntario App for the purpose of tracking completed specialty tasks (mulching, vandalism, vehicular damage, rose trimming, fertilizations, chemical applications, illegal dumping, hazardous waste, pruning shrubs, downed branches and rodent control, restroom issues). All specialty tasks shall be recorded as a service request using the app order system and shall be reported to the city representative when completed. City staff will close the service request.

NOTICES

Any notice, demand, request, consent, approval, or communication that either Party desires, or is required to give to the other Party or any other person, shall be in writing and either served personally, sent by prepaid, first-class mail, or by email followed by mailing of said notice.

PERFORMANCE/PAYMENT BONDS ON THE NEXT PAGE

PERFORMANCE BOND

KNOW ALL PERSONS BY THESE PRESENTS:

THAT WHEREAS, the City of Ontario (hereinafter referred to as "City") has awarded to _____, (hereinafter referred to as the "Contractor") _____ an agreement for _____ (hereinafter referred to as the "Project").

WHEREAS, the work to be performed by the Contractor is more particularly set forth in the Contract Documents for the Project dated _____, (hereinafter referred to as "Contract Documents"), the terms and conditions of which are expressly incorporated herein by reference; and

WHEREAS, the Contractor is required by said Contract Documents to perform the terms thereof and to furnish a bond for the faithful performance of said Contract Documents.

NOW, THEREFORE, we, _____, the undersigned Contractor and _____ as Surety, a corporation organized and duly authorized to transact business under the laws of the State of California, are held and firmly bound unto the City in the sum of _____ DOLLARS, ($_____), said sum being not less than one hundred percent (100%) of the total amount of the Contract, for which amount well and truly to be made, we bind ourselves, our heirs, executors and administrators, successors and assigns, jointly and severally, firmly by these presents.

THE CONDITION OF THIS OBLIGATION IS SUCH, that, if the Contractor, his or its heirs, executors, administrators, successors or assigns, shall in all things stand to and abide by, and well and truly keep and perform the covenants, conditions and agreements in the Contract Documents and any alteration thereof made as therein provided, on its part, to be kept and performed at the time and in the manner therein specified, and in all respects according to their intent and meaning; and shall faithfully fulfill all obligations including the one-year guarantee of all materials and workmanship; and shall indemnify and save harmless the City, its officers and agents, as stipulated in said Contract Documents, then this obligation shall become null and void; otherwise it shall be and remain in full force and effect.

As a condition precedent to the satisfactory completion of the Contract Documents, unless otherwise provided for in the Contract Documents, the above obligation shall hold good for a period of one (1) year after the acceptance of the work by City, during which time if Contractor shall fail to make full, complete, and satisfactory repair and replacements and totally protect the City from loss or damage resulting from or caused by defective materials or faulty workmanship, Surety shall undertake and faithfully fulfill all such obligations. The obligations of Surety hereunder shall continue so long as any obligation of Contractor remains. Nothing herein shall limit the City's rights or the Contractor or Surety's obligations under the Contract, law or equity, including, but not limited to, California Code of Civil Procedure section 337.15.

Whenever Contractor shall be, and is declared by the City to be, in default under the Contract Documents, the Surety shall remedy the default pursuant to the Contract Documents, or shall promptly, at the City's option:

(1) Take over and complete the Project in accordance with all terms and conditions in the Contract Documents; or

(2) Obtain a bid or bids for completing the Project in accordance with all terms and conditions in the Contract Documents and upon determination by Surety of the lowest responsive and responsible bidder, arrange for a Contract between such bidder, the Surety and the City, and make available as work progresses sufficient funds to pay the cost of completion of the Project, less the balance of the contract price, including other costs and damages for which Surety may be liable. The term "balance of the contract price" as used in this paragraph shall mean the total amount payable to Contractor by the City under the Contract and any modification thereto, less any amount previously paid by the City to the Contractor and any other set offs pursuant to the Contract Documents.

(3) Permit the City to complete the Project in any manner consistent with local, California and federal law and make available as work progresses sufficient funds to pay the cost of completion of the Project, less the balance of the contract price, including other costs and damages for which Surety may be liable. The term "balance of the contract price" as used in this paragraph shall mean the total amount payable to Contractor by the City under the Contract and any modification thereto, less any amount previously paid by the City to the Contractor and any other set offs pursuant to the Contract Documents.

Surety expressly agrees that the City may reject any contractor or subcontractor which may be proposed by Surety in fulfillment of its obligations in the event of default by the Contractor.

Surety shall not utilize Contractor in completing the Project nor shall Surety accept a bid from Contractor for completion of the Project if the City, when declaring the Contractor in default, notifies Surety of the City's objection to Contractor's further participation in the completion of the Project.

The Surety, for value received, hereby stipulates and agrees that no change, extension of time, alteration or addition to the terms of the Contract Documents or to the Project to be performed thereunder shall in any way affect its obligations on this bond, and it does hereby waive notice of any such change, extension of time, alteration or addition to the terms of the Contract Documents or to the Project, including but not limited to the provisions of sections 2819 and 2845 of the California Civil Code.

PAYMENT BOND

KNOW ALL MEN BY THESE PRESENTS That

WHEREAS, the City of Ontario (hereinafter designated as the "City"), has awarded to _____ hereinafter designated as the "Principal," a contract for the work described as follows:

_____ (the "Project"); and

WHEREAS, the work to be performed by the Principal is more particularly set forth in the Contract Documents for the Project dated _____ ("Contract Documents"), the terms and conditions of which are expressly incorporated by reference; and

WHEREAS, said Principal is required to furnish a bond in connection with said contract; providing that if said Principal or any of its Subcontractors shall fail to pay for any materials, provisions, provender, equipment, or other supplies used in, upon, for or about the performance of the work contracted to be done, or for any work or labor done thereon of any kind, or for amounts due under the Unemployment Insurance Code or for any amounts required to be deducted, withheld, and paid over to the Employment Development Department from the wages of employees of said Principal and its Subcontractors with respect to such work or labor the Surety on this bond will pay for the same to the extent hereinafter set forth.

NOW THEREFORE, we, the Principal and _____ as Surety, are held and firmly bound unto the City in the penal sum of _____ _____ Dollars ($_____) lawful money of the United States of America, for the payment of which sum well and truly to be made, we bind ourselves, our heirs, executors, administrators, successors and assigns, jointly and severally, firmly by these presents.

THE CONDITION OF THIS OBLIGATION IS SUCH that if said Principal, his or its subcontractors, heirs, executors, administrators, successors or assigns, shall fail to pay any of the persons named in Section 9100 of the Civil Code, fail to pay for any materials, provisions or other supplies, used in, upon, for or about the performance of the work contracted to be done, or for any work or labor thereon of any kind, or amounts due under the Unemployment Insurance Code with respect to work or labor performed under the contract, or for any amounts required to be deducted, withheld, and paid over to the Employment Development Department or Franchise Tax Board from the wages of employees of the contractor and his subcontractors pursuant to Section 18663 of the Revenue and Taxation Code, with respect to such work and labor the Surety or Sureties will pay for the same, in an amount not exceeding the sum herein above specified.

This bond shall inure to the benefit of any of the persons named in Section 9100 of the Civil Code so as to give a right of action to such persons or their assigns in any suit brought upon this bond.

It is further stipulated and agreed that the Surety on this bond shall not be exonerated or released from the obligation of this bond by any change, extension of time for performance, addition, alteration or modification in, to, or of any contract, plans, specifications, or agreement pertaining or relating to any scheme or work of improvement herein above described, or pertaining or relating to the furnishing of labor, materials, or equipment therefore, nor by any change or modification of any terms of payment or extension of the time for any payment pertaining or relating to any scheme or work of improvement herein above described, nor by any rescission or

attempted rescission of the contract, agreement or bond, nor by any conditions precedent or subsequent in the bond attempting to limit the right of recovery of claimants otherwise entitled to recover under any such contract or agreement or under the bond, nor by any fraud practiced by any person other than the claimant seeking to recover on the bond and that this bond be construed most strongly against the Surety and in favor of all persons for whose benefit such bond is given, and under no circumstances shall Surety be released from liability to those for whose benefit such bond has been given, by reason of any breach of contract between the owner or City and original contractor or on the part of any obligee named in such bond, but the sole conditions of recovery shall be that claimant is a person described in Section 9100 of the Civil Code, and has not been paid the full amount of his claim and that Surety does hereby waive notice of any such change, extension of time, addition, alteration or modification herein mentioned and the provisions of sections 2819 and 2845 of the California Civil Code.

CITY OF ONTARIO *Agenda Report* **August 20, 2024**	**SECTION:** **CONSENT CALENDAR**
Department: Public Works Prepared By: Niles Boyer Staff Member Presenting: Tito Haes, Executive Director Public Works Reviewed By: Gina Gomez, Bonnie Tam Approved By:	Submitted To: Council/OHA Approved: _____ Continued To: _____ Denied: _____ Item No: 19

SUBJECT: **AN AMENDMENT TO THE DESIGN SERVICES AGREEMENT WITH ROBERT BORDERS AND ASSOCIATES FOR ON-CALL ARCHITECTURAL DESIGN SERVICES FOR THE JOHN GALVIN PARK SNACK BAR RENOVATION PROJECT**

RECOMMENDATION: That the City Council authorize the City Manager, or his designee, to execute Amendment No. 21 to the on-call Design Services Agreement with Robert Borders and Associates, of Costa Mesa, California, to provide on-call architectural design services for the PF2307 John Galvin Park Snack Bar Renovation Project in the amount of $20,078 for a total not-to-exceed contract amount of $858,209 and extend the term to June 30, 2025.

THE FOLLOWING COUNCIL GOALS ARE BEING ACHIEVED:
Invest in the City's Infrastructure (Water, Streets, Sewers, Parks, Storm Drains and Public Facilities)

FISCAL IMPACT: The Fiscal Year 2024-25 Adopted Budget includes appropriations in the Capital Projects-Measure Q Fund for the PF2307 John Galvin Park Snack Bar Renovation Project. The recommended Amendment No. 21 will increase the total contract amount by $20,078, funded by Measure Q, for a total not-to-exceed contract amount of $858,209. The total contract amount of $858,209 for the on-call Agreement with Robert Borders and Associates includes on-call work performed for various citywide projects.

BACKGROUND & ANALYSIS: On February 20, 2024, City Council approved Amendment No. 20 to the Design Services Agreement with Robert Borders and Associates for on-call architectural design services for the Homer Briggs Park and Anthony Munoz Park concession area upgrades and roof design projects.

The recommended Amendment No. 21 will include a demolition plan for the concrete bleachers and revisions to the design of the roof for accommodation of the roof mounted Heating, Ventilation, and Air Conditioning (HVAC) System for the concession kitchen range hood exhaust system, the design of an in-ground grease waste interceptor at the Latimer Field concession building at John Galvin Park. Additionally, the architectural design services include schematic design and design development, preparation of construction documents, structural and mechanical engineering, and consultant coordination.

AMENDMENT NO. 21 TO THE DESIGN SERVICES AGREEMENT BETWEEN THE CITY OF ONTARIO AND ROBERT BORDERS AND ASSOCIATES

1. Parties and Date.

This Amendment No. 21 to the Agreement (as defined herein) is made and entered as of _____, by and between the City of Ontario ("City") and Robert Borders and Associates, a Corporation ("Consultant"). City and Consultant are sometimes individually referred to as "Party" and collectively as "Parties."

2. Recitals.

2.1 Agreement. The City and Consultant have entered into an agreement entitled "Design Services Agreement" dated January 1, 2020 ("Agreement").

2.2 Amendment Purpose. The City and Consultant desire to amend the Agreement to revise the scope of services for the Eastern Little League Latimer Baseball Field Concession Building and Bleachers Renovation Project set forth in Amendment No. 21 – Attachment "A" and increase the not-to-exceed amount by **Twenty Thousand Seventy-Seven Dollars and Fifty Cents ($20,077.50)**. The Parties have heretofore entered into that Amendment No. 1 dated March 15, 2020, Amendment No. 2 dated June 22, 2020, Amendment No.3 dated November 19, 2020, Amendment No. 4 dated December 5, 2020, Amendment No. 5 dated January 15, 2021, Amendment No. 6 dated April 6, 2021, Amendment No. 7 dated August 11, 2021, Amendment No. 8 dated September 30, 2021, Amendment No. 9 dated September 30, 2021, Amendment No. 10 dated February 1, 2022, Amendment No. 11 dated October 1, 2022, Amendment No. 12 dated January 5, 2023, Amendment No. 13 dated May 17, 2023, Amendment No. 14 dated June 20, 2023, Amendment No. 15 dated June 20, 2023, Amendment No. 16 dated August 15, 2023, Amendment No. 17 dated September 19, 2023, Amendment No. 18 dated November 7, 2023, Amendment No. 19 dated November 7, 2023, and Amendment No. 20 date February 2, 2024.

2.3 Amendment Authority. This Amendment No. 21 is authorized pursuant to Section 3.8.1 of the Agreement.

3. Terms.

3.1 Amendment. Section 3.10.1 of the Agreement is hereby amended in its entirety to read as follows:

"3.10.1 Consultant's Compensation for Basic Services. City shall pay to Consultant, for the performance of all Services rendered under this Agreement, with the total not to exceed amount of **Eight Hundred Fifty-Eight Thousand Two Hundred E i g h t dollars with Fifty Cents ($858,208.50)** ("Total Compensation"). This Total Compensation amount shall be based upon, and may be adjusted according to, the fee schedule and related terms and conditions attached hereto as Exhibit "B" and incorporated herein by reference. The Total Compensation, as may be adjusted upon mutual agreement, shall constitute complete and adequate payment for Services under this Agreement.

Exhibit A is hereby deleted in its entirety and replaced with Attachment A attached hereto and incorporated herein by reference.

3.2 Continuing Effect of Agreement. Except as amended by this Amendment No. 21 all other provisions of the Agreement remain in full force and effect and shall govern the actions of the parties under this Amendment No. 21. From and after the date of this Amendment No. 20, whenever the term "Agreement" appears in the Agreement, it shall mean the Agreement as amended by this Amendment No. 21.

3.3 Adequate Consideration. The Parties hereto irrevocably stipulate and agree that they have each received adequate and independent consideration for the performance of the obligations they have undertaken pursuant to this Amendment No. 21.

3.4 Severability. If any portion of this Amendment No. 21 is declared invalid, illegal, or otherwise unenforceable by a court of competent jurisdiction, the remaining provisions shall continue in full force and effect.

3.5 Integration. This Amendment represents the entirety of the Parties' understanding relating to the subject of this Amendment, including written or verbal communications between the Parties, which shall have no relevance unless expressly incorporated herein. This is an integrated amendment.

Ontario, CA 91761

Attention : Niles Boyer, Project Manager
Parks Department
Project: Latimer Park Little League Concessions
Ontario, CA
Project No: 23017
Subject: Letter of Authorization Number One

Dear Mr. Boyer:

This Letter of Authorization (LOA) No. One is written to document our authorization to provide Additional Services under the terms of our Agreement for this project. The following services have been requested that are a change to the original Basic Services scope of work.

1. Revisions for the re-design of the roof mounted HVAC system required for the development of the Concession Stand based on the requirement for a commercial kitchen. The required equipment and hood necessitated a roof change to accommodate the equipment located on the roof.
2. Miscellaneous items including revision to add a grease waste interceptor, Path of Travel documentation and separate plan for bleacher demolition site work.

Compensation for this work will consist of the following:

Architectural	
Design Development	$ 4,612.50
Construction Documents	$ 7,015.00
Structural Engineering:	$ 3,450.00
Mechanical Engineering:	$ 4,025.00
Consultant Coordination	$ 975.00
Total	$ 20,077.50

Total Fee LOA One **$ 20,077.50**

Compensation: This work will be completed on a time-and-material basis. Total compensation for Letter of Authorization (LOA) No. One will not exceed **$ 20,077.50** plus any reimbursable expenses without prior approval from the City of Ontario.

This Letter of Authorization No. One authorizes the Additional Services work described above. Please execute this authorization by signing in the space provided below and return one copy for our files.

Sincerely,

BORDERS ARCHITECTS

Loren Della Marna
Principal

CITY OF ONTARIO *Agenda Report* **August 20, 2024**	**SECTION:** **CONSENT CALENDAR**
Department: Broadband Operations Prepared By: Judy Witrago Staff Member Presenting: Jimmy Chang, Broadband General Manager Approved By:	Submitted To: Council/OHA Approved: _____ Continued To: _____ Denied: _____ Item No: 20

SUBJECT: A CHANGE ORDER TO THE CONSTRUCTION CONTRACT WITH SECC CORPORATION FOR ON-CALL CONDUIT AND CABLE INSTALLATION

RECOMMENDATION: That the City Council authorize Change Order No. 1 to Construction Contract No. BB-2022-002 with SECC Corporation of Chino, California, for on-call citywide fiber conduit installation services, in the amount of $277,403 for a revised total of $3,277,403; and authorize the City Manager, or his designee, to execute said contract and future amendments within the authorization limits.

THE FOLLOWING COUNCIL GOALS ARE BEING ACHIEVED:
Invest in the Growth and Evolution of the City's Economy
Operate in a Businesslike Manner
Invest in the City's Infrastructure (Water, Streets, Sewers, Parks, Storm Drains and Public Facilities)

FISCAL IMPACT: The Fiscal Year 2024-25 Adopted Budget includes appropriations for construction support services for the Ontario Municipal Utilities Company (OMUC) Facility Site Security Improvement Project (WA0205). If approved, appropriations will be included in future Annual Budgets to the City Council for approval as needed to fund Change Order No. 1 for on-call citywide fiber conduit installation services.

BACKGROUND & ANALYSIS: On January 17, 2023, Construction Contract No. BB-2022-002 was awarded to SECC Corporation for on-call conduit installation services in the amount of $3,000,000. SECC Corporation supports the Broadband Departments' Phase 1 Fiber Broadband Expansion project, approved by the City Council on July 20, 2021, and Broadband construction projects for fiber optic conduit installation services throughout the City.

Change Order No. 1 will support unscheduled work to support City infrastructure, as stated in the Fiber Optic Master Plan (on file with the Records Department). The Fiber Optic Master Plan enables and supports future capabilities and initiatives that will reduce telecommunication costs for City facilities and represent technology improvements such as digital building access control, surveillance video services, and public safety monitoring. In addition to the extra work associated with Change Order No. 1, supplementary construction unit codes associated with fiber optic micro-

trenching will be incorporated within the current SECC construction unit table, as shown in Exhibit A. The City Engineering Department recently approved Standard Drawing 1308 for micro-trenching construction, as shown in Exhibit B. The micro-trenching construction method will support and enhance ongoing fiber optic expansion efforts citywide by reducing service delivery schedules and overall construction costs. Micro-trenching construction work unrelated to the OMUC Facility Site Security Improvement Project will be funded through existing contract funds.

OMUC has agreed to fund Change Order No. 1 to construct fiber conduit infrastructure at the following locations, however, locations are subject to change based on priority, schedule, and requirements of OMUC and the Broadband Department, as shown in Exhibit C.

OntarioNet will provide secure, reliable, and high bandwidth connectivity for OMUC's Supervisory Control and Data Acquisition (SCADA) operation system and Information Technology connectivity for surveillance property protection of the City's water production infrastructure. The surveillance property protection will include cameras and access control which will provide a level of accountability for security and integrate into the Ontario Police Department's Real-Time Information Center.

The City has purchased all conduit, fiber, network, and wireless components such as fiber optic cable, conduit, handholes, network switches, etc. SECC Corporation collects the materials from the City's warehouse and provides the labor to complete the assigned work. Having the material and equipment on hand during construction lessens supply chain delays for fiber optic material and network equipment procurement and eliminates costly overhead and markup charges.

City Staff recommends approving Change Order No. 1 to continue these services and City facility growth provided by SECC Corporation.

CITY OF ONTARIO
CHANGE ORDER

Project: On-Call Citywide Fiber Conduit Installation Services
Contract Date: **01/31/2023**

Change Order Number: **1**
Change Order Date: August 20, 2024

To: SECC Corporation
502 N Sheridan Sr
Corona, California 92878

THIS CHANGE ORDER FORM SHALL BE USED FOR ALL CHANGE ORDERS ASSOCIATED WITH THE WORK. NO ADDITIONS OR DELETIONS TO THIS FORM SHALL BE ALLOWED, EXCEPT WITH PERMISSION OF THE CITY OF ONTARIO.

The Contract is changed as follows:

The City has requested the Contractor to extend limits of fiber conduit installation services to the following City facilities:

See Exhibit A.

In addition to the extra work locations associated with CCO No. 1, SECC Corporation is authorized to complete additional work throughout the City, in addition to City facilities, per the approved City Standard Drawings. This work includes micro-trenching, which is added to the project specifications. All work verified in the field by the project Inspector and Construction Manager, and within the contract limits.

EXTRA WORK AT AGREED UPON UNIT PRICES

UNIT DEFINITIONS

(100-101) Trench Dirt (Per Ft)

Unit consists of all labor, minor material and equipment required to open a trench in natural ground with machine trencher. Unit includes potholing existing substructures, excavation, shoring, dewatering, backfill (native backfill only) compaction, surface restoration (dirt or gravel only), and removal and disposal of all spoils from the site. Other backfill and surface materials such as sand, slurry, concrete, asphalt, decorative rock, bark or brick are covered under other units and are not a part of this unit. The installation of cable, conduit, duct, steel pipe, marker ribbon, locate wire, etc., in the trench is covered under other units and is not a part of this unit. The minimum depth of cover over the installed facilities will be as specified on the design plans, typical 36” minimum.

(287-289) Micro Trench (1 or 2 Cell Microduct) (Per Ft)
Unit consists of all labor, material and equipment required to perform microtrench installation near the edge of curb/gutter, linear and crossing asphalt areas, with select backfill and approved seal of the top cap layer.

Microtrench method should be less than 2" wide cuts, with a depth of 12"-20". Construction will use a small ditch witch or equivalent equipment, vac truck for removal and disposal of material and preform full restoration of the trench line, compaction and top seal. Unit will include the placement of (1) or (2) conduits or 16/13mm microducts or as outlined on the design plans, coupling as required with transitions, sweeps into handoles or flowerpots.

Unit includes verification of microduct path continuity. Lidar or ground penetration radar maybe required to validate utilities along the design path. Restoration must comply with City standards.

(510-511) Concrete Removal and Restoration (Per Sq Ft)
Unit consists of all labor, material and equipment required to remove and restore one square foot of concrete. Thickness of concrete will be as shown on the design plans.

Unit includes all saw cutting, breaking, removal and disposal of spoils, excavation, leveling, site preparation, forms, wire, rebar, pouring, compacting, finishing and edging the new concrete surface and final cleanup.
(512-513) Asphalt Removal and Restoration (Per Sq Ft)
Unit consists of all labor, material and equipment required to remove and restore one square foot of asphalt. Thickness of asphalt will be as shown on the design plans.

Unit includes all saw cutting, breaking, removal and disposal of spoils, excavation, leveling, site preparation laying, rolling and compacting, replacement of delineators, striping and final cleanup

(514-515) Asphalt Over Concrete Removal and Restoration (Per Sq Ft)
Unit is the same as Asphalt Removal and Restoration and includes removal and replacement of concrete under the asphalt surface. Thickness of concrete will be as shown on the design plans.

(520-523) Surface Restoration (Per Sq Ft)
Unit consists of all labor, material and equipment required to remove and restore seeded, planted, sodded, decorative rock, decorative bark or brick surfaces.

Unit includes ground preparation, topsoils, mulch, planting, seeding, re-sodding and all fertilizers, chemicals and watering to promote initial growth.

(400-404) Handhole/Pullbox/Flowerpot (Soft Surface) (Each)
Unit consists of all labor, minor material and equipment required to install one handhole or pullbox.

Unit includes excavation, pea gravel base ½" or ¾", mesh underlay, shoring, dewatering, backfill, compaction and dirt or gravel surface restoration. Surface restoration other than dirt or gravel is covered by other units and is not a part of this unit. Unit also includes removal and disposal of all spoils removed during handhole installation.

Includes the installation of the wire terminal and locate wire termination, if required.

(411-414) Handhole (Hard Surface) (Each)
Unit consists of all labor, minor material and equipment required to install one handhole as outlined by the unit.

Unit includes excavation, pea gravel base ½" or ¾", mesh underlay, shoring, dewatering, backfill, compaction and dirt or gravel surface restoration. Surface restoration other than dirt or gravel is covered by other units and is not a part of this unit. Unit also includes removal and disposal of all spoils removed during handhole installation. Includes concrete surface restoration, typical to sidewalk placement or intersection work, with an estimated volume of (1) sidewalk panel, restored back to original condition and shall be doweled into existing curbing or concrete sidewalk panels as applicable. Restoration must comply with City standards.

Includes the installation of the wire terminal and locate wire termination, if required.

(415) Handhole Replacement (Soft Surface) (Each)
Unit consists of all labor, minor material and equipment required hand dig around existing type 3 or type 5 vault, remove vault, remove dirt, gravel at base, protect existing conductor in place, install one handhole as outlined by the unit. Position half of the handhole

Unit includes excavation, pea gravel base ½" or ¾", mesh underlay, shoring, dewatering, backfill, compaction and dirt or gravel surface restoration. Unit also includes removal and disposal of all spoils removed during handhole installation.
Includes surface restoration and soil compaction. Restoration must comply with City standards.

(416) Handhole Replacement (Hard Surface – Half Panel) (Each)
Unit consists of all labor, minor material and equipment required hand dig around existing type 3 or type 5 vault, remove vault, remove dirt, gravel at base, protect existing conductor in place, install one handhole as outlined by the unit. Position half of the handhole

Unit includes excavation, pea gravel base ½" or ¾", mesh underlay, shoring, dewatering, backfill, compaction and dirt or gravel surface restoration. Surface restoration other than dirt or gravel is covered by other units and is not a part of this unit. Unit also includes removal and disposal of all spoils removed during handhole installation.

Includes concrete surface restoration, typical to sidewalk placement or intersection work, with an estimated volume of (1/2) sidewalk panel, restored back to original condition and shall be doweled into existing curbing or concrete sidewalk panels as applicable. Restoration must comply with City standards.

(417) Handhole Replacement (Hard Surface – Full Panel) (Each)
Unit consists of all labor, minor material and equipment required hand dig around existing type 3 or type 5 vault, remove vault, remove dirt, gravel at base, protect existing conductor in place, install one handhole as outlined by the unit. Position half of the handhole

Unit includes excavation, pea gravel base ½" or ¾", mesh underlay, shoring, dewatering, backfill, compaction and dirt or gravel surface restoration. Surface restoration other than dirt or gravel is covered by other units and is not a part of this unit. Unit also includes removal and disposal of all spoils removed during handhole installation.

Includes concrete surface restoration, typical to sidewalk placement or intersection work, with an estimated volume of (1) sidewalk panel, restored back to original condition and shall be doweled into existing curbing or concrete sidewalk panels as applicable. Restoration must comply with City standards.

Contractor agrees to furnish all labor, materials, equipment and services to perform the Work, modified as described herein, in accordance with the Contract Documents as revised by this Change Order.

NOT VALID UNTIL SIGNED BY OWNER

In consideration of the change(s) described above, the Contract Price is adjusted as follows:

The original Contract Price was	$3,000,000
Net change by previously authorized Change Orders	$0
The Contract Price prior to this Change Order was	$3,000,000
The Contract Price will be changed by this Change Order in the amount of	$277,402.26
The new Contract Price including this Change Order will be	$3,277,402.26

In consideration of the change(s) describe above, the Contract Time is adjusted as follows:

The Contract Time will be: increased ☒ decreased ☐ unchanged ☐ by:	0 Days
The Contract Time prior to this Change Order was	618 Days
The new Contract Time including this Change Order will be	1096 Days

Attachments: Exhibit A – WELL SITE WATER SYSTEM LOCATIONS & MAP

Contractor accepts the terms and conditions stated herein as full and final settlement of any and all claims arising from this Change Order. The adjustments to the Contract Price and Contract Time in this Change Order constitutes the entire compensation and/or adjustment thereto due to Contractor, including direct, indirect, consequential, and overhead (field and home office) costs, due to Contractor arising out of or related to the change in the Work covered by this Change Order. By signing this Change Order, Contractor agrees to accept the amount of the adjustment to the Contract Price, and the adjustment of the Contract Time, as payment in full for all costs, including direct, indirect, consequential, and overhead (field and home office) costs, related to the change in the Work covered by this Change Order.

UNIT DEFINITIONS

(100-101) Trench Dirt (Per Ft)
Unit consists of all labor, minor material and equipment required to open a trench in natural ground with machine trencher. Unit includes potholing existing substructures, excavation, shoring, dewatering, backfill (native backfill only) compaction, surface restoration (dirt or gravel only), and removal and disposal of all spoils from the site. Other backfill and surface materials such as sand, slurry, concrete, asphalt, decorative rock, bark or brick are covered under other units and are not a part of this unit. The installation of cable, conduit, duct, steel pipe, marker ribbon, locate wire, etc., in the trench is covered under other units and is not a part of this unit. The minimum depth of cover over the installed facilities will be as specified on the design plans, typical 36” minimum.

(287-289) Micro Trench (1 or 2 Cell Microduct) (Per Ft)
Unit consists of all labor, material and equipment required to perform microtrench installation near the edge of curb/gutter, linear and crossing asphalt areas, with select backfill and approved seal of the top cap layer.

Microtrench method should be less than 2” wide cuts, with a depth of 12”-20”. Construction will use a small ditch witch or equivalent equipment, vac truck for removal and disposal of material and preform full restoration of the trench line, compaction and top seal. Unit will include the placement of (1) or (2) conduits or 16/13mm microducts or as outlined on the design plans, coupling as required with transitions, sweeps into handoles or flowerpots.

Unit includes verification of microduct path continuity. Lidar or ground penetration radar maybe required to validate utilities along the design path. Restoration must comply with City standards.

(510-511) Concrete Removal and Restoration (Per Sq Ft)
Unit consists of all labor, material and equipment required to remove and restore one square foot of concrete. Thickness of concrete will be as shown on the design plans.

Unit includes all saw cutting, breaking, removal and disposal of spoils, excavation, leveling, site preparation, forms, wire, rebar, pouring, compacting, finishing and edging the new concrete surface and final cleanup.

(512-513) Asphalt Removal and Restoration (Per Sq Ft)
Unit consists of all labor, material and equipment required to remove and restore one square foot of asphalt. Thickness of asphalt will be as shown on the design plans.

Unit includes all saw cutting, breaking, removal and disposal of spoils, excavation, leveling, site preparation laying, rolling and compacting, replacement of delineators, striping and final cleanup

(514-515) Asphalt Over Concrete Removal and Restoration (Per Sq Ft)
Unit is the same as Asphalt Removal and Restoration and includes removal and replacement of concrete under the asphalt surface. Thickness of concrete will be as shown on the design plans.

(520-523) Surface Restoration (Per Sq Ft)
Unit consists of all labor, material and equipment required to remove and restore seeded, planted, sodded, decorative rock, decorative bark or brick surfaces.

Unit includes ground preparation, topsoils, mulch, planting, seeding, re-sodding and all fertilizers, chemicals and watering to promote initial growth.

(400-404) Handhole/Pullbox/Flowerpot (Soft Surface) (Each)
Unit consists of all labor, minor material and equipment required to install one handhole or pullbox.

Unit includes excavation, pea gravel base ½" or ¾", mesh underlay, shoring, dewatering, backfill, compaction and dirt or gravel surface restoration. Surface restoration other than dirt or gravel is covered by other units and is not a part of this unit. Unit also includes removal and disposal of all spoils removed during handhole installation.

Includes the installation of the wire terminal and locate wire termination, if required.

(411-414) Handhole (Hard Surface) (Each)
Unit consists of all labor, minor material and equipment required to install one handhole as outlined by the unit.

Unit includes excavation, pea gravel base ½" or ¾", mesh underlay, shoring, dewatering, backfill, compaction and dirt or gravel surface restoration. Surface restoration other than dirt or gravel is covered by other units and is not a part of this unit. Unit also includes removal and disposal of all spoils removed during handhole installation.
Includes concrete surface restoration, typical to sidewalk placement or intersection work, with an estimated volume of (1) sidewalk panel, restored back to original condition and shall be doweled into existing curbing or concrete sidewalk panels as applicable. Restoration must comply with City standards.

Includes the installation of the wire terminal and locate wire termination, if required.

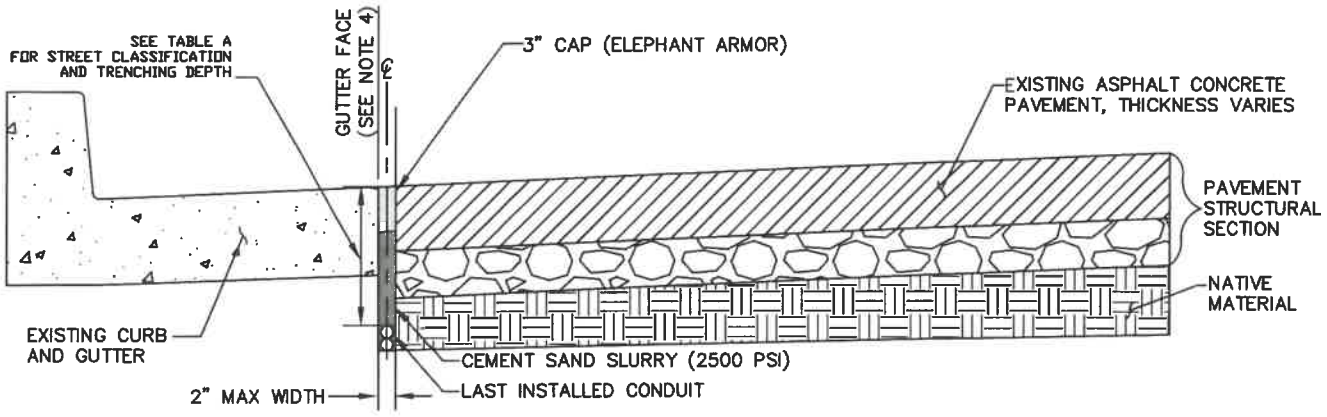
(415) Handhole Replacement (Soft Surface) (Each)
Unit consists of all labor, minor material and equipment required hand dig around existing type 3 or type 5 vault, remove vault, remove dirt, gravel at base, protect existing conductor in place, install one handhole as outlined by the unit. Position half of the handhole

Unit includes excavation, pea gravel base ½" or ¾", mesh underlay, shoring, dewatering, backfill, compaction and dirt or gravel surface restoration. Unit also includes removal and disposal of all spoils removed during handhole installation.
Includes surface restoration and soil compaction. Restoration must comply with City standards.

(416) Handhole Replacement (Hard Surface – Half Panel) (Each)
Unit consists of all labor, minor material and equipment required hand dig around existing type 3 or type 5 vault, remove vault, remove dirt, gravel at base, protect existing conductor in place, install one handhole as outlined by the unit. Position half of the handhole

Unit includes excavation, pea gravel base ½" or ¾", mesh underlay, shoring, dewatering, backfill, compaction and dirt or gravel surface restoration. Surface restoration other than dirt or gravel is covered by other units and is not a part of this unit. Unit also includes removal and disposal of all spoils removed during handhole installation.

Includes concrete surface restoration, typical to sidewalk placement or intersection work, with an estimated volume of (1/2) sidewalk panel, restored back to original condition and shall be doweled into existing curbing or concrete sidewalk panels as applicable. Restoration must comply with City standards.



(417) Handhole Replacement (Hard Surface – Full Panel) (Each)
Unit consists of all labor, minor material and equipment required hand dig around existing type 3 or type 5 vault, remove vault, remove dirt, gravel at base, protect existing conductor in place, install one handhole as outlined by the unit. Position half of the handhole

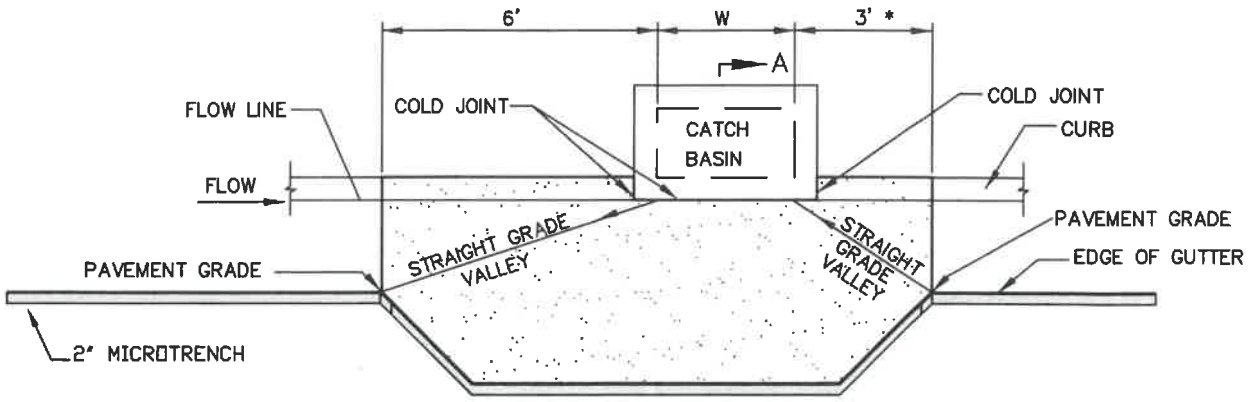
Unit includes excavation, pea gravel base ½" or ¾", mesh underlay, shoring, dewatering, backfill, compaction and dirt or gravel surface restoration. Surface restoration other than dirt or gravel is covered

by other units and is not a part of this unit. Unit also includes removal and disposal of all spoils removed during handhole installation.

Includes concrete surface restoration, typical to sidewalk placement or intersection work, with an estimated volume of (1) sidewalk panel, restored back to original condition and shall be doweled into existing curbing or concrete sidewalk panels as applicable. Restoration must comply with City standards.

Contractor agrees to furnish all labor, materials, equipment and services to perform the Work, modified as described herein, in accordance with the Contract Documents as revised by this Change Order.

TYPICAL MICRO-TRENCH SECTION



NOTES

1. MICRO-TRENCHING SHALL ONLY BE USED TO INSTALL TELECOMMUNICATION CONDUITS.
2. MICRO-TRENCHING SHALL NOT BE ALLOWED IN CONCRETE PAVED STREETS, NOR SIDEWALKS, CURBS AND GUTTERS.
3. MICRO-TRENCH ALIGNMENTS SHALL CONSIST OF RUNS PARALLEL TO THE CENTERLINE OF THE STREET. STREET CROSSINGS MAY BE PERMITTED UPON THE CITY ENGINEER'S DISCRETION, PROVIDED THE ALIGNMENT IS PERPENDICULAR TO THE STREET CENTERLINE TO THE EXTENT POSSIBLE. MICRO TRENCH SHALL BE PLACED A MINIMUM OF 24" FROM THE OUTSIDE OF ANY EXISTING UNDERGROUND UTILITY.
4. THE EDGE OF THE MICRO-TRENCH SHALL BE AGAINST THE EXISTING FACE OF THE GUTTER.
5. THE CONDUIT SHALL BE INSTALLED SO THAT THE TOP OF THE CONDUIT BANK IS AT A MAXIMUM DEPTH OF 20-INCHES BELOW THE EXISTING AC PAVEMENT SURFACE AND AT LEAST 1-INCH BELOW THE BOTTOM OF THE PAVEMENT STRUCTURAL SECTION.
6. CONDUIT BANK REQUIRES (1) 12AWG HIGH STRENGTH (MIN. BREAK LOAD 452#) COPPER-CLAD STEEL W/30MIL HDPE ORANGE INSULATION FOR LOCATE/TRACER WIRE.
7. ALL MICRO-TRENCHES SHALL BE BACKFILLED WITH 2 SACK CEMENT SAND SLURRY 2500 PSI. (MEDIUM TO DARK RED COLOR) TO SUB GRADE BY THE END OF THE WORK DAY.

   FOR FINAL REINSTATEMENT, USE ELEPHANT ARMOR ASPHALT REPAIR, LINE PUMPED INTO THE TOP 3-INCHES OF THE MICRO-TRENCH. WHEN THE CAP LIMIT IS WITHIN 2-FEET OR LESS FROM THE GUTTER FACE, CURB, SLAB OR SURFACE. THE CAP LIMIT SHALL EXTEND TO THAT ITEM. ADDITIONAL GRIND AND OVERLAY MAY BE REQUIRED AT THE CITY'S DISCRETION BASED ON STREET CLASSIFICATION, LANE LINE AND BIKE LANE LOCATIONS.
   A. PAVEMENT SHALL BE LEVEL WITH ADJACENT ROADWAY ELEVATIONS AND SHALL PROVIDE A SMOOTH SURFACE PER GREENBOOK SECTION 302-5 AND IS SUBJECT TO ACCEPTANCE BY THE INSPECTOR.
   B. PAVEMENT MARKINGS SHALL BE RESTORED IN KIND.
9. ONLY ONE MICRO-TRENCH PER SIDE OF THE STREET IS ALLOWED. ADDITIONAL MICRO-TRENCHES MAY BE CONSIDERED AT THE DISCRETION OF THE CITY ENGINEER.
10. CONNECTION TO SERVICE LATERALS, JUNCTION BOXES, ETC., SHALL BE DONE SUCH THAT CURB AND GUTTER IS NOT DISTURBED, SETTLED OR DAMAGED. REMOVAL LIMITS OF SIDEWALK SHALL FOLLOW APPLICABLE STANDARDS AND REQUIREMENTS AS APPROVED BY THE CITY ENGINEER. THE USE OF HYDRO-JETTING IS NOT PERMITTED. VOIDS RESULTING FROM TRENCHLESS METHODS SHALL BE BACKFILLED WITH APPROVED CONTROLLED LOW-STRENGTH MATERIAL (CLSM) CONSISTING OF FINE AGGREGATE, FLUIDIZING AGENT, PORTLAND CEMENT AND WATER. FILL SHALL BE PREPARED USING A VOLUMETRIC MIXER.
11. THE MICRO-TRENCH SHALL BE CONSTRUCTED WITH CONTINUOUS UNIFORM STRAIGHT AND NEAT EDGES.
12. CONSTRUCTION INSTALLATION METHODS PARTICULARLY SUITABLE FOR MICRO-TRENCHING SHALL INCLUDE:
    A. MICRO-TRENCHER CAPABLE OF MEETING TARGET DEPTH AND WIDTH IN A SINGLE PASS WITH AN INTEGRAL HOOD AND ASSOCIATED VACUUM SYSTEM. SELECTION OF CUTTING WHEEL SHALL BE SUCH THAT IT MINIMIZES DAMAGE TO THE ADJACENT AC SURFACE. TRENCHER MUST BE STREET LEGAL WITH THE USE OF A FILTER SYSTEM FOR DUSTLESS EXCAVATION.
    B. CITY RECOMMENDS EQUIPMENT RATE OF 350HP OR GREATER, SHALL COLLECT EXCAVATED MATERIAL ONBOARD WITH TWO POINTS OF SUCTION FOR SPOILS.
    C. MOBILE CONCRETE/SLURRY PLACEMENT WITH AN ON-BOARD VIBRATOR, NARROW THROUGH TO MATCH MICRO-TRENCH WIDTH.

CITY OF ONTARIO *Agenda Report* **August 20, 2024**	**SECTION:** **CONSENT CALENDAR**
Department: Economic Development Prepared By: Charity Hernandez Staff Member Presenting: Jennifer McLain Hiramoto, Economic Development Director Approved By:	Submitted To: Council/OHA Approved: _____ Continued To: _____ Denied: _____ Item No: 21

SUBJECT: **A FIRST AMENDMENT TO A REIMBURSEMENT AGREEMENT FOR PUBLIC IMPROVEMENTS BETWEEN THE CITY OF ONTARIO AND TIPPING DEVELOPMENT, INC.**

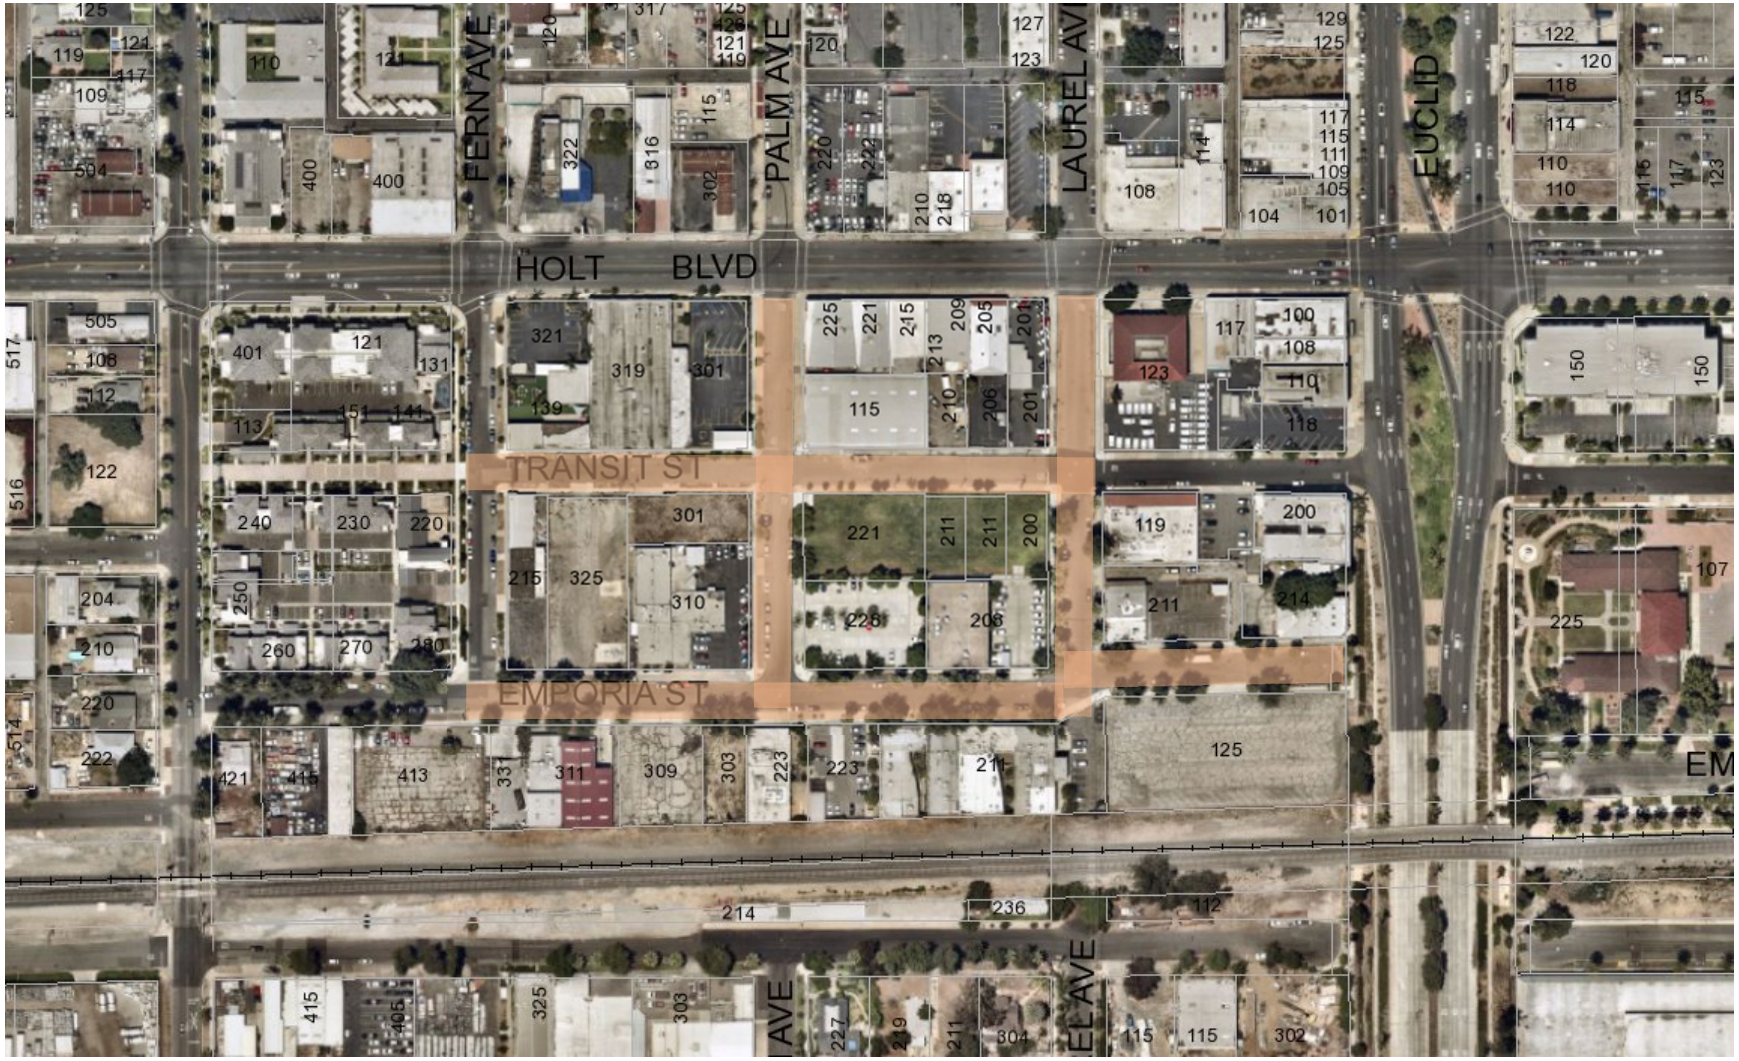
RECOMMENDATION: That the City Council approve a First Amendment to a Reimbursement Agreement ("Agreement") between the City of Ontario ("City") and Tipping Development, Inc. ("Developer"), and authorize the City Manager, or his designee, to execute the Agreement and all other documents required for implementation of the Agreement.

THE FOLLOWING COUNCIL GOALS ARE BEING ACHIEVED:
Invest in the City's Infrastructure (Water, Streets, Sewers, Parks, Storm Drains and Public Facilities)
Focus Resources in Ontario's Commercial and Residential Neighborhoods
Invest in the Growth and Evolution of the City's Economy

FISCAL IMPACT: The Agreement will provide for reimbursement of actual documented infrastructure-related costs not to exceed $5,310,000 which represent and increase of $2,310,000. Additional appropriations in the about of $1,612,056 will be included in the Water Capital Fund in the next quarterly budget update to City Council.

BACKGROUND & ANALYSIS: The City and Tipping Development, Inc. ("Developer") entered into a Disposition and Development Agreement on September 21, 2021, for the development of an infill mixed-use project known as "The Vault" located at 125 West Emporia Street. The Vault is located within the Emporia Arts District which encompasses various land uses including City administrative offices, commercial, and residential uses. The Vault will include storage facilities for recreational vehicles and exotic cars, retail and restaurant pads, and future City office space to be occupied by the Community Life and Culture Agency.

Utility infrastructure is needed to support the construction of The Vault and further development in the vicinity including the Emporia Place Phase II multi-family redevelopment project. Using the Water Master Plan in conjunction with future development plans, staff identified the need to remove and upgrade approximately 3,000 linear feet of aging 4-inch to 6-inch potable water pipelines to 12-inch potable mains that provide reliable water service for the Emporia Arts District



area.

On August 16, 2022, to expedite the design and construction of these public improvements, the City entered into a Reimbursement Agreement where the Developer agreed to undertake certain public improvements including, but not limited to designing and permitting the public improvements, abandoning and upsizing water mains and appurtenances, installing a fire hydrant, paving, striping, construction support cost and contingency. The preliminary Financial Consideration that the City had estimated for the work as a part of the Capital Improvement Program was $3,000,000.

In early 2024, Developer completed construction bid documents, which allowed the Developer to solicit bids from regional contractors. The bidding process occurred between June and July 2024. Due to unanticipated inflation costs for labor and material, the increased scope of roadway pavement and the high utility line density in these smaller streets and alleys, the bid came in approximately $2,310,000 higher than originally estimated in 2022. The Developer provided the bid results to City Staff and the Developers' engineer of record to review and confirm the price with current pipeline and roadway replacement costs.

Staff reviewed the bids and construction support proposals for responsiveness and pricing, and recommends increasing the reimbursement not-to-exceed limit by $2,310,000 for a total not-to-exceed amount of $5,310,000. This includes a twenty percent (20%) contingency, pursuant to the original Reimbursement Agreement.

FIRST AMENDMENT TO
REIMBURSEMENT AGREEMENT
(THE VAULT)

This First Amendment to the Reimbursement Agreement ("First Amendment") is entered into as of _____, (for reference purposes only) by and between the CITY OF ONTARIO, a California municipal corporation ("City") and TIPPING DEVELOPMENT, INC., a California corporation ("TDI"). City and TDI are sometimes collectively referred to herein as the "Parties" or individually as a "Party".

RECITALS

A. The City and RWSS Development, LLC, a California limited liability company and an affiliate of TDI, ("Developer") entered into a Disposition and Development Agreement on September 21, 2021, for the development of an infill mixed-use facility known as the "Vault" located at 125 West Emporia Street. The Vault is located within the boundaries of the Emporia Arts District, which encompasses various land uses including City administrative offices, commercial, and residential uses. The Vault will include storage facilities for recreational vehicles and exotic cars, retail and restaurant pads, and future City office space to be occupied by the Community Life and Culture Agency.

B. Utility infrastructure is needed to support the construction of the Vault and further development in the vicinity including the Emporia Phase II Apartments. Using the City's Water Master Plan in conjunction with future development plans, City staff identified the need to remove and upgrade approximately 3,000 LF of aging 4-inch to 6-inch potable water pipelines to 12-inch potable mains that would provide reliable water service for the Emporia Arts District.

C. City and TDI had entered into that certain Reimbursement Agreement dated August 16, 2022 ("Original Agreement") whereby TDI agreed to undertake those certain public utility infrastructure improvements including, but not limited to designing and permitting the public improvements, abandoning and upsizing water mains and appurtenances, installation of a fire hydrant, paving, striping, construction support cost and contingency ("Public Improvements") to facilitate the completion of Public Improvements which are part of the City's Capital Improvement Program.

D. In the Original Agreement, the preliminary amount of financial consideration to be paid by the City as reimbursement for the Public Improvements was estimated to be Three Million Even Dollars and No/100 ($3,000,000.00).

E. In early 2024, TDI completed the construction bid documents and between June and July of 2024 conducted the bidding process by soliciting for bids from regional contractors. Due to unanticipated inflation costs for labor and materials, the increased scope of roadway pavement and the high utility line density in these smaller streets and alleys, the construction and construction support costs, including a 20% contingency, came in approximately Two Million Three Hundred Ten Thousand Dollars and No/100 ($2,310,000.00) higher than originally estimated in 2022. TDI provided the bid results to its engineer of record and City staff to review and confirm the price with current pipeline and roadway replacement costs.

F. The City and TDI now desire to amend the Original Agreement to increase the financial consideration by $2,310,000.00 for a total not to exceed amount of $5,310,000.00 which includes a twenty percent (20%) contingency per the Original Agreement as further set forth herein.

G. This First Amendment and the Original Agreement will hereinafter be collectively referenced as the "Agreement" unless otherwise specifically referenced individually.

NOW, THEREFORE, in consideration of the above recitals, and the representations, warranties, covenants and conditions contained herein and for other good and valuable consideration, the receipt and adequacy of which are hereby acknowledged, City and TDI agree as follows:

1. **Incorporation of Recitals**. The recitals set forth above are hereby incorporated herein as if set forth in their entirety and made a part of this Agreement.

2. **Reimbursement of Costs; Selection of General Contractor; Change Orders**. The first sentence in Section 2 of the Agreement shall be amended and replaced by the following:

> In light of the benefit the Public Improvements will provide to the City, City intends to provide, through this Reimbursement Agreement, funding in an amount estimated at this time not exceed Five Million Three Hundred Ten Thousand Dollars and No/100 ($5,310,000.00) ("City Financial Consideration") to offset actual documented infrastructure-related costs associated with the construction of the Public Improvements, including but not limited to funding for actual documented costs for interest on the loan TDI obtains to construct the Public Improvements, and certain actual documented costs of overhead items for the Public Improvements, as limited by this Agreement.

3. **Other Terms and Conditions Remain**. In the event of any inconsistencies between the Original Agreement and this First Amendment, the terms of this First Amendment shall control. Except as expressly set forth in this First Amendment, the Agreement is otherwise unmodified and remains in full force and effect.

4. **Capitalized Terms**. All capitalized terms used but not defined herein shall have the same meanings as defined in the Agreement.

5. **Construction; Interpretation**. The Agreement and any amendments are the result of negotiations between the Parties hereto, and with the advice and assistance of their respective counsel. The fact that this Agreement and amendments were prepared as a matter of convenience by a Party shall have no importance or significance. Any uncertainty or ambiguity in this Agreement and amendments shall not be construed against the Party that prepared it in its final form.

6. **Force and Effect.** The effective date of this First Amendment shall be the date that this First Amendment is last executed by the Parties below.

7. **Counterparts; Electronic Execution and Delivery**. This First Amendment to the Agreement may be executed in any number of counterparts, each of which shall be deemed an original, but all of which when taken together will constitute one and the same instrument. The signature page of any counterpart may be detached therefrom without impairing the legal effect of the signature(s) thereon provided such signature page is attached to any other counterpart identical thereto except having additional signature pages executed by other parties to this First Amendment attached thereto. This First Amendment may also be executed by DocuSign or other electronic transmission of signatures, including facsimile or email transmission of a counterpart hereof in portable document format (.pdf), and each copy hereof bearing the DocuSign, facsimile or electronic transmitted signature of any party's authorized representative shall be deemed to be an original. Upon request from either party, the parties hereto agree to exchange original signatures as soon as practical thereafter.

Signature Provisions on the Following Page(s)

IN WITNESS WHEREOF, the Parties have entered into this First Amendment as of the last date of execution by the Parties.

CITY OF ONTARIO *Agenda Report* **August 20, 2024**	**SECTION:** **CONSENT CALENDAR**
Department: Public Works Prepared By: Vanny Khu Staff Member Presenting: Tito Haes, Executive Director Public Works Reviewed By: Andrea Ampig, Bonnie Tam Approved By:	Submitted To: Council/OHA Approved: _____ Continued To: _____ Denied: _____ Item No: 22

SUBJECT: PRE-AUTHORIZE THE PURCHASE OF ANIMAL CONTROL VEHICLES

RECOMMENDATION: That the City Council pre-authorize the cooperative purchase and delivery of six 2024 F-350 animal control trucks for West End Animal Services Agency from PB Loader Corporation, of Fresno, California, consistent with the terms and conditions of the PB Loader Sourcewell Cooperative Contract No. 080521-PBL in the amount of $797,172 plus a 20% contingency of $159,435 for a total amount not-to-exceed amount of $956,607.

THE FOLLOWING COUNCIL GOALS ARE BEING ACHIEVED:
Maintain the Current High Level of Public Safety
Operate in a Businesslike Manner

FISCAL IMPACT: The total cost of the vehicles recommended for purchase is $797,172 plus a 20% contingency of $159,435 to mitigate any unforeseen issues with supply chain surcharges and manufacturer price increases, for a total not-to-exceed amount of $956,607. If approved, additional appropriations in the Equipment Services Fund will be included in future quarterly budget updates to City Council for approval.

BACKGROUND & ANALYSIS: For years, the City of Ontario has contracted with the Inland Valley Humane Society (IVHS) to provide animal services. Unfortunately, the partnership has deteriorated, leading to a noticeable decline in service quality, increased community concerns, and a continued lack of transparency, collaboration, and communication by IHVS. Despite multiple efforts over the past year by City Staff to improve relations, IVHS issued a 180-day notice on April 15, 2024, indicating they are cancelling the contract effective June 30, 2025.

On July 16, 2024, the City Council voted to establish the Joint Powers Authority (JPA) partnership with the City of Chino, named the West End Animal Services Agency (WEASA). WEASA will be a full-service animal services agency that will provide both animal control and sheltering services to member agencies and will start providing animal services effective July 1, 2025. The animal control service will consist of follow-up on citizen reports/complaints, gathering stray animals, enforcement of all animal control laws, investigation of animal abuse reports, transportation of injured, sick or stray animals to receive veterinary care, quarantine of suspect animals, and daily patrol.

The City is requesting the approval for the purchase of six 2024 F-350 animal control trucks to provide field response services. Due to the lead time required by PB Loader Corporation, the City of Ontario will pre-purchase the vehicles to ensure they are delivered and fully operable by July 1, 2025. Once the vehicles are delivered and inspected, the title ownership of the vehicles will be transferred from the City of Ontario to WEASA, ensuring that the agency has the necessary equipment to commence its operations on schedule.

In general conformation with the provisions of Government Code Section 54201 through 54204, Ontario Municipal Code Section 2-6.29 allows for the purchase of supplies and equipment through cooperative purchasing programs, pursuant to California Government Code Section 6502 and City of Ontario Resolution No. 91-141. Cooperative purchasing allows the City to pool its procurement power with other public agencies to obtain lower pricing than otherwise might be possible.

Sourcewell

Solicitation Number: RFP #080521

CONTRACT

This Contract is between Sourcewell, 202 12th Street Northeast, P.O. Box 219, Staples, MN 56479 (Sourcewell) and PB Loader Corporation, 5778 W. Barstow Ave., Fresno, CA 93722 (Supplier).

Sourcewell is a State of Minnesota local government unit and service cooperative created under the laws of the State of Minnesota (Minnesota Statutes Section 123A.21) that offers cooperative procurement solutions to government entities. Participation is open to eligible federal, state/province, and municipal governmental entities, higher education, K-12 education, nonprofit, tribal government, and other public entities located in the United States and Canada. Sourcewell issued a public solicitation for Roadway Maintenance Equipment from which Supplier was awarded a contract.

Supplier desires to contract with Sourcewell to provide equipment, products, or services to Sourcewell and the entities that access Sourcewell's cooperative purchasing contracts (Participating Entities).

1. TERM OF CONTRACT

A. EFFECTIVE DATE. This Contract is effective upon the date of the final signature below.

B. EXPIRATION DATE AND EXTENSION. This Contract expires October 11, 2025, unless it is cancelled sooner pursuant to Article 22. This Contract may be extended one additional year upon the request of Sourcewell and written agreement by Supplier.

C. SURVIVAL OF TERMS. Notwithstanding any expiration or termination of this Contract, all payment obligations incurred prior to expiration or termination will survive, as will the following: Articles 11 through 14 survive the expiration or cancellation of this Contract. All other rights will cease upon expiration or termination of this Contract.

2. EQUIPMENT, PRODUCTS, OR SERVICES

A. EQUIPMENT, PRODUCTS, OR SERVICES. Supplier will provide the Equipment, Products, or Services as stated in its Proposal submitted under the Solicitation Number listed above.

DocuSign Envelope ID: 532CA49D-A48F-4868-825B-7A04EE816FE6

Supplier's Equipment, Products, or Services Proposal (Proposal) is attached and incorporated into this Contract.

All Equipment and Products provided under this Contract must be new and the current model. Supplier may offer close-out or refurbished Equipment or Products if they are clearly indicated in Supplier's product and pricing list. Unless agreed to by the Participating Entities in advance, Equipment or Products must be delivered as operational to the Participating Entity's site.

This Contract offers an indefinite quantity of sales, and while substantial volume is anticipated, sales and sales volume are not guaranteed.

B. WARRANTY. Supplier warrants that all Equipment, Products, and Services furnished are free from liens and encumbrances, and are free from defects in design, materials, and workmanship. In addition, Supplier warrants the Equipment, Products, and Services are suitable for and will perform in accordance with the ordinary use for which they are intended. Supplier's dealers and distributors must agree to assist the Participating Entity in reaching a resolution in any dispute over warranty terms with the manufacturer. Any manufacturer's warranty that extends beyond the expiration of the Supplier's warranty will be passed on to the Participating Entity.

C. DEALERS, DISTRIBUTORS, AND/OR RESELLERS. Upon Contract execution and throughout the Contract term, Supplier must provide to Sourcewell a current means to validate or authenticate Supplier's authorized dealers, distributors, or resellers relative to the Equipment, Products, and Services offered under this Contract, which will be incorporated into this Contract by reference. It is the Supplier's responsibility to ensure Sourcewell receives the most current information.

3. PRICING

All Equipment, Products, or Services under this Contract will be priced at or below the price stated in Supplier's Proposal.

When providing pricing quotes to Participating Entities, all pricing quoted must reflect a Participating Entity's total cost of acquisition. This means that the quoted cost is for delivered Equipment, Products, and Services that are operational for their intended purpose, and includes all costs to the Participating Entity's requested delivery location.

Regardless of the payment method chosen by the Participating Entity, the total cost associated with any purchase option of the Equipment, Products, or Services must always be disclosed in the pricing quote to the applicable Participating Entity at the time of purchase.

A. SHIPPING AND SHIPPING COSTS. All delivered Equipment and Products must be properly packaged. Damaged Equipment and Products may be rejected. If the damage is not readily apparent at the time of delivery, Supplier must permit the Equipment and Products to be

DocuSign Envelope ID: 532CA49D-A48F-4868-825B-7A04EE816FE6

returned within a reasonable time at no cost to Sourcewell or its Participating Entities. Participating Entities reserve the right to inspect the Equipment and Products at a reasonable time after delivery where circumstances or conditions prevent effective inspection of the Equipment and Products at the time of delivery. In the event of the delivery of nonconforming Equipment and Products, the Participating Entity will notify the Supplier as soon as possible and the Supplier will replace nonconforming Equipment and Products with conforming Equipment and Products that are acceptable to the Participating Entity.

Supplier must arrange for and pay for the return shipment on Equipment and Products that arrive in a defective or inoperable condition.

Sourcewell may declare the Supplier in breach of this Contract if the Supplier intentionally delivers substandard or inferior Equipment or Products.

B. SALES TAX. Each Participating Entity is responsible for supplying the Supplier with valid tax-exemption certification(s). When ordering, a Participating Entity must indicate if it is a tax-exempt entity.

C. HOT LIST PRICING. At any time during this Contract, Supplier may offer a specific selection of Equipment, Products, or Services at discounts greater than those listed in the Contract. When Supplier determines it will offer Hot List Pricing, it must be submitted electronically to Sourcewell in a line-item format. Equipment, Products, or Services may be added or removed from the Hot List at any time through a Sourcewell Price and Product Change Form as defined in Article 4 below.

Hot List program and pricing may also be used to discount and liquidate close-out and discontinued Equipment and Products as long as those close-out and discontinued items are clearly identified as such. Current ordering process and administrative fees apply. Hot List Pricing must be published and made available to all Participating Entities.

4. PRODUCT AND PRICING CHANGE REQUESTS

Supplier may request Equipment, Product, or Service changes, additions, or deletions at any time. All requests must be made in writing by submitting a signed Sourcewell Price and Product Change Request Form to the assigned Sourcewell Supplier Development Administrator. This approved form is available from the assigned Sourcewell Supplier Development Administrator. At a minimum, the request must:

- Identify the applicable Sourcewell contract number;
- Clearly specify the requested change;
- Provide sufficient detail to justify the requested change;

DocuSign Envelope ID: 532CA49D-A48F-4868-825B-7A04EE816FE6

- Individually list all Equipment, Products, or Services affected by the requested change, along with the requested change (e.g., addition, deletion, price change); and
- Include a complete restatement of pricing documentation in Microsoft Excel with the effective date of the modified pricing, or product addition or deletion. The new pricing restatement must include all Equipment, Products, and Services offered, even for those items where pricing remains unchanged.

A fully executed Sourcewell Price and Product Change Request Form will become an amendment to this Contract and will be incorporated by reference.

5. PARTICIPATION, CONTRACT ACCESS, AND PARTICIPATING ENTITY REQUIREMENTS

A. PARTICIPATION. Sourcewell's cooperative contracts are available and open to public and nonprofit entities across the United States and Canada; such as federal, state/province, municipal, K-12 and higher education, tribal government, and other public entities.

The benefits of this Contract should be available to all Participating Entities that can legally access the Equipment, Products, or Services under this Contract. A Participating Entity's authority to access this Contract is determined through its cooperative purchasing, interlocal, or joint powers laws. Any entity accessing benefits of this Contract will be considered a Service Member of Sourcewell during such time of access. Supplier understands that a Participating Entity's use of this Contract is at the Participating Entity's sole convenience and Participating Entities reserve the right to obtain like Equipment, Products, or Services from any other source.

Supplier is responsible for familiarizing its sales and service forces with Sourcewell contract use eligibility requirements and documentation and will encourage potential participating entities to join Sourcewell. Sourcewell reserves the right to add and remove Participating Entities to its roster during the term of this Contract.

B. PUBLIC FACILITIES. Supplier's employees may be required to perform work at government-owned facilities, including schools. Supplier's employees and agents must conduct themselves in a professional manner while on the premises, and in accordance with Participating Entity policies and procedures, and all applicable laws.

6. PARTICIPATING ENTITY USE AND PURCHASING

A. ORDERS AND PAYMENT. To access the contracted Equipment, Products, or Services under this Contract, a Participating Entity must clearly indicate to Supplier that it intends to access this Contract; however, order flow and procedure will be developed jointly between Sourcewell and Supplier. Typically, a Participating Entity will issue an order directly to Supplier or its authorized subsidiary, distributor, dealer, or reseller. If a Participating Entity issues a purchase order, it may use its own forms, but the purchase order should clearly note the applicable Sourcewell

DocuSign Envelope ID: 532CA49D-A48F-4868-825B-7A04EE816FE6

contract number. All Participating Entity orders under this Contract must be issued prior to expiration or cancellation of this Contract; however, Supplier performance, Participating Entity payment obligations, and any applicable warranty periods or other Supplier or Participating Entity obligations may extend beyond the term of this Contract.

Supplier's acceptable forms of payment are included in its attached Proposal. Participating Entities will be solely responsible for payment and Sourcewell will have no liability for any unpaid invoice of any Participating Entity.

B. ADDITIONAL TERMS AND CONDITIONS/PARTICIPATING ADDENDUM. Additional terms and conditions to a purchase order, or other required transaction documentation, may be negotiated between a Participating Entity and Supplier, such as job or industry-specific requirements, legal requirements (e.g., affirmative action or immigration status requirements), or specific local policy requirements. Some Participating Entities may require the use of a Participating Addendum; the terms of which will be negotiated directly between the Participating Entity and the Supplier. Any negotiated additional terms and conditions must never be less favorable to the Participating Entity than what is contained in this Contract.

C. SPECIALIZED SERVICE REQUIREMENTS. In the event that the Participating Entity requires service or specialized performance requirements not addressed in this Contract (such as e-commerce specifications, specialized delivery requirements, or other specifications and requirements), the Participating Entity and the Supplier may enter into a separate, standalone agreement, apart from this Contract. Sourcewell, including its agents and employees, will not be made a party to a claim for breach of such agreement.

D. TERMINATION OF ORDERS. Participating Entities may terminate an order, in whole or in part, immediately upon notice to Supplier in the event of any of the following events:

1. The Participating Entity fails to receive funding or appropriation from its governing body at levels sufficient to pay for the equipment, products, or services to be purchased; or
2. Federal, state, or provincial laws or regulations prohibit the purchase or change the Participating Entity's requirements.

E. GOVERNING LAW AND VENUE. The governing law and venue for any action related to a Participating Entity's order will be determined by the Participating Entity making the purchase.

7. CUSTOMER SERVICE

A. PRIMARY ACCOUNT REPRESENTATIVE. Supplier will assign an Account Representative to Sourcewell for this Contract and must provide prompt notice to Sourcewell if that person is changed. The Account Representative will be responsible for:

DocuSign Envelope ID: 532CA49D-A48F-4868-825B-7A04EE816FE6

- Maintenance and management of this Contract;
- Timely response to all Sourcewell and Participating Entity inquiries; and
- Business reviews to Sourcewell and Participating Entities, if applicable.

B. BUSINESS REVIEWS. Supplier must perform a minimum of one business review with Sourcewell per contract year. The business review will cover sales to Participating Entities, pricing and contract terms, administrative fees, sales data reports, supply issues, customer issues, and any other necessary information.

8. REPORT ON CONTRACT SALES ACTIVITY AND ADMINISTRATIVE FEE PAYMENT

A. CONTRACT SALES ACTIVITY REPORT. Each calendar quarter, Supplier must provide a contract sales activity report (Report) to the Sourcewell Supplier Development Administrator assigned to this Contract. Reports are due no later than 45 days after the end of each calendar quarter. A Report must be provided regardless of the number or amount of sales during that quarter (i.e., if there are no sales, Supplier must submit a report indicating no sales were made).

The Report must contain the following fields:

- Participating Entity Name (e.g., City of Staples Highway Department);
- Participating Entity Physical Street Address;
- Participating Entity City;
- Participating Entity State/Province;
- Participating Entity Zip/Postal Code;
- Participating Entity Contact Name;
- Participating Entity Contact Email Address;
- Participating Entity Contact Telephone Number;
- Sourcewell Assigned Entity/Participating Entity Number;
- Item Purchased Description;
- Item Purchased Price;
- Sourcewell Administrative Fee Applied; and
- Date Purchase was invoiced/sale was recognized as revenue by Supplier.

B. ADMINISTRATIVE FEE. In consideration for the support and services provided by Sourcewell, the Supplier will pay an administrative fee to Sourcewell on all Equipment, Products, and Services provided to Participating Entities. The Administrative Fee must be included in, and not added to, the pricing. Supplier may not charge Participating Entities more than the contracted price to offset the Administrative Fee.

The Supplier will submit payment to Sourcewell for the percentage of administrative fee stated in the Proposal multiplied by the total sales of all Equipment, Products, and Services purchased

DocuSign Envelope ID: 532CA49D-A48F-4868-825B-7A04EE816FE6

by Participating Entities under this Contract during each calendar quarter. Payments should note the Supplier's name and Sourcewell-assigned contract number in the memo; and must be mailed to the address above "Attn: Accounts Receivable" or remitted electronically to Sourcewell's banking institution per Sourcewell's Finance department instructions. Payments must be received no later than 45 calendar days after the end of each calendar quarter.

Supplier agrees to cooperate with Sourcewell in auditing transactions under this Contract to ensure that the administrative fee is paid on all items purchased under this Contract.

In the event the Supplier is delinquent in any undisputed administrative fees, Sourcewell reserves the right to cancel this Contract and reject any proposal submitted by the Supplier in any subsequent solicitation. In the event this Contract is cancelled by either party prior to the Contract's expiration date, the administrative fee payment will be due no more than 30 days from the cancellation date.

9. AUTHORIZED REPRESENTATIVE

Sourcewell's Authorized Representative is its Chief Procurement Officer.

Supplier's Authorized Representative is the person named in the Supplier's Proposal. If Supplier's Authorized Representative changes at any time during this Contract, Supplier must promptly notify Sourcewell in writing.

10. AUDIT, ASSIGNMENT, AMENDMENTS, WAIVER, AND CONTRACT COMPLETE

A. AUDIT. Pursuant to Minnesota Statutes Section 16C.05, subdivision 5, the books, records, documents, and accounting procedures and practices relevant to this Agreement are subject to examination by Sourcewell or the Minnesota State Auditor for a minimum of six years from the end of this Contract. This clause extends to Participating Entities as it relates to business conducted by that Participating Entity under this Contract.

B. ASSIGNMENT. Neither party may assign or otherwise transfer its rights or obligations under this Contract without the prior written consent of the other party and a fully executed assignment agreement. Such consent will not be unreasonably withheld. Any prohibited assignment will be invalid.

C. AMENDMENTS. Any amendment to this Contract must be in writing and will not be effective until it has been duly executed by the parties.

D. WAIVER. Failure by either party to take action or assert any right under this Contract will not be deemed a waiver of such right in the event of the continuation or repetition of the circumstances giving rise to such right. Any such waiver must be in writing and signed by the parties.

DocuSign Envelope ID: 532CA49D-A48F-4868-825B-7A04EE816FE6

E. CONTRACT COMPLETE. This Contract represents the complete agreement between the parties. No other understanding regarding this Contract, whether written or oral, may be used to bind either party.For any conflict between the attached Proposal and the terms set out in Articles 1-22 of this Contract, the terms of Articles 1-22 will govern.

F. RELATIONSHIP OF THE PARTIES. The relationship of the parties is one of independent contractors, each free to exercise judgment and discretion with regard to the conduct of their respective businesses. This Contract does not create a partnership, joint venture, or any other relationship such as master-servant, or principal-agent.

11. INDEMNITY AND HOLD HARMLESS

Supplier must indemnify, defend, save, and hold Sourcewell and its Participating Entities, including their agents and employees, harmless from any claims or causes of action, including attorneys' fees incurred by Sourcewell or its Participating Entities, arising out of any act or omission in the performance of this Contract by the Supplier or its agents or employees; this indemnification includes injury or death to person(s) or property alleged to have been caused by some defect in the Equipment, Products, or Services under this Contract to the extent the Equipment, Product, or Service has been used according to its specifications. Sourcewell's responsibility will be governed by the State of Minnesota's Tort Liability Act (Minnesota Statutes Chapter 466) and other applicable law.

12. GOVERNMENT DATA PRACTICES

Supplier and Sourcewell must comply with the Minnesota Government Data Practices Act, Minnesota Statutes Chapter 13, as it applies to all data provided by or provided to Sourcewell under this Contract and as it applies to all data created, collected, received, stored, used, maintained, or disseminated by the Supplier under this Contract.

13. INTELLECTUAL PROPERTY, PUBLICITY, MARKETING, AND ENDORSEMENT

A. INTELLECTUAL PROPERTY

1. *Grant of License.* During the term of this Contract:
   a. Sourcewell grants to Supplier a royalty-free, worldwide, non-exclusive right and license to use thetrademark(s) provided to Supplier by Sourcewell in advertising and promotional materials for the purpose of marketing Sourcewell's relationship with Supplier.
   b. Supplier grants to Sourcewell a royalty-free, worldwide, non-exclusive right and license to use Supplier's trademarks in advertising and promotional materials for the purpose of marketing Supplier's relationship with Sourcewell.
2. *Limited Right of Sublicense*. The right and license granted herein includes a limited right of each party to grant sublicenses to their respective subsidiaries, distributors, dealers,

DocuSign Envelope ID: 532CA49D-A48F-4868-825B-7A04EE816FE6

resellers, marketing representatives, and agents (collectively "Permitted Sublicensees") in advertising and promotional materials for the purpose of marketing the Parties' relationship to Participating Entities. Any sublicense granted will be subject to the terms and conditions of this Article. Each party will be responsible for any breach of this Article by any of their respective sublicensees.

3. *Use; Quality Control.*

a. Neither party may alter the other party's trademarks from the form provided and must comply with removal requests as to specific uses of its trademarks or logos.

b. Each party agrees to use, and to cause its Permitted Sublicensees to use, the other party's trademarks only in good faith and in a dignified manner consistent with such party's use of the trademarks. Upon written notice to the breaching party, the breaching party has 30 days of the date of the written notice to cure the breach or the license will be terminated.

4. As applicable, Supplier agrees to indemnify and hold harmless Sourcewell and its Participating Entities against any and all suits, claims, judgments, and costs instituted or recovered against Sourcewell or Participating Entities by any person on account of the use of any Equipment or Products by Sourcewell or its Participating Entities supplied by Supplier in violation of applicable patent or copyright laws.

5. Termination. Upon the termination of this Contract for any reason, each party, including Permitted Sublicensees, will have 30 days to remove all Trademarks from signage, websites, and the like bearing the other party's name or logo (excepting Sourcewell's pre-printed catalog of suppliers which may be used until the next printing). Supplier must return all marketing and promotional materials, including signage, provided by Sourcewell, or dispose of it according to Sourcewell's written directions.

B. PUBLICITY. Any publicity regarding the subject matter of this Contract must not be released without prior written approval from the Authorized Representatives. Publicity includes notices, informational pamphlets, press releases, research, reports, signs, and similar public notices prepared by or for the Supplier individually or jointly with others, or any subcontractors, with respect to the program, publications, or services provided resulting from this Contract.

C. MARKETING. Any direct advertising, marketing, or offers with Participating Entities must be approved by Sourcewell. Send all approval requests to the Sourcewell Supplier Development Administrator assigned to this Contract.

D. ENDORSEMENT. The Supplier must not claim that Sourcewell endorses its Equipment, Products, or Services.

DocuSign Envelope ID: 532CA49D-A48F-4868-825B-7A04EE816FE6

14. GOVERNING LAW, JURISDICTION, AND VENUE

The substantive and procedural laws of the State of Minnesota will govern this Contract. Venue for all legal proceedings arising out of this Contract, or its breach, must be in the appropriate state court in Todd County, Minnesota or federal court in Fergus Falls, Minnesota.

15. FORCE MAJEURE

Neither party to this Contract will be held responsible for delay or default caused by acts of God or other conditions that are beyond that party's reasonable control. A party defaulting under this provision must provide the other party prompt written notice of the default.

16. SEVERABILITY

If any provision of this Contract is found by a court of competent jurisdiction to be illegal, unenforceable, or void then both parties will be relieved from all obligations arising from that provision. If the remainder of this Contract is capable of being performed, it will not be affected by such determination or finding and must be fully performed.

17. PERFORMANCE, DEFAULT, AND REMEDIES

A. PERFORMANCE. During the term of this Contract, the parties will monitor performance and address unresolved contract issues as follows:

1. *Notification.* The parties must promptly notify each other of any known dispute and work in good faith to resolve such dispute within a reasonable period of time. If necessary, Sourcewell and the Supplier will jointly develop a short briefing document that describes the issue(s), relevant impact, and positions of both parties.
2. *Escalation.* If parties are unable to resolve the issue in a timely manner, as specified above, either Sourcewell or Supplier may escalate the resolution of the issue to a higher level of management. The Supplier will have 30 calendar days to cure an outstanding issue.
3. *Performance while Dispute is Pending*. Notwithstanding the existence of a dispute, the Supplier must continue without delay to carry out all of its responsibilities under the Contract that are not affected by the dispute. If the Supplier fails to continue without delay to perform its responsibilities under the Contract, in the accomplishment of all undisputed work, the Supplier will bear any additional costs incurred by Sourcewell and/or its Participating Entities as a result of such failure to proceed.

B. DEFAULT AND REMEDIES. Either of the following constitutes cause to declare this Contract, or any Participating Entity order under this Contract, in default:

1. Nonperformance of contractual requirements, or
2. A material breach of any term or condition of this Contract.

DocuSign Envelope ID: 532CA49D-A48F-4868-825B-7A04EE816FE6

The party claiming default must provide written notice of the default, with 30 calendar days to cure the default. Time allowed for cure will not diminish or eliminate any liability for liquidated or other damages. If the default remains after the opportunity for cure, the non-defaulting party may:

- Exercise any remedy provided by law or equity, or
- Terminate the Contract or any portion thereof, including any orders issued against the Contract.

18. INSURANCE

A. REQUIREMENTS. At its own expense, Supplier must maintain insurance policy(ies) in effect at all times during the performance of this Contract with insurance company(ies) licensed or authorized to do business in the State of Minnesota having an "AM BEST" rating of A- or better, with coverage and limits of insurance not less than the following:

1. *Workers' Compensation and Employer's Liability.*
Workers' Compensation: As required by any applicable law or regulation.
Employer's Liability Insurance: must be provided in amounts not less than listed below:
Minimum limits:
$500,000 each accident for bodily injury by accident
$500,000 policy limit for bodily injury by disease
$500,000 each employee for bodily injury by disease

2. *Commercial General Liability Insurance.* Supplier will maintain insurance covering its operations, with coverage on an occurrence basis, and must be subject to terms no less broad than the Insurance Services Office ("ISO") Commercial General Liability Form CG0001 (2001 or newer edition), or equivalent. At a minimum, coverage must include liability arising from premises, operations, bodily injury and property damage, independent contractors, products-completed operations including construction defect, contractual liability, blanket contractual liability, and personal injury and advertising injury. All required limits, terms and conditions of coverage must be maintained during the term of this Contract.
Minimum Limits:
$1,000,000 each occurrence Bodily Injury and Property Damage
$1,000,000 Personal and Advertising Injury
$2,000,000 aggregate for Products-Completed operations
$2,000,000 general aggregate

3. *Commercial Automobile Liability Insurance.* During the term of this Contract, Supplier will maintain insurance covering all owned, hired, and non-owned automobiles in limits of liability not less than indicated below. The coverage must be subject to terms

DocuSign Envelope ID: 532CA49D-A48F-4868-825B-7A04EE816FE6

no less broad than ISO Business Auto Coverage Form CA 0001 (2010 edition or newer), or equivalent.

Minimum Limits:
$1,000,000 each accident, combined single limit

4. *Umbrella Insurance*. During the term of this Contract, Supplier will maintain umbrella coverage over Employer's Liability, Commercial General Liability, and Commercial Automobile.

Minimum Limits:
$2,000,000

5. *Network Security and Privacy Liability Insurance*. During the term of this Contract, Supplier will maintain coverage for network security and privacy liability. The coverage may be endorsed on another form of liability coverage or written on a standalone policy. The insurance must cover claims which may arise from failure of Supplier's security resulting in, but not limited to, computer attacks, unauthorized access, disclosure of not public data – including but not limited to, confidential or private information, transmission of a computer virus, or denial of service.

Minimum limits:
$2,000,000 per occurrence
$2,000,000 annual aggregate

Failure of Supplier to maintain the required insurance will constitute a material breach entitling Sourcewell to immediately terminate this Contract for default.

B. CERTIFICATES OF INSURANCE. Prior to commencing under this Contract, Supplier must furnish to Sourcewell a certificate of insurance, as evidence of the insurance required under this Contract. Prior to expiration of the policy(ies), renewal certificates must be mailed to Sourcewell, 202 12th Street Northeast, P.O. Box 219, Staples, MN 56479 or sent to the Sourcewell Supplier Development Administrator assigned to this Contract. The certificates must be signed by a person authorized by the insurer(s) to bind coverage on their behalf.

Failure to request certificates of insurance by Sourcewell, or failure of Supplier to provide certificates of insurance, in no way limits or relieves Supplier of its duties and responsibilities in this Contract.

C. ADDITIONAL INSURED ENDORSEMENT AND PRIMARY AND NON-CONTRIBUTORY INSURANCE CLAUSE. Supplier agrees to list Sourcewell and its Participating Entities, including their officers, agents, and employees, as an additional insured under the Supplier's commercial general liability insurance policy with respect to liability arising out of activities, "operations," or "work" performed by or on behalf of Supplier, and products and completed operations of Supplier. The policy provision(s) or endorsement(s) must further provide that coverage is

DocuSign Envelope ID: 532CA49D-A48F-4868-825B-7A04EE816FE6

primary and not excess over or contributory with any other valid, applicable, and collectible insurance or self-insurance in force for the additional insureds.

D. WAIVER OF SUBROGATION. Supplier waives and must require (by endorsement or otherwise) all its insurers to waive subrogation rights against Sourcewell and other additional insureds for losses paid under the insurance policies required by this Contract or other insurance applicable to the Supplier or its subcontractors. The waiver must apply to all deductibles and/or self-insured retentions applicable to the required or any other insurance maintained by the Supplier or its subcontractors. Where permitted by law, Supplier must require similar written express waivers of subrogation and insurance clauses from each of its subcontractors.

E. UMBRELLA/EXCESS LIABILITY/SELF-INSURED RETENTION. The limits required by this Contract can be met by either providing a primary policy or in combination with umbrella/excess liability policy(ies), or self-insured retention.

19. COMPLIANCE

A. LAWS AND REGULATIONS. All Equipment, Products, or Services provided under this Contract must comply fully with applicable federal laws and regulations, and with the laws in the states and provinces in which the Equipment, Products, or Services are sold.

B. LICENSES. Supplier must maintain a valid and current status on all required federal, state/provincial, and local licenses, bonds, and permits required for the operation of the business that the Supplier conducts with Sourcewell and Participating Entities.

20. BANKRUPTCY, DEBARMENT, OR SUSPENSION CERTIFICATION

Supplier certifies and warrants that it is not in bankruptcy or that it has previously disclosed in writing certain information to Sourcewell related to bankruptcy actions. If at any time during this Contract Supplier declares bankruptcy, Supplier must immediately notify Sourcewell in writing.

Supplier certifies and warrants that neither it nor its principals are presently debarred, suspended, proposed for debarment, declared ineligible, or voluntarily excluded from programs operated by the State of Minnesota; the United States federal government or the Canadian government, as applicable; or any Participating Entity. Supplier certifies and warrants that neither it nor its principals have been convicted of a criminal offense related to the subject matter of this Contract. Supplier further warrants that it will provide immediate written notice to Sourcewell if this certification changes at any time.

DocuSign Envelope ID: 532CA49D-A48F-4868-825B-7A04EE816FE6

21. PROVISIONS FOR NON-UNITED STATES FEDERAL ENTITY PROCUREMENTS UNDER UNITED STATES FEDERAL AWARDS OR OTHER AWARDS

Participating Entities that use United States federal grant or FEMA funds to purchase goods or services from this Contract may be subject to additional requirements including the procurement standards of the Uniform Administrative Requirements, Cost Principles and Audit Requirements for Federal Awards, 2 C.F.R. § 200. Participating Entities may have additional requirements based on specific funding source terms or conditions. Within this Article, all references to "federal" should be interpreted to mean the United States federal government. The following list only applies when a Participating Entity accesses Supplier's Equipment, Products, or Services with United States federal funds.

A. EQUAL EMPLOYMENT OPPORTUNITY. Except as otherwise provided under 41 C.F.R. § 60, all contracts that meet the definition of "federally assisted construction contract" in 41 C.F.R. § 60-1.3 must include the equal opportunity clause provided under 41 C.F.R. §60-1.4(b), in accordance with Executive Order 11246, "Equal Employment Opportunity" (30 FR 12319, 12935, 3 C.F.R. §, 1964-1965 Comp., p. 339), as amended by Executive Order 11375, "Amending Executive Order 11246 Relating to Equal Employment Opportunity," and implementing regulations at 41 C.F.R. § 60, "Office of Federal Contract Compliance Programs, Equal Employment Opportunity, Department of Labor." The equal opportunity clause is incorporated herein by reference.

B. DAVIS-BACON ACT, AS AMENDED (40 U.S.C. § 3141-3148). When required by federal program legislation, all prime construction contracts in excess of $2,000 awarded by non-federal entities must include a provision for compliance with the Davis-Bacon Act (40 U.S.C. § 3141-3144, and 3146-3148) as supplemented by Department of Labor regulations (29 C.F.R. § 5, "Labor Standards Provisions Applicable to Contracts Covering Federally Financed and Assisted Construction"). In accordance with the statute, contractors must be required to pay wages to laborers and mechanics at a rate not less than the prevailing wages specified in a wage determination made by the Secretary of Labor. In addition, contractors must be required to pay wages not less than once a week. The non-federal entity must place a copy of the current prevailing wage determination issued by the Department of Labor in each solicitation. The decision to award a contract or subcontract must be conditioned upon the acceptance of the wage determination. The non-federal entity must report all suspected or reported violations to the federal awarding agency. The contracts must also include a provision for compliance with the Copeland "Anti-Kickback" Act (40 U.S.C. § 3145), as supplemented by Department of Labor regulations (29 C.F.R. § 3, "Contractors and Subcontractors on Public Building or Public Work Financed in Whole or in Part by Loans or Grants from the United States"). The Act provides that each contractor or subrecipient must be prohibited from inducing, by any means, any person employed in the construction, completion, or repair of public work, to give up any part of the compensation to which he or she is otherwise entitled. The non-federal entity must report all suspected or reported violations to the federal awarding agency. Supplier must be in compliance with all applicable Davis-Bacon Act provisions.

DocuSign Envelope ID: 532CA49D-A48F-4868-825B-7A04EE816FE6

C. CONTRACT WORK HOURS AND SAFETY STANDARDS ACT (40 U.S.C. § 3701-3708). Where applicable, all contracts awarded by the non-federal entity in excess of $100,000 that involve the employment of mechanics or laborers must include a provision for compliance with 40 U.S.C. §§ 3702 and 3704, as supplemented by Department of Labor regulations (29 C.F.R. § 5). Under 40 U.S.C. § 3702 of the Act, each contractor must be required to compute the wages of every mechanic and laborer on the basis of a standard work week of 40 hours. Work in excess of the standard work week is permissible provided that the worker is compensated at a rate of not less than one and a half times the basic rate of pay for all hours worked in excess of 40 hours in the work week. The requirements of 40 U.S.C. § 3704 are applicable to construction work and provide that no laborer or mechanic must be required to work in surroundings or under working conditions which are unsanitary, hazardous or dangerous. These requirements do not apply to the purchases of supplies or materials or articles ordinarily available on the open market, or contracts for transportation or transmission of intelligence. This provision is hereby incorporated by reference into this Contract. Supplier certifies that during the term of an award for all contracts by Sourcewell resulting from this procurement process, Supplier must comply with applicable requirements as referenced above.

D. RIGHTS TO INVENTIONS MADE UNDER A CONTRACT OR AGREEMENT. If the federal award meets the definition of “funding agreement” under 37 C.F.R. § 401.2(a) and the recipient or subrecipient wishes to enter into a contract with a small business firm or nonprofit organization regarding the substitution of parties, assignment or performance of experimental, developmental, or research work under that “funding agreement,” the recipient or subrecipient must comply with the requirements of 37 C.F.R. § 401, “Rights to Inventions Made by Nonprofit Organizations and Small Business Firms Under Government Grants, Contracts and Cooperative Agreements,” and any implementing regulations issued by the awarding agency. Supplier certifies that during the term of an award for all contracts by Sourcewell resulting from this procurement process, Supplier must comply with applicable requirements as referenced above.

E. CLEAN AIR ACT (42 U.S.C. § 7401-7671Q.) AND THE FEDERAL WATER POLLUTION CONTROL ACT (33 U.S.C. § 1251-1387). Contracts and subgrants of amounts in excess of $150,000 require the non-federal award to agree to comply with all applicable standards, orders or regulations issued pursuant to the Clean Air Act (42 U.S.C. § 7401- 7671q) and the Federal Water Pollution Control Act as amended (33 U.S.C. § 1251- 1387). Violations must be reported to the Federal awarding agency and the Regional Office of the Environmental Protection Agency (EPA). Supplier certifies that during the term of this Contract will comply with applicable requirements as referenced above.

F. DEBARMENT AND SUSPENSION (EXECUTIVE ORDERS 12549 AND 12689). A contract award (see 2 C.F.R. § 180.220) must not be made to parties listed on the government wide exclusions in the System for Award Management (SAM), in accordance with the OMB guidelines at 2 C.F.R. §180 that implement Executive Orders 12549 (3 C.F.R. § 1986 Comp., p. 189) and 12689 (3 C.F.R. § 1989 Comp., p. 235), “Debarment and Suspension.” SAM Exclusions contains the names

DocuSign Envelope ID: 532CA49D-A48F-4868-825B-7A04EE816FE6

of parties debarred, suspended, or otherwise excluded by agencies, as well as parties declared ineligible under statutory or regulatory authority other than Executive Order 12549. Supplier certifies that neither it nor its principals are presently debarred, suspended, proposed for debarment, declared ineligible, or voluntarily excluded from participation by any federal department or agency.

G. BYRD ANTI-LOBBYING AMENDMENT, AS AMENDED (31 U.S.C. § 1352). Suppliers must file any required certifications. Suppliers must not have used federal appropriated funds to pay any person or organization for influencing or attempting to influence an officer or employee of any agency, a member of Congress, officer or employee of Congress, or an employee of a member of Congress in connection with obtaining any federal contract, grant, or any other award covered by 31 U.S.C. § 1352. Suppliers must disclose any lobbying with non-federal funds that takes place in connection with obtaining any federal award. Such disclosures are forwarded from tier to tier up to the non-federal award. Suppliers must file all certifications and disclosures required by, and otherwise comply with, the Byrd Anti-Lobbying Amendment (31 U.S.C. § 1352).

H. RECORD RETENTION REQUIREMENTS. To the extent applicable, Supplier must comply with the record retention requirements detailed in 2 C.F.R. § 200.333. The Supplier further certifies that it will retain all records as required by 2 C.F.R. § 200.333 for a period of 3 years after grantees or subgrantees submit final expenditure reports or quarterly or annual financial reports, as applicable, and all other pending matters are closed.

I. ENERGY POLICY AND CONSERVATION ACT COMPLIANCE. To the extent applicable, Supplier must comply with the mandatory standards and policies relating to energy efficiency which are contained in the state energy conservation plan issued in compliance with the Energy Policy and Conservation Act.

J. BUY AMERICAN PROVISIONS COMPLIANCE. To the extent applicable, Supplier must comply with all applicable provisions of the Buy American Act. Purchases made in accordance with the Buy American Act must follow the applicable procurement rules calling for free and open competition.

K. ACCESS TO RECORDS (2 C.F.R. § 200.336). Supplier agrees that duly authorized representatives of a federal agency must have access to any books, documents, papers and records of Supplier that are directly pertinent to Supplier's discharge of its obligations under this Contract for the purpose of making audits, examinations, excerpts, and transcriptions. The right also includes timely and reasonable access to Supplier's personnel for the purpose of interview and discussion relating to such documents.

L. PROCUREMENT OF RECOVERED MATERIALS (2 C.F.R. § 200.322). A non-federal entity that is a state agency or agency of a political subdivision of a state and its contractors must comply with Section 6002 of the Solid Waste Disposal Act, as amended by the Resource Conservation

DocuSign Envelope ID: 532CA49D-A48F-4868-825B-7A04EE816FE6

and Recovery Act. The requirements of Section 6002 include procuring only items designated in guidelines of the Environmental Protection Agency (EPA) at 40 C.F.R. § 247 that contain the highest percentage of recovered materials practicable, consistent with maintaining a satisfactory level of competition, where the purchase price of the item exceeds $10,000 or the value of the quantity acquired during the preceding fiscal year exceeded $10,000; procuring solid waste management services in a manner that maximizes energy and resource recovery; and establishing an affirmative procurement program for procurement of recovered materials identified in the EPA guidelines.

M. FEDERAL SEAL(S), LOGOS, AND FLAGS. The Supplier not use the seal(s), logos, crests, or reproductions of flags or likenesses of Federal agency officials without specific pre-approval.

N. NO OBLIGATION BY FEDERAL GOVERNMENT. The U.S. federal government is not a party to this Contract or any purchase by an Participating Entity and is not subject to any obligations or liabilities to the Participating Entity, Supplier, or any other party pertaining to any matter resulting from the Contract or any purchase by an authorized user.

O. PROGRAM FRAUD AND FALSE OR FRAUDULENT STATEMENTS OR RELATED ACTS. The Contractor acknowledges that 31 U.S.C. 38 (Administrative Remedies for False Claims and Statements) applies to the Supplier's actions pertaining to this Contract or any purchase by a Participating Entity.

P. FEDERAL DEBT. The Supplier certifies that it is non-delinquent in its repayment of any federal debt. Examples of relevant debt include delinquent payroll and other taxes, audit disallowance, and benefit overpayments.

Q. CONFLICTS OF INTEREST. The Supplier must notify the U.S. Office of General Services, Sourcewell, and Participating Entity as soon as possible if this Contract or any aspect related to the anticipated work under this Contract raises an actual or potential conflict of interest (as described in 2 C.F.R. Part 200). The Supplier must explain the actual or potential conflict in writing in sufficient detail so that the U.S. Office of General Services, Sourcewell, and Participating Entity are able to assess the actual or potential conflict; and provide any additional information as necessary or requested.

R. U.S. EXECUTIVE ORDER 13224. The Supplier, and its subcontractors, must comply with U.S. Executive Order 13224 and U.S. Laws that prohibit transactions with and provision of resources and support to individuals and organizations associated with terrorism.

S. PROHIBITION ON CERTAIN TELECOMMUNICATIONS AND VIDEO SURVEILLANCE SERVICES OR EQUIPMENT. To the extent applicable, Supplier certifies that during the term of this Contract it will comply with applicable requirements of 2 C.F.R. § 200.216.

DocuSign Envelope ID: 532CA49D-A48F-4868-825B-7A04EE816FE6

T. DOMESTIC PREFERENCES FOR PROCUREMENTS. To the extent applicable, Supplier certifies that during the term of this Contract will comply with applicable requirements of 2 C.F.R. § 200.322.

22. CANCELLATION

Sourcewell or Supplier may cancel this Contract at any time, with or without cause, upon 60 days' written notice to the other party. However, Sourcewell may cancel this Contract immediately upon discovery of a material defect in any certification made in Supplier's Proposal. Cancellation of this Contract does not relieve either party of financial, product, or service obligations incurred or accrued prior to cancellation.

Marcus Putnam, Regional Sales Director, 5778 W Barstow Ave, Fresno, CA 93722, mputnam@pbloader.com, Tel: 559-277-7370, Cell: 559-304-1024.	

Table 2: Company Information and Financial Strength

Line Item	Question	Response *	
9	Provide a brief history of your company, including your company's core values, business philosophy, and industry longevity related to the requested equipment, products or services.	PB Loader Corporation began operation in 1954 with the invention of the PB Front Loader and the pothole patcher and emulsion systems in the 1960's for use in Road Asphalt Maintenance. As a family founded and run company, relationships in business are at the center of what PB Loader stands for and is reflected in day-to-day operations. PB believes in making a quality product which their customers can rely on year-in and year-out. PB does not believe in a one-size-fits-all approach. PB custom configures and engineers products to meet the exact needs of their customers. When a customer chooses PB they know they are going to be able to rely on quality construction materials assembled by experienced professionals. PB stands behind their products with not only a successful network of dealers but also production, engineering, and sales staff who are available for troubleshooting and repair. PB Loader has found that conducting business in an honest and attentive way, providing a quality, proven product, and listening to their customers are the best business practices possible. When you call PB with a question they listen and act. It is in this way that PB Loader continues to be synonymous with reliability in their industry and the world over. When we joined Sourcewell nine years ago, we found that their philosophy and values fell in line with the core values of PB Loader. From this, we have adopted Sourcewell as our company's predominate method of procurement. We wholeheartedly believe the present and future of government procurement lies with cooperative purchasing and Sourcewell, along with PB, leading the field.	*

10	What are your company's expectations in the event of an award?	We expect to provide growth through the use of this contract in the marketplace and with our customers. We are firm believers that contract buying is the way of the future with its ease of use for the customer… and customers need to do more with less. We have made and will continue to make the Sourcewell contract the preferred choice of purchasing for our customers. Our commitment to Sourcewell and contract buying… We have risen to the top of our Sourcewell category over the last two contracts and expect to continue with this success. We expect growth by continuing to broaden our offering of additional road maintenance manufacturers and equipment beyond our asphalt patchers and front loaders. We have added to our current contract with: Hook Lifts Light, Medium, and Heavy Duty Dump Bodies Custom Bodies Flatbed and platform bodies Arbor Bodies Contractor Flatbeds Air Compressors Dumping Flatbeds Cargo Bodies Chipper Bodies Landscape Bodies Standard & Mechanic Service Bodies Liftgates Chassis Message Board & Light Trailers Mechanic Truck Cranes Numerous Body & Equipment Accessories Truck Winches Truck Generators & Inverters We will continue to search for additional road maintenance equipment and accessories that will grow our Sourcewell product offering. We have and will always add customer specific models to serve our customers' requirements. Using the contract to meet our customers' needs exactly so they can make repeat equipment purchases effortlessly. For example, we have added a massive listing of custom road maintenance products for City of Los Angeles and San Diego County which plan to purchase multiple units continually each year.	*
11	Demonstrate your financial strength and stability with meaningful data. This could include such items as financial statements, SEC filings, credit and bond ratings, letters of credit, and detailed reference letters. Upload supporting documents (as applicable) in the document upload section of your response.	PB Loader has been in business since the 1950's making us one of the oldest municipal manufacturers on the west coast. Because of our strength in the marketplace and the quality of our products, PB has been and will continue to be a financially responsible and solid company. PB Loader is in excellent financial health. We have experienced substantial growth over the last five years, which has resulted in more than doubling the size of our company. We know this is due to our commitment to excellence in the marketplace as well as utilizing the Sourcewell contract. PB is privately held and for this reason we cannot release financial statements and do not have SEC filings. Please see attached reference letters from our financial institution, vendors, and dealers.	*
12	What is your US market share for the solutions that you are proposing?	Loader – 100% market share. This is a niche market, and we are the only manufacturer of the product. Patcher – Depending on the state, we have 45%-90% of the market share. We typically have high market share in the West and some in the southern states. Overall, we represent approximately 60% of the market throughout North America. Since our last contract we have even better representation. We are committed to find local dealers who can serve our customers.	*
13	What is your Canadian market share for the solutions that you are proposing?	We represent 40% of the Canadian market with our asphalt patchers and it continues to be an area of growth.	*
14	Has your business ever petitioned for bankruptcy protection? If so, explain in detail.	No, we have never petitioned for bankruptcy protection.	*
15	How is your organization best described: is it a manufacturer, a distributor/dealer/reseller, or a service provider? Answer whichever question (either a) or b) just below) best applies to your organization. a) If your company is best described as a distributor/dealer/reseller (or similar entity), provide your written authorization to act as a distributor/dealer/reseller for the manufacturer of the products proposed in this RFP. If applicable, is your dealer network independent or company owned? b) If your company is best described as a manufacturer or service provider, describe your relationship with your sales and service force and with your dealer network in delivering the products and services proposed in this RFP. Are these individuals your employees, or the employees of a third party?	PB Loader is best described as a manufacturer who works through a network of dealers along with our own sales staff to sell our product. We have 29 dealers with 44 branches covering the US states and Canada (see map). We are continually looking for dealers in the few areas we do not currently have one. We are always reviewing our dealers to ensure the quality needed to fulfill our customers' needs. To support our dealers, we have a total of 16 sales and support staff: President, two National Sales Directors who manage the dealers, two Territory Sales representatives, five Inside Sales and Customer Support staff members, a Parts & Service Manager, a Warranty Coordinator, two dedicated Sales Engineers, a Trade Show Support Specialist, and Sales Assistant.	*
16	If applicable, provide a detailed explanation outlining the licenses and certifications that are both required to be held, and actually held, by your organization (including third parties and subcontractors that you use) in pursuit of the business contemplated by this RFP.	PB Loader has local and California state resale/business licenses, Louisiana Motor Vehicles license, and Oregon business license. We are a final stage vehicle installer as well as a California licensed used vehicle dealer.	*
17	Provide all "Suspension or Debarment" information that has applied to your organization during the past ten years.	PB Loader has never had any suspension or debarments applied.	*

Table 3: Industry Recognition & Marketplace Success

Line Item	Question	Response *	
18	Describe any relevant industry awards or recognition that your company has received in the past five years	National Truck Equipment Association (NTEA) – MVP Member Top ranked vendor in sales revenue for the current Road Maintenance Equipment contract category.	*
19	What percentage of your sales are to the governmental sector in the past three years	The year-over-year numbers are consistent at 99% Government (State, County and Municipal) versus 1% private sector. Our internal and dealer sales force along with our products are specifically designed to meet the specialized needs of Government agencies. This sector of the market is the sole focus of our company. This allows us to better meet and understand their needs.	*
20	What percentage of your sales are to the education sector in the past three years	Our product offering is geared toward public works agencies, however, there is occasional overlap with school district ground maintenance equipment needs.	*
21	List any state, provincial, or cooperative purchasing contracts that you hold. What is the annual sales volume for each of these contracts over the past three years?	PB holds an HGAC contract. We see less than three sales a year and dimensioning due to the fact of our continued efforts to convert HGAC customers to Sourcewell.	*
22	List any GSA contracts or Standing Offers and Supply Arrangements (SOSA) that you hold. What is the annual sales volume for each of these contracts over the past three years?	Our product offering is rarely sold to the federal government except for a few military air bases and national parks. We do not currently hold any federal contracts (GSA, SOSA) because the market demand is very limited. When approached, we inform the federal agency of the benefits of Sourcewell.	*

Table 4: References/Testimonials

Line Item 23. Supply reference information from three customers who are eligible to be Sourcewell participating entities.

Entity Name *	Contact Name *	Phone Number *	
City of Los Angeles	Ray Perez	323-526-9221	*
City of Colorado Springs	Michael Shill Jr.	719-385-6711	*
County of San Diego	Jim Whitlock	619-709-2171	*
County of Fresno	Mike Downing	559-600-7528	
City of Tucson	Jerry Robles	520-837-6602	

Table 5: Top Five Government or Education Customers

Line Item 24. Provide a list of your top five government, education, or non-profit customers (entity name is optional), including entity type, the state or province the entity is located in, scope of the project(s), size of transaction(s), and dollar volumes from the past three years.

Entity Name	Entity Type *	State / Province *	Scope of Work *	Size of Transactions *	Dollar Volume Past Three Years *	
City of Los Angeles	Government	California - CA	Dump Bodies (52), Flatbed (31), Chipper Bodies (15), Truck Mounted Loaders (11), Patchers (5), Utility Bodies (2)	$50,000 to $200,000 depending on unit	$23,698,990	*
County of Fresno	Government	California - CA	Loaders (6), Dump Bodies (4), Patchers (1)	$50,000 to $200,000 depending on unit	$3,074,364	*
City of Ontario	Government	California - CA	Flatbeds (12), Dump Bodies (3), Service Bodies (2), Chassis (2), Patchers (1)	$50,000 to $200,000 depending on unit	$2,617,946	*
County of San Diego	Government	California - CA	Truck Mounted Loaders (11), Message Board Trailers (9), Patchers (3), Sprayers (2)	$50,000 to $200,000 depending on unit	$2,124,900	*
City of Portland	Government	Oregon - OR	Patchers (5)	$50,000 to $200,000 depending on unit	$869,675	*

Table 6: Ability to Sell and Deliver Service

Describe your company's capability to meet the needs of Sourcewell participating entities across the US and Canada, as applicable. Your response should address in detail at least the following areas: locations of your network of sales and service providers, the number of workers (full-time equivalents) involved in each sector, whether these workers are your direct employees (or employees of a third party), and any overlap between the sales and service functions.

Line Item	Question	Response *	

25	Sales force.	Our sales force is designed to support our dealer network and at the same time work directly with the end user government agencies. We take it upon ourselves to ensure our end users receive the highest level of customer service and are committed to their complete satisfaction with our products. Our sales force is specifically trained and has the knowledge and resources to ensure our dealers and customers utilize Sourcewell as their primary procurement method. Each team member listed below is committed to growing our company revenue through Sourcewell. Our team consists of twenty-two (22) sales and support professionals: Five (5) Outside Sales personnel. The President of the company (1) and two (2) traveling National Sales Directors, and two (2) outside sales representatives who visit dealers and end users throughout the country. Five (5) Inside Sales personnel. One (1) Sales Manager, and four (4) Inside Sales Coordinators who are responsible for quotes and working with our customers/dealers on the specific and unique designs of our product as well as offering product knowledge and support. One (1) Sales Assistant who is responsible for supporting our sales team and dealers with product information, social media, trade show coordination, and many other support duties which allows our sales team more time to respond to customers. One (1) Parts/Service Salesperson who is dedicated to meeting the aftermarket needs of our customers to ensure quick response to customers' needs. One (1) Warranty Coordinator dedicated to meeting the aftermarket needs of our customers to ensure quick response to any situation that arises. One (1) Trade Show Support who provides extra sales assistance at booths and other event functions. We have an Engineering team of eight (8) who are dedicated to support the sales teams with layout drawings and engineering information requests by customers, which ensures a high level of accuracy to meet the customers' needs. We are currently in the process of expanding our Sales team. We have job openings for two additional outside sales personnel and two inside. The company also utilizes our engineering, operations, and production personnel to support the sales team and customers.
26	Dealer network or other distribution methods.	PB Loader sells through a network of dealers throughout North America. It is our belief that utilizing local dealers provides the best customer service for our end users. Please see attached dealer list and map. We currently have 29 dealers totaling 44 branch locations in the US and Canada, totaling 148 dealer salespeople. Of that total, we have four (4) dealers with eight (8) branches in Canada. All our US dealers and their branches have received training from our staff on Sourcewell procurement and we are looking forward to doing the same with Canoe in Canada. Our sales team regularly visits our dealers to ensure they are trained on our product and the Sourcewell contract. We support many of our dealers' local trade shows and events. We are very active and encourage our dealers to be active in trade organizations such as APWA, MSA, RSFMA, NAPA, and others. These events are excellent opportunities to inform our government customers about Sourcewell procurement of our products.
27	Service force.	The above-mentioned dealer network employs factory trained parts and service representatives at their branches. These dealers typically handle other large municipal equipment like PB Loader. Because of this they have invested in service tooling at many of their locations, such as overhead cranes, mobile service trucks, and very capable shop facilities. The PB Loader sales team provides service support by being the first point of contact for customer questions on the operation and product usage. We provide an initial delivery training and for added value, free training for the life of the unit. We want to ensure that our customers can utilize our product safely and effectively. Replacement manuals and decals are also provided at no charge for the life of the unit. PB Loader utilizes its service team that can be sent around the country to support our dealers and end users. Our dealer network has a total of 295 service and 122 parts staff. PB Loader also supports them with our service and engineering personnel. We have complete manuals, engineering schematics, drawings, and videos. Troubleshooting assistance is available via phone and/or video conference. Per customer request, we utilize additional local third-party repair shops that are closer for a quicker turn around than some dealer locations. We also provide support for customers who provide their own service and a reimbursement program for customers who are required to do their own warranty work.
28	Describe the ordering process. If orders will be handled by distributors, dealers or others, explain the respective roles of the Proposer and others.	Quotes are generated by the inside sales department at PB Loader using Sourcewell pricing. Members will generate a purchase order directly to PB or one of our authorized dealers. Once received, an order confirmation is generated to ensure accuracy of the order. Regular updates are provided as the unit progresses through the manufacturing process. Final delivery is done by PB or our dealers and includes training. Once payment is received, it is recorded, and placed on our Sourcewell quarterly reports.

29	Describe in detail the process and procedure of your customer service program, if applicable. Include your response-time capabilities and commitments, as well as any incentives that help your providers meet your stated service goals or promises.	PB Loader's business philosophy is to provide superior quality in customer service which means quick response times and resolving issues to the customer's satisfaction. We require our dealers to provide immediate service to our customers. Many of our dealers offer multi-year service plans. We also offer multi-year warranty plans supported by our dealers. We also have a free lifetime replacement program for our manuals and all instruction/safety decals. PB Loader provides phone/video technical support to both dealers and end users. This is supported by our engineering/sales teams. When we are contacted with a service/warranty issue, a ticket is created within our MRP system and an email is sent company wide. Production, engineering, sales, and support teams all receive this notification and start resolving the issue. By having such a large team involve in rectifying the problem, solutions develop quicker and response times are improved.	*
30	Describe your ability and willingness to provide your products and services to Sourcewell participating entities in the United States.	We have made and will continue to make the Sourcewell contract the preferred choice of purchasing for our customers. We are firm believers that contract buying is the way of the future with its ease of use. Our desire is to have every product we make available through the Sourcewell contract. This philosophy is driven by the President of the company and upper management to ensure the entire organization is committed to making Sourcewell successful with PB Loader.	*
31	Describe your ability and willingness to provide your products and services to Sourcewell participating entities in Canada.	We are looking forward to expanding Sourcewell procurement utilizing the new Canoe platform with all our Canadian customers and dealerships. We currently have four (4) dealers in Canada with seven (7) branches covering nearly the entire country. We retain more than 40% market share in Canada with our asphalt patchers. Canada has been a major customer base for us and will continue to be.	*
32	Identify any geographic areas of the United States or Canada that you will NOT be fully serving through the proposed contract.	We fully serve all geographic areas within North America.	*
33	Identify any Sourcewell participating entity sectors (i.e., government, education, not-for-profit) that you will NOT be fully serving through the proposed contract. Explain in detail. For example, does your company have only a regional presence, or do other cooperative purchasing contracts limit your ability to promote another contract?	We fully serve all Sourcewell participating entities within North America.	*
34	Define any specific contract requirements or restrictions that would apply to our participating entities in Hawaii and Alaska and in US Territories.	There are no specific contract restrictions or requirements for participating entities in Hawaii, Alaska or US territories. We have experienced dealers who are trained to utilize Sourcewell. In Alaska, Craig Taylor Equipment offers sales and service support. In Hawaii we utilize the local truck dealerships for sales and service. Our Florida dealer, Environmental Products, has a dedicated salesperson who covers Puerto Rico.	*

Table 7: Marketing Plan

Line Item	Question	Response *	
35	Describe your marketing strategy for promoting this contract opportunity. Upload representative samples of your marketing materials (if applicable) in the document upload section of your response.	Sourcewell is integrated and promoted heavily into our sales process. A key part of our strategy is making sure our dealer network is promoting Sourcewell as our primary method to purchase PB products. This is accomplished during all sales calls to every dealer and at customer demonstrations with dealer management and sales personnel. We want it known that PB is synonymous with Sourcewell. We help convey this message by displaying the Sourcewell logo on all demonstration vehicles and apparel. We have committed to display the Sourcewell logo everywhere possible: media, ads, promotional items, website, trade show displays, our office, dealer branch locations, and company sales vehicles. The most important part of our strategy is having direct conversations with end user agencies on the value of utilizing Sourcewell for not only purchasing PB products but other products from Sourcewell vendors. We believe the more they utilize Sourcewell contract procurement, the more Sourcewell and PB will grow together. Through our own sales staff and more than 100 dealer salespeople these conversations occur daily.	*
36	Describe your use of technology and digital data (e.g., social media, metadata usage) to enhance marketing effectiveness.	We have begun the process of implementing a new forward-thinking social media and metadata program along with the redevelopment of our website. This began with signing a long-term contract with a respected digital marketing firm who will partner with us to develop and distribute a continuous campaign of all our social media, digital marketing, and website. Social media posts will include trade shows, industry events, customer demonstrations, new unit deliveries to satisfied customers, product upgrades, and new features. The campaign will include purchasing advertising banners on industry sites as well as an extensive GoogleAds. Each post and banner will include a Sourcewell presence, which is another way to make PB and Sourcewell synonymous. We are excited for the roll-out of the new e-purchase vendor showcase of which we will take full advantage.	*
37	In your view, what is Sourcewell's role in promoting contracts arising out of this RFP? How will you integrate a Sourcewell-awarded contract into your sales process?	Being a current vendor, the Sourcewell contract is already integrated into our sales process, utilized, and promoted heavily. Many of our dealers are very familiar with the contract, because of us and the other manufacturers they represent who are also vendors of Sourcewell. We believe that Sourcewell provides the initial platform for member agencies and should work directly with awarded vendors to promote increased membership. We feel Sourcewell should provide consulting on the legal requirements for members to use corporative purchasing. The sales integration process and Sourcewell becoming the primary method for our customers to purchase PB products began nine years ago with our first contract. We were believers in the beginning that Sourcewell and cooperative purchasing would be the future of government procurement. We have made every effort to make it our future as well. As stated in the previous two questions we laid out our overall marketing strategy for Sourcewell and are committed to continually evolve and improve that strategy as new ideas come to the forefront.	*
38	Are your products or services available through an e-procurement ordering process? If so, describe your e-procurement system and how governmental and educational customers have used it.	We often see e-advertising as becoming more prevalent in our industry. We have noticed many new customers have sought our website on the internet. Because of the high technical nature, unlimited customizations, and dollar value of our products, particularly being integrated with a chassis, a standard e-procurement system is inadequate to meet the needs of our customers. For these reasons we sell with a hands-on approach with our local dealer network which includes writing lengthy technical specs and doing 3-D layout drawings of the products. It is our belief that one size does not fit all therefore our products are custom designed and configured to meet the needs of our customers exactly. E-procurement is not a robust enough of a process to fulfill our customers' needs. We are, however, looking forward to the roll-out of the new e-purchase vendor showcase of which we will take full advantage.	*

Table 8: Value-Added Attributes

Line Item	Question	Response *	
39	Describe any product, equipment, maintenance, or operator training programs that you offer to Sourcewell participating entities. Include details, such as whether training is standard or optional, who provides training, and any costs that apply.	We offer free operator training and maintenance training onsite when the end user puts the unit into service. We also provide free follow-up training for the lifetime of the unit conducted by our own factory trained staff and/or dealers. It is our business philosophy to ensure that our customers can effectively and safely use our products. Also, we provide free manuals, and instructional/safety decals for the life of the unit. We have a dedicated person at the factory that customers can call for any kind of troubleshooting or operational advice. This in addition to the sales staff that can also provide this service. There are instructional videos, blueprints, and other digital materials that can be sent to the customers as learning tools. Several times a year we provide patcher training school which we encourage Sourcewell members to attend.	*
40	Describe any technological advances that your proposed products or services offer.	We like to be in the forefront of the technological advances within the municipal and truck equipment industries. We have incorporated options for the latest in back up sensor technology and cameras on our equipment. We strive to make our units the safest in the industry and have adapted standard automotive technology to road maintenance equipment which we have seen few others accomplish. We have updated numerous hydraulic and control systems to more efficient components that integrate with the advanced chassis ECM programming and chip sets. This is accomplished through our engineering department working directly with chassis manufacturers.	*
41	Describe any “green” initiatives that relate to your company or to your products or services, and include a list of the certifying agency for each.	To our knowledge, there are not any green agencies that certify our type of product (Pothole Patchers). However, our standard pothole patcher is heated by LPG which is an environmentally friendly fuel. We also offer an electric heated unit which is powered by an onboard generator on current chassis. We have begun to work closely with several electric chassis manufactures so that we can be on the forefront of the technology and offer fully electric road maintenance equipment. As a company we feel our carbon footprint is important with our products and how we operate. We are completing a new facility wide conversion to highly efficient LED lighting. We also have several recycling programs for steel, cardboard, e-waste, among others. Within the next few years, we are planning a solar program initiative which will significantly reduce our footprint.	*
42	Identify any third-party issued eco-labels, ratings or certifications that your company has received for the equipment or products included in your Proposal related to energy efficiency or conservation, life-cycle design (cradle-to-cradle), or other green/sustainability factors.	We do not know of any third parties that label road maintenance equipment specifically. As stated in question 41, the company is committed to developing green practices internally by utilizing energy efficiencies which will make us far more sustainable in the future.	*
43	Describe any Women or Minority Business Entity (WMBE), Small Business Entity (SBE), or veteran owned business certifications that your company or hub partners have obtained. Upload documentation of certification (as applicable) in the document upload section of your response.	PB Loader is not accredited as a WMBE or SBE. However, we work with several hub partners: Cicero Brothers (SBE) Westcoast Materials (SBE, DVBE) Main Street Materials (SBE)	*
44	What unique attributes does your company, your products, or your services offer to Sourcewell participating entities? What makes your proposed solutions unique in your industry as it applies to Sourcewell participating entities?	Quality and Customer Service have distinguished us as an industry leader and will continue to do so in the future. It is our business philosophy to stand by our products and customers. We want every customer to feel completely satisfied with the product and the service they receive over the product’s lifetime. By listening to our customers and responding to their needs expeditiously we ensure their complete satisfaction. What makes our products unique is that we do not believe in the one size fits all solution; agencies have very different needs because of their geographic locations, agency size, and other demographics. For this reason, we offer by far the largest selection of models and sizes with our products. But more importantly, we offer hundreds of options and will custom build additional features based off the customer’s needs. We believe in making it easy for our customers to purchase our products. We do this by first listening to their requirements and from there develop a detailed layout drawing. This allows our customer and their crews a great opportunity to design their own unit and know what they are getting before they purchase. On this contract we offer complete turnkey solutions with our products integrated with chassis so the customer can issue one PO to one vendor and have one point of contact. We have a large and dedicated dealer network whose goal is to support their local markets. In turn, we provide our dealers the support to do this as well as offering support directly to the end user. Even though PB sells through dealers, we believe that it is our responsibility to ensure the end user is completely satisfied.	*

Table 9A: Warranty

Describe in detail your manufacturer warranty program, including conditions and requirements to qualify, claims procedure, and overall structure. You may upload representative samples of your warranty materials (if applicable) in the document upload section of your response in addition to responding to the questions below.

Line Item	Question	Response *	
45	Do your warranties cover all products, parts, and labor?	Yes, our warranty covers all products, parts, and labor. In some cases, freight as well. It is our commitment to solve all warranty issues to the complete satisfaction of our customers.	*
46	Do your warranties impose usage restrictions or other limitations that adversely affect coverage?	No, our warranty does not have any usage restriction or other limitations. It is important to PB Loader that on the rare occasion there is a manufacturer defect, it is rectified immediately.	*
47	Do your warranties cover the expense of technicians' travel time and mileage to perform warranty repairs?	PB or the authorized dealer will cover travel time and mileage for any Sourcewell members warranty claim.	*
48	Are there any geographic regions of the United States or Canada (as applicable) for which you cannot provide a certified technician to perform warranty repairs? How will Sourcewell participating entities in these regions be provided service for warranty repair?	In regions where we do not have a certified technician, we offer over the phone technical support. If a problem is not resolved we may send a PB Loader technician to fix unit or utilize local third-party repair shops. Either PB or our dealer network can provide a technician who will travel to all geographic locations in US and Canada. Many repairs don't require a certified technician and third-party shops can be utilized when appropriate.	*
49	Will you cover warranty service for items made by other manufacturers that are part of your proposal, or are these warranties issues typically passed on to the original equipment manufacturer?	Yes, we will cover all items sold by PB Loader including those components manufactured by others. We believe this provides the best customer service to the end user.	*
50	What are your proposed exchange and return programs and policies?	Customers can return and exchange parts within 30 days without a restocking fee, but pay return freight. After 30 days, there is a 25% restocking fee, but in appropriate cases this may be waived. We wish to ensure customer satisfaction.	*
51	Describe any service contract options for the items included in your proposal.	PB Loader offers starter spare parts kits and a base refurbish package for our pothole patching products. We also offer extended warranty packages on the contract.	*

Table 9B: Performance Standards or Guarantees

Describe in detail your performance standards or guarantees, including conditions and requirements to qualify, claims procedure, and overall structure. You may upload representative samples of your performance materials (if applicable) in the document upload section of your response in addition to responding to the questions below.

Line Item	Question	Response *	
52	Describe any performance standards or guarantees that apply to your services	We make every effort to track the original promised delivery at time of quotation and actual delivery performance. We use this information to notify our customers of any deviation from the original quoted delivery.	*
53	Describe any service standards or guarantees that apply to your services (policies, metrics, KPIs, etc.)	We utilize a KPI system that tracks turn around time for part sales. It is imperative to get parts to the customer to minimize their down time.	*

Table 10: Payment Terms and Financing Options

Line Item	Question	Response *	
54	Describe your payment terms and accepted payment methods?	Our payment terms are Net 30. Check, ACH, and wire transfer are all acceptable forms of payment. We accept Visa and MasterCard for parts sales. We do not have a processing fee.	*
55	Describe any leasing or financing options available for use by educational or governmental entities.	For any customers seeking finance or leasing options, we partner with NCL Government Capital.	*
56	Describe any standard transaction documents that you propose to use in connection with an awarded contract (order forms, terms and conditions, service level agreements, etc.). Upload a sample of each (as applicable) in the document upload section of your response.	Each standard Sourcewell transaction starts with a Quote Request Form and detailed dimensional forms. Once a purchase order is received, an Order Confirmation Form is generated.	*
57	Do you accept the P-card procurement and payment process? If so, is there any additional cost to Sourcewell participating entities for using this process?	We accept P-card payments with no additional processing fee.	*

Table 11: Pricing and Delivery

Provide detailed pricing information in the questions that follow below. Keep in mind that reasonable price and product adjustments can be made during the term of an awarded Contract as described in the RFP, the template Contract, and the Sourcewell Price and Product Change Request Form.

Line Item	Question	Response *	
58	Describe your pricing model (e.g., line-item discounts or product-category discounts). Provide detailed pricing data (including standard or list pricing and the Sourcewell discounted price) on all of the items that you want Sourcewell to consider as part of your RFP response. If applicable, provide a SKU for each item in your proposal. Upload your pricing materials (if applicable) in the document upload section of your response.	See the attached Price Catalog for all our products being offered, which include their SKUs, MSRP, and Sourcewell discounts. We are offering a 10% discount off MSRP on the entirety of our catalog except for chassis. Chassis will be offered at a 5% discount off MSRP.	*
59	Quantify the pricing discount represented by the pricing proposal in this response. For example, if the pricing in your response represents a percentage discount from MSRP or list, state the percentage or percentage range.	We are offering a 10% discount off MSRP on the entirety of our catalog except for chassis. Chassis will be offered at a 5% discount off MSRP.	*
60	Describe any quantity or volume discounts or rebate programs that you offer.	In an addition to the initial 10% discount to Sourcewell members, we also offer a 3% quantity discount for orders of six (6) or more units excluding chassis.	*
61	Propose a method of facilitating “sourced” products or related services, which may be referred to as “open market” items or “nonstandard options”. For example, you may supply such items “at cost” or “at cost plus a percentage,” or you may supply a quote for each such request.	We like to approach sourced items in one of two ways. First, if they are customer specific, we will add them to the contract just for that customer, so it makes repeat purchasing easier. The second method is to supply a cost plus a percentage quote for these specialty items.	*
62	Identify any element of the total cost of acquisition that is NOT included in the pricing submitted with your response. This includes all additional charges associated with a purchase that are not directly identified as freight or shipping charges. For example, list costs for items like pre-delivery inspection, installation, set up, mandatory training, or initial inspection. Identify any parties that impose such costs and their relationship to the Proposer.	We like to approach sourced items in one of two ways. First, if they are customer specific, we will add them to the contract just for that customer, so it makes repeat purchasing easier. The second method is to supply a cost plus a percentage quote for these specialty items.	*
63	If freight, delivery, or shipping is an additional cost to the Sourcewell participating entity, describe in detail the complete freight, shipping, and delivery program.	Shipping and delivery are an additional cost. The amount depends on the size of the product and where it is going. We quote market rate.	*
64	Specifically describe freight, shipping, and delivery terms or programs available for Alaska, Hawaii, Canada, or any offshore delivery.	For Canada, we contact truck freight brokers who specialize in crossing the border. We and our dealers are very familiar with the USMCA processes. For Alaska, Hawaii and offshore deliveries, our dealers have freight brokers that handle the complete process. We have regularly shipped to all these locations. This is nothing out of the ordinary for us.	*
65	Describe any unique distribution and/or delivery methods or options offered in your proposal.	Our units are built as turnkey work ready products, so they can be delivered directly to the end user and are ready for operation.	*

Table 12: Pricing Offered

Line Item	The Pricing Offered in this Proposal is: *	Comments
66	c. better than the Proposer typically offers to GPOs, cooperative procurement organizations, or state purchasing departments.	To encourage Sourcewell sales we offer the best pricing to its members compared to any other pricing models.

Table 13: Audit and Administrative Fee

Line Item	Question	Response *	
67	Specifically describe any self-audit process or program that you plan to employ to verify compliance with your proposed Contract with Sourcewell. This process includes ensuring that Sourcewell participating entities obtain the proper pricing, that the Vendor reports all sales under the Contract each quarter, and that the Vendor remits the proper administrative fee to Sourcewell. Provide sufficient detail to support your ability to report quarterly sales to Sourcewell as described in the Contract template.	It is mandatory for our dealers to request a Sourcewell quote and provide member entity information. From this, a quote number is assigned and is tracked through the sales process. Each purchase order we receive from our dealer or end user is cross checked with a quote number to identify it as a Sourcewell order. This ensures that all Sourcewell orders make it on the quarterly report and a dealer cannot sell an Sourcewell product without our knowledge.	*
68	If you are awarded a contract, provide a few examples of internal metrics that will be tracked to measure whether you are having success with the contract.	Since we have been an awarded vendor for two contracts, we have established historical metrics. We track the Sourcewell sales dollars within our total sales dollars. We also track the Sourcewell units and product types produced within our total units produced. We track Sourcewell quotes generated within the total number of quotes generated and the conversion rate to orders of Sourcewell quotes. We analyze this performance to grow our success with the Sourcewell contract.	*
69	Identify a proposed administrative fee that you will pay to Sourcewell for facilitating, managing, and promoting the Sourcewell Contract in the event that you are awarded a Contract. This fee is typically calculated as a percentage of Vendor’s sales under the Contract or as a per-unit fee; it is not a line-item addition to the Member’s cost of goods. (See the RFP and template Contract for additional details.)	Our current contract has a fee of 2%. We would like to continue this with the new contract for our entire catalog including chassis.	*

Table 14A: Depth and Breadth of Offered Equipment Products and Services

Line Item	Question	Response *
70	Provide a detailed description of the equipment, products, and services that you are offering in your proposal.	We offer an enormous range of road maintenance equipment from pothole patchers to cone trucks, dump trucks, flatbed, message board trailers, and countless others. Asphalt (Pothole) Patchers PB Loader is the leading manufacturer of asphalt patchers with the largest selection of models, sizes, and options in the industry, as well as broad customization above and beyond that. Hot mix asphalt is required to complete a superior asphalt repair. PB patchers keep the temperature consistent throughout the entire shift in order to make a permanent patch. PB Asphalt Patchers carry all the equipment and material for a two-person crew to repair potholes, road shoulders, cut outs, skin patch, and utility cuts throughout the year. PB Patchers are fully equipped with all the tools needed so a team can tackle patching jobs with just one machine. All PB Patchers feature an insulated and heated asphalt hopper that keeps asphalt hot and usable all day. Four (4) Conveying Options: Belt, Single Auger, Double Auger, Dump Four (4) Mounting Options: Truck Chassis, Slip-In, Hook-Lift, Trailer Eight (8) Sizes: 1.5, 1.8, 3, 4, 5, 6, 8, 10 cubic yards Hundreds of options and custom configurations such as: (refer to catalog for complete list) Flasher, safety Spoils bins Tool boxes and baskets Arrow boards Vibratory compactors and rollers Back up alarms and camera equipment Air compressors Generators Jack hammers Hose reels Work decks Water containers Fire Extinguisher, first aid kits, triangle kits Many of these options are customizable within themselves. Locations on the truck, sizes, and usage are all considered when discussing these elements with the customer. PB Patchers come in two formats, a “V” hopper which uses either a continuous conveyor or auger to move the asphalt or a dump hopper which uses a hoist to raise the hopper which allows the asphalt to slide out. Both formats are available for mounting on truck chassis, slip-in, hook-lift or trailer models. Proven Features Heavy Duty Design All Hydraulic Operation Radiant Heat System Burner Systems Available in LPG, Diesel, and Electric Generator Fully Insulated Asphalt Container Hand Torch with 200,000 BTU Output Convenient Operator Controls Emulsion Spray System Emulsion Sprayers PB offers emulsion sprayers with more sizes and features than anyone else in the industry. Fully equipped emulsion systems can be powered by a hydraulically driven pump or compressed air and sized to meet our customers’ needs. These systems are truck mounted in conjunction with an asphalt patcher or truck equipment body. They are also available in trailer, hook lift, and slip-in models. All are available with a variety of options, sizes, and custom configurations. Truck Mounted Styles: 15-200 gallons Trailer Mounted and Slip-In Styles: 200-700 gallons Pump Type Sprayers - Pump type emulsion sprayers include a solvent tank for flushing the emulsion hose and cleaning asphalt tools with a waste tank system. Truck mounted units are usually heated by the truck cooling system but can also be heated by LPG burner. All trailer units use LPG heaters. Compressor Type Sprayers - Compressor type emulsion sprayers are available in the many sizes. These can be charged off the truck brake system compressor, or any air compressor. These sprayers are heated by the truck cooling system or LPG burner. Trailer and slip-in models are equipped with an engine driven compressor. Options and Features - All spray units can include Recirculation, Auxiliary Electric Heat, Tank Insulation, Discharge Strainer, Hose Reels, LPG Tanks, Thermostatic Controls, Loading Hose, Reverse Flow Systems, Draw Off Valve, Optional Engines, and Work Platform. PB Truck Mounted Loaders PB Truck Mounted Loaders combine a dump truck and loader shovel into one unit. Designed to load, haul and dump asphalt cold patch, leaves, gravel, dirt, snow, trash, or brush just to name a few. PB Loaders save operation cost, reduce manpower, and lets you tackle a variety of jobs that would otherwise require several pieces of equipment. PB Loaders are built tough and come equipped with features that improve productivity and safety. An exclusive arm design allows the operator access to the cab when the shovel is on the ground or in the travel position. PB Loaders are available with a 3,000 lb. or 5,000 lb. shovel lifting capacity, and can be outfitted with a clam, tilt, clam/tilt or standard shovel. Shovel capacities range from 3/4 cubic

yard to 1 1/2 cubic yards. Safety switches shut down all systems if the cab door is opened or the dump body is raised during loading operations.

Options include air or joystick controls, automatic grease lines, tool boxes, pull tarps, various sizes of dump bodies, emulsion spray systems, carbide blade and blocks for the shovel, installation on tilt cab or conventional chassis, and many more.

Road Maintenance Support Equipment

PB Bodies are offered in a variety of models and capacities that can be used in conjunction with a PB Truck Mounted Loader, PB Patchers, and PB Emulsion Systems. They can also be standalone units equipped to provide valuable service for road maintenance. Features include heavy-duty construction, a large variety of accessory equipment and tools, custom configured to meet the exact needs of the using agency.

Chassis:
PB Loader offers full turn-key solutions (single PO Source Purchasing) for our Sourcewell customers by providing a variety of chassis that are used in conjunction with our truck mounted products. For example:

- Ford
- Freightliner
- Western Star
- Peterbilt
- Isuzu
- Volvo

Dump Bodies:
PB Loader offers many sizes and types of dump bodies. We work with several leading manufacturers which allows us to bring complete solutions to our Sourcewell customers. We also work with these manufacturers' national dealer networks by convincing them to sell dump bodies with Sourcewell in their local markets. For example:

- Small Contractor Bodies
  - Rigid and/or Fold-Down Sides
- Medium Duty Bodies
  - Bobtail Bodies
- Heavy Duty Bodies
  - Square Bodies
  - Elliptical Bodies
  - Demolition Bodies

Flatbeds / Stake Bodies / Platform Bodies:
PB represents several leading brands as well as manufacture our own models. These bodies can come in standard to heavy duty construction and can be custom built with inlay tool boxes, dump hoists, lift gates, and many other features. Bringing yet another complete solution to our SW customers. We work with these manufacturers' national dealer networks by convincing them to sell flatbed bodies with Sourcewell in their local markets. For example:

- Smooth Floor
  - Tread Plate Floor
  - Wood Deck
  - Aluminum Body
  - Rancher Body
  - Dumping Bodies
  - Stake Sides (wood, steel, aluminum)
  - Various Lengths and Widths

Chipper Boxes / Landscape / Arbor Bodies:
PB represents several brands as well as manufacture our own models. These bodies come in many configurations to meet the roadway landscaping needs of our Sourcewell customers. We work with these manufacturers' national dealer networks by convincing them to sell their bodies with Sourcewell in their local markets. For example:

- Open Top Chipper Box
- Closed Top Chipper Box
- Side Open and barn door landscape bodies (rugby and reading)
- Arbor Bodies with included storage for saws and tree trimming equipment

Utility Bodies:
PB offers the Reading Utility Bodies product line to its SW customers. Reading has a full line of bodies that range from smaller maintenance units to large mechanic trucks for use in road maintenance applications. With a base body from reading, we can upfit additional SW listed equipment to customize a truck to create the best solution for our Sourcewell members. We work with Reading's national dealer network by convincing them to sell utility bodies with Sourcewell in their local markets. For example:

- Steel Constructed Bodies
- Aluminum Constructed Bodies
- Single and Dual Wheel
- Canopy Bodies
- Mechanics Bodies
- Mechanics Crane Bodies

Message Boards Trailers:
PB Loader partners with Wanco to offer a full line of trailer and truck mounted message boards and traffic control products to provide reliable traffic safety for roads and highways. Traffic safety is paramount to all road maintenance work. By providing these products in conjunction with our full line of equipment we give our customers complete solutions. We work with Wanco's national dealer network by convincing them to sell their safety equipment with Sourcewell in their local markets. For example:

Arrow Board Trailers and Truck Mount
Message Board Trailers and Truck Mount
Speed Radar Trailers
Light Tower Trailers

Swaploader Hook Lifts:
We are offering a full hook-lift line, these products are often used in conjunction with our asphalt patchers and support bodies. Hook-lift systems provide an efficient fleet utilization system for municipalities because the customer can use one chassis with several pieces of equipment. We work with their dealer nationwide by convincing them to sell hook lift systems with Sourcewell in their local markets. For example:

Single axle from 7,500 lbs. to 24,000 lbs. capacity
Tandem axle from 33,000 lbs. to 65,000 lbs. capacity

Lift Gates:
Truck mounted lift gate systems that offer value added ease of accessibility to many truck equipment bodies. For example:

Tommy Lift Gate
- Pick Up Truck
- Utility Body
- Flatbed
- Box Body
- Rail Gate
- Tuck under
- Dump Through

Palfinger Lift Gates
- Cantilever
- Pick Up Truck
- Utility Body
- Flatbed
- Box Body
- Rail Gate
- Tuck Under

Compressor Systems:
Truck and skid mounted compressor systems that offer value added functions to many truck equipment bodies. These systems are utilized to run jack hammers, impact wrenches, blow guns, and many other air powered tools and accessories that road maintenance crews use regularly. For example:

Vanair
- Under deck rotary screw compressors from 60 to 185 CFM
- Hydraulic driven compressors from 30 to 85 CFM
- Engine driven compressors from 30 to 85 CFM
- All-In-One systems combines air, electric generators, welder, and hydraulic into one unit

Sullivan-Palletek
- Above deck skid mount, engine driven, 185 CFM

Other brands
- Small engine reciprocating compressor
- Electric 12V compressor

Attenuator: Trailer and truck mounted
Traffix Scorpion truck mounted and trailer crash attenuator systems MASH rated. Attenuators provide that additional safety to the road maintenance crews allowing them to work on the road with confidence. The models presently on our contract provide for safety at highway speeds.

Water Trucks:
We are offering truck mounted water tanks for the use during road maintenance projects for dust control and clean up. For example:

Single axle 2,000 gallon
Tandem axle 4,000 gallon

Cranes:
We offer several brands of truck mounted cranes spanning many types and sizes. These cranes are sold in conjunction with other support bodies to increase the capabilities of the truck. For example:

Electric
- Hydraulic

Folding, compact
- Outriggers

Spitzlif
Palfinger/Reading
Venturo

Customer Specific Custom Road Maintenance Equipment:
As a result of our many options and custom configurations to meet the exact needs of individual agencies, we have started a program of adding customer specific configurations to our current Sourcewell contract. This is to facilitate ease of purchasing for our customers, particularly those who have massive amounts of customized features. One of the greatest successes of this is with the City of Los Angeles which has more than a dozen custom SKUs which includes chassis for turn-key solutions.

Additional Accessories:
On this contract PB offers many additional accessories to upfit any truck or support body with all the tools that road crews need. For example, but not limited to:

Whelen safety lights
PSE Code3 Safety Lights
Work lights and spotlights

		Warn Wenches Tool boxes and baskets Tool holders Back up cameras and sensors Bed vibrators Pull Tarps Inverter Systems with electrical outlets Fire extinguishers and triangle kits Water coolers Wash tanks Ladder and material racks Vises Reflective safety tape and panels	
71	Within this RFP category there may be subcategories of solutions. List subcategory titles that best describe your products and services.	Roadway Surface Maintenance and Repair Equipment – We manufacture pothole (asphalt) patchers and emulsion transport and sprayers. We offer the largest selection by far of models and sizes of pothole patchers also custom built to our customers' needs. Equipment and Products in Support of Roadway Maintenance and Repair – We offer many additional asphalt support bodies that utilize emulsion systems and other products that municipalities use in conjunction with their pothole patcher and road maintenance programs. This also includes our PB front loader systems.	*

Table 14B: Depth and Breadth of Offered Equipment Products and Services

Indicate below if the listed types or classes of equipment, products, and services are offered within your proposal. Provide additional comments in the text box provided, as necessary.

Line Item	Category or Type	Offered *	Comments	
72	Asphalt recycles and reclaimers	○ Yes ◉ No	We are in development to produce asphalt hotbox trailers that have asphalt reclaiming features. Product launch is expected First Quarter 2022. We are committing to ultimately producing a full line of these trails and heavily competing in this market.	*
73	Patchers, seal coaters, crack sealers, and mastic and adhesive melters	◉ Yes ○ No	We are the leading producer of truck mounted pothole patching systems in North America. PB does not manufacture seal coaters, crack sealers, and mastic and adhesive melters.	*
74	Chip spreaders, asphalt brooms, and pavement grinding or grooving equipment	○ Yes ◉ No	We do not manufacture any of these products.	*
75	Pavement marking application and removal equipment	○ Yes ◉ No	We do not manufacture any of these products.	*
76	Other	◉ Yes ○ No	We are the leading producers of truck mounted emulsion spray systems. We also offer a multitude of road maintenance support equipment as mentioned in Table 14A.	*

Table 15: Exceptions to Terms, Conditions, or Specifications Form

Line Item 77. **NOTICE**: To identify any exception, or to request any modification, to the Sourcewell template Contract terms, conditions, or specifications, a Proposer must submit the exception or requested modification on the **Exceptions to Terms, Conditions, or Specifications Form** immediately below. The contract section, the specific text addressed by the exception or requested modification, and the proposed modification must be identified in detail. Proposer's exceptions and proposed modifications are subject to review and approval of Sourcewell and will not automatically be included in the contract.

Documents

Ensure your submission document(s) conforms to the following:

1. Documents in PDF format are preferred. Documents in Word, Excel, or compatible formats may also be provided.

2. Documents should NOT have a security password, as Sourcewell may not be able to open the file. It is your sole responsibility to ensure that the uploaded document(s) are not either defective, corrupted or blank and that the documents can be opened and viewed by Sourcewell.

3. Sourcewell may reject any response where any document(s) cannot be opened and viewed by Sourcewell.

4. If you need to upload more than one (1) document for a single item, you should combine the documents into one zipped file. If the zipped file contains more than one (1) document, ensure each document is named, in relation to the submission format item responding to. For example, if responding to the Marketing Plan category save the document as "Marketing Plan."

Addenda, Terms and Conditions

PROPOSER AFFIDAVIT AND ASSURANCE OF COMPLIANCE

I certify that I am the authorized representative of the Proposer submitting the foregoing Proposal with the legal authority to bind the Proposer to this Affidavit and Assurance of Compliance:

1. The Proposer is submitting this Proposal under its full and complete legal name, and the Proposer legally exists in good standing in the jurisdiction of its residence.

2. The Proposer warrants that the information provided in this Proposal is true, correct, and reliable for purposes of evaluation for contract award.

3. The Proposer, including any person assisting with the creation of this Proposal, has arrived at this Proposal independently and the Proposal has been created without colluding with any other person, company, or parties that have or will submit a proposal under this solicitation; and the Proposal has in all respects been created fairly without any fraud or dishonesty. The Proposer has not directly or indirectly entered into any agreement or arrangement with any person or business in an effort to influence any part of this solicitation or operations of a resulting contract; and the Proposer has not taken any action in restraint of free trade or competitiveness in connection with this solicitation. Additionally, if Proposer has worked with a consultant on the Proposal, the consultant (an individual or a company) has not assisted any other entity that has submitted or will submit a proposal for this solicitation.

4. To the best of its knowledge and belief, and except as otherwise disclosed in the Proposal, there are no relevant facts or circumstances which could give rise to an organizational conflict of interest. An organizational conflict of interest exists when a vendor has an unfair competitive advantage or the vendor's objectivity in performing the contract is, or might be, impaired.

5. The contents of the Proposal have not been communicated by the Proposer or its employees or agents to any person not an employee or legally authorized agent of the Proposer and will not be communicated to any such persons prior to Due Date of this solicitation.

6. If awarded a contract, the Proposer will provide to Sourcewell Participating Entities the equipment, products, and services in accordance with the terms, conditions, and scope of a resulting contract.

7. The Proposer possesses, or will possess before delivering any equipment, products, or services, all applicable licenses or certifications necessary to deliver such equipment, products, or services under any resulting contract.

8. The Proposer agrees to deliver equipment, products, and services through valid contracts, purchase orders, or means that are acceptable to Sourcewell Members. Unless otherwise agreed to, the Proposer must provide only new and first-quality products and related services to Sourcewell Members under an awarded Contract.

9. The Proposer will comply with all applicable provisions of federal, state, and local laws, regulations, rules, and orders.

10. The Proposer understands that Sourcewell will reject RFP proposals that are marked "confidential" (or "nonpublic," etc.), either substantially or in their entirety. Under Minnesota Statutes Section 13.591, subdivision 4, all proposals are considered nonpublic data until the evaluation is complete and a Contract is awarded. At that point, proposals become public data. Minnesota Statutes Section 13.37 permits only certain narrowly defined data to be considered a "trade secret," and thus nonpublic data under Minnesota's Data Practices Act.

11. Proposer its employees, agents, and subcontractors are not:
    1. Included on the "Specially Designated Nationals and Blocked Persons" list maintained by the Office of Foreign Assets Control of the United States Department of the Treasury found at: https://www.treasury.gov/ofac/downloads/sdnlist.pdf;

    2. Included on the government-wide exclusions lists in the United States System for Award Management found at: https://sam.gov/SAM/; or

    3. Presently debarred, suspended, proposed for debarment, declared ineligible, or voluntarily excluded from programs operated by the State of Minnesota; the United States federal government or the Canadian government, as applicable; or any Participating Entity. Vendor certifies and warrants that neither it nor its principals have been convicted of a criminal offense related to the subject matter of this solicitation.

☑ By checking this box I acknowledge that I am bound by the terms of the Proposer's Affidavit, have the legal authority to submit this Proposal on behalf of the Proposer, and that this electronic acknowledgment has the same legal effect, validity, and enforceability as if I had hand signed the Proposal. This signature will not be denied such legal effect, validity, or enforceability solely because an electronic signature or electronic record was used in its formation. - Jason Thompson, President, PB Loader Corporation

The Proposer declares that there is an actual or potential Conflict of Interest relating to the preparation of its submission, and/or the Proposer foresees an actual or potential Conflict of Interest in performing the contractual obligations contemplated in the bid.

CITY OF ONTARIO *Agenda Report* **August 20, 2024**	**SECTION:** **CONSENT CALENDAR**
Department: Economic Development Prepared By: Jennifer Hiramoto Staff Member Presenting: Jennifer McLain Hiramoto, Economic Development Director Approved By:	Submitted To: Council/OHA Approved: _____ Continued To: _____ Denied: _____ Item No: 23

SUBJECT: **CONSIDER A RESOLUTION APPROVING, PURSUANT TO THE CERTIFIED FINAL ENVIRONMENTAL IMPACT REPORT AND ADDENDA FOR THE ONTARIO CENTER SPECIFIC PLAN (SCH NO. 89041009), THE FIRST AMENDMENT TO THE COMMUNITY EVENTS CENTER OPERATING AGREEMENT BETWEEN THE CITY AND SMG AMENDING TERMS FOR THE OPERATION AND MANAGEMENT OF EVENTS CENTER LOCATED AT 4000 EAST ONTARIO CENTER PARKWAY, ONTARIO, CA (APN: 0210-205-01)**

RECOMMENDATION: That the City Council takes the following actions:

A. Consider and Adopt a Resolution Approving, Pursuant to the Certified Final Environmental Impact Report and Addenda for The Ontario Center Specific Plan (SCH No. 89041009), the First Amendment to the Community Events Center Operating Agreement between the City of Ontario and SMG; and
B. Authorize the City Manager, or his designee, to execute the First Amendment to the Community Events Center Operating Agreement between the City and SMG, on behalf of the City.

THE FOLLOWING COUNCIL GOALS ARE BEING ACHIEVED:
Operate in a Businesslike Manner
Invest in the Growth and Evolution of the City's Economy
Focus Resources in Ontario's Commercial and Residential Neighborhoods

FISCAL IMPACT: The City of Ontario is expected to generate $1M a year in new revenue as a result of this Amendment.

BACKGROUND & ANALYSIS: On July 1, 2016, the City entered into the Community Events Center Operating Agreement ("Operating Agreement") with SMG Worldwide ("Operator") for the management of 25.7-acre area that includes the 11,000 seat Toyota Arena at 4000 Ontario Center Parkway, and roughly four parking lots, all owned by the City of Ontario ("City"). As the City continues to look at capitalizing on its investment and success of the Toyota Arena, the City envisions a robust entertainment, pedestrian and residential district that will include upscale retail

and restaurants, vibrant entertainment venues and dense residential development.

To deliver on this vision, on July 19, 2022, the City entered into four separate development agreements with a master developer. In total, this development will include 700 new residential units and nearly 70,000 SF of new commercial. One of the agreements was with OTC Lot A Owner ("OTC") for property immediately to the east of the Toyota Arena. In addition to this private development, the City intends on developing a Public Plaza ("Plaza Area") to the east of the Toyota Arena and to the west of the Lot A development. This approximately 2-acre Plaza will create a public space that will contain retail and concession kiosks ("Kiosks"), outside furniture, and outdoor entertainment space. This amount of programming, especially the Kiosks, presents a financial opportunity for the City, and with that it will also require day-to-day management.

In order for SMG to manage activities in the Plaza Area, the City needs to amend its existing Agreement with SMG. The First Amendment to the Community Events Operating Agreement will allow for this expanded activity, as well as details the revenue share of the Kiosks.

A summary of the additions in the Amendment include the following:

- Definitions were clarified or added, including the addition of the Plaza Area. This is defined as an 87,120 square foot area between the Toyota Arena and Lot A, as depicted in the Agreement.
- Scope of Services were added to include that the Operator shall manage, operate and maintain both the Events Center and the Plaza Area.
- Definitions for collections and payments for the Plaza Area were added, including defining operating revenue, operating expenses, and net operating income and loss for the Plaza Area.
- Distribution of Net Operating Income - Plaza Area.
    - The Amendment introduces the concept of priority payments for the activity, including revenue from Kiosks, in the Plaza Area. The Operator shall:
        - Pay the first $1.62 M to OTC Lot A.
        - Pay the second $1 M to the City.
        - Pay the third $1 M to itself (Operator). These funds will cover operating expenses.
    - Any balance in excess of the priority payments detailed above shall be split three ways between the OTC Lot A, the Operator and the Owner.

CEQA

The City prepared and certified the Final EIR (“FEIR”) in 1990, for the Ontario Center Specific Plan (SCH No. 89041009) and Mitigation, Monitoring and Reporting Program (“MMRP”) consisting of comments received during the 45-day public review and comment period on the Draft FEIR, written responses to those comments, and revisions and errata to the Draft FEIR. On February 1, 2006, the City adopted an Addendum to the FEIR for the Community Events Center, including a Community Events Center and a multi-purpose stadium, per the standards for subsequent environmental review outlined in Public Resources Code section 21166, State CEQA Guidelines section by preparing an Initial Study and accompanying technical reports (“CEC Addendum”). Based on the CEC Addendum, the FEIR, and the other Addendum adopted by the City with regard to the FEIR, staff has concluded that the previously certified FEIR fully analyzed and mitigated, where feasible,

all potentially significant environmental impacts, if any, that would result from the First Amendment to the Community Events Center Operation Agreement, and therefore, no subsequent EIR or mitigated negative declaration is required.

RESOLUTION NO. _____

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF ONTARIO, CALIFORNIA, APPROVING, PURSUANT TO THE CERTIFIED FINAL ENVIRONMENTAL IMPACT REPORT AND ADDENDA FOR THE ONTARIO CENTER SPECIFIC PLAN (SCH NO. 89041009), THE FIRST AMENDMENT TO THE COMMUNITY EVENTS CENTER OPERATING AGREEMENT BETWEEN THE CITY AND SMG AMENDING TERMS FOR THE OPERATION AND MANAGEMENT OF EVENTS CENTER LOCATED AT 4000 EAST ONTARIO CENTER PARKWAY, ONTARIO, CA (APN 0210-205-01-0000).

WHEREAS, the City of Ontario is the fee interest owner of certain real property, identified with Assessor's Parcel Number 0210-205-01-0000, located at 4000 East Ontario Center Parkway, Ontario, CA, consisting of approximately 25.7 gross acres of land, (the "City Property"), which contains certain improvements, including a sports and entertainment arena with related office space for administrative use (the "Events Center"), commonly known as the Toyota Arena, which is situated on and generally within center point of the City Property, and presently with parking lots for use associated with the Events Center; and

WHEREAS, the City and SMG, a general partnership, ("Operator") have entered into that certain Community Events Center Operating Agreement (the "Original Agreement"), dated as of July 1, 2016, pursuant to which Operator manages and operates the Toyota Arena Events Center for the City; and

WHEREAS, the City desires to design and construct certain improvements outside along the east side of the Events Center to create a public plaza or paseo (the "Plaza Area") that will contain retail and concession kiosks ("Kiosks"), outside furniture, and outdoor entertainment space for use by the residents of Ontario and the regional community; and

WHEREAS, a Kiosks License Agreement and Sublicense Agreement are desired to grant a license for the locations of the Kiosks under the License Agreement and a sublicense to the Operator, or an associated entity of Operator, for the Operator, among other things, to manage, maintain and operate the Kiosks; and

WHEREAS, the City has entered into Ground Leases with two associated entities to the developer, Adept, ("Adept Entities") whereby the Adept Entities will design, plan and construct commercial, hospitality and residential development on the two lots located on the east side of the Events Center as part of the desired entertainment district; and

WHEREAS, the City and Operator desire to amend the Original Agreement to, among other things, re-define the areas of management and operation control over and on portions of the City Property and to amend the financial provisions related to the Plaza Area in furtherance of creating a desired entertainment district; and

WHEREAS, the City and Operator as contracting parties desire to provide the special financial provisions for the collective common benefit of the overall current and prospective development on the City Property for the entertainment district; and

WHEREAS, pursuant to the California Environmental Quality Act (Public Resource Code §§ 21000 et seq.) ("CEQA"), and the State CEQA Guidelines (14 Cal. Code Regs. §§ 15000 et seq.) the City previously determined that an Environmental Impact Report ("EIR") be prepared pursuant to CEQA in order to analyze all potential adverse environmental impacts of the Ontario Center Specific Plan; and

WHEREAS, the City prepared and certified the Final EIR ("FEIR") in 1990, for the Ontario Center Specific Plan (SCH No. 89041009) and Mitigation, Monitoring and Reporting Program ("MMRP") consisting of comments received during the 45-day public review and comment period on the Draft FEIR, written responses to those comments, and revisions and errata to the Draft FEIR. For the purposes of this Resolution, the "FEIR" shall refer to the Draft FEIR, as revised by the Final FEIR's errata section, together with the other sections of the Final FEIR; and

WHEREAS, on February 1, 2006, the City adopted an Addendum to the FEIR for the Community Events Center, including a Community Events Center and a multi-purpose stadium, per the standards for subsequent environmental review outlined in Public Resources Code section 21166, State CEQA Guidelines section by preparing an Initial Study and accompanying technical reports ("CEC Addendum"); and

WHEREAS, based on the CEC Addendum, the FEIR, and the other Addendum adopted by the City with regard to the FEIR, staff has concluded that the previously certified FEIR fully analyzed and mitigated, where feasible, all potentially significant environmental impacts, if any, that would result from the First Amendment to the Community Events Center Operation Agreement, and therefore, no subsequent EIR or mitigated negative declaration is required; and

NOW, THEREFORE, THE CITY COUNCIL FOR THE CITY OF ONTARIO DOES HEREBY RESOLVE AND DECLARE AS FOLLOWS:

SECTION 1. Recitals. The Recitals set forth above are true and correct and are incorporated into this Resolution by this reference.

SECTION 2. Findings. The City Council finds that the First Amendment to the Community Events Center Operating Agreement for the City Property pursuant to the Agreement will further the goals and purposes of the City, and is in the common interest of the City and its residents.

SECTION 3. Approval of Amendment to the Agreement. The City Council hereby approves the First Amendment to the Community Events Center Operating Agreement in substantially the form attached hereto as Exhibit A, subject to any non-substantive revisions which do not increase the City's liability and are approved by the

City Attorney, and authorizes the City Manager to sign and enter into the Agreement and perform the obligations of the City under the Agreement.

SECTION 4. CEQA. As the decision-making body for the First Amendment to the Community Events Center Operating Agreement, City Council has reviewed and considered the previously certified FEIR and Addenda, any oral or written comments received, and the administrative record prior to making any decision on the First Amendment to the Community Events Center Operating Agreement. The Council finds that the Addenda and FEIR contain a complete and accurate reporting of all of the environmental impacts associated with the First Amendment to the Community Events Center Operating Agreement.

SECTION 5. Findings on the Necessity for a Subsequent or Supplemental Environmental Impact Report. Based on the substantial evidence set forth in the record, including but not limited to, the previously certified FEIR, the Addenda, and all related information presented to the City Council, the Council finds that the First Amendment to the Community Events Center Operating Agreement does not necessitate even minor modifications to the FEIR and Addenda. Therefore, pursuant to State CEQA Section 15164 and the City Council finds that the preparation of a subsequent or supplemental EIR is not required for the First Amendment to the Community Events Center Operating Agreement.

SECTION 6. Findings on Environmental Impacts. Having considered the Addenda, the administrative record, the previously certified FEIR and all written and oral evidence presented to the City Council, the Council finds that all environmental impacts of the First Amendment to the Community Events Center Operating Agreement have been addressed within the FEIR and the Addenda. The City Council finds that no new or additional mitigation measures or alternatives are required. The Council further finds that there is not substantial evidence in the administrative record supporting a fair argument that the First Amendment to the Community Events Center Operating Agreement may result in any significant environmental impacts beyond those analyzed in the FEIR and Addenda.

SECTION 7. Notice of Determination. The Executive Director, or designee, is hereby directed to file a Notice of Determination for the First Amendment to the Community Events Center Operating Agreement under CEQA.

SECTION 8. Severability. If any provision of this Resolution or the application of any such provision to any person or circumstance is held invalid, such invalidity shall not affect other provisions or applications of this Resolution that can be given effect without the invalid provision or application, and to this end the provisions of this Resolution are severable. The City declares that the City would have adopted this Resolution irrespective of the invalidity of any particular portion of this Resolution.

SECTION 9. Effective Date. This Resolution shall become effective immediately upon its adoption.

The City Clerk of the City of Ontario shall certify as to the adoption of this Resolution.

PASSED, APPROVED, AND ADOPTED this 20th day of August, 2024.

The foregoing is the original of Resolution No. 2024- duly passed and adopted by the Ontario City Council at their regular meeting held August 20, 2024.

_____
SHEILA MAUTZ, CITY CLERK

(SEAL)

FIRST AMENDMENT TO THE
COMMUNITY EVENTS CENTER OPERATING AGREEMENT

This First Amendment to the Community Events Center Operating Agreement ("First Amendment"), dated as of _____, 2024 (the "Effective Date"), is made by and between the City of Ontario, a municipal corporation organized under the laws of the State of California ("Owner" or "City"), and SMG, a Pennsylvania General Partnership, whose current address is 300 Conshohocken State Road, Suite 770, West Conshohocken, PA 19428 ("Operator"). The Owner and Operator may sometimes hereinafter be referred to individually as the "Party" or collectively as the "Parties."

RECITALS

WHEREAS, Owner is the fee interest owner of certain real property, identified with Assessor's Parcel Number 0210-205-01-0000, located at 4000 East Ontario Center Parkway, Ontario, CA, consisting of approximately 25.7 gross acres of land, (the "City Property") as depicted on **Exhibit A**, **Depiction of City Property**, which contains certain improvements, including a sports and entertainment arena with related office space for administrative use by Owner and Operator (the "Events Center"), commonly known as the Toyota Arena, which is situated on and generally within center point of the City Property, and presently with parking lots for use associated with the Events Center;

WHEREAS, the Owner and Operator have entered into that certain Community Events Center Operating Agreement (the "Original Agreement"), dated as of July 1, 2016, pursuant to which Operator manages and operates the Events Center for the Owner;

WHEREAS, Owner is interested in creating an entertainment district for the residents of Ontario and regional community by facilitating future upscale retail and restaurants, entertainment venues and theater, commercial, hospitality and residential development on certain portions of the City Property;

WHEREAS, Owner has entered into certain other agreements and leases for portions of the City Property in furtherance of the aforementioned future development, including that certain Ground Lease dated July 19, 2022 ("Lot A Ground Lease") between the Owner and OTC Lot A Owner, LLC ("OTC Lot A") for an area east of the Events Center, referenced as "Lot A";

WHEREAS, Owner intends to design and construct improvements outside between the east side of the Events Center and the land referenced as Lot A to create a public plaza or paseo (the "Plaza Area") that will contain retail and concession kiosks ("Kiosks"), outside furniture, and outdoor entertainment space for use by the public;

WHEREAS, the Owner and OTC Lot A intend to enter into a Kiosk License Agreement ("License") for the Kiosks whereby OTC Lot A will be granted a license for a portion of the Plaza Area (as defined below) to implement the certain use rights granted to OTC Lot A by the Owner under the Lot A Ground Lease;

WHEREAS, concurrently or subsequent to Owner and OTC Lot A entering into the Kiosk

License Agreement, the Operator (or an associated entity of Operator) intends to enter into a Naming Rights and Kiosk Sub-License Agreement ("Sublicense") with OTC Lot A whereby Operator will sub-license the Kiosks area (located within the Plaza Area) to manage and operate the Kiosks for OTC Lot A and will have other rights to obtain sponsor(s) for a sign that will be affixed to a Building on Lot A facing the Plaza Area;

WHEREAS, the Owner and Operator desire to amend the Original Agreement to, among other things, re-define the areas of management and operation control over and on portions of the City Property and to amend the financial provisions related to the Plaza Area in furtherance of creating the desired entertainment district;

WHEREAS, the Owner and Operator as contracting parties desire to provide the special financial provisions for the collective benefit of the overall current and prospective development on the City Property for the entertainment district and the aforementioned agreements between the Owner and Operator, the Owner and OTC Lot A, Owner and Adept Development (an entity related to OTC Lot A) and the Operator and OTC Lot A, respectively;

WHEREAS, this First Amendment and the Original Agreement will hereinafter be collectively referenced as the "Agreement" unless otherwise specifically referenced individually;

NOW, THEREFORE, in consideration of the above recitals, and the representations, warranties, covenants and conditions contained herein and for other good and valuable consideration, the receipt and adequacy of which are hereby acknowledged, Owner and Operator agree as follows:

1. **Incorporation of Recitals**. The recitals set forth above are hereby incorporated herein as if set forth in their entirety and made a part of this Agreement.

2. **Definitions**. A Definitions section shall be added as Section 1.4 (to replace the previously omitted section) and the following defined terms shall have the meanings set forth below:

1.4 Definitions. Set forth below are definitions for the Events Center, Lot A, Lot B, Lot E, Parking Lots and Plaza Area to amend the terms pertaining to Sections 1.5 and 2.1 of the Agreement and to provide additional information for amending the financial provisions of the Agreement.

1.4.1 Events Center: a first-class, state-of-the-art sports and entertainment arena facility, located at 4000 Ontario Center, Ontario, California, which consists of: (a) approximately 10,500 seats, including luxury suite seats and club seats, (b) 32 suites, (c) approximately 750 club seats, (d) private membership bars and/or private membership restaurants, (e) at least 225,000 square feet of gross area and certain square feet of office space attached or integrated as part of the Arena building for administrative use by Owner and Operator, as shown in **Exhibit A**. In any provision of the Agreement where the capitalized term, "Arena" is referenced in this Agreement, it shall mean the Events Center.

1.4.2 Lot A: A certain portion of land located on the eastern border of the City Property, subject to Lot A Ground Lease and that certain Development Agreement entered substantially concurrently therewith between Owner and OTC Lot A, consisting of

approximately 210,250 square feet, as shown in **Exhibit A-1**, attached hereto and by this reference incorporated herein, whereby OTC Lot A intends to develop Lot A pursuant to the Lot A Ground Lease and it related Development Agreement.

1.4.3 Lot B: A certain portion of land located on the southeastern border of the City Property, subject to that certain Ground Lease dated July 19, 2022 between the Owner and OTC Lot B Owner, LLC ("OTC Lot B") and that certain Development Agreement entered substantially concurrently therewith between Owner and OTC Lot B, consisting of approximately 73,640 square feet, as shown in **Exhibit A-1**, whereby OTC Lot B intends to develop Lot B pursuant to the Lot B Ground Lease and its related Development Agreement.

1.4.4 Lot E: A certain portion of land located on and along the southern border of the City Property and west of Lot B, subject to an exclusive negotiating agreement between the City and Adept Development ("Adept"), in which the City and Adept have commenced negotiations and desire to enter into a ground lease and development agreement concerning Lot E, as shown in **Exhibit A-2**, attached hereto and by this reference incorporated herein.

1.4.5 Parking Lots: Any city owned property that has been designated for parking on or adjacent to the City Property, for use during any sports, entertainment, or reserved events scheduled at the Events Center.

1.4.5 Plaza Area: the area situated adjacent to and between the Events Center and Lot A, consisting of approximately 87,120 square feet (2+/- acres) , as depicted in **Exhibit A-3**, attached hereto and by this reference incorporated herein.

3. **Scope of Services**. Section 1.5 of the Agreement is hereby amended and restated in its entirety by the following:

1.5 Scope of Services. Subject to the terms of this Agreement, Operator shall manage, operate and maintain the Events Center and the Plaza Area (excepting therefrom the portion of the Kiosks Licensed Area) during the Term under the direction of the Owner. For purposes of this Agreement between Owner and Operator, the Kiosks Licensed Area described and depicted in the Kiosk License Agreement is not a part of the Plaza Area for purposes of management, operations and maintenances by Operator on behalf of the Owner under this Agreement. Lots A and B are not part of the Scope of Services under this Agreement. Until such time that Lot B will be developed by OTC Lot B, Lot B, or a portion thereof, may be made available for Parking for the Events Center or the Plaza Area provided Owner has provided written notice to Operator confirming that Lot B, or a portion thereof, is available for use as Parking under this Operating Agreement.

Any of the provisions in the Agreement pertaining to management, operation and maintenance of the Events Center by the Operator shall also apply to the Plaza Area upon such time the improvements to be made to the Plaza Area are completed. City will provide notice to Operator when such improvements have been completed.

4. **Definitions for Collections and Payments for Plaza Area**. Section 2.1.1 of this Agreement

is hereby amended with a new Subsection 2.1.1.5 by the following:

2.1.1.5 Definitions for Collections and Payments for Plaza Area. Set forth below are definitions for Gross Operating Revenue, Operating Expenses, Net Operating Income and Net Operating Loss as each apply and relate to the Plaza Area. Except to the extent contrary to the express terms of such definitions, Gross Operating Revenue, Operating Expense, Net Operating Profit and Net Operating Loss shall be determined in accordance with Generally Accepted Accounting Principles promulgated by the Financial Accounting Standards Board ("GAAP").

2.1.1.5.1 Gross Operating Revenue for Plaza Area. The term "Gross Operating Revenue" means the total revenue earned and received from the operation of the Plaza Area or any portion thereof including, but not limited to revenue received in connection with Plaza Area naming rights and official partnerships, event/program based or other sponsorships, advertising and media sales, sales of tickets/entry for any Events held at the Plaza Area, rental of the Plaza Area, and the sale of food, beverages, and merchandise operated by and under Operator's Alcoholic Beverage Control (ABC) License.

2.1.1.5.2 Operating Expenses for Plaza Area. The term "Operating Expense" means all expenses paid or incurred by Operator in connection with the operation and maintenance of the Plaza Area.

2.1.1.5.3 Net Operating Income for Plaza Area. Net Operating Income means, with respect to the applicable time period for the terms provided in Section 2.3.4 of the Agreement, the amount by which Gross Operating Revenue exceeds Operating Expenses for the Plaza Area. For purposes of determining the Net Operating Income, Operator shall keep the accounting for the Plaza Area separate from the Events Center in order to accommodate the distribution of the Net Operating Income described in Section 2.3.4 of the Agreement.

2.1.1.5.4 Net Operating Loss for Plaza Area. The term "Net Operating Loss" means, with respect to the applicable time period for the terms provided in Section 2.3.4 of the Agreement, the amount by which Operating Expenses exceed Gross Operating Revenue, and such amount shall be expressed mathematically as a negative number, for the Plaza Area.

5. **Payment of Operating Expenses; Operator's Rights Regarding Revenues**. The second sentence in Section 2.1.2 shall be amended and replaced by the following:

Except as provided in Section 2.3.2 and 2.3.4 hereof, Operator shall be entitled to keep and retain all revenues and profits from the operation of the Events Center and Plaza Area, should any amounts remain after all disbursements have been made under this Agreement.

6. **Fee; Distribution of Net Operating Income**. Section 2.3 of the Agreement is hereby amended to add a new Section 2.3.4 for the distribution of Net Operating Income for the Plaza Area.

2.3.4 Distribution of Net Operating Income – Plaza Area. Subject to the terms provided below in this Section 2.3.4, the audit terms described in Section 2.4 of the Agreement and on

the basis of a preliminary determination by Operator of Net Operating Income from the Plaza Area, not later than forty-five (45) days after the end of each Operating Year, the following shall occur in the described order and the sources of revenue:

2.3.4.1 Conditions Precedent. The terms in Section 2.3.4 will apply so long as all of the following conditions precedent ("Conditions") are true and exist:

2.3.4.1.1 The License and Sublicense as described above are entered into and remain in effect; and

2.3.4.1.2 Operator (or an Operator associated entity) is the contracted operator of the Events Center and the Plaza Area; and the same is the Sub-licensee and operator of the Kiosks licensed/sublicensed area and Naming Rights Licensee under the Sublicense; and

2.3.4.1.3 Operator shall have obtained City's prior advance written consent before exercising its right to extend the Sublicense beyond the initial term period.

2.3.4.2 Effective Date and Duration. The terms for distribution of Net Operating Income provided in Section 2.3.4 shall become effective commencing on the date that is the later of 1) three (3) years following the Effective Date of the Sublicense or 2) the date upon which OTC Lot A receives a temporary certificate of occupancy for the residential portion of the building to be constructed on Lot A (referenced as the "Lot A Building" in the Sublicense), and will continue until the end of the initial term of the Sublicense, unless amended by the parties, terminated sooner or expire by the terms stated in the Kiosk License Agreement or the Sublicense.

2.3.4.3 Priority and Use of Certain Revenue and Net Operating Income: Operator shall pay to the Owner, the OTC Lot A, or to itself, respectively, the amounts due to the aforementioned parties in the order of priority described below and shall draw from the sources as follows if applicable:

2.3.4.3.1 Payment to OTC Lot A. Operator shall pay the first One Million Six Hundred Twenty Thousand and No/100 Dollars ($1,620,000.00) annually drawn from the sources in the order described below to OTC Lot A to satisfy payment by Operator (as Sublicensee under the Sublicense) of the annual Naming Rights Fee and License Fee ("Fees") due under Sublicense.

2.3.4.3.1.1 First Priority of Source for Payment of Fees to OTC Lot A. The Operator, as the first priority of a source of funds to make the Fees payment in full to OTC Lot A, shall use the revenue derived from sponsorship and operations under the Sublicense (Sublicense Revenue). Sublicense Revenue shall be used towards satisfying and paying the Fees to OTC Lot A under the Sublicense. Fees due under Sublicense to be treated as if it was a Sublicense operating expense except to the extent that such Fees shall be paid first from Sublicense Revenue and before any other Sublicense Operating Expenses are paid. In the event that the Sublicense Revenue is documented as insufficient for Operator to pay the total amount of the Fees to OTC Lot A, then the Operator may utilize funds from the source described in Section 2.3.4.3.1.2 below.

2.3.4.3.1.2 Second Priority of Source for Payment to OTC Lot A. The Operator, as the second priority of a source of funds to make the Fees payment in full to OTC Lot A, may utilize funds from Net Operating Income from the Plaza Area operations ("Plaza NOI") to the extent such funds are available. In the event that Sublicense Revenue and the Plaza NOI sources of funds are documented as collectively insufficient to pay all the Fees due, Operator may utilize funds from the source described in Section 2.3.4.3.1.3 below.

2.3.4.3.1.3 Third Priority of Source for Payment to OTC Lot A. – The Operator, as the third priority of source of funds to make the Fees payment to OTC Lot A, may utilize funds from the remaining Net Operating Income from the Events Center operations ("Events Center Residual NOI") as further described in Section 2.3.2(4) of the Agreement for "Operating Year Commencing July 2018, and all Subsequent Operating Years", to the extent such funds are available. For clarification purposes, the Events Center Residual NOI means any remaining profit amount after payments have been made to satisfy the terms in Sections 2.3.2 and 2.7 of the Agreement. If and only if Sublicense Revenue and Plaza NOI sources of funds are documented as insufficient to satisfy all of the Fees due in the Initial Term under the Sublicense, Operator may utilize Events Center Residual NOI to pay towards the Fees up to the One Million Six Hundred Twenty Thousand and No/100 Dollars ($1,620,000.00) yearly, to the extent of such Events Center Residual NOI exists.

2.3.4.3.2 Payment to Owner. Operator shall pay the second One Million and No/100 Dollars ($1,000,000.00) to Owner annually drawn from the Sublicense Revenue and the Plaza NOI, to the extent there be any amounts remaining.

2.3.4.3.3 Payment to Operator. Operator shall pay to itself the third One Million and No/100 Dollars ($1,000,000.00) to cover its operating expenses annually drawn from the Sublicense Revenue.

2.3.4.3.4 Distribution of Remaining Amounts of Sublicense Revenue. After the above three payments described in Sections 2.3.4.3.1, 2.3.4.3.2 and 2.3.4.3.3 are made, any remaining amounts from Sublicense Revenue shall be split three ways between and paid to Owner, Operator and OTC Lot A.

2.3.4.4 If Net Operating Income in an Operating Year during the Term is insufficient to make the full amount of the Payments described above in Section 2.3.4, then such shortfall shall be carried forward and added to the following year's payments to be made to the respective parties.

2.3.4.5 At the end of the fourth year of the Initial Term of the Sublicense, City and SMG shall revisit the terms and structure for satisfying the Fees under the Sublicense for the purpose of determining feasibility and renegotiation for an extended term of the Sublicense if such extension is desired. City shall have the right to terminate the above financial terms for no cause at the end of the Initial Term of the Sublicense.

7. **Parking**. The first sentence in Section 3.4 of the Agreement shall be amended and replaced

by the following:

Owner shall include a sufficient number of parking spaces in Parking Lots identified and designated for the Events Center, but in no event less than 3,000 parking stalls (the "Parking").

8. **Live Performance.** The fifth sentence of Section 4.1.2 shall be amended and replaced by the following:

"Event" shall include performances or exhibitions which occur in the Parking, or otherwise outside of the main Arena floor, only if Operator obtains prior written approval from Owner, such approval not to be unreasonably withheld or delayed.

9. **Exhibits.** Exhibit A is deleted and hereby replaced by Exhibit A, Depiction of City Property, attached hereto and by this reference incorporated herein. Exhibits A-1, A-2, A-3 and A-4 are hereby added as new exhibits to this Agreement.

10. **Other Terms and Conditions Remain**. In the event of any inconsistencies between the Original Agreement and this First Amendment, the terms of this First Amendment shall control. Except as expressly set forth in this First Amendment, the Agreement is otherwise unmodified and remains in full force and effect.

11. **Capitalized Terms**. All capitalized terms used but not defined herein shall have the same meanings as defined in the Agreement.

12. **Construction; Interpretation**. The Agreement and any amendments are the result of negotiations between the Parties hereto, and with the advice and assistance of their respective counsel. The fact that this Agreement and amendments were prepared as a matter of convenience by a Party shall have no importance or significance. Any uncertainty or ambiguity in this Agreement and amendments shall not be construed against the Party that prepared it in its final form.

13. **Counterparts; Electronic Execution and Delivery**. This First Amendment to the Agreement may be executed in any number of counterparts, each of which shall be deemed an original, but all of which when taken together will constitute one and the same instrument. The signature page of any counterpart may be detached therefrom without impairing the legal effect of the signature(s) thereon provided such signature page is attached to any other counterpart identical thereto except having additional signature pages executed by other parties to this First Amendment attached thereto. This First Amendment may also be executed by DocuSign or other electronic transmission of signatures, including facsimile or email transmission of a counterpart hereof in portable document format (.pdf), and each copy hereof bearing the DocuSign, facsimile or electronic transmitted signature of any party's authorized representative shall be deemed to be an original. Upon request from either party, the parties hereto agree to exchange original signatures as soon as practical thereafter.

(Signature Provisions on the Following Pages)

IN WITNESS WHEREOF, the Parties have caused their duly authorized representatives to execute this First Amendment on the dates set forth below.

CITY OF ONTARIO *Agenda Report* **August 20, 2024**	**SECTION:** **CONSENT CALENDAR**
Department: Economic Development Prepared By: Jennifer Hiramoto Staff Member Presenting: Jennifer McLain Hiramoto, Economic Development Director Approved By:	Submitted To: Council/OHA Approved: _____ Continued To: _____ Denied: _____ Item No: 24

SUBJECT: **CONSIDER A RESOLUTION APPROVING A KIOSK LICENSE AGREEMENT BETWEEN THE CITY AND OTC LOT A OWNER GRANTING A LICENSE TO USE CERTAIN LOCATIONS WITHIN AN AREA IMMEDIATELY ADJACENT TO THE EVENTS CENTER TO, AMONG OTHER THINGS, CONSTRUCT AND OPERATE KIOSKS AND MAKING CERTAIN CEQA FINDINGS IN CONNECTION THEREWITH**

RECOMMENDATION: That the City Council takes the following actions:

A. Consider and Adopt a Resolution Approving A Kiosk License Agreement Between The City And OTC Lot A Owner Granting A License To Use Certain Locations Within An Area Immediately Adjacent To The Events Center To, Among Other Things, Construct And Operate Kiosks And Making Certain CEQA Findings In Connection Therewith; and
B. Authorize the City Manager, or his designee, to execute the Kiosk License Agreement between the City and OTC Lot A Owner, on behalf of the City.

THE FOLLOWING COUNCIL GOALS ARE BEING ACHIEVED:
Invest in the Growth and Evolution of the City's Economy
Operate in a Businesslike Manner
Focus Resources in Ontario's Commercial and Residential Neighborhoods

FISCAL IMPACT: Any costs associated with providing utilities to the Kiosks will be studied and presented at a future date as part of the Public Plaza Capital Improvement Project.

BACKGROUND & ANALYSIS: The City of Ontario is the owner of the 11,000 seat Ontario Events Center, known as the Toyota Arena ("Arena"), at 4000 Ontario Center Parkway. The City intends on capitalizing on its investment and the success of the Toyota Arena, which hosts over 125 events a year, by developing a robust entertainment, pedestrian and residential district that will include upscale retail and restaurants, vibrant entertainment venues and dense residential development.

To deliver on this vision, on July 19, 2022, the City entered into four separate Ground Leases with a master developer. In total, this development will include 700 new residential units and nearly 70,000 SF of new commercial. One of the four Ground Leases was with OTC Lot A Owner, LLC,

("OTC") for property adjacent to the east side of the Arena. In accordance with Section 4.2.2 of the Ground Lease, OTC was given the option to construct, operate, manage, maintain and license commercial kiosks ("Kiosks"), within a future location near the Arena.

Since the execution of the Ground Lease, the City has further developed its vision for an enhanced Public Plaza ("Plaza Area") to the east of the Toyota Arena and to the west of the "Lot A" development, as depicted in Exhibit 2 of the Kiosk License Agreement. This Public Plaza would be a comfortable outdoor space for patrons of the Arena, and would further support the future commercial activity proposed at OTC's development. This approximately 2-acre Plaza will create a public space that will contain opportunities for retail and concession Kiosks, outside furniture, and outdoor entertainment space, which is why OTC is electing to exercise its rights to have Kiosks in the Plaza Area.

The purpose of the Kiosk License Agreement is to provide OTC a license to establish Kiosks in certain locations within the now defined Plaza Area. The term of the Agreement is 55 years. Other terms in the Kiosk License Agreement includes the following:

- This Agreement provides an exclusive license to the Operator to construct, operate, manage and maintain the Kiosks.
- It defines the four types of kiosks, details utilities required for each.
- It defines prohibited uses within the Kiosks.
- It defines terms related to utilities and services, including that the City shall furnish utilities to the Kiosks, and that OTC shall pay for all water, gas, heat, light, power, telephone and other utilities supplied to the Kiosks.
- It gives OTC the right assign or sub-license this Agreement.

CEQA

Pursuant to the California Environmental Quality Act (Public Resource Code §§ 21000 *et seq.*) (“CEQA”), and the State CEQA Guidelines (14 Cal. Code Regs. §§ 15000 *et seq.*), the Kiosk License Agreement is exempt from CEQA pursuant to CEQA Guidelines Section 15311 (Class 11) Accessory Structures as construction and operation of the Kiosks pursuant to the Kiosk License Agreement consists of the construction, or replacement of minor structures accessory to (appurtenant to) existing commercial, industrial, or institutional facilities. None of the following exceptions to categorical exemption set forth in CEQA Guidelines Section 15300.2 apply:

“(a) Location. Classes 3, 4, 5, 6, and 11 are qualified by consideration of where the project is to be located--a project that is ordinarily insignificant in its impact on the environment may in a particularly sensitive environment be significant. Therefore, these classes are considered to apply in all instances, except where the project may impact on an environmental resource of hazardous or critical concern where designated, precisely mapped, and officially adopted pursuant to law by federal, state, or local agencies.

(b) Cumulative Impact. All exemptions for these classes are inapplicable when the cumulative impact of successive projects of the same type in the same place, over time is significant.

(c) Significant Effect. A categorical exemption shall not be used for an activity where there is a

reasonable possibility that the activity will have a significant effect on the environment due to unusual circumstances.

(d) Scenic Highways. A categorical exemption shall not be used for a project which may result in damage to scenic resources, including but not limited to, trees, historic buildings, rock outcroppings, or similar resources, within a highway officially designated as a state scenic highway. This does not apply to improvements which are required as mitigation by an adopted negative declaration or certified EIR.

(e) Hazardous Waste Sites. A categorical exemption shall not be used for a project located on a site which is included on any list compiled pursuant to Section 65962.5 of the Government Code.

(f) Historical Resources. A categorical exemption shall not be used for a project which may cause a substantial adverse change in the significance of a historical resource."

KIOSK LICENSE AGREEMENT

THIS KIOSK LICENSE AGREEMENT (this "Agreement") is entered into as of August [__], 2024 (the "Effective Date"), by and between the CITY OF ONTARIO, a California municipal corporation ("Licensor"), and OTC LOT A OWNER, LLC, a Delaware limited liability company ("Licensee").

RECITALS

WHEREAS, pursuant to that certain Ground Lease dated as of July 19, 2022, between Licensee, as tenant, and Licensor, as landlord, as amended by that certain First Amendment to Ground Lease dated as of August [__], 2024 and as supplemented by that certain Letter Agreement re Pre-Stabilized Rent dated November 23, 2022 and that certain Letter Agreement re Pre-Stabilization Date & Assessments dated September 8, 2023 (as amended and supplemented and as the same may be further amended, modified or supplemented from time to time, the "Ground Lease"), Licensee is the tenant of that certain real property described on Exhibit A attached hereto ("Lot A");

WHEREAS, Licensor is the owner of the Ontario Events Center, an approximately 225,000 square foot venue located to the west of Lot A, which hosts over 125 events annually including concerts, family shows, and sporting competitions, as the same may exist now or as it may exist in the future ("Ontario Events Center");

WHEREAS, Licensor intends to construct or cause the construction of a public plaza on land owned by Licensor immediately adjacent to the Ontario Events Center and located to the west of Lot A (the "Public Plaza"). The proposed Public Plaza is anticipated to be located in the area depicted on Exhibit B attached hereto;

WHEREAS, in accordance with Section 4.2.2 of the Ground Lease, Licensee exercised its option to construct, operate, manage, maintain, and license commercial kiosks including the placement of outdoor furniture surrounding such kiosks (collectively, the "Kiosks" and individually a "Kiosk") within the proposed Public Plaza; and

WHEREAS, Licensee desires to enter into this Agreement with Licensor to provide Licensee an exclusive license to use certain locations within the Public Plaza to construct, operate, manage, and maintain the Kiosks, subject to and in accordance with all of the terms and conditions set forth in this Agreement.

NOW, THEREFORE, in consideration of the foregoing, Ten Dollars ($10.00), and other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, Licensor and Licensee, intending to be legally bound, hereby agree as follows:

1. License.

(a) Subject to the terms and conditions set forth in this Agreement, including without limitation Section 1(b), Licensor grants to Licensee, and Licensee accepts from Licensor, an exclusive license to use certain locations within the Public Plaza collectively referred to herein as the "License Area" (which area is defined and described in more detail in subsection (d), below) for the sole purpose of constructing, operating, managing, and maintaining the Kiosks in accordance with all of the terms and conditions set forth in this Agreement (the "License"). Licensor retains all rights to the Public Plaza (subject to the License) and any income and revenue

derived from the Public Plaza, including, without limitation, any sponsorship and naming rights revenues but excluding income and revenue derived solely from the Kiosks during the Term of this Agreement.

(b) Licensee acknowledges and agrees that the License constitutes a limited privilege to use the License Area solely for those permitted uses and activities expressly permitted under this Agreement and subject to all of the terms and conditions set forth in this Agreement, including, without limitation, limitations on assignment and termination provisions expressly set forth in this Agreement. Licensee further acknowledges and agrees that: (1) Licensee is not a tenant or lessee of Licensor and holds no rights of tenancy or leasehold in relation to the License Area or the Public Plaza; (2) this Agreement does not create (nor shall be construed as creating) a leasehold, tenancy or any other interest in the License Area or the Public Plaza; and (3) the License shall end upon the expiration of the Term or earlier termination of this Agreement as expressly provided herein. In consideration of Licensor's entering into this Agreement and the grant of the License, Licensee specifically and expressly waives, releases and relinquishes any and all right(s) to assert any claim of right, privilege or interest in the License Area or the Public Plaza other than the License. Licensee further acknowledges and agrees that without the representations and agreements set forth herein, Licensor would not enter into the Agreement. This Agreement and the License granted herein are subject to all outstanding easements, covenants, conditions, and rights of way over, across and upon the License Area. Licensor may grant additional easements or rights of way over, across, in and upon the License Area as necessitated to be in the public interest so long as any such easements or rights of way do not materially adversely impact or materially adversely interfere with the use of or access to the License Area and the Kiosks.

(c) Intentionally Deleted.

(d) The location and placement of the Kiosks shall initially be in the locations within the Public Plaza which are mutually agreed upon by Licensor and Licensee, each in its reasonable discretion (collectively, the "License Area"). The aggregate indoor square footage of all Kiosks shall not exceed an aggregate total of 20,000 square feet of space. Following the initial Kiosk placement, the Kiosks shall not protrude or extend beyond the License Area, and the location of the Kiosks shall not be modified, changed, or altered without prior written approval of Licensor which such approval shall not be unreasonably withheld, conditioned or delayed.

(e) Licensor shall have the right from time to time to adjust the License Area and/or relocate the Kiosks (in whole or in part) provided that the following conditions are satisfied: (1) Licensor shall provide not less than one hundred twenty (120) days prior written notice to Licensee of such adjustment/relocation; (2) the new location/placement area shall be comprised of at least the same aggregate amount of square footage of the License Area prior to the adjustment/relocation unless otherwise agreed to by Licensee; (3) the new location/placement area shall not materially adversely affect the use, operation and/or revenue of the Kiosk(s) to be relocated unless such new location/placement area shall be approved by Licensee, which approval shall not be unreasonably withheld, conditioned, or delayed; (4) Licensor shall provide (or cause to be provided), at Licensor's sole cost and expense, the same utility connections to the new location/placement as previously provided to the License Area and Kiosk(s) to be relocated; and (5) Licensor shall pay, or cause to be paid, all reasonable out-of-pocket costs and expenses reasonably incurred by Licensee and any of its permitted sub-licensees in connection with the adjustment/relocation. In addition, upon not less than sixty (60) days prior written notice from

Licensor, as may be necessary for programming or other events at the Ontario Events Center and/or the Public Plaza, Licensor shall have the right to require that the moveable Kiosks not affixed to the License Area be relocated on a temporary basis to allow for such programming or other events at the Ontario Events Center and/or the Public Plaza so long as Licensor pays, or causes to be paid, all reasonable out-of-pocket costs and expenses incurred by Licensee and any of its permitted sub-licensees in connection with the temporary relocation and the duration and location of such temporary relocation do not materially adversely affect the use, operation and/or revenue of the applicable Kiosks unless such temporary relocation shall be approved by Licensee, which approval shall not be unreasonably withheld, conditioned, or delayed. The duration and location of such relocation shall be as set forth in the written notice from Licensor.

(f) As described in Section 4.2.2 of the Ground Lease, Licensee has exercised the option for all Kiosks contemplated by the Ground Lease in the Public Plaza on a "first come first served" basis, and no other ground tenant or owner of the other Lots (as defined in the Ground Lease) shall have the right or ability to exercise the option for kiosks in the Public Plaza.

(g) Licensee accepts the License Area in its "as is" condition as of the Operating Expense Commencement Date (as defined below) and without any warranties of whatsoever nature, express or implied. Licensor makes no representation, covenant, warranty or promise that the License Area or the Public Plaza, and any fixtures thereon, are fit or suitable for any particular use, including the use for which this Agreement is made and Licensee is not relying on any such representation, covenant, warranty, or promise.

(h) Licensee shall, at its sole cost and expense, only use the License Area for constructing, operating, managing, and maintaining the Kiosks in accordance with all of the terms and conditions set forth in this Agreement, and the use of the Licensed Area or Kiosks for any other purpose shall be deemed a material default and grounds for termination of this Agreement subject to and in accordance with Section 13 (Default; Remedies) of this Agreement. Licensee shall, at its sole cost and expense, (or shall cause any permitted sub-licensee, at the sub-licensee's sole cost and expense, to) construct, operate, manage, and maintain the License Area and Kiosks in compliance with all applicable laws, all City of Ontario municipal requirements and regulations related to the Kiosks, and all of the terms and conditions set forth in this Agreement, and for no other use or purpose. Licensee shall, at its sole cost and expense, (or shall cause any permitted sub-licensee, at the sub-licensee's sole cost and expense, to) engage a reputable, licensed and qualified architect and contractor in connection with the construction of the Kiosks. Licensee shall (or shall cause any permitted sub-licensee to) obtain, and thereafter comply with and keep in effect, all consents, permits and approvals required by governmental bodies that are necessary for the installation, construction, operation, management, and maintenance of the Kiosks. All installation and construction work shall be performed in a good and workmanlike manner and Licensee shall (or shall cause any permitted sub-licensee to) diligently prosecute such installation and construction to completion. Licensor shall not require bathrooms to be included within the Kiosks. Licensee shall (or shall cause any permitted sub-licensee to) comply with all City of Ontario municipal requirements and regulations related to the construction/installation of the Kiosks which may require a building plan check process/permit for the permanent Kiosk structures with utility connections and a planning review/approval for the mobile/non-permanent Kiosks which may not require a permit.

(i) Licensee shall not use (or permit the use of) the License Area or Kiosks for

any of the following prohibited uses:

(1) Selling, exhibiting or delivering pornographic or obscene materials;

(2) Any fire, auction, lost lease, quitting business or bankruptcy sale, and any signage or advertisement for such, to the extent that this prohibition is permitted by applicable law;

(3) A massage parlor, a so-called "gentlemen's club", or other establishment offering nude or other adult entertainment which prohibits the admission of minors or a gaming parlor (except for bingo gaming). This shall not prohibit the operation of a national branded, high-end day spa and salon such as Burke Williams, Massage Envy, or Glen Ivy;

(4) The sale of fireworks;

(5) Any noxious activity or anything which may be or becomes a nuisance, or which interferes, or which will interfere in any way, with the use of the Ontario Events Center or the Public Plaza;

(6) No window shall be covered in whole or in part, inside or outside, with aluminum foil, newspaper, paint, tint or any other material reasonably deemed inappropriate for such use by Licensor. Windows, however, may be tinted or treated provided that the color and method of tinting or treatment is approved by the City of Ontario;

(7) Any activities that are or might be unsafe or hazardous to any person or property. Under no circumstances may explosives, fireworks, or highly flammable materials such as gasoline, kerosene, oil, oil-based paints, solvents or other similar materials be stored in any Kiosks, except for customary amounts of paints, solvents or other similar materials typically found in commercial businesses for use by that business in the normal course of business and in compliance with all applicable local, state, and federal laws, rules and regulations;

(8) Any activity involving the use, transportation, handling, manufacture, emission or disposal of any Hazardous Materials, other than in accordance with all applicable local, state, and federal laws, rules and regulations. "Hazardous Materials" means any biologically or chemically active, or toxic or hazardous waste or materials as defined or regulated by as defined by the laws of any local government, the State of California and the United States;

(9) The manufacture, refining, processing or bulk storage of Hazardous Materials;

(10) An adult business ("Adult Business"), which shall mean any business establishment or concern which operates as an "Adult Arcade", "Adult Bookstore", "Adult Motion Picture Theater", "Adult Mini-Motion Picture Theater", "Adult Theater", "Adult Video Store", "Class "D" Cabaret", "Escort Agency", "Massage Establishment" (provided that therapeutic massages or massage therapy shall be permitted as an incidental part of a medical office, health spa or salon permitted by the then applicable City of Ontario Municipal Code),

"Nude Model/Figure Studio", "Sexual Encounter/Rap Studio", and "Sexual Novelty Store", as said terms are currently defined in the Ontario Municipal Code;

(11) A "Head Shop", which shall mean a store that sells goods related to marijuana and/or related to any illegal drugs and their consumption, such as, without limitation, bongs, roach clips, pipes, rolling papers and rolling machines, blacklight-responsive posters, incense, cigarette lighters, products claimed to give false negative results for drugs on urine analysis tests, and whipped-cream chargers (which contain nitrous oxide); and/or

(12) Any use prohibited by applicable local, state, or federal law, rule or regulation.

(j) The Kiosks may be used for any and all uses permitted by applicable law provided such uses are compatible and not in conflict with the operation and business of the Ontario Events Center and the Public Plaza, and subject to all other terms and conditions of this Agreement.

(k) Licensor acknowledges and agrees that Licensor shall reasonably cooperate with Licensee's or any of its permitted sub-licensee's entitlement, development, construction, installation, maintenance, operation and/or repair of the Kiosks. Without limiting the foregoing, to the extent reasonably required in connection with the entitlement, development, construction, installation, maintenance, operation and/or repair of the Kiosks as permitted by this Agreement, Licensor, as the owner of the fee title of the License Area, shall execute such documentation as is required to evidence its consent to (as licensor and not as a municipal regulatory body) (or, if required, join as a party to but only as licensor and not as a municipal regulatory body) any such permit, application, filing or other document of Licensee or a permitted sub-licensee's so long as such consent does not impose any obligation or liability on Licensor.

(l) The License includes an exclusive right to all of the Kiosks in the Public Plaza during the Term of this Agreement, subject to the terms and conditions of this Agreement, and Licensor shall not license, lease, sell, or otherwise transfer the right to construct, operate, manage, maintain, and license any of the Kiosks within the Public Plaza to any party other than Licensee during the Term of this Agreement.

2. License Fee and Expenses.

(a) Licensor and Licensee acknowledge and agree that, pursuant to Section 4.2.2 of the Ground Lease, the License granted hereunder shall be without any additional consideration from Licensee, and other than the fees set forth in Section 2(b), Licensee shall not be obligated to pay a fee for such License.

(b) Commencing on the Operating Expense Commencement Date (as defined below), Licensee shall pay (or reimburse Licensor within twenty (20) days following written notice for) all costs, fees, taxes, charges, and expenses in connection with or otherwise related to Licensee's development, installation, construction, operation, management, maintenance, and/or repair of the Kiosks and Licensee's use of the License Area. Licensor shall deliver written notice for such reimbursement within one hundred eighty (180) days following receipt by Licensor of any final billing or invoice for any such costs, fees, taxes, charges, and expenses and if Licensor

fails to timely deliver such written notice, then Licensee shall not be obligated to reimburse Licensor for such costs, fees, taxes, charges, and expenses.

(c) As used herein, the term "Operating Expense Commencement Date" means the date that is the earliest of (i) three (3) years following the Effective Date, (ii) the date on which Licensee (or its permitted sub-licensee) or any one of their agents or contractors or subcontractors enters the License Area and commences to install, develop, and/or construct any one of the Kiosks, or (iii) the date on which Licensor commences to install water, electrical and/or sewer conduit, lines, connections, or the like for any of the Kiosks.

3. Term. The term of this Agreement shall commence on the Effective Date and expire at 12:00 midnight Pacific Time on July 19, 2077 unless earlier terminated pursuant to the express terms of this Agreement or upon termination of the Ground Lease (the "Term"). Upon such expiration or termination of this Agreement, this Agreement and the License granted hereunder shall automatically terminate without need for any further act by any party.

4. Acknowledgement of Requirement as to Lot A. Licensee hereby acknowledges and agrees that at all times during the Term of this Agreement, Licensee shall be the ground lease tenant of Lot A under the Ground Lease or shall be the fee owner of Lot A if Licensee shall have purchased Lot A under and pursuant to the terms of the Ground Lease. Failure to adhere to the requirements of this requirement shall result in default under this Agreement subject to and in accordance with Section 13 (Default; Remedies) below. For the avoidance of doubt, Licensee shall have the right to assign this Agreement in strict accordance with Section 10(a) (Assignment and Sub-licensing) below.

5. Surrender. Licensee shall, upon the expiration or sooner termination of this Agreement, remove from the License Area, at Licensee's sole cost and expense, all personal property, trade fixtures, and equipment of Licensee or its sub-licensees and occupants, and surrender the Kiosks vacant, broom clean and in good order, condition and repair, ordinary wear and tear excepted. Licensee shall repair any and all damage to the License Area and/or the Kiosks resulting from the installation, presence and removal of such personal property, trade fixtures, and equipment of Licensee or its sub-licensees and occupants. Licensee agrees that Licensor shall have all remedies available at law or in equity for Licensee's failure to comply with this Section. In addition to such remedies, Licensee shall be responsible for all costs expended by Licensor in performing Licensee's obligations under this Section in the event Licensee fails to perform the same and any such reimbursement shall be paid within twenty (20) days after receipt of written demand therefor.

6. Alterations. Licensee shall have the right to make or cause to be made any structural or other alterations, additions, installations, demolitions, improvements, and/or changes (collectively, "Alterations") in the License Area and/or the Kiosks with the prior written approval of Licensor which such approval shall not be unreasonably withheld, conditioned or delayed. Licensee shall fully pay for all materials brought upon the License Area by or for Licensee and shall fully pay all persons who perform labor upon and/or supply materials to the License Area and shall not suffer any mechanic's or other lien of any kind or nature to be filed against the License Area for any work done (or claimed to have been done) or materials furnished (or claimed to have been furnished) to Licensee or anyone claiming through or under it. If any such lien shall be filed, Licensee shall discharge the same of record within thirty (30) days after Licensee is

notified thereof at Licensee's expense by filing the bond required by law. Licensor is and shall be under no obligation to make any Alterations to any part of the License Area on account of this Agreement.

7. Utilities and Services.

(a) Licensor shall furnish (or cause to be furnished) to the Kiosks such utilities (which may include, without limitation, water, gas, heat, light, power, sewer and telephone) which are mutually agreed upon by Licensor and Licensee, each in its reasonable discretion.

(b) Licensee shall pay for all water, gas, heat, light, power, telephone, and other utilities and services supplied to the Kiosks, together with any taxes thereon. If any such services are not separately metered to Licensee, Licensee shall pay a reasonable proportion to be reasonably determined by Licensor of all utilities or services jointly metered with other premises. Notwithstanding the foregoing, during any period the operator of the Ontario Events Center is (and remains) the permitted sub-licensee of the License as to all of the Kiosks covered by this Agreement pursuant to that certain Naming Rights and Kiosk Sub-License Agreement entered into as of even date herewith by and between Licensee and Toyota Arena LLC, a California limited liability company ("Naming Rights Agreement"), Licensor shall pay for (or cause the payment of) all water, gas, heat, light, power, telephone, and other utilities and services supplied to the Kiosks, together with any taxes thereon.

(c) Notwithstanding anything to the contrary set forth in this Agreement, Licensor shall not be liable for any damages directly or indirectly resulting from cessation or interruption of use of water, gas, heat, light, power, telephone, and other utilities and services supplied to the Kiosks. In the event of any such cessation or interruption, Licensor shall use reasonable diligence to have the same restored and shall use commercially reasonable efforts to minimize interference with Licensee's use of the Kiosks and License Area; provided, however, unless the operator of the Ontario Events Center is (and remains) the sub-licensee of the License as to all of the Kiosks covered by this Agreement pursuant to that certain Naming Rights Agreement, Licensee shall pay (or reimburse Licensor within twenty (20) days following written notice for) the reasonable out-of-pocket costs and expenses in connection with such restoration by Licensor.

(d) Except to the extent provided in Section 7(a) (Utilities and Services), Section 7(b) (Utilities and Services), and Section 8(b) (Repairs and Maintenance), Licensor is and shall be under no obligation to provide any services to any part of the License Area on account of this Agreement.

8. Repair and Maintenance.

(a) Licensee shall, at Licensee's sole cost and expense, maintain the License Area and Kiosks, and every part thereof, in a clean, safe, lawful and proper manner, and in good order, condition and repair at all times during the Term of this Agreement, including trash collection. If Licensee fails to maintain and/or repair the License Area and Kiosks, and every part thereof, promptly following written notice from Licensor, Licensor shall have the right (but not the obligation) to do so at Licensee's sole cost and expense. Licensee shall reimburse Licensor for such costs within twenty (20) days after receipt of written request from Licensor.

(b) In order to provide uniformity with regard to maintenance, if the operator

of the Ontario Events Center is not the permitted sub-licensee of the License as to all of the Kiosks covered by this Agreement pursuant to the Naming Rights Agreement, then Licensee shall, at Licensee's sole cost and expense, either, at Licensee's option: (i) maintain the License Area to the same maintenance standard and using the same maintenance schedule that the then operator of the Ontario Events Center is using to maintain the Public Plaza, or (ii) engage the then operator of the Ontario Events Center to perform maintenance services with respect to the License Area, and Licensee shall pay a reasonable pro rata share of the maintenance services as reasonably determined by Licensor.

(c) Notwithstanding anything to the contrary set forth in this Agreement, during the period the operator of the Ontario Events Center is (and remains) the permitted sub-licensee of the License as to all of the Kiosks covered by this Agreement pursuant to that certain Naming Rights Agreement, Licensor shall, at Licensor's sole cost and expense, maintain (or cause the maintenance of) the Kiosks and the License Area, and every part thereof, in a clean, safe, lawful and proper manner, and in good order, condition and repair at all times during the Term of this Agreement, including trash collection and security.

9. Disability Laws and Regulations. Licensee shall ensure that the License Area and Kiosks all activities, seating, signs, banners, and structures and installations within the License Area and Kiosks are accessible to qualified individuals with a disability. Licensee shall comply with all Disability Laws and Regulations applicable to the License Area and Kiosks including without limitation, the Americans with Disabilities Act (ADA) (42 U.S.C. section 12101 *et seq*.,), the California Unruh Civil Rights Act (California Civil Code section 51), California Civil Codes sections 54 through 55.2, Title 24 of the California Code of Regulations (California Physical Access Laws), California Government Code sections 11135-11139.8, (Accessibility to Government Programs) The Fair Employment and Housing Act (California Government Code Section 12900-12951 & 12927-12928 & 12955 - 12956.1 & 12960-12976). Compliance shall include, but is not limited to, the removal of all structural barriers, maintaining the accessibility of services and goods, and the modification of policies, practices and procedures and its auxiliary aids and services. Licensor will not be responsible for any costs or expenses related to Licensee's compliance with the Disability Laws or Regulations. Licensee will defend, indemnify, and hold Licensor harmless from and against all claims, suits or causes of action and expenses (including attorneys' fees) which arise out of any act or omission by Licensee, its agents, employees, guests, clients, customers, patrons, or invitees that violates or is alleged to violate any or all the Disability Laws and Regulations.

10. Assignment and Sub-licensing.

(a) Except as expressly permitted herein, Licensee shall not have the right to assign, sub-license, encumber and/or otherwise transfer this Agreement without Licensor's prior written consent (which such consent shall not be unreasonably withheld, conditioned or delayed). Licensor hereby consents to (i) a sub-license of the License as to all of the Kiosks to the operator of the Ontario Events Center pursuant to the Naming Rights Agreement, (ii) sub-sublicense(s) of the License as to any of the Kiosks by the operator of the Ontario Events Center under the Naming Rights Agreement to any third party, (iii) an assignment of this Agreement to a Leasehold Mortgagee (as defined in the Ground Lease) to secure a Leasehold Mortgage (as defined in the Ground Lease), including an assignment of this Agreement to any holder of a mezzanine loan or preferred equity provider; and (iv) an assignment to (A) a new ground lease tenant of Lot A under

the Ground Lease provided such Assignment or Transfer (as defined in the Ground Lease) to the new ground lease tenant is expressly permitted or has been approved by the City of Ontario under the Ground Lease as and to the extent required by the Ground Lease, or (B) the fee owner of Lot A if Licensee purchases the fee interest in Lot A as provided in the Ground Lease; provided that any such new ground lease tenant or fee owner assignee executes the Assignment and Assumption Agreement (as defined in the Ground Lease) (or a substantially similar agreement if Licensee purchases the fee interest in Lot A as provided in the Ground Lease) and such Assignment and Assumption Agreement includes the assignment and assumption of this Agreement and a duly fully executed copy of such Assignment and Assumption Agreement has been delivered to City.

Within thirty (30) days after the receipt of written notice (the "Initial Notice") from Licensee requesting Licensor approval pursuant to this Section 10(a), Licensor shall approve or disapprove any such request. Any disapproval shall be in writing and shall specify the reasons for the disapproval and, if applicable, the conditions required to be satisfied by Licensee in order to obtain approval. If Licensor fails to deliver to Licensee a written approval or disapproval within such thirty (30) day period, Licensee shall provide Licensor a second written notice (the "Second Notice") stating on the front page in bold, uppercase, 14 point font as follows: "**THIS NOTICE IS A FINAL NOTICE OF A PROPOSED ASSIGNMENT OR TRANSFER UNDER SECTION 10(A) OF THE KIOSK LICENSE AGREEMENT BETWEEN THE CITY OF ONTARIO AND [INSERT NAME OF LICENSEE] ASSIGNING OR TRANSFERRING [INSERT NAME OF LICENSEE]'S RIGHTS UNDER THE KIOSK LICENSE AGREEMENT AS DESCRIBED BELOW. IF THE CITY OF ONTARIO FAILS TO APPROVE OR DISAPPROVE THE PROPOSED ASSIGNMENT OR TRANSFER DESCRIBED BELOW WITHIN FIVE (5) DAYS FOLLOWING RECEIPT OF THIS NOTICE, THE CITY OF ONTARIO SHALL BE DEEMED TO HAVE APPROVED THE ASSIGNMENT OR TRANSFER**". If Licensor fails to deliver to Licensee a written approval or disapproval within such five (5) day period following Licensor's receipt of such Second Notice, Licensor's consent shall be deemed granted so long as the Initial Notice and the Second Notice was sent by (i) electronic mail to all of the individual Licensor addressees listed in Section 17 (Notices) and (ii) simultaneously delivered by (A) recognized overnight delivery service or (B) personal delivery to Scott Ochoa and Ruben Duran at the addresses set forth in Section 17 (Notices).

(b) Licensor may sell, assign or transfer its rights or interest in this Agreement without the prior written consent of Licensee. Upon any such sale, assignment or transfer, other than merely as security, Licensee agrees to look solely to the assignee or transferee for the performance of all Licensor's obligations under this Agreement and Licensor shall be released from any further obligations hereunder.

11. Insurance.

11.1. Licensee agrees to purchase (or cause the purchase of) all required insurance at Licensee's expense and to deposit with the Licensor certificates of insurance, including all endorsements required herein, necessary to satisfy the Licensor that the insurance provisions of this Agreement have been complied with and to keep such insurance coverage and the certificates therefore on deposit with the Licensor during the entire Term of this Agreement. The Licensor reserves the right to request the declarations pages showing all endorsements and a complete certified copy of the policy.

11.2. Licensee shall use commercially reasonable efforts to ensure that any Contractor (as defined below), architects, engineers, and other licensed professionals (collectively, hereinafter referred to as "Insured Parties") performing work on behalf of Licensee pursuant to this Agreement shall maintain insurance subject to the terms and conditions as set forth herein unless such Insured Parties are covered under Licensee's insurance. Licensee shall not allow any Insured Parties to commence work until the insurance requirements have been satisfied. It is the obligation of the Licensee to provide notice of the insurance requirements to all Insured Parties and to obtain evidence of insurance prior to allowing any Insured Parties to commence work. Evidence of insurance must be maintained by Licensee through the entirety of this Agreement for inspection by Licensor at any reasonable time upon advance written notice.

11.3. Licensee will require Builders Risk insurance for new construction. The Builders Risk policy shall be written on a Special Causes of Loss Form with the exclusion of earthquake and flood. The limit of insurance shall be 100% of the completed project value with no coinsurance and replacement cost valuation.

11.4. All self-insured retentions ("SIR(s)") or deductibles shall be clearly stated on the certificate of insurance. If no deductibles or SIRs apply, indicate this on the certificate of insurance with a zero (0) by the appropriate line of coverage. Any deductible or self-insured retention (SIR) in an amount in excess of $25,000 ($5,000 for automobile liability) carried by Licensee, shall specifically be approved by the City Risk Manager. Licensee shall be responsible for reimbursement of any deductible to the insurer. Upon notice of any actual or alleged claim or loss arising out of Insured Parties work hereunder, such Insured Party shall immediately satisfy in full the SIR provisions of the policy in order to trigger coverage for the Licensee and additional insureds.

11.5. Terms & Conditions Applicable to Licensee and All Insured Parties.

(a) Qualified Insurer.

(1) Each such policy shall be from a company or companies with a current A.M. Best's rating of no less than A:VII and authorized to transact business in the State of California, or otherwise allowed to place insurance through a surplus line brokers under applicable provisions of the California Insurance Code or any federal law.

(2) If the Licensee's insurance carrier is not an admitted carrier in the State of California and does not have an A.M. Best rating of A:VII, the City Risk Manager retains the right to approve or reject a carrier after a review of the company's performance and financial

ratings. Licensee is responsible to enforce this requirement with the Insured Parties.

(3) The policy or policies of insurance maintained by the Licensee shall provide the minimum limits and coverage that are the greater of the limits and coverage as set forth below:

Coverages	Minimum Limits
Commercial General Liability	$1,000,000 per occurrence $2,000,000 aggregate
Automobile Liability including coverage for owned, non-owned and hired vehicles (if applicable)	$1,000,000 limit per occurrence
Workers' Compensation (if applicable)	Statutory Minimum
Employers' Liability Insurance (if applicable)	$1,000,000 per occurrence

(4) The policy or policies of insurance maintained by the general contractor ("Contractor") (to the extent not covered by the policy or policies of insurance maintained by Licensee) shall provide the minimum limits and coverage as set forth below:

Coverages	Minimum Limits
Commercial General Liability	$1,000,000 per occurrence $2,000,000 aggregate
Automobile Liability including coverage for owned, non-owned and hired vehicles	$1,000,000 limit per occurrence
Workers' Compensation	Statutory Minimum
Employers' Liability Insurance	$1,000,000 per occurrence
Builders Risk for New Construction	Completed Improvements value

(5) The policy or policies of insurance maintained by architects, engineers, and other licensed professionals (to the extent not covered by the policy or policies of insurance maintained by Licensee) shall provide the minimum limits and coverage as set forth below for a period of 3 years following completion of the contact

Coverages	Minimum Limits
Professional Liability For Architects	$2,000,000 per claim or occurrence $3,000,000 aggregate
Professional Liability for Structural Engineer and Others	$1,000,000 per claim or occurrence $2,000,000 aggregate
Workers' Compensation	Statutory Minimum
Employers' Liability Insurance	$1,000,000 per occurrence

(b) Commercial General Liability.

(1) Licensee and Contractor (to the extent not covered by Licensee's insurance policy) shall take out and maintain, during this Agreement, in amounts not less than specified herein, Commercial General Liability Insurance, in a form and with insurance companies acceptable to the Licensor.

(2) Coverage for Commercial General Liability insurance shall be at least as broad as the following: Insurance Services Office Commercial General Liability coverage (Occurrence Form CG 00 01) or exact equivalent. Commercial General Liability Insurance must include coverage for the following:

(i) Bodily Injury and Property Damage

(ii) Personal Injury/Advertising Injury

(iii) Premises/Operations Liability

(iv) Products/Completed Operations Liability

(v) Aggregate Limits that Apply per Project

(vi) Explosion, Collapse and Underground (UCX) exclusion deleted

(vii) Contractual Liability with respect to this Contract

(viii) Broad Form Property Damage

(ix) Independent Consultants Coverage

(3) The policy shall contain no endorsements or provisions limiting coverage for (i) contractual liability; (ii) cross liability exclusion for claims or suits by one insured against another; (iii) products/completed operations liability; or (iv) contain any other exclusion contrary to this Agreement.

(4) The policy shall give Licensor, the City Council and each member of the City Council, its officers, employees, agents and City of Ontario designated volunteers additional insured status using ISO endorsement forms CG 20 10 10 01 and 20 37 10 01, or endorsements providing the exact same coverage. The general liability program may utilize either deductibles or provide coverage excess of a self-insured retention, subject to written approval by the City Risk Manager, and provided that such deductibles shall not apply to the City of Ontario as an additional insured.

(5) The Business Auto Liability coverage shall be written on ISO form CA 00 01, or a substitute form providing equivalent liability coverage.

(c) Required Endorsements. The Commercial General Liability policy shall contain the following endorsements, which shall accompany the certificate of insurance:

(1) The additional insured endorsement(s) listed in subsection (b)(4), above.

(2) The limits set forth herein shall apply separately to each insured against whom claims are made or suits are brought, except with respect to the limits of liability. Further the limits set forth herein shall not be construed to relieve the Licensee or any of the Insured Parties from liability in excess of such coverage, nor shall it limit any indemnification obligations to the Licensor and shall not preclude the Licensor from taking such other actions available to the Licensor under other provisions of this Agreement or applicable laws.

(3) The Workers' Compensation policy shall contain a waiver of subrogation endorsement waiving all rights of subrogation against the City of Ontario and members of the City Council, its elected and appointed officials, officers, employees and agents.

(4) All insurance policies required by this Agreement shall waive all rights of subrogation against the City of Ontario and members of the City Council, its elected and appointed officials, officers, agents and employees when acting within the scope of their appointment or employment.

(5) The Commercial General Liability policy shall contain a severability of interests clause (standard in the ISO CG 001 policy).

(d) Requirements Not Limiting. Requirement of specific coverage or minimum limits contained in this Section are not intended as a limitation on coverage, limits, or other requirement, or a waiver of any coverage normally provided by any insurance.

11.6. Terms & Conditions Specific to Licensee.

(a) Licensee shall notify Licensor in writing prior to any lapse of insurance coverage and provide a copy of the cancellation notice to Licensor and adhere to this Section 11.

(b) Intentionally omitted.

(c) The Licensee is granted the option of procuring insurance under a single policy or by a combination of underlying policies with the balance provided by an Excess or Umbrella policy with Follow Form coverage to the total per occurrence and aggregate limits required under this Agreement.

(d) Licensor will have the right, but not the obligation of prohibiting the Licensee from entering the License Area until such evidence of insurance has been submitted to the Licensor.

(e) Failure of Licensor to demand delivery of or identify deficiency with such evidence of insurance shall not be construed as a waiver of Licensee's obligations under this Section.

(f) By requiring insurance, the Licensor does not represent that coverage and limits will necessarily be adequate to protect the Licensee. Insurance procured by the Licensee will not reduce or limit the Licensee's contractual obligations.

(g) Licensee shall not be relieved of its responsibility for any and all loss, damage or liability stemming from any risk or exposure that is not insured, or not covered within any deductibles or self-insured retentions, or not covered as a result of policy exclusions or limitations.

(h) Insurance certificates should be forwarded to:

City of Ontario
303 East "B" Street
Ontario, CA 91764
Attn: Risk Manager, Human Resources/Risk Management Agency

With a copy to:

Ruben Duran, City Attorney
Best Best & Krieger, LLP
2855 E Guasti Road
Ontario, CA 91761

(i) Licensor expressly retains the right to request a change in insurance requirements if in the reasonable judgment of the City's Risk Manager it is the general commercial practice in the City of Ontario to carry such insurance and/or in the requested insurance limits for the subject activities taking into consideration the risks associated with such uses of the License Area or Kiosks, so long as any insurance required is available from recognized carriers. If so requested, Licensee and Licensor will strive to mutually agree to increase or decrease insurance of any of the above insurance types throughout the term of this Agreement and any increase or decrease in insurance will be as deemed by City of Ontario's Risk Manager as appropriate to adequately protect Licensor.

(j) Following mutual agreement, Licensee will then deposit copies of acceptable certificates of insurance and endorsements with Licensor incorporating such changes within thirty (30) days of procuring such revised insurance.

(k) The procuring of such required policy or policies of insurance shall not be construed to limit Licensee's liability hereunder nor to fulfill the indemnification provisions and requirements of this Agreement, nor act in any way to reduce the policy coverage and limits available from the insurer.

12. Indemnification of Licensor. Licensee shall be solely responsible for, and shall indemnify, defend (by counsel acceptable to the Indemnified Parties (as defined below) in question) and hold Licensor and its affiliates, partners, trustees, officers, directors, agents, employees and any other person acting for or on behalf of Licensor (collectively, the "Indemnified Parties") harmless from and against any and all costs, expenses, claims, losses, damages, causes of action, judgments, settlements and liability (including reasonable attorneys' fees, disbursements and costs) which may arise directly or indirectly by reason of (i) any occurrence attributable to or arising out of any act, omission or failure of Licensee's or any employee, director, contractor, agent, client, sub-licensee, occupant, invitee or guest of Licensee (collectively, "Agents"), including the failure to observe or perform any obligation of Licensee under this Agreement (including failure to surrender the Kiosks upon the expiration or earlier termination of this Agreement); (ii) Licensee's or its Agents entry upon and access to the License Area; (iii) the release and/or transportation of any Hazardous Materials; (iv) any accident or other occurrence in or about the License Area or that arise from the use, occupancy, management, repair, or maintenance of the Kiosks, or any portion thereof, except to the extent caused by the gross negligence or willful misconduct of Licensor; and/or (v) the installation, presence, operation, maintenance, repair and removal of any personal property, trade fixtures, and equipment of Licensee or its sub-licensees and occupants; including, without limitation, any claim or cause of action for injury to or death of any person or damage to any property or business arising out of any such occurrence described above or any other loss or injury arising out of the installation, operation, maintenance or removal of such personal property or improvements. The provisions of this Section shall survive the expiration and termination of this Agreement.

13. Default; Remedies. If Licensee fails to perform or observe any covenant to be performed or observed by Licensee under this Agreement and Licensee shall fail to remedy the same within (i) ten (10) days with respect to a monetary covenant and (ii) thirty (30) days with respect to a non-monetary covenant after notice from Licensor to Licensee specifying such neglect or failure, Licensor shall have, in addition to any other remedy available hereunder, at law or in equity, the right to immediately revoke and terminate this Agreement upon notice to Licensee, and this Agreement shall forthwith be revoked and terminated. Upon such revocation and termination, Licensee shall remove all personal property, trade fixtures, and equipment of Licensee or its sub-licensees and occupants and the provisions of Section 5 (Surrender) regarding surrender shall be applicable. Licensee agrees to pay to Licensor the amount of all reasonable legal fees and expenses incurred by Licensor arising out of or resulting from any breach by Licensee of its obligations hereunder.

14. Additional Termination Rights. Licensor shall have the right to terminate this Agreement in the event Licensee and any of its sub-licensees and occupants cease operation of the

Kiosks for a period of six (6) consecutive months after written notice from Licensor to Licensee, subject to Force Majeure Events (as defined in the Ground Lease) and excluding cessation of operations due to changes affecting the broader economy or capital, financial, credit, or securities markets.

15. Exculpation. Notwithstanding anything to the contrary contained herein, no member, officer, partner, shareholder, director, board member, agent, or employee of either party will be personally liable to the other party, and no party will have recourse against any of the foregoing, in an event of default by such party or for any amount which may become due to the other party or on any obligations under the terms of this Agreement or any claim based upon this Agreement.

16. No Joint Venture. This Agreement shall not create a partnership, joint venture or landlord/tenant relationship between Licensor and Licensee. It is specifically understood that this Agreement is not a lease or a sublease.

17. Notices. Any notice which may be given or required to be given hereunder shall be in writing and sent by United States certified mail, postage prepaid, or by overnight courier service, and addressed to the other party at the following address:

Licensee: OTC Lot A Owner, LLC
388 Cordova Street, #280
Pasadena, California 91101
Attention: Patrick Chraghchian & Robert Montano

With a copy to:

Willkie Farr & Gallagher LLP
2029 Century Park East
Los Angeles, California 90067
Attention: Misty M. Sanford, Esq.
Email: msanford@willkie.com

Licensor: City of Ontario
303 East "B" Street
Ontario, California 91764
Attention: City Manager; Scott Ochoa

with a copy to:

Best Best & Krieger, LLP
2855 E Guasti Road
Ontario, CA 91761
Attention: Ruben Duran (City Attorney)
Email: ruben.duran@bbklaw.com

Either party may, at any time, change its address for the above purposes by sending a notice to the other party stating the change and setting forth the new address.

18. CONDITION OF THE LICENSE AREA. LICENSEE ACKNOWLEDGES AND AGREES THAT IT IS LICENSING PORTIONS OF THE LICENSE AREA WHERE THE KIOSKS WILL BE BUILT "AS IS, WHERE IS" AND "WITH ALL FAULTS". NEITHER LICENSOR NOR LICENSOR'S AGENTS HAVE MADE ANY REPRESENTATIONS OR PROMISES WITH RESPECT TO THE PHYSICAL CONDITION OF THE LICENSE AREA, THE RENTS, LEASES, EXPENSES OF OPERATION OR ANY OTHER MATTER OR THING AFFECTING OR RELATED TO THE LICENSE AREA AND/OR KIOSKS AND NO RIGHTS OR EASEMENTS LICENSES ARE ACQUIRED BY LICENSEE BY IMPLICATION OR OTHERWISE. ALL UNDERSTANDINGS AND AGREEMENTS HERETOFORE MADE BETWEEN THE PARTIES HERETO ARE MERGED IN THIS CONTRACT, WHICH ALONE FULLY AND COMPLETELY EXPRESSES THE AGREEMENT BETWEEN LICENSOR AND LICENSEE, AND ANY EXECUTORY AGREEMENT HEREAFTER MADE SHALL BE INEFFECTIVE TO CHANGE, MODIFY, DISCHARGE, WAIVE OR EFFECT AN ABANDONMENT OF IT IN WHOLE OR IN PART, UNLESS SUCH EXECUTORY AGREEMENT IS IN WRITING AND SIGNED BY THE PARTY AGAINST WHOM ENFORCEMENT OF THE CHANGE, MODIFICATION, DISCHARGE, WAIVER OR ABANDONMENT IS SOUGHT.

19. Estoppel Certificate. At any time and from time to time, within ten (10) business days after written request by either Licensor or Licensee (the "requesting party"), the other party (the "responding party") shall execute and deliver an estoppel certificate addressed to the requesting party, and/or to such other beneficiary (as described below) as the requesting party shall request, certifying (i) that this Agreement is in full force and effect, if such be the case, (ii) that this Agreement is unmodified, or, if there have been modifications, identifying the same, (iii) that, to the actual knowledge of the responding party without any duty to investigate, there are no then existing and uncured defaults under the Agreement by either Licensor or Licensee, or, if any such defaults are known, identifying the same, and (iv) any other factual matters (which shall be limited to the actual knowledge of the responding party without any duty to investigate) as may be reasonably requested by the requesting party. Such certificate may designate as the beneficiary thereof the requesting party, and/or any third party having a reasonable need for such a certificate (such as, but not limited to, a prospective purchaser, transferee, or lender).

20. Nondiscrimination. Licensee covenants and agrees for itself, its successors, its assigns and every successor in interest to Licensee's interest in this Agreement, that there shall be no discrimination against or segregation of any person, or group of persons, on account of race, color, creed, religion, sex, marital status, national origin or ancestry in the sale, lease, sublease, transfer, use, occupancy, tenure or enjoyment of the License Area and/or Kiosks nor shall Licensee itself or any person claiming under or through it establish or permit any such practice or practices of discrimination or segregation with reference to the selection, location, number, use or occupancy of tenants, lessees, subtenants, sublessees, sub-licensees or vendees of the Kiosks.

Licensee covenants and agrees for itself, its successors, its assigns and every successor in interest to Licensee's interest in this Agreement, that Licensee shall refrain from restricting the rental, sale, lease or sub-license of the Kiosks on the basis of the race, color, creed, religion, sex, marital status, national origin or ancestry of any person. Licensee covenants and agrees for itself, its successors, its assigns and every successor in interest to Licensee's interest in this Agreement, that all deeds, leases or contracts entered into relating to the sale, transfer, leasing or sub-licensing of the Kiosks or any interest therein shall contain or be subject to substantially the following nondiscrimination

or nonsegregation clauses:

(a) In deeds: "The grantee herein covenants by and for itself, its successors, and assigns, and all persons claiming under or through them, that there shall be no discrimination against or segregation of, any person or group of persons on account of race, color, creed, religion, sex, marital status, national origin or ancestry in the sale, lease, sublease, transfer, license, sub-license, sub-sub-license, use, occupancy, tenure or enjoyment of the land herein conveyed, nor shall the grantee itself or any person claiming under or through it, establish or permit any such practice or practices of discrimination or segregation with reference to the selection, location, number, use or occupancy of tenants, lessees, subtenants, sublessees, licensees, sub-licensees, sub-sub-licensees, or vendees in the land herein conveyed. The foregoing covenants shall run with the land."

(b) In leases: "The lessee herein covenants by and for itself, its successors and assigns, and all persons claiming under or through them, and this lease is made and accepted upon and subject to the following conditions: That there shall be no discrimination against or segregation of any person or group of persons, on account of race, color, creed, religion, sex, marital status, national origin or ancestry in the leasing, subleasing, renting, transferring, licensing, sub-licensing, sub-sub-licensing, use, occupancy, tenure or enjoyment of the land herein leased, nor shall lessee itself, or any person claiming under or through it, establish or permit such practice or practices of discrimination or segregation with reference to the selection, location, number, use or occupancy of tenants, lessees, subtenants, sublessees, licensees, sub-licensees, sub-sub-licensees, or vendees in the land herein leased."

(c) In contracts entered into relating to the sale, transfer, leasing, licensing, sub-licensing, or sub-sub-licensing of land or any interest therein: "There shall be no discrimination against or segregation of any person or group of persons on account of race, color, creed, religion, sex, marital status, national origin or ancestry in the sale, lease, sublease, transfer, license, sub-license, sub-sub-license, use, occupancy, tenure or enjoyment of the land, nor shall the transferee itself or any person claiming under or through it, establish or permit any such practice or practices of discrimination or segregation with reference to the selection, location, number, use or occupancy of tenants, lessees, subtenants, sublessees, licensees, sub-licensees, sub-sub-licensees, or vendees of the land."

21. Miscellaneous.

(a) This Agreement and the Ground Lease embodies the entire agreement between the parties with respect to the subject matter hereof and shall supersede all prior offers, negotiations and agreements, and in the event of any conflict between terms and conditions of this Agreement and the Ground Lease, the terms and conditions of this Agreement shall control. This Agreement may be modified only in writing, signed by Licensor and Licensee.

(b) This Agreement shall be governed by and construed in accordance with the laws of the State of California, without regard to the conflict of laws principles thereof.

(c) This Agreement shall extend to and bind the heirs, executors, administrators, successors and assigns of the parties hereto.

(d) Licensor and Licensee each represent that they had no dealings with any real estate broker, finder or other person, with respect to this Agreement in any manner. Each

party agrees to indemnify and hold harmless the other against and from any claim or demand for any brokerage commission or other fees, and all costs, claims, expenses and liabilities in connection therewith (including, without limitation, attorneys' fees, disbursements and actual costs), arising out of any purported or actual dealings with any such broker.

(e) The submission of this Agreement to Licensee shall not be construed as an offer, nor shall Licensee have any rights with respect hereto, unless and until both parties shall execute and deliver a copy of this Agreement to the other party.

(f) The paragraph headings throughout this Agreement are for convenience and reference only, and the words contained therein shall in no way be held to explain, modify, amplify or aid in the interpretation, construction or meaning of the provisions of this Agreement.

(g) In any action or proceeding brought to enforce or interpret any provision of this Agreement, the prevailing party in such action shall be entitled to recover its reasonable costs and expenses, including without limitation court costs and attorneys' fees actually and reasonably incurred, as awarded by a court of competent jurisdiction. This Section shall survive the termination of Agreement.

(h) If any term or provision of this Agreement or the application thereof to any person or circumstance shall, to any extent, be invalid or unenforceable, the remainder of this Agreement, or the application of such term or provision to persons or circumstances other than those as to which it is held invalid or unenforceable, shall not be affected thereby, and each term and provision of this Agreement shall be valid and shall be enforced to the fullest extent permitted by law; provided, that, the invalid or unenforceable term or provision shall be deemed replaced to the extent necessary by a term or provision that is valid and enforceable and that comes closest to expressing the intention of the parties with respect to such invalid or unenforceable term or provision.

(i) This Agreement may be executed in multiple counterparts, each of which shall be deemed an original and all of which, taken together, shall constitute one and the same instrument. A signed copy of this Agreement transmitted by facsimile, email, DocuSign or other means of electronic transmission shall be deemed to have the same legal effect as delivery of an original executed copy of this Agreement for all purposes and shall create a binding document.

[NO FURTHER TEXT ON THIS PAGE]

IN WITNESS WHEREOF, Licensor and Licensee have executed this Agreement as of the date first written above.

LICENSEE:

EXHIBIT A

LEGAL DESCRIPTION OF LOT A

That portion of land lying within Parcel 1 of Parcel Map No. 17978, in the City of Ontario, County of San Bernardino, State of California, as per map filed in Book 216, Pages 44 and 45 of Parcel Maps, records of said county, more particularly described as follows:

BEGINNING at the northwesterly terminus of that certain course shown along the southeasterly line of said Parcel 1 as "N33°23'13" E 516.65'";

Thence southwesterly along said southeasterly line, South 33°23'13" West a distance of 479.18 feet;

Thence leaving said southeasterly line, South 63°16'30" West a distance of 36.68 feet;

Thence South 89°54'52" West a distance of 362.10 feet to the beginning of a non-tangent curve, concave northwesterly, having a radius of 491.74 feet, a radial bearing to said curve bears South 72°45'50" East;

Thence northeasterly along said curve, a distance of 86.84 feet through a central angle of 10°07'05";

Thence non-tangent to said curve, North 17°43'54" West a distance of 36.09 feet to the beginning of a non-tangent curve, concave northeasterly, having a radius of 168.73 feet, a radial bearing to said curve bears South 72°54'37" West;

Thence northerly along said curve, a distance of 53.66 feet through a central angle of 18°13'22";

Thence non-tangent to said curve, North 03°47'16" East, a distance of 44.47 feet;

Thence North 79°39'21" West, a distance of 13.17 feet to a beginning of a non-tangent curve, concave westerly having a radius of 125.07 feet, a radial bearing to said curve bears South 81°26'03" East;

Thence northerly along said curve, a distance of 86.32 feet through a central angle of 39°32'39", to the beginning of a reverse curve, concave northeasterly, having a radius of 268.72 feet, a radial bearing to said curve bears North 59° 01' 18" East;

Thence northwesterly along said reverse curve, a distance of 25.50 feet through a central angle of 05°26'15", to the beginning of a non-tangent curve, concave northeasterly, having a radius of 109.35 feet, a radial bearing to said curve bears South 67°02'24" West;

Thence northwesterly along said curve a distance of 29.64 feet through a central angle of 15°31'56";

Thence North 07°25’40” West a distance of 30.09 feet to the beginning of a non-tangent curve, concave southeasterly, having a radius of 50.51 feet; a radial bearing to said curve bears South 79°55’53” West;

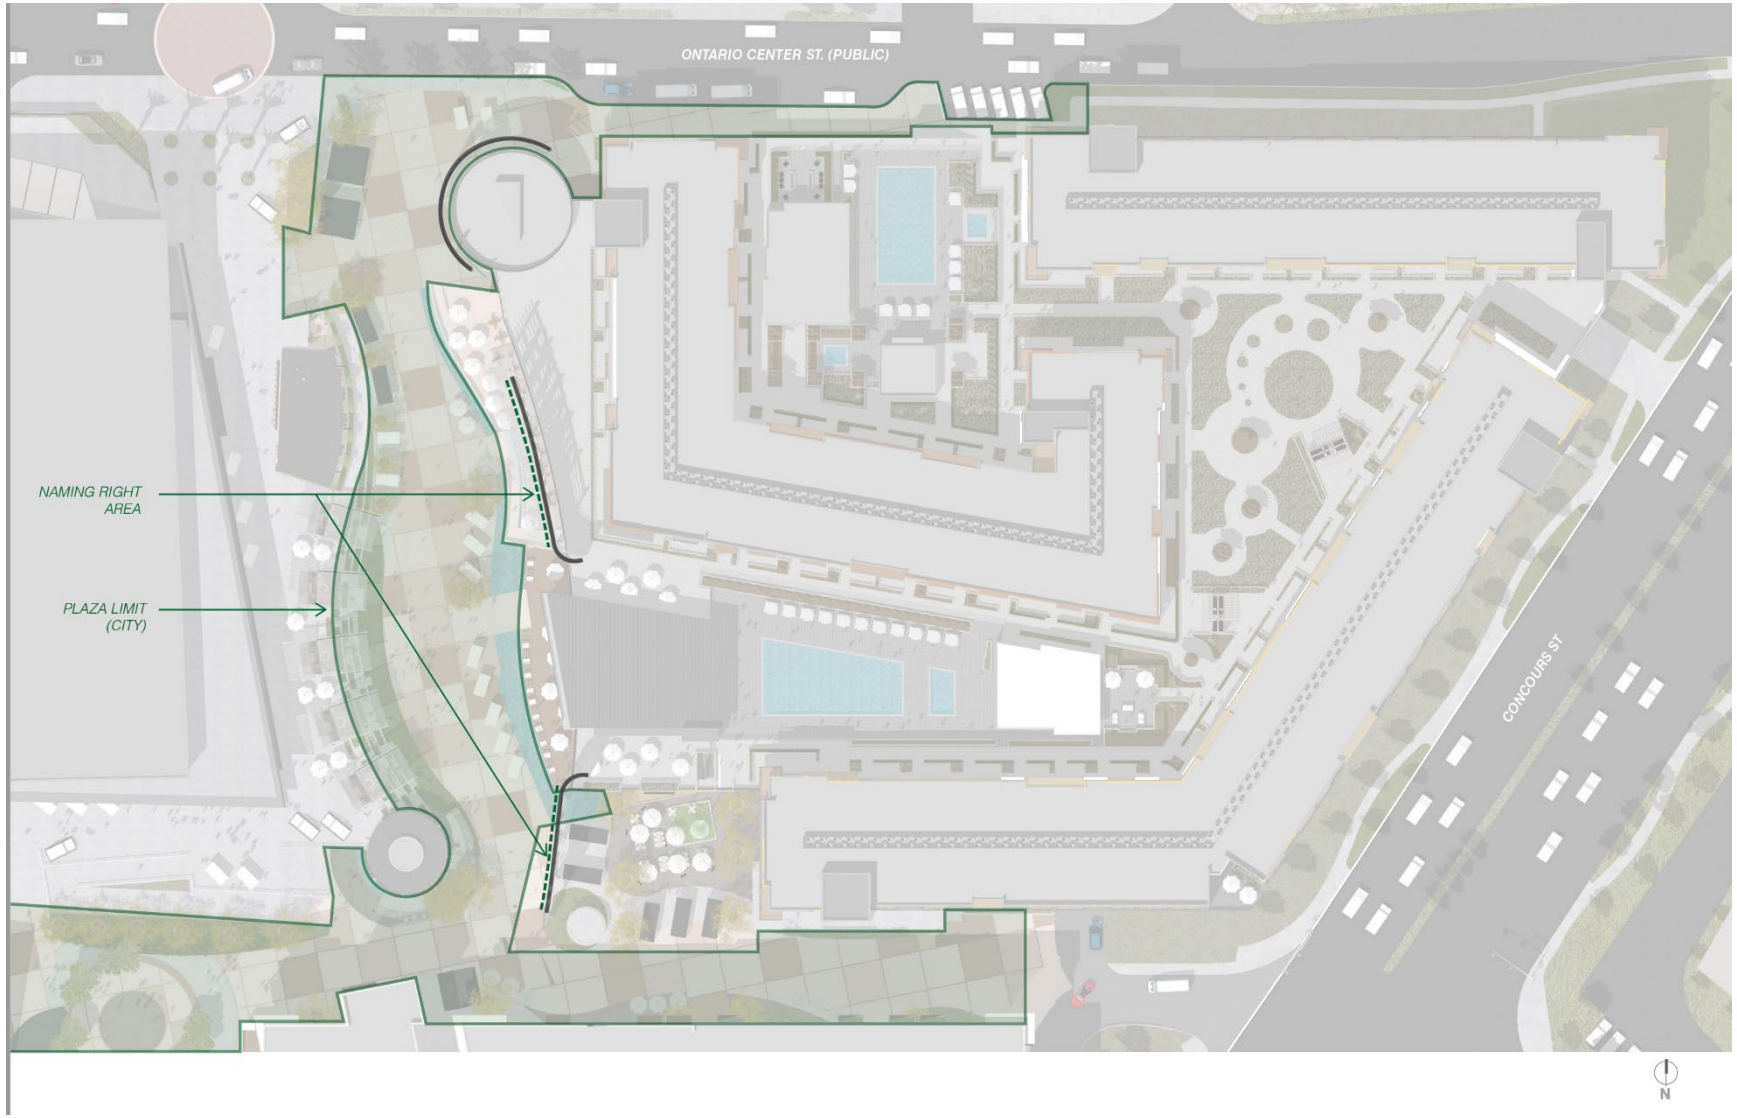
Thence northerly and northeasterly along said curve a distance of 89.18 feet through a central angle of 101°09’41”;

Thence non-tangent to said curve, North 00°24’32” East a distance of 19.27 feet to the northerly line of said Parcel 1;

Thence easterly along said northerly line, North 89°22’30” East, a distance of 424.99 feet to the beginning of a tangent curve, concave northerly, having a radius of 470.50 feet;

Thence easterly along said curve a distance of 69.53 feet through a central angle of 08°28’01”;

Thence continuing along said northerly line, North 89°09’29” East, a distance of 100.00 feet to the beginning of a tangent curve, concave southerly, having a radius of 429.50 feet;



Thence easterly along said curve, a distance of 37.57 feet through a central angle of 05°00’43” to the most Northerly, Northeasterly corner of said Parcel 1;

Thence radial to said curve along the Northeasterly line of said parcel 1, South 02°49’48” East a distance of 10.50 feet;

Thence South 27°54’22” East a distance of 57.11 feet to the **POINT OF BEGINNING.**

EXHIBIT B

DEPICTION OF PUBLIC PLAZA AREA

RESOLUTION NO. _____

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF ONTARIO, CALIFORNIA, APPROVING A KIOSK LICENSE AGREEMENT BETWEEN THE CITY AND OTC LOT A OWNER GRANTING A LICENSE TO USE CERTAIN LOCATIONS WITHIN AN AREA IMMEDIATELY ADJACENT TO THE EVENTS CENTER TO, AMONG OTHER THINGS, CONSTRUCT AND OPERATE KIOSKS AND MAKING CERTAIN CEQA FINDINGS IN CONNECTION THEREWITH.

WHEREAS, the City of Ontario is the fee interest owner of certain real property, identified with Assessor's Parcel Number 0210-205-01-0000, located at 4000 East Ontario Center Parkway, Ontario, CA, consisting of approximately 25.7 gross acres of land, (the "City Property"), which contains certain improvements, including a sports and entertainment arena with related office space for administrative use (the "Events Center"), commonly known as the Toyota Arena, which is situated on and generally within center point of the City Property, and presently with parking lots for use associated with the Events Center; and

WHEREAS, the City desires to design and construct certain improvements outside along the east side of the Events Center to create a public plaza or paseo (the "Plaza Area") that will contain retail and concession kiosks ("Kiosks"), outside furniture, and outdoor entertainment space for use by the residents of Ontario and the regional community; and

WHEREAS, the City has entered into a Ground Lease with OTC LOT A OWNER, LLC, a Delaware limited liability company ("OTC Lot A Owner"), whereby OTC Lot A Owner will design, plan, and construct a development on a lot located on the east side of the Events Center ("Ground Lease"); and

WHEREAS, as contemplated by Section 4.2.2 of the Ground Lease, the City and OTC Lot A Owner have negotiated a draft Kiosk License Agreement to grant OTC Lot A Owner a license to use certain locations within the Plaza Area to construct, operate, manage, and maintain the Kiosks ("Kiosk License Agreement"), subject to and in accordance with all of the terms and conditions set forth in the Kiosk License Agreement; and

WHEREAS, pursuant to the California Environmental Quality Act (Public Resource Code §§ 21000 *et seq.*) ("CEQA"), and the State CEQA Guidelines (14 Cal. Code Regs. §§ 15000 *et seq.*), the Kiosk License Agreement is exempt from CEQA pursuant to CEQA Guidelines Section 15311 (Class 11) Accessory Structures as construction and operation of the Kiosks pursuant to the Kiosk License Agreement consists of the construction, or replacement of minor structures accessory to (appurtenant to) existing commercial, industrial, or institutional facilities. None of the following exceptions to categorical exemption set forth in CEQA Guidelines Section 15300.2 apply:

"(a) Location. Classes 3, 4, 5, 6, and 11 are qualified by consideration of where the project is to be located--a project that is ordinarily insignificant in its impact on the environment may in a particularly sensitive environment be significant. Therefore, these classes are considered to apply in all instances, except where the project may impact on an environmental resource of hazardous or critical concern where designated, precisely mapped, and officially adopted pursuant to law by federal, state, or local agencies.

(b) Cumulative Impact. All exemptions for these classes are inapplicable when the cumulative impact of successive projects of the same type in the same place, over time is significant.

(c) Significant Effect. A categorical exemption shall not be used for an activity where there is a reasonable possibility that the activity will have a significant effect on the environment due to unusual circumstances.

(d) Scenic Highways. A categorical exemption shall not be used for a project which may result in damage to scenic resources, including but not limited to, trees, historic buildings, rock outcroppings, or similar resources, within a highway officially designated as a state scenic highway. This does not apply to improvements which are required as mitigation by an adopted negative declaration or certified EIR.

(e) Hazardous Waste Sites. A categorical exemption shall not be used for a project located on a site which is included on any list compiled pursuant to Section 65962.5 of the Government Code.

(f) Historical Resources. A categorical exemption shall not be used for a project which may cause a substantial adverse change in the significance of a historical resource."

NOW, THEREFORE, THE CITY COUNCIL FOR THE CITY OF ONTARIO DOES HEREBY RESOLVE AND DECLARE AS FOLLOWS:

SECTION 1. Recitals. The Recitals set forth above are true and correct and are incorporated into this Resolution by this reference.

SECTION 2. Finding of Categorical Exemption. Based on substantial evidence set forth in the record, including but not limited to, all information (including all written and oral evidence) presented to the City Council, the City Council hereby finds that the construction and operation of the Kiosks pursuant to the Kiosk License Agreement is categorically exempt from further CEQA review pursuant to CEQA Guidelines Section 15311 (Class 11 Accessory Structures).

SECTION 3. Finding of No Exception to Categorical Exemption. Based on substantial evidence set forth in the record, including but not limited to, all information (including all written and oral evidence) presented to the City Council, the City Council hereby finds that the construction and operation of the Kiosks pursuant to the Kiosk License Agreement is not subject to any of the exceptions to categorical exemption set forth in CEQA Guidelines Section 15300.2.

SECTION 4. Approval of Amendment to the Kiosk License Agreement. The City Council hereby approves the Kiosk License Agreement in substantially the form attached hereto as Exhibit A, subject to any non-substantive revisions which do not increase the City's liability and are approved by the City Attorney, and authorizes the City Manager to sign and enter into the Kiosk License Agreement and perform the obligations of the City under the Kiosk License Agreement.

SECTION 5. Notice of Exemption. The City Manager, or designee, is hereby directed to file a Notice of Exemption for the Kiosk License Agreement under CEQA.

SECTION 6. Severability. If any provision of this Resolution or the application of any such provision to any person or circumstance is held invalid, such invalidity shall not affect other provisions or applications of this Resolution that can be given effect without the invalid provision or application, and to this end the provisions of this Resolution are severable. The City declares that the City would have adopted this Resolution irrespective of the invalidity of any particular portion of this Resolution.

SECTION 7. Effective Date. This Resolution shall become effective immediately upon its adoption.

The City Clerk of the City of Ontario shall certify as to the adoption of this Resolution.

PASSED, APPROVED, AND ADOPTED this 20th day of August, 2024.

CITY OF ONTARIO *Agenda Report* **August 20, 2024**	**SECTION:** **PUBLIC HEARINGS**
Department: Planning Prepared By: Edmelynne V Hutter Department: Prepared By: Edmelynne V Hutter Staff Member Presenting: Scott Murphy, Executive Director Community Development Approved By:	Submitted To: Council/OHA Approved: _____ Continued To: _____ Denied: _____ Item No: 25

SUBJECT: **A PUBLIC HEARING TO CONSIDER CERTIFICATION OF THE ENVIRONMENTAL IMPACT REPORT (STATE CLEARINGHOUSE NO. 2023020281), INCLUDING THE ADOPTION OF A MITIGATION MONITORING AND REPORTING PROGRAM AND A STATEMENT OF OVERRIDING CONSIDERATIONS, IN CONJUNCTION WITH A SPECIFIC PLAN (FILE NO. PSP22-001 - EUCLID MIXED USE SPECIFIC PLAN)**

RECOMMENDATION: That the City Council take the following actions:

A. Consider and adopt a Resolution certifying the Environmental Impact Report (State Clearinghouse No. 2023020281) prepared for the Euclid Mixed Use Specific Plan, File No. PSP22-001, which includes a Statement of Overriding Considerations and Mitigation Monitoring and Reporting Program; and
B. Introduce and waive further reading of an Ordinance approving the Euclid Mixed Use Specific Plan (File No. PSP22-001).

THE FOLLOWING COUNCIL GOALS ARE BEING ACHIEVED:
Invest in the Growth and Evolution of the City's Economy
Invest in the City's Infrastructure (Water, Streets, Sewers, Parks, Storm Drains and Public Facilities)
Ensure the Development of a Well Planned, Balanced, and Self-Sustaining Community in Ontario Ranch

FISCAL IMPACT: Adoption of the Euclid Mixed Use Specific Plan (EMUSP) would result in both short- and long-term fiscal impacts to the City. Short-term impacts include infrastructure improvements to serve the new Business Park and Mixed-Use development. The cost of these improvements is included in the Nexus Study and Development Impact Fees previously adopted by the City Council. The developer will be required to install improvements or pay the Development Impact Fees ("DIF") associated with the various improvements. Long-term fiscal impacts include the ongoing operations and maintenance services (police, fire, maintenance, etc.) necessary to serve the new development. While the development will result in potential increased property tax revenue, the

increase is not sufficient to cover the cost of services associated with the project. To address the shortfall, the developer will be required to form and/or join a Community Facilities District ("CFD") to cover the additional public service costs. No Original Model Colony dollars will be used to fund this Ontario Ranch development.

BACKGROUND & ANALYSIS: The Ontario Plan 2050 (TOP 2050) Policy Plan (General Plan) provides the basic framework for development within the 8,200-acre area commonly referred to as Ontario Ranch. The Policy Plan requires City Council approval of a Specific Plan for new developments within Ontario Ranch, to ensure that sufficient land area is included to achieve cohesive, unified districts and neighborhoods. Additionally, a Specific Plan is required to incorporate a development framework that details land use, circulation, infrastructure improvements (such as drainage, sewer, and water facilities), provision for public services, and urban and design landscape standards.

The Euclid Mixed Use Specific Plan (EMUSP) area is 84 acres in size and bordered by Schaefer Avenue to the north, Sultana Avenue to the east, Edison Avenue to the south and Euclid Avenue to the west.

The EMUSP establishes a comprehensive set of design guidelines and development regulations to guide and regulate site planning, landscape, and architectural character, and ensuring that excellence in community design is achieved during Project development. The EMUSP establishes the procedures and requirements to approve new development within the Project site to ensure the Policy Plan goals and policies are achieved.

Land Use Plan - The EMUSP consists of five Planning Areas that will accommodate business park, light industrial, commercial, office and residential uses. The Land Use Plan implements the vision of TOP 2050 by providing opportunities for employment in warehousing, research and development, service, professional office, and supporting retail at intensities designed to meet the demand of current and future market conditions.

The EMUSP land use intensity anticipated in the five proposed planning areas (see Exhibit B: Land Use Plan) is consistent with TOP 2050. The EMUSP proposes a maximum 0.6 Floor-Area Ratio (FAR) within the Business Park land use district (Planning Areas 1, 2A and 2B); and 1.5 FAR for office uses, 1.0 FAR for retail uses and 35 DU/AC for residential uses within the Mixed-Use land use district (Planning Areas 3A and 3B). The proposed overall FARs and residential density for the EMUSP are consistent with the TOP 2050 Policy Plan Land Use designations for Business Park and Mixed Use – Great Park.

The EMUSP proposes the potential development of up to 1,676,886 square feet of business park, office and retail development, and 466 dwelling units. Planning Areas 1 and 2 are approximately 53.06 acres in size and can potentially be developed with 1,386,776 square feet of business park space. Planning Area 3 is approximately 19.03 acres in size and is anticipated to be developed with up to 290,110 square feet of office and retail space, and 466 dwelling units. Planning Areas 4 and 5 are 6.28 acres and 5.73 acres both include the extension of existing Southern California Edison transmission lines and are designated as non-recreational open space.

Design Guidelines - The design theme and concept for the project was created to ensure a high-

quality, attractive and cohesive design structure for the EMUSP. The guidelines provide the following objectives for all future development within the EMUSP area.

- Demonstrates high-quality development that complements and integrates into the community and adds value to the City.
- Creates a functional and sustainable place that ensures EMUSP is competitive regionally and appropriate in the Ontario Ranch community.
- Illustrates the distinctive characteristics of the three land use districts: Business Park, Mixed Use and Open Space – Nonrecreational.
- Establishes criteria for building design and materials, landscape design, and site design that provide guidance to developers, buildings, architects, landscape architects, and other professionals preparing plans for construction.
- Provides guidance to City staff and the Planning Commission in the review and evaluation of future development projects in the EMUSP area.
- Incorporates construction and landscape design standards that promote energy and water conservation strategies.
- Implements the goals and policies of TOP 2050 and the intent of the Ontario Development Code.

The Design Guidelines have been established to promote high-quality architecture as required by the Ontario Development Code and TOP 2050. The proposed architectural theme of the EMUSP incorporates a Contemporary Architectural style, and the planning areas will be designed to be compatible with and complement one another. The EMUSP provides examples of the type of business park and mixed-use concepts that are envisioned to be constructed within the Specific Plan.

The EMUSP requires all buildings to be designed to highlight the primary entryways by incorporating special materials, visual relief, massing and shading. Additionally, the facades that front onto a public street must incorporate vertical and horizontal articulation and material changes that will assist in enhancing these elevations and providing visual interest from the public view.

Circulation Concept - The circulation plan reinforces the objective of moving vehicles, pedestrians, cyclists, and public transit safely and efficiently through and around the Project and establishes the hierarchy and general location of roadways in and around the project boundary.

Future traffic signals are planned at the following intersections.

- Schaefer & Sultana (future) Avenues
- Edison & Sultana (future) Avenues
- Schaefer Avenue – between Euclid and Sultana Avenues
- Edison Avenue – between Euclid and Sultana Avenues
- Euclid Avenue – between Schaefer and Edison Avenues

Primary access to developments within the EMUSP area will be provided along the perimeter streets of Schaefer, Sultana (future), Edison and Euclid Avenues. Final right-of-way section

improvements along these streets are provided in the EMUSP and are consistent with the City's Master Plan of Streets. Euclid Avenue right-of-way will be 200 feet wide, while Edison Avenue will be 160 feet wide. Euclid and Edison Avenues will have 4 lanes in each direction, with raised medians that are 66 FT-wide and 26 FT-wide, respectively. Schaefer Avenue is planned to be 108 feet wide with 2 lanes in each direction, and no raised median. Sultana Avenue is categorized as a local industrial street with 66 feet wide right-of-way.

Each street will include a parkway, sidewalk and landscape buffer. Euclid, Edison and Schaefer Avenues will also be designed with a multi-purpose trail within the neighborhood edge, however the trail on Edison Avenue is planned on the south side of the street and will be addressed in a different specific plan.

Landscaping - The landscape design theme for EMUSP encourages durable landscape materials and designs that enhance the aesthetics of the structures, create and define public and private spaces, and provide shade and environmental benefits. Table 5.1 in the EMUSP establishes a base palette and includes a variety of groundcovers, shrubs, ornamental grasses, and evergreen and deciduous trees. The selection complements the design theme of the EMUSP area and features water-efficient, drought-tolerant species native to the region. Similar plant materials may be substituted for the species listed in Table 5.1 – Plant Palette if the alternative plans are climate appropriate and enhance the thematic setting.

The minimum landscape coverage required for both Business Park and Mixed-use land use districts is 10 percent. As illustrated in Section 5.13 – Streetscapes of the Specific Plan, Euclid Avenue will be required to provide a 50-foot-wide neighborhood edge (15-foot-wide parkway plus an additional 35-foot-wide landscape buffer). Edison and Schaefer Avenues will be required to provide a 23-foot-wide landscape buffer. Sultana will be designed with a nine-foot-wide parkway that includes a five-foot-wide sidewalk and a four-foot-wide landscape area adjacent to the curb.

Infrastructure and Services – The backbone infrastructure to serve all areas of the EMUSP will be installed by the developers in accordance with the Ontario Ranch Master Plans for streets, water (including recycled water), sewer, storm drain, and fiber optic facilities. Natural gas will be provided by Southern California Gas Company and electricity by Southern California Edison ("SCE"). Development of the Project requires that the developer install all infrastructure necessary to serve the Project as a standalone development, with phasing and ultimate details to be reviewed and approved via the Development Agreement (File No. PDA23-004).

Specific Plan Phasing – Development phasing within the EMUSP will be determined by the developer, based upon the real estate market conditions, infrastructure extensions, and associated Development Agreements. The EMUSP provides a Conceptual Phasing Plan and anticipated development to occur in at least two phases (see Exhibit E: Conceptual Phasing Plan). The Applicant is an interest holder of the Phase 1 area, and therefore is pursuing the associated proposed Tentative Parcel Map (File No. PMTT23-005) and Development Plan (File No. PDEV23-011) applications that the Planning Commission considered at a public hearing on July 23, 2024, and voted (6-0) to approve. The properties within the Phase 2 area are under different ownerships and no development is currently proposed for these properties.

Signage – The Euclid Mixed Use Specific Plan requires that signage within the Specific Plan area adhere to Section 5.2.2.5 (Signage) of the Euclid Mixed Use Specific Plan and comply with Chapter 8 (Sign Regulations) of the Development Code.

COMPLIANCE WITH THE ONTARIO PLAN: The proposed Project is consistent with the principles, goals and policies contained within the Vision, Governance, Policy Plan (General Plan), and City Council Priorities components of The Ontario Plan 2050.

The California Government Code (Title 7, Division 1, Chapter 3, Article 8, Section 65450-65457) permits the adoption and administration of specific plans as an implementation tool for elements contained in the local General Plan. Specific plans must demonstrate consistency in regulations, guidelines, and programs, with the goals and policies set forth in the General Plan. The EMUSP has been prepared in conformance with the goals and policies of the Policy Plan (General Plan) component of The Ontario Plan 2050. The policy analysis in Chapter 7 of the Specific Plan describes the manner in which the EMUSP complies with the Policy Plan goals and policies.

HOUSING ELEMENT COMPLIANCE: The Project is consistent with the Housing Element of the Policy Plan (General Plan) component of The Ontario Plan 2050. The Project site is one of the properties listed in the Housing Element Sites Inventory contained in Tables B-1 and B-2 of the Housing Element Technical Report, and the proposed Project is consistent with the number of dwelling units (466) and density (35 du/ac) specified in the Housing Element Sites Inventory.

AIRPORT LAND USE COMPATIBILITY PLAN (ALUCP) COMPLIANCE: The California State Aeronautics Act (Public Utilities Code Section 21670 et seq.) requires that an Airport Land Use Compatibility Plan be prepared for all public use airports in the State; and requires that local land use plans and individual development proposals must be consistent with the policies set forth in the adopted Airport Land Use Compatibility Plan.

On April 19, 2011, the City Council of the City of Ontario approved and adopted the ONT ALUCP, establishing the Airport Influence Area for Ontario International Airport, which encompasses lands within parts of San Bernardino, Riverside, and Los Angeles Counties, and limits future land uses and development within the Airport Influence Area, as they relate to noise, safety, airspace protection, and overflight impacts of current and future airport activity. As the recommending body for File No. PSP22-001 and the decision-making body for File Nos. PMTT23-005 and PDEV23-011, the City Council has reviewed and considered the facts and information contained in the Application and supporting documentation against the ONT ALUCP compatibility factors, including [1] Safety Criteria (ONT ALUCP Table 2-2) and Safety Zones (ONT ALUCP Map 2-2), [2] Noise Criteria (ONT ALUCP Table 2-3) and Noise Impact Zones (ONT ALUCP Map 2-3), [3] Airspace protection Zones (ONT ALUCP Map 2-4), and [4] Overflight Notification Zones (ONT ALUCP Map 2-5). As a result, the City Council, therefore, finds and determines that the Project, when implemented in conjunction with the conditions of approval, will be consistent with the policies and criteria set forth within the ONT ALUCP.

On August 2, 2022, the City Council of the City of Ontario approved and adopted a Development Code Amendment to establish the Chino Airport ("CNO") Overlay Zoning District ("OZD") and Reference I, Chino Airport Land Use Compatibility Plan ("CNO ALUCP"). The CNO OZD and CNO

ALUCP established the Airport Influence Area for Chino Airport, solely within the City of Ontario, and limits future land uses and development within the Airport Influence Area, as they relate to safety, airspace protection, and overflight impacts of current and future airport activity. The CNO ALUCP is consistent with policies and criteria set forth within the Caltrans 2011 California Airport Land Use Planning Handbook. The proposed Project is located within the Airport Influence Area of Chino Airport and was evaluated and found to be consistent with the California Airport Land Use Planning Handbook and the CNO ALUCP. As the decision-making body for File No. PSP22-001 and the decision-making body for File Nos. PMTT23-005 and PDEV23-011, the City Council has reviewed and considered the facts and information contained in the Application and supporting documentation against the CNO ALUCP compatibility factors, including Safety, Airspace Protection and Overflight. As a result, the City Council, therefore, finds and determines that the Project, when implemented in conjunction with the conditions of approval, will be consistent with the policies and criteria set forth within the California Airport Land Use Planning Handbook and the Chino ALUCP.

ENVIRONMENTAL REVIEW: The Specific Plan is located in what was formerly the City of Ontario Sphere of Influence ("SOI") area, which consists of roughly 8,200 acres at the south end of the City. On January 7,1998, the City of Ontario adopted the New Model Colony ("NMC") General Plan Amendment, setting forth a comprehensive strategy for the future development of the SOI. The NMC is bounded by Riverside Drive to the north, Hamner Avenue to the east, Euclid Avenue to the west, and Merrill Avenue/Bellegrave to the south.

Since the adoption of the NMC General Plan Amendment, the City has updated the General Plan on different occasions. On January 27, 2010, the City adopted The Ontario Plan and certified the accompanying Environmental Impact Report (SCH# 2008101140). On August 16, 2022, the City adopted The Ontario Plan 2050 (TOP 2050), which was an update to The Ontario Plan adopted in 2010 and included the certification of an accompanying Supplemental Environmental Impact Report (SCH# 2021070364). The Policy Plan component of TOP 2050 serves as the General Plan for the entire City, including the NMC (now referred to as "Ontario Ranch"). TOP 2050 identified many areas that might have potentially significant impacts on the environment. These areas included 1) Aesthetics; 2) Biological Resources; 3) Geology and Soils; 4) Hazards and Hazardous Materials; 5) Hydrology and Water Quality; 6) Land Use and Planning; 7) Mineral Resources; 8) Population and Housing; 9) Public Services; 10) Recreation; and 11) Utilities and Service systems. Through the EIR process, these potential impacts were analyzed, revisions were incorporated into the plan, and/or mitigation measures were identified that reduced the potential environmental impacts to a level that was less than significant.

TOP 2050 also identified several potential impacts that, even with revisions and/or mitigation measures, could not be reduced to a level of less than significant. These areas included Air Quality, Cultural Resources, Noise, and Transportation. While these impacts will be significant and unavoidable, the City determined that the benefits of the Ontario Ranch development outweigh the potential unavoidable, adverse impacts of the plan. As a result, the City adopted a Statement of Overriding Considerations for those impacts that could not be fully mitigated to a level of less than significant.

The TOP 2050 EIR analyses focused on the program, or "big picture" impacts associated with development. With the submittal of the EMUSP, staff is charged with evaluating the potential

impacts of development at the project level, looking specifically at the project proposal and any potential environmental impacts associated with it. Staff completed an Initial Study for the Project and determined that an EIR should be prepared for the EMUSP. Through the Initial Study preparation and scoping meeting discussion, an EIR was prepared for the EMUSP addressing the following issues:

- Aesthetics
- Agricultural and Forestry Resource
- Air Quality Biological Resources
- Cultural Resources
- Energy
- Geology and Soils
- Greenhouse Gas Emissions
- Hazards and Hazardous Materials
- Hydrology and Water Quality
- Land Use and Planning
- Noise
- Population and Housing
- Public Services
- Transportation
- Tribal Cultural Resources
- Utilities and Service Systems

The EMUSP EIR evaluates each of these various areas and identifies mitigation measures and/or revisions to the plan to lessen the level of significance. The EIR analyzed EMUSP Phase 1 based on the proposed EMUSP land uses, development intensities, conceptual designs, infrastructure requirements, and onsite surveys and studies. However, access to properties within Phase 2 could not be obtained and, therefore, the level of impact cannot be known for categories such as Biological Resources, Geology and Soils, and Hazards and Hazardous Materials since onsite surveys could not be conducted. It is conceivable that, when development of Phase 2 is proposed and onsite access is obtained, the potentially significant impacts on Biological Resources, Geology and Soils, and Hazards and Hazardous Materials in Phase 2 can be mitigated to less than significant. Nevertheless, since level of impact cannot be known for Phase 2 areas at this time, the EMUSP EIR conservatively concludes that there are significant and unavoidable impacts.

With the implementation of the various mitigation measures, many of the potential adverse impacts can be reduced to a level of less than significant. Of the 17 areas considered by the EIR, all but seven areas were less than significant or mitigated to a level of less than significant. The seven remaining impact areas, even with the mitigation measures, could not be reduced to less than significant, resulting in some impacts remaining potentially significant and unavoidable. These areas are:

- Agricultural and Forestry Resources
- Air Quality
- Biological Resources (Phase 2 only)
- Cultural Resources

- Geology and Soils (Phase 2 only)
- Greenhouse Gas Emissions
- Hazards and Hazardous Materials (Phase 2 only)

While mitigation of all potential impacts to a level of less than significant is desirable, the fact that seven areas will remain significant and unavoidable is not unexpected. The identification of these areas as significant and unavoidable also validates the work previously completed for TOP 2050. Staff continues to believe that the benefits of the proposed development outweigh the potential impacts associated with it. Therefore, staff recommends the Planning Commission recommend certification of the EIR to the City Council and that a Statement of Overriding Considerations be adopted for the Project.

PLANNING COMMISSION REVIEW: On July 23, 2024, the Planning Commission conducted a public hearing and voted (6-0) to recommend City Council approval of the project Environmental Impact Report including a Statement of Overriding Consideration and a Mitigation Monitoring and Reporting Program, and the Specific Plan, File No. PSP22-001.

RESOLUTION NO. _____

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF ONTARIO, CALIFORNIA, CERTIFYING THE PROJECT ENVIRONMENTAL IMPACT REPORT (STATE CLEARINGHOUSE NO. 2023020281) FOR THE EUCLID MIXED USE SPECIFIC PLAN (EMUSP) FOR FILE NO. PSP22-001 AND ADOPT ENVIRONMENTAL FINDINGS PURSUANT TO THE CALIFORNIA ENVIRONMENTAL QUALITY ACT, INCLUDING A STATEMENT OF OVERRIDING CONSIDERATIONS, AND A MITIGATION MONITORING AND REPORTING PROGRAM.

WHEREAS, EUCLID LAND INVESTMENT LLC ("Applicant") has filed an Application for the approval of a Specific Plan, File No. PSP22-001 (Euclid Mixed Use Specific Plan), as described in the title of this Resolution (hereinafter referred to as "Application" or "Project"); and

WHEREAS, the Application applies to 84 acres of land with 18 parcels, bordered by Schaefer Avenue to the north, future Sultana Avenue to the east, Edison Avenue to the south, and Euclid Avenue to the west, within the SP(AG) (Specific Plan (Agricultural Overlay)) zoning district, and is presently improved with agricultural, dairy, recreational vehicle storage, residential and vacant land uses; and

WHEREAS, the City prepared The Ontario Plan 2050 Final Supplemental Environmental Impact Report ("TOP 2050 SEIR") (SCH # 2021070364) in association with the 2050 General Plan Update ("GPU") and certified the TOP 2050 EIR on August 16, 2022; and

WHEREAS, the TOP 2050 EIR is a Supplemental EIR, an update to the approved 2010 The Ontario Plan; therefore, TOP 2050 SEIR relies on the findings of the 2009 Draft EIR, 2010 Recirculated Draft EIR, and 2010 Final EIR; and

WHEREAS, the City originally issued a Notice of Preparation ("NOP") for the Euclid Mixed Use Specific Plan for which the public review period extended from February 10, 2023, through March 13, 2023. The NOP was published in the Inland Valley Daily Bulletin and was posted at the San Bernardino County Clerk's office on February 10, 2023. Copies of the NOP were made available for public review at the City of Ontario Planning Department and the City's website; and

WHEREAS, pursuant to Public Resources Code (PRC) §21083.9 and State California Environmental Quality Act (CEQA) Guidelines §15082(c) and 15083, a public scoping meeting was held on Tuesday February 22, 2023, at 6:00pm where comments were received; and

WHEREAS, the Project Environmental Impact Report ("EIR") for File No. PSP22-001 (State Clearinghouse No. 2023020281) has been prepared in accordance with the

California Environmental Quality Act (“CEQA”), the State CEQA Guidelines, and the City of Ontario Guidelines for implementation of the CEQA Guidelines; and

WHEREAS, a Draft Environmental Impact Report (“Draft EIR”) was prepared, incorporating comments received in response to the NOP, and determined that mitigation measures were required to mitigate impacts to a less than significant level for air quality, biological resources, cultural resources, geology and soils, greenhouse gas emissions, hazards and hazardous materials, tribal cultural resources, and further concluded that despite the incorporation of all feasible mitigation measures, the proposed Project would nonetheless result in significant and unavoidable impacts relating to agriculture and forestry resources, air quality, biological resources, cultural resources, geology and soils, greenhouse gas emissions, hazards and hazardous materials; and

WHEREAS, the Euclid Mixed Use Specific Plan anticipates development in two phases and that onsite access to properties in Phase 1 were obtained through which onsite studies and surveys for the EIR were conducted, and that onsite access to properties within Phase 2 were not obtained and certain studies and analyses could not be conducted; and

WHEREAS, after completing the Draft EIR (State Clearinghouse No. 2023020281), the City released the document for public review for a 45-day public comment period that began December 22, 2023, and ended February 6, 2024. A Notice of Availability (“NOA”) was circulated for the Draft EIR on December 22, 2023 and published in the Inland Valley Daily Bulletin and posted at the Office of the Clerk of the Board of Supervisors of San Bernardino County. At that time, the City also provided a Notice of Availability to all organizations and individuals who had previously requested such notice. Additionally, copies of the Draft EIR were made available for review at City Hall, the Ovitt Family Community Library, as well as on the City's website; and

WHEREAS, the Final Environmental Impact Report ("Final EIR"), for the Euclid Mixed Use Specific Plan ("EMUSP") Environmental Impact Report (State Clearinghouse No. 2023020281) consists of the Draft EIR and the comments and responses to comments made on the Draft EIR; and

WHEREAS, the EMUSP Final EIR Statement of Overriding Considerations, and Mitigation Monitoring and Reporting Program (MMRP) for File No. PSP22-001 have been prepared in accordance with CEQA, the State CEQA Guidelines, and the City of Ontario Guidelines for implementation of CEQA; and

WHEREAS, copies of the Final EIR were distributed to the City Council, Planning Commission, City departments, and federal, state, regional, local, and other agencies and individuals; and

WHEREAS, on July 23, 2024, the Planning Commission of the City of Ontario conducted a duly noticed public hearing on the EIR at which time all persons wishing to testify were heard and the EIR was fully studied and concluded said hearing on that date.

After considering all public testimony, the Planning Commission issued Resolution No. PC24-031, recommending City Council certification of the Project EIR; and

WHEREAS, on August 20, 2024, the City Council of the City of Ontario conducted a noticed public hearing on the Project at which time all persons wishing to testify were heard and the Final EIR was fully studied; and

WHEREAS, all other legal prerequisites to the adoption of this Resolution have occurred.

NOW, THEREFORE, IT IS HEREBY FOUND, DETERMINED, AND RESOLVED by the City Council of the City of Ontario, as follows:

SECTION 1: ***Environmental Determination and Findings.*** As the decision-making body for the Project, the City Council has reviewed and considered the information contained in the Final EIR and supporting documentation. Based upon the facts and information contained in the Final EIR and supporting documentation, including all written and oral evidence presented to the City Council, the City Council finds as follows:

(1) The environmental impacts of this Project were reviewed in conjunction with Euclid Mixed Use Specific Plan ("EMUSP") Final EIR (State Clearinghouse No. 2023020281) that was prepared; and

(2) The Final EIR contains a complete and accurate reporting of the environmental impacts associated with the Project; and

(3) The Final EIR was completed in compliance with CEQA and the Guidelines promulgated thereunder, and the City of Ontario Local CEQA Guidelines; and

(4) The Final EIR reflects the independent judgment of the City Council.

SECTION 2: ***City Council Action.*** Based on the entire record before the City Council and all written and oral evidence presented, the City Council finds the Final EIR complies with CEQA for the following reasons:

(1) The EIR analyzes the environmental effects of the Project and finds that, if the EMUSP is adopted as proposed by this plan, and with the implementation of proposed mitigation measures, the following impacts will still be significant and unavoidable: agriculture and forestry resources, air quality, biological resources, cultural resources, geology and soils, greenhouse gas emissions, and hazards and hazardous materials; and

(2) The City Council further finds that the Findings of Facts and Statement of Overriding Considerations, demonstrates that the EMUSP's benefits outweigh its significant and unavoidable impacts, and therefore the City

would be justified in approving the EMUSP notwithstanding said significant and unavoidable impacts.

SECTION 3: ***Housing Element Compliance.*** Pursuant to the requirements of California Government Code Chapter 3, Article 10.6, commencing with Section 65580, as the decision-making body for the Project, the City Council finds that based upon the facts and information contained in the Application and supporting documentation, at the time of Project implementation, the Project is consistent with the Housing Element of the Policy Plan (General Plan) component of The Ontario Plan 2050. The Project site is one of the properties listed in the Housing Element Sites Inventory contained in Tables B-1 and B-2 of the Housing Element Technical Report, and the proposed Project is consistent with the number of dwelling units (466) and density (35 du/ac) specified in the Housing Element Sites Inventory.

SECTION 4: ***Ontario International Airport Land Use Compatibility Plan ("ALUCP") Compliance.*** The California State Aeronautics Act (Public Utilities Code Section 21670 et seq.) requires that an Airport Land Use Compatibility Plan be prepared for all public use airports in the State; and requires that local land use plans and individual development proposals must be consistent with the policies set forth in the adopted Airport Land Use Compatibility Plan.

(1) On April 19, 2011, the City Council of the City of Ontario approved and adopted the ALUCP, establishing the Airport Influence Area for Ontario International Airport (hereinafter referred to as "ONT"), which encompasses lands within parts of San Bernardino, Riverside, and Los Angeles Counties, and limits future land uses and development within the Airport Influence Area, as they relate to noise, safety, airspace protection, and overflight impacts of current and future airport activity. As the decision-making body for the Project, the City Council has reviewed and considered the facts and information contained in the Application and supporting documentation against the ALUCP compatibility factors, including [1] Safety Criteria (ALUCP Table 2-2) and Safety Zones (ALUCP Map 2-2), [2] Noise Criteria (ALUCP Table 2-3) and Noise Impact Zones (ALUCP Map 2-3), [3] Airspace protection Zones (ALUCP Map 2-4), and [4] Overflight Notification Zones (ALUCP Map 2-5). As a result, the City Council, therefore, finds and determines that the Project, when implemented in conjunction with the conditions of approval, will be consistent with the policies and criteria set forth within the ALUCP.

(2) On August 2, 2022, the City Council of the City of Ontario approved and adopted a Development Code Amendment to establish the Chino Airport ("CNO") Overlay Zoning District ("OZD") and Reference I, Chino Airport Land Use Compatibility Plan ("CNO ALUCP"). The CNO OZD and CNO ALUCP established the Airport Influence Area for Chino Airport, solely within the City of Ontario, and limits future land uses and development within the Airport Influence Area, as they relate to safety, airspace protection, and overflight impacts of current and future airport activity. The CNO ALUCP is consistent with policies and criteria set forth within the Caltrans 2011 California Airport Land Use Planning Handbook. The proposed Project is located within the Airport Influence Area of Chino Airport and was evaluated and found to be consistent with the California Airport Land Use Planning Handbook and the CNO ALUCP. As the decision-

making body for the Project, the City Council has reviewed and considered the facts and information contained in the Application and supporting documentation against the CNO ALUCP compatibility factors, including Safety, Airspace Protection, Overflight. As a result, the City Council, therefore, finds and determines that the Project, when implemented in conjunction with the conditions of approval, will be consistent with the policies and criteria set forth within the California Airport Land Use Planning Handbook and the Chino ALUCP.

SECTION 5: ***Concluding Facts and Reasons.*** Based upon the substantial evidence presented to the City Council during the above-referenced hearing, and upon the specific findings set forth in Sections 1 through 4, above, the City Council concludes as follows:

(1) The proposed Final EIR is consistent CEQA and the Guidelines promulgated thereunder, and the City of Ontario Local CEQA Guidelines; and

(2) The EIR contains a complete and accurate reporting of the environmental impacts associated with the Project; and

(3) The Project EIR analyzed the environmental impacts associated with the implementation of Phases 1 and 2 of the Euclid Mixed Use Specific Plan, and finds that, if the Specific Plan is adopted and development occurs as proposed by this plan, and with implementation of proposed mitigation measures, the following impacts will still be significant and unavoidable:

(a) Agricultural Resources – Project-specific impacts and cumulative impacts would remain significant and unavoidable; and

(b) Air Quality – Impacts related to a net increase in criteria pollutants would remain significant and unavoidable with the implementation of recommended mitigation measures; and

(c) Biological Resources – Impacts related to development of Phase 2 could not be analyzed in that biological surveys could not be conducted in this area, and therefore there is potential for significant and unavoidable impacts; and

(d) Cultural (Historic) Resources – Impacts related to demolition of milk barns within the Project site is considered a significant and unavoidable impact; and

(e) Geology and Soils - Impacts related to development of Phase 2 could not be analyzed in that geological and soils surveys could not be conducted in this area, and therefore there is potential for significant and unavoidable impacts; and

(f) Greenhouse Gas Emissions – Project-specific impacts and cumulative impacts would remain significant and unavoidable; and

(g) Hazards and Hazardous Materials - Impacts related to development of Phase 2 could not be analyzed in that hazard and hazardous materials surveys could not be conducted in this area, and therefore there is potential for significant and unavoidable impacts.

(4) The EIR reflects the independent judgment of the City Council.

SECTION 6: ***City Council Action.*** Based upon the findings and conclusions set forth in Section 1 through 5 above, the City Council hereby certifies the Project EIR, included as Attachment A of this Resolution, and adopts a Statement of Overriding Considerations, and the associated Mitigation Monitoring and Reporting Program.

SECTION 7: ***Indemnification.*** The Applicant shall agree to defend, indemnify and hold harmless, the City of Ontario or its agents, officers, and employees from any claim, action or proceeding against the City of Ontario or its agents, officers or employees to attack, set aside, void, or annul this approval. The City of Ontario shall promptly notify the applicant of any such claim, action, or proceeding, and the City of Ontario shall cooperate fully in the defense.

SECTION 8: ***Custodian of Records.*** The documents and materials that constitute the record of proceedings on which these findings have been based are located at the City of Ontario City Hall, 303 East "B" Street, Ontario, California 91764. The custodian for these records is the City Clerk of the City of Ontario.

The City Clerk of the City of Ontario shall certify as to the adoption of this Resolution.

PASSED, APPROVED, AND ADOPTED this 20th day of August, 2024.

1.0 EXECUTIVE SUMMARY

1.1 Introduction

The Environmental Impact Report (EIR) process, as defined by the California Environmental Quality Act (CEQA), requires the preparation of an objective, full-disclosure document in order to (1) inform agency decision-makers and the general public of the direct and indirect potentially significant environmental effects of a proposed action; (2) identify feasible or potentially feasible mitigation measures to reduce or eliminate potentially significant adverse impacts; and (3) identify and evaluate reasonable alternatives to a project. In accordance with State CEQA Guidelines Section 15168 (Title 14 of the California Code of Regulations [CCR]), this Draft EIR (State Clearinghouse No. 2023020281) has been prepared for the Euclid Mixed Use Specific Plan Project (Project). In accordance with CEQA Guidelines Section 15123, this section of the Draft EIR provides a brief description of the Project; identifies significant effects and proposed mitigation measures or alternatives that would reduce or avoid those effects; and describes areas of controversy and issues to be resolved.

CEQA requires that projects subject to approval by a State of California (State) public agency, and that are not otherwise exempt or excluded, undergo an environmental review process to identify and evaluate potential impacts. CEQA Guidelines Section 15050 states that environmental review shall be conducted by the Lead Agency, defined in CEQA Guidelines Section 15367 as the public agency with principal responsibility for approving a project. The Project is subject to approval actions by the City of Ontario (City), which will, therefore, act as the Lead Agency.

This Draft EIR has been prepared as a "Program EIR" pursuant to the requirements Section 15168 of the State CEQA Guidelines (Title 14 of the California Code of Regulations [CCR]) and the City's CEQA procedures, as this EIR addresses the proposed Specific Plan (the "Project") and is intended to cover anticipated future discretionary approvals. The Draft EIR considers the environmental impacts of the Project, as well as the additive effects of growth throughout the City and the region. These latter impacts are referred to as cumulative impacts. The Draft EIR also evaluates a range of potential feasible alternatives anticipated to reduce significant impacts of the Project, including a No Project/No Build Alternative. This Draft EIR has been prepared for the City, pursuant to the requirements of CEQA.

Pursuant to CEQA Guidelines Section 15082, the City circulated a Notice of Preparation (NOP) advising public agencies, special districts, and members of the public who had requested such notice that an EIR for the Project was being prepared. The NOP was distributed on February 10, 2023, to solicit comments related to the proposed construction of the Project. The NOP was circulated with a 30-day public review period ending on March 13, 2023. This process and the comments submitted in response to the NOP are discussed in ***Section 2.0: Introduction***, and ***Section 1.7: Areas of Controversy***, below.

After receiving public comments on the NOP, the Project was analyzed for its potential to result in environmental impacts. Impacts were evaluated in accordance with the significance criteria presented in Appendix G, "Environmental Checklist Form," of the CEQA Guidelines. The criteria in the Environmental Checklist Form (checklist), was used to determine if the Project would result in, "no impact," "less than

significant impact," "less than significant impact with mitigation measures," or "potentially significant impact" to a particular environmental resource. In some instances, a project may use the checklist to provide an initial discussion of a project and to screen out certain topics from a full discussion in the Draft EIR. This Draft EIR discusses all environmental resources in CEQA Guidelines, Appendix G. A table listing the significant Project impacts and any associated mitigation measures is included at the end of this summary in ***Table 1-1: Summary of Significant Impacts and Proposed Mitigation Measures***.

This Draft EIR describes the existing environmental resources on the Project site and in the vicinity of the site, analyzes potential impacts on those resources that would or could occur upon initiation of the Project, and identifies mitigation measures that could avoid or reduce the magnitude of those impacts determined to be significant. The environmental impacts evaluated in this Draft EIR concern several subject areas, including aesthetics, agriculture and forestry, air quality, biological resources, cultural resources, energy/energy conservation, geology and soils, greenhouse gas (GHG) emissions, hazards and hazardous materials, hydrology and water quality, land use and planning, noise, population and housing, public services, transportation, tribal cultural resources, and utilities and service systems. As noted in the preceding paragraph, public comment was received during the NOP process and included written letters provided to the City. A copy of the letters with the NOP are provided in ***Appendix A*** to this Draft EIR. The comments were used, as intended, to help inform the discussion of this Draft EIR and help determine the scope and framework of certain topical discussions.

The Draft EIR is subject to further review and comment by the public, as well as responsible agencies and other interested jurisdictions, agencies, and organizations for a period of 45 days after completion.

Following the public review period, written responses to all comments received on the Draft EIR will be prepared. Those written responses, and any other necessary changes to the Draft EIR, will constitute the Final EIR and will be submitted to the Board of Supervisors for their consideration. If the City finds that the Final EIR is "adequate and complete" in accordance with the CEQA Guidelines, the City may certify the EIR. The Board of Supervisors would also consider the adoption of Findings of Fact pertaining to the EIR, specific mitigation measures, a Statement of Overriding Considerations and a Mitigation Monitoring and Reporting Plan (MMRP). Upon review and consideration of the Final EIR, the hearing body would take action concerning the Project.

Regarding the MMRP, CEQA Guidelines Section 15097 requires public agencies to set up monitoring and reporting programs to ensure compliance with mitigation measures, which are adopted or made as a condition of project approval and designed to mitigate or avoid the significant environmental effects identified in environmental impact reports. A MMRP incorporating the mitigation measures set forth in this EIR will be considered and acted upon by the City decision-makers concurrent with adoption of the findings of this EIR and prior to approval of the Project.

1.2 Environmental Procedures

This Draft EIR has been prepared pursuant to CEQA to assess the environmental effects associated with implementation of the proposed Project, as well as anticipated future discretionary actions and approvals. CEQA established six main objectives for an EIR:

1. Disclose to decision makers and the public the significant environmental effects of proposed activities.
2. Identify ways to avoid or reduce environmental damage.
3. Prevent environmental damage by requiring implementation of feasible alternatives or mitigation measures.
4. Disclose to the public reasons for agency approval of projects with significant environmental effects.
5. Foster interagency coordination in the review of projects.
6. Enhance public participation in the planning process.

An EIR is the most comprehensive form of environmental documentation in CEQA; it is intended to provide an objective, factually supported analysis and full disclosure of the environmental consequences of a proposed project and its potential to result in significant, adverse environmental impacts.

An EIR is one of various decision-making tools used by a lead agency to consider the merits and disadvantages of a project that is subject to its discretionary authority. Before approving a proposed project, the lead agency must consider the information in the EIR; determine whether the EIR was prepared in accordance with CEQA and the CEQA Guidelines; determine that it reflects the independent judgment of the lead agency; adopt findings concerning the project's significant environmental impacts and alternatives; and adopt a statement of overriding considerations if significant impacts cannot be avoided.

1.3 Project Overview

Project Location

The Euclid Mixed Use Specific Plan Project (Project) is made up of 18 existing parcels totaling 84.1 acres in the City of Ontario (City). The City is located approximately 40 miles east of downtown Los Angeles, 20 miles west of downtown San Bernardino, and 7 miles northeast from the Orange County line.

Regional access to the Project site is provided by State Route 83 (SR-83; Euclid Avenue), which connects to State Route 60 (SR-60) and Interstate 10 (I-10) to the north; Interstate 15 (I-15) approximately 5.5 miles to the east; and State Route 71 (SR-71) approximately 4.3 miles to the west. SR-71 connects the Project to State Route 91 (SR-91) in unincorporated Riverside County.

The Project site is in the southwestern portion of the City, immediately east of the City of Chino in San Bernardino County. The proposed Project site is bounded by Schaefer Avenue on the north, Sultana Avenue on the east, Edison Avenue on the south, and Euclid Avenue on the west. The Assessor Parcel Numbers (APNs) for this Project are 1053-071-01, -02, -03, -04; 1053-211-01, -02, -05; 1053-281-01, -02, -03, -04, -05, -07, -08; 1053-081-01, -02, -03, -04.

Project Description

The proposed Project consists of a Specific Plan to allow for a business park and mixed-use development on 18 parcels covering 84.1 acres in the City. The development would include up to 290,110 square feet of commercial retail/office uses, up to 466 residential units, and approximately 1,386,777 square feet of

business park uses, and associated on-site and off-site infrastructure improvements, as described further below. The Project site is anticipated to be developed in two phases within five planning areas (PAs), with only Phase I proposed at a project-level entitlement.

Phase I would include PAs 1, 2A, and 3A, proposing the construction of up to 13 buildings. The 13 Phase I buildings would provide up to 1,473,026 square feet of business park and commercial retail/office mixed uses (the maximum development allowed in the proposed Specific Plan). A conceptual site plan for Phase I envisions a less dense site, at approximately 1,000,595 square feet of development (depicted in ***Figure 3-6: Phase I Conceptual Site Plan***). However, the EIR conservatively evaluates the maximum development potential for Phases I and II as permitted in the proposed Specific Plan. Note that the applicant intends to process a Development Plan and Tentative Parcel Map for the Phase I Project following processing of the Project Specific Plan. Phase I is expected to start construction in 2024, with an anticipated opening year in 2032.

The EIR also evaluates, at a "programmatic" level, potential future development of Phase II, comprised of PA 2B and PA 3B. Phase II is being evaluated at the programmatic level for a number of reasons, consistent with CEQA Guidelines Section 15168 (Program EIR). These reasons include: 1) the Applicant does not own the parcels within the Phase II area (PA 2B and PA 3B); 2) the Applicant does not have access to the Phase II area; 3) no specific development proposals have been identified for the Phase II area at this time; and 4) the Phase II area will be developed at an unknown, later date following Phase I. Therefore, this EIR appropriately evaluates the Phase II area at a programmatic level. Consistent with TOP 2050, the Specific Plan proposes the Phase II area with a maximum development potential of 203,861 square feet of business park uses, in addition to up to 466 dwelling units.

Combined, the Phase I and Phase II portions of the Specific Plan would allow up to 1,676,887 square feet of non-residential business park and commercial retail/office mixed uses in addition to up to 466 residential units, as shown in ***Table 3-1: Maximum Project Buildout***.

1.4 Unavoidable Significant Impacts

The Project's potentially significant impacts are defined in ***Section 4.1: Aesthetics*** through ***Section 4.17: Utilities and Service Systems*** of this Draft EIR. As noted in these sections, most of the potentially significant impacts identified can be mitigated to a less than significant level through implementation of Project design features, standard conditions, and feasible mitigation measures. There are unavoidable significant impacts associated with Agriculture and Forestry Resources, Air Quality, Biological Resources, Cultural Resources, Geology and Soils, GHG emissions, and Hazards and Hazardous Materials.

1.5 Summary of Project Alternatives

The CEQA Guidelines (Section 15126.6[a]) state that an EIR must address "a range of reasonable alternatives to the project, or to the location of the project, which could feasibly attain the basic objectives of the Project, but would avoid or substantially lessen any of the significant effects of the project and evaluate the comparative merits of the alternatives." The alternatives were based, in part, on their potential ability to reduce or eliminate the impacts determined to be significant and unavoidable for the proposed project. The following three alternatives have been determined to represent a reasonable range

of alternatives which have the potential to feasibly attain most of the basic objectives of the Project, but which may avoid or substantially lessen any of the significant effects of the Project. These alternatives are analyzed in detail in ***Section 6.0: Alternatives*** to the Project, of this Draft EIR.

- No Project/No Build Alternative
- No Project/Existing General Plan Alternative
- Reduced Intensity Alternative

An EIR must identify an "environmentally superior" alternative, and where the No Project Alternative is identified as environmentally superior, the EIR is then required to identify as environmentally superior an alternative from among the others evaluated. Each alternative's environmental impacts are compared to the proposed project and determined to be environmentally superior, neutral, or inferior. However, only impacts found significant and unavoidable are used in making the final determination of whether an alternative is environmentally superior or inferior to the proposed project. Impacts involving agricultural resources, air quality, cultural resources, and greenhouse gas emissions were found to be significant and unavoidable. ***Section 6.6: Environmentally Superior Alternative*** identifies the environmentally superior alternative.

Alternative 1: No Project/No Build Alternative

State CEQA Guidelines Section 15126.6, requires an evaluation of the "No Project" alternative for decision-makers the ability to compare the impacts of approving the Project with impacts or not approving the Project, thus leaving the Project site in its current developed condition. The No Project analysis is required to discuss the existing conditions as they were at the time of publication of the Notice of Preparation (February 10, 2023) and analyze the potential impacts of the Project site if the land were to continue under applicable existing plans, policies, and designations. Alternative 1: No Project/No Build Alternative (Alternative 1) assumes that the Project would not be developed, and no new development would occur; however, the existing conditions would remain in operation. The existing environmental conditions would not be necessarily preserved, as some form of redevelopment of the site for future business park and mixed-use development could still occur pursuant to The Ontario Plan 2050.

Alternative 2: No Project/Existing General Plan Alternative

Under the No Project/Existing General Plan Alternative, the current General Plan land uses, and zoning would remain in effect. Development in accordance with the existing General Plan and zoning would occur. According to Exhibit LU-01: Land Use Plan of The Ontario Plan 2050[1], the Project site is currently designated for development of Business Park (BP) (0.6 FAR) and Mixed-Use (MU) at 14.0 to 65.0 du/ac; 1.5 FAR office; 1.0 FAR retail. The existing zoning designation is Specific Plan (SP) Zoning District with an Agricultural (SP AG) Overlay.[2] The SP District designation requires approval of a specific plan by the City

[1] City of Ontario. 2022. *LU-01 TOP 2050 Land Use Map*. https://experience.arcgis.com/experience/99e7a1effa0242218701ac06ca387f9b. (accessed October 2022).
[2] City of Ontario. 2022. *Zoning Map*. https://www.ontarioca.gov/sites/default/files/Ontario-Files/Planning/Zoning%20Map/Zoning_20220415_Rev1.pdf. (accessed March 2023).

for urban development of the Project site. The Specific Plan will be the zoning for the Project site, consistent with TOP 2050.

The proposed Project's FARs are within what is allowed in TOP 2050; as such, the No Project/Existing General Plan Alternative under TOP 2050 would generate approximately 1,386,777 square feet of business park development, 290,110 square feet of commercial retail/office uses, up to 466 residential units, 1,655 employees, and 1,571 residents. Additionally, the southern portion of the Project site is within the Great Park Corridor. Sites within the Great Park Corridor are currently zoned Specific Plan (SP) Zoning District with an Agricultural Overlay (SP-AG), but no specific plan has been adopted, and they will be rezoned to SP-AG Affordable Housing (AH) for inclusion in the Affordable Housing Overlay District described within the City's Housing Element.[3] The SP-AG-AH Overlay will establish a minimum density of 20 du/ac, and allow the TOP 2050 designation to govern the maximum densities for each site. The Agriculture Overlay District will remain in place until the parcel is ready for development consistent with the TOP 2050 and Affordable Housing Overlay District. Property owners and developers alike have expressed interest in redeveloping this area, so existing agricultural operations are not expected to limit development potential. Sites in this area would have TOP 2050 designations of Medium Density Residential and Mixed-Use. Medium-Density Residential will allow a range of 20-30 du/ac for projects with at least 25 percent of units being affordable to lower incomes, and a range of 20-25 du/ac for all other projects. Two different MU areas are proposed in this opportunity area, Mixed-Use Eucalyptus/Chino Airport (MU-EU) allowing 20-45 du/ac and Mixed-Use Great Park allowing 20-65 du/ac. With the TOP 2050 and zoning changes noted in Program 13, all sites identified support densities necessary to facilitate lower- and moderate-income housing development.[4]

Alternative 3: Reduced Intensity Alternative

The Reduced-Intensity Alternative proposes a 25 percent reduction in building area of the proposed mixed-use and business park uses. Under this alternative, a total of 1,040,083 square feet of business park uses, and 217,582 square feet of commercial retail/office uses, and up to and approximately 350 residential units. The development impact area would generally remain the same as the Project. This alternative would generate approximately 1,242 employees. Access to the site would be similar to the Project with a reduction in the number of parking spaces. Given the infrastructure costs, including off-site improvements, a 25 percent reduction was considered aggressive and further reduction is likely not financially feasible.

Environmentally Superior Alternative

State CEQA Guidelines requires that an Environmentally Superior Alternative be identified; that is, an alternative that would result in the fewest or least significant environmental impacts. The No Project Alternative is the Environmentally Superior Alternative because it would avoid many of the proposed Project's impacts. If the No Project Alternative is the environmentally superior Alternative, CEQA Guidelines § 15126.6(e)(2) requires that another alternative that could feasibly attain most of the Project's basic objectives be chosen as the Environmentally Superior Alternative. Therefore, in compliance with

[3] City of Ontario. 2022. *TOP 2050, Housing Element, page H-282*. https://www.ontarioca.gov/about-ontario-ontario-plan-policy-plan/housing. (accessed July 2023).
[4] Ibid.

CEQA requirements, this Draft EIR also identifies an environmentally superior alternative among the other alternatives. Based on analysis conducted in ***Section 6.0: Alternatives***, Alternative 3 was chosen as the Environmentally Superior Alternative. These alternatives are further discussed in ***Section 6.0: Alternatives***.

1.6 Issues to be Resolved

Section 15123(b)(3) of the CEQA Guidelines requires that an EIR contain issues to be resolved, including the choice among alternatives and whether or how to mitigate significant impacts. With regard to the Project, the major issues to be resolved include decisions by the lead agency as to:

1. Whether this Draft EIR adequately describes the environmental impacts of the Project.
2. Whether the benefits of the Project override those environmental impacts which cannot be feasibly avoided or mitigated to a level of insignificance.
3. Whether the proposed land use changes are compatible with the character of the existing area.
4. Whether the identified goals, policies, or mitigation measures should be adopted or modified.
5. Whether there are other mitigation measures that should be applied to the Project besides the Mitigation Measures identified in the Draft EIR.
6. Whether there are any alternatives to the Project that would substantially lessen any of the significant impacts of the Project and achieve most of the basic Project objectives.

1.7 Areas of Controversy

The CEQA Guidelines Section 15123 (b)(2) and (3) require that a Draft EIR identify areas of controversy known to the Lead Agency, including issues raised by other agencies and the public and issues to be resolved, including the choice among alternatives and whether, or how to mitigate the significant effects. The issues of concern have been identified during the review period of the distribution of the NOP (from February 10, 2023, to March 13, 2023) and public meetings (public scoping meeting was held during the 30-day public review period, on February 22, 2023, at 5:30 PM via Zoom). A summary of comments received on the NOP are provided in ***Table 2-1: NOP Written Comments Summary***. The table provides references to the sections of the Draft EIR in which these issues are evaluated. No other areas of controversy are known to the Lead Agency.

1.8 Summary of Environmental Impacts & Mitigation Measures

The following table is a summary of significant impacts and proposed mitigation measures associated with the Project as identified in this EIR. Refer to ***Sections 4.1*** through ***4.17***, for a detailed description of the environmental impacts and mitigation measures for the Project. Impacts are identified as significant or less than significant, and mitigation measures are identified for all significant impacts. The level of significance after implementation of the mitigation measures is also presented. Impacts not represented in this table are found in ***Section 7.0: Effects Found Not to be Significant*** in this Draft EIR.

Table 1-1: Summary of Significant Impacts and Proposed Mitigation Measures

Resource Impact	Level of Significance	Mitigation Measure(s)
Section 4.2: Agriculture and Forestry Resources		
Impact 4.2-1 Would the Project convert Prime Farmland, Unique Farmland, or Farmland of Statewide Importance (Farmland), as shown on the maps prepared pursuant to the Farmland Mapping and Monitoring Program of the California Resources Agency, to non-agricultural use?	Significant and Unavoidable	**MM AG-1** Deed disclosure – In order to reduce conflicts issued between sensitive receptors and agricultural uses, all property owners in the Euclid Mixed Use Specific Plan shall be provided with a deed disclosure or similar notice approved by the City Attorney regarding the proximity and nature of neighboring agricultural uses. This disclosure shall be applied at the tentative map stage to the affected properties, or otherwise prior to finalizing the sale or rental agreement of any property. The written disclosure shall be supplied to the property purchaser or renter by the vendor or vendor's agent. The content and text of the disclosure shall be approved by the City Attorney and shall include language to inform new residents that existing agricultural uses may create nuisances such as flies, odors, dust, night-light, and chemical spraying.
Impact 4.2-5 Would the Project Involve other changes in the existing environment which, due to their location or nature, could result in conversion of Farmland, to non-agricultural use or conversion of forest land to non-forest use?	Significant and Unavoidable	Refer to **MM AG-1**.
Section 4.3: Air Quality		
Impact 4.3-1 Would the Project conflict with or obstruct implementation of the applicable air quality plan?	Significant and Unavoidable Impact	**MM AQ-1** The Project shall utilize "Super-Compliant" low VOC paints which have been reformulated to exceed the regulatory VOC limits (i.e., have a lower VOC content than what is required) put forth by SCAQMD's Rule 1113 for all architectural coatings. Super-Compliant low VOC paints shall be no more than 10g/L of VOC. Prior to issuance of a building permit, the Ontario Building and Safety Department shall confirm that plans specify that all architectural coatings will be super-compliant low VOC paints. **MM AQ-2** Only electric-powered off-road equipment (e.g., yard trucks/hostlers, forklifts, indoor material handling equipment, etc.) shall be utilized onsite for daily warehouse and business operations. The Project developer/facility owner shall disclose this requirement to all tenants/business entities prior to the signing of any lease agreement. In addition, the limitation to use only electric-powered off-road equipment shall be included in all leasing agreements. Prior to issuance of a Business License for a new tenant/business entity, the Project developer/facility owner and tenant/business entity shall provide to the City of Ontario Planning Department and Business License Department a signed document (verification document) noting that the Project development/facility owner has disclosed to the tenant/business entity the requirement to use only electric-powered equipment for daily operations. This verification document shall be signed by authorized agents for the Project developer/facility owner and tenant/business

Resource Impact	Level of Significance	Mitigation Measure(s)
		entities. In addition, if applicable, the tenant/business entity shall provide documentation (e.g., purchase or rental agreement) to the City of Ontario Planning Department and Business License Department to verify, to the City's satisfaction, that any off-road equipment utilized will be electric-powered. Prior to the issuance of building permits, the City of Ontario Building Department shall confirm that if emergency generators are proposed, the Project applicant shall explore non-diesel options. If non-diesel generators are determined to not be feasible due commercial availability or the energy requirements of the project, the Project applicant shall provide written justification to be approved by the City's Building Department. **MM AQ-3** Prior to issuance of occupancy permits, the Project operator shall prepare and submit a Transportation Demand Management (TDM) program detailing strategies that would reduce the use of single occupant vehicles by employees by increasing the number of trips by walking, bicycle, carpool, vanpool and transit. The TDM shall include, but is not limited to the following: ▪ Provide a transportation information center and on-site TDM coordinator to educate residents, employers, employees, and visitors of surrounding transportation options; ▪ Promote bicycling and walking through design features such as showers for employees, self-service bicycle repair area, etc. around the Project site; ▪ Provide on-site car share amenities for employees who make only occasional use of a vehicle, as well as others who would like occasional access to a vehicle of a different type than they use day-to-day; ▪ Promote and support carpool/vanpool/rideshare use through parking incentives and administrative support, such as ride-matching service; and ▪ Incorporate incentives for using alternative travel modes, such as preferential load/unload areas or convenient designated parking spaces for carpool/vanpool users. **MM AQ-4** Prior to the issuance of a building permit, the Planning Department shall confirm that the Project is designed to include the following: ▪ The buildings' electrical room shall be sufficiently sized to hold additional panels that may be needed to supply power for the future installation of electric vehicle (EV) truck charging stations on the site. Conduit should be installed from the electrical room to tractor trailer parking spaces in a logical location(s) on the site determined by the Project Applicant during construction

Resource Impact	Level of Significance	Mitigation Measure(s)
		document plan check, for the purpose of accommodating the future installation of EV truck charging stations at such time this technology becomes commercially available and the buildings are being served by trucks with electric-powered engines. **MM AQ-5** All truck access gates and loading docks within the Project site shall have a sign posted that states: ▪ Truck drivers shall turn off engines when not in use. ▪ Truck drivers shall shut down the engine after five minutes of continuous idling operation (pursuant to Title 13 of the California Code of Regulations, Section 2485). Once the vehicle is stopped, the transmission is set to "neutral" or "park," and the parking brake is engaged. ▪ Telephone numbers of the building facilities manager and CARB to report violations. ▪ Truck travel is restricted to truck routes identified in Figure M-04 of the Mobility Element in TOP 2050. In addition, signage shall be installed to direct trucks to the appropriate designated truck routes. **MM AQ-6** The installation of wood-burning and natural gas equipment shall be prohibited. The purpose of this measure is to limit emissions of ROG, CO, particulate matter, and visible emissions from wood-burning and natural gas devices used for primary heat, supplemental heat, or ambiance. This prohibition shall be noted on the deed and/or lease agreements for future property owners/tenants to obey. **MM AQ-7** The installation of cold storage logistics (warehouse) space is prohibited. Should cold storage logistics (warehouse) space be considered in the future, a separate discretionary approval would be required.
Impact 4.3-2 Would the proposed project, result in a cumulatively considerable net increase of any criteria pollutant for which the project region is non-attainment under an applicable federal or state ambient air quality standard?	Significant and Unavoidable Impact	Refer to **MM AQ-1** through **MM AQ-7**.
Impact 4.3-3 Would the proposed project expose sensitive receptors to substantial pollutant concentrations?	Less Than Significant with Mitigation Incorporated	Refer to **MM AQ-1** through **MM AQ-7**. **MM AQ-8** Prior to issuance of grading permits, the applicant shall prepare and submit documentation to the City of Ontario that demonstrate that all off-road diesel-powered construction equipment greater than 50 horsepower meets California Air Resources Board Tier 4 Final off-road emissions standards. Requirements for Tier 4 Final equipment shall be included in applicable bid documents and successful contractor(s) must demonstrate the ability to supply such equipment. A copy of each unit's Best Available Control Technology (BACT)

Resource Impact	Level of Significance	Mitigation Measure(s)
		documentation (certified tier specification or model year specification), and CARB or SCAQMD operating permit (if applicable) shall be provided to the City at the time of mobilization of each applicable unit of equipment.
Section 4.4, Biological Resources		
Impact 4.4-1 Would the Project have a substantial adverse effect, either directly or through habitat modifications, on any species identified as a candidate, sensitive, or special status species in local or regional plans, policies, or regulations, or by the California Department of Fish and Wildlife or U.S. Fish and Wildlife Service?	Less than Significant with Mitigation Incorporated (Phase I Project) and Significant and Unavoidable (Phase II Only)	**MM BIO-1 Nesting Bird and Raptor Preconstruction Survey.** Regulatory requirement for potential direct/indirect impacts to nesting common and sensitive bird and raptor species will require compliance with the CDFG Code Section 3503. Construction outside the nesting season (between September 1st and January 31st) do not require pre-removal nesting bird surveys. If construction is proposed during nesting season (February 1st and August 31st), a qualified biologist will conduct a nesting bird survey(s) no more than three (3) days prior to initiation of grading to document the presence or absence of nesting birds within or directly adjacent (200 ft -500 ft for raptors) to the Project site. The survey(s) will focus on identifying any raptors and/or bird nests that are directly or indirectly affected by construction activities. If active nests are documented, the qualified biologist will prepare and implement specific measures to prevent abandonment of the active nest. At a minimum, grading in the vicinity of a nest will be postponed until the young birds have fledged. The perimeter of the nest setback zone will be fenced or adequately demarcated with stakes and flagging at 20-foot intervals, and construction personnel and activities will be restricted from the area. The biologist shall establish a no-disturbance buffer around each active nest. The buffer area will be determined by the biologist based on the species present, surrounding habitat, and type of construction activities proposed in the area. The survey report will be submitted by the qualified biologist to the City of Ontario for review and approval prior to initiation of grading in the nest-setback zone. Additionally, the qualified biologist will serve as a construction monitor during those periods when construction activities occur near active nest areas to ensure that no inadvertent impacts on these nests occur. A final monitoring report of the findings, prepared by a qualified biologist, will be submitted to the City of Ontario documenting compliance with the CDFG Code. Any nest permanently vacated for the season would not warrant protection pursuant to the CDFG Code. **MM BIO-2 Focused Bat Survey.** Prior to implementation of Project activities, a qualified biologist shall be retained to determine whether potential roosting sites for bats may be affected. For large ornamental trees suitable for bat roosting/nursery, exit counts and acoustic surveys shall be performed prior to initial ground disturbance, vegetation or structure removal to determine whether the Project Site and a 300-foot buffer supports a nursery or roost, and by which species. This work will occur between late -spring and late summer and/or in the fall (generally mid-March through late October). If the results of the bat survey find a total of a single roosting individual of a special status bat species or 25 or more individuals of a non-special status bat species with

Resource Impact	Level of Significance	Mitigation Measure(s)
		potential to be present in the Project Site (i.e., western Mastiff bat, big free-tailed bat, or pallid bat), a Bat Management Plan shall be developed to ensure mortality to bats does not occur. For each location confirmed to be occupied by bats, the plan will provide details both in text and graphically where exclusion devises/and or staged tree removal will need to occur, the timing for exclusion work and the timeline and methodology needed to exclude the bats. The plan will need to be reviewed and approved by CDFW prior to disturbance of the root(s). **MM BIO-3 Focused and Preconstruction Burrowing Owl Surveys.** Focused surveys for burrowing owl will be conducted in accordance with the March 7, 2022, CDFG staff report on Burrowing Owl Mitigation. Specifically, A total of 4 surveys will be conducted: 1) at least one site visit between February 15th and April 15th, and 2) a minimum of three (3) surveys, at least three weeks apart, between April 15th and July 15th, with at least one visit after June 15th. A report of the findings prepared by a qualified biologist shall be submitted to the City of Ontario prior to any permit or approval for ground disturbing activities. A 14-day burrowing owl preconstruction survey will also be conducted immediately prior to the initiation of ground-disturbing construction to ensure protection for this species. The survey will be conducted in compliance with CDFW guidelines (CDFW 2012). A report of the findings prepared by a qualified biologist shall be submitted to the City of Ontario prior to any permit or approval for ground disturbing activities. If burrowing owls are detected on-site during the focused surveys or 14-day preconstruction survey efforts, during the breeding season (February 1st to August 31st) then construction activities shall be limited to beyond 300 feet of the active burrows until a qualified biologist has confirmed that nesting efforts are compete or not initiated. In addition to monitoring breeding activity, if construction is proposed to be initiated during the breeding season or active relocation is proposed, a burrowing owl relocation plan will be developed and approved by the City of Ontario, CDFW and USFWS. **MM BIO-4 Programmatic Assessment Area CEQA Analysis.** The Programmatic Assessment Area located within the southwest region of the Specific Plan Boundary, including APN's 1053-281-01, -02, -03, -04, -05, 07 and – 08, was not evaluated for biological resources as part of this analysis. To ensure that potential adverse effects to sensitive species and resources are reduced to a less than significant level, a focused biological resources assessment and impact analysis shall be conducted in the un-surveyed portion of the Specific Plan Boundary prior to approval of development within this region. In addition to completing CEQA review, any focused surveys and required mitigation measures shall be implemented prior to project approval and initiation of construction.
Impact 4.4-2	Less than Significant with Mitigation Incorporated	Refer to **MM BIO-4.**

Resource Impact	Level of Significance	Mitigation Measure(s)
Would the Project have a substantial adverse effect on any riparian habitat or other sensitive natural community identified in local or regional plans, policies, regulations or by the California Department of Fish and Wildlife or U.S. Fish and Wildlife Service?	(Phase I Project) and Significant and Unavoidable (Phase II Only)	
Impact 4.4-3 Would the Project have a substantial adverse effect on state or federally protected wetlands (including, but not limited to, marsh, vernal pool, coastal, etc.) through direct removal, filling, hydrological interruption, or other means?	Less than Significant (Phase I Project) and Significant and Unavoidable (Phase II Only)	Refer to **MM BIO-4**.
Impact 4.4-4 Would the Project interfere substantially with the movement of any native resident or migratory fish or wildlife species or with established native resident or migratory wildlife corridors, or impede the use of native wildlife nursery sites?	Less than Significant with Mitigation Incorporated (Phase I Project) and Significant and Unavoidable (Phase II Only)	Refer to **MM BIO-1** and **MM BIO-4.**
Impact 4.4-5 Would the Project conflict with any local policies or ordinances protecting biological resources, such as a tree preservation policy or ordinance?	Less than Significant with Mitigation Incorporated (Phase I Project) and Significant and Unavoidable (Phase II Only)	**MM BIO-5** **Tree Inventory.** Prior to implementation of Project site clearing or grading, a qualified biologist shall provide a tree inventory to ensure compliance with Ontario MC Section 6.05.020, Tree Preservation Policy and Protection Measures. Healthy Heritage Trees that are approved for removal shall be replaced with new trees with a total trunk diameter equal to the tree(s) removed, or as deemed appropriate by the Approving Authority based on lot size and available planting space. Replacement trees are to be in addition to the quantity of trees required for landscaping. The Approving Authority is responsible for reviewing the landscape plan and approving appropriate species for tree replacement (The Ontario Plan 2050).
Section 4.5: Cultural Resources		
Impact 4.5-1 Would the Project cause a substantial adverse change in the significance of a historical resource pursuant to Section 15064.5?	Significant and Unavoidable	**MM CUL-1** Prior to issuance of a demolition building permit, every effort shall be made to relocate the Milk Parlor (front portion). The building shall be offered at no cost for those who can relocate off site. Advertisements notifying the public of the opportunity to relocate the building shall be placed for a minimum of 30 days: on-site with temporary signage, in at least three local publications (newspapers, magazines, local organization newsletters), and on local bulletin boards. **MM CUL-2** Full documentation, including but not limited to as built drawing, historical narrative and Historic American Building Survey (HABS) photographs, of the historic resource pursuant to HABS Level 3 standards shall be submitted to the Planning Department for subsequent release to the Ovitt Family Community Library, Model Colony History Room prior to issuance of demolition building permit. **MM CUL-3** A mitigation fee pursuant to Section 7.01.030 of the Ontario Development Code shall be paid to the Planning Department prior to issuance of

Resource Impact	Level of Significance	Mitigation Measure(s)
		building permit for demolition. Mitigation fee is equal to 30% of the price per square foot construction cost as established in the most current International Code Council Building Valuation Data. The fee amount will be provided by the Planning Department at the time of payment. Funds will be deposited into the City's Historic Preservation Trust Fund. **MM CUL-4** A determination whether items within or on the resource should be salvaged shall be made by the Planning Department. The applicant shall be responsible for the removal, relocation and donation of such items selected for salvaging. An inventory of salvaged items shall be provided by the applicant to the Planning Department prior to be to issuance of building permit. **MM CUL-5** The applicant shall obtain a building permit prior to any demolition, relocation, or construction. **MM CUL-6** Develop a historic context report for significant persons in the dairy farm industry such as the Grant family. **MM CUL-7** Conduct a comparative study of other dairy areas within California such as the San Joaquin Valley, Arcata Bottoms in Humboldt County, and the Fresno region to further understand the significance of dairy farming at a local, regional, and statewide level. **MM CUL-8** Produce a short video documentary on the operations of a functioning dairy located within the Ontario Ranch area. The 12-15 minute documentary should focus on the dairy history, themes, site, building, and stories gathered from new and archived oral interviews, dairy context and recent dairy surveys.
Impact 4.5-2 Would the Project cause a substantial adverse change in the significance of an archaeological resource pursuant to § 15064.5?	Less Than Significant with Mitigation Incorporated	**MM CUL-9** Prior to the issuance of any grading permits for the Project area, a Cultural Awareness Training Program shall be provided to all construction managers and construction personnel prior to commencing any ground disturbance work within the Project area. The training shall be prepared and conducted by a Qualified Archaeologist to the satisfaction of the City Planning Department. The training may be discontinued when ground disturbance is completed. Construction personnel shall not be permitted to operate equipment within the construction area unless they have attended the training. A copy of the training transcript and/or training video, as well as a list of the names of all personnel who attended the training and copies of the signed acknowledgment forms shall be submitted to the City Planning Department for their review and approval. **MM CUL-10** Should any cultural resources be discovered during Project implementation; the City Planning Department and a Qualified Archaeologist shall be notified to assess the nature and significance of the find. Should any cultural resources be deemed significant, the Qualified Archaeologist shall draft a treatment plan for review and approval by the City Planning Department. Tribes listed on the City's contact list for the Project shall be notified of any significance discovery that is Native American in origin and be given the opportunity to comment on the treatment plan prior to implementation. All final site records, reports, etc.

Resource Impact	Level of Significance	Mitigation Measure(s)
		associated with the discovery, evaluation, and treatment of cultural resources discovered during Project implementation shall be submitted to the South-Central Coastal Information Center (SCCIC).
Section 4.7: Geology and Soils		
Impact 4.7-3 Would the Project result in substantial soil erosion or the loss of topsoil?	Less than Significant with Mitigation Incorporated (Phase I Project) and Significant Unavoidable (Phase II Only)	**MM GEO-1** As specified in the Preliminary Geotechnical Investigation & Organic Soil/Manure Evaluation Report for the Euclid Mixed Use Specific Plan Project by Converse Consulting, cut/fill transitions should be eliminated from all level portions of the building pad areas. This should be accomplished by over excavating the entire "cut" portion of the building pad area by at least 5.0 feet below proposed grade and replacing the excavated materials as properly compacted fill, so that all footings for structures and walls are founded into engineered fill with a minimum of 3.0 feet of fill below footings for proposed structures and 2.0 feet below footings for proposed walls. No fill should be placed until excavations and/or natural ground preparation have been observed by the geotechnical consultant. The native soils encountered within the project sites are generally considered suitable for re-use as compacted fill. Excavated soils should be processed, including removal of roots and debris, removal of oversized particles, mixing, and moisture conditioning, before placing as compacted fill. On-site soils used as fill should meet the following criteria. ▪ No particles larger than 8 inches in largest dimension. ▪ Rocks larger than 4 inches should not be placed within the upper 12 inches of subgrade soils. ▪ Free of all significant organic matter, debris, or other deleterious material. ▪ Expansion index of 50 or less. ▪ Sand Equivalent greater than 15 (greater than 30 for pipe bedding). ▪ Contain less than 30 percent by weight retained in 3/4-inch sieve. ▪ Contain less than 40 percent fines (passing #200 sieve).
Impact 4.7-5 Would the Project be located on expansive soil, as defined in Table 18-1-B of the Uniform Building Code (1994), creating substantial direct or indirect risks to life or property?	Less than Significant with Mitigation Incorporated (Phase I Project) and Significant Unavoidable (Phase II Only)	**MM GEO-2** Stockpiled fill soils would be placed in deeper fills (at least 5 feet below proposed grade), landscaped areas, or non-structural fills, or blended with sandier soils on site outside of the subject fill stockpile in order to reduce the expansion potential of the stockpiled soils. The expansion potential of the finish-grade soils shall be tested at grading completion. Slabs-on-grade shall have a minimum thickness of 5 inches for support of nominal live loads and be reinforced with No. 3 bars spaced 24 inches or less on-centers both ways. Slab reinforcement shall be supported on concrete chairs so that the desired placement is properly placed per the design engineer. Structural design elements of slabs-on-grade, including but not limited to thickness, reinforcement, and joint spacing of more heavily loaded slabs shall be dependent upon the anticipated

Resource Impact	Level of Significance	Mitigation Measure(s)
		loading conditions and the modulus of subgrade reaction (200kcf) of the supporting materials and shall be designed by a structural engineer. Subgrade for slabs-on-grade shall be firm and uniform. All loose or disturbed soils, including under-slab utility trench backfill shall be recompacted. Prior to placing concrete, the subgrade soils below all floor slabs shall be pre-watered to achieve a moisture content that is equal to 100 percent of the optimum moisture content of the subgrade soils. The moisture content should penetrate to a minimum depth of 12 inches. This should promote uniform curing of the concrete and minimize the development of shrinkage cracks. **MM GEO-3** **Corrosive Materials**. Prior to issuance of a building permit, the Director of the City Public Works Department, or designee, shall verify that the Project Applicant/Developer has retained the services of a licensed corrosion engineer to provide detailed corrosion protection measures. Where steel may come in contact with on-site soils, project construction shall include the use of steel that is protected against corrosion. Corrosion protection may include, but is not limited to, sacrificial metal, the use of protective coatings, and/or cathodic protection. Additional site testing and final design evaluation regarding the possible on-site presence of significant volumes of corrosive soils shall be performed by the Project Geotechnical Consultant to refine and enhance these recommendations. On-site inspection during grading shall be conducted by a qualified corrosion consultant and City of Director of Public Works/City Engineer, or designee, to ensure compliance with geotechnical specifications as incorporated into Project plans.
Impact 4.7-7 Would the Project directly or indirectly destroy a unique paleontological resource or site or unique geologic feature?	Less than Significant with Mitigation Incorporated	**MM GEO-4** In areas of documented or inferred archaeological and/or paleontological resource presence, City staff shall require applicants for development permits to provide studies to document the presence/absence of such resources. On properties where resources are identified, such studies shall provide a detailed mitigation plan based on the recommendations of a qualified cultural preservation expert. Additionally, a paleontological resource monitoring plan (PRMP) would be prepared and implemented. Periodic paleontological spot checks would be conducted when excavation exceeds depths of 5 feet to determine if older, paleontologically sensitive sediments are present. If present, monitoring would be implemented. Prior to the start of construction, a paleontological resource monitoring plan (PRMP) would be prepared and implemented. The Project's PRMP would implement the following procedures: ▪ A trained and qualified paleontological monitor would perform spot-check and/or monitoring of any excavations on the Project that have the potential to impact paleontological resources in undisturbed native sediments below five feet in depth. The monitor would have the ability to redirect construction activities to ensure avoidance of adverse impacts to paleontological resources.

Resource Impact	Level of Significance	Mitigation Measure(s)
		▪ The Project paleontologist may re-evaluate the necessity for paleontological monitoring after examination of the affected sediments during excavation, with approval from Lead Agency and Client representatives. ▪ Any potentially significant fossils observed shall be collected and recorded in conjunction with best management practices and Society of Vertebrate Paleontology professional standards. ▪ Any fossils recovered during mitigation shall be deposited in an accredited and permanent scientific institution for the benefit of current and future generations. ▪ A report documenting the results of the monitoring, including any salvage activities and the significance of any fossils, shall be prepared and submitted to the appropriate personnel.
Section 4.8: Greenhouse Gas Emissions		
Impact 4.8-1 Would the Project generate GHG emissions, either directly or indirectly, that could have a significant impact on the environment?	Less than Significant with Mitigation Incorporated	Refer to **MM AQ-2** through **AQ-6** in ***Section 4.3: Air Quality***. **MM GHG-1** Project development proposals with building permit applications on file with the City shall implement Screening Table Measures that achieve at least 100 points per the Screening Tables. The City shall verify that Screening Table Measures achieving the 100-point performance standard are incorporated in development plans prior to the issuance of building permit(s) and/or site plans (as applicable). The City shall verify implementation of the selected Screening Table Measures prior to the issuance of Certificate(s) of Occupancy. At the discretion of the City, measures that provide GHG reductions equivalent to GHG emissions reductions achieved via the Screening Table Measures may be implemented. Multiple development proposals may, at the discretion of the City, be allowed to collectively demonstrate achievement of at least 100 points per the Screening Tables.
Impact 4.8-2 Would the Project conflict with an applicable plan, policy, or regulation of an agency adopted for the purpose of reducing GHG emissions?	Significant and Unavoidable Impact	Refer to **MM AQ-2** through **MM AQ-6** in ***Section 4.3: Air Quality*** and **MM GHG 1** (refer to Impact Threshold 4.8-1).
Section 4.9-1: Hazards and Hazardous Materials		
Impact 4.9-1 Would the Project create a significant hazard to the public or the environment through the routine transport, use, or disposal of hazardous materials?	Less Than Significant with Mitigation Incorporated (Phase I Project) and Significant and Unavoidable (Phase II Only)	**MM HAZ-1** **Construction period testing.** Construction at the Project site shall be conducted under a Project-specific Construction Risk Management Plan (CRMP) to protect construction workers, the general public, and the environment from subsurface hazardous materials previously identified and to address the possibility of encountering unknown contamination or hazards in the subsurface. The CRMP shall summarize soil and groundwater analytical data collected on the Project sites during past investigations and during site investigation activities;

Resource Impact	Level of Significance	Mitigation Measure(s)
		delineate areas of known soil and groundwater contamination, if applicable; and identify soil and groundwater management options for excavated soil and groundwater, in compliance with local, state, and federal statutes and regulations. The CRMP shall: ▪ Provide procedures for evaluating, handling, storing, testing, and disposing of soil and groundwater during Project excavation and dewatering activities, respectively. ▪ Require the preparation of a Project-specific Health and Safety Plan that identifies hazardous materials present, describes required health and safety provisions and training for all workers potentially exposed to hazardous materials in accordance with State and Federal worker safety regulations, and designates the personnel responsible for Health and Safety Plan implementation. ▪ Require the preparation of a contingency plan that shall be applied should previously unknown hazardous materials be encountered during construction activities. The contingency plan shall include provisions that require collection of soil and/or groundwater samples in the newly discovered affected area by a qualified environmental professional prior to further work, as appropriate. The analytical results of the sampling shall be reviewed by the qualified environmental professional and submitted to the appropriate regulatory agency. The environmental professional shall provide recommendations, as applicable, regarding soil/waste management, worker health and safety training, and regulatory agency notifications, in accordance with local, state, and federal requirements. Work shall not resume in the area(s) affected until these recommendations have been implemented under the oversight of the County or regulatory agency, as appropriate. ▪ Designate personnel responsible for implementation of the CRMP. The CRMP shall be submitted to the County for review and approval prior to the issuance of construction and demolition permits. **MM HAZ-2** **Soil Management Plan.** Prior to issuance of a grading permit, the Project applicant shall retain a qualified environmental consultant to prepare a Soil Management Plan that details procedures and protocols for on-site management of soils containing potentially hazardous materials. The SMP would be implemented during grading activities on-site to ensure that soils containing

Resource Impact	Level of Significance	Mitigation Measure(s)
		residual levels of hydrocarbons or arsenic are properly identified, monitored, and managed on-site, and include the following: ▪ A certified hazardous waste hauler shall remove all potentially hazardous soils. In addition, sampling of soil shall be conducted during excavation to ensure that all petroleum hydrocarbon and arsenic impacted soils are removed, and that Environmental Screening Levels (ESLs) for non-residential uses are not exceeded. Excavated materials shall be transported per California Hazardous Waste Regulations to a landfill permitted by the State to accept hazardous materials. ▪ Any subsurface materials exposed during construction activities that appear suspect of contamination, either from visual staining or suspect odors, shall require immediate cessation of excavation activities. Soils suspected of contamination shall be tested for potential contamination. If contamination is found to be present per the Department of Toxic Substances Control Screening Levels for industrial/commercial land use (DTSCSLi) and the U.S. EPA Regional Screening Levels for industrial/commercial land use (EPARSLi), it shall be transported and disposed of per state regulations to an appropriately permitted landfill. ▪ The SMP shall include a Health and Safety Plan (HSP) that addresses potential safety and health hazards and includes the requirements and procedures for employee protection; each contractor will be required to have their own HSP tailored to their particular trade that addresses the general project safety requirements. The HSP shall also outline proper soil handling procedures and health and safety requirements to minimize worker and public exposure to hazardous materials during construction. ▪ The SMP shall be prepared and executed in accordance with South Coast Air Quality Management District (SCAQMD) Rule 1166, Volatile Organic Compound Emissions from Decontamination of Soil. The SMP shall require the timely testing and sampling of soils so that contaminated soils can be separated from inert soils for proper disposal. The SMP shall specify the testing parameters and sampling frequency. Anticipated testing includes total petroleum hydrocarbons (TPH), volatile organic compounds (VOCs), and semi-volatile organic compounds (SVOCs). During excavation, Rule 1166 requires that soils identified as contaminated shall be sprayed with water or another

Resource Impact	Level of Significance	Mitigation Measure(s)
		approved vapor suppressant or covered with sheeting during periods of inactivity of greater than an hour, to prevent contaminated soils from becoming airborne. Under Rule 1166, contaminated soils shall be transported from the project site by a licensed transporter and disposed of at a licensed storage/treatment facility to prevent contaminated soils from becoming airborne or otherwise released into the environment. ▪ All SMP measures shall be printed on the construction documents, contracts, and project plans prior to issuance of grading permits. ▪ The SMP would also include procedures for the safe handling and transportation of soils on the Project Site that may impact sensitive receptors such as schools. **MM HAZ-3** Prior to the commencement of any construction-related site activities (clearing, demolition, grading etc.), all above-ground storage tanks (ASTs) and underground storage tanks (USTs) shall be removed. ASTs storing diesel shall be disposed of by a State of California licensed contractor and in compliance with the required San Bernardino County Fire Department (SBCFD) Hazardous Materials Division regulations for tank removals. For stained soils in the vicinity of diesel containing ASTs, as identified in the Phase I Environmental Site Assessment (ESA) dated July 29, 2021 soil samples shall be collected, as directed by the SBCFD inspector, for chemical analysis at a laboratory licensed by the State of California. If contaminated soils are encountered, a soil management plan shall be prepared to manage the stained soils during redevelopment. USTs shall be removed through reviewing available files at the SBCFD and ensuring the proper removal of the UST and a subsurface investigation to determine if the UST had impacted the subsurface. **MM HAZ-4** Prior to the issuance of grading permits, the Project applicant shall conduct testing for the presence of methane on the Project site, in accordance with DTSC methane assessment guidelines. The Project applicant shall prepare a methane gas soil survey and implement grading activity recommendations to the satisfaction of the City Building Department. This survey and recommendation shall include a post-construction soil gas investigation and installation of methane gas mitigation systems where post-grading methane levels exceed 5,000 ppmv, should any such levels occur. **MM HAZ-5** Following drainage of the on-site ponds, the Project applicant shall conduct a limited Phase II subsurface assessment of sediments to evaluate the sediments for chemical risks to human health and the environment. If contamination from dairy and animal-related wastes is encountered at a level above Environmental Screening Levels (ESLs) for non-residential uses, the appropriate

Resource Impact	Level of Significance	Mitigation Measure(s)
		environmental agency (Regional Water Quality Control Board, Department of Toxic Substance Control, South Coast Air Quality Management District) shall be notified. Any contamination identified as a result of such testing/sampling shall be investigated and removed or remediated to the satisfaction of the environmental agency and established Regional Screening Levels with evidence provided to the City, such that there are no residual significant impacts following mitigation. Prior to allowing the commencement of any soil removal or hauling activities at the Proposed Project, the City will review and/or evaluate potential air quality impacts (criteria pollutants and toxic air contaminants from equipment exhaust, earthmoving, and other on-site remedial activities, as applicable) to verify that impacts are properly assessed and disclosed in accordance with CEQA. **MM HAZ-6** Prior to the issuance of a demolition permit for any buildings or structures on-site, the Project applicant shall conduct comprehensive ACM and mercury contamination surveys to identify the locations and quantities of ACM and mercury in above-ground structures. The Project applicant shall retain a licensed or certified asbestos consultant to inspect buildings and structures on-site. The consultant's report shall include requirements for abatement, containment, and disposal of ACM, if encountered, in accordance with the South Coast Air Quality Management District's Rule 1403. Prior to issuance of a demolition permit of the onsite structure, preparation of a demolition plan for the safe dismantling and removal of building components and debris including a plan for lead and asbestos abatement shall be required. The demolition plan shall be submitted to the City for review and approval prior to commencement of construction activities.
Impact 4.9-2 Would the Project create a significant hazard to the public or the environment through reasonably foreseeable upset and accident conditions involving the release of hazardous materials into the environment?	Less Than Significant with Mitigation Incorporated (Phase I Project) and Significant and Unavoidable (Phase II Only)	Refer to **MM HAZ-1** through **MM HAZ-6.**
Impact 4.9-3 Would the Project emit hazardous emissions or handle hazardous or acutely hazardous materials, substances, or waste within one-quarter mile of an existing or proposed school?	Less Than Significant Impacts with Mitigation Incorporated (Phase I Project) and Significant and Unavoidable (Phase II Only)	Refer to **MM HAZ-2.**
Impact 4.9-4 Would the project be located on a site which is included on a list of hazardous materials sites compiled pursuant to	Less Than Significant Impacts with Mitigation Incorporated	Refer to **MM HAZ-5**.

Resource Impact	Level of Significance	Mitigation Measure(s)
Government Code Section 65962.5 and, as a result, would it create a significant hazard to the public or the environment?		
Section 4.16: Tribal Cultural Resources		
Impact 4.16-1 Would the project cause a substantial adverse change in the significance of a tribal cultural resource, defined in Public Resources Code § 21074 as either a site, feature, place, cultural landscape that is geographically defined in terms of the size and scope of the landscape, sacred place, or object with cultural value to a California Native American tribe, and that is: i) Listed or eligible for listing in the California Register of Historical Resources, or in a local register of historical resources as defined in Public Resources Code 5020.1(k), or ii) A resource determined by the lead agency, in its discretion and supported by substantial evidence, to be significant pursuant to criteria set forth in subdivision (c) of Public Resources Code § 5024.1. In applying the criteria set forth in subdivision (c) of Public Resource Code § 5024.1, the lead agency shall consider the significance of the resource to a California Native American tribe.	Less than Significant Impact with Mitigation Incorporated	Refer to ***Section 4.5: Cultural Resources*** for **MM CUL-6** and **MM CUL-7**.

2.0 INTRODUCTION AND PURPOSE

2.1 Purpose of the Environmental Impact Report

The California Environmental Quality Act (CEQA) requires that all state and local governmental agencies consider the environmental consequences of projects over which they have discretionary authority before taking action on those projects. This Draft Environmental Impact Report (EIR) has been prepared to satisfy CEQA (Public Resources Code [PRC] Section 21000 et seq.) and the State CEQA Guidelines (California Code of Regulations Section 15000 et seq.). The EIR is a public document designed to provide decision-makers and the public with an analysis of the environmental effects of the proposed project, to indicate possible ways to reduce or avoid environmental impacts and to identify alternatives to the project. The EIR must also disclose significant environmental impacts that cannot be avoided; growth-inducing impacts; effects not found to be significant; and significant cumulative impacts of all past, present, and reasonably foreseeable future projects.

CEQA requires each EIR to reflect the independent judgment of the "Lead Agency." The Lead Agency is "the public agency which has the principal responsibility for carrying out or approving a project which may have a significant effect upon the environment" (PRC Section 21067). The City of Ontario (City) has the principal responsibility for approval of the Euclid Mixed Use Specific Plan Project ("Project" or "proposed Project"). For this reason, the City is the CEQA Lead Agency for this Project.

The Lead Agency exercises its independent judgment on questions, including but not limited to the thresholds of significance used to analyze project impacts, analyses, and conclusions regarding the level of significance of impacts both before and after mitigation, the identification and application of mitigation measures to avoid or reduce project-related impacts, and the consideration of alternatives to the proposed Project. In preparing this EIR, the City has employed CEQA and environmental technical specialists, but, the City, as the Lead Agency, has reviewed and revised all submitted drafts, technical studies, and reports as necessary to reflect its own independent judgment, including reliance on City technical personnel from other departments and review of all technical subconsultant reports. Therefore, the analyses and conclusions set forth in this EIR reflect the independent judgment of the City as Lead Agency.

The intent of the Draft EIR is to provide sufficient information on the potential environmental impacts of the Project to allow the City to make an informed decision regarding approval of the Project. The Draft EIR is also intended to inform responsible agencies, decision-makers, and the general public about the potential environmental effects of the development and operation of the Project. Specific discretionary actions to be reviewed by the City are described in ***Section 3.0: Project Description***.

2.2 Notice of Preparation

The City determined that an EIR would be required for this Project and issued a Notice of Preparation (NOP) (see ***Appendix A: Notice of Preparation and Scoping Meeting Materials***). CEQA Guidelines §15063 provides that if a lead agency determines that an EIR will clearly be required for a project, an Initial Study is not required; therefore, an Initial Study was not prepared for this project. Comments received during

the public review period, from February 10, 2023, to March 13, 2023, are provided in ***Appendix A***. In addition, a public scoping meeting was held on February 22, 2023, via Zoom. Members of the public, the Project applicant and its consultants, and staff were able to participate in the meeting via Zoom. The meeting was recorded, and the meeting presentation is contained in ***Appendix A***.

A total of eight letters were received in response to the NOP. The comment letters received during the NOP comment period are included in ***Appendix A***.

Table 2-1: NOP Written Comments Summary compiles the comment letters received from commenting agencies/persons during the NOP process and identifies the section(s) of the Draft EIR where the issues are addressed.

Table 2-1: NOP Written Comments Summary

Commenting Agency/Person		Letter Dated	Summary of Comments	Issue Addressed in:
Native American Heritage Commission	Cameron Vela, Cultural Resource Analyst	February 14, 2023	• Tribal Consultation recommendation for Californian Native American Tribes that are traditionally and culturally affiliated with the geographic area of the Project. • AB 52 and SB 18 compliance and additional requirements.	***Section 4.5: Cultural Resources*** and ***Section 4.16: Tribal Cultural Resources***
Council of Carpenters	Mitchell M. Tsai, Attorneys for Southwest Regional	February 22, 2023	• The City should require the use of a local workforce to benefit the community's economic development and environment. • The City should impose training requirements for the project's construction activities to prevent community spread of Covid-19 and other infectious diseases.	Not Applicable
Riverside County Airport Land Use Commission	Jackie Vega, Urban Regional Planner I	February 27, 2023	• Project is located outside Riverside County and therefore not within our jurisdiction. • Request to reference Chino Airport Compatibility plan and noted that Ontario Airport is another surrounding airport.	***Section 3.0: Project Description***; ***Section 4.11: Land Use***; ***Section 4.9: Hazards***
Southern California Gas Company	Will Liao, Region Planning Supervisor	March 2, 2023	• Request that the builder contact USA / Dig Alert prior to any excavation activities, so that personnel can go out to perform Locate & Mark.	Not Applicable
Southern California Association of Governments	Frank Wen, Ph.D., Manager, Planning Strategy Department	March 9, 2023	• Request further environmental documentation for review.	***Section 4.15: Transportation and Traffic; Appendix I***
South Coast Air Quality Management District	Sam Wang, Program Supervisor, CEQA IGR	March 10, 2023	• Recommends that South Coast AQMD's CEQA Air Quality Handbook and website be used as guidance when preparing the air quality and greenhouse gas analyses. • Use the CalEEMod2 land use emissions software. • Quantify criteria pollutant emissions and compare the emissions to South Coast AQMD's CEQA regional pollutant emissions significance thresholds and localized significance thresholds to determine the Proposed Project's air quality impacts. • Identify any potential adverse air quality impacts that could occur from all phases of the Proposed Project and all air pollutant sources related to the Proposed Project. • Air quality impacts from both construction (including demolition, if any) and operations should be calculated. • Emissions from the overlapping construction and operational activities should be combined and compared to South Coast AQMD's regional air quality CEQA operational thresholds to determine the level of significance.	***Section 4.3: Air Quality; Section 4.8: Greenhouse Gas Emissions; Appendix B***

Commenting Agency/Person		Letter Dated	Summary of Comments	Issue Addressed in:
			• If diesel emissions generated from long-term construction or attracts diesel-fueled vehicular trips, perform a mobile source health risk assessment. • In the event of significant adverse air quality impacts, all feasible mitigation measures that go beyond what is required by law be utilized to minimize impacts; any impacts resulting from mitigation measures must also be analyzed.	
City of Chino	Chris Cortez, Assistant Planner	March 13, 2023	• Any intersection in Chino where project trips are likely to reach 50 peak hour trips will be included for evaluation within the Project's EIR per Chino TIA Guidelines. • Access points along Euclid should be minimized to meet/maintain the roadway classification of an expressway when considering the project's internal roadway network alignment. • The project is in the vicinity of the City of Chino's water treatment facility. Grading and other associated construction activities performed at the various phases of development are pertinent to adhere to the State Water Resources Control Board's General Permit requirements to control dust and other pollution. • The City of Chino has critical water main infrastructure within the right-of-way of Schaefer Avenue. Temporary and permanent construction activities shall provide protection of the existing 16-inch and 18-inch water mains. Installation of any sewer lines 24 inches or larger within 10 feet of the City of Chino water mains should be reviewed by City of Chino Water Division. • Additionally, take note of the uses and setbacks on the south side of Schaefer Avenue, as these would likely extend easterly to the Eastside Water Treatment Facility. • The SCE easement which also extends to the EWTF may also be affected by said setbacks.	***Section 4.15: Transportation and Traffic;*** **Appendix I** ***Section 4.10: Hydrology and Water Quality;*** **Appendix G**
Californians Allied for a Responsible Economy (CARE CA)	Jeff Modrzejewski, Executive Director	March 13, 2023	• CARE CA respectfully requests complete analysis of CEQA impacts, imposition of all feasible mitigation and study of a reasonable range of alternatives, including at least two environmentally superior alternatives to the Project. • Avoid developing narrow project objectives as to exclude any meaningful alternative other than the Project. • Make all efforts to minimize air quality effects to the greatest extent possible. This in part means that a Health Risk Assessment must be	***Section 4.1: Aesthetics*** through ***Section 7.0: Effects Found Not to be Significant*** See ***Appendix B: Air Quality – Greenhouse Gas Emissions Reports***

Commenting Agency/Person		Letter Dated	Summary of Comments	Issue Addressed in:
			prepared as part of the DEIR. The HRA should include both construction and operational diesel PM emissions and cancer risk assessment, and account for other emission sources such as backup generators. • To determine the significance of the Project's GHG, the City should avoid attempts at threshold shopping to secure a favorable less than significant result for the Project. If the City adopts a qualitative analysis, then the DEIR should provide a detailed explanation if numeric thresholds, adopted by various air districts are not used in the analysis. We also urge the City to adopt thresholds that embody climate change's existential threat to humankind. Aside from identifying an appropriate threshold backed with substantial evidence, we expect a detailed discussion on the Applicant's plan to offset the Project's GHG emissions. • Mitigation measures must be effective and enforceable. Every effort must be made to incorporate modern technology in the mitigation measures and MMRP. • Provide all sources and referenced materials when the DEIR is made available.	

The NOP process helps determine the scope of the environmental issues to be addressed in the Draft EIR. Based on this process for the Project, certain environmental categories were identified as having the potential to result in significant impacts. Issues considered Potentially Significant are addressed in this Draft EIR in detail, but effects found not to be significant are briefly discussed in ***Section 7.0: Effects Found not to be Significant***.

Native American Consultation

The City initiated Native American consultation concurrent with the NOP scoping process, pursuant to Assembly Bill (AB) 52 and Senate Bill (SB) 18. Letters were sent to the applicable tribes and are contained in ***Appendix D: Cultural Resources Documentation***.

2.3 Scope of this Draft Environmental Impact Report

The scope of the Draft EIR was determined based on comments received in response to the NOP. A scoping meeting was also conducted by the City. Pursuant to State CEQA Guidelines, Sections 15126.2 and 15126.4, the Draft EIR should identify any potentially significant adverse impacts and recommend mitigation that would reduce or eliminate these impacts to levels of insignificance.

The information in ***Section 3.0: Project Description***, establishes the basis for analyzing future, project-related environmental impacts.

Impacts Considered Less Than Significant

During preparation of the Draft EIR, the City determined that three environmental impact categories were not significantly affected by or did not affect the proposed Project. These categories are not discussed in detail in this Draft EIR.

- Mineral Resources
- Recreation
- Wildfire

Potentially Significant Adverse Impacts

The City determined that 17 environmental factors have potentially significant impacts if the proposed Project is implemented.

- Aesthetics
- Agriculture and Forestry Resources
- Air Quality
- Biological Resources
- Cultural Resources
- Energy
- Geology and Soils
- Greenhouse Gas Emissions
- Hazards and Hazardous Materials
- Hydrology and Water Quality
- Land Use and Planning
- Noise
- Population and Housing
- Public Services
- Transportation
- Tribal Cultural Resources
- Utilities and Service Systems

Unavoidable Significant Impacts

This Draft EIR identifies several significant and unavoidable impacts, as defined by CEQA, that would result from implementation of the proposed Project. Unavoidable significant impacts may be considered significant on a project-specific basis, cumulatively significant, and/or potentially significant. Pursuant to State CEQA Guidelines Section 15093, for any project having unavoidable significant impacts, the City must prepare a "statement of overriding considerations" before it can approve the Project, attesting that the decision-making body has balanced the benefits of the proposed Project against its unavoidable significant environmental effects and has determined that the benefits outweigh the adverse effects, and therefore the adverse effects are considered acceptable. The impacts that were found in the Draft EIR to be significant and unavoidable are found in these sections:

- Agriculture and Forestry Resources
- Air Quality
- Biological Resources
- Cultural Resources
- Geology and Soils
- Greenhouse Gas Emissions
- Hazards and Hazardous Materials

2.4 Incorporation by Reference

In accordance with State CEQA Guidelines Section 15150, the following documents are hereby incorporated by reference into this EIR and are made available for public review on their respective websites.

The Ontario Plan 2050: The City's General Plan underwent a technical update and was adopted as The Ontario Plan (TOP) 2050 on August 16, 2022. TOP 2050 states long-term goals, principles, and policies for achieving Ontario's Vision. It guides growth and development to achieve optimum results from the City's physical, economic, environmental, and human resources. TOP 2050 is made up of nine elements: Land Use, Housing, Mobility, Safety (including Noise), Environmental Resources (including Conservation), Parks and Recreation (including Open Space), Community Economics, Community Design, and Social Resources. Environmental Justice is woven throughout the Policy Plan. The Policy Plan is intended to be a long-term policy document. It includes abiding principles for each element, goals, and policies. TOP 2050 can be found here: https://www.ontarioca.gov/OntarioPlan.

The Ontario Plan 2050 Supplemental EIR: The Ontario Plan (TOP) 2050 Supplemental EIR (SCH Number 2021070364) is an update to the approved TOP 2009; therefore, TOP 2050 Supplemental EIR relies on the findings of the 2009 Draft EIR, 2010 Recirculated Draft EIR, and 2010 Final EIR and, per CEQA Guidelines Section 15163, contains all of the information necessary to ensure that the certified TOP EIR fully evaluates the TOP 2050. These documents, though discussed separately here, are collectively referred to in the TOP 2050 Supplemental EIR as the 2010 Certified EIR. In accordance with CEQA Guidelines Sections 15148 and 15150, this TOP 2050 Supplemental EIR incorporates the 2010 Certified EIR (and its constituent parts) by

reference. TOP 2050 Supplemental EIR, certified August 2022, addresses the short and long-term effects of buildout of the City, which includes development of the Project area. Mitigation measures were imposed for impacts determined to be significant or potentially significant. Significant and unavoidable impacts were identified for agricultural resources, air quality, cultural resources, greenhouse gas emissions, noise, and transportation. TOP policies that are related to the proposed Project are cited in various sections throughout this EIR.

The TOP 2050 Supplemental EIR can be found here:

https://www.ontarioca.gov/sites/default/files/Ontario-Files/Planning/The%20Ontario%20Plann/EIR/Final_DraftSEIR_TOP2050.pdf .

Ontario Development Code: This Development Code is enacted to assist in the implementation of Federal and State planning, zoning, development, subdivision, and environmental laws, and TOP, and guide the orderly development of the City in a manner that promotes and protects the public health, safety, comfort, convenience, prosperity, and welfare of its inhabitants. The Development Code is referenced throughout this document as regulations governing development and land use activities within the City. Regulatory information from the Development Code is cited in various sections of this EIR. The development code can be found here: https://www.ontarioca.gov/Planning/Applications.

San Bernardino County Countywide Plan: The County of San Bernardino adopted the County Countywide Plan in 2020. The Countywide Plan is comprised of four sections: Policy Plan, Business Plan, Community Action Guides, and Environmental Documents. The County Policy Plan is an update and expansion of the County's General Plan for the unincorporated areas. As an update of the County's General Plan and Community Plans, the Policy Plan addresses physical, social, and economic issues facing the unincorporated portions of the County. It also addresses supportive services for adults and children, healthcare services, public safety, and other regional county services provided to both incorporated and unincorporated areas. As part of its Policy Plan, the County includes the following eight elements: 1) Land Use; 2) Infrastructure & Utilities; 3) Transportation & Mobility; 4) Natural Resources; 5) Hazards; 6) Personal & Property Protection; 7) Economic Development; and 8) Health & Wellness. The Policy Plan was used throughout this EIR since it contains information, policies, and regulations relevant to the proposed Project.

This document is available for review on the County's website at: http://countywideplan.com/policy-plan.

Southern California Association of Governments (Connect SoCal): The 2020-2045 Southern California Association of Governments (SCAG) Regional Transportation Plan/Sustainable Communities Strategy (RTP/SCS), also known as Connect SoCal, is a long-range visioning plan that balances future mobility and housing needs with economic, environmental, and public health goals. Connect SoCal embodies a collective vision for the region's future and addresses the cumulative impact of future development and associated infrastructure improvements for SCAG regions. It is developed with input from local governments, county transportation commissions, tribal governments, non-profit organizations, businesses, and local stakeholders within SCAG regions such as San Bernardino County and the City. Connect SoCal can be found here: https://scag.ca.gov/connect-socal.

Ontario Ranch Business Park Final Subsequent EIR. The Ontario Ranch Business Park Final Subsequent EIR addressed the environmental effects and comments from public agencies and interested parties associated with the implementation of the Ontario Ranch Business Park Specific Plan Amendment project, located south of the proposed Euclid Mixed Use Specific Plan Project area. The Ontario Ranch Business Park Final Subsequent EIR is specifically relevant as it addressed the impacts of constructing regional infrastructure necessary to serve the developing southwestern industrial sector of the City of Ontario.

This document is available for review on the City's website at:

https://www.ontarioca.gov/sites/default/files/Ontario-Files/Planning/Environmental%20Documents/ORBP/01%20ORBP%20II%20SPA%20Final%20SEIR.pdf.

2.5 Environmental Impact Report Process

This Draft EIR is being circulated for public review for 45 days. Interested agencies and members of the public are invited to provide written comments on the Draft EIR to the City address shown on the title page of this document. Upon completion of the 45-day review period, the City will review all written comments received and prepare written responses for each. A Final EIR will incorporate the received comments, responses to the comments, and any changes to the Draft EIR that result from comments. The Final EIR will be presented to the City for potential certification as the environmental document for the Project. All persons who comment on the Draft EIR will be notified of the availability of the Final EIR and the date of the public hearing where the City will consider whether to certify the Final EIR.

The Draft EIR is available to the general public for review at various locations:

- City of Ontario, Planning Department, 303 East "B" Street, Ontario, CA 91764
- Ontario Main Library 215 East "C" Street, Ontario, CA 91764
- City's website: https://www.ontarioca.gov/Planning/Reports/EnvironmentalImpact

3.0 PROJECT DESCRIPTION

3.1 Project Location and Settings

The Euclid Mixed Use Specific Plan Project (Project) is made up of 18 existing parcels totaling 84.1 acres in the City of Ontario (City). The City is located approximately 40 miles east of downtown Los Angeles, 20 miles west of downtown San Bernardino, and 30 miles north from the Orange County line. (See ***Figure 3-1: Regional Location***).

Regional access to the Project site is provided by State Route 83 (SR-83; Euclid Avenue), which connects to State Route 60 (SR-60) and Interstate 10 (I-10) to the north; Interstate 15 (I-15) approximately 5.5 miles to the east; and State Route 71 (SR-71) approximately 4.3 miles to the west. SR-71 connects the Project to State Route 91 (SR-91) in unincorporated Riverside County.

The Project site is in the southwestern portion of the City, immediately east of the City of Chino in San Bernardino County. The proposed Project site is bounded by Schaefer Avenue on the north, Sultana Avenue on the east, Edison Avenue on the south, and Euclid Avenue on the west (See ***Figure 3-2: Local Vicinity Map*** and ***Figure 3-3: Project Boundary***). The Assessor Parcel Numbers (APNs) for this Project are 1053-071-01, -02, -03, -04; 1053-211-01, -02, -05; 1053-281-01, -02, -03, -04, -05, -07, -08; 1053-081-01, -02, -03, -04.

The Project specific plan will create guidelines that will: address the Project's consistency with The Ontario Plan (TOP) 2050 Update; provide a development plan, which specifies land uses, circulation, infrastructure, streetscape, and landscape plans applicable to properties within the Project area; establish procedures for reviewing individual projects; implement design guidelines to create a visually attractive environment; and summarizes the development review process; and specifies provisions for administration and implementation of the Project.

3.2 Project Site and Surrounding Land Uses

The 84.1-acre Project site is currently occupied by agricultural uses, including the raising of livestock, dairy farming activities, and a commercial nursery. Dairy farming and agriculture have been the primary uses of the Project site since before the 1930s. The majority of the site exists as fallow or cultivated fields. There is a private recreational vehicle facility in the southwestern portion of the site and a scrap yard at the intersection of Euclid Avenue and Edison Avenue. Various non-conforming single family residential structures, as well as agricultural related buildings and open structures are located within the Project site. Two Southern California Edison (SCE) easements extend across the Project site. No structures are located within the SCE easements; however, they have been used for various agricultural uses historically.

Existing uses surrounding the Project site are similar to those on the site. Ongoing crop farming is located to the north of the Project site and a vacant property that was a former dairy farm is located to the east of the site. The property to the south is currently utilized for residential, farming, or trucking related uses. North across Schaefer Avenue is an existing dairy farm; south across Edison Avenue is an existing trucking facility; east across Sultana Avenue is vacant land and an existing trucking facility; west across

Euclid Avenue, is the City of Chino with existing commercial and residential uses, and a truck/trailer storage yard (see ***Figure 3-4: Surrounding Land Uses***).

Existing Zoning and Land Use Designations

The existing land use designations for the Project site are consistent with the TOP's existing land designations (see ***Figure 3-5: Existing Land Use and Zoning***). The City's TOP designates the Project site for development of Business Park (BP) at 0.6 FAR, and Mixed-Use (MU) at 14.0 to 65.0 du/ac; 1.5 FAR office; 1.0 FAR retail, and includes portions designated for Open Space-Non-Residential (OS-NR).[1]

TOP land use designations for the Project site by parcel number are as follows:

- Business Park
    - APN: 1053-071-01, -02, -03, -04; 1053-211-01, -02, -05; 1053-081-01, -02, -03, -04.
- Mixed-Use
    - APN: 1053-281-01, -02, -03, -04, -05, , -07, -08.

Additionally, the southern portion of the Project site is located within TOP 2050 South Euclid District Place Type. Lying at the southwest corner of the City, the South Euclid District Place Type is envisioned to develop as a vertically- and horizontally mixed-use area to serve the populations of newly developing Ontario Ranch and adjoining communities.[2] The district will include a range of housing types integrated within and alongside retail, commercial, and office uses, as well as public spaces and trails that connect the "Great Park" to Euclid Avenue. The area is intended to be highly walkable with pedestrian-oriented site design and road network and transit stops with amenities.

The southern portion of the Project site is also within the Great Park Corridor. Sites within the Great Park Corridor are currently zoned Specific Plan (SP) Zoning District with an Agricultural Overlay (SP-AG), but no specific plan has been adopted, and they will be rezoned to SP-AG Affordable Housing (AH) for inclusion in the Affordable Housing Overlay District described within the City's Housing Element.[3] The SP-AG-AH Overlay will establish a minimum density of 20 du/ac, and allow TOP 2050 designation to govern the maximum densities for each site. The Agriculture Overlay District will remain in place until the parcel is ready for development consistent with TOP 2050 and Affordable Housing Overlay District. Property owners and developers alike have expressed interest in redeveloping this area, so existing agricultural operations are not expected to limit development potential. Sites in this area would have TOP 2050 designations of Medium Density Residential and Mixed-Use (MU). Medium-Density Residential will allow a range of 20-30 du/ac for projects with at least 25 percent of units affordable to lower incomes, and a range of 20-25 du/ac for all other projects. Two different MU areas are proposed in this opportunity area, Mixed-Use Eucalyptus/Chino Airport (MU-EU) allowing 20-45 du/ac and Mixed-Use Great Park allowing

[1] City of Ontario. 2022. *TOP 2050, Figure LU-01, Official Land Use Plan.* https://www.ontarioca.gov/sites/default/files/Ontario-Files/Planning/The%20Ontario%20Plann/Land%20Use/Figure%20LU-01%20Official%20Land%20Use%20Plan_0.pdf. (accessed October 2022).

[2] City of Ontario. 2022. *TOP 2050, Page 107*. https://www.ontarioca.gov/OntarioPlan. (accessed March 2023).

[3] City of Ontario. 2022. *TOP 2050, Housing Element, page H-282*. https://www.ontarioca.gov/about-ontario-ontario-plan-policy-plan/housing. (accessed July 2023).

20-65 du/ac. With TOP 2050 and zoning changes noted in Program 13, all sites identified support densities necessary to facilitate lower- and moderate-income housing development.[4]

TOP designates the surrounding areas in Ontario Ranch for Commercial, Residential, and Mixed-Use development.

The existing zoning designation is Specific Plan (SP) Zoning District with an Agricultural (AG) Overlay.[5] The SP District designation requires approval of a specific plan by the City for urban development of the Project site. The Specific Plan will be the zoning for the Project site, consistent with TOP 2050.

Surrounding Land Uses

The existing uses in the vicinity include:

- North across Schaefer Avenue: dairy farm
- South across Edison Avenue: trucking facility
- East across Sultana Avenue: vacant and existing trucking facility
- West across Euclid Avenue (City of Chino): existing commercial and residential uses, truck/trailer storage

Environmental Characteristics

Topography

The Project site slopes gently from the northeast to the southwest and south. Drainage appears to flow south and southwest. Site elevations range from approximately 730 feet above mean sea level (msl) in the northeast portion of the site to approximately 690 feet above msl in the southwest portion of the site.

Biology

As a part of the Biological Resources Technical Report prepared for the Project (***Appendix C: Biological Resources Reports***), species and habitat information were gathered from relevant databases to determine which species and/or habitats would be expected to occur on-site. Based on the results of the field investigation, no special-status plant or animal communities were observed on-site. No impacts to jurisdictional waters would occur based on the limits of the improvements and therefore no regulatory permits are necessary. Refer to ***Section 4.4: Biological Resources***, for further discussion.

Hydrology

According to the Geotechnical Investigation conducted for the Project (***Appendix E: Geotechnical Reports***), groundwater was not encountered during the investigation. Based on the available data and the findings of the investigation, the historical high groundwater level and the current groundwater level is estimated to be deeper than 137 feet below ground surface. Groundwater is not expected to be encountered during construction of the Project. It should be noted that the groundwater level could vary

[4] Ibid.
[5] City of Ontario. 2022. *Zoning Map*. https://www.ontarioca.gov/sites/default/files/Ontario-Files/Planning/Zoning%20Map/Zoning_20220415_Rev1.pdf. (accessed March 2023).

depending upon the seasonal precipitation and possible groundwater pumping activity in each site vicinity. Perched water layers at depth may be present locally, particularly following high precipitation and irrigation events. Refer to ***Section 4.10: Hydrology and Water Quality***, for further discussion.

Seismic Conditions

The Project site is not located within an Alquist-Priolo Earthquake Fault Zone, and no evidence of faulting was identified during the Geotechnical Investigation. There are no Alquist-Priolo Earthquake Fault Zones within the Project area. The nearest Alquist-Priolo Earthquake Fault Zone, the Elsinore Fault Zone, is approximately 3.5 miles southwest of the Project site.[6] This fault is a north to northwest trending reverse fault that dips steeply towards the southwest.

There have been no notable earthquakes, of a magnitude of 5.5 or more, affecting the Ontario-Chino region within the last 50 years. The most recent earthquake, the 2008 Chino Hills Earthquake, occurred southwest of the Project site and had a magnitude of 5.4. See ***Section 4.6: Geology and Soils*** for further discussion.

Flood Zone Information

According to the Federal Emergency Management Agency's (FEMA) National Flood Insurance Program's Flood Insurance Rate Maps (FIRM) (Map No. 06071C8620H and 06071C9335H, rev. August 28, 2008), the majority of the Project site lies Zone D, an area where there are possible but undetermined flood hazards.[7] See ***Section 4.9: Hazards and Hazardous Materials*** and ***Section 4.10: Hydrology and Water Quality***, for further discussion.

Hazards and Hazardous Materials

According to the Phase I and II Environmental Site Assessment conducted for the Project (***Appendix F: Phase I and II Environmental Site Assessment***), the site was previously developed for agricultural uses from as early as 1933 to the present day. Between 1946 and the present, the Project site was used agriculturally, including one dairy operation on the western portion of the site, and another dairy operation on the northeastern portion of the site. From as early as 2006, the current plant nursery operation on the southwestern portion of the Property was noted as well. Recognized Environmental Conditions were identified on-site. Refer to ***Section 4.9: Hazards and Hazardous Materials***, for further discussion.

Airport Influence Areas

Ontario International Airport Influence Area

The Ontario International Airport Land Use Compatibility Plan (ONT ALUCP) was adopted by the Ontario City Council on April 19, 2011. The intent of a compatibility plan is to avoid conflicts between airport

[6] California Geological Survey. 2023. *Earthquake Zones of Required Investigation*. https://maps.conservation.ca.gov/cgs/EQZApp/app/. (accessed July 2023).

[7] Federal Emergency Management Act. ND. *National Flood Hazard Layer (NFHL) Viewer*. https://hazards-fema.maps.arcgis.com/apps/webappviewer/index.html?id=8b0adb51996444d4879338b5529aa9cd&extent=-117.81426821289033,33.99346556420189,-117.48193178710954,34.1356709592875. (accessed January 2023).

operations and surrounding land uses. The Project area is not within the safety, noise impact, or airspace protection zones of the ONT ALUCP; however, it is within the Airport Influence Area, as is the entire City.

Chino Airport Overlay Zone

The Project site is located directly north of the Chino Airport and within the Chino Airport, airport influence areas. The City is currently preparing an ALUCP for Chino Airport which relies on the California Airport Land Use Planning Handbook published by Caltrans Division of Aeronautics. The Chino ALUCP will establish policies and criteria for the four types of compatibility impacts which include safety, noise, airspace protection, and overflight. The Project site is not within the Chino Airport noise impact zone. Projects within the Project specific plan boundary shall be required to be consistent with the policies and criteria of the ALUCP for Chino Airport.

Williamson Act Contracts

The California Land Conservation Act of 1965, commonly referred to as the Williamson Act, enables local governments to enter into contracts with private landowners for the purpose of restricting specific parcels of land to agricultural or related open space use. In return, landowners receive property tax assessments that are much lower than normal because they are based upon farming and open space uses as opposed to full market value. The motivation for the Williamson Act is to promote voluntary land conservation, particularly farmland conservation. There are no active Williamson Act contracts located within the Project area.

3.3 Project Objectives

Objectives for the Project are defined in the Project specific plan to aid decision makers in their review of the Project and its associated environmental impacts. The Project objectives have been refined throughout the planning and design process for the Project and are listed below:

- Optimize the movement of goods throughout the region by designing a mixed-use center to create a highly walkable and pedestrian-oriented site design and road network which leverages the Bus Rapid Transit (BRT) investments;
- Create a mixed-use center to serve the populations of the newly developing Ontario Ranch and adjoining communities, by providing a range of housing types integrated within and alongside retail, commercial, and office uses, as well as public spaces and trails;
- Develop and operate a large format mixed-use center to allow the City of Ontario to compete on a domestic scale through the efficient and cost-effective movement of goods;
- Provide a flexible planning framework that responds to changing physical and market driven aspects of future development opportunities;
- Specify a coordinated phasing of infrastructure, utilities, and public services for this area of Ontario Ranch;
- Promote compatible uses and interfaces between adjacent properties;
- Create a professional, well maintained and attractive environment for the development of a vibrant mixed-use development along Edison Avenue and a multi-purpose business park complex;

- Provide the entitlement and framework for office retail development and multiple family residential units;
- Provide the entitlements and framework for the development of business park uses;
- Provide employment opportunities for the surrounding community;
- Facilitate the implementation of roads, utilities, and other infrastructure investments that will be sufficiently sized to serve the Project site;
- Expand Ontario's retail, office and business park uses in proximity to local airports and regional transportation networks;
- Create an economic driver for future growth in western portion of Ontario Ranch that acts as a catalyst for the development of infrastructure improvements in the area and implementation the City's long term planning vision;
- Provide opportunities for residents to live, work and shop within close proximity;
- Provide a logical extension of planned community trails and bikeways; and
- Facilitate the establishment of design guidelines and development standards that create a unique, well-defined identity for the proposed Project. Enhance Project identity through architecture, landscaping, walls, fencing, signage and entry treatments.

3.4 Proposed Project

"Project" as defined by the State CEQA Guidelines, means:

> *"…the whole of an action, which has a potential for resulting in either a direct physical change in the environment, or a reasonably foreseeable indirect physical change in the environment, and that is any of the following: (1)…enactment and amendment of zoning ordinances, and the adoption and amendment of local General Plans or elements thereof pursuant to Government Code Section 65100-65700. (State CEQA Guidelines Section 15378[a])."*

Description of the Project

The proposed Project consists of a Specific Plan to allow for a business park and mixed-use development on 18 parcels covering 84.1 acres in the City. The development would include up to 290,110 square feet of commercial retail/office uses, up to 466 residential units, and 1,386,777 square feet of business park uses, and associated on-site and off-site infrastructure improvements, as described further below. The Project site is anticipated to be developed in two phases within five planning areas (PAs), with only Phase I proposed at a project-level entitlement. Note there are two applicants for the Project Specific Plan – the private Applicant for Phase I and the City for Phase II.

Phase I would include PAs 1, 2A, and 3A, proposing the construction of 13 buildings. The 13 Phase I buildings would provide up to 1,473,026 square feet of business park and commercial retail/office mixed uses (the maximum development allowed in the proposed Specific Plan). A conceptual site plan for Phase I envisions a less dense site, at approximately 1,000,595 square feet of development (depicted in ***Figure***

3-6: Phase I Conceptual Site Plan). However, the EIR conservatively evaluates the maximum development potential for Phases I and II as permitted in the proposed Specific Plan. Note that the applicant intends to process a Development Plan and Tentative Parcel Map for the Phase I Project following processing of the Project Specific Plan. Phase I is expected to start construction in 2024, with an anticipated opening year in 2032.

The EIR also evaluates, at a "programmatic" level, potential future development of Phase II, comprised of PAs 2B and PA 3B. Phase II is being evaluated at the programmatic level for a number of reasons, consistent with CEQA Guidelines Section 15168 (Program EIR). These reasons include: 1) the private Applicant does not own the parcels within the Phase II area (PAs 2B and PA 3B); 2) the City is the Applicant for these parcels and no specific development proposals have been identified for the Phase II area at this time; and 3) the extent the Phase II area is developed it will be at an unknown, later date following Phase I.

Combined, the Phase I and Phase II portions of the Specific Plan would allow up to 1,676,887 square feet of non-residential business park and commercial retail/office mixed uses in addition to up to 466 residential units, as shown in ***Table 3-1: Maximum Project Buildout***, below.

Land Use Plan

The Project consists of five PAs accommodating a variety land uses including commercial retail/office uses, high density residential uses and open space areas, low-intensity office, and other similar uses that are compatible with the Project site's location and surrounding existing and proposed land uses. The Project Specific Plan's Land Use Plan implements the vision of TOP by providing opportunities for employment in manufacturing, distribution, and research and development at intensities designed to meet the demand of current and future market conditions. The Land Use Plan identifies the location of the land use designations for the Project area. The Project zoning mirrors the TOP Land Use Districts and is identified along with the five PAs (see ***Figure 3-7: Land Use Plan)***.

Business Park (BP) Zoning District: The BP zoning district accommodates business park and related commercial, low intensity office uses, and certain light industrial uses. Development within this district is typically multi-tenant in nature; however, single-tenant buildings are not precluded.

Development within the Business Park District will be set back from Euclid Avenue, separated by a 50-foot landscaped Neighborhood Edge with an 8-foot-wide multi-purpose trail. Smaller scale buildings will face Euclid Avenue and will be designed to create an attractive frontage that reflects a commercial/office character within the allowable building heights. Parking and vehicle storage areas will be sited behind buildings or will be heavily screened from perimeter street view.

Mixed-Use (MU) Zoning District: The MU zoning district accommodates a wide variety of retail commercial, office and high-density residential development in conformance with TOP. It is anticipated that the Mixed-Use development will be comprised of 10 percent Office, 20 percent Commercial/Retail, and 70 percent Residential.

The southern portion of the site that is comprised of approximately 20 acres along the north side of Edison Avenue and is zoned for Mixed Use development. This area is part of a much larger mixed-use area identified in TOP as the Great Park Mixed Use Area. Approximately 170 additional contiguous acres are located south of Edison Avenue. This Mixed Use Area is intended to encourage commercial/retail, office, and higher density residential development opportunities to serve the western portion of the Ontario Ranch and to provide a west anchor to the City of Ontario Great Park.

Open Space/Non-Recreational (OS-NR) Zoning District: The OS-NR Zoning District defines the utility corridors (SCE) easement areas within the City, including the Project boundary. This zoning district allows for low intensity uses such as vehicle and truck storage, nursery and limited agricultural uses, parking, etc., subject to written approval from SCE. The OS-NR Zoning District encompasses the utility easement corridors within the Project Specific Plan boundary. These areas are designated for non-recreational uses. While no building are proposed within this district, it is suitable for uses such as landscape plant nurseries, recreational vehicle and truck/trailer storage and other uses allowed by the City zoning.

The land use types proposed by the Project are summarized below in ***Table 3-1: Maximum Project Buildout***. ***Table 3-1*** provides the maximum development intensity, addressing full buildout per the Project Specific Plan (allowable gross building area and maximum residential development for each PA based on the allowable floor area ratio or residential density respectively). Development standards, such as setback requirements, parking, open space, minimum landscaping, infrastructure, and site design, may reduce the maximum gross square footage or density.

The EIR will evaluate the total maximum allowable development in the Project Specific Plan, which is 1,676,887 square feet of business park and mixed-use land uses, up to 466 residential units and associated on-site and off-site infrastructure improvements. Additional on-site improvements would include landscaping, utility infrastructure, and internal roadways. Off-site improvements may include various street improvements, storm drain infrastructure, sewer infrastructure, domestic water infrastructure, recycled water infrastructure, and underground electric utility infrastructure.

Conceptual Site Plan

The conceptual site plan for the Project is presented in ***Figure 3-6: Phase I Conceptual Site Plan***. Under this conceptual plan, PA 1, 2A, and 3A would be developed with 13 buildings with approximately 1,000,595 square feet of business park and commercial retail/office mixed use development. Note that the applicant intends to process a Development Plan and Tentative Parcel Map for the Phase I Project concurrently or following processing of the Project Specific Plan.[8]

[8] The Applicant has submitted applications for a Development Permit and Tentative Parcel Map for the Phase I area. These applications are currently in City staff review and may be considered by the City concurrent with the Specific Plan if those applications have completed City staff review.

Table 3-1: Maximum Project Buildout

Planning Area	Land Use Designation	Site Acreage	Maximum Building Square Footage
Phase I			
1	Business Park	24.60	642,946
2A	Business Park	20.66	539,970
3A	Mixed-Use (Office; Retail)	5.71	290,110
4	Open Space/Non-Recreational	6.28	-
	Subtotal	***57.25***	***1,473,026***
Phase II			
2B	Business Park	7.80	203,861
3B	Mixed-Use (Residential)	13.32	-
5	Open Space/Non-Recreational	5.73	-
	Subtotal	***26.85***	***203,861***
	Total	***84.1***	***1,676,887***

Notes:
1. The numbers were rounded to present a conservative estimate.
2. The EIR will evaluate the total maximum allowable development in the Project Specific Plan. The Floor Area Ratio (FAR) may be increased to the TOP max levels of 0.60 for BP respectively with appropriate CEQA analysis.
3. Phase II uses are being evaluated at programmatic level only; no specific development applications have been submitted; no specific development dates are known.
4. Specific Plan proposed a minimum of 20,000 square feet of retail within PA 3A. Maximum density allowed may exceed 35 du/ac on any parcel as long as a maximum of 466 du is not exceeded within the Project Specific Plan area.

Table 3-2: Phase I Conceptual Site Plan, shows the anticipated actual amount of square footage upon Project buildout based upon market conditions. The conceptual site plan reflects current market trends, site conditions, and planned infrastructure. However, the conceptual site plan may be modified, provided it does not exceed the maximum building area presented in ***Table 3-1*** and complies with this Project and applicable provisions of the City of Ontario Development Code. To be conservative, this EIR addresses the maximum development potential of the Phase I and Phase II areas.

Table 3-2: Phase I Conceptual Site Plan

Land Use Designation	Building Numbers	Site Acreage	Ground Floor Area (SF)
Planning Area 1			
Business Park	1	2.73	46,010
Business Park	2	2.58	50,325
Business Park	3	2.32	39,506
Business Park	4	2.79	54,710
Business Park	5	4.70	91,464
Business Park	6	6.51	160,171
Business Park	7	4.73	92,790
Subtotal		***26.36***	***534,976***
Planning Area 2A			
Business Park	8	4.65	95,481
Business Park	9	5.10	108,293
Business Park	10	3.68	83,410
Business Park	11	1.69	29,205
Business Park	12	1.64	26,332
Subtotal		***16.76***	***342,721***
Planning Area 3A			
Mixed-Use (Office)	13	6.09	122,898
Subtotal		***6.09***	***122,898***
Total		***49.20***	***1,000,595***
Planning Area 4			
Open Space/Non-Recreational	-	6.28	-

Notes:
1. The numbers were rounded to present a conservative estimate.
2. The Project is proposed in two phases. Phase I, comprised of Planning Areas (PA) 1 and 2, 3A, and 4, envisions approximately 1,000,595 SF of business park and mixed-use development and open space uses. Phase I consists of the construction of Buildings 1 through 13 as numbered in ***Figure 3-6: Phase I Conceptual Site Plan***. This phase may be developed in several subphases in response to market demands and according to the logical and orderly completion of infrastructure improvements.
3. ***Actual Phase I development may be greater***, up to the maximum allowed in the Specific Plan as set forth in Table 3-1.

Circulation Plan

The Circulation Plan (***Figure 3-8: Circulation Plan***) facilitates movement of vehicles, pedestrians and cyclists around and within the Project site, consistent with the City of Ontario Roadway Classification System (***Figure 3-9: City of Ontario Roadway Classification System***). See ***Section 4.15: Transportation*** for additional information on vehicular and truck circulation, trip distribution, and truck routing.

Figure 3-10: Street Sections, presents typical street cross sections for Euclid Avenue, Schaefer Avenue, Sultana Avenue, and Edison Avenue. Roadway, sidewalk, and trail improvements within the Project site must be approved by the City's Engineering Department. Preliminary improvement responsibilities are indicated in the cross sections; however, final fair share responsibilities for street improvements shall be as determined in a Development Agreement with the City. Conceptual streetscape design is presented in the Project specific plan's design Guidelines for this Project. Road surface, sidewalk, and trail improvements within the Project area shall be approved by the City's Engineering Department.

Refer to the Development Plan discussion below for the site-specific development proposal being evaluated in this EIR, for the Phase II portion of the Project. Note that the Development Plan includes

slightly less square footage than the maximum allowed for under the Project specific plan zoning (see ***Table 3-2***).

Final site planning and off-site design shall be subject to City approval pursuant to the provision of the Project specific plan. In addition to the typical street section described and depicted, additional right-of-way and geometric enhancements such as an additional left turn and right turn lanes, including but not limited to those at intersections, may be required to adequately mitigate impacts identified in the Traffic Impact Analysis/Specific Plan EIR.

Local Circulation

Driveways shall conform to access requirements of the City Traffic and Transportation Design Guidelines and be to the satisfaction of the City Engineer. Driveway locations, specifically those that are in proximity to master-planned or future traffic signals, shall be located so as not to interfere with queues as projected in the Traffic Impact Analysis. Fair share responsibilities for street improvements would be addressed in a Development Agreement with the City.

Euclid Avenue (State Route 83)

Euclid Avenue is a State Route under Caltrans' jurisdiction that is designated as an eight-lane Other Principal Arterial in TOP. The centerline of this street forms the boundary between the City of Ontario to the east and the City of Chino to the west. Euclid Avenue is designed with a 200-foot-wide right-of-way, a 66-foot-wide center median, and 52 feet of pavement including curbs and gutter. The existing half-width street right-of-way is 100 feet; therefore, no dedication is required.

The Euclid Avenue streetscape design illustrated in the Project Specific Plan's Design Guidelines, for the east side of the street adjacent to the Project site specifies a 15-foot-wide parkway including a 5-foot-wide sidewalk and an 8-foot-wide on-site multipurpose trail within a 35-foot-wide landscape buffer, creating a 50-foot-wide neighborhood edge as specified in the Ontario Ranch Colony Streetscape Master Plan.

Edison Avenue

Edison Avenue is located along the southern boundary of the Project site, providing east/west access to the site. Edison Avenue is designated as an Other Principal Arterial Street in TOP. The Project Specific Plan specifies a 160-foot-wide right-of-way with a 26-foot landscaped median and a 52-foot paved section on each side.

The Edison Avenue streetscape design presented in the Project Specific Plan's Design Guidelines, for the north side of the street adjacent to the Project site specifies a 15-foot-wide parkway including a 10-foot-wide curb-adjacent landscaped area and a 5-foot-wide sidewalk. The south side also provides an 8-foot-wide on-site multipurpose trail within a 23-foot-wide landscape buffer setback. Together, the parkway and landscape buffer setback create a 38-foot-wide neighborhood edge, per the City's Master Plan of Streets.

Schaefer Avenue

Schaefer Avenue is designated as a four lane Collector Street per the City's Master Plan of Streets and provides east-west access to the Project's northern boundary. The Project Specific Plan specifies a 108-foot-wide right-of-way and 84 feet of pavement including curb and gutter for Schaefer Avenue.

The Schaefer Avenue streetscape design presented in the Project's Specific Plan Design Guidelines, for the south side of the street adjacent to the Project site includes a Class II on-street bike lane at the edge of the street, a 7-foot-wide curb-adjacent landscaped area, and a 5-foot-wide sidewalk. An 8-foot-wide multi-purpose trail is located within a 23-foot-wide landscape buffer setback. Together, these improvements establish a 35-foot-wide neighborhood edge, per in the City's Master Plan of Streets.

Sultana Avenue

Sultana Avenue is designated as a Local Street with a 66-foot-wide right-of-way and 48 feet of pavement including curb and gutter. The Sultana Avenue streetscape presented in the Project Specific Plan Design Guidelines, specifies a 9-foot-wide parkway including a 4-foot-wide landscape planter and a 5-foot-wide sidewalk. The west side of the street adjacent to the Project site, provides a 10-foot-wide landscape buffer setback. Sultana Avenue is not yet developed adjacent to the Project site. However, the right-of-way exists, and no dedication is required.

Traffic Control Devices

Traffic signs regulating, warning, and/or guiding traffic on public roads shall conform to the California Manual on Uniform Traffic Control Devices (MUTCD), latest edition. Traffic-control signs, whether on public or private property, shall conform to the California MUTCD.

Pedestrian Circulation

Sidewalks would be provided along all streets abutting the Project site to improve safety and the pedestrian experience, connect the various parts of the Project area, and expand access to nearby land uses.

Trails and Bike Paths

Trails and bicycle paths provide an additional mode of circulation in and around the Project site. Multipurpose trails would be provided on the east side of Euclid Avenue, on the south side of Schaefer Avenue and on the south side of Edison Avenue (see ***Figure 3-11: Bicycle and Pedestrian Plan***).

The Ontario Plan Mobility Element specifies a Class II bicycle lane on the north side of Schaefer Avenue adjacent to the Project site. Class II bicycle lanes are defined as dedicated (striped) lanes along streets, with no parking allowed in the bicycle lane. This bicycle lane provides linkages to the City's bicycle path system (see ***Figure 3-12: City of Ontario Trail and Bicycle Paths Plan***). The trail and bicycle path improvements would be installed along the Project frontages in conjunction with street improvements.

Transit

Transit options provide an alternative mode of transportation for motorists and a primary mode for the transit dependent. The City is coordinating with regional transit agencies to implement Bus Rapid Transit

(BRT) service to target destinations and along corridors, including Euclid Avenue on the western boundary of the Project site.

Domestic Water Plan

The City's ultimate domestic water system will consist of five pressure zones. Most of Ontario Ranch (including the Project site area) is in the 925 Pressure Zone. The overall water infrastructure plan to serve the City of Ontario as well as the required water infrastructure required to be constructed to serve the Project site is shown on ***Figure 3-13: City of Ontario Ultimate Water System***. The developer of the Project will be responsible to provide the required water lines to connect to the existing improvements constructed by the Ontario Ranch Business Park development to the south of the site.

In addition to extending the 925 Pressure Zone (PZ) Phase 2 West Backbone, the Project site requires a connection between the 925 PZ Phase 2 West Backbone and the 1010 PZ. This would supply a second source of potable water to the Project site. The connection to the 1010 PZ would require extending the Phase 2 West Backbone at Eucalyptus Avenue and Grove Avenue by installing a 30-inch potable water main north on Grove Avenue to Chino Avenue. The connection to the 1010 PZ would require installing an 18-inch potable water main in Chino Avenue easterly to the existing 18-inch potable water main located on the west side of the Cucamonga Creek channel and installing a Pressure Reducing Station between the 1010 PZ and 925 PZ near the intersection of Grove Avenue and Chino Avenue.

Other elements of the Phase 2 Water System are shown on ***Figure 3-13***. The elements shown north of Chino Avenue would be constructed by others. The balance of Phase 2 Water System would be completed as required by future development of Ontario Ranch. The Project would be required to participate in the future Phase 2 Water System improvements, as detailed in the development agreement with the City.

Water service to the Project site would be provided by the City. Currently, there are no City domestic water mains or City water infrastructure in the vicinity of the Project site. The extension of City master planned domestic water infrastructure is being developed within the western portion of Ontario Ranch. The Project is responsible to provide domestic water service to serve future development and would construct a 16-inch line in Euclid Avenue and a 12-inch line along the remaining perimeter of the Project site in Schaefer, Sultana, and Edison Avenues. The Project site would extend the 12-inch line in Schaefer Avenue to connect to the future line at Grove Avenue and the 16-inch line in Euclid Avenue south to connect to the future line in Eucalyptus Avenue. Water mains required to serve the Project would need to be constructed prior to or concurrent with on-site water improvements. Within the Project site, a private network of 2- to 4-inch water lines for domestic water service and 10- to 12-inch water lines for fire service water would be installed. The on-site water system includes connections to the water main in Edison Avenue, Euclid Avenue, Schaefer Avenue and Sultana Avenue. Refer to ***Figure 3-14: Domestic Water Plan*** for further detail.

Recycled Water Plan

Recycled water is provided to the City of Ontario by the Inland Empire Utility Agency (IEUA) from its four wastewater reclamation plants. The entire Project site is within the City's master planned 930 Pressure Zone. Recycled water infrastructure improvements requiring the planning, design, and construction of

new 930 Pressure Zone (PZ) Recycled Water Master Plan main lines area would be required (see ***Figure 3--15: City of Ontario Future Recycled Water System***).

The City requires all new development in Ontario Ranch to connect to and use recycled water for all approved uses, including but not limited to landscape irrigation. Currently, there are no City owned recycled water mains or City recycled water infrastructure in the vicinity of the Project site. There is an existing 30-inch IEUA recycled water main in Eucalyptus Avenue south of the Project site. The Project is responsible to provide recycled water service to serve future development and would construct a 12-inch line in Euclid Avenue and an 8-inch line along the perimeter of the Project site. The Project would extend the 12-inch line in Euclid Avenue south to connect to the existing line in Eucalyptus Avenue. See ***Figure 3-16: Recycled Water Plan*** for further detail.

The 12-inch line in Sultana Avenue may be reduced to an 8-inch line if the development to the east is required to provide individual meters to serve future development.

Sewer Plan

Regional wastewater treatment services are provided to the City and its neighboring agencies by the IEUA. Several regional trunk sewers collect sewage generated in the City and transport it to IEUA's Regional Plant No. 1 and Regional Plant No. 5 for treatment. The City's sewer service area is divided into eight sewer sheds, primarily based on the outlet points where the City's system ties into the IEUA downstream facility. Ontario Ranch is located in Sewer Shed 8. Refer to ***Figure 3-17: City of Ontario Ultimate Sewer System.***

There are no sewer mains located in Euclid Avenue or the other streets adjacent to the Project area. The extension of City master planned sewer infrastructure is being developed within the western portion of Ontario Ranch. The City's master planned sewer system has been constructed in Euclid Avenue at Eucalyptus Avenue and along Eucalyptus Avenue between Euclid and Sultana Avenues.

The Project is responsible to provide sewer service to serve future development and would construct a 16-inch line approximately 2,650 feet in length along the Project frontage of Euclid Avenue and extend an 18-inch main line along the Euclid Avenue to the south to connect to the Kimball Interceptor Sewer. The Project would construct an 8-inch line along approximately 1,320 feet in length along the eastern boundary of the Project site to Edison Avenue and extend the 12-inch line in Sultana Avenue to connect to the existing line in Merrill Avenue. A sewer line may be extended along a portion of Edison Avenue, if necessary to serve the adjacent parcels to the north (see ***Figure 3-18: Sewer Plan***).

Storm Drain Plan

Storm drain systems to serve the Project site would be installed according to the City of Ontario Storm Drain System (see ***Figure 3-19: City of Ontario Ultimate Storm Drain System***). Currently, there are no City domestic storm drain trunk lines in the vicinity of the Project site. The extension of City master planned storm drain infrastructure is being developed within the western portion of Ontario Ranch. The Project is responsible to provide storm drains to serve future development and would construct a 90-inch line in Euclid Avenue along the western perimeter of the Project site, a 48-inch to 90-inch line in Schaefer Avenue

along the northern perimeter of the Project site, and a 78-inch to 96-inch in Edison Avenue along the southern perimeter of the Project site. The Project would construct a 102-inch trunk line in Euclid Avenue south to connect to the existing 108-inch line at Euclid Avenue and Eucalyptus Avenue.

Catch basins located throughout the site would collect runoff. On-site storm drain systems serving the Project site would connect to the master planned system in Euclid Avenue to serve the Project site development. The Project site storm drain improvements are shown in ***Figure 3-20: Storm Drain Plan*****.**

National Polluant Discharge Elimination System (NPDES) Compliance

The grading and drainage of the Project area would be designed to retain/filter, harvest, and reuse or treat surface runoff to comply with the current requirements of the San Bernardino County NPDES Stormwater Program's Water Quality Management Plan (WQMP) for significant new development projects. Water quality impacts may be minimized through the implementation of site designs that reduce runoff and pollutant transport by minimizing impervious surfaces and maximizing on-site infiltration, employing Source Control Best Management Practices (BMP's), or using on-site structural Treatment Control BMP's where the infeasibility of installing Low Impact Development BMP's is demonstrated.

New development within the Project site would utilize a variety of Low Impact Development site drainage designs to manage stormwater, including but not limited to retention/filtration basins, trenches and swales, and above ground bio-retention systems. Development projects within the Project site would incorporate features including but not limited to:

- Landscape designs that promote water retention and incorporation of water conservation elements such as use of native plants and drip irrigation systems;
- Permeable surface designs in areas with low traffic;
- Parking lots that drain to landscaped areas to provide retention and infiltration, or bio-treatment where infiltration is infeasible; or
- Limit soil compaction during grading operations within landscaped storm water infiltration areas to no more than 80 percent compaction.

Prior to the issuance of a grading or construction permit, a Storm Water Pollution Prevention Plan (SWPPP), Erosion and Sediment Control Plan sheets, and a WQMP would be prepared and approved. The SWPPP and Erosion and Sediment Control Plan Sheets would identify and detail all appropriate BMP's to be implemented or installed during construction of the Project, and the WQMP would describe all post-construction BMP's designed to address water quality and quantity of runoff for the life of the Project.

All Priority Land Use (PLU) areas within the Project site shall comply with the statewide Trash Provisions adopted by the State Water Resources Control Board (SWRCB) and trash requirements in the most current San Bernardino County Area-Wide MS4 Permit. PLU includes high-density residential (defined as a land use with at least 10 dwelling units per acre), industrial, commercial, mixed urban, and public transportation station. Drainage from the PLU shall be designed with conveyance tributary to a sub-regional Full Trash Capture System such as a Debris Separating Baffle Box (DSBB), Continuous Deflective System (CDS), or an equivalent hydrodynamic separator which has been approved by the SWRCB.

Conceptual Grading Plan

The topography of the site is moderately flat, sloping from the north to the south. There is an approximately 25-foot elevation change across the Project site.

The grading activities for the Project area would generally consist of clearing and grubbing, demolition of existing structures, and moving surface soils to construct building pads, driveways, and streets.

A Conceptual Grading Plan would be prepared in conjunction with future subdivision mapping and approvals. The grading plan would provide a balance of cut and fill for the Project site. Grading plans for each development project within the Project site will be reviewed and approved by the City of Ontario prior to the issuance of grading permits. Grading plans and activities would conform to the City's grading ordinance and dust and erosion control requirements.

All landscaped areas within the Project site would be designed to accept runoff water from impervious surfaces. Landscape slopes shall not be greater than 3:1 on all slopes, including within neighborhood edge areas and slopes over five feet in height.

Dry Utilities Plan

Utility services provided to the site shall be installed underground in accordance with City guidelines.

Communication System

Developments in Ontario Ranch are required to install and provide fiber conduit to all improved lots. Proposed on-site facilities would be placed underground within a duct and structure system that would be installed by the developer, see ***Figure 3-21: Fiber Optical Plan***. Pursuant to the City of Ontario 2013 Fiber Optic Master Plan, the fiber optic network would be owned and operated by the City of Ontario and as such maintenance of the installed system would be the responsibility of the City and/or Special District fiber optic entity and not the developer. According to the City's Fiber Optic Master Plan, the proposed fiber optic infrastructure, including approximately 23 miles of backbone fiber south of Riverside Drive, is an investment into a long-term capital asset using newly constructed and existing conduit to provide high speed communication links to key locations throughout the City. The Project site would be connected to the City's system as shown on ***Figure 3-22: City of Ontario Ultimate Fiber Optical System***.

Natural Gas

The Southern California Gas Company would provide natural gas to the Project site. Gas mains would be installed to the individual development projects by the Southern California Gas Company, as necessary.

Electricity

Southern California Edison would provide electricity to the Project site from existing facilities in the vicinity. All new lines within the Project site would be installed according to City requirements.

Undergrounding of existing overhead power lines would be subject to Section 7-7 of the Ontario Municipal Code. Existing power poles along Edison Avenue would need to be relocated. The existing location is within the ultimate roadway.

Public Services

Public services within the Project site, including police, fire and solid waste disposal services would be provided as follows:

Police

The City of Ontario would provide police services to the Project site. The closest police station is located approximately four miles north of the Project site at 2500 South Archibald Avenue, just south of SR-60. This station is also the City of Ontario Police Department headquarters.

Fire

The City of Ontario would provide fire protection services to the Project site. The Ontario Fire Department currently has 10 stations, which are staffed with eight four-man paramedic engine companies and two four-man truck companies. The closest operational fire station, Station 2, is located at 544 W. Francis Street, approximately three miles north of the Project site.

Solid Waste Disposal

The City of Ontario would provide solid waste services to the Project site. Solid waste facilities will follow the "Solid Waste Department Refuse and Recycling Planning Manual." The Manual establishes the City of Ontario's requirements for refuse and recycling storage and access for service, as well as addresses the City's recycling goals. The Mid-Valley Landfill is the nearest County of San Bernardino landfill located at 2390 North Alder Avenue in the City of Rialto, approximately 20 miles northeast of the Project site.

Development Standards and Design Guidelines

Upon adoption of the Project Specific Plan, the development standards and procedures established within the Project Specific Plan Chapter 5 would become the governing zoning standards for any new construction, addition, or remodel within the Project area. The Project Specific Plan outlines the allowable uses and standards for building heights, setbacks, parking, coverage, landscape, signage and other development standards within the Project area. Design Guidelines of the Project Specific Plan provide conceptual themes of site planning, architecture, and landscape design within the Project site. Refer to Project Specific Plan Chapter 5 for additional information.

Sustainable Design Strategies

The Applicant is committed to sustainable design strategies that integrate principles of environmental stewardship into the design and construction process. Appropriate strategies will be determined for each project within the Project site. Strategies include, but are not limited to:

Sustainable Construction & Technology Concepts

1. Design and construct energy efficient buildings to reduce air, water, and land pollution and environmental impacts from energy production and consumption.
2. Employ passive design including skylights, building orientation, landscaping, and strategic colors to improve building energy performance.
3. Reduce the heat island effect by providing shade structures and trees that produce large canopies. In addition, choose roof and paving materials that possess a high level of solar reflectivity (cool roofs).
4. Use recycled and other environmentally-friendly building materials wherever possible.
5. Incorporate skylights into at least two percent of warehouse/distribution building roof area to provide natural light and reduce electric lighting demand.
6. Use energy efficient LED (or similar) products.
7. Provide interior or exterior bicycle storage consistent with the City Municipal Code requirements, including California Green Building Standards Code.
8. Use drought tolerant landscaping with drip irrigation and include plantings such as trees, shrubs, groundcovers and/or vines. Optional amenities include benches, trellises, thematic fencing, and decorative walkways.
9. Employ high performance dual pane window glazing in office storefronts.

Water Quality

1. Utilize landscape areas including retention/infiltration swales and basins or bio-treatment when infiltration is infeasible, as required by the San Bernardino County MS4 Permit and Water Quality Management Plan.
2. Select native and drought tolerant plants to reduce water demand.
3. Integrate permeable pavement and perforated curbs throughout the Project site as feasible to allow stormwater to enter planter areas, assist with filtration and control runoff.
4. Use captured runoff to augment irrigation systems whenever possible.
5. Employ irrigation systems that respond to changing weather conditions, irrigate by hydrazone, and use micro-irrigation techniques.
6. Use recycled water to irrigate landscape areas and for other appropriate uses. The use of recycled water for certain purposes is required by the City of Ontario Recycled Water Master Plan.

3.5 Construction and Phasing

Development phasing of the Project site would be determined by the landowner and/or developer based upon real estate market conditions. Phasing would occur as appropriate levels of infrastructure are provided. Phasing sequencing is subject to change over time to respond to various market and local factors and as such, individual phases may overlap or develop concurrently. Infrastructure improvements, as required and approved by the City Engineer to support the development, would be installed by the

developer. ***Figure 3-23: Conceptual Phasing Plan***, describes the general phases of development anticipated for the Project site.

Project backbone infrastructure would be installed by the Project developer, in accordance with the applicable City adopted infrastructure plan for the area, as well as the provisions of the Project Specific Plan and an approved Development Agreement. Fair share responsibilities for improvements would be addressed in a Development Agreement with the City of Ontario. The timing for installation of infrastructure and utilities within the Project site would be determined as part of the City's approval of future subdivision maps and development plans. Infrastructure would be constructed and made available in a timely manner as development progresses. Phasing of required infrastructure would be determined per separate Development Agreement.

3.6 Agreements, Permits and Approvals Required

This Draft EIR examines the environmental effects of the proposed Project's Specific Plan. Note that the Applicant intends to process a Development Plan and Tentative Parcel Map for the Phase I Project concurrent with or following processing of the Project specific plan. This Draft EIR also addresses various actions by the City and others to adopt and implement the proposed Project. It is the intent of this Draft EIR to evaluate the environmental effects of the Project, thereby enabling the City, other responsible agencies, and interested parties to make informed decisions with respect to the requested entitlements. The following summarizes the requested Project approval. For additional details and review of all application materials, including the Project Specific Plan, they are available for review at the City of Ontario Planning Department, refer to Project submittals on file and available for review.

Euclid Mixed Use Specific Plan (PSP22-001)

The Project Specific Plan provides regulations for development of the Project site by establishing permitted land uses, development standards, infrastructure requirements, and implementation requirements. Implementation of the proposed Project Specific Plan would achieve the intent of TOP for the Project site.

Anticipated Approvals

The anticipated approvals required for this Project are listed in ***Table 3-3: Anticipated Permits and Approvals Required***, below:

Table 3-3: Anticipated Permits and Approvals Required

Lead Agency	Action
City of Ontario City Council	• Certification of the Final EIR • Adoption of the Mitigation Monitoring and Reporting Program • Adoption of the Euclid Mixed Use Specific Plan (PSP22--001)
Responsible Agencies	**Action**
San Bernardino County	• Well removal permit from County Health Department (if required)
City of Chino	• Street and drainage improvements
Caltrans	• Encroachment permit (if required)
Santa Ana Regional Water Quality Control Board	• Issuance of a National Pollutant Discharge Elimination System (NPDES) Permit
Federal Aviation Administration	• Obstruction evaluation
South Coast Air Quality Management District	• Issuance of Air Quality permits for construction

Future Agreements, Permits and Approvals

Development proposed within the Project area shall be subject to Development Plan review pursuant to Section 4.02.025 of the Ontario Development Code. The review is intended to ensure compliance with the provisions of the Project Specific Plan, protect the integrity and character of the physical composition of the City, and encourage high-quality development. The following future agreements, permits and approvals are anticipated, concurrent with or following City approval of the Specific Plan.

Development Plan (PDEV23-011)

A Development Plan application is proposed for the Project site area which constitutes PAs 1 and 2A, 3A, and 4 (Phase I). PAs 2B, 3B, and 5 (Phase II) are not owned by the Applicant at this time and therefore, Phase II is programmatically planned under the Project and no specific development is proposed at this time.

Tentative Parcel Map (PMTT23-005)

Concurrent with submitting the Development Plan for Phase I, the applicant has submitted a Tentative Parcel Map (TPM) for Phase I of the Project (PAs 1 and 2A, 3A, and 4).

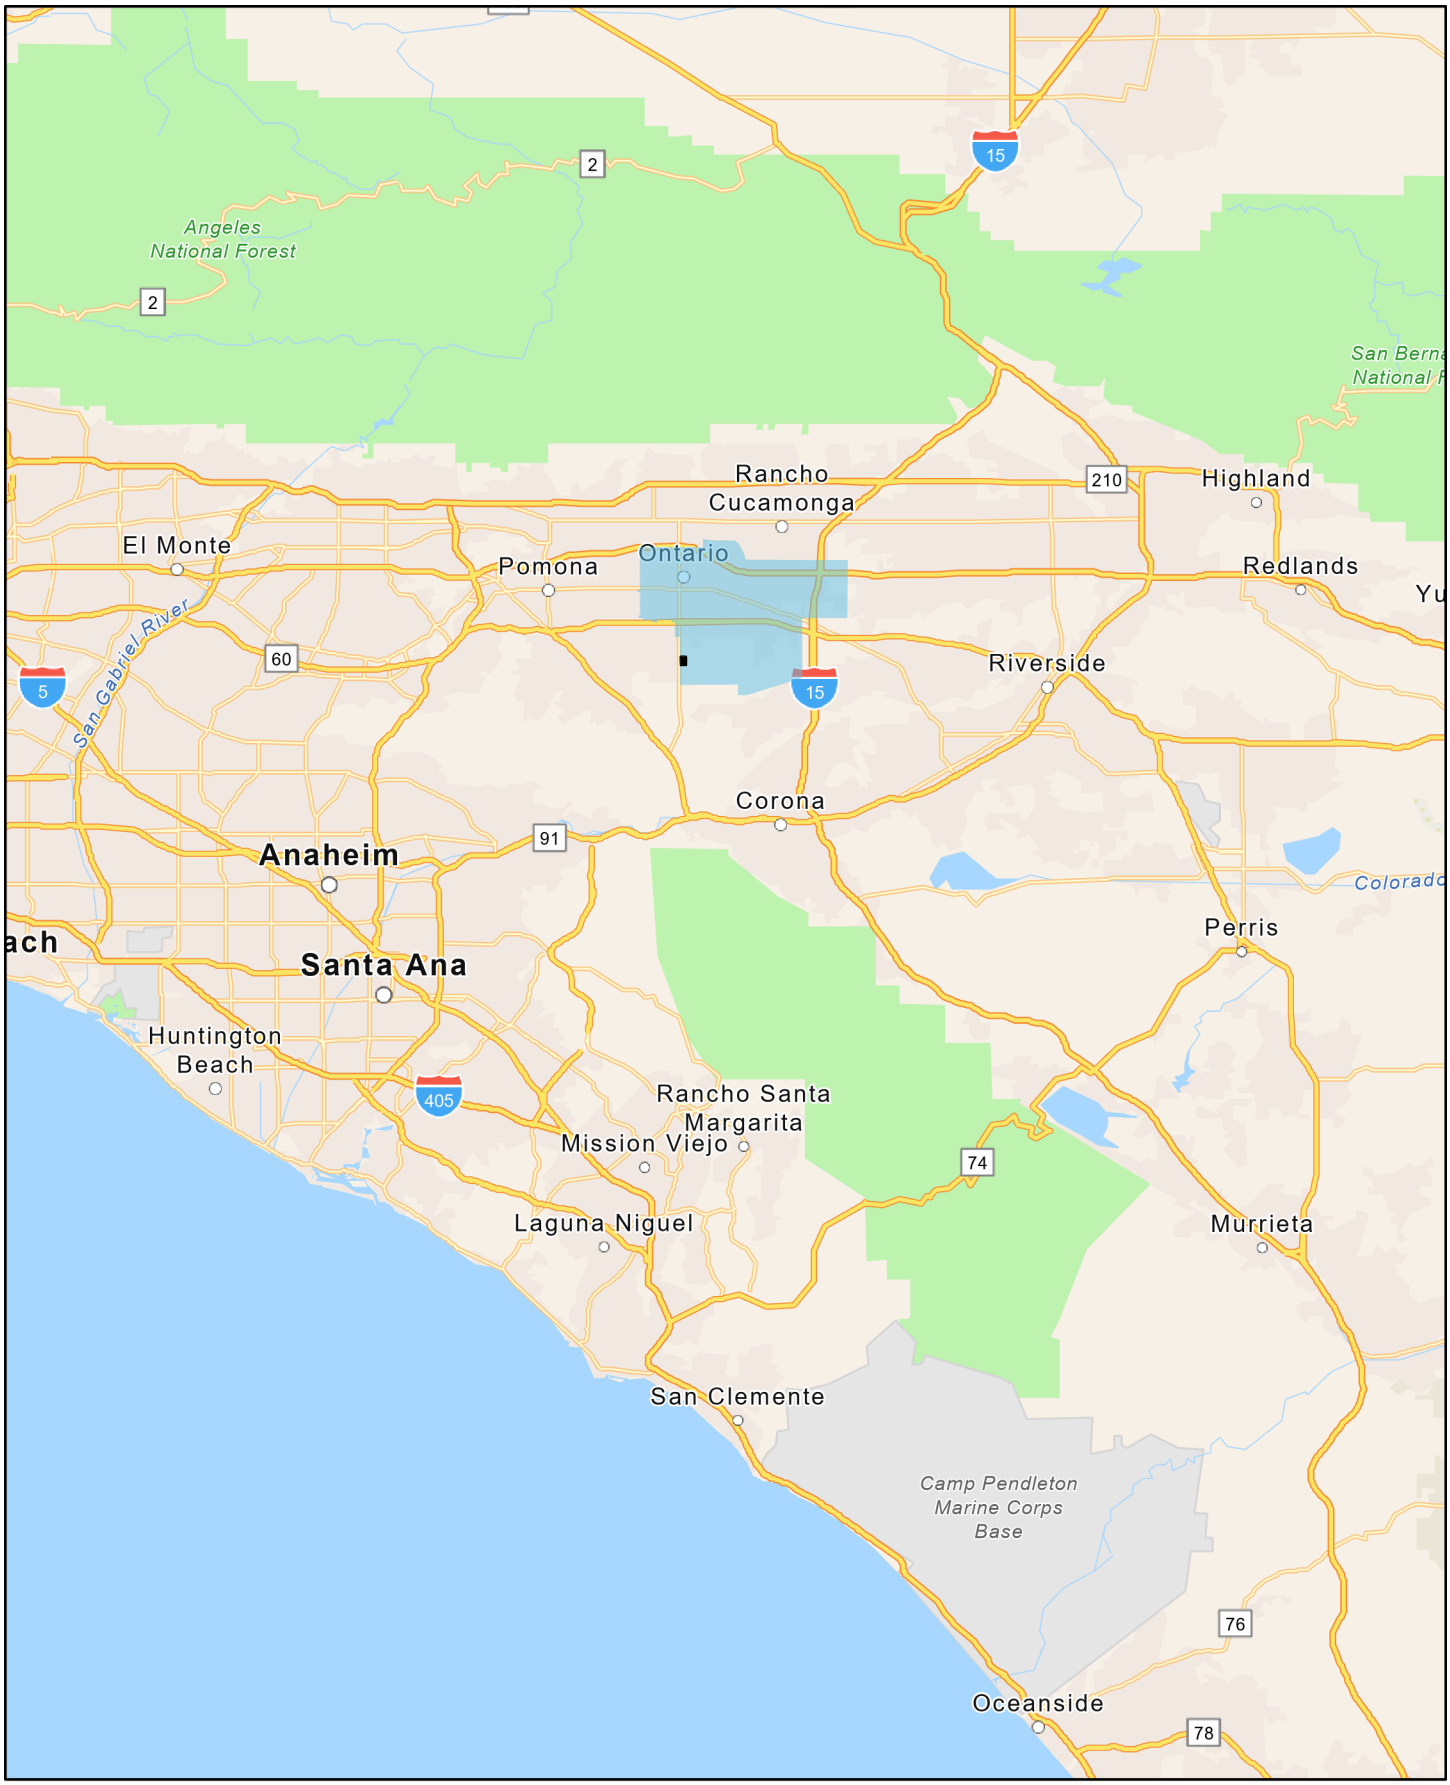
Development Agreement (PDA23-004)

The applicant is requesting approval of a development agreement pursuant to California Government Code §65864 et seq. The Development Agreement will include, but not be limited to, methods for financing, acquisition, and construction of necessary infrastructure (no other physical improvements are anticipated to be associated with the Development Agreement other than that which is described in this EIR). The Development Agreement is intended to be fully executed prior to recordation of the first Final Map.

Subdivision Maps

In addition to the Phase I Tentative Parcel Map noted above, development within the Project may require the processing of additional tentative and final tract or parcel maps and/or lot line adjustments or mergers. Subdivision maps and lot changes shall be reviewed and approved pursuant to the Ontario Development Code and other applicable City codes and regulations, California Government Code Section 66410 (Subdivision Map Act), as well as the provisions of the Project Specific Plan.

Conditional Use Permit



A Conditional Use Permit shall be required for uses specified as "conditionally permitted" in the Specific Plan. Applications for a Conditional Use Permit shall be processed pursuant to Section 4.02.015 of the City Development Code.

Administrative Use Permit

An Administrative Use Permit shall be required for uses specified as "administratively permitted" in the Specific Plan. Applications for an Administrative Use Permit shall be processed pursuant to Section 4.03.015 of the City Development Code.

Maintenance Plan

Final determination of maintenance responsibilities for the public and private improvements constructed in association with the Project Specific Plan shall be specified in the approved Development Agreement, which shall be executed prior to recordation of the first Final Map. However, it is anticipated that maintenance shall be generally shared by three entities as described further in the Project Specific Plan Section 6.

Note: The Project is proposed in two phases. Phase I, comprised of Planning Areas (PA) 1 and 2, 3A, and 4, would allow approximately 1,000,595 SF of business park and mixed-use development and open space uses. Phase I consists of the construction of Buildings 1 through 13 and includes the Development Plan (PAs 1, 2, 3A, and 4). This phase may be developed in several sub-phases in response to market demands and according to the logical and orderly completion of infrastructure improvements.

4.0 ENVIRONMENTAL IMPACT ANALYSIS

This section examines the environmental setting of the Euclid Mixed Use Specific Plan Project (Project), analyzes the Project's effects and the significance of its impacts, and recommends mitigations measures to reduce or avoid impacts. This section contains separate sections for each environmental resource area that was determined to need further study in this Draft Environmental Impact Report (EIR). This scope was determined through the Notice of Preparation (NOP), which was published February 10, 2023 (see ***Appendix A***), and through public and agency comments received during the NOP comment period from February 10, 2023, to March 13, 2023 (see ***Appendix A***). Additionally, a scoping meeting was held on February 22, 2023. Environmental resource areas and their corresponding sections are:

- Section 4.1: Aesthetics
- Section 4.2: Agriculture and Forestry Resources
- Section 4.3: Air Quality
- Section 4.4: Biological Resources
- Section 4.5: Cultural Resources
- Section 4.6: Energy
- Section 4.7: Geology and Soils
- Section 4.8: Greenhouse Gas Emissions
- Section 4.9: Hazards and Hazardous Materials
- Section 4.10: Hydrology and Water Quality
- Section 4.11: Land Use and Planning
- Section 4.12: Noise
- Section 4.13: Population and Housing
- Section 4.14: Public Services
- Section 4.15: Transportation
- Section 4.16: Tribal Cultural Resources
- Section 4.17: Utilities and Service Systems

Sections 4.1 through ***Section 4.17*** provide a detailed discussion of the environmental setting, effects associated with the Project, and mitigation measures designed to reduce significant impacts where required and when feasible. The residual impacts following the implementation of any mitigation measure are also discussed.

During the scoping period it was also determined that certain thresholds under an environmental resource area would not be significantly affected by implementation of the Project. These resource areas, Mineral Resources, Recreation, and Wildfire, are discussed in ***Section 7.0: Effects Found Not to be Significant***.

4.0.1 Approach to Environmental Analysis

Organization of Environmental Analysis

Each potentially significant environmental resource area is addressed in a separate EIR Section (***Section 4.1*** through ***4.17***) and is organized into the following subsections:

1. Introduction
2. Environmental Setting
3. Regulatory Setting
4. Impact Thresholds and Significance Criteria

5. Plans, Programs, and Policies
6. Impacts and Mitigation Measures
7. Cumulative Impacts
8. Significant Unavoidable Impacts
9. References

In addition, ***Section 1.0: Executive Summary***, has ***Table 1-1: Summary of Significant Environmental Impacts and Proposed Mitigation Measures*** that summarizes all impacts by environmental resource.

Terminology Used in this Draft EIR

The threshold of significance is identified for each impact in this Draft EIR. Although the criteria for determining significance are different for each topic area, the environmental analysis applies a uniform classification of the impacts based on definitions consistent with the California Environmental Quality Act (CEQA) and the State CEQA Guidelines.

- **No Impact.** The project would not change the environment.
- **Less than significant impact.** The project would not cause any substantial, adverse change in the environment.
- **Less than significant with mitigation incorporated.** The EIR includes mitigation measures that avoid substantial adverse impacts on the environment.
- **Significant and unavoidable.** The project would cause a substantial adverse effect on the environment, and no feasible mitigation measures are available to reduce the impact to a less than significant level.

4.0.2 Cumulative Impact Methodology

State CEQA Guidelines Section 15130 states that cumulative impacts shall be discussed where they are significant. It further states that this discussion shall reflect the level and severity of the impact and the likelihood of occurrence, but not in as great a level of detail as that necessary for the project alone. State CEQA Guidelines Section 15355 defines cumulative impacts as "...two or more individual effects which, when considered together, are considerable or which compound or increase other environmental impacts." Cumulative impacts represent the change caused by the incremental impact of a project when added to other proposed or committed projects in the vicinity.

The State CEQA Guidelines Section 15130(b)(1) states that the information utilized in an analysis of cumulative impacts should come from one of two sources:

A. A list of past, present and probable future projects producing related cumulative impacts, including, if necessary, those projects outside the control of the agency.

B. A summary of projections contained in an adopted local, regional, or statewide plan, or related planning document, that describes or evaluates conditions contributing to the cumulative effect.

The cumulative impact analysis in this Draft EIR uses a hybrid approach of both Method A and Method B. Method A uses a quantitative analysis approach, compiling a list of past, present, and probable future projects producing related or cumulative impacts including, if necessary, those projects outside the control of the agency. Method B uses the City's General Plan which was comprehensively updated and adopted as The Ontario Plan (TOP) 2050 on August 16, 2022. TOP 2050 states long-term goals, principles, and policies for achieving Ontario's Vision. It guides growth and development to achieve optimum results from the City's physical, economic, environmental, and human resources.[1] Cumulative impact analyses will use the projections in the TOP and other long-range planning documents–such as Ontario's 2020 Urban Water Management Plan for water supply and the Southern California Association of Government's (SCAG) 2020–2045 Regional Transportation Plan/Sustainable Communities Strategy (RTP/SCS) for land use and planning. A list of cumulative projects surrounding the Project area and their land use summary can be found in the Traffic Analysis Study (**Appendix I).** These projects are further described below in ***Table 4 1: Related Approved and Pending Projects*.**

Cumulative impact analyses for several topical sections are also based on the most appropriate geographic boundary for the respective impact. For example, cumulative hydrological impacts are based on the area's watershed (Santa Ana River Watershed), and wastewater impacts are based on the Inland Empire Utilities Agency (IEUA) service boundary, which includes other jurisdictions besides the City of Ontario. The approach is further discussed below and in each respective topical section. Several potential cumulative impacts that encompass regional boundaries (e.g., air quality, greenhouse gases, traffic) have been addressed in the context of various regional plans and their significance thresholds. The following is a summary of the approach and extent of cumulative impacts, which is further detailed in each topical environmental section.

- **Aesthetics.** Aesthetic impacts are assessed relative to a project's viewshed, state and local regulations and/or planning documents.
- **Agriculture and Forestry Resources.** Agriculture and forestry resources impacts are assessed relative to federal, state, and local agricultural and forestry resource regulations.
- **Air Quality.** Air quality impacts are based on the regional boundaries of the South Coast Air Basin.
- **Biological Resources.** Regional evaluation considering regional habitat loss, protected species, and wildlife corridors, based primarily upon the San Bernardino Valley area.
- **Cultural Resources.** Cultural resources impacts are site specific and generally do not combine to result in cumulative impacts. The cumulative analysis of historical resources includes the Project site and immediately surrounding area.
- **Energy.** Energy impacts are assessed based on state and regional regulatory compliance and evaluate the use of electricity and natural gas.
- **Geology and Soils.** Geologic and soils impacts are site specific and generally do not combine to result in cumulative impacts.

[1] Note that the City's TOP2050 Final Supplemental EIR evaluated cumulative build-out of the City based upon TOP 2050 land uses. As the proposed Project is consistent with TOP 2050 land uses, the City's TOP 2050 Final Supplemental EIR is hereby incorporated by reference for evaluation of cumulative build-out impacts.

- **Greenhouse Gas (GHG) Emissions.** Potential GHG impacts are not bounded by geography but affect global climate change. The assessment of cumulative GHG impacts, therefore, is based on consistency with regional plans and per-capita GHG reduction thresholds to achieve targeted reductions.
- **Hazards and Hazardous Materials.** Cumulative analysis highlights the regulatory requirements related to both airport hazards and wildfire hazards. Project impacts, however, are site specific, and generally would not combine with impacts of other projects to result in cumulatively considerable impacts.
- **Hydrology and Water Quality.** Cumulative hydrological impacts are based on the Santa Ana River Watershed, and water quality impacts are based on potential cumulative impacts on the Chino Groundwater Basin (Chino Basin).
- **Land Use and Planning.** Cumulative analysis is based on applicable jurisdictional boundaries and related plans, including TOP 2050, Ontario International Airport Land Use Compatibility Plan, and regional land use planning based on the SCAG 2020-2045 RTP/SCS.
- **Noise.** Cumulative traffic noise is assessed relative to applicable City General Plan noise-level standards. The study area is aligned with the traffic study area.
- **Population and Housing.** Cumulative impacts are assessed relative to citywide jobs-housing balances, applicable city general plan (including housing element), regional plans (RTP/SCS), and population/housing projections.
- **Public Services.** Cumulative impacts are based on a potentially related development within the applicable service provider boundaries (Ontario Fire Department and Police Department) and assessed relative to applicable plans and projections.
- **Transportation.** The traffic study considers both Project-specific impacts and the Project's cumulative contribution to traffic in the Project vicinity. To assess cumulative traffic conditions, existing traffic is combined with Project trips, regional ambient growth, and trips generated by the projects specified in ***Table 4-4: Cumulative Development Land Use Summary,*** of the Traffic Analysis Study (**Appendix I** of this Draft EIR). Future traffic forecasts also include the effects of related projects expected to be implemented in the vicinity of the Project site prior to the buildout date of the Project. A total of 63 cumulative projects were identified in the study area and are listed in ***Table 4-1: Related Approved and Pending Projects*** and shown on ***Figure 4-1: Related Approved and Pending Projects***, below.
- **Tribal Cultural Resources.** Considers Native American territory that includes the Project site, as provided by the Native American Heritage Commission.
- **Utilities and Service Systems.** Water supply and distribution system impacts would be contiguous with IEUA service area. Wastewater conveyance and treatment would be contiguous with the IEUA service area. Cumulative impacts related to stormwater drainage would be contiguous with Upper Santa Ana River basin hydrologic units and the Santa Ana Regional Water Quality Control Board service area. Solid waste collection and disposal services would be contiguous with the City and natural gas and electricity services would be contiguous with the Southern California Gas Company and Southern California Edison service areas, respectively.

- **Wildfire.** Wildfire impacts are analyzed through regulatory compliance at the federal, state, and local levels. Fire Hazard Severity Zones are determined by CalFire.

Related Projects

The list of related projects was prepared based on data received from the City of Ontario, City of Chino, City of Chino Hills, City of Eastvale, and City of Jurupa Valley. A total of 63 cumulative projects were identified in the study area for the traffic study, shown on ***Table 4-1*** and ***Figure 4-1*** below. These related projects are expected to be implemented in the vicinity of the Project site prior to the buildout date of the Project.

Please refer to ***Sections 4.1*** through ***4.17*** of this Draft EIR for a discussion of the cumulative impacts associated with development and growth in the City and region for each environmental resource.

4.1 AESTHETICS

4.1.1 Introduction

The purpose of this section is to describe the existing regulatory and environmental conditions related to aesthetics and other visual resources in the vicinity of the Euclid Mixed Use Specific Plan Project (Project), within the City of Ontario (City). This section of the Draft Environmental Impact Report (EIR) identifies potential impacts that could result from the Project. This chapter discusses the visual changes that would occur upon implementation of the Project, and as necessary, recommends mitigation measures to avoid and/or reduce the significance of impacts. Aesthetic and other visual resources include both natural and built environments. Impacts are discussed in terms of the changes that would result from Project implementation and includes analysis of adverse effects on a scenic vista(s), changes to scenic resources (e.g., trees, rock outcroppings, or historic buildings) within a state scenic highway, and/or degradation of the sites or the surrounding visual character. Impacts could also result from the creation of a new source of substantial light or glare.

This Section and environmental discussion use information from the following City documents:

- The Ontario Plan 2050
- City of Ontario Municipal Code
- City of Ontario TOP 2050 Final Supplemental EIR

Visual Resource Terminology and Concepts

When viewing a landscape, people can have different responses to that landscape based on what is seen, their expectations of views, and because of proposed or current changes to the visual landscape. Viewer responses will vary based upon the viewer's values, familiarity, concern, or expectations of that landscape as well as the scenic quality. Because each person's attachment to and value for a landscape is unique, visual changes to that landscape inherently affect viewers differently. Nonetheless, generalizations can be made about viewer sensitivity to scenic quality and visual changes. Recreational users (e.g., hikers, equestrians, tourists, and people driving for pleasure) generally have high concern for scenery and landscape character. People commuting daily through the same landscape generally have a moderate concern for scenery, while people working at an industrial site would generally have a lower concern for scenic quality or changes to existing landscape character. Regarding travelers navigating through a landscape, the visual sensitivity of these types of viewers is affected by the travel speed at which they are moving, the landscape they are viewing, and area in which they are traveling, for example, an interstate or scenic highway. Other considerations may include changes as seen by viewers from hiking trails or stationary viewers from a residence.

The visual sensitivity of a viewer also is affected by variables such as the viewing distances to the landscape. For example, a project feature or natural environment can be perceived differently by people depending on the distance the observer is from the viewed object. At closer ranges greater detail of an object or landscape is visible. In these instances, changes to viewed object have a greater potential to influence the visual quality of the object because changes to form or scale (the object's relative size in

relation to the viewer) are more noticeable. When the same object is viewed at background distances, details may be imperceptible while changes to the overall forms of terrain and vegetation may be evident. In the middle ground, some detail is evident (e.g., the foreground), and landscape elements are seen in context with landforms and vegetative patterns (e.g., the background). Nonetheless, changes in views from all distances can result in negative consideration from viewers.

Specific terms and concepts are used to assess the visual elements, aesthetic setting, and potential for a project to have effects on visual resources. These terms are included in the discussions throughout this section and are listed below.

Scenic Vista. An area that is designated, signed, and accessible to the public for the express purposes of viewing and sightseeing. This includes any such areas designated by a federal, state, or local agency.

Scenic Highway. Any stretch of public roadway that is designated as a scenic corridor by a federal, state, or local agency.

Sensitive Receptors. Viewer responses to visual settings are inferred from a variety of factors, including distance and viewing angle, types of viewers, number of viewers, duration of view, and viewer activities. The viewer type and associated viewer sensitivity are distinguished among project viewers in recreational, residential, commercial, military, and industrial areas. Viewer activities can range from a circumstance that encourages a viewer to observe the surroundings more closely (such as recreational activities) to one that discourages close observation (such as commuting in heavy traffic). Viewers in recreational areas are considered to have high sensitivity to visual resources. Residential viewers generally have moderate sensitivity but extended viewing periods. Viewers in commercial, military, and industrial areas are generally considered to have low sensitivity.

Viewshed. A project's viewshed is defined as the surrounding geographic area from which the project is likely to be seen, based on topography, atmospheric conditions, land use patterns, and roadway orientations. "Project viewshed" is used to describe the area surrounding a project site where a person standing on the ground or driving a vehicle can view the project site.

Visual character typically consists of landforms, vegetation, water features, and cultural modifications that impart an overall visual impression of an area's landscape. Scenic areas typically include open space, landscaped corridors, and viewsheds. Visual character is influenced by many different landscape attributes including color contrasts, landform prominence, repetition of geometric forms, and uniqueness of textures among other characteristics.

4.1.2 Environmental Setting

Visual Setting

The Project site is approximately 84.1 acres in size and is comprised of five planning areas, comprised of rural uses, including a dairy farm and vacant land. The Project would allow for development of approximately 1.6 million square feet (SF) of business park and mixed-use land uses. The Project is also proposed in two phases which are discussed further below. The existing visual character of the Project

area is neither unique nor of special aesthetic value or quality. The Project site area is characterized by agricultural uses, and the topography is moderately flat, sloping from the north to the south. North across Schaefer Avenue is an existing dairy farm; south across Edison Avenue is an existing trucking facility; east across Sultana Avenue is vacant land and an existing trucking facility; west across Euclid Avenue, is the City of Chino with existing commercial and residential uses, and a truck/trailer storage yard.

Scenic Vistas

Scenic vistas are panoramic views of important visual features, as seen from public viewing areas. The Euclid Avenue Corridor and the Mission Boulevard Corridor are primary scenic resources in the City. Euclid Avenue borders the west side of the Project site. Euclid Avenue is a 200-foot wide right of way with a 60-foot-wide landscape median and 15-foot-wide parkways which are used for public activities and civic events. From G Street to I-10 Freeway, there are three lanes of travel in each direction. Visually, Euclid Avenue is the most defining corridor in the City. Mission Boulevard, approximately 3.8 miles north of the Project site, also has a wide landscaped median and runs east-west immediately south of the Ontario Airport.

Scenic Highways

The Ontario Plan (TOP) 2050 discusses that regional circulation to and through the City is provided by I-10 and SR-60, east to west, and by I-15 and SR-83 (Euclid Avenue), north to south. Access to the Project site is served by various highways. The Project site is bordered by SR-83, which connects to SR-60 and I-10 to the north, I-15 approximately 5.5 miles to the east, and SR-71 approximately 4.3 miles to the west and approximately 4.7 miles directly south. SR-71 connects the Project to SR-91 in unincorporated Riverside County. These segments have not been designated as scenic highways by the California Department of Transportation.[1]

Light and Glare

Light and glare in the Project site is typical of that found in semi-rural environments. Sources of light and glare include adjacent residential, commercial, and area roadways both from streetlights and vehicle headlights for the Project. The Project site is located within a partially urbanized area that generates light from signage, residential interiors, farm and dairy operations, security measures, as well as light generated by vehicular traffic on local streets. The Project site and surrounding areas are transitioning from agricultural use, such as private dairy farms, to higher density residential and commercial uses in response to regional market influences attracting urban development. Ongoing crop farming is located to the north of the site and a vacant property that was a former dairy farm is located to the east of the site. The property to the south is currently residential, farming or trucking related uses. These existing residences and dairy structures do not generate substantial light and glare given their limited size and number. Because nighttime lighting in the Project vicinity is currently limited, glare, which reflects light, is also limited. The existing sensitive receptors relative to light and glare include the nearby residential uses and motorists traveling on local streets. Commercial uses in the vicinity of the site also produce some light and glare generally from stationary light sources such as exterior building lighting (i.e., building illumination,

[1] California Department of Transportation. 2022. *Scenic Highways Map*. https://dot.ca.gov/programs/design/lap-landscape-architecture-and-community-livability/lap-liv-i-scenic-highways. (accessed January 2023).

security lighting, parking lot lighting, and landscape lighting), as well as interior lighting visible through windows and exterior sources.

4.1.3 Regulatory Setting

Federal

No Federal laws, regulations, or executive orders apply to aesthetics and scenic resources in the Project site.

State

California Building Code: Building Energy Efficiency Standards

Energy conservation standards for new residential and non-residential buildings were adopted by the California Energy Resources Conservation and Development Commission (now the California Energy Commission [CEC]) in June 1977 and most recently revised in 2022 (Title 24, Part 6, of the California Code of Regulations [CCR]). Title 24 requires the design of building shells and building components to conserve energy. The standards are updated periodically to allow for consideration and possible incorporation of new energy efficiency technologies and methods. The CEC adopted the 2022 Building Energy Efficiency Standards, which went into effect on January 1, 2023. Title 24 requires outdoor lighting controls to reduce energy usage; in effect, this reduces outdoor lighting.

State Scenic Highways

The California Department of Transportation (Caltrans) Scenic Highway Program protects and enhances the natural scenic beauty of California's highways and corridors through special conservation treatment. A highway may be designated scenic depending upon how much of the natural landscape can be seen by travelers, the scenic quality of the landscape, and the extent to which development intrudes upon the traveler's enjoyment of the view.

The State Scenic Highway System includes a list of highways that are either eligible for designation as scenic highways or have been officially designated. The status of a proposed state scenic highway changes from eligible to officially designated when the local governing body applies to Caltrans for scenic highway approval, adopts a Corridor Protection Program, and receives notification that the highway has been officially designated a Scenic Highway.

When a city or county nominates an eligible scenic highway for official designation, it must identify and define the scenic corridor of the highway. Scenic corridors consist of land that is visible from the highway right of way and is comprised primarily of scenic and natural features. Topography, vegetation, viewing distance, and/or jurisdictional lines determine the corridor boundaries. The city or county must also adopt ordinances, zoning and/or planning policies to preserve the scenic quality of the corridor or document such regulations that already exist in various portions of local codes. These ordinances and/or policies make up the Corridor Protection Program.

Local

City of Ontario General Plan – The Ontario Plan 2050

The TOP 2050 Land Use Element and Community Design Elements identify Euclid Avenue as a visually sensitive corridor and specifies several needs to maintain and improve the aesthetic quality of the corridor. Other visual resources for consideration include the backdrop of the San Gabriel Mountains, which dominate the northern views from the City. Maintenance of these viewsheds will be considered and enhanced, if possible, as part of the development. Included in TOP 2050 is the Policy Plan, which is a framework that would guide the City's future growth through the application of policies and goals. The following goals of TOP 2050 relate to visual and scenic resources.

The following policy contained in the Land Use Element is relevant to the Project:

Land Use Element[2]

Goal LU-2 **Compatibility between a wide range of uses and resultant urban patterns and forms.**

Policy LU-2.6 **Infrastructure Compatibility.** We require infrastructure to be aesthetically pleasing and in context with the community character.

The following policies contained in the Community Design Element are relevant to the Project:

Community Design Element[3]

Goal CD-1 **A dynamic, progressive city containing distinct and complete places that foster a positive sense of identity and belonging among residents, visitors, and businesses.**

Policy CD-1.2 **Place Types.** We establish Place Types in urban, mixed use, and transit-oriented areas to foster the City's identity as a premier community and require new development within each Place Type to incorporate prescribed urban patterns, forms, and placemaking priorities.

Policy CD-1.5 **View Corridors.** We require all major north-south streets be designed and redeveloped to feature views of the San Gabriel Mountains, which are part of the City's visual identity and a key to geographic orientation. Such views should be free of visual clutter, including billboards and may be enhanced by framing with trees.

Goal CD-2 **A high level of design quality resulting in neighborhoods, commercial areas, public spaces, parks, and streetscapes that are attractive, safe, functional, human-scale, and distinct.**

Policy CD-2.1 **Quality Building Design and Architecture.** We encourage all development projects to convey visual interest and character through:

- Building volume, massing, and height to provide context-appropriate scale and proportion;

[2] City of Ontario. 2022. *TOP 2050, Land Use Element*. https://www.ontarioca.gov/about-ontario-ontario-plan-policy-plan/land-use. (accessed January 2023).

[3] City of Ontario. 2022. *TOP 2050, Community Design Element*. https://www.ontarioca.gov/about-ontario-ontario-plan-policy-plan/community-design. (accessed January 2023).

- A true architectural style which is carried out in plan, section, and elevation through all aspects of the building and site design and appropriate for its setting; and
- Exterior building materials that are articulated, high quality, durable, and appropriate for the architectural style.

Policy CD-2.4 **Urban, Mixed Use, and Transit-oriented Areas.** We establish Place Types to require mixed use, urban, and transit-oriented areas to be designed and developed as pedestrian oriented areas that are integrated with adjacent neighborhoods and promote a vibrant, comfortable, and functional environment, as defined for each Place Type.

Policy CD-2.5 **Streetscapes.** We design new and, when necessary, retrofit existing streets to improve walkability, bicycling and transit integration, strengthen connectivity, and enhance community identity through improvements to the public right-of-way such as sidewalks, street trees, parkways, curbs, street lighting and street furniture.

Policy CD-2.8 **Safe Design.** We incorporate defensible space design into new and existing developments to ensure the maximum safe travel and visibility on pathways, corridors, and open space and at building entrances and parking areas by avoiding physically and visually isolated spaces, maintaining visibility and accessibility, and using lighting.

Policy CD-2.9 **Landscape Design.** We encourage durable, sustainable, and drought-tolerant landscaping materials and designs that enhance the aesthetics of structures, create and define public and private spaces, and provide shade and environmental benefits.

Policy CD-2.11 **Entry Statements.** We encourage the inclusion of amenities, signage, and landscaping at the entry to neighborhoods, commercial centers, mixed use areas, industrial developments, and public places that reinforce them as uniquely identifiable places.

Policy CD-2.12 **Site and Building Signage.** We encourage the use of sign programs that utilize complementary materials, colors, and themes. Project signage should be designed to effectively communicate and direct users to various aspects of the development and complement the character of the structures.

Goal CD-3 **Vibrant urban environments that are organized around intense buildings, pedestrian and transit areas, public plazas, and linkages between and within developments that are conveniently located, visually appealing and safe during all hours.**

Policy CD-3.1 **Unique Identity.** We promote development that heightens the unique character and identity of each Place Type by requiring compatible land uses and land planning, site design, and building design that promotes an active public realm.

Policy CD-3.2 **Comfortable, Human-Scale Public Realm.** We require that public spaces, including streets, parks, and plazas on both public and private property be designed to maximize safety, comfort and aesthetics and connect to the citywide pedestrian, vehicular, and bicycle networks.

Policy CD-3.3 **Complete and Connected Network.** We require that pedestrian, vehicular, and bicycle circulation on both public and private property be coordinated to provide connections internally and externally to adjacent neighborhoods and properties (existing and planned) through a system of local roads and trails that promote walking and biking to nearby destinations (including existing and planned parks, commercial areas, and transit stops) and are designed to maximize safety, comfort, and aesthetics.

Policy CD-3.5 **Active Frontages**. We create lively pedestrian streetscapes by requiring primary building, business, and residential entrances, outdoor dining, and storefronts be located on ground floors adjacent to sidewalks or public spaces and designed to maximize safety, comfort, aesthetics, and the intended functionality (as defined by the Place Type).

City of Ontario Municipal Code

The City of Ontario Municipal Code (OMC)[4] contains all the regulations of the City, that were codified and adopted as Ordinances by the City Council. The OMC is continually updated as the City continues to develop and transform. The OMC contains various requirements related to aesthetics and development design, many of which are relevant to the Project. Specifically, Title 9 of the OMC is known as the Ontario Development Code (ODC)[5] and contains zoning information, development standards, and design guidelines for each of the land use categories identified in TOP. The ODC is enacted to assist in the implementation of Federal and State planning, assist in TOP, zoning, development, subdivision, and environmental laws, and guide the orderly development of the City in a manner that promotes and protects the public health, safety, comfort, convenience, prosperity, and welfare of its inhabitants. It regulates the type, intensity, function, and appearance of all land uses in the City and is the main tool utilized to shape the physical form of development.

City of Ontario Development Code

Development and Subdivision Regulations Chapter 6.01-6.03[6]

In the ODC, Chapter 6.01.015-13 of the District Standards and Guidelines section discusses proper lighting, glare, and aesthetics sections that a project must adhere to when in development. Project development shall incorporate lighting fixtures that are decorative and are designed to eliminate adverse impacts of light spillover and promote safe vehicular and pedestrian access. Light fixtures shall be full cut-off fixtures to prevent glare and light spill off the project site onto adjacent properties, buildings, and roadways. Pedestrian-level pole-mounted lighting, bollard lighting, ground-mounted lighting, or other low, glare-controlled fixtures mounted on buildings or walls shall be used to light pedestrian walkways.

[5] City of Ontario. ND. *Development Code – Chapter 1.0: Development Code Enactment and General Provisions, Enactment and General Provisions*. https://www.ontarioca.gov/sites/default/files/Ontario-Files/Planning/Documents/Planning%20Documents/Development%20Code/Chapter%201.0%20Development%20Code%20Enactment%20and%20General%20Provisions.pdf. (accessed January 2023).

[6] City of Ontario. ND. *Development Code – Chapter 6.0: Development and Subdivision Regulations, Development and Subdivision Regulations*. https://www.ontarioca.gov/sites/default/files/Ontario-Files/Planning/Documents/Planning%20Documents/Development%20Code/Chapter%206.0%20Development%20and%20Subdivision%20Regulations.pdf. (accessed January 2023).

Pole-mounted, building-mounted, or tree-mounted lighting fixtures shall be no more than 12 feet in height. Bollard-type lighting shall be no more than 4 feet in height.

For building color, exteriors shall incorporate colors that are of compatible hues and intensities. Color schemes shall tie building elements together, relate separate buildings within the same development, and enhance the architectural form of a building. Exterior building colors shall be low-reflecting and subtle. Furthermore, overly intense, overly bright, or fluorescent or day-glow colors, shall not be used on a building exterior, as determined by the Planning Director. The exterior building color of a new development project shall be reviewed and approved in conjunction with the approval of the structure by the Approving Authority. Development projects consisting of multiple buildings shall incorporate colors that are coordinated between structures, utilizing compatible hues and intensities. The final review and approval of paint colors, utilizing a color test, may be required by the City, prior to painting a building. All building mechanical equipment and appurtenances, including, but not limited to, meters, flues, vents, gutters, and utilities, shall match or complement the permanent color of the surface from which they are attached or projected.

Off-street parking and loading regulations must provide accessible, attractive, secure, properly lighted, and well-maintained parking facilities. They are to reduce traffic congestion and hazards caused by the loading and unloading of trucks on public streets and the shortage of parking spaces. Lighting must alleviate or prevent traffic congestion caused by shortage of parking spaces and the loading and unloading of trucks on public streets; ensure that off-street parking and loading facilities are provided for new land uses and the expansion of existing land uses in proportion to the needs of the land uses they serve; and ensure that off-street parking and loading facilities are designed in a manner that will result in maximum efficiency, protect the public safety, provide for the special needs of the physically handicapped, and where appropriate, insulate surrounding land uses from their impact.

Parking lot lighting is required for all off-street parking facilities and shall be provided with nighttime security lighting pursuant to OMC Section 4-11.08 (Special Residential Building Provisions) and Section 4-11.09 (Special Commercial/Industrial Building Provisions), designed to confine emitted light to the parking areas. Parking facilities shall be lighted from sunset until sunrise, daily, and shall be operated by a photocell switch. Lighting levels shall be measured with a direct-reading portable light meter. The equipment used must allow accurate measurements, with all measurements made after dark with the lights on and then again with the lights off. The difference between the two readings shall then be compared to the applicable standard for maximum permitted illumination. All parking lot lighting fixtures shall be decorative. Along pedestrian movement corridors, the use of decorative low-mounted bollard light standards, which reinforce pedestrian scale, shall be used. Unless intended as part of a master lighting program, no operation, activity, or lighting fixture shall create illumination on any adjacent property. The maximum permitted height of luminaires within a parking lot shall be as follows:

- **No Cutoff Luminaire**. When a light source or luminaire has no cutoff (the point at which all light rays are completely shielded), the maximum permitted height of the luminaire shall be 14 feet.
- **Ninety Degree or More Cutoff Luminaire**. When a luminaire has a total cutoff of light at an angle of 90 degrees or greater, the maximum permitted height of the luminaire shall be 24 feet.

- **Less than 90-Degree Cutoff Luminaire**. When a luminaire has a total cutoff of light at an angle of less than 90 degrees, the maximum permitted height of the luminaire shall be 30 feet.

4.1.4 Impact Thresholds and Significance Criteria

State CEQA Guidelines Appendix G contains the Environmental Checklist Form, which includes questions concerning aesthetics. The questions presented in the Environmental Checklist Form have been utilized as significance criteria in this section.

Accordingly, the Project would have a significant effect on the environment if it would:

- Have a substantial adverse effect on a scenic vista;
- Substantially damage scenic resources, including but not limited to, trees, rock outcroppings, and historic buildings within a state scenic highway;
- In nonurbanized areas, substantially degrade the existing visual character or quality of public views of the site and its surroundings (Public views are those that are experienced from publicly accessible vantage point). If the project is in an urbanized area, would the project conflict with applicable zoning and other regulations governing scenic quality; or
- Create a new source of substantial light or glare which would adversely affect day or nighttime views in the area.

Methodology and Assumptions

The Project site is evaluated against the aforementioned significance criteria/thresholds, as the basis for determining the impact's level of significance concerning aesthetics. This analysis considers the existing regulatory framework (i.e., laws, ordinances, regulations, and standards) that avoid or reduce the potentially significant environmental impact. Where significant impacts remain despite compliance with the regulatory framework, feasible mitigation measures are recommended, to avoid or reduce the potentially significant environmental impacts at the Project site.

Approach to Analysis

This analysis of impacts on aesthetic resources examines the temporary (i.e., construction) and permanent (i.e., operational) effects based on significance criteria/threshold's application outlined above. For each criterion, the analyses are generally divided into two main categories: (1) temporary impacts and (2) permanent impacts. Each criterion is discussed in the context of Project site and the surrounding characteristics and geography. The impact conclusions consider the potential for changes in environmental conditions, as well as compliance with the regulatory framework enacted to protect the environment.

The baseline conditions and impact analyses are from review of Project site plan, maps, and drawings; analysis of aerial and ground-level photographs; and review of various data available in public records, including local planning documents. The determination that a Project component would or would not result in "substantial" adverse effects on scenic resources or visual character considers the site's aesthetic resource value and the severity of the Project component's visual impact (e.g., the nature and duration of

the impact). For example, a Project component resulting in a severe impact on a site with a low aesthetic resource value would result in a less than significant impact concerning scenic or visual character. In other words, new conspicuous structures or visual changes in areas with a low aesthetic resource value may not necessarily result in substantial adverse effects on visual resources.

4.1.5 Plans, Programs, and Policies

Refer to above discussion regarding existing Regulatory Framework.

4.1.6 Impacts and Mitigation Measures

Impact 4.1-1 Would the Project have a substantial adverse effect on a scenic vista?

Level of Significance: Less Than Significant

Specific Plan – Phase I

Construction and Operations

A scenic vista can be defined as a viewpoint that provides expansive views of a highly valued landscape for the public's benefit. From the viewshed point of view, looking north from Schaefer Avenue are the foothills of the San Gabriel and San Bernardino Mountains. The Project site is surrounded by areas with varying agricultural and residential densities; previously developed land containing dairy farms, and multiple commercial and residential buildings, and an airport.

Scenic vistas include the San Gabriel Mountains and the San Bernardino National Forest, which are located north of the City, approximately 11.5 miles north from the Project site. The Project is in the southwest portion of the City, opposite of the two scenic vistas. Construction of the Project site would result in alterations to the existing scenic vistas views from the Project site. It would result in temporary changes to the visual characteristics of the site as viewed from Edison Avenue facing north toward Schaefer Avenue. Visual changes would include alterations in the appearance of the foreground to viewers looking across the site toward the San Gabriel Mountains and views from the residences looking across the site to the south and southwest away from the San Gabriel Mountains. Views of the mountains from Edison Avenue to the north are already partially obscured by intervening agricultural development and existing power lines.

While construction activities on the Project site would modify foreground views as observed by some viewers, considering the existing disturbed nature of the site, developed nature of surrounding areas, and the current partially obscured views from existing off-site development, the changes the construction activities would represent are not considered to be substantial. The proposed Project, although different from some surrounding views, would be within an existing urban footprint. Additionally, because most views are already obscured, limited, and short-in duration, the views as seen by the majority of viewers would not be significantly adversely affected. Therefore, while construction of the Project site would change the existing views toward the mountains, impacts associated with adversely affecting a scenic vista would be less than significant.

Upon completion of construction on the Project site, the buildings would be a new permanent visual element in the environment. The new structures and operations associated with the Project would change the foreground views of the San Gabriel Mountains as observed from viewers looking north, across the site. However, Project development would occur within developed area of the City, where views are already partially obstructed by existing development, powerlines, utility poles, etc.

The Project specific plan also includes design guidelines addressing architecture, landscape and lighting (Specific Plan Chapter 5, Design Guidelines). Pursuant to the Project specific plan design guidelines and development standards, Project development would not exceed the maximum building height allowed for the business park district, 45 feet, and mixed-use district, 55 feet, and would be setback, allowing for unobstructed scenic views. Additionally, implementation of TOP 2050 policies and adherence to the City's Municipal Code, would ensure that the development of Phase I does not substantially degrade scenic vistas in the City. For example, the Project would comply with TOP 2050 Policy CD-1.5, which would ensure that major north-south streets would be designed and redeveloped to feature views of the San Gabriel Mountains. Therefore, while the Project site structures and associated operations would change the existing views toward the mountains, impacts associated with adversely affecting a scenic vista would be less than significant. No mitigation is required.

Specific Plan – Phase II Future Development Areas

Construction and Operations

The Phase II area is being evaluated only at a programmatic level, and there are no specific development proposals at this time. Development of Phase II would add to the new permanent visual element in the environment when Planning Areas 2B and 3B are completed – similar to the discussion of Phase I above. While the structures and associate operations associate with Phase II would alter the existing visual characteristics of the site, impacts affecting a scenic vista would be less than significant. Furthermore, the proposed Project Specific Plan land use designations within Phase II are the same land use designations as contained in TOP 2050. Accordingly, no mitigation is required other than compliance with applicable plans, policies and programs, including the proposed Specific Plan and TOP 2050.[7]

Conclusion

As noted above, the Project would not significantly impact a scenic vista. The Project specific plan proposes the same land uses as contained in the City's TOP 2050. Impacts would be less than significant. No mitigation is required other than compliance with applicable plans, policies and programs, including the proposed Specific Plan and TOP 2050.[8]

Mitigation Measures

No mitigation is necessary.

[7] City of Ontario. 2022. *TOP 2050, Final Supplemental Environmental Impact Report, Section 5.1, Aesthetics*. https://www.ontarioca.gov/sites/default/files/Ontario-Files/Planning/The%20Ontario%20Plann/EIR/Final_DraftSEIR_TOP2050.pdf. (accessed January 2023).

[8] Ibid.

Impact 4.1-2 Would the Project Substantially damage scenic resources, including, but not limited to, trees, rock outcroppings, and historic buildings within a state scenic highway?

Level of Significance: Less Than Significant

Specific Plan – Phase I

Construction and Operations

There are no officially designated state scenic highways within the City.[9] As stated above, the Project site is bordered by Euclid Avenue (SR-83), which connects to SR-60 and I-10 to the north, I-15 approximately 5.5 miles to the east, and SR-71 approximately 4.3 miles to the west and approximately 4.7 miles directly south. SR-71 connects the Project to SR-91 in unincorporated Riverside County. These segments have not been designated as scenic highways by the California Department of Transportation.[10] The nearest designated state scenic highway to the Project site is approximately 12.0 miles southwest of the Project specific plan site.

The Project site's surrounding area was previously developed with commercial, residential, and mixed-use buildings and structures. According to the cultural study found in ***Section 4.5: Cultural Resources*** (***Appendix D: Cultural and Paleontological Resources Assessment***), the Project site contains a dairy farm which is not historically significant. In addition, the Project's biological resources study identified various mature trees on the site, but these do not appear to be "heritage trees" requiring mitigation. Furthermore, the majority of trees on the site are ornamental trees located at the existing nursery on-site, which the nursery will be relocated prior to site development. Prior to site development, a heritage tree survey will be **completed,** and trees relocated or mitigated if required (see ***Appendix C: Biological Resources Technical Report*** and ***Section 4.4: Biological Resources***). Regardless, on-site trees are not located in proximity to a scenic highway. Therefore, no scenic resources such as trees, rock outcroppings and historical buildings are known to exist on the Project site adjacent to a state scenic highway. A less than significant impact is expected to occur.

Specific Plan – Phase II Future Development Areas

Construction and Operations

The Phase II area is being evaluated only at a programmatic level, and there are no specific development proposals at this time. Phase II would add to the new permanent visual element in the environment when Planning Areas 2B and 3B are completed. While the structures and associate operations associated with Phase II would alter the existing visual characteristics of the site, impacts affecting a scenic highway would be less than significant, as no scenic highways exist in the Project area. Furthermore, the proposed Project Specific Plan land use designations are the same land use designations as contained in TOP 2050. No

[9] California Department of Transportation. 2022. *Scenic Highways Map*. https://dot.ca.gov/programs/design/lap-landscape-architecture-and-community-livability/lap-liv-i-scenic-highways. (accessed January 2023).
[10] Ibid.

mitigation is required other than compliance with applicable plans, policies and programs, including the proposed Specific Plan and TOP 2050.[11]

Conclusion

As noted above, the Project would not significantly impact a scenic highway, as no scenic highways exist in the Project area. The Project's impacts would be less than significant. No mitigation is required other than compliance with applicable plans, policies and programs, including the proposed Specific Plan and TOP 2050.[12]

Mitigation Measures

No mitigation is necessary.

Impact 4.1-3 ***Would the Project in nonurbanized areas, substantially degrade the existing visual character or quality of public views of the site and its surroundings? (Public views are those that are experienced from publicly accessible vantage point). If the project is in an urbanized area, would the project conflict with applicable zoning and other regulations governing scenic quality?***

Level of Significance: Less Than Significant

Specific Plan - Phase I

Construction and Operations

The existing visual character of the Project site is defined primarily by agricultural uses and related structures. The site is designated as Business Park, Mixed-Use, and Open Space – Non-Rec, in the City's TOP 2050 Land Use Map.[13] The Project is located in an urbanizing area and is subject to the City's TOP 2050 and Development Code governing scenic quality. The City's TOP 2050 Community Design Element establishes multiple policies that protect scenic resources and promote high quality, visually compatible development, that the Project would adhere to. For example, Policy CD 1-5 requires that "all major north-south streets be designed and redeveloped to feature views of the San Gabriel Mountains, which are part of the City's visual identity and a key to geographic orientation. Such views should be free of visual clutter, including billboards and may be enhanced by framing with trees;" Policy CD-2.1, encourages "all development projects to convey visual interest and character through building volume, massing, and height to provide context-appropriate scale and proportion; a true architectural style which is carried out in plan, section, and elevation through all aspects of the building and site design and appropriate for its setting; and exterior building materials that are articulated, high quality, durable, and appropriate for the architectural style." Lastly, Policy CD 2-9 encourages "durable, sustainable, and drought-tolerant

[11] City of Ontario. 2022. *TOP 2050, Final Supplemental Environmental Impact Report, Section 5.1, Aesthetics*. https://www.ontarioca.gov/sites/default/files/Ontario-Files/Planning/The%20Ontario%20Plann/EIR/Final_DraftSEIR_TOP2050.pdf. (accessed January 2023).
[12] Ibid.
[13] City of Ontario. 2022. *TOP 2050, Figure LU-01, Official Land Use Plan*. https://www.ontarioca.gov/sites/default/files/Ontario-Files/Planning/The%20Ontario%20Plann/Land%20Use/Figure%20LU-01%20Official%20Land%20Use%20Plan_0.pdf. (accessed January 2023).

landscaping materials and designs that enhance the aesthetics of structures, create and define public and private spaces, and provide shade and environmental benefits."

The City's TOP 2050 measures governing scenic quality, including those noted above, ensure protection of scenic resources and promote visually compatible and appealing development. These policies are implemented through Development Code Chapter 6.0, Development and Subdivision Regulations, et al.[14] The City would assure that the Project, as implemented, contains Development Regulations and Design Guidelines that would conform to provisions of the City's TOP 2050 and Development Code. All subsequent development within the Project site would also be required to comply with the Specific Plan Development Regulations and Design Guidelines addressing visual and scenic qualities (Specific Plan Chapter 5, Design Guidelines). Conformance with TOP 2050, Development Code, and Project Specific Plan would minimize the potential for the Project to substantially degrade the existing visual character or quality of public views of the site and its surroundings such that any impact would be less than significant.

Specific Plan- Phase II Future Development Areas

Construction and Operations

Refer to discussion for Phase I. The same policies, ordinances, and codes described above would apply to Phase II. The Phase II area is being evaluated only at a programmatic level, and there are no specific development proposals at this time. Conformance with TOP 2050, Development Code, and Project specific plan would minimize the potential for the Project to substantially degrade the existing visual character or quality of public views of the site and its surroundings such that any impact would be less than significant. Further the proposed Project Specific Plan proposes the same land uses as contained in the City's TOP 2050. Impacts to aesthetic resources, including visual character and scenic quality, would be less than significant.

Conclusion

As noted above, conformance with TOP 2050, Development Code, and Project specific plan would minimize the potential for the Project to result in substantial degradation of the Project site's visual character. Therefore, no significant impacts would occur. No mitigation is required other than compliance with applicable plans, policies and programs, including the proposed Specific Plan and TOP 2050.[15]

Mitigation Measures

No mitigation is necessary.

Impact 4.1-4 Would the Project create a new source of substantial light or glare which would adversely affect day or nighttime views in the area?

[14] City of Ontario. ND. *Development Code – Chapter 6.0: Development and Subdivision Regulations, Development and Subdivision Regulations.* https://www.ontarioca.gov/sites/default/files/Ontario-Files/Planning/Documents/Planning%20Documents/Development%20Code/Chapter%206.0%20Development%20and%20Subdivision%20Regulations.pdf. (accessed January 2023).

[15] City of Ontario. 2022. *TOP 2050, Final Supplemental Environmental Impact Report, Section 5.1, Aesthetics*. https://www.ontarioca.gov/sites/default/files/Ontario-Files/Planning/The%20Ontario%20Plann/EIR/Final_DraftSEIR_TOP2050.pdf. (accessed January 2023).

Level of Significance: Less Than Significant

Specific Plan - Phase I

Construction and Operations

Spill light occurs when lighting fixtures such as streetlights, parking lot lighting, exterior building lighting, and landscape lighting are not properly aimed or shielded to direct light to the desired location and light escapes and partially illuminates a surrounding location.

Glare is the result of improperly aimed or blocked lighting sources that are visible against a dark background such as the night sky. Glare may also refer to the sensation experienced looking into an excessively bright light source that causes a reduction in the ability to see or causes discomfort. Glare generally does not result in illumination of off-site locations but results in a visible source of light viewable from a distance. Glare could also occur from building materials of the new structures, including glass and other reflective materials.

The Project site is currently occupied by agricultural uses, including the raising of livestock, dairy farming activities, and a commercial nursery. Existing uses surrounding the Project site are similar to those on the site. Ongoing crop farming is located to the north of the Project site and a vacant property that was a former dairy farm is located to the east of the site. The property to the south is currently utilized for residential, farming, or trucking related uses. North across Schaefer Avenue is an existing dairy farm; south across Edison Avenue is an existing trucking facility; east across Sultana Avenue is vacant land and an existing trucking facility; west across Euclid Avenue, is the City of Chino with existing commercial and residential uses, and a truck/trailer storage yard. Sources of light and glare exist minimally in the Project's immediate vicinity. Existing lighting sources include outdoor lighting and lighting emitted from the indoors from adjacent developments, and vehicle headlights from adjacent and surrounding roadways. The urbanizing nature of the Project area would lead to a high baseline of light and glare from surrounding development and vehicle lights traveling at night. Construction of Phase I of the Project site would be limited to daytime hours, and nighttime lighting may be utilized for security purposes. However, all lighting and light fixtures, including parking lot lighting, security lighting and decorative lighting, may be indirect or diffused, or, if not, shall be shielded or directed away from nearby sensitive receptors. Therefore, no short-term impacts associated with light, and glare would occur. These lights would be used to improve visibility and safety on the site and would be directed to maximize site visibility and minimize glare to sensitive receptors. Lighting would also be properly screened to avoid further impact to nearby receptors. Additionally, the Project includes design guidelines and standards for lighting of on-site areas (Specific Plan Chapter 5, Design Guidelines). The Project requires lighting fixtures to be selected and located to confine the area of illumination to within the site boundaries, including lighting for parking areas, pedestrian walkways, graphics and signage, architectural and landscape features, and any additional exterior areas. This would reduce the potential for spill light. All subsequent development within the Project site would be required to conform with the Project Development Regulations and Design Guidelines addressing light, glare, and overspill from the Project Specific Plan.

In accordance with OMC Sections 4-11.08, 4-11.09, and 6.03.050 (A), all parking facilities developed shall be provided with nighttime security lighting and designed to confine emitted light to the parking areas.

This lighting may cause slight glare to the surrounding residences and vehicles passing along the bordering roadways. The maximum permitted height of luminaires within a parking lot shall not exceed a height of 14 feet when there is no cutoff involved. If a ninety degree or greater cutoff is enacted, the maximum height shall not exceed that of 24 feet. Anything less than ninety degrees of cutoff, the maximum height of luminaire shall be 30 feet.

Consistent with the City's Development Code, all lighting used on the Project site is required to be directed and/or shielded to prevent the light from adversely affecting adjacent properties, and no structures or features that create adverse glare effects are permitted. Thus, all exterior lighting would be shielded/hooded to prevent light trespass onto nearby properties. Additionally, the Project would use a variety of non-reflective building materials, and although some new reflective improvements (i.e., windows and building front treatments) would be introduced to the site, the Project would not be a source of glare in the area. Therefore, long-term impacts associated with light, and glare would be less than significant.

Specific Plan – Phase II Future Development Areas

Construction and Operations

Refer to discussion for Phase I. The same policies, ordinances, and codes described above would apply to Phase II. The Phase II area is being evaluated only at a programmatic level, and there are no specific development proposals at this time. The proposed Project Specific Plan proposes the same land uses as contained in the City's TOP 2050. Impacts to aesthetic resources, including light and glare, would be less than significant.

Conclusion

As noted above, the Project would not result in significant light and glare impacts, and the Project is consistent with existing City TOP 2050 and zoning designations. Therefore, no significant impacts would occur. No mitigation is required other than compliance with applicable plans, policies and programs, including the proposed Specific Plan and TOP 2050.[16]

Mitigation Measures

No mitigation is necessary.

4.1.7 Cumulative Impacts

The conversion of the Specific Plan area from dairy/agricultural use to business park and mixed uses would contribute to a change in the visual character of the Project area.

The cumulative change in visual condition that would result from the Specific Plan, in combination with nearby projects would not be considered adverse, because the Specific Pan would implement design features and the City's Development Code with respect to architecture, landscaping, signs, lighting, and other related items. The City's Development Code regulations have the goal of improving the visual quality

[16] Ibid.

of the City by providing guidelines to ensure consistent, quality development. Thus, with implementation of the applicable Development Code regulations and the Specific Plan design guidelines, implementation of the Project would result in a less than significant cumulatively considerable impact related to degradation of the existing visual character or quality of the site and its surroundings.

The cumulative study area for light and glare for the Project area is immediately adjacent to lands that could receive light or glare from new development within the Project or could generate daytime glare or nighttime lighting that would be visible within the Project area. All such areas contain a variety of sources of nighttime lighting, such as roadways, vehicle lights, exterior security lighting, as well as sources of daytime glare, such as glass windows on buildings. Because cumulative projects would result in more intense development than currently exists, the Project, in combination with past, present, and reasonably foreseeable future projects could create significant cumulative nighttime lighting and daytime glare impacts. However, application of the City's Development Code regulations require compliance with light and glare performance standards that would avoid significant effects. These regulations state that lighting shall be shielded to prevent light from shining onto adjacent properties or inclusion of features that could create glare. Further, the TOP 2050 Final Supplemental EIR found that, with implementation of Community Design Element policies, the City's Development Code, and Specific Plans (as required by the General Plan), impacts to the character and quality of the City (including the proposed Specific Plan area) would be less than significant. Here, with implementation of the existing City regulations, the development that would occur by the related projects would not result in a cumulatively considerable contribution of light and glare. Thus, the cumulative effects of development from the Project in combination with cumulative projects related to light and glare are less than significant.

4.1.8 Significant Unavoidable Impacts

No significant unavoidable aesthetic impacts have been identified.

4.2 AGRICULTURE AND FORESTRY

4.2.1 Introduction

This section of the Draft Environmental Impact Report (EIR) identifies and evaluates the Euclid Mixed Use Specific Plan Project's (Project) potential impacts to agriculture and forestry resources in the City of Ontario (City). This section will describe the environmental setting of the Project along with any applicable federal, state, regional, and local regulations. Direct environmental impacts on agricultural and forestry resources will be assessed for significance as well as any potentially cumulative impacts associated with the Project development. The existing environment was based on the conditions present at the time that the Notice of Preparation was created and distributed on February 10, 2023. This was used as the baseline against which to compare potential impacts associated with implementation of the Project. As necessary and to the extent feasible, mitigation measures will be provided to minimize any potentially significant environmental impact to less than significant levels.

Data used in preparation of this section were taken from various sources including the California Department of Conservation (DOC) Farmland Mapping and Monitoring Program, The Ontario Plan (TOP) 2050 Final Supplemental EIR, other environmental analyses prepared by the City, and information in the Euclid Mixed Use Specific Plan (Project Specific Plan).

This Section and environmental discussion use information from the following City documents:

- The Ontario Plan 2050
- City of Ontario Municipal Code
- City of Ontario TOP 2050 Final Supplemental EIR

4.2.2 Environmental Setting

Regional

According to the California DOC's latest Farmland Conversion Report, Southern California comprised 38 percent of the Statewide urban and other development increase (17,125 acres). Five of the top ten urbanizing counties were in Southern California with San Bernardino County (County) having 3,502 acres.[1]

The Southern California region was second in terms of irrigated land to urban land shifts, with 2,695 acres of conversion from irrigated land to urban land.[2]

The County experienced a net loss of 850 acres of Important Farmland and an increase in 3,921 acres of new Urban and Built-Up land. In general, agricultural land has declined in the County region due to the profitability of dairy businesses in the Central Valley and because urban development has pushed agricultural development from the County.[3] Land uses surrounding the City mostly support industrial and

[1] California Department of Conservation. 2023. *2014-2016 Farmland Conversion Report*. https://www.conservation.ca.gov/dlrp/fmmp/Pages/2014-2016_Farmland_Conversion_Report.aspx. (accessed March 2023).

Source: California Department of Conservation. 2023. *Alternate San Bernardino County 2016-2018 Land Use Conversion, Table A-28.* https://www.conservation.ca.gov/dlrp/fmmp/Documents/fmmp/pubs/2016-2018/alternate_conversion/Alternate_San_Bernardino_County_2016-2018_Land_Use_Conversion.pdf. (accessed April 2023).

Additionally, the County Department of Agriculture/Weights and Measures (AWM) 2021 Annual Crop Report provides an overview of agricultural production in the County, pursuant to the provisions of Section 2272 and Section 2279 of the California Food and Agricultural Code.[4] This report provides the estimated production, acreage, and gross value of the agricultural industry in the County for the year 2021. ***Table 4.2-2: San Bernardino County Top Ten Agricultural Products (by dollar value)***, presents information from the County AWM 2021 Annual Crop Report summarizing primary sources of County agricultural production by dollar value. In 2021, the total value of agricultural commodities in the County was $350,857,419.

This total represents a decrease in value from 2020 of $69,393,581. Crop value varies from year to year based on production, market fluctuations and weather. The decrease in crop value in 2021 is primarily

[4] County of San Bernardino Department of Agriculture/Weights & Measures. 2023. *2021 Annual Crop Report*. https://awm.sbcounty.gov/wp-content/uploads/sites/84/2022/10/N4454-AWM-CROP-REPORT-2021-Web.pdf. (accessed March 2023).

attributed to a decrease in the price for navel oranges, a decrease in vegetable crops due to increased urban development in the west end and a decrease in animal products due to the closure of 13 egg farms and 8 dairies. Agriculture remains a critical component of the economy in the County. The strength of agriculture contributed to the diversity of agricultural crops produced in the County.

The City lies in the County AWM "Central," "West End North," and in portions of the "West End South," in the County. These areas of the County are responsible for most of the percentage (by dollar value) of the County's total agricultural production.[5]

Table 4.2-2: San Bernardino County Top Ten Agricultural Products (by dollar value)

2021 Rank	Product Value	Value	% of Total	2020 Rank
1	Milk & Milk Products	$112,451,000	26.76%	1
2	Cattle, Calves & Dairy Cull	$55,941,000	13.31%	2
3	Eggs	$50,526,000	12.02%	3
4	Replacement Heifers	$23,016,000	5.48%	4
5	Indoor Decoratives	$18,127,000	4.31%	6
6	Trees & Shrubs (Incl. Roses)	$17,161,000	4.08%	7
7	Alfalfa (All Types)	$15,612,000	3.71%	8
8	Turf	$12,427,000	2.96%	9
9	Citrus Fruit	$11,814,000	2.81%	5
10	Groundcover & Bedding Plants	$8,198,000	1.95%	10
Total Top Ten: $343,835,000				

Source: County of San Bernardino Department of Agriculture/Weights & Measures. 2023. *2021 Annual Crop Report*. https://awm.sbcounty.gov/wp-content/uploads/sites/84/2022/10/N4454-AWM-CROP-REPORT-2021-Web.pdf (accessed March 2023).

Southern California Agricultural Land Foundation Preserves

The San Bernardino County Agricultural Land Preserves within the City were managed by the Southern California Agricultural Land Foundation (SoCALF) until 2006, when the County took over management of these parcels. Hence, these areas are still referred to as SoCALF Preserves in the City. The SoCALF Preserves were established and maintained with funds from the 1988 Park Bond Act regulations. Much of the original 15,000-acre area of SoCALF Preserves is being developed by both the City and Chino. An amount of $20 million was paid to the County from the State of California to establish and fund these lands if they remained in agricultural use within the San Bernardino County Agriculture Land Preserve (California Public Resources Code Section 5905–5907). When the SoCALF Preserves are no longer being used for agricultural purposes, these funds must be returned to the State or used to purchase property of equal size and similar use within the San Bernardino County Agriculture Land Preserve. Approximately 200 acres are designated as SoCALF Preserves in the New Model Colony (NMC), now known as Ontario Ranch.

The City recognizes the importance of existing agricultural activities, and TOP 2050 includes goals and policies implemented to ensure protection of these agricultural resources. However, the City does not have any prohibitions that prevent the transition of agricultural land uses to urban land uses. While existing agricultural uses would be allowed to persist per the TOP 2050, the City's land use plan does not

[5] Ibid.

designate these areas for agricultural land uses. Although the intent of the SoCALF Preserves was to preserve Important Farmland in perpetuity in this area of the County, the preserves do not guarantee that Important Farmland would not be converted to nonagricultural uses within the City.

When the NMC was annexed in 1999, the City zoned the area as Specific Plan, which requires the area to be developed with specific plans. Once a specific plan is implemented in an area, the provisions of that specific plan will determine the land use, which will be consistent with the TOP 2050. The land use plan for the City designates these areas for nonagricultural land uses provided that equivalent Important Farmland is preserved elsewhere, or funds associated with the 1988 Park Bond Act are returned. Important farmland outside of these preserves may be converted to nonagricultural uses without requiring the county to repay the funding to the state or relocating the farmland elsewhere in the San Bernardino County Agricultural Land Preserve. Consequently, buildout of TOP 2050 would replace the existing agricultural land in an economically productive way that would serve the growing population. Thus, the City's future development emphasizes mixed-use, commercial, industrial, and residential projects rather than supporting the continuation of agricultural uses, which are becoming less economically viable.

Local Agriculture and Farmland

Table 4.2-3: Existing Farmland in Ontario, presents information from the latest California DOC Farmland Mapping and Monitoring Program for the City on farmland within the City.

Table 4.2-3: Existing Farmland in Ontario

Land Use Category	Acres
Prime Farmland	2,008
Farmland of Statewide Importance	40
Unique Farmland	266
Farmland of Local Importance	29
Total Farmland in Ontario	**2,342**

Source: City of Ontario. 2022. *TOP 2050 Final Supplemental Environmental Impact Report, Section 5.2, Agriculture and Forestry, Table 5.2-2*. https://www.ontarioca.gov/sites/default/files/Ontario-Files/Planning/The%20Ontario%20Plann/EIR/Final_DraftSEIR_TOP2050.pdf. (accessed March 2023).

Original Model Colony

Historically, agricultural lands made up much of the City, including land for citrus, olive, dairy farms, and vineyards, however, many of the developed portions of the Original Model Colony (OMC) have replaced agricultural land uses with residential, commercial, and industrial land uses. Limited agriculture land uses are currently permitted in areas zoned for Residential-Agricultural (AR), Residential Estate (RE), Public Facility (PF), Open Space (OS), Commercial (C-1 to C-4), and Industrial (M1 to M3) land uses, though these zoning designations are not intended for large-scale farming/agricultural operations. Today, very little Farmland remains in the OMC.

Ontario Ranch (New Model Colony)

The Ontario Ranch area covers 8,200 acres of the former 14,000-acre San Bernardino Agricultural Preserve, which was historically used for dairy or cattle farming. The Agricultural Preserve was divided and incorporated into the cities of Chino, Chino Hills, and Ontario in 1999, and the City named its portion

the "New Model Colony." There are four sections of agricultural preserve in the Ontario Ranch, totaling 200 acres in the southwestern portion of the City, where the Project site is located. The change of land use from agricultural to nonagricultural has mostly been due to increasing population, which has put pressure on cities in southern California to turn Important Farmland into uses that would support residential, economic, and employment needs. Dairies and farms in the City have also found that they are outcompeted by dairies and farms in the Central Valley, so they have either converted their land to more productive, nonagricultural uses or they have left the City for the Central Valley.

California Land Conservation Act (Williamson Act)

The Ontario Ranch has areas that are currently agriculture preserves under contract with County through the Williamson Act of 1965. The preservation of agricultural land through Williamson Act contracts today in the City is meant to discourage premature and unnecessary conversion to urban uses. Once the Ontario Ranch annexed to the City, the City became the administrating entity for the Williamson Act contracts. Under the Act, either the landowner or the planning jurisdiction (the City) has the ability to submit the property for nonrenewal. Property owners in this area with Williamson Act contracts have filed for nonrenewal because of the declining profits from agriculture in the area and the potential development of these lands with nonagricultural uses. Current nonrenewed contracts would expire between 2021 and 2027.

Project Site

The 84.1-acre Project site is currently occupied by agricultural uses, including the raising of livestock, dairy farming activities, and a commercial nursery. Dairy farming and agriculture have been the primary uses of the Project site since before the 1930s. The majority of the site exists as fallow or cultivated fields, with a nursery located along the western portion of the site. There is a private recreational vehicle storage facility in the southwestern portion of the site and a scrap yard at the intersection of Euclid Avenue and Edison Avenue. Numerous single family residential structures, as well as agricultural related buildings and open structures are located within the Project site. Two Southern California Edison (SCE) easements extend across the Project site. No permanent structures (besides the transmission towers) are located within the SCE easements; however, they have been used for various agricultural uses historically. According to the California Important Farmland Finder (CIFF), the Project site contains Prime Farmland and Other Land.[6] As stated previously, the Project site is not within a SoCALF Preserve. The northern and southern portion of the site is identified as "Prime Farmland," totaling 37.67 acres, and the remainder of the site is identified as "Other Land" totaling 40.93 acres, and "Urban and Built-Up Land" totaling 5.56 acres, under the Farmland Mapping and Monitoring Program (FMMP). FMMP Farmland categories are described below. There are no existing Williamson Contracts on site.[7] There is no Forest Land located on the Project site.

[6] California Department of Conservation. 2022. *California Important Farmland Finder*. https://maps.conservation.ca.gov/DLRP/CIFF/ (accessed March 2023).

[7] City of Ontario. 2022. TOP 2050 Final Supplemental Environmental Impact Report, Section 5.2, Agriculture and Forestry, Figure 5.2-2, Williamson Act Land. https://www.ontarioca.gov/sites/default/files/Ontario-Files/Planning/The%20Ontario%20Plann/EIR/Final_DraftSEIR_TOP2050.pdf (accessed March 2023).

Zoning Designations

According to the City's Zoning Map, the Project site's zoning designation is Specific Plan with an Agricultural (SP AG) Overlay.[8] Project buildout would include zoning regulations for development on the Project site which includes business park and mixed-use land uses. The SP-AG Overlay Zone (Right to Farm Ordinance) requires that each project address the appropriate transition of the area from agricultural uses to urban uses and include provisions for buffering between the proposed uses to protect agricultural and urban uses. Furthermore, Section 9-1.2700, SP-AG Overlay Zoning District of the Ontario Municipal Code, allows for the continuation of agricultural uses on an interim basis, until such time that urban development consistent with the TOP occurs.

Surrounding Uses

Existing uses surrounding the Project site are similar to those on the site. Ongoing crop farming is located to the north of the Project site and a vacant property that was a former dairy farm is located to the east of the site. The property to the south is currently utilized for residential, farming, or trucking related uses. North across Schaefer Avenue is an existing dairy farm; south across Edison Avenue is an existing trucking facility; east across Sultana Avenue is vacant land and an existing trucking facility; west across Euclid Avenue, is the City of Chino with existing commercial and residential uses, and a truck/trailer storage (see ***Figure 3-4: Surrounding Land Uses***).

4.2.3 Regulatory Setting

Federal

Farmland Protection and Policy Act

The Farmland Protection and Policy Act (FPPA), United States Code Title 7 Section 4201, was enacted in 1981 to minimize the loss of prime and unique farmlands because of federal actions by converting these lands to nonagricultural uses. It ensures that federal programs are consistent with state, local, and private programs, and policies to protect farmland.

State

Farmland Mapping and Monitoring Program

Pursuant to California Government Code Section 65570, the California Department of Conservation FMMP compiles important farmland maps for the state. These maps combine soil survey and current land use information to provide an inventory of agricultural resources in each county, based on data from the U.S. Department of Agriculture and Natural Resources Conservation Service. The maps show urbanized lands and a qualitative sequence of agricultural designations. County, state, and federal agencies have established several classifications of important agricultural land based on factors such as soil characteristics, climate, and water supply.

[8] City of Ontario. 2022. Zoning Map. https://www.ontarioca.gov/sites/default/files/Ontario-Files/Planning/Zoning%20Map/Zoning_20220415_Rev1.pdf. (accessed March 2023).

Prime Farmland. This has the best combination of physical and chemical features and can sustain long-term agricultural production. The land has the soil quality, growing season, and moisture supply needed to produce sustained high yields and it must have been used for irrigated agricultural production at some time during the four years prior to the mapping date.

Farmland of Statewide Importance. Similar to Prime Farmland but with minor shortcomings, such as greater slopes or less ability to store soil moisture. Land must have been used for irrigated agricultural production at some time during the four years prior to the mapping date.

Unique Farmland. Lesser-quality soils used for the production of the state's leading agricultural crops. This land is usually irrigated but may include non-irrigated orchards or vineyards. Land must also have been cultivated at some time during the four years prior to the mapping date.

Farmland of Local Importance. Land of importance to the local economy, as defined by each county's local advisory committee and adopted by its board of supervisors. This refers to all farmable lands in the county that do not meet the definitions of Prime, Statewide, or Unique. This includes land that is or has been used for irrigated pasture, dryland farming, confined livestock and dairy, poultry facilities, aquaculture, and grazing land.

Grazing Land. This has existing vegetation that is suited to the grazing of livestock. This category was developed in cooperation with the California Cattlemen's Association, the University of California Cooperative Extension, and other groups interested in the extent of grazing activities. The minimum mapping unit for Grazing Land is 40 acres.

Urban and Built-Up Land. This land is occupied by structures with a building density of at least one unit to 1.5 acres, or approximately six structures to a 10-acre parcel. This land is used for residential, industrial, commercial, construction, institutional, public administration, railroad, and other transportation yards, cemeteries, airports, golf courses, sanitary landfills, sewage treatment, water control structures, and other developed purposes.

Other Land. This land is not included in any other mapping category. Common examples of this type of land include low-density rural developments; brush, timber, wetland, and riparian areas not suitable for livestock grazing; confined livestock, poultry, or aquaculture facilities; strip mines or borrow pits; and water bodies smaller than 40 acres. Vacant and nonagricultural land surrounded on all sides by urban development and greater than 40 acres is mapped as Other Land.

Note that California Environmental Quality Act (CEQA) analysis focuses on impacts to three categories of mapped farmland—Prime Farmland, Farmland of Statewide Importance, and Unique Farmland. In this section, the term "mapped important farmland" refers to these three categories of farmland combined.

California Land Conservation Act (Williamson Act)

The California Land Conservation Act, or Williamson Act, was adopted in 1965 (California Government Code Section 51200 et. seq.). The act was established to encourage the preservation of agricultural lands in view of the increasing trend toward their "premature and unnecessary" urbanization. The act enables

counties and cities to designate agricultural preserves (Williamson Act lands) and offer preferential taxation to agricultural landowners based on the land's income-producing value. In return for the preferential tax rate, the landowner is required to sign a contract (Williamson contract) with the county or city agreeing not to develop the land for a minimum of 10 years. The contract is renewed automatically on its anniversary date unless a notice of nonrenewal or petition for cancellation is filed. There are no active Williamson Act Contracts within the Project site.[9]

Local

City of Ontario General Plan – The Ontario Plan 2050

The TOP 2050 Environmental Resources Element defines the ethic to guide management of the City's environmental resources; establishes goals for Environmental Infrastructure; maps environmental justice areas; and establishes policies that support system integration, resource conservation and regeneration, energy independence, environmental justice, and healthy communities. Included in TOP 2050 is the Policy Plan, which is a framework that would guide the City's future growth through the application of policies and goals. The following goals of TOP 2050 relate to visual and scenic resources. The TOP 2050 Environmental Resources Element contains policies which pertain to existing farms and improving the transition of farms to urban uses.

The following policy contained in the Environmental Resources Element is relevant to the Project:

Environmental Resources Element[10]

Goal ER-5 **Protected high value habitat and farming and mineral resource extraction activities that are compatible with adjacent development.**

Policy ER-5.3 **Right to Farm.** We support the right of existing farms to continue their operations within the Ontario Ranch.

Policy ER-5.4 **Transition of Farms.** We protect both existing farms and sensitive uses around them as agricultural areas transition to urban uses.

City of Ontario Municipal Code

The City of Ontario Municipal Code contains regulations pertaining to agricultural resources in the City, including:

- Ontario Development Code, Chapter 6, Development and Subdivision Regulations, Division 6.01, District Standards and Guidelines, Division 6.01, Section 6.01.035, Overlay Zoning Districts. The purpose of the SP-AG Overlay District is to accommodate the continuation of agricultural uses within the City, on an interim basis, and to allow for the establishment of general agricultural uses, such as dairies, within certain areas of concentrated agricultural use. This section regulates development in the NMC to create compatibility between agricultural and nonagricultural uses.

[9] Ibid.
[10] City of Ontario. 2022. *TOP 2050, Environmental Resources Element*. https://www.ontarioca.gov/about-ontario-ontario-plan-policy-plan/environmental-resources. (accessed March 2023).

It recognizes that specific plans would guide the development of the NMC. The overall goal of the ordinance is to prevent unnecessary urban development in the area unless the development has been planned. New construction, except for agricultural uses or agricultural-related activities, and single-family homes and building ancillary thereto, shall first require the adoption of a Specific Plan, which prescribes the allowed land uses, development regulations and guidelines, and sign regulations applicable to the Project.

4.2.4 Impact Thresholds and Significance Criteria

According to Appendix G of the State CEQA Guidelines, a project would normally have a significant effect on the environment if it would:

- Convert Prime Farmland, Unique Farmland, or Farmland of Statewide Importance (Farmland), as shown on the maps prepared pursuant to the Farmland Mapping and Monitoring Program of the California Resources Agency to non-agricultural use;
- Conflict with existing zoning for agricultural use, or a Williamson Act contract;
- Conflict with existing zoning for, or cause rezoning of, forest land (as defined in Public Resources Code Section 12220(g)), timberland (as defined by Public Resources Code Section 4526), or timberland zoned Timberland Production (as defined by Government Code Section 51104(g));
- Result in the loss of forest land or conversion of forest land to non-forest use; or
- Involve other changes in the existing environment which, due to their location or nature, could result in conversion of Farmland to non-agricultural use or conversion of forest land to non-forest use.

Methodology

Agricultural resources were assessed based on the California DOC's FMMP, which is a biennial report and mapping resource on the conversion of farmland and grazing land. The FMMP identified over 50 acres of Prime Farmland on the Project site. Williamson Act contract lands were identified by the DOC and the City; according to records from the City, there are no active Williamson Act Contracts within the Project site.

Development of the Project site was analyzed for conversion of Prime Farmland to non-agricultural use and changes in the existing environment that would remove farmland from agricultural production. The evaluation of impacts to agricultural resources is based on the amount of agricultural land on-site and in the surrounding area, and the effect the proposed Project would have on the existing resources.

4.2.5 Plans, Programs, and Policies

Refer to above discussion regarding existing Regulatory Framework.

4.2.6 Impacts and Mitigation Measures

Impact 4.2-1 ***Would the Project convert Prime Farmland, Unique Farmland, or Farmland of Statewide Importance (Farmland), as shown on the maps prepared pursuant to the Farmland Mapping and Monitoring Program of the California Resources Agency, to non-agricultural use?***

Level of Significance: Significant and Unavoidable

Specific Plan – Phase I and Phase II Future Development Areas

Construction and Operations

The Project Specific Plan includes Development Standards and Design Guidelines, where all subsequent development within the Project Specific Plan would be required to conform with these Standards and Guidelines (Specific Plan Chapter 5, Design Guidelines).

In accordance with the Project Specific Plan's Allowable Uses, commercial crop production and farming would be conditionally allowed within the Specific Plan Zoning District. Additionally, community gardens, urban farms, and related uses would be administratively allowed within the Business Park and Mixed-Use land use areas.

The proposed improvements would also include buffering from parking lots, loading and service areas in accordance with the provisions of the Project Specific Plan. These requirements support the City's planned orderly transition of existing agricultural uses to urban uses and include the following:

- Site Design: Screen parking areas and loading docks facing the street using landscape buffers planted with screen trees and drought-tolerant vegetation.
- Landscape Design: use landscaping to aid in the screening and buffering of mechanical equipment, trash collection areas, loading docks and outside storage from public view.
- Buffering and Screening: to alleviate the unsightly appearance of parking lots, loading, and service areas, buffering and screening design features would be used to enhance overall development.

The California DOC's FMMP is charged with producing maps for analyzing impacts on the state's agricultural resources. California's agricultural lands are rated based on soil quality and irrigation status. The classification system is contiguous with U.S. Department of Agriculture soil surveys and current land use. These maps are updated every two years, with the most recent data being from 2018. For CEQA purposes, the following categories are qualified as "agricultural land": Prime Farmland, Farmland of Statewide Importance, Unique Farmland, Farmland of Local Importance, and Grazing Land.[11]

The Project site has historically been used for agricultural purposes, primarily dairy operations, and field crops. A total of 37.67 acres is identified as Prime Farmland in the northern and southern portion of the site, and the remainder of the site is identified as "Other Land" totaling 40.93 acres, and "Urban and Built-

[11] California Department of Conservation. 2022. *Important Farmland Categories.* https://www.conservation.ca.gov/dlrp/fmmp/Pages/Important-Farmland-Categories.aspx. (accessed March 2023).

Up Land" totaling 5.56 acres.[12] The Project would convert the 37.67 acres of Prime Farmland from agriculture to urban use, which was identified as a significant impact within TOP 2050 Final Supplemental EIR.

As identified in the TOP 2010 EIR, build out of the Ontario Policy Plan would result in conversion of all agricultural-designated land to urban uses; remaining agricultural uses would be retained within 200 acres of the SoCALF preserves. It was determined that the mitigation proposed and considered would not prevent significant impacts from occurring, and impacts would be significant and unavoidable. The City adopted a Statement of Overriding Considerations in 2018 for significant and unavoidable impacts to agricultural lands with full buildout of the Policy Plan, which allows the decision-making body of the City to approve a project despite one or more unmitigated significant environmental impacts identified in the TOP Final EIR. Therefore, consistent with Findings made at the time of certification of the City's TOP 2010 Certified EIR and the City's TOP 2050 Final Supplemental SEIR, this impact is significant and unavoidable.

Conclusion

As noted above, the Project would be consistent with the TOP 2010 Certified EIR and 2050 Final Supplemental EIR Findings. The proposed Project Specific Plan proposes the same land uses as contained in the City's TOP 2050. Therefore, consistent with Findings of the City's TOP 2050 Supplemental EIR, impacts would be significant and unavoidable.[13]

Mitigation Measures

MM AG-1 **Deed disclosure –** In order to reduce conflicts issued between sensitive receptors and agricultural uses, all property owners in the Euclid Mixed Use Specific Plan shall be provided with a deed disclosure or similar notice approved by the City Attorney regarding the proximity and nature of neighboring agricultural uses. This disclosure shall be applied at the tentative map stage to the affected properties, or otherwise prior to finalizing the sale or rental agreement of any property. The written disclosure shall be supplied to the property purchaser or renter by the vendor or vendor's agent. The content and text of the disclosure shall be approved by the City Attorney and shall include language to inform new residents that existing agricultural uses may create nuisances such as flies, odors, dust, night-light, and chemical spraying.

In accordance with the findings of the TOP 2010 Certified EIR , there are no other feasible mitigation measures that would reduce the Project's significant impacts regarding agricultural conversion to levels that would be less than significant.

Further, according to the TOP 2010 Certified EIR findings, while the City maintains a Right-to-Farm ordinance, use of farm equipment and odors associated with dairy farming in the Ontario Ranch area is not compatible with densities proposed in the City's Land Use Plan. Furthermore, several mitigation

[12] California Department of Conservation. 2022. *California Important Farmland Finder*. https://maps.conservation.ca.gov/DLRP/CIFF/ (accessed March 2023).

[13] City of Ontario. 2022. *TOP 2050 Final Supplemental Environmental Impact Report, Section 5.2, Agriculture and Forestry Resources*. https://www.ontarioca.gov/sites/default/files/Ontario-Files/Planning/The%20Ontario%20Plann/EIR/Final_DraftSEIR_TOP2050.pdf (accessed April 2023).

measures to reduce the impacts of TOP on agriculture were considered and were considered again as to this EIR for the Project Specific Plan; however, none of the mitigation measures considered by the City, and detailed below, would feasibly be able to reduce the significant impacts to levels less than significant and therefore impacts would remain significant and unavoidable. The measures considered are discussed further below.

Mitigation Measures Considered But Rejected

The Project build-out area is designated for urban development pursuant to the City's Policy Plan. Existing agricultural uses are in various stages of converting to urban uses that are consistent with the Policy Plan. As the agricultural uses diminish, so too are the needed support uses such as feed stores, agricultural equipment sales and rentals, and manure services. In addition, as described previously, dairy farming has become less and less viable in the City region. The dairy industry in San Bernardino County has consistently and sharply declined since 2000, and incentives to convert to urban uses increase. Existing agricultural uses within the City are becoming economically unsustainable and represent land uses that are increasingly incongruous with continuing urbanization of the City. Transition of existing agricultural uses and farmland to non-agricultural uses is an unavoidable effect of implementing the TOP. TOP 2010 Certified EIR considered various mitigation measures which were considered again for this EIR for the Project specific plan that could reduce impacts to agricultural resources. The City again concluded that there are no feasible measures that would reduce the loss of agriculture to levels that would be less than significant. The TOP 2010 Certified EIR Mitigation Measures that were considered before are, again, considered and rejected and are described below.

TOP 2010 Certified EIR Mitigation Measure: Retention of On-Site Agricultural Uses. Retention of agricultural uses within the City of Ontario would create or maintain islands of agricultural uses within an urbanized setting, exacerbating potential land use conflicts and land use incompatibilities. Moreover, TOP does not envision long-term use of City properties for agricultural purposes. This is evidenced in the adopted Land Use Plan, which does not establish or maintain any "Agricultural" Land Use designations within the City. Preservation of agricultural land uses would therefore conflict with the adopted Land Use Plan. The "Retention of On-Site Agricultural Uses" mitigation strategy would require comprehensive amendment of the Policy Plan. Neither the City nor applicant has indicated that such amendment is warranted or desired, and neither has initiated such action.

Additionally, economic viability of agricultural uses in the City has declined as a result of losing many of the necessary support services. Increasing urbanization, rising land values, and relatively high operational costs have also put City agricultural and dairy farming uses at a competitive disadvantage in regional markets. Ultimately, the long-term viability of agriculture within the City is limited due to the increasing land values, increased water costs, higher labor costs, higher property taxes, competition from other parts of the state, and the growing urbanization of the area. Based on the preceding, retention of on-site agricultural uses is considered infeasible.

TOP 2010 Certified EIR Mitigation Measure: Replacement of Agricultural Resources Off-Site. Replacement of agricultural resources at an off-site location would require the applicant to purchase off-site replacement acreage not designated as Farmland and improve or restore it to Farmland status.

Creation of additional Farmland in the City is contrary to the Land Use Plan policies and vision as summarized previously and would require comprehensive amendment of the Policy Plan. Neither the City nor applicant has indicated that such amendment is warranted or desired, and neither has initiated such action. The potential to provide off-site mitigation for the loss of agricultural land and agricultural uses was considered but rejected as infeasible in the TOP EIR. Using another area within Ontario Ranch for mitigation of impacts related to the Project would result in the same issues as previously described in consideration of on-site mitigation. Therefore, similar to the reasons why on-site mitigation is not feasible, off-site mitigation within Ontario Ranch is also infeasible. In addition, off-site mitigation within the region is also considered infeasible due to the decreasing economic vitality of agriculture in Ontario Ranch and Southern California and increased urbanization pressures on existing agricultural lands.

Further, creation of new Farmland-status properties outside the City is beyond the Lead Agency and Project applicant's control. The Farmland status at any site would be assigned through the California Department of Conservation Farmland Mapping and Monitoring Program Important Farmland Series mapping protocol. Moreover, creation of new Farmland-status properties at extra-jurisdictional locations could result in land use conflicts at the interface of agricultural uses and urban uses similar to those the City has experienced and seeks to avoid through implementation of the Land Use Plan.

Additionally, the "Replacement of Agricultural Resources Off-Site" mitigation strategy would likely result in potentially adverse environmental impacts including, but not limited to, impacts to biological resources, hydrology/water quality, air quality, greenhouse gas emissions, and land use and planning. In this regard, the mitigation strategy would likely result in increased, rather than diminished environmental impacts. Based on the preceding, replacement of agricultural resources at off-site locations is considered infeasible.

TOP 2010 Certified EIR Mitigation Measure: Retention of On-Site Agricultural Uses. Retention of agricultural uses within the City of Ontario would create or maintain islands of agricultural uses within an urbanized setting, exacerbating potential land use conflicts and land use incompatibilities. Moreover, TOP does not envision long-term use of City properties for agricultural purposes. This is evidenced in the adopted Land Use Plan, which does not establish or maintain any "Agricultural" Land Use designations within the City. Preservation of agricultural land uses would therefore conflict with the adopted Land Use Plan. The "Retention of On-Site Agricultural Uses" mitigation strategy would require comprehensive amendment of the Policy Plan. Neither the City nor applicant has indicated that such amendment is warranted or desired, and neither has initiated such action.

Additionally, economic viability of agricultural uses in the City has declined as a result of losing many of the necessary support services. Increasing urbanization, rising land values, and relatively high operational costs have also put City agricultural and dairy farming uses at a competitive disadvantage in regional markets. Ultimately, the long-term viability of agriculture within the City is limited due to the increasing land values, increased water costs, higher labor costs, higher property taxes, competition from other parts of the state, and the growing urbanization of the area. Based on the preceding, retention of on-site agricultural uses is considered infeasible.

TOP 2010 Certified EIR Mitigation Measure: Replacement of Agricultural Resources Off-Site. Replacement of agricultural resources at an off-site location would require the applicant to purchase off-site replacement acreage not designated as Farmland and improve or restore it to Farmland status. Creation of additional Farmland in the City is contrary to the Land Use Plan policies and vision as summarized previously and would require comprehensive amendment of the Policy Plan. Neither the City nor applicant has indicated that such amendment is warranted or desired, and neither has initiated such action. The potential to provide off-site mitigation for the loss of agricultural land and agricultural uses was considered but rejected as infeasible in the TOP EIR. Using another area within Ontario Ranch for mitigation of impacts related to the Project would result in the same issues as previously described in consideration of on-site mitigation. Therefore, similar to the reasons why on-site mitigation is not feasible, off-site mitigation within Ontario Ranch is also infeasible. In addition, off-site mitigation within the region is also considered infeasible due to the decreasing economic vitality of agriculture in Ontario Ranch and Southern California and increased urbanization pressures on existing agricultural lands.

Further, creation of new Farmland-status properties outside the City is beyond the Lead Agency and Project applicant's control. The Farmland status at any site would be assigned through the California Department of Conservation Farmland Mapping and Monitoring Program Important Farmland Series mapping protocol. Moreover, creation of new Farmland-status properties at extra-jurisdictional locations could result in land use conflicts at the interface of agricultural uses and urban uses similar to those the City has experienced and seeks to avoid through implementation of the Land Use Plan.

Additionally, the "Replacement of Agricultural Resources Off-Site" mitigation strategy would likely result in potentially adverse environmental impacts including, but not limited to, impacts to biological resources, hydrology/water quality, air quality, greenhouse gas emissions, and land use and planning. In this regard, the mitigation strategy would likely result in increased, rather than diminished environmental impacts. Based on the preceding, replacement of agricultural resources at off-site locations is considered infeasible.

TOP 2010 Certified EIR Mitigation Measure: Relocation of Farmland Topsoil. Relocation of Farmland topsoil would entail removal of the top 12 to 18 inches of topsoil from Farmland properties and the placement of this soil at sites that have lesser quality soil. This would promote creation of new or additional Farmland status properties in the City, rather than provide for their transition to urban uses. This would be contrary to the Land Use Plan policies and vision as summarized previously and would require comprehensive amendment of the Policy Plan. Neither the City nor applicant has indicated that such amendment is warranted or desired, and neither has initiated such action.

Further, creation of new Farmland-status by means of imported Farmland topsoil is beyond the Lead Agency and Project applicant's control. The Farmland status at any site would be assigned through the California Department of Conservation Farmland Mapping and Monitoring Program Important Farmland Series mapping protocol. Moreover, creation of new Farmland-status properties at extra-jurisdictional locations could result in land use conflicts at the interface of agricultural uses and urban uses similar to those the City has experienced and seeks to avoid through implementation of the Land Use Plan.

Additionally, excavation and relocation of topsoil would likely result in potentially adverse environmental impacts affecting biological resources, hydrology/water quality, air quality, greenhouse gas emissions, and land use and planning. Based on the preceding, relocation of Farmland topsoil is considered infeasible.

TOP 2010 Certified EIR Mitigation Measure: Establishment of Conservation Easement or Preserves. Establishment of conservation easements or preserves is contrary to the Land Use Plan policies and vision providing for transition of agricultural uses to urban uses. This mitigation strategy would require comprehensive amendment to the Policy Plan. The City has not indicated that such amendment is warranted or desired and has initiated no such action. At the Project site, establishment of agricultural conservation easements or preserves would negate the Project, resulting in a No-Build condition. Based on the preceding, the "Establishment of Conservation Easement or Preserves" mitigation strategy is considered infeasible.

TOP 2010 Certified EIR Mitigation Measure: Transfer of Development Rights. SCAG provides the following summary of description and application of Transfer of Development Rights (TDR) programs:

TDR "is a device by which the development potential of a site is severed from its title and made available for transfer to another location. The owner of a site within a transfer area retains property ownership, but not approval to develop. The owner of a site within a receiving area may purchase transferable development rights, allowing a receptor site to be developed at a greater density."

TDR is most commonly used to preserve agricultural lands, but it can also be used for preserving natural, open space. TDR programs can vary depending on the need of the local jurisdiction but in general there are a few common factors that contribute to the success of a TDR program. These include having a donor site with development constraints, appropriate zoning regulations, and infrastructure requirements."

The Project site is not currently entitled for development absent an adopted Specific Plan, and it is unclear what if any development rights would be transferred under a TDR program. Further, there is no designated or contemplated receiving area to accept these development rights. Moreover, a TDR program would preserve agricultural uses at the Project Site rather than further planned transition of agricultural uses to non-agricultural uses as envisioned under the Policy Plan. This would be contrary to the Land Use Plan policies and vision as summarized previously.

The City of Ontario has not implemented a TDR Program. Implementation of a TDR program would require amending the City Development Code and comprehensive amendment of the Policy Plan. Neither the City nor applicant has indicated that such amendments are warranted or desired, and neither has initiated such actions. Based on the preceding, implementation of a "Transfer of Development Rights Program" mitigation strategy is considered infeasible.

The City has considered but rejected the collection of fees for off-site mitigation of agricultural impacts. Neither the City nor the adjoining counties have adopted fee programs. Absent viable programs in the region, the imposition of fees would not serve to mitigate the impacts of the Project. Furthermore, an off-site fee mitigation program would not avoid the loss of farmland; would not minimize the effect of the Project; would not repair, rehabilitate, or restore the affected farmland; and, absent a viable fee program,

would not replace affected farmland with substitute farmland. Thus, such a program would not actually mitigate or substantially lessen the significant impact of the Project (CRR State CEQA Guidelines Section15370; San Franciscans for Reasonable Growth v. City and County of San Francisco (1989) 209 Cal.App.3d 1502, 1519). The same factors that make on-site mitigation infeasible would apply off-site in the region as well. The challenges to continued agricultural production in the Chino Basin area, also challenge agriculture throughout Southern California (Defend the Bay v. City of Irvine [2004] 119 Cal. App. 4th 1261, 1270-72).

Off-site mitigation would require the City to purchase replacement acreage for Important Farmland currently not in use elsewhere in California and restore it as viable farmland. However, distant mitigation would not reduce impacts because these mitigation parcels could have no bearing or relationship on the loss of agricultural lands within the City or the County. In addition, experience indicates a program consisting of the required purchase of agricultural easements on other land or through fee programs for the acquisition of agricultural easements would be of limited utility or benefit. Such a program is inherently dependent upon voluntary agreements by farm owners to sell such easements on their property for an agreed price, which, within the City, is largely driven by the City's TOP land use designations, population growth, urbanization of the surrounding area, and the limited supply of suitable farmland. In remote areas not planned for development in the near-term, owner's may be more willing to sell such an easement at a reasonable price but within the region much of the land is already subject to development pressure.

As a result, the most likely result would be a "patchwork" of easements, with some owners more willing than others to sell them, potentially creating a more dispersed development pattern and loss of viability of farmland over time, which would not serve as a feasible measure to mitigate the loss of farmland by the Project. Neither the City nor the County have adopted programs for the acquisition of off-site agricultural easements. Consequently, for the reasons previously outlined, it is determined that off-site mitigation of agricultural resources is neither feasible nor effective in mitigating such impacts.

Overall, no feasible mitigation measures have been identified, which would substantially lessen the Project's significant impacts related to the loss of Prime Farmland and conversion of farmland to non-agricultural use. This finding is consistent with the finding in TOP EIR; that there are no feasible mitigation measures to reduce impacts on Important Farmland or the conversion of agricultural land to non-agricultural uses, and thus impacts would be significant and unavoidable.

Impact 4.2-2 ***Would the Project conflict with existing zoning for agricultural use, or a Williamson Act contract?***

Level of Significance: Less Than Significant

Specific Plan – Phase I and Phase II Future Development Areas

Construction and Operations

The Project site is currently zoned Specific Plan with an Agricultural Overlay, according to the City's Zoning Map, also identified as SP-AG Overlay Zone (Right to Farm Ordinance).[14] It also contains an operational dairy farm and other structures and equipment associated with agricultural use. Construction of this Project will remove the agricultural land, converting it to Business Park and Mixed-Use uses. When the City annexed all of the land within the Ontario Ranch area, including the Project Specific Plan area, it was zoned Specific Plan, with an Agricultural Overlay Zoning District (Section F of Division 5.01 of the Ontario Development Code). The Overlay Zoning provides for agricultural uses within the City on an interim basis, until such time that urban development consistent with TOP 2050 occurs. The operation of the on-site dairy and row crops and the urban development that is proposed by the Project Specific Plan are consistent with this ordinance. The Project Specific Plan will not conflict with the Agricultural Overlay Zoning, and impacts related to a conflict with the overlay will not occur. With Project approval, the Project's existing SP-AG overlay zone would be removed as part of Project approval, consistent with TOP 2050 goals to transition agricultural areas to urban development. Lastly, according to records from the City, there are no active Williamson Act Contracts within the Project site. Therefore, impacts regarding conflict with existing zoning for agricultural use or a Williamson Act contract would be less than significant.

Conclusion

As noted above, there are no active Williamson Act Contracts within the Project site nor would the Project conflict with existing zoning for agricultural use. Accordingly, impacts would be less than significant. No mitigation is required other than compliance with applicable plans, policies and programs, including the proposed Project Specific Plan and TOP 2050.[15]

Mitigation Measures

No mitigation is required.

Impact 4.2-3 ***Would the Project conflict with existing zoning for, or cause rezoning of, forest land (as defined in Public Resources Code Section 12220(g)), timberland (as defined by Public Resources Code Section 4526), or timberland zoned Timberland Production (as defined by Government Code Section 51104(g))?***

Impact 4.2-4 ***Would the Project result in the loss of forest land or conversion of forest land to non-forest use?***

Level of Significance: No Impact

[14] City of Ontario. 2022. *Zoning Map*. https://www.ontarioca.gov/sites/default/files/Ontario-Files/Planning/Zoning%20Map/Zoning_20220415_Rev1.pdf (accessed March 2023).
[15] Ibid.

Specific Plan – Phase I and Phase II Future Development Areas

Construction and Operations

"Forest land" is defined as "land that can support 10 percent native tree cover of any species, including hardwoods, under natural conditions, and that allows for management of one or more forest resources, including timber, aesthetics, fish and wildlife, biodiversity, water quality, recreation, and other public benefits." "Timberland" is defined as "land, other than land owned by the federal government and land designated by the board as experimental forest land, which is available for, and capable of, growing a crop of trees of a commercial species used to produce lumber and other forest products, including Christmas trees." Pursuant to Sections 51112 and 51113 of the California Government Code,[16] "Timberland Production Zone" (TPZ) is defined as "an area which has been zoned and is devoted to and used for growing and harvesting timber, or for growing and harvesting timber and compatible uses, as defined in subdivision (h)."

The Project site is identified as having an Agricultural Overlay (SP-AG) and is not zoned for forest land, timberland, or TPZ. TOP 2050 does not designate any forest land or timberland land uses within the City. Therefore, the Project would not conflict with existing zoning for, or cause rezoning of, forest land (as defined in Public Resources Code Section 12220(g)), timberland (as defined by Public Resources Code Section 4526), or timberland zoned Timberland Production (as defined by Government Code Section 51104(g)); and the Project would not result in the loss of forest land or conversion of forest land to non-forest use. No impact would occur.

Conclusion

As noted above, there are no land use designations or zoning for forest land, timberland, or timberland zoned Timberland Production in the City. As such there would be no impact. No mitigation is required other than compliance with applicable plans, policies and programs, including the proposed Project Specific Plan and TOP 2050.[17]

Mitigation Measures

No mitigation is required.

Impact 4.2-5 Would the Project Involve other changes in the existing environment which, due to their location or nature, could result in conversion of Farmland, to non-agricultural use or conversion of forest land to non-forest use?

Level of Significance: Significant and Unavoidable

[16] California Government Code. 2022. *Article 2, Timberland Production Zones [51110 - 51119.5]*. https://leginfo.legislature.ca.gov/faces/codes_displaySection.xhtml?lawCode=GOV&sectionNum=51113. (accessed March 2023).

[17] City of Ontario. 2022. *TOP 2050 Final Supplemental Environmental Impact Report, Section 5.2, Agriculture and Forestry Resources.* https://www.ontarioca.gov/sites/default/files/Ontario-Files/Planning/The%20Ontario%20Plann/EIR/Final_DraftSEIR_TOP2050.pdf (accessed April 2023).

Specific Plan – Phase I and Phase II Future Development Areas

Construction and Operations

Refer to Impacts 4.2-3 and 4.2-4 for forest land. See ***Section 4.2.2***, for a discussion of the Project site's current use as a dairy farm and for cropland

As discussed above, the development of the Project will result in the conversion of the existing agricultural uses that include a total of 37.67 acres of Prime Farmland to an urban or non-agricultural use. The City does not have any prohibitions that prevent the transition of agricultural land uses to urban land uses. While existing agricultural uses would be allowed to persist, the proposed land use plan for the City designates these areas for nonagricultural land uses provided that equivalent Important Farmland is preserved elsewhere, or funds associated with the 1988 Park Bond Act are returned. Therefore, these existing agricultural uses would be converted to nonagricultural uses upon buildout of TOP 2050. Furthermore, although the intent of the SoCALF Preserves was to preserve Important Farmland in perpetuity in this area of the City, the preserves do not guarantee that Important Farmland would not be converted to nonagricultural uses. Important farmland outside of these preserves may be converted to nonagricultural uses without requiring the County to repay the funding to the state or relocating the farmland elsewhere in the San Bernardino County Agricultural Land Preserve. Development and implementation of the Project would have significant and unavoidable impacts on agricultural resources in the Project area.

The Project Specific Plan could promote and encourage urban growth by contributing to the urban development of other nearby agricultural lands. Development proposals for substantial portions of the area around the site are pending (as described in ***Section 4.0***) and development of the Project Specific Plan could facilitate the conversion of other farmland within the Project vicinity through the extension of public infrastructure and increases in land values. Properties surrounding the Project site are currently utilized for agricultural operations; however, there is encroaching land development consistent with TOP 2050.

Although implementation of the Project Specific Plan would result in the conversion of agricultural land to other uses, it is occurring consistently with the previously identified policies in the TOP 2050 Final Supplement EIR. Thus, and consistent with the findings of the TOP 2050 Final Supplemental EIR and which were acknowledged in a previously adopted Statement of Overriding Considerations, Project impacts related to other changes in the environment which, due to their location or nature, could result in conversion of farmland to non-agricultural would be significant and unavoidable.

Conclusion

Altering the land from agricultural development will promote further growth and future development within the City, increasing economic prosperity. However, this conversion from agricultural land to business park and mixed-use will have significant and unavoidable impacts. Further, as noted above, the Project would be consistent with the TOP 2010 Certified EIR and 2050 Final Supplemental EIR Findings.

Mitigation Measures

Refer to **MM AG-1** above.

4.2.7 Cumulative Impacts

The cumulative study area for agriculture includes the County. Throughout the County, numerous related projects exist that would result in the additional conversion of agricultural land, including Prime Farmland and Important Farmland, to nonagricultural uses. Important Farmland in the County has continually declined and all of the prime agricultural land in the southern area of the City is planned for development by the City's TOP 2050. Continued conversion of agricultural lands to urban uses would substantially reduce overall agricultural productivity in the City and the region. According to the TOP 2050 Final Supplemental EIR, agricultural land within the Ontario Ranch area has the potential to be converted to non-agricultural uses, upon buildout of TOP 2050 and the Specific Plan overlay. This was identified as a significant cumulative impact in TOP 2010 Certified EIR and TOP 2050 Final Supplemental EIR. Implementation of the proposed Project would contribute to the reduction of agricultural resources in the region and cumulatively contribute to the loss of agricultural resources. Although the proposed conversion is consistent with the projected decline in agricultural productivity of the region, the Ontario Ranch area, and the Project site, the Project would result in a cumulatively considerable impact to agricultural resources. Significant and unavoidable impacts to agriculture resources have been identified; refer to *Impacts 4.2-1* and *4.1-5*.

4.2.8 Significant Unavoidable Impacts

Impact 4.2-1

In accordance with the findings of the TOP 2010 Certified EIR and TOP 2050 Final Supplemental EIR, conversion of agricultural-designated land to urban land uses is a significant and unavoidable impact. As detailed above, there are no feasible mitigation measures that would reduce the Project's significant impacts to agricultural resources to levels that would be less than significant. Although implementation of **MM AG-1** would reduce the potential for pressure to convert nearby agricultural land to other uses, with full buildout of the City in accordance with TOP 2050, all agricultural lands would be converted to urban land uses, which would be a significant and unavoidable impact.

Impact 4.2-5

Implementation of **MM AG-1** would reduce the potential for pressure to convert nearby agricultural land to other uses. Nevertheless, with full buildout of the City in accordance with the Policy Plan, all agricultural lands would be converted to urban land uses, which would be a significant and unavoidable impact.

4.3 AIR QUALITY

4.3.1 Introduction

This section of the Draft Environmental Impact Report (EIR) identifies and analyzes the Euclid Mixed-Use Specific Plan Project's (Project) potential air quality impacts that would be generated by construction and operation of the Project, within the City of Ontario (City). The ambient air quality of the local and regional area is described, along with relevant federal, State, and local air pollutant regulations and pollutant concentrations. This evaluation is based on the methodology recommended by the South Coast Air Quality Management District (SCAQMD). Criteria air pollutant emissions modeling for the proposed Project is included *in* ***Appendix B1: Air Quality Emissions Model Data***, of this Draft EIR. The modeling outputs and calculations for localized particulate matter emissions is included in ***Appendix B3: Greenhouse Gas Emissions Model Data***. The Health Risk Assessment (HRA) modeling outputs and calculations for the proposed Project is included in ***Appendix B2: Health Risk Assessment Data***. Transportation-sector impacts are based on trip generation and average vehicle trip distance for passenger vehicle and trucks as provided by Urban Crossroads in ***Appendix I: Transportation Reports***, of this Draft EIR. Cumulative impacts related to air quality are based on the regional boundaries of the South Coast Air Basin (SCAB).

This Section and environmental discussion use information from the following City documents:

- The Ontario Plan 2050
- City of Ontario Municipal Code
- City of Ontario TOP 2050 Final Supplemental EIR

Additionally, the following analysis is based in part on information obtained from:

- Kimley-Horn and Associates. March 2023. *Air Quality Emissions Model Data*. (***Appendix B1***)
- Kimley-Horn and Associates. 2023. *Health Risk Assessment Data*. (***Appendix B2***)
- Kimley-Horn and Associates. 2023. *Greenhouse Gas Emissions Model Data*. (***Appendix B3***)
- Urban Crossroads. January 2023. *Euclid Mixed-Use Specific Plan Traffic Analysis*. (***Appendix I1***)

4.3.2 Environmental Setting

Climate and Meteorology

South Coast Air Basin

The Project site is in the SCAB, which includes all of Orange County and the non-desert portions of Los Angeles, Riverside, and San Bernardino counties. The SCAB is a coastal plain with connecting broad valleys and low hills and is bounded by the Pacific Ocean in the southwest quadrant, with high mountains forming the remainder of the perimeter. The general region is in the semi-permanent high-pressure zone of the eastern Pacific. The climate is mild, tempered by cool sea breezes. This weather pattern is interrupted infrequently by periods of extremely hot weather, winter storms, and Santa Ana winds.

Temperature and Precipitation

The annual average temperature throughout the 6,645-square-mile SCAB ranges from low 60 to high 80 degrees Fahrenheit (°F) with little variance. With a more pronounced oceanic influence, coastal areas show less variability in annual minimum and maximum temperatures than inland areas. The climatological station nearest the site is in Pomona (ID No. 041779). The average low is reported at 38.6°F in January and the average high is 90.4°F in July. All areas in the SCAB have recorded temperatures above 100°F in recent years. January is typically the coldest month in this area of the SCAB, with minimum temperatures in the 30s. In contrast to a very steady pattern of temperature, rainfall is seasonally and annually highly variable. Almost all rain falls from November through April. Summer rainfall is normally restricted to widely scattered thundershowers near the coast with slightly heavier shower activity in the east and over the mountains. Rainfall averages around 16.95 inches per year in the Project area, as measured in Pomona.

Humidity

Although the SCAB has a semiarid climate, the air near the surface is typically moist because of the presence of a shallow marine layer. Except for infrequent periods when dry, continental air is brought into the SCAB by offshore winds, the ocean effect is dominant. Periods of heavy fog, especially along the coastline, are frequent; low stratus clouds, often called high fog, are a characteristic climatic feature. Annual average humidity is 70 percent at the coast and 57 percent in the east portions of the SCAB.

Wind

Wind patterns across the south coastal region are characterized by westerly and southwesterly onshore winds during the day and easterly or northeasterly breezes at night. Wind speed is somewhat greater during the dry summer months than during the rainy winter season. Between periods of wind, periods of air stagnation may occur, both in the morning and evening hours. Air stagnation is one of the critical determinants of air quality conditions on any given day. During the winter and fall months, surface high-pressure systems over the SCAB, combined with other meteorological conditions, can result in very strong, downslope Santa Ana winds. These winds normally continue a few days before predominant meteorological conditions are reestablished. The mountain ranges to the east affect the transport and diffusion of pollutants by inhibiting the eastward transport of pollutants. Air quality in the SCAB generally ranges from fair to poor and is similar to air quality in most of coastal southern California. The entire region experiences heavy concentrations of air pollutants during prolonged periods of stable atmospheric conditions.

Inversions

In conjunction with the two characteristic wind patterns that affect the rate and orientation of horizontal pollutant transport, there are two similarly distinct types of temperature inversions that control the vertical depth through which pollutants are mixed. These inversions are the marine/subsidence inversion and the radiation inversion. The height of the base of the inversion at any given time is known as the "mixing height." The combination of winds and inversions are critical determinants in leading to the highly degraded air quality in summer and the generally good air quality in the winter in the Project area.

Air Pollutants of Concern

The air pollutants emitted into the ambient air by stationary and mobile sources are regulated by state and federal laws. These regulated air pollutants are known as "criteria air pollutants" and are categorized into primary and secondary pollutants.

Primary air pollutants are emitted directly from sources. Carbon monoxide (CO), reactive organic gases (ROG), nitrogen oxide (NO_X), sulfur dioxide (SO_2), coarse particulate matter (PM_{10}), fine particulate matter ($PM_{2.5}$), and lead are primary air pollutants. Of these, CO, NO_X, SO_2, PM_{10}, and $PM_{2.5}$ are criteria pollutants. ROG and NO_X are criteria pollutant precursors and form secondary criteria pollutants through chemical and photochemical reactions in the atmosphere. For example, the criteria pollutant ozone (O_3) is formed by a chemical reaction between ROG and NO_X in the presence of sunlight. O_3 and nitrogen dioxide (NO_2) are the principal secondary pollutants. Sources and health effects commonly associated with criteria pollutants are summarized in ***Table 4.3-1: Air Contaminants and Associated Public Health Concerns***.

Table 4.3-1: Air Contaminants and Associated Public Health Concerns

Pollutant	Health Effects	Examples of Sources
Carbon Monoxide (CO)	Reduces the ability of blood to deliver oxygen to vital tissues, affecting the cardiovascular and nervous system. Impairs vision, causes dizziness, and can lead to unconsciousness or death.	An odorless, colorless gas formed when carbon in fuel is not burned completely; a component of motor vehicle exhaust.
Ozone (O_3)	Irritates and causes inflammation of the mucous membranes and lung airways; causes wheezing, coughing, and pain when inhaling deeply; decreases lung capacity; aggravates lung and heart problems. Damages plants; reduces crop yield.	Formed by a chemical reaction between reactive organic gases/volatile organic compounds (ROG or VOC)[1] and nitrogen oxides (NO_X) in the presence of sunlight. Motor vehicle exhaust, industrial emissions, gasoline storage and transport, solvents, paints and landfills.
Nitrogen Dioxide (NO_2)	Respiratory irritant; aggravates lung and heart problems. Precursor to O_3. Contributes to global warming and nutrient overloading which deteriorates water quality. Causes brown discoloration of the atmosphere.	A reddish-brown gas formed during fuel combustion for motor vehicles and industrial sources. Sources include motor vehicles, electric utilities, and other sources that burn fuel.
Particulate Matter (PM_{10} & $PM_{2.5}$)	Increased respiratory symptoms, such as irritation of the airways, coughing, or difficulty breathing; asthma; chronic bronchitis; irregular heartbeat; nonfatal heart attacks; and premature death in people with heart or lung disease. Impairs visibility.	Power plants, steel mills, chemical plants, unpaved roads and parking lots, wood-burning stoves and fireplaces, automobiles and others.
Sulfur Dioxide (SO_2)	Respiratory irritant. Aggravates lung and heart problems. In the presence of moisture and oxygen, sulfur dioxide converts to sulfuric acid which can damage marble, iron and steel. Damages crops and natural vegetation. Impairs visibility. Precursor to acid rain.	A colorless gas formed when fuel containing sulfur is burned and when gasoline is extracted from oil. Examples are petroleum refineries, cement manufacturing, metal processing facilities, locomotives, and ships.
Lead (Pb)	Exposure to lead occurs mainly through inhalation of air and ingestion of lead in food, water, soil, or dust. It accumulates in the blood, bones, and soft tissues and can adversely affect the kidneys, liver, nervous system, and other organs. Excessive exposure to lead may cause neurological impairments such as seizures, mental retardation, and behavioral disorders. Even at low doses, lead exposure is associated	Lead is a metal found naturally in the environment as well as in manufactured products. The major sources of lead emissions have historically been motor vehicles (such as cars and trucks) and industrial sources. Due to the phase out of leaded gasoline, metals processing is the major source of lead emissions to the air today. The highest levels of lead in air are generally found near lead smelters. Other

Pollutant	Health Effects	Examples of Sources
	with damage to the nervous systems of fetuses and young children, resulting in learning deficits and lowered IQ.	stationary sources are waste incinerators, utilities, and lead-acid battery manufacturers.

Source: California Air Pollution Control Officers Association (CAPCOA). 2023. *Health Effects*. https://oehha.ca.gov/air/criteria-pollutants. (accessed April 2023).
Notes:
[1] Volatile Organic Compounds (VOCs) or Reactive Organic Gases (ROG) are hydrocarbons/organic gases that are formed solely of hydrogen and carbon. There are several subsets of organic gases including ROGs and VOCs. Both ROGs and VOCs are emitted from the incomplete combustion of hydrocarbons or other carbon-based fuels. The major sources of hydrocarbons are combustion engine exhaust, oil refineries, and oil-fueled power plants; other common sources are petroleum fuels, solvents, dry cleaning solutions, and paint (via evaporation).

Toxic Air Contaminants

Toxic air contaminants (TACs) are airborne substances that can cause short-term (acute) or long-term (i.e., chronic, carcinogenic or cancer causing) adverse human health effects (i.e., injury or illness). TACs include both organic and inorganic chemical substances. They may be emitted from a variety of common sources including gasoline stations, automobiles, dry cleaners, industrial operations, and painting operations. The current California list of TACs includes more than 200 compounds, including particulate emissions from diesel-fueled engines.

The California Air Resources Board (CARB) identified diesel particulate matter (DPM) as a TAC. DPM differs from other TACs in that it is not a single substance but rather a complex mixture of hundreds of substances. Diesel exhaust is a complex mixture of particles and gases produced when an engine burns diesel fuel. DPM is a concern because it causes lung cancer; many compounds found in diesel exhaust are carcinogenic. DPM includes the particle-phase constituents in diesel exhaust. The chemical composition and particle sizes of DPM vary between different engine types (heavy-duty, light-duty), engine operating conditions (idle, accelerate, decelerate), fuel formulations (high/low sulfur fuel), and the year of the engine. Some short-term (acute) effects of diesel exhaust include eye, nose, throat, and lung irritation, and diesel exhaust can cause coughs, headaches, light-headedness, and nausea. DPM poses the greatest health risk among the TACs. Almost all diesel exhaust particle mass is 10 microns or less in diameter. Due to their extremely small size, these particles can be inhaled and eventually trapped in the bronchial and alveolar regions of the lung.

Ambient Air Quality

CARB monitors ambient air quality at approximately 250 air monitoring stations across the state. These stations usually measure pollutant concentrations ten feet above ground level; therefore, air quality is often referred to in terms of ground-level concentrations. Existing levels of ambient air quality, historical trends, and projections near the Project are documented by measurements made by the SCAQMD, the air pollution regulatory agency in the SCAB that maintains air quality monitoring stations which process ambient air quality measurements.

Pollutants of concern in the SCAB include O_3, PM_{10}, and $PM_{2.5}$. The closest air monitoring station to the Project that monitors ambient concentrations of these pollutants is the Upland Monitoring Station (located approximately seven miles to the north). Local air quality data from 2019 to 2021 are provided in ***Table 4.3-2: Ambient Air Quality Data Standards for Criteria Pollutants***, which lists the monitored

maximum concentrations and number of exceedances of state or federal air quality standards for each year.

Table 4.3-2: Ambient Air Quality Standards for Criteria Pollutants

Criteria Pollutant	2019	2020	2021
Ozone (O_3)			
1-hour Maximum Concentration (ppm)	0.131	0.158	0.124
8-hour Maximum Concentration (ppm)	0.107	0.123	0.100
Number of Days Standard Exceeded			
CAAQS 1-hour (>0.09 ppm)	31	82	42
NAAQS 8-hour (>0.070 ppm)	52	116	78
Carbon Monoxide (CO)			
1-hour Maximum Concentration (ppm)	1.45	1.54	1.31
Number of Days Standard Exceeded			
NAAQS 1-hour (>35 ppm)	0	0	0
CAAQS 1-hour (>20 ppm)	0	0	0
Nitrogen Dioxide (NO_2)			
1-hour Maximum Concentration (ppm)	0.058	0.055	0.065
Number of Days Standard Exceeded			
NAAQS 1-hour (>0.100 ppm)	0	0	0
CAAQS 1-hour (>0.18 ppm)	0	0	0
Particulate Matter Less Than 10 Microns (PM_{10})			
National 24-hour Maximum Concentration	125.9	174.8	124.3
State 24-hour Maximum Concentration	—	—	—
State Annual Average Concentration (CAAQS=20 µg/m^3)	—	—	—
Number of Days Standard Exceeded			
NAAQS 24-hour (>150 µg/m^3)	0	1	0
CAAQS 24-hour (>50 µg/m^3)	—	—	—
Particulate Matter Less Than 2.5 Microns ($PM_{2.5}$)			
National 24-hour Maximum Concentration	—	—	—
State 24-hour Maximum Concentration	91.1	74.0	83.8
Number of Days Standard Exceeded			
NAAQS 24-hour (>35 µg/m^3)	—	—	—

Source: All pollutant measurements are from the CARB Aerometric Data Analysis and Management system database (https://www.arb.ca.gov/adam) except for CO, which were retrieved from the CARB Air Quality and Meteorological Information System (https://www.arb.ca.gov/aqmis2/aqdselect.php).
Notes: NAAQS = National Ambient Air Quality Standards; CAAQS = California Ambient Air Quality Standards; ppm = parts per million; µg/m3 = micrograms per cubic meter; – = insufficient data available.
Measurements taken at the Upland Monitoring Station at 1350 San Bernardino Road, Upland CA, 91786 (CARB# 36175)

Sensitive Receptors

Sensitive populations are more susceptible to the effects of air pollution than the general population. Sensitive receptors that are in proximity to localized sources of toxic pollutants are of particular concern. Land uses considered sensitive receptors include residences, schools, playgrounds, childcare centers,

long-term health care facilities, rehabilitation centers, convalescent centers, and retirement homes. The nearest sensitive receptors are the single-family residences located across the street from the Project site, along Euclid Avenue with other nearby residences located surrounding the Project site. The houses directly west of the Project along Euclid Avenue are the nearest receptors to Phase I, approximately 135 feet (41 meters) from the Phase I Project boundary. The nearest sensitive receptor from Phase II of the Project are the houses along Sultana Avenue to the east, approximately 110 feet (34 meters) from Phase II Project boundary.

4.3.3 Regulatory Setting

Ambient air quality standards (AAQS) have been adopted at the state and federal levels for criteria air pollutants. In addition, both the state and federal government regulate the release of TACs. The proposed Project is in the SCAB and is subject to the rules and regulations imposed by the SCAQMD as well as the California AAQS (CAAQS) adopted by CARB and National AAQS (NAAQS) adopted by the United States Environmental Protection Agency (U.S. EPA). Federal, State, regional, and local laws, regulations, plans, or guidelines that are potentially applicable to the proposed Project are summarized in this section.

Federal

Federal Clean Air Act

Air quality is federally protected by the Federal Clean Air Act (FCAA) and its amendments. Under the FCAA, the U.S. EPA developed the primary and secondary NAAQS for the criteria air pollutants including O_3, NO_2, CO, SO_2, PM_{10}, $PM_{2.5}$, and lead (Pb). Proposed projects in or near nonattainment areas could be subject to more stringent air-permitting requirements. The FCAA requires each state to prepare a State Implementation Plan to demonstrate how it will attain the NAAQS within the federally imposed deadlines.

The U.S. EPA can withhold certain transportation funds from states that fail to comply with the planning requirements of the FCAA. If a state fails to correct these planning deficiencies within two years of Federal notification, the U.S. EPA is required to develop a Federal implementation plan for the identified nonattainment area or areas. The provisions of 40 Code of Federal Regulations (CFR) Parts 51 and 93 apply in all nonattainment and maintenance areas for transportation-related criteria pollutants for which the area is designated nonattainment or has a maintenance plan. The U.S. EPA has designated enforcement of air pollution control regulations to the individual states. Applicable federal standards are summarized in ***Table 4.3-3: State and Federal Ambient Air Quality Standards***.

Table 4.3-3: State and Federal Ambient Air Quality Standards

Pollutant	Averaging Time	California Standard[1]	Federal Standard[2]
Ozone (O_3) [2, 5, 7]	1 hour	0.09 ppm	NA
	8 hours	0.070 ppm	0.070 ppm
Carbon Monoxide (CO)	1 hour	20 ppm	35 ppm
	8 hours	9.0 ppm	9 ppm
Nitrogen Dioxide (NO_2)	Annual Arithmetic Mean	0.030 ppm	0.053 ppm
	1 hour	0.18 ppm	0.100 ppm
Sulfur Dioxide (SO_2) [8]	Annual Arithmetic Mean	NA	0.030 ppm
	1 hour	0.25 ppm	0.075 ppm
	24 hours	0.04 ppm	0.14 ppm

Pollutant	Averaging Time	California Standard[1]	Federal Standard[2]
Coarse Particulate Matter (PM_{10}) [1, 3, 6]	Annual Arithmetic Mean	20 µg/m³	NA
	24 hours	50 µg/m³	150 µg/m³
Fine Particulate Matter ($PM_{2.5}$) [3, 4, 6, 9]	Annual Arithmetic Mean	12 µg/m³	12 µg/m³
	24 hours	NA	35 µg/m³
Lead (Pb) [10, 11]	30-Day Average	1.5 µg/m³	NA
	Calendar Quarter	NA	1.5 µg/m³
	Rolling 3-Month Average	NA*	1.5 µg/m³ 0.15 µg/m³
Sulfates (SO_4)	24 hours	25 µg/m³	NA
Hydrogen Sulfide	1 hour	0.03 ppm	NA
Vinyl Chloride [10]	24 hour	0.01 ppm	NA

Source: South Coast Air Quality Management District, Air Quality Management Plan. 2022. California Air Resources Board, Ambient Air Quality Standards. https://ww2.arb.ca.gov/resources/california-ambient-air-quality-standards. (accessed April 2023).
Notes: ppm: parts per million; µg/m3: micrograms per cubic meter

1 California standards for O3, carbon monoxide (except Lake Tahoe), sulfur dioxide (1-hour and 24-hour), nitrogen dioxide, suspended particulate matter - PM_{10}, and visibility reducing particles are values that are not to be exceeded. The standards for sulfates, Lake Tahoe carbon monoxide, lead, hydrogen sulfide, and vinyl chloride are not to be equaled or exceeded. If the standard is for a 1-hour, 8-hour or 24-hour average (i.e., all standards except for lead and the PM_{10} annual standard), then some measurements may be excluded. Measurements are excluded that CARB determines would occur less than once per year on the average. The Lake Tahoe carbon monoxide standard is 6.0 ppm, a level one-half the national standard and two-thirds the State standard.

2 National standards shown are the "primary standards" designed to protect public health. National standards other than for O3, particulates and those based on annual averages are not to be exceeded more than once a year. The 1-hour O_3 standard is attained if, during the most recent three-year period, the average number of days per year with maximum hourly concentrations above the standard is equal to or less than one. The 8-hour O3 standard is attained when the 3-year average of the 4th highest daily concentrations is 0.070 ppm or less. The 24-hour PM_{10} standard is attained when the 3-year average of the 99th percentile of monitored concentrations is less than 150 µg/m³. The 24-hour PM2.5 standard is attained when the 3-year average of 98th percentiles is less than 35 µg/m³.

3 Except for the national particulate standards, annual standards are met if the annual average falls below the standard at every site. The national annual particulate standard for PM_{10} is met if the 3-year average falls below the standard at every site. The annual $PM_{2.5}$ standard is met if the 3-year average of annual averages spatially-averaged across officially designed clusters of sites falls below the standard.
NAAQS are set by the U.S. EPA at levels determined to be protective of public health with an adequate margin of safety.

4 On October 1, 2015, the national 8-hour O_3 primary and secondary standards were lowered from 0.075 to 0.070 ppm. An area will meet the standard if the fourth-highest maximum daily 8-hour O_3 concentration per year, averaged over three years, is equal to or less than 0.070 ppm. U.S. EPA will make recommendations on attainment designations by October 1, 2016, and issue final designations October 1, 2017. Nonattainment areas will have until 2020 to late 2037 to meet the health standard, with attainment dates varying based on the O_3 level in the area.

5 The national 1-hour O_3 standard was revoked by the U.S. EPA on June 15, 2005.

6 In June 2002, CARB established new annual standards for $PM_{2.5}$ and PM_{10}.

7 The 8-hour California O_3 standard was approved by the CARB on April 28, 2005, and became effective on May 17, 2006.

8 On June 2, 2010, the U.S. EPA established a new 1-hour SO_2 standard, effective August 23, 2010, which is based on the 3-year average of the annual 99th percentile of 1-hour daily maximum concentrations. The existing 0.030 ppm annual and 0.14 ppm 24-hour SO_2 NAAQS however must continue to be used until one year following U.S. EPA initial designations of the new 1-hour SO_2 NAAQS.

9 In December 2012, U.S. EPA strengthened the annual $PM_{2.5}$ NAAQS from 15.0 to 12.0 µg/m³. In December 2014, the U.S. EPA issued final area designations for the 2012 primary annual $PM_{2.5}$ NAAQS. Areas designated "unclassifiable/attainment" must continue to take steps to prevent their air quality from deteriorating to unhealthy levels. The effective date of this standard is April 15, 2015.

10 CARB has identified lead and vinyl chloride as 'toxic air contaminants' with no threshold level of exposure below which there are no adverse health effects determined.

11 National lead standard, rolling 3-month average: final rule signed October 15, 2008. Final designations effective December 31, 2011

State of California

California Air Resources Board

CARB administers the air quality policy in California. The CAAQS were established in 1969 pursuant to the Mulford-Carrell Act. These standards, included with the NAAQS in ***Table 4.2-3***, are generally more stringent and apply to more pollutants than the NAAQS. In addition to the criteria pollutants, CAAQS have been established for visibility reducing particulates, hydrogen sulfide, and sulfates.

The California Clean Air Act (CCAA) requires that each local air district prepare and maintain an Air Quality Management Plan (AQMP) to achieve compliance with CAAQS. These AQMPs also serve as the basis for the preparation of the State Implementation Plan for meeting federal clean air standards for the State of

California. Like the U.S. EPA, CARB also designates areas within California as either attainment or nonattainment for each criteria pollutant based on whether the CAAQS have been achieved. Under the CCAA, areas are designated as nonattainment for a pollutant if air quality data shows that a state standard for the pollutant was violated at least once during the previous three calendar years. Exceedances that are affected by highly irregular or infrequent events such as wildfires, volcanoes, etc. are not considered violations of a state standard, and are not used as a basis for designating areas as nonattainment.

Regional

South Coast Air Quality Management District

The SCAQMD is the air pollution control agency for cities and counites within the SCAB, which generally includes all of Orange County and the non-desert portions of Los Angeles, Riverside, and San Bernardino counties. The agency's primary responsibility is ensuring that state and federal ambient air quality standards are attained and maintained in the SCAB. The SCAQMD is also responsible for adopting and enforcing rules and regulations concerning air pollutant sources, issuing permits for stationary sources of air pollutants, inspecting stationary sources of air pollutants, responding to citizen complaints, monitoring ambient air quality and meteorological conditions, awarding grants to reduce motor vehicle emissions, conducting public education campaigns, and many other activities. All projects are subject to SCAQMD rules and regulations in effect at the time of construction.

The SCAQMD is also the lead agency in charge of developing the AQMP, with input from the Southern California Association of Governments (SCAG) and CARB. The AQMP is a comprehensive plan that includes control strategies for stationary and area sources, as well as for on-road and off-road mobile sources. SCAG has the primary responsibility for providing future growth projections and the development and implementation of transportation control measures. CARB, in coordination with federal agencies, provides the control element for mobile sources.

The 2022 AQMP was adopted by the SCAQMD Governing Board on December 2, 2022. The purpose of the AQMP is to set forth a comprehensive and integrated program that would lead the SCAB into compliance with the federal 24-hour $PM_{2.5}$ air quality standard, and to provide an update to the SCAQMD's commitments towards meeting the federal 8-hour O_3 standards. The AQMP incorporates the latest scientific and technological information and planning assumptions, including the SCAG *Regional Transportation Plan/Sustainable Communities Strategy* (RTP/SCS) and updated emission inventory methodologies for various source categories.

The SCAQMD has published the *CEQA Air Quality Handbook* (approved by the SCAQMD Governing Board in 1993 and augmented with guidance for Local Significance Thresholds [LST] in 2008). The SCAQMD guidance helps local government agencies and consultants to develop environmental documents required by California Environmental Quality Act (CEQA) and provides identification of suggested thresholds of significance for criteria pollutants for both construction and operation (see discussion of thresholds below). With the help of the CEQA Air Quality Handbook and associated guidance, local land use planners and consultants are able to analyze and document how proposed and existing projects affect air quality in order to meet the requirements of the CEQA review process. The SCAQMD periodically provides supplemental guidance and updates to the handbook on their website.

SCAG is the regional planning agency for Los Angeles, Orange, Ventura, Riverside, San Bernardino, and Imperial counties and serves as a forum for regional issues relating to transportation, the economy, community development, and the environment. Under federal law, SCAG is designated as a Metropolitan Planning Organization (MPO) and under State law as a Regional Transportation Planning Agency and a Council of Governments.

The State and federal attainment status designations for the SCAB are summarized in ***Table 4.3-4: Attainment Status of Criteria Pollutants in the South Coast Air Basin***. The SCAB is currently designated as a nonattainment area with respect to the State O_3, PM_{10}, and $PM_{2.5}$ standards, as well as the national 8-hour O_3 and $PM_{2.5}$ standards. The SCAB is designated as attainment or unclassified for the remaining state and federal standards.

Table 4.3-4: Attainment Status of Criteria Pollutants in the South Coast Air Basin

Pollutant	State	Federal
Ozone – 1-hour	Nonattainment	Nonattainment
Ozone – 8-hour	Nonattainment	Nonattainment
PM_{10}	Nonattainment	Attainment
$PM_{2.5}$	Nonattainment	Nonattainment
CO	Attainment	Attainment
NO_2	Attainment	Attainment
SO_2	Attainment	Attainment
Lead	Attainment	Nonattainment (Partial)
All others	Attainment/Unclassified	Attainment/Unclassified

Source: South Coast Air Quality Management District. 2022. *2022 Air Quality Management Plan*. http://www.aqmd.gov/home/air-quality/clean-air-plans/air-quality-mgt-plan. (accessed April 2023).

The following is a list of SCAQMD rules that are required of construction activities associated with the Project:

- **Rule 402 (Nuisance)** – This rule prohibits the discharge from any source whatsoever such quantities of air contaminants or other material which cause injury, detriment, nuisance, or annoyance to any considerable number of persons or to the public, or which endanger the comfort, repose, health, or safety of any such persons or the public, or which cause, or have a natural tendency to cause, injury or damage to business or property. This rule does not apply to odors emanating from agricultural operations necessary for the growing of crops or the raising of fowl or animals.
- **Rule 403 (Fugitive Dust)** – This rule requires fugitive dust sources to implement best available control measures for all sources, and all forms of visible particulate matter are prohibited from crossing any property line. This rule is intended to reduce PM_{10} emissions from any transportation, handling, construction, or storage activity that has the potential to generate fugitive dust. PM_{10} suppression techniques are summarized below.

  a) Portions of a construction site to remain inactive longer than a period of three months will be seeded and watered until grass cover is grown or otherwise stabilized.

  b) All on-site roads will be paved as soon as feasible or watered periodically or chemically stabilized.

c) All material transported off-site will be either sufficiently watered or securely covered to prevent excessive amounts of dust.

d) The area disturbed by clearing, grading, earthmoving, or excavation operations will be minimized at all times.

e) Where vehicles leave a construction site and enter adjacent public streets, the streets will be swept daily or washed down at the end of the workday to remove soil tracked onto the paved surface.

- **Rule 431.2** (**Sulfur Content of Liquid Fuels)** – This rule limits the sulfur content in diesel and other liquid fuels for the purpose of both reducing the formation of sulfur oxides and particulates during combustion and to enable the use of add-on control devices for diesel fueled internal combustion engines.
- **Rule 1113 (Architectural Coatings)** – This rule requires manufacturers, distributors, and end users of architectural and industrial maintenance coatings to reduce ROG emissions from the use of these coatings, primarily by placing limits on the ROG content of various coating categories.
- **Rule 2305 (Warehouse Indirect Source Rule)** - SCAQMD adopted Rule 2305 in May 2021 to reduce emissions associated with warehouses and mobile sources attracted to warehouses. This rule applies to all existing and proposed warehouses over 100,000 square feet located in SCAQMD. Rule 2305 requires warehouse operators to track annual vehicle miles traveled (VMT) associated with truck trips to and from the warehouse. These trip miles are used to calculate the warehouses' WAIRE (Warehouse Actions and Investments to Reduce Emissions) Points Compliance Obligation. WAIRE Points are earned based on emission reduction measures and warehouse operators are required to submit an annual WAIRE Report which includes truck trip data and emission reduction measures. Reduction strategies listed in the WAIRE menu include acquire zero emission (ZE) or near zero emission (NZE) trucks; require ZE/NZE truck visits; require ZE yard trucks; install on-site ZE charging/fueling infrastructure; install onsite energy systems; and install filtration systems in residences, schools, and other buildings in the adjacent community. Warehouse operators that do not earn a sufficient number of WAIRE points to satisfy the WAIRE Points Compliance Obligation are required to pay a mitigation fee. This Project will comply with the adopted Rule 2305 (Warehouse Indirect Source Rule).

Local

City of Ontario General Plan – The Ontario Plan 2050

The Ontario Plan (TOP) 2050 Environmental Resources Element establishes goals for environmental infrastructure and policies that support system integration, resource conservation and regeneration, and energy independence. Included in TOP 2050 is the Policy Plan, which is a framework that would guide the City's future growth through the application of policies and goals. Included in TOP 2050 is the Policy Plan, which is a framework that would guide the City's future growth through the application of policies and goals. The following goals of TOP 2050 relate to visual and scenic resources. The following goals of TOP 2050 relate to air quality.

The following policy contained in the Environmental Resources Element is relevant to the Project:

Environmental Resources Element[1]

Goal ER-4 **Improved indoor and outdoor air quality and reduced locally generated pollutant emissions.**

Policy ER-4.1 **Land Use.** We will reduce greenhouse gas (GHG) and other local pollutant emissions through compact, mixed use, and transit-oriented development and development that improves the regional jobs-housing balance.

Policy ER-4.4 **Indoor Air Quality.** We will comply with State Green Building Codes relative to indoor air quality. We seek funding to improve indoor air quality for households with poor indoor air quality, with priority for lower income households in environmental justice areas.

Policy ER-4.6 **Particulate Matter.** We support efforts to reduce particulate matter to meet State and Federal Clean Air Standards.

Policy ER-4.9 **New Localized Air Pollution Sources Near Existing Sensitive Receptors.** We require new developments to conduct a Health Risk Assessment for land uses that generate more than 100 trucks per day or 40 trucks per day by trucks operating transportation refrigeration units (TRU's) within 1,000 feet from sensitive land uses (California Health and Safety Code Section 42705.5(a)(5)). If the health risk assessment determines the new development poses health hazards that increase the incremental cancer risk above the threshold established by the South Coast Air Quality Management District (AQMD), we will only approve permits upon the condition that adequate mitigation measures are proposed and implemented for potential impacts on the sensitive uses around the site and along the route within Ontario taken by the trucks to and from freeways. We require new developments that must perform a health risk assessment to conduct additional public outreach by sending notifications in multiple languages to all residents living within 500 feet, and encourage hosting a public meeting.

4.3.4 Impact Thresholds and Significance Criteria

According to Appendix G of the CEQA Guidelines, a project would normally have a significant effect on the environment if the project would:

- Conflict with or obstruct implementation of the applicable air quality plan;
- Result in a cumulatively considerable net increase of any criteria pollutant for which the project region is non-attainment under an applicable federal or state ambient air quality standard;
- Expose sensitive receptors to substantial pollutant concentrations; or
- Result in other emissions (such as those leading to odors) adversely affecting a substantial number of people.

[1] City of Ontario. 2022. *TOP 2050, Environmental Resources Element*. https://www.ontarioca.gov/about-ontario-ontario-plan-policy-plan/environmental-resources. (accessed April 2023).

South Coast Air Quality Management District Thresholds

The significance criteria established by the SCAQMD may be relied upon to make the above determinations to the SCAQMD, an air quality impact is considered significant if the Project would violate any ambient air quality standard, contribute substantially to an existing or projected air quality violation, or expose sensitive receptors to substantial pollutant concentrations. The SCAQMD has established thresholds of significance for air quality during construction and operational activities of land use development projects, as shown in ***Table 4.3-5: SCAQMD Emissions Thresholds***. SCAQMD's significance threshold for cumulative impacts is the same for project-specific impacts.

Table 4.3-5: SCAQMD Emission Thresholds

Air Pollutant	Construction Phase	Operational Phase
Reactive Organic Gases (ROGs)/Volatile Organic Compounds (VOCs)	75 lbs/day	55 lbs/day
Nitrogen Oxides (NO_X)	100 lbs/day	55 lbs/day
Carbon Monoxide (CO)	550 lbs/day	550 lbs/day
Sulfur Oxides (SO_X)	150 lbs/day	150 lbs/day
Particulates (PM_{10})	150 lbs/day	150 lbs/day
Particulates ($PM_{2.5}$)	55 lbs/day	55 lbs/day

Source: South Coast Air Quality Management District. 2023. *South Coast AQMD Air Quality Significance Thresholds*. https://www.aqmd.gov/docs/default-source/ceqa/handbook/south-coast-aqmd-air-quality-significance-thresholds.pdf?sfvrsn=25. (accessed April 2023).

Localized Carbon Monoxide

In addition to the daily thresholds listed above, development associated with the Project would also be subject to the AAQS. These are addressed through an analysis of localized CO impacts. The significance of localized impacts depends on whether ambient CO levels near the Project site above state and federal CO standards are (the more stringent California standards are 20 ppm for 1-hour and 9 ppm for 8-hour). The SCAB has been designated as attainment under the 1-hour and 8-hour standards.

Localized Significance Thresholds

The SCAQMD has also developed LSTs for emissions of NO_2, CO, PM_{10}, and $PM_{2.5}$ generated at new development sites (off-site mobile source emissions are not included in the LST analysis). LSTs represent the maximum emissions that can be generated at a project without expecting to cause or substantially contribute to an exceedance of the most stringent NAAQS or CAAQS. LSTs are based on the ambient concentrations of that pollutant within the Project source receptor area (SRA), as demarcated by the SCAQMD, and the distance to the nearest sensitive receptor. LST analysis for construction is applicable for all projects that disturb five acres or less on a single day. The proposed Project construction is anticipated to disturb a maximum of four acres in a single day, so the LST applies.

The Project site is located within SCAQMD SRA 33, Southwest San Bernardino Valley Area. ***Table 4.3-6: Local Significance Thresholds for Construction/Operations***, shows the LSTs for a 1-acre, 2-acre, and 5-acre project in SRA 33. The SCAQMD's LST guidance notes that the 25-meter threshold applies to receptors 25 meters away or less. Because the nearest sensitive receptors are located approximately 50 feet (15 meters) from the Project boundary, the thresholds for 25 meters or less are identified in ***Table 4.3-6***.

Table 4.3-6 demonstrates that as the Project size increases, the thresholds for construction and operations emissions also increase.

Table 4.3-6: Local Significance Thresholds for Construction/Operations

Project Size	Threshold (lbs/day)[1]			
	Nitrogen Oxides (NO_X)	Carbon Monoxide (CO)	Coarse Particulates (PM_{10})	Fine Particulates ($PM_{2.5}$)
1 Acre	118/118	863/863	5/2	4/1
2 Acres	170/170	1,232/1,232	6/2	5/2
5 Acres	270/270	2,193/2,193	16/4	9/2

Source: South Coast Air Quality Management District. 2008. *Localized Significance Threshold Methodology*. http://www.aqmd.gov/docs/default-source/ceqa/handbook/localized-significance-thresholds/final-lst-methodology-document.pdf. (accessed April 2023).

Health Risk

Whenever a project would use chemical compounds identified in SCAQMD Rule 1401, on CARB's air toxics list pursuant to Assembly Bill (AB) 1807, or on the U.S. EPA's National Emissions Standards for Hazardous Air Pollutants, an HRA is required by the SCAQMD. ***Table 4.3-7: SCAQMD Toxic Air Contaminants Incremental Risk Thresholds***, lists the SCAQMD's TAC incremental risk thresholds for operation of a project. Projects that do not generate emissions that exceed the values in ***Table 4.3-7*** would not substantially contribute to cumulative air quality hazards or exacerbate an existing environmental hazard.

Table 4.3-7: SCAQMD Toxic Air Contaminants Incremental Risk Thresholds

Contaminants	Risk Threshold
Maximum Incremental Cancer Risk	≥ 10 in 1 million
Cancer Burden (in areas ≥ 1 in 1 million)	> 0.5 excess cancer cases
Hazard Index (project increment)	≥ 1.0
