*The Specific Plan design guidelines (Chapter 5, Design Guidelines) and development standards (Chapter 4, Land Use and Development Standards) ensure high quality, cohesive, attractive, and appropriately-scaled development that complements and integrates into the Ontario Ranch community and adds value to the City.*

**GOAL CD2: A high level of design quality resulting in public spaces, streetscapes, and developments that are attractive, safe, functional, and distinct.**

### Policy CD2-1 Quality Architecture

We encourage all developments to convey visual interest and character through:

- Building volume, massing, and height to provide appropriate scale and proportion;
- A true architectural style which is carried out in plan, section, and elevation through all aspects of the building and site design and appropriate for its setting;
- Exterior building materials that are visually interesting, high quality, durable, and appropriate for the architectural style.

*The Specific Plan design guidelines (Chapter 5) ensure that: 1) scale, massing, fenestration, materials, and colors are consistent with the building's architectural style and compatible with the overall design in the Specific Plan area; 2) articulation is provided through elements such as cornices, parapets, expression lines, and changes in materials and/or colors; 3) use of a variety of colors, materials, and/or textures on each building is appropriate to the architectural features or massing.*

### Policy CD2-5 Streetscapes

We design new and, when necessary, retrofit existing streets to improve walkability, bicycling and transit integration, strengthen connectivity, and enhance community identify through improvements to the public right-of-way such as sidewalks, street trees, parkways, curbs, street lighting, and street furniture.

*Chapter 3, Section 3.2, Street Plan, addresses connectivity, street improvements, pedestrian and bicycle plans, and transit. In Chapter 5, Section 5.3, Landscape Design, the Specific Plan identifies street improvements and streetscape including parkways, street trees, sidewalks, landscape buffers, and street lighting for Grove Avenue, Eucalyptus Avenue, Merrill Avenue, and Bon View Avenue within the Specific Plan area, which are consistent with the Circulation Element of The Ontario Plan. The Specific Plan streetscape design creates an aesthetically pleasing view for pedestrians, cyclists, and motorists, screens parking and loading areas from the public right-of-way, and visually integrates the development into the surrounding Ontario Ranch community.*

### Policy CD2-6 Connectivity

We promote development of local street patterns and pedestrian networks that create and unify neighborhoods, rather than divide them, and create cohesive and continuous corridors, rather than independent "islands".

*The Specific Plan creates an efficient street system by providing convenient connections with adjacent land uses in compliance with the vision of The Ontario Plan Circulation Element. The design of Specific Plan street sections (Chapter 3.2: Street Plan) and streetscape (Chapter 5.3, Landscape Design) provides road improvements including sidewalks, trails and bikeways to promote connectivity and supplement vehicular transportation.*

### Policy CD2-7 Sustainability

We collaborate with the development community to design and build neighborhoods, streetscapes, sites, outdoor spaces, landscaping and buildings to reduce energy demand through solar orientation, maximum use of natural daylight, passive solar and natural ventilation, building form, mechanical and structural systems, building materials and construction techniques.

*The Specific Plan is committed to sustainable design strategies that integrate principles of environmental stewardship into the design, construction, and operation process. The Specific Plan incorporates sustainability principles into its design guidelines (Chapter 5.8, Sustainable Design Strategies), such as drought tolerant landscaping, skylights in warehouse/distribution buildings to provide natural light and reduce lighting demand, high performance dual pane glazing in office storefronts, and LED products for energy efficient site lighting. Design strategies include the design and construction of energy efficient buildings to reduce air, water, and land pollution and environmental impacts from energy production and consumption. The use of recycled water to irrigate landscape is required by the Specific Plan's Recycled Water Plan (Chapter 3.4), consistent with the City of Ontario Recycled Water Master Plan.*

### Policy CD2-9 Landscape Design

We encourage durable landscaping materials and designs that enhance the aesthetics of structure, create and define public and private spaces, and provide shade and environmental benefits.

*Consistent with the vision for Ontario Ranch as outlined in the Ontario Ranch Streetscape Master Plan, the Specific Plan (Chapter 5.3, Landscape Design) provides for landscaped setbacks and landscaped parkways adjacent to bike lanes and sidewalks, defining these public spaces. The landscaped setbacks and parkways include drought-tolerant plants featuring colorful shrubs and groundcovers, ornamental grasses and*

*succulents, evergreen and deciduous trees, and species native to Southern California or naturalized to the arid climate to promote durable plant materials. The plant selection complements the design theme of the Specific Plan area. Parking lot landscaping reduces associated heat buildup, improves aesthetics, and integrates into onsite landscape design and adjacent streetscapes. Swaled landscape areas retain/infiltrate stormwater run-off to improve water quality and promote groundwater recharge. Shade trees thoughtfully located near expanses of paving, building walls, roofs, and windows reduce the impacts of heat gain.*

### Policy CD2-11 Entry Statements

We encourage the inclusion of amenities, signage, and landscaping at the entry to neighborhoods, commercial centers, mixed use areas, industrial developments, and public places that reinforce them as uniquely identifiable places.

*The Specific Plan establishes design guidelines to ensure high-quality development and a sense of place. As discussed in Chapter 5.3, Landscape Design, Grove, Eucalyptus, Merrill and Bon View Avenues feature landscaped setbacks that provide attractive entries into the site. Entry monument signage is predominantly placed to identify the South Ontario Logistics Center.*

### Policy CD2-12 Site and Building Signage

We encourage the use of sign programs that utilize complementary materials, colors, and themes. Project signage should be designed to effectively communicate and direct users to various aspects of the development and complement the character of the structure.

*The Specific Plan (Chapter 5.7, Signage) requires approval of a comprehensive sign program to address parcel identification, building identification and directional signage within the Specific Plan area. A comprehensive sign program will integrate project signage with the overall design of the site and structures to create a unified visual statement. A comprehensive sign program provides flexible application of sign regulations to provide incentive and latitude in the design and display of multiple signs. Industrial uses on the site will also be appropriately signed to give direction to loading and receiving, visitor parking, and other special uses.*

| | |
|---|---|
| **GOAL CD3:** | **Vibrant urban environments that are organized around intense buildings, pedestrian and transit areas, public plazas, and linkages between and within developments that are conveniently located, visually appealing, and safe during all hours.** |

### Policy CD3-1 Design

We require that pedestrian, vehicular, bicycle, and equestrian circulation on both public and private property be coordinated and designed to maximize safety, comfort, and aesthetics.

*The Specific Plan (Chapter 3.2, Street Plan) coordinates street, sidewalk, trail, and bikeway designs to serve onsite land uses and extend access to the surrounding area in compliance with The Ontario Plan Mobility Element. The Specific Plan specifies street improvements for Grove Avenue, Eucalyptus Avenue, Merrill Avenue, and Bon View Avenue. The Specific Plan streetscape design (Chapter 5.3, Landscape Design) provides an aesthetically pleasing view for pedestrians, cyclists, and motorists, screens parking and loading areas from the public right-of-way, and integrates the development into the surrounding community.*

### Policy CD3-5 Paving

We require sidewalks and road surfaces to be of a type and quality that contributes to the appearance and utility of streets and public places.

*The Specific Plan development standards (Chapter 4, Land Use and Development Standards) require that design and materials for sidewalks and road surfaces within the Specific Plan area be approved by the City's Engineering Department. Specific Plan design guidelines (Chapter 5) encourage the use of enhanced paving to mark major building entries and paving materials that possess a high level of solar reflectivity to reduce the heat island effect.*

## GOAL CD5: A sustained level of maintenance and improvement of properties, buildings and infrastructure that protects the property values and encourages additional public and private investment.

### Policy CD5-1 Maintenance of Buildings and Property

We require all public and privately owned buildings and property (including trails and easements) to be properly and consistency maintained.

*The Specific Plan includes a Maintenance Responsibility Matrix in Chapter 6, Implementation, identifying the parties responsible for maintenance of roadways, parkways, trails, sidewalks, common areas, walls and monuments, infrastructure, and utilities within the Specific Plan area. Privately owned buildings will be maintained as specified by the Property Owners Association (Chapter 6.11.2).*

### Policy CD5-2 Maintenance of Infrastructure

We require the continued maintenance of infrastructure.

*The Specific Plan includes a Maintenance Responsibility Matrix in Chapter 6, Implementation, identifying the parties responsible for maintenance of roadways, parkways, trails, sidewalks, common areas, walls and monuments, infrastructure, and utilities within the Specific Plan area.*

## 7.3 Mobility Element

**GOAL M1: A system of roadways that meets the mobility needs of a dynamic and prosperous Ontario.**

### Policy M1-1 Roadway Design and Maintenance

We require our roadways to:

- Comply with federal, state, and local design and safety standards.
- Meet the needs of multiple transportation modes and users.
- Handle the capacity envisioned in the Functional Roadway Classification Plan.
- Endeavour to maintain a peak hour Level of Service (LOS) E or better at all intersections.
- Be compatible with the streetscape and surrounding land uses.
- Be maintained in accordance with best practices and our Right-of-Way Management Plan

*The Specific Plan complies with the Functional Roadway Classification Plan of the Mobility Element and, therefore, aims to comply with federal, state, and local design and safety standards; meet the needs of multiple transportation modes and users; and maintain a Level of Service of E or better at all intersections addressed in the project environmental impact report. The Specific Plan site design strives to minimize the effects of truck traffic on nearby uses.*

### Policy M1-2 Mitigation of Impacts

We require development to mitigate its traffic impact.

*The Specific Plan requires in Chapter 1.6, California Environmental Quality Act Compliance, and in Chapter 6.4.4, Consistency with CEQA, that projects within the Specific Plan area comply with all mitigation measures, conditions, and project design features identified in the project environmental impact report. Chapter 5.1, Site Design, provides guidelines to ensure buildings, structures, and loading facilities are designed so loading and unloading activities occur on-site without extending beyond the property line.*

**GOAL M2: A system of trails and corridors that facilitate and encourage bicycling and walking.**

### Policy M2-1 Bikeway Plan

We maintain our Multipurpose Trails & Bikeway Corridor Plan to create a comprehensive system of on- and off-street bikeways that connect residential areas, businesses, schools, parks, and other key destination points.

*The Specific Plan includes a Circulation Plan in Chapter 3 to provide connectivity to the trails and bikeway corridors identified in the Ontario Multipurpose Trails and Bikeway Corridor Plan, including installation of a Class II Bikeway along Merrill Avenue and multipurpose trails along Grove, Eucalyptus, and Merrill Avenues.*

### Policy M2-3 Pedestrian Walkways

We require walkways that promote safe and convenient travel between residential areas, businesses, schools, parks, recreation areas, and other key destination points.

*The Specific Plan street sections and streetscape designs (Chapter 3.2, Street Plan and Chapter 5.3, Landscape Design) provide for construction of five-foot wide public pedestrian sidewalks for Grove Avenue, Eucalyptus Avenue, Merrill Avenue, and Bon View Avenue to connect with existing and planned pedestrian circulation systems. Pedestrian sidewalks are separated from vehicular travel lanes by a landscaped parkway. The Specific Plan area street improvements are consistent with the City's Ontario Ranch Streetscape Master Plan.*

**GOAL M3: A public transit system that is a viable alternative to automobile travel and meets basic transportation needs of the transit dependent.**

### Policy M3-2 Transit Facilities at New Development

We require new development to provide transit facilities, such as bus shelters, transit bays and turnouts, as necessary.

*The Specific Plan discusses in Chapter 3.2.11, Transit, that the City is coordinating with regional transit agencies to implement Bus Rapid Transit (BRT) service to target destinations and along corridors.*

**GOAL M4: An efficient flow of goods through the City that maximizes economic benefits and minimizes negative impacts.**

### Policy M4-1 Truck Routes

We designate and maintain a network of City truck routes that provide for the effective transport of goods while minimizing negative impacts on local circulation and noise-sensitive land uses, as shown in the Truck Routes Plan.

*The Specific Plan is designed to enable easy access to the truck route network and to encourage its industrial users to implement effective goods movement strategies. The Land Use and Circulation Plans for the Specific Plan area (Chapter 3, Development Plan) are designed to focus trucks on the designated Merrill Avenue truck route. The design guidelines in Chapter 5.1, Site Design, stipulate buildings, structures, and loading facilities be designed to ensure that loading and unloading activities and maneuvering of freight vehicles occurs on-site without extending beyond the property line.*

## 7.4 Environmental Resources Element

**GOAL ER1: A reliable and cost effective system that permits the City to manage its diverse water resources and needs.**

### Policy ER1-3 Conservation

We require conservation strategies that reduce water usage.

*The Specific Plan incorporates water conservation strategies into its development plan and design guidelines. The use of recycled water to irrigate landscape areas is required consistent with the City of Ontario Recycled Water Master Plan (Chapter 3, Development Plan). Landscape and irrigation plans are encouraged to use water conservation features such as drought-tolerant plant species native or adapted to the region and drip irrigation (Chapter 5, Design Guidelines). The Specific Plan encourages the design and construction of energy efficient buildings to reduce air, water, and land pollution and environmental impacts from energy production and consumption.*

### Policy ER1-5 Groundwater Management

We protect groundwater quality by incorporating strategies that prevent pollution, require remediation where necessary, capture and treat urban run-off, and recharge the aquifer.

*In Chapter 3.8, Storm Drainage Plans, the Specific Plan stipulates that prior to issuance of grading or construction permits, a Storm Water Pollution Prevention Plan (SWPPP) be prepared and approved by the City. The SWPPP will identify and detail appropriate Best Management Practices (BMPs) to prevent pollutant discharge into storm drain systems and natural drainages and aquifers. In addition to the preparation of a SWPPP, a WQMP will be prepared and approved that will enforce long-term BMPs to prevent pollutant discharges into storm drain systems for the life of the project. Chapter 5.8.2, Water Quality, requires the provision of on-site landscape swales to collect and treat stormwater run-off.*

### Policy ER1-6 Urban Run-off Quantity

We encourage the use of low impact development strategies to intercept run-off, slow the discharge rate, increase infiltration, and ultimately reduce discharge volumes to traditional storm drain systems.

*The Specific Plan (Chapter 3.8, Storm Drainage Plan) incorporates low impact development strategies including landscape designs that promote water retention; permeable surface designs in parking lots and areas with low traffic; parking lots that drain to landscaped areas to provide treatment, retention, or infiltration; and limited soil compaction during grading.*

### Policy ER1-7 Urban Run-off Quality

We require the control and management of urban run-off, consistent with Regional Water Quality Control Board regulations.

*In Chapter 3.8, Storm Drainage Plan, the Specific Plan specifies that prior to issuance of grading or construction permits, a Water Quality Management Plan (WQMP) is required to minimize stormwater runoff and provide on-site opportunities for groundwater recharge integrated into project design and amenities. The grading and drainage of the Specific Plan area will be designed to retain/infilter, harvest & re-use or biotreat surface runoff to comply with the current requirements of the San Bernardino County NPDES Stormwater Program's WQMP for significant new development projects.*

### Policy ER1-8 Wastewater Management

We require the management of wastewater discharge and collection consistent with waste discharge requirements adopted by the Regional Water Quality Control Board.

*In Chapter 3.5, Sewer Plan, the Specific Plan provides for design of a wastewater system consistent with City and Regional Water Quality Control Board requirements. The Specific Plan includes a network of new public sewer mains consistent with the City of Ontario's Ultimate Sewer System Plan.*

| | |
|---|---|
| **GOAL ER3:** | **Cost-effective and reliable energy system sustained through a combination of low impact building, site and neighborhood energy conservation and diverse sources of energy generation that collectively helps to minimize the region's carbon footprint.** |

### Policy ER3-1 Conservation Strategy

We require conservation as the first strategy to be employed to meet applicable energy-saving standards.

*The Specific Plan incorporates energy-saving conservation strategies into its design guidelines (Chapter 5) by addressing lighting, bicycle parking, sustainable landscaping, and energy efficiency. Sustainable design strategies (Chapter 5.8) include design and construction of energy efficient buildings to reduce air, water, and land pollution and environmental impacts from energy production and consumption.*

### Policy ER3-3 Building and Site Design

We require new construction to incorporate energy efficient building and site design strategies, which could include appropriate solar orientation, maximum use of natural daylight, passive solar and natural ventilation.

*The Specific Plan's Sustainable Design Strategies (Chapter 5.8) include the use of passive design to improve building energy performance through skylights, building orientation, landscaping, and use of select colors.*

**GOAL ER4: Improved indoor and outdoor air quality and reduced locally generated pollutant emissions.**

Policy ER4-4 Indoor Air Quality

We comply with State Green Building Codes relative to indoor air quality.

*The Specific Plan requires development projects in the Specific Plan area to comply with the State of California Building Code as adopted and implemented by the City. The Specific Plan's Sustainable Design Strategies (Chapter 5.8) include the design and construction of energy efficient buildings to reduce air, water, and land pollution.*

**GOAL ER5: Protected high value habitat and farming and mineral resources extraction activities that are compatible with adjacent development.**

Policy ER5-2 Entitlement and Permitting Process

We comply with state and federal regulations regarding protected species.

*The Specific Plan acknowledges that development projects within the Specific Plan area shall comply with the mitigation measures of the project environmental impact report.*

## 7.5 Safety Element

***7.5.1***

**GOAL S1: Minimized risk of injury, loss of life, property damage and economic and social disruption caused by earthquake-induced and other geologic hazards.**

Policy S1-1 Implementation of Regulations and Standards

We require that all new habitable structures be designed in accordance with the most recent California Building Code adopted by the City, including provisions regarding lateral forces and grading.

*The Specific Plan requires development projects to comply with the State of California Building Code as adopted and implemented by the City.*

### Policy S1-2 Entitlement and Permitting Process

We follow state guidelines and the California Building Code to determine when development proposals must conduct geotechnical and geological investigations.

*The Specific Plan acknowledges that projects within the Specific Plan area shall comply with state guidelines and the California Building Code. Research of available maps indicates that the Specific Plan site is not located within an Alquist-Priolo Earthquake Fault Zone. Furthermore, there was no visible evidence of faulting during geotechnical investigation.*

## GOAL S2: Minimized risk of injury, loss of life, property damage and economic and social disruption caused by flooding and inundation hazards.

### Policy S2-1 Entitlement and Permitting Process

We follow State guidelines and building code to determine when development proposals require hydrological studies prepared by a State-certified engineer to assess the impact that the new development will have on the flooding potential of existing development down-gradient.

*The Specific Plan acknowledges that projects within the Specific Plan area shall comply with applicable mitigation measures of the project environmental impact report, state guidelines, and the California Building Code regarding flooding and inundation hazards.*

## GOAL S3: Reduced risk of death, injury, property damage and economic loss due to fires, accidents and normal everyday occurrences through prompt and capable emergency response.

### Policy S3-8 Fire Prevention through Environmental Design

We require new development to incorporate fire prevention consideration in the design of streetscapes, sites, open spaces and buildings.

*The Specific Plan acknowledges that projects within the Specific Plan area shall comply with the City's development review process, which provides for review by the City's Fire Department and potential redesign to incorporate fire prevention design elements within streetscapes, sites, open spaces, and buildings.*

**GOAL S4: An environment where noise does not adversely affect the public's health, safety, and welfare.**

Policy S4-1 Noise Mitigation

We utilize the City's Noise Ordinance, building codes and subdivision and development codes to mitigate noise impacts.

*The Specific Plan acknowledges that projects within the Specific Plan area shall comply with mitigation measures of the project environmental impact report, the City's noise ordinance, subdivision and development codes, and the California Building Code to mitigate noise impacts.*

**GOAL S5: Reduced risk of injury, property damage and economic loss resulting from windstorms and wind-related hazards.**

Policy S5-2 Dust Control Measures

We require the implementation of Best Management Practices for dust control at all excavation and grading projects.

*The Specific Plan acknowledges that projects within the Specific Plan area shall comply with mitigation measures of the project environmental impact report, the construction management plan, and subdivision and development codes regarding dust control.*

**GOAL S6: Reduced potential for hazardous materials exposure and contamination.**

Policy S6-9 Remediation of Methane

We require development to assess and mitigate the presence of methane, per regulatory standards and guidelines.

*The Specific Plan acknowledges that projects within the Specific Plan area shall comply with mitigation measures of the project environmental impact report.*

| GOAL S7: | **Neighborhoods and commercial and industrial districts that are kept safe through a multi-faceted approach of prevention, suppression, community involvement, and a system of continuous monitoring.** |
|---|---|

Policy S7-4 Crime Prevention through Environmental Design (CPTED)

We require new development to incorporate CPTED in the design of streetscapes, sites, open spaces and buildings.

*The Specific Plan acknowledges that projects within the Specific Plan area shall comply with the City's development review process, which provides for review by the City's Police Department and potential redesign to incorporate crime prevention design elements in streetscapes, sites, open spaces, and buildings. Parcel lighting (Chapter 5.6, Lighting) addresses illumination of parking lots, loading dock areas, pedestrian walkways, building entrances, signage, and architectural and landscape features. A key provision includes the installation of ground or low mounted fixtures to provide for safety and convenience along pedestrian walkways, entrances, activity areas, steps, ramps, and special features. Chapter 5.1, Site Design, also encourages delineation of pedestrian access to on-site buildings from adjacent streets and parking areas by marking building entrances with signage, prominent architectural features, and/or landscaping features.*

## 7.6 Community Economics Element

| GOAL CE1: | **A complete community that provides for all incomes and stages of life.** |
|---|---|

Policy CE1-1 Jobs-Housing Balance

We pursue improvement to the Inland Empire's balance between jobs and housing by promoting job growth that reduces the regional economy's reliance on out-commuting.

*The Specific Plan anticipates the creation of jobs in warehousing, logistics, light manufacturing, and administration within the Specific Plan area, which helps improve the region's jobs-housing balance. Actual job creation depends on the type of land uses ultimately developed on the site as a wide-range of commercial, office, and industrial uses are permitted in the Specific Plan. The Land Use Plan (Chapter 3.1)*

*implements the vision of The Ontario Plan by providing opportunities for employment in manufacturing, distribution, research and development, service, and supporting retail at intensities designed to meet the demand of current and future market conditions.*

### Policy CE1-5 Business Attraction

We proactively attract new and expanding businesses to Ontario in order to increase the City's share of growing sectors of the regional and global economy.

*In Chapter 3.1, Land Use Plan, the Specific Plan provides for the construction of over 3.1 million square feet of business park and industrial development in compliance with City and regional planning goals and strategies that facilitate goods movement throughout the SCAG region.*

## GOAL CE2: A City of distinctive neighborhoods, districts, and corridors, where people choose to be.

### Policy CE2-1 Development Projects

We require new development and redevelopment to create unique, high-quality places that add value to the community.

*The Specific Plan contains design guidelines in Chapter 5 to guide future development consistent with the vision for Ontario Ranch. The guidelines ensure high quality, cohesive and attractive development that complements and integrates into the community and adds value to the City. The Specific Plan also establishes landscape setbacks along the roadways within the Specific Plan area to create safe and attractive streets for pedestrians, cyclists, and motorists.*

### Policy CE2-2 Development Review

We require those proposing new development and redevelopment to demonstrate how their projects will create appropriately unique, functional and sustainable places that will compete well with their competition within the region.

*The Specific Plan establishes a land use plan (Chapter 3.1) and design guidelines (Chapter 5) addressing site design, building design, and landscape design that ensure high-quality, functional and sustainable development that is regionally competitive and appropriate for the Ontario Ranch community.*

### Policy CE2-5 Private Maintenance

We require adequate maintenance, upkeep, and investment in private property because proper maintenance on private property protects property values.

*The Specific Plan includes a Maintenance Responsibility Matrix (Chapter 6.11) identifying the public, private, or utility providers responsible for maintenance of roadways, parkways, trails, sidewalks, common areas, walls and monuments, infrastructure, and utilities within the Specific Plan area. A Property Owners Association will be established for the maintenance of on-site common areas, including such improvements as landscape areas and drive aisles.*

### Policy CE2-6 Public Maintenance

We require the establishment and operation of maintenance districts or other vehicles to fund the long-term operation and maintenance of the public realm whether on private land, in rights-of-way, or on publicly-owned property.

*The Specific Plan includes a Maintenance Responsibility Matrix (Chapter 6.11) identifying the public, private, or utility providers responsible for maintenance of roadways, parkways, trails, sidewalks, common areas, walls and monuments, infrastructure, and utilities within the Specific Plan area. Right-of-way for public streets and infrastructure improvements within the Specific Plan area shall be dedicated to the City of Ontario for maintenance purposes. Landscape improvements and public streetlights within the public right-of-way shall be maintained through a landscape and lighting district or other special maintenance district established by the City. Dry utilities such as electricity, natural gas, and communication systems will be maintained by the appropriate utility company.*

CITY OF ONTARIO PLANNING DEPARTMENT

# LAND DEVELOPMENT DIVISION CONDITIONS OF APPROVAL

303 East B Street, Ontario, California 91764 Phone: 909.395.2036 / Fax: 909.395.2420

**Date Prepared:** **11/30/2021**

**File No:** **PSP19-001**

**Related File:** **PGPA19-004**

**Project Description:** **A public hearing to consider certification of the Environmental Impact Report (State Clearinghouse No. 2021010318), including the adoption of a Mitigation Monitoring and Reporting Program and a Statement of Overriding Considerations, for the following: 1) A General Plan Amendment (File No. PGPA19-004) to modify the Land Use Plan (Exhibit LU-01) of the Policy Plan (General Plan) of The Ontario Plan to change the land use designations on 219.39 acres of land, from 157.06 acres of Low-Medium Density Residential (5.1-11 dwelling units per acre) and 62.36 acres of Business Park (0.6 FAR) to 184.22 acres of General Industrial (0.55 FAR) and 35.17 acres of Business Park (0.6 FAR), and modify the Future Buildout Table (Exhibit LU-03) to be consistent with the land use designation changes; and 2) a Specific Plan (File No. PSP19-001 – South Ontario Logistics Center Specific Plan) to establish the land use districts, development standards, design guidelines, and infrastructure improvements for the potential development of up to 5,333,518 square feet of General Industrial and Business Park land uses. The project site is generally bordered by Eucalyptus Avenue on the north, Merrill Avenue on the south, existing right-of-way for the future Campus Avenue extension to the west, and Grove Avenue to the east;** (APNs: 1054-071-01, 1054-071-02, 1054-081-03, 1054-091-01, 1054-091-02, 1054-101-01, 1054-101-02, 1054-231-01, 1054-231-02, 1054-241-01, 1054-241-02, 1054-321-01, 1054-321-02, 1054-311-01, 1054-311-02, 1054-051-01, 1054-051-02, 1054-061-01, 1054-061-02, 1054-251-01, 1054-251-02, 1054-301-01, 1054-301-02); **submitted by Grove Land Venture, LLC.**

**Prepared By:** Alexis Vaughn, Assistant Planner

Email: avaughn@ontarioca.gov

---

The Planning Department, Land Development Section, conditions of approval applicable to the above-described Project, are listed below. The Project shall comply with each condition of approval listed below:

**1.0 Standard Conditions of Approval.** The project shall comply with the *Standard Conditions for New Development*, adopted by City Council Resolution No. 2017-027 on April 18, 2017. A copy of the *Standard Conditions for New Development* may be obtained from the Planning Department or City Clerk/Records Management Department.

**2.0 Special Conditions of Approval.** In addition to the *Standard Conditions for New Development* identified in condition no. 1.0, above, the project shall comply with the following special conditions of approval:

**2.1** Specific Plan. The following shall be submitted to the Planning Department within 30 days following City Council approval of the Specific Plan/Specific Plan Amendment:

**(a)** Five bound copies of the final Specific Plan document;

**(b)** One complete, unbound copy of the final Specific Plan document;

**(c)** One CD containing a complete Microsoft Word copy of the final Specific Plan document, including all required revisions;

**(d)** Five CDs, each containing a complete PDF copy of the final Specific Plan document, including all required revisions; and

**(e)** One CD containing a complete electronic website version of the final Specific Plan document, including all required revisions.

**2.2** Indemnification. The applicant shall agree to defend, indemnify and hold harmless, the City of Ontario or its agents, officers, and employees from any claim, action or proceeding against the City of Ontario or its agents, officers or employees to attack, set aside, void or annul any approval of the City of Ontario, whether by its City Council, Planning Commission or other authorized board or officer. The City of Ontario shall promptly notify the applicant of any such claim, action or proceeding, and the City of Ontario shall cooperate fully in the defense.

**2.3** Additional Fees.

**(a)** Within 5 days following final application approval, the Notice of Determination ("NOD") filing fee and applicable Department of Fish and Wildlife fee shall be provided to the Planning Department. The fee shall be paid by check, made payable to the "Clerk of the Board of Supervisors", which shall be forwarded to the San Bernardino County Clerk of the Board of Supervisors, along with all applicable environmental forms/notices, pursuant to the requirements of the California Environmental Quality Act ("CEQA"). Failure to provide said fee within the time specified may result in a 180-day extension to the statute of limitations for the filing of a CEQA lawsuit.

ORDINANCE NO. _____

AN ORDINANCE OF THE CITY COUNCIL OF THE CITY OF ONTARIO, CALIFORNIA, APPROVING FILE NO. PSP19-001, THE SOUTH ONTARIO LOGISTICS CENTER SPECIFIC PLAN, TO ESTABLISH LAND USE DISTRICTS, DEVELOPMENT STANDARDS, DESIGN GUIDELINES, AND INFRASTRUCTURE IMPROVEMENTS FOR THE POTENTIAL DEVELOPMENT OF UP TO 5,333,518 SQUARE FEET OF INDUSTRIAL AND BUSINESS PARK LAND USES ON 219.39 ACRES OF LAND GENERALLY BORDERED BY EUCALYPTUS AVENUE ON THE NORTH, MERRILL AVENUE ON THE SOUTH, GROVE AVENUE ON THE EAST, AND CAMPUS AVENUE ON THE WEST, AND MAKING FINDINGS IN SUPPORT THEREOF—APNS: 1054-071-01, 1054-071-02, 1054-081-03, 1054-091-01, 1054-091-02, 1054-101-01, 1054-101-02, 1054-231-01, 1054-231-02, 1054-241-01, 1054-241-02, 1054-321-01, 1054-321-02, 1054-311-01, 1054-311-02, 1054-051-01, 1054-051-02, 1054-061-01, 1054-061-02, 1054-251-01, 1054-251-02, 1054-301-01, AND 1054-301-02.

WHEREAS, Grove Land Venture, LLC ("Applicant") has filed an Application for the approval of a Specific Plan, File No. PSP19-001, as described in the title of this Ordinance (hereinafter referred to as "Application" or "Project"); and

WHEREAS, the Application applies to approximately 219.4 acres of land, bounded by Eucalyptus Avenue to the north, Merrill Avenue to the south, Grove Avenue on the east, and Campus Avenue on the west, within the Business Park (0.6 FAR) and Low-Medium Density Residential (5.1-11 du/ac) land use designations, and is presently improved with agriculture/dairy and single-family residential uses; and

WHEREAS, the property to the north of the Project site is within the SP(AG) zoning district and is currently developed with agricultural uses and a dairy farm. The property to the east is within the Merrill Commerce Center Specific Plan and is currently vacant. The property to the south of the project site is located within the City of Chino and is developed with the Chino Airport. The property to the west of the project site is located within the SP(AG) zoning district and is developed with agricultural and dairy uses; and

WHEREAS, the South Ontario Logistics Center Specific Plan establishes a comprehensive set of design guidelines and development regulations to guide and regulate site planning, landscape, and architectural character, and ensuring that excellence in community design is achieved during project development. In addition, the Specific Plan will establish the procedures and requirements to approve new development within the project site to ensure The Ontario Plan (“TOP”) goals and policies are achieved; and

WHEREAS, the South Ontario Logistics Center Specific Plan consists of approximately 219.4 acres of land, which includes the potential development of up to 5,333,518 square feet of business park and industrial development; and

WHEREAS, a request for approval of a General Plan Amendment (File No. PGPA19-004) to change the land use designations shown on the Land Use Plan Map (Exhibit LU-1) for 219.4 acres of land from Low-Medium Density Residential (5.1-11 du/ac) and Business Park (0.6 FAR) to Industrial (0.55 FAR) and Business Park (0.6 FAR), and modify the Future Buildout Table (Exhibit LU-03) to be consistent with the land use designation changes has also been submitted as part of the proposed South Ontario Logistics Center Specific Plan; and

WHEREAS, the land use intensity of the South Ontario Logistics Center Specific Plan anticipated in the five planning areas is consistent with TOP. The Specific Plan is proposing a maximum 0.6 Floor Area Ratio (FAR) within the Business Park land use designation (Planning Areas 1 and 3) located along the northern portion of the Specific Plan area. Planning Area 1 is 23.65 acres in size and can be potentially developed with 618,076 square feet of business park development. Planning Area 3 is 11.52 acres in size and can potentially be developed with 300,972 square feet of business park development. In addition, buildings within the Business Park land use area that front onto a public right-of-way shall not exceed a 125,000 square-foot building footprint. The Specific Plan is proposing a maximum 0.55 FAR within the Industrial land use designation (Planning Areas 2, 4, and 5) located along the southern portion of the Specific Plan. Planning Area 2 is 106.71 acres in size and can potentially be developed with 2,556,442 square feet of industrial development. Planning Area 4 is 60.06 acres in size and can potentially be developed with 1,438,914 square feet of industrial development. Planning area 5 is 17.45 acres in size and can potentially be developed with 419,114 square feet of industrial development. The proposed FARs for each of the Planning Areas is consistent with the Policy Plan Land Use designations for Business Park and Industrial; and

WHEREAS, the South Ontario Logistics Center Specific Plan has been prepared in conformance with the goals and policies of the City of Ontario Policy Plan (General Plan). The policy (General Plan) analysis in the Appendix “Policy Plan (General Plan) Consistency,” of the Specific Plan describes the manner in which the South Ontario Logistics Center Specific Plan complies with the Policy Plan goals and policies applicable to the South Ontario Logistics Center Specific Plan; and

WHEREAS, the South Ontario Logistics Center Specific Plan does not conflict with the Land Use Policies of the General Plan (Policy Plan component of TOP) and will provide for development, in a manner consistent with the General Plan. The policy (General Plan) analysis in the Appendix “Policy Plan (General Plan) Consistency,” of the Specific Plan describes the manner in which the South Ontario Logistics Center Specific Plan complies with the Policy Plan goals and policies applicable to the South Ontario Logistics Center Specific Plan; and

WHEREAS, an Environmental Impact Report (“EIR”) (State Clearinghouse No. 2021010318), including the adoption of a Mitigation Monitoring and Reporting Program and a Statement of Overriding Considerations have been prepared in accord with the California Environmental Quality (CEQA), the State CEQA Guidelines and the City of Ontario Guidelines to address the environmental effects of the Specific Plan (South Ontario Logistics Center); and

WHEREAS, Ontario Development Code Table 2.02-1 (Review Matrix) grants the City Council the responsibility and authority to review and act on the subject Application; and

WHEREAS, the Project has been reviewed for consistency with the Housing Element of the Policy Plan component of The Ontario Plan, as State Housing Element law (as prescribed in Government Code Sections 65580 through 65589.8) requires that development projects must be consistent with the Housing Element, if upon consideration of all its aspects, it is found to further the purposes, principals, goals, and policies of the Housing Element; and

WHEREAS, the Project is located within the Airport Influence Area of Ontario International Airport, which encompasses lands within parts of San Bernardino, Riverside, and Los Angeles Counties, and is subject to, and must be consistent with, the policies and criteria set forth in the Ontario International Airport Land Use Compatibility Plan ("ALUCP"), which applies only to jurisdictions within San Bernardino County, and addresses the noise, safety, airspace protection, and overflight impacts of current and future airport activity; and

WHEREAS, the project site is also located within the Airport Influence of Chino Airport and must be consistent with policies and criteria set forth within the 2011 California Airport Land Use Planning Handbook published by the California Department of Transportation, Division of Aeronautics, which addresses the noise, safety, airspace protection, and overflight impacts of current and future airport activity; and

WHEREAS, to address the requirements of SB330, the approval of the South Ontario Logistics Center Specific Plan is contingent upon City Council approval of General Plan Amendment, File No. PGPA21-004, for the Housing Element update to the Policy Plan (General Plan) component of The Ontario Plan, to address State mandates regarding the Regional Housing Needs Allocation ("RHNA"), as well as to modify the Policy Plan Land Use Plan (Exhibit LU-01) to establish a Zone Change (File No. PZC21-002); and

WHEREAS, City of Ontario Development Code Division 2.03 (Public Hearings) prescribes the manner in which public notification shall be provided and hearing procedures to be followed, and all such notifications and procedures have been completed; and

WHEREAS, on January 25, 2022, the Planning Commission of the City of Ontario conducted a hearing to consider the Project, and concluded said hearing on that date, voting to issue Resolution No. PC22-006 recommending the City Council approve the Application; and

WHEREAS, on March 1, 2022, the City Council of the City of Ontario conducted a hearing to consider the Project, and concluded said hearing on that date; and

WHEREAS, all legal prerequisites to the adoption of this Resolution have occurred.

NOW, THEREFORE, IT IS HEREBY FOUND, DETERMINED, AND ORDAINED by the City Council of the City of Ontario, as follows:

SECTION 1. ***Environmental Determination and Findings.*** As the decision-making body for the Project, the City Council has reviewed and considered the information contained in Environmental Impact Report (EIR), Mitigation Monitoring and Reporting Program and a Statement of Overriding Considerations prepared for the project and supporting documentation. Based upon the facts and information contained in the EIR (SCH# 2021010318) and supporting documentation, the City Council finds as follows:

(1) The South Ontario Logistics Center Specific Plan EIR, Mitigation Monitoring and Reporting Program and a Statement of Overriding Considerations contains a complete and accurate reporting of the environmental impacts associated with the Project; and

(2) The South Ontario Logistics Center Specific Plan EIR, Mitigation Monitoring and Reporting Program and a Statement of Overriding Considerations was completed in compliance with CEQA and the Guidelines promulgated thereunder; and

(3) The South Ontario Logistics Center Specific Plan EIR, Mitigation Monitoring and Reporting Program, and a Statement of Overriding Considerations reflects the independent judgment of the City Council; and

SECTION 2. ***Ontario International Airport Land Use Compatibility Plan ("ALUCP") Compliance.*** The California State Aeronautics Act (Public Utilities Code Section 21670 et seq.) requires that an Airport Land Use Compatibility Plan be prepared for all public use airports in the State; and requires that local land use plans and individual development proposals must be consistent with the policies set forth in the adopted Airport Land Use Compatibility Plan.

(1) On April 19, 2011, the City Council of the City of Ontario approved and adopted the Ontario International Airport Land use Compatibility Plan ("ALUCP"), establishing the Airport Influence Area for Ontario International Airport ("ONT"), which encompasses lands within parts of San Bernardino, Riverside, and Los Angeles Counties, and limits future land uses and development within the Airport Influence Area, as they relate to noise, safety, airspace protection, and overflight impacts of current and future airport activity. As the decision-making body for the Project, the City Council has reviewed and considered the facts and information contained in the Application and supporting documentation against the ALUCP compatibility factors, including [1] Safety Criteria (ALUCP Table 2-2) and Safety Zones (ALUCP Map 2-2), [2] Noise Criteria (ALUCP Table 2-3) and Noise Impact Zones (ALUCP Map 2-3), [3] Airspace protection Zones (ALUCP Map 2-4), and [4] Overflight Notification Zones (ALUCP Map 2-5). As a result, the City Council, therefore, finds and determines that the Project, when implemented in conjunction with the conditions of approval, will be consistent with the policies and criteria set forth within the ALUCP; and

(2) Chino Airport is owned and operated by the County of San Bernardino and is situated within the boundaries of the City of Chino, immediately south of Ontario. Portions of the City of Ontario are impacted by aircraft operations at Chino Airport. The adopted ALUCP for Chino Airport was approved in 1991 and does not reflect the most recently adopted 2005 Airport Master Plan. Also, the existing Chino Airport Land Use Compatibility Plan does not reflect the 2011 Caltrans Airport Land Use Planning Handbook. Public Utilities Code Section 21670.1(c) requires local jurisdictions under the "alternative process" to "rely upon" the California Airport Land Use Planning Handbook (Handbook) published by the California Department of Transportation (Caltrans), Division of Aeronautics in October 2011, for preparing Compatibility Plans and to utilize the Handbook's height, land use, noise, safety, and density criteria. Although the City of Ontario does not have the formal responsibility under the "alternative process" to prepare a compatibility plan for Chino Airport, the City of Ontario has completed an Airport Land Use Compatibility Assessment that analyzes Chino Airport's impacts on Ontario, consistent with policies and criteria set forth within the Caltrans 2011 California Airport Land Use Planning Handbook. The City of Ontario is currently working towards completing an Airport Land Use Compatibility Plan for portions of the City that are impacted by aircraft operations at Chino Airport. The proposed Project is located within the Airport Influence Area of Chino Airport and was evaluated and found to be consistent with the California Airport Land Use Planning Handbook and the City of Ontario's Chino Airport Land Use Compatibility Assessment. As the decision-making authority for the Project, the City Council has reviewed and considered the facts and information contained in the Application and supporting documentation against the ALUCP compatibility factors, including Safety, Noise, Airspace Protection, Overflight. As a result, the City Council, therefore, finds and determines that the Project, will be consistent with the policies and criteria set forth within the California Airport Land Use Planning Handbook and the City of Ontario's Chino Airport Land Use Compatibility Assessment.

SECTION 3. ***Concluding Facts and Reasons.*** Based upon the substantial evidence presented to the City Council during the above-referenced hearing, and upon the specific findings set forth in Section 1 through 3, above, the City Council hereby concludes as follows:

(1) The approximately 219.4-acre South Ontario Logistics Center Specific Plan is suitable for business park and industrial development and is consistent with the goals, policies, plans and exhibits of the Vision, Policy Plan (General Plan), and City Council Priorities components of The Ontario Plan. The proposed land uses in the proposed districts will also be in harmony in terms of access, size, and compatibility with existing land use in the surrounding area; and

(2) The proposed South Ontario Logistics Center Specific Plan is in conformance with the Land Use Policies and Goals of the Policy Plan and will provide standards and guidelines for the harmonious development within the districts, in a manner consistent with the Policy Plan. The Specific Plan is proposing business park and industrial type development for the approximately 219.4-acre site, which is what is proposed to be mandated by the land use plan of the Policy Plan, therefore, the proposed industrial uses will be in conformance with the policies and goals of the Policy Plan; and

(3) During the South Ontario Logistics Center Specific Plan review, opportunities for the involvement of citizens, California Native American Indian tribes (Government Code Section 65352.3.), public agencies, public utility companies, and civic, education, and other community groups, through public hearings or other means were implemented consistent with California Government Code Section 65351; and

(4) The project is consistent with the Housing Element of the Policy Plan (General Plan) component of The Ontario Plan, as the project site is not one of the properties in the Available Land Inventory contained in Table A-3 (Available Land by Planning Area) of the Housing Element Technical Report Appendix.

Senate Bill 330 ("SB 330") – Housing Accountability Act (Government Code Section 65589.5 et seq.) (SB 330) was passed by the California Legislature, signed by the Governor, and became effective on January 1, 2020. The bill is the result of the Legislature's extensive findings regarding the California "housing supply crisis" with "housing demand far outstripping supply."

SB 330 amends Government Code Section 65589.5 adds Government Code Sections 65940, 65943 and 65950, and repeals and readopts Sections 65906.5, 65913.10 and 65941.1. To summarize, no city may disapprove a residential housing development project for low- to moderate-income households (as defined therein) unless it makes a finding that the housing development project "would have a specific, adverse impact upon the public health or safety, and there is no feasible method to satisfactorily mitigate or avoid the specific adverse impact without rendering the development unaffordable to low- and moderate-income households…" such as where the housing development project is proposed on land "which does not have adequate water or wastewater facilities to serve the project." (Government Code Section 65589.5(d)(2), (4)).

In addition, the legislation adds Chapter 12 to Division 1 of Title 7 of the Government Code (Section 66300 et seq.) that applies to "affected cities," which are identified as cities in urbanized areas as determined by the most recent census. In accordance with SB 330, the Department of Community Development and Housing ("HCD") has prepared a list of affected cities and has determined that Ontario is an "affected city." Therefore, pursuant to Government Code section 66300(b)(1)(A) and (b):

> *(b) (1) Notwithstanding any other law except as provided in subdivision (i), with respect to land where housing is an allowable use, an affected city shall not enact a development policy, standard, or condition that would have any of the following effects:*
>
> *(A) Changing the general plan land use designation, specific plan land use designation, or zoning of a parcel or parcels of property to a less intensive use or reducing the intensity of land use within an existing general plan land use designation, specific plan land use designation, or zoning district below what was allowed under the land use designation and zoning ordinances of the affected county or affected city, as applicable, as in effect on January 1, 2018…"*

except when approved by HCD or when the following exception is set out in Government Code Section 66300(i)(1) applies:

*(i) (1) This section does not prohibit an affected county or an affected city from changing a land use designation or zoning ordinance to a less intensive use if the city or county concurrently changes the development standards, policies, and conditions applicable to other parcels within the jurisdiction to ensure that there is no net loss in residential capacity.*

The General Plan Amendment ("GPA") is proposed to change the Project site's land use designations from Business Park (0.6 FAR) and Low-Medium Density Residential (5.1-11 du/ac) to Business Park (0.6 FAR) and Industrial (0.55 FAR) land uses. The General Plan Amendment will allow development of up to 919,048 square feet of business park and 4,414,470 square feet of industrial, for a maximum development of 5,333,518 square feet. The GPA would, therefore, eliminate the low-medium density housing designation, thereby theoretically eliminating 1,352 units (as determined by the City's density determinations to be 8.5 dwelling units per acre [du/ac.]). In compliance with SB330, the EIR evaluated the elimination of 1,352 units and determined that based on SB 330 Exceptions for lack of water and sewer to serve a residential project and the no net loss of residential capacity, the Project is consistent with HCD exception findings. The Project site does not have sufficient water or wastewater facilities to serve a residential project. As explained in Section 3.4.1.2, of the Draft EIR, at present there is no water or sewer infrastructure that could serve residential units because the land has been used for agricultural purposes with water provided by on-site wells and sewer provided by septic systems. The Project Applicant is working on projects both approved and under review that span the length of Eucalyptus Avenue to the north, Merrill Avenue to the south, Euclid Avenue to the east, and Grove Avenue to the west (Ontario Ranch Business Park Specific Plan – Approved; Ontario Ranch Business Park Specific Plan Amendment – Under review; and, South Ontario Logistics Center – Subject Project), with a combined estimated cost of $144,331,000 (see Table 1, Project Cost Estimate by Project Area, below). The total estimated cost includes individual streets, lengths of pipe, storm drain, sewer, water, streetlights, curbing, paving, signals, power/fiber, and more. This cost would be financially infeasible for the 1,352 units presently allowed under the current residential General Plan designation and therefore the cost of such improvements would make residential development on the site financially infeasible (see Government Code Section 66589.5(d)(2) cited above).

| ***Table 1: Project Cost Estimate by Project Area*** | |
|---|---|
| ***Project Name*** | ***Cost Estimate*** |
| Ontario Ranch Business Park Phase 1 (Specific Plan - Approved) | $72,151,000 |
| South Ontario Logistics Center (Specific Plan – Subject Project, Under Review) | $59,780,000 |
| Ontario Ranch Business Park Phase 2 (Specific Plan Amendment, Under Review) | $12,400,000 |
| **Total** | **$144,331,000** |

In order to demonstrate "no net loss of residential capacity," the Project will be required to demonstrate increased residential zoning capacity on a "SB330 Replacement Site" by 1,352 units to off-set the Project site loss of zoning capacity (Low Medium Density, 5.1 to

11 du/ac). In tandem with the City's adoption of the 6th Cycle Housing Element, the City is also adopting an Affordable Housing Overlay zone and applying this zone to all parcels in the sites inventory that are south of Riverside Drive or are zoned MU-2 along Holt Boulevard. Relevant to the Project, the Affordable Housing Overlay zone will establish a minimum density of 20 dwelling units per acre for all development (regardless of Policy Plan designation or underlying zoning district), and increase the maximum density from 25 to 30 units per acre for parcels that are designated in the Policy Plan for Medium Density Residential ("MDR") when an affordable housing project is proposed with at least 25 percent of proposed units are restricted for lower income households. The creation of the Affordable Housing Overlay zone and increased maximum density of 5 dwelling units per acre will increase residential capacity on 473.7 acres of such parcels currently designated MDR, by 2,368 dwelling units. On December 20, 2021, the Planning Commission reviewed and recommended to City Council for approval a General Plan Amendment (File No. PGPA21-004) for the Housing Element update to the Policy Plan (General Plan) component of The Ontario Plan, to address State mandates regarding the Regional Housing Needs Allocation ("RHNA"), as well as to modify the Policy Plan Land Use Plan (Exhibit LU-01) to establish a Zone Change (File No. PZC21-002). The Project EIR addresses the potential impacts associated with relocating residential density from the Project site to the SB330 Replacement Sites located north of the Project site, along Grove Avenue, pursuant to SB330. With the City adoption of the 6th Cycle Housing Element and associated Affordable Housing Overlay zone, no net loss of residential capacity will occur as a result of the Project.

SECTION 4. ***City Council Action.*** Based upon the findings and conclusions set forth in Sections 1 through 3, above, the City Council hereby APPROVES the herein described Specific Plan, attached hereto as "Attachment A," and incorporated herein by this reference.

SECTION 5. ***Notice of Determination Filing.*** Within 5 days following final application approval, The Applicant shall provide the Notice of Determination ("NOD") filing fee and applicable Department of Fish and Wildlife mitigation fee to the City of Ontario Planning Department. Required fees shall be paid by check, made payable to the "Clerk of the Board of Supervisors", which shall be forwarded to the San Bernardino County Clerk of the Board of Supervisors, along with all applicable environmental forms/notices, pursuant to the requirements of the California Environmental Quality Act ("CEQA"). Failure to provide required fees within the above-specified time will result in an extension to the statute of limitations for the filing of a CEQA lawsuit against the Project, from 30 days to 180 days.

SECTION 6. ***Final Documents.*** Within 30 days following approval of this Ordinance, the Applicant shall provide the following to the City:

(1) Five bound copies of the final Specific Plan document; and

(2) One complete, unbound copy of the final Specific Plan document; and

(3) One CD containing a complete Microsoft Word copy of the final Specific Plan document, including all required revisions; and

(4) Five CDs, each containing a complete PDF copy of the final Specific Plan document, including all required revisions; and

(5) One CD containing a complete electronic website version of the final Specific Plan document, including all required revisions.

SECTION 7. ***Indemnification.*** The Applicant shall agree to defend, indemnify and hold harmless, the City of Ontario or its agents, officers, and employees from any claim, action or proceeding against the City of Ontario or its agents, officers or employees to attack, set aside, void, or annul this approval. The City of Ontario shall promptly notify the applicant of any such claim, action, or proceeding, and the City of Ontario shall cooperate fully in the defense.

SECTION 8. ***Custodian of Records.*** The documents and materials that constitute the record of proceedings on which these findings have been based are located at the City of Ontario City Hall, 303 East "B" Street, Ontario, California 91764. The custodian for these records is the City Clerk of the City of Ontario.

SECTION 9. ***Severability.*** If any section, sentence, clause or phrase of this Ordinance or the application thereof to any entity, person or circumstance is held for any reason to be invalid or unconstitutional, such invalidity or unconstitutionality shall not affect other provisions or applications of this Ordinance which can be given effect without the invalid provision or application, and to this end the provisions of this Ordinance are severable. The People of the City of Ontario hereby declare that they would have adopted this Ordinance and each section, sentence, clause or phrase thereof, irrespective of the fact that any one or more section, subsections, sentences, clauses or phrases be declared invalid or unconstitutional.

SECTION 10. ***Effective Date.*** This Ordinance shall become effective 30 days following its adoption.

SECTION 11. ***Publication and Posting.*** The Mayor shall sign this Ordinance and the City Clerk shall certify as to the adoption and shall cause a summary thereof to be published at least once, in a newspaper of general circulation in the City of Ontario, California within 15 days following the adoption. The City Clerk shall post a certified copy of this ordinance, including the vote for and against the same, in the Office of the City Clerk, in accordance with Government Code Section 36933.

PASSED, APPROVED, AND ADOPTED this ____ day of _____ 2022.

Sewer Subarea Master Plan (SSAMP)

# 1.0 INTRODUCTION

The South Ontario Logistics Center Specific Plan (this "Specific Plan") is one of the initial industrial specific plans implementing the vision outlined by the City of Ontario for the Ontario Ranch area (formerly New Model Colony). The Ontario Ranch area covers 8,200 acres of the former 14,000-acre San Bernardino Agricultural Preserve, which was historically used for dairy or cattle farming by descendants of Dutch, French Basque, Portuguese, and Mexican families.

The Agricultural Preserve was divided in 1999, with portions incorporated into the three adjacent cities of Chino, Chino Hills, and Ontario. The City of Ontario named its portion the *New Model Colony* after the original *Model Colony of Ontario* established by the Chaffey Brothers, William and George Jr., in 1882. The original Model Colony was founded on innovative land development principles that included the distribution of water rights with land purchases (Mutual Water Company), a grand boulevard (Euclid Avenue), and an agricultural college (Chaffey College, established 1885).

Within Ontario Ranch, the City of Ontario promotes innovative land development principles to continue the legacy of the Model Colony. The land use plan for Ontario Ranch provides for housing, commercial and industrial areas, parks, a lake, a golf course, and trail and bike links. Specific plans are required to guide development in Ontario Ranch to ensure the City objectives are achieved.

On January 26, 2010, the City of Ontario adopted The Ontario Plan, which serves as its new business plan and includes a long-term vision and principle-based policy plan, essentially functioning as the General Plan for the city, including Ontario Ranch.

## 1.1 Purpose and Intent of the Specific Plan

The South Ontario Logistics Center Specific Plan provides zoning regulations for development of the project site by establishing permitted land use, development standards, infrastructure requirements, and implementation requirements for development. A comprehensive set of design guidelines and development regulations are included to guide and regulate site planning, architectural character, and landscape within the community, ensuring that excellence in community design is achieved during project development. The Specific Plan establishes the procedures and requirements to approve new development within the project site.

The purpose of the Specific Plan is to:

1. Provide a planning framework that responds to the physical and market driven aspects of future development opportunities;
2. Specify adequate and coordinated infrastructure, utilities, and public services for this area of the Ontario Ranch;
3. Promote compatible uses and interfaces with adjacent properties;

4. Ensure the appropriate location and intensity of uses through new development parameters; and
5. Conform with State laws and local ordinances and policies for the preparation of the Specific Plan.

The objectives of the Specific Plan are to:

1. Create a professional, well-maintained, and attractive environment for the development of a multi-purpose business park, light industrial and warehousing/logistics complex.
2. Provide the entitlements and framework for the development of at least 5.3 million square feet of business park and light industrial uses.
3. Provide employment opportunities for community residents.
4. Facilitate the construction of utilities, roads, and other major infrastructure that are sufficiently sized to adequately serve the Specific Plan area.
5. Expand Ontario's industrial uses in proximity to local airports and regional transportation networks.
6. Create an economic engine to drive future growth in Ontario Ranch, spur infrastructure improvements in the area and implement the Specific Plan vision.

## 1.2 Project Description

This Specific Plan is the regulatory document for the South Ontario Logistics Center, accommodating up to 5,333,518 square feet of business park and general industrial uses on approximately 219 gross acres of land. The Specific Plan addresses consistency with The Ontario Plan; provides a development plan identifying land uses, circulation, infrastructure, streetscape, and landscape plans; establishes allowable uses and development standards for reviewing individual projects; presents design guidelines to create a visually attractive environment; summarizes the development review process; and specifies provisions for administration and implementation of the Specific Plan.

The South Ontario Logistics Center is envisioned to contain business park and industrial buildings supported by public roads and utility infrastructure systems, private driveways, parking lots, truck courts, lighting, landscaping, signage, and other functional and decorative features. The business park uses in smaller buildings are positioned along Eucalyptus Avenue while industrial uses in larger warehouse-style buildings comprise the balance of the site. As designed, building users are expected to be a mixture of local, national, and international businesses that bring job opportunities and economic growth to Ontario. A summary of the land uses is as follows:

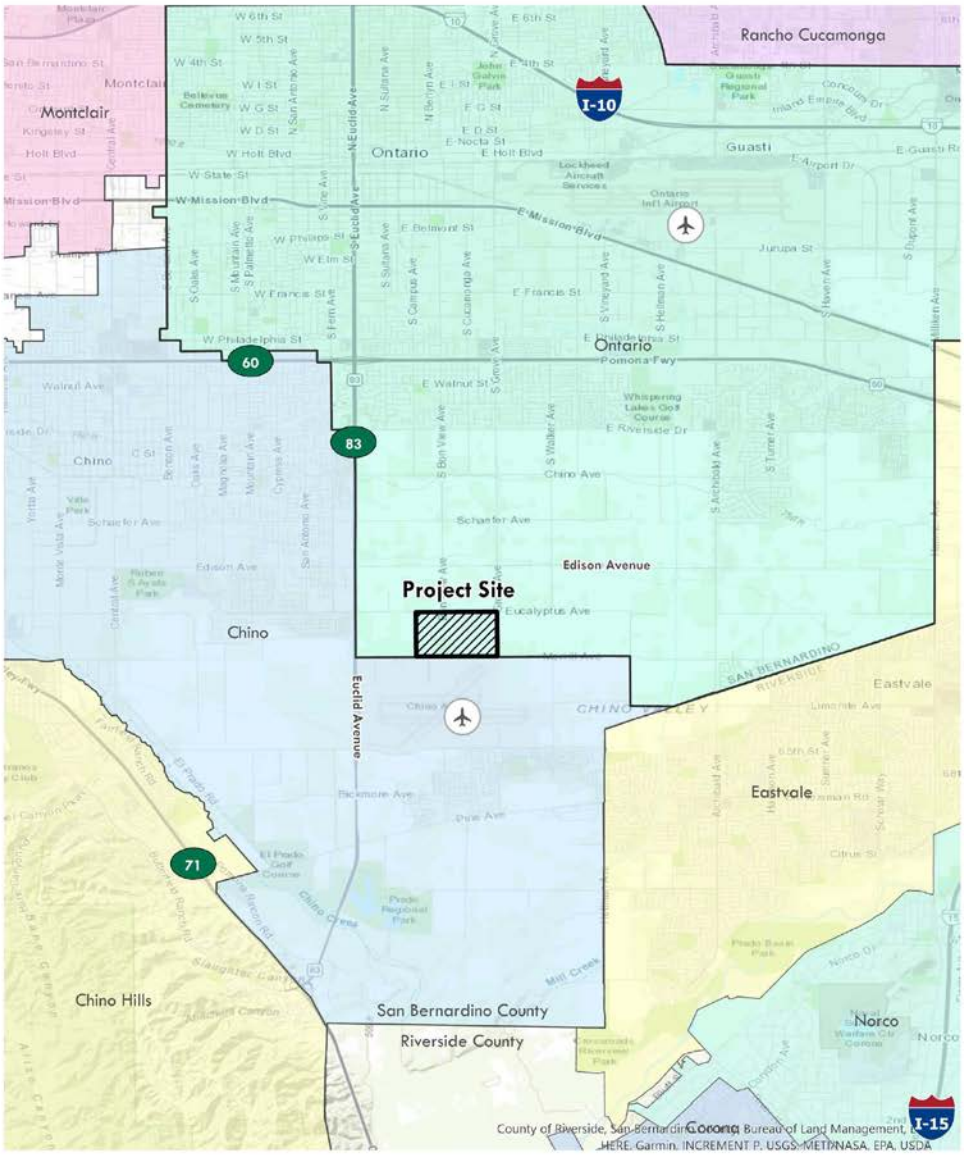

**Table 1.0 Land Use Summary**

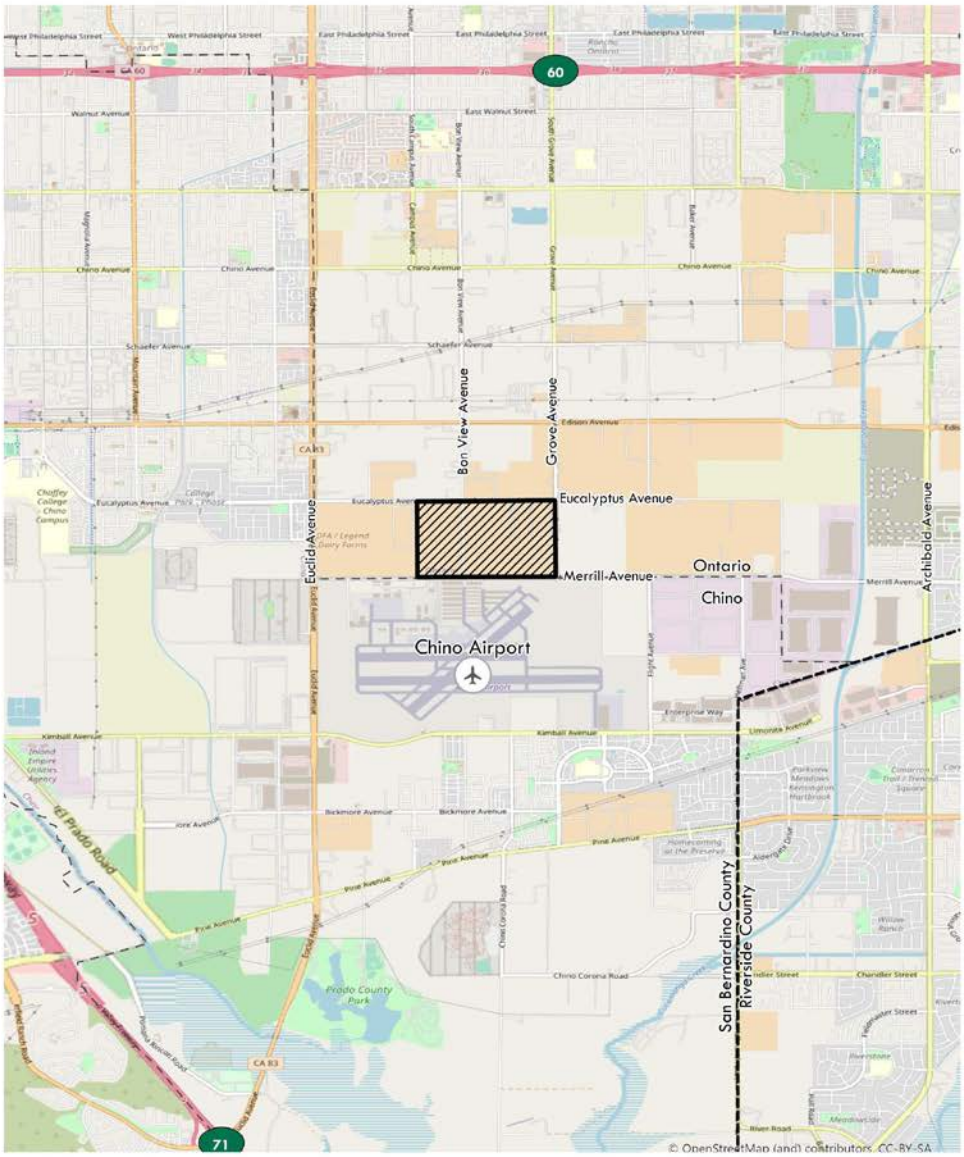
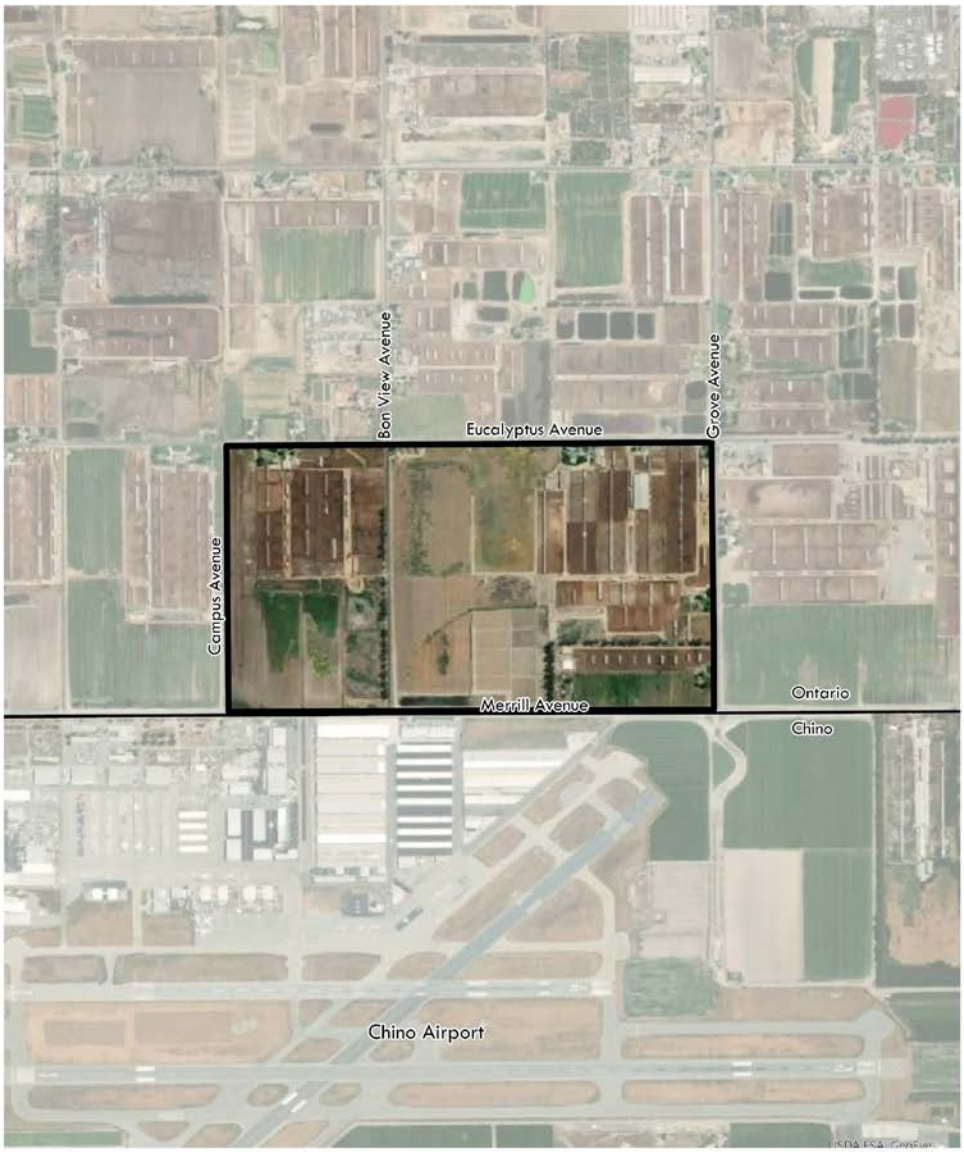
| Land Use Designation | Acreage | Maximum Building Square Footage |
|---|---|---|
| Business Park Planning Areas | 35.17 AC | 919,048 SF |
| Industrial – General Planning Areas | 184.22 AC | 4,414,470 SF |
| Total | 219.39 AC | **5,333,518 SF** |

## Location and Specific Plan Boundary



The Specific Plan area is located in the southwestern portion of the city of Ontario within the community called Ontario Ranch (Figure 1.1, Regional Map). The site is approximately 0.80 miles east of State Route 83 (CA-83); 2.97 miles south of State Route 60 (CA-60); 4.5 miles west of Interstate 15 (I-15); and 7.5 miles north of State Route 91 (CA-91) (Figure 1.2, Vicinity Map). The Specific Plan area encompasses 23 parcels bounded by Eucalyptus Avenue on the north, Grove Avenue on the east, Merrill Avenue on the south, Campus Avenue on the west, and consists of the following Assessor Parcel Numbers (APNs): 1054-071-01, -02; 1054-081-03; 1054-091-01, -02; 1054-101-01, -02; 1054-231-01, -02; 1054-241-01, -02; 1054-321-01, -02; 1054-311-01, -02; 1054-051-01, -02; 1054-061-01, -02; 1054-251-01, -02, 1054-301-01, -02. (Figure 1.3, Specific Plan Boundary).

# Regional Map



South Ontario Logistics Center Specific Plan **Figure 1.1**

## Vicinity Map

South Ontario Logistics Center Specific Plan **Figure 1.2**

## Specific Plan Boundary

South Ontario Logistics Center Specific Plan **Figure 1.3**

### Employment Generation

At build-out, the South Ontario Logistics Center is anticipated to create hundreds of jobs in warehousing, logistics, light manufacturing, and administration. Actual job creation depends on the type of land uses ultimately developed, as a wide range of office, business park, and industrial uses are permitted. For example, e-commerce uses such as internet merchant fulfillment would yield more jobs than a distribution warehouse since many e-commerce companies employ labor-intensive picking and packing operations. Employment opportunities will range from entry level to highly skilled labor, adding to Ontario's competitive advantage in the region. South Ontario Logistics Center will also provide expanded opportunities for start-up businesses.

### Infrastructure Framework

In cooperation with adjacent property owners and developers, the Specific Plan will help establish the necessary framework to enable the continued growth and development of Ontario Ranch. The Specific Plan identifies master planned domestic water, recycled water, sewer, storm drain and fiber optic infrastructure.

### Community Compatibility

The Specific Plan land use plan designates the northern frontage along Eucalyptus Avenue as Business Park, which provides for smaller scale buildings with less intense uses. The Industrial designation is applied to the remainder of the Specific Plan area, which is adjacent to the Chino Airport across Merrill Avenue.

## 1.3 Specific Plan Requirements

The range of topics addressed in a specific plan is left to the discretion of the decision-making body. However, all specific plans must, at a minimum, address the following:

1. The distribution, location, and extent of the uses of land, including open space, within the area covered by the plan.
2. The proposed distribution, location, and extent and intensity of major components of public and private transportation, sewage, water, drainage, solid waste disposal, energy, and other essential facilities proposed to be located within the area covered by the plan and needed to support the land uses described in the plan.
3. Standards and criteria by which development will proceed, and standards for the conservation, development, and utilization of natural resources, where applicable.
4. A program of implementation measures including regulations, programs, public works projects, and financing measures necessary to carry out the above identified items.

## 1.4 Authority and Scope of the Specific Plan

The Ontario Plan requires approval of a Specific Plan for development within Ontario Ranch to guide development of the project site, ensure unified districts and neighborhoods, and implement the City's goals and policies. The City of Ontario has zoned the project site SP (Specific Plan) Zoning District with an AG (Agriculture) Overlay District. This Specific Plan provides zoning regulations to govern development of

the site and shall take precedence over the City of Ontario Development Code. However, in instances where the Specific Plan is silent, the Development Code shall prevail.

The California Government Code (Title 7, Division 1, Chapter 3, Article 8, Sections 65450 through 65457) grants the City the authority to adopt a specific plan by ordinance (a regulatory plan) or resolution (a policy driven plan). This Specific Plan is a regulatory document, providing land use and design guidance adopted by ordinance.

As a regulatory plan, this document serves as zoning law for the land within the Specific Plan area. Development plans, site plans, and tentative tract and parcel maps must be consistent with this Specific Plan and The Ontario Plan. The topics covered in this Specific Plan include land use, infrastructure, development standards, design guidelines, and implementation measures. The minimum requirements of a specific plan are established by California Government Code Sections 65450 through 65457 and City of Ontario Code Sections 9-1.2100 to 9-1.2125.

No local public works project may be approved, no tentative map or parcel map for which a tentative map was not required may be approved, and no zoning ordinance may be adopted or amended within an area covered by a specific plan unless it is consistent with the adopted specific plan (California Government Code Section 65455). The California Government Code also requires compatibility with local, regional and other planning measures. For example, the Specific Plan must be consistent with any applicable comprehensive airport land use plan (ALUP) (California Government Code Section 65302.3). After adoption, any identification of inconsistency must be followed by amendment of either the existing plans and regulations or the specific plan itself. Failure to correct inconsistencies can result in the inability to enforce specific plan regulations and policies.

## 1.5 Other Governing Documents

In addition to this Specific Plan, which includes a Land Use Plan, Infrastructure Plan, Development Regulations, Design Guidelines, and an Implementation Plan tailored to the South Ontario Logistics Center, the following documents also contain applicable information:

- The Ontario Policy Plan (which serves as the City's State mandated General Plan) that includes City-wide policies pertaining to land use, housing, mobility, safety, environmental resources, parks & recreation, community economics, community design, and social resources.
- The City of Ontario Development Code, which governs over topics on which this Specific Plan's development regulations are silent. (Where the requirements of this Specific Plan differ from the requirements of the Ontario Development Code, this Specific Plan takes precedence.)
- The South Ontario Logistics Center Development Agreement, which specifies methods for the financing, acquisition, and construction of infrastructure systems and provides assurance that development of the property may proceed subject to Ontario's rules and regulations in effect at the time of this Specific Plan's approval.
- The Airport Land Use Compatibility Plans for Ontario International Airport (ONT) and Chino Airport. The City of Ontario is currently preparing an Airport Land Use Compatibility Plan for Chino Airport which relies on the California Airport Land Use Planning Handbook published by Caltrans Division of Aeronautics, that

is expected to be adopted in 2021. The Chino Airport Land Use Compatibility Plan will establish policies and criteria for the four types of compatibility impacts which include safety, noise, airspace protection, and overflight. Projects within the Specific Plan boundary shall be required to be consistent with the policies and criteria of the Airport Land Use Compatibility Plans for Ontario International Airport and Chino Airport.

- The Mitigation Monitoring and Reporting Program (MMRP) that is part of the South Ontario Logistics Center's Environmental Impact Report (EIR) prepared in compliance with the California Environmental Quality Act. The MMRP stipulates measures that are required to be implemented to mitigate the environmental effects of the commerce center's construction and operation.

## 1.6 California Environmental Quality Act Compliance

The Specific Plan is a discretionary project and is subject to the requirements of the California Environmental Quality Act (CEQA). Pursuant to State and local CEQA guidelines, an Environmental Impact Report (EIR) addressing the impacts associated with the development of a project must be considered and certified by the City prior to approval of a Specific Plan.

To address potential environmental impacts, it is anticipated that an EIR will be prepared. The EIR will analyze the potential environmental impacts of the adoption and implementation of the Specific Plan and any concurrently processed permits. The EIR for the Specific Plan will be helpful in dealing with concurrently processed implementing projects (such as development within the Specific Plan and/or related infrastructure provision) and subsequent activities within the Specific Plan area. With a detailed analysis of the Specific Plan and associated development, many subsequent activities, such as grading permits or other development permits, could be found to be within the scope of the project described in the EIR, and no further environmental documents would be required.

## 1.7 Organization of this Specific Plan

The Specific Plan is organized by chapter as follows:

1. **Introduction.** This chapter states the purpose and intent of the Specific Plan, introduces the proposed project, summarizes specific plan requirements, and explains the scope and authority of the Specific Plan and its compliance with CEQA.

2. **Existing Conditions.** This chapter explains the baseline conditions for the project site including current and surrounding land uses, airport influence, circulation, utilities, and environmental conditions.

3. **Development Plan.** This chapter establishes the overall development concept for the Specific Plan including the land use plan, infrastructure plans for water, sewer, drainage, and circulation, and the provision of public services such as fire, police, and solid waste disposal.

4. **Land Use and Development Regulations.** This chapter establishes the land use designations and regulations for the Specific Plan. Upon adoption of this Specific Plan, the land use and development standards within this chapter serve as the legal zoning for the Specific Plan area.

5. **Design Guidelines.** This chapter provides direction for site planning, architecture, and landscape design in the Specific Plan area.

6. **Administration and Implementation.** This chapter provides requirements for development review and administration of the Specific Plan including amendment procedures and implementation priorities.

7. **The Ontario Plan Consistency.** This chapter describes the Specific Plan's conformance with The Ontario Plan.

# 2.0 EXISTING CONDITIONS

The following sections document the conditions prior to the adoption of this Specific Plan, including land uses, airport influence areas, Williamson Act contracts, land use designations, circulation, and environmental conditions.

## 2.1 Existing and Surrounding Land Uses

The Specific Plan area is occupied by agricultural uses, including a dairy farm, row crops, and vacant land. Approximately six residences that house the dairy owner and workers are also located within the Specific Plan area. Dairy farming and agriculture have been the primary uses of the property since the 1930s or earlier.

Figure 2.1 shows the existing uses in the vicinity, which include:

- North across Eucalyptus Avenue: dairy farm and agricultural row crops
- South across Merrill Avenue: Chino Airport (City of Chino)
- East across Grove Avenue: dairy farm and agricultural row crops
- West across Campus Avenue: dairy farm and agricultural row crops

The Ontario Plan designates the surrounding areas in Ontario Ranch for business park, commercial, and residential uses.

## 2.2 Airport Influence Areas

### Ontario International Airport Influence Area

The Ontario International Airport Land Use Compatibility Plan (ONT ALUCP) was adopted by the Ontario City Council on April 19, 2011. The intent of a compatibility plan is to avoid conflicts between airport operations and surrounding land uses. The Specific Plan area is not within the safety, noise impact, or airspace protection zones of the ONT ALUCP; however, it is within the Airport Influence Area, as is the entire City of Ontario. While a Real Estate Transaction Disclosure policy is not required for non-residential land, developers or tenants may purchase a Natural Hazard Disclosure report that would indicate that the property is in an Airport Influence Area.

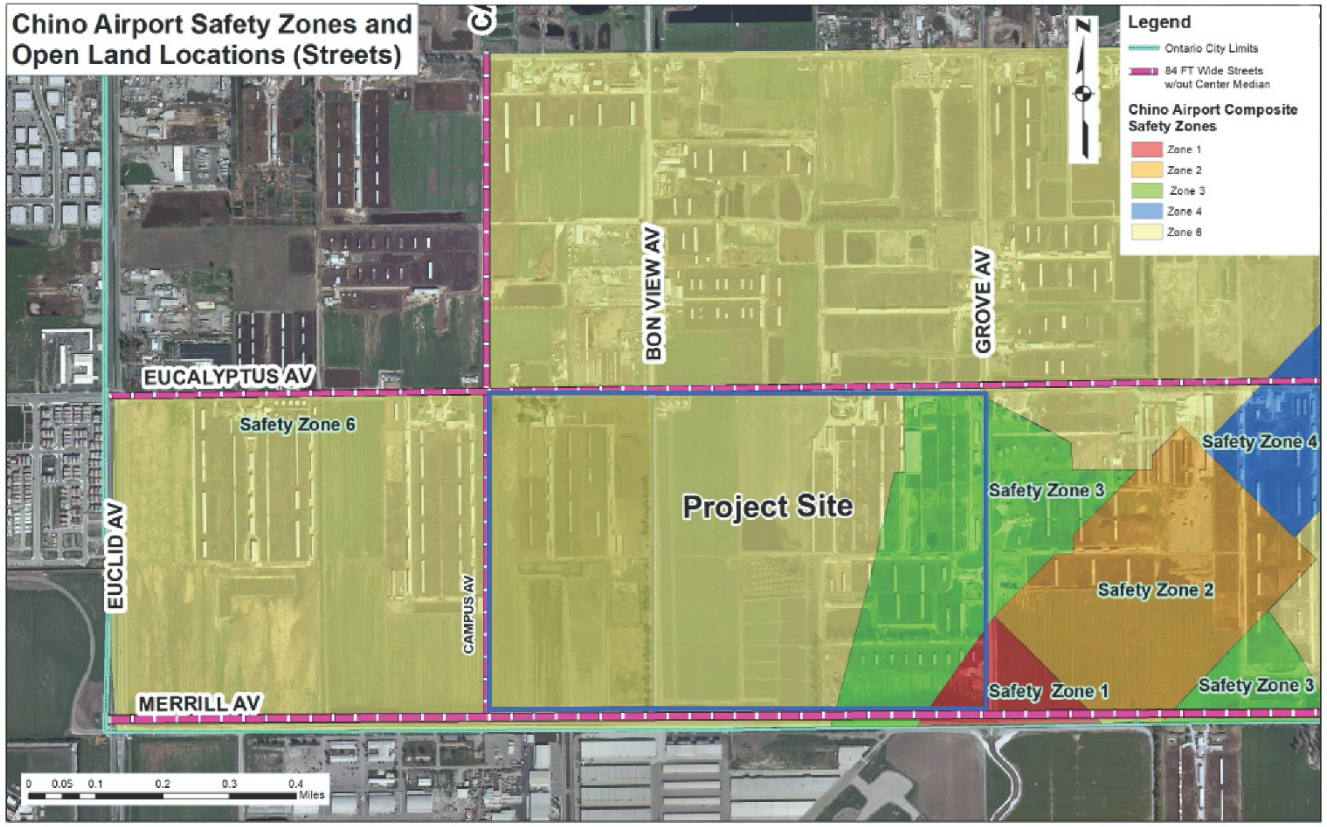
### Chino Airport Overlay Zone

The Specific Plan area is within Safety Zone 1, 3 and 6 of the Chino Airport Overlay (Generic Safety Zones for General Aviation Airports from the Caltrans Division of Aeronautics – California Airport Land Use Planning Handbook) as shown in Figure 2.2 Airport Influence Areas.

The following open land and occupancy limit requirements shall apply in Chino Airport Safety Zones, as established by the Chino Airport Compatibility Plan.

Zone 1: No buildings shall be located in Safety Zone 1.
Zone 3: At least 15% of the zone shall remain as open land* and occupancy shall be limited to 100 people per acre on average and a maximum of 300 people in any one acre.

Zone 6: At least 10% of the zone shall remain as open land* or an open area every ¼ mile to ½ mile is required; occupancy shall be limited to 300 people per acre on average and a maximum of 1,200 people in any one acre.



* Open land is defined as areas at least 300 feet long by 75 feet wide (about 0.5 acre) that are relatively level and free of tall vertical objects such as structures, overhead lines/wires, and large trees and poles greater than 4 inches in diameter and taller than 4 feet above the ground. Parking lots can be considered as acceptable open lands. In the Specific Plan area, surrounding roads (Eucalyptus, Campus and Merrill Avenues), drive aisles, and truck parking lots can be considered as acceptable open lands in urbanized settings.

## Existing Surrounding Land Uses

South Ontario Logistics Center Specific Plan **Figure 2.1**

## Airport Influence Areas

South Ontario Logistics Center Specific Plan

**Figure 2.2**

## 2.3 Williamson Act Contracts

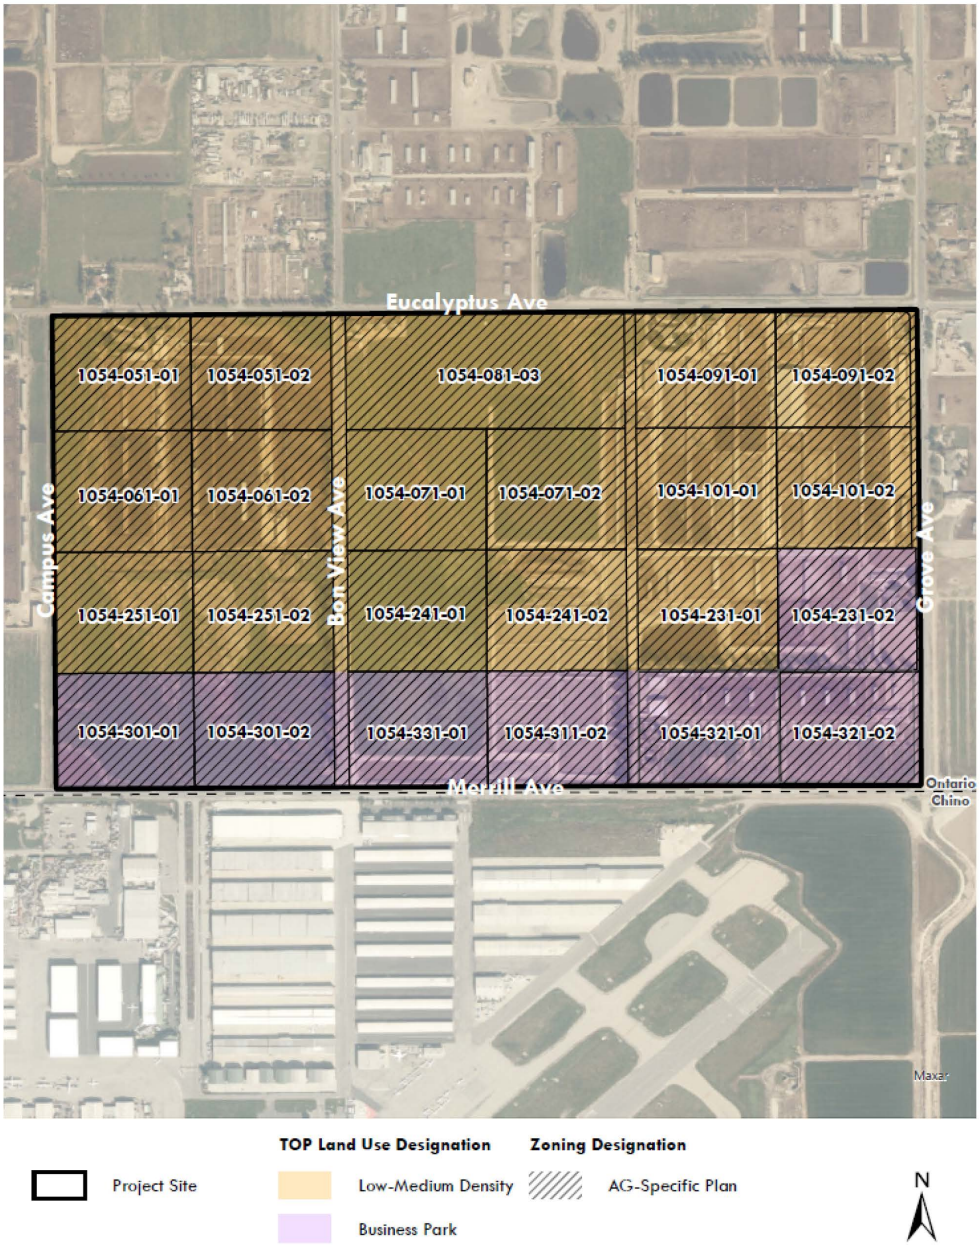
The California Land Conservation Act of 1965, commonly referred to as the Williamson Act, enables local governments to enter into contracts with private landowners for the purpose of restricting specific parcels of land to agricultural or related open space use. In return, landowners receive property tax assessments that are much lower than normal because they are based upon farming and open space uses as opposed to full market value. The motivation for the Williamson Act is to promote voluntary land conservation, particularly farmland conservation. At the time this Specific Plan was prepared (2021), there is an active Williamson Act Contract (Contract #72-392) on APN 1054-051-01, 02 and 1054-061-01, 02. However, a notice of non-renewal was recorded, starting the process to terminate this Contract. As one of the discretionary actions associated with the South Ontario Logistics Specific Plan, these existing Williamson Act Contracts will be cancelled. Cancellation would comply with provisions and requirements identified at Government Code (GC) §51280 et seq. The City would be required to make the required statutory findings (GC §51282(a)). The landowner would be required to pay the requisite cancellation fee.

## 2.4 Existing Ontario Plan and Zoning Land Use Designations

The Ontario Plan existing land use designations and existing zoning map designations for the Specific Plan area (prior to adoption of the South Ontario Logistics Center Specific Plan) are shown in Figure 2.3.

The Ontario Plan existing land use designations are:

- Business Park (0.6 Floor Area Ratio (FAR))
  Assessor Parcel Number (APN): 1054-231-02; 1054-321-01, -02; 1054-311-02; 1054-331-01; 1054-301-01, -02.



- Low-Medium Density Residential (5.1 – 11 dwelling units per acre)
  APN: 1054-071-01, -02; 1054-081-03; 1054-091-01, -02, 1054-101-01, -02; 1054-231-01; 1054-241-01, -02, 1054-252-01, -02, 1054-061-01, -02, 1054-051-01,-02.

- Chino Airport Overlay
  APN: 1054-101-02; 1054-231-01, -02; 1054-311-02, 1054-321-01, -02 and portions of 1054-091-02; 1054-101-01; 1054-241-02; 1054-311-01

The project includes an application for a General Plan Amendment to change the land use designations to Industrial and Business Park, as discussed in Chapter 3, Development Plan.

The existing zoning designation is SP (Specific Plan) Zoning District with an AG (Agriculture) Overlay District. The AG Overlay indicates that the land can continue to be used for agricultural uses, but the SP District designation requires approval of a specific plan by the City for urban development of the project site.

## Existing TOP Land Use and Zoning

South Ontario Logistics Center Specific Plan **Figure 2.3**

## 2.5 Existing Circulation

The Specific Plan area is located approximately three miles south of State Route 60 via State Route 83 (Euclid Avenue), which is located west of the Specific Plan area, as shown in Figure 1.1 and Figure 1.2 .

Vehicular circulation in the Specific Plan area is provided by Eucalyptus Avenue on the north, Merrill Avenue on the south, Grove Avenue on the east, and Campus Avenue on the west.

Grove, Eucalyptus, Campus and Merrill Avenues do not provide fully dedicated rights-of-way as specified in The Ontario Plan and lack major street and parkway improvements.

Bon View Avenue is a fully dedicated street but lacks street and parkway improvements.

The site currently takes access from multiple drive entrances off Grove Avenue and Eucalyptus Avenue. There are no site access points from Merrill and Bon View Avenues due to dirt berms along these property lines.

There is an existing unused dedicated paper street (Cucamonga Avenue) that runs north/south through the center of the site that will be vacated.

There are no traffic signals located at the street intersections bordering the site.

No sidewalks exist adjacent to the site.

## 2.6 Existing Environmental Conditions

### Topography

The topography of the site is moderately flat, sloping from the northeast to the southwest with approximately a 17-foot drop in elevation.

### Geology, Soils, and Seismicity

A geotechnical feasibility study included boring to depths of 20 to 30± feet and trenching to depths of 5 to 10± feet. Manure was present at the ground surface at two of the trenches with thicknesses of 4½ to 5± inches. Highly organic topsoil materials were encountered at some of the boring and trench locations, which consisted of silty fine sands and contained manure and/or other fibrous organic material. A 6±-inch-thick surficial layer of aggregate base was observed at the ground surface at one of the borings.

Artificial fill soils were encountered beneath the AB layer and at the ground surface at one of the boring locations, extending to depths of 2½ to 3± feet. The fill soils consisted of medium dense fine sand with trace silt, fine gravel, and AC fragments. Native alluvial soils were encountered at the ground surface or beneath the fill, topsoil, and manure at all of the boring and trench locations. The near-surface alluvium generally consisted of loose to medium dense fine sands and silty fine sands to fine sandy silts, extending to depths of 4½ to 8½± feet below ground surface. Beneath these soils, the borings encountered stiff to very stiff clayey silts, silty clays, and sandy clays with occasional layers of medium dense silty sands, sandy silts, and clayey sands, extending to at least the maximum depth explored of 30± feet below existing site grades. Free water was not encountered during the drilling of any of the borings.

The subject site is located in an area that is subject to strong ground motions due to earthquakes. Research of available maps indicates that the Specific Plan area is not located within an Alquist-Priolo Earthquake Fault Zone. Furthermore, no evidence of faulting was identified during the geotechnical investigation. Therefore, the possibility of significant fault rupture on the site is considered low.

The potential for other geologic hazards such as seismically induced settlement, lateral spreading, tsunamis, inundation, seiches, flooding, and subsidence affecting the site is considered low. Research of the San Bernardino County Land Use Services website indicates that the subject site is not located within a zone of liquefaction susceptibility. Based on the mapping performed by San Bernardino County and the conditions encountered at the boring locations, liquefaction is not considered to be a design concern for development within the Specific Plan area.

### Hydrology

Storm runoff from the site generally drains from north to south. Onsite detention areas are located in the central and southerly portions of the site.

The site surface drains southerly to a dirt swale located adjacent to Merrill Avenue, then westerly to a set of four corrugated steel pipes, then southerly to an earthen channel adjacent to Euclid Avenue.

Areas north of the project site drain southerly towards Eucalyptus Avenue and then westerly towards Euclid Avenue. Eucalyptus Avenue is not fully improved, so it is possible that offsite flows from the north enter the project site.

According to Federal Emergency Management Agency (FEMA) Flood Insurance Rate Maps, the project site is not located within a flood hazard zone.

### Biological Resources

The Specific Plan area generally represents low biological resource value due to highly disturbed site conditions and historic dairy/agricultural use, resulting in low biological diversity. The entire site has been disturbed by agricultural use and no native habitat was present.

There is limited vegetation on the majority of the site; the vegetation that exists is generally non-native grasses and weeds. Project site contains approximately 94 acres of agriculture fields. These fields are currently fallow. The agriculture fields are disturbed and dominated by non-native species of grasses and plants. Species observed include Avenasp., Bromussp., Russian thistle (Salsola tragus) and alfalfa (Medicago sativa).

The site contains approximately 107.45 acres of disturbed agriculture infrastructure. These areas contain no native habitat and are currently used for containing livestock. These areas are mostly developed with agricultural use structures or residential buildings. Vegetation within these areas consists of non-native ornamental plant species.

The project site contains approximately 19.0 acres of areas stock/retention ponds and channels. These ponds and channels are man-made and fed by wells. The ponds are dry and dominated by upland species such as bromus and Russan thistle, but the stock pond drainage channels contain grasses such as Burmda (Cynodon dactylon) and curly dock (Rumex crispus).

## 2.7 Existing Ground Water Wells

In compliance with the Chino Basin Water Master's Well Procedure for Developers, a well use/destruction plan and schedule for all existing private/agricultural wells shall be submitted to the City of Ontario for approval prior to the issuance of permits for any construction activity. If a private well is actively used for water supply, the Developer shall submit a plan to abandon such well and connect users to the City's

water system (residential to the domestic water system and agricultural to the recycled water system) when available. Wells shall be destroyed/abandoned per the California Water Resource Guidelines and require permitting from County Health Department. The locations of existing wells are shown in Figure 2.4, “Existing Ground Water Wells”. A copy of such permit and Form DWR 188 Well Completion Form shall be provided to the Development Engineering Department and the Utilities Engineering Department prior to issuance of grading and/or building permits. If the Developer proposes temporary use of an existing agricultural well for purposes other than agriculture, such as grading, dust control, etc., the developer shall make a formal request to the City of Ontario for such use prior to issuance of permits for any construction activity. Upon approval, the Developer shall enter into an agreement with the City of Ontario and pay any applicable fees as set forth by the agreement.

## Existing Ground Water Wells

South Ontario Logistics Center Specific Plan **Figure 2.4**

# 3.0 DEVELOPMENT PLAN

This chapter provides the framework to guide development of the South Ontario Logistics Center Specific Plan. The chapter presents the proposed planning areas, infrastructure plans, and public services to support the project.

## 3.1 Land Use Plan

The Specific Plan consists of five Planning Areas accommodating a variety of industrial-serving commercial, low-intensity office, technology, light manufacturing, and warehouse/distribution uses that are compatible with the site's location within Safety Zone 1, 3 and 6 of the Chino Airport Influence Area. Chino Airport Runway 21 Runway Protection Zone and CFR Part 77 height restriction of the Chino Airport. The Land Use Plan implements the vision of The Ontario Plan by providing opportunities for employment in manufacturing, distribution, and research and development at intensities designed to meet the demand of current and future market conditions. A list of allowable uses by Planning Area is presented in Chapter 4 (Land Use and Development Standards).

Figure 3.1a (Land Use Plan) identifies the location of the land use designations for the proposed Project area. The Specific Plan zoning mirrors the TOP Land Use Districts and is identified along with the five Planning Areas in Figure 3.1b.

***BP (Business Park) Zoning District:*** The BP zoning district accommodates industrial-serving commercial, low intensity office uses, and certain light industrial uses. Development within this district is typically multi-tenant in nature; however, single-tenant buildings are not precluded.

***IG (Industrial - General) Zoning District:*** The IG zoning district accommodates storage and warehousing uses located in larger buildings on larger sites. Uses may include e-commerce, high cube warehouses, or distribution. A wide range of manufacturing and assembly uses are also permitted in this district.

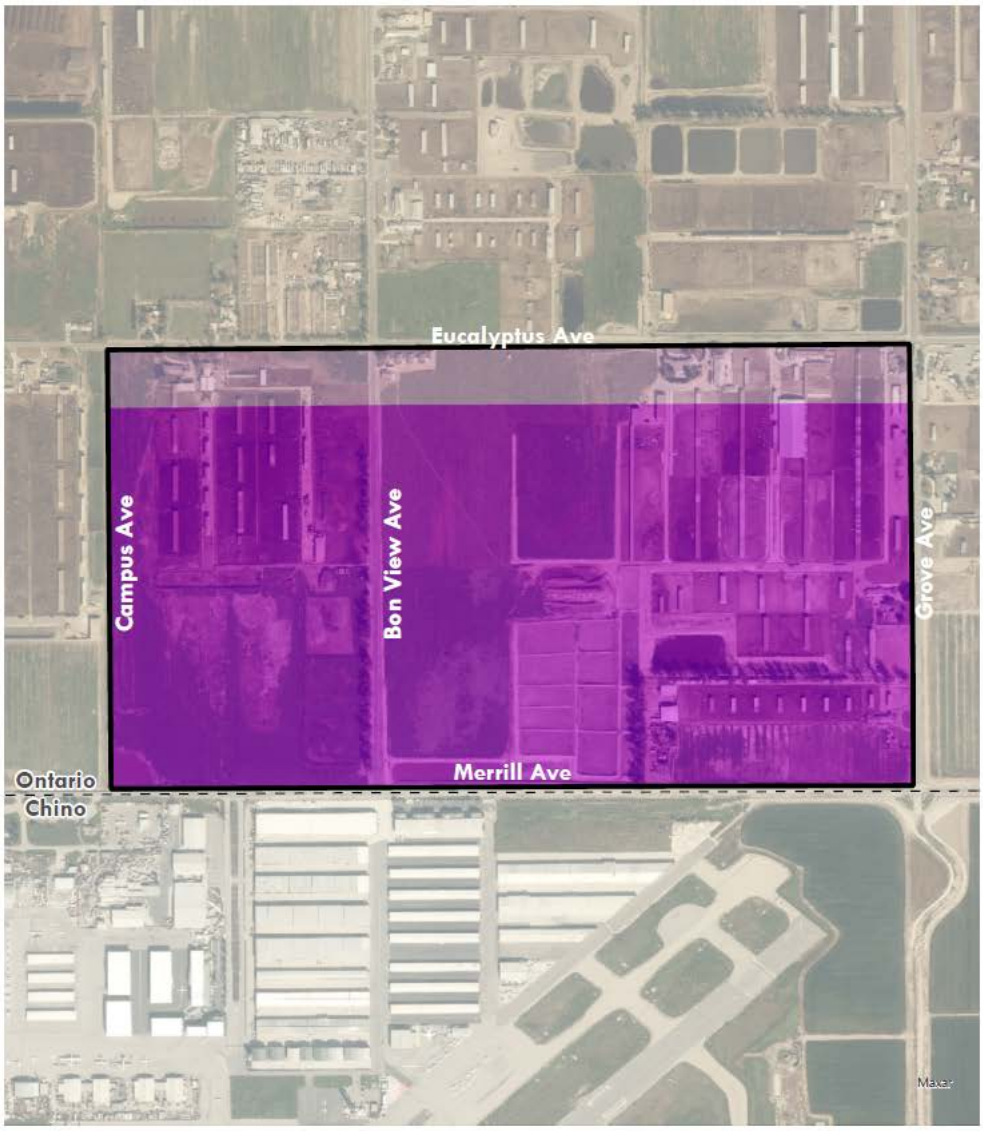


Table 3.1 provides the maximum allowable gross building area for each Planning Area at its associated floor area ratio. Development standards (found in Chapter 4), such as setbacks, parking, landscaping, infrastructure, and site design, may reduce the maximum gross square footage.

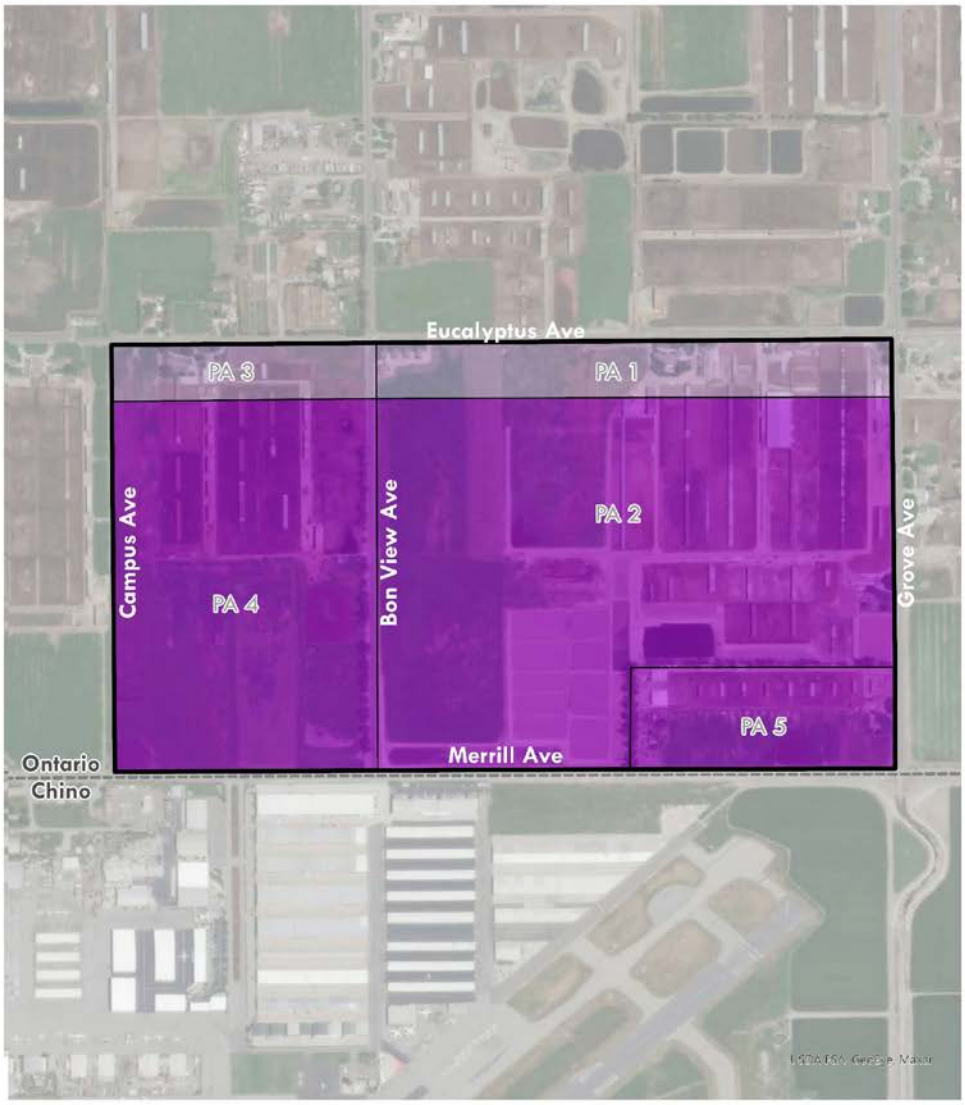
### Table 3.1 Maximum Specific Plan Build-Out

| Planning Area | Maximum Floor Area Ratio[1] | Site Acreage | Maximum Building Square Footage |
|---|---|---|---|
| Planning Area 1: Business Park | 0.60 | 23.65 | 618,076 SF |
| Planning Area 3: Business Park | 0.60 | 11.52 | 300,972 SF |
| Planning Area 2: Industrial - General | 0.55 | 106.71 | 2,556,442 SF |
| Planning Area 4: Industrial -General | 0.55 | 60.06 | 1,438,914 SF |
| Planning Area 5: Industrial – General | 0.55 | 17.45 | 419,114 SF |
| **TOTAL** | | **219.39** | **5,333,518** |

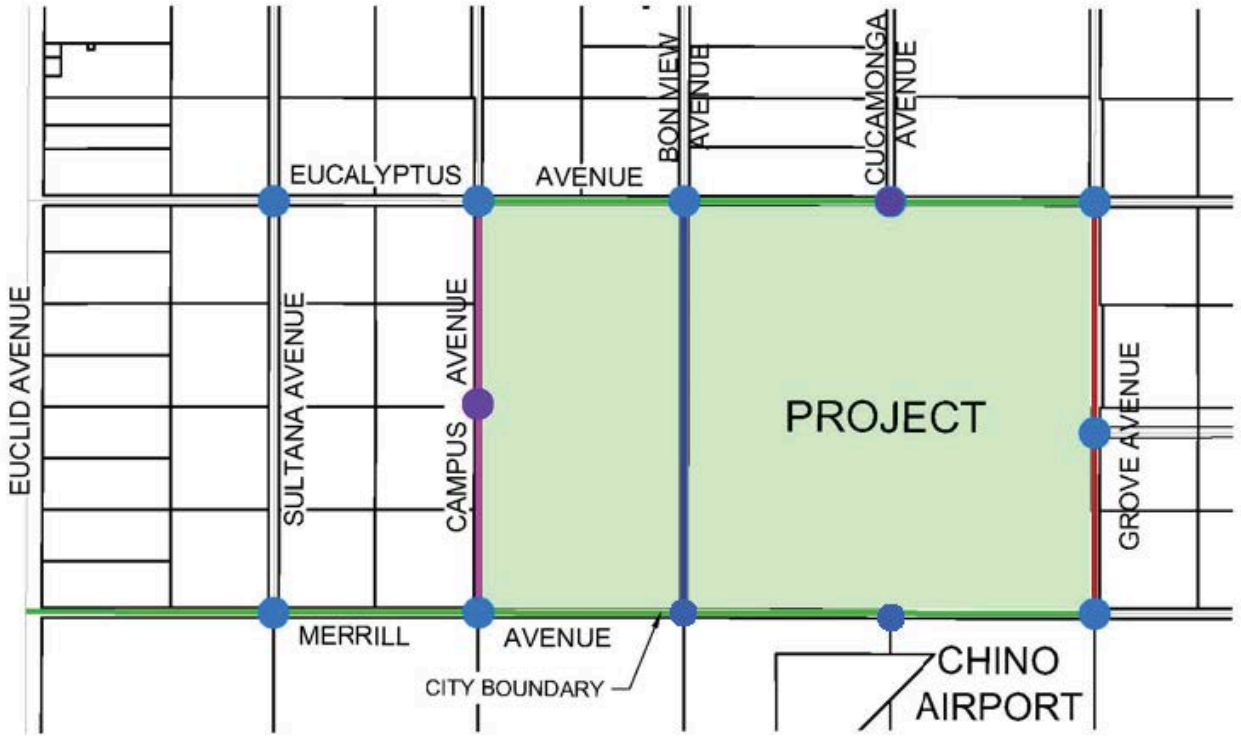


Note:
1. Provided the General Plan Amendment application submitted in conjunction with this Specific Plan to designate PAs 1 and 3 as Business Park and PAs 2,4, and 5 as Industrial – General is approved.

## TOP Land Use Plan

South Ontario Logistics Center Specific Plan **Figure 3.1a**

## Proposed Specific Plan Land Use Plan



South Ontario Logistics Center Specific Plan **Figure 3.1b**

## 3.2 Street Plan

The Street Plan (Figure 3.2) facilitates movement of vehicles, pedestrians and cyclists within the Specific Plan area, consistent with the City of Ontario's Roadway Classification System, shown in Figure 3.3.

Figures 3.4 and 3.4a presents typical street cross sections for Grove, Eucalyptus, Merrill, Bon View, and Campus Avenues. Preliminary improvement responsibilities are indicated in the cross sections; however, final fair share responsibilities for street improvements shall be as determined in a Development Agreement with the City. Conceptual streetscape design is presented in Chapter 5 (Design Guidelines). Road surface, sidewalk, and trail improvements within the Specific Plan area shall be approved by the City's Engineering Department.

### 3.2.1 Grove Avenue

Grove Avenue is located along the eastern boundary of the Specific Plan area and is designated as an Other Principal Arterial in The Ontario Plan's Functional Roadway Classification Plan. Grove Avenue is designed with a 124-foot wide right-of-way, a 28-foot wide center median, and 28-foot wide pavement from median to curb face. The existing street right-of-way varies; therefore, a varied street dedication of 10 to 29 feet is required. An additional 20 feet dedication for the following neighborhood edge is required.

The Grove Avenue streetscape design illustrated in Chapter 5, Design Guidelines, specifies 20-foot wide parkways that include a five-foot wide sidewalk and 20-foot wide landscape buffer setbacks. The east side also includes an eight-foot wide decomposed granite multipurpose trail. Together, the parkways and landscape buffer setbacks create 40-foot wide neighborhood edges as specified in the *Ontario Ranch Colony Streetscape Master Plan*.

### 3.2.2 Eucalyptus Avenue

Eucalyptus Avenue is located along the northern boundary of the Specific Plan area, providing east/west access to the site. Eucalyptus Avenue is designated by the Functional Roadway Classification Plan as a four-lane Collector Street. The Specific Plan specifies an 108-foot wide right-of-way with 84 feet of pavement including curb/gutter. An additional 23ft dedication for the neighborhood edge is required.

The Eucalyptus Avenue streetscape design presented in Chapter 5, Design Guidelines, for the south side of the street adjacent to the project site specifies a 12-foot wide parkway including a seven-foot wide curb-adjacent landscaped area and a five-foot wide sidewalk. A five-foot wide Class II on-street bike lane at the edge of the street on the south side is proposed. The north side provides an eight-foot wide on-site multipurpose trail within a 23-foot wide landscape buffer setback. Together, the parkway and landscape buffer setback create a 35-foot wide neighborhood edge, as described in the *Ontario Ranch Colony Streetscape Master Plan*. A 21-foot dedication will be required for Eucalyptus Avenue.

### 3.2.3 Merrill Avenue

Merrill Avenue is designated as a four-lane Collector Street in the Functional Roadway Classification Plan and provides east-west access to the project's southern boundary. The centerline of this street forms the boundary between the City of Ontario to the north and the City of Chino to the south. The Specific Plan specifies a 98-foot wide right-of-way and 74 feet of pavement including curb and gutter for Merrill Avenue. An additional 23ft dedication for the neighborhood edge is required on the north side.

The Merrill Avenue streetscape design presented in Chapter 5, Design Guidelines, for the north side of the street includes an eight-foot wide Class II on-street bike lane at the edge of the street, a seven-foot wide curb-adjacent landscaped area, a five-foot wide sidewalk and an eight-foot wide multipurpose trail is located within a 23-foot wide landscape buffer setback. Together, these improvements establish a 35-

foot wide neighborhood edge, as specified in the *Ontario Ranch Streetscape Master Plan*. A 21-foot street dedication will be required for Merrill Avenue.

### 3.2.4 Bon View Avenue

Bon View Avenue is designated as a Local Industrial with a 66-foot wide right-of-way and 48 feet of pavement including curb and gutter. The Bon View Avenue right-of-way exists and no dedication is required.

The Bon View Avenue streetscape presented in Chapter 5, Design Guidelines, specifies 9-foot wide parkways including a five-foot wide sidewalk.

### 3.2.5 Campus Avenue

Campus Avenue is located along the western boundary of the Specific Plan area, providing west access to the site. Campus Avenue is designated as a Minor Arterial Street per the Functional Roadway Classification Plan. The Specific Plan specifies a 108-foot wide right-of-way and will require a 29-foot half-width dedication and a 12-foot parkway including the sidewalk. An additional 23 foot dedication for the neighborhood edge is required.

The Campus Avenue streetscape presented in Chapter 5, Design Guidelines, specifies a 12-foot parkway with a 5’ sidewalk and an 8’ multipurpose trail as part of the 35-foot Neighborhood Edge on the east side, while the western side includes a five-foot wide Class II on-street bike lane at the edge of the street.

### 3.2.6 Local Circulation

Final site planning and off-site design shall be subject to City approval. In addition to the typical street section described and depicted, additional right-of-way and geometric enhancements such as additional left turn and right turn lanes, including but not limited to those at intersections, may be required to adequately mitigate impacts identified in the Traffic Impact Analysis/Specific Plan EIR. Local roadway circulation shall accommodate trucks with a double trailer combination wheelbase of 67 feet (known as the WB-67 design vehicle).

Driveways shall conform to access requirements of the City of Ontario Traffic and Transportation Design Guidelines and be to the satisfaction of the City Engineer. Driveway locations, specifically those that are in proximity to master-planned or future traffic signals, shall be located so as not to interfere with queues as projected in the Traffic Impact Analysis for the Specific Plan. The use of surrounding roads, drive aisles and truck parking lots to address the open land requirement for the Chino Airport Overlay zone is discussed in Chapter 2 (Section 2.2: Airport Influence Areas).

Fair share responsibilities for street improvements will be addressed in a Development Agreement with the City.

### 3.2.7 Traffic Control Devices

Traffic signs regulating, warning, and/or guiding traffic on public roads shall conform to the California Manual on Uniform Traffic Control Devices (MUTCD), latest edition. Traffic-control signs, whether on public or private property, shall conform to the California MUTCD.

### 3.2.8 Truck Routes

The City of Ontario designates and maintains a network of truck routes that provide for the effective transport of goods while minimizing negative impacts on local circulation and noise-sensitive land uses (Figure 3.5). Merrill Avenue, which runs along the southern boundary of the Specific Plan area, is a designated truck route from Euclid Avenue to Archibald Avenue. PCC pavement shall be installed per City Standard 1207 at signalized intersections along truck routes.

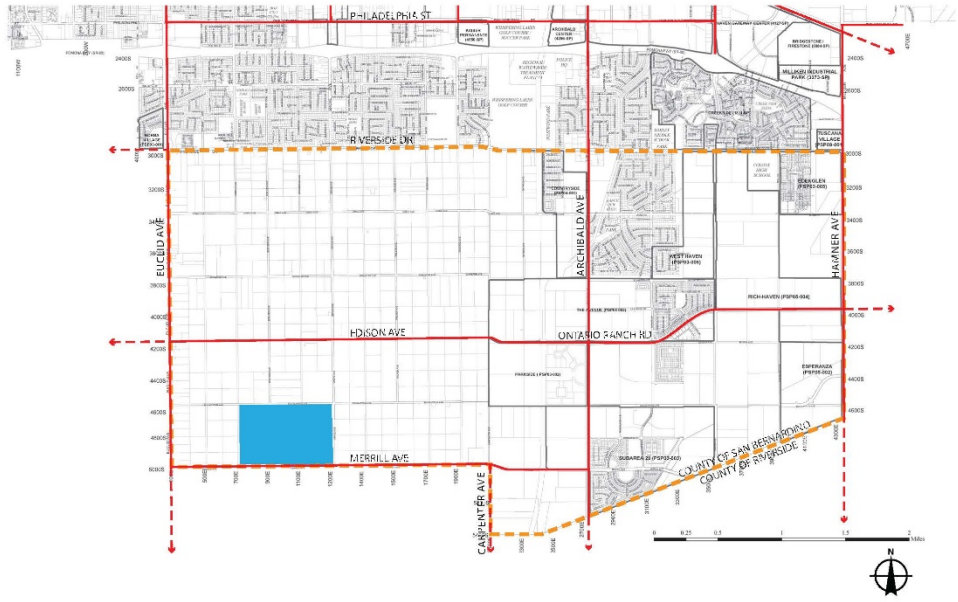
### 3.2.9 Pedestrian Circulation

Sidewalks will be provided along both sides of the street to improve safety and the pedestrian experience, connect the various parts of the Specific Plan area, and expand access to nearby land uses. Sidewalks shall be five-feet wide, constructed of concrete, and installed in conjunction with adjacent roadway improvements.

### 3.2.10 Trails and Bike Paths

Trails and bicycle paths provide an additional mode of circulation in and around the Specific Plan area.

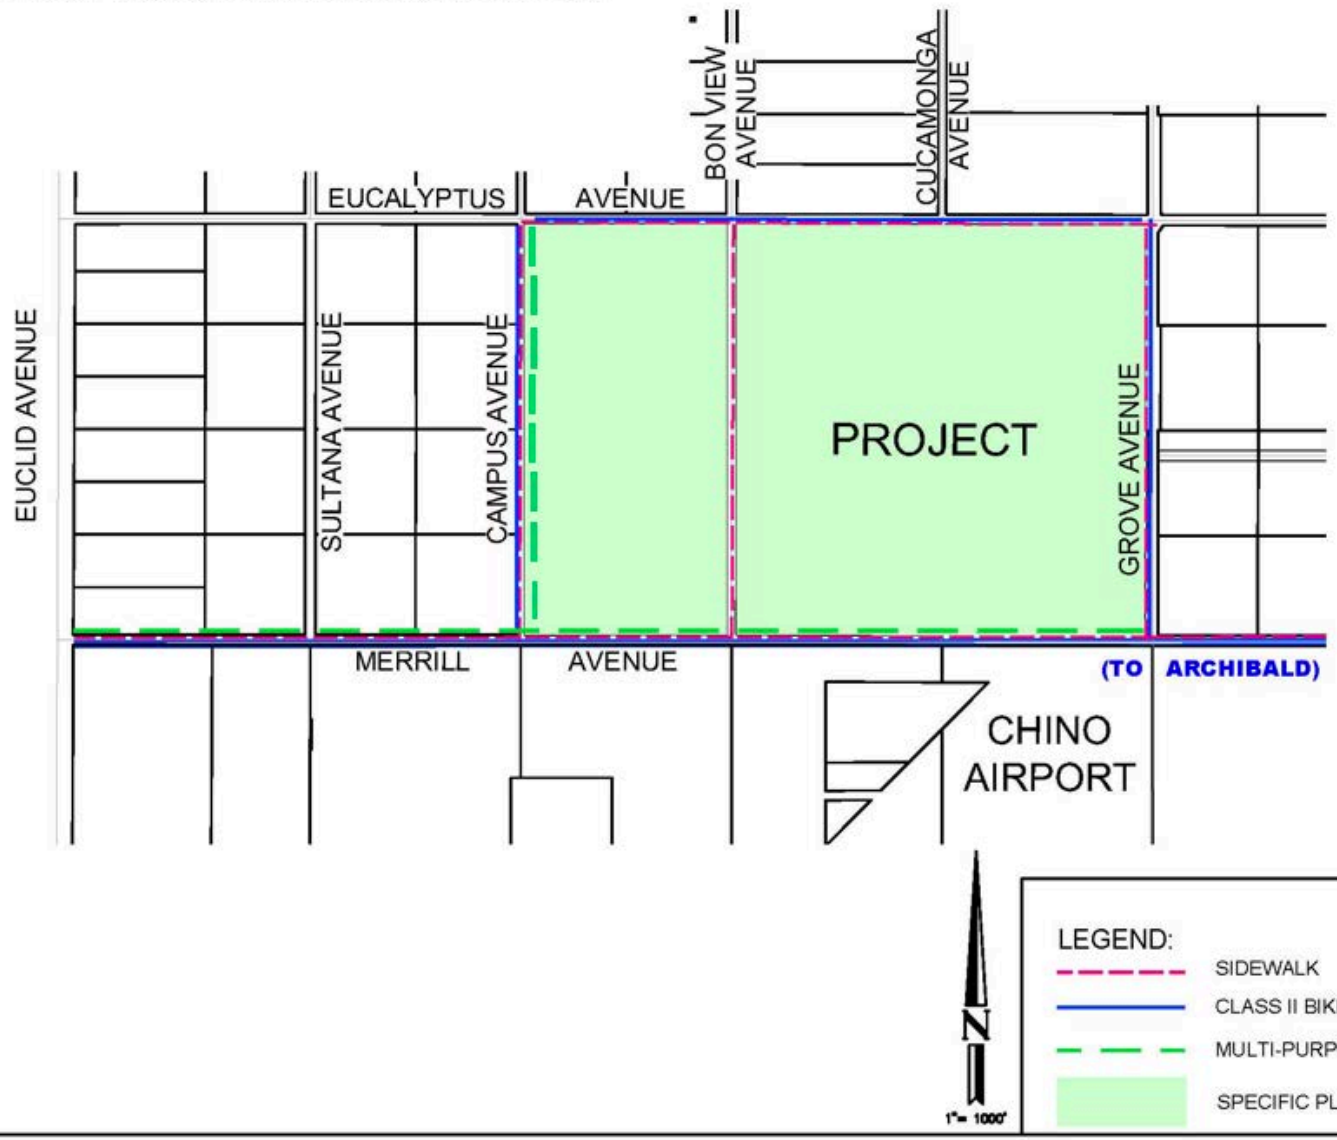
The Ontario Plan Mobility Element specifies a Class II bikeway on the north side of Merrill Avenue, south side of Eucalyptus and on the west side of Campus Avenue. A Class II bikeway is defined as a dedicated (striped) lane along the street, with no parking allowed in the bike lane. This bike lane provides linkages to the City's bike path system (Figure 3.6).



Eight-foot wide multipurpose trails are provided on the east side of Grove Avenue, east side of Campus, the north side of Eucalyptus Avenue and the north side of Merrill Avenue (Figure 3.6).

The Specific Plan's trail and bikeway improvements shall be installed in conjunction with street improvements. The City reserves the right to implement bike lanes on Eucalyptus at the discretion of the Traffic and Transportation Division.

### 3.2.11 Transit



Transit options provide an alternative mode of transportation for motorists and a primary mode for the transit-dependent. The City is coordinating with regional transit agencies to implement Bus Rapid Transit (BRT) service to target destinations and along corridors, including Euclid Avenue west of the Specific Plan area.

# Truck Routes

South Ontario Logistics Center Specific Plan **Figure 3.5**

FIGURE 3.6 - BICYCLE AND PEDESTRIAN PLAN

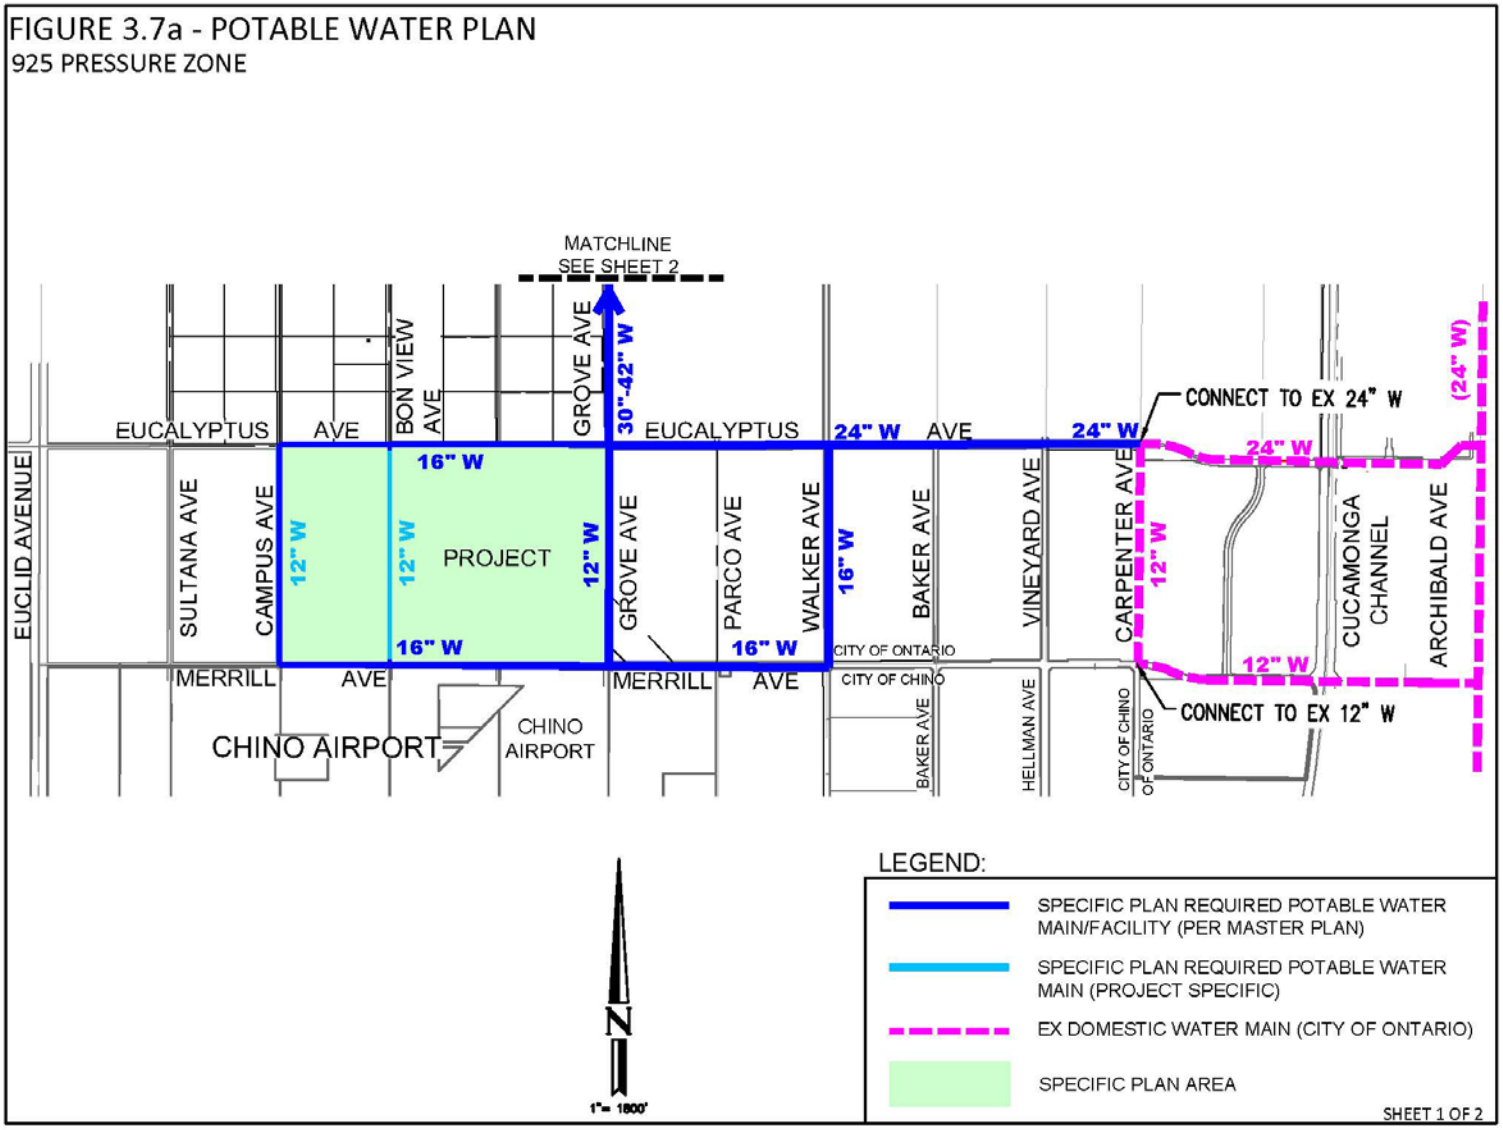
## 3.3 Potable Water Plan

Water service to the Specific Plan area will be provided by the City of Ontario. Potable water is provided by imported water from the Water Facilities Authority (WFA), Chino Basin Desalter Authority (CDA) and groundwater from the Chino Basin, extracted via the City's wells. The WFA was formed in 1980 as a Joint Powers Authority by the Cities of Chino, Chino Hills, Ontario and Upland, and the Monte Vista Water District. It was formed to construct and operate water treatment facilities that provide a supplemental supply of potable water to its member agencies.

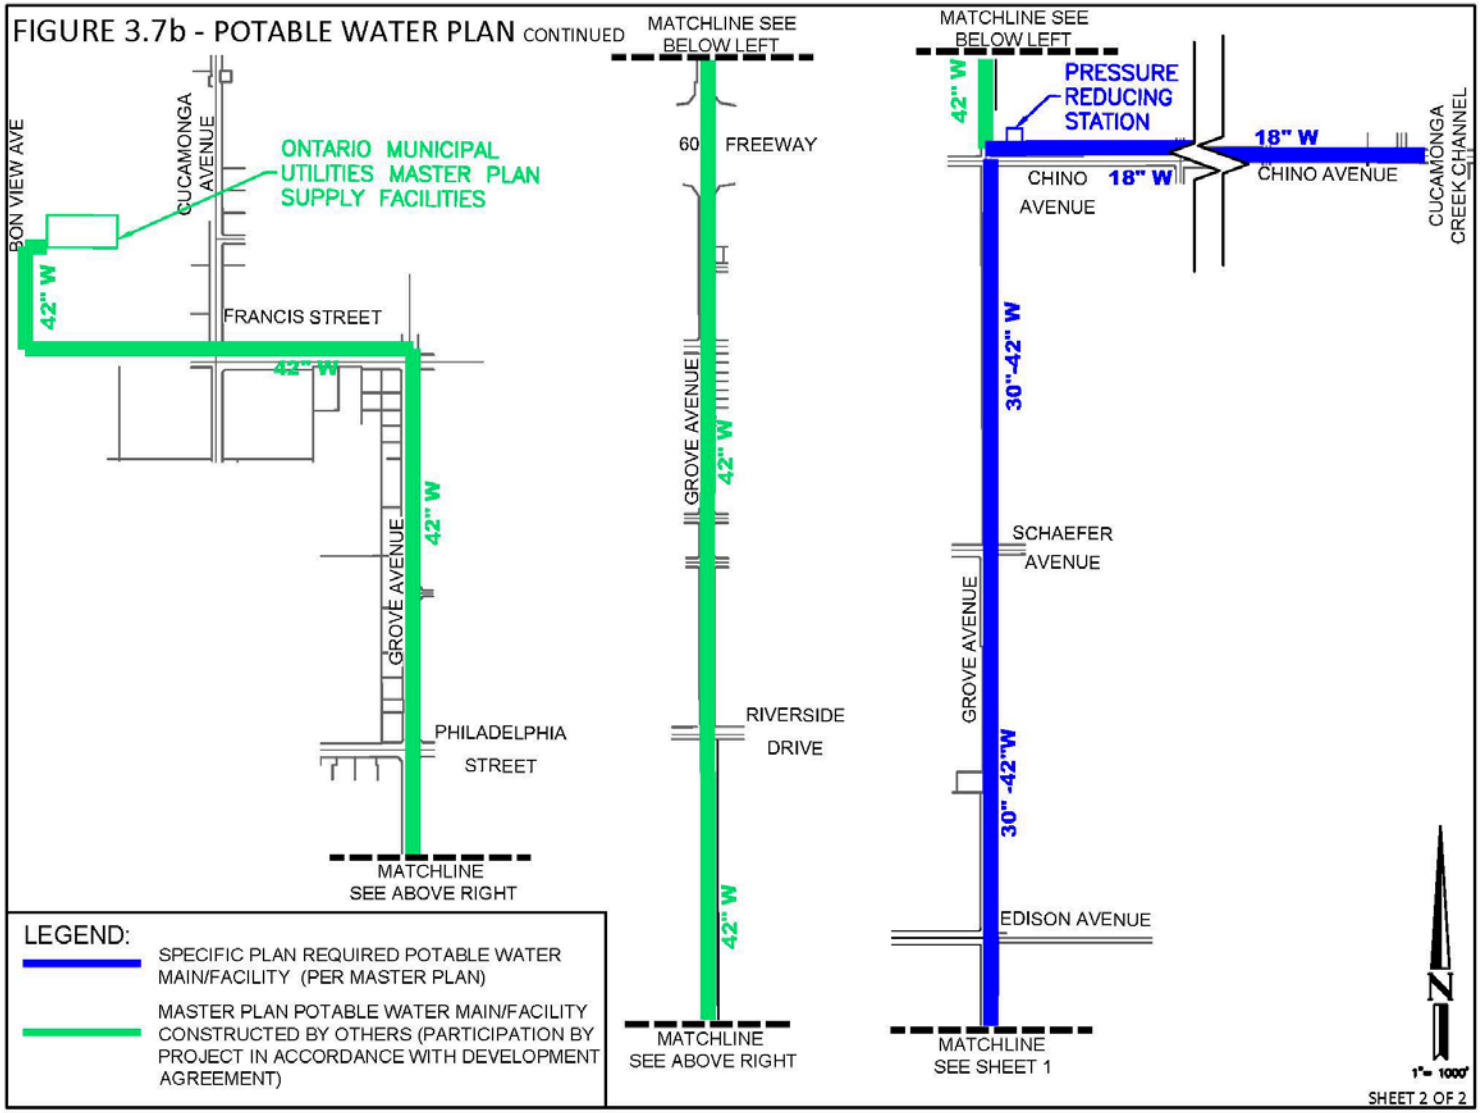
Currently there are no City potable water mains or City potable water infrastructure in the vicinity of the Specific Plan Area. Potable Water System Improvements for the Specific Plan area (Figure 3.7a & Figure 3.7b) require the planning, design, and construction of the 925 Pressure Zone (PZ) Phase 2 West Backbone, which includes: Extending the 24-inch potable water main in Eucalyptus Avenue from Carpenter Avenue to Grove Avenue; installing a 30-inch to 42-inch potable water main in Grove Avenue connecting from the 24-inch potable water main in Eucalyptus Avenue and extending to Chino Avenue; installing an 18-inch potable water main in Chino Avenue connecting from the 30-inch to 42-inch potable water main in Grove Avenue and extending to connect to the end point of an existing 18-inch potable water main on the west side of the Cucamonga Channel; installing a 42-inch potable water main in Grove Avenue that ended at Chino Avenue and extending to Philadelphia Street; installing a 42-inch potable water main in Philadelphia Street connecting from the 42-inch potable water main in Grove Avenue and extending to Cucamonga Avenue; installing a 42-inch potable water main in Cucamonga Avenue connecting from the 42-inch potable water main in Philadelphia Street and extending to Bon View Avenue Reservoir site and to the Reservoir. At the time this Specific Plan was prepared, the alignment of the 42-inch water line between Chino Avenue and the water reservoir site had not been finalized and is subject to change. This Specific Plan will be required to participate in the future Phase 2 Water System Improvements north of Chino Avenue, as detailed in the development agreement with the City.

In addition to the 925 Pressure Zone (PZ) Phase 2 West Backbone, the Specific Plan area requires the planning, design, and construction of a Secondary Industrial 16-inch Loop between the 925 Pressure Zone (PZ) Phase 2 West Backbone and the Specific Plan area which includes: installing a 16-inch potable water main in Eucalyptus Avenue connecting to the 30-inch to 42-inch 925 Pressure Zone (PZ) Phase 2 West Backbone main in Grove Avenue and extending to Campus Avenue; installing a 12-inch potable water main in Campus Avenue connecting from the 16-inch potable water main in Eucalyptus Avenue and extending to Merrill Avenue; installing a 16-inch potable water main in Merrill Avenue connecting from the 12-inch potable water main in Campus Avenue and extending to Walker Avenue; installing a 16-inch potable water main in Walker Ave from the 16-inch potable water main at Merrill Avenue and extending northernly to connect to the existing 24-inch potable water main at Eucalyptus Avenue.

The Specific Plan area also requires the planning, design, and construction of the Adjacent Potable Water System, which includes: installing a 12-inch potable water main in Bon View Avenue connecting to the 16inch potable water main in Eucalyptus Avenue and extending to connect to the 16-inch potable water main in Merrill Avenue; and, installing a 12-inch potable water main in Grove Avenue connecting to the

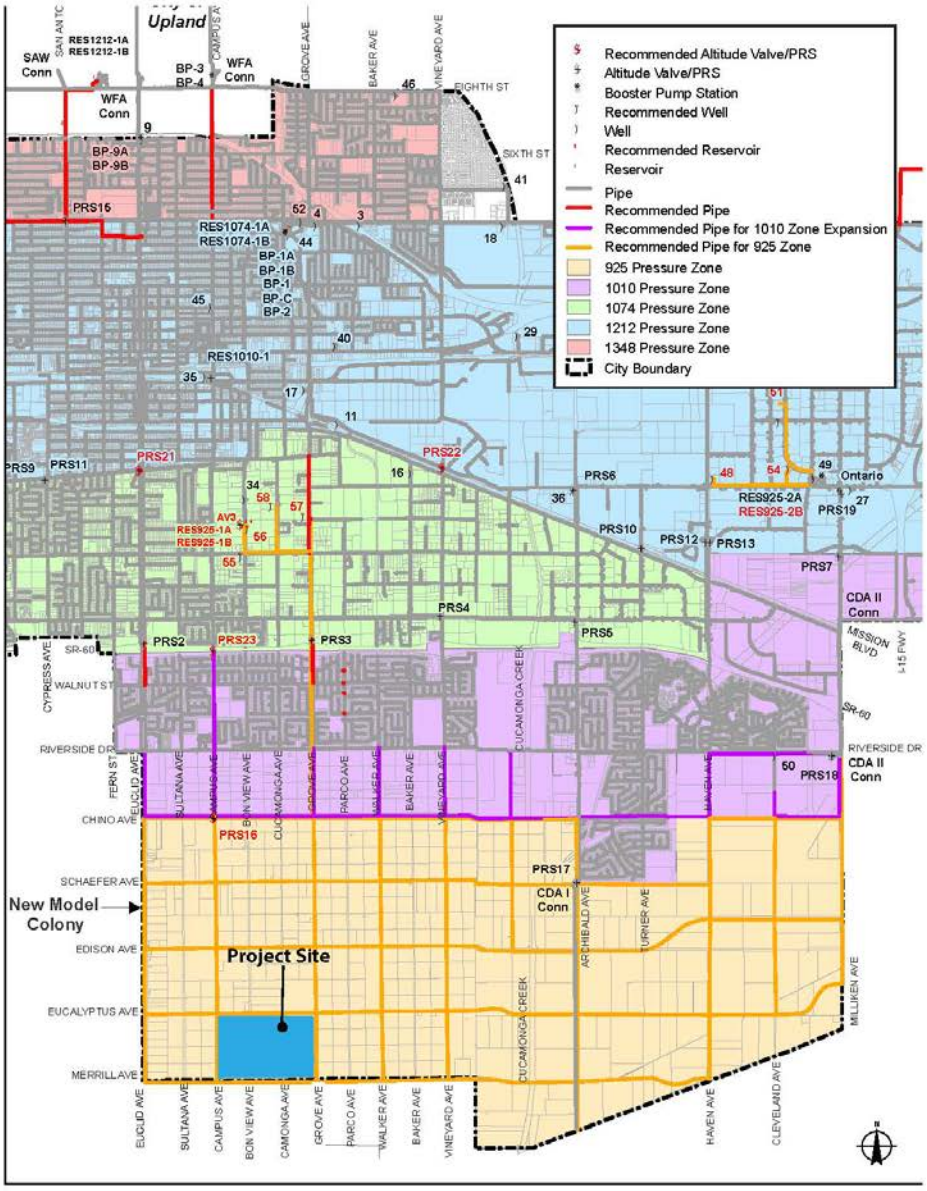


16-inch potable water main in Eucalyptus Avenue and extending to connect to the 16-inch potable water main in Merrill Avenue.



At minimum, the full Potable Water Infrastructure shown on Figure 3.7a and 3.7b shall be completed as Part of Phase 1 of the Specific Plan, which includes 925 Pressure Zone (PZ) Phase 2 West Backbone, the Secondary Loop, and the Adjacent Potable Water System

Water mains required to serve the project will need to be constructed prior to or concurrent with on-site water improvements. Within the project site, a network of 2-inch water lines for domestic water service and 8- to 10-inch water lines for fire service water will be installed. The on-site water system includes connections to the water main in Eucalyptus Avenue to serve PA-1 and to the main in Merrill Avenue to serve PA-2.



Until the ultimate pipeline network for Ontario Ranch has been completed, there may be instances where construction of improvements to serve a project may not meet the required fire flow demands. Therefore, projects within the Specific Plan area may be required to construct additional pipelines not indicated in the Master Plan or upsize master planned pipelines to meet Fire Department fire flow requirements and/or Water Master Plan criteria. The developer shall submit a hydraulic analysis to the City for review and approval to demonstrate adequate fire flow and adherence to Potable Water Master Plan criteria.

The overall water infrastructure plan to serve the City of Ontario is shown on Figure 3.8. The City's ultimate domestic water system consists of five pressure zones. Most of Ontario Ranch (including the Specific Plan area) is located within the 925 Pressure Zone. The sizing and alignment of potable water lines shall follow the current approved City of Ontario water system plan. Transmission line locations are subject to change, based on City conducted and approved hydraulic analysis. Required potable water infrastructure is subject to change based upon findings of the approved hydraulic study and master plan updates.

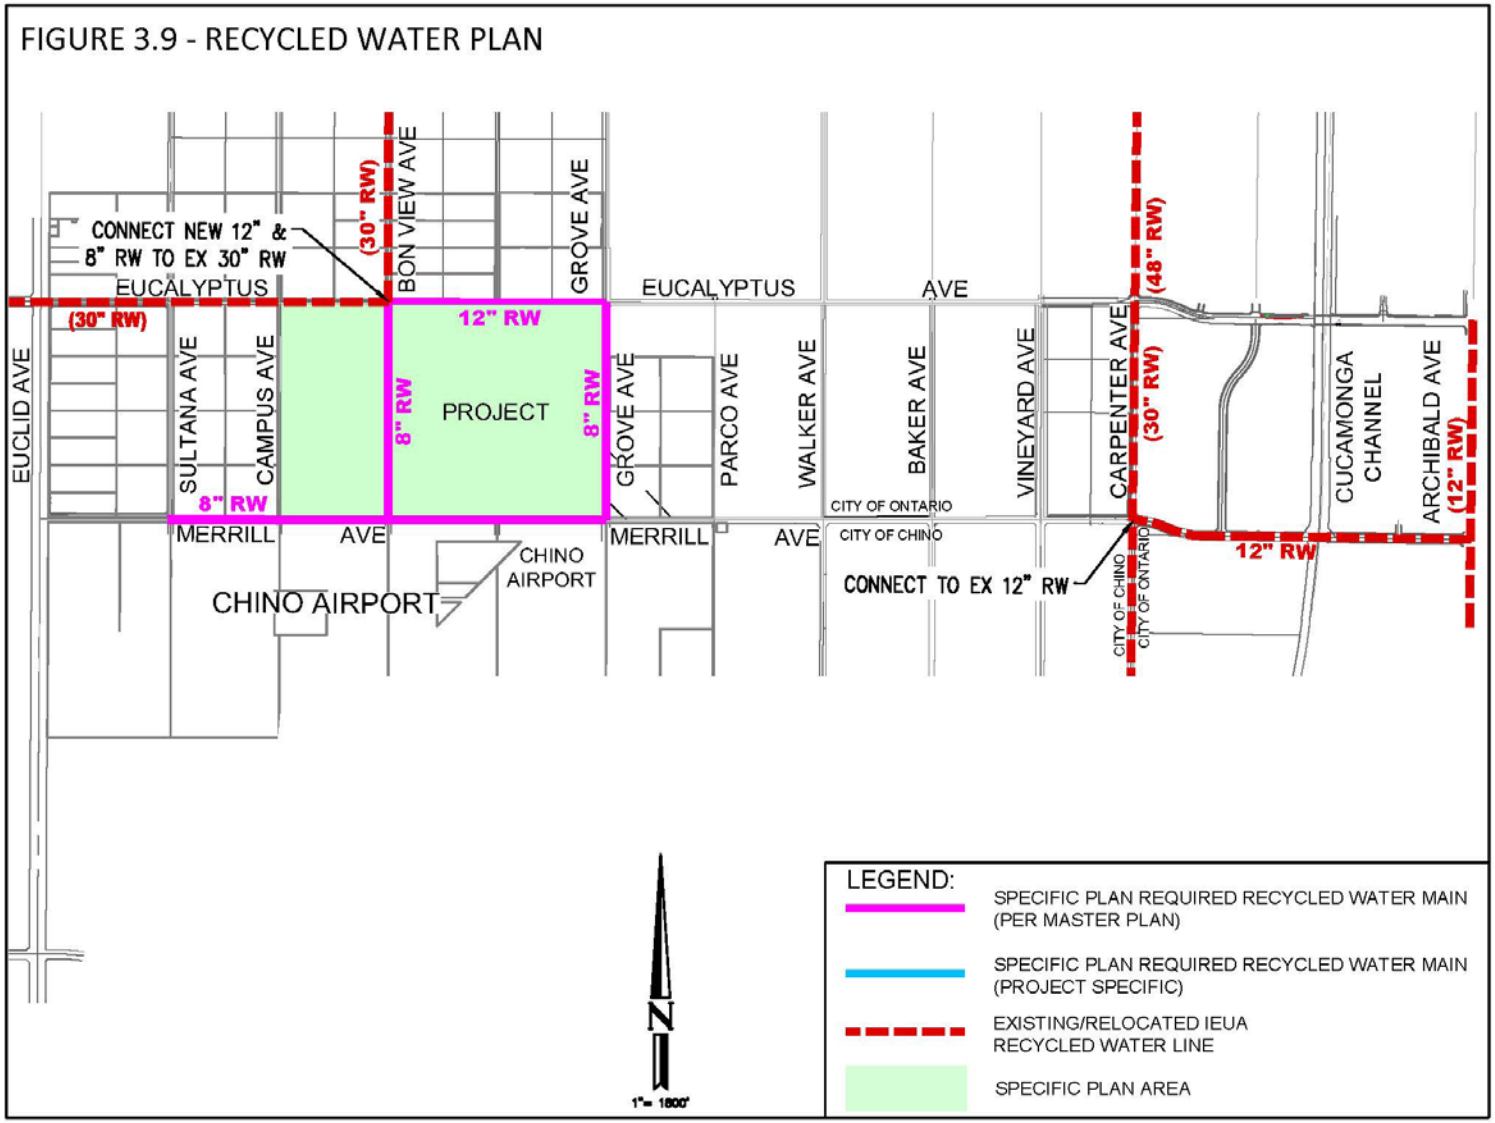
## City of Ontario Ultimate Water System

South Ontario Logistics Center Specific Plan **Figure 3.8**

Size and location of waterlines subject to change based on current approved Master Plan as well as City conducted and approved hydraulic analysis.

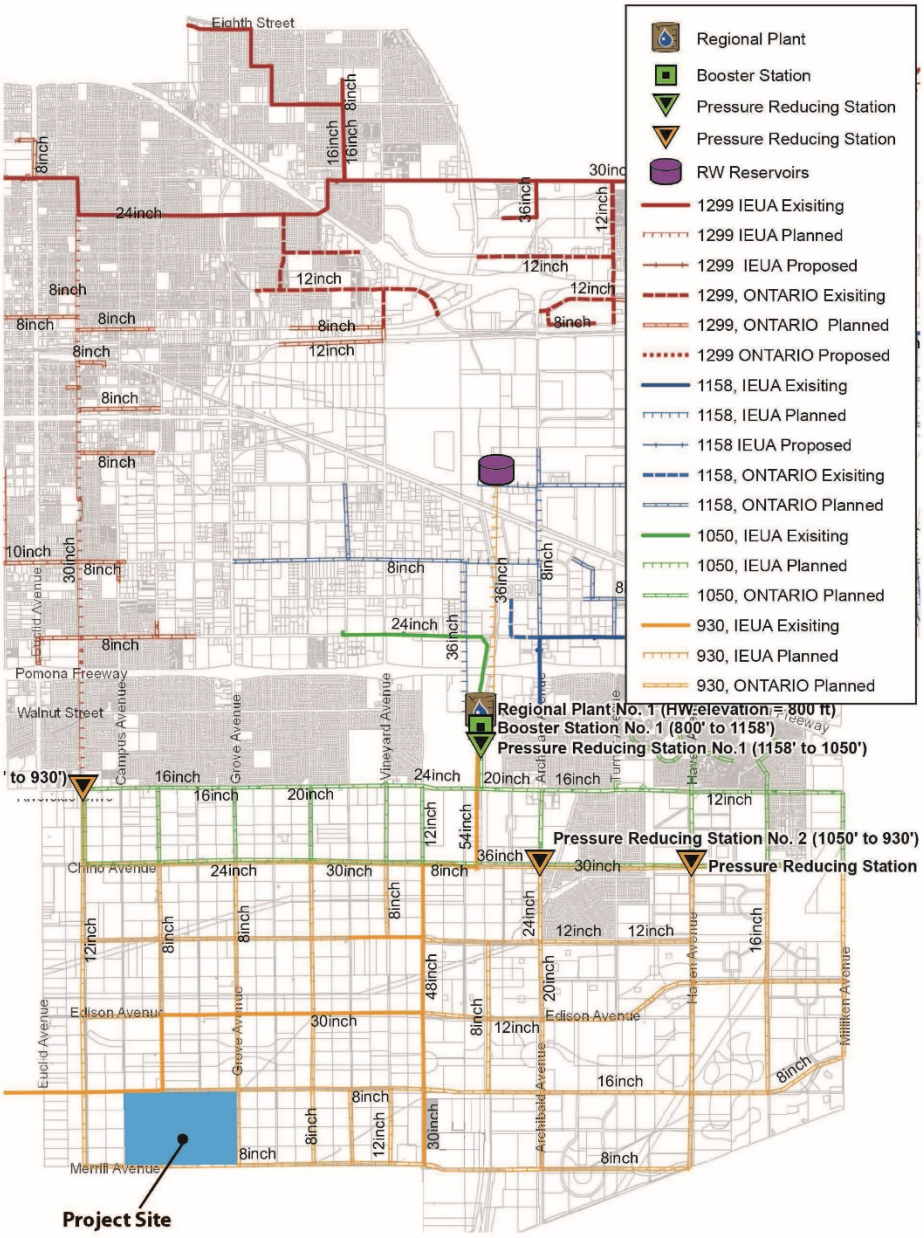
## 3.4 Recycled Water Plan

The City of Ontario Ordinance 2689 requires all new development in Ontario Ranch to connect to and use recycled water for all approved uses, including but not limited to landscape irrigation. Prior to use of recycled water, approval from the City of Ontario and State Water Resources Control Board (SWRCB) is required. Interim connection to potable water is not allowed.



Currently there are no City recycled water mains or City recycled water infrastructure in the vicinity of the Specific Plan Area. Recycled Water is provided to the City of Ontario by the Inland Empire Utility Agency (IEUA) from its four wastewater reclamation plants. The entire Specific Plan area is within the City's master planned 930 Pressure Zone. Recycled Water Infrastructure Improvements for the Specific Plan area (Figure 3.9) require the planning, design, and construction of 930 Pressure Zone (PZ) Recycled Water Master Plan mains, which includes: installing a 12-inch recycled water main in Eucalyptus Avenue connecting to the 8-inch recycled water main in Grove Avenue and extending to connect to the IEUA 30-inch recycled water main in Eucalyptus Avenue at Bon View Avenue; installing an 8-inch recycled water main in Bon-View Avenue to connect to the IEUA 30-inch recycled water main in Eucalyptus Avenue and extending to connect to the 8-inch recycled water main in Merrill Avenue; installing an 8-inch recycled water main in Merrill Avenue connecting to the 8-inch recycled water main in Sultana Avenue and extending to connect to the 8-inch recycled water main in Grove Avenue; installing an 8-inch recycled water main in Grove Avenue connecting to the 8-inch recycled water main in Merrill Avenue and extending to connect to the 12-inch recycled water main in Eucalyptus Avenue.

The layout and construction of planned developments within the Specific Plan area may require a project specific 8-inch recycled water main in Campus Avenue, connecting to the 8-inch recycled water main in Merrill Avenue, and extending to the 30-inch RW main in Eucalyptus Avenue. It may also require an 8-inch recycled water main in Merrill Avenue, connecting to the 8-inch recycled water main at Campus Avenue and Sultana Avenue.



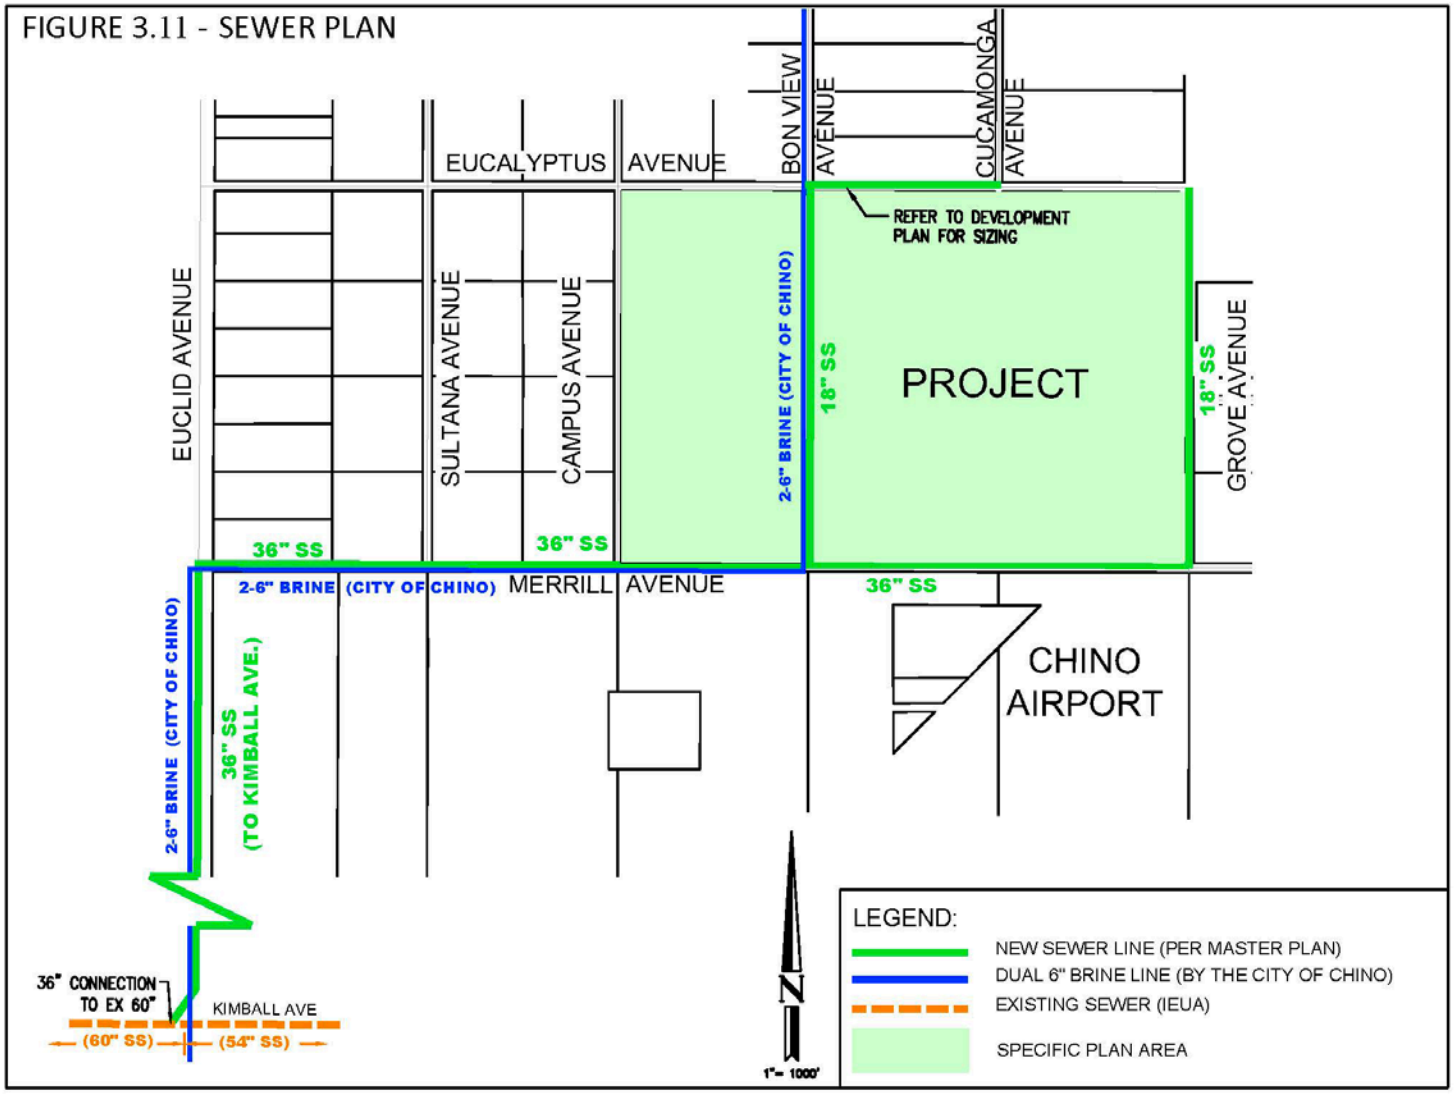
The future recycled water system to serve the City of Ontario is shown on Figure 3.10. The sizing and alignment of existing and proposed recycled water lines are shown in the exhibit.

Sizing and alignment of the recycled water lines will be consistent with the City of Ontario Recycled Water System Master Plan and/or a City approved hydraulic analysis.

FIGURE 3.9 - RECYCLED WATER PLAN

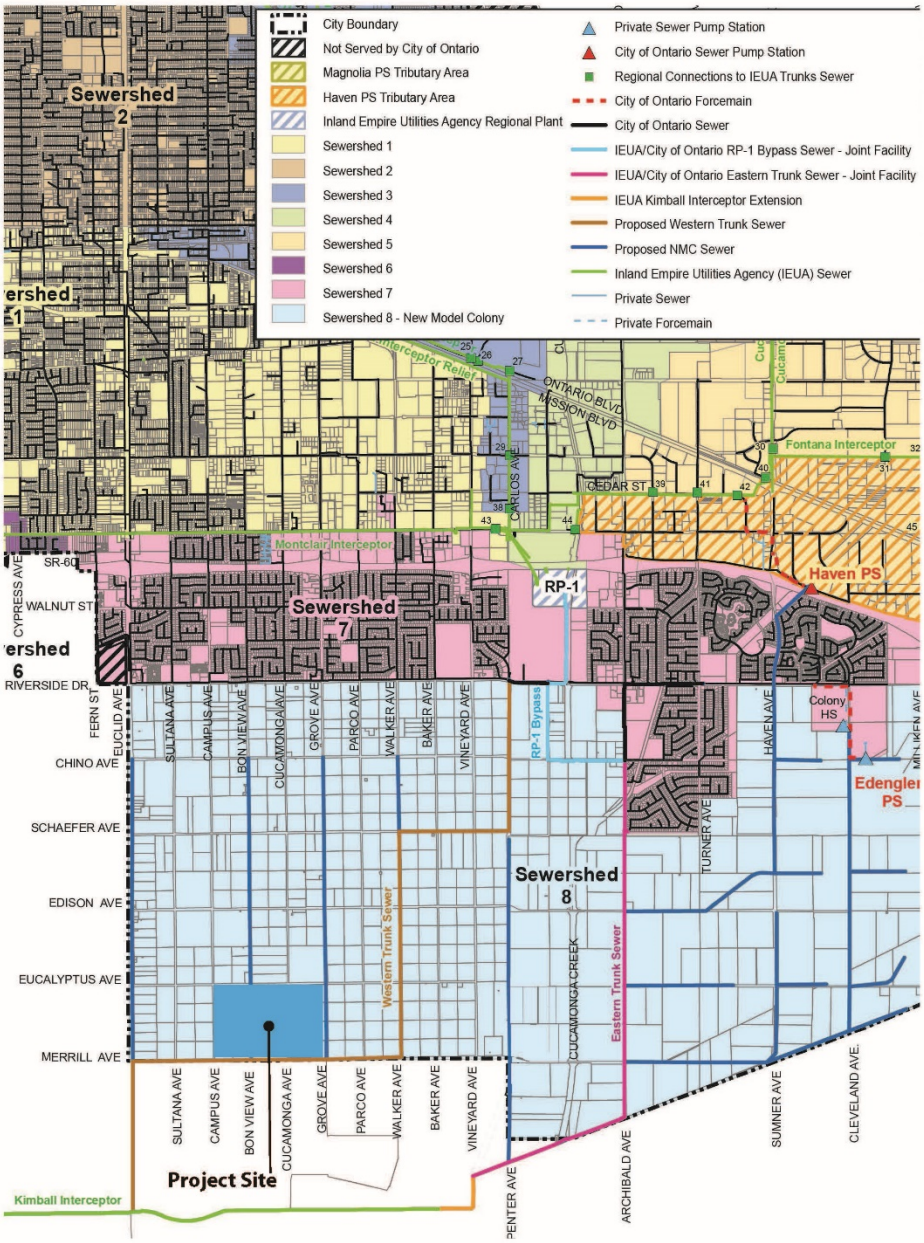
## City of Ontario Future Recycled Water System

South Ontario Logitics Center Specific Plan **Figure 3.10**



## 3.5 Sewer Plan

Regional wastewater treatment services are provided to the City of Ontario and its neighboring agencies by the Inland Empire Utilities Agency (IEUA). Several regional trunk sewers collect sewage generated in the city and transport it to IEUA's Regional Plant No.1 and Regional Plant No.5 for treatment. The City of Ontario's sewer service area is divided into eight sewersheds, primarily based on the outlet points where the City's system ties into the IEUA downstream facility. Ontario Ranch is located in Sewer shed 8.



There are no sewer mains located within the broader vicinity of the Specific Plan area; therefore, the Specific Plan includes a network of new public sewer mains (Figure 3.11), consistent with the City of Ontario's Ultimate Sewer System Plan (Figure 3.12). A 36-inch sewer main will connect to an existing IEUA interceptor trunk main sewer located in Kimball Avenue to the south, run north in Euclid Avenue to Merrill Avenue, then stays a 36-inch sewer main east to Grove Avenue. The IEUA interceptor trunk sewer main is 54-inches east of Euclid and 60-inches west of Euclid Avenue. An 18-inch sewer main would run from Merrill Avenue north within Bon View Avenue and Grove Avenue to Eucalyptus Avenue. A sewer main will run within Eucalyptus Avenue, from a point west of Grove Avenue to Bon View Avenue where it will connect to the 18-inch sewer main within Bon View Avenue. The size of the Eucalyptus Avenue sewer main will be determined during development plan preparation for PA1 and PA2.

The ultimate sizing and alignment of sewer infrastructure shall be consistent with the City of Ontario ultimate sewer system plan and/or a City conducted and approved hydraulic analysis.

A Sewer Sub-Area Master Plan (SSAMP) shall be prepared for each tract map and development within the Specific Plan.

# City of Ontario Ultimate Sewer System

South Ontario Logistics Center Specific Plan **Figure 3.12**

## 3.6 Conceptual Grading Plan

The topography of the site is moderately flat, sloping from the northeast to the southwest with approximately a 17-foot drop in elevation across the Specific Plan area.

The grading activities for the Specific Plan area will generally consist of clearing and grubbing, demolition of existing structures, and moving surface soils to construct building pads, driveways and streets.

Conceptual grading and earthwork analysis indicate the project can be balanced onsite. Earthwork will include approximately 425,912 cubic yards (CY) of cut and 425,912 CY of fill with 272,777 CY of over-excavation. Geotechnical and/or environmental conditions encountered during grading operations may impact final earthwork calculations. Grading plans for each development project within the Specific Plan area shall be reviewed and approved by the City of Ontario prior to the issuance of grading permits. Grading plans and activities shall conform to the City's grading ordinance and dust and erosion control requirements.

All landscaped areas within the Specific Plan area shall be graded as shallow swales and designed to accept runoff water from impervious surfaces. Water quality retention basins, trenches, etc., (the exact location of which will be determined at the time of Water Quality Management Plan (WQMP) approval for individual implementing projects) will have a maximum side slope of 3:1.

## 3.7 Dry Utilities Plan

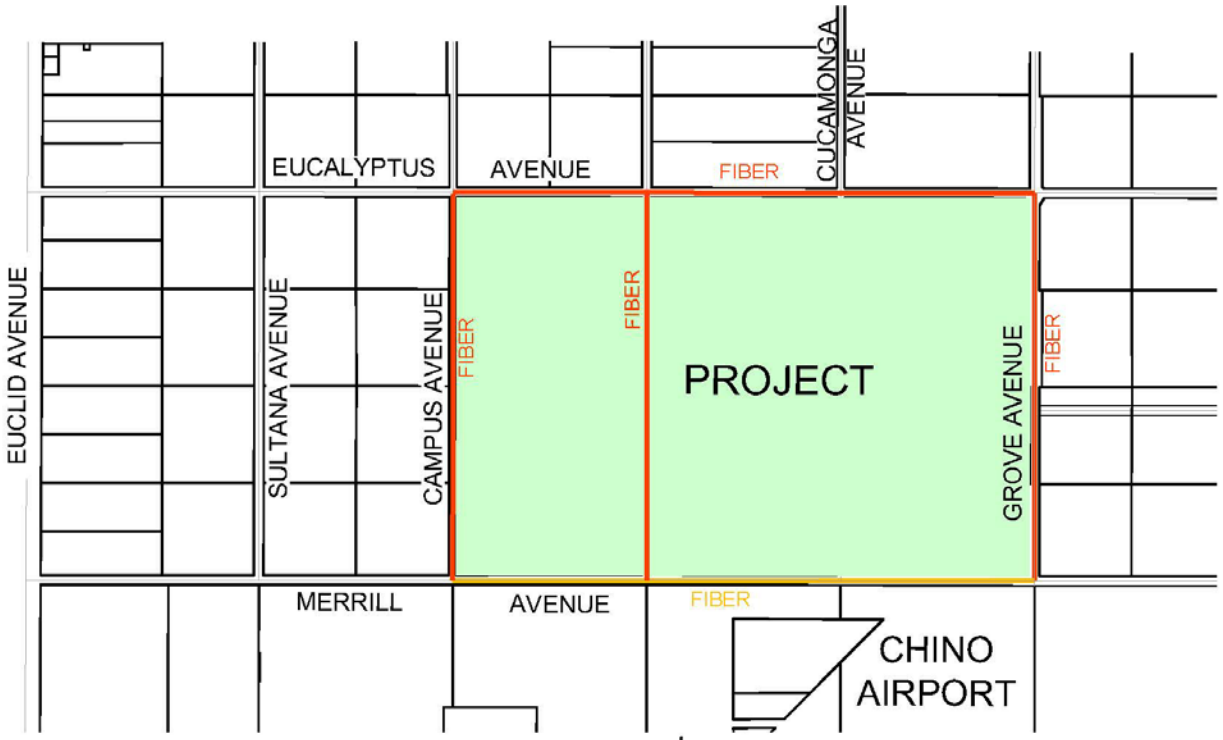
Utility services provided to the site shall be installed underground in accordance with City of Ontario guidelines.

### Communication System

According to the City of Ontario 2013 Fiber Optic Master Plan, the fiber optic infrastructure, including approximately 23 miles of backbone fiber south of Riverside Drive, is an investment in a long-term capital asset using newly constructed and existing conduit to provide high speed communication links to key locations throughout the city. Developments within Ontario Ranch are required to install and provide fiber conduit to all improved lots. Proposed on-site facilities will be placed underground within a duct and structure system that will be installed by the developer. Pursuant to the City's Fiber Optic Master Plan, the fiber optic network will be owned and operated by the City and as such maintenance of the installed system will be the responsibility of the City and/or Special District fiber optic entity and not the developer. The Specific Plan area will be connected to the City's system as shown on Figure 3.13.

### Natural Gas

Southern California Gas Company maintains 3" and 12" mains in Eucalyptus Avenue, a 12" main Grove Avenue and 2" mains located east and west of the site in Merrill Avenue. There mains are available to provide service to the project site. Gas mains will be installed to the individual development projects by the Gas Company, as necessary.



### Electrical

Southern California Edison will provide electricity to the Specific Plan area from existing facilities in the vicinity. New lines within the Specific Plan area shall be installed according to City of Ontario requirements.

### Cable

Charter does not maintain any facilities with the vicinity of the proposed project site. A main extension would be required if services are desired.

FIGURE 3.13 - FIBER OPTIC PLAN

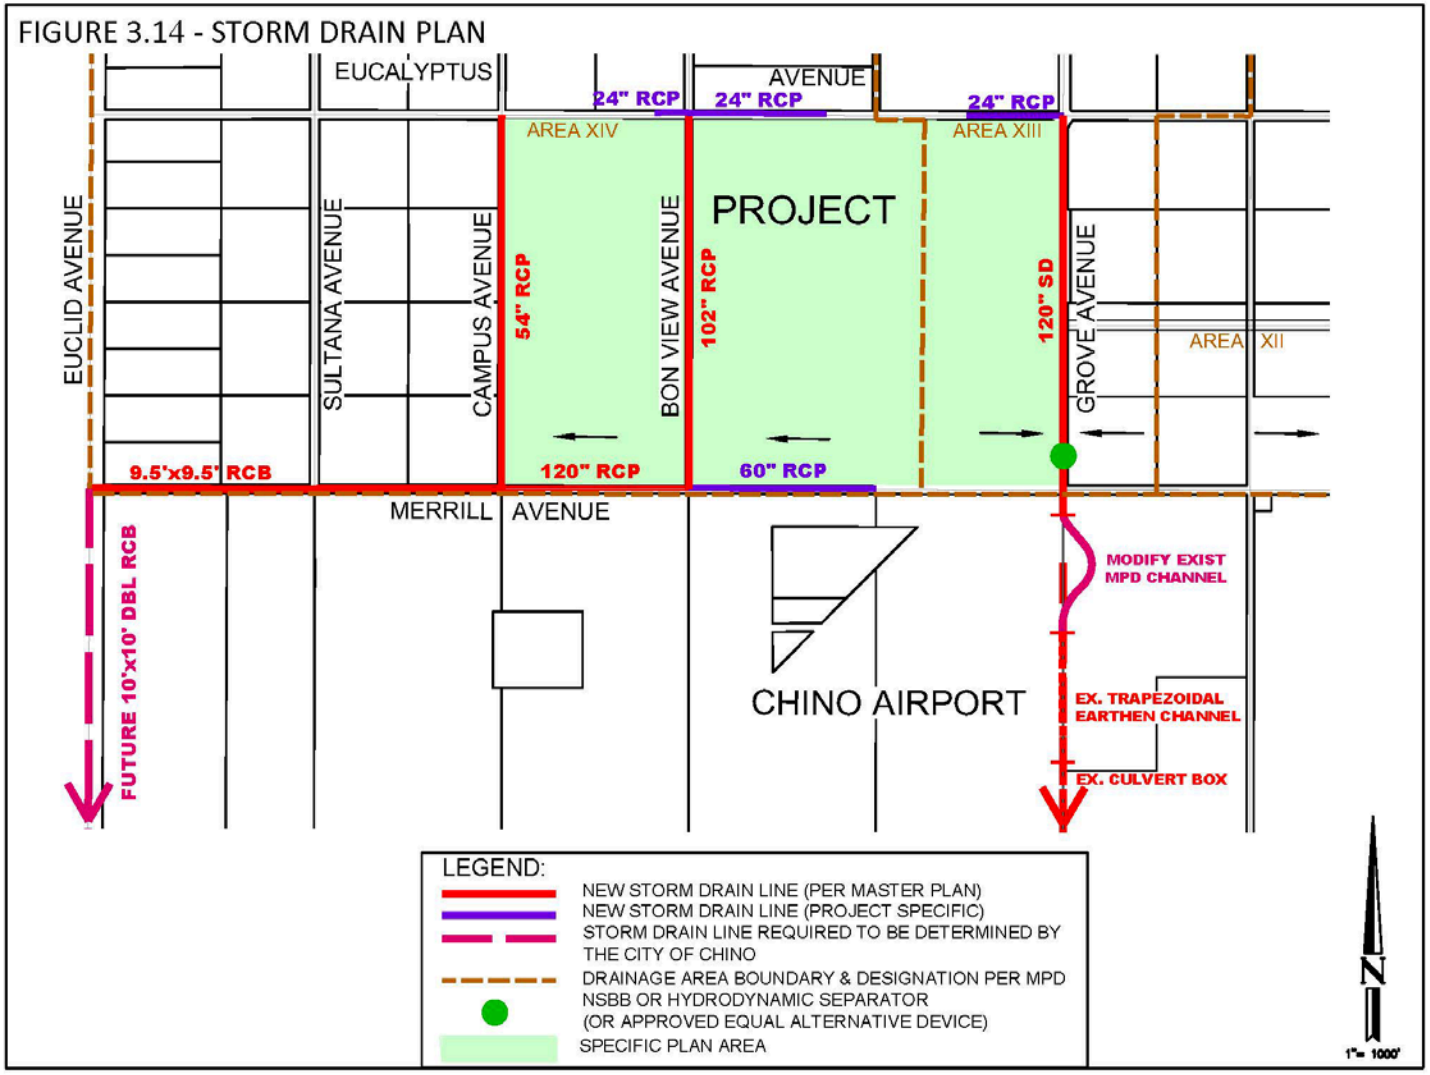
## 3.8 Storm Drainage Plan

The Specific Plan area storm drain improvements (Figure 3.14) are consistent with the facilities specified in Drainage Area XIV of the City of Ontario Planned Drainage Facilities (Figure 3.15).

Catch basins located throughout the site will collect runoff. On-site storm drain systems will convey runoff to the following facilities:

- 120-inch storm drain in Grove Avenue leading south to existing facilities via modification of an existing channel.
- 102-inch reinforced concrete pipe in Bon View Avenue.
- 60-inch reinforced concrete pipe in Merrill Avenue adjacent to the Specific Plan area, which will transition to a 120-inch reinforced concrete pipe running west to a reinforced concrete box at Euclid Avenue.
- 54-inch storm drain in Campus Avenue which connects to the future storm drain in Merrill Avenue.
- 10' x 10' storm drain in Euclid connecting to the Prado flood control basin.

Additional on-site drain improvements would include storm water detention/ retention/ water quality basins, which would capture, treat, and/or gradually release storm water into the downstream public storm drain systems. Onsite storm water treatment would incorporate underground chambers installed within each building's parking area.

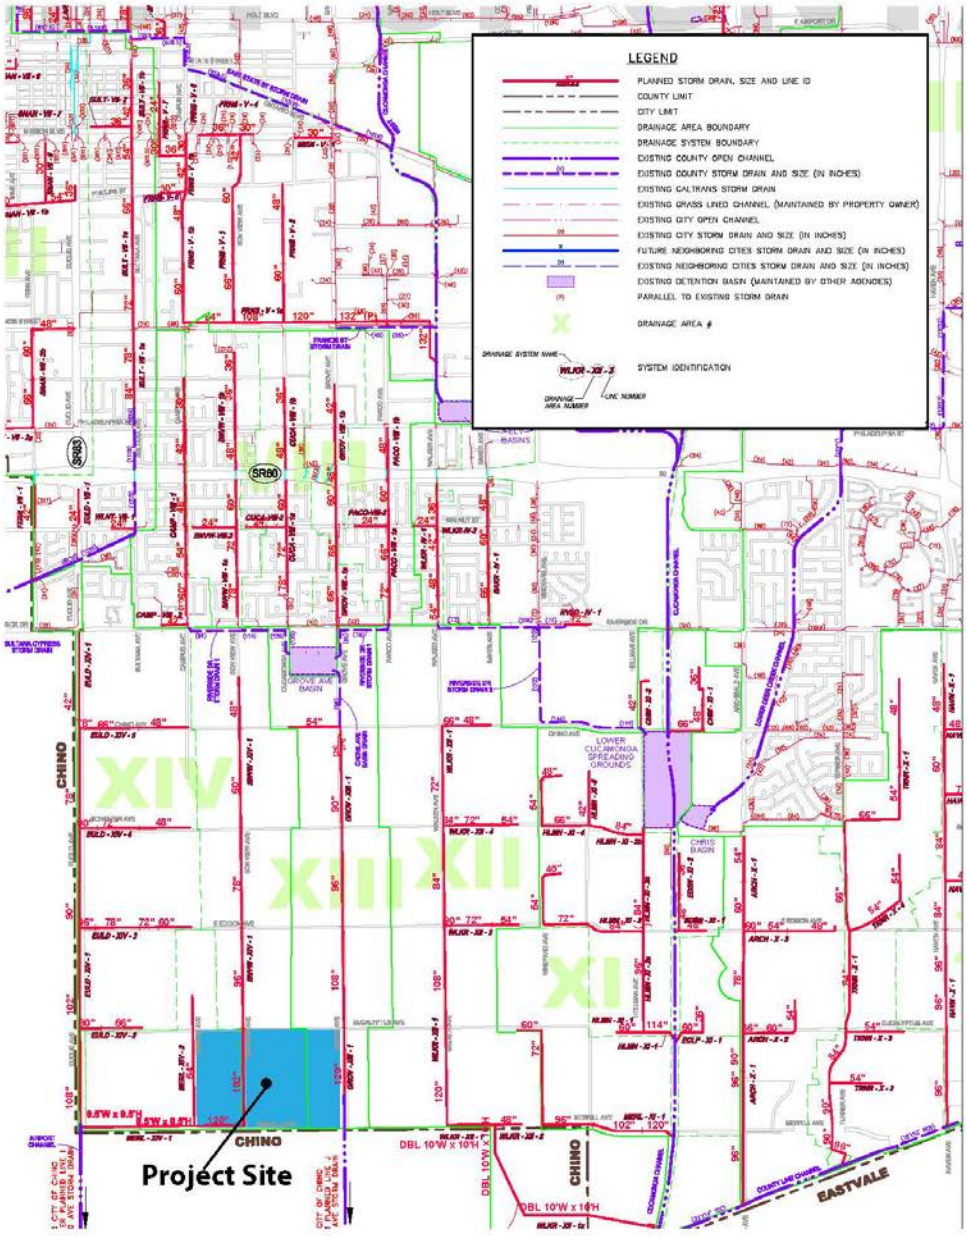


Development within this specific plan shall be responsible to construct the ultimate storm drain improvements if they are not installed at time of development.

Each storm drain in Campus Avenue, Bon View Avenue, Grove Ave and Merrill Avenue will be equipped with a hydrodynamic separator, or series of hydrodynamic separators to satisfy the statewide trash mandate. Each device will be approved by and listed on the Certified Full Capture System List of Trash Treatment Control Devices of the State Water Resources Control Board (SWRCB).

### NPDES Compliance

The grading and drainage of the Specific Plan area will be designed to retain/infilter, harvest, and re-use or biotreat surface runoff to comply with the current requirements of the San Bernardino County NPDES Stormwater Program's Water Quality Management Plan (WQMP) for significant new development projects. The objective of the WQMP for this project is to minimize the detrimental effects of urbanization on the beneficial uses of receiving waters, including effects caused by increased pollutants and changes in hydrology. These effects may be minimized through the implementation of site designs that reduce runoff and pollutant transport by minimizing impervious surfaces and maximizing on-site infiltration, employing Source Control Best Management Practices (BMP's), or using on-site structural Treatment Control BMP's where the infeasibility of installing Low Impact Development BMP's is demonstrated.



All Priority Land Use (PLU) areas within the Specific Plan Area shall comply with the statewide Trash Provisions adopted by State Water Resources Control Board (SWRCB) and trash requirements in the most current San Bernardino County Area-Wide MS4 Permit.

# City of Ontario Planned Drainage Facilities

South Ontario Logistics Center Specific Plan **Figure 3.15**

New development within the Specific Plan area will utilize a variety of Low Impact Development site drainage designs to manage stormwater, including but not limited to retention/infiltration basins, trenches and swales, and above ground and/or below ground bio-treatment systems. Development projects within the Specific Plan area will comply with the latest Low Impact Development guidelines and incorporate features including but not limited to:

- Landscape designs that promote water retention and incorporation of water conservation elements such as use of native plants and drip irrigation systems;
- Permeable surface designs in areas with low traffic;
- Parking lots that drain to landscaped areas to provide retention and infiltration, or bio-treatment where infiltration is infeasible;
- Limited soil compaction during grading operations within landscaped storm water infiltration areas of not more than 80 percent compaction.

Prior to the issuance of a grading or construction permit, a Storm Water Pollution Prevention Plan (SWPPP), Erosion & Sediment Control Plan sheets, and a WQMP shall be prepared and approved. The SWPPP and Erosion & Sediment Control Plan Sheets shall identify and detail all appropriate BMP's to be implemented or installed during construction of the project, and the WQMP shall describe all post-construction BMP's designed to address water quality and quantity of runoff for the life of the project.

## 3.9 Public Services

This sub-section addresses public services within the Specific Plan area, including police, fire and solid waste disposal services.

### 3.9.1 Police

The City of Ontario will provide police services to the Specific Plan area. The closest police station is located approximately five miles north of the Specific Plan area at 2500 S. Archibald Avenue, just south of SR-60. This station is also the City of Ontario Police Department headquarters.

### 3.9.2 Fire

The City of Ontario will provide fire protection services to the Specific Plan area. The Ontario Fire Department currently has eight stations, which are staffed with eight four-person paramedic engine companies and two four-person truck companies. The closest operational fire station, Station 2, is located at 544 W. Francis Street, approximately four miles north of the Specific Plan area.

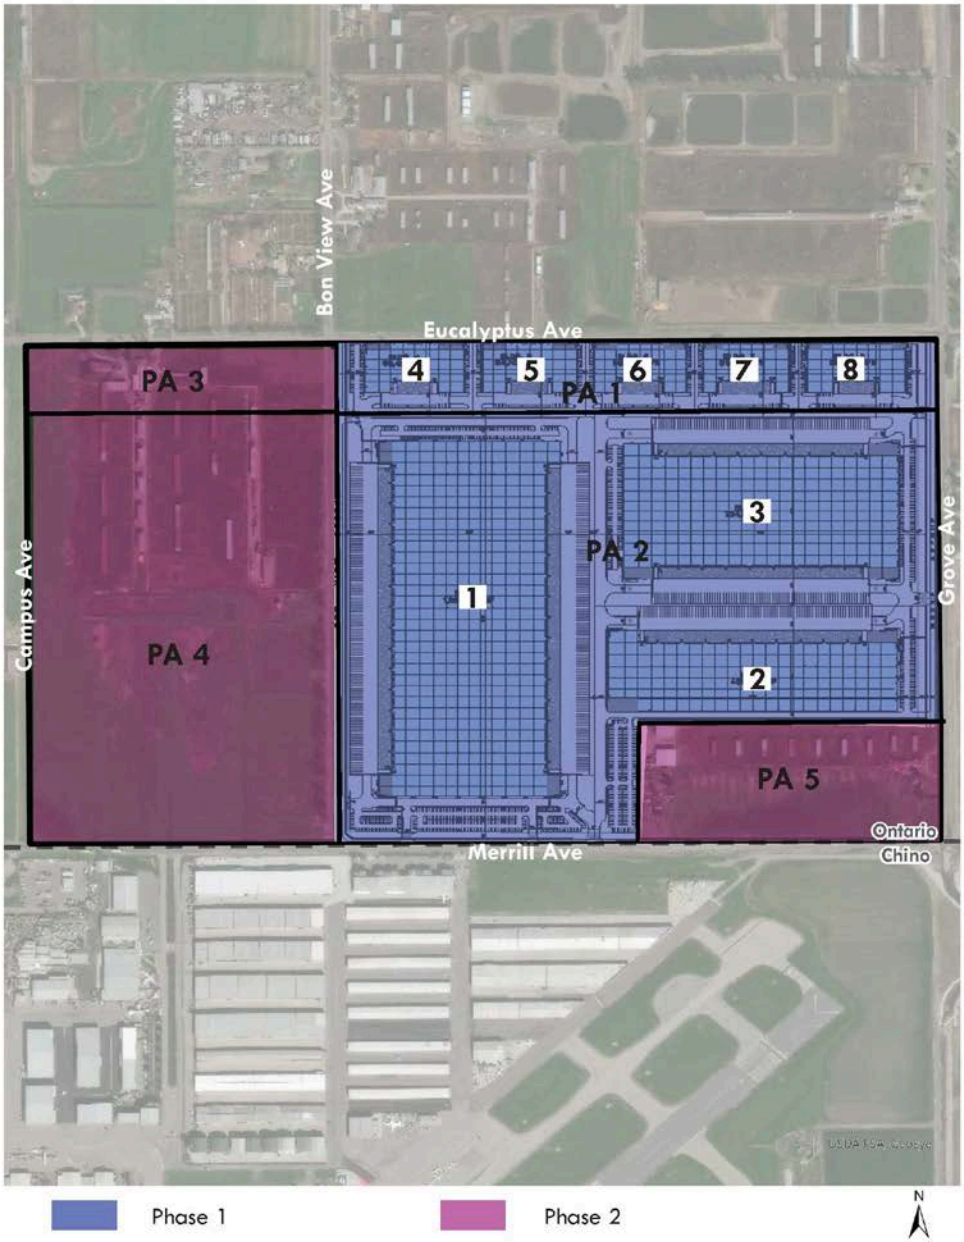
### 3.9.3 Solid Waste Disposal

The City of Ontario will provide solid waste services to the Specific Plan area. The City offers a full array of commercial and industrial services designed to meet the business community's needs. Solid waste facilities follow the "Solid Waste Department Refuse and Recycling Planning Manual." The Manual establishes the City of Ontario's requirements for refuse and recycling storage and access for service, as well as addresses the City's recycling goals. The Mid-Valley Landfill is the nearest County of San Bernardino landfill located at 2390 N. Alder Avenue in the City of Rialto, approximately 20 miles northeast of the Specific Plan area.

## 3.10 Phasing Plan

Development phasing of the Specific Plan area will be determined by the landowner and/or developer based upon real estate market conditions. Phasing sequencing is subject to change over time to respond to various market and local factors and as such, individual phases may overlap or develop concurrently. Phasing will occur as appropriate levels of infrastructure are provided. Infrastructure improvements, as required and approved by the City Engineer to support the development, shall be installed by the developer.

Figure 3.16, Conceptual Phasing Plan, describes two general phases of development for South Ontario Logistics Center.



**Phase 1:** Phase 1 consists of the construction of Buildings 1 through 8 as numbered in the Conceptual Site Plan and includes the Development Plan (PAs 1 and 2). This phase may be developed in several sub-phases in response to market demands and according to the logical and orderly completion of infrastructure improvements.

**Phase 2:** Phase 2 consists of the balance of the Project site (PAs 3, 4, and 5) .

Specific Plan backbone infrastructure shall be installed by the project developer, in accordance with the applicable City-adopted infrastructure plan for the area, as well as the provisions of this Specific Plan and an approved Development Agreement. Final grading and infrastructure improvements will be completed in accordance with the approved Development Agreement and City Engineer approval. Fair share responsibilities for improvements shall be addressed in a Development Agreement with the City of Ontario.

All the Specific Plan required infrastructure can be found in Section 3.3 (Figure 3.7 and 3.7a) for Potable Water, Section 3.4 (Figure 3.9) for Recycled Water, Section 3.5 (Figure 3.11) for the Sewer Plan, Section 3.7 (Figure 3.13) for the Fiber Optic Plan, and Section 3.8 (Figure 3.14) for the Storm Drain Plan. Phasing will be determined per separate Development Agreement.

## Conceptual Phasing Plan

South Ontario Logistics Center Specific Plan **Figure 3.16**

# 4.0 LAND USE AND DEVELOPMENT STANDARDS

This chapter identifies allowable uses and development standards including building height, setbacks, lot coverage, parking, and landscape within the Specific Plan area. These regulations are intended to create a harmonious relationship among development within the Specific Plan area and with surrounding land uses as well as to protect the health, safety, and general welfare of the community.

## 4.1 General Provisions

Upon adoption of this Specific Plan, the allowable land uses and development standards within this document become the governing zoning for new construction, additions, or remodels within the Specific Plan area. However, in reviewing individual projects requiring discretionary approval, additional conditions may be applied by the approving body to accomplish the goals and objectives of this Specific Plan.

## 4.2 Allowable Uses

Table 4.1 (Allowable Uses) provides the land uses, activities, and facilities allowed within the Specific Plan's BP (Business Park) and IG (Industrial - General) Zoning Districts discussed in Chapter 3. These uses include a variety of industrial-serving commercial, low-intensity office, technology, light manufacturing, and warehouse/distribution uses that are compatible with the site's location within Safety Zone 6 of the Chino Airport. The letters/symbols used in Table 4.1 shall have the following meanings:

### "P" - Permitted Land Uses

A Permitted Use (P) is permitted by right and may be established as the primary use of a building without the need for discretionary approval. Permitted Uses are subject to the development standards and guidelines applicable to the zoning district in which the use is located.

### "C" - Conditionally Permitted Land Uses

A Conditionally Permitted Use (C) is permitted upon issuance of a Conditional Use Permit (CUP) pursuant to Section 4.02.015 of the Ontario Development Code and City processing procedures.

### "A" - Administratively Permitted Land Uses

An Administratively Permitted Use (A) is permitted upon issuance of an Administrative Use Permit (AUP) pursuant to Section 4.03.015 of the Ontario Development Code and City processing procedures.

### "—" - Prohibited Land Uses

A land use indicated with a "—" symbol is prohibited within the zoning district.

### Land Uses Not Listed

A land use not listed in Table 4.1 shall be considered a prohibited land use. For land uses similar to those listed in Table 4.1, but not expressly stated in this Specific Plan, the City of Ontario Planning Director or his/her designee shall have the authority to make a determination of the applicability of similar land uses.

## Table 4.1: Allowable Uses

| Land Use | BP District | IG District |
|---|---|---|
| **AGRICULTURAL USES** | | |
| Commercial Crop Production and Farming[1] | C | P |
| Community Gardens, Urban Farms, and Related Uses | A | A |
| Kennels and Catteries | -- | P |
| **RESIDENTIAL USES** | | |
| Caretaker's Unit (not to exceed 1,000 square feet) | A | A |
| **CONSTRUCTION** | | |
| Contractors (e.g., building construction, site preparation, capital improvement projects) | | |
| • Completely within enclosed building | P | P |
| • With outdoor storage | -- | P |
| **MANUFACTURING** | | |
| Apparel Manufacturing | P | P |
| Artisan Crafts (made by hand) such as glassworks, jewelry, pottery | P | P |
| Beverage Manufacturing | -- | C |
| Chemical Manufacturing (excludes pesticides and fertilizers) | -- | C |
| Computer and Electronic Product Manufacturing | P | P |
| Electrical Equipment, Appliance and Component Manufacturing | P | P |
| Fabricated Metal Product Manufacturing | -- | P |
| Ammunition and Arms Manufacturing | C | C |
| Food Manufacturing, General (but excluding animal slaughtering and processing and seafood product preparation and packaging) | -- | C |
| Food Manufacturing, Limited (bread, tortillas, snack foods, roasted nuts and peanut butter, coffee, tea, flavoring syrup, seasoning and dressing, spice extract) | C | C |
| Furniture and Related Product Manufacturing | P | P |
| Glass and Glass Product Manufacturing | -- | C |
| Leather and Allied Product Manufacturing (excluding leather and hide tanning and finishing) | P | P |
| Machinery Manufacturing | -- | P |
| Miscellaneous Manufacturing (medical equipment and supplies, jewelry, sporting goods, toys, office supplies, signs, etc.) | P | P |
| Paper Manufacturing | -- | C |
| Pharmaceutical and Medicine Manufacturing (excludes biological product manufacturing) | C | C |
| Printing and Related Support Activities | P | P |
| Primary Metal Manufacturing | -- | C |
| Petroleum and Coal Products Manufacturing | -- | C |
| Plastics Product Manufacturing | -- | C |
| Rubber Product Manufacturing | -- | C |
| Textile Mills | -- | C |
| Textile Product Mills | -- | C |

| | | |
|---|---|---|
| Transportation Equipment Manufacturing | -- | P |
| Wood Product Manufacturing | -- | C |
| **WHOLESALE TRADE** | | |
| Merchant Wholesalers, Durable Goods - General (includes motor vehicles and parts, lumber and construction materials, metals and minerals other than petroleum, and machinery equipment and supplies) | -- | P |
| Merchant Wholesalers, Durable Goods - Limited (includes furniture and home furnishings, professional and commercial equipment and supplies, hardware, plumbing, and heating equipment and supplies) | P | P |
| Merchant Wholesalers, Nondurable Goods (excludes industrial gases, petroleum bulk stations and terminals, and fireworks and explosives merchant wholesalers) | -- | P |
| Wholesale Electronic Markets, Agents and Brokers (excludes automobile auctions) | P | -- |
| **HEALTH CARE AND SOCIAL ASSISTANCE** | | |
| Ambulatory Health Care Services | P | -- |
| Child Day Care Services (Commercial Facilities) | -- | -- |
| Child Day Care Services (Employer Provided Services) | -- | -- |
| Medical Office | P | -- |
| Vocational Rehabilitation Services | C | -- |
| **COMMERCIAL USES** | | |
| ***Information*** | | |
| Broadcasting | P | P |
| Data Processing, Health, and Related Services | P | P |
| Publishing Industries | P | P |
| Motion Picture and Sound Recording Facilities (excludes movie theaters) | P | P |
| Recording and sound studios | P | -- |
| Telecommunication Facilities | P | P |
| ***Eating and Drinking Places, and Food Services*** | | |
| Alcoholic beverage sales for consumption on the premises (includes all retailers on-sale licenses issued by the State of California Department of Alcoholic Beverage Control) | C | -- |
| Food Bank or Meal Delivery Services | C | C |
| Restaurant | | |
| • Without drive-thru | P | -- |
| • With drive-thru | C | -- |
| ***Motor Vehicle Mechanical and Electrical Repair and Maintenance*** | | |
| Servicing Facilities (limited to retail-oriented services, such as emissions testing, battery replacement and other similar retail activities that involve the limited use of pneumatic tools or equipment that creates noise impacts) | P | -- |

| | | |
|---|---|---|
| General Repair Facilities (includes general motor vehicle mechanical and electrical repair and maintenance of air conditioning, brakes, cooling, electric, exhaust, fuel, suspension system, engine, transmission, and drive train) | | |
| • General Repair Facilities - Automobile, Light Truck and Van Repair and Maintenance | C | C |
| • General Repair Facilities- Large Truck, Bus and Similarly Large Motor Vehicle Repair and Maintenance | -- | C |
| Automotive Body, Paint, Interior and Glass Repair | | |
| • Automobile, Light Truck and Van Body, Paint, and Interior Repair and Customization | C | C |
| • Minor Customization Work (limited to the "bolt-on" replacement or addition of parts only -- no body or paint work is allowed) | C | C |
| • Large Truck and Bus Body, Paint, and Interior Repair and Maintenance | -- | C |
| ***Personal Services*** | | |
| Couriers and Messengers | P | P |
| Commercial and Industrial Machinery and Equipment Repair and Maintenance (except automotive and electronic) | -- | P |
| Electronic and Precision Equipment Repair and Maintenance | P | P |
| Fitness and Recreational Sports Center | | |
| • Gross Floor Area less than 10,000 square feet | P | -- |
| • Gross Floor Area 10,000 square feet or more | C | -- |
| Industrial Laundry and Linen Supply | C | C |
| Personal and Household Goods Repair and Maintenance | P | P |
| Pet Boarding and Kennels | | |
| • Day only (e.g., Doggie Daycare) | C | -- |
| • Overnight Stays | C | -- |
| Postal Services | P | P |
| Passenger Car Rental and Leasing | C | -- |
| Truck, Utility Trailer, and Recreational Vehicle Rental and Leasing | C | P |
| ***Offices*** | | |
| Administrative and Support Services | P | -- |
| Finance and Insurance Offices | P | -- |
| Management of Companies and Enterprises | P | -- |
| Office Ancillary to a Primary Industrial Use (less than 10% of GFA) | P | P |
| Professional, Scientific, and Technical Services (e.g., accounting, tax preparation, architecture, bookkeeping, legal, engineering, consulting) | P | -- |
| Real Estate Offices | P | -- |
| ***Retail*** | | |
| Alcoholic beverage sales for consumption off the premises (includes all retailers off-sale licenses issued by the State of California Department of Alcoholic Beverage Control) | C | -- |

| | | |
|---|---|---|
| Auction Houses | C | -- |
| Automotive Parts and Accessories (including tires) | P | -- |
| Convenience stores (without alcoholic beverage sales) | P | -- |
| Gasoline Fueling Station with or without Convenience Store (without alcoholic beverage sales) | C | -- |
| Internet Fulfillment/Warehousing/Distribution (E-Commerce) | P | P |
| ***Industrial Retail Sales*** (retail sales of goods and/or products either manufactured, warehoused or wholesaled on-site) | | |
| • Maximum 15% of building floor area or 8,000 square feet, whichever is less | A | A |
| • Over 15% of building floor area or 8,000 square feet | C | C |
| Non-Store Retailers (includes electronic shopping and mail-order houses, vending machine operators, and other direct selling establishments excluding fuel/petroleum dealers) | P | P |
| **WAREHOUSING** | | |
| Warehousing and Storage (General and Other) | | |
| • Completely within enclosed building | P | P |
| • Outdoor Storage Accessory to an Allowed Use | A | A |
| • Outdoor Storage as the Primary Use | -- | C |
| Refrigerated Warehousing and Storage | P | P |
| **OTHER** | | |
| Religious Assembly | C | -- |
| Parking Facilities | P | -- |
| Vocational/Trade Schools | C | C |

Notes:
1. Excluding Commercial Crop Production of Marijuana
2. P=Permitted, C= Conditionally Permitted, A=Administratively Permitted, "—"=Prohibited
3. Refer to the Specific Plan EIR and Ontario International Airport Land Use Compatibility Plan (ONT ALUCP) for additional development criteria and policies that may affect allowable land uses.

## 4.3 Conceptual Site Plan

The conceptual site plan for the South Ontario Logistics Center Specific Plan is presented in Figure 4.1. Under this conceptual plan, Planning Area 1 (Business Park Zoning District) is developed with five buildings totaling 464,820 square feet (SF) and Planning Area 2 (Industrial – General Zoning District) is developed with three buildings totaling 2,462,135 SF (Table 4.2). Cumulatively, the eight buildings depicted in the conceptual site plan provide 2,926,955 SF of development.

The conceptual site plan reflects current market trends, site conditions, and planned infrastructure. However, the conceptual site plan may be modified provided it does not exceed the maximum building area presented in Table 3.1 and complies with this Specific Plan and applicable provisions of the City of Ontario Development Code.

### Table 4.2 Conceptual Site Plan

| Planning Area | SP Zoning District | Site Acreage | Proposed Conceptual Building Square Footage |
|---|---|---|---|
| 1 | BP | 23 | 464,820 SF |
| 2 | IG | 107.34 | 2,462,135 SF |
| **TOTAL** | | **130.34** | **2,926,955 SF** |

## Conceptual Site Plan

South Ontario Logistics Center Specific Plan

**Figure 4.1**

## 4.4 Development Standards

Table 4.3 (Development Standards) provides a summary of the development standards applicable to the land uses, structures, and related improvements located within the Specific Plan area. Refer to the Ontario Development Code for any standard not addressed in Table 4.3.

**Table 4.3 Development Standards**

| Development Standard | Zoning District | |
|---|---|---|
| | BP | IG |
| Minimum Lot Area | 10,000 sq ft | 20,000 sq ft |
| Minimum Lot Dimensions | | |
| 1. Lot Width | 100 ft | 100 ft |
| 2. Lot Depth | 100 ft | 100 ft |
| Maximum Floor Area Ratio | 0.60 | 0.55 |
| Maximum Building Footprint [1] | 125,000 sq ft | N/A |
| Minimum Landscape Setback | | |
| 1. Grove Avenue | 20 ft | 20 ft |
| 2. Eucalyptus Avenue | 23 ft | N/A |
| 3. Merrill Avenue | N/A | 23 ft |
| 4. Bon View Avenue | 10 ft | 10 ft |
| 5. Interior Side | N/A | N/A |
| 6. Interior Rear | N/A | N/A |
| Minimum Building Setback [2] | | |
| 1. Grove Avenue | 20 ft | 20 ft |
| 2. Eucalyptus Avenue | 23 ft | N/A |
| 3. Merrill Avenue | N/A | 23 ft |
| 4. Campus Ave | 10ft | 10ft |
| 5. Bon View Avenue | 10 ft | 10 ft |
| 6. Interior Side | 10 ft | 10 ft |
| 7. Interior Rear | 10 ft | 10 ft |
| Minimum Parking Space and Drive Aisle Separations[3,4,7] | | |
| 1. Parking Space or Drive Aisle to Street Property Line | 20 ft | 10 ft |
| 2. Parking Space or Drive Aisle to Interior Property Line | 5 ft | 5 ft |
| 3. Parking Space to Buildings, Walls, and Fences | Areas adjacent to public entries and office areas: 10 ft<br>Areas adjacent to other building areas: 5 ft<br>Within screened loading and storage yard areas: 0 ft | |
| 4. Drive Aisles to Buildings, Walls, and Fences | 5ft | 5ft |
| 5. Drive Aisles within Screened Loading and Storage Yard Areas | 0 ft | 0 ft |

## Table 4.3 Development Standards

| Development Standard | Zoning District | |
|---|---|---|
| | BP | IG |
| Maximum Building Height [5,6] | 45 ft | 55 ft |
| Minimum Landscape Coverage | 15% | 10% |
| Walls, Fences, and Hedges | Per Ontario Development Code Division 6.02 (Walls, Fences, and Obstructions) and Section 5.5 (Buffering and Screening) of the Design Guidelines in Chapter 5. | |

Notes:

1. Maximum building footprint limit is applicable only to buildings that front onto a public right-of-way.
2. Setback areas shall be measured from the property line and shall be landscaped.
3. Within yard areas fully screened by a decorative wall, there shall be no minimum drive aisle or parking space setback required, unless adjacent to residentially zoned properties.
4. The minimum separation area between a building, wall, or fence and a parking space or drive aisle shall be fully landscaped. The separation area may include pedestrian walkways, as necessary; however, a minimum 5-foot wide planter area shall be maintained between a building wall and a pedestrian walkway. The minimum separation dimension shall not include any area devoted to vehicle overhang.
5. Architectural projections, mechanical equipment, and focal elements may be allowed to exceed the maximum height up to 25 percent above the prescribed height limit.
6. The maximum building height and floor area ratio may be restricted pursuant to the Ontario International Airport Land Use Compatibility Plan (ONT ALUCP) and The Chino Airport Land Use Compatibility Plan. Refer to the ALUCP for properties affected by airport safety zones for additional development criteria and policies that may affect allowable land uses.
7. The use of surrounding roads, drive aisles and truck parking lots to address the open land requirement for the Chino Airport Overlay zone is discussed in Chapter 2 (Section 2.2, Airport Influence Areas).

Table 4.4 (Off-Street Parking and Loading Design Standards) establishes the design standards for off-street parking in the Specific Plan area. Refer to the Ontario Development Code for any parking-related standard not addressed in Table 4.4.

## Table 4.4: Off-Street Parking and Loading Design Standards

| Development Standard | Requirement |
|---|---|
| Parking space dimensions | |
| 1. Standard parking | 9 feet wide by 18 feet long |
| 2. Tractor trailer parking | 12 feet wide by 45 feet long |
| 3. At grade loading space | 12 feet wide by 18 feet long |
| Minimum aisle width for 90-degree parking | 24 feet |
| Maximum gradient at parking space | 5 percent measured in any direction |
| Dock-high loading facilities | |

### Table 4.4: Off-Street Parking and Loading Design Standards

| Development Standard | Requirement |
|---|---|
| 1. Dock high door loading space | 12 feet wide by 45 feet long with 14-foot minimum vertical clearance measured from finished surface of loading dock. |
| 2. Truck maneuvering area | Meet the minimum practical turning radius of a 53-foot semi-trailer/tractor combination. |

Table 4.5 (Required Number of Parking and Loading Spaces) specifies the number of parking spaces that must be provided according to land use. For a use not specified in the table, refer to the Ontario Development Code, Table 6.03-1, Off-Street Parking Requirements.

### Table 4.5: Required Number of Parking and Loading Spaces

| Land Use | Number of Required Spaces |
|---|---|
| Multi-tenant business park | Per 1,000 square feet of gross floor area:<br>• 3 spaces<br>• Required parking for "general office" when exceeding 10% of gross floor area<br>• One tractor trailer parking space per 4 dock-high loading doors |
| General office when exceeding 10 percent of building gross floor area | 4 spaces per 1,000 square feet of gross floor area of office use |
| Industrial speculative building | Per 1,000 square feet of gross floor area:<br>• Up to 50,000 square feet: 1.85 spaces<br>• 50,001 – 100,000 square feet: 1 space<br>• 100,001 square feet and over: 0.5 space<br>• One tractor trailer parking space per 4 dock-high loading doors.<br>• Plus required parking for "general business offices" and other associated uses, when those uses exceed 10 percent of the building gross floor area. |
| Manufacturing | 1.85 spaces per 1,000 square feet of gross floor area<br>• plus one tractor trailer parking space per 4 dock-high loading doors.<br>• Plus required parking for "general business offices" and other associated uses, when those uses exceed 10 percent of the building floor area. |
| Restaurant (including outdoor seating area up to 25 percent of gross floor area) | • Under 2,000 square feet: 5 spaces per 1,000 square feet of gross floor area<br>• More than 2,000 square feet: 10 spaces per 1,000 square feet of gross floor area |
| Warehousing and distribution (including associated office use if less than 10 percent of building gross floor area) | • First 20,000 square feet: 1 space per 1,000 square feet of gross floor area<br>• Additional square feet: 0.5 space per 1,000 square feet of additional gross floor area |

| | |
|---|---|
| | • Plus one tractor trailer parking space per 4 dock-high loading doors<br>• Plus required parking for "general office" and other associated uses when exceeding 10 percent of the building gross floor area |

Sufficient off-street loading and unloading spaces shall be provided on each development site, and adequate provisions and space shall be made for maneuvering freight vehicles and handling freight. Loading activity, including turnaround and maneuvering, shall be made on site. Buildings, structures, and loading facilities shall be designed and placed on the site so that vehicles, whether rear loading or side loading, may be loaded or unloaded at any loading dock, door, or area without extending beyond the property line.

# 5.0 DESIGN GUIDELINES

This chapter identifies conceptual themes for site planning, architecture, and landscape design within the Specific Plan area. The guidelines are intended to ensure a cohesive and attractive development that meets the following objectives:

1. Demonstrates high-quality development that complements and integrates into the community and adds value to the city.
2. Creates a functional and sustainable development that ensures South Ontario Logistics Center is regionally competitive and appropriate within the Ontario Ranch community.
3. Illustrates the distinctive characteristics of its two zoning districts: Business Park (BP) District (Planning Area 1 and 3) and Industrial - General (IG) District (Planning Area 2, 4 and 5).
4. Establishes criteria for building design and materials, landscape design, and site design that provide guidance to developers, builders, architects, landscape architects, and other professionals preparing plans for construction.
5. Provides guidance to City staff and the Planning Commission in the review and evaluation of future development projects in the South Ontario Logistics Center Specific Plan area.
6. Incorporates construction and landscape design standards that promote energy and water conservation strategies.
7. Implements the goals and policies of The Ontario Plan and the intent of the Ontario Development Code.

## 5.1 Site Design

Site design within Planning Area 1 and 3 (BP District) and Planning Area 2, 4 and 5 (IG District) shall incorporate the following design features.

Key provisions include:

1. Provide a well-organized site plan that emphasizes pedestrian connectivity and attractive landscape areas for the public through the location and arrangement of buildings, circulation, and parking areas.
2. Orient buildings towards street frontages to create an inviting public perimeter.
3. Provide visible pedestrian access to buildings from the street, parking areas, and perimeter sidewalks through signage, prominent architectural features, and landscape design.
4. Employ enhanced paving, accent trees, and other landscape features that highlight major building entries.
5. Design drive aisles to minimize impact to pedestrians, provide adequate stacking space, and prevent queuing of vehicles onto public streets.

6. Locate visitor and short-term parking areas at the front and sides of buildings near primary building entrances.
7. Create small parking clusters through the design and placement of landscape areas, drive entrances, and/or buildings to avoid large, visually dominant parking lots.
8. Locate loading and storage areas away from streets when feasible, ensure adequate space for vehicle backing and maneuvering on-site, and provide adequate parking for loading vehicles so normal traffic flow is not impeded.
9. Screen parking areas and loading docks facing the street using landscape buffers planted with screen trees and drought-tolerant vegetation.
10. Orient and screen elements such as trash enclosures, loading bay doors, and service docks to minimize their visibility.
11. Locate service entrances to avoid conflict with front entries.
12. Place electrical rooms and transformers away from front entries and street views.

## 5.2 Architectural Design

The building design, materials, colors, and textures establish its theme and character. Architecture shall be compatible and complementary with other buildings within the Specific Plan area; however, design diversity is encouraged to provide visual interest. Although development within Planning Area 1 and 3 (BP District) and Planning Area 2, 4 and 5 (IG District) differ in building height and scale, similar design concepts apply as follows.

Key provisions include:

1. Ensure scale, massing, fenestration, materials, and colors are consistent with the building's architectural style and compatible with the overall design in the Specific Plan area.
2. Avoid blank walls by providing articulation on building elevations visible from the public right-of-way through elements such as cornices, parapets, expression lines, and changes in materials and/or colors.
3. Provide the greatest level of articulation on the front facades that are visible from the public rights-of-way and the main entrances.
4. Design entry features as a significant aspect of a building's overall composition through massing, detailing, architectural treatments, and/or special materials and colors.
5. Employ recessed or covered building entrances to provide shade and visual relief.
6. Design office buildings, business parks, and office areas of industrial or warehouse buildings with an emphasis on the use of windows, architectural details, and building articulation.
7. Integrate the design of industrial/warehouse office areas into the overall building composition so they create powerful architectural statements and not visually disjointed "add-ons".
8. Employ a minimum of four different colors, materials, and/or textures on each building.
9. Avoid terminating a change in material or color at a building edge; instead, select a logical termination point in relation to the architectural features or massing.
10. Paint exposed downspouts, service doors, and mechanical screens the same color as the adjacent wall.
11. Elevations to the front of buildings across Eucalyptus Ave shall be additionally enhanced due to residential land use designation across the street.

## 5.3 Landscape Design

Conceptual landscape plans encourage durable landscape materials and designs that enhance the aesthetics of structures, create and define public and private spaces, and provide shade and environmental benefits. The following guidelines ensure that intersection sight lines and pedestrian safety are preserved. Landscaping plans within the Specific Plan area shall comply with the City of Ontario "Landscape Development Guidelines", the "Standard Drawings" and "Traffic and Transportation Guidelines" for sight-distance.

Key provisions include:

1. Landscape and irrigate all areas of the site not covered by buildings, structures, paving, or impervious surfaces.
2. Design and grade projects to direct storm runoff from building roofs and paved areas into swaled landscape areas for retention/infiltration. Landscape areas may be used for storm water basins and swales at no greater than 50 percent of the available landscape area and may not obstruct the mature root zone of required tree locations.
3. Provide shade for expanses of paving, building walls, roofs, and windows with irrigated shade trees located in appropriate areas where space permits to reduce the impacts of heat gain.
4. Design parking lot landscaping to reduce associated heat buildup, improve aesthetics, and integrate with on-site landscape and adjacent streetscape.
5. Use landscaping to aid in the screening and buffering of mechanical equipment, trash collection areas, loading docks, and outside storage areas from public view.
6. Coordinate utilities with landscape plans by showing utilities on plans to ensure placement clear of required tree locations. Utilities such as backflow devices and transformers shall be screened using landscaping that provides at least 75 percent coverage. Backflow devices and transformers shall be located at least five feet from hardscape to ensure space for landscape screening.
7. Prepare landscape plans that meet the requirements of the Landscape Development Guidelines and provide for the efficient use of water. Plants shall be selected and planted based upon their adaptability to the climate and topographical conditions of the project site.
8. Select drought-tolerant plants such as colorful shrubs and groundcovers, ornamental grasses and succulents, evergreen and deciduous trees, and species native to Southern California or naturalized to the local arid climate.
9. Incorporate water conservation features in landscape and irrigation plans.
10. Place a landscape planter island every ten parking spaces within parking lots. Planter islands shall be at least five feet in width exclusive of curbs and the same length as the abutting parking space. Planter islands shall include at least one tree, appropriate shrubs, and groundcover. Parking areas located behind screen walls shall not be subject to this provision.
11. Provide a minimum dimension of five feet exclusive of curbs for all landscape areas, except for vine pockets.

12. Space living plant materials less than or equal to the mature plant diameter. Non-living ornamental landscape materials may comprise a maximum of five percent of the landscape area requirements and shall be permeable.

## 5.3.1 Streetscapes

Streetscape design creates an aesthetically pleasing view for pedestrians, cyclists, and motorists, screens parking and loading areas from the public right-of-way, and integrates the development into the surrounding community. The following streetscape designs are conceptual only; final grading, plantings, and tree locations shall be determined on a project-by-project basis.

### *5.3.1.1 Grove Avenue Streetscape*

Grove Avenue features a 28-foot wide landscaped median, 7-foot wide parkways, 5’ wide sidewalk, within a 40’ neighborhood edge and a 20-foot wide landscape setbacks. An 8’ multipurpose trail is located on the east side. (Figure 5.1). Tree species along Grove Avenue include *Platanus acerifolia* ‘Bloodgood’ in the parkway, alternating Cercis occidentalis and Platanus acerfolia ‘Bloodgood’ groups behind the sidewalk and Pinus eldarica and Cercis occientalis in the median.

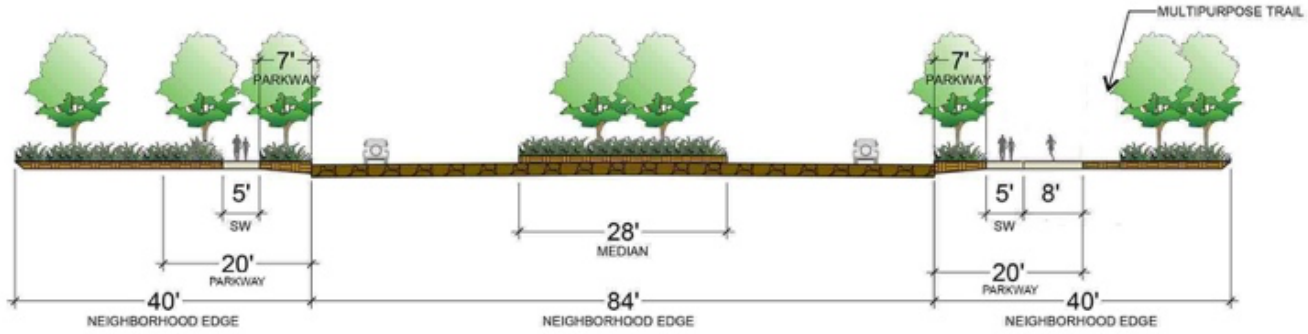

FIGURE 5.1: **GROVE AVENUE CONCEPTUAL STREETSCAPE**

### *5.3.1.2 Eucalyptus Avenue Streetscape*

The typical Eucalyptus Avenue section will feature a 12-foot wide parkway and 23-foot wide landscape setback to create a 35-foot Neighborhood Edge. The parkway will include a 7-foot wide curb-adjacent landscape strip generally planted with trees and groundcover and a five-foot wide sidewalk. An eight-foot

wide multi-purpose trail is located on the north side. A five-foot wide on-street Class II bike lane is located on the south side. Tree species along Eucalyptus Avenue will include Pistache trees in the parkway and behind the sidewalk alternating with groups of Podocarpus gracilior trees. The Neighborhood Edge creates a buffer along the Specific Plan boundary as well as a visual statement (Figure 5.2).

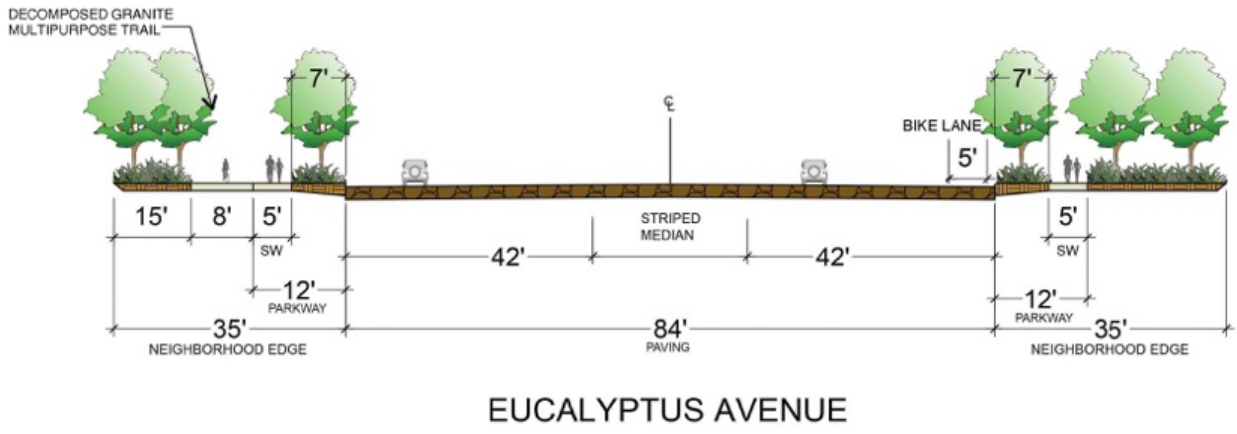

FIGURE 5.2: **EUCALYPTUS AVENUE CONCEPTUAL STREETSCAPE**

### *5.3.1.3 Merrill Avenue Streetscape*

The typical Merrill Avenue section on the north side of the street will feature an eight-foot wide on-street Class II bike lane, 12-foot wide parkway, eight-foot wide multi-purpose trail and 23-foot wide landscape setback. The parkway will include a seven-foot wide curb-adjacent landscape strip and a five-foot wide sidewalk. Tree species along Merrill Avenue will include Quercus agrifolia in the parkway and behind the sidewalk alternating with Cercis canadensis 'Forest Pansy.' The parkway and landscape setback will combine to form the 35-foot Neighborhood Edge buffer

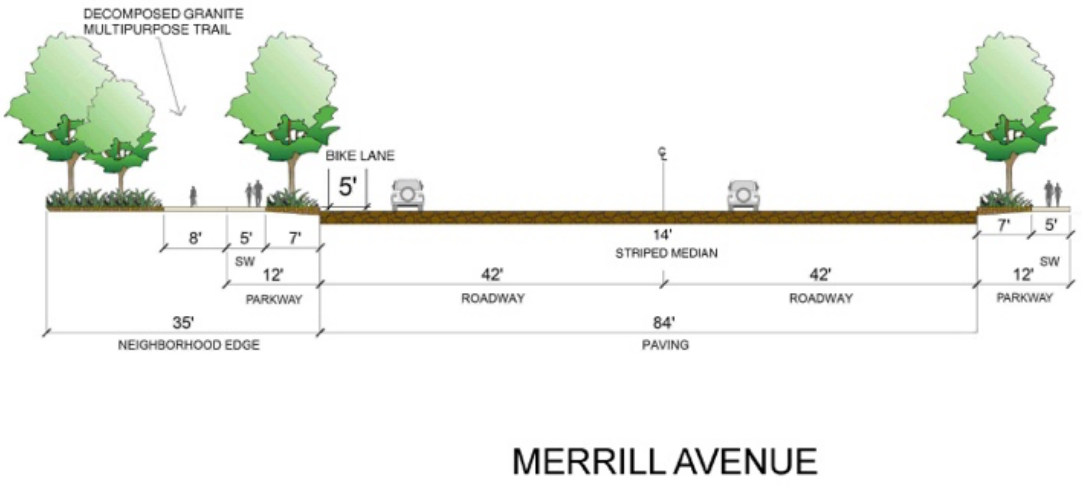

FIGURE 5.3: **MERRILL AVENUE CONCEPTUAL STREETSCAPE**

### *5.3.1.4 **Bon View Avenue Streetscape***

The Bon View Avenue section features 9-foot wide parkways with an 4-foot wide curb-adjacent landscape strip planted with trees and groundcover and a five-foot wide sidewalk (Figure 5.4). Tree species along Bon View Avenue include Chinese Pistache and Coast Live Oak.

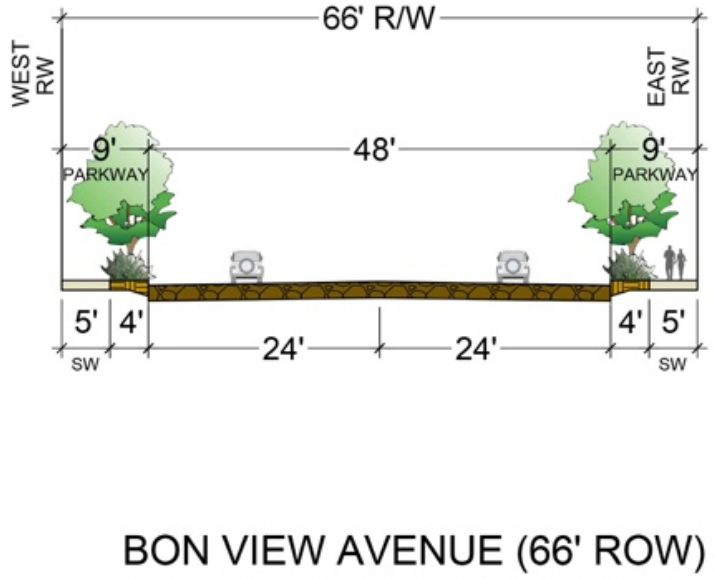

FIGURE 5.4: **BON VIEW AVENUE CONCEPTUAL STREETSCAPE**

### *5.3.1.5 Campus Avenue Streetscape*

The Campus Avenue section features a 15-foot wide landscape setback to create a 35-foot Neighborhood Edge (Figure 5.5). The east side of Campus Avenue includes a 12-foot parkway with a 5’ sidewalk and an 8’ multipurpose trail as part of the 35-foot Neighborhood Edge, while the western side includes a five-foot wide Class II on-street bike lane at the edge of the street. The Neighborhood Edges include a 7-foot wide curb-adjacent landscape strip that will be planted with trees and groundcover. Tree species along Campus Avenue include Drake Elm, Tulip Trees, and African Sumacs.

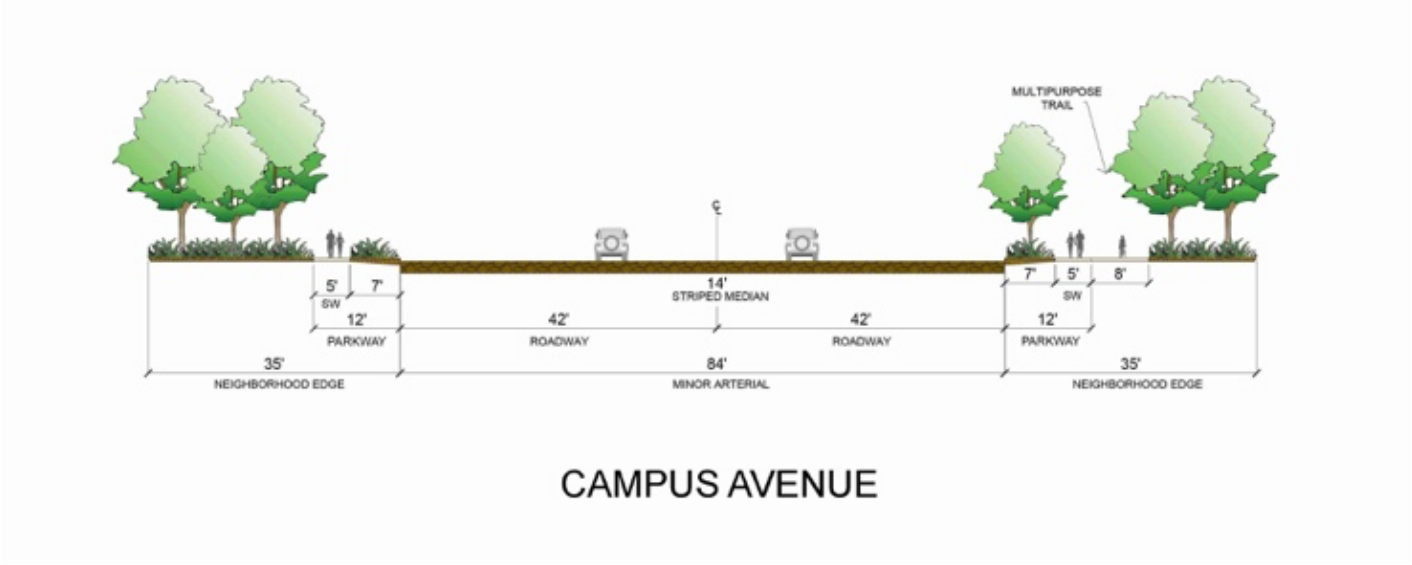

FIGURE 5.5: **CAMPUS AVENUE CONCEPTUAL STREETSCAPE**

### 5.3.2 Project Entries

The Specific Plan area includes multiple shared vehicular driveways accessible from Grove, Eucalyptus, Merrill, Campus and Bon View Avenues. Figure 5.6 presents a typical conceptual entry design featuring enhanced paving; a landscaped setback with flowering accent trees, canopy trees, and drought-tolerant landscaping; a multipurpose trail; sidewalk; and landscaped parkway with street trees.

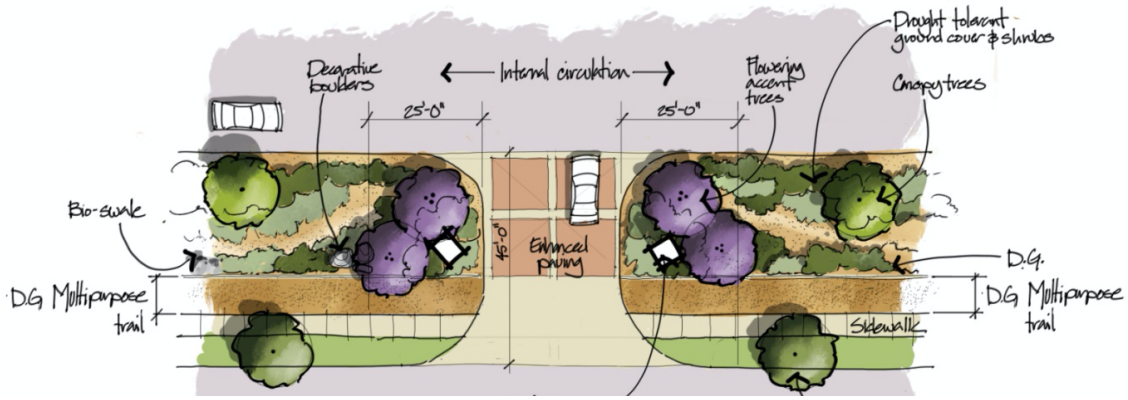

FIGURE 5.6: **CONCEPTUAL VEHICULAR ENTRY**

### 5.3.3 Plant Palette

The Plant Palette shown in Table 5.1 establishes a base palette for the Specific Plan area and includes a variety of groundcovers, shrubs, ornamental grasses, and evergreen and deciduous trees. The selection complements the design theme of the Specific Plan area and features water-efficient, drought-tolerant species native or adapted to the region. Similar plant materials may be substituted for the species listed in Table 5.1 if the alternative plants are appropriate to the climate and enhance the thematic setting.

**Table 5.1: Plant Palette**

| Botanical Name | Common Name | Use |
|---|---|---|
| *Chilopsis linearis* | Desert Willow | Tree |
| *Chitalpa tashkentensis* | Chitalpa | Tree |
| *Cinnamomum camphora* | Camphor Tree | Tree |
| *Cupressus sempervirens* | Italian Cypress | Tree |
| *Heteromeles arbutifolia* | Toyon | Tree |
| *Juniperus s.* 'Skyrocket' | Skyrocket Juniper | Tree |
| *Koelreuteria bipinnata* | Chinese Flame Tree | Tree |
| *Lagerstroemia i.* 'Muskogee' | Crape Myrtle | Tree |

## Table 5.1: Plant Palette

| Botanical Name | Common Name | Use |
|---|---|---|
| *Magnolia g.* 'Samuel Sommer' | Magnolia | Tree |
| *Magnolia g.* 'Little Gem' | Magnolia | Tree |
| *Olea europaea* | Olive | Tree |
| *Pinus canariensis* | Canary Island Pine | Tree |
| *Pinus eldarica* | Afghan Pine | Tree |
| *Pistacia chinensis* | Chinese Pistache | Tree |
| *Platanus acerifolia* | London Plane | Tree |
| *Platanus racemosa* | California Sycamore | Tree |
| *Quercus agrifolia* | Coast Live Oak | Tree |
| *Schinus molle* | California Pepper | Tree |
| *Tristania conferta* | Brisbane Box | Tree |
| *Washingtonia filifera* | California Fan Palm | Tree |
| *Phoenix dactylifera* | Date Palm | Tree |
| *Acca sellowiana* | Pineapple Guava | Shrub |
| *Buxus j.* 'Green Beauty' | Japanese Boxwood | Hedge |
| *Callistemon* 'Little John' | Dwarf Bottle Brush | Shrub |
| *Carissa macrocarpa* 'Tuttle' | Natal Plum | Shrub |
| *Cistus* 'Sunset Pink' | Sunset Pink Rockrose | Shrub |
| *Dianella* 'Little Rev' | Dwarf Dianella | Shrub |
| *Dianella tasmanica* | Dianella | Shrub |
| *Dodonaea viscosa* 'Purpurea' | Hopseed Bush | Shrub |
| *Eleagnus pungens* | Silverberry | Shrub |
| *Leucophyllum f.* 'Green Cloud' | Texas Ranger | Shrub |
| *Ligustrum j. texanum* | Texas Privet | Shrub |
| *Pittosporum tobira* 'Variegata' | Variegated Mock Orange | Hedge |
| *Pittosporum t.* 'Wheeleri' | Wheeler's Dwarf | Shrub |
| *Rhaphiolepis i.* 'Clara' | Indian Hawthorn | Hedge |
| *Rhaphiolepis i.* 'Springtime' | Indian Hawthorn | Hedge |
| *Rhamnus californica* | Coffeeberry | Shrub |
| *Rhamnus c.* 'Mound San Bruno' | Dwarf Coffeeberry | Shrub |
| *Rosmarinus o.* 'Tuscan Blue' | Rosemary | Shrub |
| *Salvia c.* 'Allen Chickering' | Allen Chickering Sage | Shrub |
| *Salvia greggii* | Autumn Sage | Shrub |
| *Salvia leucantha* | Mexican Sage | Shrub |
| *Westringia fruticosa* | Coast Rosemary | Shrub |
| *Xylosma congestum* | Shiny Xylosma | Hedge |
| *Agave* 'Blue Flame' | Blue Flame Agave | Accent |
| *Aloe maculata* | Soap Aloe | Accent |
| *Aloe petricola* | Stone Aloe | Accent |
| *Aloe polyphylla* | Spiral Aloe | Accent |
| *Aloe striata* | Coral Aloe | Accent |
| *Echeveria* 'Ruffles' | Ruffles Echeveria | Accent |
| *Hesperaloe parviflora* | Red Yucca | Accent |
| *Acacia redolens* 'Low Boy' | Dwarf Acacia | Groundcover |

### Table 5.1: Plant Palette

| Botanical Name | Common Name | Use |
|---|---|---|
| *Baccharis p.* 'Pigeon Point' | Dwarf Coyote Bush | Groundcover |
| *Baccharis p.* 'Centennial' | Coyote Bush | Groundcover |
| *Carex pansa* | California Meadow Sedge | Grass |
| *Carex tumulicola* | Foothill Sedge | Grass |
| *Festuca mairei* | Altas Fescue | Grass |
| *Festuca o.* 'Glauca' | Blue Fescue | Grass |
| *Lonicera j.* 'Halliana' | Hall's Honeysuckle | Groundcover |
| *Muhlenbergia capillaris* | Pink Muhly | Grass |
| *Myoporum parvifolium* | Myoporum | Groundcover |
| *Rosa* 'Flower Carpet' - Red | Red Flower Carpet Rose | Groundcover |
| *Rosmarinus o.* 'Huntington Carpet' | Prostrate Rosemary | Groundcover |
| *Salvia* 'Bee's Bliss' | Bee's Bliss Sage | Groundcover |
| *Senecio mandraliscae* | Blue Fingers | Groundcover |
| *Sesleria autumnali* | Moor Grass | Grass |
| *Trachelopspermum jasminiode* | Star Jasmine | Groundcover |
| *Distictus buccinatoria* | Blood-Red Trumpet Vine | Vine |

## 5.4 Walls and Fences

Walls and fences are important design features intended to both complement building and landscape architecture and provide functional elements. Any proposed entry gates shall be reviewed by the City of Ontario Traffic and Transportation Division prior to installation, and shall be permitted only if approved.

Key provisions include:

1. Provide attractive, durable, and complementary wall and fencing materials consistent with the building design.
2. Offset and architecturally treat long expanses of wall surfaces every 100 feet with material changes, pilasters and posts, staggered walls, or landscape treatments to prevent visual monotony.
3. Soften the appearance of fencing with plants that reach the height of the wall or fence at maturity.
4. Construct sliding gates visible from a public street with tubular steel, vertical steel pickets, or high-density perforated metal screening painted to match or complement adjacent walls. Interior gates not visible to public view may be galvanized steel or chain link.
5. Prohibit chain link fencing visible from public street rights of way.

## 5.5 Buffering and Screening

To alleviate the unsightly appearance of loading and service areas, buffering and screening design features shall be used to enhance the overall development. Entry gates shall be reviewed and approved by the City of Ontario Traffic and Transportation Division prior to installation.

### 5.5.1 Parking Lots

1. Buffer parking lots adjacent to and visible from public streets using a combination of architectural wing walls, buildings, decorative screen walls, evergreen hedges, and landscape buffers.
2. Use plants for screening that are a minimum of three feet tall at the time of installation.

### 5.5.2 Loading and Service Areas (Truck Courts)

1. Screen loading docks and truck parking areas visible from Grove Avenue, Eucalyptus Avenue, Merrill Avenue and Bon View Avenue and Campus Avenue. Screening may include portions of buildings, landscaping, evergreen hedges, and/or decorative walls.
2. Incorporate gated/screened entrances to loading areas into the overall architectural design of the development.
3. Design walls and fencing to be a minimum of eight feet high and a maximum of 14 feet high, as measured from finished grade, to screen truck courts and hide views of the top of loading bays or trailers.
4. Utilize buildings, architectural wing walls, and/or landscaping to screen service areas.
5. Screen ground- and roof-mounted mechanical equipment from public view. Ground-mounted equipment shall be screened with decorative walls or landscaping. Building architecture shall be designed to screen roof-mounted equipment.
6. Ensure refuse containers are easily accessible by service vehicles yet screened from public view within the building's façade or within a walled enclosure.
7. Obtain a use permit for outdoor storage, which shall be limited to predefined areas. Storage areas shall be screened from public view by decorative walls or landscaping with a minimum height of eight feet and a maximum height of 14 feet. The height of outdoor storage shall not-exceed the height of screening.

*Loading and Service Area Example*

## 5.6 Lighting

Site lighting provides illumination for operations, safety, security, and ambiance in parking lots, loading dock areas, pedestrian walkways, building entrances, signage, and architectural and landscape features.

Key provisions include:

1. Choose lighting fixtures that complement the building architecture and promote consistency throughout the Planning Areas.
2. Install ground- or low-mounted fixtures to provide safety and convenience along pedestrian walkways, entrances, activity areas, steps, ramps, and special features.
3. Allow building-mounted accent lighting for general illumination provided there is no light spill or distraction onto roadways or adjacent properties. Plain shoebox or unshielded wall packs are not permitted.
4. Direct exterior lighting fixtures downward to avoid unnecessary light spill and glare.
5. Limit pole-mounted, building-mounted, or tree-mounted lighting fixtures to no more than 30 feet high to minimize light spill and glare.
6. Shield and direct pole-mounted lights away from public streets.
7. Ensure exterior lighting is consistent with the Chino Airport Land Use Compatibility Plan.
8. Design parking lot lighting plans to avoid placing fixtures in required tree locations.

## 5.7 Signage

Approval of a comprehensive sign program shall be required for development within the Specific Plan area. A sign program facilitates integration of signs with the overall site and building design to create a unified visual statement and provide for flexible application of sign regulations in the design and display of multiple signs.

Key provisions include:

1. Install entry monument signage to identify the South Ontario Logistics Center. Entry monuments shall be designed in accordance with City of Ontario Traffic and Transportation Guidelines for monument placement.
2. Employ signage to identify a center and tenants within a center, direct vehicular traffic, and provide on-site way-finding for pedestrians.
3. Employ signage within industrial sites to give direction to loading and receiving, visitor parking, and other special uses.
4. Provide a unifying sign theme in developments with multiple users.
5. Coordinate signage with the building design, materials, colors, size, and placement.
6. Design signage with backlit or internally illuminated individual channel letters. Can-type box signs with translucent backlit panels are discouraged.
7. Avoid covering significant architectural elements with signage.
8. Position flush-mounted signs with respect to architectural features and align with signs on other buildings to maintain a pattern.
9. Place street address signs perpendicular to approaching vehicular traffic.
10. Ensure signage located within a landscape planter is not blocked or damaged by plant materials.
11. Conserve energy by utilizing an automatic illumination shut-off mechanism when businesses are closed.
12. Construct signs from high-quality materials and avoid exposed wiring, ballasts, conduits, fasteners, raceways, or similar hardware.

*Signage Examples*

## 5.8 Sustainable Design Strategies

South Ontario Logistics Center is committed to sustainable design strategies that integrate principles of environmental stewardship into the design and construction process. Appropriate strategies shall be determined for each project within the Specific Plan area.

### 5.8.1 Sustainable Construction & Technology Concepts

1. Design and construct energy-efficient buildings to reduce air, water, and land pollution and environmental impacts from energy production and consumption.
2. Employ passive design including skylights, building orientation, landscaping, and strategic colors to improve building energy performance.
3. Reduce the heat island effect by providing shade structures and trees that produce large canopies. In addition, choose roof and paving materials that possess a high level of solar reflectivity.
4. Use recycled and other environmentally-friendly building materials wherever possible.
5. Incorporate skylights into at least two percent of warehouse/distribution building roof area to provide natural light and reduce electric lighting demand.
6. Use energy-efficient LED (or similar) products.
7. Provide interior or exterior bicycle storage consistent with the California Green Building Standards Code.
8. Use drought-tolerant landscaping with drip irrigation and include plantings such as trees, shrubs, groundcovers and/or vines. Optional amenities include benches, trellises, thematic fencing, and decorative walkways.
9. Employ high-performance dual-pane window glazing in office storefronts.

### 5.8.2 Water Quality

1. Design landscape areas with retention/infiltration swales and basins, or employ bio-treatment when infiltration is infeasible, as required by the San Bernardino County MS4 Permit and Water Quality Management Plan.
2. Select native and drought-tolerant plants to reduce water demand.
3. Integrate permeable pavement and perforated curbs throughout the project area as feasible to allow stormwater to enter planter areas, assist with filtration, and control runoff.
4. Use captured runoff to augment irrigation systems whenever possible.
5. Employ irrigation systems that respond to changing weather conditions, irrigate by hydro zone, and use micro-irrigation techniques.

6. Use recycled water to irrigate landscape areas and for other appropriate uses. The use of recycled water for certain purposes is required by the City of Ontario Recycled Water Master Plan.

*Sustainable Design Examples*

# 6.0 IMPLEMENTATION

This chapter summarizes the development process for implementation of the South Ontario Logistics Center Specific Plan and provides for the orderly development of the Specific Plan area.

## 6.1 Applicability

The provisions, standards, and guidelines contained within this Specific Plan provide the regulations for land use and development within South Ontario Logistics Center. The Specific Plan supersedes the development standards and regulations of the Ontario Development Code unless stated otherwise in this document. Whenever the provisions and development standards of the Specific Plan conflict with those of the Ontario Development Code, the Specific Plan shall take precedence. Where the Specific Plan is silent, the Ontario Development Code shall apply.

### Definition of Terms

The terms used within the Specific Plan shall mean the same as defined in the Ontario Development Code, unless otherwise noted.

## 6.2 Severability

The Specific Plan serves as the implementation tool for the City's Policy Plan (General Plan). In the event that any provision of this Specific Plan or its application to any person or circumstance is held to be invalid or unconstitutional by any court of competent jurisdiction, such portion shall be deemed separate, distinct and independent, and shall not affect the validity of the remaining provisions of this Specific Plan or applications thereof, which can be implemented without the invalid provision or application.

## 6.3 Interpretation

If an issue, condition, or situation occurs that is not sufficiently covered or provided for in this Specific Plan, those that are applicable for the most similar issue, condition, or situation shall be used. Unless otherwise provided, any ambiguity concerning the content or application of the Specific Plan shall be resolved by the City of Ontario Planning Director in a manner consistent with the goals, policies, objectives, and intent established in the Specific Plan.

## 6.4 Consistency with Other Plans and Regulations

This sub-section discusses consistency of the Specific Plan with The Ontario Plan, Airport Land Use Compatibility Plans, the California Building Code, and CEQA.

### 6.4.1 Consistency with The Ontario Plan

No land use, activity, or facility shall be permitted that is inconsistent with the objectives, policies, general land uses, and programs of The Ontario Plan, as amended.

The South Ontario Logistics Center entitlement applications include a General Plan Amendment to change the site's land use designations from Low Medium Density Residential to Business Park and Industrial - General to be consistent with this Specific Plan.

### 6.4.2 Consistency with Airport Land Use Compatibility Plans

Projects located within the Specific Plan area are subject to the restrictions and provisions of the Airport Land Use Compatibility Plans prepared for Ontario International Airport and Chino Airport.

### 6.4.3 Consistency with California Building Code

Projects located within the Specific Plan area must comply with the State of California Building Code as adopted and implemented by the City of Ontario.

### 6.4.4 Consistency with CEQA

The City of Ontario is defined as the lead agency under the California Environmental Quality Act (CEQA) based upon its authority to approve this Specific Plan. Concurrent with approval of this Specific Plan, the City Council will be required to certify the associated Environmental Impact Report (EIR), including a Mitigation Monitoring and Reporting Program to ensure that all approved EIR mitigation measures are implemented. The Planning Director shall be responsible for confirming that mitigation measures have been implemented through each project's approved plans.

## 6.5 Specific Plan Revisions

It is recognized that modifications to the text or exhibits of this Specific Plan may be warranted in the future to accommodate unforeseen conditions or events. Revisions shall be processed in a manner prescribed by the City of Ontario Planning Department pursuant to the provisions in this section.

### 6.5.1 Minor Modifications to the Specific Plan

Minor modifications to the Specific Plan shall be processed administratively without the submission of a formal Specific Plan Amendment application and shall not require a public hearing or review by the Planning Commission. The Planning Director shall have the authority to review and make a determination of approval, approval with conditions, or denial of a request for minor modification to the Specific Plan. The Planning Director may, at his/her discretion, refer any such request to the Planning Commission or City Council.

Minor modifications are defined as:

1. Expansions or reductions to a Planning Area boundary or acreage, provided that the total acreage within each affected Planning Area is not modified by more than 20 percent.
2. An increase in maximum building area for single- and multi-tenant buildings of up to 20 percent, provided that the maximum square footage for the Planning Area established by this Specific Plan is not exceeded.
3. A modification of up to 20 percent of a project's required minimum lot area, minimum lot dimensions, or setbacks if compatible with the surrounding land uses and consistent with the overall design character of the South Ontario Logistics Center.
4. Additions, deletions, or modifications to Table 4.1, Allowable Uses, which lists the permitted and conditionally permitted uses in the Specific Plan area, provided the Planning Director determines the changes to be consistent with the objectives and intent of the Specific Plan.
5. Minor modification of conceptual design criteria for architectural features and materials, landscape treatments, lighting, signage, and sustainable design strategies.
6. Revisions to roadway alignment when the change results in centerline shift of less than 250 feet.
7. Revisions to infrastructure facility sizing and precise location for dry utilities, water, sewer, and storm drainage improvements subject to approval of the City Engineer.
8. Changes to the Phasing Plan, provided infrastructure is available to serve the phase as determined by the City Engineer.
9. Revisions to exhibits in the Specific Plan that do not substantially change its intent or character.
10. Modifications of a similar nature to those listed above, which are deemed minor by the Planning Director and conform to the purpose and intent of this Specific Plan and The Ontario Plan.

### 6.5.2 Specific Plan Amendments

Proposed changes to this Specific Plan that do not meet the criteria for a Minor Modification shall be subject to a formal Specific Plan Amendment application process pursuant to Section 4.01.035 of the Ontario Development Code and California Government Code Section 65450, et seq.

If the proposed amendment requires supplemental environmental analysis pursuant to CEQA, the applicant shall adhere to the City's adopted procedures and CEQA Guidelines.

## 6.6 Subdivision Maps

Development within the Specific Plan area may require the processing of tentative and final tract or parcel maps and/or lot line adjustments or mergers. Subdivision maps and lot changes shall be reviewed and approved pursuant to Section 4.02.085 of the Ontario Development Code and other applicable City codes

and regulations, California Government Code Section 66410 et seq. (Subdivision Map Act), as well as the provisions of this Specific Plan.

## 6.7 Development and Land Use Review Procedures

Review procedures for development and land use within the Specific Plan area shall be as provided in this Specific Plan and in accordance with the Ontario Development Code.

### 6.7.1 Development Plan Review

Development proposed within the Specific Plan area shall be subject to Development Plan review pursuant to Section 4.02.025 of the Ontario Development Code. The review is intended to ensure compliance with the provisions of this Specific Plan, protect the integrity and character of the physical composition of the City, and encourage high quality development.

### 6.7.2 Conditional Use Permit

A Conditional Use Permit shall be required for uses deemed "conditionally permitted" in Table 4.1 (Allowable Uses). Applications for a Conditional Use Permit shall be processed pursuant to Section 4.02.015 of the Ontario Development Code.

### 6.7.3 Administrative Use Permit

An Administrative Use Permit shall be required for uses deemed "administratively permitted" in Table 4.1 (Allowable Uses). Applications for an Administrative Use Permit shall be processed pursuant to Section 4.03.015 of the Ontario Development Code.

### 6.7.4 Appeals

Appeals of decisions of the Development Advisory Board, Zoning Administrator, Planning Director, or the Planning Commission regarding implementation of this Specific Plan may be made by the applicant or other aggrieved party pursuant to Division 2.04 of the Ontario Development Code.

## 6.8 Development Agreement

Approval of a statutory development agreement authorized pursuant to California Government Code Section 65864 et seq. shall be required by this Specific Plan. The Development Agreement shall include, but not be limited to, methods for financing, acquisition, and construction of necessary infrastructure. The Development Agreement shall be fully executed prior to recordation of the first Final Map.

## 6.9 Specific Plan Phasing

Implementation of this Specific Plan is anticipated to occur in two phases, as discussed in Chapter 3.10, Phasing Plan:

**Phase 1:** Phase 1 consists of the construction of Buildings 1 through 8 as numbered in the Conceptual Site Plan. This phase may be developed in several sub-phases in response to market demands and according to the logical and orderly completion of infrastructure improvements.

**Phase 2:** Phase 2 consists of the development of PAs 3, 4, & 5.

These phases may be developed as sub-phases and may occur either sequentially or concurrently with one another.

All the Specific Plan required infrastructure can be found in Section 3.3 (Figure 3.7 and 3.7a) for Potable Water, Section 3.4 (Figure 3.9) for Recycled Water, Section 3.5 (Figure 3.11) for the Sewer Plan, Section 3.7 (Figure 3.13) for the Fiber Optic Plan, and Section 3.8 (Figure 3.14) for the Storm Drain Plan. Phasing will be determined per separate Development Agreement.

### 6.9.1 Phasing Objectives

Development phasing shall meet the following objectives:

1. The orderly build-out of the project based upon market and economic conditions;
2. The provision of adequate parking, infrastructure, and public facilities concurrent with the development of each phase; and
3. The protection of the public health, safety, and welfare.

### 6.9.2 Findings for Modification of the Phasing Plan

The Planning Director shall have the authority to approve modification of the Phasing Plan, subject to the following findings:

1. The modification is consistent with the Policy Plan (General Plan);
2. The modification will not adversely affect the implementation of the Specific Plan;
3. The modification will not be detrimental to public health, safety, and general welfare; and
4. The modification will not delay the construction of infrastructure improvements necessary to serve the development.

## 6.10 Financing of Public Improvements

The financing of the construction, operation, and maintenance of public infrastructure improvements, facilities, and services within the Specific Plan area shall be provided through a combination of mechanisms. Final determination of the scope of improvements, maintenance responsibilities, and funding sources shall be specified in the approved Development Agreement, executed prior to recordation of the first Final Map.

Financing options may include, but are not limited to, the following:

1. Private capital investment by the project developer, the property owner(s), or a Property Owners Association.
2. Private capital investment by a consortium of property owners and/or developers of the project and/or surrounding area.
3. Community Facilities District (CFD) established pursuant to the Mello-Roos Community Facilities District Act of 1982, or other special district, to provide funding for the construction of public facilities or the provision of public services. City Council approval shall be a prerequisite for use of special district financing mechanisms.
4. Development Impact Fee (DIF) credits to be applied for infrastructure completed by the project developer.
5. Enhanced Infrastructure Financing District to fund infrastructure development through tax increment financing pursuant to Senate Bill 628.
6. Community Revitalization and Investment Authorities (CRIA) to fund infrastructure development through tax increment financing pursuant to Assembly Bill 2.

## 6.11 Maintenance Plan

Final determination of maintenance responsibilities for the public and private improvements constructed in association with this Specific Plan shall be specified in the approved Development Agreement, which shall be executed prior to recordation of the first Final Map. However, it is anticipated that maintenance shall be generally shared by three entities as described below and outlined in Table 6.1, Maintenance Responsibilities.

### 6.11.1 City of Ontario, Community Facilities District & Other Special District

The establishment of a community facilities district, landscape and lighting district, or other special district to fund the maintenance of public facilities shall be at the City's discretion. It is anticipated that public maintenance shall include the following:

1. Right-of-way for public streets within the Specific Plan area (Grove Avenue, Eucalyptus Avenue, Merrill Avenue, Campus Ave and Bon View Avenue) shall be dedicated to the City of Ontario per

the provisions of this Specific Plan (Chapter 3, Development Plan) and as approved by the City Engineer.

2. Landscape improvements and public streetlights within the public right-of-way shall be maintained through a landscape and lighting district or other special maintenance district established by the City.
3. The City shall maintain off-site infrastructure improvements, including water, sewer, and storm drainage facilities.
4. The City shall maintain NPDES facilities located within the curb-to-curb area of public streets. Operation and maintenance requirements for NPDES stormwater runoff source control and treatment control Best Management Practices shall be identified in the approved Water Quality Management Plan for the project.

### 6.11.2 Property Owners Association

A Property Owners Association (POA) may be established for the maintenance of common areas, including such improvements as on-site landscape areas and parking and drive aisles within South Ontario Logistics Center. It is anticipated that improvements maintained by the POA would include the following:

1. Driveways;
2. On-site open spaces, landscape areas, common areas, parking lots, and walkways;
3. Landscaping within setback/landscape buffer areas along Campus Avenue;
4. NPDES facilities within landscape setbacks and on-site common areas;
5. Property identification signage and architectural elements located within the landscape buffer;
6. Fencing and walls, including graffiti removal; and
7. Water, sewer, recycled water facilities and storm drainage facilities located on-site and constructed by the developer are considered privately owned and to be maintained by the property owners or the Property Owner Associations. The Property Owners Association(s) shall maintain permanent on-site water quality basins, trenches, swales and biotreatment filters required by the San Bernardino County MS4 Permit and Water Quality Management Plan.

**Table 6.1: Maintenance Responsibilities**

| Area of Responsibility | City or Special District | Property Owners or POA | Utility |
|---|---|---|---|
| **Master Planned Roadways: Grove Avenue, Eucalyptus Avenue, Merrill Avenue, Campus Ave and Bon View Avenue** | | | |
| Curb-to-curb improvements | ☐ | | |
| Bon View- landscaping within the public right-of-way (parkways) | | ☐ | |

**Table 6.1: Maintenance Responsibilities**

| Area of Responsibility | City or Special District | Property Owners or POA | Utility |
|---|---|---|---|
| Behind the curb improvements - landscaping within the public right-of-way (parkways) and sidewalks and neighborhood edge | ☐ | | |
| **Other Improvements** | | | |
| Traffic Signals and Traffic Control Signs on public streets | ☐ | | |
| Street lights in the public right-of-way | ☐ | | |
| Drive aisles | | ☐ | |
| On-site parking areas | | ☐ | |
| Common open space | | ☐ | |
| Landscaping within setback/landscape buffer areas | | ☐ | |
| Monument signage | | ☐ | |
| Walls and fences | | ☐ | |
| Stormwater drainage/water quality control facilities within the curb-to-curb area of public streets and Merrill and Bon View public storm drain proposed behind the curb | ☐ | | |
| Stormwater drainage/water quality control facilities behind the curb | | ☐ | |
| Water, recycled water, and sewer infrastructure in the public right-of-way | ☐ | | |
| Dry utilities: electricity, natural gas, communication systems | | | ☐ |
| City of Ontario Fiber Optic Conduit (in Ontario Ranch Streets) | ☐ | | |

## 6.12 Additional Entitlement Requirements

Currently, there are no existing City utilities, nor any improvement plans for City utilities in the vicinity of the Specific Plan area. Several miles of new infrastructure are required to provide City utility services to the Specific Plan area. In order to ensure orderly expansion of the City Utility Systems and other City infrastructure, the following additional entitlement requirements are imposed upon all subdivision maps and developments within the Specific Plan area.

### 6.12.1 Conceptual Design Report

Prior to approval of any entitlement applications (subdivision maps, Development Plan Reviews, etc.), a conceptual design report shall be prepared and submitted to the Development Agency Engineering Department and the Utilities Engineering Department for review and approval of the extent of all public improvements required for the project. The study shall identify existing and future rights-of-ways (ROW) and infrastructure improvements and establish all vertical and horizontal alignments for each utility. The report shall include cross-sections, profiles, and any supporting details needed to demonstrate that utilities can be adequately accommodated in the public ROW. The study shall account for all utility conflicts, right-of-way variations, existing obstructions, and the timing of utility installation. Utilities cannot be located along an alignment that conflicts with existing conditions (e.g. electrical poles, private property, etc.) unless the applicant accepts the responsibility of modifying the existing conditions (e.g. undergrounding, relocation, ROW acquisition, etc.).

### 6.12.2 Preliminary Design Report

As a condition of entitlement (subdivision map, Development Plan Review, etc.) within the Specific Plan area and prior to submittal of Infrastructure Improvements Plans, a Preliminary Design Report (PDR) for all public infrastructure shall be submitted and approved by the Development Agency Engineering Department and the Utilities Engineering Department. The PDR shall include the following:

Conceptual Design Compliance: A discussion modifying or confirming the conceptual design established in the project's Conceptual Design Report shall be included. The study shall confirm all rights-of-ways (ROW), infrastructure improvements, and vertical and horizontal alignments for each utility.

Street Cross Sections and Profiles: Street cross sections and profiles shall be provided for each public street, private street and Public Utility Easement (PUE) containing a public utility and at any points along the alignments where the ROW varies. The cross sections shall show the location and size of each utility and shall annotate the property/ROW lines, the type of finished surface material, the distance of each utility from centerline, the depth from finished surface to top of pipe, and the distance between utilities (outside wall to outside wall).

Constructability Review: The report shall include a discussion of the constructability issues along the proposed alignment and identify the recommended construction methods that may be utilized. The study shall perform field investigation (field survey and potholing) in order to identify potential utility conflicts, right-of-way variations, existing obstructions, and constructability issues created by the timing of utility installation.

Supporting Details: The PDR shall include any supporting details needed to demonstrate that utilities can be adequately accommodated in the public ROW, including the placement of large appurtenances, clearance from existing obstructions, etc.

30% Design Drawings: The PDR findings shall be incorporated into a 30% design plan set and included in the PDR.

Western Trunk Sewershed Scope: In order to qualify for Development Impact Fees (DIF) and to assure that the Western Trunk Sewer (WTS) is designed to serve its entire Sewer Master Plan Tributary Area, the PDR shall include the WTS and all the Master Plan Trunk Sewers connecting to the WTS. The PDR shall include: the WTS from the Kimball Interceptor to the Whispering Lakes Pump Station at Riverside Drive and Carpenter Avenue; the Euclid Trunk Sewer from the WTS in Merrill Avenue to Chino Avenue; the Bon View Trunk Sewer from the WTS in Merrill Avenue to Chino Avenue; the Grove Trunk Sewer from the WTS in Merrill Avenue to Chino Avenue; and the Walker Trunk Sewer from the WTS in Schaeffer Avenue to Chino Avenue.

Horizontal and Vertical Alignment Studies: Horizontal and vertical alignment studies shall demonstrate the entire sewershed and subsewersheds can be sewered.

Sewer Sizing Hydraulic Calculations: Sewer sizing hydraulic calculations shall demonstrate the proposed trunk sewer designs can accommodate the Master Plan Flows to meet the Master Plan Design Criteria.

### 6.12.3 Utilities Systems Map (USM)

Prior to approval of any entitlement application (subdivision maps, Development Plan Reviews, etc.), as part of the entitlement application a Conceptual Utilities Systems Map (USM) shall be prepared and submitted to the Development Agency Engineering Department and the Utilities Engineering Department for review and approval. The USM is a summary plan sheet exhibit that shows all the public offsite infrastructure requirements and demands for the Development Project (and/or Subdivision), the onsite private infrastructure improvements, and the interaction between the public and private utilities systems. As a Condition of Approval for the Development Project (and/or Subdivision), the Conceptual Utilities Systems Map shall be updated into a Final Utilities Systems Map to reflect the changes that occur between entitlement and Final Plan and Permit Approval. Reference the Ontario Municipal Utilities Company Utilities Engineering Department's Utilities Systems Map (USM) Requirements for details.

### 6.12.4 Integrated Waste Management Report (IWMR) and Solid Waste Handling Plan (SWHP)

Prior to approval of any entitlement application (subdivision maps, Development Plan Reviews, etc.), as part of the entitlement application a Conceptual Integrated Waste Management Report (IWMR) and a Conceptual Solid Waste Handling Plan (SWHP) shall be prepared and submitted to the Development Agency Engineering Department and the Utilities Engineering Department for review and approval. The SWHP summary plan sheet exhibit that demonstrates the project site's design conformance with the Integrated Waste Department's requirements, including the requirements for Sizing of Storage, Location of Collection Areas, Accessibility for Collection Vehicles, and Collection of Sorted/Diverted Waste Types. The IWMR is a report that presents project specific information that is not able to be demonstrated within the Solid Waste Handling Plan, including discussions on: project solid waste operations; project compliance with all applicable laws, statues, policies, and requirements; and, conformance with all the Integrated Waste Department's requirements, including the requirements for Sizing of Storage, Location of Collection Areas, Accessibility for Collection Vehicles, and Collection of Sorted/Diverted Waste Types. As a Condition of Approval for the Development Project (and/or Subdivision), the Conceptual SWHP and the a Conceptual IWMR shall be updated into a Final SWHP and Final IWMR to reflect the changes that occur between entitlement and Final Plan and Permit Approval. The SWHP and IWMR may be required to be updated from whenever there are new occupants, new uses or changes to existing uses, Tenant Improvements, Business Licenses, and Certificates of Occupancy. Reference the Ontario Municipal Utilities Company Utilities Engineering Department's Integrated Waste Management Report (IWMR) and Solid Waste Handling Plan (SWHP) Requirements for details.

# 7.0 GENERAL PLAN CONSISTENCY

California Government Code (Title 7, Division 1, Chapter 3, Article 8, Section 65440-65457) permits the adoption and administration of Specific Plans as an implementation tool for elements contained within a jurisdiction's local General Plan. Approval of this Specific Plan is based on the finding that the regulations, guidelines, and programs contained within this Specific Plan are consistent with The Ontario Plan. The Ontario Plan establishes the direction and vision for the City of Ontario and provides a single comprehensive document to shape its future. The Ontario Plan provides for policies to accommodate change over its 30-year lifespan. The Ontario Plan consists of a six-part Component Framework: 1) Vision, 2) Governance Manual, 3) Policy Plan, 4) City Council Priorities, 5) Implementation, and 6) Tracking and Feedback. The following sections demonstrate the South Ontario Logistics Center Specific Plan implements the goals and policies of the City's Policy Plan (General Plan).

## 7.1 Land Use Element

**GOAL LU1: A community that has a spectrum of housing types and price ranges that match the jobs in the City and that make it possible for people to live and work in Ontario and maintain a quality of life.**

Policy LU1-2 Sustainable Community Strategy

We integrate state, regional, and local Sustainable Community/Smart Growth principles into the development and entitlement process.

*The Specific Plan encourages the efficient use of energy resources in design, product selection, and operational techniques. The Design Guidelines in Chapter 5 address lighting, bicycle parking, sustainable landscaping, and sustainable design strategies. Landscape provisions require the use of drought-resistant vegetation and shade trees to conserve water and reduce heat islands. The sustainable design strategies include design and construction of energy efficient buildings to reduce air, water, and land pollution and environmental impacts from energy production and consumption. Protecting water quality, reducing runoff, and reducing water demand for landscaping are promoted in the Development Plan in Chapter 3 through the recycled water plan and storm drainage facilities source control and treatment practices.*

### Policy LU1-3 Adequate Capacity

We require adequate infrastructure and services for all development.

*The Specific Plan establishes a Phasing Plan that is coordinated with affected infrastructure providers and ensures that uses on the project site are adequately served. The Specific Plan requires infrastructure development to occur in a timely manner. Potable and recycled water, sewer, fiber optic communications, and storm drain infrastructure improvements that ultimately serve the Specific Plan area are addressed in Chapter 3, Development Plan. Infrastructure and services will be consistent with City of Ontario infrastructure master plans and the approved development agreement.*

## GOAL LU2: Compatibility between a wide-range of uses.

### Policy LU2-3 Hazardous Uses

We regulate the development of industrial and similar uses that use, store, produce or transport toxic substances, air emissions, other pollutants or hazardous materials.

*Uses within the Specific Plan are required to comply with federal, state, and local regulations pertaining to the use, storage, disposal, and transport of hazardous materials, toxic substances, and other pollutants.*

### Policy LU2-6 Infrastructure Compatibility

We require infrastructure to be aesthetically pleasing and in context with the community character.

*The Specific Plan design guidelines (Chapter 5) support high-quality development that complements the desired community character. Landscaped areas separate parking areas to keep parking lots from being the dominant visual element of the site. The Specific Plan also establishes landscape setback requirements (Chapter 4, Land Use and Development Standards) and conceptual streetscape design (Chapter 5, Design Guidelines) along all roadways within the Specific Plan area to create safe and attractive streets for pedestrians, cyclists, and motorists and ensure a cohesive pattern of development.*

### Policy LU2-9 Methane Gas Sites

We require sensitive land uses and new uses on former dairy farms or other methane-producing sites to be designed to minimize health risks.

*The Specific Plan incorporates into its Implementation Plan (Chapter 6) requirements for development to comply with the mitigation measures identified in the project environmental impact report, including those for soil remediation and proper venting to address the potential existence of methane gases within the Specific Plan area.*

**GOAL LU5: Integrated airport systems and facilities that minimize negative impacts to the community and maximize economic benefits.**

### Policy LU5-7 ALUCP Consistency with Land Use Regulations

We comply with state law that requires policy plan/general plans, specific plans, and all new development be consistent with the policies and criteria set forth within an Airport Land Use Compatibility Plan for any public use airport.

*The Specific Plan area is within the Ontario International Airport Influence Area and the Chino Airport Influence Area. The Specific Plan discusses compliance with the ALUCP requirements for the Ontario Airport and the Chino Airport in Chapter 2, Section 2.2, Airport Influence Areas.*

## 7.2 Community Design Element

**GOAL CD1: A dynamic, progressive city containing distinct neighborhoods and commercial districts that foster a positive sense of identity and belonging among residents, visitors, and businesses.**

### Policy CD1-2 Growth Areas

We require development in growth areas to be distinctive and unique places within which there are cohesive design themes.

*The Specific Plan design guidelines (Chapter 5, Design Guidelines) and development standards (Chapter 4, Land Use and Development Standards) ensure high quality, cohesive, attractive, and appropriately-scaled development that complements and integrates into the Ontario Ranch community and adds value to the City.*

**GOAL CD2: A high level of design quality resulting in public spaces, streetscapes, and developments that are attractive, safe, functional, and distinct.**

### Policy CD2-1 Quality Architecture

We encourage all developments to convey visual interest and character through:

- Building volume, massing, and height to provide appropriate scale and proportion;
- A true architectural style which is carried out in plan, section, and elevation through all aspects of the building and site design and appropriate for its setting;
- Exterior building materials that are visually interesting, high quality, durable, and appropriate for the architectural style.

*The Specific Plan design guidelines (Chapter 5) ensure that: 1) scale, massing, fenestration, materials, and colors are consistent with the building's architectural style and compatible with the overall design in the Specific Plan area; 2) articulation is provided through elements such as cornices, parapets, expression lines, and changes in materials and/or colors; 3) use of a variety of colors, materials, and/or textures on each building is appropriate to the architectural features or massing.*

### Policy CD2-5 Streetscapes

We design new and, when necessary, retrofit existing streets to improve walkability, bicycling and transit integration, strengthen connectivity, and enhance community identify through improvements to the public right-of-way such as sidewalks, street trees, parkways, curbs, street lighting, and street furniture.

*Chapter 3, Section 3.2, Street Plan, addresses connectivity, street improvements, pedestrian and bicycle plans, and transit. In Chapter 5, Section 5.3, Landscape Design, the Specific Plan identifies street improvements and streetscape including parkways, street trees, sidewalks, landscape buffers, and street lighting for Grove Avenue, Eucalyptus Avenue, Merrill Avenue, and Bon View Avenue within the Specific Plan area, which are consistent with the Circulation Element of The Ontario Plan. The Specific Plan streetscape design creates an aesthetically pleasing view for pedestrians, cyclists, and motorists, screens parking and loading areas from the public right-of-way, and visually integrates the development into the surrounding Ontario Ranch community.*

### Policy CD2-6 Connectivity

We promote development of local street patterns and pedestrian networks that create and unify neighborhoods, rather than divide them, and create cohesive and continuous corridors, rather than independent "islands".

*The Specific Plan creates an efficient street system by providing convenient connections with adjacent land uses in compliance with the vision of The Ontario Plan Circulation Element. The design of Specific Plan street sections (Chapter 3.2: Street Plan) and streetscape (Chapter 5.3, Landscape Design) provides road improvements including sidewalks, trails and bikeways to promote connectivity and supplement vehicular transportation.*

### Policy CD2-7 Sustainability

We collaborate with the development community to design and build neighborhoods, streetscapes, sites, outdoor spaces, landscaping and buildings to reduce energy demand through solar orientation, maximum use of natural daylight, passive solar and natural ventilation, building form, mechanical and structural systems, building materials and construction techniques.

*The Specific Plan is committed to sustainable design strategies that integrate principles of environmental stewardship into the design, construction, and operation process. The Specific Plan incorporates sustainability principles into its design guidelines (Chapter 5.8, Sustainable Design Strategies), such as drought tolerant landscaping, skylights in warehouse/distribution buildings to provide natural light and reduce lighting demand, high performance dual pane glazing in office storefronts, and LED products for energy efficient site lighting. Design strategies include the design and construction of energy efficient buildings to reduce air, water, and land pollution and environmental impacts from energy production and consumption. The use of recycled water to irrigate landscape is required by the Specific Plan's Recycled Water Plan (Chapter 3.4), consistent with the City of Ontario Recycled Water Master Plan.*

### Policy CD2-9 Landscape Design

We encourage durable landscaping materials and designs that enhance the aesthetics of structure, create and define public and private spaces, and provide shade and environmental benefits.

*Consistent with the vision for Ontario Ranch as outlined in the Ontario Ranch Streetscape Master Plan, the Specific Plan (Chapter 5.3, Landscape Design) provides for landscaped setbacks and landscaped parkways adjacent to bike lanes and sidewalks, defining these public spaces. The landscaped setbacks and parkways include drought-tolerant plants featuring colorful shrubs and groundcovers, ornamental grasses and*

*succulents, evergreen and deciduous trees, and species native to Southern California or naturalized to the arid climate to promote durable plant materials. The plant selection complements the design theme of the Specific Plan area. Parking lot landscaping reduces associated heat buildup, improves aesthetics, and integrates into onsite landscape design and adjacent streetscapes. Swaled landscape areas retain/infiltrate stormwater run-off to improve water quality and promote groundwater recharge. Shade trees thoughtfully located near expanses of paving, building walls, roofs, and windows reduce the impacts of heat gain.*

### Policy CD2-11 Entry Statements

We encourage the inclusion of amenities, signage, and landscaping at the entry to neighborhoods, commercial centers, mixed use areas, industrial developments, and public places that reinforce them as uniquely identifiable places.

*The Specific Plan establishes design guidelines to ensure high-quality development and a sense of place. As discussed in Chapter 5.3, Landscape Design, Grove, Eucalyptus, Merrill and Bon View Avenues feature landscaped setbacks that provide attractive entries into the site. Entry monument signage is predominantly placed to identify the South Ontario Logistics Center.*

### Policy CD2-12 Site and Building Signage

We encourage the use of sign programs that utilize complementary materials, colors, and themes. Project signage should be designed to effectively communicate and direct users to various aspects of the development and complement the character of the structure.

*The Specific Plan (Chapter 5.7, Signage) requires approval of a comprehensive sign program to address parcel identification, building identification and directional signage within the Specific Plan area. A comprehensive sign program will integrate project signage with the overall design of the site and structures to create a unified visual statement. A comprehensive sign program provides flexible application of sign regulations to provide incentive and latitude in the design and display of multiple signs. Industrial uses on the site will also be appropriately signed to give direction to loading and receiving, visitor parking, and other special uses.*

| | |
|---|---|
| **GOAL CD3:** | **Vibrant urban environments that are organized around intense buildings, pedestrian and transit areas, public plazas, and linkages between and within developments that are conveniently located, visually appealing, and safe during all hours.** |

### Policy CD3-1 Design

We require that pedestrian, vehicular, bicycle, and equestrian circulation on both public and private property be coordinated and designed to maximize safety, comfort, and aesthetics.

*The Specific Plan (Chapter 3.2, Street Plan) coordinates street, sidewalk, trail, and bikeway designs to serve onsite land uses and extend access to the surrounding area in compliance with The Ontario Plan Mobility Element. The Specific Plan specifies street improvements for Grove Avenue, Eucalyptus Avenue, Merrill Avenue, and Bon View Avenue. The Specific Plan streetscape design (Chapter 5.3, Landscape Design) provides an aesthetically pleasing view for pedestrians, cyclists, and motorists, screens parking and loading areas from the public right-of-way, and integrates the development into the surrounding community.*

### Policy CD3-5 Paving

We require sidewalks and road surfaces to be of a type and quality that contributes to the appearance and utility of streets and public places.

*The Specific Plan development standards (Chapter 4, Land Use and Development Standards) require that design and materials for sidewalks and road surfaces within the Specific Plan area be approved by the City's Engineering Department. Specific Plan design guidelines (Chapter 5) encourage the use of enhanced paving to mark major building entries and paving materials that possess a high level of solar reflectivity to reduce the heat island effect.*

## GOAL CD5: A sustained level of maintenance and improvement of properties, buildings and infrastructure that protects the property values and encourages additional public and private investment.

### Policy CD5-1 Maintenance of Buildings and Property

We require all public and privately owned buildings and property (including trails and easements) to be properly and consistency maintained.

*The Specific Plan includes a Maintenance Responsibility Matrix in Chapter 6, Implementation, identifying the parties responsible for maintenance of roadways, parkways, trails, sidewalks, common areas, walls and monuments, infrastructure, and utilities within the Specific Plan area. Privately owned buildings will be maintained as specified by the Property Owners Association (Chapter 6.11.2).*

### Policy CD5-2 Maintenance of Infrastructure

We require the continued maintenance of infrastructure.

*The Specific Plan includes a Maintenance Responsibility Matrix in Chapter 6, Implementation, identifying the parties responsible for maintenance of roadways, parkways, trails, sidewalks, common areas, walls and monuments, infrastructure, and utilities within the Specific Plan area.*

## 7.3 Mobility Element

**GOAL M1: A system of roadways that meets the mobility needs of a dynamic and prosperous Ontario.**

### Policy M1-1 Roadway Design and Maintenance

We require our roadways to:

- Comply with federal, state, and local design and safety standards.
- Meet the needs of multiple transportation modes and users.
- Handle the capacity envisioned in the Functional Roadway Classification Plan.
- Endeavour to maintain a peak hour Level of Service (LOS) E or better at all intersections.
- Be compatible with the streetscape and surrounding land uses.
- Be maintained in accordance with best practices and our Right-of-Way Management Plan

*The Specific Plan complies with the Functional Roadway Classification Plan of the Mobility Element and, therefore, aims to comply with federal, state, and local design and safety standards; meet the needs of multiple transportation modes and users; and maintain a Level of Service of E or better at all intersections addressed in the project environmental impact report. The Specific Plan site design strives to minimize the effects of truck traffic on nearby uses.*

### Policy M1-2 Mitigation of Impacts

We require development to mitigate its traffic impact.

*The Specific Plan requires in Chapter 1.6, California Environmental Quality Act Compliance, and in Chapter 6.4.4, Consistency with CEQA, that projects within the Specific Plan area comply with all mitigation measures, conditions, and project design features identified in the project environmental impact report. Chapter 5.1, Site Design, provides guidelines to ensure buildings, structures, and loading facilities are designed so loading and unloading activities occur on-site without extending beyond the property line.*

**GOAL M2: A system of trails and corridors that facilitate and encourage bicycling and walking.**

### Policy M2-1 Bikeway Plan

We maintain our Multipurpose Trails & Bikeway Corridor Plan to create a comprehensive system of on- and off-street bikeways that connect residential areas, businesses, schools, parks, and other key destination points.

*The Specific Plan includes a Circulation Plan in Chapter 3 to provide connectivity to the trails and bikeway corridors identified in the Ontario Multipurpose Trails and Bikeway Corridor Plan, including installation of a Class II Bikeway along Merrill Avenue and multipurpose trails along Grove, Eucalyptus, and Merrill Avenues.*

### Policy M2-3 Pedestrian Walkways

We require walkways that promote safe and convenient travel between residential areas, businesses, schools, parks, recreation areas, and other key destination points.

*The Specific Plan street sections and streetscape designs (Chapter 3.2, Street Plan and Chapter 5.3, Landscape Design) provide for construction of five-foot wide public pedestrian sidewalks for Grove Avenue, Eucalyptus Avenue, Merrill Avenue, and Bon View Avenue to connect with existing and planned pedestrian circulation systems. Pedestrian sidewalks are separated from vehicular travel lanes by a landscaped parkway. The Specific Plan area street improvements are consistent with the City's Ontario Ranch Streetscape Master Plan.*

**GOAL M3: A public transit system that is a viable alternative to automobile travel and meets basic transportation needs of the transit dependent.**

### Policy M3-2 Transit Facilities at New Development

We require new development to provide transit facilities, such as bus shelters, transit bays and turnouts, as necessary.

*The Specific Plan discusses in Chapter 3.2.11, Transit, that the City is coordinating with regional transit agencies to implement Bus Rapid Transit (BRT) service to target destinations and along corridors.*

**GOAL M4: An efficient flow of goods through the City that maximizes economic benefits and minimizes negative impacts.**

### Policy M4-1 Truck Routes

We designate and maintain a network of City truck routes that provide for the effective transport of goods while minimizing negative impacts on local circulation and noise-sensitive land uses, as shown in the Truck Routes Plan.

*The Specific Plan is designed to enable easy access to the truck route network and to encourage its industrial users to implement effective goods movement strategies. The Land Use and Circulation Plans for the Specific Plan area (Chapter 3, Development Plan) are designed to focus trucks on the designated Merrill Avenue truck route. The design guidelines in Chapter 5.1, Site Design, stipulate buildings, structures, and loading facilities be designed to ensure that loading and unloading activities and maneuvering of freight vehicles occurs on-site without extending beyond the property line.*

## 7.4 Environmental Resources Element

**GOAL ER1: A reliable and cost effective system that permits the City to manage its diverse water resources and needs.**

### Policy ER1-3 Conservation

We require conservation strategies that reduce water usage.

*The Specific Plan incorporates water conservation strategies into its development plan and design guidelines. The use of recycled water to irrigate landscape areas is required consistent with the City of Ontario Recycled Water Master Plan (Chapter 3, Development Plan). Landscape and irrigation plans are encouraged to use water conservation features such as drought-tolerant plant species native or adapted to the region and drip irrigation (Chapter 5, Design Guidelines). The Specific Plan encourages the design and construction of energy efficient buildings to reduce air, water, and land pollution and environmental impacts from energy production and consumption.*

### Policy ER1-5 Groundwater Management

We protect groundwater quality by incorporating strategies that prevent pollution, require remediation where necessary, capture and treat urban run-off, and recharge the aquifer.

*In Chapter 3.8, Storm Drainage Plans, the Specific Plan stipulates that prior to issuance of grading or construction permits, a Storm Water Pollution Prevention Plan (SWPPP) be prepared and approved by the City. The SWPPP will identify and detail appropriate Best Management Practices (BMPs) to prevent pollutant discharge into storm drain systems and natural drainages and aquifers. In addition to the preparation of a SWPPP, a WQMP will be prepared and approved that will enforce long-term BMPs to prevent pollutant discharges into storm drain systems for the life of the project. Chapter 5.8.2, Water Quality, requires the provision of on-site landscape swales to collect and treat stormwater run-off.*

### Policy ER1-6 Urban Run-off Quantity

We encourage the use of low impact development strategies to intercept run-off, slow the discharge rate, increase infiltration, and ultimately reduce discharge volumes to traditional storm drain systems.

*The Specific Plan (Chapter 3.8, Storm Drainage Plan) incorporates low impact development strategies including landscape designs that promote water retention; permeable surface designs in parking lots and areas with low traffic; parking lots that drain to landscaped areas to provide treatment, retention, or infiltration; and limited soil compaction during grading.*

### Policy ER1-7 Urban Run-off Quality

We require the control and management of urban run-off, consistent with Regional Water Quality Control Board regulations.

*In Chapter 3.8, Storm Drainage Plan, the Specific Plan specifies that prior to issuance of grading or construction permits, a Water Quality Management Plan (WQMP) is required to minimize stormwater runoff and provide on-site opportunities for groundwater recharge integrated into project design and amenities. The grading and drainage of the Specific Plan area will be designed to retain/infilter, harvest & re-use or biotreat surface runoff to comply with the current requirements of the San Bernardino County NPDES Stormwater Program's WQMP for significant new development projects.*

### Policy ER1-8 Wastewater Management

We require the management of wastewater discharge and collection consistent with waste discharge requirements adopted by the Regional Water Quality Control Board.

*In Chapter 3.5, Sewer Plan, the Specific Plan provides for design of a wastewater system consistent with City and Regional Water Quality Control Board requirements. The Specific Plan includes a network of new public sewer mains consistent with the City of Ontario's Ultimate Sewer System Plan.*

| | |
|---|---|
| **GOAL ER3:** | **Cost-effective and reliable energy system sustained through a combination of low impact building, site and neighborhood energy conservation and diverse sources of energy generation that collectively helps to minimize the region's carbon footprint.** |

### Policy ER3-1 Conservation Strategy

We require conservation as the first strategy to be employed to meet applicable energy-saving standards.

*The Specific Plan incorporates energy-saving conservation strategies into its design guidelines (Chapter 5) by addressing lighting, bicycle parking, sustainable landscaping, and energy efficiency. Sustainable design strategies (Chapter 5.8) include design and construction of energy efficient buildings to reduce air, water, and land pollution and environmental impacts from energy production and consumption.*

### Policy ER3-3 Building and Site Design

We require new construction to incorporate energy efficient building and site design strategies, which could include appropriate solar orientation, maximum use of natural daylight, passive solar and natural ventilation.

*The Specific Plan's Sustainable Design Strategies (Chapter 5.8) include the use of passive design to improve building energy performance through skylights, building orientation, landscaping, and use of select colors.*

**GOAL ER4: Improved indoor and outdoor air quality and reduced locally generated pollutant emissions.**

Policy ER4-4 Indoor Air Quality

We comply with State Green Building Codes relative to indoor air quality.

*The Specific Plan requires development projects in the Specific Plan area to comply with the State of California Building Code as adopted and implemented by the City. The Specific Plan's Sustainable Design Strategies (Chapter 5.8) include the design and construction of energy efficient buildings to reduce air, water, and land pollution.*

**GOAL ER5: Protected high value habitat and farming and mineral resources extraction activities that are compatible with adjacent development.**

Policy ER5-2 Entitlement and Permitting Process

We comply with state and federal regulations regarding protected species.

*The Specific Plan acknowledges that development projects within the Specific Plan area shall comply with the mitigation measures of the project environmental impact report.*

## 7.5 Safety Element

***7.5.1***

**GOAL S1: Minimized risk of injury, loss of life, property damage and economic and social disruption caused by earthquake-induced and other geologic hazards.**

Policy S1-1 Implementation of Regulations and Standards

We require that all new habitable structures be designed in accordance with the most recent California Building Code adopted by the City, including provisions regarding lateral forces and grading.

*The Specific Plan requires development projects to comply with the State of California Building Code as adopted and implemented by the City.*

### Policy S1-2 Entitlement and Permitting Process

We follow state guidelines and the California Building Code to determine when development proposals must conduct geotechnical and geological investigations.

*The Specific Plan acknowledges that projects within the Specific Plan area shall comply with state guidelines and the California Building Code. Research of available maps indicates that the Specific Plan site is not located within an Alquist-Priolo Earthquake Fault Zone. Furthermore, there was no visible evidence of faulting during geotechnical investigation.*

## GOAL S2: Minimized risk of injury, loss of life, property damage and economic and social disruption caused by flooding and inundation hazards.

### Policy S2-1 Entitlement and Permitting Process

We follow State guidelines and building code to determine when development proposals require hydrological studies prepared by a State-certified engineer to assess the impact that the new development will have on the flooding potential of existing development down-gradient.

*The Specific Plan acknowledges that projects within the Specific Plan area shall comply with applicable mitigation measures of the project environmental impact report, state guidelines, and the California Building Code regarding flooding and inundation hazards.*

## GOAL S3: Reduced risk of death, injury, property damage and economic loss due to fires, accidents and normal everyday occurrences through prompt and capable emergency response.

### Policy S3-8 Fire Prevention through Environmental Design

We require new development to incorporate fire prevention consideration in the design of streetscapes, sites, open spaces and buildings.

*The Specific Plan acknowledges that projects within the Specific Plan area shall comply with the City's development review process, which provides for review by the City's Fire Department and potential redesign to incorporate fire prevention design elements within streetscapes, sites, open spaces, and buildings.*

**GOAL S4: An environment where noise does not adversely affect the public's health, safety, and welfare.**

Policy S4-1 Noise Mitigation

We utilize the City's Noise Ordinance, building codes and subdivision and development codes to mitigate noise impacts.

*The Specific Plan acknowledges that projects within the Specific Plan area shall comply with mitigation measures of the project environmental impact report, the City's noise ordinance, subdivision and development codes, and the California Building Code to mitigate noise impacts.*

**GOAL S5: Reduced risk of injury, property damage and economic loss resulting from windstorms and wind-related hazards.**

Policy S5-2 Dust Control Measures

We require the implementation of Best Management Practices for dust control at all excavation and grading projects.

*The Specific Plan acknowledges that projects within the Specific Plan area shall comply with mitigation measures of the project environmental impact report, the construction management plan, and subdivision and development codes regarding dust control.*

**GOAL S6: Reduced potential for hazardous materials exposure and contamination.**

Policy S6-9 Remediation of Methane

We require development to assess and mitigate the presence of methane, per regulatory standards and guidelines.

*The Specific Plan acknowledges that projects within the Specific Plan area shall comply with mitigation measures of the project environmental impact report.*

| GOAL S7: | **Neighborhoods and commercial and industrial districts that are kept safe through a multi-faceted approach of prevention, suppression, community involvement, and a system of continuous monitoring.** |
|---|---|

Policy S7-4 Crime Prevention through Environmental Design (CPTED)

We require new development to incorporate CPTED in the design of streetscapes, sites, open spaces and buildings.

*The Specific Plan acknowledges that projects within the Specific Plan area shall comply with the City's development review process, which provides for review by the City's Police Department and potential redesign to incorporate crime prevention design elements in streetscapes, sites, open spaces, and buildings. Parcel lighting (Chapter 5.6, Lighting) addresses illumination of parking lots, loading dock areas, pedestrian walkways, building entrances, signage, and architectural and landscape features. A key provision includes the installation of ground or low mounted fixtures to provide for safety and convenience along pedestrian walkways, entrances, activity areas, steps, ramps, and special features. Chapter 5.1, Site Design, also encourages delineation of pedestrian access to on-site buildings from adjacent streets and parking areas by marking building entrances with signage, prominent architectural features, and/or landscaping features.*

## 7.6 Community Economics Element

| GOAL CE1: | **A complete community that provides for all incomes and stages of life.** |
|---|---|

Policy CE1-1 Jobs-Housing Balance

We pursue improvement to the Inland Empire's balance between jobs and housing by promoting job growth that reduces the regional economy's reliance on out-commuting.

*The Specific Plan anticipates the creation of jobs in warehousing, logistics, light manufacturing, and administration within the Specific Plan area, which helps improve the region's jobs-housing balance. Actual job creation depends on the type of land uses ultimately developed on the site as a wide-range of commercial, office, and industrial uses are permitted in the Specific Plan. The Land Use Plan (Chapter 3.1)*

*implements the vision of The Ontario Plan by providing opportunities for employment in manufacturing, distribution, research and development, service, and supporting retail at intensities designed to meet the demand of current and future market conditions.*

### Policy CE1-5 Business Attraction

We proactively attract new and expanding businesses to Ontario in order to increase the City's share of growing sectors of the regional and global economy.

*In Chapter 3.1, Land Use Plan, the Specific Plan provides for the construction of over 3.1 million square feet of business park and industrial development in compliance with City and regional planning goals and strategies that facilitate goods movement throughout the SCAG region.*

## GOAL CE2: A City of distinctive neighborhoods, districts, and corridors, where people choose to be.

### Policy CE2-1 Development Projects

We require new development and redevelopment to create unique, high-quality places that add value to the community.

*The Specific Plan contains design guidelines in Chapter 5 to guide future development consistent with the vision for Ontario Ranch. The guidelines ensure high quality, cohesive and attractive development that complements and integrates into the community and adds value to the City. The Specific Plan also establishes landscape setbacks along the roadways within the Specific Plan area to create safe and attractive streets for pedestrians, cyclists, and motorists.*

### Policy CE2-2 Development Review

We require those proposing new development and redevelopment to demonstrate how their projects will create appropriately unique, functional and sustainable places that will compete well with their competition within the region.

*The Specific Plan establishes a land use plan (Chapter 3.1) and design guidelines (Chapter 5) addressing site design, building design, and landscape design that ensure high-quality, functional and sustainable development that is regionally competitive and appropriate for the Ontario Ranch community.*

### Policy CE2-5 Private Maintenance

We require adequate maintenance, upkeep, and investment in private property because proper maintenance on private property protects property values.

*The Specific Plan includes a Maintenance Responsibility Matrix (Chapter 6.11) identifying the public, private, or utility providers responsible for maintenance of roadways, parkways, trails, sidewalks, common areas, walls and monuments, infrastructure, and utilities within the Specific Plan area. A Property Owners Association will be established for the maintenance of on-site common areas, including such improvements as landscape areas and drive aisles.*

### Policy CE2-6 Public Maintenance

We require the establishment and operation of maintenance districts or other vehicles to fund the long-term operation and maintenance of the public realm whether on private land, in rights-of-way, or on publicly-owned property.

*The Specific Plan includes a Maintenance Responsibility Matrix (Chapter 6.11) identifying the public, private, or utility providers responsible for maintenance of roadways, parkways, trails, sidewalks, common areas, walls and monuments, infrastructure, and utilities within the Specific Plan area. Right-of-way for public streets and infrastructure improvements within the Specific Plan area shall be dedicated to the City of Ontario for maintenance purposes. Landscape improvements and public streetlights within the public right-of-way shall be maintained through a landscape and lighting district or other special maintenance district established by the City. Dry utilities such as electricity, natural gas, and communication systems will be maintained by the appropriate utility company.*

| *CITY OF ONTARIO*<br>*Agenda Report*<br>**March 15, 2022** | **SECTION:**<br>**CONSENT CALENDAR** |
|---|---|
| Department: Police Department<br>Prepared By: Nicole Alvarez<br>Staff Member Presenting:<br>Mike Lorenz, Chief of Police<br>Approved By: | Submitted To: Council/OHA<br>Approved: _____<br>Continued To: _____<br>Denied: _____<br>Item No: 13 |

**SUBJECT:** **AMENDMENT TO AN ARCHITECTURAL SERVICES AGREEMENT WITH HOLT ARCHITECTS, INC. FOR THE POLICE DEPARTMENT HEADQUARTERS IMPROVEMENT PROJECT**

**RECOMMENDATION:** That the City Council authorize the City Manager to execute an amendment to the existing Architectural Services Agreement with Holt Architects, Inc. of Riverside California for the Police Department Headquarters Improvement Project in the amount of $91,436 for a total contract value of $230,822. The Architectural Services Agreement and proposed amendment are on file with the Records Management Department.

**THE FOLLOWING COUNCIL GOALS ARE BEING ACHIEVED:**
**Maintain the Current High Level of Public Safety**
**Operate in a Businesslike Manner**

**FISCAL IMPACT:** Appropriation for this contract are included in the Fiscal Year 2021-22 budget in the Capital Improvement Projects fund. The proposed Amendment in the amount of $91,436 will increase the current total not-to exceed authorization to $230,822.

**BACKGROUND & ANALYSIS:** An on On-Call Architectural Services Agreement was awarded to Holt Architects, Inc. in January 2020 for work on the Police Department Headquarters Improvement Project. After initial site plans and design drawings were prepared, Staff determined that the project scope should be expanded to include revised inspection and design services to incorporate required ADA improvements.

| *CITY OF ONTARIO*<br>*Agenda Report*<br>**March 15, 2022** | **SECTION:**<br>**CONSENT CALENDAR** |
|---|---|
| Department: Management Services<br>Prepared By: Brandi Belmontes<br>Staff Member Presenting:<br>Darlene M. Sanchez, Assistant City Manager<br>Approved By: | Submitted To: Council/OHA<br>Approved: _____<br>Continued To: _____<br>Denied: _____<br>Item No: 14 |

**SUBJECT:** **REQUEST BY FOGLESONG TOWING & STORAGE INC. FOR THE ONTARIO CITY COUNCIL'S CONSENT TO TRANSFER ITS TOWING CONTRACT TO BENDITO CIELO, INC.**

**RECOMMENDATION:** Staff recommends approval of the request to transfer the towing contract.

**THE FOLLOWING COUNCIL GOALS ARE BEING ACHIEVED:**
**Maintain the Current High Level of Public Safety**
**Operate in a Businesslike Manner**

**FISCAL IMPACT:** Staff does not anticipate that the results of this transfer will have a fiscal impact on the City.

**BACKGROUND & ANALYSIS:** Five tow companies operate in the City pursuant to the City Contract Towing Service Agreements ("Contracts") which expire on November 16, 2025. The contracted tow companies are Certified Towing, Inc.; Foglesong Towing & Storage, Inc.; Pepe's Towing Service; Dietz Towing, Inc., and Fleet Sales & Consulting, Inc. dba Bill & Wag's Towing.

On November 16, 2021, Foglesong Towing sent a letter requesting that the City Council approve the transfer of Foglesong's Contract to Bendito Cielo, Inc., in accordance with Ontario Municipal Code section 4-19.16. That section states:

> A towing carrier shall not sell, transfer, lease, assign, sublet, mortgage or dispose of in whole or in part, either by forced or involuntary sale, or by ordinary sale, contract, consolidation or otherwise, the permit or any rights or privileges therein granted, without the prior written consent of the City Council. The written request, a deposit of One Thousand Dollars ($1,000.00) and the proposed sale agreement or other document evidencing disposal of the tow truck business shall be submitted to the Administrative Services Agency at least one hundred-twenty (120) days before the requested transfer or assignment date.

In accordance with Ontario Municipal Code section 4-19.16, Foglesong provided a $1,000.00 deposit

and a copy of the relevant portions of the proposed Sale Agreement.

After receiving Foglesong's request, the Ontario Police Department conducted an investigation based upon the submission of requested information from the proposed transferee Bendito Cielo, Inc., as well as a review of public documents, and an inspection of the Foglesong facilities. The Police Department has determined that Bendito Cielo, Inc. meets the minimum requirements of the Ontario Municipal Code for operation under an approved contract. Laura Acosta is the owner of Bendito Cielo, Inc.. As part of the information submitted to the City, Ms. Acosta detailed her experience working in the towing industry, including her work for Pepe's Towing Service. Pepe's Towing Service is one of the five tow companies under Contract to the City. Ms. Acosta's father is a principal owner of Pepe's Towing Service.

It is anticipated that this relationship be a source of concern for the other permitted tow companies. That said, however, in applying the relevant criteria governing these Contracts and in consideration of the information provided granting the transfer, the request is appropriate. Therefore, based on a review of the submitted documents and the inspection of the Site, Staff recommends that the City Council consent to the request of Foglesong to transfer its towing contract to Cielo Bendito, Inc.

| *CITY OF ONTARIO*<br>*Agenda Report*<br>**March 15, 2022** | **SECTION:**<br>**PUBLIC HEARINGS** |

| Department: Planning<br>Prepared By: Edmelynne V Hutter<br>Department: Planning<br>Prepared By: Rudy Zeledon<br>Staff Member Presenting:<br>Scott Murphy, Executive Director Community Development<br>Approved By: | Submitted To: Council/OHA<br>Approved: _____<br>Continued To: _____<br>Denied: _____<br>Item No: 15 |

**SUBJECT:** **A PUBLIC HEARING TO CONSIDER AN APPEAL OF THE PLANNING COMMISSION'S DECISION TO APPROVE THE USE OF AN ADDENDUM TO THE ONTARIO PLAN ENVIRONMENTAL IMPACT REPORT (STATE CLEARINGHOUSE NO. 2008101140), A TENATIVE PARCEL MAP NO. 20147 (FILE NO. PMTT21-010), SUBDIVIDING 95.35 ACRES OF LAND INTO THREE PARCELS, AND A DEVELOPMENT PLAN (FILE NO. PDEV21-018) TO CONSTRUCT TWO INDUSTRIAL BUILDINGS TOTALING 168,722 SQUARE FEET ON 13.07 ACRES OF LAND GENERALLY LOCATED AT THE SOUTHEAST CORNER OF JURUPA STREET AND MILLIKEN AVENUE, AT 1425 SOUTH TOYOTA WAY, WITHIN THE INDUSTRIAL MIXED USE AND WAREHOUSE/DISTRIBUTION LAND USE DISTRICTS OF THE TOYOTA ONTARIO BUSINESS PARK SPECIFIC PLAN (APN: 0238-121-75).**

**RECOMMENDATION:** That the City Council consider and adopt the Resolutions upholding the Planning Commission's approval of the use of an Addendum to The Ontario Plan Environmental Impact Report (State Clearinghouse No. 2008101140), Tentative Parcel Map No. 20147 (File No. PMTT21-010) and Development Plan (File No. PDEV21-018), and deny the appeal.

**THE FOLLOWING COUNCIL GOALS ARE BEING ACHIEVED:**
**Invest in the Growth and Evolution of the City's Economy**
**Operate in a Businesslike Manner**
**Focus Resources in Ontario's Commercial and Residential Neighborhoods**

**FISCAL IMPACT:** The proposed Tentative Parcel Map and Development Plan will facilitate the development of two industrial buildings totaling 168,722 square feet. This will result in a one-time payment to the City for permitting and plan check fees, development impact fees, as well as an increase in on-going property tax revenues for the City.

**BACKGROUND & ANALYSIS:** On May 10, 2021, the Applicant, MIG, Inc., submitted Tentative Parcel Map (File No. PMTT21-010) and Development Plan (File No. PDEV21-018) applications requesting approval to subdivide 95.35 acres of land into three parcels for the construction of two industrial

buildings totaling 168,772 square feet. The project is proposed on 13.07 acres of land generally located at the southeast corner of Jurupa Street and Milliken Avenue, at 1425 South Toyota Way, within the Industrial Mixed Use and Warehouse/Distribution land use districts of the Toyota Ontario Business Park Specific Plan. The full project description is provided in the December 20, 2021, Planning Commission Agenda Report for the subject project.

On December 20, 2021, the Development Advisory Board conducted a hearing to consider the application and recommended that the Planning Commission approve the project subject to conditions. On December 20, 2021, the Planning Commission conducted a public hearing to consider the subject applications and the Development Advisory Board's recommendation. Following a presentation of Staff's finding and after receipt of all public correspondence and testimony, the Planning Commission addressed the applications and unanimously voted (6-0) to adopt Resolution Nos. PC21-086, PC21-087, and PC21-088, approving the use of an Addendum to The Ontario Plan Environmental Impact Report (State Clearinghouse No. 2008101140), the Tentative Parcel Map and the Development Plan, respectively.

Prior to any public hearing on this project, the Planning Department mailed project notices to all property owners within 300 feet of the project site on December 10, 2021. These notices provided a detailed description of the project and provided contact information for directing questions and comments. In addition, the Appellant, Supporters Alliance for Environmental Responsibility, were notified by email on December 17, 2021, of the public hearing.

**APPEAL:** On December 30, 2021, the Appellant submitted an appeal of the Planning Commission's decision to approve File Nos. PMTT21-010 and PDEV21-018, and the use of an Addendum to The Ontario Plan Environmental Impact Report. A copy of the Appeal application and Appellant statement is included as Exhibit "A" of this report.

The basis of the Appellant's appeal is a statement that the Addendum to The Ontario Plan Environmental Impact Report prepared for the Project fails to comply with the California Environmental Quality Act. However, the Appellant has failed to provide any facts or reasons to support their assertion that the Project Addendum fails to comply with the California Environmental Quality Act.

The Ontario Development Code clearly outlines the requirements for an appeal. Section 2.01.010.B.1 states that an appeal shall include a statement identifying the specific action or decision of the Approving Authority that is being appealed, the specific grounds for the appeal, and the relief requested from the Appeal Authority. The Appellant has failed to provide specific grounds for the appeal, and the relief requested from the Appeal Authority. In addition, Section 2.01.010.B.2. stipulates that an appeal of an action or decision by the Approving Authority shall be limited to those matters raised during the hearing and contained in the appeal statement. The Appellant failed to raise their concerns during the public hearing or to provided written notice of their concerns prior to the public hearing. As a result, the Appellant failed to exhaust their legal remedy, as prescribed in Ontario Development Code Division 2.04 (Appeals), Section 2.04.010. Furthermore, Section 2.04.010.B.2 states that the Appeal Authority is not permitted to consider any matter that was not previously raised during the hearing before the Approving Authority and contained in the appeal statement.

**CONCLUSION:** Staff recommends that the City Council consider all public testimony on the appeal and uphold the Planning Commission's decision to approve the use of an Addendum to The Ontario Plan Environmental Impact Report (State Clearinghouse No. 2008101140) and approve the Tentative Parcel Map (File No. PMTT21-010) and Development Plan (File No. PDEV21-018) applications, and deny the appeal.

**Subject:** Appeal of PDEV21-018 / PMTT21-010

Good morning,

Attached please find an appeal of the Planning Commission's approval of Tentative Parcel Map No. 20147, File No. PMTT21-010, and Development Plan No. PDEV21-018 (Toyota Industrial Buildings), submitted on behalf of Supporters Alliance for Environmental Responsibility ("SAFER").

Please note that we attempted to file a hard copy of this appeal, along with a check containing the appeal fee, with the Planning Department this morning, but found that the department was closed.

Therefore, we will file the hard copy and appeal fee on Monday when the City reopens.

Best regards,
Molly

CITY OF ONTARIO PLANNING DEPARTMENT

# *Appeal Application Form*

303 East B Street, Ontario, California 91764 Phone: 909.395.2036 / Fax: 909.395.2420

Dear Applicant:

In an effort to improve customer service and ensure development projects are processed as quickly as possible, the Planning Department finds it necessary to remind its clients that complete application submittals are crucial to the plan review process. In the past, accepting incomplete applications has led to errors and time delays at the end of the review process. I do not want this to happen to you.

Consequently, the Planning Department staff will only accept complete applications at time of submittal. All items listed on the enclosed application form must be provided before the Planning Department counter staff can accept your application for filing. Please review these minimum requirements prior to submitting your application, as counter staff do not have the authority to waive these requirements.

Please remember that failure to provide all of the required plans and information will result in significant time delays in the processing of your application. If you have any questions regarding the necessity of any particular item requested on the application form, please feel free to contact the Planning Department counter supervisor to discuss your questions.

The Planning Department looks forward to a continued efficient and professional relationship with you in the future. If you have any questions, comments, or concerns regarding this matter, please feel free to contact the Planning Department at (909) 395-2036.

Respectfully,

Rudy Zeledon
Planning Director

***ATTENTION!***

The City of Ontario strives to provide you with efficient and effective service in a businesslike manner. We are committed to the principle that every interaction you have with the City must be based on honesty and integrity.

City employees are prohibited by law from soliciting or accepting money, services, or gifts of any kind in connection with the discharge of their duties.

If you are approached or are aware of any violation of this policy, please immediately contact any of the following:

Scott Ochoa, City Manager .....(909) 395-2396 or sochoa@ontarioca.gov
Mike Lorenz, Police Chief ..... (909) 395-2710 or mlorenz@ontarioca.gov

# *Appeal Application Form*

303 East B Street, Ontario, California 91764 Phone: 909.395.2036 / Fax: 909.395.2420

*Instructions:*

1. *Pursuant to Ontario Development Code Division 2.04 (Appeals), any person having legal standing may appeal and action or decision to the Appeal Authority, including but not limited to an applicant, resident, business owner, or any person owning real property within the City, that is aggrieved by an interpretation, action, or decision made by any City agency or department, or by an Approving Authority.*

2. *Within 10 days following the action or decision being appealed, an appeal request must be filed with the Planning Department on an Appeal Application Form, along with the required filing fees. The appeal request must include a statement identifying the specific action or decision that is being appealed, the specific grounds for the appeal, and the relief requested from the Appeal Authority.*

3. *An appeal of an action or decision made by an Approving Authority following a hearing, is limited to those matters raised during the hearing and contained in an appeal statement. The Appeal Authority cannot consider any matter that was not raised during the hearing before the Approving Authority and contained in the appeal statement.*

4. *The Appeal Authority that will hear the appeal request is limited to taking testimony and making its decision based solely on the specific grounds specified by the appellant in the Appeal Application Form, insofar as they make an adequate claim pursuant to Ontario Development Code Section 2.04.010. When the decision of an Approving Authority*

## *SUBJECT OF APPEAL*

This application is hereby filed pursuant to Ontario Development Code Division 2.04 (Appeals), appealing a decision or action of the following Authority:

☐ Department/Agency Head ☐ Development Advisory Board ☐ Zoning Administrator

☐ Historic Preservation Subcommittee ☐ Historic Preservation Commission ☒ Planning Commission

Project File No(s).: PDEV21-018 / PMTT21-010 Date of Action/Decision: December 20, 2021

The application being appealed requests the following *(attach additional sheets as necessary)*:

This form constitutes an appeal of the Planning Commission's decisions to approve Tentative Parcel Map No. 20147, File No. PMTT21-010, and Development Plan No. PDEV21-018 ("Project"), and to adopt the Addendum to The Ontario Plan Environmental Impact Report prepared for the Project.

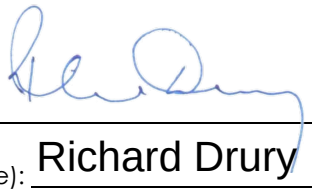
List the specific action(s) or decision(s) that is/are being appealed (attach additional sheets as necessary):

1. Approval of Tentative Parcel Map No. 20147, File No. PMTT21-010
2. Approval of the Development Plan, File No. PDEV21-018
3. Adoption of the Addendum to The Ontario Plan Environmental Impact Report prepared for the Project.

## *APPEAL STATEMENT*

Please check the box that best describes your reason(s) for the appeal:

- ☒ Abuse of discretion.
- ☐ Decision was not supported by the record.
- ☐ Abuse of discretion and decision was not supported by the record.



State the specific grounds for the appeal and the relief requested (please be specific and attach additional sheets if necessary):

The Addendum to The Ontario Plan Environmental Impact Report ("Addendum") prepared for project known as PDEV21-018 / PMTT21-010 ("Project") fails to comply with the California Environmental Quality Act ("CEQA"). Therefore, the City of Ontario ("City") must prepare an Environmental Impact Report ("EIR") for the Project.

## *APPELLANT ACKNOWLEDGEMENT*

I, the undersigned, hereby certify that the statements and information provided in this **Appeal Application Form,** and in any attached exhibits, present the data and information required for this application to the best of my ability, and that the facts, statements and information presented are true and correct to the best of my knowledge and belief.

Date: 12/29/2021

CITY OF ONTARIO PLANNING DEPARTMENT

# PLANNING COMMISSION STAFF REPORT

**December 20, 2021**

303 East B Street, Ontario, California 91764 Phone: 909.395.2036 / Fax: 909.395.2420

**FILE NOS:** PMTT21-010 and PDEV21-018

**SUBJECT:** A Tentative Parcel Map (TPM 20147)(File No. PMTT21-010) to subdivide 95.35 acres of land into three parcels, in conjunction with a Development Plan (File No. PDEV21-018) to construct two industrial buildings totaling 168,772 square feet on 13.07 acres of land located at the southeast corner of Jurupa Street and Milliken Avenue, at 1425 South Toyota Way, within the Industrial Mixed Use and Warehouse/Distribution land use districts of the Toyota Ontario Business Park Specific Plan; (APN: 0238-121-75) **submitted by MIG, Inc.**

**PROPERTY OWNER:** Toyota Motor Sales, U.S.A., Inc.

---

**RECOMMENDED ACTION:** That the Planning Commission take the following actions:

(1) Consider and adopt the resolution approving the use of an Addendum to The Ontario Plan Environmental Impact Report;

(2) Consider and adopt a resolution approving Tentative Parcel Map No. 20147, File No. PMTT21-010, subject to the conditions of approval contained in the attached departmental reports; and

(3) Consider and adopt a resolution approving the Development Plan, File No. PDEV21-018, subject to the conditions of approval contained in the attached departmental reports.

**PROJECT SETTING:** The project site is comprised of 95.35 acres of land located at 1425 South Toyota Way, within the Toyota Ontario Business Park Specific Plan zoning district, depicted in Figure 1: Project Location, right. The properties to the north and west of the Project site are within the Commercial/Food/Hotel and Light Industrial land use districts of the

California Commerce Center Specific Plan, and are improved with warehousing, light industrial, commercial, and retail developments. The properties to the south are within the Entratter Industrial Specific Plan and the IG (General Industrial) zoning district, are developed with warehouses. To the east of the Project site is the Interstate 15 freeway. The existing surrounding land uses, zoning, and general plan and specific plan land use designations are summarized in the "Surrounding Zoning & Land Uses" table located in the Technical Appendix of this report.

## PROJECT ANALYSIS:

(1) Background — The Toyota Ontario Business Park Specific Plan was established in 1993 by the City Council to govern the development of the Specific Plan area. Subsequently, the specific plan area was developed in 1994 with a warehouse and distribution facility for Toyota North American Parts that includes warehouse space, ancillary office, parking lot, a truck yard, landscaping, a private street (Toyota Way), and other associated site improvements. The northwest portion of the Specific Plan area, however, was left vacant and undeveloped.

On June 2, 2020, the City Council adopted 1) Resolution No. R2020-063 approving the use of an Addendum to The Ontario Plan Environmental Impact Report (State Clearinghouse No. 2008101140), which was certified by the Ontario City Council on January 27, 2010, and 2) Resolution No. R2020-064, approving a Specific Plan Amendment to the Toyota Ontario Business Park Specific Plan (File No. PSPA19-004) to allow Industrial Mixed-Use land uses and update the landscape palette to incorporate drought tolerant plant species.

On May 10, 2021, the Applicant submitted a Tentative Parcel Map and Development Plan applications requesting approval for the development and the construction of two industrial buildings with associated site improvements on the remaining vacant portion of the Project site.

(2) Addendum — The related Applications establish a project pursuant to the California Environmental Quality Act (Public Resources Code Section 21000 et seq.) ("CEQA") and an Initial Study/Addendum has been prepared to determine possible environmental impacts. Although the proposed project could have a significant effect on the environment, however all potentially significant effects have been analyzed adequately in an earlier Certified EIR, and have been avoided or mitigated pursuant to that earlier Certified EIR, including revisions or mitigation measures that are imposed on the proposed project, so nothing further is required. The Project will introduce no new significant environmental impacts beyond those previously analyzed in the Certified EIR, and all mitigation measures previously adopted by the Environmental Impact Report are a condition of project approval and are incorporated in the Initial Study/Addendum (see Attachment A—EIR Addendum, attached).

(3) Tentative Parcel Map No. 20147 (File No. PMTT21-010) — The Applicant is proposing to subdivide the 95.35-acre Project site into three numbered lots (see Exhibit B—Parcel Map and Exhibit C—Site Plan, both attached). Parcel 1 will be 81.67 acres in size and encompass the area already developed with the Toyota warehouse and distribution facility, Toyota Way (private street), and existing landscaped areas. Parcel 2 is the northwest parcel, occupying the corner of Milliken Avenue and Jurupa Street, and will be 8.24 acres in size. Parcel 3 is located to the south of Parcel 2 and located at the northeast corner of Milliken Avenue and Toyota Way, encompassing 3.79 acres of land. Parcels 2 and 3 comprise the existing vacant land in the northwest portion of the Project site. The lot sizes proposed by the tentative parcel map exceed the one-acre minimum lot size required by the Toyota Ontario Business Park Specific Plan.

(4) Development Plan (File No. PDEV21-018)

(a) Site Design/Building Layout — The Applicant is proposing to construct two industrial buildings and associated site improvements on the vacant portion of the Project site, at the northwest corner (see Exhibit C—Site Plan, attached) of the Specific Plan area. The subject area is triangular in shape and 13.07 acres in size. It is bounded by Jurupa Street to the north, Toyota Way to the south and east, and Milliken Avenue to the west. There is a City well site located on a separate parcel located along the Jurupa Street frontage, midway between the Milliken Avenue and Toyota Way intersections, and is not part of the Project site. No new development is proposed in the area south and east of Toyota Way, as this area is already developed with an 807,067-square-foot industrial building, including 48,929 square feet of office space.

The proposed Building A on Parcel 2 is the larger of the two new buildings, at a total of 118,067 square feet, including 10,000 square feet of ancillary office space. This building is rectangular in shape and is designed with main entrances on the northwest and northeast corners of the building. The parking lot areas surround this building on four sides, providing a total of 131 parking spaces. The truck yard area is located along the south elevation and provides 25 truck dock positions, which will be screened from public view and gated.

Proposed Building B on Parcel 3 is a 50,705-square-foot industrial building, with 5,000 square feet of office space. The office area is located at the northwest corner of the building. The parking lot areas are on the north, south, and west sides of the building, with a total of 63 parking spaces. This industrial building also provides eight truck dock positions, which are located on the north side of the building. Consistent with Building A, the truck yard for Building B will be gated and screened from public view.

(b) Site Access/Circulation — The Project site has existing access via Toyota Way, which is a private street that intersects with Milliken Avenue on the west and Jurupa Street to the north. The new industrial buildings will have access from new driveway approaches on Milliken Avenue and Toyota Way. Direct access from Jurupa Street is not proposed. The primary passenger vehicle and truck access is provided via a shared

driveway on Milliken Avenue, approximately 400 feet south of Jurupa Street. Secondary access is available at two locations along Toyota Way.

Internal circulation is provided by minimum 24-foot-wide drive aisles along the building perimeter. The truck yard for Building A has two gated access points, one each on the east and west ends of the yard. The truck yard for Building B has one access point, which is located at the west end of the yard, near the primary driveway approach on Milliken Avenue.

Pedestrian access paths that lead to the building entrances are at three locations on the Project site. Two paths are located along Milliken Avenue, and the third path is along Jurupa Street.

(c) Parking — The Project is required to provide 69 passenger vehicle parking spaces for Building A and 36 passenger vehicle parking spaces for Building B. The Project provides 131 vehicle parking spaces for Building A and 63 parking spaces for Building B, exceeding the passenger vehicle parking space requirements. Table 1 provides a parking summary for the Project.

***Table 1: Parking Summary***

| *Use & Required Parking Ratio* | *Building A* | | *Building B* | | *Total* | |
|---|---|---|---|---|---|---|
| | *Required* | *Provided* | *Required* | *Provided* | *Required* | *Provided* |
| **Warehouse** (one space / 1,000 SF <20,000 SF and one space / 2,000 SF ≥20,000 SF) | 69 | 131 | 36 | 63 | 105 | 194 |
| **Office** (4 spaces / 1,000 SF for portion of building in excess of 10% of GFA) | 0 | 0 | 0 | 0 | 0 | 0 |
| **Trailer Parking** (one trailer space / 4 dock-high loading doors/spaces) | 7 | 7 | 2 | 2 | 9 | 9 |

In addition to passenger vehicle parking spaces, the Project is required to provide truck-trailer parking spaces. The proposed site design provides the minimum number of truck-trailer parking spaces required for the Project.

(d) Architecture — The architectural design of the proposed buildings is based on the existing warehouse building design to present a cohesive architectural style among the three industrial buildings. The new buildings will be of concrete tilt-up construction with painted and scored accents. The building elevations will have variations in the glazing and paint color, which are proposed to be a color scheme of white with medium and gray accents, and blue trim (see Exhibit D—Exterior Elevations, attached). The building design also incorporates recessed primary entry doors, two story glazing, concrete trellis with metal fins, and variations in parapet height, all of which are designs that can be found on the existing warehouse building on the Project site.

(e) Landscaping — Landscaping is proposed along all street frontages, including Toyota Way, and will maintain the existing mature trees along Jurupa Street and Milliken Avenue. Areas that are not developed with structures, parking lot or other site amenity will be landscaped in accordance with City requirements. The Project is required to provide landscape areas over at least 15 percent of the lot area. The Project exceeds this requirement, with 29 percent landscape coverage on Parcel 2, where Building A is located, and 35 percent landscape coverage on Parcel 3, where Building B is located.

(f) Signage — Project signage is not proposed as part of this Project. As conditioned, signage shall be required to comply with the Ontario Development Code Division 8.1 (Sign Regulations).

(g) Utilities (drainage, sewer) — Public utilities (water and sewer) are available to serve the Project. Furthermore, the Applicant has submitted a Preliminary Water Quality Management Plan ("PWQMP"), which establishes the Project's compliance with storm water discharge/water quality requirements. The PWQMP includes site design measures that capture runoff and pollutant transport by minimizing impervious surfaces and maximizes low impact development ("LID") best management practices ("BMPs"), such as retention and infiltration, biotreatment, and evapotranspiration.

**COMPLIANCE WITH THE ONTARIO PLAN:** The proposed project is consistent with the principles, goals and policies contained within the Vision, Governance, Policy Plan (General Plan), and City Council Priorities components of The Ontario Plan (TOP). More specifically, the goals and policies of TOP that are furthered by the proposed project are as follows:

(1) City Council Goals.

- Invest in the Growth and Evolution of the City's Economy

(2) Vision.

**Distinctive Development:**

- Commercial and Residential Development

➢ Development quality that is broadly recognized as distinctive and not exclusively tied to the general suburban character typical of much of Southern California.

(3) Governance.

**Decision Making:**

- Goal G1: Sustained decision-making that consistently moves Ontario towards its Vision by using The Ontario Plan as a framework for assessing choices.

  - G1-2 Long-term Benefit. We require decisions to demonstrate and document how they add value to the community and support the Ontario Vision.

(4) Policy Plan (General Plan)

**Land Use Element:**

- Goal LU1: A community that has a spectrum of housing types and price ranges that match the jobs in the City and that make it possible for people to live and work in Ontario and maintain a quality of life.

  - LU1-1 Strategic Growth. We concentrate growth in strategic locations that help create place and identity, maximize available and planned infrastructure, and foster the development of transit.

  - LU1-6 Complete Community: We incorporate a variety of land uses and building types in our land use planning efforts that result in a complete community where residents at all stages of life, employers, workers and visitors have a wide spectrum of choices of where they can live, work, shop and recreate within Ontario. (Refer to Complete Community Section of Community Economics Element).

- Goal LU2: Compatibility between a wide range of uses.

  - LU2-6: Infrastructure Compatibility: We require infrastructure to be aesthetically pleasing and in context with the community character.

**Community Economics Element:**

- Goal CE2: A City of distinctive neighborhoods, districts, and corridors, where people choose to be.

  - CE2-1 Development Projects. We require new development and redevelopment to create unique, high-quality places that add value to the community.

  - CE2-2 Development Review. We require those proposing new development and redevelopment to demonstrate how their projects will create appropriately unique, functional and sustainable places that will compete well with their competition within the region.

➢ CE2-4 Protection of Investment. We require that new development and redevelopment protect existing investment by providing architecture and urban design of equal or greater quality.

➢ CE2-5 Private Maintenance. We require adequate maintenance, upkeep, and investment in private property because proper maintenance on private property protects property values.

**Safety Element:**

- Goal S1: Minimized risk of injury, loss of life, property damage and economic and social disruption caused by earthquake-induced and other geologic hazards.

➢ S1-1 Implementation of Regulations and Standards. We require that all new habitable structures be designed in accordance with the most recent California Building Code adopted by the City, including provisions regarding lateral forces and grading.

➢ S1-2 Entitlement and Permitting Process. We follow state guidelines and the California Building Code to determine when development proposals must conduct geotechnical and geological investigations.

**Community Design Element:**

- Goal CD1: A dynamic, progressive city containing distinct neighborhoods and commercial districts that foster a positive sense of identity and belonging among residents, visitors, and businesses.

➢ CD1-1 City Identity. We take actions that are consistent with the City being a leading urban center in Southern California while recognizing the diverse character of our existing viable neighborhoods.

➢ CD1-2 Growth Areas. We require development in growth areas to be distinctive and unique places within which there are cohesive design themes.

- Goal CD2: A high level of design quality resulting in public spaces, streetscapes, and developments that are attractive, safe, functional and distinct.

➢ CD2-1 Quality Architecture. We encourage all development projects to convey visual interest and character through:

- Building volume, massing, and height to provide appropriate scale and proportion;
- A true architectural style which is carried out in plan, section and elevation through all aspects of the building and site design and appropriate for its setting; and

- Exterior building materials that are visually interesting, high quality, durable, and appropriate for the architectural style.

➢ CD2-7 Sustainability. We collaborate with the development community to design and build neighborhoods, streetscapes, sites, outdoor spaces, landscaping and buildings to reduce energy demand through solar orientation, maximum use of natural daylight, passive solar and natural ventilation, building form, mechanical and structural systems, building materials and construction techniques.

➢ CD2-8 Safe Design. We incorporate defensible space design into new and existing developments to ensure the maximum safe travel and visibility on pathways, corridors, and open space and at building entrances and parking areas by avoiding physically and visually isolated spaces, maintenance of visibility and accessibility, and use of lighting.

➢ CD2-9 Landscape Design. We encourage durable landscaping materials and designs that enhance the aesthetics of structures, create and define public and private spaces, and provide shade and environmental benefits.

➢ CD2-10 Surface Parking Areas. We require parking areas visible to or used by the public to be landscaped in an aesthetically pleasing, safe and environmentally sensitive manner. Examples include shade trees, pervious surfaces, urban run-off capture and infiltration, and pedestrian paths to guide users through the parking field.

➢ CD2-11 Entry Statements. We encourage the inclusion of amenities, signage and landscaping at the entry to neighborhoods, commercial centers, mixed use areas, industrial developments, and public places that reinforce them as uniquely identifiable places.

➢ CD2-12 Site and Building Signage. We encourage the use of sign programs that utilize complementary materials, colors, and themes. Project signage should be designed to effectively communicate and direct users to various aspects of the development and complement the character of the structures.

➢ CD2-13 Entitlement Process. We work collaboratively with all stakeholders to ensure a high degree of certainty in the efficient review and timely processing of all development plans and permits.

- Goal CD3: Vibrant urban environments that are organized around intense buildings, pedestrian and transit areas, public plazas, and linkages between and within developments that are conveniently located, visually appealing and safe during all hours.

- CD3-2 Connectivity Between Streets, Sidewalks, Walkways and Plazas. We require landscaping and paving be used to optimize visual connectivity between streets, sidewalks, walkways and plazas for pedestrians.

- CD3-3 Building Entrances. We require all building entrances to be accessible and visible from adjacent streets, sidewalks or public open spaces.

- CD3-5 Paving. We require sidewalks and road surfaces to be of a type and quality that contributes to the appearance and utility of streets and public spaces.

- CD3-6 Landscaping. We utilize landscaping to enhance the aesthetics, functionality and sustainability of streetscapes, outdoor spaces and buildings.

- Goal CD5: A sustained level of maintenance and improvement of properties, buildings and infrastructure that protects the property values and encourages additional public and private investments.

- CD5-1 Maintenance of Buildings and Property. We require all public and privately owned buildings and property (including trails and easements) to be properly and consistently maintained.

- CD5-2 Maintenance of Infrastructure. We require the continual maintenance of infrastructure.

**HOUSING ELEMENT COMPLIANCE:** The project is consistent with the Housing Element of the Policy Plan (General Plan) component of The Ontario Plan, as the project site is not one of the properties in the Available Land Inventory contained in Table A-3 (Available Land by Planning Area) of the Housing Element Technical Report Appendix.

**AIRPORT LAND USE COMPATIBILITY PLAN (ALUCP) COMPLIANCE:** The California State Aeronautics Act (Public Utilities Code Section 21670 et seq.) requires that an Airport Land Use Compatibility Plan be prepared for all public use airports in the State; and requires that local land use plans and individual development proposals must be consistent with the policies set forth in the adopted Airport Land Use Compatibility Plan. On April 19, 2011, the City Council of the City of Ontario approved and adopted the Ontario International Airport Land use Compatibility Plan ("ALUCP"), establishing the Airport Influence Area for Ontario International Airport, which encompasses lands within parts of San Bernardino, Riverside, and Los Angeles Counties, and limits future land uses and development within the Airport Influence Area, as they relate to noise, safety, airspace protection, and overflight impacts of current and future airport activity. The proposed project is located within the Airport Influence Area of Ontario International Airport and was evaluated and found to be consistent with the policies and criteria of the ALUCP. Any special conditions of approval associated with uses in close proximity to the airport are included in the conditions of approval provided with the attached Resolution.

**ENVIRONMENTAL REVIEW:** On January 27, 2010, the City Council certified The Ontario Plan Environmental Impact Report (State Clearinghouse No. 2008104410), in conjunction with File No. PGPA06-001. Staff prepared an Addendum to The Ontario Plan Environmental Impact Report ("Certified EIR") for the proposed Project, which found that all potential adverse direct, indirect, and cumulative environmental impacts were thoroughly analyzed and discussed in the Certified EIR, including, but not limited to potential aesthetic, air quality, greenhouse gas emissions, noise, transportation, and tribal cultural resources impacts, and all feasible mitigation has been identified and will be incorporated into the proposed Project. This Project does not contemplate any actions that would require the preparation of a subsequent or supplemental environmental document under State CEQA Guidelines Section 15162 or 15163, as it is consistent with the development scenario identified within the Certified EIR. Furthermore, this project introduces no new significant environmental impacts and no further environmental review is required. A copy of the Addendum has been included in the environmental action resolution provided with this report.

**CONDITIONS OF APPROVAL:** See attached department reports.

## TECHNICAL APPENDIX:

**Surrounding Zoning and Land Use:**

| | *Existing Land Use* | *General Plan Designation* | *Zoning Designation* | *Specific Plan Land Use* |

RESOLUTION NO. PC21-086

A RESOLUTION OF THE PLANNING COMMISSION OF THE CITY OF ONTARIO APPROVING AN ADDENDUM TO THE ONTARIO PLAN ENVIRONMENTAL IMPACT REPORT, PURSUANT TO THE REQUIREMENTS OF THE CALIFORNIA ENVIRONMENTAL QUALITY ACT, AS AMENDED, FOR FILE NOS. PMTT21-010 AND PDEV21-018.

WHEREAS, MIG, INC. (hereinafter referred to as "Applicant") has filed an Application for the approval of a Tentative Parcel Map and Development Plan, File Nos. PMTT21-010 AND PDEV21-018, respectively, which consists of a Tentative Parcel Map to subdivide 95.35 acres of land into three parcels, in conjunction with a Development Plan to construct two industrial buildings totaling 168,772 square feet on 13.07 acres of land located at the southeast corner of Jurupa Street and Milliken Avenue, at 1425 South Toyota Way, in the City of Ontario, California (hereinafter referred to as "Application" or "Project"); and

WHEREAS, The Ontario Plan Environmental Impact Report (State Clearinghouse No. 2008104410) was certified on January 27, 2010, (hereinafter referred to as “Certified EIR”), in which development and use of the Project site was discussed; and

WHEREAS, the Planning Director of the City of Ontario has prepared and approved for attachment to the certified Environmental Impact Report, an Addendum to the Certified EIR (hereinafter referred to as “EIR Addendum”) in accordance with the requirements of the California Environmental Quality Act of 1970, together with State and local guidelines implementing said Act, all as amended to date (collectively referred to as “CEQA”); and

WHEREAS, the EIR Addendum concluded that implementation of the Project could result in a number of significant effects on the environment that were previously analyzed in the Certified EIR, and that the Certified EIR identified mitigation measures that would reduce each of those significant effects to a less-than-significant level; and

WHEREAS, pursuant to State CEQA Guidelines Section 15164(a), a lead agency shall prepare an addendum to a previously certified EIR if some changes or additions are necessary to a project, but the preparation of a subsequent or supplemental EIR is not required; and

WHEREAS, the City determined that none of the conditions requiring preparation of a subsequent or supplemental EIR would occur from the Project, and that preparation of an Addendum to the Certified EIR was appropriate; and

WHEREAS, the City of Ontario is the lead agency on the Project, and the Planning Commission is the decision-making authority for the requested approval to construct and otherwise undertake the Project; and

WHEREAS, the Planning Commission has reviewed and considered the EIR Addendum for the Project, has concluded that none of the conditions requiring preparation of a subsequent of supplemental EIR have occurred, and intends to take actions on the Project in compliance with CEQA and state and local guidelines implementing CEQA; and

WHEREAS, the EIR Addendum for the Project is on file in the Planning Department, located at 303 East B Street, Ontario, CA 91764, are available for inspection by any interested person at that location and are, by this reference, incorporated into this Resolution as if fully set forth herein; and

WHEREAS, all legal prerequisites to the adoption of this Resolution have occurred.

NOW, THEREFORE, IT IS HEREBY FOUND, DETERMINED, AND RESOLVED by the Planning Commission of the City of Ontario, as follows:

SECTION 1: ***Environmental Determination and Findings.*** As the decision-making authority for the Project, The Planning Commission has reviewed and considered the information contained in the administrative record for the Project. Based upon the facts and information contained in the administrative record, including all written and oral evidence presented to the Planning Commission, the Planning Commission finds as follows:

(1) The environmental impacts of this project were reviewed in conjunction with an Addendum to The Ontario Plan Environmental Impact Report (State Clearinghouse No. 2008104410), certified by the Ontario City Council on January 27, 2010, in conjunction with File No. PGPA06-001; and

(2) The EIR Addendum and administrative record have been completed in compliance with CEQA, the State CEQA Guidelines, and the City of Ontario Local CEQA Guidelines; and

(3) The City's "Guidelines for the Implementation of the California Environmental Quality Act (CEQA)" provide for the use of a single environmental assessment in situations where the impacts of subsequent projects are adequately analyzed. This Application introduces no new significant environmental impacts; and

(4) All previously adopted mitigation measures shall be a condition of project approval, as they are applicable to the Project, and are incorporated herein by this reference; and

(5) The EIR Addendum contains a complete and accurate reporting of the environmental impacts associated with the Project, and reflects the independent judgment of the Planning Commission; and

(6) There is no substantial evidence in the administrative record supporting a fair argument that the project may result in significant environmental impacts.

SECTION 2: ***Additional Environmental Review Not Required.*** Based on the Addendum, all related information presented to the Planning Commission, and the specific findings set forth in Section 1, above, the Planning Commission finds that the preparation of a subsequent or supplemental Environmental Impact Report is not required for the Project, as the Project:

(1) Does not constitute substantial changes to the Certified EIR that will require major revisions to the Certified EIR due to the involvement of new significant environmental effects or a substantial increase in the severity of previously identified significant effects; and

(2) Does not constitute substantial changes with respect to the circumstances under which the Certified EIR was prepared, that will require major revisions to the Certified EIR due to the involvement of new significant environmental effects or a substantial increase in the severity of the previously identified significant effects; and.

(3) Does not contain new information of substantial importance that was not known and could not have been known with the exercise of reasonable diligence at the time the Certified EIR was certified/adopted, that shows any of the following:

(a) The project will have one or more significant effects not discussed in the Certified EIR; or

(b) Significant effects previously examined will be substantially more severe than shown in the Certified EIR; or

(c) Mitigation measures or alternatives previously found not to be feasible would in fact be feasible and would substantially reduce one or more significant effects of the Project, but the City declined to adopt such measures; or

(d) Mitigation measures or alternatives considerably different from those analyzed in the Certified EIR would substantially reduce one or more significant effects on the environment, but which the City declined to adopt.

SECTION 3: ***Planning Commission Action.*** Based upon the findings and conclusions set forth in Sections 1 and 2, above, the Planning Commission hereby finds

that based upon the entire record of proceedings before it, and all information received, that there is no substantial evidence that the Project will constitute substantial changes to the Certified EIR, and does hereby approve the EIR Addendum, attached hereto as "Attachment A," and incorporated herein by this reference.

SECTION 4: ***Indemnification.*** The Applicant shall agree to defend, indemnify and hold harmless, the City of Ontario or its agents, officers, and employees from any claim, action or proceeding against the City of Ontario or its agents, officers or employees to attack, set aside, void, or annul this approval. The City of Ontario shall promptly notify the applicant of any such claim, action, or proceeding, and the City of Ontario shall cooperate fully in the defense.

SECTION 5: ***Custodian of Records.*** The documents and materials that constitute the record of proceedings on which these findings have been based are located at the City of Ontario City Hall, 303 East "B" Street, Ontario, California 91764. The custodian for these records is the City Clerk of the City of Ontario.

SECTION 6: ***Certification to Adoption.*** The Secretary shall certify to the adoption of the Resolution.

- - - - - - - - - - - - - -

The Secretary Pro Tempore for the Planning Commission of the City of Ontario shall certify as to the adoption of this Resolution.

I hereby certify that the foregoing Resolution was duly and regularly introduced, passed and adopted by the Planning Commission of the City of Ontario at a special meeting thereof held on the 20th day of December 2021, and the foregoing is a full, true and correct copy of said Resolution, and has not been amended or repealed.

Rick Gage
Planning Commission Chairman

ATTEST:

Rudy Zeledon
Planning Director and
Secretary to the Planning Commission

STATE OF CALIFORNIA )
COUNTY OF SAN BERNARDINO )
CITY OF ONTARIO )

I, Gwen Berendsen, Secretary Pro Tempore of the Planning Commission of the City of Ontario, DO HEREBY CERTIFY that foregoing Resolution No. PC21-086, was duly passed and adopted by the Planning Commission of the City of Ontario at their special meeting held on December 20, 2021, by the following roll call vote, to wit:

AYES: Anderson, Dean, DeDiemar, Gage, Lampkin, Willoughby

NOES: None

ABSENT: Ricci

ABSTAIN: None

Gwen Berendsen
Secretary Pro Tempore

# Addendum to The Ontario Plan Environmental Impact Report

CITY OF ONTARIO PLANNING DEPARTMENT
303 East B Street, Ontario, California 91764 Phone: 909.395.2036 / Fax: 909.395.2420

1. Project Title/File No.: PMTT21-010 and PDEV21-018

2. Lead Agency: City of Ontario, 303 East B Street, Ontario, California 91764, (909) 395-2036

3. Contact Person: Edmelynne V. Hutter, Senior Planner, Phone: (909) 395-2429, Email: ehutter@ontarioca.gov

4. Project Sponsor: MIG, Inc. ATTN: Pamela Steele; 1650 Spruce Street, Suite 106, Riverside, CA 92507

5. Project Location: The project site is located in southwestern San Bernardino County, within the City of Ontario. The City of Ontario is located approximately 40 miles from downtown Los Angeles, 20 miles from downtown San Bernardino, and 30 miles from Orange County. As illustrated on Figures 1 and 2, below, the project site is located at 1425 South Toyota Way, on approximately 95 acres, at the southeast corner of Jurupa Street and Milliken Avenue.

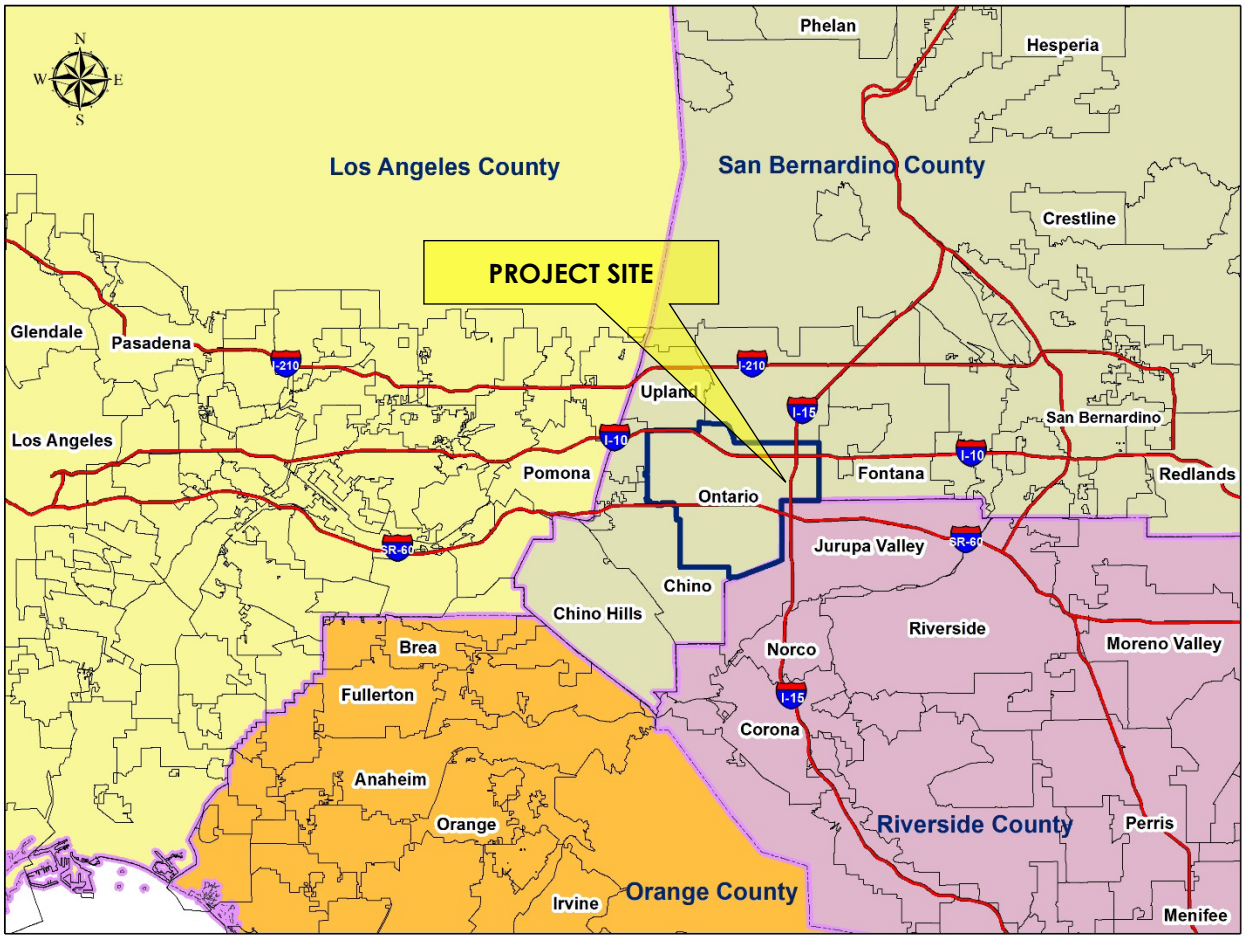

*Figure 1: REGIONAL LOCATION MAP*

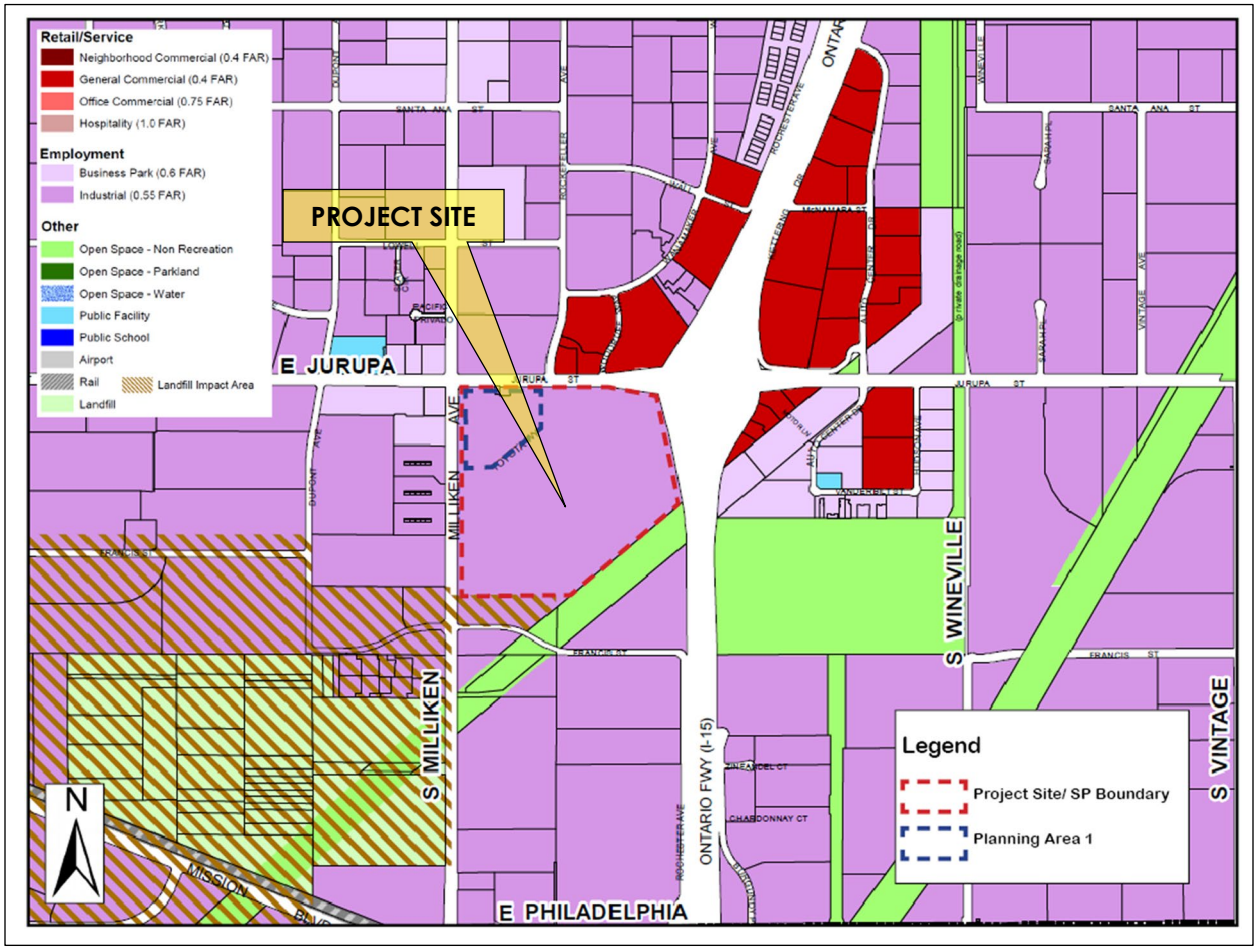

*Figure 2: VICINITY MAP*

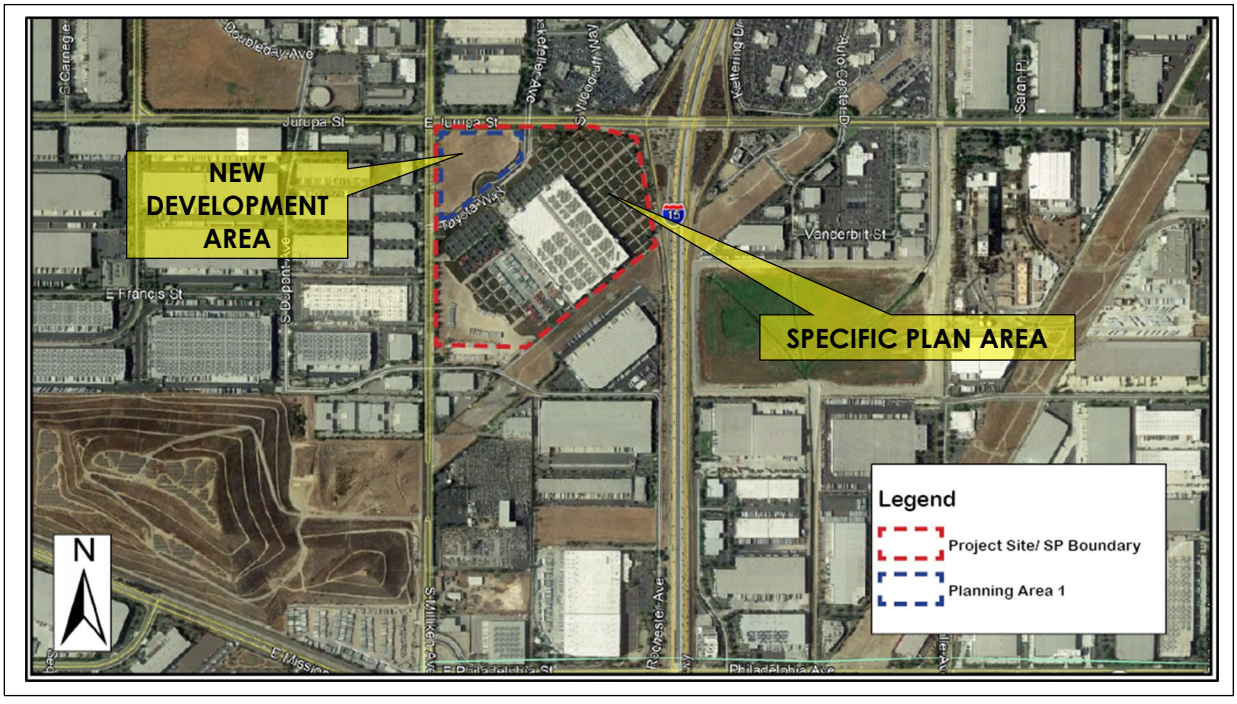

*Figure 3: AERIAL PHOTOGRAPH*

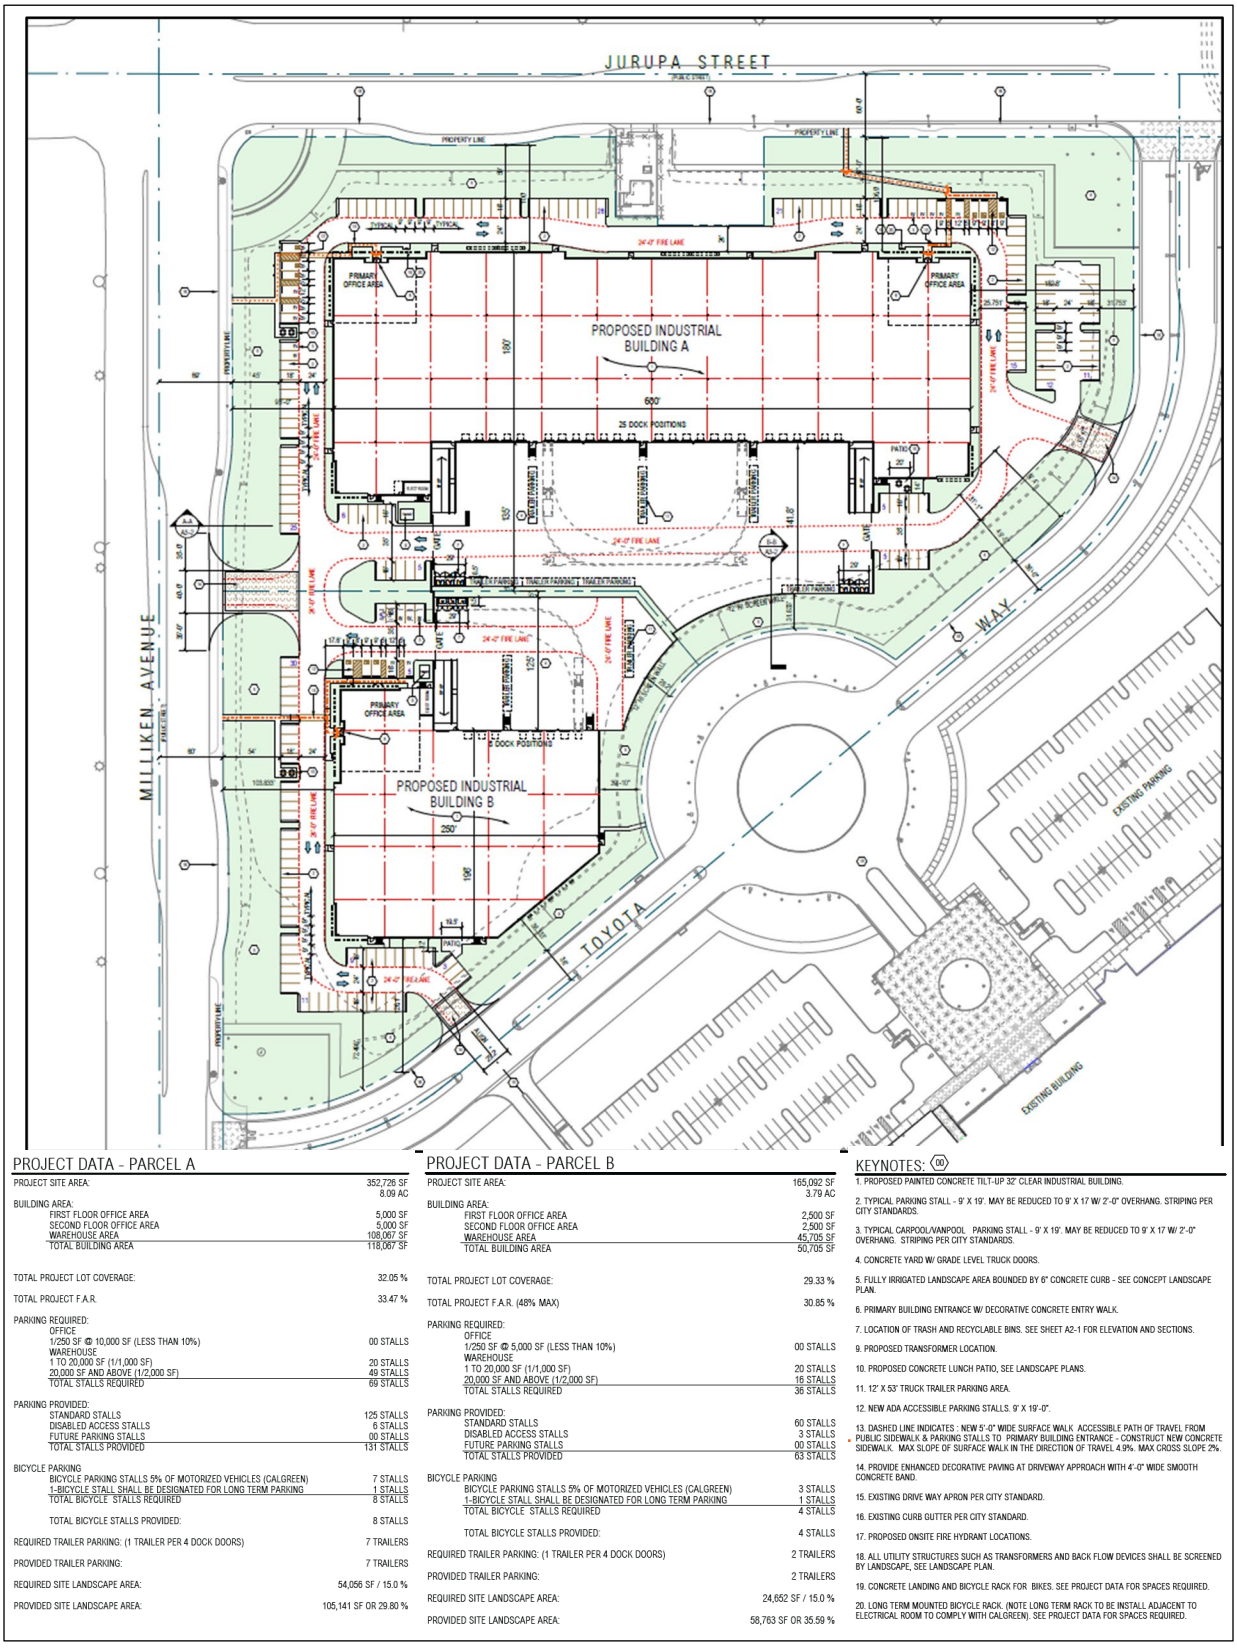
6. Policy Plan (General Plan) Designation: Industrial

7. Zoning Designation: Toyota/Ontario Business Park Specific Plan – Industrial Mixed Use



8. Description of Project: A Tentative Parcel Map (TPM No. 20147), submitted as part of the application, would subdivide the Specific Plan area into three parcels: Parcel 1 would include the Specific Plan area south of Toyota Way, which is already developed with an 807,068 square feet warehouse and distribution facility and no development for this area is proposed under this Project; Parcels 2 and 3 would be the area north of Toyota Way and include the northwest portion of the Project site where new development is proposed. As shown in Figure 4, the proposed Project would involve the construction of two industrial warehouse buildings totaling 168,722 square feet and associated site improvements.

   *Building A*. Building A, located on the northern portion of Project site, would total 118,067 square feet and include 108,067 square feet of warehouse space and 10,000 square feet of office space. The office component of the building would be two stories and would be located in the northwest and northeast corners of the building**.** Twenty-five truck loading docks would be located along the southern side of the building. A summary of development specifications are outlined in Tables 1 and 2.

   *Building B.* Building B, located on the southern portion of the Project site, would be located south of Building A and would total 50,705 square feet which would include 45,705 square feet of warehouse space with 5,000 square feet of office use. The office component of the building would be two stories and would be located in the northwest corner of the building. Eight truck loading docks would be located along the northern side of the building. A summary of development specifications are outlined in Tables 1 and 2.

*Architecture.* The proposed buildings would be concrete tilt-up construction with painted and scored accents. The design provides glazing and color variation along the length of the buildings, and would utilize a combination of materials and colors. The main colors of the buildings would be Nebulous White with accents colors of Online (medium) and Steely Gray (dark), with Leisure Blue trimming. The primary window blue reflective glass Solarcool Pacifica is located on the wall panels, the building corners, and office areas. There are trellises and free-standing concrete columns painted with a brushed Stainless color to provide accents to the buildings. The proposed screen walls would match the paint and color variations of the buildings. Conceptual elevations are shown in Figure 5.

The buildings designs would also incorporate the following features:

- Recessed primary entry doors
- Two story glazing
- Punched square first and second floor windows with thin concrete legs in a pattern to create an office look
- Concrete trellis with metal fin with canopy top
- Higher parapets at the primary entry to create hierarchy
- Higher parapets at the secondary corners to create additional hierarchy

*Landscaping.* Landscaping is proposed along all streets frontages, along Toyota Way, on the front and side setbacks adjacent to the buildings, and throughout the parking areas. The Project provides landscaping which exceeds the 15 percent landscaping requirement, and includes 29.80 percent for Building A and 35.59 percent for Building B. A landscaping plan is shown in Figure 6.

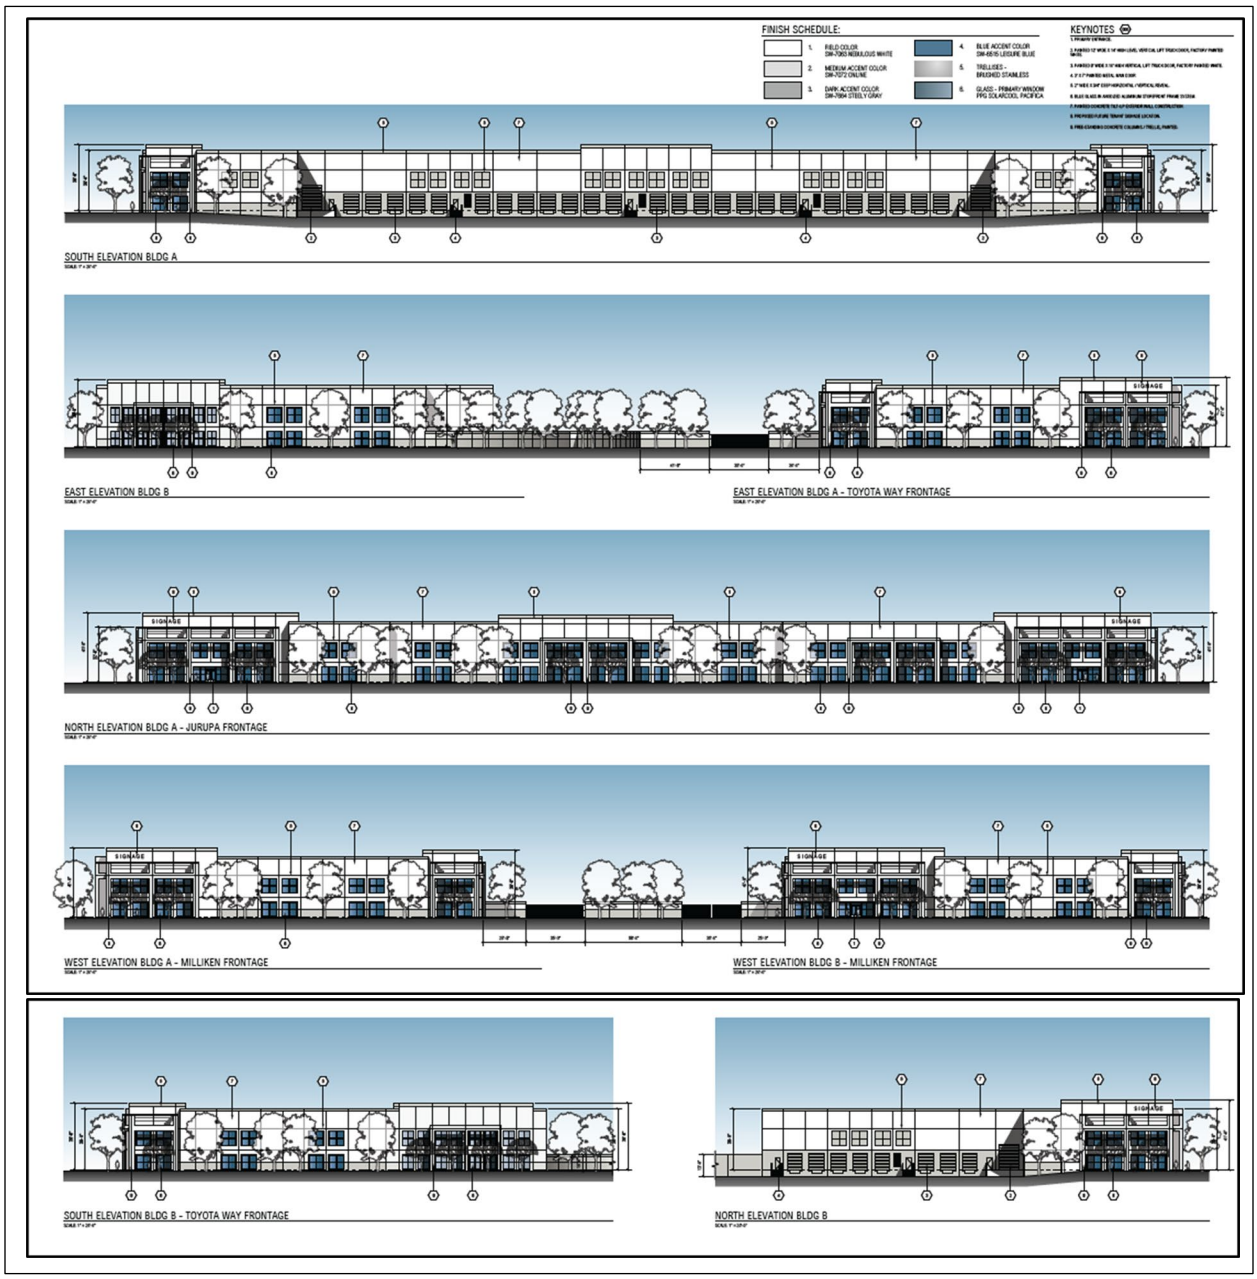

*Figure 5: CONCEPTUAL BUILDING ELEVATIONS*

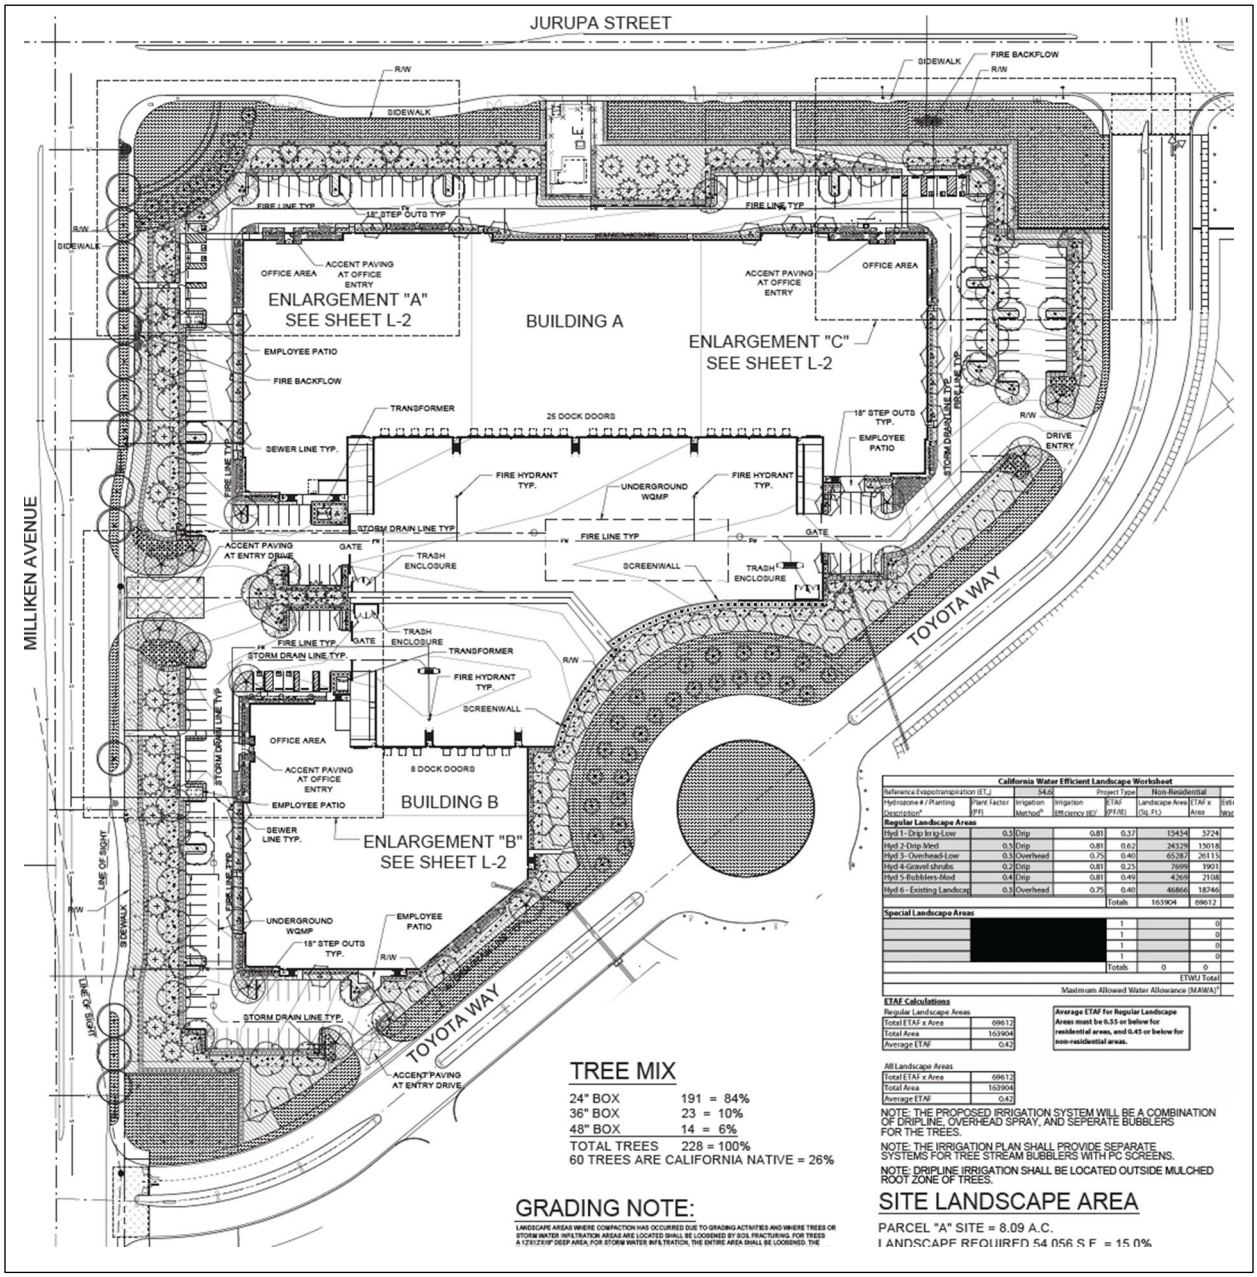

*Figure 6: CONCEPTUAL LANDSCAPE PLAN*

*Drainage*. For Building A, runoff from the east portion of the site, along with the northerly landscaped area, would be conveyed through storm drain Line A. Runoff from the west half of the site along with the parking lot along the south of the building would be conveyed through storm drain Line B. These storm drain lines would discharge into an underground infiltration chamber system located in the central portion of the site. The underground infiltration system would be sized to capture and retain the required water quality design capture volume, as well as mitigate discharge to existing conditions for the Project site. The system would have a footprint of approximately 54-feet by 160-feet and consist of 60-inch diameter perforated corrugated metal pipes surrounded by gravel. The excess flow generated from higher storm events would be designed to back up in proposed Line A, which would convey and then discharge to the existing private storm drain line in Toyota Way.

For Building B, runoff from north of the building would be conveyed through storm drain Line C. Runoff from south of the building would be conveyed through storm drain Line D. The

proposed storm drain lines would discharge into an underground infiltration chamber system located in the southwest portion of the site. The underground infiltration system would be sized to capture and retain the required water quality design capture volume. The system would have a footprint of approximately 24-feet by 105-feet and consist of 60-inch diameter perforated corrugated metal pipes surrounded by gravel. The excess flow generated from higher storm events would be designed to back up in proposed Line D and release in Line E, which would convey and then discharge to the existing private storm drain line in Toyota Way.

*Circulation.* There are two driveways off Toyota Way that would provide access to the site. A 35-foot wide driveway, located east of Building A, would be for automobile and truck use. To the south of Building B there would be a 29-foot wide driveway for automobile use only. A 40-foot wide driveway located along Milliken Avenue would provide direct access to the truck courts of both buildings.

Emergency vehicle access would be provided around the two buildings with 24-foot wide drive aisles through the parking areas and truck court. The majority of the automobile parking would be located along the perimeter of the proposed buildings.

**Prior Environmental Analysis of Project Site.** The Project site is located within the boundary of the Toyota/Ontario Business Park Specific Plan (Specific Plan), which was adopted in August 1993. The Specific Plan area is Assessor's Parcel Number (APN) 0238-121-75, totaling 95.35 gross acres

On January 27, 2010, the Ontario City Council adopted The Ontario Plan (TOP). TOP serves as the framework for the City's business plan and provides a foundation for the City to operate as a municipal corporation that consists of six distinct components: 1) Vision; 2) Governance Manual; 3) Policy Plan; 4) Council Priorities; 5) Implementation; and 6) Tracking and Feedback. The Policy Plan component of TOP meets the functional and legal mandate of a General Plan and contains nine elements: Land Use, Housing, Parks and Recreation, Environmental Resources, Community Economics, Safety, Mobility, Community Design and Social Resources.

An Environmental Impact Report was prepared for TOP (TOP FEIR) (SCH # 2008101140) and certified by the City Council on January 27, 2010 and included Mitigation Measures, Findings, and a Statement of Overriding Considerations pursuant to CEQA. TOP FEIR analyzed the direct and physical changes in the environment that would be caused by implementation of TOP, focusing on changes to land use associated with the buildout of the proposed land use plan, and the associated population and employment growth in the City. The Project site was analyzed in TOP FEIR as industrial (See Exhibit A, TOP EIR Figure 1-3, Proposed Land Use Plan) to be consistent with the industrial uses to the north, west, and south of the Project site, Interstate I-15 freeway to the east, and the Project site's location under the landing path of the Ontario International Airport. The significant unavoidable adverse impacts that were identified in TOP FEIR included: agriculture resources, air quality, cultural resources, greenhouse gas emissions, noise and transportation/traffic.

In 2019, Toyota requested a Specific Plan Amendment to change the zoning of the Project site (identified as Planning Area 1 in the Specific Plan) from Office/Research & Development (Office/R&D) to Industrial Mixed Use, which would allow for both Office/R&D and warehouse/distribution/manufacturing uses on the site. The Specific Plan Amendment also updated the landscape palette to conform to current drought tolerant landscape practices, which apply to any development in the Specific Plan area. Revisions to the Specific Plan also included:

- Any graphic that showed Planning Area 1 zoning as Office/R&D was changed to Industrial Mixed Use.
- Text in the Specific Plan that referred to Office/R&D was revised to reflect the new

designation of Industrial Mixed Use.
- Permitted Uses under Industrial Mixed Use was updated to include warehouse and distribution uses.
- Graphic and text references to Rockefeller Drive within the Specific Plan area were changed to reflect the actual street name: Toyota Way.
- The landscape palette and graphic representations of landscape were updated to reflect more drought tolerant materials.
- Specific Design Guidelines for Office/R&D district were retitled to Industrial Mixed Use.

To evaluate the environmental impacts associated with the Specific Plan Amendment, the City prepared an Addendum to TOP FEIR. The Specific Plan Amendment, File No. PSPA 19-004 was approved in 2020 with an environmental Addendum Resolution No. 2020-063, which included the review and approval of three updated technical studies including a Traffic Trip Generation Comparison Letter, Greenhouse Gas Emissions CEQA Thresholds and Screening Tables, and a Cultural Resources Report.

**Use of an Addendum.** According to the California Environmental Quality Act Guidelines Section 15164, an Addendum to a previously certified EIR may be used if some changes or additions are necessary, but none of the conditions described in Section 15162, requiring the preparation of a subsequent Negative Declaration or EIR, have occurred. The CEQA Guidelines require that a brief explanation be provided to support the findings that no subsequent EIR or Negative Declaration are needed for further discretionary approval. These findings are described below:

1. *Required Finding: Substantial changes are not proposed for the project that will require major revisions of the previous EIR due to the involvement of new, significant environmental effects or a substantial increase in the severity of previously identified effects*.

   Substantial changes are not proposed by the Project, and Project construction and operation would not require revisions to TOP FEIR. TOP FEIR analyzed the environmental impacts that would be caused by implementation of TOP; focusing on changes to land use associated with the buildout of the proposed land use plan. The Project site is located in the Toyota/Ontario Business Park Specific Plan area, with a zoning designation of Industrial Mixed Use, which would allow warehouse/distribution uses along with the Office/R&D uses. As described in the Specific Plan and, therefore, analyzed in TOP FEIR, maximum development within Planning Area 1 could be up to 300,000 square feet. The proposed Project would include 168,722 square feet of warehouse use on the site, which would be significantly less development than assumed at the site in TOP FEIR. Therefore, the proposed Project would result in the less development than TOP FEIR analyzed at buildout.

   Because the proposed Project would result in reduction in development, compared to the site development assumptions originally included in TOP FEIR analysis, no revisions to TOP FEIR are required. A trip generation comparison was conducted by Ganddini Group, and reviewed by the City's Traffic Engineering Division, which compares trip generation at the Project site under the original zoning versus the development proposed under the Specific Plan Amendment. As shown below in Table 3, the Specific Plan Amendment zoning would result in 2,528 fewer daily personal car equivalent (PCE) trips compared to the development allowed under the prior zoning included in TOP FEIR. It should also be noted that the proposed Project would include less square footage than analyzed within the Ganddini Group trip generation comparison, so the reduction in trips would likely be greater than what was identified in Table 3.

| **Table 3: Trip Generation Comparison** | | | | | | | | |
|---|---|---|---|---|---|---|---|---|
| | | Trip Generation | | | | | | |
| | | AM Peak Hour | | | PM Peak Hour | | | Daily |
| Zoning | Quantity | In | Out | Total | In | Out | Total | |
| Original Zoning (Office) | 300,000 SF | 299 | 49 | 348 | 55 | 290 | 345 | 2,922 |
| Proposed (Warehouse) | 173,247 SF | 35 | 14 | 49 | 16 | 36 | 52 | 394 |
| **Trip Generation Comparison (Proposed Project – Original Zoning)** | | **-264** | **-35** | **-299** | **-39** | **-254** | **-293** | **-2,528** |

In addition, all previously adopted mitigation measures of TOP FEIR are applicable to the Project and are incorporated herein by reference. Additionally, City Standard Conditions of Approval, and Development and Performance Standards included in the Specific Plan, would be applicable to the proposed Project. Construction and operation of the proposed Project would not result in new significant environmental effects or a substantial increase in the severity of previously identified effects. The attached Initial Study provides an analysis of the proposed Project and verification that the Project would not cause environmental impacts such that any of the circumstances identified in State CEQA Guidelines Section 15162 are present.

2. *Required Finding: Substantial changes have not occurred with respect to the circumstances under which the project is undertaken, that would require major revisions of the previous Environmental Impact Report due to the involvement of new significant environmental effects or a substantial increase in the severity of previously identified significant effects.*

   Substantial changes have not occurred that would require major revisions to TOP FEIR. TOP FEIR evaluated the Project site as Industrial with a maximum FAR of 0.55 (see attached Exhibit "A"- TOP EIR Figure 1-3, Proposed Land Use Plan), consistent with the surrounding industrial properties to the north, west, and south. A Specific Plan Amendment was adopted by the City Council and an Addendum to TOP FEIR was prepared and adopted in 2020. The proposed Project would result in the construction of two warehouse buildings, and associated site improvements, and would be consistent with the Industrial Mixed Use land use designation included in the Specific Plan Amendment. No proposed changes or revisions to TOP FEIR are required. In addition, all previously adopted mitigation measures of TOP FEIR are applicable to the Project and are incorporated herein by reference. Lastly, City Standard Conditions of Approval, and Development and Performance Standards included in the Specific Plan, would be applicable to the proposed Project. The attached Initial Study provides an analysis of the proposed Project and verification that the Project would not cause environmental impacts such that any of the circumstances identified in State CEQA Guidelines Section 15162 are present.

3. *Required Finding. No new information has been provided that would indicate that the proposed project would result in one or more significant effects not discussed in the previous EIR.*

   No new information has been provided that would indicate the proposed Project would result in any new significant effects not previously discussed in TOP FEIR. As stated above in Section 2, no substantial changes have occurred with respect to the circumstances under which the Project was undertaken. TOP FEIR evaluated the site as Industrial with a maximum FAR of 0.55 (see attached Exhibit "A"- TOP EIR Figure 1-3, Proposed Land Use Plan), consistent with the surrounding industrial properties to the north, west, and south. Since adoption of the 1992 General Plan and the 2010 TOP FEIR, the Project site and

surrounding area have been planned for and remained industrial use (see attached Exhibit "B"- 1992 General Plan Land Use Map). Therefore, no proposed changes or revisions to TOP FEIR are required. In addition, all previously adopted mitigation measures of TOP FEIR are applicable to the Project and are incorporated herein by reference. Finally, City Standard Conditions of Approval, and Development and Performance Standards included in the Specific Plan, would be applicable to the proposed Project. The attached Initial Study provides an analysis of the proposed Project and verification that the Project would not cause environmental impacts such that any of the circumstances identified in State CEQA Guidelines Section 15162 are present.

**CEQA Requirements for an Addendum.** If changes to a project or its circumstances occur or new information becomes available after adoption of a negative declaration, the lead agency may: (1) prepare a subsequent EIR if the criteria of State CEQA Guidelines Section 15162(a) are met, (2) prepare a subsequent negative declaration, (3) prepare an addendum, or (4) prepare no further documentation. (State CEQA Guidelines Section 15162(b)). When only minor technical changes or additions to the negative declaration are necessary and none of the conditions described in section 15162 calling for the preparation of a subsequent EIR or negative declaration have occurred, CEQA allows the lead agency to prepare and adopt an addendum. (State CEQA Guidelines Section 15164(b).)

Under Section 15162, a subsequent EIR or negative declaration is required only when:

1) Substantial changes are proposed in the project which will require major revisions of the previous negative declaration due to the involvement of new significant environmental effects or a substantial increase in the severity of previously identified significant effects;

2) Substantial changes occur with respect to the circumstances under which the project is undertaken which will require major revisions of the negative declaration due to the involvement of any new significant environmental effects or a substantial increase in the severity of previously identified significant effects; or

3) New information of substantial importance, which was not known and could not have been known with the exercise of reasonable diligence at the time the negative declaration was adopted, shows any of the following:

    i. The project will have one or more significant effects not discussed in the previous negative declaration;

    ii. Significant effects previously examined will be substantially more severe than shown in the previous EIR;

    iii. Mitigation measures or alternatives previously found not to be feasible would in fact be feasible and would substantially reduce one or more significant effects of the project, but the project proponents decline to adopt the mitigation measure or alternative; or

    iv. Mitigation measures or alternatives which are considerably different from those analyzed in the previous EIR would substantially reduce one or more significant effects on the environment, but the project proponents decline to adopt the mitigation measure or alternative.

Thus, if the proposed Project does not result in any of the circumstances listed in Section 15162 (i.e., no new or substantially greater significant impacts), the City may properly adopt an addendum to TOP FEIR.

**Conclusion**. TOP FEIR, certified by City Council on January 27, 2010, was prepared as a Program EIR in accordance with CEQA, the State CEQA Guidelines, and the City's Rules for the Implementation of CEQA and in accordance with Section 15121(a) of the State CEQA Guidelines (California Code of Regulations, Title 14, Division 6, Chapter 3). TOP FEIR considered the direct physical changes and reasonably foreseeable indirect physical changes in the environment associated with implementation of TOP. Consequently, TOP FEIR focused on impacts from changes to land use associated with buildout of the City's Land Use Plan, and impacts from the resulting population and employment growth in the City. The proposed Project is consistent with the existing uses of the properties and uses within the surrounding areas. As described above, the amount of development associated with the proposed Project would be lower for Planning Area 1 than TOP FEIR analyzed.

Accordingly, and based on the findings and information contained in the previously certified TOP FEIR, the analysis above, the attached Initial Study, and CEQA statute and State CEQA Guidelines, including Sections 15164 and 15162, the proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in TOP FEIR. No changes or additions to TOPF EIR analyses are necessary, nor is there a need for any additional mitigation measures. Therefore, pursuant to State CEQA Guidelines Section 15164, the Ontario City Council hereby adopts this Addendum to TOP FEIR.

9. Project Setting: The Project site is relatively flat with minimal topographic variation, with the majority of the area being developed with the warehouse building, parking lot and landscaping. The vacant area of the project site being proposed for new development is primarily covered in grass. Mature palm trees are planted at various locations along the perimeter of the site with shrubs located along the Toyota Way frontage. Existing sidewalks are located along the Milliken Avenue and Jurupa Street frontages. Street lighting is also located along the perimeter of the site. A city well and structure is south of Jurupa Street immediately adjacent to the Project site; however, this area is not included within the Project site. The Project site is located in a developed, urban area of the City of Ontario, and is surrounded by business park uses, warehouses, and distribution facilities.

   The Project site is located within the Toyota/Ontario Business Park Specific Plan (Specific Plan), which identifies the land use of the site as Industrial Mixed Use and Warehouse/Distribution. As described in the Specific Plan, which was adopted in August 1993, the purpose of the document is to assure the systematic implementation of the goals and policies contained in the Ontario General Plan. The Specific Plan contains development standards for the classifications of land use within the Project site, and addresses transportation and circulation, streetscape and landscape guidelines, and infrastructure and public services.

   The proposed new industrial buildings would be located on approximately 13 acres of vacant land in the northwest corner of the Project site and bounded by Jurupa Street to the north, Toyota Way to the south and east, and Milliken Avenue to the west.

10. Surrounding Land Uses:

| | Existing Land Use | General Plan Designation | Zoning Designation | Specific Plan Land Use |
|---|---|---|---|---|
| Site: | Warehouse, vacant | Industrial | Toyota Ontario Business Park Specific Plan | Industrial Mixed Use, Warehouse/Distribution |
| North: | Warehouse/ Distribution | Industrial | California Commerce Center Specific Plan | Light Industrial |

| | Existing Land Use | General Plan Designation | Zoning Designation | Specific Plan Land Use |
|---|---|---|---|---|
| South: | Warehouse | Industrial | Entratter Industrial Specific Plan | Industrial |
| East: | Interstate 15 Freeway | Interstate 15 Freeway | Interstate 15 Freeway | Interstate 15 Freeway |
| West: | Office/Business Park | Industrial | California Commerce Center Specific Plan | Light Industrial, Commercial/Food/Hotel |

11. Other public agencies whose approval is required (e.g., permits, financing approval or participation agreement): None

12. Have California Native American tribes traditionally and culturally affiliated with the project area requested consultation pursuant to Public Resources Code section 21080.3.1?
☐Yes ☒ No

If "yes", has consultation begun? ☐ Yes ☐ No ☐ Completed

**ENVIRONMENTAL FACTORS POTENTIALLY AFFECTED**

The environmental factors checked below would be potentially affected by this project, involving at least one impact that is a "Potentially Significant Impact" as indicated by the checklist on the following pages.

| | | |
|---|---|---|
| ☐ Aesthetics | ☐ Agriculture/Forestry Resources | ☐ Air Quality |
| ☐ Biological Resources | ☐ Cultural Resources | ☐ Geology / Soils |
| ☐ Greenhouse Gas Emissions | ☐ Hazards & Hazardous Materials | ☐ Hydrology/Water Quality |
| ☐ Land Use / Planning | ☐ Mineral Resources | ☐ Noise |
| ☐ Population / Housing | ☐ Public Services | ☐ Recreation |
| ☐ Transportation | ☐ Utilities / Service Systems | ☐ Mandatory Findings of Significance |
| ☐ Tribal Cultural Resources | ☐ Wildfire | ☐ Energy |

**DETERMINATION** (To be completed by the Lead Agency)

On the basis of this initial evaluation:

☐ I find that the proposed project COULD NOT have a significant effect on the environment, and a NEGATIVE DECLARATION will be prepared.

☐ I find that although the proposed project could have a significant effect on the environment, there will not be a significant effect in this case because revisions in the project have been

made by or agreed to by the project proponent. A MITIGATED NEGATIVE DECLARATION will be prepared.

☐ I find that the proposed project MAY have a significant effect on the environment, and an ENVIRONMENTAL IMPACT REPORT is required.

☐ I find that the proposed project MAY have a "potentially significant" or "potentially significant unless mitigated" impact on the environment, but at least one effect 1) has been adequately analyzed in an earlier document pursuant to applicable legal standards, and 2) has been addressed by mitigation measures based on the earlier analysis as described on attached sheets. An ENVIRONMENTAL IMPACT REPORT is required, but it must analyze only the effects that remain to be addressed.

☒ I find that although the proposed project could have a significant effect on the environment, because all potentially significant effects (a) have been analyzed adequately in an earlier EIR or NEGATIVE DECLARATION pursuant to applicable standards, and (b) have been avoided or mitigated pursuant to that earlier EIR or NEGATIVE DECLARATION, including revisions or mitigation measures that are imposed upon the proposed project, nothing further is required.

**EVALUATION OF ENVIRONMENTAL IMPACTS**

1. A brief explanation is required for all answers except "No Impact" answers that are adequately supported by the information sources a lead agency cites in the parentheses following each question. A "No Impact" answer is adequately supported if the referenced information sources show that the impact simply does not apply to projects like the one involved (e.g., the project falls outside a fault rupture zone). A "No Impact" answer should be explained where it is based on project-specific factors as well as general standards (e.g., the project will not expose sensitive receptors to pollutants, based on a project-specific screening analysis).

2. All answers must take account of the whole action involved, including off-site as well as on-site, cumulative as well as project-level, indirect as well as direct, and construction as well as operational impacts.

3. Once the lead agency has determined that a particular physical impact may occur, then the checklist answers must indicate whether the impact is potentially significant, less than significant with mitigation, or less than significant. "Potentially Significant Impact" is appropriate if there is substantial evidence that an effect is significant. If there are one or more "Potentially Significant Impact" entries when the determination is made, an EIR is required.

4. "Negative Declaration: Less Than Significant with Mitigation Incorporated" applies where the incorporation of mitigation measures has reduced an effect from "Potentially Significant Impact" to a "Less than Significant Impact." The lead agency must describe the mitigation measures, and briefly explain how they reduce the effect to a less than significant level (mitigation measures from the "Earlier Analyses" Section may be cross-referenced).

5. Earlier analyses may be used where, pursuant to the tiering, program EIR, or other CEQA process, an effect has been adequately analyzed in an earlier EIR or Negative Declaration. Section 15063(c)(3)(D). In this case, a brief discussion should identify the following:

a. Earlier Analyses Used. Identify and state where they are available for review.

b. Impacts Adequately Addressed. Identify which effects from the above checklist were within the scope of and adequately analyzed in an earlier document pursuant to applicable legal standards, and state whether such effects were addressed by mitigation measures based on the earlier analysis.

c. Mitigation Measures. For effects that are "Less than Significant with Mitigation Measures Incorporated," describe the mitigation measures which were incorporated or refined from the earlier document and the extent to which they address site-specific conditions for the project.

6. Lead agencies are encouraged to incorporate into the checklist references to information sources for potential impacts (e.g., general plans, zoning ordinances). Reference to a previously prepared or outside document should, where appropriate, include a reference to the page or pages where the statement is substantiated.

7. Supporting Information Sources. A source list should be attached, and other sources used or individuals contacted should be cited in the discussion.

8. This is only a suggested form, and lead agencies are free to use different formats; however, lead agencies should normally address the questions from this checklist that are relevant to a project's environmental effects in whatever format is selected.

9. The explanation of each issue should identify:

a. The significance criteria or threshold, if any, used to evaluate each question; and

b. The mitigation measure identified, if any, to reduce the impact to less than significance.

(Note: Example explanations have been provided. Add, remove, or replace as needed.)

| *Issues* | *Potentially Significant Impact* | *Less Than Significant with Mitigation* | *Less Than Significant Impact* | *No New Impact / No Impact* |
|---|---|---|---|---|
| 1. AESTHETICS. Except as provided in Public Resources Code section 21099, would the project: | | | | |
| a) Have a substantial adverse effect on a scenic vista? | ☐ | ☐ | ☐ | ☒ |
| b) Substantially damage scenic resources, including, but not limited to, trees, rock outcroppings, and historic buildings within a state scenic highway? | ☐ | ☐ | ☐ | ☒ |
| c) In non-urbanized areas, substantially degrade the existing visual character or quality of public views of the site and its surroundings? (Public views are those that are experienced from publicly accessible vantage point). If the project is in an urbanized area, would the project conflict with applicable zoning and other regulations governing scenic quality?) | ☐ | ☐ | ☐ | ☒ |
| d) Create a new source of substantial light or glare which would adversely affect day or nighttime views in the area? | ☐ | ☐ | ☐ | ☒ |
| 2. AGRICULTURE AND FOREST RESOURCES. In determining whether impacts to agricultural resources are significant | | | | |

| *Issues* | *Potentially Significant Impact* | *Less Than Significant with Mitigation* | *Less Than Significant Impact* | *No New Impact / No Impact* |
|---|---|---|---|---|
| environmental effects, lead agencies may refer to the California Agricultural Land Evaluation and Site Assessment Model (1997) prepared by the California Dept. of Conservation as an optional model to use in assessing impacts on agriculture and farmland. In determining whether impacts to forest resources, including timberland, are significant environmental effects, lead agencies may refer to information compiled by the California Department of Forestry and Fire Protection regarding the state's inventory of forest land, including the Forest and Range Assessment Project and the Forest Legacy Assessment project; and forest carbon measurement methodology provided in Forest protocols adopted by the California Air Resources Board. Would the project: | | | | |
| a) Convert Prime Farmland, Unique Farmland, or Farmland of Statewide Importance (Farmland), as shown on the maps prepared pursuant to the Farmland Mapping and Monitoring Program of the California Resources Agency, to non-agricultural use? | ☐ | ☐ | ☐ | ☒ |
| b) Conflict with existing zoning for agricultural use, or a Williamson Act contract? | ☐ | ☐ | ☐ | ☒ |
| c) Conflict with existing zoning for, or cause rezoning of, forest land (as defined in Public Resources Code section 12220(g)), timberland (as defined by Public Resources Code section 4526), or timberland zoned Timberland Production (as defined by Government Code section 51104(g))? | ☐ | ☐ | ☐ | ☒ |
| d) Result in the loss of forest land or conversion of forest land to non-forest use? | ☐ | ☐ | ☐ | ☒ |
| e) Involve other changes in the existing environment which, due to their location or nature, could result in conversion of Farmland, to non-agricultural use or conversion of forest land to non-forest use? | ☐ | ☐ | ☐ | ☒ |
| 3. AIR QUALITY. Where available, the significance criteria established by the applicable air quality management district or air pollution control district may be relied upon to make the following determinations. Would the project: | | | | |
| a) Conflict with or obstruct implementation of the applicable air quality plan? | ☐ | ☐ | ☐ | ☒ |
| b) Result in a cumulatively considerable net increase of any criteria pollutant for which the project region is non-attainment under an applicable federal or state ambient air quality standard? | ☐ | ☐ | ☐ | ☒ |
| c) Expose sensitive receptors to substantial pollutant concentrations? | ☐ | ☐ | ☐ | ☒ |
| d) Result in other emissions (such as those leading to odors) adversely affecting a substantial number of people? | ☐ | ☐ | ☐ | ☒ |
| 4. BIOLOGICAL RESOURCES. Would the project: | | | | |
| a) Have a substantial adverse effect, either directly or through habitat modifications, on any species identified as a candidate, sensitive, or special status species in local or regional plans, policies, or regulations, or by the California Department of Fish | ☐ | ☐ | ☐ | ☒ |

| *Issues* | *Potentially Significant Impact* | *Less Than Significant with Mitigation* | *Less Than Significant Impact* | *No New Impact / No Impact* |
|---|---|---|---|---|
| and Game or U.S. Fish and Wildlife Service? | | | | |
| b) Have a substantial adverse effect on any riparian habitat or other sensitive natural community identified in local or regional plans, policies, regulations or by the California Department of Fish and Game or U.S. Fish and Wildlife Service? | ☐ | ☐ | ☐ | ☒ |
| c) Have a substantial adverse effect on state or federally protected wetlands (including, but not limited to, marsh, vernal pool, coastal, etc.) through direct removal, filling, hydrological interruption, or other means? | ☐ | ☐ | ☐ | ☒ |
| d) Interfere substantially with the movement of any native resident or migratory fish or wildlife species or with established native resident or migratory wildlife corridors, or impede the use of native wildlife nursery sites? | ☐ | ☐ | ☐ | ☒ |
| e) Conflict with any local policies or ordinances protecting biological resources, such as a tree preservation policy or ordinance? | ☐ | ☐ | ☐ | ☒ |
| f) Conflict with the provisions of an adopted Habitat Conservation Plan, Natural Community Conservation Plan, or other approved local, regional, or state habitat conservation plan? | ☐ | ☐ | ☐ | ☒ |
| 5. CULTURAL RESOURCES. Would the project: | | | | |
| a) Cause a substantial adverse change in the significance of a historical resource pursuant to § 15064.5? | ☐ | ☐ | ☐ | ☒ |
| b) Cause a substantial adverse change in the significance of an archaeological resource pursuant to § 15064.5? | ☐ | ☐ | ☐ | ☒ |
| c) Disturb any human remains, including those interred outside of dedicated cemeteries? | ☐ | ☐ | ☐ | ☒ |
| 6. ENERGY. Would the project: | | | | |
| a) Result in potentially significant environmental impact due to wasteful, inefficient, or unnecessary consumption of energy resources, during project construction or operation? | ☐ | ☐ | ☐ | ☒ |
| b) Conflict with or obstruct a state or local plan for renewable energy or energy efficiency? | ☐ | ☐ | ☐ | ☒ |
| 7. GEOLOGY AND SOILS. Would the project: | | | | |
| a) Directly or indirectly cause potential substantial adverse effects, including the risk of loss, injury or death involving: | | | | |
| i) Rupture of a known earthquake fault, as delineated on the most recent Alquist-Priolo Earthquake Fault Zoning Map issued by the State Geologist for the area or based on other substantial evidence of a known fault? Refer to Division of Mines and Geology Special Publication 42. | ☐ | ☐ | ☐ | ☒ |
| ii) Strong seismic ground shaking? | ☐ | ☐ | ☐ | ☒ |
| iii) Seismic-related ground failure, including | ☐ | ☐ | ☐ | ☒ |

| *Issues* | *Potentially Significant Impact* | *Less Than Significant with Mitigation* | *Less Than Significant Impact* | *No New Impact / No Impact* |
|---|---|---|---|---|
| liquefaction? | | | | |
| iv) Landslides? | ☐ | ☐ | ☐ | ☒ |
| b) Result in substantial soil erosion or the loss of topsoil? | ☐ | ☐ | ☐ | ☒ |
| c) Be located on a geologic unit or soil that is unstable, or that would become unstable as a result of the project, and potentially result in on- or off-site landslide, lateral spreading, subsidence, liquefaction or collapse? | ☐ | ☐ | ☐ | ☒ |
| d) Be located on expansive soil, as defined in Table 18-1-B of the Uniform Building Code, creating substantial direct or indirect risks to life or property? | ☐ | ☐ | ☐ | ☒ |
| e) Have soils incapable of adequately supporting the use of septic tanks or alternative wastewater disposal systems where sewers are not available for the disposal of wastewater? | ☐ | ☐ | ☐ | ☒ |
| f) Directly or indirectly destroy a unique paleontological resource or site or unique geologic feature? | ☐ | ☐ | ☐ | ☒ |
| 8. GREENHOUSE GAS EMISSIONS. Would the project: | | | | |
| a) Generate greenhouse gas emissions, either directly or indirectly, that may have a significant impact on the environment? | ☐ | ☐ | ☐ | ☒ |
| b) Conflict with an applicable plan, policy or regulation adopted for the purpose of reducing the emission of greenhouse gases? | ☐ | ☐ | ☐ | ☒ |
| 9. HAZARDS AND HAZARDOUS MATERIALS. Would the project: | | | | |
| a) Create a significant hazard to the public or the environment through the routine transport, use, or disposal of hazardous materials? | ☐ | ☐ | ☐ | ☒ |
| b) Create a significant hazard to the public or the environment through reasonably foreseeable upset and accident conditions involving the release of hazardous materials into the environment? | ☐ | ☐ | ☐ | ☒ |
| c) Emit hazardous emissions or handle hazardous or acutely hazardous materials, substances, or waste within one-quarter mile of an existing or proposed school? | ☐ | ☐ | ☐ | ☒ |
| d) Be located on a site which is included on a list of hazardous materials sites compiled pursuant to Government Code section 65962.5 and, as a result, would it create a significant hazard to the public or the environment? | ☐ | ☐ | ☐ | ☒ |
| e) For a project located within an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project result in a safety hazard or excessive noise for people residing or working in the project area? | ☐ | ☐ | ☐ | ☒ |
| f) Impair implementation of or physically interfere with an adopted emergency response plan or emergency evacuation plan? | ☐ | ☐ | ☐ | ☒ |
| g) Expose people or structures, either directly or indirectly, to a significant risk of loss, injury or death | ☐ | ☐ | ☐ | ☒ |

| *Issues* | *Potentially Significant Impact* | *Less Than Significant with Mitigation* | *Less Than Significant Impact* | *No New Impact / No Impact* |
|---|---|---|---|---|
| involving wildland fires? | | | | |
| 10. HYDROLOGY AND WATER QUALITY. Would the project: | | | | |
| a) Violate any water quality standards or waste discharge requirements or otherwise substantially degrade surface or ground water quality? | ☐ | ☐ | ☐ | ☒ |
| b) Substantially decrease groundwater supplies or interfere substantially with groundwater recharge such that the project may impede sustainable groundwater management of the basin? | ☐ | ☐ | ☐ | ☒ |
| c) Substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river or through the addition of impervious surfaces, in a manner which would: | | | | |
| i) Result in substantial erosion or siltation on- or off-site; | ☐ | ☐ | ☐ | ☒ |
| ii) Substantially increase the rate or amount of surface runoff in a manner which would result in flooding on- or offsite; | ☐ | ☐ | ☐ | ☒ |
| iii) Create or contribute runoff water which would exceed the capacity of existing or planned stormwater drainage systems or provide substantial additional sources of polluted runoff; or | ☐ | ☐ | ☐ | ☒ |
| d) Impede or redirect flood flows? | ☐ | ☐ | ☐ | ☒ |
| e) In flood hazard, tsunami, or seiche zones, risk release of pollutants due to project inundation? | ☐ | ☐ | ☐ | ☒ |
| f) Conflict with or obstruct implementation of a water quality control plan or sustainable groundwater management plan? | ☐ | ☐ | ☐ | ☒ |
| 11. LAND USE AND PLANNING. Would the project: | | | | |
| a) Physically divide an established community? | ☐ | ☐ | ☐ | ☒ |
| b) Cause a significant environmental impact due to a conflict with any land use plan, policy, or regulation adopted for the purpose of avoiding or mitigating an environmental effect? | ☐ | ☐ | ☐ | ☒ |
| 12. MINERAL RESOURCES. Would the project: | | | | |
| a) Result in the loss of availability of a known mineral resource that would be of value to the region and the residents of the state? | ☐ | ☐ | ☐ | ☒ |
| b) Result in the loss of availability of a locally important mineral resource recovery site delineated on a local general plan, specific plan or other land use plan? | ☐ | ☐ | ☐ | ☒ |
| 13. NOISE. Would the project result in: | | | | |
| a) Generation of a substantial temporary or permanent increase in ambient noise levels in the vicinity of the project in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies? | ☐ | ☐ | ☐ | ☒ |
| b) Generation of excessive groundborne vibration or groundborne noise levels? | ☐ | ☐ | ☐ | ☒ |

| *Issues* | *Potentially Significant Impact* | *Less Than Significant with Mitigation* | *Less Than Significant Impact* | *No New Impact / No Impact* |
|---|---|---|---|---|
| c) For a project located within the vicinity of a private airstrip or an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project expose people residing or working in the project area to excessive noise levels? | ☐ | ☐ | ☐ | ☒ |
| 14. POPULATION AND HOUSING. Would the project: | | | | |
| a) Induce substantial unplanned population growth in an area, either directly (for example, by proposing new homes and businesses) or indirectly (for example, through extension of road or other infrastructure)? | ☐ | ☐ | ☐ | ☒ |
| b) Displace substantial numbers of existing people or housing, necessitating the construction of replacement housing elsewhere? | ☐ | ☐ | ☐ | ☒ |
| 15. PUBLIC SERVICES. Would the project: | | | | |
| a) Result in substantial adverse physical impacts associated with the provision of new or physically altered governmental facilities, need for new or physically altered governmental facilities, the construction of which could cause significant environmental impacts, in order to maintain acceptable service ratios, response times or other performance objectives for any of the public services: | | | | |
| i) Fire protection? | ☐ | ☐ | ☐ | ☒ |
| ii) Police protection? | ☐ | ☐ | ☐ | ☒ |
| iii) Schools? | ☐ | ☐ | ☐ | ☒ |
| iv) Parks? | ☐ | ☐ | ☐ | ☒ |
| v) Other public facilities? | ☐ | ☐ | ☐ | ☒ |
| 16. RECREATION. | | | | |
| a) Would the project increase the use of existing neighborhood and regional parks or other recreational facilities such that substantial physical deterioration of the facility would occur or be accelerated? | ☐ | ☐ | ☐ | ☒ |
| b) Does the project include recreational facilities or require the construction or expansion of recreational facilities which have an adverse physical effect on the environment? | ☐ | ☐ | ☐ | ☒ |
| 17. TRANSPORTATION. Would the project: | | | | |
| a) Conflict with a program plan, ordinance or policy addressing the circulation system, including transit, roadway, bicycle and pedestrian facilities? | ☐ | ☐ | ☐ | ☒ |
| b) Conflict or be inconsistent with CEQA Guidelines section 15064.3, subdivision (b)? | ☐ | ☐ | ☐ | ☒ |
| c) Substantially increase hazards due to a geometric design feature (e.g., sharp curves or dangerous intersections) or incompatible uses (e.g., farm equipment)? | ☐ | ☐ | ☐ | ☒ |
| d) Result in inadequate emergency access? | ☐ | ☐ | ☐ | ☒ |

| *Issues* | *Potentially Significant Impact* | *Less Than Significant with Mitigation* | *Less Than Significant Impact* | *No New Impact / No Impact* |
|---|---|---|---|---|
| 18. TRIBAL CULTURAL RESOURCES. Would the project cause a substantial adverse change in the significance of a tribal cultural resource, defined in Public Resources Code section 21074 as either a site, feature, place, cultural landscape that is geographically defined in terms of the size and scope of the landscape, sacred place, or object with cultural value to a California Native American tribe, and that is: | | | | |
| a) Listed or eligible for listing in the California Register of Historical Resources, or in a local register of historical resources as defined in Public Resources Code section 5020.1(k), or | ☐ | ☐ | ☐ | ☒ |
| b) A resource determined by the lead agency, in its discretion and supported by substantial evidence, to be significant pursuant to criteria set forth in subdivision (c) of Public Resources Code section 5024.1. In applying the criteria set forth in subdivision (c) of Public Resources Code section 5024.1, the lead agency shall consider the significance of the resource to a California Native American tribe. | ☐ | ☐ | ☐ | ☒ |
| 19. UTILITIES AND SERVICE SYSTEMS. Would the project: | | | | |
| a) Require or result in the relocation or construction of new or expanded water, wastewater treatment or storm water drainage, electric power, natural gas, or telecommunications facilities, the construction or relocation of which could cause significant environmental effects? | ☐ | ☐ | ☐ | ☒ |
| b) Have sufficient water supplies available to serve the project and reasonably foreseeable future development during normal, dry and multiple dry years? | ☐ | ☐ | ☐ | ☒ |
| c) Result in a determination by the wastewater treatment provider which serves or may serve the project that it has adequate capacity to serve the project's projected demand in addition to the provider's existing commitments? | ☐ | ☐ | ☐ | ☒ |
| d) Generate solid waste in excess of State or local standards, or in excess of the capacity of local infrastructure, or otherwise impair the attainment of solid waste reduction goals? | ☐ | ☐ | ☐ | ☒ |
| e) Comply with federal, state, and local management and reduction statutes and regulations related to solid waste? | ☐ | ☐ | ☐ | ☒ |
| 20. WILDFIRE. If located in or near state responsibility areas or lands classified as very high fire hazard severity zones, would the project: | | | | |
| a) Substantially impair an adopted emergency response plan or emergency evacuation plan? | ☐ | ☐ | ☐ | ☒ |
| b) Due to slope, prevailing winds, and other factors, exacerbate wildfire risks, and thereby expose project occupants to, pollutant concentrations from a wildfire or the uncontrolled spread of a wildfire? | ☐ | ☐ | ☐ | ☒ |
| c) Require the installation or maintenance of associated infrastructure (such as roads, fuel breaks, emergency water sources, power lines or other utilities) that may | ☐ | ☐ | ☐ | ☒ |

| *Issues* | *Potentially Significant Impact* | *Less Than Significant with Mitigation* | *Less Than Significant Impact* | *No New Impact / No Impact* |
|---|---|---|---|---|
| exacerbate fire risk or that may result in temporary or ongoing impacts to the environment? | | | | |
| d) Expose people or structures to significant risks, including downslope or downstream flooding or landslides, as a result of runoff, post-fire slope instability, or drainage changes? | ☐ | ☐ | ☐ | ☒ |
| 21. MANDATORY FINDINGS OF SIGNIFICANCE. (State CEQA Guidelines section 15065(a).) | | | | |
| a) Does the project have the potential to substantially degrade the quality of the environment, substantially reduce the habitat of a fish or wildlife species, cause a fish or wildlife population to drop below self-sustaining levels, threaten to eliminate a plant or animal community, substantially reduce the number or restrict the range of a rare or endangered plant or animal or eliminate important examples of the major periods of California history or prehistory? | ☐ | ☐ | ☐ | ☒ |
| b) Does the project have the potential to achieve short-term environmental goals to the disadvantage of long-term environmental goals? | ☐ | ☐ | ☐ | ☒ |
| c) Does the project have impacts that are individually limited, but cumulatively considerable? ("Cumulatively considerable" means that the incremental effects of a project are considerable when viewed in connection with the effects of past projects, the effects of other current project, and the effects of probable future projects.) | ☐ | ☐ | ☐ | ☒ |
| d) Does the project have environmental effects which will cause substantial adverse effects on human beings, either directly or indirectly? | ☐ | ☐ | ☐ | ☒ |
| Note: Authority cited: Public Resources Code sections 21083, 21083.05, 21083.09.<br>Reference: Gov. EXPLANATION OF ISSUES

1. AESTHETICS. Would the project:

   a. Have a substantial adverse effect on a scenic vista?

Discussion of Effects: The Policy Plan (General Plan) does not identify scenic vistas within the City. However, the Policy Plan (Policy CD1-5) requires all major require north-south streets be designed and redeveloped to feature views of the San Gabriel Mountain. The project site is located along Milliken Avenue and Jurupa Street, both principal arterials, as identified in the Functional Roadway Classification Plan (Figure M-2) of the Mobility Element within the Policy Plan.

The proposed Project would allow for the construction of warehouses within an area that has warehouse, business park, and industrial development. While construction of the Project may block some public views to the north, intermittent views of the San Gabriel Mountains would still be available, and the Project would not result in significant adverse environmental impacts with

regard to views of the San Gabriel Mountains; no significant adverse impacts on a scenic vista would occur.

Mitigation: No additional mitigation is required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

b. Substantially damage scenic resources, including, but not limited to, tress, rock outcroppings and historic buildings within a state scenic highway?

Discussion of Effects: The City of Ontario is served by three freeways: I-10, I-15, and SR-60. I-10 and SR-60 traverse the northern and central portion of the City, respectively, in an east–west direction. I-15 traverses the northeastern portion of the City in a north–south direction. These segments of I-10, I-15, and SR-60 have not been officially designated as scenic highways by the California Department of Transportation. In addition, there are no historic buildings or any scenic resources identified on or in the vicinity of the project site. Therefore, it will not result in adverse environmental impacts.

Mitigation: No additional mitigation is required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

c. Substantially degrade the existing visual character or quality of the site and its surroundings?

Discussion of Effects: The project would not degrade the existing visual character or quality of the site or its surroundings. The project site is located in an urban area that is characterized by industrial development and is surrounded by urban land uses. Development of the proposed Project would be required to meet policies of the TOP Community Design Element and zoning designations on the property. Furthermore, the proposed Project would be required to be consistent with the design guidelines and development standards of the Toyota/Ontario Business Park Specific Plan. The Project site is zoned for Industrial Mixed Use, and the Project would not conflict with regulations governing scenic quality.

Mitigation: No additional mitigation is required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

d. Create a new source of substantial light or glare that would adversely affect day or nighttime views in the area?

Discussion of Effects: New lighting will be introduced to the site with the development of the project. Pursuant to the requirements of the City's Development Code, project on-site lighting will be shielded, diffused or indirect, to avoid glare to pedestrians or motorists. In addition, lighting fixtures will be selected and located to confine the area of illumination to within the project site and minimize light spillage.

Furthermore, as required by the Toyota/Ontario Business Park Specific Plan, a Master Lighting Plan would be submitted to the City of Ontario for review and approval. The Master Plan would contain criteria and standards governing lighting along Toyota Way, lighting within parking lots and access drives, and lighting improvements for pedestrian walkways. The Master Plan would also establish minimum illumination criteria consistent with City of Ontario policies on exterior illumination. Site lighting would be directed inward and downward, to avoid spillover of light and glare onto the adjacent freeway, nearby public streets or onto adjacent properties.

Additionally, the Project would be required to adhere to the following performance standard included in the Toyota/Ontario Business Park Specific Plan:

> ***5.11.3 Light and Glare:*** *No lighting fixture shall create any illumination which exceeds five foot candles on adjacent parcels of land, whether such illumination is direct or indirect. Glare levels shall be measured with a photoelectric photometer following standard spectral luminous efficiency curves adopted by the International Commission of Illumination.*

Site lighting plans are subject to review by the Planning Department and Ontario Police Department prior to issuance of building permits (pursuant to the City's Building Security Ordinance); no significant adverse impacts would occur.

Mitigation: No additional mitigation is required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

2. AGRICULTURE AND FOREST RESOURCES. In determining whether impacts to agricultural resources are significant environmental effects, lead agencies may refer to the California Agricultural Land Evaluation and Site Assessment Model prepared by the California Department of Conservation as an optional model to use in assessing impacts on agriculture and farmland. In determining whether impacts to forest resources, including timberland, are significant environmental effects, lead agencies may refer to information compiled by the California Department of Forestry and Fire Protection regarding the state's inventory of forest land, including the Forest and Range Assessment Project and the Forest Legacy Assessment project; and forest carbon measurement methodology provided in Forest Protocols adopted by the California Air Resources Board. Would the project:

a. Convert Prime Farmland, Unique Farmland, or Farmland of Statewide Importance (Farmland), as shown on the maps prepared pursuant to the Farmland Mapping and Monitoring Program of the California Resources Agency, to non-agricultural use?

Discussion of Effects: The proposed development site is presently vacant and does not contain any agricultural uses. Further, the site is identified as Urban and Built-up Land on the map prepared by the California Resources Agency, pursuant to the Farmland Mapping and Monitoring Program. As a result, no adverse environmental impacts are anticipated.

Mitigation: No additional mitigation is required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

b. Conflict with existing zoning for agricultural use, or a Williamson Act contract?

Discussion of Effects: The project site is not zoned for agricultural use. The project site zoned is Industrial Mixed Use (Toyota Ontario Business Park Specific Plan). The proposed project is consistent with the development standards and allowed land uses of the proposed zone. Furthermore, there is no Williamson Act contract in effect on the subject site. Therefore, no impacts to agricultural uses are anticipated, nor will there be any conflict with existing or Williamson Act contracts.

Mitigation: No additional mitigation is required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

c. Conflict with existing zoning for, or cause rezoning of, forest land (as defined in Public Resources Code section 12220(g)), timberland (as defined by Public Resources Code section

4526), or timberland zoned Timberland Production (as defined by Government Code section 51104(g)?

Discussion of Effects: Impacts to forest land were not analyzed in TOP FEIR, but this topic has since been included as part of the revisions to the State CEQA Guidelines. The Project site is zoned Industrial Mixed Use. Development of the proposed Project would not result in the rezoning of forest land, timberland, or timberland zoned Timberland Production as those land use designations do not exist within the City of Ontario. No impacts to forest or timberland would occur.

Mitigation: No additional mitigation is required. The proposed Project would not conflict with existing zoning or cause rezoning of forest land, timberland, or timberland zoned Timberland Production. No impact would occur and no further analysis of impacts to forest resources or timberland is required in TOP FEIR; no changes or additions to TOP FEIR analysis are necessary.

d. Result in the loss of forest land or conversion of forest land to non-forest use?

Discussion of Effects: There is currently no land in the City of Ontario that qualifies as forest land as defined in Public Resources Code section 12220(g). Neither The Ontario Plan nor the City's Zoning Code provide designations for forest land. Consequently, the proposed project would not result in the loss or conversion of forest land.

Mitigation: No additional mitigation is required. The proposed Project would not result in a loss of forest land or conversion of forest land to non-forest use. No impact would occur and no further analysis of impacts to forest resources is required in TOP FEIR; no changes or additions to TOP FEIR analyses are necessary.

e. Involve other changes in the existing environment, which, due to their location or nature, could individually or cumulatively result in loss of Farmland to non-agricultural use or conversion of forest land to non-forest use?

Discussion of Effects: Construction of the proposed Project would not result in changes to the existing environment that would result in the loss of farmland. While conversion of farmland increases the potential for adjacent areas to also be converted from farmland to urban uses, there are no agricultural uses occurring onsite or in the immediate vicinity of the Project site; the Project does not directly or indirectly result in conversion of farmland. No new cumulative impacts beyond those identified in the Certified TOP FEIR would result from Project construction. As a result, the Project would not result in loss of Farmland to non-agricultural use.

Additionally, there is currently no land in the City of Ontario that qualifies as forest land as defined in Public Resources Code Section 12220(g). Neither TOP nor the City's Zoning Code provide designations for forest land. The proposed Project would not result in the conversion of forest land to non-forest use.

Mitigation Required: No additional mitigation is required. The Project will not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

3. AIR QUALITY. Where available, the significance criteria established by the applicable air quality management or air pollution control district may be relied upon to make the following determinations. Would the project:

a. Conflict with or obstruct implementation of the applicable air quality plan?

Discussion of Effects: As described in TOP FEIR, TOP would not be consistent with the South

Coast Air Quality Management District's Air Quality Management Plan (AQMP) because air pollutant emissions associated with buildout of the City of Ontario would cumulatively contribute to the nonattainment designations in the South Coast Air Basin (SoCAB). Furthermore, buildout of TOP Land Use Plan would exceed estimates of population, employment, and VMT for Ontario; these emissions are not included in the regional emissions inventory for the SoCAB used for the analysis within TOP FEIR. Therefore TOP was considered inconsistent with the AQMP resulting in a significant unavoidable impact.

Because the proposed Project would result in a decrease in the amount of development than was anticipated at the Project site under TOP FEIR, construction and operation of the proposed Project would not increase the identified significant air quality impact associated with implementation of TOP

Mitigation: No additional mitigation is required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

b. Result in a cumulatively considerable net increase of any criteria pollutant for which the project region is non-attainment under an applicable federal or state ambient air quality standard?

Discussion of Effects: As described in TOP FEIR, both construction and operational air quality impacts associated with implementation of TOP Land Use Plan were deemed to be significant. Mitigation measures were identified, but the impacts were still considered significant and unavoidable. These mitigation measures are applicable to the proposed Project, and are included below:

*3-1: The City of Ontario Building Department shall require that all new construction projects incorporate all feasible mitigation measures to reduce air quality emissions. Potential measures shall be incorporated as conditions of approval for a project and may include:*

- *Requiring fugitive dust control measures that exceed South Coast Air Quality Management District's Rule 403, such as:*
- *Requiring use of nontoxic soil stabilizers to reduce wind erosion.*
- *Applying water every four hours to active soil-disturbing activities.*
- *Tarping and/or maintaining a minimum of 24 inches of freeboard on trucks hauling dirt, sand, soil, or other loose materials.*
- *Using construction equipment rated by the United States Environmental Protection Agency as having Tier 3 or higher exhaust emission limits.*
- *Ensuring construction equipment is properly serviced and maintained to the manufacturer's standards.*
- *Limiting nonessential idling of construction equipment to no more than five consecutive minutes.*
- *Using Super-Compliant VOC paints for coating of architectural surfaces whenever possible. A list of Super-Compliant architectural coating manufactures can be found on the South Coast Air Quality Management District's website at: http://www.aqmd.gov/prdas/brochures/Super-Compliant_AIM.pdf.*

*3-2: The City of Ontario shall evaluate new development proposals within the City and require all developments to include access or linkages to alternative modes of transportation, such as transit stops, bike paths, and/or pedestrian paths (e.g., sidewalks).*

Because the proposed Project would result in a decrease in the amount of development anticipated at the Project site compared to what was assumed in TOP FEIR, construction and

operation of the proposed Project would not increase the anticipated air quality impacts identified within TOP FEIR.

Mitigation: No additional mitigation is required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analyses are necessary.

c. Expose sensitive receptors to substantial pollutant concentrations?

Discussion of Effects: As described in TOP FEIR, eight high vehicle count intersections were evaluated for CO emissions, and it was determined that sensitive receptors in the area would not be significantly adversely affected by CO emissions generated at buildout of the Land Use Plan. Localized air quality impacts related to mobile-source emissions were identified as being less than significant.

In addition, as noted in TOP FEIR, the California Air Resource Board (CARB) developed and approved the *Air Quality and Land Use Handbook: A Community Health Perspective* in May 2005 to address the siting of sensitive land uses in the vicinity of freeways, distribution centers, rail yards, ports, refineries, chrome-plating facilities, dry cleaners, and gasoline-dispensing facilities. This guidance document was developed to assess compatibility and associated health risks when placing sensitive receptors near existing pollution sources.

As detailed in TOP FEIR Table 5.3-9, CARB provides the following recommendations for siting new sensitive land uses for distributions centers:

- Avoid siting new sensitive land uses within 1,000 feet of a distribution center (that accommodates more than 100 trucks per day, more than 40 trucks with operating transport refrigeration units [TRUs] per day, or where TRU unit operations exceed 300 hours per week).
- Take into account the configuration of existing distribution centers and avoid locating residences and other sensitive land uses near entry and exit points.

The Project site is located within an industrial area, and is not located in close proximity to any sensitive receptors.

The proposed warehouse would not be located within 1,000 feet of any sensitive receptor, and is not anticipated to generate 100 truck trips per day; the trip generation analysis provided by Ganddini Group estimated 61 truck trips per day. The proposed Project would not place sensitive receptors near existing pollution sources. Therefore, impacts related to the exposure of sensitive receptors to substantial pollutant concentrations would not occur.

Mitigation: No additional mitigation is required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

d. Result in other emissions (such as those leading to odors adversely affecting a substantial number of people)?

Discussion of Effects: As described in TOP FEIR, construction activity would require the operation of equipment that may generate exhaust from either gasoline or diesel fuel. Construction and development would also require the application of paints and the paving of roads, which could generate odors from materials such as paints and asphalt. As these odors are short-term in nature and quickly disperse into the atmosphere, this is not considered significant. Additionally, commercial, industrial, and residential projects, associated with implantation of TOP are also required to comply with SCAQMD Rule 402 to prevent occurrence of public nuisances. As a result, Project-related odors are required to avoid the creation of a public nuisance. Odorous emissions attributable to implementation of TOP are not considered a significant adverse impact to air quality.

Mitigation: No additional mitigation is required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

4. BIOLOGICAL RESOURCES. Would the project:

a. Have a substantial adverse effect, either directly or through habitat modifications, on any species identified as a candidate, sensitive, or special status species in local or regional plans, policies, or regulations, or by the California Department of Fish and Game or U.S. Fish and Wildlife Service?

Discussion of Effects: The Project site is within an urbanized area, characterized by industrial development, and lacks native habitat. However, the United States Department of Fish and Wildlife (USFWS) has identified the Project vicinity as an area where the endangered Delhi Sands flower-loving fly (*Rhaphiomidas terminates abdominalis*) is known to currently or to have at one time existed. Because the Delhi Sands flower-loving fly requires a specific habitat type, this species requires site specific considerations, protection and enhancement of its limited habitat type, and species specific management to maintain the habitat and populations. To avoid potential impacts to this species, the proposed Project conducted pre-construction surveys for Delhi Sands flower-loving fly to determine if the species or its habitat are currently located on the Project site. The pre-construction surveys of the site determined that there is currently no extant habitat for the species nor were any individuals of the species observed on the Project site. Therefore, impacts to species identified as a candidate, sensitive, or special status species will not occur as a result of the proposed Project.

Mitigation: No additional mitigation is required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

b. Have a substantial adverse effect on any riparian habitat or other sensitive natural community identified in local or regional plans, policies, regulations, or by the California Department of Fish and Game or U.S. Fish and Wildlife Service?

Discussion of Effects: The Project site is within an urbanized area and lacks native habitat. According to the United States National Wetlands Inventory (NWI), no riparian habitat is found within the Project site. Therefore, no significant impact would occur to riparian or other sensitive natural communities as a result of construction and operation of the proposed Project.

Mitigation: No additional mitigation is required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

c. Have a substantial adverse effect on federally protected wetlands as defined by Section 404 of the Clean Water Act (including, but not limited to, marsh, vernal pool, coastal, etc.) through direct removal, filling, hydrological interruption, or other means?

Discussion of Effects: The Project site is within an urbanized area and lacks any wetlands. According to the United States National Wetlands Inventory (NWI), no wetlands occur within the Project site; no significant wetlands impact would occur.

Mitigation: No additional mitigation is required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

d. Interfere substantially with the movement of any native resident or migratory fish or wildlife species or with established native resident or migratory wildlife corridors, or impede the use of native wildlife nursery sites?

Discussion of Effects: As described in TOP FEIR, no regional wildlife movement corridors have been identified in the City, and most of the City is ill-suited for the purposes of wildlife movement. Furthermore, the Project site is within an urban area with industrial uses and is bounded on all sides by development. As a result, there are no wildlife corridors connecting this site to other areas. Therefore, no significant wildlife corridor impacts would occur.

Mitigation: No additional mitigation is required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

e. Conflict with any local policies or ordinances protecting biological resources, such as a tree preservation policy or ordinance?

Discussion of Effects: As described in TOP EIR, while the City of Ontario does not have any municipal ordinances for the protection of trees on private property, Municipal Code Sections 10-1.25 and 10-2.05 prohibit the damaging or destruction of trees on City property, except under conditions specified in the Municipal Code. Additionally, TOP Policy ER5-2 notes that the City will comply with state and federal regulations regarding protected species. The proposed Project would not conflict with any local policies or ordinances protection biological resources.

Mitigation: No additional mitigation is required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

f. Conflict with the provisions of an adopted Habitat Conservation Plan (HCP), Natural Community Conservation Plan (NCCP), or other approved local, regional, or state habitat conservation plan?

Discussion of Effects: The site is not part of an adopted HCP, NCCP or other approved habitat conservation plan. As a result, no adverse environmental impacts are anticipated.

Mitigation: No additional mitigation is required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

5. CULTURAL RESOURCES. Would the project:

a. Cause a substantial adverse change in the significance of a historical resource as defined in Section 15064.5?

Discussion of Effects: The Project site is vacant and does not contain any buildings or structures constructed more than 50 years ago (generally, structures need to be at least 50 years or older to be considered historical resources). As such, there are no structures onsite eligible for listing in the California Register of Historic Resources.

A Cultural Resources Records Search was conducted on July 16, 2019 at the California Historic Resource Inventory System at the South Central Coastal Information Center (CHRIS-SCCIC). The records search indicated that there are no cultural resources (prehistoric, historic, or built environments) recorded within the Project boundaries. There was one historic resource (CA-SBR-008857H) located within a one-half mile radius of the Project site. The historic resource is a section of the Southern California Edison Company's Lugo-Mira No. 1 500kv Transmission Line. The

transmission line was determined eligible for listing in the National Register of Historic Place (NRHP) under Criteria A and C, and therefore, is eligible for listing in the California Register of Historic Resources. However, this historic resource would not be impacted (directly or indirectly) by the proposed Project. Therefore, no significant impacts would occur.

Mitigation: No additional mitigation is required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

b. Cause a substantial adverse change in the significance of an archaeological resource pursuant to Section 15064.5?

Discussion of Effects: As described in TOP FEIR, a records review at the Archaeological Information Center at San Bernardino County Museum (SBCM) indicated no known prehistoric archaeological resources in the City of Ontario; however, only about 10 percent of the City has been adequately surveyed for prehistoric or historic archaeology. Figure 5.5-2 of TOP FEIR shows that the Project site has not been surveyed for archeological resources. The CHRIS-SCCIC records search, noted in subsection "a" above, did not identify prehistoric, historic, or historic built environments within or adjacent to the Project boundaries. Additionally, an NAHC Sacred Lands File search failed to indicate archaeological resources or artifacts associated with Tribal Cultural Resources (TCRs) within the Project site.

The Project site has been highly disturbed by modern human activities including agricultural use from the 1940's through the 1960's and the development and construction of the Toyota Motors North American Parts Center and supporting infrastructure that would have displaced potential surface and subsurface archaeological resources. The proposed Project would not impact cultural (prehistoric, historic, or historic built environments) resources and no mitigation measures are recommended.

While no adverse impacts to archeological resources are anticipated at the site due to its urbanized nature, the following City Standard Conditions of Approval would be applied should unanticipated archaeological resources be discovered during excavation or construction:

> *5.2 If any archeological or paleontological resources are found during Project grading, excavation, or construction, the area shall not be disturbed until the significance of the resource is determined. If determined to be significant, the resource shall be recovered by a qualified archeologist or paleontologist consistent with current standards and guidelines, or other appropriate measures implemented*.

Mitigation: No additional mitigation is required. The Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

c. Disturb any human remains, including those interred outside of dedicated cemeteries?

Discussion of Effects: The proposed Project is located in an area that has been previously disturbed by human activity. No known religious or sacred sites exist within the Project area, and human remains are not expected to be encountered during construction activities. However, in the unlikely event that human remains are discovered, existing regulations, including the California Public Resources Code Section 5097.98, would afford protection for human remains discovered during development activities. Furthermore, the following City Standard Conditions of Approval would be applied in the event of unanticipated discoveries of human remains are identified during excavation and construction activities:

*5.1 If human remains are found during Project grading, excavation, or construction activities, the area shall not be disturbed until any required investigation is completed by the County Coroner and/or Native American consultation has been completed (if deemed applicable)*.

Mitigation: No additional mitigation is required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

6. ENERGY. Would the project:

a. Result in potentially significant environmental impact due to wasteful, inefficient, or unnecessary consumption of energy resources, during project construction or operation?

Discussion of Effects: Energy was not analyzed in TOP FEIR, but was included as part of the 2019 revisions to the State CEQA Guidelines. Implementation of the proposed Project would increase the demand for electricity and natural gas at the Project site and gasoline consumption in the region during construction and operation. A detailed discussion is provided below:

***Electricity***

*Construction*. Temporary electric power would be required for lighting and electronic equipment (e.g., computers) located in trailers used by the construction crew. However, the electricity used for such activities would be temporary and would have a negligible contribution to the Project's overall energy consumption.

*Operation*. Operation of the proposed Project would require electricity for multiple purposes, such as: building heating and cooling, lighting, appliances, and electronics. Although electricity consumption would increase at the site under implementation of the proposed Project, the building envelope, HVAC, lighting, and other systems, would be designed to maximize energy performance. The Project would also be subject to statewide mandatory energy requirements as outlined in the CALGreen Code. In addition, the Project would implement additional measures, as detailed in the GHG reduction measures screening table, which would further reduce electricity consumption. For these reasons, the electricity that would be consumed by the Project is not considered to be inefficient or wasteful, and impacts would be less than significant.

***Natural Gas***

*Construction*. Natural gas consumption is not anticipated during construction of the Project. Fuels used for construction would generally consists of diesel and gasoline, which are discussed in the next subsection. Any amounts of natural gas that may be consumed during Project construction would be nominal and would have a negligible contribution to the Project's overall energy consumption.

*Operational*. The operational phase of the proposed Project would require natural gas consumption for various purposes, such as building heating and cooling. While natural gas consumption would increase at the site with construction of the proposed Project, the building envelope, HVAC, lighting, and other systems, would be designed to maximize energy performance. The Project would be subject to statewide mandatory energy requirements as outlined in the CALGreen Code. For these reasons, the natural gas that would be consumed by the Project is not considered to be inefficient or wasteful, and impacts would be less than significant.

***Diesel and Gasoline Fuel***

*Construction*. Diesel and gasoline fuels, also referred to as petroleum in this subsection, would be consumed throughout construction of the Proposed Project. Fuel consumed by construction equipment would be the primary energy resource consumed over the course of construction, and vehicle miles traveled (VMT) associated with the transportation of construction materials (e.g., deliveries to the site) and worker trips to and from the site would also result in petroleum consumption. Whereas on-site, heavy-duty construction equipment and delivery trucks would predominantly use diesel fuel, construction workers would generally rely on gasoline-powered vehicles. Construction-related vehicles would be required to comply with CARB's Airborne Toxic Control Measures, which restricts heavy-duty diesel vehicle idling to five minutes. Since petroleum use during construction would be temporary and required to conduct development activities, it would not be wasteful or inefficient, and impacts would be less than significant.

*Operational*. Fuel consumption associated with development pursuant to the proposed Project's operational phase would primarily be attributable to workers commuting to and from the Project and the operation of large, diesel-powered trucks (e.g., semi-trucks) needed to transport goods. Over the lifetime of the Project, the fuel efficiency of the vehicles being used by the employees is expected to increase. As such, the amount of petroleum consumed as a result of vehicular trips to and from the Project site during operation is anticipated to decrease over time. Operation of the Project is expected to decrease the amount of petroleum it consumes in the future due to advances in fuel economy. Although the proposed Project would increase petroleum use in the region during construction and operation, the use would be a small fraction of the statewide use and, due to efficiency increases, would diminish over time. As such, petroleum consumption associated with the Project would not be considered inefficient or wasteful and would result in a less-than-significant impact.

Mitigation: The Project would not result in any new significant impacts. No changes or additions to TOP FEIR analyses are necessary.

b. Conflict with or obstruct a state or local plan for renewable energy or energy efficiency?

Discussion of Effects: The proposed Project would not conflict with or obstruct a state or local plan adopted for the purposes of increasing the amount of renewable energy or energy efficiency. The California Title 24 Building Code contains energy efficiency standards for non-residential buildings. These standards address electricity and natural gas efficiency in lighting, water, heating, and air conditioning, as well as the effects of the building envelope (e.g., windows, doors, walls and rooves, etc.) on energy consumption. As described above, the Project would be required to comply with the 2019 CALGreen standards, and would implement additional measures identified in the City's Greenhouse Gas Reduction Measures Screening Threshold Table for Commercial and Industrial Development. Given the above, the proposed Project would not conflict with nor obstruct a state or local plan for renewable energy or energy efficiency. This impact would be less than significant.

Mitigation: The Project would not result in any new significant impacts. No changes or additions to TOP FEIR analyses are necessary.

7. GEOLOGY & SOILS. Would the project:

a. Expose people or structures to potential substantial adverse effects, including the risk of loss, injury or death involving:

i. Rupture of a known earthquake fault, as delineated on the most recent Alquist-Priolo Earthquake Fault Zoning Map issued by the State Geologist for the area or based on other

substantial evidence of a known fault? Refer to Division of Mines and Geology Special Publication 42.

Discussion of Effects: There are no active faults known on the site and the project site is located outside the Fault Rapture Hazard Zone (formerly Alquist-Priolo Zone). The Ontario Plan FEIR (Section 5.7/Figure 5.7-2) identifies eight active or potentially active fault zones near the City. Given that the closest fault zone is located more than ten miles from the project site, fault rupture within the project area is not likely. All development will comply with the Uniform Building Code seismic design standards to reduce geologic hazard susceptibility. Therefore, no adverse impacts are anticipated.

Mitigation: No additional mitigation is required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

ii. Strong seismic ground shaking?

Discussion of Effects: There are no active faults known on the site and the project site is located outside the Fault Rapture Hazard Zone (formerly Alquist-Priolo Zone). The Land Use Plan (Figure LU-6) of the Policy Plan (General Plan) FEIR (Section 5.7/Figure 5.7-2) identifies eight active or potentially active fault zones near the City. The closest fault zone is located more than ten miles from the project site. The proximity of the site to the active faults will result in ground shaking during moderate to severe seismic events. All construction will be in compliance with the California Building Code, the Ontario Municipal Code, The Ontario Plan and all other ordinances adopted by the City related to construction and safety. Therefore, no adverse impacts are anticipated.

Mitigation: No additional mitigation is required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

iii. Seismic-related ground failure, including liquefaction?

Discussion of Effects: As identified in the TOP FEIR (Section 5.7), groundwater saturation of sediments is required for earthquake induced liquefaction. In general, groundwater depths shallower than 10 feet to the surface can cause the highest liquefaction susceptibility. Depth to ground water at the project site during the winter months is estimated to be between 250 to 450 feet below ground surface. Therefore, the liquefaction potential within the project area is minimal. Implementation of The Ontario Plan strategies, Uniform Building Code and Ontario Municipal code would reduce impacts to a less than significant level.

Mitigation: No additional mitigation is required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

iv. Landslides?

Discussion of Effects: The project would not expose people or structures to potential adverse effects, including the risk of loss, injury, or death involving landslides because the relatively flat topography of the project site (less than 2 percent slope across the city) makes the chance of landslides remote. Implementation of The Ontario Plan strategies, Uniform Building Code and Ontario Municipal Code would reduce impacts to a less than significant level.

Mitigation: No additional mitigation is required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

b. Result in substantial soil erosion or the loss of topsoil?

Discussion of Effects: Grading increases the potential for erosion by removing protective vegetation, changing natural drainage patterns, and constructing slopes. However, the following City Standard Conditions of Approval would reduce the potential for substantial erosion:

> *3.67 Prior to Grading Plan approval and the issuance of a grading permit, an Erosion and Sediment Control Plan shall be submitted to, and approved by, the Engineering Department. The Erosion and Sediment Control Plan shall specifically identify the Best Management Practices (BMPs) that will be implemented on the Project during construction, to reduce the discharge of sediment and other pollutants into the City's storm drain system.*

Compliance with the California Building Code, review of grading plans, and approval and implementation of the Erosion and Sediment Control Plan by the Engineering Department would ensure no significant erosion impacts occur. Implementation of a NPDES program, the Environmental Resource Element of the Policy Plan (General Plan) strategies, California Building Code, and Ontario Municipal code would reduce impacts to a less than significant level.

Mitigation: No additional mitigation is required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

c. Be located on a geologic unit or soil that is unstable, or that would become unstable as a result of the project, and potentially result in on- or off-site landslide, lateral spreading, subsidence, liquefaction or collapse?

Discussion of Effects: Please see Section 7.a.iii for a discussion of liquefaction and Section 7.a.iv for a discussion of landslides.

Lateral spreading is a form of horizontal displacement of soil toward an open channel or other "free" face, such as an excavation boundary. Lateral spreading may also occur where open banks and unsupported cut slopes provide a free face. Ground subsidence is the gradual settling or sinking of the ground surface with little or no horizontal movement, and most often results from human activities such as the extraction of oil, gas, or groundwater. Effects of subsidence include fissures, sinkholes, depressions, and disruption of surface drainage.

As described in TOP FEIR, projects developed pursuant to TOP would be required to meet the most current seismic safety requirements in the California Building Code (CBC). Chapter 16 of the CBC contains requirements for design and construction of structures to resist loads, including earthquake loads. Chapter 18 contains requirements for excavation, grading, and fill; load-bearing values of soils; and foundations, footings, and piles. Compliance with those requirements would ensure that there would not be substantial impacts related to ground shaking, liquefaction, or seismic settlement. TOP Policy S1-1 would require that all new habitable structures be designed in accordance with the most recent Building Code adopted by the City, including provisions regarding lateral forces and grading. Implementation of TOP strategies, California Building Code, and Ontario Municipal code would reduce impacts to a less than significant level.

Mitigation: No additional mitigation is required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and

addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

d. Be located on expansive soil, as defined in Table 18-1-B of the Uniform Building Code (1994), creating substantial risks to life or property?

Discussion of Effects: Soils containing expansive clay minerals can shrink or swell substantially as the moisture content decreases or increases. Structures built on these soils may experience shifting, cracking, and breaking damage as soils shrink and subside or expand.

As described in TOP FEIR, expansive soils are likely in the southern parts of the City, where there are silts, sandy silts, and silty clays. Near-surface soils in the northern and central parts of the City are primarily granular, that is, silty sand, sand, and gravel; such sediments are usually non-expansive or have very low expansion potential. Projects in the southern part of the City considered for approval under TOP could expose persons or structures to potentially significant hazards from expansive soils. However, compliance with the CBC and review of grading plans for individual projects by the City Engineer would ensure no significant impacts would occur.

Mitigation: No additional mitigation is required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

e. Have soils incapable of adequately supporting the use of septic tanks or alternative wastewater disposal systems where sewers are not available for the disposal of wastewater?

Discussion of Effects: The Project area is served by the local sewer system and the use of septic tanks or alternative wastewater disposal systems is not proposed.

Mitigation: No additional mitigation is required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

f. **Directly or indirectly destroy a unique paleontological resource or site or unique geologic feature?**

g.

Discussion of Effects: A paleontological resources records search prepared for the Project site commissioned through the Natural History Museum of Los Angeles County (NHMLAC) did not identify previously recorded vertebrate fossil localities or unique geological features within the Project Site or within a one-mile radius. There are two previously recorded fossil localities (LACM 7811: Masticophis and LACM 1207: Odocoileus) located within a five-mile radius of the Project site that were discovered within the same sedimentary deposits at depths that extends into the Project area. The results of the literature review and the search at the NHMLAC indicated that the Project site has surficial sediments composed of younger Quaternary Alluvium, derived as alluvial fan deposits from the San Gabriel Mountains to the north or as dune sands. These deposits typically do not contain significant vertebrate fossils, at least in the uppermost layers, but they may be underlain by older sedimentary materials at estimated depths greater than 9 feet. Therefore, MIG concluded that the proposed Project would not result in a significant impact to paleontological resources or unique geological features, and no mitigation measures are recommended.

While no paleontological resources are anticipated on the Project site, the following City Standard Conditions of Approval would be applied should unanticipated paleontological resources be uncovered during excavation and construction activities:

*5.2: If any archeological or paleontological resources are found during Project grading, excavation, or construction, the area shall not be disturbed until the significance of the resource is determined. If determined to be significant, the resource shall be recovered by*

*a qualified archeologist or paleontologist consistent with current standards and guidelines, or other appropriate measures implemented.*

Mitigation: No additional mitigation is required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

8. GREENHOUSE GAS EMISSIONS. Would the project:

a. Generate greenhouse gas emissions, either directly or indirectly, that may have a significant impact on the environment?

Discussion of Effects: The impact of buildout of The Ontario Plan on the environment due to the emission of greenhouse gases ("GHGs") was analyzed in the Environmental Impact Report ("EIR") for the Policy Plan (General Plan). According to the EIR, this impact would be significant and unavoidable. (Re-circulated Portions of the Ontario Plan Draft Environmental Impact Report, p. 2-118.) This EIR was certified by the City on January 27, 2010, at which time a statement of overriding considerations was also adopted for The Ontario Plan's significant and unavoidable impacts, including that concerning the emission of greenhouse gases.

The Project applicant has prepared a Greenhouse Gas Reduction Measures Screening Threshold Table for Commercial and Industrial Development, which identifies the GHG reduction measures that have been incorporated into the Project. As noted in the instructions for completing the table, the Screening Table assigns points for each option incorporated into a project as mitigation or a project design feature. The point values correspond to the minimum emissions reduction expected from each feature. The menu of features allows maximum flexibility and options for how development projects can implement the GHG reduction measures. The point levels are based upon improvements compared to 2008 emission levels of efficiency. Projects that garner at least 100 points will be consistent with the reduction quantities anticipated in the City's CAP. As such, those projects that garner a total of 100 points or greater would not require quantification of project specific GHG emissions. Consistent with CEQA Guidelines, such projects would be determined to have a less than significant individual and cumulative impact for GHG emissions

As shown in the Project GHG Reduction Measures Screening Table, the Project garners a total of 103 points, and is therefore consistent with the reduction quantities anticipated in the City's CAP. Therefore, quantification of Project-specific GHG emissions is not required and the Project GHG impact is considered less than significant. No changes or additions to TOP FEIR analysis are necessary.

Mitigation Required: No new mitigation measures are required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

b. Conflict with an applicable plan, policy or regulation adopted for the purpose of reducing the emissions of greenhouse gases?

Discussion of Effects: The proposed project is consistent with The Ontario Plan Goal ER 4 of improving air quality by, among other things, implementation of Policy ER4-3, regarding the reduction of greenhouse gas emissions in accordance with regional, state and federal regulations. In addition, the proposed project is consistent with the policies outlined in Section 5.6.4 of the Environmental Impact Report for The Ontario Plan, which aims to reduce the City's contribution of greenhouse gas emissions at build-out by fifteen (15%), because the project is upholding the applicable City's adopted mitigation measures as represented in 6-1 through 6-6. Therefore, the

proposed project does not conflict with an applicable plan, policy or regulation adopted for the purpose of reducing emissions of greenhouse gases.

As described in more detail in Section 8.a (above), the proposed Project includes enough GHG reduction features to be considered consistent with the reduction quantities anticipated in the City's Climate Action Plan. Construction and operation of the proposed Project would not result in a significant conflict with an applicable plan, policy or regulation developed to reduce GHG emissions

Mitigation Required: No additional mitigation is required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

9. HAZARDS & HAZARDOUS MATERIALS. Would the project:

a. Create a significant hazard to the public or the environment through the routine transport, use or disposal of hazardous materials?

Discussion of Effects: Construction of the proposed Project would likely involve the use and disposal of chemical agents, solvents, paints, and other hazardous materials associated with construction activities. The amount of these chemicals typically present during construction would be limited, would be in compliance with existing government regulations, and would not be considered a significant hazard.

It is possible that activities associated with operation of the proposed Project would involve transport, use or disposal of hazardous materials. As described in TOP FEIR, current federal and state regulations, City ordinances, and TOP policies would regulate the handling of hazardous substances to reduce potential releases; exposure; and risks of transporting, storing, treating, and disposing of hazardous materials and wastes. Hazardous waste transport, use, and/or disposal that would occur would be less than significant with adherence to the existing regulations.

Mitigation: No additional mitigation is required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

b. Create a significant hazard to the public or the environment through reasonably foreseeable upset and accident conditions involving the release of hazardous materials into the environment?

Discussion of Effects: Operation of the proposed Project may involve the transport, storage, use or disposal of hazardous materials. With existing federal, State and local regulation and oversight of hazardous materials, the risk to the public or the environment from upset and accident conditions involving the release of hazardous materials would be a less than significant.

Mitigation: No additional mitigation is required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

c. Emit hazardous emissions or handle hazardous or acutely hazardous materials, substances or waste within one-quarter mile of an existing or proposed school?

Discussion of Effects: The proposed Project is a warehouse facility, and is not anticipated to generate or emit hazardous emissions or materials as part of its regular operations. It is possible that the facility could store hazardous materials. However, as described in TOP FEIR, current federal

and state regulations, City ordinances, and TOP policies would regulate the handling of hazardous substances to reduce potential releases; exposure; and risks of transporting, storing, treating, and disposing of hazardous materials and wastes. Any hazardous waste transport, use, and/or disposal that would occur with operation of the Project would be less than significant with adherence to the existing regulations.

Mitigation: No additional mitigation is required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

d. Be located on a site which is included on a list of hazardous materials sites compiled pursuant to Government Code Section 65962.5 and, as a result, would it create a significant hazard to the public or the environment?

Discussion of Effects: The proposed project site is not listed on the hazardous materials site compiled pursuant to Government Code Section 65962.5. Therefore, the project would not create a hazard to the public or the environment and no impact is anticipated.

Mitigation: No additional mitigation is required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

e. For a project located within the safety zone of the airport land use compatibility plan for ONT or Chino Airports, would the project result in a safety hazard for people residing or working in the project area?

Discussion of Effects: The proposed Project was reviewed and found to be located within the Airport Influence Area of Ontario International Airport (ONT). An airport influence area includes areas in which current or future airport-related safety, noise, airspace protection, or overflight factors may significantly affect land uses or necessitate restrictions on those uses. The entirety of the City of Ontario is within the ONT influence area. The Project site is located within the ONT airport influence area but outside the airport safety zones. The Project site lies outside the boundaries of the Chino Airport Influence Area.

The Project was evaluated and found to be consistent with the policies and criteria of the Airport Land Use Compatibility Plan (ALUCP) for ONT. The Project is required to file and record an Avigation Easement with the Ontario International Airport Authority prior to obtaining a Certificate of Occupancy. Any potential impact would be considered less than significant.

Mitigation: No additional mitigation is required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

f. For a project within the vicinity of a private airstrip, would the project result in a safety hazard for people residing or working in the project area?

Discussion of Effects: The project site is not located within the vicinity of a private airstrip. Therefore, no impacts are anticipated.

Mitigation: None required.

g. Impair implementation of or physically interfere with an adopted emergency response plan or emergency evacuation plan?

Discussion of Effects: The proposed Project does not include any changes to surrounding

roadways. The City's Safety Element, as included within TOP, includes policies and procedures to be administered in the event of a disaster. TOP seeks interdepartmental and inter-jurisdictional coordination and collaboration to be prepared for, respond to, and recover from every day and disaster emergencies. In addition, the proposed Project would comply with the requirements of the Ontario Fire Department and all City requirements for fire and other emergency access. Because the Project will comply with all applicable City codes, any impacts would be reduced to a less than significant level.

Mitigation: No additional mitigation is required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

h. Expose people or structures to a significant risk of loss, injury or death involving wildland fires, including where wildlands are adjacent to urbanized areas or where residences are intermixed with wildlands?

Discussion of Effects: The Project site is located within an urban industrial area and does not include any changes to roadways. Additionally, according to CalFire mapping, the Project site is not located in or near a State Responsibility Area (SRA), nor is it located in or near lands identified as a Fire Hazard Severity Zone (FHSZ). The closest FHSZ is approximately three miles from the Project site. Therefore, no impacts are anticipated.

Mitigation: No additional mitigation is required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR; no significant wildland fire impact would occur.

10. HYDROLOGY & WATER QUALITY. Would the project:

a. Violate any other water quality standards or waste discharge requirements or potential for discharge of storm water pollutants from areas of material storage, vehicle or equipment fueling, vehicle or equipment maintenance (including washing), waste handling, hazardous materials handling or storage, delivery areas or loading docks, or other outdoor work areas?

Discussion of Effects: The project site is served by City water and sewer service and will not affect water quality standards or waste discharge requirements. Discharge of storm water pollutants from areas of materials storage, vehicle or equipment fueling, vehicle or equipment maintenance (including washing, waste handling, hazardous materials handling or storage, delivery areas or loading docks, or other outdoor work) areas could result in a temporary increase in the amount of suspended solids, trash and debris, oil and grease, organic compounds, pesticides, nutrients, heavy metals and bacteria pathogens in surface flows during a concurrent storm event, thus resulting in surface water quality impacts. The site is required to comply with the statewide National Pollutant Discharge Elimination System (NPDES) General Industrial Activities Stormwater Permit, the San Bernardino County Area-Wide Urban Runoff Permit (MS4 permit) and the City of Ontario's Municipal Code (Title 6, Chapter 6 (Stormwater Drainage System)). This would reduce any impacts to below a level of significance.

Additionally, the Project applicant would be required to submit a Water Quality Management Plan (WQMP), which would establish the site's compliance with storm water discharge and water quality management requirements. The WQMP will include site design measures that capture runoff and pollutant transport by minimizing impervious surfaces and maximizes low impact development (LID) best management practices (BMPs), such as retention and infiltration, biotreatment and evapotranspiration. Furthermore, prior to Grading Plan approval and the issuance of a grading permit, an Erosion and Sediment Control Plan must be approved by the Engineering Department. The Erosion and Sediment Control Plan will specifically identify the Best Management Practices (BMPs) that will be implemented on the Project during construction, to

reduce the discharge of sediment and other pollutants into the City's storm drain system. Adherence to federal and state regulations, City ordinances, and TOP policies would result in a less-than-significant impact.

Mitigation: No additional mitigation is required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

b. Substantially deplete groundwater supplies or interfere substantially with groundwater recharge such that there would be a net deficit in aquifer volume or a lowering of the local groundwater table level (e.g., the production rate of pre-existing nearby wells would drop to a level which would not support existing land uses or planned uses for which permits have been granted)?

Discussion of Effects: No increases in the current amount of water flow to the project site are anticipated, and the proposed project will not deplete groundwater supplies, nor will it interfere with recharge. The water use associated with the proposed use of the property will be negligible. The development of the site will require the grading of the site and excavation is expected to be less than three feet and would not affect the existing aquifer, estimated to be about 230 to 250 feet below the ground surface.

As described in the City's Urban Water Management Plan, the Chino Basin is the City's main source of water supply. Chino Basin encompasses about 235 square miles of the upper Santa Ana River watershed and lies within portions of San Bernardino, Riverside, and Los Angeles counties. The Chino Basin has approximately 5 to 7 million acre feet of water in storage, and an estimated 1 million acre-feet of additional unused storage capacity.

TOP FEIR assumed development on the Project site would be an industrial use. The proposed Project includes warehouse uses, which would generally have a lower water demand than Office/Research & Development (Office/R&D), which was the prior zoning of the Project site. Therefore, this would result in a decrease in demand on groundwater supplies compared to what was evaluated within the TOP FEIR.

While construction of the proposed Project would result in an increase in impervious surfaces, which would decrease the amount of groundwater recharge that occurs on the Project site, given the total size of the Chino Basin, this decrease in pervious surface would not be considered to interfere substantially with groundwater recharge. This potential impact would be considered less than significant.

Mitigation: No additional mitigation is required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

c. Substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river, in a manner which would result in substantial erosion or siltation on- or off-site or volume of storm water runoff to cause environmental harm or potential for significant increases in erosion of the project site or surrounding areas?

Discussion of Effects: The Project site is currently undeveloped, and construction of the proposed Project would change the existing drainage pattern of the Project site. However, the Project applicant would be required to submit an Erosion and Sediment Control Plan which would be approved by the Engineering Department. The Erosion and Sediment Control Plan would specifically identify the Best Management Practices (BMPs) that would be implemented on the Project site during construction to reduce the discharge of sediment and other pollutants into the City's storm drain system. Furthermore, stormwater generated by the Project would be discharged

in compliance with the statewide NPDES Permit and San Bernardino County MS4 permit requirements. Implementation of a Storm Water Pollution Prevention Plan (SWPPP), the BMPs included in the SWPPP, and an Erosion and Sediment Control Plan would reduce any impacts to below a level of significance. No streams or streambeds are present on the site.

Mitigation: No additional mitigation is required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

d. Substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river, or substantially increase the rate or amount of surface runoff in a manner that would result in flooding on- or off-site or potential for significant changes in the flow velocity or volume of storm water runoff to cause environmental harm?

Discussion of Effects: For Building A, runoff from the east portion of the site, along with the northerly landscaped area, would be conveyed through storm drain Line A. Runoff from the west half of the site along with the parking lot to the south of the building would be conveyed through storm drain Line B. These storm drain lines would discharge into an underground infiltration chamber system located in the central portion of the site. The underground infiltration system would be sized to capture and retain the required water quality design capture volume, as well as mitigate discharge to existing conditions for the project site. The system would have a footprint of approximately 54-feet by 160-feet and consist of 60-inch diameter perforated corrugated metal pipes surrounded by gravel. The excess flow generated from higher storm events would be designed to back up in proposed Line A, which would convey and then discharge to the existing private storm drain line in Toyota Way.

For Building B, runoff from the area to the north of the building would be conveyed through storm drain Line C. Runoff from the area to the south of the site would be conveyed through storm drain Line D. The proposed storm drain lines would discharge into an underground infiltration chamber system located in the southwest portion of the site. The underground infiltration system would be sized to capture and retain the required water quality design capture volume. The system would have a footprint of approximately 24-feet by 105-feet and consist of 60-inch diameter perforated corrugated metal pipes surrounded by gravel. The excess flow generated from higher storm events would be designed to back up in proposed Line D and release in Line E, which would convey and then discharge to the existing private storm drain line in Toyota Way. On- or off-site flooding impacts would be considered less than significant.

Mitigation: No additional mitigation is required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

e. Create or contribute runoff water which would exceed the capacity of existing or planned storm water drainage systems or provide substantial additional sources of polluted runoff (a&b) during construction and/or post-construction activity?

Discussion of Effects: Please see Section 10.b.ii for a discussion of on-site storm drainage facilities. The proposed Project's underground infiltration system would be sized to capture and retain the required water quality design capture volume as well as mitigate discharge to existing conditions for the Project site.

Mitigation: No additional mitigation is required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

f. Otherwise substantially degrade water quality or potential for discharge of storm water to

affect the beneficial uses of receiving water?

Discussion of Effects: Activities associated with the construction period, could result in a temporary increase in the amount of suspended solids in surface flows during a concurrent storm event, thus resulting in surface water quality impacts. The site is required to comply with the statewide NPDES General Construction Permit and the City of Ontario's Municipal Code (Title 6, Chapter 6 (Stormwater Drainage System)) to minimize water pollution. Thus it is anticipated that there is no potential for discharges of stormwater during construction that will affect the beneficial uses of the receiving waters. However, with the General Construction Permit requirement and implementation of the policies in The Ontario Plan, any impacts associated with the project would be less than significant.

Mitigation: No additional mitigation is required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

g. Place housing within a 100-year flood hazard area as mapped on a federal Flood Hazard Boundary or Flood Insurance Rate Map or other flood hazard delineation map?

Discussion of Effects: The project site is not located within a 100-year flood hazard area as mapped on a Federal Flood Hazard Boundary or Flood Insurance Rate Map or other flood hazard delineation map. Therefore, no impacts are anticipated.

Mitigation: No additional mitigation is required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

h. Place within a 100-year flood hazard area, structures that would impede or redirect flood flows?

Discussion of Effects: As identified in the Safety Element (Exhibit S-2) of the Policy Plan (General Plan), the site lies outside of the 100-year flood hazard area. Therefore, no adverse impacts are anticipated.

Mitigation: No additional mitigation is required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

i. Expose people or structures to a significant risk of loss, injury or death involving flooding, including flooding as a result of the failure of a levee or dam?

Discussion of Effects: As identified in the Safety Element (Exhibit S-2) of The Ontario Plan, the site lies outside of the 100-year flood hazard area. No levees or dams are located near the project site. Therefore, no adverse impacts are anticipated.

Mitigation: No additional mitigation is required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

j. Expose people or structures to inundation by seiche, tsunami or mudflow?

Discussion of Effects: Impacts associated with flooding are primarily related to the construction or placement of structures in areas prone to flooding including within an unprotected 100-year flood zone, and in areas susceptible to high tides, tsunamis, seiches, mudflows or sea level rise. According to FEMA mapping, the Project site is not located in a known floodplain. No

wetlands have been mapped on the Project site according to the NWI. The Project site is located over 60 miles east of the Pacific Ocean and is not located in a mapped tsunami zone. Additionally, the Project site is not next to a large body of water. Therefore, the Project would not have a significant risk of flood hazard, tsunami, seiche zones.

Mitigation: No additional mitigation is required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

11. LAND USE & PLANNING. Would the project:

a. Physically divide an established community?

Discussion of Effects: The physical division of an established community typically refers to the construction of a physical feature (such as an interstate highway or railroad tracks) or removal of a means of access (such as a local road or bridge) that would impair mobility within an existing community or between a community and outlying area. The Project site is located in an area that is currently developed with urban land uses. This Project would be of similar design and size to surrounding development, and would not change any public roadways. The proposed Project would not physically divide an established community.

Mitigation: No additional mitigation is required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

b. Conflict with applicable land use plan, policy or regulation of agencies with jurisdiction over the project (including, but not limited to general plan, airport land use compatibility plan, specific plan, or development code) adopted for the purpose of avoiding or mitigation an environmental effect?

Discussion of Effects: The proposed project is consistent with The Ontario Plan and does not interfere with any policies for environmental protection. As such, no impacts are anticipated.

Mitigation: No additional mitigation is required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

c. Conflict with any applicable habitat conservation plan or natural community conservation plan?

Discussion of Effects: There are no adopted habitat conservation plans in the project area. As such no conflicts or impacts are anticipated.

Mitigation: None required.

12. MINERAL RESOURCES. Would the project:

a. Result in the loss of availability of a known mineral resource that would be of value to the region and the residents of the state?

Discussion of Effects: As shown in Figure 5.11-1 of TOP FEIR, the Project site is located within an area identified as Mineral Resource Zone 3 (MRZ-3). As described in TOP FEIR, a designation of MRZ-3 indicates the significance of mineral deposits cannot be determined from available data.

The Project site is located within a mostly developed area surrounded by urban land uses

and, as noted in TOP FEIR, development in a MRZ-3 would not result in significant impacts as mineral resources of statewide or local importance are not identified in the California Geological Survey PC maps. Therefore, this potential impact would be considered less than significant.

Mitigation: No additional mitigation is required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

b. Result in the loss of availability of a locally important mineral resource recovery site delineated on a local general plan, specific plan or other land use plan?

Discussion of Effects: The Project site is not identified as a locally important mineral resource recovery site on a local general plan, specific plan, or other land use plan, and there are no known mineral resources on the Project site. No mineral resource impacts would occur.

Mitigation: No additional mitigation is required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

13. NOISE. Would the project result in:

a. Exposure of persons to or generation of noise levels in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies?

Discussion of Effects: Construction Noise. As described in TOP FEIR, there are two types of short-term noise impacts could occur during construction. First, the transport of workers and movement of materials to and from the site could incrementally increase noise levels along local access roads. However, the amount of construction traffic is typically small in relation to the total daily traffic volumes on those roadway segments.

The second type of short-term noise impact is related to demolition, site preparation, grading, and/or physical construction. Construction is performed in distinct steps, each of which has its own mix of equipment, and, consequently, its own noise characteristics. However, despite the variety in the type and size of construction equipment, similarities in the dominant noise sources and patterns of operation allow construction-related noise ranges to be categorized by work phase.

Construction of individual developments associated with buildout of TOP Land Use Plan would temporally increase the ambient noise environment. However, the City of Ontario restricts the hours of construction activities to the least noise-sensitive portions of the day. According to the Municipal Code, construction activities are restricted to the weekday hours of 7:00 AM to 6:00 PM and 9:00 AM to 6:00 PM on Saturday and Sunday. However, construction activities may occur outside of these hours if the City determines that the maintenance, repair, or improvement is necessary to maintain public services or cannot feasibly be conducted during normal business hours, or if construction activities comply with the stationary source noise standards of the Municipal Code (see Table 5.12-4 of TOP FEIR). Because construction activities associated with any individual development may occur near noise-sensitive receptors and noise disturbances may occur for prolonged periods of time, construction noise impacts from buildout of the Land Use Plan are considered significant.

The Project site is identified as industrial use in TOP Land Use Plan. The industrial land use designation is generally not considered a noise sensitive land use. The Project is located in an industrial area and there are no noise-sensitive receptors in the immediate vicinity that may be disturbed by construction of the proposed Project. In addition, the following mitigation measure from TOP FEIR would be applicable:

*Mitigation Measures 12-4: Construction activities associated with new development that occurs near sensitive receptors shall be evaluated for potential noise impacts. Mitigation measures such as installation of temporary sound barriers for adjacent construction activities that occur adjacent to occupied noise-sensitive structures, equipping construction equipment with mufflers, and reducing nonessential idling of construction equipment to no more than five minutes shall be incorporated into the construction operations to reduce construction-related noise to the extent feasible.*

Operational Noise. As described in TOP FEIR, the northeastern portion of the City of Ontario is characterized by industrial warehousing operations. In addition to on-site mechanical equipment, warehousing and industrial land uses generate substantial truck traffic that results in additional sources of noise on local roadways in the vicinity of industrial operations.

The City of Ontario regulates noise sources within the City through the City's Municipal Code (Title 5, Chapter 29, Noise). The City of Ontario Municipal Code has established noise standards for stationary source noise levels, as shown in Table 5.12-4 of TOP FEIR, *City of Ontario Maximum Permissible Exterior Noise Levels*, at various categories of land uses in the City. The City applies the Noise Control Ordinance standards to non-transportation noise sources. These standards do not gauge the compatibility of developments in the noise environment, but provide restrictions on the amount and duration of noise generated at a property, as measured at the property line of the noise receptor.

Industrial noise is less intermittent and can have moderate to high levels on a continual basis. TOP proposes 159,998,711 square feet of industrial land uses at buildout. As shown in Figure 3-6 for TOP FEIR, proposed industrial areas are centered around the Ontario International Airport (ONT) and Chino Airport. In general, new industrial areas would be buffered by business park uses or located around existing major noise sources that would mask most industrial noise (e.g., freeways, Chino Airport, ONT). The siting of new industrial developments may increase noise levels to nearby uses. This can be due to the continual presence of heavy trucks used for the pick-up and delivery of goods and supplies, or from the use of noisy equipment used in the manufacturing or machining process. While vehicle noise on public roadways is exempt from local regulation, for the purposes of the planning process, it may be regulated as a stationary-source noise while operating on private property. To regulate stationary-source noise created by industrial machinery and tools from affecting sensitive land uses, the City of Ontario requires industrial operations to limit noise to no greater than the maximum allowable noise levels as described in the Noise Ordinance.

As shown in TOP FEIR Figure 5.12-6, future noise levels from surface transportation are expected to be between 65 and 75 dBA CNEL, depending on the location within the Project site. Part of the Project site would be expected to experience a 3 to 4 dBA CNEL increase associated with buildout of TOP land use plan.

The proposed Project would be required to comply with the City's Noise Ordinance (Title 5, Chapter 29, Noise). Compliance with the noise ordinance would result in noise levels that are acceptable to the City and would result less than significant noise impacts from stationary sources.

Mitigation: No additional mitigation required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

b. Exposure of persons to or generation of excessive groundborne vibration or groundborne noise levels?

Discussion of Effects: The Proposed Project would involve a warehouse use, and excessive

groundborne vibration or groundborne noise levels are not anticipated with operation of the Project.

Groundborne vibration may occur as part of the construction of the proposed Project. As described in TOP FEIR, construction operations can generate varying degrees of ground vibration, depending on the construction procedures and equipment. Operation of construction equipment generates vibrations that spread through the ground and diminish with distance from the source. The effect on buildings in the vicinity of the construction site varies depending on soil type, ground strata, and receptor-building construction. The results from vibration can range from no perceptible effects at the lowest vibration levels, to low rumbling sounds and perceptible vibrations at moderate levels, and slight structural damage at the highest levels.

The Project site is located within an industrial area, and there are no noise-sensitive receptors in the immediate vicinity. As specific construction equipment use is not known at this time, the following mitigation measure included in TOP FEIR would be applicable to the Project site, and reduce the potential impact to a less-than-significant level:

> *Mitigation Measures 12-2: Individual projects that involve vibration-intensive construction activities, such as pile drivers, jack hammers, and vibratory rollers, occurring near sensitive receptors shall be evaluated for potential vibration impacts. If construction-related vibration is determined to be perceptible at vibration-sensitive uses (i.e., exceed the Federal Transit Administration vibration-annoyance criteria of 78 VdB during the daytime), additional requirements, such as use of less vibration intensive equipment or construction techniques, shall be implemented during construction (e.g., drilled piles to eliminate use of vibration-intensive pile driver).*

Mitigation: No additional mitigation is required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

c. A substantial permanent increase in ambient noise levels in the project vicinity above levels existing without the project?

Discussion of Effects: The project will not be a significant noise generator and will not cause a substantial permanent increase in ambient noise levels because of the limited size and scope of the project. Moreover, the proposed use will be required to operate within the noise levels permitted for commercial development, pursuant to City of Ontario Development Code. Therefore, no increases in noise levels within the vicinity of the project are anticipated.

Mitigation: No additional mitigation is required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

d. A substantial temporary or periodic increase in ambient noise levels in the project vicinity above levels existing without the project?

Discussion of Effects: Temporary construction activities will minimally impact ambient noise levels. All construction machinery will be maintained according to industry standards to help minimize the impacts. Normal activities associated with the project are unlikely to increase ambient noise levels.

Mitigation: No additional mitigation is required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

e. For a project located within the noise impact zones of the airport land use compatibility plan for ONT and Chino Airports, would the project expose people residing or working in the project area to excessive noise levels?

Discussion of Effects: According to the Safety Element in The Ontario Plan, the proposed site is located within the airport land use plan. However, the project is located outside of the 65CNEL noise contour. Therefore, no impacts are anticipated.

Mitigation: None required.

f. For a project within the vicinity of a private airstrip, would the project expose people residing or working in the project area to excessive noise levels?

Discussion of Effects: The project site is not located within the vicinity of a private airstrip. Therefore, no impacts are anticipated.

Mitigation: No additional mitigation is required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

14. POPULATION & HOUSING. Would the project:

a. Induce substantial population growth in an area, either directly (for example, by proposing new homes and businesses) or indirectly (for example, through extension of road or other infrastructure)?

Discussion of Effects: This proposed Project includes construction of two warehouse buildings and associated site improvements. The Project does not include new housing or a large employment generator, which could directly induce substantial unplanned population growth. Additionally, the proposed Project does not include the expansion of infrastructure, which could indirectly cause unplanned population growth. No population growth impacts are anticipated.

Mitigation: No additional mitigation is required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

b. Displace substantial numbers of existing housing, necessitating the construction of replacement housing elsewhere?

Discussion of Effects: The Project site is currently vacant and does not include any housing units. Construction of the Project would not displace substantial numbers of existing people or housing, necessitating the construction of replacement housing; no impact would occur.

Mitigation: No additional mitigation is required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

c. Displace substantial numbers of people, necessitating the construction of replacement housing elsewhere?

Discussion of Effects: The project site is currently undeveloped. Therefore, no impacts are anticipated.

Mitigation: No additional mitigation is required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and

addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

15. PUBLIC SERVICES. Would the project:

a. Result in substantial adverse physical impacts associated with the provision of new or physically altered governmental facilities, need for new or physically altered governmental facilities, the construction of which could cause significant environmental impacts, in order to maintain acceptable service ratios, response times or other performance objectives for any of the public services:

i. Fire protection?

Discussion of Effects: The Ontario Fire Department provides fire service to the Project site. The Ontario Fire Department has ten fire stations, including the Ontario International Airport (ONT) fire station. These fire stations house nine 4-person paramedic engine companies, three 4-person truck companies, an 8-person ARFF station, one fire investigation supervisor, and two battalion chiefs. The closest fire station to the Project site is Ontario Fire Department Station 7, located at 4901 Vanderbilt Street, which is approximately one mile from the Project site.

In 2020, the Ontario Fire Department responded to over 20,000 calls for service, approximately 55 calls per day, ranging from medical emergencies to a traffic collisions to large commercial fires. Ontario Fire Department has 221 personnel comprised of 182 sworn firefighters and 39 professional staff members serving our community across five bureaus – Operations, Fire Prevention, Support Services/Airport Operations, EMS, and Administrative Services.

As described in TOP FEIR, firefighter staffing needs are determined by the Ontario Fire Department by the number of calls and requests for fire services within the service area. The Fire Department also reviews service contracts with the California Department of Forestry to ensure fire services in times of emergency. To ensure the provision of adequate fire protection services, the City of Ontario has established a Development Impact Fee Program to provide funding for services within the City. Fees collected from developers are placed in a fire services fund that can be expended for the acquisition or construction of new fire services facilities and for the improvement or expansion of the City's existing fire service capabilities, provided that such expenditure from the fund has been authorized by the City Council. The Project applicant would be required to pay all appropriate fire service development fees.

Additionally, as described in detail in TOP FEIR, future growth in accordance with TOP is expected to increase the demand for fire services throughout the city but especially in the New Model Colony (NMC). The Development Impact Fee and Nexus Schedule (2005) recommends that two new stations would be built in the Old Model Colony (OMC) to replace stations number 3 and 7 and that four new stations be built in the NMC. The funding needed to build these stations has been assessed and incorporated into the fee schedule and it would be adequate for the proposed development and relocation of stations. Various localized environmental impacts related to construction of new fire stations could occur; however environmental review would occur once site specific plans have been developed.

Mitigation: No additional mitigation is required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the TOP FEIR. No changes or additions to TOP FEIR analyses are necessary.

ii. Police protection?

Discussion of Effects: The Ontario Police Department is a full-service police agency providing a wide range of crime suppression, education, and prevention services to the community. The Ontario Police Department has three main service bureaus: the Uniform Bureau,

Investigations Bureau, and Service Bureau. Within these bureaus, the department comprises the Police Administration, Air Support Unit, Community Oriented Problem Solving unit, Special Weapons and Tactics Team, Traffic Division, Communications Division, Investigation Division, and Crime Prevention Division.

The Ontario Police Department has implemented a geographical based policing program. As part of this "Geo-Policing" program, the city has been divided into three geographical areas: West, East, and South. Each area has an assigned Lieutenant as Area Commander. The Area Commander is responsible for the delivery of police services in their area of control with an emphasis on the preservation and improvement of the quality of life, safety, and economic value of those who live and do business in the city. Each area has dedicated teams of officers and corporals, headed by police sergeants, who work day-to-day (24/7) patrol operations; traffic officers; Community Oriented Problem Solving (C.O.P.S.) officers, who work special projects; narcotics investigators; and detectives. The Project site is located within the East Area Command.

As described in TOP FEIR, buildout of TOP would result in an increase in demand for police protection services within the City. New facilities, equipment, and personnel may be necessary to maintain adequate levels of service. Development within the City would be subject to development impact fees that would pay for police services. The police services required to cover the new development and population growth for the City of Ontario would be assessed and acquired appropriately based on the needs of the City. The police services would receive adequate funding through the City's general fund to cover Project needs.

Buildout of TOP would result in an impact on the Ontario Police Department and their ability to deliver police services in a timely manner. Buildout of TOP would require the hiring of new staff and the building of new facilities. Environmental impacts would result from the construction of these facilities and each project would have to complete environmental review under CEQA. Various localized environmental impacts related to construction of new police facilities could occur; however environmental review would occur once site specific plans have been developed and potential environmental impacts would be reduced to less than significant through mitigation and compliance with existing regulations.

Mitigation: No additional mitigation is required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

iii. Schools?

Discussion of Effects: The proposed Project does not include residential uses and is not expected to directly increase demand for school services. The proposed Project would be required to pay applicable development impact fees to the Cucamonga School District and the Chaffey Joint Union High School District, which provide school services to the Project site and surrounding area. Currently, the Cucamonga School District collects a development fee of $0.228 per square foot of Industrial/Warehouse/Manufacturing Use. Based on a revenue sharing agreement, the Chaffey Joint Union High School District receives approximately 31 percent of the school impact fee collected. Payment of school impact fees, as allowed by Government Code 65996, are meant to offset increased student enrollment and has been deemed by the State legislature (per Government Code Section 65995(h)) to constitute full and complete mitigation of impacts of a development project on the provision of adequate school facilities. No impacts are anticipated.

Mitigation: No additional mitigation is required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered

and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

iv. Parks?

Discussion of Effects: This proposed Project includes construction of two warehouse buildings and associated site improvements. The Project does not include new housing or a large employment generator that would cause an increase in the use of neighborhood parks or other recreational facilities; this potential impact would be considered less than significant.

Mitigation: No additional mitigation is required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

v. Other public facilities?

Discussion of Effects: This proposed Project includes construction of two warehouse buildings and associated site improvements. The Project does not include new housing or a large employment generator that would cause an increase in the use of public facilities, such as libraries; this potential impact would be considered less than significant.

Mitigation: No additional mitigation is required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

16. RECREATION. Would the project:

a. Increase the use of existing neighborhood and regional parks or other recreational facilities such that substantial physical deterioration of the facility would occur or be accelerated?

Discussion of Effects: This proposed Project includes construction of two warehouse buildings and associated site improvements. The Project does not include new housing or a large employment generator that would cause an increase in the use of neighborhood parks or other recreational facilities; this potential impact would be considered less than significant.

Mitigation: No additional mitigation is required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

b. Does the project include recreational facilities or require the construction or expansion of recreational facilities that have an adverse physical effect on the environment?

Discussion of Effects: The Project does not include construction of recreational facilities. Additionally, the Project is not proposing any new housing or a large employment generator that would require the construction or expansion neighborhood parks or other recreational facilities; this potential impact would be considered less than significant.

Mitigation: No additional mitigation is required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

17. TRANSPORTATION/TRAFFIC. Would the project:

a. Conflict with an applicable plan, ordinance or policy establishing measures of effectiveness for the performance of the circulation system, taking into account all modes of transportation including mass transit and non-motorized travel and relevant components of the circulation system, including but not limited?

Discussion of Effects: The project is in an area that is mostly developed with all street improvements existing. The number of vehicle trips per day is not expected to be increased as a result of this Project. Less than significant impacts are anticipated.

Mitigation: No additional mitigation is required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

b. Conflict with an applicable congestion management program, including, but not limited to, level of service standard and travel demand measures, or other standards established by the county congestion management agency for designated roads or highways?

Discussion of Effects: TOP FEIR concluded that trips generated as a result of buildout TOP Land Use Plan would cause a deficient level of service (LOS) for existing area intersections without implementation of the recommended lane geometry improvements. In addition, buildout of TOP Land Use Plan would also cumulatively contribute to the cumulatively significant freeway level of service impact that is already projected to occur in the future. TOP FEIR Mitigation Measure 16-1 includes development of more enhanced intersections throughout the City, as identified in Table 5.16-6 of TOP FEIR, and construction of additional turn and through lanes. As further described in TOP FEIR, implementation of these improvements would result in LOS E or above at all intersections during both AM and PM peak hours. With implementation of the mitigation measure, impacts to local roadways would be less than significant. However, buildout of TOP Land Use Plan would result in additional traffic volume that would significantly cumulatively contribute to mainline freeway segment impacts. The City's development impact fees cannot be used for improvements to roadway facilities under the sole jurisdiction of the California Department of Transportation (Caltrans), such as freeway mainline segments, and the City cannot widen the freeway itself. Consequently, impacts to freeway segments within the City were identified as significant and unavoidable.

As described in more detail in Section 17.b, below, the proposed Project is forecast to generate fewer trips than the original zoning of the site, which was incorporated in TOP FEIR. The traffic impacts associated with the proposed Project would be considered consistent with and less than the traffic impacts projected and analyzed in TOP FEIR. The proposed Project would not create an increase in the number of vehicle trips, traffic volume, or congestion at intersections than has already been evaluated in TOP FEIR.

As described in TOP FEIR, the Mobility Element would introduce and implement various strategies and approaches to accommodate multiple modes of travel. The plan accounts for improvements and enhancements to roadways (for passenger cars, trucks, buses, and bicycles), rail lines (for freight and passenger rail), and trails and walkways (for bicycles and pedestrians). The strategies and approaches to improvements to public transit and nonmotorized transportation would ensure that this impact would be less than significant. Construction of the proposed Project would not impede implementation of the strategies identified in the Mobility Element, and the impact would be considered less than significant.

Mitigation: No additional mitigation is required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

c. Result in a change in air traffic patterns, including either an increase in traffic levels or a

change in location that results in substantial safety risks?

Discussion of Effects: The project will not create a substantial safety risk or interfere with air traffic patterns at Ontario International Airport as it is under such height restrictions. No impacts are anticipated.

Mitigation: No additional mitigation is required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

d. Conflict or be inconsistent with CEQA Guidelines section 15064.3, subdivision (b)?

Discussion of Effects: CEQA Guidelines Section 15064.3 subdivision (b) has been included in the 2018 CEQA Guidelines update as part of the implementation of SB 743, which requires local jurisdictions use Vehicle Miles Travelled (VMT) instead of Level of Service (LOS) methodologies for the purpose of determining the significance of traffic impacts under CEQA. As part of the implementation of SB 743, local jurisdiction were given until July 1, 2020 to develop and implement thresholds of significance criteria and methodologies for evaluating VMT under the new SB 743 requirements. TOP FEIR was certified prior to adoption of SB 743. As such, the analysis of traffic impacts within TOP FEIR is based on Level of Service (LOS) methodologies, not Vehicle Miles Travelled (VMT). As TOP FEIR relies on LOS for the analysis of the transportation impacts, this Addendum also includes a discussion of LOS.

TOP FEIR concluded that trips generated as a result of buildout of TOP Land Use Plan would cause a deficient LOS for the existing area intersections without implementation of the recommended lane geometry improvements. In addition, buildout of TOP Land Use Plan would also cumulatively contribute to the cumulatively significant freeway level of service impact that were projected to occur in the future. TOP FEIR Mitigation Measure 16-1 includes development of more enhanced intersections throughout the City, as identified in Table 5.16-6 of the TOP FEIR, and construction of additional turn and through lanes. As further described in TOP FEIR, implementation of these improvements would result in LOS E or above at all intersections during both AM and PM peak hours. Under the City's development impact fee program, project applicants for new developments can either contribute their fair share toward traffic improvements or make the improvements as part of the project. Additionally, the City of Ontario has a Capital Improvement Program that details the implementation of regional improvements. With implementation of the mitigation measure, impacts to local roadways would be less than significant. However, buildout of TOP Land Use Plan would result in additional traffic volume that would significantly cumulatively contribute to mainline freeway segment impacts. The City's development impact fees cannot be used for improvements to roadway facilities under Caltrans' sole jurisdiction, such as freeway mainline segments, and the City cannot widen the freeway itself. Consequently, impacts to freeway segments within the City were identified as significant and unavoidable.

TOP FEIR analysis assumed that the Project site would have an Industrial land use. The Toyota/Ontario Business Park Specific Plan identified the site as having a maximum development potential of 300,000 square feet. The Specific Plan Amendment to the Toyota/Ontario Business Park Specific Plan adopted by the City Council in 2020 changed the zoning of the site from Office/Research & Development (Office/R&D) to Industrial Mixed Use. The proposed Project includes development of two warehouse buildings totaling 168,772 square feet, which includes approximately 15,000 square feet of office space and approximately 153,772 square feet of warehouse space.

To evaluate the potential change in trips associated with the Specific Plan Amendment for the Project site, Ganddini evaluated the trip generation associated with the original Office/Research and Development zoning designation, as well as the development for the Specific Plan Amendment. It should be noted that for the Specific Plan Amendment development

analysis, the Ganddini Group evaluated a development scenario that was slightly larger (approximately 4,475 square feet) than what the Project proposes. As shown in Table 5, the Proposed Project would result in a reduction in the number of trips generated on the Project site compared to the prior zoning designation.

**Table 5: Trip Generation Comparison**

| Zoning | Quantity | Trip Generation | | | | | | |
|---|---|---|---|---|---|---|---|---|
| | | AM Peak Hour | | | PM Peak Hour | | | Daily |
| | | In | Out | Total | In | Out | Total | |
| Original Zoning (Office) | 300,000 SF | 299 | 49 | 348 | 55 | 290 | 345 | 2,922 |
| Proposed (Warehouse) | 173,247 SF(A) | 35 | 14 | 49 | 16 | 36 | 52 | 394 |
| **Trip Generation Comparison (Proposed – Original)** | | **-264** | **-35** | **-299** | **-39** | **-254** | **-293** | **-2,528** |

Source: Ganddini Group Inc, 2019.
(A) While the proposed Project includes 168,772 square feet of floor area, the Ganddini report analyzed impacts from 173,247 square feet of floor area.

The proposed Project is forecast to generate fewer trips than the original zoning of the site. The traffic impacts associated with the proposed Project would be considered consistent with and less than the traffic impacts projected and analyzed with TOP FEIR. The proposed Project would not create a substantial increase in the number of vehicle trips, traffic volume or congestion at intersections than has already been evaluated within the FEIR.

Mitigation: No additional mitigation is required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

e. Substantially increase hazards due to a design feature (e.g., sharp curves or dangerous intersections) or incompatible uses (e.g., farm equipment)?

Discussion of Effects: The Project is in an area that is mostly developed, and no alterations are proposed for adjacent intersections or arterials. The Project would not create a substantial increase in hazards due to a design feature; this potential impact would be considered less than significant.

Mitigation: No additional mitigation is required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

f. Result in inadequate emergency access?

Discussion of Effects: The proposed Project would not include any changes to adjacent roadways. Additionally, development of the proposed Project includes fire lanes and would provide access for all emergency vehicles. The proposed Project would not result in a significant impact related to inadequate emergency access.

Mitigation: No additional mitigation is required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

g. Result in inadequate parking capacity?

Discussion of Effects: The project is required to meet parking standards established by the Ontario Development Code and will therefore not create an inadequate parking capacity. No impacts are anticipated.

Mitigation: No additional mitigation is required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

h. Conflict with adopted policies, plans, or programs supporting alternative transportation (e.g., bus turnouts, bicycle racks)?

Discussion of Effects: The project does not conflict with any transportation policies, plans or programs. Therefore, no impacts are anticipated.

Mitigation: None required.

18. TRIBAL CULTURAL RESOURCES. Would the project cause a substantial adverse change in the significance of a tribal cultural resource, defined in Public Resources Code section 21074 as either a site, feature, place, cultural landscape that is geographically defined in terms of the size and scope of the landscape, sacred place, or object with cultural value to a California Native American tribe, and that is:

a. Listed or eligible for listing in the California Register of Historical Resources, or in a local register of historical resources as defined in Public Resources Code section 5020.1(k)?

   Discussion of Effects: The results of the records research compiled from the CHRIS-SCCIC, the Scared Lands File Search (commissioned through the NAHC) failed to indicate known Tribal Cultural Resources (TCR) within the Project boundaries or within a one-mile radius of the Project area as specified in Public Resources Code (PRC): 210741, 5020.1(k), or 5024. Moreover, there was no indication of known TCRs within the Project site or within a one-mile radius of the Project Area. In compliance with AB 52, it is the responsibility of the Public Agency (e.g. Lead Agency) to consult with Native American tribes early in the CEQA process to allow tribal governments, lead agencies, and project proponents to discuss the appropriate level of environment review, identify and address potential adverse impacts to TCRs, and reduce the potential for delay and conflict in the environmental review process (see PRC Section 2108.3.2). Specifically, government-to-government consultation may provide "tribal knowledge" of the Project Area that can be used in identifying TCRs that cannot be obtained through other investigative means.

   The Project Site has been highly disturbed by modern human activities to include agricultural use from the 1940's through the 1960's and the development and construction of the Toyota Motors North American Parts Center and supporting infrastructure that would have displaced surface and subsurface archaeological resources. Therefore, it is concluded that the proposed Project would not impact Tribal Cultural Resources or Native America artifacts relating to TCR's and as such, no mitigation measures are recommended.

   Mitigation: No new mitigation measures required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

b. A resource determined by the lead agency, in its discretion and supported by substantial evidence, to be significant pursuant to criteria set forth in subdivision (c) of Public Resources Code section 5024.1. In applying the criteria set forth in subdivision (c) of Public Resources Code section 5024.1, the lead agency shall consider the significance of the resource to a California Native American tribe.

Discussion of Effects: The subject site is not listed in the California Register of Historic Resources. It is anticipated that during the application process the Lead Agency will notify the tribes of the proposed Specific Plan Amendment and will commence AB 52 Consultations as specified in the regulations. In addition, the results of the records research compiled from the CHRIS-SCCIC, the Scared Lands File Search (commissioned through the NAHC) failed to indicate known Tribal Cultural Resources (TCR) within the Project boundaries or within a one-mile radius of the Project area as specified in Public Resources Code (PRC): 210741, 5020.1(k), or 5024. Moreover, there was no indication of known TCRs within the Project site or within a one-mile radius of the Project Area. No impacts are anticipated through Project implementation.

Mitigation: No new mitigation measures are required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

19. UTILITIES AND SERVICE SYSTEMS. Would the project:

a. Exceed wastewater treatment requirements of the applicable Regional Water Quality Control Board?

Discussion of Effects: The proposed project is served by the City of Ontario sewer system, which has waste treated by the Inland Empire Utilities Agency at the RP-1 treatment plant. The project is required to meet the requirements of the Ontario Engineering Department regarding wastewater. No impacts are anticipated.

Mitigation: No new mitigation measures are required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

b. Require or result in the construction of new water or wastewater treatment facilities or expansion of existing facilities, the construction of which could cause significant environmental effects?

Discussion of Effects: The proposed project is served by the City of Ontario sewer system and which has waste treated by the Inland Empire Utilities Agency at the RP-1 treatment plant. RP-1 is not at capacity and this project will not cause RP-1 to exceed capacity. The project will therefore not require the construction of new wastewater treatment facilities, or the expansion of existing facilities. No impacts are anticipated.

Mitigation: No new mitigation measures are required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

c. Require or result in the construction of new storm water drainage facilities or expansion of existing facilities, the construction of which could cause significant environmental effects?

Discussion of Effects: As described in TOP FEIR, the potable water network in Ontario includes 536 miles of pipeline, ranging from 2 to 42 inches in diameter. The City has four pressure zones. Locally obtained water comes from approximately 20 operating groundwater wells in Ontario and the Chino Basin Desalter Authority (CDA). The Project Site would be served by City of Ontario water system and there is a 12-inch water line available for connection in Jurupa Street.

TOP FEIR includes a discussion of the City's sewer system. The City sewer mains are primarily constructed of vitrified clay pipe ranging from 4 to 42 inches in diameter. Approximately 75 percent of the pipes are 8 inches in diameter. The City's sewers are classified into two groups: primary sewers, greater than 15 inches in diameter, and secondary sewers, 15 inches or smaller in diameter. The City has about 375 miles of gravity sewers. The City's wastewater collection system also consists of two City-owned pump stations, one privately owned/City-maintained pump station, over 7,000 feet of associated force mains, and five siphons. The Project would connect to an 8-inch sewer line off Jurupa Street.

Wastewater generated at the Project site would be treated by the Inland Empire Utilities Agency at Regional Water Recycling Plant No. 1 (RP-1). RP-1 is located in the City of Ontario and has undergone several expansions to increase the design hydraulic domestic wastewater treatment capacity to 44 million gallons per day. The plant treats an average influent wastewater flow of approximately 28 million gallons per day. The plant serves areas of Chino, Fontana, Montclair, Ontario, Rancho Cucamonga, Upland, and solids removed from RP-4, located in Rancho Cucamonga. RP-1 has treatment capacity and future development of this Project site would not cause RP-1 to exceed capacity.

The City of Ontario maintains the local stormwater drainage system, which includes regional (major) drainage facilities designed to convey peak 100-year discharge flows and secondary drainage facilities designed for peak 10-, 25-, or 100-year flows that convey locally generated flows to regional facilities. The City's stormwater is collected and diverted into various channels that empty into the Santa Ana River; a small portion is reclaimed in spreading basins for reuse as percolated groundwater. The primary direction of drainage flow in the Chino watershed is from the San Gabriel Mountains southward to the Santa Ana River, then southwest in the river.

For Building A, runoff from the east portion of the site, along with the northerly landscaped area, would be conveyed through storm drain Line A. Runoff from the west half of the site along with the parking lot to the south of the building would be conveyed through storm drain Line B. These storm drain lines would discharge into an underground infiltration chamber system located in the central portion of the site. The underground infiltration system would be sized to capture and retain the required water quality design capture volume, as well as mitigate discharge to existing conditions for the Project site. The system would have a footprint of approximately 54-feet by 160-feet and consist of 60-inch diameter perforated corrugated metal pipes surrounded by gravel. The excess flow generated from higher storm events would be designed to back up in proposed Line A, which would convey and then discharge to the existing private storm drain line in Toyota Way.

For Building B, runoff from the north of the building would be conveyed through storm drain Line C. Runoff from the south of the building would be conveyed through storm drain Line D. The proposed storm drain lines would discharge into an underground infiltration chamber system located in the southwest portion of the site. The underground infiltration system would be sized to capture and retain the required water quality design capture volume. The system would have a footprint of approximately 24-feet by 105-feet and consist of 60-inch diameter perforated corrugated metal pipes surrounded by gravel. The excess flow generated from higher storm events would be designed to back up in proposed Line D and release in Line E, which would convey and then discharge to the existing private storm drain line in Toyota Way.

The proposed Project would not require the construction of new water or wastewater treatment facilities, or the expansion of existing facilities. As discussed in the Energy Section above (Section 6), the Project would have less than significant impacts with regard to electric power and natural gas. In addition, the Project would not have an impact on telecommunications facilities. Construction and operation of the proposed Project would result in a less than significant impact related to utilities services.

Mitigation: No new mitigation measures are required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

d. Have sufficient water supplies available to serve the project from existing entitlements and resources, or are new or expanded entitlements needed? In making this determination, the City shall consider whether the project is subject to the water supply assessment requirements of Water Code Section 10910, et seq. (SB 610), and the requirements of Government Code Section 664737 (SB 221).

Discussion of Effects: As a water supplier, the City is required to prepare and Urban Water Management Plan (UWMP). A UWMP provides a framework for long term water supply and evaluates existing water conservation efforts. As described in the City's UWMP, purchased water and groundwater supplies are sufficient in meeting the City's water demands under all base years, including during normal, single, and multiple dry years. Sufficient water supplies are available to serve the proposed Project.

Mitigation: No additional mitigation required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

e. Result in a determination by the wastewater treatment provider that serves or may serve the project that it has adequate capacity to serve the project's projected demand in addition to the provider's existing commitments?

Discussion of Effects: Wastewater generated at the Project site would be treated by the Inland Empire Utilities Agency at the Regional Water Recycling Plant No. 1 (RP-1). RP-1 is located in the City of Ontario and has undergone several expansions to increase the design hydraulic domestic wastewater treatment capacity to 44 million gallons per day. The plant treats an average influent wastewater flow of approximately 28 million gallons per day. The plant serves areas of Chino, Fontana, Montclair, Ontario, Rancho Cucamonga, Upland, and solids removed from the Regional Water Recycling Plant No. 4 (RP-4), located in Rancho Cucamonga. RP-1 has treatment capacity, and future development of this Project site would not cause RP-1 to exceed capacity.

Mitigation: No additional mitigation required. The proposed Project will not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analyses are necessary.

f. Be served by a landfill with sufficient permitted capacity to accommodate the project's solid waste disposal needs?

Discussion of Effects: City of Ontario serves the proposed project. Currently, the City of Ontario contracts with a waste disposal company that transports trash to a landfill with sufficient capacity to handle the City's solid waste disposal needs. No impacts are anticipated.

Mitigation: None required.

g. Generate solid waste in excess of state or local standards, or in excess of the capacity of local infrastructure, or otherwise impair the attainment of solid waste reduction goals?

Discussion of Effects: As described in TOP FEIR, increases in population in the City of Ontario would result in increases in solid waste disposal needs. Buildout of TOP would result in the generation of 2,017 tons per day of solid waste in the City. This would be 1,009 more tons per day

(368,488 more tons per year) of solid waste than in 2007. To reduce waste disposal, AB 939 requires every California city and county to divert 50 percent of its waste from landfills by the year 2000. The City of Ontario has met this waste diversion requirement through local recycling programs and participation in regional recycling programs.

As noted in TOP FEIR, the El Sobrante landfill has a capacity of 184,930,000 tons and is expected to close in 2030. Growth in the surrounding communities that use El Sobrante landfill will cause additional increases in waste generation. According to AB 939, jurisdictions are required to begin planning for new landfills when the jurisdiction's primary disposal site reaches its 15-year capacity. To reduce waste disposal, AB 939 also requires every California city and county to divert 50 percent of its waste from landfills by the year 2000. The City of Ontario has exceeded this requirement by diverting approximately 64 percent of waste through local recycling programs and participation in regional recycling programs. Continuation of these recycling programs would ensure compliance with AB 939. All impacts on waste disposal services would be less than significant.

Mitigation: No additional mitigation is required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

h. Comply with federal, state, and local statutes and regulations related to solid waste?

Discussion of Effects: The proposed Project would comply with all with federal, state, and local statues and regulations regarding solid waste; potential impacts would be considered less than significant.

Mitigation: No additional mitigation is required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

20. WILDFIRE. If located in or near state responsibility areas or lands classified as very high fire hazard severity zones, would the project:

a. Substantially impair an adopted emergency response plan or emergency evacuation plan?

Discussion of Effects: Wildfire was not analyzed in TOP FEIR but has since been included as part of the 2019 revisions to the State CEQA Guidelines. A discussion of potential wildfire impacts is provided below.

The Project site is located within an urban industrial area and does not include any changes to roadways. Additionally, according to CalFire mapping, the Project site is not located in or near a State Responsibility Area (SRA), nor is it located in or near lands classified as a Fire Hazard Severity Zone (FHSZ). The closest FHSZ is approximately three miles from the Project site. The proposed Project would not substantially impair and emergency response or evacuation plan.

Mitigation: No new mitigation measures are required. The proposed Project would not result in any new significant impacts. No changes or additions to TOP FEIR analysis are necessary.

b. Due to slope, prevailing winds, and other factors, exacerbate wildfire risks, and thereby expose project occupants to, pollutant concentrations from a wildfire or the uncontrolled spread of a wildfire?

Discussion of Effects: The Project site is not located in or near an SRA nor is it located in or near lands classified as a very high FHSZ. The closest FHSZ is approximately three miles from the Project site. This potential impact would be considered less than significant.

Mitigation: No new mitigation measures are required. The proposed Project would not result in any new significant impacts. No changes or additions to TOP FEIR analysis are necessary.

c. Require the installation or maintenance of associated infrastructure (such as roads, fuel breaks, emergency water sources, power lines or other utilities) that may exacerbate fire risk or that may result in temporary or ongoing impacts to the environment?

Discussion of Effects: The proposed Project would include construction of two warehouse buildings and associated onsite improvements, and would not require the installation of off-site infrastructure, such as roads, fuel breaks, emergency water sources, or other utilities. The Project site is not located in or near an SRA nor is it located in or near lands classified as a very high FHSZ. The closest fire hazard severity zone is approximately three miles from the Project site. This potential impact would be considered less than significant.

Mitigation: No new mitigation measures are required. The proposed Project would not result in any new significant impacts. No changes or additions to TOP FEIR analysis are necessary.

d. Expose people or structures to significant risks, including downslope or downstream flooding or landslides, as a result of runoff, post-fire slope instability, or drainage changes?

Discussion of Effects: The Project site is relatively flat and is located in an urban industrial area. The Project site is not located in or near an SRA nor is it located in or near lands classified as a very high FHSZ. The closest FHSZ is approximately three miles from the Project site. This potential impact would be considered less than significant.

Mitigation: No new mitigation measures are required. The proposed Project would not result in any new significant impacts. No changes or additions to TOP FEIR analysis are necessary.

21. MANDATORY FINDINGS OF SIGNIFICANCE.

a. Does the project have the potential to degrade the quality of the environment, substantially reduce the habitat or a fish or wildlife species, cause a fish or wildlife population to drop below self-sustaining levels, threaten to eliminate a plant or animal community, reduce the number or restrict the range of a rare or endangered plant or animal or eliminate important examples of the major periods of California history or prehistory?

Discussion of Effects: The results of the preceding analysis indicate that the proposed Project would have less-than-significant impacts to sensitive biological, historical, archaeological, and paleontological resources with implementation of the mitigation measures identified in TOP FEIR and the City's Standard Conditions of Approval. Impacts related to degradation of the environment would be less than significant and no additional mitigation is required.

Mitigation: No additional mitigation is required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

b. Does the project have the potential to achieve short-term environmental goals to the disadvantage of long-term environmental goals?

Discussion of Effects: The proposed Project does not have the potential to achieve short-term environmental goals to the disadvantage of long-term environmental goals. TOP land use

plan has anticipated industrial uses on the Project site, and all applicable TOP FEIR mitigation measures and City Standard Conditions of Approval would be applicable.

Mitigation: No additional mitigation is required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

c. Does the project have impacts that are individually limited, but cumulatively considerable? ("Cumulatively considerable" means that the incremental effects of a project are considerable when viewed in connection with the effects of past projects, the effects of other current project, and the effects of probable future projects.)

Discussion of Effects: Cumulative impacts resulting from the development of the Project site were included in TOP FEIR analysis. The proposed Project does not include any changes to land use plan designations and thus is generally consistent with the project analyzed in TOP FEIR. The proposed Project's individual contribution to potentially significant cumulative impacts is not considerable and no mitigation is required.

Mitigation: No additional mitigation is required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

d. Does the project have environmental effects that will cause substantial adverse effects on human beings, either directly or indirectly?

Discussion of Effects: As supported by the preceding environmental evaluation, the proposed Project would not result in substantial adverse effects on human beings. It has been determined through analysis within TOP FEIR and this Addendum that the proposed Project would not result in a significant substantial adverse effect on human beings.

Mitigation: No additional mitigation required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analyses are necessary.

**EARLIER ANALYSES**

*(Earlier analyses may be used where, pursuant to the tiering, program EIR, or other CEQA process, one or more effects have been adequately analyzed in an earlier EIR or Negative Declaration. Section 15063(c)(3)(D))*:

1) Earlier Analyses Used. Identify earlier analyzes used and state where they are available for review.

a) The Ontario Plan Final Environmental Impact Report

b) The Ontario Plan

c) City of Ontario Zoning

All documents listed above are on file with the City of Ontario Planning Department, 303 East "B" Street, Ontario, California 91764, (909) 395-2036.

2) Impacts Adequately Addressed. Identify which effects from the above checklist were within the scope of, and adequately analyzed in, an earlier document pursuant to applicable legal

standards.

**MITIGATION MEASURES**

*(For effects that are "Less than Significant with Mitigation Incorporated," describe the mitigation measures, which were incorporated or refined from the earlier document and the extent to which they address site-specific conditions for the project.)*

The Mitigation Measures contained in the Certified TOP Final Environmental Impact Report adequately mitigate the impacts of the proposed Project. These mitigation measures are contained in the attached Mitigation Monitoring and Reporting Program.

No additional mitigation beyond that previously imposed is required.

# Exhibit B
# 1992 General Plan Land Use Map

RESOLUTION NO. PC21-087

A RESOLUTION OF THE PLANNING COMMISSION OF THE CITY OF ONTARIO, CALIFORNIA, APPROVING TENTATIVE PARCEL MAP NO. 20147, FILE NO. PMTT21-010, TO SUBDIVIDE 95.35 ACRES OF LAND INTO THREE PARCELS TO FACILITATE THE DEVELOPMENT OF TWO INDUSTRIAL BUILDINGS AND ASSOCIATED SITE IMPROVEMENTS, AND MAKING FINDINGS IN SUPPORT THEREOF—APN: 0238-121-75.

WHEREAS, MIG, INC. (hereinafter referred to as "Applicant") has filed an Application for the approval of Tentative Parcel Map No. 20147, File No. PMTT21-010, as described in the title of this Resolution (hereinafter referred to as "Application" or "Project"); and

WHEREAS, the Application applies to 95.35 acres of land generally located at the southeast corner of Jurupa Street and Milliken Avenue, at 1425 South Toyota Way within the Toyota Ontario Business Park Specific Plan zoning district, and is presently partially improved with a warehouse and distribution facility; and

WHEREAS, the properties to the north are within the California Commerce Center Specific Plan zoning district and are developed with warehouse and commercial uses. The properties to the south are within the Entratter Industrial Specific Plan and the IG (General Industrial) zoning district, and are developed with warehouse uses. The land to the east is the Interstate 15 freeway. The properties to the west are within the California Commerce Center Specific Plan and are developed with light industrial and business park uses; and

WHEREAS, The Applicant is proposing to subdivide the Project site into three parcels. Parcel 1 will be 81.67 acres in size and encompass the area already developed with the Toyota warehouse and distribution facility, Toyota Way (private street), and existing landscaped areas. Parcel 2 is the northwest parcel, occupying the corner of Milliken Avenue and Jurupa Street, and will be 8.24 acres in size. Parcel 3 is located to the south of Parcel 2 and located at the northeast corner of Milliken Avenue and Toyota Way, encompassing 3.79 acres of land. Parcels 2 and 3 comprise the existing vacant land in the northwest portion of the Project site; and

WHEREAS, the lot sizes proposed by Tentative Parcel Map No. 20147 exceed the one-acre minimum lot size required by the Toyota Ontario Business Park Specific Plan; and

WHEREAS, Tentative Parcel Map No. 20147 was filed in conjunction with a Development Plan, File No. PDEV21-018, to construct two industrial warehouse buildings totaling 168,772 square feet on Parcels 2 and 3; and

WHEREAS, the Application is a project pursuant to the California Environmental Quality Act (Public Resources Code Section 21000 et seq.) ("CEQA") and an initial study has been prepared to analyze possible environmental impacts; and

WHEREAS, The Ontario Plan Environmental Impact Report (State Clearinghouse No. 2008101140) was certified on January 27, 2010, (hereinafter referred to as “Certified EIR”), in which development and use of the Project site was discussed; and

WHEREAS, the Planning Director of the City of Ontario prepared and approved for attachment to the certified Environmental Impact Report, an Addendum to the Certified EIR (hereinafter referred to as “EIR Addendum”) in accordance with the requirements of the California Environmental Quality Act of 1970, together with State and local guidelines implementing said Act, all as amended to date (collectively referred to as “CEQA”); and

WHEREAS, the environmental impacts of this project were thoroughly analyzed in the EIR Addendum, which concluded that implementation of the Project could result in a number of significant effects on the environment that were previously analyzed in the Certified EIR, and that the Certified EIR identified mitigation measures that would reduce each of those significant effects to a less-than-significant level; and

WHEREAS, the City's "Local Guidelines for the Implementation of the California Environmental Quality Act (CEQA)" provide for the use of a single environmental assessment in situations where the impacts of subsequent projects are adequately analyzed; and

WHEREAS, the Application is a project pursuant to the California Environmental Quality Act — Public Resources Code Section 21000 et seq. — (hereinafter referred to as "CEQA") and an EIR Addendum has been prepared to determine possible environmental impacts; and

WHEREAS, Ontario Development Code Table 2.02-1 (Review Matrix) grants the Planning Commission the responsibility and authority to review and act on the subject Application; and

WHEREAS, the Project has been reviewed for consistency with the Housing Element of the Policy Plan component of The Ontario Plan, as State Housing Element law (as prescribed in Government Code Sections 65580 through 65589.8) requires that development projects must be consistent with the Housing Element, if upon consideration of all its aspects, it is found to further the purposes, principals, goals, and policies of the Housing Element; and

WHEREAS, the Project is located within the Airport Influence Area of Ontario International Airport, which encompasses lands within parts of San Bernardino, Riverside,

and Los Angeles Counties, and is subject to, and must be consistent with, the policies and criteria set forth in the Ontario International Airport Land Use Compatibility Plan (hereinafter referred to as "ALUCP"), which applies only to jurisdictions within San Bernardino County, and addresses the noise, safety, airspace protection, and overflight impacts of current and future airport activity; and

WHEREAS, City of Ontario Development Code Division 2.03 (Public Hearings) prescribes the manner in which public notification shall be provided and hearing procedures to be followed, and all such notifications and procedures have been completed; and

WHEREAS, on December 20, 2021, the Development Advisory Board of the City of Ontario conducted a hearing to consider the Application and concluded said hearing on that date, voting to issue Decision No. DAB21-060, recommending that the Planning Commission approve the Application; and

WHEREAS, as the first action on the Project, on December 20, 2021, the Planning Commission adopted a Resolution approving the use of the EIR Addendum, finding that the proposed Project introduces no new significant environmental impacts and applying all previously adopted mitigation measures to the Project, which were incorporated by reference; and

WHEREAS, on December 20, 2021, the Planning Commission of the City of Ontario conducted a hearing to consider the Project, and concluded said hearing on that date; and

WHEREAS, all legal prerequisites to the adoption of this Resolution have occurred.

NOW, THEREFORE, IT IS HEREBY FOUND, DETERMINED, AND RESOLVED by the Planning Commission of the City of Ontario, as follows:

SECTION 1: ***Environmental Determination and Findings.*** As the decision-making body for the Project, the Planning Commission has reviewed and considered the information contained in the Addendum, the initial study, and the administrative record for the Project, including all written and oral evidence provided during the comment period. Based upon the facts and information contained in the Addendum, the initial study, and the administrative record, including all written and oral evidence presented to the Planning Commission, the Planning Commission finds as follows:

(1) The environmental impacts of the Project were reviewed in conjunction with an Addendum to The Ontario Plan Environmental Impact Report (State Clearinghouse No. 2008101140), certified by the Ontario City Council on January 27, 2010, in conjunction with File No. PMTT21-010 and PDEV21-018; and

(2) The EIR Addendum and administrative record have been completed in compliance with CEQA, the State CEQA Guidelines, and the City of Ontario Local CEQA Guidelines; and

(3) The City's "Guidelines for the Implementation of the California Environmental Quality Act (CEQA)" provide for the use of a single environmental assessment in situations where the impacts of subsequent projects are adequately analyzed. This Application introduces no new significant environmental impacts; and

(4) All previously adopted mitigation measures shall be a condition of project approval, as they are applicable to the Project, and are incorporated herein by this reference; and

(5) The EIR Addendum contains a complete and accurate reporting of the environmental impacts associated with the Project, and reflects the independent judgment of the Planning Commission; and

(6) There is no substantial evidence in the administrative record supporting a fair argument that the project may result in significant environmental impacts.

SECTION 2: ***Subsequent or Supplemental Environmental Review Not Required.*** Based on the EIR Addendum, all related information presented to the Planning Commission, and the specific findings set forth in Section 1, above, the Planning Commission finds that the preparation of a subsequent or supplemental Certified EIR is not required for the Project, as the Project:

(1) Does not constitute substantial changes to the Certified EIR that will require major revisions to the Certified EIR due to the involvement of new significant environmental effects or a substantial increase in the severity of previously identified significant effects; and

(2) Does not constitute substantial changes with respect to the circumstances under which the Certified EIR was prepared, that will require major revisions to the Certified EIR due to the involvement of new significant environmental effects or a substantial increase in the severity of the previously identified significant effects; and

(3) Does not contain new information of substantial importance that was not known and could not have been known with the exercise of reasonable diligence at the time the Certified EIR was certified/adopted, that shows any of the following:

(a) The Project will have one or more significant effects not discussed in the Certified EIR; or

(b) Significant effects previously examined will be substantially more severe than shown in the Certified EIR; or

(c) Mitigation measures or alternatives previously found not to be feasible would in fact be feasible and would substantially reduce one or more significant effects of the Project, but the City declined to adopt such measures; or

(d) Mitigation measures or alternatives considerably different from those analyzed in the Certified EIR would substantially reduce one or more significant effects on the environment, but which the City declined to adopt.

SECTION 3: ***Housing Element Compliance.*** Pursuant to the requirements of California Government Code Chapter 3, Article 10.6, commencing with Section 65580, as the decision-making body for the Project, the Planning Commission finds that based upon the facts and information contained in the Application and supporting documentation, at the time of Project implementation, the project is consistent with the Housing Element of the Policy Plan (General Plan) component of The Ontario Plan, as the project site is not one of the properties in the Available Land Inventory contained in Table A-3 (Available Land by Planning Area) of the Housing Element Technical Report Appendix.

SECTION 4: ***Ontario International Airport Land Use Compatibility Plan ("ALUCP") Compliance.*** The California State Aeronautics Act (Public Utilities Code Section 21670 et seq.) requires that an Airport Land Use Compatibility Plan be prepared for all public use airports in the State; and requires that local land use plans and individual development proposals must be consistent with the policies set forth in the adopted Airport Land Use Compatibility Plan. On April 19, 2011, the City Council of the City of Ontario approved and adopted the ALUCP, establishing the Airport Influence Area for Ontario International Airport (hereinafter referred to as "ONT"), which encompasses lands within parts of San Bernardino, Riverside, and Los Angeles Counties, and limits future land uses and development within the Airport Influence Area, as they relate to noise, safety, airspace protection, and overflight impacts of current and future airport activity. As the decision-making authority for the Project, the Planning Commission has reviewed and considered the facts and information contained in the Application and supporting documentation against the ALUCP compatibility factors, including [1] Safety Criteria (ALUCP Table 2-2) and Safety Zones (ALUCP Map 2-2), [2] Noise Criteria (ALUCP Table 2-3) and Noise Impact Zones (ALUCP Map 2-3), [3] Airspace protection Zones (ALUCP Map 2-4), and [4] Overflight Notification Zones (ALUCP Map 2-5). As a result, the PLANNING COMMISSION, therefore, finds and determines that the Project, when implemented in conjunction with the conditions of approval, will be consistent with the policies and criteria set forth within the ALUCP.

SECTION 5: ***Concluding Facts and Reasons.*** Based upon the substantial evidence presented to the Planning Commission during the above-referenced hearing,

and upon the specific findings set forth in Sections 1 through 4, above, the Planning Commission hereby concludes as follows:

(1) ***The proposed Tentative Parcel Map is consistent with the goals, policies, plans, and exhibits of the Vision, Policy Plan (General Plan), and City Council Priorities components of The Ontario Plan, and applicable area and specific plans, and planned unit developments.*** The proposed Tentative Parcel Map is located within the Industrial land use district of the Policy Plan Land Use Map, and the Toyota Ontario Business Park Specific Plan zoning district. The proposed subdivision is consistent with the goals, policies, plans, and exhibits of the Vision, Policy Plan (General Plan), and City Council Priorities components of The Ontario Plan, as the project will contribute to the establishment of "[a] dynamic, progressive city containing distinct neighborhoods and commercial districts that foster a positive sense of identity and belonging among residents, visitors, and businesses" (Goal CD1). Furthermore, the project will promote the City's policy to "take actions that are consistent with the City being a leading urban center in Southern California while recognizing the diverse character of our existing viable neighborhoods" (Policy CD1-1 *City Identity*).

(2) ***The design or improvement of the proposed Tentative Parcel Map is consistent with the goals, policies, plans and exhibits of the Vision, Policy Plan (General Plan), and City Council Priorities components of The Ontario Plan, and applicable specific plans and planned unit developments.*** The proposed Tentative Parcel Map is located within the Industrial land use district of the Policy Plan Land Use Map, and the Toyota Ontario Business Park Specific Plan zoning district. The proposed design or improvement of the subdivision is consistent with the goals, policies, plans, and exhibits of the Vision, Policy Plan (General Plan), and City Council Priorities components of The Ontario Plan, as the project will provide "[a] high level of design quality resulting in public spaces, streetscapes, and developments that are attractive, safe, functional and distinct (Goal CD2). Furthermore, the project will promote the City's policy to "collaborate with the development community to design and build neighborhoods, streetscapes, sites, outdoor spaces, landscaping and buildings to reduce energy demand through solar orientation, maximum use of natural daylight, passive solar and natural ventilation, building form, mechanical and structural systems, building materials and construction techniques" (Policy CD2-7 *Sustainability*).

(3) ***The site is physically suitable for the type of development proposed.*** The project site meets the minimum lot area and dimensions of the Toyota Ontario Business Park Specific Plan zoning district, and is physically suitable for the type of industrial development proposed in terms of zoning, land use and development activity proposed, and existing and proposed site conditions.

(4) ***The site is physically suitable for the density/intensity of development proposed.*** The project site is proposed for industrial development at a floor-area ratio

ranging from 0.23 to 0.33. The project site meets the minimum lot area and dimensions of the Toyota Ontario Business Park Specific Plan zoning district, and is physically suitable for this proposed density / intensity of development.

(5) ***The design of the subdivision or the proposed improvements thereon, are not likely to cause substantial environmental damage, or substantially and avoidably injure fish or wildlife, or their habitat.*** The project site is not located in an area that has been identified as containing species identified as a candidate, sensitive, or special status species in local or regional plans, policies or regulations or by the California Department of Fish and Wildlife or the U.S. Fish and Wildlife Service, nor does the site contain any riparian habitat or other sensitive natural community, and no wetland habitat is present on site; therefore, the design of the subdivision, or improvements proposed thereon, are not likely to cause substantial environmental damage, or substantially and avoidably injure fish or wildlife, or their habitat.

(6) ***The design of the subdivision, or the type of improvements thereon, are not likely to cause serious public health problems.*** The design of the proposed subdivision, and the industrial improvements existing or proposed on the project site, are not likely to cause serious public health problems, as the project is not anticipated to involve the transport, use, or disposal of hazardous materials during either construction or project implementation, include the use of hazardous materials or volatile fuels, nor are there any known stationary commercial or industrial land uses within close proximity to the subject site that use/store hazardous materials to the extent that they would pose a significant hazard to visitors or occupants to the project site.

(7) ***The design of the subdivision, or the type of improvements thereon, will not conflict with easements acquired by the public at large for access through, or use of property within, the proposed subdivision.*** The proposed subdivision has provided for all necessary public easements and dedications for access through, or use of property within, the proposed subdivision. Furthermore, all such public easements and dedications have been designed pursuant to: (a) the requirements of the Policy Plan component of The Ontario Plan and applicable area plans; (b) applicable specific plans or planned unit developments; (c) applicable provisions of the City of Ontario Development Code; (d) applicable master plans and design guidelines of the City; and (e) applicable Standard Drawings of the City.

SECTION 6: ***Planning Commission Action.*** Based upon the findings and conclusions set forth in Sections 1 through 5, above, the Planning Commission hereby APPROVES the herein described Application, subject to each and every condition set forth in the Department reports attached hereto as “Attachment A,” and incorporated herein by this reference.

SECTION 7: ***Indemnification.*** The Applicant shall agree to defend, indemnify and hold harmless, the City of Ontario or its agents, officers, and employees from any claim, action or proceeding against the City of Ontario or its agents, officers or employees to attack, set aside, void, or annul this approval. The City of Ontario shall promptly notify the applicant of any such claim, action, or proceeding, and the City of Ontario shall cooperate fully in the defense.

SECTION 8: ***Custodian of Records.*** The documents and materials that constitute the record of proceedings on which these findings have been based are located at the City of Ontario City Hall, 303 East "B" Street, Ontario, California 91764. The custodian for these records is the City Clerk of the City of Ontario.

SECTION 9: ***Certification to Adoption.*** The Secretary shall certify to the adoption of the Resolution.

- - - - - - - - - - - - - -

The Secretary Pro Tempore for the Planning Commission of the City of Ontario shall certify as to the adoption of this Resolution.

I hereby certify that the foregoing Resolution was duly and regularly introduced, passed and adopted by the Planning Commission of the City of Ontario at a special meeting thereof held on the 20th day of December 2021, and the foregoing is a full, true and correct copy of said Resolution, and has not been amended or repealed.

Rick Gage
Planning Commission Chairman

The Planning Department, Land Development Section, conditions of approval applicable to the above-described Project, are listed below. The Project shall comply with each condition of approval listed below:

**1.0 Standard Conditions of Approval.** The project shall comply with the *Standard Conditions for New Development*, adopted by City Council Resolution No. 2017-027 on April 18, 2017. A copy of the *Standard Conditions for New Development* may be obtained from the Planning Department or City Clerk/Records Management Department.

**2.0 Special Conditions of Approval.** In addition to the *Standard Conditions for New Development* identified in condition no. 1.0, above, the project shall comply with the following special conditions of approval:

**2.1** Time Limits.

**(a)** Tentative Parcel Map approval shall become null and void 2 years following the effective date of application approval, unless the final parcel map has been recorded, or a time extension has been approved by the Planning Commission pursuant to Development Code Section 2.02.025 (Time Limits and Extensions). This Permit does not supersede any individual time limits specified herein for performance of specific conditions or improvements.

**2.2** Subdivision Map.

**(a)** The Final Parcel Map shall be in conformance with the approved Tentative Parcel Map on file with the City. Variations rom the approved Tentative Parcel Map may be reviewed and approved by the Planning Department. A substantial variation from the approved Tentative Parcel Map may require review and approval by the Planning Commission, as determined by the Planning Director.

**(b)** Tentative Parcel Map approval shall be subject to all conditions, requirements and recommendations from all other departments/agencies provided on the attached reports/memorandums.

**(c)** Pursuant to California Government Section 66474.9, the subdivider agrees that it will defend, indemnify, and hold harmless the City of Ontario or its agents, officers and employees from any claim, action or proceeding against the City of Ontario or its agents, officers or employees to attack, set aside, void or annul any approval of the City of Ontario, whether by its City Council, Planning Commission or other authorized board or officer of this subdivision, which action is brought within the time period provided for in Government Code Section 66499.37. The City of Ontario shall promptly notify the subdivider of any such claim, action or proceeding and the City of Ontario shall cooperate fully in the defense.

**2.3** General Requirements. The Project shall comply with the following general requirements:

**(a)** All construction documentation shall be coordinated for consistency, including, but not limited to, architectural, structural, mechanical, electrical, plumbing, landscape and irrigation, grading, utility and street improvement plans. All such plans shall be consistent with the approved entitlement plans on file with the Planning Department.

**(b)** The project site shall be developed in conformance with the approved plans on file with the City. Any variation from the approved plans must be reviewed and approved by the Planning Department prior to building permit issuance.

**(c)** The herein-listed conditions of approval from all City departments shall be included in the construction plan set for project, which shall be maintained on site during project construction.

**2.4** Covenants, Conditions and Restrictions (CC&Rs)/Mutual Access and Maintenance Agreements.

**(a)** CC&Rs shall be prepared for the Project and shall be recorded prior to the issuance of a building permit.

**(b)** The CC&Rs shall be in a form and contain provisions satisfactory to the City. The articles of incorporation for the property owners association and the CC&Rs shall be reviewed and approved by the City.

**(c)** CC&Rs shall ensure reciprocal parking and access between parcels.

**(d)** CC&Rs shall ensure reciprocal parking and access between parcels, and common maintenance of:

**(i)** Landscaping and irrigation systems within common areas;
**(ii)** Landscaping and irrigation systems within parkways adjacent to the project site, including that portion of any public highway right-of-way between the property line or right-of-way boundary line and the curb line and also the area enclosed within the curb lines

of a median divider (Ontario Municipal Code Section 7-3.03), pursuant to Ontario Municipal Code Section 5-22-02;

**(iii)** Shared parking facilities and access drives; and

**(iv)** Utility and drainage easements.

**(e)** CC&Rs shall include authorization for the City's local law enforcement officers to enforce City and State traffic and penal codes within the project area.

**(f)** The CC&Rs shall grant the City of Ontario the right of enforcement of the CC&R provisions.

**(g)** A specific methodology/procedure shall be established within the CC&Rs for enforcement of its provisions by the City of Ontario, if adequate maintenance of the development does not occur, such as, but not limited to, provisions that would grant the City the right of access to correct maintenance issues and assess the property owners association for all costs incurred.

**2.5** Environmental Review.

**(a)** The environmental impacts of this project were reviewed in conjunction with an **Addendum to The Ontario Plan Environmental Impact Report** (State Clearinghouse No. 2008101140). This application introduces no new significant environmental impacts. The City's "Guidelines for the Implementation of the California Environmental Quality Act (CEQA)" provide for the use of a single environmental assessment in situations where the impacts of subsequent projects are adequately analyzed. This Application introduces no new significant environmental impacts. All previously adopted mitigation measures are a condition of project approval and are incorporated herein by this reference. All previously adopted mitigation measures shall be a condition of project approval, as they are applicable, and are incorporated herein by this reference.

**(b)** If human remains are found during project grading/excavation/ construction activities, the area shall not be disturbed until any required investigation is completed by the County Coroner and Native American consultation has been completed (if deemed applicable).

**(c)** If any archeological or paleontological resources are found during project grading/excavation/construction, the area shall not be disturbed until the significance of the resource is determined. If determined to be significant, the resource shall be recovered by a qualified archeologist or paleontologist consistent with current standards and guidelines, or other appropriate measures implemented.

**2.6** Indemnification. The applicant shall agree to defend, indemnify and hold harmless, the City of Ontario or its agents, officers, and employees from any claim, action or proceeding against the City of Ontario or its agents, officers or employees to attack, set aside, void or annul any approval of the City of Ontario, whether by its City Council, Planning Commission or other authorized board or officer. The City of Ontario shall promptly notify the applicant of any such claim, action or proceeding, and the City of Ontario shall cooperate fully in the defense.

**2.7** Additional Fees.

**(a)** Within 5 days following final application approval, the Notice of Determination ("NOD") filing fee shall be provided to the Planning Department. The fee shall be paid by check, made payable to the "Clerk of the Board of Supervisors", which shall be forwarded to the San Bernardino County Clerk of the Board of Supervisors, along with all applicable environmental forms/notices, pursuant to the requirements of the California Environmental Quality Act ("CEQA"). Failure to provide said fee within the time specified may result in a 180-day extension to the statute of limitations for the filing of a CEQA lawsuit.

**(b)** After the Project's entitlement approval, and prior to issuance of final building permits, the Planning Department's Plan Check and Inspection fees shall be paid at the rate established by resolution of the City Council.

**THIS PROJECT SHALL COMPLY WITH THE REQUIREMENTS SET FORTH IN THE GENERAL STANDARD CONDITIONS OF APPROVAL ADOPTED BY THE CITY COUNCIL (RESOLUTION NO. 2017-027) AND THE PROJECT SPECIFIC CONDITIONS OF APPROVAL SPECIFIED IN HEREIN. ONLY APPLICABLE CONDITIONS OF APPROVAL ARE CHECKED. THE APPLICANT SHALL BE RESPONSIBLE FOR THE COMPLETION OF ALL APPLICABLE CONDITIONS OF APPROVAL PRIOR TO PARCEL MAP APPROVAL, ISSUANCE OF PERMITS AND/OR OCCUPANCY CLEARANCE, AS SPECIFIED IN THIS REPORT.**

## 1. PRIOR TO PARCEL MAP APPROVAL, APPLICANT SHALL:

Check When Complete

☐ 1.01 Dedicate to the City of Ontario, the right-of-way, described below: ☐

_____ feet on _____

Property line corner 'cut-back' required at the intersection of _____ and _____.

☐ 1.02 Dedicate to the City of Ontario, the following easement(s): _____ ☐

_____

☐ 1.03 Restrict vehicular access to the site as follows: _____ ☐

☒ **1.04 Vacate the following street(s) and/or easement(s):** ☐

**A. All interfering on-site easements shall be quitclaimed, vacated, and/or submit non-interference letter from affected owner/utility company.**

☐ 1.05 Submit a copy of a recorded private reciprocal use agreement or easement. The agreement or easement shall ensure, at a minimum, common ingress and egress and joint maintenance of all common access areas and drive aisles. ☐

☒ **1.06 Provide (original document) Covenants, Conditions and Restrictions (CC&Rs) as applicable to the project and as approved by the City Attorney and the Engineering and Planning Departments, ready for recordation with the County of San Bernardino. The CC&Rs shall provide for, but not be limited to, common ingress and egress, joint maintenance responsibility for all common access improvements, common facilities, parking areas, utilities, median and landscaping improvements and drive approaches, in addition to maintenance requirements established in the Water Quality Management Plan (WQMP), as applicable to the project. The CC&Rs shall also address the maintenance and repair responsibility for public improvements/utilities (sewer, water, storm drain, recycled water, etc.) located within open space/easements. In the event of any maintenance or repair of these facilities, the City shall only restore disturbed areas to current City Standards.** ☐

☐ 1.07 For all development occurring south of the Pomona Freeway (60-Freeway) and within the specified boundary limits (per Boundary Map found at *http://tceplumecleanup.com/*), the property developer/owner is made aware of the South Archibald Trichloroethylene (TCE) Plume "Disclosure Letter". Property owner may wish to provide this Letter as part of the Real Estate Transfer Disclosure requirements under California Civil Code Section 1102 et seq. This may include notifications in the Covenants, Conditions and Restrictions (CC&Rs) or other documents related to property transfer and disclosures. Additional information on the plume is available from the Santa Ana Regional Water Quality Control Board at *http://geotracker.waterboards.ca.gov/profile_report?global_id=T10000004658.* ☐

☐ 1.08 File an application for Reapportionment of Assessment, together with payment of a reapportionment processing fee, for each existing assessment district listed below. Contact the Financial Services Department at (909) 395-2124 regarding this requirement. ☐

(1) _____

(2) _____

☒ **1.09** **Prepare a fully executed Subdivision Agreement (on City approved format and forms) with accompanying security as required, or complete all public improvements.** ☐

☒ **1.10** **Provide a monument bond (i.e. cash deposit) in an amount calculated by the City's approved cost estimate spreadsheet (available for download on the City's website: www.ci.ontario.ca.us) or as specified in writing by the applicant's Registered Engineer or Licensed Land Surveyor of Record and approved by the City Engineer, whichever is greater.** ☐

☒ **1.11** **Provide a preliminary title report current to within 30 days.** ☐

☐ 1.12 File an application, together with an initial deposit (if required), to establish a Community Facilities District (CFD) pursuant to the Mello-Roos Community Facilities District Act of 1982. The application and fee shall be submitted a minimum of four (4) months prior to final subdivision map approval, and the CFD shall be established prior to final subdivision map approval or issuance of building permits, whichever occurs first. The CFD shall be established upon the subject property to provide funding for various City services. An annual special tax shall be levied upon each parcel or lot in an amount to be determined. The special tax will be collected along with annual property taxes. The City shall be the sole lead agency in the formation of any CFD. Contact Investment and Revenue Resources at (909) 395-2341 to initiate the CFD application process. ☐

☐ 1.13 Ontario Ranch Developments: ☐

☐ 1) Provide evidence of final cancellation of Williamson Act contracts associated with this tract, prior to approval of any final subdivision map. Cancellation of contracts shall have been approved by the City Council.

☐ 2) Provide evidence of sufficient storm water capacity availability equivalents (Certificate of Storm Water Treatment Equivalents).

☐ 3) Provide evidence of sufficient water availability equivalents (Certificate of Net MDD Availability).

☒ **1.14** **Other conditions:** ☐

**A. Provide private easements for utilities, cross lot drainage, blanket emergency access and reciprocal access across all parcels in favor of all parcels (as needed).**
**B. Provide a private access easement across Parcel 1/Toyota Way (private) in favor of Parcels 2 and 3 for ingress and access purposes.**

## 2. PRIOR TO ISSUANCE OF ANY PERMITS, APPLICANT SHALL:

**A. GENERAL**
**( Permits includes Grading, Building, Demolition and Encroachment )** ☐

☒ **2.01** **Record Parcel Map No. 20147 pursuant to the Subdivision Map Act and in accordance with the City of Ontario Municipal Code.**

☒ **2.02** **Submit a PDF of the recorded map to the City Engineer's office.** ☐

☐ 2.03 Note that the subject parcel is a recognized parcel in the City of Ontario per_____. ☐

☐ 2.04 Note that the subject parcel is an 'unrecognized' parcel in the City of Ontario and shall require a Certificate of Compliance to be processed unless a deed is provided confirming the existence of the parcel prior to the date of March 4, 1972. ☐

☐ 2.05 Apply for a: ☐

☐ Certificate of Compliance with a Record of Survey;

☐ Lot Line Adjustment (Record a Conforming Deed with the County of San Bernardino within six

months of the recordation of the Lot Line Adjustment to conform the new LLA legal description. Submit a copy of the recorded Conforming Deed to the Engineering Department.);

☐ Make a Dedication of Easement.

☐ 2.06 Provide (original document) Covenants, Conditions and Restrictions (CC&R's), as applicable to the project, and as approved by the City Attorney and the Engineering and Planning Departments, ready for recordation with the County of San Bernardino. The CC&R's shall provide for, but not be limited to, common ingress and egress, joint maintenance of all common access improvements, common facilities, parking areas, utilities and drive approaches in addition to maintenance requirements established in the Water Quality Management Plan ( WQMP), as applicable to the project. ☐

☐ 2.07 For all development occurring south of the Pomona Freeway (60-Freeway) and within the specified boundary limits (per Boundary Map found at http://tceplumecleanup.com/), the property developer/owner is made aware of the South Archibald Trichloroethylene (TCE) Plume "Disclosure Letter". Property owner may wish to provide this Letter as part of the Real Estate Transfer Disclosure requirements under California Civil Code Section 1102 et seq. This may include notifications in the Covenants, Conditions and Restrictions (CC&Rs) or other documents related to property transfer and disclosures. Additional information on the plume is available from the Santa Ana Regional Water Quality Control Board at http://geotracker.waterboards.ca.gov/profile_report?global_id=T10000004658. ☐

☐ 2.08 Submit a soils/geology report. ☐

☐ 2.09 Other Agency Permit/Approval: Submit a copy of the approved permit and/or other form of approval of the project from the following agency or agencies: ☐

- ☐ State of California Department of Transportation (Caltrans)
- ☐ San Bernardino County Road Department (SBCRD)
- ☐ San Bernardino County Flood Control District (SBCFCD)
- ☐ Federal Emergency Management Agency (FEMA)
- ☐ Cucamonga Valley Water District (CVWD) for sewer/water service
- ☐ United States Army Corps of Engineers (USACE)
- ☐ California Department of Fish & Game
- ☐ Inland Empire Utilities Agency (IEUA)
- ☐ Other: _____

☐ 2.10 Dedicate to the City of Ontario the right-of-way described below: ☐

_____ feet on _____

Property line corner 'cut-back' required at the intersection of _____ and _____.

☐ 2.11 Dedicate to the City of Ontario the following easement(s):_____ ☐

_____

☐ 2.12 Vacate the following street(s) and/or easement(s): ☐

A. All interfering on-site easements shall be quitclaimed, vacated, and/or submit non-interference letter from affected owner/utility company.

☐ 2.13 Ontario Ranch Developments: ☐

☐ 1) Submit a copy of the permit from the San Bernardino County Health Department to the Engineering Department and the Ontario Municipal Utilities Company (OMUC) for the destruction/abandonment of the on-site water well. The well shall be destroyed/abandoned in accordance with the San Bernardino County Health Department guidelines.

☐ 2) Make a formal request to the City of Ontario Engineering Department for the proposed temporary

use of an existing agricultural water well for purposes other than agriculture, such as grading, dust control, etc. Upon approval, the Applicant shall enter into an agreement with the City of Ontario and pay any applicable fees as set forth by said agreement.

☐ 3) Design proposed retaining walls to retain up to a maximum of three (3) feet of earth. In no case shall a wall exceed an overall height of nine (9) feet (i.e. maximum 6-foot high wall on top of a maximum 3-foot high retaining wall.

☐ 2.14 Submit a security deposit to the Engineering Department to guarantee construction of the public improvements required herein valued at _____% of the approved construction cost estimate. Security deposit shall be in accordance with the City of Ontario Municipal Code. Security deposit will be eligible for release, in accordance with City procedure, upon completion and acceptance of said public improvements. ☐

☒ **2.15 The applicant/developer shall submit all necessary survey documents prepared by a Licensed Surveyor registered in the State of California detailing all existing survey monuments in and around the project site. These documents are to be reviewed and approved by the City Survey Office.** ☐

☒ **2.16 Pay all Development Impact Fees (DIF) to the Building Department. Storm Drain Development Impact Fee, approximately $270,471, shall be paid to the Building Department. Final fee shall be determined based on the approved site plan.** ☐

☐ 2.17 Other conditions: _____ ☐

## B. PUBLIC IMPROVEMENTS
**(See attached Exhibit 'A' for plan check submittal requirements.)**

☒ 2.17 **Design and construct full public improvements in accordance with the City of Ontario Municipal Code, current City standards and specifications, master plans and the adopted specific plan for the area, if any. These public improvements shall include, but not be limited to, the following (checked boxes):**

| Improvement | Jurupa Street | Milliken Avenue | Street 3 | Street 4 |
|---|---|---|---|---|
| Curb and Gutter | ☐ New; ___ ft. from C/L<br>☐ Replace damaged<br>☐ Remove and replace | ☐ New; ___ ft. from C/L<br>☐ Replace damaged<br>☐ Remove and replace | ☐ New; ___ ft. from C/L<br>☐ Replace damaged<br>☐ Remove and replace | ☐ New; ___ ft. from C/L<br>☐ Replace damaged<br>☐ Remove and replace |
| AC Pavement | ☐ Replacement<br>☐ Widen ____ additional feet along frontage, including pavm't transitions | ☐ Replacement<br>☐ Widen ____ additional feet along frontage, including pavm't transitions | ☐ Replacement<br>☐ Widen ____ additional feet along frontage, including pavm't transitions | ☐ Replacement<br>☐ Widen ____ additional feet along frontage, including pavm't transitions |
| PCC Pavement (Truck Route Only) | ☐ New<br>☐ Modify existing | ☐ New<br>☐ Modify existing | ☐ New<br>☐ Modify existing | ☐ New<br>☐ Modify existing |
| **Drive Approach** | ☐ New<br>☐ Remove and replace | ☒ **New**<br>☐ Remove and replace | ☐ New<br>☐ Remove and replace | ☐ New<br>☐ Remove and replace |
| Sidewalk | ☐ New<br>☐ Remove and replace | ☐ New<br>☐ Remove and replace | ☐ New<br>☐ Remove and replace | ☐ New<br>☐ Remove and replace |
| ADA Access Ramp | ☐ New<br>☐ Remove and replace | ☐ New<br>☐ Remove and replace | ☐ New<br>☐ Remove and replace | ☐ New<br>☐ Remove and replace |
| Parkway | ☐ Trees<br>☐ Landscaping (w/irrigation) | ☐ Trees<br>☐ Landscaping (w/irrigation) | ☐ Trees<br>☐ Landscaping (w/irrigation) | ☐ Trees<br>☐ Landscaping (w/irrigation) |
| Raised Landscaped Median | ☐ New<br>☐ Remove and replace | ☐ New<br>☐ Remove and replace | ☐ New<br>☐ Remove and replace | ☐ New<br>☐ Remove and replace |
| Fire Hydrant | ☐ New / Upgrade<br>☐ Relocation | ☐ New / Upgrade<br>☐ Relocation | ☐ New / Upgrade<br>☐ Relocation | ☐ New / Upgrade<br>☐ Relocation |

| | | | | |
|---|---|---|---|---|

| Removal of Improvements | | | | |
| Other Improvements | | | | |

**Specific notes for improvements listed in item no. 2.17, above:**

**A. For longitudinal trenches over 150' in length, a minimum 10' wide, 2" grind and overlay is required per City Std. No. 1306. See COA 2.18 below.**
**B. All master planned utilities shall be designed and installed to the ultimate condition.**

☒ **2.18 Construct a 2" asphalt concrete (AC) grind and overlay on the following street(s):** ☐

- **Milliken Ave from Jurupa Street to Toyota Way. See recycled water main construction listed in COA 2.17 above.**

☐ 2.19 Reconstruction of the full pavement structural section, per City of Ontario Standard Drawing number 1011, may be required based on the existing pavement condition and final street design. Minimum limits of reconstruction shall be along property frontage, from street centerline to curb/gutter. ☐

☐ 2.20 Make arrangements with the Cucamonga Valley Water District (CVWD) to provide ☐ water service ☐ sewer service to the site. This property is within the area served by the CVWD and Applicant shall provide documentation to the City verifying that all required CVWD fees have been paid. ☐

☐ 2.21 Overhead utilities shall be under-grounded, in accordance with Title 7 of the City's Municipal Code (Ordinance No. 2804 and 2892). Developer may pay in-lieu fee, approximately _____, for undergrounding of utilities in accordance with Section 7-7.302.e of the City's Municipal Code. ☐

☒ **2.22 Other conditions:** ☐

**A. Pay an in-lieu fee for PCC pavement installation at the following signalized intersections:**
**i. Jurupa Street & Toyota Way**
**ii. Jurupa Street & Milliken Avenue**
**iii. Toyota Way & Milliken Avenue**
**The fee will be based on an engineer's cost estimate that will be reviewed and approved by the City. The Applicant/Developer will be responsible for their fair share which is equivalent to 25% of the total cost.**

## C. SEWER

☒ **2.23 A 18 inch sewer main is available for connection by this project in Milliken Ave. (Ref: Sewer plan bar code: S10006)** ☐

☐ 2.24 Design and construct a sewer main extension. A sewer main is not available for direct connection. The closest main is approximately _____ feet away. ☐

☐ 2.25 Submit documentation that shows expected peak loading values for modeling the impact of the subject project to the existing sewer system. The project site is within a deficient public sewer system area. Applicant shall be responsible for all costs associated with the preparation of the model. Based on the results of the analysis, Applicant may be required to mitigate the project impact to the deficient public sewer system, including, but not limited to, upgrading of existing sewer main(s), construction of new sewer main(s) or diversion of sewer discharge to another sewer. ☐

☒ **2.26 Other conditions:** ☐

**A. Sewer Monitoring Manhole: Each building is to have its own monitoring manhole, on private property, immediately back of the property line.**

## D. WATER

☒ **2.27 A 16 inch water main is available for connection by this project in Jurupa St and Milliken Ave. (Ref: Water plan bar code: W11713, W10016)** ☐

☐ 2.28 Design and construct a water main extension. A water main is not available for direct connection. The closest main is approximately _____ feet away. ☐

☐ 2.29 Other conditions: _____ ☐

## E. RECYCLED WATER

☒ **2.30 A 8 inch recycled water main is available for connection by this project in Jurupa St. (Ref: Recycled Water plan bar code: P10294)** ☐

☒ **2.31 Design and construct an on-site recycled water system for this project. A recycled water main does exist in the vicinity of this project.** ☐

☐ 2.32 Design and construct an on-site recycled water ready system for this project. A recycled water main does not currently exist in the vicinity of this project, but is planned for the near future. If Applicant would like to connect to this recycled water main when it becomes available, the cost for the connection shall be borne solely by the Applicant. ☐

☒ **2.33** **Submit two (2) hard copies and one (1) electronic copy, in PDF format, of the Engineering Report (ER), for the use of recycled water, to the OMUC for review and subsequent submittal to the California Department of Public Health (CDPH) for final approval.** ☐

**Note: The OMUC and the CDPH review and approval process will be approximately three (3) months. Contact the Ontario Municipal Utilities Company at (909) 395-2647 regarding this requirement.**

☒ **2.34** **Other conditions:** ☐

**A. Recycled Water Main Extension: Extend by constructing a recycled water main from the intersection of Milliken Avenue and Jurupa Street, south to serve Building A and B, specifically Building B with recycled water.**

## F. TRAFFIC / TRANSPORTATION

☐ 2.35 Submit a focused traffic impact study, prepared and signed by a Traffic/Civil Engineer registered in the State of California. The study shall address, but not be limited to, the following issues as required by the City Engineer: ☐
1. On-site and off-site circulation
2. Traffic level of service (LOS) at 'build-out' and future years
3. Impact at specific intersections as selected by the City Engineer

☐ 2.36 New traffic signal installations shall be added to Southern California Edison (SCE) customer account number # 2-20-044-3877. ☐

☒ **2.37** **Other conditions:** ☐

**A. Replace any existing street light fixtures project frontages of Milliken Avenue and Jurupa Street with the current City approved LED equivalent fixture per the Traffic and Transportation Design Guidelines**
**B. All landscaping, block walls, and other obstructions shall be compatible with the stopping sight distance requirements per City of Ontario Standard Drawing No. 1309.**
**C. Provide reciprocal access with the between the project site and all other adjacent properties.**
**D. Design and construct proposed driveway in accordance with City of Ontario Standard Drawing No. 1204 for Commercial Driveway along Milliken Avenue.**

## G. DRAINAGE / HYDROLOGY

☐ 2.38 A _____inch storm drain main is available to accept flows from this project in _____. ☐
(Ref: Storm Drain plan bar code:_____)

☐ 2.39 Submit a hydrology study and drainage analysis, prepared and signed by a Civil Engineer registered in the State of California. The study shall be prepared in accordance with the San Bernardino County Hydrology Manual and City of Ontario standards and guidelines. Additional drainage facilities, including, but not limited to, improvements beyond the project frontage, may be required to be designed and constructed, by Applicant, as a result of the findings of this study. ☐

☐ 2.40 An adequate drainage facility to accept additional runoff from the site does not currently exist downstream of the project. Design and construct a storm water detention facility on the project site. 100 year post-development peak flow shall be attenuated such that it does not exceed 80% of pre-development peak flows, in accordance with the approved hydrology study and improvement plans. ☐

☒ **2.41** **Submit a copy of a recorded private drainage easement or drainage acceptance agreement to the Engineering Department for the acceptance of any increase to volume and/or concentration of historical drainage flows onto adjacent property, prior to approval of the grading plan for the project.** ☐

☐ 2.42 Comply with the City of Ontario Flood Damage Prevention Ordinance (Ordinance No. 2409). The project site or a portion of the project site is within the Special Flood Hazard Area (SFHA) as indicated on the Flood Insurance Rate Map (FIRM) and is subject to flooding during a 100 year frequency storm. The site plan shall be subject to the provisions of the National Flood Insurance Program. ☐

☐ 2.43 Other conditions: _____ ☐

## H. STORM WATER QUALITY / NATIONAL POLLUTANT DISCHARGE AND ELIMINATION SYSTEM (NPDES)

☐ 2.44 401 Water Quality Certification/404 Permit – Submit a copy of any applicable 401 Certification or 404 Permit for the subject project to the City project engineer. Development that will affect any body of surface water (i.e. lake, creek, open drainage channel, etc.) may require a 401 Water Quality Certification from the California Regional Water Quality Control Board, Santa Ana Region (RWQCB) and a 404 Permit from the United States Army Corps of Engineers (USACE). The groups of water bodies classified in these requirements are perennial (flow year round) and ephemeral (flow during rain conditions, only) and include, but are not limited to, direct connections into San Bernardino County Flood Control District (SBCFCD) channels.
If a 401 Certification and/or a 404 Permit are not required, a letter confirming this from Applicant's engineer shall be submitted.
Contact information: USACE (Los Angeles District) (213) 452-3414; RWQCB (951) 782-4130. ☐

☒ **2.45 Submit a Water Quality Management Plan (WQMP). This plan shall be approved by the Engineering Department prior to approval of any grading plan. The WQMP shall be submitted, utilizing the current San Bernardino County Stormwater Program template, available at: http://www.sbcounty.gov/dpw/land/npdes.asp.** ☐

☐ 2.46 Design and construct a Connector Pipe Trash Screen or equivalent Trash Treatment Control Device, per catch basin located within or accepting flows tributary of a Priority Land Use (PLU) area that meets the Full Capture System definition and specifications, and is on the Certified List of the State Water Resources Control Board. The device shall be adequately sized per catch basin and include a deflector screen with vector control access for abatement application, vertical support bars, and removable component to facilitate maintenance and cleaning. ☐

☐ 2.47 Other conditions: _____ ☐

## J. SPECIAL DISTRICTS

☐ 2.48 File an application, together with an initial deposit (if required), to establish a Community Facilities District (CFD) pursuant to the Mello-Roos Community Facilities District Act of 1982. The application and fee shall be submitted a minimum of four (4) months prior to final subdivision map approval, and the CFD shall be established prior to final subdivision map approval or issuance of building permits, whichever occurs first. The CFD shall be established upon the subject property to provide funding for various City services. An annual special tax shall be levied upon each parcel or lot in an amount to be determined. The special tax will be collected along with annual property taxes. The City shall be the sole lead agency in the formation of any CFD. Contact Investment and Revenue Resources at (909) 395-2341 to initiate the CFD application process. ☐

☐ 2.49 Other conditions: _____ ☐

## K. FIBER OPTIC

☐ 2.50 A _____ fiber optic line is available for connection by this project in _____.
(Ref: Fiber Optic plan bar code:_____) ☐

☒ **2.51 Design and construct fiber optic system to provide access to the City's conduit and fiber optic system per the City's Fiber Optic Master Plan. Building entrance conduits shall start from the closest OntarioNet hand hole constructed along the project frontage in the ROW and shall terminate in the main telecommunications room for each building. Conduit infrastructure shall interconnect with the primary and/or secondary backbone fiber optic conduit system at the nearest OntarioNet hand hole located at the southeast corner of Jurupa St and Milliken Ave. Limits of work are generally located along the project frontages of Jurupa St and Milliken Ave.** ☐

☒ **2.52** **Refer to the City's Fiber Optic Master Plan for design and layout guidelines. Contact the Broadband Operations Department at (909) 395-2000, regarding this requirement.** ☐

## L. INTEGRATED WASTE

☒ **2.53** **Onsite solid waste shall be designed in accordance with the City's Refuse & Recycling Planning Manual located at:** ☐

**https://www.ontarioca.gov/OMUC/IntegratedWaste**

☒ **2.54** **Other conditions:** ☐

**A. Organics Separation and Collection: This development shall comply with the Requirements of State Assembly Bill AB341 and AB1826, which requires organic waste to be diverted and collected separately from recycling and other refuse wastes. Additional information can be obtained at through the City website at https://www.ontarioca.gov/IntegratedWaste:**

**B. Three 4-CY Bins Trash Enclosure: Each trash enclosure is to have three 4-cy bins with their respective gate, and a solid roof.**

**C. Final Solid Waste Handling Plan (SWHP): Prior to approval of any building permits, revised as stated directly above and submit Final SWHP and be submitted with the Precise Grading Plan for review and approval of the Integrated Waste Department.**

**D. Integrated Waste Management Report (IWMR): Prior to approval of the Precise Grading Plan, submit to OMUC for review and approval, an Integrated Waste Management Report (IWMR) that complies with the IWMR Requirements.**

## 3. PRIOR TO ISSUANCE OF A CERTIFICATE OF OCCUPANCY, APPLICANT SHALL:

☒ **3.01** **Set new monuments in place of any monuments that have been damaged or destroyed as a result of construction of the subject project. Monuments shall be set in accordance with City of Ontario standards and to the satisfaction of the City Engineer.** ☐

☒ **3.02** **Complete all requirements for recycled water usage.** ☐

☒ **1) Procure from the OMUC a copy of the letter of confirmation from the California Department of Public Health (CDPH) that the Engineering Report (ER) has been reviewed and the subject site is approved for the use of recycled water.**

☒ **2) Obtain clearance from the OMUC confirming completion of recycled water improvements and passing of shutdown tests and cross connection inspection, upon availability/usage of recycled water.**

☒ **3) Complete education training of on-site personnel in the use of recycled water, in accordance with the ER, upon availability/usage of recycled water.**

☒ **3.03** **The applicant/developer shall submit all final survey documents prepared by a Licensed Surveyor registered in the State of California detailing all survey monuments that have been preserved, revised, adjusted or set along with any maps, corner records or Records of Survey needed to comply with these Conditions of Approvals and the latest edition of the California Professional Land Survey Act. These documents are to be reviewed and approved by the City Survey Office.** ☐

☐ 3.04 Ontario Ranch Projects: For developments located at an intersection of any two collector or arterial streets, the applicant/developer shall set a monument if one does not already exist at that intersection. Contact the City Survey office for information on reference benchmarks, acceptable methodology and required submittals. ☐

☒ **3.05** **Confirm payment of all Development Impact Fees (DIF) to the Building Department.** ☐

☒ **3.06** **Submit electronic copies (PDF and Auto CAD format) of all approved improvement plans, studies and reports (i.e. hydrology, traffic, WQMP, etc.).** ☐

## 4. PRIOR TO FINAL ACCEPTANCE, APPLICANT SHALL:

| | | | |
|---|---|---|---|
| ☒ | 4.01 | **Complete all Conditions of Approval listed under Sections 1-3 above.** | ☐ |
| ☒ | 4.02 | **Pay all outstanding fees pursuant to the City of Ontario Municipal Code, including but not limited to, plan check fees, inspection fees and Development Impact Fees.** | ☐ |
| ☒ | 4.03 | **The applicant/developer shall submit a written request for the City's final acceptance of the project addressed to the City Project Engineer. The request shall include a completed Acceptance and Bond Release Checklist, state that all Conditions of Approval have been completed and shall be signed by the applicant/developer. Upon receipt of the request, review of the request shall be a minimum of 10 business days. Conditions of Approval that are deemed incomplete by the City will cause delays in the acceptance process.** | ☐ |
| ☒ | 4.04 | **Submit record drawings (PDF) for all public improvements identified within Section 2 of these Conditions of Approval.** | ☐ |

**EXHIBIT 'A'**

## ENGINEERING DEPARTMENT
## First Plan Check Submittal Checklist

**Project Number: PMTT21-010, PDEV21-018, and/or Parcel Map No. 20147**

**The following items are required to be included with the first plan check submittal:**

1. ☒ **A copy of this check list**
2. ☒ **Payment of fee for Plan Checking**
3. ☒ **One (1) copy of Engineering Cost Estimate (on City form) with engineer's wet signature and stamp.**
4. ☒ **One (1) copy of project Conditions of Approval**
5. ☒ **Include a PDF (electronic submittal) of each required improvement plan at every submittal.**
6. ☒ **Two (2) sets of Potable and Recycled Water demand calculations (include water demand calculations showing low, average and peak water demand in GPM for the proposed development and proposed water meter size).**
7. ☐ Three (3) sets of Public Street improvement plan with street cross-sections
8. ☐ Four (4) sets of Public Water improvement plan (include water demand calculations showing low, average and peak water demand in GPM for the proposed development and proposed water meter size)
9. ☒ **Four (4) sets of Recycled Water improvement plan (include recycled water demand calculations showing low, average and peak water demand in GPM for the proposed development and proposed water meter size and an exhibit showing the limits of areas being irrigated by each recycled water meter)**
10. ☐ Four (4) sets of Public Sewer improvement plan
11. ☐ Five (5) sets of Public Storm Drain improvement plan
12. ☒ **Three (3) sets of Public Street Light improvement plan**
13. ☐ Three (3) sets of Signing and Striping improvement plan
14. ☒ **Three (3) sets of Fiber Optic plan (include Auto CAD electronic submittal)**
15. ☒ **Three (3) sets of Dry Utility plans within public right-of-way (at a minimum the plans must show existing and ultimate right-of-way, curb and gutter, proposed utility location including centerline dimensions, wall to wall clearances between proposed utility and adjacent public line, street work repaired per Standard Drawing No. 1306. Include Auto CAD electronic submittal)**
16. ☐ Three (3) sets of Traffic Signal improvement plan and One (1) copy of Traffic Signal Specifications with modified Special Provisions. Please contact the Traffic Division at (909) 395-2154 to obtain Traffic Signal Specifications.
17. ☒ **Two (2) copies of Water Quality Management Plan (WQMP), including one (1) copy of the approved Preliminary WQMP (PWQMP).**
18. ☐ One (1) copy of Hydrology/Drainage study
19. ☒ **One (1) copy of Soils/Geology report**
20. ☒ **Payment for Parcel Map processing fee**

21. ☒ **Three (3) copies of Parcel Map**

22. ☒ **One (1) copy of approved Tentative Map**

23. ☒ **One (1) copy of Preliminary Title Report (current within 30 days)**

24. ☒ **One (1) copy of Traverse Closure Calculations**

25. ☒ **One (1) set of supporting documents and maps (legible copies): referenced improvement plans (full size), referenced record final maps/parcel maps (full size, 18"x26"), Assessor's Parcel map (full size, 11"x17"), recorded documents such as deeds, lot line adjustments, easements, etc.**

26. ☒ **Two (2) copies of Engineering Report and an electronic file (include PDF format electronic submittal) for recycled water use**

27. ☐ Other: _____

# CITY OF ONTARIO
## MEMORANDUM

**TO:** **Edmelynne Hutter, Senior Planner**
**Planning Department**

**FROM:** **Mike Gerken, Deputy Fire Chief/Fire Marshal**
**Fire Department**

**DATE:** **May 24, 2021**

**SUBJECT:** **PMTT21-010 - A Parcel Map to subdivide 13.07 acres of land into three (3) parcels located at southeast corner of Jurupa Street and Milliken Avenue, within the Office/R-D and Warehouse/Distribution land use districts of the Toyota Business Park Specific Plan (APN(s): 0238-121-75). Related File(s): PDEV21-018.**

---

☒ The plan **does** adequately address Fire Department requirements at this time.

☒ Standard Conditions of Approval apply, as stated below.

---

**SITE AND BUILDING FEATURES:**

A. 2019 CBC Type of Construction: Type III-B

B. Type of Roof Materials: Panelized

C. Ground Floor Area(s): Building A = 113,067 Sq. Ft.
Building B = 48,205 Sq. Ft.

D. Number of Stories: 1 with Mezzanine

E. Total Square Footage: Building A = 118,067 Sq. Ft.
Building B = 50,705 Sq. Ft.

F. 2019 CBC Occupancy Classification(s): B/S1/F1

## CONDITIONS OF APPROVAL:

### 1.0 GENERAL

☒ 1.1 The following are the Ontario Fire Department ("Fire Department") requirements for this development project, based on the current edition of the California Fire Code (CFC), and the current versions of the Fire Prevention Standards ("Standards.") It is recommended that the applicant or developer transmit a copy of these requirements to the on-site contractor(s) and that all questions or concerns be directed to the Bureau of Fire Prevention, at (909) 395-2029. For copies of Ontario Fire Department Standards please access the City of Ontario website at www.ontarioca.gov/Fire/Prevention.

☒ 1.2 These Fire Department conditions of approval are to be included on any and all construction drawings.

### 2.0 FIRE DEPARTMENT ACCESS

☒ 2.1 Fire Department vehicle access roadways shall be provided to within 150 ft. of all portions of the exterior walls of the first story of any building, unless specifically approved. Roadways shall be paved with an all-weather surface and shall be a minimum of twenty-four (24) ft. wide. See Standard #B-004.

☒ 2.2 In order to allow for adequate turning radius for emergency fire apparatus, all turns shall be designed to meet the minimum twenty five feet (25') inside and forty-five feet (45') outside turning radius per Standard #B-005.

☒ 2.3 Fire Department access roadways that exceed one hundred and fifty feet (150') in length shall have an approved turn-around per Standard #B-002.

☒ 2.4 Access drive aisles which cross property lines shall be provided with CC&Rs, access easements, or reciprocating agreements, and shall be recorded on the titles of affected properties, and copies of same shall be provided at the time of building plan check.

☒ 2.5 "No Parking-Fire Lane" signs and /or red painted curbs with lettering are required to be installed in interior access roadways, in locations where vehicle parking would obstruct the minimum clear width requirement. Installation shall be per Standard #B-001.

☒ 2.6 Security gates or other barriers on fire access roadways shall be provided with a Knox brand key switch or padlock to allow Fire Department access. See Standards #B-003, B-004 and H-001.

☒ 2.7 Any time PRIOR to on-site combustible construction and/or storage, a minimum twenty-four (24) ft. wide circulating all weather access roads shall be provided to within 150 ft. of all portions of the exterior walls of the first story of any building, unless specifically approved by fire department and other emergency services.

## 3.0 WATER SUPPLY

☒ 3.1 The required fire flow per Fire Department standards, based on the 2019 California Fire Code, Appendix B, is 3750 gallons per minute (g.p.m.) for 4 hours at a minimum of 20 pounds per square inch (p.s.i.) residual operating pressure.

☒ 3.2 Off-site (public) fire hydrants are required to be installed on all frontage streets, at a minimum spacing of three hundred foot (300') apart, per Engineering Department specifications.

☒ 3.3 Buildings that exceed 100,000 square feet in floor area shall provide an onsite looped fire protection water line around the building(s.) The loops shall be required to have two or more points of connection from a public circulating water main.

☒ 3.4 The public water supply, including water mains and fire hydrants, shall be tested and approved by the Engineering Department and Fire Department prior to combustible construction to assure availability and reliability for firefighting purposes.

## 4.0 FIRE PROTECTION SYSTEMS

☒ 4.3 An automatic fire sprinkler system is required. The system design shall be in accordance with National Fire Protection Association (NFPA) Standard 13. All new fire sprinkler systems, except those in single family dwellings, which contain twenty (20) sprinkler heads or more shall be monitored by an approved listed supervising station. An application along with detailed plans shall be submitted, and a construction permit shall be issued by the Fire Department, prior to any work being done.

☒ 4.5 Fire Department Connections (FDC) shall be located on the address side of the building within one hundred fifty feet (150') of a public fire hydrant on the same side of the street. Provide identification for all fire sprinkler control valves and fire department connections per Standard #D-007. Raised curbs adjacent to Fire Department connection(s) shall be painted red, five feet either side, per City standards.

☒ 4.6 A fire alarm system is required. The system design shall be in accordance with National Fire Protection Association (NFPA) Standard 72. An application along with detailed plans shall be submitted, and a construction permit shall be issued by the Fire Department, prior to any work being done.

☒ 4.7 Portable fire extinguishers are required to be installed prior to occupancy per Standard #C-001. Please contact the Fire Prevention Bureau to determine the exact number, type and placement required.

## 5.0 BUILDING CONSTRUCTION FEATURES

☒ 5.1 The developer/general contractor is to be responsible for reasonable periodic cleanup of the development during construction to avoid hazardous accumulations of combustible trash and debris both on and off the site.

☒ 5.2 Approved numbers or addresses shall be placed on all new and existing buildings in such a position as to be plainly visible and legible from the street or road fronting the property. Homes

that do not front street shall be provided with an address entry sign at the street. Address numbers shall contrast with their background. See Section 9-1 6.06 of the Ontario Municipal Code and Standards #H-003 and #H-002.

☒ 5.6 Knox ® brand key-box(es) shall be installed in location(s) acceptable to the Fire Department. All Knox boxes shall be monitored for tamper by the building fire alarm system. See Standard #H-001 for specific requirements.

☒ 5.7 Placards shall be installed in acceptable locations on buildings that store, use or handle hazardous materials in excess of the quantities specified in the CFC. Placards shall meet the requirements of National Fire Protection Association (NFPA) Standard 704.

# CITY OF ONTARIO
## MEMORANDUM

**TO:** **Edmelynne Hutter, Senior Planner**

**FROM:** **Officer Bill Lee, Police Department**

**DATE:** **May 19, 2021**

**SUBJECT:** **PMTT21-010- A DEVELOPMENT PLAN TO CONSTRUCT TWO (2) INDUSTRIAL BUILDINGS TOTALING 168,772 SQUARE FEET, LOCATED AT THE SOUTHEAST CORNER OF JURUPA STREET AND MILLIKEN AVENUE. RELATED FILE: PDEV21-018.**

---

The "Standard Conditions of Approval" contained in Resolution No. 2017-027 apply. The applicant shall read and be thoroughly familiar with these conditions, including, but not limited to, the requirements below.

- Required lighting for all walkways, driveways, doorways, parking lots, hallways and other areas used by the public shall be provided. Lights shall operate via photosensor. Photometrics shall be provided to the Police Department and include the types of fixtures proposed and demonstrate that such fixtures meet the vandal-resistant requirement. Planned landscaping shall not obstruct lighting.
- Rooftop addresses shall be installed on the buildings as stated in the Standard Conditions. The numbers shall be at a minimum 6 feet tall and 2 foot wide, in reflective white paint on a flat black background, and oriented with the bottom of the numbers towards the addressed street. Associated letters shall also be included.
- The Applicant shall comply with construction site security requirements as stated in the Standard Conditions.

The Applicant is invited to contact Officer Bill Lee at (909) 408-1672 with any questions or concerns regarding these conditions.

## The project is impacted by the following ONT ALUCP Compatibility Zones:

| Safety | Noise Impact | Airspace Protection | Overflight Notification |
|---|---|---|---|
| ○ Zone 1 | ○ 75+ dB CNEL | ☐ High Terrain Zone | ☐ Avigation Easement Dedication |
| ○ Zone 1A | ○ 70 - 75 dB CNEL | ☑ FAA Notification Surfaces | ☑ Recorded Overflight Notification |
| ○ Zone 2 | ☑ 65 - 70 dB CNEL | ☑ Airspace Obstruction Surfaces | ○ Real Estate Transaction Disclosure |
| ☐ Zone 3 | ☑ 60 - 65 dB CNEL | ☑ Airspace Avigation Easement Area | |
| ○ Zone 4 | | Allowable Height: 200 FT + | |
| ○ Zone 5 | | | |

## The project is impacted by the following Chino ALUCP Safety Zones:

☐ Zone 1 ○ Zone 2 ☐ Zone 3 ○ Zone 4 ○ Zone 5 ○ Zone 6

Allowable Height: _____

## CONSISTENCY DETERMINATION

This proposed Project is: ○ Exempt from the ALUCP ◉ Consistent ○ Consistent with Conditions ○ Inconsistent

The proposed project is located within the Airport Influence Area of Ontario International Airport (ONT) and was evaluated and found to be consistent with the policies and criteria of the Airport Land Use Compatibility Plan (ALUCP) for ONT.

Airport Planner Signature: Lorena Mejia

RESOLUTION NO. PC21-088

A RESOLUTION OF THE PLANNING COMMISSION OF THE CITY OF ONTARIO, CALIFORNIA, APPROVING A DEVELOPMENT PLAN, FILE NO. PDEV21-018, TO CONSTRUCT TWO INDUSTRIAL BUILDINGS TOTALING 168,772 SQUARE FEET AND ASSOCIATED SITE IMPROVEMENTS ON 13.07 ACRES OF LAND LOCATED AT THE SOUTHEAST CORNER OF JURUPA STREET AND MILLIKEN AVENUE, AT 1425 SOUTH TOYOTA WAY, AND MAKING FINDINGS IN SUPPORT THEREOF—APN: 0238-121-75.

WHEREAS, MIG, INC. (hereinafter referred to as "Applicant") has filed an Application for the approval of a Development Plan, File No. PDEV21-018, as described in the title of this Resolution (hereinafter referred to as "Application" or "Project"); and

WHEREAS, the Application applies to 13.07 acres of land generally located at the southeast corner of Jurupa Street and Milliken Avenue, at 1425 South Toyota Way within the Toyota Ontario Business Park Specific Plan, and is presently vacant; and

WHEREAS, the properties to the north are within the California Commerce Center Specific Plan zoning district and are developed with warehouse and commercial uses. The properties to the south are within the Entratter Industrial Specific Plan and the IG (General Industrial) zoning district, and are developed with warehouse uses. The land to the east is the Interstate 15 freeway. The properties to the west are within the California Commerce Center Specific Plan and are developed with light industrial and business park uses; and

WHEREAS, the Applicant is proposing to construct two industrial buildings totaling 168,772 square feet, and associated site improvements, on the vacant portion of the Project site, at the northwest corner of the Specific Plan area; and

WHEREAS, the Application was submitted in conjunction with Tentative Parcel Map No. 20147, File No. PMTT21-010, to subdivide the Project site into three parcels to facilitate the development of the proposed Project with an industrial building on each vacant parcel (Parcels 2 and 3); and

WHEREAS, proposed Building A on Parcel 2 is the larger of the two new buildings, at a total of 118,067 square feet, and proposed Building B on Parcel 3 totals 50,705 square feet; and

WHEREAS, the Application is a project pursuant to the California Environmental Quality Act (Public Resources Code Section 21000 et seq.) ("CEQA") and an initial study has been prepared to analyze possible environmental impacts; and

WHEREAS, The Ontario Plan Environmental Impact Report (State Clearinghouse No. 2008101140) was certified on January 27, 2010, (hereinafter referred to as “Certified EIR”), in which development and use of the Project site was discussed; and

WHEREAS, the Planning Director of the City of Ontario prepared and approved for attachment to the certified Environmental Impact Report, an Addendum to the Certified EIR (hereinafter referred to as “EIR Addendum”) in accordance with the requirements of the California Environmental Quality Act of 1970, together with State and local guidelines implementing said Act, all as amended to date (collectively referred to as “CEQA”); and

WHEREAS, the environmental impacts of this project were thoroughly analyzed in the EIR Addendum, which concluded that implementation of the Project could result in a number of significant effects on the environment that were previously analyzed in the Certified EIR, and that the Certified EIR identified mitigation measures that would reduce each of those significant effects to a less-than-significant level; and

WHEREAS, the City's "Local Guidelines for the Implementation of the California Environmental Quality Act (CEQA)" provide for the use of a single environmental assessment in situations where the impacts of subsequent projects are adequately analyzed; and

WHEREAS, the Application is a project pursuant to the California Environmental Quality Act — Public Resources Code Section 21000 et seq. — (hereinafter referred to as "CEQA") and an EIR Addendum has been prepared to determine possible environmental impacts; and

WHEREAS, Ontario Development Code Table 2.02-1 (Review Matrix) grants the Planning Commission the responsibility and authority to review and act on the subject Application; and

WHEREAS, the Project has been reviewed for consistency with the Housing Element of the Policy Plan component of The Ontario Plan, as State Housing Element law (as prescribed in Government Code Sections 65580 through 65589.8) requires that development projects must be consistent with the Housing Element, if upon consideration of all its aspects, it is found to further the purposes, principals, goals, and policies of the Housing Element; and

WHEREAS, the Project is located within the Airport Influence Area of Ontario International Airport, which encompasses lands within parts of San Bernardino, Riverside, and Los Angeles Counties, and is subject to, and must be consistent with, the policies and criteria set forth in the Ontario International Airport Land Use Compatibility Plan (hereinafter referred to as “ALUCP”), which applies only to jurisdictions within San

Bernardino County, and addresses the noise, safety, airspace protection, and overflight impacts of current and future airport activity; and

WHEREAS, City of Ontario Development Code Division 2.03 (Public Hearings) prescribes the manner in which public notification shall be provided and hearing procedures to be followed, and all such notifications and procedures have been completed; and

WHEREAS, on December 20, 2021, the Development Advisory Board of the City of Ontario conducted a hearing to consider the Application and concluded said hearing on that date, voting to issue Decision No. DAB21-061, recommending that the Planning Commission approve the Application; and

WHEREAS, as the first action on the Project, on December 20, 2021, the Planning Commission adopted a Resolution approving the use of the EIR Addendum, finding that the proposed Project introduces no new significant environmental impacts and applying all previously adopted mitigation measures to the Project, which were incorporated by reference; and

WHEREAS, on December 20, 2021, the Planning Commission of the City of Ontario conducted a hearing to consider the Project, and concluded said hearing on that date; and

WHEREAS, all legal prerequisites to the adoption of this Resolution have occurred.

NOW, THEREFORE, IT IS HEREBY FOUND, DETERMINED, AND RESOLVED by the Planning Commission of the City of Ontario, as follows:

SECTION 1: ***Environmental Determination and Findings.*** As the decision-making body for the Project, the Planning Commission has reviewed and considered the information contained in the Addendum, the initial study, and the administrative record for the Project, including all written and oral evidence provided during the comment period. Based upon the facts and information contained in the Addendum, the initial study, and the administrative record, including all written and oral evidence presented to the Planning Commission, the Planning Commission finds as follows:

(1) The environmental impacts of the Project were reviewed in conjunction with an Addendum to The Ontario Plan Environmental Impact Report (State Clearinghouse No. 2008101140), certified by the Ontario City Council on January 27, 2010, in conjunction with File No. PMTT21-010 and PDEV21-018; and

(2) The EIR Addendum and administrative record have been completed in compliance with CEQA, the State CEQA Guidelines, and the City of Ontario Local CEQA Guidelines; and

(3) The City's "Guidelines for the Implementation of the California Environmental Quality Act (CEQA)" provide for the use of a single environmental assessment in situations where the impacts of subsequent projects are adequately analyzed. This Application introduces no new significant environmental impacts; and

(4) All previously adopted mitigation measures shall be a condition of project approval, as they are applicable to the Project, and are incorporated herein by this reference; and

(5) The EIR Addendum contains a complete and accurate reporting of the environmental impacts associated with the Project, and reflects the independent judgment of the Planning Commission; and

(6) There is no substantial evidence in the administrative record supporting a fair argument that the project may result in significant environmental impacts.

SECTION 2: ***Subsequent or Supplemental Environmental Review Not Required.*** Based on the EIR Addendum, all related information presented to the Planning Commission, and the specific findings set forth in Section 1, above, the Planning Commission finds that the preparation of a subsequent or supplemental Certified EIR is not required for the Project, as the Project:

(1) Does not constitute substantial changes to the Certified EIR that will require major revisions to the Certified EIR due to the involvement of new significant environmental effects or a substantial increase in the severity of previously identified significant effects; and

(2) Does not constitute substantial changes with respect to the circumstances under which the Certified EIR was prepared, that will require major revisions to the Certified EIR due to the involvement of new significant environmental effects or a substantial increase in the severity of the previously identified significant effects; and

(3) Does not contain new information of substantial importance that was not known and could not have been known with the exercise of reasonable diligence at the time the Certified EIR was certified/adopted, that shows any of the following:

(a) The Project will have one or more significant effects not discussed in the Certified EIR; or

(b) Significant effects previously examined will be substantially more severe than shown in the Certified EIR; or

(c) Mitigation measures or alternatives previously found not to be feasible would in fact be feasible and would substantially reduce one or more significant effects of the Project, but the City declined to adopt such measures; or

(d) Mitigation measures or alternatives considerably different from those analyzed in the Certified EIR would substantially reduce one or more significant effects on the environment, but which the City declined to adopt.

SECTION 3: ***Housing Element Compliance.*** Pursuant to the requirements of California Government Code Chapter 3, Article 10.6, commencing with Section 65580, as the decision-making body for the Project, the Planning Commission finds that based upon the facts and information contained in the Application and supporting documentation, at the time of Project implementation, the project is consistent with the Housing Element of the Policy Plan (General Plan) component of The Ontario Plan, as the project site is not one of the properties in the Available Land Inventory contained in Table A-3 (Available Land by Planning Area) of the Housing Element Technical Report Appendix.

SECTION 4: ***Ontario International Airport Land Use Compatibility Plan ("ALUCP") Compliance.*** The California State Aeronautics Act (Public Utilities Code Section 21670 et seq.) requires that an Airport Land Use Compatibility Plan be prepared for all public use airports in the State; and requires that local land use plans and individual development proposals must be consistent with the policies set forth in the adopted Airport Land Use Compatibility Plan. On April 19, 2011, the City Council of the City of Ontario approved and adopted the ALUCP, establishing the Airport Influence Area for Ontario International Airport (hereinafter referred to as "ONT"), which encompasses lands within parts of San Bernardino, Riverside, and Los Angeles Counties, and limits future land uses and development within the Airport Influence Area, as they relate to noise, safety, airspace protection, and overflight impacts of current and future airport activity. As the decision-making authority for the Project, the Planning Commission has reviewed and considered the facts and information contained in the Application and supporting documentation against the ALUCP compatibility factors, including [1] Safety Criteria (ALUCP Table 2-2) and Safety Zones (ALUCP Map 2-2), [2] Noise Criteria (ALUCP Table 2-3) and Noise Impact Zones (ALUCP Map 2-3), [3] Airspace protection Zones (ALUCP Map 2-4), and [4] Overflight Notification Zones (ALUCP Map 2-5). As a result, the PLANNING COMMISSION, therefore, finds and determines that the Project, when implemented in conjunction with the conditions of approval, will be consistent with the policies and criteria set forth within the ALUCP.

SECTION 5: ***Concluding Facts and Reasons.*** Based upon the substantial evidence presented to the Planning Commission during the above-referenced hearing,

and upon the specific findings set forth in Sections 1 through 4, above, the Planning Commission hereby concludes as follows:

(1) ***The proposed development at the proposed location is consistent with the goals, policies, plans and exhibits of the Vision, Policy Plan (General Plan), and City Council Priorities components of The Ontario Plan.*** The proposed Project is located within the Industrial land use district of the Policy Plan Land Use Map, and the Toyota Ontario Business Park Specific Plan zoning district. The development standards and conditions under which the proposed Project will be constructed and maintained, is consistent with the goals, policies, plans, and exhibits of the Vision, Policy Plan (General Plan), and City Council Priorities components of The Ontario Plan.

(2) ***The proposed development is compatible with those on adjoining sites in relation to location of buildings, with particular attention to privacy, views, any physical constraint identified on the site and the characteristics of the area in which the site is located.*** The Project has been designed consistent with the requirements of the City of Ontario Development Code and the Toyota Ontario Business Park Specific Plan zoning district, including standards relative to the particular land use proposed (industrial), as-well-as building intensity, building and parking setbacks, building height, number of off-street parking and loading spaces, on-site and off-site landscaping, and fences, walls and obstructions.

(3) ***The proposed development will complement and/or improve upon the quality of existing development in the vicinity of the project and the minimum safeguards necessary to protect the public health, safety and general welfare have been required of the proposed project.*** The Development Advisory Board has required certain safeguards, and impose certain conditions of approval, which have been established to ensure that: [i] the purposes of the Toyota Ontario Business Park Specific Plan are maintained; [ii] the project will not endanger the public health, safety or general welfare; [iii] the project will not result in any significant environmental impacts; [iv] the project will be in harmony with the area in which it is located; and [v] the project will be in full conformity with the Vision, City Council Priorities and Policy Plan components of The Ontario Plan, and the California Commerce Center Specific Plan.

(4) ***The proposed development is consistent with the development standards and design guidelines set forth in the Development Code, or applicable specific plan or planned unit development.*** The proposed Project has been reviewed for consistency with the general development standards and guidelines of the Toyota Ontario Business Park Specific Plan that are applicable to the proposed Project, including building intensity, building and parking setbacks, building height, amount of off-street parking and loading spaces, parking lot dimensions, design and landscaping, bicycle parking, on-site landscaping, and fences and walls, as-well-as those development standards and guidelines specifically related to the particular land use being proposed

(industrial). As a result of this review, the Development Advisory Board has determined that the Project, when implemented in conjunction with the conditions of approval, will be consistent with the development standards and guidelines described in the California Commerce Center Specific Plan.

SECTION 6: ***Planning Commission Action.*** Based upon the findings and conclusions set forth in Sections 1 through 5, above, the Planning Commission hereby APPROVES the herein described Application, subject to each and every condition set forth in the Department reports attached hereto as "Attachment A," and incorporated herein by this reference.

SECTION 7: ***Indemnification.*** The Applicant shall agree to defend, indemnify and hold harmless, the City of Ontario or its agents, officers, and employees from any claim, action or proceeding against the City of Ontario or its agents, officers or employees to attack, set aside, void, or annul this approval. The City of Ontario shall promptly notify the applicant of any such claim, action, or proceeding, and the City of Ontario shall cooperate fully in the defense.

SECTION 8: ***Custodian of Records.*** The documents and materials that constitute the record of proceedings on which these findings have been based are located at the City of Ontario City Hall, 303 East "B" Street, Ontario, California 91764. The custodian for these records is the City Clerk of the City of Ontario.

SECTION 9: ***Certification to Adoption.*** The Secretary shall certify to the adoption of the Resolution.

- - - - - - - - - - - - - -

The Secretary Pro Tempore for the Planning Commission of the City of Ontario shall certify as to the adoption of this Resolution.

I hereby certify that the foregoing Resolution was duly and regularly introduced, passed and adopted by the Planning Commission of the City of Ontario at a special meeting thereof held on the 20th day of December 2021, and the foregoing is a full, true and correct copy of said Resolution, and has not been amended or repealed.

---

The Planning Department, Land Development Section, conditions of approval applicable to the above-described Project, are listed below. The Project shall comply with each condition of approval listed below:

**1.0 Standard Conditions of Approval.** The project shall comply with the *Standard Conditions for New Development*, adopted by City Council Resolution No. 2017-027 on April 18, 2017. A copy of the *Standard Conditions for New Development* may be obtained from the Planning Department or City Clerk/Records Management Department.

**2.0 Special Conditions of Approval.** In addition to the *Standard Conditions for New Development* identified in condition no. 1.0, above, the project shall comply with the following special conditions of approval:

**2.1** Time Limits.

**(a)** Development Plan approval shall become null and void 2 years following the effective date of application approval, unless a building permit is issued and construction is commenced, and diligently pursued toward completion, or a time extension has been approved by the Planning Director. This condition does not supersede any individual time limits specified herein, or any other departmental conditions of approval applicable to the Project, for the performance of specific conditions or improvements.

**2.2** General Requirements. The Project shall comply with the following general requirements:

**(a)** All construction documentation shall be coordinated for consistency, including, but not limited to, architectural, structural, mechanical, electrical, plumbing, landscape and irrigation, grading, utility and street improvement plans. All such plans shall be consistent with the approved entitlement plans on file with the Planning Department.

**(b)** The project site shall be developed in conformance with the approved plans on file with the City. Any variation from the approved plans must be reviewed and approved by the Planning Department prior to building permit issuance.

**(c)** The herein-listed conditions of approval from all City departments shall be included in the construction plan set for project, which shall be maintained on site during project construction.

**2.3** Architecture Treatment and Building Design.

**(a)** At locations where changes in parapet wall height meet, the taller parapet must return into the building for a minimum distance of 6 FT, so that the actual thickness of the parapet wall cannot be observed or readily discerned.

**(b)** Roof access ladders shall be located on the inside of the building.

**(c)** All building drainage gutters, downspouts, vents, etc., shall be completely concealed from public view or shall be architecturally compatible (decorative) with the exterior building design and color.

**2.4** Landscaping.

**(a)** The Project shall provide and continuously maintain landscaping and irrigation systems in compliance with the provisions of Ontario Development Code Division 6.05 (Landscaping).

**(b)** Comply with the conditions of approval of the Planning Department; Landscape Planning Division.

**(c)** Landscaping shall not be installed until the Landscape and Irrigation Construction Documentation Plans required by Ontario Development Code Division 6.05 (Landscaping) have been approved by the Landscape Planning Division.

**(d)** Changes to approved Landscape and Irrigation Construction Documentation Plans, which affect the character or quantity of the plant material or irrigation system design, shall be resubmitted for approval of the revision by the Landscape Planning Division, prior to the commencement of the changes.

**2.5** Walls and Fences. All Project walls and fences shall comply with the requirements of Ontario Development Code Division 6.02 (Walls, Fences and Obstructions).

**2.6** Parking, Circulation and Access.

**(a)** The Project shall comply with the applicable off-street parking, loading and lighting requirements of City of Ontario Development Code Division 6.03 (Off-Street Parking and Loading).

**(b)** All drive approaches shall be provided with an enhanced pavement treatment. The enhanced paving shall extend from the back of the approach apron, into the site, to the first intersecting drive aisle or parking space.

**(c)** Areas provided to meet the City's parking requirements, including off-street parking and loading spaces, access drives, and maneuvering areas, shall not be used for the outdoor storage of materials and equipment, nor shall it be used for any other purpose than parking.

**(d)** The required number of off-street parking spaces and/or loading spaces shall be provided at the time of site and/or building occupancy. All parking and loading spaces shall be maintained in good condition for the duration of the building or use.

**(e)** Parking spaces specifically designated and conveniently located for use by the physically disabled shall be provided pursuant to current accessibility regulations contained in State law (CCR Title 24, Part 2, Chapters 2B71, and CVC Section 22507.8).

**(f)** Bicycle parking facilities, including bicycle racks, lockers, and other secure facilities, shall be provided in conjunction with development projects pursuant to current regulations contained in CALGreen (CAC Title 24, Part 11).

**2.7** Outdoor Loading and Storage Areas.

**(a)** Loading facilities shall be designed and constructed pursuant to Development Code Division 6.03 (Off-Street Parking and Loading).

**(b)** Areas designated for off-street parking, loading, and vehicular circulation and maneuvering, shall not be used for the outdoor storage of materials or equipment.

**(c)** Outdoor loading and storage areas, and loading doors, shall be screened from public view pursuant to the requirements of Development Code Paragraph 6.02.025.A.2 (Screening of Outdoor Loading and Storage Areas, and Loading Doors) Et Seq.

**(d)** Outdoor loading and storage areas shall be provided with gates that are view-obstructing by one of the following methods:

**(i)** Construct gates with a perforated metal sheet affixed to the inside of the gate surface (50 percent screen); or
**(ii)** Construct gates with minimum one-inch square tube steel pickets spaced at maximum 2-inches apart.

**(e)** The minimum gate height for screen wall openings shall be established based upon the corresponding wall height, as follows:

| ***Screen Wall Height*** | ***Minimum Gate Height*** |
|---|---|
| 14 feet: | 10 feet |
| 12 feet: | 9 feet |
| 10 feet: | 8 feet |

| | |
|---|---|
| 8 feet: | 8 feet |
| 6 feet: | 6 feet |

**2.8** Site Lighting.

**(a)** All off-street parking facilities shall be provided with nighttime security lighting pursuant to Ontario Municipal Code Section 4-11.08 (Special Residential Building Provisions) and Section 4-11.09 (Special Commercial/Industrial Building Provisions), designed to confine emitted light to the parking areas. Parking facilities shall be lighted from sunset until sunrise, daily, and shall be operated by a photocell switch.

**(b)** Unless intended as part of a master lighting program, no operation, activity, or lighting fixture shall create illumination on any adjacent property.

**2.9** Mechanical and Rooftop Equipment.

**(a)** All exterior roof-mounted mechanical, heating and air conditioning equipment, and all appurtenances thereto, shall be completely screened from public view by parapet walls or roof screens that are architecturally treated so as to be consistent with the building architecture.

**(b)** All ground-mounted utility equipment and structures, such as tanks, transformers, HVAC equipment, and backflow prevention devices, shall be located out of view from a public street, or adequately screened through the use of landscaping and/or decorative low garden walls.

**2.10** Security Standards. The Project shall comply with all applicable requirements of Ontario Municipal Code Title 4 (Public Safety), Chapter 11 (Security Standards for Buildings).

**2.11** Signs. All Project signage shall comply with the requirements of Ontario Development Code Division 8.1 (Sign Regulations).

**2.12** Sound Attenuation. The Project shall be constructed and operated in a manner so as not to exceed the maximum interior and exterior noised levels set forth in Ontario Municipal Code Title 5 (Public Welfare, Morals, and Conduct), Chapter 29 (Noise).

**2.13** Covenants, Conditions and Restrictions (CC&Rs)/Mutual Access and Maintenance Agreements.

**(a)** CC&Rs shall be prepared for the Project and shall be recorded prior to the issuance of a building permit.

**(b)** The CC&Rs shall be in a form and contain provisions satisfactory to the City. The articles of incorporation for the property owners association and the CC&Rs shall be reviewed and approved by the City.

**(c)** CC&Rs shall ensure reciprocal parking and access between parcels.

**(d)** CC&Rs shall ensure reciprocal parking and access between parcels, and common maintenance of:

**(i)** Landscaping and irrigation systems within common areas;
**(ii)** Landscaping and irrigation systems within parkways adjacent to the project site, including that portion of any public highway right-of-way between the property line or right-of-way boundary line and the curb line and also the area enclosed within the curb lines of a median divider (Ontario Municipal Code Section 7-3.03), pursuant to Ontario Municipal Code Section 5-22-02;
**(iii)** Shared parking facilities and access drives; and
**(iv)** Utility and drainage easements.

**(e)** CC&Rs shall include authorization for the City's local law enforcement officers to enforce City and State traffic and penal codes within the project area.

**(f)** The CC&Rs shall grant the City of Ontario the right of enforcement of the CC&R provisions.

**(g)** A specific methodology/procedure shall be established within the CC&Rs for enforcement of its provisions by the City of Ontario, if adequate maintenance of the development does not occur, such as, but not limited to, provisions that would grant the City the right of access to correct maintenance issues and assess the property owners association for all costs incurred.

**2.14** Environmental Review.

**(a)** The environmental impacts of this project were reviewed in conjunction with an **Addendum to The Ontario Plan Environmental Impact Report** (State Clearinghouse No. 2008101140). This application introduces no new significant environmental impacts. The City's "Guidelines for the Implementation of the California Environmental Quality Act (CEQA)" provide for the use of a single environmental assessment in situations where the impacts of subsequent projects are adequately analyzed. This Application introduces no new significant environmental impacts. All previously adopted mitigation measures are a condition of project approval and are incorporated herein by this reference. All previously adopted mitigation measures shall be a condition of project approval, as they are applicable, and are incorporated herein by this reference.

**(b)** If human remains are found during project grading/excavation/ construction activities, the area shall not be disturbed until any required investigation is completed by the County Coroner and Native American consultation has been completed (if deemed applicable).

**(c)** If any archeological or paleontological resources are found during project grading/excavation/construction, the area shall not be disturbed until the significance of the resource is determined. If determined to be significant, the resource shall be recovered by a qualified archeologist or paleontologist consistent with current standards and guidelines, or other appropriate measures implemented.

**2.15** Indemnification. The applicant shall agree to defend, indemnify and hold harmless, the City of Ontario or its agents, officers, and employees from any claim, action or proceeding

against the City of Ontario or its agents, officers or employees to attack, set aside, void or annul any approval of the City of Ontario, whether by its City Council, Planning Commission or other authorized board or officer. The City of Ontario shall promptly notify the applicant of any such claim, action or proceeding, and the City of Ontario shall cooperate fully in the defense.

**2.16** Additional Fees.

**(a)** Within 5 days following final application approval, the Notice of Determination ("NOD") filing fee shall be provided to the Planning Department. The fee shall be paid by check, made payable to the "Clerk of the Board of Supervisors", which shall be forwarded to the San Bernardino County Clerk of the Board of Supervisors, along with all applicable environmental forms/notices, pursuant to the requirements of the California Environmental Quality Act ("CEQA"). Failure to provide said fee within the time specified may result in a 180-day extension to the statute of limitations for the filing of a CEQA lawsuit.

**(b)** After the Project's entitlement approval, and prior to issuance of final building permits, the Planning Department's Plan Check and Inspection fees shall be paid at the rate established by resolution of the City Council.

## MEMORANDUM

TO:
Scott Murphy, Community Development Director
Rudy Zeledon, Planning Director (Copy of memo only)
Diane Ayala, Advanced Planning Division (Copy of memo only)
Charity Hernandez, Economic Development
Matt Montieth, Building Department
Raymond Lee, Engineering Department
Jamie Richardson, Landscape Planning Division
Dennis Mejia, Municipal Utility Company
Gabriel Gutierrez, Police Department
Mike Gerken, Deputy Fire Chief/Fire Marshal
Jay Bautista, T. E., Traffic/Transportation Manager
Lorena Mejia, Airport Planning
Eric Woosley, Engineering/NPDES
Angela Magana, Community Improvement (Copy of memo only)
Jimmy Chang , IPA Department

**Revision #2**

FROM: Edmelynne Hutter, Senior Planner

DATE: October 07, 2021

SUBJECT: FILE #: PDEV21-018 Finance Acct#:

The following project has been resubmitted for review. Please send one (1) copy and email one (1) copy of your DAB report to the Planning Department by .

**PROJECT DESCRIPTION:** A Development Plan to construct two (2) industrial buildings totaling 168,772 square feet on 13.07 acres of land located at southeast corner of Jurupa Street and Milliken Avenue, within the Office/R-D and Warehouse/Distribution land use districts of the Toyota Business Park Specific Plan (APN(s): 0238-121-75). Related File(s): PMTT21-010.

☒ The plan does adequately address the departmental concerns at this time.

- ☐ No comments
- ☐ See previous report for Conditions
- ☒ Report attached (1 copy and email 1 copy)
- ☒ Standard Conditions of Approval apply

☐ The plan does not adequately address the departmental concerns.

- ☐ The conditions contained in the attached report must be met prior to scheduling for Development Advisory Board.

Riverside, CA 92614

| | |
|---|---|
| ☒ | **Preliminary Plans (dated 6/12/21) meets the Standard Conditions for New Development and have been approved with the consideration that the following conditions below be met upon submittal of the landscape construction documents.** |
| ☐ | **Preliminary Plans (dated) have not been approved. Corrections noted below are required prior to Preliminary Landscape Plan approval.** |

**A RESPONSE SHEET IS REQUIRED WITH RESUBMITTAL OR PLANS WILL BE RETURNED AS INCOMPLETE.**
**Landscape construction plans with plan check number may be emailed to: landscapeplancheck@ontarioca.gov**
**DIGITAL SUBMITTALS MUST BE 10MB OR LESS.**

Civil/ Site Plans

1. Provide an arborist report and tree inventory for existing trees include genus, species, trunk diameter, canopy width and condition. Show and note existing trees in good condition to remain and note trees proposed to be removed. Include existing trees within 15' of adjacent property that would be affected by new walls, footings or on-site tree planting. Add tree protection notes on construction and demo plans to protect trees to remain. Replacement and mitigation for removed trees shall be equal to trunk diameter of heritage trees removed per the Development Code Tree Preservation Policy and Protection Measures, section 6.05.020.
2. Locate the employee break areas in an open area near the building rather than the parking lot.
3. Stormwater infiltration devices located in landscape areas shall be reviewed and plans approved by the Landscape Planning Division prior to permit issuance. Any stormwater devices in parkway areas shall not displace street trees.
4. Show transformers set back 5' from paving all sides. Coordinate with landscape plans.
5. Show backflow devices set back 4' from paving all sides. Locate on level grade
6. Civil Plans: Note for compaction to be no greater than 85% at landscape areas. All finished grades at 1 ½" below finished surfaces. Slopes to be maximum 3:1.
7. Dimension all planters to have a minimum 5' wide inside dimension.
8. Dimension, show and call out for step-outs at parking spaces adjacent to planters; a 12" wide monolithic concrete curb, DG paving or pavers with edging.
9. Show outdoor employee break area with table or bench and shade trees on the south and west sides.
10. Add Note to Grading Plans: Landscape areas where compaction has occurred due to grading

activities and where trees or stormwater infiltration areas are located shall be loosened by soil fracturing. For trees, a 12'x12'x18" deep area; for stormwater infiltration, the entire area shall be loosened. Add the following information on the plans: The backhoe method of soil fracturing shall be used to break up compaction. A 4" layer of Compost is spread over the soil surface before fracturing is begun. The backhoe shall dig into the soil lifting and then drop the soil immediately back into the hole. The bucket then moves to the adjacent soil and repeats. The Compost falls into the spaces between the soil chunks created. Fracturing shall leave the soil surface quite rough with large soil clods. These must be broken by additional tilling. Tilling in more Compost to the surface after fracturing per the soil report will help create an A horizon soil. Imported or reused Topsoil can be added on top of the fractured soil as needed for grading. The Landscape Architect shall be present during this process and provide certification of the soil fracturing. For additional reference, see Urban Tree Foundation – Planting Soil Specifications.

Landscape Plans

11. Provide an arborist report and tree inventory as noted in #1.
12. Locate the employee break areas in an open area near the building rather than the parking lot.
13. Quercus agrifolia shall be planted in planter spaces greater than 8' wide; use Quercus ilex in planter 5' wide.
14. Show backflow devices with 36" high strappy leaf shrub screening and trash enclosures and transformers, a 4'-5' high evergreen hedge screening. Do not encircle utility, show as masses and duplicate masses in other locations on regular intervals.
15. Locate light standards, fire hydrants, water and sewer lines to not conflict with required tree locations. Coordinate civil plans with landscape plans
16. Show all utilities on the landscape plans. Coordinate so utilities are clear of tree locations.
17. Detail irrigation dripline outside of mulched root zone.
18. Show minimum on-site tree sizes per the Landscape Development standards, see the Landscape Planning website. 5% 48" box, 10% 36 box, 30% 24" box, 55% 15 gallon.
19. After a project's entitlement approval, the applicant shall pay all applicable fees for landscape plan check and inspections at a rate established by resolution of the City Council.
20. Landscape construction plans with building permit number for plan check may be emailed to: landscapeplancheck@ontarioca.gov

**THIS PROJECT SHALL COMPLY WITH THE REQUIREMENTS SET FORTH IN THE GENERAL STANDARD CONDITIONS OF APPROVAL ADOPTED BY THE CITY COUNCIL (RESOLUTION NO. 2017-027) AND THE PROJECT SPECIFIC CONDITIONS OF APPROVAL SPECIFIED IN HEREIN. ONLY APPLICABLE CONDITIONS OF APPROVAL ARE CHECKED. THE APPLICANT SHALL BE RESPONSIBLE FOR THE COMPLETION OF ALL APPLICABLE CONDITIONS OF APPROVAL PRIOR TO PARCEL MAP APPROVAL, ISSUANCE OF PERMITS AND/OR OCCUPANCY CLEARANCE, AS SPECIFIED IN THIS REPORT.**

## 1. PRIOR TO PARCEL MAP APPROVAL, APPLICANT SHALL:

Check When Complete

☐ 1.01 Dedicate to the City of Ontario, the right-of-way, described below: ☐

_____ feet on _____

Property line corner 'cut-back' required at the intersection of _____ and _____.

☐ 1.02 Dedicate to the City of Ontario, the following easement(s): _____ ☐

_____

☐ 1.03 Restrict vehicular access to the site as follows: _____ ☐

☒ **1.04 Vacate the following street(s) and/or easement(s):** ☐

**A. All interfering on-site easements shall be quitclaimed, vacated, and/or submit non-interference letter from affected owner/utility company.**

☐ 1.05 Submit a copy of a recorded private reciprocal use agreement or easement. The agreement or easement shall ensure, at a minimum, common ingress and egress and joint maintenance of all common access areas and drive aisles. ☐

☒ **1.06 Provide (original document) Covenants, Conditions and Restrictions (CC&Rs) as applicable to the project and as approved by the City Attorney and the Engineering and Planning Departments, ready for recordation with the County of San Bernardino. The CC&Rs shall provide for, but not be limited to, common ingress and egress, joint maintenance responsibility for all common access improvements, common facilities, parking areas, utilities, median and landscaping improvements and drive approaches, in addition to maintenance requirements established in the Water Quality Management Plan (WQMP), as applicable to the project. The CC&Rs shall also address the maintenance and repair responsibility for public improvements/utilities (sewer, water, storm drain, recycled water, etc.) located within open space/easements. In the event of any maintenance or repair of these facilities, the City shall only restore disturbed areas to current City Standards.** ☐

☐ 1.07 For all development occurring south of the Pomona Freeway (60-Freeway) and within the specified boundary limits (per Boundary Map found at *http://tceplumecleanup.com/*), the property developer/owner is made aware of the South Archibald Trichloroethylene (TCE) Plume "Disclosure Letter". Property owner may wish to provide this Letter as part of the Real Estate Transfer Disclosure requirements under California Civil Code Section 1102 et seq. This may include notifications in the Covenants, Conditions and Restrictions (CC&Rs) or other documents related to property transfer and disclosures. Additional information on the plume is available from the Santa Ana Regional Water Quality Control Board at *http://geotracker.waterboards.ca.gov/profile_report?global_id=T10000004658.* ☐

☐ 1.08 File an application for Reapportionment of Assessment, together with payment of a reapportionment processing fee, for each existing assessment district listed below. Contact the Financial Services Department at (909) 395-2124 regarding this requirement. ☐

(1) _____

(2) _____

☒ **1.09** **Prepare a fully executed Subdivision Agreement (on City approved format and forms) with accompanying security as required, or complete all public improvements.** ☐

☒ **1.10** **Provide a monument bond (i.e. cash deposit) in an amount calculated by the City's approved cost estimate spreadsheet (available for download on the City's website: www.ci.ontario.ca.us) or as specified in writing by the applicant's Registered Engineer or Licensed Land Surveyor of Record and approved by the City Engineer, whichever is greater.** ☐

☒ **1.11** **Provide a preliminary title report current to within 30 days.** ☐

☐ 1.12 File an application, together with an initial deposit (if required), to establish a Community Facilities District (CFD) pursuant to the Mello-Roos Community Facilities District Act of 1982. The application and fee shall be submitted a minimum of four (4) months prior to final subdivision map approval, and the CFD shall be established prior to final subdivision map approval or issuance of building permits, whichever occurs first. The CFD shall be established upon the subject property to provide funding for various City services. An annual special tax shall be levied upon each parcel or lot in an amount to be determined. The special tax will be collected along with annual property taxes. The City shall be the sole lead agency in the formation of any CFD. Contact Investment and Revenue Resources at (909) 395-2341 to initiate the CFD application process. ☐

☐ 1.13 Ontario Ranch Developments: ☐

☐ 1) Provide evidence of final cancellation of Williamson Act contracts associated with this tract, prior to approval of any final subdivision map. Cancellation of contracts shall have been approved by the City Council.

☐ 2) Provide evidence of sufficient storm water capacity availability equivalents (Certificate of Storm Water Treatment Equivalents).

☐ 3) Provide evidence of sufficient water availability equivalents (Certificate of Net MDD Availability).

☒ **1.14** **Other conditions:** ☐

**A. Provide private easements for utilities, cross lot drainage, blanket emergency access and reciprocal access across all parcels in favor of all parcels (as needed).**
**B. Provide a private access easement across Parcel 1/Toyota Way (private) in favor of Parcels 2 and 3 for ingress and access purposes.**

## 2. PRIOR TO ISSUANCE OF ANY PERMITS, APPLICANT SHALL:

**A. GENERAL**
**( Permits includes Grading, Building, Demolition and Encroachment )** ☐

☒ **2.01** **Record Parcel Map No. 20147 pursuant to the Subdivision Map Act and in accordance with the City of Ontario Municipal Code.**

☒ **2.02** **Submit a PDF of the recorded map to the City Engineer's office.** ☐

☐ 2.03 Note that the subject parcel is a recognized parcel in the City of Ontario per_____. ☐

☐ 2.04 Note that the subject parcel is an 'unrecognized' parcel in the City of Ontario and shall require a Certificate of Compliance to be processed unless a deed is provided confirming the existence of the parcel prior to the date of March 4, 1972. ☐

☐ 2.05 Apply for a: ☐

☐ Certificate of Compliance with a Record of Survey;

☐ Lot Line Adjustment (Record a Conforming Deed with the County of San Bernardino within six

months of the recordation of the Lot Line Adjustment to conform the new LLA legal description. Submit a copy of the recorded Conforming Deed to the Engineering Department.);

☐ Make a Dedication of Easement.

☐ 2.06 Provide (original document) Covenants, Conditions and Restrictions (CC&R's), as applicable to the project, and as approved by the City Attorney and the Engineering and Planning Departments, ready for recordation with the County of San Bernardino. The CC&R's shall provide for, but not be limited to, common ingress and egress, joint maintenance of all common access improvements, common facilities, parking areas, utilities and drive approaches in addition to maintenance requirements established in the Water Quality Management Plan ( WQMP), as applicable to the project. ☐

☐ 2.07 For all development occurring south of the Pomona Freeway (60-Freeway) and within the specified boundary limits (per Boundary Map found at http://tceplumecleanup.com/), the property developer/owner is made aware of the South Archibald Trichloroethylene (TCE) Plume "Disclosure Letter". Property owner may wish to provide this Letter as part of the Real Estate Transfer Disclosure requirements under California Civil Code Section 1102 et seq. This may include notifications in the Covenants, Conditions and Restrictions (CC&Rs) or other documents related to property transfer and disclosures. Additional information on the plume is available from the Santa Ana Regional Water Quality Control Board at http://geotracker.waterboards.ca.gov/profile_report?global_id=T10000004658. ☐

☐ 2.08 Submit a soils/geology report. ☐

☐ 2.09 Other Agency Permit/Approval: Submit a copy of the approved permit and/or other form of approval of the project from the following agency or agencies: ☐

- ☐ State of California Department of Transportation (Caltrans)
- ☐ San Bernardino County Road Department (SBCRD)
- ☐ San Bernardino County Flood Control District (SBCFCD)
- ☐ Federal Emergency Management Agency (FEMA)
- ☐ Cucamonga Valley Water District (CVWD) for sewer/water service
- ☐ United States Army Corps of Engineers (USACE)
- ☐ California Department of Fish & Game
- ☐ Inland Empire Utilities Agency (IEUA)
- ☐ Other: _____

☐ 2.10 Dedicate to the City of Ontario the right-of-way described below: ☐

_____ feet on _____

Property line corner 'cut-back' required at the intersection of _____ and _____.

☐ 2.11 Dedicate to the City of Ontario the following easement(s):_____ ☐

_____

☐ 2.12 Vacate the following street(s) and/or easement(s): ☐

A. All interfering on-site easements shall be quitclaimed, vacated, and/or submit non-interference letter from affected owner/utility company.

☐ 2.13 Ontario Ranch Developments: ☐

☐ 1) Submit a copy of the permit from the San Bernardino County Health Department to the Engineering Department and the Ontario Municipal Utilities Company (OMUC) for the destruction/abandonment of the on-site water well. The well shall be destroyed/abandoned in accordance with the San Bernardino County Health Department guidelines.

☐ 2) Make a formal request to the City of Ontario Engineering Department for the proposed temporary

use of an existing agricultural water well for purposes other than agriculture, such as grading, dust control, etc. Upon approval, the Applicant shall enter into an agreement with the City of Ontario and pay any applicable fees as set forth by said agreement.

☐ 3) Design proposed retaining walls to retain up to a maximum of three (3) feet of earth. In no case shall a wall exceed an overall height of nine (9) feet (i.e. maximum 6-foot high wall on top of a maximum 3-foot high retaining wall.

☐ 2.14 Submit a security deposit to the Engineering Department to guarantee construction of the public improvements required herein valued at _____% of the approved construction cost estimate. Security deposit shall be in accordance with the City of Ontario Municipal Code. Security deposit will be eligible for release, in accordance with City procedure, upon completion and acceptance of said public improvements. ☐

☒ **2.15 The applicant/developer shall submit all necessary survey documents prepared by a Licensed Surveyor registered in the State of California detailing all existing survey monuments in and around the project site. These documents are to be reviewed and approved by the City Survey Office.** ☐

☒ **2.16 Pay all Development Impact Fees (DIF) to the Building Department. Storm Drain Development Impact Fee, approximately $270,471, shall be paid to the Building Department. Final fee shall be determined based on the approved site plan.** ☐

☐ 2.17 Other conditions: _____ ☐

## B. PUBLIC IMPROVEMENTS
**(See attached Exhibit 'A' for plan check submittal requirements.)**

☒ 2.17 **Design and construct full public improvements in accordance with the City of Ontario Municipal Code, current City standards and specifications, master plans and the adopted specific plan for the area, if any. These public improvements shall include, but not be limited to, the following (checked boxes):**

| Improvement | Jurupa Street | Milliken Avenue | Street 3 | Street 4 |
|---|---|---|---|---|
| Curb and Gutter | ☐ New; ___ ft. from C/L<br>☐ Replace damaged<br>☐ Remove and replace | ☐ New; ___ ft. from C/L<br>☐ Replace damaged<br>☐ Remove and replace | ☐ New; ___ ft. from C/L<br>☐ Replace damaged<br>☐ Remove and replace | ☐ New; ___ ft. from C/L<br>☐ Replace damaged<br>☐ Remove and replace |

| Removal of Improvements | | | | |
| Other Improvements | | | | |

**Specific notes for improvements listed in item no. 2.17, above:**

**A. For longitudinal trenches over 150' in length, a minimum 10' wide, 2" grind and overlay is required per City Std. No. 1306. See COA 2.18 below.**
**B. All master planned utilities shall be designed and installed to the ultimate condition.**

☒ **2.18 Construct a 2" asphalt concrete (AC) grind and overlay on the following street(s):** ☐

- **Milliken Ave from Jurupa Street to Toyota Way. See recycled water main construction listed in COA 2.17 above.**

☐ 2.19 Reconstruction of the full pavement structural section, per City of Ontario Standard Drawing number 1011, may be required based on the existing pavement condition and final street design. Minimum limits of reconstruction shall be along property frontage, from street centerline to curb/gutter. ☐

☐ 2.20 Make arrangements with the Cucamonga Valley Water District (CVWD) to provide ☐ water service ☐ sewer service to the site. This property is within the area served by the CVWD and Applicant shall provide documentation to the City verifying that all required CVWD fees have been paid. ☐

☐ 2.21 Overhead utilities shall be under-grounded, in accordance with Title 7 of the City's Municipal Code (Ordinance No. 2804 and 2892). Developer may pay in-lieu fee, approximately _____, for undergrounding of utilities in accordance with Section 7-7.302.e of the City's Municipal Code. ☐

☒ **2.22 Other conditions:** ☐

**A. Pay an in-lieu fee for PCC pavement installation at the following signalized intersections:**
**i. Jurupa Street & Toyota Way**
**ii. Jurupa Street & Milliken Avenue**
**iii. Toyota Way & Milliken Avenue**
**The fee will be based on an engineer's cost estimate that will be reviewed and approved by the City. The Applicant/Developer will be responsible for their fair share which is equivalent to 25% of the total cost.**

## C. SEWER

☒ **2.23 A 18 inch sewer main is available for connection by this project in Milliken Ave. (Ref: Sewer plan bar code: S10006)** ☐

☐ 2.24 Design and construct a sewer main extension. A sewer main is not available for direct connection. The closest main is approximately _____ feet away. ☐

☐ 2.25 Submit documentation that shows expected peak loading values for modeling the impact of the subject project to the existing sewer system. The project site is within a deficient public sewer system area. Applicant shall be responsible for all costs associated with the preparation of the model. Based on the results of the analysis, Applicant may be required to mitigate the project impact to the deficient public sewer system, including, but not limited to, upgrading of existing sewer main(s), construction of new sewer main(s) or diversion of sewer discharge to another sewer. ☐

☒ **2.26 Other conditions:** ☐

**A. Sewer Monitoring Manhole: Each building is to have its own monitoring manhole, on private property, immediately back of the property line.**

## D. WATER

☒ **2.27 A 16 inch water main is available for connection by this project in Jurupa St and Milliken Ave. (Ref: Water plan bar code: W11713, W10016)** ☐

☐ 2.28 Design and construct a water main extension. A water main is not available for direct connection. The closest main is approximately _____ feet away. ☐

☐ 2.29 Other conditions: _____ ☐

## E. RECYCLED WATER

☒ **2.30 A 8 inch recycled water main is available for connection by this project in Jurupa St. (Ref: Recycled Water plan bar code: P10294)** ☐

☒ **2.31 Design and construct an on-site recycled water system for this project. A recycled water main does exist in the vicinity of this project.** ☐

☐ 2.32 Design and construct an on-site recycled water ready system for this project. A recycled water main does not currently exist in the vicinity of this project, but is planned for the near future. If Applicant would like to connect to this recycled water main when it becomes available, the cost for the connection shall be borne solely by the Applicant. ☐

☒ **2.33** **Submit two (2) hard copies and one (1) electronic copy, in PDF format, of the Engineering Report (ER), for the use of recycled water, to the OMUC for review and subsequent submittal to the California Department of Public Health (CDPH) for final approval.** ☐

**Note: The OMUC and the CDPH review and approval process will be approximately three (3) months. Contact the Ontario Municipal Utilities Company at (909) 395-2647 regarding this requirement.**

☒ **2.34** **Other conditions:** ☐

**A. Recycled Water Main Extension: Extend by constructing a recycled water main from the intersection of Milliken Avenue and Jurupa Street, south to serve Building A and B, specifically Building B with recycled water.**

## F. TRAFFIC / TRANSPORTATION

☐ 2.35 Submit a focused traffic impact study, prepared and signed by a Traffic/Civil Engineer registered in the State of California. The study shall address, but not be limited to, the following issues as required by the City Engineer: ☐
1. On-site and off-site circulation
2. Traffic level of service (LOS) at 'build-out' and future years
3. Impact at specific intersections as selected by the City Engineer

☐ 2.36 New traffic signal installations shall be added to Southern California Edison (SCE) customer account number # 2-20-044-3877. ☐

☒ **2.37** **Other conditions:** ☐

**A. Replace any existing street light fixtures project frontages of Milliken Avenue and Jurupa Street with the current City approved LED equivalent fixture per the Traffic and Transportation Design Guidelines**
**B. All landscaping, block walls, and other obstructions shall be compatible with the stopping sight distance requirements per City of Ontario Standard Drawing No. 1309.**
**C. Provide reciprocal access with the between the project site and all other adjacent properties.**
**D. Design and construct proposed driveway in accordance with City of Ontario Standard Drawing No. 1204 for Commercial Driveway along Milliken Avenue.**

## G. DRAINAGE / HYDROLOGY

☐ 2.38 A _____inch storm drain main is available to accept flows from this project in _____. ☐
(Ref: Storm Drain plan bar code:_____)

☐ 2.39 Submit a hydrology study and drainage analysis, prepared and signed by a Civil Engineer registered in the State of California. The study shall be prepared in accordance with the San Bernardino County Hydrology Manual and City of Ontario standards and guidelines. Additional drainage facilities, including, but not limited to, improvements beyond the project frontage, may be required to be designed and constructed, by Applicant, as a result of the findings of this study. ☐

☐ 2.40 An adequate drainage facility to accept additional runoff from the site does not currently exist downstream of the project. Design and construct a storm water detention facility on the project site. 100 year post-development peak flow shall be attenuated such that it does not exceed 80% of pre-development peak flows, in accordance with the approved hydrology study and improvement plans. ☐

☒ **2.41** **Submit a copy of a recorded private drainage easement or drainage acceptance agreement to the Engineering Department for the acceptance of any increase to volume and/or concentration of historical drainage flows onto adjacent property, prior to approval of the grading plan for the project.** ☐

☐ 2.42 Comply with the City of Ontario Flood Damage Prevention Ordinance (Ordinance No. 2409). The project site or a portion of the project site is within the Special Flood Hazard Area (SFHA) as indicated on the Flood Insurance Rate Map (FIRM) and is subject to flooding during a 100 year frequency storm. The site plan shall be subject to the provisions of the National Flood Insurance Program. ☐

☐ 2.43 Other conditions: _____ ☐

## H. STORM WATER QUALITY / NATIONAL POLLUTANT DISCHARGE AND ELIMINATION SYSTEM (NPDES)

☐ 2.44 401 Water Quality Certification/404 Permit – Submit a copy of any applicable 401 Certification or 404 Permit for the subject project to the City project engineer. Development that will affect any body of surface water (i.e. lake, creek, open drainage channel, etc.) may require a 401 Water Quality Certification from the California Regional Water Quality Control Board, Santa Ana Region (RWQCB) and a 404 Permit from the United States Army Corps of Engineers (USACE). The groups of water bodies classified in these requirements are perennial (flow year round) and ephemeral (flow during rain conditions, only) and include, but are not limited to, direct connections into San Bernardino County Flood Control District (SBCFCD) channels.
If a 401 Certification and/or a 404 Permit are not required, a letter confirming this from Applicant's engineer shall be submitted.
Contact information: USACE (Los Angeles District) (213) 452-3414; RWQCB (951) 782-4130. ☐

☒ **2.45 Submit a Water Quality Management Plan (WQMP). This plan shall be approved by the Engineering Department prior to approval of any grading plan. The WQMP shall be submitted, utilizing the current San Bernardino County Stormwater Program template, available at: http://www.sbcounty.gov/dpw/land/npdes.asp.** ☐

☐ 2.46 Design and construct a Connector Pipe Trash Screen or equivalent Trash Treatment Control Device, per catch basin located within or accepting flows tributary of a Priority Land Use (PLU) area that meets the Full Capture System definition and specifications, and is on the Certified List of the State Water Resources Control Board. The device shall be adequately sized per catch basin and include a deflector screen with vector control access for abatement application, vertical support bars, and removable component to facilitate maintenance and cleaning. ☐

☐ 2.47 Other conditions: _____ ☐

## J. SPECIAL DISTRICTS

☐ 2.48 File an application, together with an initial deposit (if required), to establish a Community Facilities District (CFD) pursuant to the Mello-Roos Community Facilities District Act of 1982. The application and fee shall be submitted a minimum of four (4) months prior to final subdivision map approval, and the CFD shall be established prior to final subdivision map approval or issuance of building permits, whichever occurs first. The CFD shall be established upon the subject property to provide funding for various City services. An annual special tax shall be levied upon each parcel or lot in an amount to be determined. The special tax will be collected along with annual property taxes. The City shall be the sole lead agency in the formation of any CFD. Contact Investment and Revenue Resources at (909) 395-2341 to initiate the CFD application process. ☐

☐ 2.49 Other conditions: _____ ☐

## K. FIBER OPTIC

☐ 2.50 A _____ fiber optic line is available for connection by this project in _____.
(Ref: Fiber Optic plan bar code:_____) ☐

☒ **2.51 Design and construct fiber optic system to provide access to the City's conduit and fiber optic system per the City's Fiber Optic Master Plan. Building entrance conduits shall start from the closest OntarioNet hand hole constructed along the project frontage in the ROW and shall terminate in the main telecommunications room for each building. Conduit infrastructure shall interconnect with the primary and/or secondary backbone fiber optic conduit system at the nearest OntarioNet hand hole located at the southeast corner of Jurupa St and Milliken Ave. Limits of work are generally located along the project frontages of Jurupa St and Milliken Ave.** ☐

☒ **2.52** **Refer to the City's Fiber Optic Master Plan for design and layout guidelines. Contact the Broadband Operations Department at (909) 395-2000, regarding this requirement.** ☐

## L. INTEGRATED WASTE

☒ **2.53** **Onsite solid waste shall be designed in accordance with the City's Refuse & Recycling Planning Manual located at:** ☐

**https://www.ontarioca.gov/OMUC/IntegratedWaste**

☒ **2.54** **Other conditions:** ☐

**A. Organics Separation and Collection: This development shall comply with the Requirements of State Assembly Bill AB341 and AB1826, which requires organic waste to be diverted and collected separately from recycling and other refuse wastes. Additional information can be obtained at through the City website at https://www.ontarioca.gov/IntegratedWaste:**

**B. Three 4-CY Bins Trash Enclosure: Each trash enclosure is to have three 4-cy bins with their respective gate, and a solid roof.**

**C. Final Solid Waste Handling Plan (SWHP): Prior to approval of any building permits, revised as stated directly above and submit Final SWHP and be submitted with the Precise Grading Plan for review and approval of the Integrated Waste Department.**

**D. Integrated Waste Management Report (IWMR): Prior to approval of the Precise Grading Plan, submit to OMUC for review and approval, an Integrated Waste Management Report (IWMR) that complies with the IWMR Requirements.**

## 3. PRIOR TO ISSUANCE OF A CERTIFICATE OF OCCUPANCY, APPLICANT SHALL:

☒ **3.01** **Set new monuments in place of any monuments that have been damaged or destroyed as a result of construction of the subject project. Monuments shall be set in accordance with City of Ontario standards and to the satisfaction of the City Engineer.** ☐

☒ **3.02** **Complete all requirements for recycled water usage.** ☐

☒ **1) Procure from the OMUC a copy of the letter of confirmation from the California Department of Public Health (CDPH) that the Engineering Report (ER) has been reviewed and the subject site is approved for the use of recycled water.**

☒ **2) Obtain clearance from the OMUC confirming completion of recycled water improvements and passing of shutdown tests and cross connection inspection, upon availability/usage of recycled water.**

☒ **3) Complete education training of on-site personnel in the use of recycled water, in accordance with the ER, upon availability/usage of recycled water.**

☒ **3.03** **The applicant/developer shall submit all final survey documents prepared by a Licensed Surveyor registered in the State of California detailing all survey monuments that have been preserved, revised, adjusted or set along with any maps, corner records or Records of Survey needed to comply with these Conditions of Approvals and the latest edition of the California Professional Land Survey Act. These documents are to be reviewed and approved by the City Survey Office.** ☐

☐ 3.04 Ontario Ranch Projects: For developments located at an intersection of any two collector or arterial streets, the applicant/developer shall set a monument if one does not already exist at that intersection. Contact the City Survey office for information on reference benchmarks, acceptable methodology and required submittals. ☐

☒ **3.05** **Confirm payment of all Development Impact Fees (DIF) to the Building Department.** ☐

☒ **3.06** **Submit electronic copies (PDF and Auto CAD format) of all approved improvement plans, studies and reports (i.e. hydrology, traffic, WQMP, etc.).** ☐

## 4. PRIOR TO FINAL ACCEPTANCE, APPLICANT SHALL:

| | | | |
|---|---|---|---|
| ☒ | 4.01 | **Complete all Conditions of Approval listed under Sections 1-3 above.** | ☐ |
| ☒ | 4.02 | **Pay all outstanding fees pursuant to the City of Ontario Municipal Code, including but not limited to, plan check fees, inspection fees and Development Impact Fees.** | ☐ |
| ☒ | 4.03 | **The applicant/developer shall submit a written request for the City's final acceptance of the project addressed to the City Project Engineer. The request shall include a completed Acceptance and Bond Release Checklist, state that all Conditions of Approval have been completed and shall be signed by the applicant/developer. Upon receipt of the request, review of the request shall be a minimum of 10 business days. Conditions of Approval that are deemed incomplete by the City will cause delays in the acceptance process.** | ☐ |
| ☒ | 4.04 | **Submit record drawings (PDF) for all public improvements identified within Section 2 of these Conditions of Approval.** | ☐ |

**EXHIBIT 'A'**

## ENGINEERING DEPARTMENT
## First Plan Check Submittal Checklist

**Project Number: PMTT21-010, PDEV21-018, and/or Parcel Map No. 20147**

**The following items are required to be included with the first plan check submittal:**

1. ☒ **A copy of this check list**
2. ☒ **Payment of fee for Plan Checking**
3. ☒ **One (1) copy of Engineering Cost Estimate (on City form) with engineer's wet signature and stamp.**
4. ☒ **One (1) copy of project Conditions of Approval**
5. ☒ **Include a PDF (electronic submittal) of each required improvement plan at every submittal.**
6. ☒ **Two (2) sets of Potable and Recycled Water demand calculations (include water demand calculations showing low, average and peak water demand in GPM for the proposed development and proposed water meter size).**
7. ☐ Three (3) sets of Public Street improvement plan with street cross-sections
8. ☐ Four (4) sets of Public Water improvement plan (include water demand calculations showing low, average and peak water demand in GPM for the proposed development and proposed water meter size)
9. ☒ **Four (4) sets of Recycled Water improvement plan (include recycled water demand calculations showing low, average and peak water demand in GPM for the proposed development and proposed water meter size and an exhibit showing the limits of areas being irrigated by each recycled water meter)**
10. ☐ Four (4) sets of Public Sewer improvement plan
11. ☐ Five (5) sets of Public Storm Drain improvement plan
12. ☒ **Three (3) sets of Public Street Light improvement plan**
13. ☐ Three (3) sets of Signing and Striping improvement plan
14. ☒ **Three (3) sets of Fiber Optic plan (include Auto CAD electronic submittal)**
15. ☒ **Three (3) sets of Dry Utility plans within public right-of-way (at a minimum the plans must show existing and ultimate right-of-way, curb and gutter, proposed utility location including centerline dimensions, wall to wall clearances between proposed utility and adjacent public line, street work repaired per Standard Drawing No. 1306. Include Auto CAD electronic submittal)**
16. ☐ Three (3) sets of Traffic Signal improvement plan and One (1) copy of Traffic Signal Specifications with modified Special Provisions. Please contact the Traffic Division at (909) 395-2154 to obtain Traffic Signal Specifications.
17. ☒ **Two (2) copies of Water Quality Management Plan (WQMP), including one (1) copy of the approved Preliminary WQMP (PWQMP).**
18. ☐ One (1) copy of Hydrology/Drainage study
19. ☒ **One (1) copy of Soils/Geology report**
20. ☒ **Payment for Parcel Map processing fee**

21. ☒ **Three (3) copies of Parcel Map**

22. ☒ **One (1) copy of approved Tentative Map**

23. ☒ **One (1) copy of Preliminary Title Report (current within 30 days)**

24. ☒ **One (1) copy of Traverse Closure Calculations**

25. ☒ **One (1) set of supporting documents and maps (legible copies): referenced improvement plans (full size), referenced record final maps/parcel maps (full size, 18"x26"), Assessor's Parcel map (full size, 11"x17"), recorded documents such as deeds, lot line adjustments, easements, etc.**

26. ☒ **Two (2) copies of Engineering Report and an electronic file (include PDF format electronic submittal) for recycled water use**

27. ☐ Other: _____

# CITY OF ONTARIO
## MEMORANDUM

**TO:** **Edmelynne Hutter, Senior Planner**
**Planning Department**

**FROM:** **Mike Gerken, Deputy Fire Chief/Fire Marshal**
**Fire Department**

**DATE:** **May 24, 2021**

**SUBJECT:** **PMTT21-010 - A Parcel Map to subdivide 13.07 acres of land into three (3) parcels located at southeast corner of Jurupa Street and Milliken Avenue, within the Office/R-D and Warehouse/Distribution land use districts of the Toyota Business Park Specific Plan (APN(s): 0238-121-75). Related File(s): PDEV21-018.**

---

☒ The plan **does** adequately address Fire Department requirements at this time.

☒ Standard Conditions of Approval apply, as stated below.

---

**SITE AND BUILDING FEATURES:**

A. 2019 CBC Type of Construction: Type III-B

B. Type of Roof Materials: Panelized

C. Ground Floor Area(s): Building A = 113,067 Sq. Ft.
Building B = 48,205 Sq. Ft.

D. Number of Stories: 1 with Mezzanine

E. Total Square Footage: Building A = 118,067 Sq. Ft.
Building B = 50,705 Sq. Ft.

F. 2019 CBC Occupancy Classification(s): B/S1/F1

## CONDITIONS OF APPROVAL:

### 1.0 GENERAL

☒ 1.1 The following are the Ontario Fire Department ("Fire Department") requirements for this development project, based on the current edition of the California Fire Code (CFC), and the current versions of the Fire Prevention Standards ("Standards.") It is recommended that the applicant or developer transmit a copy of these requirements to the on-site contractor(s) and that all questions or concerns be directed to the Bureau of Fire Prevention, at (909) 395-2029. For copies of Ontario Fire Department Standards please access the City of Ontario website at www.ontarioca.gov/Fire/Prevention.

☒ 1.2 These Fire Department conditions of approval are to be included on any and all construction drawings.

### 2.0 FIRE DEPARTMENT ACCESS

☒ 2.1 Fire Department vehicle access roadways shall be provided to within 150 ft. of all portions of the exterior walls of the first story of any building, unless specifically approved. Roadways shall be paved with an all-weather surface and shall be a minimum of twenty-four (24) ft. wide. See Standard #B-004.

☒ 2.2 In order to allow for adequate turning radius for emergency fire apparatus, all turns shall be designed to meet the minimum twenty five feet (25') inside and forty-five feet (45') outside turning radius per Standard #B-005.

☒ 2.3 Fire Department access roadways that exceed one hundred and fifty feet (150') in length shall have an approved turn-around per Standard #B-002.

☒ 2.4 Access drive aisles which cross property lines shall be provided with CC&Rs, access easements, or reciprocating agreements, and shall be recorded on the titles of affected properties, and copies of same shall be provided at the time of building plan check.

☒ 2.5 "No Parking-Fire Lane" signs and /or red painted curbs with lettering are required to be installed in interior access roadways, in locations where vehicle parking would obstruct the minimum clear width requirement. Installation shall be per Standard #B-001.

☒ 2.6 Security gates or other barriers on fire access roadways shall be provided with a Knox brand key switch or padlock to allow Fire Department access. See Standards #B-003, B-004 and H-001.

☒ 2.7 Any time PRIOR to on-site combustible construction and/or storage, a minimum twenty-four (24) ft. wide circulating all weather access roads shall be provided to within 150 ft. of all portions of the exterior walls of the first story of any building, unless specifically approved by fire department and other emergency services.

## 3.0 WATER SUPPLY

☒ 3.1 The required fire flow per Fire Department standards, based on the 2019 California Fire Code, Appendix B, is 3750 gallons per minute (g.p.m.) for 4 hours at a minimum of 20 pounds per square inch (p.s.i.) residual operating pressure.

☒ 3.2 Off-site (public) fire hydrants are required to be installed on all frontage streets, at a minimum spacing of three hundred foot (300') apart, per Engineering Department specifications.

☒ 3.3 Buildings that exceed 100,000 square feet in floor area shall provide an onsite looped fire protection water line around the building(s.) The loops shall be required to have two or more points of connection from a public circulating water main.

☒ 3.4 The public water supply, including water mains and fire hydrants, shall be tested and approved by the Engineering Department and Fire Department prior to combustible construction to assure availability and reliability for firefighting purposes.

## 4.0 FIRE PROTECTION SYSTEMS

☒ 4.3 An automatic fire sprinkler system is required. The system design shall be in accordance with National Fire Protection Association (NFPA) Standard 13. All new fire sprinkler systems, except those in single family dwellings, which contain twenty (20) sprinkler heads or more shall be monitored by an approved listed supervising station. An application along with detailed plans shall be submitted, and a construction permit shall be issued by the Fire Department, prior to any work being done.

☒ 4.5 Fire Department Connections (FDC) shall be located on the address side of the building within one hundred fifty feet (150') of a public fire hydrant on the same side of the street. Provide identification for all fire sprinkler control valves and fire department connections per Standard #D-007. Raised curbs adjacent to Fire Department connection(s) shall be painted red, five feet either side, per City standards.

☒ 4.6 A fire alarm system is required. The system design shall be in accordance with National Fire Protection Association (NFPA) Standard 72. An application along with detailed plans shall be submitted, and a construction permit shall be issued by the Fire Department, prior to any work being done.

☒ 4.7 Portable fire extinguishers are required to be installed prior to occupancy per Standard #C-001. Please contact the Fire Prevention Bureau to determine the exact number, type and placement required.

## 5.0 BUILDING CONSTRUCTION FEATURES

☒ 5.1 The developer/general contractor is to be responsible for reasonable periodic cleanup of the development during construction to avoid hazardous accumulations of combustible trash and debris both on and off the site.

☒ 5.2 Approved numbers or addresses shall be placed on all new and existing buildings in such a position as to be plainly visible and legible from the street or road fronting the property. Homes

that do not front street shall be provided with an address entry sign at the street. Address numbers shall contrast with their background. See Section 9-1 6.06 of the Ontario Municipal Code and Standards #H-003 and #H-002.

☒ 5.6 Knox ® brand key-box(es) shall be installed in location(s) acceptable to the Fire Department. All Knox boxes shall be monitored for tamper by the building fire alarm system. See Standard #H-001 for specific requirements.

☒ 5.7 Placards shall be installed in acceptable locations on buildings that store, use or handle hazardous materials in excess of the quantities specified in the CFC. Placards shall meet the requirements of National Fire Protection Association (NFPA) Standard 704.

# CITY OF ONTARIO
## MEMORANDUM

**TO:** **Edmelynne Hutter, Senior Planner**

**FROM:** **Officer Bill Lee, Police Department**

**DATE:** **May 19, 2021**

**SUBJECT:** **PMTT21-010- A DEVELOPMENT PLAN TO CONSTRUCT TWO (2) INDUSTRIAL BUILDINGS TOTALING 168,772 SQUARE FEET, LOCATED AT THE SOUTHEAST CORNER OF JURUPA STREET AND MILLIKEN AVENUE. RELATED FILE: PDEV21-018.**

---

The "Standard Conditions of Approval" contained in Resolution No. 2017-027 apply. The applicant shall read and be thoroughly familiar with these conditions, including, but not limited to, the requirements below.

- Required lighting for all walkways, driveways, doorways, parking lots, hallways and other areas used by the public shall be provided. Lights shall operate via photosensor. Photometrics shall be provided to the Police Department and include the types of fixtures proposed and demonstrate that such fixtures meet the vandal-resistant requirement. Planned landscaping shall not obstruct lighting.
- Rooftop addresses shall be installed on the buildings as stated in the Standard Conditions. The numbers shall be at a minimum 6 feet tall and 2 foot wide, in reflective white paint on a flat black background, and oriented with the bottom of the numbers towards the addressed street. Associated letters shall also be included.
- The Applicant shall comply with construction site security requirements as stated in the Standard Conditions.

The Applicant is invited to contact Officer Bill Lee at (909) 408-1672 with any questions or concerns regarding these conditions.

# MINUTES

## December 20, 2021

**SPECIAL MEETING:** City Hall, 303 East B Street
Called to order by Chairman Gage at 6:30 PM

**COMMISSIONERS Present:** Chairman Gage**,** Anderson, Dean, DeDiemar, Lampkin, and Willoughby

**Absent:** Ricci

**OTHERS PRESENT:** Planning Director Zeledon, City Attorney Maldonado, Principal Planner Mercier, Principal Planner Ruddins, Senior Planner Grahn, Senior Planner Hutter, Associate Planner Aguilo, Associate Planner Antuna, Assistant Planner Morales, Transportation Manager Bautista, and Planning Secretary Berendsen

**PLEDGE OF ALLEGIANCE TO THE FLAG**

The Pledge of Allegiance was led by Commissioner DeDiemar.

**ANNOUNCEMENTS**

Mr. Zeledon stated that Item B is being continued to the January 25, 2022 meeting and Items F & G will be presented together.

**PUBLIC COMMENTS**

Murena Sandovela spoke in opposition to Item C and apartments being built there.

Mr. Gage explained this is an item that is on the agenda for tonight.

No one further responded from the audience.

**CONSENT CALENDAR ITEMS**

**A-01. MINUTES APPROVAL**

Planning/Historic Preservation Commission Minutes of November 23, 2021, approved as written.

***It was moved by Lampkin, seconded by Anderson, to approve the Planning Commission Minutes of November 23, 2021, as written. Roll call vote: AYES, Anderson, Dean, Gage, and Lampkin; NOES, none; ABSTAIN, DeDiemar and Willoughby; ABSENT, Ricci. The motion was carried 4 to 0.***

**PUBLIC HEARING ITEMS**

***It was moved by Lampkin, seconded by Anderson, to adopt a resolution to approve the Conditional Use Permit, File No., PCUP21-004, subject to conditions of approval. Roll call vote: AYES, Anderson, Dean, DeDiemar, Gage, Lampkin, and Willoughby; NOES, none; RECUSE, none; ABSENT, Ricci. The motion was carried 6 to 0.***

***It was moved by Willoughby, seconded by Lampkin, to adopt a resolution to approve the Development Plan, File No., PDEV21-012, subject to conditions of approval. Roll call vote: AYES, Anderson, Dean, DeDiemar, Gage, Lampkin, and Willoughby; NOES, none; RECUSE, none; ABSENT, Ricci. The motion was carried 6 to 0.***

**E.** **ENVIRONMENTAL ASSESSMENT, TENTATIVE PARCEL MAP, AND DEVELOPMENT PLAN REVIEW FOR FILE NOS. PMTT21-010 AND PDEV21-018:** A Tentative Parcel Map (TPM 20147) (File No. PMTT21-010) to subdivide 95.35 acres of land into three parcels, in conjunction with a Development Plan (File No. PDEV21-018) to construct two industrial buildings totaling 168,772 square feet on 13.07 acres of land located at the southeast corner of Jurupa Street and Milliken Avenue, at 1425 South Toyota Way, within the Industrial Mixed Use and Warehouse/Distribution land use districts of the Toyota Ontario Business Park Specific Plan. An Addendum to The Ontario Plan Environmental Impact Report (State Clearinghouse No. 2008104410) was prepared. This application introduces no new significant environmental impacts. The proposed project is located within the Airport Influence Area of Ontario International Airport and was evaluated and found to be consistent with the policies and criteria of the Ontario International Airport Land Use Compatibility Plan (ALUCP); (APN: 0238-121-75) **submitted by Pamela Steele, MIG, Inc.**

Senior Planner Hutter, presented the staff report. She stated that staff is recommending the Planning Commission approve the Addendum to an EIR and File Nos. PMTT21-010 and PDEV21-018, pursuant to the facts and reasons contained in the staff report and attached resolution, and subject to the conditions of approval.

Mr. Lampkin wanted clarification on the height on the new elevations
Ms. Hutter stated they will be about the same.

Mr. Lampkin wanted to know about the water resource at the location.

Ms. Hutter responded.

Mr. Lampkin no changes to the south elevation of the water resource section.

Ms. Hutter responded.

Mr. Lampkin wanted to know about circulation and that area.

Ms. Hutter responded.

Mr. Zeledon clarified regarding well site and visual features.

Mr. Lampkin wanted to know about lighting for the area.

Ms. Hutter clarified.

**PUBLIC TESTIMONY**

Pam Steele with MIG, Inc. was present and spoke in favor of the project and agreed with the conditions of

approval.

As there was no one else wishing to speak, Chairman Gage closed the public testimony

There was no Planning Commission deliberation.

**PLANNING COMMISSION ACTION**

***It was moved by Willoughby, seconded by DeDiemar, to adopt a resolution to approve the Addendum to a Certified EIR, subject to conditions of approval. Roll call vote: AYES, Anderson, Dean, DeDiemar, Gage, Lampkin, and Willoughby; NOES, none; RECUSE, none; ABSENT, Ricci. The motion was carried 6 to 0.***

***It was moved by Lampkin, seconded by Dean, to adopt a resolution to approve the Tentative Parcel Map, File No., PMTT21-010, subject to conditions of approval. Roll call vote: AYES, Anderson, Dean, DeDiemar, Gage, Lampkin, and Willoughby; NOES, none; RECUSE, none; ABSENT, Ricci. The motion was carried 6 to 0.***

***It was moved by Gage, seconded by Willoughby, to adopt a resolution to approve the Development Plan, File No., PDEV21-018, subject to conditions of approval. Roll call vote: AYES, Anderson, Dean, DeDiemar, Gage, Lampkin, and Willoughby; NOES, none; RECUSE, none; ABSENT, Ricci. The motion was carried 6 to 0.***

**F.** **ENVIRONMENTAL ASSESSMENT AND DEVELOPMENT PLAN AND CERTIFICATE OF APPROPRIATENESS REVIEW FOR FILE NO. PDEV21-030 AND PHP21-015:** A Development Plan (File No. PDEV21-030) to construct a 174,603 -square-foot industrial building on 7.47 acres of land, in conjunction with a Certificate of Appropriateness (File No. PHP21-015) to facilitate the demolition of an existing Tier III historic eligible structure (1914 Craftsman Single-Family Residence) to accommodate the proposed industrial development located on the west side of Bon View Avenue, approximately 132 feet north of Cedar Street, within the IG (General Industrial) zoning district. Staff has prepared an Addendum to The Ontario Plan Environmental Impact Report (State Clearinghouse No. 2008101140), certified by the City Council on January 27, 2010. This application introduces no new significant environmental impacts. The proposed project is located within the Airport Influence Area of Ontario International Airport, and was evaluated and found to be consistent with the policies and criteria of the Ontario International Airport Land Use Compatibility Plan (ALUCP); (APNs: 1050-441-05, 1050-441-09, 1050-441-11, 1050-441-12, 1050-441-13, 1050-441-14, 1050-441-15, 1050-441-16, 1050-441-17, 1050-441-18, 1050-441-19, 1050-441-20, 1050-441-21, 1050-441-22, 1050-441-23, 1050-441-24, 1050-441-25, 1050-441-26, 1050-441-27, 1050-441-28, 1050-441-29, 1050-441-30, 1050-441-31, 1050-441-32, 1050-441-33, 1050-441-34, 1050-441-35, 1050-441-36, 1050-441-37, 1050-441-38, 1050-441-39, 1050-441-40, 1050-441-41, 1050-441-42, 1050-441-43, 1050-441-44, 1050-441-45, 1050-441-46, 1050-441-47, 1050-441-48, 1050-441-49, 1050-441-50, 1050-441-51, 1050-441-52, 1050-441-53, 1050-441-54, 1050-441-55, 1050-441-56, 1050-441-57, 1050-441-58, 1050-441-59, 1050-441-60, 1050-441-61, 1050-441-62, and 1050-441-73) **submitted by Bon View Land 10, LLC & BV Investments 10, LLC as tenants-in-common.**

**G.** **ENVIRONMENTAL ASSESSMENT AND ZONE CHANGE REVIEW FOR FILE NO. PZC21-001:** A Zone Change (File No. PZC21-001) amending the zoning designation on 2.77 acres located at 1948 South Bon View Avenue, from IL (Light Industrial) to IG (General Industrial). Staff has prepared an Addendum to The Ontario Plan Environmental Impact Report (State Clearinghouse No. 2008101140), certified by the City Council on January 27, 2010. This application introduces no new significant environmental impacts. The proposed project is located within the Airport Influence Area of Ontario International Airport and was evaluated and found to

**MATTERS FROM THE PLANNING COMMISSION**

**Old Business Reports From Subcommittees**

**Historic Preservation (Standing):** This subcommittee met on December 9, 2021.

Mr. Willoughby stated they voted on the Certificate of Appropriateness that was discussed tonight. He stated there was discussion regarding the Granada Theater and the Fallis House.

**Development Code Review (Ad-hoc):** This subcommittee did not meet.

**Zoning General Plan Consistency (Ad-hoc):** This subcommittee did not meet.

**New Business**

**NOMINATIONS FOR SPECIAL RECOGNITION**

None at this time.

**DIRECTOR'S REPORT**

Mr. Zeledon stated the Monthly Activity Reports will be presented next month.

**ADJOURNMENT**

Lampkin motioned to adjourn, seconded by Willoughby. The meeting was adjourned at 8:42 PM, to the January 25, 2021 meeting.

Gwen Berendsen
Secretary Pro Tempore

Chairman, Planning Commission

RESOLUTION NO. _____

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF ONTARIO, CALIFORNIA, DENYING THE APPEAL OF THE PLANNING COMMISSION'S DECISION TO APPROVE THE USE OF AN ADDENDUM TO THE ONTARIO PLAN ENVIRONMENTAL IMPACT REPORT PURSUANT TO THE REQUIREMENTS OF THE CALIFORNIA ENVIRONMENTAL QUALITY ACT, AS AMMENDED, FOR FILE NOS. PMTT21-010 AND PDEV21-018.

WHEREAS, MIG, INC. (hereinafter referred to as "Applicant") has filed an Application for the approval of Tentative Parcel Map No. 20147, File No. PMTT21-010, subdividing 95.35 acres of land into three parcels, in conjunction with a Development Plan, File No. PDEV21-018, for the construction of two industrial buildings totaling 168,772 square feet on 13.07 acres of the 95.35-acre Project site, located at the southeast corner of Jurupa Street and Milliken Avenue, at 1425 South Toyota Way, within the Toyota Business Park Specific Plan, as described in the title of this Resolution (hereinafter referred to as "Application" or "Project"); and

WHEREAS, The Ontario Plan Environmental Impact Report (State Clearinghouse No. 2008104410) was certified on January 27, 2010, (hereinafter referred to as "Certified EIR"), in which development and use of the Project site was discussed; and

WHEREAS, the Planning Director of the City of Ontario has prepared and approved for attachment to the Certified EIR, an Addendum to the Certified EIR (hereinafter referred to as "EIR Addendum") in accordance with the requirements of the California Environmental Quality Act of 1970, together with State and local guidelines implementing said Act, all as amended to date (collectively referred to as "CEQA"); and

WHEREAS, the EIR Addendum concluded that implementation of the Project could result in a number of significant effects on the environment that were previously analyzed in the Certified EIR, and that the Certified EIR identified mitigation measures that would reduce each of those significant effects to a less-than-significant level; and

WHEREAS, pursuant to State CEQA Guidelines Section 15164(a), a lead agency shall prepare an addendum to a previously certified EIR if some changes or additions are necessary to a project, but the preparation of a subsequent or supplemental EIR is not required; and

WHEREAS, the City determined that none of the conditions requiring preparation of a subsequent or supplemental EIR would occur from the Project, and that preparation of an Addendum to the Certified EIR was appropriate; and

WHEREAS, the City of Ontario is the lead agency on the Project, and the Planning Commission is the Approval Authority for the requested approval to construct and otherwise undertake the Project; and

WHEREAS, on December 10, 2021, and December 17, 2021, the Planning Department sent public hearing notices to property owners within 300 feet of the project site via postal mail and to Supporters Alliance for Environmental Responsibility (hereinafter referred to as Appellant) via e-mail, respectively, informing the recipient of the Project's upcoming public hearing; and

WHEREAS, on December 20, 2021, the Development Advisory Board of the City of Ontario conducted a hearing to consider the Project, and concluded said hearing on that date, voting to issue Decision Nos. DAB21-060 and DAB21-061, recommending that the Planning Commission approve the Project; and

WHEREAS, on December 20, 2021, the Planning Commission of the City of Ontario conducted a hearing to consider the EIR Addendum and the Project, and concluded said hearing on that date, voting to issue Resolution Nos. PC21-086, PC21-087, and PC21-088, approving the Project; and

WHEREAS, on December 30, 2021, the Appellant submitted an Appeal, through e-mail, of the Planning Commission's decision to approve File Nos. PMTT21-010 and PDEV21-018; and

WHEREAS, the Ontario Development Code, Division 2.01 (Appeals), Sections 2.01.010.B1 and B2., state that an appeal shall include a statement identifying the specific action or decision of the Approving Authority that is being appealed, the specific grounds for the appeal, and the relief requested from the Appeal Authority; and that an appeal of an action shall be limited to those matters raised during the hearing and contained in the appeal statement; and

WHEREAS, the City Council is the Appeal Authority for Planning Commission decisions; and

WHEREAS, the basis of the Appellant's appeal is a statement that the Addendum to The Ontario Plan Environmental Impact Report prepared for the Project fails to comply with the California Environmental Quality Act; and

WHEREAS, the Appellant did not provide any facts or reasons to support their assertion that the Project Addendum fails to comply with the California Environmental Quality Act and did not include a relief request from the Appeal Authority; and

WHEREAS, the Appellant failed to raise their concerns during the public hearing or provide written notice of their concerns prior to the public hearing and, therefore, the City Council cannot consider the appeal statement; and

WHEREAS, City of Ontario Development Code Division 2.03 (Public Hearings) prescribes the manner in which public notification shall be provided and hearing procedures to be followed, and all such notifications and procedures have been completed; and

WHEREAS, on March 15, 2022, the City Council of the City of Ontario conducted a hearing to consider the Appeal, and concluded said hearing on that date; and

WHEREAS, the City Council has reviewed and considered the EIR Addendum for the Project, has concluded that none of the conditions requiring preparation of a subsequent of supplemental EIR have occurred, and intends to take actions on the Project in compliance with CEQA and state and local guidelines implementing CEQA; and

WHEREAS, the EIR Addendum for the Project is on file in the Planning Department, located at 303 East B Street, Ontario, CA 91764, are available for inspection by any interested person at that location and are, by this reference, incorporated into this Resolution as if fully set forth herein; and

WHEREAS, all legal prerequisites to the adoption of this Resolution have occurred.

NOW, THEREFORE, IT IS HEREBY FOUND, DETERMINED, AND RESOLVED by the City Council of the City of Ontario, as follows:

SECTION 1. ***Environmental Determination and Findings.*** As the decision-making authority for the Project, the City Council has reviewed and considered the information contained in the administrative record for the Project. Based upon the facts and information contained in the administrative record, including all written and oral evidence presented to the City Council, the City Council finds as follows:

(1) The environmental impacts of this project were reviewed in conjunction with an Addendum to The Ontario Plan Environmental Impact Report (State Clearinghouse No. 2008104410), certified by the Ontario City Council on January 27, 2010, in conjunction with File No. PGPA06-001; and

(2) The EIR Addendum and administrative record have been completed in compliance with CEQA, the State CEQA Guidelines, and the City of Ontario Local CEQA Guidelines; and

(3) The City's "Guidelines for the Implementation of the California Environmental Quality Act (CEQA)" provide for the use of a single environmental assessment in situations where the impacts of subsequent projects are adequately analyzed. This Application introduces no new significant environmental impacts; and

(4) All previously adopted mitigation measures shall be a condition of project approval, as they are applicable to the Project, and are incorporated herein by this reference; and

(5) The EIR Addendum contains a complete and accurate reporting of the environmental impacts associated with the Project, and reflects the independent judgment of the City Council; and

(6) There is no substantial evidence in the administrative record supporting a fair argument that the project may result in significant environmental impacts.

SECTION 2. ***Additional Environmental Review Not Required.*** Based on the Addendum, all related information presented to the City Council, and the specific findings set forth in Section 1, above, the City Council finds that the preparation of a subsequent or supplemental Environmental Impact Report is not required for the Project, as the Project:

(1) Does not constitute substantial changes to the Certified EIR that will require major revisions to the Certified EIR due to the involvement of new significant environmental effects or a substantial increase in the severity of previously identified significant effects; and

(2) Does not constitute substantial changes with respect to the circumstances under which the Certified EIR was prepared, that will require major revisions to the Certified EIR due to the involvement of new significant environmental effects or a substantial increase in the severity of the previously identified significant effects; and.

(3) Does not contain new information of substantial importance that was not known and could not have been known with the exercise of reasonable diligence at the time the Certified EIR was certified/adopted, that shows any of the following:

(a) The project will have one or more significant effects not discussed in the Certified EIR; or

(b) Significant effects previously examined will be substantially more severe than shown in the Certified EIR; or

(c) Mitigation measures or alternatives previously found not to be feasible would in fact be feasible and would substantially reduce one or more significant effects of the Project, but the City declined to adopt such measures; or

(d) Mitigation measures or alternatives considerably different from those analyzed in the Certified EIR would substantially reduce one or more significant effects on the environment, but which the City declined to adopt.

SECTION 3. ***Housing Element Compliance.*** Pursuant to the requirements of California Government Code Chapter 3, Article 10.6, commencing with Section 65580, as the decision-making body for the Project, the City Council finds that based upon the facts and information contained in the Application and supporting documentation, at the time of Project implementation, the project is consistent with the Housing Element of the Policy Plan (General Plan) component of The Ontario Plan, as the project site is not one of the properties in the Available Land Inventory contained in Table A-3 (Available Land by Planning Area) of the Housing Element Technical Report Appendix.

SECTION 4. ***Ontario International Airport Land Use Compatibility Plan ("ALUCP") Compliance.*** The California State Aeronautics Act (Public Utilities Code Section 21670 et seq.) requires that an Airport Land Use Compatibility Plan be prepared for all public use airports in the State; and requires that local land use plans and individual development proposals must be consistent with the policies set forth in the adopted Airport Land Use Compatibility Plan. On April 19, 2011, the City Council of the City of Ontario approved and adopted the Ontario International Airport Land use Compatibility Plan ("ALUCP"), establishing the Airport Influence Area for Ontario International Airport ("ONT"), which encompasses lands within parts of San Bernardino, Riverside, and Los Angeles Counties, and limits future land uses and development within the Airport Influence Area, as they relate to noise, safety, airspace protection, and overflight impacts of current and future airport activity. As the decision-making body for the Project, the City Council has reviewed and considered the facts and information contained in the Application and supporting documentation against the ALUCP compatibility factors, including [1] Safety Criteria (ALUCP Table 2-2) and Safety Zones (ALUCP Map 2-2), [2] Noise Criteria (ALUCP Table 2-3) and Noise Impact Zones (ALUCP Map 2-3), [3] Airspace protection Zones (ALUCP Map 2-4), and [4] Overflight Notification Zones (ALUCP Map 2-5). As a result, the City Council, therefore, finds and determines that the Project, when implemented in conjunction with the conditions of approval, will be consistent with the policies and criteria set forth within the ALUCP.

SECTION 5. ***Concluding Facts and Reasons.*** Based upon the substantial evidence presented to the City Council during the above-referenced hearing, and upon the specific findings set forth in Sections 1 and 4, above, the City Council hereby concludes as follows:

(1) ***The Ontario Development Code specifies the Appeal process and requirements for filing an appeal.*** The Ontario Development Code requires that an appeal shall include a statement identifying the specific action or decision of the Approving Authority that is being appealed, the specific grounds for the appeal, and the relief requested from the Appeal Authority; and that an appeal of an action shall be limited to those matters raised during the hearing and contained in the appeal statement.

(2) ***The submitted Appeal does not include specific grounds for the appeal and the relief requested from the Appeal Authority.*** The submitted Appeal did not provide any specific facts or reasons to support their assertion that the Project Addendum fails to comply with the California Environmental Quality Act and did not include a relief request from the Appeal Authority.

(3) ***The Appeal assertion that the Project Addendum fails to comply with the California Environmental Quality Act was not raised during the public hearing.*** The Appellant failed to raise their concerns regarding the Project Addendum compliance with the California Environmental Quality Act during the public hearing or provide written notice of their concerns prior to the public hearing.

SECTION 6. ***City Council Action.*** Based upon the findings and conclusions set forth in Sections 1 through 5, above, the City Council hereby UPHOLDS THE PLANNING COMMISSION'S PREVIOUS ACTION ON THE PROJECT AND DENIES

THE APPEAL, and hereby finds that based upon the entire record of proceedings before it and all information received, that there is no substantial evidence that the Project will constitute substantial changes to the Certified EIR, and does hereby approve the use of the EIR Addendum, attached hereto as "Attachment A," and incorporated herein by this reference.

SECTION 7. ***Indemnification.*** The Applicant shall agree to defend, indemnify, and hold harmless, the City of Ontario or its agents, officers, and employees from any claim, action or proceeding against the City of Ontario or its agents, officers or employees to attack, set aside, void, or annul this approval. The City of Ontario shall promptly notify the applicant of any such claim, action, or proceeding, and the City of Ontario shall cooperate fully in the defense.

SECTION 8. ***Custodian of Records.*** The documents and materials that constitute the record of proceedings on which these findings have been based are located at the City of Ontario City Hall, 303 East "B" Street, Ontario, California 91764. The custodian for these records is the City Clerk of the City of Ontario.

PASSED, APPROVED, AND ADOPTED this 15th day of March 2022.

# Addendum to The Ontario Plan Environmental Impact Report

CITY OF ONTARIO PLANNING DEPARTMENT
303 East B Street, Ontario, California 91764 Phone: 909.395.2036 / Fax: 909.395.2420

1. Project Title/File No.: PMTT21-010 and PDEV21-018

2. Lead Agency: City of Ontario, 303 East B Street, Ontario, California 91764, (909) 395-2036

3. Contact Person: Edmelynne V. Hutter, Senior Planner, Phone: (909) 395-2429, Email: ehutter@ontarioca.gov

4. Project Sponsor: MIG, Inc. ATTN: Pamela Steele; 1650 Spruce Street, Suite 106, Riverside, CA 92507

5. Project Location: The project site is located in southwestern San Bernardino County, within the City of Ontario. The City of Ontario is located approximately 40 miles from downtown Los Angeles, 20 miles from downtown San Bernardino, and 30 miles from Orange County. As illustrated on Figures 1 and 2, below, the project site is located at 1425 South Toyota Way, on approximately 95 acres, at the southeast corner of Jurupa Street and Milliken Avenue.

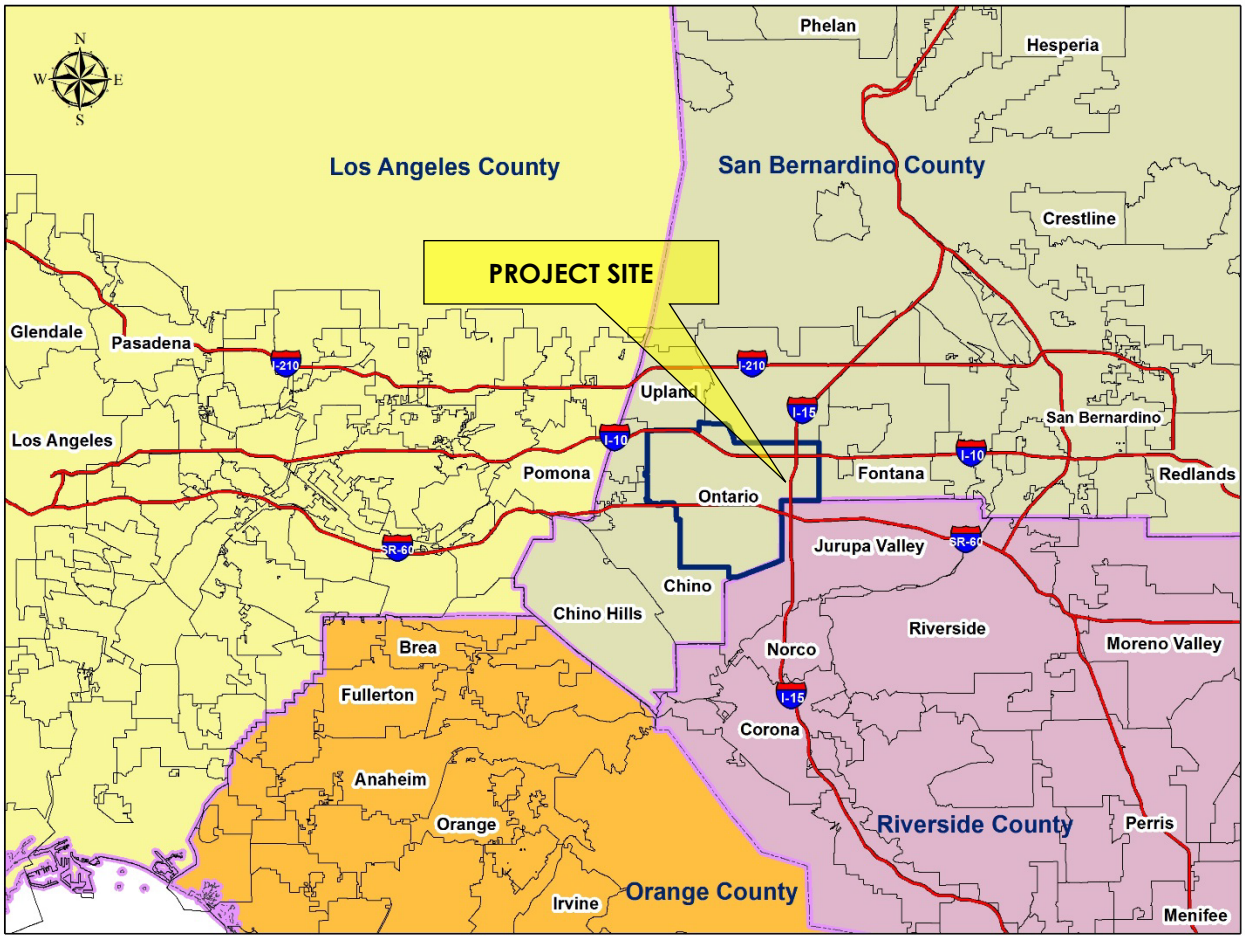

*Figure 1: REGIONAL LOCATION MAP*

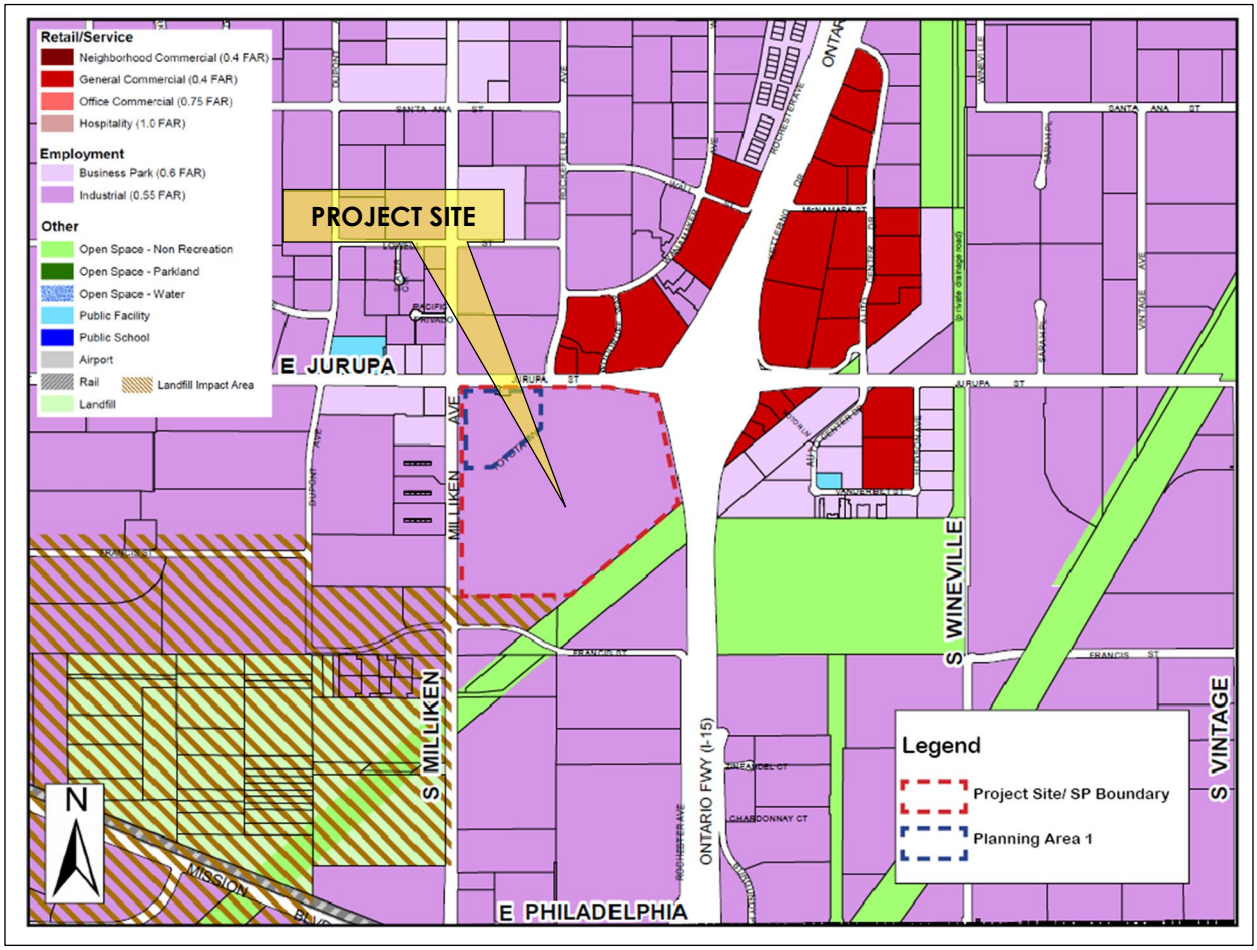

*Figure 2: VICINITY MAP*

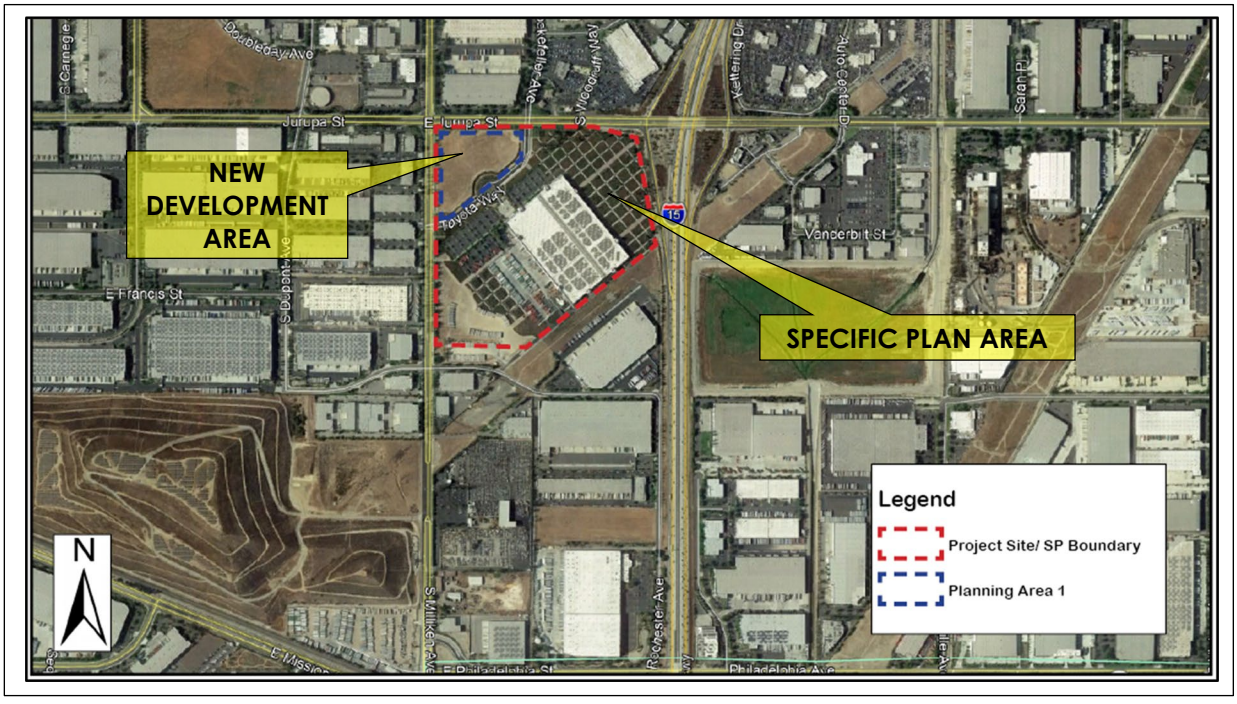

*Figure 3: AERIAL PHOTOGRAPH*

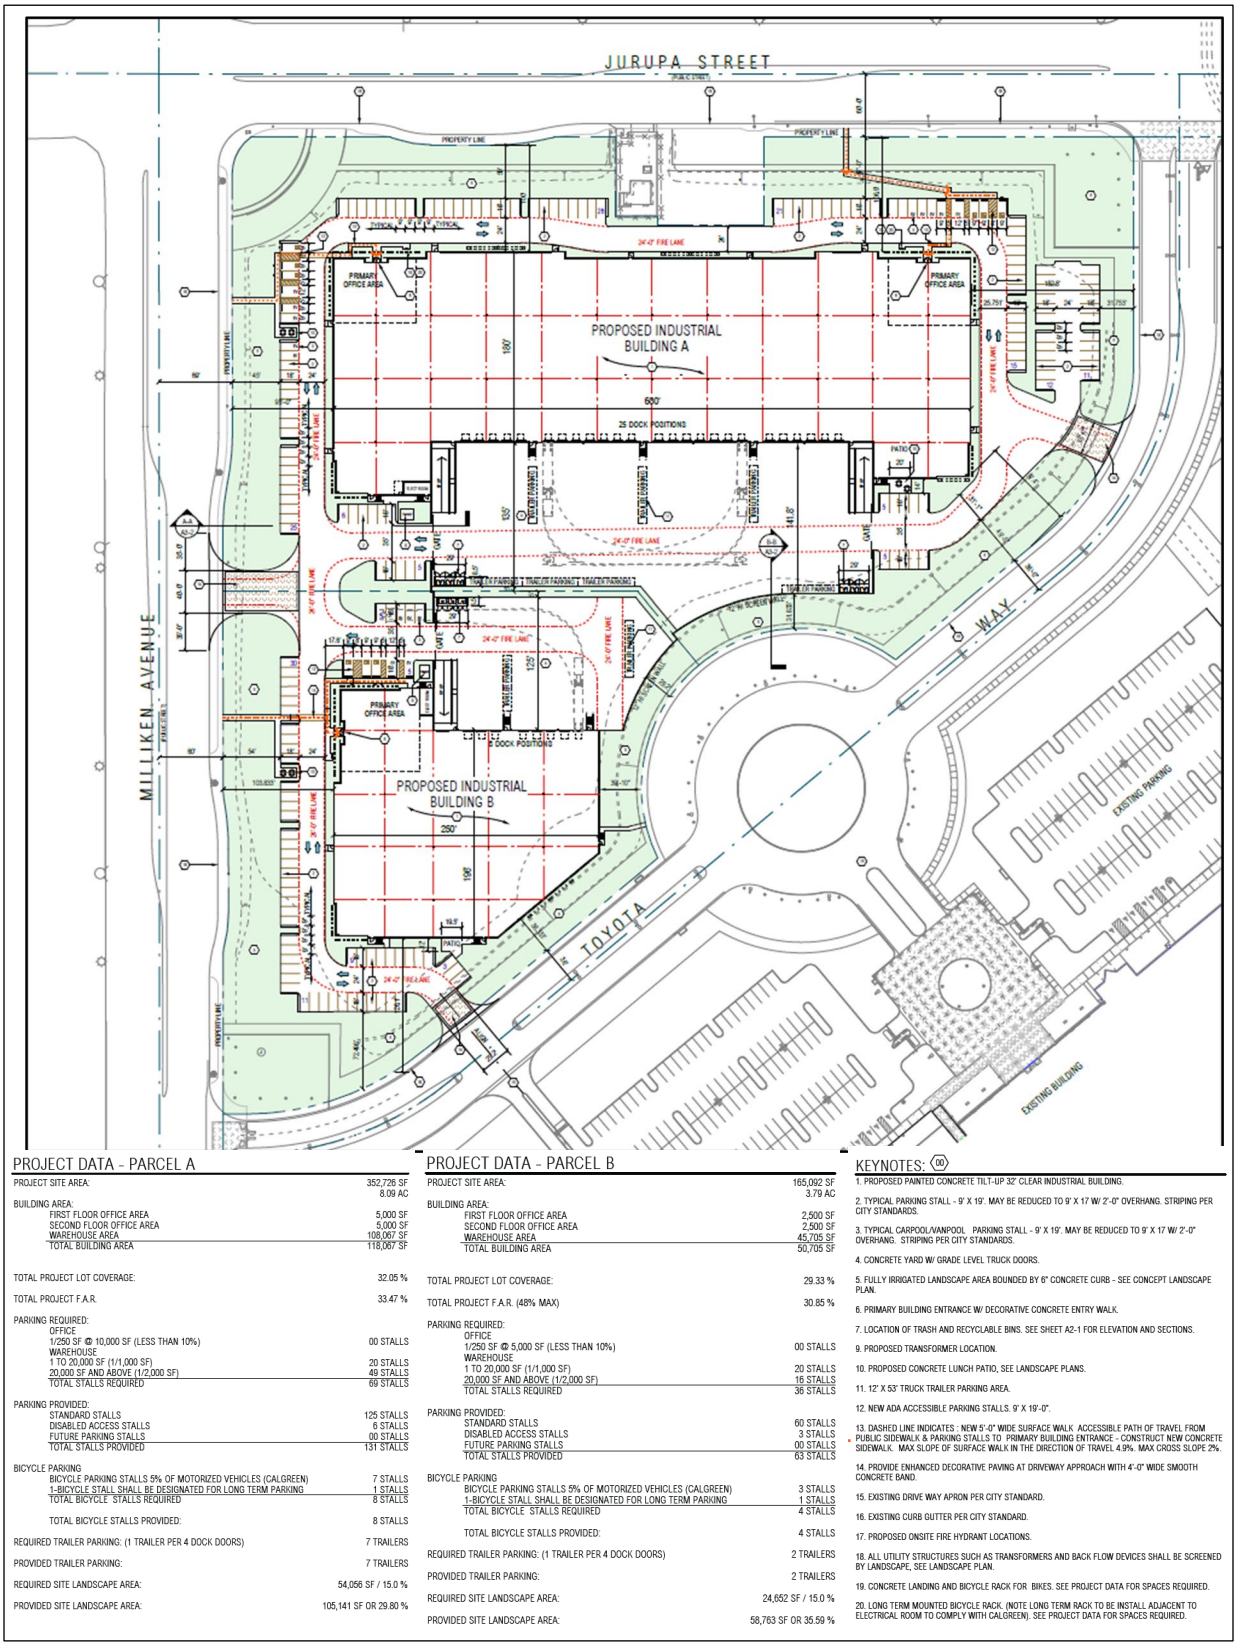
6. Policy Plan (General Plan) Designation: Industrial

7. Zoning Designation: Toyota/Ontario Business Park Specific Plan – Industrial Mixed Use



8. Description of Project: A Tentative Parcel Map (TPM No. 20147), submitted as part of the application, would subdivide the Specific Plan area into three parcels: Parcel 1 would include the Specific Plan area south of Toyota Way, which is already developed with an 807,068 square feet warehouse and distribution facility and no development for this area is proposed under this Project; Parcels 2 and 3 would be the area north of Toyota Way and include the northwest portion of the Project site where new development is proposed. As shown in Figure 4, the proposed Project would involve the construction of two industrial warehouse buildings totaling 168,722 square feet and associated site improvements.

   *Building A*. Building A, located on the northern portion of Project site, would total 118,067 square feet and include 108,067 square feet of warehouse space and 10,000 square feet of office space. The office component of the building would be two stories and would be located in the northwest and northeast corners of the building**.** Twenty-five truck loading docks would be located along the southern side of the building. A summary of development specifications are outlined in Tables 1 and 2.

   *Building B.* Building B, located on the southern portion of the Project site, would be located south of Building A and would total 50,705 square feet which would include 45,705 square feet of warehouse space with 5,000 square feet of office use. The office component of the building would be two stories and would be located in the northwest corner of the building. Eight truck loading docks would be located along the northern side of the building. A summary of development specifications are outlined in Tables 1 and 2.

*Architecture.* The proposed buildings would be concrete tilt-up construction with painted and scored accents. The design provides glazing and color variation along the length of the buildings, and would utilize a combination of materials and colors. The main colors of the buildings would be Nebulous White with accents colors of Online (medium) and Steely Gray (dark), with Leisure Blue trimming. The primary window blue reflective glass Solarcool Pacifica is located on the wall panels, the building corners, and office areas. There are trellises and free-standing concrete columns painted with a brushed Stainless color to provide accents to the buildings. The proposed screen walls would match the paint and color variations of the buildings. Conceptual elevations are shown in Figure 5.

The buildings designs would also incorporate the following features:

- Recessed primary entry doors
- Two story glazing
- Punched square first and second floor windows with thin concrete legs in a pattern to create an office look
- Concrete trellis with metal fin with canopy top
- Higher parapets at the primary entry to create hierarchy
- Higher parapets at the secondary corners to create additional hierarchy

*Landscaping.* Landscaping is proposed along all streets frontages, along Toyota Way, on the front and side setbacks adjacent to the buildings, and throughout the parking areas. The Project provides landscaping which exceeds the 15 percent landscaping requirement, and includes 29.80 percent for Building A and 35.59 percent for Building B. A landscaping plan is shown in Figure 6.

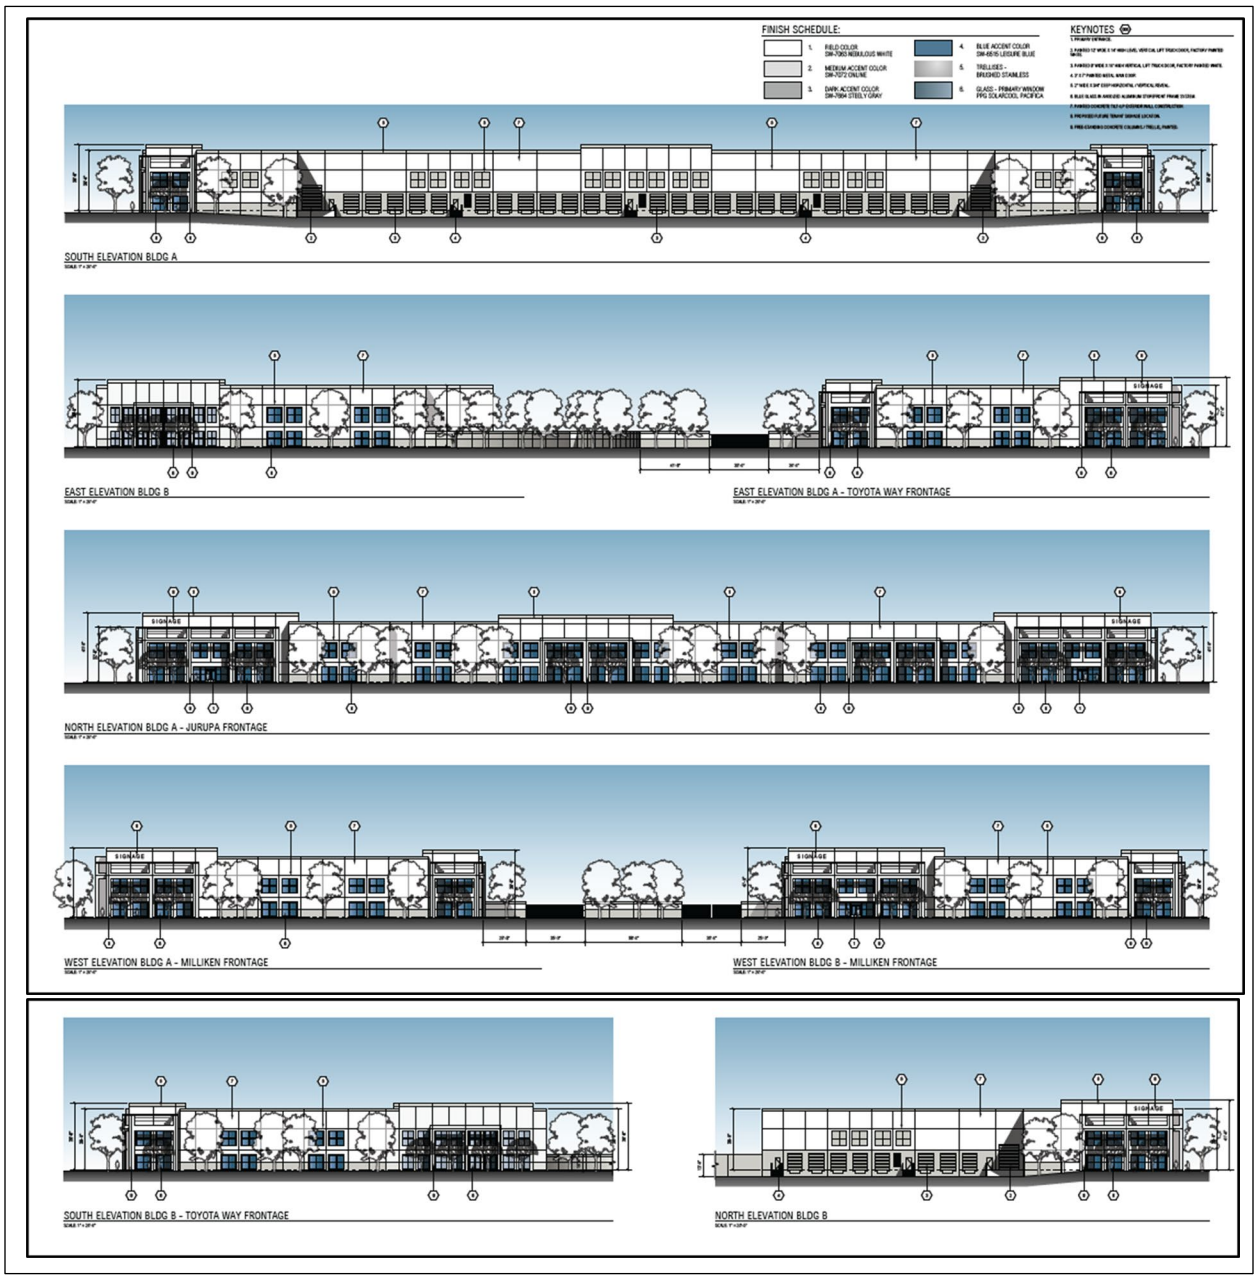

*Figure 5: CONCEPTUAL BUILDING ELEVATIONS*

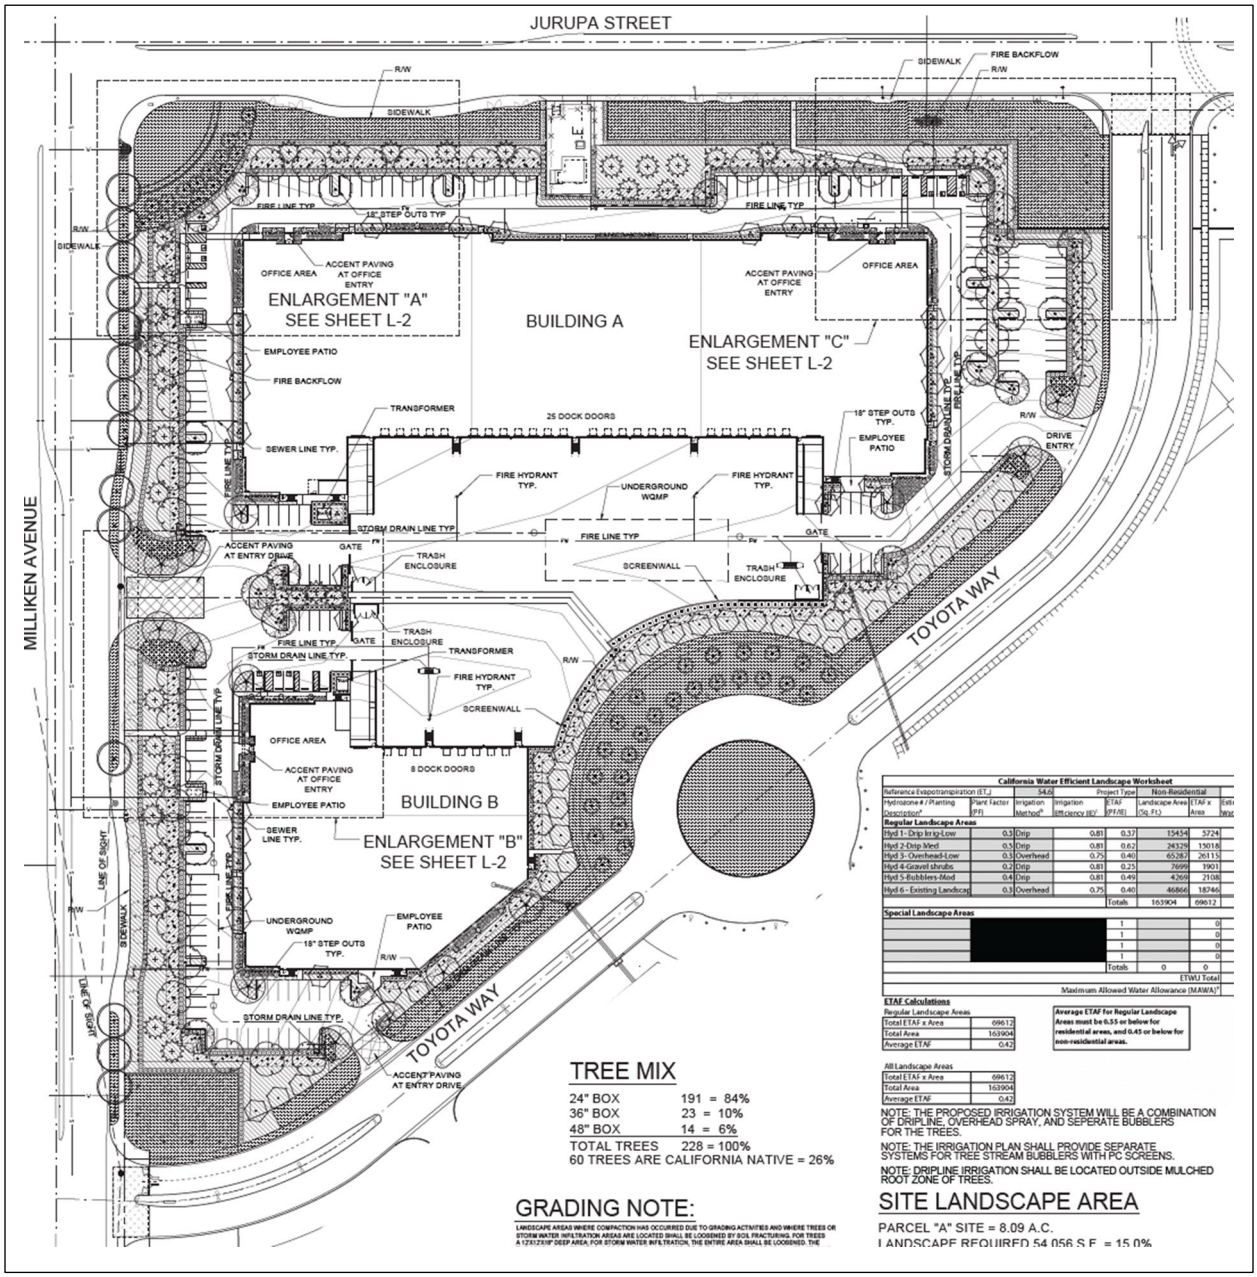

*Figure 6: CONCEPTUAL LANDSCAPE PLAN*

*Drainage*. For Building A, runoff from the east portion of the site, along with the northerly landscaped area, would be conveyed through storm drain Line A. Runoff from the west half of the site along with the parking lot along the south of the building would be conveyed through storm drain Line B. These storm drain lines would discharge into an underground infiltration chamber system located in the central portion of the site. The underground infiltration system would be sized to capture and retain the required water quality design capture volume, as well as mitigate discharge to existing conditions for the Project site. The system would have a footprint of approximately 54-feet by 160-feet and consist of 60-inch diameter perforated corrugated metal pipes surrounded by gravel. The excess flow generated from higher storm events would be designed to back up in proposed Line A, which would convey and then discharge to the existing private storm drain line in Toyota Way.

For Building B, runoff from north of the building would be conveyed through storm drain Line C. Runoff from south of the building would be conveyed through storm drain Line D. The

proposed storm drain lines would discharge into an underground infiltration chamber system located in the southwest portion of the site. The underground infiltration system would be sized to capture and retain the required water quality design capture volume. The system would have a footprint of approximately 24-feet by 105-feet and consist of 60-inch diameter perforated corrugated metal pipes surrounded by gravel. The excess flow generated from higher storm events would be designed to back up in proposed Line D and release in Line E, which would convey and then discharge to the existing private storm drain line in Toyota Way.

*Circulation.* There are two driveways off Toyota Way that would provide access to the site. A 35-foot wide driveway, located east of Building A, would be for automobile and truck use. To the south of Building B there would be a 29-foot wide driveway for automobile use only. A 40-foot wide driveway located along Milliken Avenue would provide direct access to the truck courts of both buildings.

Emergency vehicle access would be provided around the two buildings with 24-foot wide drive aisles through the parking areas and truck court. The majority of the automobile parking would be located along the perimeter of the proposed buildings.

**Prior Environmental Analysis of Project Site.** The Project site is located within the boundary of the Toyota/Ontario Business Park Specific Plan (Specific Plan), which was adopted in August 1993. The Specific Plan area is Assessor's Parcel Number (APN) 0238-121-75, totaling 95.35 gross acres

On January 27, 2010, the Ontario City Council adopted The Ontario Plan (TOP). TOP serves as the framework for the City's business plan and provides a foundation for the City to operate as a municipal corporation that consists of six distinct components: 1) Vision; 2) Governance Manual; 3) Policy Plan; 4) Council Priorities; 5) Implementation; and 6) Tracking and Feedback. The Policy Plan component of TOP meets the functional and legal mandate of a General Plan and contains nine elements: Land Use, Housing, Parks and Recreation, Environmental Resources, Community Economics, Safety, Mobility, Community Design and Social Resources.

An Environmental Impact Report was prepared for TOP (TOP FEIR) (SCH # 2008101140) and certified by the City Council on January 27, 2010 and included Mitigation Measures, Findings, and a Statement of Overriding Considerations pursuant to CEQA. TOP FEIR analyzed the direct and physical changes in the environment that would be caused by implementation of TOP, focusing on changes to land use associated with the buildout of the proposed land use plan, and the associated population and employment growth in the City. The Project site was analyzed in TOP FEIR as industrial (See Exhibit A, TOP EIR Figure 1-3, Proposed Land Use Plan) to be consistent with the industrial uses to the north, west, and south of the Project site, Interstate I-15 freeway to the east, and the Project site's location under the landing path of the Ontario International Airport. The significant unavoidable adverse impacts that were identified in TOP FEIR included: agriculture resources, air quality, cultural resources, greenhouse gas emissions, noise and transportation/traffic.

In 2019, Toyota requested a Specific Plan Amendment to change the zoning of the Project site (identified as Planning Area 1 in the Specific Plan) from Office/Research & Development (Office/R&D) to Industrial Mixed Use, which would allow for both Office/R&D and warehouse/distribution/manufacturing uses on the site. The Specific Plan Amendment also updated the landscape palette to conform to current drought tolerant landscape practices, which apply to any development in the Specific Plan area. Revisions to the Specific Plan also included:

- Any graphic that showed Planning Area 1 zoning as Office/R&D was changed to Industrial Mixed Use.
- Text in the Specific Plan that referred to Office/R&D was revised to reflect the new

designation of Industrial Mixed Use.
- Permitted Uses under Industrial Mixed Use was updated to include warehouse and distribution uses.
- Graphic and text references to Rockefeller Drive within the Specific Plan area were changed to reflect the actual street name: Toyota Way.
- The landscape palette and graphic representations of landscape were updated to reflect more drought tolerant materials.
- Specific Design Guidelines for Office/R&D district were retitled to Industrial Mixed Use.

To evaluate the environmental impacts associated with the Specific Plan Amendment, the City prepared an Addendum to TOP FEIR. The Specific Plan Amendment, File No. PSPA 19-004 was approved in 2020 with an environmental Addendum Resolution No. 2020-063, which included the review and approval of three updated technical studies including a Traffic Trip Generation Comparison Letter, Greenhouse Gas Emissions CEQA Thresholds and Screening Tables, and a Cultural Resources Report.

**Use of an Addendum.** According to the California Environmental Quality Act Guidelines Section 15164, an Addendum to a previously certified EIR may be used if some changes or additions are necessary, but none of the conditions described in Section 15162, requiring the preparation of a subsequent Negative Declaration or EIR, have occurred. The CEQA Guidelines require that a brief explanation be provided to support the findings that no subsequent EIR or Negative Declaration are needed for further discretionary approval. These findings are described below:

1. *Required Finding: Substantial changes are not proposed for the project that will require major revisions of the previous EIR due to the involvement of new, significant environmental effects or a substantial increase in the severity of previously identified effects*.

   Substantial changes are not proposed by the Project, and Project construction and operation would not require revisions to TOP FEIR. TOP FEIR analyzed the environmental impacts that would be caused by implementation of TOP; focusing on changes to land use associated with the buildout of the proposed land use plan. The Project site is located in the Toyota/Ontario Business Park Specific Plan area, with a zoning designation of Industrial Mixed Use, which would allow warehouse/distribution uses along with the Office/R&D uses. As described in the Specific Plan and, therefore, analyzed in TOP FEIR, maximum development within Planning Area 1 could be up to 300,000 square feet. The proposed Project would include 168,722 square feet of warehouse use on the site, which would be significantly less development than assumed at the site in TOP FEIR. Therefore, the proposed Project would result in the less development than TOP FEIR analyzed at buildout.

   Because the proposed Project would result in reduction in development, compared to the site development assumptions originally included in TOP FEIR analysis, no revisions to TOP FEIR are required. A trip generation comparison was conducted by Ganddini Group, and reviewed by the City's Traffic Engineering Division, which compares trip generation at the Project site under the original zoning versus the development proposed under the Specific Plan Amendment. As shown below in Table 3, the Specific Plan Amendment zoning would result in 2,528 fewer daily personal car equivalent (PCE) trips compared to the development allowed under the prior zoning included in TOP FEIR. It should also be noted that the proposed Project would include less square footage than analyzed within the Ganddini Group trip generation comparison, so the reduction in trips would likely be greater than what was identified in Table 3.

| **Table 3: Trip Generation Comparison** | | | | | | | | |
|---|---|---|---|---|---|---|---|---|
| | | Trip Generation | | | | | | |
| | | AM Peak Hour | | | PM Peak Hour | | | Daily |
| Zoning | Quantity | In | Out | Total | In | Out | Total | |
| Original Zoning (Office) | 300,000 SF | 299 | 49 | 348 | 55 | 290 | 345 | 2,922 |
| Proposed (Warehouse) | 173,247 SF | 35 | 14 | 49 | 16 | 36 | 52 | 394 |
| **Trip Generation Comparison (Proposed Project – Original Zoning)** | | **-264** | **-35** | **-299** | **-39** | **-254** | **-293** | **-2,528** |

In addition, all previously adopted mitigation measures of TOP FEIR are applicable to the Project and are incorporated herein by reference. Additionally, City Standard Conditions of Approval, and Development and Performance Standards included in the Specific Plan, would be applicable to the proposed Project. Construction and operation of the proposed Project would not result in new significant environmental effects or a substantial increase in the severity of previously identified effects. The attached Initial Study provides an analysis of the proposed Project and verification that the Project would not cause environmental impacts such that any of the circumstances identified in State CEQA Guidelines Section 15162 are present.

2. *Required Finding: Substantial changes have not occurred with respect to the circumstances under which the project is undertaken, that would require major revisions of the previous Environmental Impact Report due to the involvement of new significant environmental effects or a substantial increase in the severity of previously identified significant effects.*

   Substantial changes have not occurred that would require major revisions to TOP FEIR. TOP FEIR evaluated the Project site as Industrial with a maximum FAR of 0.55 (see attached Exhibit "A"- TOP EIR Figure 1-3, Proposed Land Use Plan), consistent with the surrounding industrial properties to the north, west, and south. A Specific Plan Amendment was adopted by the City Council and an Addendum to TOP FEIR was prepared and adopted in 2020. The proposed Project would result in the construction of two warehouse buildings, and associated site improvements, and would be consistent with the Industrial Mixed Use land use designation included in the Specific Plan Amendment. No proposed changes or revisions to TOP FEIR are required. In addition, all previously adopted mitigation measures of TOP FEIR are applicable to the Project and are incorporated herein by reference. Lastly, City Standard Conditions of Approval, and Development and Performance Standards included in the Specific Plan, would be applicable to the proposed Project. The attached Initial Study provides an analysis of the proposed Project and verification that the Project would not cause environmental impacts such that any of the circumstances identified in State CEQA Guidelines Section 15162 are present.

3. *Required Finding. No new information has been provided that would indicate that the proposed project would result in one or more significant effects not discussed in the previous EIR.*

   No new information has been provided that would indicate the proposed Project would result in any new significant effects not previously discussed in TOP FEIR. As stated above in Section 2, no substantial changes have occurred with respect to the circumstances under which the Project was undertaken. TOP FEIR evaluated the site as Industrial with a maximum FAR of 0.55 (see attached Exhibit "A"- TOP EIR Figure 1-3, Proposed Land Use Plan), consistent with the surrounding industrial properties to the north, west, and south. Since adoption of the 1992 General Plan and the 2010 TOP FEIR, the Project site and

surrounding area have been planned for and remained industrial use (see attached Exhibit "B"- 1992 General Plan Land Use Map). Therefore, no proposed changes or revisions to TOP FEIR are required. In addition, all previously adopted mitigation measures of TOP FEIR are applicable to the Project and are incorporated herein by reference. Finally, City Standard Conditions of Approval, and Development and Performance Standards included in the Specific Plan, would be applicable to the proposed Project. The attached Initial Study provides an analysis of the proposed Project and verification that the Project would not cause environmental impacts such that any of the circumstances identified in State CEQA Guidelines Section 15162 are present.

**CEQA Requirements for an Addendum.** If changes to a project or its circumstances occur or new information becomes available after adoption of a negative declaration, the lead agency may: (1) prepare a subsequent EIR if the criteria of State CEQA Guidelines Section 15162(a) are met, (2) prepare a subsequent negative declaration, (3) prepare an addendum, or (4) prepare no further documentation. (State CEQA Guidelines Section 15162(b)). When only minor technical changes or additions to the negative declaration are necessary and none of the conditions described in section 15162 calling for the preparation of a subsequent EIR or negative declaration have occurred, CEQA allows the lead agency to prepare and adopt an addendum. (State CEQA Guidelines Section 15164(b).)

Under Section 15162, a subsequent EIR or negative declaration is required only when:

1) Substantial changes are proposed in the project which will require major revisions of the previous negative declaration due to the involvement of new significant environmental effects or a substantial increase in the severity of previously identified significant effects;

2) Substantial changes occur with respect to the circumstances under which the project is undertaken which will require major revisions of the negative declaration due to the involvement of any new significant environmental effects or a substantial increase in the severity of previously identified significant effects; or

3) New information of substantial importance, which was not known and could not have been known with the exercise of reasonable diligence at the time the negative declaration was adopted, shows any of the following:

    i. The project will have one or more significant effects not discussed in the previous negative declaration;

    ii. Significant effects previously examined will be substantially more severe than shown in the previous EIR;

    iii. Mitigation measures or alternatives previously found not to be feasible would in fact be feasible and would substantially reduce one or more significant effects of the project, but the project proponents decline to adopt the mitigation measure or alternative; or

    iv. Mitigation measures or alternatives which are considerably different from those analyzed in the previous EIR would substantially reduce one or more significant effects on the environment, but the project proponents decline to adopt the mitigation measure or alternative.

Thus, if the proposed Project does not result in any of the circumstances listed in Section 15162 (i.e., no new or substantially greater significant impacts), the City may properly adopt an addendum to TOP FEIR.

**Conclusion**. TOP FEIR, certified by City Council on January 27, 2010, was prepared as a Program EIR in accordance with CEQA, the State CEQA Guidelines, and the City's Rules for the Implementation of CEQA and in accordance with Section 15121(a) of the State CEQA Guidelines (California Code of Regulations, Title 14, Division 6, Chapter 3). TOP FEIR considered the direct physical changes and reasonably foreseeable indirect physical changes in the environment associated with implementation of TOP. Consequently, TOP FEIR focused on impacts from changes to land use associated with buildout of the City's Land Use Plan, and impacts from the resulting population and employment growth in the City. The proposed Project is consistent with the existing uses of the properties and uses within the surrounding areas. As described above, the amount of development associated with the proposed Project would be lower for Planning Area 1 than TOP FEIR analyzed.

Accordingly, and based on the findings and information contained in the previously certified TOP FEIR, the analysis above, the attached Initial Study, and CEQA statute and State CEQA Guidelines, including Sections 15164 and 15162, the proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in TOP FEIR. No changes or additions to TOPF EIR analyses are necessary, nor is there a need for any additional mitigation measures. Therefore, pursuant to State CEQA Guidelines Section 15164, the Ontario City Council hereby adopts this Addendum to TOP FEIR.

9. Project Setting: The Project site is relatively flat with minimal topographic variation, with the majority of the area being developed with the warehouse building, parking lot and landscaping. The vacant area of the project site being proposed for new development is primarily covered in grass. Mature palm trees are planted at various locations along the perimeter of the site with shrubs located along the Toyota Way frontage. Existing sidewalks are located along the Milliken Avenue and Jurupa Street frontages. Street lighting is also located along the perimeter of the site. A city well and structure is south of Jurupa Street immediately adjacent to the Project site; however, this area is not included within the Project site. The Project site is located in a developed, urban area of the City of Ontario, and is surrounded by business park uses, warehouses, and distribution facilities.

   The Project site is located within the Toyota/Ontario Business Park Specific Plan (Specific Plan), which identifies the land use of the site as Industrial Mixed Use and Warehouse/Distribution. As described in the Specific Plan, which was adopted in August 1993, the purpose of the document is to assure the systematic implementation of the goals and policies contained in the Ontario General Plan. The Specific Plan contains development standards for the classifications of land use within the Project site, and addresses transportation and circulation, streetscape and landscape guidelines, and infrastructure and public services.

   The proposed new industrial buildings would be located on approximately 13 acres of vacant land in the northwest corner of the Project site and bounded by Jurupa Street to the north, Toyota Way to the south and east, and Milliken Avenue to the west.

10. Surrounding Land Uses:

| | Existing Land Use | General Plan Designation | Zoning Designation | Specific Plan Land Use |
|---|---|---|---|---|
| Site: | Warehouse, vacant | Industrial | Toyota Ontario Business Park Specific Plan | Industrial Mixed Use, Warehouse/Distribution |
| North: | Warehouse/ Distribution | Industrial | California Commerce Center Specific Plan | Light Industrial |

| | Existing Land Use | General Plan Designation | Zoning Designation | Specific Plan Land Use |
|---|---|---|---|---|
| South: | Warehouse | Industrial | Entratter Industrial Specific Plan | Industrial |
| East: | Interstate 15 Freeway | Interstate 15 Freeway | Interstate 15 Freeway | Interstate 15 Freeway |
| West: | Office/Business Park | Industrial | California Commerce Center Specific Plan | Light Industrial, Commercial/Food/Hotel |

11. Other public agencies whose approval is required (e.g., permits, financing approval or participation agreement): None

12. Have California Native American tribes traditionally and culturally affiliated with the project area requested consultation pursuant to Public Resources Code section 21080.3.1?
☐Yes ☒ No

If "yes", has consultation begun? ☐ Yes ☐ No ☐ Completed

**ENVIRONMENTAL FACTORS POTENTIALLY AFFECTED**

The environmental factors checked below would be potentially affected by this project, involving at least one impact that is a "Potentially Significant Impact" as indicated by the checklist on the following pages.

| | | |
|---|---|---|
| ☐ Aesthetics | ☐ Agriculture/Forestry Resources | ☐ Air Quality |
| ☐ Biological Resources | ☐ Cultural Resources | ☐ Geology / Soils |
| ☐ Greenhouse Gas Emissions | ☐ Hazards & Hazardous Materials | ☐ Hydrology/Water Quality |
| ☐ Land Use / Planning | ☐ Mineral Resources | ☐ Noise |
| ☐ Population / Housing | ☐ Public Services | ☐ Recreation |
| ☐ Transportation | ☐ Utilities / Service Systems | ☐ Mandatory Findings of Significance |
| ☐ Tribal Cultural Resources | ☐ Wildfire | ☐ Energy |

**DETERMINATION** (To be completed by the Lead Agency)

On the basis of this initial evaluation:

☐ I find that the proposed project COULD NOT have a significant effect on the environment, and a NEGATIVE DECLARATION will be prepared.

☐ I find that although the proposed project could have a significant effect on the environment, there will not be a significant effect in this case because revisions in the project have been

made by or agreed to by the project proponent. A MITIGATED NEGATIVE DECLARATION will be prepared.

☐ I find that the proposed project MAY have a significant effect on the environment, and an ENVIRONMENTAL IMPACT REPORT is required.

☐ I find that the proposed project MAY have a "potentially significant" or "potentially significant unless mitigated" impact on the environment, but at least one effect 1) has been adequately analyzed in an earlier document pursuant to applicable legal standards, and 2) has been addressed by mitigation measures based on the earlier analysis as described on attached sheets. An ENVIRONMENTAL IMPACT REPORT is required, but it must analyze only the effects that remain to be addressed.

☒ I find that although the proposed project could have a significant effect on the environment, because all potentially significant effects (a) have been analyzed adequately in an earlier EIR or NEGATIVE DECLARATION pursuant to applicable standards, and (b) have been avoided or mitigated pursuant to that earlier EIR or NEGATIVE DECLARATION, including revisions or mitigation measures that are imposed upon the proposed project, nothing further is required.

**EVALUATION OF ENVIRONMENTAL IMPACTS**

1. A brief explanation is required for all answers except "No Impact" answers that are adequately supported by the information sources a lead agency cites in the parentheses following each question. A "No Impact" answer is adequately supported if the referenced information sources show that the impact simply does not apply to projects like the one involved (e.g., the project falls outside a fault rupture zone). A "No Impact" answer should be explained where it is based on project-specific factors as well as general standards (e.g., the project will not expose sensitive receptors to pollutants, based on a project-specific screening analysis).

2. All answers must take account of the whole action involved, including off-site as well as on-site, cumulative as well as project-level, indirect as well as direct, and construction as well as operational impacts.

3. Once the lead agency has determined that a particular physical impact may occur, then the checklist answers must indicate whether the impact is potentially significant, less than significant with mitigation, or less than significant. "Potentially Significant Impact" is appropriate if there is substantial evidence that an effect is significant. If there are one or more "Potentially Significant Impact" entries when the determination is made, an EIR is required.

4. "Negative Declaration: Less Than Significant with Mitigation Incorporated" applies where the incorporation of mitigation measures has reduced an effect from "Potentially Significant Impact" to a "Less than Significant Impact." The lead agency must describe the mitigation measures, and briefly explain how they reduce the effect to a less than significant level (mitigation measures from the "Earlier Analyses" Section may be cross-referenced).

5. Earlier analyses may be used where, pursuant to the tiering, program EIR, or other CEQA process, an effect has been adequately analyzed in an earlier EIR or Negative Declaration. Section 15063(c)(3)(D). In this case, a brief discussion should identify the following:

a. Earlier Analyses Used. Identify and state where they are available for review.

b. Impacts Adequately Addressed. Identify which effects from the above checklist were within the scope of and adequately analyzed in an earlier document pursuant to applicable legal standards, and state whether such effects were addressed by mitigation measures based on the earlier analysis.

c. Mitigation Measures. For effects that are "Less than Significant with Mitigation Measures Incorporated," describe the mitigation measures which were incorporated or refined from the earlier document and the extent to which they address site-specific conditions for the project.

6. Lead agencies are encouraged to incorporate into the checklist references to information sources for potential impacts (e.g., general plans, zoning ordinances). Reference to a previously prepared or outside document should, where appropriate, include a reference to the page or pages where the statement is substantiated.

7. Supporting Information Sources. A source list should be attached, and other sources used or individuals contacted should be cited in the discussion.

8. This is only a suggested form, and lead agencies are free to use different formats; however, lead agencies should normally address the questions from this checklist that are relevant to a project's environmental effects in whatever format is selected.

9. The explanation of each issue should identify:

a. The significance criteria or threshold, if any, used to evaluate each question; and

b. The mitigation measure identified, if any, to reduce the impact to less than significance.

(Note: Example explanations have been provided. Add, remove, or replace as needed.)

| *Issues* | *Potentially Significant Impact* | *Less Than Significant with Mitigation* | *Less Than Significant Impact* | *No New Impact / No Impact* |
|---|---|---|---|---|
| 1. AESTHETICS. Except as provided in Public Resources Code section 21099, would the project: | | | | |
| a) Have a substantial adverse effect on a scenic vista? | ☐ | ☐ | ☐ | ☒ |
| b) Substantially damage scenic resources, including, but not limited to, trees, rock outcroppings, and historic buildings within a state scenic highway? | ☐ | ☐ | ☐ | ☒ |
| c) In non-urbanized areas, substantially degrade the existing visual character or quality of public views of the site and its surroundings? (Public views are those that are experienced from publicly accessible vantage point). If the project is in an urbanized area, would the project conflict with applicable zoning and other regulations governing scenic quality?) | ☐ | ☐ | ☐ | ☒ |
| d) Create a new source of substantial light or glare which would adversely affect day or nighttime views in the area? | ☐ | ☐ | ☐ | ☒ |
| 2. AGRICULTURE AND FOREST RESOURCES. In determining whether impacts to agricultural resources are significant | | | | |

| *Issues* | *Potentially Significant Impact* | *Less Than Significant with Mitigation* | *Less Than Significant Impact* | *No New Impact / No Impact* |
|---|---|---|---|---|
| environmental effects, lead agencies may refer to the California Agricultural Land Evaluation and Site Assessment Model (1997) prepared by the California Dept. of Conservation as an optional model to use in assessing impacts on agriculture and farmland. In determining whether impacts to forest resources, including timberland, are significant environmental effects, lead agencies may refer to information compiled by the California Department of Forestry and Fire Protection regarding the state's inventory of forest land, including the Forest and Range Assessment Project and the Forest Legacy Assessment project; and forest carbon measurement methodology provided in Forest protocols adopted by the California Air Resources Board. Would the project: | | | | |
| a) Convert Prime Farmland, Unique Farmland, or Farmland of Statewide Importance (Farmland), as shown on the maps prepared pursuant to the Farmland Mapping and Monitoring Program of the California Resources Agency, to non-agricultural use? | ☐ | ☐ | ☐ | ☒ |
| b) Conflict with existing zoning for agricultural use, or a Williamson Act contract? | ☐ | ☐ | ☐ | ☒ |
| c) Conflict with existing zoning for, or cause rezoning of, forest land (as defined in Public Resources Code section 12220(g)), timberland (as defined by Public Resources Code section 4526), or timberland zoned Timberland Production (as defined by Government Code section 51104(g))? | ☐ | ☐ | ☐ | ☒ |
| d) Result in the loss of forest land or conversion of forest land to non-forest use? | ☐ | ☐ | ☐ | ☒ |
| e) Involve other changes in the existing environment which, due to their location or nature, could result in conversion of Farmland, to non-agricultural use or conversion of forest land to non-forest use? | ☐ | ☐ | ☐ | ☒ |
| 3. AIR QUALITY. Where available, the significance criteria established by the applicable air quality management district or air pollution control district may be relied upon to make the following determinations. Would the project: | | | | |
| a) Conflict with or obstruct implementation of the applicable air quality plan? | ☐ | ☐ | ☐ | ☒ |
| b) Result in a cumulatively considerable net increase of any criteria pollutant for which the project region is non-attainment under an applicable federal or state ambient air quality standard? | ☐ | ☐ | ☐ | ☒ |
| c) Expose sensitive receptors to substantial pollutant concentrations? | ☐ | ☐ | ☐ | ☒ |
| d) Result in other emissions (such as those leading to odors) adversely affecting a substantial number of people? | ☐ | ☐ | ☐ | ☒ |
| 4. BIOLOGICAL RESOURCES. Would the project: | | | | |
| a) Have a substantial adverse effect, either directly or through habitat modifications, on any species identified as a candidate, sensitive, or special status species in local or regional plans, policies, or regulations, or by the California Department of Fish | ☐ | ☐ | ☐ | ☒ |

| iv) Landslides? | ☐ | ☐ | ☐ | ☒ |
| b) Result in substantial soil erosion or the loss of topsoil? | ☐ | ☐ | ☐ | ☒ |
| c) Be located on a geologic unit or soil that is unstable, or that would become unstable as a result of the project, and potentially result in on- or off-site landslide, lateral spreading, subsidence, liquefaction or collapse? | ☐ | ☐ | ☐ | ☒ |
| d) Be located on expansive soil, as defined in Table 18-1-B of the Uniform Building Code, creating substantial direct or indirect risks to life or property? | ☐ | ☐ | ☐ | ☒ |
| e) Have soils incapable of adequately supporting the use of septic tanks or alternative wastewater disposal systems where sewers are not available for the disposal of wastewater? | ☐ | ☐ | ☐ | ☒ |
| f) Directly or indirectly destroy a unique paleontological resource or site or unique geologic feature? | ☐ | ☐ | ☐ | ☒ |
| 8. GREENHOUSE GAS EMISSIONS. Would the project: | | | | |
| a) Generate greenhouse gas emissions, either directly or indirectly, that may have a significant impact on the environment? | ☐ | ☐ | ☐ | ☒ |
| b) Conflict with an applicable plan, policy or regulation adopted for the purpose of reducing the emission of greenhouse gases? | ☐ | ☐ | ☐ | ☒ |
| 9. HAZARDS AND HAZARDOUS MATERIALS. Would the project: | | | | |
| a) Create a significant hazard to the public or the environment through the routine transport, use, or disposal of hazardous materials? | ☐ | ☐ | ☐ | ☒ |
| b) Create a significant hazard to the public or the environment through reasonably foreseeable upset and accident conditions involving the release of hazardous materials into the environment? | ☐ | ☐ | ☐ | ☒ |
| c) Emit hazardous emissions or handle hazardous or acutely hazardous materials, substances, or waste within one-quarter mile of an existing or proposed school? | ☐ | ☐ | ☐ | ☒ |
| d) Be located on a site which is included on a list of hazardous materials sites compiled pursuant to Government Code section 65962.5 and, as a result, would it create a significant hazard to the public or the environment? | ☐ | ☐ | ☐ | ☒ |
| e) For a project located within an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project result in a safety hazard or excessive noise for people residing or working in the project area? | ☐ | ☐ | ☐ | ☒ |
| f) Impair implementation of or physically interfere with an adopted emergency response plan or emergency evacuation plan? | ☐ | ☐ | ☐ | ☒ |
| g) Expose people or structures, either directly or indirectly, to a significant risk of loss, injury or death | ☐ | ☐ | ☐ | ☒ |

| *Issues* | *Potentially Significant Impact* | *Less Than Significant with Mitigation* | *Less Than Significant Impact* | *No New Impact / No Impact* |
|---|---|---|---|---|
| involving wildland fires? | | | | |
| 10. HYDROLOGY AND WATER QUALITY. Would the project: | | | | |
| a) Violate any water quality standards or waste discharge requirements or otherwise substantially degrade surface or ground water quality? | ☐ | ☐ | ☐ | ☒ |
| b) Substantially decrease groundwater supplies or interfere substantially with groundwater recharge such that the project may impede sustainable groundwater management of the basin? | ☐ | ☐ | ☐ | ☒ |
| c) Substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river or through the addition of impervious surfaces, in a manner which would: | | | | |
| i) Result in substantial erosion or siltation on- or off-site; | ☐ | ☐ | ☐ | ☒ |
| ii) Substantially increase the rate or amount of surface runoff in a manner which would result in flooding on- or offsite; | ☐ | ☐ | ☐ | ☒ |
| iii) Create or contribute runoff water which would exceed the capacity of existing or planned stormwater drainage systems or provide substantial additional sources of polluted runoff; or | ☐ | ☐ | ☐ | ☒ |
| d) Impede or redirect flood flows? | ☐ | ☐ | ☐ | ☒ |
| e) In flood hazard, tsunami, or seiche zones, risk release of pollutants due to project inundation? | ☐ | ☐ | ☐ | ☒ |
| f) Conflict with or obstruct implementation of a water quality control plan or sustainable groundwater management plan? | ☐ | ☐ | ☐ | ☒ |
| 11. LAND USE AND PLANNING. Would the project: | | | | |
| a) Physically divide an established community? | ☐ | ☐ | ☐ | ☒ |
| b) Cause a significant environmental impact due to a conflict with any land use plan, policy, or regulation adopted for the purpose of avoiding or mitigating an environmental effect? | ☐ | ☐ | ☐ | ☒ |
| 12. MINERAL RESOURCES. Would the project: | | | | |
| a) Result in the loss of availability of a known mineral resource that would be of value to the region and the residents of the state? | ☐ | ☐ | ☐ | ☒ |
| b) Result in the loss of availability of a locally important mineral resource recovery site delineated on a local general plan, specific plan or other land use plan? | ☐ | ☐ | ☐ | ☒ |
| 13. NOISE. Would the project result in: | | | | |
| a) Generation of a substantial temporary or permanent increase in ambient noise levels in the vicinity of the project in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies? | ☐ | ☐ | ☐ | ☒ |
| b) Generation of excessive groundborne vibration or groundborne noise levels? | ☐ | ☐ | ☐ | ☒ |

| *Issues* | *Potentially Significant Impact* | *Less Than Significant with Mitigation* | *Less Than Significant Impact* | *No New Impact / No Impact* |
|---|---|---|---|---|
| c) For a project located within the vicinity of a private airstrip or an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project expose people residing or working in the project area to excessive noise levels? | ☐ | ☐ | ☐ | ☒ |
| 14. POPULATION AND HOUSING. Would the project: | | | | |
| a) Induce substantial unplanned population growth in an area, either directly (for example, by proposing new homes and businesses) or indirectly (for example, through extension of road or other infrastructure)? | ☐ | ☐ | ☐ | ☒ |
| b) Displace substantial numbers of existing people or housing, necessitating the construction of replacement housing elsewhere? | ☐ | ☐ | ☐ | ☒ |
| 15. PUBLIC SERVICES. Would the project: | | | | |
| a) Result in substantial adverse physical impacts associated with the provision of new or physically altered governmental facilities, need for new or physically altered governmental facilities, the construction of which could cause significant environmental impacts, in order to maintain acceptable service ratios, response times or other performance objectives for any of the public services: | | | | |
| i) Fire protection? | ☐ | ☐ | ☐ | ☒ |
| ii) Police protection? | ☐ | ☐ | ☐ | ☒ |
| iii) Schools? | ☐ | ☐ | ☐ | ☒ |
| iv) Parks? | ☐ | ☐ | ☐ | ☒ |
| v) Other public facilities? | ☐ | ☐ | ☐ | ☒ |
| 16. RECREATION. | | | | |
| a) Would the project increase the use of existing neighborhood and regional parks or other recreational facilities such that substantial physical deterioration of the facility would occur or be accelerated? | ☐ | ☐ | ☐ | ☒ |
| b) Does the project include recreational facilities or require the construction or expansion of recreational facilities which have an adverse physical effect on the environment? | ☐ | ☐ | ☐ | ☒ |
| 17. TRANSPORTATION. Would the project: | | | | |
| a) Conflict with a program plan, ordinance or policy addressing the circulation system, including transit, roadway, bicycle and pedestrian facilities? | ☐ | ☐ | ☐ | ☒ |
| b) Conflict or be inconsistent with CEQA Guidelines section 15064.3, subdivision (b)? | ☐ | ☐ | ☐ | ☒ |
| c) Substantially increase hazards due to a geometric design feature (e.g., sharp curves or dangerous intersections) or incompatible uses (e.g., farm equipment)? | ☐ | ☐ | ☐ | ☒ |
| d) Result in inadequate emergency access? | ☐ | ☐ | ☐ | ☒ |

| *Issues* | *Potentially Significant Impact* | *Less Than Significant with Mitigation* | *Less Than Significant Impact* | *No New Impact / No Impact* |
|---|---|---|---|---|
| 18. TRIBAL CULTURAL RESOURCES. Would the project cause a substantial adverse change in the significance of a tribal cultural resource, defined in Public Resources Code section 21074 as either a site, feature, place, cultural landscape that is geographically defined in terms of the size and scope of the landscape, sacred place, or object with cultural value to a California Native American tribe, and that is: | | | | |
| a) Listed or eligible for listing in the California Register of Historical Resources, or in a local register of historical resources as defined in Public Resources Code section 5020.1(k), or | ☐ | ☐ | ☐ | ☒ |
| b) A resource determined by the lead agency, in its discretion and supported by substantial evidence, to be significant pursuant to criteria set forth in subdivision (c) of Public Resources Code section 5024.1. In applying the criteria set forth in subdivision (c) of Public Resources Code section 5024.1, the lead agency shall consider the significance of the resource to a California Native American tribe. | ☐ | ☐ | ☐ | ☒ |
| 19. UTILITIES AND SERVICE SYSTEMS. Would the project: | | | | |
| a) Require or result in the relocation or construction of new or expanded water, wastewater treatment or storm water drainage, electric power, natural gas, or telecommunications facilities, the construction or relocation of which could cause significant environmental effects? | ☐ | ☐ | ☐ | ☒ |
| b) Have sufficient water supplies available to serve the project and reasonably foreseeable future development during normal, dry and multiple dry years? | ☐ | ☐ | ☐ | ☒ |
| c) Result in a determination by the wastewater treatment provider which serves or may serve the project that it has adequate capacity to serve the project's projected demand in addition to the provider's existing commitments? | ☐ | ☐ | ☐ | ☒ |
| d) Generate solid waste in excess of State or local standards, or in excess of the capacity of local infrastructure, or otherwise impair the attainment of solid waste reduction goals? | ☐ | ☐ | ☐ | ☒ |
| e) Comply with federal, state, and local management and reduction statutes and regulations related to solid waste? | ☐ | ☐ | ☐ | ☒ |
| 20. WILDFIRE. If located in or near state responsibility areas or lands classified as very high fire hazard severity zones, would the project: | | | | |
| a) Substantially impair an adopted emergency response plan or emergency evacuation plan? | ☐ | ☐ | ☐ | ☒ |
| b) Due to slope, prevailing winds, and other factors, exacerbate wildfire risks, and thereby expose project occupants to, pollutant concentrations from a wildfire or the uncontrolled spread of a wildfire? | ☐ | ☐ | ☐ | ☒ |
| c) Require the installation or maintenance of associated infrastructure (such as roads, fuel breaks, emergency water sources, power lines or other utilities) that may | ☐ | ☐ | ☐ | ☒ |

| *Issues* | *Potentially Significant Impact* | *Less Than Significant with Mitigation* | *Less Than Significant Impact* | *No New Impact / No Impact* |
|---|---|---|---|---|
| exacerbate fire risk or that may result in temporary or ongoing impacts to the environment? | | | | |
| d) Expose people or structures to significant risks, including downslope or downstream flooding or landslides, as a result of runoff, post-fire slope instability, or drainage changes? | ☐ | ☐ | ☐ | ☒ |
| 21. MANDATORY FINDINGS OF SIGNIFICANCE. (State CEQA Guidelines section 15065(a).) | | | | |
| a) Does the project have the potential to substantially degrade the quality of the environment, substantially reduce the habitat of a fish or wildlife species, cause a fish or wildlife population to drop below self-sustaining levels, threaten to eliminate a plant or animal community, substantially reduce the number or restrict the range of a rare or endangered plant or animal or eliminate important examples of the major periods of California history or prehistory? | ☐ | ☐ | ☐ | ☒ |
| b) Does the project have the potential to achieve short-term environmental goals to the disadvantage of long-term environmental goals? | ☐ | ☐ | ☐ | ☒ |
| c) Does the project have impacts that are individually limited, but cumulatively considerable? ("Cumulatively considerable" means that the incremental effects of a project are considerable when viewed in connection with the effects of past projects, the effects of other current project, and the effects of probable future projects.) | ☐ | ☐ | ☐ | ☒ |
| d) Does the project have environmental effects which will cause substantial adverse effects on human beings, either directly or indirectly? | ☐ | ☐ | ☐ | ☒ |
| Note: Authority cited: Public Resources Code sections 21083, 21083.05, 21083.09.<br>Reference: Gov. EXPLANATION OF ISSUES

1. AESTHETICS. Would the project:

   a. Have a substantial adverse effect on a scenic vista?

Discussion of Effects: The Policy Plan (General Plan) does not identify scenic vistas within the City. However, the Policy Plan (Policy CD1-5) requires all major require north-south streets be designed and redeveloped to feature views of the San Gabriel Mountain. The project site is located along Milliken Avenue and Jurupa Street, both principal arterials, as identified in the Functional Roadway Classification Plan (Figure M-2) of the Mobility Element within the Policy Plan.

The proposed Project would allow for the construction of warehouses within an area that has warehouse, business park, and industrial development. While construction of the Project may block some public views to the north, intermittent views of the San Gabriel Mountains would still be available, and the Project would not result in significant adverse environmental impacts with

regard to views of the San Gabriel Mountains; no significant adverse impacts on a scenic vista would occur.

Mitigation: No additional mitigation is required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

b. Substantially damage scenic resources, including, but not limited to, tress, rock outcroppings and historic buildings within a state scenic highway?

Discussion of Effects: The City of Ontario is served by three freeways: I-10, I-15, and SR-60. I-10 and SR-60 traverse the northern and central portion of the City, respectively, in an east–west direction. I-15 traverses the northeastern portion of the City in a north–south direction. These segments of I-10, I-15, and SR-60 have not been officially designated as scenic highways by the California Department of Transportation. In addition, there are no historic buildings or any scenic resources identified on or in the vicinity of the project site. Therefore, it will not result in adverse environmental impacts.

Mitigation: No additional mitigation is required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

c. Substantially degrade the existing visual character or quality of the site and its surroundings?

Discussion of Effects: The project would not degrade the existing visual character or quality of the site or its surroundings. The project site is located in an urban area that is characterized by industrial development and is surrounded by urban land uses. Development of the proposed Project would be required to meet policies of the TOP Community Design Element and zoning designations on the property. Furthermore, the proposed Project would be required to be consistent with the design guidelines and development standards of the Toyota/Ontario Business Park Specific Plan. The Project site is zoned for Industrial Mixed Use, and the Project would not conflict with regulations governing scenic quality.

Mitigation: No additional mitigation is required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

d. Create a new source of substantial light or glare that would adversely affect day or nighttime views in the area?

Discussion of Effects: New lighting will be introduced to the site with the development of the project. Pursuant to the requirements of the City's Development Code, project on-site lighting will be shielded, diffused or indirect, to avoid glare to pedestrians or motorists. In addition, lighting fixtures will be selected and located to confine the area of illumination to within the project site and minimize light spillage.

Furthermore, as required by the Toyota/Ontario Business Park Specific Plan, a Master Lighting Plan would be submitted to the City of Ontario for review and approval. The Master Plan would contain criteria and standards governing lighting along Toyota Way, lighting within parking lots and access drives, and lighting improvements for pedestrian walkways. The Master Plan would also establish minimum illumination criteria consistent with City of Ontario policies on exterior illumination. Site lighting would be directed inward and downward, to avoid spillover of light and glare onto the adjacent freeway, nearby public streets or onto adjacent properties.

Additionally, the Project would be required to adhere to the following performance standard included in the Toyota/Ontario Business Park Specific Plan:

> ***5.11.3 Light and Glare:*** *No lighting fixture shall create any illumination which exceeds five foot candles on adjacent parcels of land, whether such illumination is direct or indirect. Glare levels shall be measured with a photoelectric photometer following standard spectral luminous efficiency curves adopted by the International Commission of Illumination.*

Site lighting plans are subject to review by the Planning Department and Ontario Police Department prior to issuance of building permits (pursuant to the City's Building Security Ordinance); no significant adverse impacts would occur.

Mitigation: No additional mitigation is required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

2. AGRICULTURE AND FOREST RESOURCES. In determining whether impacts to agricultural resources are significant environmental effects, lead agencies may refer to the California Agricultural Land Evaluation and Site Assessment Model prepared by the California Department of Conservation as an optional model to use in assessing impacts on agriculture and farmland. In determining whether impacts to forest resources, including timberland, are significant environmental effects, lead agencies may refer to information compiled by the California Department of Forestry and Fire Protection regarding the state's inventory of forest land, including the Forest and Range Assessment Project and the Forest Legacy Assessment project; and forest carbon measurement methodology provided in Forest Protocols adopted by the California Air Resources Board. Would the project:

a. Convert Prime Farmland, Unique Farmland, or Farmland of Statewide Importance (Farmland), as shown on the maps prepared pursuant to the Farmland Mapping and Monitoring Program of the California Resources Agency, to non-agricultural use?

Discussion of Effects: The proposed development site is presently vacant and does not contain any agricultural uses. Further, the site is identified as Urban and Built-up Land on the map prepared by the California Resources Agency, pursuant to the Farmland Mapping and Monitoring Program. As a result, no adverse environmental impacts are anticipated.

Mitigation: No additional mitigation is required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

b. Conflict with existing zoning for agricultural use, or a Williamson Act contract?

Discussion of Effects: The project site is not zoned for agricultural use. The project site zoned is Industrial Mixed Use (Toyota Ontario Business Park Specific Plan). The proposed project is consistent with the development standards and allowed land uses of the proposed zone. Furthermore, there is no Williamson Act contract in effect on the subject site. Therefore, no impacts to agricultural uses are anticipated, nor will there be any conflict with existing or Williamson Act contracts.

Mitigation: No additional mitigation is required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

c. Conflict with existing zoning for, or cause rezoning of, forest land (as defined in Public Resources Code section 12220(g)), timberland (as defined by Public Resources Code section

4526), or timberland zoned Timberland Production (as defined by Government Code section 51104(g)?

Discussion of Effects: Impacts to forest land were not analyzed in TOP FEIR, but this topic has since been included as part of the revisions to the State CEQA Guidelines. The Project site is zoned Industrial Mixed Use. Development of the proposed Project would not result in the rezoning of forest land, timberland, or timberland zoned Timberland Production as those land use designations do not exist within the City of Ontario. No impacts to forest or timberland would occur.

Mitigation: No additional mitigation is required. The proposed Project would not conflict with existing zoning or cause rezoning of forest land, timberland, or timberland zoned Timberland Production. No impact would occur and no further analysis of impacts to forest resources or timberland is required in TOP FEIR; no changes or additions to TOP FEIR analysis are necessary.

d. Result in the loss of forest land or conversion of forest land to non-forest use?

Discussion of Effects: There is currently no land in the City of Ontario that qualifies as forest land as defined in Public Resources Code section 12220(g). Neither The Ontario Plan nor the City's Zoning Code provide designations for forest land. Consequently, the proposed project would not result in the loss or conversion of forest land.

Mitigation: No additional mitigation is required. The proposed Project would not result in a loss of forest land or conversion of forest land to non-forest use. No impact would occur and no further analysis of impacts to forest resources is required in TOP FEIR; no changes or additions to TOP FEIR analyses are necessary.

e. Involve other changes in the existing environment, which, due to their location or nature, could individually or cumulatively result in loss of Farmland to non-agricultural use or conversion of forest land to non-forest use?

Discussion of Effects: Construction of the proposed Project would not result in changes to the existing environment that would result in the loss of farmland. While conversion of farmland increases the potential for adjacent areas to also be converted from farmland to urban uses, there are no agricultural uses occurring onsite or in the immediate vicinity of the Project site; the Project does not directly or indirectly result in conversion of farmland. No new cumulative impacts beyond those identified in the Certified TOP FEIR would result from Project construction. As a result, the Project would not result in loss of Farmland to non-agricultural use.

Additionally, there is currently no land in the City of Ontario that qualifies as forest land as defined in Public Resources Code Section 12220(g). Neither TOP nor the City's Zoning Code provide designations for forest land. The proposed Project would not result in the conversion of forest land to non-forest use.

Mitigation Required: No additional mitigation is required. The Project will not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

3. AIR QUALITY. Where available, the significance criteria established by the applicable air quality management or air pollution control district may be relied upon to make the following determinations. Would the project:

a. Conflict with or obstruct implementation of the applicable air quality plan?

Discussion of Effects: As described in TOP FEIR, TOP would not be consistent with the South

Coast Air Quality Management District's Air Quality Management Plan (AQMP) because air pollutant emissions associated with buildout of the City of Ontario would cumulatively contribute to the nonattainment designations in the South Coast Air Basin (SoCAB). Furthermore, buildout of TOP Land Use Plan would exceed estimates of population, employment, and VMT for Ontario; these emissions are not included in the regional emissions inventory for the SoCAB used for the analysis within TOP FEIR. Therefore TOP was considered inconsistent with the AQMP resulting in a significant unavoidable impact.

Because the proposed Project would result in a decrease in the amount of development than was anticipated at the Project site under TOP FEIR, construction and operation of the proposed Project would not increase the identified significant air quality impact associated with implementation of TOP

Mitigation: No additional mitigation is required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

b. Result in a cumulatively considerable net increase of any criteria pollutant for which the project region is non-attainment under an applicable federal or state ambient air quality standard?

Discussion of Effects: As described in TOP FEIR, both construction and operational air quality impacts associated with implementation of TOP Land Use Plan were deemed to be significant. Mitigation measures were identified, but the impacts were still considered significant and unavoidable. These mitigation measures are applicable to the proposed Project, and are included below:

*3-1: The City of Ontario Building Department shall require that all new construction projects incorporate all feasible mitigation measures to reduce air quality emissions. Potential measures shall be incorporated as conditions of approval for a project and may include:*

- *Requiring fugitive dust control measures that exceed South Coast Air Quality Management District's Rule 403, such as:*
- *Requiring use of nontoxic soil stabilizers to reduce wind erosion.*
- *Applying water every four hours to active soil-disturbing activities.*
- *Tarping and/or maintaining a minimum of 24 inches of freeboard on trucks hauling dirt, sand, soil, or other loose materials.*
- *Using construction equipment rated by the United States Environmental Protection Agency as having Tier 3 or higher exhaust emission limits.*
- *Ensuring construction equipment is properly serviced and maintained to the manufacturer's standards.*
- *Limiting nonessential idling of construction equipment to no more than five consecutive minutes.*
- *Using Super-Compliant VOC paints for coating of architectural surfaces whenever possible. A list of Super-Compliant architectural coating manufactures can be found on the South Coast Air Quality Management District's website at: http://www.aqmd.gov/prdas/brochures/Super-Compliant_AIM.pdf.*

*3-2: The City of Ontario shall evaluate new development proposals within the City and require all developments to include access or linkages to alternative modes of transportation, such as transit stops, bike paths, and/or pedestrian paths (e.g., sidewalks).*

Because the proposed Project would result in a decrease in the amount of development anticipated at the Project site compared to what was assumed in TOP FEIR, construction and

operation of the proposed Project would not increase the anticipated air quality impacts identified within TOP FEIR.

Mitigation: No additional mitigation is required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analyses are necessary.

c. Expose sensitive receptors to substantial pollutant concentrations?

Discussion of Effects: As described in TOP FEIR, eight high vehicle count intersections were evaluated for CO emissions, and it was determined that sensitive receptors in the area would not be significantly adversely affected by CO emissions generated at buildout of the Land Use Plan. Localized air quality impacts related to mobile-source emissions were identified as being less than significant.

In addition, as noted in TOP FEIR, the California Air Resource Board (CARB) developed and approved the *Air Quality and Land Use Handbook: A Community Health Perspective* in May 2005 to address the siting of sensitive land uses in the vicinity of freeways, distribution centers, rail yards, ports, refineries, chrome-plating facilities, dry cleaners, and gasoline-dispensing facilities. This guidance document was developed to assess compatibility and associated health risks when placing sensitive receptors near existing pollution sources.

As detailed in TOP FEIR Table 5.3-9, CARB provides the following recommendations for siting new sensitive land uses for distributions centers:

- Avoid siting new sensitive land uses within 1,000 feet of a distribution center (that accommodates more than 100 trucks per day, more than 40 trucks with operating transport refrigeration units [TRUs] per day, or where TRU unit operations exceed 300 hours per week).
- Take into account the configuration of existing distribution centers and avoid locating residences and other sensitive land uses near entry and exit points.

The Project site is located within an industrial area, and is not located in close proximity to any sensitive receptors.

The proposed warehouse would not be located within 1,000 feet of any sensitive receptor, and is not anticipated to generate 100 truck trips per day; the trip generation analysis provided by Ganddini Group estimated 61 truck trips per day. The proposed Project would not place sensitive receptors near existing pollution sources. Therefore, impacts related to the exposure of sensitive receptors to substantial pollutant concentrations would not occur.

Mitigation: No additional mitigation is required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

d. Result in other emissions (such as those leading to odors adversely affecting a substantial number of people)?

Discussion of Effects: As described in TOP FEIR, construction activity would require the operation of equipment that may generate exhaust from either gasoline or diesel fuel. Construction and development would also require the application of paints and the paving of roads, which could generate odors from materials such as paints and asphalt. As these odors are short-term in nature and quickly disperse into the atmosphere, this is not considered significant. Additionally, commercial, industrial, and residential projects, associated with implantation of TOP are also required to comply with SCAQMD Rule 402 to prevent occurrence of public nuisances. As a result, Project-related odors are required to avoid the creation of a public nuisance. Odorous emissions attributable to implementation of TOP are not considered a significant adverse impact to air quality.

Mitigation: No additional mitigation is required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

4. BIOLOGICAL RESOURCES. Would the project:

a. Have a substantial adverse effect, either directly or through habitat modifications, on any species identified as a candidate, sensitive, or special status species in local or regional plans, policies, or regulations, or by the California Department of Fish and Game or U.S. Fish and Wildlife Service?

Discussion of Effects: The Project site is within an urbanized area, characterized by industrial development, and lacks native habitat. However, the United States Department of Fish and Wildlife (USFWS) has identified the Project vicinity as an area where the endangered Delhi Sands flower-loving fly (*Rhaphiomidas terminates abdominalis*) is known to currently or to have at one time existed. Because the Delhi Sands flower-loving fly requires a specific habitat type, this species requires site specific considerations, protection and enhancement of its limited habitat type, and species specific management to maintain the habitat and populations. To avoid potential impacts to this species, the proposed Project conducted pre-construction surveys for Delhi Sands flower-loving fly to determine if the species or its habitat are currently located on the Project site. The pre-construction surveys of the site determined that there is currently no extant habitat for the species nor were any individuals of the species observed on the Project site. Therefore, impacts to species identified as a candidate, sensitive, or special status species will not occur as a result of the proposed Project.

Mitigation: No additional mitigation is required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

b. Have a substantial adverse effect on any riparian habitat or other sensitive natural community identified in local or regional plans, policies, regulations, or by the California Department of Fish and Game or U.S. Fish and Wildlife Service?

Discussion of Effects: The Project site is within an urbanized area and lacks native habitat. According to the United States National Wetlands Inventory (NWI), no riparian habitat is found within the Project site. Therefore, no significant impact would occur to riparian or other sensitive natural communities as a result of construction and operation of the proposed Project.

Mitigation: No additional mitigation is required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

c. Have a substantial adverse effect on federally protected wetlands as defined by Section 404 of the Clean Water Act (including, but not limited to, marsh, vernal pool, coastal, etc.) through direct removal, filling, hydrological interruption, or other means?

Discussion of Effects: The Project site is within an urbanized area and lacks any wetlands. According to the United States National Wetlands Inventory (NWI), no wetlands occur within the Project site; no significant wetlands impact would occur.

Mitigation: No additional mitigation is required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

d. Interfere substantially with the movement of any native resident or migratory fish or wildlife species or with established native resident or migratory wildlife corridors, or impede the use of native wildlife nursery sites?

Discussion of Effects: As described in TOP FEIR, no regional wildlife movement corridors have been identified in the City, and most of the City is ill-suited for the purposes of wildlife movement. Furthermore, the Project site is within an urban area with industrial uses and is bounded on all sides by development. As a result, there are no wildlife corridors connecting this site to other areas. Therefore, no significant wildlife corridor impacts would occur.

Mitigation: No additional mitigation is required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

e. Conflict with any local policies or ordinances protecting biological resources, such as a tree preservation policy or ordinance?

Discussion of Effects: As described in TOP EIR, while the City of Ontario does not have any municipal ordinances for the protection of trees on private property, Municipal Code Sections 10-1.25 and 10-2.05 prohibit the damaging or destruction of trees on City property, except under conditions specified in the Municipal Code. Additionally, TOP Policy ER5-2 notes that the City will comply with state and federal regulations regarding protected species. The proposed Project would not conflict with any local policies or ordinances protection biological resources.

Mitigation: No additional mitigation is required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

f. Conflict with the provisions of an adopted Habitat Conservation Plan (HCP), Natural Community Conservation Plan (NCCP), or other approved local, regional, or state habitat conservation plan?

Discussion of Effects: The site is not part of an adopted HCP, NCCP or other approved habitat conservation plan. As a result, no adverse environmental impacts are anticipated.

Mitigation: No additional mitigation is required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

5. CULTURAL RESOURCES. Would the project:

a. Cause a substantial adverse change in the significance of a historical resource as defined in Section 15064.5?

Discussion of Effects: The Project site is vacant and does not contain any buildings or structures constructed more than 50 years ago (generally, structures need to be at least 50 years or older to be considered historical resources). As such, there are no structures onsite eligible for listing in the California Register of Historic Resources.

A Cultural Resources Records Search was conducted on July 16, 2019 at the California Historic Resource Inventory System at the South Central Coastal Information Center (CHRIS-SCCIC). The records search indicated that there are no cultural resources (prehistoric, historic, or built environments) recorded within the Project boundaries. There was one historic resource (CA-SBR-008857H) located within a one-half mile radius of the Project site. The historic resource is a section of the Southern California Edison Company's Lugo-Mira No. 1 500kv Transmission Line. The

transmission line was determined eligible for listing in the National Register of Historic Place (NRHP) under Criteria A and C, and therefore, is eligible for listing in the California Register of Historic Resources. However, this historic resource would not be impacted (directly or indirectly) by the proposed Project. Therefore, no significant impacts would occur.

Mitigation: No additional mitigation is required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

b. Cause a substantial adverse change in the significance of an archaeological resource pursuant to Section 15064.5?

Discussion of Effects: As described in TOP FEIR, a records review at the Archaeological Information Center at San Bernardino County Museum (SBCM) indicated no known prehistoric archaeological resources in the City of Ontario; however, only about 10 percent of the City has been adequately surveyed for prehistoric or historic archaeology. Figure 5.5-2 of TOP FEIR shows that the Project site has not been surveyed for archeological resources. The CHRIS-SCCIC records search, noted in subsection "a" above, did not identify prehistoric, historic, or historic built environments within or adjacent to the Project boundaries. Additionally, an NAHC Sacred Lands File search failed to indicate archaeological resources or artifacts associated with Tribal Cultural Resources (TCRs) within the Project site.

The Project site has been highly disturbed by modern human activities including agricultural use from the 1940's through the 1960's and the development and construction of the Toyota Motors North American Parts Center and supporting infrastructure that would have displaced potential surface and subsurface archaeological resources. The proposed Project would not impact cultural (prehistoric, historic, or historic built environments) resources and no mitigation measures are recommended.

While no adverse impacts to archeological resources are anticipated at the site due to its urbanized nature, the following City Standard Conditions of Approval would be applied should unanticipated archaeological resources be discovered during excavation or construction:

> *5.2 If any archeological or paleontological resources are found during Project grading, excavation, or construction, the area shall not be disturbed until the significance of the resource is determined. If determined to be significant, the resource shall be recovered by a qualified archeologist or paleontologist consistent with current standards and guidelines, or other appropriate measures implemented*.

Mitigation: No additional mitigation is required. The Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

c. Disturb any human remains, including those interred outside of dedicated cemeteries?

Discussion of Effects: The proposed Project is located in an area that has been previously disturbed by human activity. No known religious or sacred sites exist within the Project area, and human remains are not expected to be encountered during construction activities. However, in the unlikely event that human remains are discovered, existing regulations, including the California Public Resources Code Section 5097.98, would afford protection for human remains discovered during development activities. Furthermore, the following City Standard Conditions of Approval would be applied in the event of unanticipated discoveries of human remains are identified during excavation and construction activities:

*5.1 If human remains are found during Project grading, excavation, or construction activities, the area shall not be disturbed until any required investigation is completed by the County Coroner and/or Native American consultation has been completed (if deemed applicable)*.

Mitigation: No additional mitigation is required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

6. ENERGY. Would the project:

a. Result in potentially significant environmental impact due to wasteful, inefficient, or unnecessary consumption of energy resources, during project construction or operation?

Discussion of Effects: Energy was not analyzed in TOP FEIR, but was included as part of the 2019 revisions to the State CEQA Guidelines. Implementation of the proposed Project would increase the demand for electricity and natural gas at the Project site and gasoline consumption in the region during construction and operation. A detailed discussion is provided below:

***Electricity***

*Construction*. Temporary electric power would be required for lighting and electronic equipment (e.g., computers) located in trailers used by the construction crew. However, the electricity used for such activities would be temporary and would have a negligible contribution to the Project's overall energy consumption.

*Operation*. Operation of the proposed Project would require electricity for multiple purposes, such as: building heating and cooling, lighting, appliances, and electronics. Although electricity consumption would increase at the site under implementation of the proposed Project, the building envelope, HVAC, lighting, and other systems, would be designed to maximize energy performance. The Project would also be subject to statewide mandatory energy requirements as outlined in the CALGreen Code. In addition, the Project would implement additional measures, as detailed in the GHG reduction measures screening table, which would further reduce electricity consumption. For these reasons, the electricity that would be consumed by the Project is not considered to be inefficient or wasteful, and impacts would be less than significant.

***Natural Gas***

*Construction*. Natural gas consumption is not anticipated during construction of the Project. Fuels used for construction would generally consists of diesel and gasoline, which are discussed in the next subsection. Any amounts of natural gas that may be consumed during Project construction would be nominal and would have a negligible contribution to the Project's overall energy consumption.

*Operational*. The operational phase of the proposed Project would require natural gas consumption for various purposes, such as building heating and cooling. While natural gas consumption would increase at the site with construction of the proposed Project, the building envelope, HVAC, lighting, and other systems, would be designed to maximize energy performance. The Project would be subject to statewide mandatory energy requirements as outlined in the CALGreen Code. For these reasons, the natural gas that would be consumed by the Project is not considered to be inefficient or wasteful, and impacts would be less than significant.

***Diesel and Gasoline Fuel***

*Construction*. Diesel and gasoline fuels, also referred to as petroleum in this subsection, would be consumed throughout construction of the Proposed Project. Fuel consumed by construction equipment would be the primary energy resource consumed over the course of construction, and vehicle miles traveled (VMT) associated with the transportation of construction materials (e.g., deliveries to the site) and worker trips to and from the site would also result in petroleum consumption. Whereas on-site, heavy-duty construction equipment and delivery trucks would predominantly use diesel fuel, construction workers would generally rely on gasoline-powered vehicles. Construction-related vehicles would be required to comply with CARB's Airborne Toxic Control Measures, which restricts heavy-duty diesel vehicle idling to five minutes. Since petroleum use during construction would be temporary and required to conduct development activities, it would not be wasteful or inefficient, and impacts would be less than significant.

*Operational*. Fuel consumption associated with development pursuant to the proposed Project's operational phase would primarily be attributable to workers commuting to and from the Project and the operation of large, diesel-powered trucks (e.g., semi-trucks) needed to transport goods. Over the lifetime of the Project, the fuel efficiency of the vehicles being used by the employees is expected to increase. As such, the amount of petroleum consumed as a result of vehicular trips to and from the Project site during operation is anticipated to decrease over time. Operation of the Project is expected to decrease the amount of petroleum it consumes in the future due to advances in fuel economy. Although the proposed Project would increase petroleum use in the region during construction and operation, the use would be a small fraction of the statewide use and, due to efficiency increases, would diminish over time. As such, petroleum consumption associated with the Project would not be considered inefficient or wasteful and would result in a less-than-significant impact.

Mitigation: The Project would not result in any new significant impacts. No changes or additions to TOP FEIR analyses are necessary.

b. Conflict with or obstruct a state or local plan for renewable energy or energy efficiency?

Discussion of Effects: The proposed Project would not conflict with or obstruct a state or local plan adopted for the purposes of increasing the amount of renewable energy or energy efficiency. The California Title 24 Building Code contains energy efficiency standards for non-residential buildings. These standards address electricity and natural gas efficiency in lighting, water, heating, and air conditioning, as well as the effects of the building envelope (e.g., windows, doors, walls and rooves, etc.) on energy consumption. As described above, the Project would be required to comply with the 2019 CALGreen standards, and would implement additional measures identified in the City's Greenhouse Gas Reduction Measures Screening Threshold Table for Commercial and Industrial Development. Given the above, the proposed Project would not conflict with nor obstruct a state or local plan for renewable energy or energy efficiency. This impact would be less than significant.

Mitigation: The Project would not result in any new significant impacts. No changes or additions to TOP FEIR analyses are necessary.

7. GEOLOGY & SOILS. Would the project:

a. Expose people or structures to potential substantial adverse effects, including the risk of loss, injury or death involving:

i. Rupture of a known earthquake fault, as delineated on the most recent Alquist-Priolo Earthquake Fault Zoning Map issued by the State Geologist for the area or based on other

substantial evidence of a known fault? Refer to Division of Mines and Geology Special Publication 42.

Discussion of Effects: There are no active faults known on the site and the project site is located outside the Fault Rapture Hazard Zone (formerly Alquist-Priolo Zone). The Ontario Plan FEIR (Section 5.7/Figure 5.7-2) identifies eight active or potentially active fault zones near the City. Given that the closest fault zone is located more than ten miles from the project site, fault rupture within the project area is not likely. All development will comply with the Uniform Building Code seismic design standards to reduce geologic hazard susceptibility. Therefore, no adverse impacts are anticipated.

Mitigation: No additional mitigation is required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

ii. Strong seismic ground shaking?

Discussion of Effects: There are no active faults known on the site and the project site is located outside the Fault Rapture Hazard Zone (formerly Alquist-Priolo Zone). The Land Use Plan (Figure LU-6) of the Policy Plan (General Plan) FEIR (Section 5.7/Figure 5.7-2) identifies eight active or potentially active fault zones near the City. The closest fault zone is located more than ten miles from the project site. The proximity of the site to the active faults will result in ground shaking during moderate to severe seismic events. All construction will be in compliance with the California Building Code, the Ontario Municipal Code, The Ontario Plan and all other ordinances adopted by the City related to construction and safety. Therefore, no adverse impacts are anticipated.

Mitigation: No additional mitigation is required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

iii. Seismic-related ground failure, including liquefaction?

Discussion of Effects: As identified in the TOP FEIR (Section 5.7), groundwater saturation of sediments is required for earthquake induced liquefaction. In general, groundwater depths shallower than 10 feet to the surface can cause the highest liquefaction susceptibility. Depth to ground water at the project site during the winter months is estimated to be between 250 to 450 feet below ground surface. Therefore, the liquefaction potential within the project area is minimal. Implementation of The Ontario Plan strategies, Uniform Building Code and Ontario Municipal code would reduce impacts to a less than significant level.

Mitigation: No additional mitigation is required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

iv. Landslides?

Discussion of Effects: The project would not expose people or structures to potential adverse effects, including the risk of loss, injury, or death involving landslides because the relatively flat topography of the project site (less than 2 percent slope across the city) makes the chance of landslides remote. Implementation of The Ontario Plan strategies, Uniform Building Code and Ontario Municipal Code would reduce impacts to a less than significant level.

Mitigation: No additional mitigation is required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

b. Result in substantial soil erosion or the loss of topsoil?

Discussion of Effects: Grading increases the potential for erosion by removing protective vegetation, changing natural drainage patterns, and constructing slopes. However, the following City Standard Conditions of Approval would reduce the potential for substantial erosion:

> *3.67 Prior to Grading Plan approval and the issuance of a grading permit, an Erosion and Sediment Control Plan shall be submitted to, and approved by, the Engineering Department. The Erosion and Sediment Control Plan shall specifically identify the Best Management Practices (BMPs) that will be implemented on the Project during construction, to reduce the discharge of sediment and other pollutants into the City's storm drain system.*

Compliance with the California Building Code, review of grading plans, and approval and implementation of the Erosion and Sediment Control Plan by the Engineering Department would ensure no significant erosion impacts occur. Implementation of a NPDES program, the Environmental Resource Element of the Policy Plan (General Plan) strategies, California Building Code, and Ontario Municipal code would reduce impacts to a less than significant level.

Mitigation: No additional mitigation is required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

c. Be located on a geologic unit or soil that is unstable, or that would become unstable as a result of the project, and potentially result in on- or off-site landslide, lateral spreading, subsidence, liquefaction or collapse?

Discussion of Effects: Please see Section 7.a.iii for a discussion of liquefaction and Section 7.a.iv for a discussion of landslides.

Lateral spreading is a form of horizontal displacement of soil toward an open channel or other "free" face, such as an excavation boundary. Lateral spreading may also occur where open banks and unsupported cut slopes provide a free face. Ground subsidence is the gradual settling or sinking of the ground surface with little or no horizontal movement, and most often results from human activities such as the extraction of oil, gas, or groundwater. Effects of subsidence include fissures, sinkholes, depressions, and disruption of surface drainage.

As described in TOP FEIR, projects developed pursuant to TOP would be required to meet the most current seismic safety requirements in the California Building Code (CBC). Chapter 16 of the CBC contains requirements for design and construction of structures to resist loads, including earthquake loads. Chapter 18 contains requirements for excavation, grading, and fill; load-bearing values of soils; and foundations, footings, and piles. Compliance with those requirements would ensure that there would not be substantial impacts related to ground shaking, liquefaction, or seismic settlement. TOP Policy S1-1 would require that all new habitable structures be designed in accordance with the most recent Building Code adopted by the City, including provisions regarding lateral forces and grading. Implementation of TOP strategies, California Building Code, and Ontario Municipal code would reduce impacts to a less than significant level.

Mitigation: No additional mitigation is required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and

addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

d. Be located on expansive soil, as defined in Table 18-1-B of the Uniform Building Code (1994), creating substantial risks to life or property?

Discussion of Effects: Soils containing expansive clay minerals can shrink or swell substantially as the moisture content decreases or increases. Structures built on these soils may experience shifting, cracking, and breaking damage as soils shrink and subside or expand.

As described in TOP FEIR, expansive soils are likely in the southern parts of the City, where there are silts, sandy silts, and silty clays. Near-surface soils in the northern and central parts of the City are primarily granular, that is, silty sand, sand, and gravel; such sediments are usually non-expansive or have very low expansion potential. Projects in the southern part of the City considered for approval under TOP could expose persons or structures to potentially significant hazards from expansive soils. However, compliance with the CBC and review of grading plans for individual projects by the City Engineer would ensure no significant impacts would occur.

Mitigation: No additional mitigation is required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

e. Have soils incapable of adequately supporting the use of septic tanks or alternative wastewater disposal systems where sewers are not available for the disposal of wastewater?

Discussion of Effects: The Project area is served by the local sewer system and the use of septic tanks or alternative wastewater disposal systems is not proposed.

Mitigation: No additional mitigation is required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

f. **Directly or indirectly destroy a unique paleontological resource or site or unique geologic feature?**

g.

Discussion of Effects: A paleontological resources records search prepared for the Project site commissioned through the Natural History Museum of Los Angeles County (NHMLAC) did not identify previously recorded vertebrate fossil localities or unique geological features within the Project Site or within a one-mile radius. There are two previously recorded fossil localities (LACM 7811: Masticophis and LACM 1207: Odocoileus) located within a five-mile radius of the Project site that were discovered within the same sedimentary deposits at depths that extends into the Project area. The results of the literature review and the search at the NHMLAC indicated that the Project site has surficial sediments composed of younger Quaternary Alluvium, derived as alluvial fan deposits from the San Gabriel Mountains to the north or as dune sands. These deposits typically do not contain significant vertebrate fossils, at least in the uppermost layers, but they may be underlain by older sedimentary materials at estimated depths greater than 9 feet. Therefore, MIG concluded that the proposed Project would not result in a significant impact to paleontological resources or unique geological features, and no mitigation measures are recommended.

While no paleontological resources are anticipated on the Project site, the following City Standard Conditions of Approval would be applied should unanticipated paleontological resources be uncovered during excavation and construction activities:

*5.2: If any archeological or paleontological resources are found during Project grading, excavation, or construction, the area shall not be disturbed until the significance of the resource is determined. If determined to be significant, the resource shall be recovered by*

*a qualified archeologist or paleontologist consistent with current standards and guidelines, or other appropriate measures implemented.*

Mitigation: No additional mitigation is required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

8. GREENHOUSE GAS EMISSIONS. Would the project:

a. Generate greenhouse gas emissions, either directly or indirectly, that may have a significant impact on the environment?

Discussion of Effects: The impact of buildout of The Ontario Plan on the environment due to the emission of greenhouse gases ("GHGs") was analyzed in the Environmental Impact Report ("EIR") for the Policy Plan (General Plan). According to the EIR, this impact would be significant and unavoidable. (Re-circulated Portions of the Ontario Plan Draft Environmental Impact Report, p. 2-118.) This EIR was certified by the City on January 27, 2010, at which time a statement of overriding considerations was also adopted for The Ontario Plan's significant and unavoidable impacts, including that concerning the emission of greenhouse gases.

The Project applicant has prepared a Greenhouse Gas Reduction Measures Screening Threshold Table for Commercial and Industrial Development, which identifies the GHG reduction measures that have been incorporated into the Project. As noted in the instructions for completing the table, the Screening Table assigns points for each option incorporated into a project as mitigation or a project design feature. The point values correspond to the minimum emissions reduction expected from each feature. The menu of features allows maximum flexibility and options for how development projects can implement the GHG reduction measures. The point levels are based upon improvements compared to 2008 emission levels of efficiency. Projects that garner at least 100 points will be consistent with the reduction quantities anticipated in the City's CAP. As such, those projects that garner a total of 100 points or greater would not require quantification of project specific GHG emissions. Consistent with CEQA Guidelines, such projects would be determined to have a less than significant individual and cumulative impact for GHG emissions

As shown in the Project GHG Reduction Measures Screening Table, the Project garners a total of 103 points, and is therefore consistent with the reduction quantities anticipated in the City's CAP. Therefore, quantification of Project-specific GHG emissions is not required and the Project GHG impact is considered less than significant. No changes or additions to TOP FEIR analysis are necessary.

Mitigation Required: No new mitigation measures are required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

b. Conflict with an applicable plan, policy or regulation adopted for the purpose of reducing the emissions of greenhouse gases?

Discussion of Effects: The proposed project is consistent with The Ontario Plan Goal ER 4 of improving air quality by, among other things, implementation of Policy ER4-3, regarding the reduction of greenhouse gas emissions in accordance with regional, state and federal regulations. In addition, the proposed project is consistent with the policies outlined in Section 5.6.4 of the Environmental Impact Report for The Ontario Plan, which aims to reduce the City's contribution of greenhouse gas emissions at build-out by fifteen (15%), because the project is upholding the applicable City's adopted mitigation measures as represented in 6-1 through 6-6. Therefore, the

proposed project does not conflict with an applicable plan, policy or regulation adopted for the purpose of reducing emissions of greenhouse gases.

As described in more detail in Section 8.a (above), the proposed Project includes enough GHG reduction features to be considered consistent with the reduction quantities anticipated in the City's Climate Action Plan. Construction and operation of the proposed Project would not result in a significant conflict with an applicable plan, policy or regulation developed to reduce GHG emissions

Mitigation Required: No additional mitigation is required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

9. HAZARDS & HAZARDOUS MATERIALS. Would the project:

a. Create a significant hazard to the public or the environment through the routine transport, use or disposal of hazardous materials?

Discussion of Effects: Construction of the proposed Project would likely involve the use and disposal of chemical agents, solvents, paints, and other hazardous materials associated with construction activities. The amount of these chemicals typically present during construction would be limited, would be in compliance with existing government regulations, and would not be considered a significant hazard.

It is possible that activities associated with operation of the proposed Project would involve transport, use or disposal of hazardous materials. As described in TOP FEIR, current federal and state regulations, City ordinances, and TOP policies would regulate the handling of hazardous substances to reduce potential releases; exposure; and risks of transporting, storing, treating, and disposing of hazardous materials and wastes. Hazardous waste transport, use, and/or disposal that would occur would be less than significant with adherence to the existing regulations.

Mitigation: No additional mitigation is required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

b. Create a significant hazard to the public or the environment through reasonably foreseeable upset and accident conditions involving the release of hazardous materials into the environment?

Discussion of Effects: Operation of the proposed Project may involve the transport, storage, use or disposal of hazardous materials. With existing federal, State and local regulation and oversight of hazardous materials, the risk to the public or the environment from upset and accident conditions involving the release of hazardous materials would be a less than significant.

Mitigation: No additional mitigation is required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

c. Emit hazardous emissions or handle hazardous or acutely hazardous materials, substances or waste within one-quarter mile of an existing or proposed school?

Discussion of Effects: The proposed Project is a warehouse facility, and is not anticipated to generate or emit hazardous emissions or materials as part of its regular operations. It is possible that the facility could store hazardous materials. However, as described in TOP FEIR, current federal

and state regulations, City ordinances, and TOP policies would regulate the handling of hazardous substances to reduce potential releases; exposure; and risks of transporting, storing, treating, and disposing of hazardous materials and wastes. Any hazardous waste transport, use, and/or disposal that would occur with operation of the Project would be less than significant with adherence to the existing regulations.

Mitigation: No additional mitigation is required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

d. Be located on a site which is included on a list of hazardous materials sites compiled pursuant to Government Code Section 65962.5 and, as a result, would it create a significant hazard to the public or the environment?

Discussion of Effects: The proposed project site is not listed on the hazardous materials site compiled pursuant to Government Code Section 65962.5. Therefore, the project would not create a hazard to the public or the environment and no impact is anticipated.

Mitigation: No additional mitigation is required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

e. For a project located within the safety zone of the airport land use compatibility plan for ONT or Chino Airports, would the project result in a safety hazard for people residing or working in the project area?

Discussion of Effects: The proposed Project was reviewed and found to be located within the Airport Influence Area of Ontario International Airport (ONT). An airport influence area includes areas in which current or future airport-related safety, noise, airspace protection, or overflight factors may significantly affect land uses or necessitate restrictions on those uses. The entirety of the City of Ontario is within the ONT influence area. The Project site is located within the ONT airport influence area but outside the airport safety zones. The Project site lies outside the boundaries of the Chino Airport Influence Area.

The Project was evaluated and found to be consistent with the policies and criteria of the Airport Land Use Compatibility Plan (ALUCP) for ONT. The Project is required to file and record an Avigation Easement with the Ontario International Airport Authority prior to obtaining a Certificate of Occupancy. Any potential impact would be considered less than significant.

Mitigation: No additional mitigation is required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

f. For a project within the vicinity of a private airstrip, would the project result in a safety hazard for people residing or working in the project area?

Discussion of Effects: The project site is not located within the vicinity of a private airstrip. Therefore, no impacts are anticipated.

Mitigation: None required.

g. Impair implementation of or physically interfere with an adopted emergency response plan or emergency evacuation plan?

Discussion of Effects: The proposed Project does not include any changes to surrounding

roadways. The City's Safety Element, as included within TOP, includes policies and procedures to be administered in the event of a disaster. TOP seeks interdepartmental and inter-jurisdictional coordination and collaboration to be prepared for, respond to, and recover from every day and disaster emergencies. In addition, the proposed Project would comply with the requirements of the Ontario Fire Department and all City requirements for fire and other emergency access. Because the Project will comply with all applicable City codes, any impacts would be reduced to a less than significant level.

Mitigation: No additional mitigation is required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

h. Expose people or structures to a significant risk of loss, injury or death involving wildland fires, including where wildlands are adjacent to urbanized areas or where residences are intermixed with wildlands?

Discussion of Effects: The Project site is located within an urban industrial area and does not include any changes to roadways. Additionally, according to CalFire mapping, the Project site is not located in or near a State Responsibility Area (SRA), nor is it located in or near lands identified as a Fire Hazard Severity Zone (FHSZ). The closest FHSZ is approximately three miles from the Project site. Therefore, no impacts are anticipated.

Mitigation: No additional mitigation is required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR; no significant wildland fire impact would occur.

10. HYDROLOGY & WATER QUALITY. Would the project:

a. Violate any other water quality standards or waste discharge requirements or potential for discharge of storm water pollutants from areas of material storage, vehicle or equipment fueling, vehicle or equipment maintenance (including washing), waste handling, hazardous materials handling or storage, delivery areas or loading docks, or other outdoor work areas?

Discussion of Effects: The project site is served by City water and sewer service and will not affect water quality standards or waste discharge requirements. Discharge of storm water pollutants from areas of materials storage, vehicle or equipment fueling, vehicle or equipment maintenance (including washing, waste handling, hazardous materials handling or storage, delivery areas or loading docks, or other outdoor work) areas could result in a temporary increase in the amount of suspended solids, trash and debris, oil and grease, organic compounds, pesticides, nutrients, heavy metals and bacteria pathogens in surface flows during a concurrent storm event, thus resulting in surface water quality impacts. The site is required to comply with the statewide National Pollutant Discharge Elimination System (NPDES) General Industrial Activities Stormwater Permit, the San Bernardino County Area-Wide Urban Runoff Permit (MS4 permit) and the City of Ontario's Municipal Code (Title 6, Chapter 6 (Stormwater Drainage System)). This would reduce any impacts to below a level of significance.

Additionally, the Project applicant would be required to submit a Water Quality Management Plan (WQMP), which would establish the site's compliance with storm water discharge and water quality management requirements. The WQMP will include site design measures that capture runoff and pollutant transport by minimizing impervious surfaces and maximizes low impact development (LID) best management practices (BMPs), such as retention and infiltration, biotreatment and evapotranspiration. Furthermore, prior to Grading Plan approval and the issuance of a grading permit, an Erosion and Sediment Control Plan must be approved by the Engineering Department. The Erosion and Sediment Control Plan will specifically identify the Best Management Practices (BMPs) that will be implemented on the Project during construction, to

reduce the discharge of sediment and other pollutants into the City's storm drain system. Adherence to federal and state regulations, City ordinances, and TOP policies would result in a less-than-significant impact.

Mitigation: No additional mitigation is required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

b. Substantially deplete groundwater supplies or interfere substantially with groundwater recharge such that there would be a net deficit in aquifer volume or a lowering of the local groundwater table level (e.g., the production rate of pre-existing nearby wells would drop to a level which would not support existing land uses or planned uses for which permits have been granted)?

Discussion of Effects: No increases in the current amount of water flow to the project site are anticipated, and the proposed project will not deplete groundwater supplies, nor will it interfere with recharge. The water use associated with the proposed use of the property will be negligible. The development of the site will require the grading of the site and excavation is expected to be less than three feet and would not affect the existing aquifer, estimated to be about 230 to 250 feet below the ground surface.

As described in the City's Urban Water Management Plan, the Chino Basin is the City's main source of water supply. Chino Basin encompasses about 235 square miles of the upper Santa Ana River watershed and lies within portions of San Bernardino, Riverside, and Los Angeles counties. The Chino Basin has approximately 5 to 7 million acre feet of water in storage, and an estimated 1 million acre-feet of additional unused storage capacity.

TOP FEIR assumed development on the Project site would be an industrial use. The proposed Project includes warehouse uses, which would generally have a lower water demand than Office/Research & Development (Office/R&D), which was the prior zoning of the Project site. Therefore, this would result in a decrease in demand on groundwater supplies compared to what was evaluated within the TOP FEIR.

While construction of the proposed Project would result in an increase in impervious surfaces, which would decrease the amount of groundwater recharge that occurs on the Project site, given the total size of the Chino Basin, this decrease in pervious surface would not be considered to interfere substantially with groundwater recharge. This potential impact would be considered less than significant.

Mitigation: No additional mitigation is required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

c. Substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river, in a manner which would result in substantial erosion or siltation on- or off-site or volume of storm water runoff to cause environmental harm or potential for significant increases in erosion of the project site or surrounding areas?

Discussion of Effects: The Project site is currently undeveloped, and construction of the proposed Project would change the existing drainage pattern of the Project site. However, the Project applicant would be required to submit an Erosion and Sediment Control Plan which would be approved by the Engineering Department. The Erosion and Sediment Control Plan would specifically identify the Best Management Practices (BMPs) that would be implemented on the Project site during construction to reduce the discharge of sediment and other pollutants into the City's storm drain system. Furthermore, stormwater generated by the Project would be discharged

in compliance with the statewide NPDES Permit and San Bernardino County MS4 permit requirements. Implementation of a Storm Water Pollution Prevention Plan (SWPPP), the BMPs included in the SWPPP, and an Erosion and Sediment Control Plan would reduce any impacts to below a level of significance. No streams or streambeds are present on the site.

Mitigation: No additional mitigation is required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

d. Substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river, or substantially increase the rate or amount of surface runoff in a manner that would result in flooding on- or off-site or potential for significant changes in the flow velocity or volume of storm water runoff to cause environmental harm?

Discussion of Effects: For Building A, runoff from the east portion of the site, along with the northerly landscaped area, would be conveyed through storm drain Line A. Runoff from the west half of the site along with the parking lot to the south of the building would be conveyed through storm drain Line B. These storm drain lines would discharge into an underground infiltration chamber system located in the central portion of the site. The underground infiltration system would be sized to capture and retain the required water quality design capture volume, as well as mitigate discharge to existing conditions for the project site. The system would have a footprint of approximately 54-feet by 160-feet and consist of 60-inch diameter perforated corrugated metal pipes surrounded by gravel. The excess flow generated from higher storm events would be designed to back up in proposed Line A, which would convey and then discharge to the existing private storm drain line in Toyota Way.

For Building B, runoff from the area to the north of the building would be conveyed through storm drain Line C. Runoff from the area to the south of the site would be conveyed through storm drain Line D. The proposed storm drain lines would discharge into an underground infiltration chamber system located in the southwest portion of the site. The underground infiltration system would be sized to capture and retain the required water quality design capture volume. The system would have a footprint of approximately 24-feet by 105-feet and consist of 60-inch diameter perforated corrugated metal pipes surrounded by gravel. The excess flow generated from higher storm events would be designed to back up in proposed Line D and release in Line E, which would convey and then discharge to the existing private storm drain line in Toyota Way. On- or off-site flooding impacts would be considered less than significant.

Mitigation: No additional mitigation is required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

e. Create or contribute runoff water which would exceed the capacity of existing or planned storm water drainage systems or provide substantial additional sources of polluted runoff (a&b) during construction and/or post-construction activity?

Discussion of Effects: Please see Section 10.b.ii for a discussion of on-site storm drainage facilities. The proposed Project's underground infiltration system would be sized to capture and retain the required water quality design capture volume as well as mitigate discharge to existing conditions for the Project site.

Mitigation: No additional mitigation is required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

f. Otherwise substantially degrade water quality or potential for discharge of storm water to

affect the beneficial uses of receiving water?

Discussion of Effects: Activities associated with the construction period, could result in a temporary increase in the amount of suspended solids in surface flows during a concurrent storm event, thus resulting in surface water quality impacts. The site is required to comply with the statewide NPDES General Construction Permit and the City of Ontario's Municipal Code (Title 6, Chapter 6 (Stormwater Drainage System)) to minimize water pollution. Thus it is anticipated that there is no potential for discharges of stormwater during construction that will affect the beneficial uses of the receiving waters. However, with the General Construction Permit requirement and implementation of the policies in The Ontario Plan, any impacts associated with the project would be less than significant.

Mitigation: No additional mitigation is required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

g. Place housing within a 100-year flood hazard area as mapped on a federal Flood Hazard Boundary or Flood Insurance Rate Map or other flood hazard delineation map?

Discussion of Effects: The project site is not located within a 100-year flood hazard area as mapped on a Federal Flood Hazard Boundary or Flood Insurance Rate Map or other flood hazard delineation map. Therefore, no impacts are anticipated.

Mitigation: No additional mitigation is required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

h. Place within a 100-year flood hazard area, structures that would impede or redirect flood flows?

Discussion of Effects: As identified in the Safety Element (Exhibit S-2) of the Policy Plan (General Plan), the site lies outside of the 100-year flood hazard area. Therefore, no adverse impacts are anticipated.

Mitigation: No additional mitigation is required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

i. Expose people or structures to a significant risk of loss, injury or death involving flooding, including flooding as a result of the failure of a levee or dam?

Discussion of Effects: As identified in the Safety Element (Exhibit S-2) of The Ontario Plan, the site lies outside of the 100-year flood hazard area. No levees or dams are located near the project site. Therefore, no adverse impacts are anticipated.

Mitigation: No additional mitigation is required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

j. Expose people or structures to inundation by seiche, tsunami or mudflow?

Discussion of Effects: Impacts associated with flooding are primarily related to the construction or placement of structures in areas prone to flooding including within an unprotected 100-year flood zone, and in areas susceptible to high tides, tsunamis, seiches, mudflows or sea level rise. According to FEMA mapping, the Project site is not located in a known floodplain. No

wetlands have been mapped on the Project site according to the NWI. The Project site is located over 60 miles east of the Pacific Ocean and is not located in a mapped tsunami zone. Additionally, the Project site is not next to a large body of water. Therefore, the Project would not have a significant risk of flood hazard, tsunami, seiche zones.

Mitigation: No additional mitigation is required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

11. LAND USE & PLANNING. Would the project:

a. Physically divide an established community?

Discussion of Effects: The physical division of an established community typically refers to the construction of a physical feature (such as an interstate highway or railroad tracks) or removal of a means of access (such as a local road or bridge) that would impair mobility within an existing community or between a community and outlying area. The Project site is located in an area that is currently developed with urban land uses. This Project would be of similar design and size to surrounding development, and would not change any public roadways. The proposed Project would not physically divide an established community.

Mitigation: No additional mitigation is required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

b. Conflict with applicable land use plan, policy or regulation of agencies with jurisdiction over the project (including, but not limited to general plan, airport land use compatibility plan, specific plan, or development code) adopted for the purpose of avoiding or mitigation an environmental effect?

Discussion of Effects: The proposed project is consistent with The Ontario Plan and does not interfere with any policies for environmental protection. As such, no impacts are anticipated.

Mitigation: No additional mitigation is required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

c. Conflict with any applicable habitat conservation plan or natural community conservation plan?

Discussion of Effects: There are no adopted habitat conservation plans in the project area. As such no conflicts or impacts are anticipated.

Mitigation: None required.

12. MINERAL RESOURCES. Would the project:

a. Result in the loss of availability of a known mineral resource that would be of value to the region and the residents of the state?

Discussion of Effects: As shown in Figure 5.11-1 of TOP FEIR, the Project site is located within an area identified as Mineral Resource Zone 3 (MRZ-3). As described in TOP FEIR, a designation of MRZ-3 indicates the significance of mineral deposits cannot be determined from available data.

The Project site is located within a mostly developed area surrounded by urban land uses

and, as noted in TOP FEIR, development in a MRZ-3 would not result in significant impacts as mineral resources of statewide or local importance are not identified in the California Geological Survey PC maps. Therefore, this potential impact would be considered less than significant.

Mitigation: No additional mitigation is required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

b. Result in the loss of availability of a locally important mineral resource recovery site delineated on a local general plan, specific plan or other land use plan?

Discussion of Effects: The Project site is not identified as a locally important mineral resource recovery site on a local general plan, specific plan, or other land use plan, and there are no known mineral resources on the Project site. No mineral resource impacts would occur.

Mitigation: No additional mitigation is required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

13. NOISE. Would the project result in:

a. Exposure of persons to or generation of noise levels in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies?

Discussion of Effects: Construction Noise. As described in TOP FEIR, there are two types of short-term noise impacts could occur during construction. First, the transport of workers and movement of materials to and from the site could incrementally increase noise levels along local access roads. However, the amount of construction traffic is typically small in relation to the total daily traffic volumes on those roadway segments.

The second type of short-term noise impact is related to demolition, site preparation, grading, and/or physical construction. Construction is performed in distinct steps, each of which has its own mix of equipment, and, consequently, its own noise characteristics. However, despite the variety in the type and size of construction equipment, similarities in the dominant noise sources and patterns of operation allow construction-related noise ranges to be categorized by work phase.

Construction of individual developments associated with buildout of TOP Land Use Plan would temporally increase the ambient noise environment. However, the City of Ontario restricts the hours of construction activities to the least noise-sensitive portions of the day. According to the Municipal Code, construction activities are restricted to the weekday hours of 7:00 AM to 6:00 PM and 9:00 AM to 6:00 PM on Saturday and Sunday. However, construction activities may occur outside of these hours if the City determines that the maintenance, repair, or improvement is necessary to maintain public services or cannot feasibly be conducted during normal business hours, or if construction activities comply with the stationary source noise standards of the Municipal Code (see Table 5.12-4 of TOP FEIR). Because construction activities associated with any individual development may occur near noise-sensitive receptors and noise disturbances may occur for prolonged periods of time, construction noise impacts from buildout of the Land Use Plan are considered significant.

The Project site is identified as industrial use in TOP Land Use Plan. The industrial land use designation is generally not considered a noise sensitive land use. The Project is located in an industrial area and there are no noise-sensitive receptors in the immediate vicinity that may be disturbed by construction of the proposed Project. In addition, the following mitigation measure from TOP FEIR would be applicable:

*Mitigation Measures 12-4: Construction activities associated with new development that occurs near sensitive receptors shall be evaluated for potential noise impacts. Mitigation measures such as installation of temporary sound barriers for adjacent construction activities that occur adjacent to occupied noise-sensitive structures, equipping construction equipment with mufflers, and reducing nonessential idling of construction equipment to no more than five minutes shall be incorporated into the construction operations to reduce construction-related noise to the extent feasible.*

Operational Noise. As described in TOP FEIR, the northeastern portion of the City of Ontario is characterized by industrial warehousing operations. In addition to on-site mechanical equipment, warehousing and industrial land uses generate substantial truck traffic that results in additional sources of noise on local roadways in the vicinity of industrial operations.

The City of Ontario regulates noise sources within the City through the City's Municipal Code (Title 5, Chapter 29, Noise). The City of Ontario Municipal Code has established noise standards for stationary source noise levels, as shown in Table 5.12-4 of TOP FEIR, *City of Ontario Maximum Permissible Exterior Noise Levels*, at various categories of land uses in the City. The City applies the Noise Control Ordinance standards to non-transportation noise sources. These standards do not gauge the compatibility of developments in the noise environment, but provide restrictions on the amount and duration of noise generated at a property, as measured at the property line of the noise receptor.

Industrial noise is less intermittent and can have moderate to high levels on a continual basis. TOP proposes 159,998,711 square feet of industrial land uses at buildout. As shown in Figure 3-6 for TOP FEIR, proposed industrial areas are centered around the Ontario International Airport (ONT) and Chino Airport. In general, new industrial areas would be buffered by business park uses or located around existing major noise sources that would mask most industrial noise (e.g., freeways, Chino Airport, ONT). The siting of new industrial developments may increase noise levels to nearby uses. This can be due to the continual presence of heavy trucks used for the pick-up and delivery of goods and supplies, or from the use of noisy equipment used in the manufacturing or machining process. While vehicle noise on public roadways is exempt from local regulation, for the purposes of the planning process, it may be regulated as a stationary-source noise while operating on private property. To regulate stationary-source noise created by industrial machinery and tools from affecting sensitive land uses, the City of Ontario requires industrial operations to limit noise to no greater than the maximum allowable noise levels as described in the Noise Ordinance.

As shown in TOP FEIR Figure 5.12-6, future noise levels from surface transportation are expected to be between 65 and 75 dBA CNEL, depending on the location within the Project site. Part of the Project site would be expected to experience a 3 to 4 dBA CNEL increase associated with buildout of TOP land use plan.

The proposed Project would be required to comply with the City's Noise Ordinance (Title 5, Chapter 29, Noise). Compliance with the noise ordinance would result in noise levels that are acceptable to the City and would result less than significant noise impacts from stationary sources.

Mitigation: No additional mitigation required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

b. Exposure of persons to or generation of excessive groundborne vibration or groundborne noise levels?

Discussion of Effects: The Proposed Project would involve a warehouse use, and excessive

groundborne vibration or groundborne noise levels are not anticipated with operation of the Project.

Groundborne vibration may occur as part of the construction of the proposed Project. As described in TOP FEIR, construction operations can generate varying degrees of ground vibration, depending on the construction procedures and equipment. Operation of construction equipment generates vibrations that spread through the ground and diminish with distance from the source. The effect on buildings in the vicinity of the construction site varies depending on soil type, ground strata, and receptor-building construction. The results from vibration can range from no perceptible effects at the lowest vibration levels, to low rumbling sounds and perceptible vibrations at moderate levels, and slight structural damage at the highest levels.

The Project site is located within an industrial area, and there are no noise-sensitive receptors in the immediate vicinity. As specific construction equipment use is not known at this time, the following mitigation measure included in TOP FEIR would be applicable to the Project site, and reduce the potential impact to a less-than-significant level:

> *Mitigation Measures 12-2: Individual projects that involve vibration-intensive construction activities, such as pile drivers, jack hammers, and vibratory rollers, occurring near sensitive receptors shall be evaluated for potential vibration impacts. If construction-related vibration is determined to be perceptible at vibration-sensitive uses (i.e., exceed the Federal Transit Administration vibration-annoyance criteria of 78 VdB during the daytime), additional requirements, such as use of less vibration intensive equipment or construction techniques, shall be implemented during construction (e.g., drilled piles to eliminate use of vibration-intensive pile driver).*

Mitigation: No additional mitigation is required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

c. A substantial permanent increase in ambient noise levels in the project vicinity above levels existing without the project?

Discussion of Effects: The project will not be a significant noise generator and will not cause a substantial permanent increase in ambient noise levels because of the limited size and scope of the project. Moreover, the proposed use will be required to operate within the noise levels permitted for commercial development, pursuant to City of Ontario Development Code. Therefore, no increases in noise levels within the vicinity of the project are anticipated.

Mitigation: No additional mitigation is required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

d. A substantial temporary or periodic increase in ambient noise levels in the project vicinity above levels existing without the project?

Discussion of Effects: Temporary construction activities will minimally impact ambient noise levels. All construction machinery will be maintained according to industry standards to help minimize the impacts. Normal activities associated with the project are unlikely to increase ambient noise levels.

Mitigation: No additional mitigation is required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

e. For a project located within the noise impact zones of the airport land use compatibility plan for ONT and Chino Airports, would the project expose people residing or working in the project area to excessive noise levels?

Discussion of Effects: According to the Safety Element in The Ontario Plan, the proposed site is located within the airport land use plan. However, the project is located outside of the 65CNEL noise contour. Therefore, no impacts are anticipated.

Mitigation: None required.

f. For a project within the vicinity of a private airstrip, would the project expose people residing or working in the project area to excessive noise levels?

Discussion of Effects: The project site is not located within the vicinity of a private airstrip. Therefore, no impacts are anticipated.

Mitigation: No additional mitigation is required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

14. POPULATION & HOUSING. Would the project:

a. Induce substantial population growth in an area, either directly (for example, by proposing new homes and businesses) or indirectly (for example, through extension of road or other infrastructure)?

Discussion of Effects: This proposed Project includes construction of two warehouse buildings and associated site improvements. The Project does not include new housing or a large employment generator, which could directly induce substantial unplanned population growth. Additionally, the proposed Project does not include the expansion of infrastructure, which could indirectly cause unplanned population growth. No population growth impacts are anticipated.

Mitigation: No additional mitigation is required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

b. Displace substantial numbers of existing housing, necessitating the construction of replacement housing elsewhere?

Discussion of Effects: The Project site is currently vacant and does not include any housing units. Construction of the Project would not displace substantial numbers of existing people or housing, necessitating the construction of replacement housing; no impact would occur.

Mitigation: No additional mitigation is required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

c. Displace substantial numbers of people, necessitating the construction of replacement housing elsewhere?

Discussion of Effects: The project site is currently undeveloped. Therefore, no impacts are anticipated.

Mitigation: No additional mitigation is required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and

addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

15. PUBLIC SERVICES. Would the project:

a. Result in substantial adverse physical impacts associated with the provision of new or physically altered governmental facilities, need for new or physically altered governmental facilities, the construction of which could cause significant environmental impacts, in order to maintain acceptable service ratios, response times or other performance objectives for any of the public services:

i. Fire protection?

Discussion of Effects: The Ontario Fire Department provides fire service to the Project site. The Ontario Fire Department has ten fire stations, including the Ontario International Airport (ONT) fire station. These fire stations house nine 4-person paramedic engine companies, three 4-person truck companies, an 8-person ARFF station, one fire investigation supervisor, and two battalion chiefs. The closest fire station to the Project site is Ontario Fire Department Station 7, located at 4901 Vanderbilt Street, which is approximately one mile from the Project site.

In 2020, the Ontario Fire Department responded to over 20,000 calls for service, approximately 55 calls per day, ranging from medical emergencies to a traffic collisions to large commercial fires. Ontario Fire Department has 221 personnel comprised of 182 sworn firefighters and 39 professional staff members serving our community across five bureaus – Operations, Fire Prevention, Support Services/Airport Operations, EMS, and Administrative Services.

As described in TOP FEIR, firefighter staffing needs are determined by the Ontario Fire Department by the number of calls and requests for fire services within the service area. The Fire Department also reviews service contracts with the California Department of Forestry to ensure fire services in times of emergency. To ensure the provision of adequate fire protection services, the City of Ontario has established a Development Impact Fee Program to provide funding for services within the City. Fees collected from developers are placed in a fire services fund that can be expended for the acquisition or construction of new fire services facilities and for the improvement or expansion of the City's existing fire service capabilities, provided that such expenditure from the fund has been authorized by the City Council. The Project applicant would be required to pay all appropriate fire service development fees.

Additionally, as described in detail in TOP FEIR, future growth in accordance with TOP is expected to increase the demand for fire services throughout the city but especially in the New Model Colony (NMC). The Development Impact Fee and Nexus Schedule (2005) recommends that two new stations would be built in the Old Model Colony (OMC) to replace stations number 3 and 7 and that four new stations be built in the NMC. The funding needed to build these stations has been assessed and incorporated into the fee schedule and it would be adequate for the proposed development and relocation of stations. Various localized environmental impacts related to construction of new fire stations could occur; however environmental review would occur once site specific plans have been developed.

Mitigation: No additional mitigation is required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the TOP FEIR. No changes or additions to TOP FEIR analyses are necessary.

ii. Police protection?

Discussion of Effects: The Ontario Police Department is a full-service police agency providing a wide range of crime suppression, education, and prevention services to the community. The Ontario Police Department has three main service bureaus: the Uniform Bureau,

Investigations Bureau, and Service Bureau. Within these bureaus, the department comprises the Police Administration, Air Support Unit, Community Oriented Problem Solving unit, Special Weapons and Tactics Team, Traffic Division, Communications Division, Investigation Division, and Crime Prevention Division.

The Ontario Police Department has implemented a geographical based policing program. As part of this "Geo-Policing" program, the city has been divided into three geographical areas: West, East, and South. Each area has an assigned Lieutenant as Area Commander. The Area Commander is responsible for the delivery of police services in their area of control with an emphasis on the preservation and improvement of the quality of life, safety, and economic value of those who live and do business in the city. Each area has dedicated teams of officers and corporals, headed by police sergeants, who work day-to-day (24/7) patrol operations; traffic officers; Community Oriented Problem Solving (C.O.P.S.) officers, who work special projects; narcotics investigators; and detectives. The Project site is located within the East Area Command.

As described in TOP FEIR, buildout of TOP would result in an increase in demand for police protection services within the City. New facilities, equipment, and personnel may be necessary to maintain adequate levels of service. Development within the City would be subject to development impact fees that would pay for police services. The police services required to cover the new development and population growth for the City of Ontario would be assessed and acquired appropriately based on the needs of the City. The police services would receive adequate funding through the City's general fund to cover Project needs.

Buildout of TOP would result in an impact on the Ontario Police Department and their ability to deliver police services in a timely manner. Buildout of TOP would require the hiring of new staff and the building of new facilities. Environmental impacts would result from the construction of these facilities and each project would have to complete environmental review under CEQA. Various localized environmental impacts related to construction of new police facilities could occur; however environmental review would occur once site specific plans have been developed and potential environmental impacts would be reduced to less than significant through mitigation and compliance with existing regulations.

Mitigation: No additional mitigation is required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

iii. Schools?

Discussion of Effects: The proposed Project does not include residential uses and is not expected to directly increase demand for school services. The proposed Project would be required to pay applicable development impact fees to the Cucamonga School District and the Chaffey Joint Union High School District, which provide school services to the Project site and surrounding area. Currently, the Cucamonga School District collects a development fee of $0.228 per square foot of Industrial/Warehouse/Manufacturing Use. Based on a revenue sharing agreement, the Chaffey Joint Union High School District receives approximately 31 percent of the school impact fee collected. Payment of school impact fees, as allowed by Government Code 65996, are meant to offset increased student enrollment and has been deemed by the State legislature (per Government Code Section 65995(h)) to constitute full and complete mitigation of impacts of a development project on the provision of adequate school facilities. No impacts are anticipated.

Mitigation: No additional mitigation is required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered

and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

iv. Parks?

Discussion of Effects: This proposed Project includes construction of two warehouse buildings and associated site improvements. The Project does not include new housing or a large employment generator that would cause an increase in the use of neighborhood parks or other recreational facilities; this potential impact would be considered less than significant.

Mitigation: No additional mitigation is required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

v. Other public facilities?

Discussion of Effects: This proposed Project includes construction of two warehouse buildings and associated site improvements. The Project does not include new housing or a large employment generator that would cause an increase in the use of public facilities, such as libraries; this potential impact would be considered less than significant.

Mitigation: No additional mitigation is required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

16. RECREATION. Would the project:

a. Increase the use of existing neighborhood and regional parks or other recreational facilities such that substantial physical deterioration of the facility would occur or be accelerated?

Discussion of Effects: This proposed Project includes construction of two warehouse buildings and associated site improvements. The Project does not include new housing or a large employment generator that would cause an increase in the use of neighborhood parks or other recreational facilities; this potential impact would be considered less than significant.

Mitigation: No additional mitigation is required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

b. Does the project include recreational facilities or require the construction or expansion of recreational facilities that have an adverse physical effect on the environment?

Discussion of Effects: The Project does not include construction of recreational facilities. Additionally, the Project is not proposing any new housing or a large employment generator that would require the construction or expansion neighborhood parks or other recreational facilities; this potential impact would be considered less than significant.

Mitigation: No additional mitigation is required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

17. TRANSPORTATION/TRAFFIC. Would the project:

a. Conflict with an applicable plan, ordinance or policy establishing measures of effectiveness for the performance of the circulation system, taking into account all modes of transportation including mass transit and non-motorized travel and relevant components of the circulation system, including but not limited?

Discussion of Effects: The project is in an area that is mostly developed with all street improvements existing. The number of vehicle trips per day is not expected to be increased as a result of this Project. Less than significant impacts are anticipated.

Mitigation: No additional mitigation is required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

b. Conflict with an applicable congestion management program, including, but not limited to, level of service standard and travel demand measures, or other standards established by the county congestion management agency for designated roads or highways?

Discussion of Effects: TOP FEIR concluded that trips generated as a result of buildout TOP Land Use Plan would cause a deficient level of service (LOS) for existing area intersections without implementation of the recommended lane geometry improvements. In addition, buildout of TOP Land Use Plan would also cumulatively contribute to the cumulatively significant freeway level of service impact that is already projected to occur in the future. TOP FEIR Mitigation Measure 16-1 includes development of more enhanced intersections throughout the City, as identified in Table 5.16-6 of TOP FEIR, and construction of additional turn and through lanes. As further described in TOP FEIR, implementation of these improvements would result in LOS E or above at all intersections during both AM and PM peak hours. With implementation of the mitigation measure, impacts to local roadways would be less than significant. However, buildout of TOP Land Use Plan would result in additional traffic volume that would significantly cumulatively contribute to mainline freeway segment impacts. The City's development impact fees cannot be used for improvements to roadway facilities under the sole jurisdiction of the California Department of Transportation (Caltrans), such as freeway mainline segments, and the City cannot widen the freeway itself. Consequently, impacts to freeway segments within the City were identified as significant and unavoidable.

As described in more detail in Section 17.b, below, the proposed Project is forecast to generate fewer trips than the original zoning of the site, which was incorporated in TOP FEIR. The traffic impacts associated with the proposed Project would be considered consistent with and less than the traffic impacts projected and analyzed in TOP FEIR. The proposed Project would not create an increase in the number of vehicle trips, traffic volume, or congestion at intersections than has already been evaluated in TOP FEIR.

As described in TOP FEIR, the Mobility Element would introduce and implement various strategies and approaches to accommodate multiple modes of travel. The plan accounts for improvements and enhancements to roadways (for passenger cars, trucks, buses, and bicycles), rail lines (for freight and passenger rail), and trails and walkways (for bicycles and pedestrians). The strategies and approaches to improvements to public transit and nonmotorized transportation would ensure that this impact would be less than significant. Construction of the proposed Project would not impede implementation of the strategies identified in the Mobility Element, and the impact would be considered less than significant.

Mitigation: No additional mitigation is required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

c. Result in a change in air traffic patterns, including either an increase in traffic levels or a

change in location that results in substantial safety risks?

Discussion of Effects: The project will not create a substantial safety risk or interfere with air traffic patterns at Ontario International Airport as it is under such height restrictions. No impacts are anticipated.

Mitigation: No additional mitigation is required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

d. Conflict or be inconsistent with CEQA Guidelines section 15064.3, subdivision (b)?

Discussion of Effects: CEQA Guidelines Section 15064.3 subdivision (b) has been included in the 2018 CEQA Guidelines update as part of the implementation of SB 743, which requires local jurisdictions use Vehicle Miles Travelled (VMT) instead of Level of Service (LOS) methodologies for the purpose of determining the significance of traffic impacts under CEQA. As part of the implementation of SB 743, local jurisdiction were given until July 1, 2020 to develop and implement thresholds of significance criteria and methodologies for evaluating VMT under the new SB 743 requirements. TOP FEIR was certified prior to adoption of SB 743. As such, the analysis of traffic impacts within TOP FEIR is based on Level of Service (LOS) methodologies, not Vehicle Miles Travelled (VMT). As TOP FEIR relies on LOS for the analysis of the transportation impacts, this Addendum also includes a discussion of LOS.

TOP FEIR concluded that trips generated as a result of buildout of TOP Land Use Plan would cause a deficient LOS for the existing area intersections without implementation of the recommended lane geometry improvements. In addition, buildout of TOP Land Use Plan would also cumulatively contribute to the cumulatively significant freeway level of service impact that were projected to occur in the future. TOP FEIR Mitigation Measure 16-1 includes development of more enhanced intersections throughout the City, as identified in Table 5.16-6 of the TOP FEIR, and construction of additional turn and through lanes. As further described in TOP FEIR, implementation of these improvements would result in LOS E or above at all intersections during both AM and PM peak hours. Under the City's development impact fee program, project applicants for new developments can either contribute their fair share toward traffic improvements or make the improvements as part of the project. Additionally, the City of Ontario has a Capital Improvement Program that details the implementation of regional improvements. With implementation of the mitigation measure, impacts to local roadways would be less than significant. However, buildout of TOP Land Use Plan would result in additional traffic volume that would significantly cumulatively contribute to mainline freeway segment impacts. The City's development impact fees cannot be used for improvements to roadway facilities under Caltrans' sole jurisdiction, such as freeway mainline segments, and the City cannot widen the freeway itself. Consequently, impacts to freeway segments within the City were identified as significant and unavoidable.

TOP FEIR analysis assumed that the Project site would have an Industrial land use. The Toyota/Ontario Business Park Specific Plan identified the site as having a maximum development potential of 300,000 square feet. The Specific Plan Amendment to the Toyota/Ontario Business Park Specific Plan adopted by the City Council in 2020 changed the zoning of the site from Office/Research & Development (Office/R&D) to Industrial Mixed Use. The proposed Project includes development of two warehouse buildings totaling 168,772 square feet, which includes approximately 15,000 square feet of office space and approximately 153,772 square feet of warehouse space.

To evaluate the potential change in trips associated with the Specific Plan Amendment for the Project site, Ganddini evaluated the trip generation associated with the original Office/Research and Development zoning designation, as well as the development for the Specific Plan Amendment. It should be noted that for the Specific Plan Amendment development

analysis, the Ganddini Group evaluated a development scenario that was slightly larger (approximately 4,475 square feet) than what the Project proposes. As shown in Table 5, the Proposed Project would result in a reduction in the number of trips generated on the Project site compared to the prior zoning designation.

**Table 5: Trip Generation Comparison**

| Zoning | Quantity | Trip Generation | | | | | | |
|---|---|---|---|---|---|---|---|---|
| | | AM Peak Hour | | | PM Peak Hour | | | Daily |
| | | In | Out | Total | In | Out | Total | |
| Original Zoning (Office) | 300,000 SF | 299 | 49 | 348 | 55 | 290 | 345 | 2,922 |
| Proposed (Warehouse) | 173,247 SF[A] | 35 | 14 | 49 | 16 | 36 | 52 | 394 |
| **Trip Generation Comparison (Proposed – Original)** | | **-264** | **-35** | **-299** | **-39** | **-254** | **-293** | **-2,528** |

Source: Ganddini Group Inc, 2019.
[A] While the proposed Project includes 168,772 square feet of floor area, the Ganddini report analyzed impacts from 173,247 square feet of floor area.

The proposed Project is forecast to generate fewer trips than the original zoning of the site. The traffic impacts associated with the proposed Project would be considered consistent with and less than the traffic impacts projected and analyzed with TOP FEIR. The proposed Project would not create a substantial increase in the number of vehicle trips, traffic volume or congestion at intersections than has already been evaluated within the FEIR.

Mitigation: No additional mitigation is required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

e. Substantially increase hazards due to a design feature (e.g., sharp curves or dangerous intersections) or incompatible uses (e.g., farm equipment)?

Discussion of Effects: The Project is in an area that is mostly developed, and no alterations are proposed for adjacent intersections or arterials. The Project would not create a substantial increase in hazards due to a design feature; this potential impact would be considered less than significant.

Mitigation: No additional mitigation is required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

f. Result in inadequate emergency access?

Discussion of Effects: The proposed Project would not include any changes to adjacent roadways. Additionally, development of the proposed Project includes fire lanes and would provide access for all emergency vehicles. The proposed Project would not result in a significant impact related to inadequate emergency access.

Mitigation: No additional mitigation is required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

g. Result in inadequate parking capacity?

Discussion of Effects: The project is required to meet parking standards established by the Ontario Development Code and will therefore not create an inadequate parking capacity. No impacts are anticipated.

Mitigation: No additional mitigation is required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

h. Conflict with adopted policies, plans, or programs supporting alternative transportation (e.g., bus turnouts, bicycle racks)?

Discussion of Effects: The project does not conflict with any transportation policies, plans or programs. Therefore, no impacts are anticipated.

Mitigation: None required.

18. TRIBAL CULTURAL RESOURCES. Would the project cause a substantial adverse change in the significance of a tribal cultural resource, defined in Public Resources Code section 21074 as either a site, feature, place, cultural landscape that is geographically defined in terms of the size and scope of the landscape, sacred place, or object with cultural value to a California Native American tribe, and that is:

a. Listed or eligible for listing in the California Register of Historical Resources, or in a local register of historical resources as defined in Public Resources Code section 5020.1(k)?

   Discussion of Effects: The results of the records research compiled from the CHRIS-SCCIC, the Scared Lands File Search (commissioned through the NAHC) failed to indicate known Tribal Cultural Resources (TCR) within the Project boundaries or within a one-mile radius of the Project area as specified in Public Resources Code (PRC): 210741, 5020.1(k), or 5024. Moreover, there was no indication of known TCRs within the Project site or within a one-mile radius of the Project Area. In compliance with AB 52, it is the responsibility of the Public Agency (e.g. Lead Agency) to consult with Native American tribes early in the CEQA process to allow tribal governments, lead agencies, and project proponents to discuss the appropriate level of environment review, identify and address potential adverse impacts to TCRs, and reduce the potential for delay and conflict in the environmental review process (see PRC Section 2108.3.2). Specifically, government-to-government consultation may provide "tribal knowledge" of the Project Area that can be used in identifying TCRs that cannot be obtained through other investigative means.

   The Project Site has been highly disturbed by modern human activities to include agricultural use from the 1940's through the 1960's and the development and construction of the Toyota Motors North American Parts Center and supporting infrastructure that would have displaced surface and subsurface archaeological resources. Therefore, it is concluded that the proposed Project would not impact Tribal Cultural Resources or Native America artifacts relating to TCR's and as such, no mitigation measures are recommended.

   Mitigation: No new mitigation measures required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

b. A resource determined by the lead agency, in its discretion and supported by substantial evidence, to be significant pursuant to criteria set forth in subdivision (c) of Public Resources Code section 5024.1. In applying the criteria set forth in subdivision (c) of Public Resources Code section 5024.1, the lead agency shall consider the significance of the resource to a California Native American tribe.

Discussion of Effects: The subject site is not listed in the California Register of Historic Resources. It is anticipated that during the application process the Lead Agency will notify the tribes of the proposed Specific Plan Amendment and will commence AB 52 Consultations as specified in the regulations. In addition, the results of the records research compiled from the CHRIS-SCCIC, the Scared Lands File Search (commissioned through the NAHC) failed to indicate known Tribal Cultural Resources (TCR) within the Project boundaries or within a one-mile radius of the Project area as specified in Public Resources Code (PRC): 210741, 5020.1(k), or 5024. Moreover, there was no indication of known TCRs within the Project site or within a one-mile radius of the Project Area. No impacts are anticipated through Project implementation.

Mitigation: No new mitigation measures are required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

19. UTILITIES AND SERVICE SYSTEMS. Would the project:

a. Exceed wastewater treatment requirements of the applicable Regional Water Quality Control Board?

Discussion of Effects: The proposed project is served by the City of Ontario sewer system, which has waste treated by the Inland Empire Utilities Agency at the RP-1 treatment plant. The project is required to meet the requirements of the Ontario Engineering Department regarding wastewater. No impacts are anticipated.

Mitigation: No new mitigation measures are required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

b. Require or result in the construction of new water or wastewater treatment facilities or expansion of existing facilities, the construction of which could cause significant environmental effects?

Discussion of Effects: The proposed project is served by the City of Ontario sewer system and which has waste treated by the Inland Empire Utilities Agency at the RP-1 treatment plant. RP-1 is not at capacity and this project will not cause RP-1 to exceed capacity. The project will therefore not require the construction of new wastewater treatment facilities, or the expansion of existing facilities. No impacts are anticipated.

Mitigation: No new mitigation measures are required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

c. Require or result in the construction of new storm water drainage facilities or expansion of existing facilities, the construction of which could cause significant environmental effects?

Discussion of Effects: As described in TOP FEIR, the potable water network in Ontario includes 536 miles of pipeline, ranging from 2 to 42 inches in diameter. The City has four pressure zones. Locally obtained water comes from approximately 20 operating groundwater wells in Ontario and the Chino Basin Desalter Authority (CDA). The Project Site would be served by City of Ontario water system and there is a 12-inch water line available for connection in Jurupa Street.

TOP FEIR includes a discussion of the City's sewer system. The City sewer mains are primarily constructed of vitrified clay pipe ranging from 4 to 42 inches in diameter. Approximately 75 percent of the pipes are 8 inches in diameter. The City's sewers are classified into two groups: primary sewers, greater than 15 inches in diameter, and secondary sewers, 15 inches or smaller in diameter. The City has about 375 miles of gravity sewers. The City's wastewater collection system also consists of two City-owned pump stations, one privately owned/City-maintained pump station, over 7,000 feet of associated force mains, and five siphons. The Project would connect to an 8-inch sewer line off Jurupa Street.

Wastewater generated at the Project site would be treated by the Inland Empire Utilities Agency at Regional Water Recycling Plant No. 1 (RP-1). RP-1 is located in the City of Ontario and has undergone several expansions to increase the design hydraulic domestic wastewater treatment capacity to 44 million gallons per day. The plant treats an average influent wastewater flow of approximately 28 million gallons per day. The plant serves areas of Chino, Fontana, Montclair, Ontario, Rancho Cucamonga, Upland, and solids removed from RP-4, located in Rancho Cucamonga. RP-1 has treatment capacity and future development of this Project site would not cause RP-1 to exceed capacity.

The City of Ontario maintains the local stormwater drainage system, which includes regional (major) drainage facilities designed to convey peak 100-year discharge flows and secondary drainage facilities designed for peak 10-, 25-, or 100-year flows that convey locally generated flows to regional facilities. The City's stormwater is collected and diverted into various channels that empty into the Santa Ana River; a small portion is reclaimed in spreading basins for reuse as percolated groundwater. The primary direction of drainage flow in the Chino watershed is from the San Gabriel Mountains southward to the Santa Ana River, then southwest in the river.

For Building A, runoff from the east portion of the site, along with the northerly landscaped area, would be conveyed through storm drain Line A. Runoff from the west half of the site along with the parking lot to the south of the building would be conveyed through storm drain Line B. These storm drain lines would discharge into an underground infiltration chamber system located in the central portion of the site. The underground infiltration system would be sized to capture and retain the required water quality design capture volume, as well as mitigate discharge to existing conditions for the Project site. The system would have a footprint of approximately 54-feet by 160-feet and consist of 60-inch diameter perforated corrugated metal pipes surrounded by gravel. The excess flow generated from higher storm events would be designed to back up in proposed Line A, which would convey and then discharge to the existing private storm drain line in Toyota Way.

For Building B, runoff from the north of the building would be conveyed through storm drain Line C. Runoff from the south of the building would be conveyed through storm drain Line D. The proposed storm drain lines would discharge into an underground infiltration chamber system located in the southwest portion of the site. The underground infiltration system would be sized to capture and retain the required water quality design capture volume. The system would have a footprint of approximately 24-feet by 105-feet and consist of 60-inch diameter perforated corrugated metal pipes surrounded by gravel. The excess flow generated from higher storm events would be designed to back up in proposed Line D and release in Line E, which would convey and then discharge to the existing private storm drain line in Toyota Way.

The proposed Project would not require the construction of new water or wastewater treatment facilities, or the expansion of existing facilities. As discussed in the Energy Section above (Section 6), the Project would have less than significant impacts with regard to electric power and natural gas. In addition, the Project would not have an impact on telecommunications facilities. Construction and operation of the proposed Project would result in a less than significant impact related to utilities services.

Mitigation: No new mitigation measures are required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

d. Have sufficient water supplies available to serve the project from existing entitlements and resources, or are new or expanded entitlements needed? In making this determination, the City shall consider whether the project is subject to the water supply assessment requirements of Water Code Section 10910, et seq. (SB 610), and the requirements of Government Code Section 664737 (SB 221).

Discussion of Effects: As a water supplier, the City is required to prepare and Urban Water Management Plan (UWMP). A UWMP provides a framework for long term water supply and evaluates existing water conservation efforts. As described in the City's UWMP, purchased water and groundwater supplies are sufficient in meeting the City's water demands under all base years, including during normal, single, and multiple dry years. Sufficient water supplies are available to serve the proposed Project.

Mitigation: No additional mitigation required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

e. Result in a determination by the wastewater treatment provider that serves or may serve the project that it has adequate capacity to serve the project's projected demand in addition to the provider's existing commitments?

Discussion of Effects: Wastewater generated at the Project site would be treated by the Inland Empire Utilities Agency at the Regional Water Recycling Plant No. 1 (RP-1). RP-1 is located in the City of Ontario and has undergone several expansions to increase the design hydraulic domestic wastewater treatment capacity to 44 million gallons per day. The plant treats an average influent wastewater flow of approximately 28 million gallons per day. The plant serves areas of Chino, Fontana, Montclair, Ontario, Rancho Cucamonga, Upland, and solids removed from the Regional Water Recycling Plant No. 4 (RP-4), located in Rancho Cucamonga. RP-1 has treatment capacity, and future development of this Project site would not cause RP-1 to exceed capacity.

Mitigation: No additional mitigation required. The proposed Project will not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analyses are necessary.

f. Be served by a landfill with sufficient permitted capacity to accommodate the project's solid waste disposal needs?

Discussion of Effects: City of Ontario serves the proposed project. Currently, the City of Ontario contracts with a waste disposal company that transports trash to a landfill with sufficient capacity to handle the City's solid waste disposal needs. No impacts are anticipated.

Mitigation: None required.

g. Generate solid waste in excess of state or local standards, or in excess of the capacity of local infrastructure, or otherwise impair the attainment of solid waste reduction goals?

Discussion of Effects: As described in TOP FEIR, increases in population in the City of Ontario would result in increases in solid waste disposal needs. Buildout of TOP would result in the generation of 2,017 tons per day of solid waste in the City. This would be 1,009 more tons per day

(368,488 more tons per year) of solid waste than in 2007. To reduce waste disposal, AB 939 requires every California city and county to divert 50 percent of its waste from landfills by the year 2000. The City of Ontario has met this waste diversion requirement through local recycling programs and participation in regional recycling programs.

As noted in TOP FEIR, the El Sobrante landfill has a capacity of 184,930,000 tons and is expected to close in 2030. Growth in the surrounding communities that use El Sobrante landfill will cause additional increases in waste generation. According to AB 939, jurisdictions are required to begin planning for new landfills when the jurisdiction's primary disposal site reaches its 15-year capacity. To reduce waste disposal, AB 939 also requires every California city and county to divert 50 percent of its waste from landfills by the year 2000. The City of Ontario has exceeded this requirement by diverting approximately 64 percent of waste through local recycling programs and participation in regional recycling programs. Continuation of these recycling programs would ensure compliance with AB 939. All impacts on waste disposal services would be less than significant.

Mitigation: No additional mitigation is required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

h. Comply with federal, state, and local statutes and regulations related to solid waste?

Discussion of Effects: The proposed Project would comply with all with federal, state, and local statues and regulations regarding solid waste; potential impacts would be considered less than significant.

Mitigation: No additional mitigation is required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

20. WILDFIRE. If located in or near state responsibility areas or lands classified as very high fire hazard severity zones, would the project:

a. Substantially impair an adopted emergency response plan or emergency evacuation plan?

Discussion of Effects: Wildfire was not analyzed in TOP FEIR but has since been included as part of the 2019 revisions to the State CEQA Guidelines. A discussion of potential wildfire impacts is provided below.

The Project site is located within an urban industrial area and does not include any changes to roadways. Additionally, according to CalFire mapping, the Project site is not located in or near a State Responsibility Area (SRA), nor is it located in or near lands classified as a Fire Hazard Severity Zone (FHSZ). The closest FHSZ is approximately three miles from the Project site. The proposed Project would not substantially impair and emergency response or evacuation plan.

Mitigation: No new mitigation measures are required. The proposed Project would not result in any new significant impacts. No changes or additions to TOP FEIR analysis are necessary.

b. Due to slope, prevailing winds, and other factors, exacerbate wildfire risks, and thereby expose project occupants to, pollutant concentrations from a wildfire or the uncontrolled spread of a wildfire?

Discussion of Effects: The Project site is not located in or near an SRA nor is it located in or near lands classified as a very high FHSZ. The closest FHSZ is approximately three miles from the Project site. This potential impact would be considered less than significant.

Mitigation: No new mitigation measures are required. The proposed Project would not result in any new significant impacts. No changes or additions to TOP FEIR analysis are necessary.

c. Require the installation or maintenance of associated infrastructure (such as roads, fuel breaks, emergency water sources, power lines or other utilities) that may exacerbate fire risk or that may result in temporary or ongoing impacts to the environment?

Discussion of Effects: The proposed Project would include construction of two warehouse buildings and associated onsite improvements, and would not require the installation of off-site infrastructure, such as roads, fuel breaks, emergency water sources, or other utilities. The Project site is not located in or near an SRA nor is it located in or near lands classified as a very high FHSZ. The closest fire hazard severity zone is approximately three miles from the Project site. This potential impact would be considered less than significant.

Mitigation: No new mitigation measures are required. The proposed Project would not result in any new significant impacts. No changes or additions to TOP FEIR analysis are necessary.

d. Expose people or structures to significant risks, including downslope or downstream flooding or landslides, as a result of runoff, post-fire slope instability, or drainage changes?

Discussion of Effects: The Project site is relatively flat and is located in an urban industrial area. The Project site is not located in or near an SRA nor is it located in or near lands classified as a very high FHSZ. The closest FHSZ is approximately three miles from the Project site. This potential impact would be considered less than significant.

Mitigation: No new mitigation measures are required. The proposed Project would not result in any new significant impacts. No changes or additions to TOP FEIR analysis are necessary.

21. MANDATORY FINDINGS OF SIGNIFICANCE.

a. Does the project have the potential to degrade the quality of the environment, substantially reduce the habitat or a fish or wildlife species, cause a fish or wildlife population to drop below self-sustaining levels, threaten to eliminate a plant or animal community, reduce the number or restrict the range of a rare or endangered plant or animal or eliminate important examples of the major periods of California history or prehistory?

Discussion of Effects: The results of the preceding analysis indicate that the proposed Project would have less-than-significant impacts to sensitive biological, historical, archaeological, and paleontological resources with implementation of the mitigation measures identified in TOP FEIR and the City's Standard Conditions of Approval. Impacts related to degradation of the environment would be less than significant and no additional mitigation is required.

Mitigation: No additional mitigation is required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

b. Does the project have the potential to achieve short-term environmental goals to the disadvantage of long-term environmental goals?

Discussion of Effects: The proposed Project does not have the potential to achieve short-term environmental goals to the disadvantage of long-term environmental goals. TOP land use

plan has anticipated industrial uses on the Project site, and all applicable TOP FEIR mitigation measures and City Standard Conditions of Approval would be applicable.

Mitigation: No additional mitigation is required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

c. Does the project have impacts that are individually limited, but cumulatively considerable? ("Cumulatively considerable" means that the incremental effects of a project are considerable when viewed in connection with the effects of past projects, the effects of other current project, and the effects of probable future projects.)

Discussion of Effects: Cumulative impacts resulting from the development of the Project site were included in TOP FEIR analysis. The proposed Project does not include any changes to land use plan designations and thus is generally consistent with the project analyzed in TOP FEIR. The proposed Project's individual contribution to potentially significant cumulative impacts is not considerable and no mitigation is required.

Mitigation: No additional mitigation is required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analysis are necessary.

d. Does the project have environmental effects that will cause substantial adverse effects on human beings, either directly or indirectly?

Discussion of Effects: As supported by the preceding environmental evaluation, the proposed Project would not result in substantial adverse effects on human beings. It has been determined through analysis within TOP FEIR and this Addendum that the proposed Project would not result in a significant substantial adverse effect on human beings.

Mitigation: No additional mitigation required. The proposed Project would not result in any new, increased or substantially different impacts, other than those previously considered and addressed in the Certified TOP FEIR. No changes or additions to TOP FEIR analyses are necessary.

**EARLIER ANALYSES**

*(Earlier analyses may be used where, pursuant to the tiering, program EIR, or other CEQA process, one or more effects have been adequately analyzed in an earlier EIR or Negative Declaration. Section 15063(c)(3)(D))*:

1) Earlier Analyses Used. Identify earlier analyzes used and state where they are available for review.

a) The Ontario Plan Final Environmental Impact Report

b) The Ontario Plan

c) City of Ontario Zoning

All documents listed above are on file with the City of Ontario Planning Department, 303 East "B" Street, Ontario, California 91764, (909) 395-2036.

2) Impacts Adequately Addressed. Identify which effects from the above checklist were within the scope of, and adequately analyzed in, an earlier document pursuant to applicable legal

standards.

**MITIGATION MEASURES**

*(For effects that are "Less than Significant with Mitigation Incorporated," describe the mitigation measures, which were incorporated or refined from the earlier document and the extent to which they address site-specific conditions for the project.)*

The Mitigation Measures contained in the Certified TOP Final Environmental Impact Report adequately mitigate the impacts of the proposed Project. These mitigation measures are contained in the attached Mitigation Monitoring and Reporting Program.

No additional mitigation beyond that previously imposed is required.

RESOLUTION NO. _____

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF ONTARIO, CALIFORNIA, DENYING THE APPEAL OF THE PLANNING COMMISSION'S DECISION TO APPROVE TENTATIVE PARCEL MAP NO. 20147 (FILE NO. PMTT21-010), SUBDIVIDING 95.35 ACRES OF LAND INTO THREE PARCELS TO FACILITATE THE DEVELOPMENT OF TWO INDUSTRIAL BUILDINGS AND ASSOCIATED SITE IMPROVEMENTS, AND MAKING FINDINGS IN SUPPORT THEREOF—APN: 0238-121-75.

WHEREAS, MIG, INC. (hereinafter referred to as "Applicant") filed an Application for the approval of Tentative Parcel Map No. 20147, File No. PMTT21-010, as described in the title of this Resolution (hereinafter referred to as "Application" or "Project"); and

WHEREAS, the Application applies to 95.35 acres of land generally located at the southeast corner of Jurupa Street and Milliken Avenue, at 1425 South Toyota Way within the Toyota Ontario Business Park Specific Plan, and is presently partially improved with a warehouse and distribution facility; and

WHEREAS, the properties to the north are within the California Commerce Center Specific Plan zoning district and are developed with warehouse and commercial uses. The properties to the south are within the Entratter Industrial Specific Plan and the IG (General Industrial) zoning district and are developed with warehouse uses. The land to the east is the Interstate 15 freeway. The properties to the west are within the California Commerce Center Specific Plan and are developed with light industrial and business park uses; and

WHEREAS, The Applicant is proposing to subdivide the Project site into three parcels. Parcel 1 will be 81.67 acres in size and encompass the area already developed with the Toyota warehouse and distribution facility, Toyota Way (private street), and existing landscaped areas. Parcel 2 is the northwest parcel, occupying the corner of Milliken Avenue and Jurupa Street, and will be 8.24 acres in size. Parcel 3 is located to the south of Parcel 2 and located at the northeast corner of Milliken Avenue and Toyota Way, encompassing 3.79 acres of land. Parcels 2 and 3 comprise the existing vacant land in the northwest portion of the Project site; and

WHEREAS, the lot sizes proposed by Tentative Parcel Map No. 20147 exceed the one-acre minimum lot size required by the Toyota Ontario Business Park Specific Plan; and

WHEREAS, Tentative Parcel Map No. 20147 was filed in conjunction with a Development Plan, File No. PDEV21-018, to construct two industrial warehouse buildings totaling 168,772 square feet on Parcels 2 and 3; and

WHEREAS, the Application is a project pursuant to the California Environmental Quality Act (Public Resources Code Section 21000 et seq.) ("CEQA") and an initial study has been prepared to analyze possible environmental impacts; and

WHEREAS, The Ontario Plan Environmental Impact Report (State Clearinghouse No. 2008101140) was certified on January 27, 2010, (hereinafter referred to as “Certified EIR”), in which development and use of the Project site was discussed; and

WHEREAS, the Planning Director of the City of Ontario prepared and approved for attachment to the certified Environmental Impact Report, an Addendum to the Certified EIR (hereinafter referred to as “EIR Addendum”) in accordance with the requirements of the California Environmental Quality Act of 1970, together with State and local guidelines implementing said Act, all as amended to date (collectively referred to as “CEQA”); and

WHEREAS, the environmental impacts of this project were thoroughly analyzed in the EIR Addendum, which concluded that implementation of the Project could result in a number of significant effects on the environment that were previously analyzed in the Certified EIR, and that the Certified EIR identified mitigation measures that would reduce each of those significant effects to a less-than-significant level; and

WHEREAS, the City's "Local Guidelines for the Implementation of the California Environmental Quality Act (CEQA)" provide for the use of a single environmental assessment in situations where the impacts of subsequent projects are adequately analyzed; and

WHEREAS, the Application is a project pursuant to the California Environmental Quality Act — Public Resources Code Section 21000 et seq. — (hereinafter referred to as "CEQA") and an EIR Addendum has been prepared to determine possible environmental impacts; and

WHEREAS, Ontario Development Code Table 2.02-1 (Review Matrix) grants the Planning Commission the responsibility and authority to review and act on the subject Application; and

WHEREAS, the Project has been reviewed for consistency with the Housing Element of the Policy Plan component of The Ontario Plan, as State Housing Element law (as prescribed in Government Code Sections 65580 through 65589.8) requires that development projects must be consistent with the Housing Element, if upon consideration of all its aspects, it is found to further the purposes, principals, goals, and policies of the Housing Element; and

WHEREAS, the Project is located within the Airport Influence Area of Ontario International Airport, which encompasses lands within parts of San Bernardino, Riverside, and Los Angeles Counties, and is subject to, and must be consistent with, the policies and criteria set forth in the Ontario International Airport Land Use Compatibility Plan (“ALUCP”), which applies only to jurisdictions within San Bernardino County, and addresses the noise, safety, airspace protection, and overflight impacts of current and future airport activity; and

WHEREAS, City of Ontario Development Code Division 2.03 (Public Hearings) prescribes the manner in which public notification shall be provided and hearing procedures to be followed, and all such notifications and procedures have been completed; and

WHEREAS, on December 10, 2021, and December 17, 2021, the Planning Department sent public hearing notices to property owners within 300 feet of the project site via first class mail and to Supporters Alliance for Environmental Responsibility (hereinafter referred to as "Appellant") via email, respectively, informing the recipient of the Project's upcoming public hearing; and

WHEREAS, on December 20, 2021, the Development Advisory Board of the City of Ontario conducted a hearing to consider the Project, and concluded said hearing on that date, voting to issue Decision Nos. DAB21-060, recommending that the Planning Commission approve the Project; and

WHEREAS, on December 20, 2021, the Planning Commission of the City of Ontario conducted a hearing to consider the use of an EIR Addendum and the Project, and concluded said hearing on that date, voting to issue Resolution No. PC21-087, approving the Project; and

WHEREAS, on December 30, 2021, the Appellant submitted an Appeal, through email, of the Planning Commission's decision to approve File No. PMTT21-010; and

WHEREAS, the Ontario Development Code, Division 2.01 (Appeals), Sections 2.01.010.B.1 and B.2, state that an appeal shall include a statement identifying the specific action or decision of the Approving Authority that is being appealed, the specific grounds for the appeal, and the relief requested from the Appeal Authority; and that an appeal of an action shall be limited to those matters raised during the hearing and contained in the appeal statement.

WHEREAS, the City Council is the Appeal Authority for Planning Commission decisions; and

WHEREAS, the basis of the Appellant's appeal is a statement that the Addendum to The Ontario Plan Environmental Impact Report prepared for the Project fails to comply with the California Environmental Quality Act; and

WHEREAS, the Appellant did not provide any facts or reasons to support their assertion that the Project Addendum fails to comply with the California Environmental Quality Act and did not include a relief request from the Appeal Authority; and

WHEREAS, the Appellant failed to raise their concerns during the public hearing or provide written notice of their concerns prior to the public hearing and therefore the City Council cannot consider the appeal statement; and

WHEREAS, City of Ontario Development Code Division 2.03 (Public Hearings) prescribes the manner in which public notification shall be provided and hearing procedures to be followed, and all such notifications and procedures have been completed; and

WHEREAS, on March 15, 2022, the City Council of the City of Ontario conducted a hearing to consider the Appeal, and concluded said hearing on that date; and

WHEREAS, all legal prerequisites to the adoption of this Resolution have occurred.

NOW, THEREFORE, IT IS HEREBY FOUND, DETERMINED, AND RESOLVED by the City Council of the City of Ontario, as follows:

SECTION 1. ***Environmental Determination and Findings.*** As the decision-making body for the Project, the City Council has reviewed and considered the information contained in the Addendum, the initial study, and the administrative record for the Project, including all written and oral evidence provided during the comment period. Based upon the facts and information contained in the Addendum, the initial study, and the administrative record, including all written and oral evidence presented to the City Council, the City Council finds as follows:

(1) The environmental impacts of the Project were reviewed in conjunction with an Addendum to The Ontario Plan Environmental Impact Report (State Clearinghouse No. 2008101140), certified by the Ontario City Council on January 27, 2010, in conjunction with File No. PGPA06-001; and

(2) The EIR Addendum and administrative record have been completed in compliance with CEQA, the State CEQA Guidelines, and the City of Ontario Local CEQA Guidelines; and

(3) The City's "Guidelines for the Implementation of the California Environmental Quality Act (CEQA)" provide for the use of a single environmental assessment in situations where the impacts of subsequent projects are adequately analyzed. This Application introduces no new significant environmental impacts; and

(4) All previously adopted mitigation measures shall be a condition of project approval, as they are applicable to the Project, and are incorporated herein by this reference; and

(5) The EIR Addendum contains a complete and accurate reporting of the environmental impacts associated with the Project, and reflects the independent judgment of the City Council; and

(6) There is no substantial evidence in the administrative record supporting a fair argument that the project may result in significant environmental impacts.

SECTION 2. ***Subsequent or Supplemental Environmental Review Not Required.*** Based on the EIR Addendum, all related information presented to the City Council, and the specific findings set forth in Section 1, above, the City Council finds that the preparation of a subsequent or supplemental Certified EIR is not required for the Project, as the Project:

(1) Does not constitute substantial changes to the Certified EIR that will require major revisions to the Certified EIR due to the involvement of new significant environmental effects or a substantial increase in the severity of previously identified significant effects; and

(2) Does not constitute substantial changes with respect to the circumstances under which the Certified EIR was prepared, that will require major revisions to the Certified EIR due to the involvement of new significant environmental effects or a substantial increase in the severity of the previously identified significant effects; and

(3) Does not contain new information of substantial importance that was not known and could not have been known with the exercise of reasonable diligence at the time the Certified EIR was certified/adopted, that shows any of the following:

(a) The Project will have one or more significant effects not discussed in the Certified EIR; or

(b) Significant effects previously examined will be substantially more severe than shown in the Certified EIR; or

(c) Mitigation measures or alternatives previously found not to be feasible would in fact be feasible and would substantially reduce one or more significant effects of the Project, but the City declined to adopt such measures; or

(d) Mitigation measures or alternatives considerably different from those analyzed in the Certified EIR would substantially reduce one or more significant effects on the environment, but which the City declined to adopt.

SECTION 3. ***Housing Element Compliance.*** Pursuant to the requirements of California Government Code Chapter 3, Article 10.6, commencing with Section 65580, as the decision-making body for the Project, the City Council finds that based upon the facts and information contained in the Application and supporting documentation, at the time of Project implementation, the project is consistent with the Housing Element of the Policy Plan (General Plan) component of The Ontario Plan, as the project site is not one of the properties in the Available Land Inventory contained in Table A-3 (Available Land by Planning Area) of the Housing Element Technical Report Appendix.

SECTION 4. ***Ontario International Airport Land Use Compatibility Plan ("ALUCP") Compliance.*** The California State Aeronautics Act (Public Utilities Code Section 21670 et seq.) requires that an Airport Land Use Compatibility Plan be prepared for all public use airports in the State; and requires that local land use plans and individual development proposals must be consistent with the policies set forth in the adopted

Airport Land Use Compatibility Plan. On April 19, 2011, the City Council of the City of Ontario approved and adopted the Ontario International Airport Land use Compatibility Plan ("ALUCP"), establishing the Airport Influence Area for Ontario International Airport ("ONT"), which encompasses lands within parts of San Bernardino, Riverside, and Los Angeles Counties, and limits future land uses and development within the Airport Influence Area, as they relate to noise, safety, airspace protection, and overflight impacts of current and future airport activity. As the decision-making body for the Project, the City Council has reviewed and considered the facts and information contained in the Application and supporting documentation against the ALUCP compatibility factors, including [1] Safety Criteria (ALUCP Table 2-2) and Safety Zones (ALUCP Map 2-2), [2] Noise Criteria (ALUCP Table 2-3) and Noise Impact Zones (ALUCP Map 2-3), [3] Airspace protection Zones (ALUCP Map 2-4), and [4] Overflight Notification Zones (ALUCP Map 2-5). As a result, the City Council, therefore, finds and determines that the Project, when implemented in conjunction with the conditions of approval, will be consistent with the policies and criteria set forth within the ALUCP.

SECTION 5. ***Concluding Facts and Reasons.*** Based upon the substantial evidence presented to the City Council during the above-referenced hearing, and upon the specific findings set forth in Sections 1 and 4, above, the City Council hereby concludes as follows:

(1) ***The proposed Tentative Parcel Map is consistent with the goals, policies, plans, and exhibits of the Vision, Policy Plan (General Plan), and City Council Priorities components of The Ontario Plan, and applicable area and specific plans, and planned unit developments.*** The proposed Tentative Parcel Map is located within the Industrial land use district of the Policy Plan Land Use Map, and the Toyota Ontario Business Park Specific Plan zoning district. The proposed subdivision is consistent with the goals, policies, plans, and exhibits of the Vision, Policy Plan (General Plan), and City Council Priorities components of The Ontario Plan, as the project will contribute to the establishment of "[a] dynamic, progressive city containing distinct neighborhoods and commercial districts that foster a positive sense of identity and belonging among residents, visitors, and businesses" (Goal CD1). Furthermore, the project will promote the City's policy to "take actions that are consistent with the City being a leading urban center in Southern California while recognizing the diverse character of our existing viable neighborhoods" (Policy CD1-1 *City Identity*).

(2) ***The design or improvement of the proposed Tentative Parcel Map is consistent with the goals, policies, plans and exhibits of the Vision, Policy Plan (General Plan), and City Council Priorities components of The Ontario Plan, and applicable specific plans and planned unit developments.*** The proposed Tentative Parcel Map is located within the Industrial land use district of the Policy Plan Land Use Map, and the Toyota Ontario Business Park Specific Plan zoning district. The proposed design or improvement of the subdivision is consistent with the goals, policies, plans, and exhibits of the Vision, Policy Plan (General Plan), and City Council Priorities components of The Ontario Plan, as the project will provide "[a] high level of design quality resulting in public spaces, streetscapes, and developments that are attractive, safe, functional and distinct (Goal CD2). Furthermore, the project will promote the City's policy to "collaborate with the development community to design and build neighborhoods, streetscapes, sites,

outdoor spaces, landscaping and buildings to reduce energy demand through solar orientation, maximum use of natural daylight, passive solar and natural ventilation, building form, mechanical and structural systems, building materials and construction techniques" (Policy CD2-7 *Sustainability*).

(3) ***The site is physically suitable for the type of development proposed.*** The project site meets the minimum lot area and dimensions of the Toyota Ontario Business Park Specific Plan zoning district, and is physically suitable for the type of industrial development proposed in terms of zoning, land use and development activity proposed, and existing and proposed site conditions.

(4) ***The site is physically suitable for the density/intensity of development proposed.*** The project site is proposed for industrial development at a floor-area ratio ranging from 0.23 to 0.33. The project site meets the minimum lot area and dimensions of the Toyota Ontario Business Park Specific Plan zoning district, and is physically suitable for this proposed density / intensity of development.

(5) ***The design of the subdivision or the proposed improvements thereon, are not likely to cause substantial environmental damage, or substantially and avoidably injure fish or wildlife, or their habitat.*** The project site is not located in an area that has been identified as containing species identified as a candidate, sensitive, or special status species in local or regional plans, policies or regulations or by the California Department of Fish and Wildlife or the U.S. Fish and Wildlife Service, nor does the site contain any riparian habitat or other sensitive natural community, and no wetland habitat is present on site; therefore, the design of the subdivision, or improvements proposed thereon, are not likely to cause substantial environmental damage, or substantially and avoidably injure fish or wildlife, or their habitat.

(6) ***The design of the subdivision, or the type of improvements thereon, are not likely to cause serious public health problems.*** The design of the proposed subdivision, and the industrial improvements existing or proposed on the project site, are not likely to cause serious public health problems, as the project is not anticipated to involve the transport, use, or disposal of hazardous materials during either construction or project implementation, include the use of hazardous materials or volatile fuels, nor are there any known stationary commercial or industrial land uses within close proximity to the subject site that use/store hazardous materials to the extent that they would pose a significant hazard to visitors or occupants to the project site.

(7) ***The design of the subdivision, or the type of improvements thereon, will not conflict with easements acquired by the public at large for access through, or use of property within, the proposed subdivision.*** The proposed subdivision has provided for all necessary public easements and dedications for access through, or use of property within, the proposed subdivision. Furthermore, all such public easements and dedications have been designed pursuant to: (a) the requirements of the Policy Plan component of The Ontario Plan and applicable area plans; (b) applicable specific plans or planned unit developments; (c) applicable provisions of the City of Ontario Development Code; (d) applicable master plans and design guidelines of the City; and (e) applicable Standard Drawings of the City.

(8) ***The Ontario Development Code specifies the Appeal process and requirements for filing an appeal.*** The Ontario Development Code requires that an appeal shall include a statement identifying the specific action or decision of the Approving Authority that is being appealed, the specific grounds for the appeal, and the relief requested from the Appeal Authority; and that an appeal of an action shall be limited to those matters raised during the hearing and contained in the appeal statement.

(9) ***The submitted Appeal does not include specific grounds for the appeal and the relief requested from the Appeal Authority.*** The submitted Appeal did not provide any specific facts or reasons to support their assertion that the Project Addendum fails to comply with the California Environmental Quality Act and did not include a relief request from the Appeal Authority.

(10) ***The Appeal assertion that the Project Addendum fails to comply with the California Environmental Quality Act was not raised during the public hearing.*** The Appellant failed to raise their concerns regarding the Project Addendum compliance with the California Environmental Quality Act during the public hearing or provide written notice of their concerns prior to the public hearing.

SECTION 6. ***City Council Action.*** Based upon the findings and conclusions set forth in Sections 1 through 5, above, the City Council hereby UPHOLDS THE PLANNING COMMISSION'S PREVIOUS ACTION ON THE PROJECT AND DENIES THE APPEAL, and based upon the entire record of proceedings before it and all information received, hereby approves the herein described Application, subject to each and every condition set forth in the Department reports attached hereto as "Attachment A," and incorporated herein by this reference.

SECTION 7. ***Indemnification.*** The Applicant shall agree to defend, indemnify and hold harmless, the City of Ontario or its agents, officers, and employees from any claim, action or proceeding against the City of Ontario or its agents, officers or employees to attack, set aside, void, or annul this approval. The City of Ontario shall promptly notify the applicant of any such claim, action, or proceeding, and the City of Ontario shall cooperate fully in the defense.

SECTION 6. ***Custodian of Records.*** The documents and materials that constitute the record of proceedings on which these findings have been based are located at the City of Ontario City Hall, 303 East "B" Street, Ontario, California 91764. The custodian for these records is the City Clerk of the City of Ontario.

The City Clerk shall certify as to the adoption of this Resolution.

PASSED, APPROVED, AND ADOPTED this 15th day of March 2022.

---

The Planning Department, Land Development Section, conditions of approval applicable to the above-described Project, are listed below. The Project shall comply with each condition of approval listed below:

**1.0 Standard Conditions of Approval.** The project shall comply with the *Standard Conditions for New Development*, adopted by City Council Resolution No. 2017-027 on April 18, 2017. A copy of the *Standard Conditions for New Development* may be obtained from the Planning Department or City Clerk/Records Management Department.

**2.0 Special Conditions of Approval.** In addition to the *Standard Conditions for New Development* identified in condition no. 1.0, above, the project shall comply with the following special conditions of approval:

**2.1** Time Limits.

**(a)** Tentative Parcel Map approval shall become null and void 2 years following the effective date of application approval, unless the final parcel map has been recorded, or a time extension has been approved by the Planning Commission pursuant to Development Code Section 2.02.025 (Time Limits and Extensions). This Permit does not supersede any individual time limits specified herein for performance of specific conditions or improvements.

**2.2** Subdivision Map.

**(a)** The Final Parcel Map shall be in conformance with the approved Tentative Parcel Map on file with the City. Variations rom the approved Tentative Parcel Map may be reviewed and approved by the Planning Department. A substantial variation from the approved Tentative Parcel Map may require review and approval by the Planning Commission, as determined by the Planning Director.

**(b)** Tentative Parcel Map approval shall be subject to all conditions, requirements and recommendations from all other departments/agencies provided on the attached reports/memorandums.

**(c)** Pursuant to California Government Section 66474.9, the subdivider agrees that it will defend, indemnify, and hold harmless the City of Ontario or its agents, officers and employees from any claim, action or proceeding against the City of Ontario or its agents, officers or employees to attack, set aside, void or annul any approval of the City of Ontario, whether by its City Council, Planning Commission or other authorized board or officer of this subdivision, which action is brought within the time period provided for in Government Code Section 66499.37. The City of Ontario shall promptly notify the subdivider of any such claim, action or proceeding and the City of Ontario shall cooperate fully in the defense.

**2.3** General Requirements. The Project shall comply with the following general requirements:

**(a)** All construction documentation shall be coordinated for consistency, including, but not limited to, architectural, structural, mechanical, electrical, plumbing, landscape and irrigation, grading, utility and street improvement plans. All such plans shall be consistent with the approved entitlement plans on file with the Planning Department.

**(b)** The project site shall be developed in conformance with the approved plans on file with the City. Any variation from the approved plans must be reviewed and approved by the Planning Department prior to building permit issuance.

**(c)** The herein-listed conditions of approval from all City departments shall be included in the construction plan set for project, which shall be maintained on site during project construction.

**2.4** Covenants, Conditions and Restrictions (CC&Rs)/Mutual Access and Maintenance Agreements.

**(a)** CC&Rs shall be prepared for the Project and shall be recorded prior to the issuance of a building permit.

**(b)** The CC&Rs shall be in a form and contain provisions satisfactory to the City. The articles of incorporation for the property owners association and the CC&Rs shall be reviewed and approved by the City.

**(c)** CC&Rs shall ensure reciprocal parking and access between parcels.

**(d)** CC&Rs shall ensure reciprocal parking and access between parcels, and common maintenance of:

**(i)** Landscaping and irrigation systems within common areas;
**(ii)** Landscaping and irrigation systems within parkways adjacent to the project site, including that portion of any public highway right-of-way between the property line or right-of-way boundary line and the curb line and also the area enclosed within the curb lines

of a median divider (Ontario Municipal Code Section 7-3.03), pursuant to Ontario Municipal Code Section 5-22-02;

**(iii)** Shared parking facilities and access drives; and

**(iv)** Utility and drainage easements.

**(e)** CC&Rs shall include authorization for the City's local law enforcement officers to enforce City and State traffic and penal codes within the project area.

**(f)** The CC&Rs shall grant the City of Ontario the right of enforcement of the CC&R provisions.

**(g)** A specific methodology/procedure shall be established within the CC&Rs for enforcement of its provisions by the City of Ontario, if adequate maintenance of the development does not occur, such as, but not limited to, provisions that would grant the City the right of access to correct maintenance issues and assess the property owners association for all costs incurred.

**2.5** Environmental Review.

**(a)** The environmental impacts of this project were reviewed in conjunction with an **Addendum to The Ontario Plan Environmental Impact Report** (State Clearinghouse No. 2008101140). This application introduces no new significant environmental impacts. The City's "Guidelines for the Implementation of the California Environmental Quality Act (CEQA)" provide for the use of a single environmental assessment in situations where the impacts of subsequent projects are adequately analyzed. This Application introduces no new significant environmental impacts. All previously adopted mitigation measures are a condition of project approval and are incorporated herein by this reference. All previously adopted mitigation measures shall be a condition of project approval, as they are applicable, and are incorporated herein by this reference.

**(b)** If human remains are found during project grading/excavation/ construction activities, the area shall not be disturbed until any required investigation is completed by the County Coroner and Native American consultation has been completed (if deemed applicable).

**(c)** If any archeological or paleontological resources are found during project grading/excavation/construction, the area shall not be disturbed until the significance of the resource is determined. If determined to be significant, the resource shall be recovered by a qualified archeologist or paleontologist consistent with current standards and guidelines, or other appropriate measures implemented.

**2.6** Indemnification. The applicant shall agree to defend, indemnify and hold harmless, the City of Ontario or its agents, officers, and employees from any claim, action or proceeding against the City of Ontario or its agents, officers or employees to attack, set aside, void or annul any approval of the City of Ontario, whether by its City Council, Planning Commission or other authorized board or officer. The City of Ontario shall promptly notify the applicant of any such claim, action or proceeding, and the City of Ontario shall cooperate fully in the defense.

**2.7** Additional Fees.

**(a)** Within 5 days following final application approval, the Notice of Determination ("NOD") filing fee shall be provided to the Planning Department. The fee shall be paid by check, made payable to the "Clerk of the Board of Supervisors", which shall be forwarded to the San Bernardino County Clerk of the Board of Supervisors, along with all applicable environmental forms/notices, pursuant to the requirements of the California Environmental Quality Act ("CEQA"). Failure to provide said fee within the time specified may result in a 180-day extension to the statute of limitations for the filing of a CEQA lawsuit.

**(b)** After the Project's entitlement approval, and prior to issuance of final building permits, the Planning Department's Plan Check and Inspection fees shall be paid at the rate established by resolution of the City Council.

**THIS PROJECT SHALL COMPLY WITH THE REQUIREMENTS SET FORTH IN THE GENERAL STANDARD CONDITIONS OF APPROVAL ADOPTED BY THE CITY COUNCIL (RESOLUTION NO. 2017-027) AND THE PROJECT SPECIFIC CONDITIONS OF APPROVAL SPECIFIED IN HEREIN. ONLY APPLICABLE CONDITIONS OF APPROVAL ARE CHECKED. THE APPLICANT SHALL BE RESPONSIBLE FOR THE COMPLETION OF ALL APPLICABLE CONDITIONS OF APPROVAL PRIOR TO PARCEL MAP APPROVAL, ISSUANCE OF PERMITS AND/OR OCCUPANCY CLEARANCE, AS SPECIFIED IN THIS REPORT.**

## 1. PRIOR TO PARCEL MAP APPROVAL, APPLICANT SHALL:

Check When Complete

☐ 1.01 Dedicate to the City of Ontario, the right-of-way, described below: ☐

_____ feet on _____

Property line corner 'cut-back' required at the intersection of _____ and _____.

☐ 1.02 Dedicate to the City of Ontario, the following easement(s): _____ ☐

_____

☐ 1.03 Restrict vehicular access to the site as follows: _____ ☐

☒ **1.04 Vacate the following street(s) and/or easement(s):** ☐

**A. All interfering on-site easements shall be quitclaimed, vacated, and/or submit non-interference letter from affected owner/utility company.**

☐ 1.05 Submit a copy of a recorded private reciprocal use agreement or easement. The agreement or easement shall ensure, at a minimum, common ingress and egress and joint maintenance of all common access areas and drive aisles. ☐

☒ **1.06 Provide (original document) Covenants, Conditions and Restrictions (CC&Rs) as applicable to the project and as approved by the City Attorney and the Engineering and Planning Departments, ready for recordation with the County of San Bernardino. The CC&Rs shall provide for, but not be limited to, common ingress and egress, joint maintenance responsibility for all common access improvements, common facilities, parking areas, utilities, median and landscaping improvements and drive approaches, in addition to maintenance requirements established in the Water Quality Management Plan (WQMP), as applicable to the project. The CC&Rs shall also address the maintenance and repair responsibility for public improvements/utilities (sewer, water, storm drain, recycled water, etc.) located within open space/easements. In the event of any maintenance or repair of these facilities, the City shall only restore disturbed areas to current City Standards.** ☐

☐ 1.07 For all development occurring south of the Pomona Freeway (60-Freeway) and within the specified boundary limits (per Boundary Map found at *http://tceplumecleanup.com/*), the property developer/owner is made aware of the South Archibald Trichloroethylene (TCE) Plume "Disclosure Letter". Property owner may wish to provide this Letter as part of the Real Estate Transfer Disclosure requirements under California Civil Code Section 1102 et seq. This may include notifications in the Covenants, Conditions and Restrictions (CC&Rs) or other documents related to property transfer and disclosures. Additional information on the plume is available from the Santa Ana Regional Water Quality Control Board at *http://geotracker.waterboards.ca.gov/profile_report?global_id=T10000004658.* ☐

☐ 1.08 File an application for Reapportionment of Assessment, together with payment of a reapportionment processing fee, for each existing assessment district listed below. Contact the Financial Services Department at (909) 395-2124 regarding this requirement. ☐

(1) _____

(2) _____

☒ **1.09** **Prepare a fully executed Subdivision Agreement (on City approved format and forms) with accompanying security as required, or complete all public improvements.** ☐

☒ **1.10** **Provide a monument bond (i.e. cash deposit) in an amount calculated by the City's approved cost estimate spreadsheet (available for download on the City's website: www.ci.ontario.ca.us) or as specified in writing by the applicant's Registered Engineer or Licensed Land Surveyor of Record and approved by the City Engineer, whichever is greater.** ☐

☒ **1.11** **Provide a preliminary title report current to within 30 days.** ☐

☐ 1.12 File an application, together with an initial deposit (if required), to establish a Community Facilities District (CFD) pursuant to the Mello-Roos Community Facilities District Act of 1982. The application and fee shall be submitted a minimum of four (4) months prior to final subdivision map approval, and the CFD shall be established prior to final subdivision map approval or issuance of building permits, whichever occurs first. The CFD shall be established upon the subject property to provide funding for various City services. An annual special tax shall be levied upon each parcel or lot in an amount to be determined. The special tax will be collected along with annual property taxes. The City shall be the sole lead agency in the formation of any CFD. Contact Investment and Revenue Resources at (909) 395-2341 to initiate the CFD application process. ☐

☐ 1.13 Ontario Ranch Developments: ☐

☐ 1) Provide evidence of final cancellation of Williamson Act contracts associated with this tract, prior to approval of any final subdivision map. Cancellation of contracts shall have been approved by the City Council.

☐ 2) Provide evidence of sufficient storm water capacity availability equivalents (Certificate of Storm Water Treatment Equivalents).

☐ 3) Provide evidence of sufficient water availability equivalents (Certificate of Net MDD Availability).

☒ **1.14** **Other conditions:** ☐

**A. Provide private easements for utilities, cross lot drainage, blanket emergency access and reciprocal access across all parcels in favor of all parcels (as needed).**
**B. Provide a private access easement across Parcel 1/Toyota Way (private) in favor of Parcels 2 and 3 for ingress and access purposes.**

## 2. PRIOR TO ISSUANCE OF ANY PERMITS, APPLICANT SHALL:

**A. GENERAL**
**( Permits includes Grading, Building, Demolition and Encroachment )** ☐

☒ **2.01** **Record Parcel Map No. 20147 pursuant to the Subdivision Map Act and in accordance with the City of Ontario Municipal Code.**

☒ **2.02** **Submit a PDF of the recorded map to the City Engineer's office.** ☐

☐ 2.03 Note that the subject parcel is a recognized parcel in the City of Ontario per_____. ☐

☐ 2.04 Note that the subject parcel is an 'unrecognized' parcel in the City of Ontario and shall require a Certificate of Compliance to be processed unless a deed is provided confirming the existence of the parcel prior to the date of March 4, 1972. ☐

☐ 2.05 Apply for a: ☐

☐ Certificate of Compliance with a Record of Survey;

☐ Lot Line Adjustment (Record a Conforming Deed with the County of San Bernardino within six

months of the recordation of the Lot Line Adjustment to conform the new LLA legal description. Submit a copy of the recorded Conforming Deed to the Engineering Department.);

☐ Make a Dedication of Easement.

☐ 2.06 Provide (original document) Covenants, Conditions and Restrictions (CC&R's), as applicable to the project, and as approved by the City Attorney and the Engineering and Planning Departments, ready for recordation with the County of San Bernardino. The CC&R's shall provide for, but not be limited to, common ingress and egress, joint maintenance of all common access improvements, common facilities, parking areas, utilities and drive approaches in addition to maintenance requirements established in the Water Quality Management Plan ( WQMP), as applicable to the project. ☐

☐ 2.07 For all development occurring south of the Pomona Freeway (60-Freeway) and within the specified boundary limits (per Boundary Map found at http://tceplumecleanup.com/), the property developer/owner is made aware of the South Archibald Trichloroethylene (TCE) Plume "Disclosure Letter". Property owner may wish to provide this Letter as part of the Real Estate Transfer Disclosure requirements under California Civil Code Section 1102 et seq. This may include notifications in the Covenants, Conditions and Restrictions (CC&Rs) or other documents related to property transfer and disclosures. Additional information on the plume is available from the Santa Ana Regional Water Quality Control Board at http://geotracker.waterboards.ca.gov/profile_report?global_id=T10000004658. ☐

☐ 2.08 Submit a soils/geology report. ☐

☐ 2.09 Other Agency Permit/Approval: Submit a copy of the approved permit and/or other form of approval of the project from the following agency or agencies: ☐

- ☐ State of California Department of Transportation (Caltrans)
- ☐ San Bernardino County Road Department (SBCRD)
- ☐ San Bernardino County Flood Control District (SBCFCD)
- ☐ Federal Emergency Management Agency (FEMA)
- ☐ Cucamonga Valley Water District (CVWD) for sewer/water service
- ☐ United States Army Corps of Engineers (USACE)
- ☐ California Department of Fish & Game
- ☐ Inland Empire Utilities Agency (IEUA)
- ☐ Other: _____

☐ 2.10 Dedicate to the City of Ontario the right-of-way described below: ☐

_____ feet on _____

Property line corner 'cut-back' required at the intersection of _____ and _____.

☐ 2.11 Dedicate to the City of Ontario the following easement(s):_____ ☐

_____

☐ 2.12 Vacate the following street(s) and/or easement(s): ☐

A. All interfering on-site easements shall be quitclaimed, vacated, and/or submit non-interference letter from affected owner/utility company.

☐ 2.13 Ontario Ranch Developments: ☐

☐ 1) Submit a copy of the permit from the San Bernardino County Health Department to the Engineering Department and the Ontario Municipal Utilities Company (OMUC) for the destruction/abandonment of the on-site water well. The well shall be destroyed/abandoned in accordance with the San Bernardino County Health Department guidelines.

☐ 2) Make a formal request to the City of Ontario Engineering Department for the proposed temporary

use of an existing agricultural water well for purposes other than agriculture, such as grading, dust control, etc. Upon approval, the Applicant shall enter into an agreement with the City of Ontario and pay any applicable fees as set forth by said agreement.

☐ 3) Design proposed retaining walls to retain up to a maximum of three (3) feet of earth. In no case shall a wall exceed an overall height of nine (9) feet (i.e. maximum 6-foot high wall on top of a maximum 3-foot high retaining wall.

☐ 2.14 Submit a security deposit to the Engineering Department to guarantee construction of the public improvements required herein valued at _____% of the approved construction cost estimate. Security deposit shall be in accordance with the City of Ontario Municipal Code. Security deposit will be eligible for release, in accordance with City procedure, upon completion and acceptance of said public improvements. ☐

☒ **2.15 The applicant/developer shall submit all necessary survey documents prepared by a Licensed Surveyor registered in the State of California detailing all existing survey monuments in and around the project site. These documents are to be reviewed and approved by the City Survey Office.** ☐

☒ **2.16 Pay all Development Impact Fees (DIF) to the Building Department. Storm Drain Development Impact Fee, approximately $270,471, shall be paid to the Building Department. Final fee shall be determined based on the approved site plan.** ☐

☐ 2.17 Other conditions: _____ ☐

## B. PUBLIC IMPROVEMENTS
**(See attached Exhibit 'A' for plan check submittal requirements.)**

☒ **2.17 Design and construct full public improvements in accordance with the City of Ontario Municipal Code, current City standards and specifications, master plans and the adopted specific plan for the area, if any. These public improvements shall include, but not be limited to, the following (checked boxes):**

| Improvement | Jurupa Street | Milliken Avenue | Street 3 | Street 4 |
|---|---|---|---|---|
| Curb and Gutter | ☐ New; ___ ft. from C/L<br>☐ Replace damaged<br>☐ Remove and replace | ☐ New; ___ ft. from C/L<br>☐ Replace damaged<br>☐ Remove and replace | ☐ New; ___ ft. from C/L<br>☐ Replace damaged<br>☐ Remove and replace | ☐ New; ___ ft. from C/L<br>☐ Replace damaged<br>☐ Remove and replace |
| AC Pavement | ☐ Replacement<br>☐ Widen ____ additional feet along frontage, including pavm't transitions | ☐ Replacement<br>☐ Widen ____ additional feet along frontage, including pavm't transitions | ☐ Replacement<br>☐ Widen ____ additional feet along frontage, including pavm't transitions | ☐ Replacement<br>☐ Widen ____ additional feet along frontage, including pavm't transitions |
| PCC Pavement (Truck Route Only) | ☐ New<br>☐ Modify existing | ☐ New<br>☐ Modify existing | ☐ New<br>☐ Modify existing | ☐ New<br>☐ Modify existing |
| **Drive Approach** | ☐ New<br>☐ Remove and replace | ☒ **New**<br>☐ Remove and replace | ☐ New<br>☐ Remove and replace | ☐ New<br>☐ Remove and replace |
| Sidewalk | ☐ New<br>☐ Remove and replace | ☐ New<br>☐ Remove and replace | ☐ New<br>☐ Remove and replace | ☐ New<br>☐ Remove and replace |
| ADA Access Ramp | ☐ New<br>☐ Remove and replace | ☐ New<br>☐ Remove and replace | ☐ New<br>☐ Remove and replace | ☐ New<br>☐ Remove and replace |
| Parkway | ☐ Trees<br>☐ Landscaping (w/irrigation) | ☐ Trees<br>☐ Landscaping (w/irrigation) | ☐ Trees<br>☐ Landscaping (w/irrigation) | ☐ Trees<br>☐ Landscaping (w/irrigation) |
| Raised Landscaped Median | ☐ New<br>☐ Remove and replace | ☐ New<br>☐ Remove and replace | ☐ New<br>☐ Remove and replace | ☐ New<br>☐ Remove and replace |
| Fire Hydrant | ☐ New / Upgrade<br>☐ Relocation | ☐ New / Upgrade<br>☐ Relocation | ☐ New / Upgrade<br>☐ Relocation | ☐ New / Upgrade<br>☐ Relocation |

| | | | | |
|---|---|---|---|---|
| Sewer (see Sec. 2.C) | ☐ Main<br>☐ Lateral | ☐ Main<br>☐ Lateral | ☐ Main<br>☐ Lateral | ☐ Main<br>☐ Lateral |
| **Water (see Sec. 2.D)** | ☐ Main<br>☒ **Service** | ☐ Main<br>☒ **Service** | ☐ Main<br>☐ Service | ☐ Main<br>☐ Service |
| **Recycled Water (see Sec. 2.E)** | ☐ Main<br>☐ Service | ☒ **Main (A)**<br>☒ **Service** | ☐ Main<br>☐ Service | ☐ Main<br>☐ Service |
| Traffic Signal System (see Sec. 2.F) | ☐ New<br>☐ Modify existing | ☐ New<br>☐ Modify existing | ☐ New<br>☐ Modify existing | ☐ New<br>☐ Modify existing |
| Traffic Signing and Striping (see Sec. 2.F) | ☐ New<br>☐ Modify existing | ☐ New<br>☐ Modify existing | ☐ New<br>☐ Modify existing | ☐ New<br>☐ Modify existing |
| **Street Light (see Sec. 2.F)** | ☒ **Upgrade**<br>☐ Relocation | ☒ **Upgrade**<br>☐ Relocation | ☐ New / Upgrade<br>☐ Relocation | ☐ New / Upgrade<br>☐ Relocation |
| Bus Stop Pad or Turn-out (see Sec. 2.F) | ☐ New<br>☐ Modify existing | ☐ New<br>☐ Modify existing | ☐ New<br>☐ Modify existing | ☐ New<br>☐ Modify existing |
| Storm Drain (see Sec. 2G) | ☐ Main<br>☐ Lateral | ☐ Main<br>☐ Lateral | ☐ Main<br>☐ Lateral | ☐ Main<br>☐ Lateral |
| **Fiber Optics (see Sec. 2K)** | ☒ **Conduit / Appurtenances** | ☒ **Conduit / Appurtenances** | ☐ Conduit / Appurtenances | ☐ Conduit / Appurtenances |
| Overhead Utilities | ☐ Underground<br>☐ Relocate | ☐ Underground<br>☐ Relocate | ☐ Underground<br>☐ Relocate | ☐ Underground<br>☐ Relocate |
| Removal of Improvements | | | | |
| Other Improvements | | | | |

**Specific notes for improvements listed in item no. 2.17, above:**

**A. For longitudinal trenches over 150' in length, a minimum 10' wide, 2" grind and overlay is required per City Std. No. 1306. See COA 2.18 below.**
**B. All master planned utilities shall be designed and installed to the ultimate condition.**

☒ **2.18 Construct a 2" asphalt concrete (AC) grind and overlay on the following street(s):** ☐

- **Milliken Ave from Jurupa Street to Toyota Way. See recycled water main construction listed in COA 2.17 above.**

☐ 2.19 Reconstruction of the full pavement structural section, per City of Ontario Standard Drawing number 1011, may be required based on the existing pavement condition and final street design. Minimum limits of reconstruction shall be along property frontage, from street centerline to curb/gutter. ☐

☐ 2.20 Make arrangements with the Cucamonga Valley Water District (CVWD) to provide ☐ water service ☐ sewer service to the site. This property is within the area served by the CVWD and Applicant shall provide documentation to the City verifying that all required CVWD fees have been paid. ☐

☐ 2.21 Overhead utilities shall be under-grounded, in accordance with Title 7 of the City's Municipal Code (Ordinance No. 2804 and 2892). Developer may pay in-lieu fee, approximately _____, for undergrounding of utilities in accordance with Section 7-7.302.e of the City's Municipal Code. ☐

☒ **2.22 Other conditions:** ☐

**A. Pay an in-lieu fee for PCC pavement installation at the following signalized intersections:**
**i. Jurupa Street & Toyota Way**
**ii. Jurupa Street & Milliken Avenue**
**iii. Toyota Way & Milliken Avenue**
**The fee will be based on an engineer's cost estimate that will be reviewed and approved by the City. The Applicant/Developer will be responsible for their fair share which is equivalent to 25% of the total cost.**

## C. SEWER

☒ **2.23 A 18 inch sewer main is available for connection by this project in Milliken Ave. (Ref: Sewer plan bar code: S10006)** ☐

☐ 2.24 Design and construct a sewer main extension. A sewer main is not available for direct connection. The closest main is approximately _____ feet away. ☐

☐ 2.25 Submit documentation that shows expected peak loading values for modeling the impact of the subject project to the existing sewer system. The project site is within a deficient public sewer system area. Applicant shall be responsible for all costs associated with the preparation of the model. Based on the results of the analysis, Applicant may be required to mitigate the project impact to the deficient public sewer system, including, but not limited to, upgrading of existing sewer main(s), construction of new sewer main(s) or diversion of sewer discharge to another sewer. ☐

☒ **2.26 Other conditions:** ☐

**A. Sewer Monitoring Manhole: Each building is to have its own monitoring manhole, on private property, immediately back of the property line.**

## D. WATER

☒ **2.27 A 16 inch water main is available for connection by this project in Jurupa St and Milliken Ave. (Ref: Water plan bar code: W11713, W10016)** ☐

☐ 2.28 Design and construct a water main extension. A water main is not available for direct connection. The closest main is approximately _____ feet away. ☐

☐ 2.29 Other conditions: _____ ☐

## E. RECYCLED WATER

☒ **2.30 A 8 inch recycled water main is available for connection by this project in Jurupa St. (Ref: Recycled Water plan bar code: P10294)** ☐

☒ **2.31 Design and construct an on-site recycled water system for this project. A recycled water main does exist in the vicinity of this project.** ☐

☐ 2.32 Design and construct an on-site recycled water ready system for this project. A recycled water main does not currently exist in the vicinity of this project, but is planned for the near future. If Applicant would like to connect to this recycled water main when it becomes available, the cost for the connection shall be borne solely by the Applicant. ☐

☒ **2.33** **Submit two (2) hard copies and one (1) electronic copy, in PDF format, of the Engineering Report (ER), for the use of recycled water, to the OMUC for review and subsequent submittal to the California Department of Public Health (CDPH) for final approval.** ☐

**Note: The OMUC and the CDPH review and approval process will be approximately three (3) months. Contact the Ontario Municipal Utilities Company at (909) 395-2647 regarding this requirement.**

☒ **2.34** **Other conditions:** ☐

**A. Recycled Water Main Extension: Extend by constructing a recycled water main from the intersection of Milliken Avenue and Jurupa Street, south to serve Building A and B, specifically Building B with recycled water.**

## F. TRAFFIC / TRANSPORTATION

☐ 2.35 Submit a focused traffic impact study, prepared and signed by a Traffic/Civil Engineer registered in the State of California. The study shall address, but not be limited to, the following issues as required by the City Engineer: ☐
1. On-site and off-site circulation
2. Traffic level of service (LOS) at 'build-out' and future years
3. Impact at specific intersections as selected by the City Engineer

☐ 2.36 New traffic signal installations shall be added to Southern California Edison (SCE) customer account number # 2-20-044-3877. ☐

☒ **2.37** **Other conditions:** ☐

**A. Replace any existing street light fixtures project frontages of Milliken Avenue and Jurupa Street with the current City approved LED equivalent fixture per the Traffic and Transportation Design Guidelines**
**B. All landscaping, block walls, and other obstructions shall be compatible with the stopping sight distance requirements per City of Ontario Standard Drawing No. 1309.**
**C. Provide reciprocal access with the between the project site and all other adjacent properties.**
**D. Design and construct proposed driveway in accordance with City of Ontario Standard Drawing No. 1204 for Commercial Driveway along Milliken Avenue.**

## G. DRAINAGE / HYDROLOGY

☐ 2.38 A _____inch storm drain main is available to accept flows from this project in _____. ☐
(Ref: Storm Drain plan bar code:_____)

☐ 2.39 Submit a hydrology study and drainage analysis, prepared and signed by a Civil Engineer registered in the State of California. The study shall be prepared in accordance with the San Bernardino County Hydrology Manual and City of Ontario standards and guidelines. Additional drainage facilities, including, but not limited to, improvements beyond the project frontage, may be required to be designed and constructed, by Applicant, as a result of the findings of this study. ☐

☐ 2.40 An adequate drainage facility to accept additional runoff from the site does not currently exist downstream of the project. Design and construct a storm water detention facility on the project site. 100 year post-development peak flow shall be attenuated such that it does not exceed 80% of pre-development peak flows, in accordance with the approved hydrology study and improvement plans. ☐

☒ **2.41** **Submit a copy of a recorded private drainage easement or drainage acceptance agreement to the Engineering Department for the acceptance of any increase to volume and/or concentration of historical drainage flows onto adjacent property, prior to approval of the grading plan for the project.** ☐

☐ 2.42 Comply with the City of Ontario Flood Damage Prevention Ordinance (Ordinance No. 2409). The project site or a portion of the project site is within the Special Flood Hazard Area (SFHA) as indicated on the Flood Insurance Rate Map (FIRM) and is subject to flooding during a 100 year frequency storm. The site plan shall be subject to the provisions of the National Flood Insurance Program. ☐

☐ 2.43 Other conditions: _____ ☐

## H. STORM WATER QUALITY / NATIONAL POLLUTANT DISCHARGE AND ELIMINATION SYSTEM (NPDES)

☐ 2.44 401 Water Quality Certification/404 Permit – Submit a copy of any applicable 401 Certification or 404 Permit for the subject project to the City project engineer. Development that will affect any body of surface water (i.e. lake, creek, open drainage channel, etc.) may require a 401 Water Quality Certification from the California Regional Water Quality Control Board, Santa Ana Region (RWQCB) and a 404 Permit from the United States Army Corps of Engineers (USACE). The groups of water bodies classified in these requirements are perennial (flow year round) and ephemeral (flow during rain conditions, only) and include, but are not limited to, direct connections into San Bernardino County Flood Control District (SBCFCD) channels.
If a 401 Certification and/or a 404 Permit are not required, a letter confirming this from Applicant's engineer shall be submitted.
Contact information: USACE (Los Angeles District) (213) 452-3414; RWQCB (951) 782-4130. ☐

☒ **2.45 Submit a Water Quality Management Plan (WQMP). This plan shall be approved by the Engineering Department prior to approval of any grading plan. The WQMP shall be submitted, utilizing the current San Bernardino County Stormwater Program template, available at: http://www.sbcounty.gov/dpw/land/npdes.asp.** ☐

☐ 2.46 Design and construct a Connector Pipe Trash Screen or equivalent Trash Treatment Control Device, per catch basin located within or accepting flows tributary of a Priority Land Use (PLU) area that meets the Full Capture System definition and specifications, and is on the Certified List of the State Water Resources Control Board. The device shall be adequately sized per catch basin and include a deflector screen with vector control access for abatement application, vertical support bars, and removable component to facilitate maintenance and cleaning. ☐

☐ 2.47 Other conditions: _____ ☐

## J. SPECIAL DISTRICTS

☐ 2.48 File an application, together with an initial deposit (if required), to establish a Community Facilities District (CFD) pursuant to the Mello-Roos Community Facilities District Act of 1982. The application and fee shall be submitted a minimum of four (4) months prior to final subdivision map approval, and the CFD shall be established prior to final subdivision map approval or issuance of building permits, whichever occurs first. The CFD shall be established upon the subject property to provide funding for various City services. An annual special tax shall be levied upon each parcel or lot in an amount to be determined. The special tax will be collected along with annual property taxes. The City shall be the sole lead agency in the formation of any CFD. Contact Investment and Revenue Resources at (909) 395-2341 to initiate the CFD application process. ☐

☐ 2.49 Other conditions: _____ ☐

## K. FIBER OPTIC

☐ 2.50 A _____ fiber optic line is available for connection by this project in _____. (Ref: Fiber Optic plan bar code:_____) ☐

☒ **2.51 Design and construct fiber optic system to provide access to the City's conduit and fiber optic system per the City's Fiber Optic Master Plan. Building entrance conduits shall start from the closest OntarioNet hand hole constructed along the project frontage in the ROW and shall terminate in the main telecommunications room for each building. Conduit infrastructure shall interconnect with the primary and/or secondary backbone fiber optic conduit system at the nearest OntarioNet hand hole located at the southeast corner of Jurupa St and Milliken Ave. Limits of work are generally located along the project frontages of Jurupa St and Milliken Ave.** ☐

☒ **2.52** **Refer to the City's Fiber Optic Master Plan for design and layout guidelines. Contact the Broadband Operations Department at (909) 395-2000, regarding this requirement.** ☐

## L. INTEGRATED WASTE

☒ **2.53** **Onsite solid waste shall be designed in accordance with the City's Refuse & Recycling Planning Manual located at:** ☐

**https://www.ontarioca.gov/OMUC/IntegratedWaste**

☒ **2.54** **Other conditions:** ☐

**A. Organics Separation and Collection: This development shall comply with the Requirements of State Assembly Bill AB341 and AB1826, which requires organic waste to be diverted and collected separately from recycling and other refuse wastes. Additional information can be obtained at through the City website at https://www.ontarioca.gov/IntegratedWaste:**

**B. Three 4-CY Bins Trash Enclosure: Each trash enclosure is to have three 4-cy bins with their respective gate, and a solid roof.**

**C. Final Solid Waste Handling Plan (SWHP): Prior to approval of any building permits, revised as stated directly above and submit Final SWHP and be submitted with the Precise Grading Plan for review and approval of the Integrated Waste Department.**

**D. Integrated Waste Management Report (IWMR): Prior to approval of the Precise Grading Plan, submit to OMUC for review and approval, an Integrated Waste Management Report (IWMR) that complies with the IWMR Requirements.**

## 3. PRIOR TO ISSUANCE OF A CERTIFICATE OF OCCUPANCY, APPLICANT SHALL:

☒ **3.01** **Set new monuments in place of any monuments that have been damaged or destroyed as a result of construction of the subject project. Monuments shall be set in accordance with City of Ontario standards and to the satisfaction of the City Engineer.** ☐

☒ **3.02** **Complete all requirements for recycled water usage.** ☐

**☒ 1) Procure from the OMUC a copy of the letter of confirmation from the California Department of Public Health (CDPH) that the Engineering Report (ER) has been reviewed and the subject site is approved for the use of recycled water.**

**☒ 2) Obtain clearance from the OMUC confirming completion of recycled water improvements and passing of shutdown tests and cross connection inspection, upon availability/usage of recycled water.**

**☒ 3) Complete education training of on-site personnel in the use of recycled water, in accordance with the ER, upon availability/usage of recycled water.**

☒ **3.03** **The applicant/developer shall submit all final survey documents prepared by a Licensed Surveyor registered in the State of California detailing all survey monuments that have been preserved, revised, adjusted or set along with any maps, corner records or Records of Survey needed to comply with these Conditions of Approvals and the latest edition of the California Professional Land Survey Act. These documents are to be reviewed and approved by the City Survey Office.** ☐

☐ 3.04 Ontario Ranch Projects: For developments located at an intersection of any two collector or arterial streets, the applicant/developer shall set a monument if one does not already exist at that intersection. Contact the City Survey office for information on reference benchmarks, acceptable methodology and required submittals. ☐

☒ **3.05** **Confirm payment of all Development Impact Fees (DIF) to the Building Department.** ☐

☒ **3.06** **Submit electronic copies (PDF and Auto CAD format) of all approved improvement plans, studies and reports (i.e. hydrology, traffic, WQMP, etc.).** ☐

## 4. PRIOR TO FINAL ACCEPTANCE, APPLICANT SHALL:

| | | | |
|---|---|---|---|
| ☒ | 4.01 | **Complete all Conditions of Approval listed under Sections 1-3 above.** | ☐ |
| ☒ | 4.02 | **Pay all outstanding fees pursuant to the City of Ontario Municipal Code, including but not limited to, plan check fees, inspection fees and Development Impact Fees.** | ☐ |
| ☒ | 4.03 | **The applicant/developer shall submit a written request for the City's final acceptance of the project addressed to the City Project Engineer. The request shall include a completed Acceptance and Bond Release Checklist, state that all Conditions of Approval have been completed and shall be signed by the applicant/developer. Upon receipt of the request, review of the request shall be a minimum of 10 business days. Conditions of Approval that are deemed incomplete by the City will cause delays in the acceptance process.** | ☐ |
| ☒ | 4.04 | **Submit record drawings (PDF) for all public improvements identified within Section 2 of these Conditions of Approval.** | ☐ |

**EXHIBIT 'A'**

## ENGINEERING DEPARTMENT
## First Plan Check Submittal Checklist

**Project Number: PMTT21-010, PDEV21-018, and/or Parcel Map No. 20147**

**The following items are required to be included with the first plan check submittal:**

1. ☒ **A copy of this check list**
2. ☒ **Payment of fee for Plan Checking**
3. ☒ **One (1) copy of Engineering Cost Estimate (on City form) with engineer's wet signature and stamp.**
4. ☒ **One (1) copy of project Conditions of Approval**
5. ☒ **Include a PDF (electronic submittal) of each required improvement plan at every submittal.**
6. ☒ **Two (2) sets of Potable and Recycled Water demand calculations (include water demand calculations showing low, average and peak water demand in GPM for the proposed development and proposed water meter size).**
7. ☐ Three (3) sets of Public Street improvement plan with street cross-sections
8. ☐ Four (4) sets of Public Water improvement plan (include water demand calculations showing low, average and peak water demand in GPM for the proposed development and proposed water meter size)
9. ☒ **Four (4) sets of Recycled Water improvement plan (include recycled water demand calculations showing low, average and peak water demand in GPM for the proposed development and proposed water meter size and an exhibit showing the limits of areas being irrigated by each recycled water meter)**
10. ☐ Four (4) sets of Public Sewer improvement plan
11. ☐ Five (5) sets of Public Storm Drain improvement plan
12. ☒ **Three (3) sets of Public Street Light improvement plan**
13. ☐ Three (3) sets of Signing and Striping improvement plan
14. ☒ **Three (3) sets of Fiber Optic plan (include Auto CAD electronic submittal)**
15. ☒ **Three (3) sets of Dry Utility plans within public right-of-way (at a minimum the plans must show existing and ultimate right-of-way, curb and gutter, proposed utility location including centerline dimensions, wall to wall clearances between proposed utility and adjacent public line, street work repaired per Standard Drawing No. 1306. Include Auto CAD electronic submittal)**
16. ☐ Three (3) sets of Traffic Signal improvement plan and One (1) copy of Traffic Signal Specifications with modified Special Provisions. Please contact the Traffic Division at (909) 395-2154 to obtain Traffic Signal Specifications.
17. ☒ **Two (2) copies of Water Quality Management Plan (WQMP), including one (1) copy of the approved Preliminary WQMP (PWQMP).**
18. ☐ One (1) copy of Hydrology/Drainage study
19. ☒ **One (1) copy of Soils/Geology report**
20. ☒ **Payment for Parcel Map processing fee**

21. ☒ **Three (3) copies of Parcel Map**

## MEMORANDUM

**TO:** **Edmelynne Hutter, Senior Planner**
**Planning Department**

**FROM:** **Mike Gerken, Deputy Fire Chief/Fire Marshal**
**Fire Department**

**DATE:** **May 24, 2021**

**SUBJECT:** **PMTT21-010 - A Parcel Map to subdivide 13.07 acres of land into three (3) parcels located at southeast corner of Jurupa Street and Milliken Avenue, within the Office/R-D and Warehouse/Distribution land use districts of the Toyota Business Park Specific Plan (APN(s): 0238-121-75). Related File(s): PDEV21-018.**

---

☒ The plan **does** adequately address Fire Department requirements at this time.

☒ Standard Conditions of Approval apply, as stated below.

---

**SITE AND BUILDING FEATURES:**

A. 2019 CBC Type of Construction: Type III-B

B. Type of Roof Materials: Panelized

C. Ground Floor Area(s): Building A = 113,067 Sq. Ft.
Building B = 48,205 Sq. Ft.

D. Number of Stories: 1 with Mezzanine

E. Total Square Footage: Building A = 118,067 Sq. Ft.
Building B = 50,705 Sq. Ft.

F. 2019 CBC Occupancy Classification(s): B/S1/F1

## CONDITIONS OF APPROVAL:

### 1.0 GENERAL

☒ 1.1 The following are the Ontario Fire Department ("Fire Department") requirements for this development project, based on the current edition of the California Fire Code (CFC), and the current versions of the Fire Prevention Standards ("Standards.") It is recommended that the applicant or developer transmit a copy of these requirements to the on-site contractor(s) and that all questions or concerns be directed to the Bureau of Fire Prevention, at (909) 395-2029. For copies of Ontario Fire Department Standards please access the City of Ontario website at www.ontarioca.gov/Fire/Prevention.

☒ 1.2 These Fire Department conditions of approval are to be included on any and all construction drawings.

### 2.0 FIRE DEPARTMENT ACCESS

☒ 2.1 Fire Department vehicle access roadways shall be provided to within 150 ft. of all portions of the exterior walls of the first story of any building, unless specifically approved. Roadways shall be paved with an all-weather surface and shall be a minimum of twenty-four (24) ft. wide. See Standard #B-004.

☒ 2.2 In order to allow for adequate turning radius for emergency fire apparatus, all turns shall be designed to meet the minimum twenty five feet (25') inside and forty-five feet (45') outside turning radius per Standard #B-005.

☒ 2.3 Fire Department access roadways that exceed one hundred and fifty feet (150') in length shall have an approved turn-around per Standard #B-002.

☒ 2.4 Access drive aisles which cross property lines shall be provided with CC&Rs, access easements, or reciprocating agreements, and shall be recorded on the titles of affected properties, and copies of same shall be provided at the time of building plan check.

☒ 2.5 "No Parking-Fire Lane" signs and /or red painted curbs with lettering are required to be installed in interior access roadways, in locations where vehicle parking would obstruct the minimum clear width requirement. Installation shall be per Standard #B-001.

☒ 2.6 Security gates or other barriers on fire access roadways shall be provided with a Knox brand key switch or padlock to allow Fire Department access. See Standards #B-003, B-004 and H-001.

☒ 2.7 Any time PRIOR to on-site combustible construction and/or storage, a minimum twenty-four (24) ft. wide circulating all weather access roads shall be provided to within 150 ft. of all portions of the exterior walls of the first story of any building, unless specifically approved by fire department and other emergency services.

## 3.0 WATER SUPPLY

☒ 3.1 The required fire flow per Fire Department standards, based on the 2019 California Fire Code, Appendix B, is 3750 gallons per minute (g.p.m.) for 4 hours at a minimum of 20 pounds per square inch (p.s.i.) residual operating pressure.

☒ 3.2 Off-site (public) fire hydrants are required to be installed on all frontage streets, at a minimum spacing of three hundred foot (300') apart, per Engineering Department specifications.

☒ 3.3 Buildings that exceed 100,000 square feet in floor area shall provide an onsite looped fire protection water line around the building(s.) The loops shall be required to have two or more points of connection from a public circulating water main.

☒ 3.4 The public water supply, including water mains and fire hydrants, shall be tested and approved by the Engineering Department and Fire Department prior to combustible construction to assure availability and reliability for firefighting purposes.

## 4.0 FIRE PROTECTION SYSTEMS

☒ 4.3 An automatic fire sprinkler system is required. The system design shall be in accordance with National Fire Protection Association (NFPA) Standard 13. All new fire sprinkler systems, except those in single family dwellings, which contain twenty (20) sprinkler heads or more shall be monitored by an approved listed supervising station. An application along with detailed plans shall be submitted, and a construction permit shall be issued by the Fire Department, prior to any work being done.

☒ 4.5 Fire Department Connections (FDC) shall be located on the address side of the building within one hundred fifty feet (150') of a public fire hydrant on the same side of the street. Provide identification for all fire sprinkler control valves and fire department connections per Standard #D-007. Raised curbs adjacent to Fire Department connection(s) shall be painted red, five feet either side, per City standards.

☒ 4.6 A fire alarm system is required. The system design shall be in accordance with National Fire Protection Association (NFPA) Standard 72. An application along with detailed plans shall be submitted, and a construction permit shall be issued by the Fire Department, prior to any work being done.

☒ 4.7 Portable fire extinguishers are required to be installed prior to occupancy per Standard #C-001. Please contact the Fire Prevention Bureau to determine the exact number, type and placement required.

## 5.0 BUILDING CONSTRUCTION FEATURES

☒ 5.1 The developer/general contractor is to be responsible for reasonable periodic cleanup of the development during construction to avoid hazardous accumulations of combustible trash and debris both on and off the site.

☒ 5.2 Approved numbers or addresses shall be placed on all new and existing buildings in such a position as to be plainly visible and legible from the street or road fronting the property. Homes

that do not front street shall be provided with an address entry sign at the street. Address numbers shall contrast with their background. See Section 9-1 6.06 of the Ontario Municipal Code and Standards #H-003 and #H-002.

☒ 5.6 Knox ® brand key-box(es) shall be installed in location(s) acceptable to the Fire Department. All Knox boxes shall be monitored for tamper by the building fire alarm system. See Standard #H-001 for specific requirements.

☒ 5.7 Placards shall be installed in acceptable locations on buildings that store, use or handle hazardous materials in excess of the quantities specified in the CFC. Placards shall meet the requirements of National Fire Protection Association (NFPA) Standard 704.

# CITY OF ONTARIO
## MEMORANDUM

**TO:** **Edmelynne Hutter, Senior Planner**

**FROM:** **Officer Bill Lee, Police Department**

**DATE:** **May 19, 2021**

**SUBJECT:** **PMTT21-010- A DEVELOPMENT PLAN TO CONSTRUCT TWO (2) INDUSTRIAL BUILDINGS TOTALING 168,772 SQUARE FEET, LOCATED AT THE SOUTHEAST CORNER OF JURUPA STREET AND MILLIKEN AVENUE. RELATED FILE: PDEV21-018.**

---

The "Standard Conditions of Approval" contained in Resolution No. 2017-027 apply. The applicant shall read and be thoroughly familiar with these conditions, including, but not limited to, the requirements below.

- Required lighting for all walkways, driveways, doorways, parking lots, hallways and other areas used by the public shall be provided. Lights shall operate via photosensor. Photometrics shall be provided to the Police Department and include the types of fixtures proposed and demonstrate that such fixtures meet the vandal-resistant requirement. Planned landscaping shall not obstruct lighting.
- Rooftop addresses shall be installed on the buildings as stated in the Standard Conditions. The numbers shall be at a minimum 6 feet tall and 2 foot wide, in reflective white paint on a flat black background, and oriented with the bottom of the numbers towards the addressed street. Associated letters shall also be included.
- The Applicant shall comply with construction site security requirements as stated in the Standard Conditions.

The Applicant is invited to contact Officer Bill Lee at (909) 408-1672 with any questions or concerns regarding these conditions.

RESOLUTION NO. _____

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF ONTARIO, CALIFORNIA, DENYING THE APPEAL OF THE PLANNING COMMISSION'S DECISION TO APPROVE FILE NO. PDEV21-018, A DEVELOPMENT PLAN TO CONSTRUCT TWO INDUSTRIAL BUILDINGS TOTALING 168,772 SQUARE FEET AND ASSOCIATED SITE IMPROVEMENTS ON 13.07 ACRES OF LAND LOCATED AT THE SOUTHEAST CORNER OF JURUPA STREET AND MILLIKEN AVENUE, AT 1425 SOUTH TOYOTA WAY, AND MAKING FINDINGS IN SUPPORT THEREOF—APN: 0238-121-75.

WHEREAS, MIG, INC. (hereinafter referred to as "Applicant") filed an Application for the approval of a Development Plan, File No. PDEV21-018, as described in the title of this Resolution (hereinafter referred to as "Application" or "Project"); and

WHEREAS, the Application applies to 13.07 acres of land generally located at the southeast corner of Jurupa Street and Milliken Avenue, at 1425 South Toyota Way within the Toyota Ontario Business Park Specific Plan zoning district, and is presently vacant; and

WHEREAS, the properties to the north are within the California Commerce Center Specific Plan zoning district and are developed with warehouse and commercial uses. The properties to the south are within the Entratter Industrial Specific Plan and the IG (General Industrial) zoning district and are developed with warehouse uses. The land to the east is the Interstate 15 freeway. The properties to the west are within the California Commerce Center Specific Plan and are developed with light industrial and business park uses; and

WHEREAS, the Applicant is proposing to construct two industrial buildings totaling 168,772 square feet, and associated site improvements, on the vacant land, at the northwest corner of the Specific Plan area; and

WHEREAS, the Application was submitted in conjunction with Tentative Parcel Map No. 20147, File No. PMTT21-010, to subdivide the Project site into three parcels to facilitate the development of the proposed Project with an industrial building on each vacant parcel (Parcels 2 and 3); and

WHEREAS, proposed Building A on Parcel 2 is the larger of the two new buildings, at a total of 118,067 square feet, and proposed Building B on Parcel 3 totals 50,705 square feet; and

WHEREAS, the Application is a project pursuant to the California Environmental Quality Act (Public Resources Code Section 21000 et seq.) ("CEQA") and an initial study has been prepared to analyze possible environmental impacts; and

WHEREAS, The Ontario Plan Environmental Impact Report (State Clearinghouse No. 2008101140) was certified on January 27, 2010, (hereinafter referred to as “Certified EIR”), in which development and use of the Project site was discussed; and

WHEREAS, the Planning Director of the City of Ontario prepared and approved for attachment to the certified Environmental Impact Report, an Addendum to the Certified EIR (hereinafter referred to as “EIR Addendum”) in accordance with the requirements of the California Environmental Quality Act of 1970, together with State and local guidelines implementing said Act, all as amended to date (collectively referred to as “CEQA”); and

WHEREAS, the environmental impacts of this project were thoroughly analyzed in the EIR Addendum, which concluded that implementation of the Project could result in a number of significant effects on the environment that were previously analyzed in the Certified EIR, and that the Certified EIR identified mitigation measures that would reduce each of those significant effects to a less-than-significant level; and

WHEREAS, the City's "Local Guidelines for the Implementation of the California Environmental Quality Act (CEQA)" provide for the use of a single environmental assessment in situations where the impacts of subsequent projects are adequately analyzed; and

WHEREAS, the Application is a project pursuant to the California Environmental Quality Act — Public Resources Code Section 21000 et seq. — (hereinafter referred to as "CEQA") and an EIR Addendum has been prepared to determine possible environmental impacts; and

WHEREAS, Ontario Development Code Table 2.02-1 (Review Matrix) grants the Planning Commission the responsibility and authority to review and act on the subject Application; and

WHEREAS, the Project has been reviewed for consistency with the Housing Element of the Policy Plan component of The Ontario Plan, as State Housing Element law (as prescribed in Government Code Sections 65580 through 65589.8) requires that development projects must be consistent with the Housing Element, if upon consideration of all its aspects, it is found to further the purposes, principals, goals, and policies of the Housing Element; and

WHEREAS, the Project is located within the Airport Influence Area of Ontario International Airport, which encompasses lands within parts of San Bernardino, Riverside, and Los Angeles Counties, and is subject to, and must be consistent with, the policies and criteria set forth in the Ontario International Airport Land Use Compatibility Plan (“ALUCP”), which applies only to jurisdictions within San Bernardino County, and addresses the noise, safety, airspace protection, and overflight impacts of current and future airport activity; and

WHEREAS, City of Ontario Development Code Division 2.03 (Public Hearings) prescribes the manner in which public notification shall be provided and hearing procedures to be followed, and all such notifications and procedures have been completed; and

WHEREAS, on December 10, 2021, and December 17, 2021, the Planning Department sent public hearing notices to property owners within 300 feet of the project site via first class mail and to Supporters Alliance for Environmental Responsibility (hereinafter referred to as Appellant) via email, respectively, informing the recipient of the Project's upcoming public hearing; and

WHEREAS, on December 20, 2021, the Development Advisory Board of the City of Ontario conducted a hearing to consider the Project, and concluded said hearing on that date, voting to issue Decision No. DAB21-061, recommending that the Planning Commission approve the Project; and

WHEREAS, on December 20, 2021, the Planning Commission of the City of Ontario conducted a hearing to consider the associated EIR Addendum and the Project, and concluded said hearing on that date, voting to issue Resolution No. PC21-088, approving the Project; and

WHEREAS, on December 30, 2021, the Appellant filed an Appeal, through email, of the Planning Commission's decision to approve File No. PDEV21-018; and

WHEREAS, the Ontario Development Code, Division 2.01 (Appeals), Sections 2.01.010.B.1 and B.2, state that an appeal shall include a statement identifying the specific action or decision of the Approving Authority that is being appealed, the specific grounds for the appeal, and the relief requested from the Appeal Authority; and that an appeal of an action shall be limited to those matters raised during the hearing and contained in the appeal statement; and

WHEREAS, the City Council is the Appeal Authority for Planning Commission decisions; and

WHEREAS, the basis of the Appellant's appeal is a statement that the Addendum to The Ontario Plan Environmental Impact Report prepared for the Project fails to comply with the California Environmental Quality Act; and

WHEREAS, the Appellant did not provide any facts or reasons to support their assertion that the Project Addendum fails to comply with the California Environmental Quality Act and did not include a relief request from the Appeal Authority; and

WHEREAS, the Appellant failed to raise their concerns during the public hearing or provide written notice of their concerns prior to the public hearing and therefore the City Council cannot consider the appeal statement; and

WHEREAS, City of Ontario Development Code Division 2.03 (Public Hearings) prescribes the manner in which public notification shall be provided and hearing procedures to be followed, and all such notifications and procedures have been completed; and

WHEREAS, on March 15, 2022, the City Council of the City of Ontario conducted a hearing to consider the Appeal, and concluded said hearing on that date; and

WHEREAS, all legal prerequisites to the adoption of this Resolution have occurred.

NOW, THEREFORE, IT IS HEREBY FOUND, DETERMINED, AND RESOLVED by the City Council of the City of Ontario, as follows:

SECTION 1. ***Environmental Determination and Findings.*** As the decision-making body for the Project, the City Council has reviewed and considered the information contained in the Addendum, the initial study, and the administrative record for the Project, including all written and oral evidence provided during the comment period. Based upon the facts and information contained in the Addendum, the initial study, and the administrative record, including all written and oral evidence presented to the City Council, the City Council finds as follows:

(1) The environmental impacts of the Project were reviewed in conjunction with an Addendum to The Ontario Plan Environmental Impact Report (State Clearinghouse No. 2008101140), certified by the Ontario City Council on January 27, 2010, in conjunction with File No. PGPA06-001; and

(2) The EIR Addendum and administrative record have been completed in compliance with CEQA, the State CEQA Guidelines, and the City of Ontario Local CEQA Guidelines; and

(3) The City's "Guidelines for the Implementation of the California Environmental Quality Act (CEQA)" provide for the use of a single environmental assessment in situations where the impacts of subsequent projects are adequately analyzed. This Application introduces no new significant environmental impacts; and

(4) All previously adopted mitigation measures shall be a condition of project approval, as they are applicable to the Project, and are incorporated herein by this reference; and

(5) The EIR Addendum contains a complete and accurate reporting of the environmental impacts associated with the Project, and reflects the independent judgment of the City Council; and

(6) There is no substantial evidence in the administrative record supporting a fair argument that the project may result in significant environmental impacts.

SECTION 2. ***Subsequent or Supplemental Environmental Review Not Required.*** Based on the EIR Addendum, all related information presented to the City Council, and the specific findings set forth in Section 1, above, the City Council finds that the preparation of a subsequent or supplemental Certified EIR is not required for the Project, as the Project:

(1) Does not constitute substantial changes to the Certified EIR that will require major revisions to the Certified EIR due to the involvement of new significant environmental effects or a substantial increase in the severity of previously identified significant effects; and

(2) Does not constitute substantial changes with respect to the circumstances under which the Certified EIR was prepared, that will require major revisions to the Certified EIR due to the involvement of new significant environmental effects or a substantial increase in the severity of the previously identified significant effects; and

(3) Does not contain new information of substantial importance that was not known and could not have been known with the exercise of reasonable diligence at the time the Certified EIR was certified/adopted, that shows any of the following:

(a) The Project will have one or more significant effects not discussed in the Certified EIR; or

(b) Significant effects previously examined will be substantially more severe than shown in the Certified EIR; or

(c) Mitigation measures or alternatives previously found not to be feasible would in fact be feasible and would substantially reduce one or more significant effects of the Project, but the City declined to adopt such measures; or

(d) Mitigation measures or alternatives considerably different from those analyzed in the Certified EIR would substantially reduce one or more significant effects on the environment, but which the City declined to adopt

SECTION 3. ***Housing Element Compliance.*** Pursuant to the requirements of California Government Code Chapter 3, Article 10.6, commencing with Section 65580, as the decision-making body for the Project, the City Council finds that based upon the facts and information contained in the Application and supporting documentation, at the time of Project implementation, the project is consistent with the Housing Element of the Policy Plan (General Plan) component of The Ontario Plan, as the project site is not one of the properties in the Available Land Inventory contained in Table A-3 (Available Land by Planning Area) of the Housing Element Technical Report Appendix.

SECTION 4. ***Ontario International Airport Land Use Compatibility Plan ("ALUCP") Compliance.*** The California State Aeronautics Act (Public Utilities Code Section 21670 et seq.) requires that an Airport Land Use Compatibility Plan be prepared for all public use airports in the State; and requires that local land use plans and individual development proposals must be consistent with the policies set forth in the adopted Airport Land Use Compatibility Plan. On April 19, 2011, the City Council of the City of Ontario approved and adopted the Ontario International Airport Land use Compatibility Plan ("ALUCP"), establishing the Airport Influence Area for Ontario International Airport ("ONT"), which encompasses lands within parts of San Bernardino, Riverside, and Los Angeles Counties, and limits future land uses and development within the Airport Influence Area, as they relate to noise, safety, airspace protection, and overflight impacts of current and future airport activity. As the decision-making body for the Project, the City Council has reviewed and considered the facts and information contained in the Application and supporting documentation against the ALUCP compatibility factors, including [1] Safety Criteria (ALUCP Table 2-2) and Safety Zones (ALUCP Map 2-2), [2]

Noise Criteria (ALUCP Table 2-3) and Noise Impact Zones (ALUCP Map 2-3), [3] Airspace protection Zones (ALUCP Map 2-4), and [4] Overflight Notification Zones (ALUCP Map 2-5). As a result, the City Council, therefore, finds and determines that the Project, when implemented in conjunction with the conditions of approval, will be consistent with the policies and criteria set forth within the ALUCP.

SECTION 5. ***Concluding Facts and Reasons.*** Based upon the substantial evidence presented to the City Council during the above-referenced hearing, and upon the specific findings set forth in Sections 1 and 4, above, the City Council hereby concludes as follows:

(1) ***The proposed development at the proposed location is consistent with the goals, policies, plans and exhibits of the Vision, Policy Plan (General Plan), and City Council Priorities components of The Ontario Plan.*** The proposed Project is located within the Industrial land use district of the Policy Plan Land Use Map, and the Toyota Ontario Business Park Specific Plan zoning district. The development standards and conditions under which the proposed Project will be constructed and maintained, is consistent with the goals, policies, plans, and exhibits of the Vision, Policy Plan (General Plan), and City Council Priorities components of The Ontario Plan.

(2) ***The proposed development is compatible with those on adjoining sites in relation to location of buildings, with particular attention to privacy, views, any physical constraint identified on the site and the characteristics of the area in which the site is located.*** The Project has been designed consistent with the requirements of the City of Ontario Development Code and the Toyota Ontario Business Park Specific Plan zoning district, including standards relative to the particular land use proposed (industrial), as-well-as building intensity, building and parking setbacks, building height, number of off-street parking and loading spaces, on-site and off-site landscaping, and fences, walls and obstructions.

(3) ***The proposed development will complement and/or improve upon the quality of existing development in the vicinity of the project and the minimum safeguards necessary to protect the public health, safety and general welfare have been required of the proposed project.*** The Development Advisory Board has required certain safeguards, and impose certain conditions of approval, which have been established to ensure that: [i] the purposes of the Toyota Ontario Business Park Specific Plan are maintained; [ii] the project will not endanger the public health, safety or general welfare; [iii] the project will not result in any significant environmental impacts; [iv] the project will be in harmony with the area in which it is located; and [v] the project will be in full conformity with the Vision, City Council Priorities and Policy Plan components of The Ontario Plan, and the California Commerce Center Specific Plan.

(4) ***The proposed development is consistent with the development standards and design guidelines set forth in the Development Code, or applicable specific plan or planned unit development*****.** The proposed Project has been reviewed for consistency with the general development standards and guidelines of the Toyota Ontario Business Park Specific Plan that are applicable to the proposed Project, including building intensity, building and parking setbacks, building height, amount of off-street

parking and loading spaces, parking lot dimensions, design and landscaping, bicycle parking, on-site landscaping, and fences and walls, as-well-as those development standards and guidelines specifically related to the particular land use being proposed (industrial). As a result of this review, the Development Advisory Board has determined that the Project, when implemented in conjunction with the conditions of approval, will be consistent with the development standards and guidelines described in the California Commerce Center Specific Plan.

(5) ***The Ontario Development Code specifies the Appeal process and requirements for filing an appeal.*** The Ontario Development Code requires that an appeal shall include a statement identifying the specific action or decision of the Approving Authority that is being appealed, the specific grounds for the appeal, and the relief requested from the Appeal Authority; and that an appeal of an action shall be limited to those matters raised during the hearing and contained in the appeal statement.

(6) ***The submitted Appeal does not include specific grounds for the appeal and the relief requested from the Appeal Authority.*** The submitted Appeal did not provide any specific facts or reasons to support their assertion that the Project Addendum fails to comply with the California Environmental Quality Act and did not include a relief request from the Appeal Authority.

(7) ***The Appeal assertion that the Project Addendum fails to comply with the California Environmental Quality Act was not raised during the public hearing.*** The Appellant failed to raise their concerns regarding the Project Addendum compliance with the California Environmental Quality Act during the public hearing or provide written notice of their concerns prior to the public hearing.

SECTION 6. ***City Council Action.*** Based upon the findings and conclusions set forth in Sections 1 through 5, above, the City Council hereby UPHOLDS THE PLANNING COMMISSION'S PREVIOUS ACTION ON THE PROJECT AND DENIES THE APPEAL, and based upon the entire record of proceedings before it and all information received, hereby approves the herein described Application, subject to each and every condition set forth in the Department reports attached hereto as "Attachment A," and incorporated herein by this reference.

SECTION 7. ***Indemnification.*** The Applicant shall agree to defend, indemnify and hold harmless, the City of Ontario or its agents, officers, and employees from any claim, action or proceeding against the City of Ontario or its agents, officers or employees to attack, set aside, void, or annul this approval. The City of Ontario shall promptly notify the applicant of any such claim, action, or proceeding, and the City of Ontario shall cooperate fully in the defense.

SECTION 8. ***Custodian of Records.*** The documents and materials that constitute the record of proceedings on which these findings have been based are located at the City of Ontario City Hall, 303 East "B" Street, Ontario, California 91764. The custodian for these records is the City Clerk of the City of Ontario.

The City Clerk shall certify as to the adoption of this Resolution.

PASSED, APPROVED, AND ADOPTED this 15th day of March 2022.

---

The Planning Department, Land Development Section, conditions of approval applicable to the above-described Project, are listed below. The Project shall comply with each condition of approval listed below:

**1.0 Standard Conditions of Approval.** The project shall comply with the *Standard Conditions for New Development*, adopted by City Council Resolution No. 2017-027 on April 18, 2017. A copy of the *Standard Conditions for New Development* may be obtained from the Planning Department or City Clerk/Records Management Department.

**2.0 Special Conditions of Approval.** In addition to the *Standard Conditions for New Development* identified in condition no. 1.0, above, the project shall comply with the following special conditions of approval:

**2.1** Time Limits.

**(a)** Development Plan approval shall become null and void 2 years following the effective date of application approval, unless a building permit is issued and construction is commenced, and diligently pursued toward completion, or a time extension has been approved by the Planning Director. This condition does not supersede any individual time limits specified herein, or any other departmental conditions of approval applicable to the Project, for the performance of specific conditions or improvements.

**2.2** General Requirements. The Project shall comply with the following general requirements:

**(a)** All construction documentation shall be coordinated for consistency, including, but not limited to, architectural, structural, mechanical, electrical, plumbing, landscape and irrigation, grading, utility and street improvement plans. All such plans shall be consistent with the approved entitlement plans on file with the Planning Department.

**(b)** The project site shall be developed in conformance with the approved plans on file with the City. Any variation from the approved plans must be reviewed and approved by the Planning Department prior to building permit issuance.

**(c)** The herein-listed conditions of approval from all City departments shall be included in the construction plan set for project, which shall be maintained on site during project construction.

**2.3** Architecture Treatment and Building Design.

**(a)** At locations where changes in parapet wall height meet, the taller parapet must return into the building for a minimum distance of 6 FT, so that the actual thickness of the parapet wall cannot be observed or readily discerned.

**(b)** Roof access ladders shall be located on the inside of the building.

**(c)** All building drainage gutters, downspouts, vents, etc., shall be completely concealed from public view or shall be architecturally compatible (decorative) with the exterior building design and color.

**2.4** Landscaping.

**(a)** The Project shall provide and continuously maintain landscaping and irrigation systems in compliance with the provisions of Ontario Development Code Division 6.05 (Landscaping).

**(b)** Comply with the conditions of approval of the Planning Department; Landscape Planning Division.

**(c)** Landscaping shall not be installed until the Landscape and Irrigation Construction Documentation Plans required by Ontario Development Code Division 6.05 (Landscaping) have been approved by the Landscape Planning Division.

**(d)** Changes to approved Landscape and Irrigation Construction Documentation Plans, which affect the character or quantity of the plant material or irrigation system design, shall be resubmitted for approval of the revision by the Landscape Planning Division, prior to the commencement of the changes.

**2.5** Walls and Fences. All Project walls and fences shall comply with the requirements of Ontario Development Code Division 6.02 (Walls, Fences and Obstructions).

**2.6** Parking, Circulation and Access.

**(a)** The Project shall comply with the applicable off-street parking, loading and lighting requirements of City of Ontario Development Code Division 6.03 (Off-Street Parking and Loading).

**(b)** All drive approaches shall be provided with an enhanced pavement treatment. The enhanced paving shall extend from the back of the approach apron, into the site, to the first intersecting drive aisle or parking space.

**(c)** Areas provided to meet the City's parking requirements, including off-street parking and loading spaces, access drives, and maneuvering areas, shall not be used for the outdoor storage of materials and equipment, nor shall it be used for any other purpose than parking.

**(d)** The required number of off-street parking spaces and/or loading spaces shall be provided at the time of site and/or building occupancy. All parking and loading spaces shall be maintained in good condition for the duration of the building or use.

**(e)** Parking spaces specifically designated and conveniently located for use by the physically disabled shall be provided pursuant to current accessibility regulations contained in State law (CCR Title 24, Part 2, Chapters 2B71, and CVC Section 22507.8).

**(f)** Bicycle parking facilities, including bicycle racks, lockers, and other secure facilities, shall be provided in conjunction with development projects pursuant to current regulations contained in CALGreen (CAC Title 24, Part 11).

**2.7** Outdoor Loading and Storage Areas.

**(a)** Loading facilities shall be designed and constructed pursuant to Development Code Division 6.03 (Off-Street Parking and Loading).

**(b)** Areas designated for off-street parking, loading, and vehicular circulation and maneuvering, shall not be used for the outdoor storage of materials or equipment.

**(c)** Outdoor loading and storage areas, and loading doors, shall be screened from public view pursuant to the requirements of Development Code Paragraph 6.02.025.A.2 (Screening of Outdoor Loading and Storage Areas, and Loading Doors) Et Seq.

**(d)** Outdoor loading and storage areas shall be provided with gates that are view-obstructing by one of the following methods:

**(i)** Construct gates with a perforated metal sheet affixed to the inside of the gate surface (50 percent screen); or
**(ii)** Construct gates with minimum one-inch square tube steel pickets spaced at maximum 2-inches apart.

**(e)** The minimum gate height for screen wall openings shall be established based upon the corresponding wall height, as follows:

| ***Screen Wall Height*** | ***Minimum Gate Height*** |
|---|---|
| 14 feet: | 10 feet |
| 12 feet: | 9 feet |
| 10 feet: | 8 feet |

| | |
|---|---|
| 8 feet: | 8 feet |
| 6 feet: | 6 feet |

**2.8** Site Lighting.

**(a)** All off-street parking facilities shall be provided with nighttime security lighting pursuant to Ontario Municipal Code Section 4-11.08 (Special Residential Building Provisions) and Section 4-11.09 (Special Commercial/Industrial Building Provisions), designed to confine emitted light to the parking areas. Parking facilities shall be lighted from sunset until sunrise, daily, and shall be operated by a photocell switch.

**(b)** Unless intended as part of a master lighting program, no operation, activity, or lighting fixture shall create illumination on any adjacent property.

**2.9** Mechanical and Rooftop Equipment.

**(a)** All exterior roof-mounted mechanical, heating and air conditioning equipment, and all appurtenances thereto, shall be completely screened from public view by parapet walls or roof screens that are architecturally treated so as to be consistent with the building architecture.

**(b)** All ground-mounted utility equipment and structures, such as tanks, transformers, HVAC equipment, and backflow prevention devices, shall be located out of view from a public street, or adequately screened through the use of landscaping and/or decorative low garden walls.

**2.10** Security Standards. The Project shall comply with all applicable requirements of Ontario Municipal Code Title 4 (Public Safety), Chapter 11 (Security Standards for Buildings).

**2.11** Signs. All Project signage shall comply with the requirements of Ontario Development Code Division 8.1 (Sign Regulations).

**2.12** Sound Attenuation. The Project shall be constructed and operated in a manner so as not to exceed the maximum interior and exterior noised levels set forth in Ontario Municipal Code Title 5 (Public Welfare, Morals, and Conduct), Chapter 29 (Noise).

**2.13** Covenants, Conditions and Restrictions (CC&Rs)/Mutual Access and Maintenance Agreements.

**(a)** CC&Rs shall be prepared for the Project and shall be recorded prior to the issuance of a building permit.

**(b)** The CC&Rs shall be in a form and contain provisions satisfactory to the City. The articles of incorporation for the property owners association and the CC&Rs shall be reviewed and approved by the City.

**(c)** CC&Rs shall ensure reciprocal parking and access between parcels.

**(d)** CC&Rs shall ensure reciprocal parking and access between parcels, and common maintenance of:

**(i)** Landscaping and irrigation systems within common areas;
**(ii)** Landscaping and irrigation systems within parkways adjacent to the project site, including that portion of any public highway right-of-way between the property line or right-of-way boundary line and the curb line and also the area enclosed within the curb lines of a median divider (Ontario Municipal Code Section 7-3.03), pursuant to Ontario Municipal Code Section 5-22-02;
**(iii)** Shared parking facilities and access drives; and
**(iv)** Utility and drainage easements.

**(e)** CC&Rs shall include authorization for the City's local law enforcement officers to enforce City and State traffic and penal codes within the project area.

**(f)** The CC&Rs shall grant the City of Ontario the right of enforcement of the CC&R provisions.

**(g)** A specific methodology/procedure shall be established within the CC&Rs for enforcement of its provisions by the City of Ontario, if adequate maintenance of the development does not occur, such as, but not limited to, provisions that would grant the City the right of access to correct maintenance issues and assess the property owners association for all costs incurred.

**2.14** Environmental Review.

**(a)** The environmental impacts of this project were reviewed in conjunction with an **Addendum to The Ontario Plan Environmental Impact Report** (State Clearinghouse No. 2008101140). This application introduces no new significant environmental impacts. The City's "Guidelines for the Implementation of the California Environmental Quality Act (CEQA)" provide for the use of a single environmental assessment in situations where the impacts of subsequent projects are adequately analyzed. This Application introduces no new significant environmental impacts. All previously adopted mitigation measures are a condition of project approval and are incorporated herein by this reference. All previously adopted mitigation measures shall be a condition of project approval, as they are applicable, and are incorporated herein by this reference.

**(b)** If human remains are found during project grading/excavation/ construction activities, the area shall not be disturbed until any required investigation is completed by the County Coroner and Native American consultation has been completed (if deemed applicable).

**(c)** If any archeological or paleontological resources are found during project grading/excavation/construction, the area shall not be disturbed until the significance of the resource is determined. If determined to be significant, the resource shall be recovered by a qualified archeologist or paleontologist consistent with current standards and guidelines, or other appropriate measures implemented.

**2.15** Indemnification. The applicant shall agree to defend, indemnify and hold harmless, the City of Ontario or its agents, officers, and employees from any claim, action or proceeding

against the City of Ontario or its agents, officers or employees to attack, set aside, void or annul any approval of the City of Ontario, whether by its City Council, Planning Commission or other authorized board or officer. The City of Ontario shall promptly notify the applicant of any such claim, action or proceeding, and the City of Ontario shall cooperate fully in the defense.

**2.16** Additional Fees.

**(a)** Within 5 days following final application approval, the Notice of Determination ("NOD") filing fee shall be provided to the Planning Department. The fee shall be paid by check, made payable to the "Clerk of the Board of Supervisors", which shall be forwarded to the San Bernardino County Clerk of the Board of Supervisors, along with all applicable environmental forms/notices, pursuant to the requirements of the California Environmental Quality Act ("CEQA"). Failure to provide said fee within the time specified may result in a 180-day extension to the statute of limitations for the filing of a CEQA lawsuit.

**(b)** After the Project's entitlement approval, and prior to issuance of final building permits, the Planning Department's Plan Check and Inspection fees shall be paid at the rate established by resolution of the City Council.

**Revision #2**

FROM: Edmelynne Hutter, Senior Planner

DATE: October 07, 2021

SUBJECT: FILE #: PDEV21-018 Finance Acct#:

The following project has been resubmitted for review. Please send one (1) copy and email one (1) copy of your DAB report to the Planning Department by .

**PROJECT DESCRIPTION:** A Development Plan to construct two (2) industrial buildings totaling 168,772 square feet on 13.07 acres of land located at southeast corner of Jurupa Street and Milliken Avenue, within the Office/R-D and Warehouse/Distribution land use districts of the Toyota Business Park Specific Plan (APN(s): 0238-121-75). Related File(s): PMTT21-010.

☒ The plan does adequately address the departmental concerns at this time.

- ☐ No comments
- ☐ See previous report for Conditions
- ☒ Report attached (1 copy and email 1 copy)
- ☒ Standard Conditions of Approval apply

☐ The plan does not adequately address the departmental concerns.

- ☐ The conditions contained in the attached report must be met prior to scheduling for Development Advisory Board.

|---|---|
| ☒ | **Preliminary Plans (dated 6/12/21) meets the Standard Conditions for New Development and have been approved with the consideration that the following conditions below be met upon submittal of the landscape construction documents.** |
| ☐ | **Preliminary Plans (dated) have not been approved. Corrections noted below are required prior to Preliminary Landscape Plan approval.** |

**A RESPONSE SHEET IS REQUIRED WITH RESUBMITTAL OR PLANS WILL BE RETURNED AS INCOMPLETE.**
**Landscape construction plans with plan check number may be emailed to: landscapeplancheck@ontarioca.gov**
**DIGITAL SUBMITTALS MUST BE 10MB OR LESS.**

Civil/ Site Plans

1. Provide an arborist report and tree inventory for existing trees include genus, species, trunk diameter, canopy width and condition. Show and note existing trees in good condition to remain and note trees proposed to be removed. Include existing trees within 15' of adjacent property that would be affected by new walls, footings or on-site tree planting. Add tree protection notes on construction and demo plans to protect trees to remain. Replacement and mitigation for removed trees shall be equal to trunk diameter of heritage trees removed per the Development Code Tree Preservation Policy and Protection Measures, section 6.05.020.
2. Locate the employee break areas in an open area near the building rather than the parking lot.
3. Stormwater infiltration devices located in landscape areas shall be reviewed and plans approved by the Landscape Planning Division prior to permit issuance. Any stormwater devices in parkway areas shall not displace street trees.
4. Show transformers set back 5' from paving all sides. Coordinate with landscape plans.
5. Show backflow devices set back 4' from paving all sides. Locate on level grade
6. Civil Plans: Note for compaction to be no greater than 85% at landscape areas. All finished grades at 1 ½" below finished surfaces. Slopes to be maximum 3:1.
7. Dimension all planters to have a minimum 5' wide inside dimension.
8. Dimension, show and call out for step-outs at parking spaces adjacent to planters; a 12" wide monolithic concrete curb, DG paving or pavers with edging.
9. Show outdoor employee break area with table or bench and shade trees on the south and west sides.
10. Add Note to Grading Plans: Landscape areas where compaction has occurred due to grading

activities and where trees or stormwater infiltration areas are located shall be loosened by soil fracturing. For trees, a 12'x12'x18" deep area; for stormwater infiltration, the entire area shall be loosened. Add the following information on the plans: The backhoe method of soil fracturing shall be used to break up compaction. A 4" layer of Compost is spread over the soil surface before fracturing is begun. The backhoe shall dig into the soil lifting and then drop the soil immediately back into the hole. The bucket then moves to the adjacent soil and repeats. The Compost falls into the spaces between the soil chunks created. Fracturing shall leave the soil surface quite rough with large soil clods. These must be broken by additional tilling. Tilling in more Compost to the surface after fracturing per the soil report will help create an A horizon soil. Imported or reused Topsoil can be added on top of the fractured soil as needed for grading. The Landscape Architect shall be present during this process and provide certification of the soil fracturing. For additional reference, see Urban Tree Foundation – Planting Soil Specifications.

Landscape Plans

11. Provide an arborist report and tree inventory as noted in #1.
12. Locate the employee break areas in an open area near the building rather than the parking lot.
13. Quercus agrifolia shall be planted in planter spaces greater than 8' wide; use Quercus ilex in planter 5' wide.
14. Show backflow devices with 36" high strappy leaf shrub screening and trash enclosures and transformers, a 4'-5' high evergreen hedge screening. Do not encircle utility, show as masses and duplicate masses in other locations on regular intervals.
15. Locate light standards, fire hydrants, water and sewer lines to not conflict with required tree locations. Coordinate civil plans with landscape plans
16. Show all utilities on the landscape plans. Coordinate so utilities are clear of tree locations.
17. Detail irrigation dripline outside of mulched root zone.
18. Show minimum on-site tree sizes per the Landscape Development standards, see the Landscape Planning website. 5% 48" box, 10% 36 box, 30% 24" box, 55% 15 gallon.
19. After a project's entitlement approval, the applicant shall pay all applicable fees for landscape plan check and inspections at a rate established by resolution of the City Council.
20. Landscape construction plans with building permit number for plan check may be emailed to: landscapeplancheck@ontarioca.gov

Last Revised: 11/24/2021

**THIS PROJECT SHALL COMPLY WITH THE REQUIREMENTS SET FORTH IN THE GENERAL STANDARD CONDITIONS OF APPROVAL ADOPTED BY THE CITY COUNCIL (RESOLUTION NO. 2017-027) AND THE PROJECT SPECIFIC CONDITIONS OF APPROVAL SPECIFIED IN HEREIN. ONLY APPLICABLE CONDITIONS OF APPROVAL ARE CHECKED. THE APPLICANT SHALL BE RESPONSIBLE FOR THE COMPLETION OF ALL APPLICABLE CONDITIONS OF APPROVAL PRIOR TO PARCEL MAP APPROVAL, ISSUANCE OF PERMITS AND/OR OCCUPANCY CLEARANCE, AS SPECIFIED IN THIS REPORT.**

## 1. PRIOR TO PARCEL MAP APPROVAL, APPLICANT SHALL:

Check When Complete

☐ 1.01 Dedicate to the City of Ontario, the right-of-way, described below: ☐

_____ feet on _____

Property line corner 'cut-back' required at the intersection of _____ and _____.

☐ 1.02 Dedicate to the City of Ontario, the following easement(s): _____ ☐

_____

☐ 1.03 Restrict vehicular access to the site as follows: _____ ☐

☒ **1.04 Vacate the following street(s) and/or easement(s):** ☐

**A. All interfering on-site easements shall be quitclaimed, vacated, and/or submit non-interference letter from affected owner/utility company.**

☐ 1.05 Submit a copy of a recorded private reciprocal use agreement or easement. The agreement or easement shall ensure, at a minimum, common ingress and egress and joint maintenance of all common access areas and drive aisles. ☐

☒ **1.06 Provide (original document) Covenants, Conditions and Restrictions (CC&Rs) as applicable to the project and as approved by the City Attorney and the Engineering and Planning Departments, ready for recordation with the County of San Bernardino. The CC&Rs shall provide for, but not be limited to, common ingress and egress, joint maintenance responsibility for all common access improvements, common facilities, parking areas, utilities, median and landscaping improvements and drive approaches, in addition to maintenance requirements established in the Water Quality Management Plan (WQMP), as applicable to the project. The CC&Rs shall also address the maintenance and repair responsibility for public improvements/utilities (sewer, water, storm drain, recycled water, etc.) located within open space/easements. In the event of any maintenance or repair of these facilities, the City shall only restore disturbed areas to current City Standards.** ☐

☐ 1.07 For all development occurring south of the Pomona Freeway (60-Freeway) and within the specified boundary limits (per Boundary Map found at *http://tceplumecleanup.com/*), the property developer/owner is made aware of the South Archibald Trichloroethylene (TCE) Plume "Disclosure Letter". Property owner may wish to provide this Letter as part of the Real Estate Transfer Disclosure requirements under California Civil Code Section 1102 et seq. This may include notifications in the Covenants, Conditions and Restrictions (CC&Rs) or other documents related to property transfer and disclosures. Additional information on the plume is available from the Santa Ana Regional Water Quality Control Board at *http://geotracker.waterboards.ca.gov/profile_report?global_id=T10000004658.* ☐

☐ 1.08 File an application for Reapportionment of Assessment, together with payment of a reapportionment processing fee, for each existing assessment district listed below. Contact the Financial Services Department at (909) 395-2124 regarding this requirement. ☐

(1) _____

(2) _____

☒ **1.09** **Prepare a fully executed Subdivision Agreement (on City approved format and forms) with accompanying security as required, or complete all public improvements.** ☐

☒ **1.10** **Provide a monument bond (i.e. cash deposit) in an amount calculated by the City's approved cost estimate spreadsheet (available for download on the City's website: www.ci.ontario.ca.us) or as specified in writing by the applicant's Registered Engineer or Licensed Land Surveyor of Record and approved by the City Engineer, whichever is greater.** ☐

☒ **1.11** **Provide a preliminary title report current to within 30 days.** ☐

☐ 1.12 File an application, together with an initial deposit (if required), to establish a Community Facilities District (CFD) pursuant to the Mello-Roos Community Facilities District Act of 1982. The application and fee shall be submitted a minimum of four (4) months prior to final subdivision map approval, and the CFD shall be established prior to final subdivision map approval or issuance of building permits, whichever occurs first. The CFD shall be established upon the subject property to provide funding for various City services. An annual special tax shall be levied upon each parcel or lot in an amount to be determined. The special tax will be collected along with annual property taxes. The City shall be the sole lead agency in the formation of any CFD. Contact Investment and Revenue Resources at (909) 395-2341 to initiate the CFD application process. ☐

☐ 1.13 Ontario Ranch Developments: ☐

☐ 1) Provide evidence of final cancellation of Williamson Act contracts associated with this tract, prior to approval of any final subdivision map. Cancellation of contracts shall have been approved by the City Council.

☐ 2) Provide evidence of sufficient storm water capacity availability equivalents (Certificate of Storm Water Treatment Equivalents).

☐ 3) Provide evidence of sufficient water availability equivalents (Certificate of Net MDD Availability).

☒ **1.14** **Other conditions:** ☐

**A. Provide private easements for utilities, cross lot drainage, blanket emergency access and reciprocal access across all parcels in favor of all parcels (as needed).**
**B. Provide a private access easement across Parcel 1/Toyota Way (private) in favor of Parcels 2 and 3 for ingress and access purposes.**

## 2. PRIOR TO ISSUANCE OF ANY PERMITS, APPLICANT SHALL:

**A. GENERAL**
**( Permits includes Grading, Building, Demolition and Encroachment )** ☐

☒ **2.01** **Record Parcel Map No. 20147 pursuant to the Subdivision Map Act and in accordance with the City of Ontario Municipal Code.**

☒ **2.02** **Submit a PDF of the recorded map to the City Engineer's office.** ☐

☐ 2.03 Note that the subject parcel is a recognized parcel in the City of Ontario per_____. ☐

☐ 2.04 Note that the subject parcel is an 'unrecognized' parcel in the City of Ontario and shall require a Certificate of Compliance to be processed unless a deed is provided confirming the existence of the parcel prior to the date of March 4, 1972. ☐

☐ 2.05 Apply for a: ☐

☐ Certificate of Compliance with a Record of Survey;

☐ Lot Line Adjustment (Record a Conforming Deed with the County of San Bernardino within six

months of the recordation of the Lot Line Adjustment to conform the new LLA legal description. Submit a copy of the recorded Conforming Deed to the Engineering Department.);

☐ Make a Dedication of Easement.

☐ 2.06 Provide (original document) Covenants, Conditions and Restrictions (CC&R's), as applicable to the project, and as approved by the City Attorney and the Engineering and Planning Departments, ready for recordation with the County of San Bernardino. The CC&R's shall provide for, but not be limited to, common ingress and egress, joint maintenance of all common access improvements, common facilities, parking areas, utilities and drive approaches in addition to maintenance requirements established in the Water Quality Management Plan ( WQMP), as applicable to the project. ☐

☐ 2.07 For all development occurring south of the Pomona Freeway (60-Freeway) and within the specified boundary limits (per Boundary Map found at http://tceplumecleanup.com/), the property developer/owner is made aware of the South Archibald Trichloroethylene (TCE) Plume "Disclosure Letter". Property owner may wish to provide this Letter as part of the Real Estate Transfer Disclosure requirements under California Civil Code Section 1102 et seq. This may include notifications in the Covenants, Conditions and Restrictions (CC&Rs) or other documents related to property transfer and disclosures. Additional information on the plume is available from the Santa Ana Regional Water Quality Control Board at http://geotracker.waterboards.ca.gov/profile_report?global_id=T10000004658. ☐

☐ 2.08 Submit a soils/geology report. ☐

☐ 2.09 Other Agency Permit/Approval: Submit a copy of the approved permit and/or other form of approval of the project from the following agency or agencies: ☐

- ☐ State of California Department of Transportation (Caltrans)
- ☐ San Bernardino County Road Department (SBCRD)
- ☐ San Bernardino County Flood Control District (SBCFCD)
- ☐ Federal Emergency Management Agency (FEMA)
- ☐ Cucamonga Valley Water District (CVWD) for sewer/water service
- ☐ United States Army Corps of Engineers (USACE)
- ☐ California Department of Fish & Game
- ☐ Inland Empire Utilities Agency (IEUA)
- ☐ Other: _____

☐ 2.10 Dedicate to the City of Ontario the right-of-way described below: ☐

_____ feet on _____

Property line corner 'cut-back' required at the intersection of _____ and _____.

☐ 2.11 Dedicate to the City of Ontario the following easement(s):_____ ☐

_____

☐ 2.12 Vacate the following street(s) and/or easement(s): ☐

A. All interfering on-site easements shall be quitclaimed, vacated, and/or submit non-interference letter from affected owner/utility company.

☐ 2.13 Ontario Ranch Developments: ☐

☐ 1) Submit a copy of the permit from the San Bernardino County Health Department to the Engineering Department and the Ontario Municipal Utilities Company (OMUC) for the destruction/abandonment of the on-site water well. The well shall be destroyed/abandoned in accordance with the San Bernardino County Health Department guidelines.

☐ 2) Make a formal request to the City of Ontario Engineering Department for the proposed temporary

use of an existing agricultural water well for purposes other than agriculture, such as grading, dust control, etc. Upon approval, the Applicant shall enter into an agreement with the City of Ontario and pay any applicable fees as set forth by said agreement.

☐ 3) Design proposed retaining walls to retain up to a maximum of three (3) feet of earth. In no case shall a wall exceed an overall height of nine (9) feet (i.e. maximum 6-foot high wall on top of a maximum 3-foot high retaining wall.

☐ 2.14 Submit a security deposit to the Engineering Department to guarantee construction of the public improvements required herein valued at _____% of the approved construction cost estimate. Security deposit shall be in accordance with the City of Ontario Municipal Code. Security deposit will be eligible for release, in accordance with City procedure, upon completion and acceptance of said public improvements. ☐

☒ **2.15 The applicant/developer shall submit all necessary survey documents prepared by a Licensed Surveyor registered in the State of California detailing all existing survey monuments in and around the project site. These documents are to be reviewed and approved by the City Survey Office.** ☐

☒ **2.16 Pay all Development Impact Fees (DIF) to the Building Department. Storm Drain Development Impact Fee, approximately $270,471, shall be paid to the Building Department. Final fee shall be determined based on the approved site plan.** ☐

☐ 2.17 Other conditions: _____ ☐

## B. PUBLIC IMPROVEMENTS
**(See attached Exhibit 'A' for plan check submittal requirements.)**

☒ 2.17 **Design and construct full public improvements in accordance with the City of Ontario Municipal Code, current City standards and specifications, master plans and the adopted specific plan for the area, if any. These public improvements shall include, but not be limited to, the following (checked boxes):**

| Improvement | Jurupa Street | Milliken Avenue | Street 3 | Street 4 |
|---|---|---|---|---|
| Curb and Gutter | ☐ New; ___ ft. from C/L<br>☐ Replace damaged<br>☐ Remove and replace | ☐ New; ___ ft. from C/L<br>☐ Replace damaged<br>☐ Remove and replace | ☐ New; ___ ft. from C/L<br>☐ Replace damaged<br>☐ Remove and replace | ☐ New; ___ ft. from C/L<br>☐ Replace damaged<br>☐ Remove and replace |

**Specific notes for improvements listed in item no. 2.17, above:**

**A. For longitudinal trenches over 150' in length, a minimum 10' wide, 2" grind and overlay is required per City Std. No. 1306. See COA 2.18 below.**
**B. All master planned utilities shall be designed and installed to the ultimate condition.**

☒ **2.18 Construct a 2" asphalt concrete (AC) grind and overlay on the following street(s):** ☐

- **Milliken Ave from Jurupa Street to Toyota Way. See recycled water main construction listed in COA 2.17 above.**

☐ 2.19 Reconstruction of the full pavement structural section, per City of Ontario Standard Drawing number 1011, may be required based on the existing pavement condition and final street design. Minimum limits of reconstruction shall be along property frontage, from street centerline to curb/gutter. ☐

☐ 2.20 Make arrangements with the Cucamonga Valley Water District (CVWD) to provide ☐ water service ☐ sewer service to the site. This property is within the area served by the CVWD and Applicant shall provide documentation to the City verifying that all required CVWD fees have been paid. ☐

☐ 2.21 Overhead utilities shall be under-grounded, in accordance with Title 7 of the City's Municipal Code (Ordinance No. 2804 and 2892). Developer may pay in-lieu fee, approximately _____, for undergrounding of utilities in accordance with Section 7-7.302.e of the City's Municipal Code. ☐

☒ **2.22 Other conditions:** ☐

**A. Pay an in-lieu fee for PCC pavement installation at the following signalized intersections:**
**i. Jurupa Street & Toyota Way**
**ii. Jurupa Street & Milliken Avenue**
**iii. Toyota Way & Milliken Avenue**
**The fee will be based on an engineer's cost estimate that will be reviewed and approved by the City. The Applicant/Developer will be responsible for their fair share which is equivalent to 25% of the total cost.**

## C. SEWER

☒ **2.23 A 18 inch sewer main is available for connection by this project in Milliken Ave. (Ref: Sewer plan bar code: S10006)** ☐

☐ 2.24 Design and construct a sewer main extension. A sewer main is not available for direct connection. The closest main is approximately _____ feet away. ☐

☐ 2.25 Submit documentation that shows expected peak loading values for modeling the impact of the subject project to the existing sewer system. The project site is within a deficient public sewer system area. Applicant shall be responsible for all costs associated with the preparation of the model. Based on the results of the analysis, Applicant may be required to mitigate the project impact to the deficient public sewer system, including, but not limited to, upgrading of existing sewer main(s), construction of new sewer main(s) or diversion of sewer discharge to another sewer. ☐

☒ **2.26 Other conditions:** ☐

**A. Sewer Monitoring Manhole: Each building is to have its own monitoring manhole, on private property, immediately back of the property line.**

## D. WATER

☒ **2.27 A 16 inch water main is available for connection by this project in Jurupa St and Milliken Ave. (Ref: Water plan bar code: W11713, W10016)** ☐

☐ 2.28 Design and construct a water main extension. A water main is not available for direct connection. The closest main is approximately _____ feet away. ☐

☐ 2.29 Other conditions: _____ ☐

## E. RECYCLED WATER

☒ **2.30 A 8 inch recycled water main is available for connection by this project in Jurupa St. (Ref: Recycled Water plan bar code: P10294)** ☐

☒ **2.31 Design and construct an on-site recycled water system for this project. A recycled water main does exist in the vicinity of this project.** ☐

☐ 2.32 Design and construct an on-site recycled water ready system for this project. A recycled water main does not currently exist in the vicinity of this project, but is planned for the near future. If Applicant would like to connect to this recycled water main when it becomes available, the cost for the connection shall be borne solely by the Applicant. ☐

☒ **2.33** **Submit two (2) hard copies and one (1) electronic copy, in PDF format, of the Engineering Report (ER), for the use of recycled water, to the OMUC for review and subsequent submittal to the California Department of Public Health (CDPH) for final approval.** ☐

**Note: The OMUC and the CDPH review and approval process will be approximately three (3) months. Contact the Ontario Municipal Utilities Company at (909) 395-2647 regarding this requirement.**

☒ **2.34** **Other conditions:** ☐

**A. Recycled Water Main Extension: Extend by constructing a recycled water main from the intersection of Milliken Avenue and Jurupa Street, south to serve Building A and B, specifically Building B with recycled water.**

## F. TRAFFIC / TRANSPORTATION

☐ 2.35 Submit a focused traffic impact study, prepared and signed by a Traffic/Civil Engineer registered in the State of California. The study shall address, but not be limited to, the following issues as required by the City Engineer: ☐
1. On-site and off-site circulation
2. Traffic level of service (LOS) at 'build-out' and future years
3. Impact at specific intersections as selected by the City Engineer

☐ 2.36 New traffic signal installations shall be added to Southern California Edison (SCE) customer account number # 2-20-044-3877. ☐

☒ **2.37** **Other conditions:** ☐

**A. Replace any existing street light fixtures project frontages of Milliken Avenue and Jurupa Street with the current City approved LED equivalent fixture per the Traffic and Transportation Design Guidelines**
**B. All landscaping, block walls, and other obstructions shall be compatible with the stopping sight distance requirements per City of Ontario Standard Drawing No. 1309.**
**C. Provide reciprocal access with the between the project site and all other adjacent properties.**
**D. Design and construct proposed driveway in accordance with City of Ontario Standard Drawing No. 1204 for Commercial Driveway along Milliken Avenue.**

## G. DRAINAGE / HYDROLOGY

☐ 2.38 A _____inch storm drain main is available to accept flows from this project in _____. ☐
(Ref: Storm Drain plan bar code:_____)

☐ 2.39 Submit a hydrology study and drainage analysis, prepared and signed by a Civil Engineer registered in the State of California. The study shall be prepared in accordance with the San Bernardino County Hydrology Manual and City of Ontario standards and guidelines. Additional drainage facilities, including, but not limited to, improvements beyond the project frontage, may be required to be designed and constructed, by Applicant, as a result of the findings of this study. ☐

☐ 2.40 An adequate drainage facility to accept additional runoff from the site does not currently exist downstream of the project. Design and construct a storm water detention facility on the project site. 100 year post-development peak flow shall be attenuated such that it does not exceed 80% of pre-development peak flows, in accordance with the approved hydrology study and improvement plans. ☐

☒ **2.41** **Submit a copy of a recorded private drainage easement or drainage acceptance agreement to the Engineering Department for the acceptance of any increase to volume and/or concentration of historical drainage flows onto adjacent property, prior to approval of the grading plan for the project.** ☐

☐ 2.42 Comply with the City of Ontario Flood Damage Prevention Ordinance (Ordinance No. 2409). The project site or a portion of the project site is within the Special Flood Hazard Area (SFHA) as indicated on the Flood Insurance Rate Map (FIRM) and is subject to flooding during a 100 year frequency storm. The site plan shall be subject to the provisions of the National Flood Insurance Program. ☐

☐ 2.43 Other conditions: _____ ☐

## H. STORM WATER QUALITY / NATIONAL POLLUTANT DISCHARGE AND ELIMINATION SYSTEM (NPDES)

☐ 2.44 401 Water Quality Certification/404 Permit – Submit a copy of any applicable 401 Certification or 404 Permit for the subject project to the City project engineer. Development that will affect any body of surface water (i.e. lake, creek, open drainage channel, etc.) may require a 401 Water Quality Certification from the California Regional Water Quality Control Board, Santa Ana Region (RWQCB) and a 404 Permit from the United States Army Corps of Engineers (USACE). The groups of water bodies classified in these requirements are perennial (flow year round) and ephemeral (flow during rain conditions, only) and include, but are not limited to, direct connections into San Bernardino County Flood Control District (SBCFCD) channels.
If a 401 Certification and/or a 404 Permit are not required, a letter confirming this from Applicant's engineer shall be submitted.
Contact information: USACE (Los Angeles District) (213) 452-3414; RWQCB (951) 782-4130. ☐

☒ **2.45 Submit a Water Quality Management Plan (WQMP). This plan shall be approved by the Engineering Department prior to approval of any grading plan. The WQMP shall be submitted, utilizing the current San Bernardino County Stormwater Program template, available at: http://www.sbcounty.gov/dpw/land/npdes.asp.** ☐

☐ 2.46 Design and construct a Connector Pipe Trash Screen or equivalent Trash Treatment Control Device, per catch basin located within or accepting flows tributary of a Priority Land Use (PLU) area that meets the Full Capture System definition and specifications, and is on the Certified List of the State Water Resources Control Board. The device shall be adequately sized per catch basin and include a deflector screen with vector control access for abatement application, vertical support bars, and removable component to facilitate maintenance and cleaning. ☐

☐ 2.47 Other conditions: _____ ☐

## J. SPECIAL DISTRICTS

☐ 2.48 File an application, together with an initial deposit (if required), to establish a Community Facilities District (CFD) pursuant to the Mello-Roos Community Facilities District Act of 1982. The application and fee shall be submitted a minimum of four (4) months prior to final subdivision map approval, and the CFD shall be established prior to final subdivision map approval or issuance of building permits, whichever occurs first. The CFD shall be established upon the subject property to provide funding for various City services. An annual special tax shall be levied upon each parcel or lot in an amount to be determined. The special tax will be collected along with annual property taxes. The City shall be the sole lead agency in the formation of any CFD. Contact Investment and Revenue Resources at (909) 395-2341 to initiate the CFD application process. ☐

☐ 2.49 Other conditions: _____ ☐

## K. FIBER OPTIC

☐ 2.50 A _____ fiber optic line is available for connection by this project in _____.
(Ref: Fiber Optic plan bar code:_____) ☐

☒ **2.51 Design and construct fiber optic system to provide access to the City's conduit and fiber optic system per the City's Fiber Optic Master Plan. Building entrance conduits shall start from the closest OntarioNet hand hole constructed along the project frontage in the ROW and shall terminate in the main telecommunications room for each building. Conduit infrastructure shall interconnect with the primary and/or secondary backbone fiber optic conduit system at the nearest OntarioNet hand hole located at the southeast corner of Jurupa St and Milliken Ave. Limits of work are generally located along the project frontages of Jurupa St and Milliken Ave.** ☐

☒ **2.52** **Refer to the City's Fiber Optic Master Plan for design and layout guidelines. Contact the Broadband Operations Department at (909) 395-2000, regarding this requirement.** ☐

## L. INTEGRATED WASTE

☒ **2.53** **Onsite solid waste shall be designed in accordance with the City's Refuse & Recycling Planning Manual located at:** ☐

**https://www.ontarioca.gov/OMUC/IntegratedWaste**

☒ **2.54** **Other conditions:** ☐

**A. Organics Separation and Collection: This development shall comply with the Requirements of State Assembly Bill AB341 and AB1826, which requires organic waste to be diverted and collected separately from recycling and other refuse wastes. Additional information can be obtained at through the City website at https://www.ontarioca.gov/IntegratedWaste:**

**B. Three 4-CY Bins Trash Enclosure: Each trash enclosure is to have three 4-cy bins with their respective gate, and a solid roof.**

**C. Final Solid Waste Handling Plan (SWHP): Prior to approval of any building permits, revised as stated directly above and submit Final SWHP and be submitted with the Precise Grading Plan for review and approval of the Integrated Waste Department.**

**D. Integrated Waste Management Report (IWMR): Prior to approval of the Precise Grading Plan, submit to OMUC for review and approval, an Integrated Waste Management Report (IWMR) that complies with the IWMR Requirements.**

## 3. PRIOR TO ISSUANCE OF A CERTIFICATE OF OCCUPANCY, APPLICANT SHALL:

☒ **3.01** **Set new monuments in place of any monuments that have been damaged or destroyed as a result of construction of the subject project. Monuments shall be set in accordance with City of Ontario standards and to the satisfaction of the City Engineer.** ☐

☒ **3.02** **Complete all requirements for recycled water usage.** ☐

**☒ 1) Procure from the OMUC a copy of the letter of confirmation from the California Department of Public Health (CDPH) that the Engineering Report (ER) has been reviewed and the subject site is approved for the use of recycled water.**

**☒ 2) Obtain clearance from the OMUC confirming completion of recycled water improvements and passing of shutdown tests and cross connection inspection, upon availability/usage of recycled water.**

**☒ 3) Complete education training of on-site personnel in the use of recycled water, in accordance with the ER, upon availability/usage of recycled water.**

☒ **3.03** **The applicant/developer shall submit all final survey documents prepared by a Licensed Surveyor registered in the State of California detailing all survey monuments that have been preserved, revised, adjusted or set along with any maps, corner records or Records of Survey needed to comply with these Conditions of Approvals and the latest edition of the California Professional Land Survey Act. These documents are to be reviewed and approved by the City Survey Office.** ☐

☐ 3.04 Ontario Ranch Projects: For developments located at an intersection of any two collector or arterial streets, the applicant/developer shall set a monument if one does not already exist at that intersection. Contact the City Survey office for information on reference benchmarks, acceptable methodology and required submittals. ☐

☒ **3.05** **Confirm payment of all Development Impact Fees (DIF) to the Building Department.** ☐

☒ **3.06** **Submit electronic copies (PDF and Auto CAD format) of all approved improvement plans, studies and reports (i.e. hydrology, traffic, WQMP, etc.).** ☐

## 4. PRIOR TO FINAL ACCEPTANCE, APPLICANT SHALL:

| | | | |
|---|---|---|---|
| ☒ | 4.01 | **Complete all Conditions of Approval listed under Sections 1-3 above.** | ☐ |
| ☒ | 4.02 | **Pay all outstanding fees pursuant to the City of Ontario Municipal Code, including but not limited to, plan check fees, inspection fees and Development Impact Fees.** | ☐ |
| ☒ | 4.03 | **The applicant/developer shall submit a written request for the City's final acceptance of the project addressed to the City Project Engineer. The request shall include a completed Acceptance and Bond Release Checklist, state that all Conditions of Approval have been completed and shall be signed by the applicant/developer. Upon receipt of the request, review of the request shall be a minimum of 10 business days. Conditions of Approval that are deemed incomplete by the City will cause delays in the acceptance process.** | ☐ |
| ☒ | 4.04 | **Submit record drawings (PDF) for all public improvements identified within Section 2 of these Conditions of Approval.** | ☐ |

**EXHIBIT 'A'**

## ENGINEERING DEPARTMENT
## First Plan Check Submittal Checklist

**Project Number: PMTT21-010, PDEV21-018, and/or Parcel Map No. 20147**

**The following items are required to be included with the first plan check submittal:**

1. ☒ **A copy of this check list**
2. ☒ **Payment of fee for Plan Checking**
3. ☒ **One (1) copy of Engineering Cost Estimate (on City form) with engineer's wet signature and stamp.**
4. ☒ **One (1) copy of project Conditions of Approval**
5. ☒ **Include a PDF (electronic submittal) of each required improvement plan at every submittal.**
6. ☒ **Two (2) sets of Potable and Recycled Water demand calculations (include water demand calculations showing low, average and peak water demand in GPM for the proposed development and proposed water meter size).**
7. ☐ Three (3) sets of Public Street improvement plan with street cross-sections
8. ☐ Four (4) sets of Public Water improvement plan (include water demand calculations showing low, average and peak water demand in GPM for the proposed development and proposed water meter size)
9. ☒ **Four (4) sets of Recycled Water improvement plan (include recycled water demand calculations showing low, average and peak water demand in GPM for the proposed development and proposed water meter size and an exhibit showing the limits of areas being irrigated by each recycled water meter)**
10. ☐ Four (4) sets of Public Sewer improvement plan
11. ☐ Five (5) sets of Public Storm Drain improvement plan
12. ☒ **Three (3) sets of Public Street Light improvement plan**
13. ☐ Three (3) sets of Signing and Striping improvement plan
14. ☒ **Three (3) sets of Fiber Optic plan (include Auto CAD electronic submittal)**
15. ☒ **Three (3) sets of Dry Utility plans within public right-of-way (at a minimum the plans must show existing and ultimate right-of-way, curb and gutter, proposed utility location including centerline dimensions, wall to wall clearances between proposed utility and adjacent public line, street work repaired per Standard Drawing No. 1306. Include Auto CAD electronic submittal)**
16. ☐ Three (3) sets of Traffic Signal improvement plan and One (1) copy of Traffic Signal Specifications with modified Special Provisions. Please contact the Traffic Division at (909) 395-2154 to obtain Traffic Signal Specifications.
17. ☒ **Two (2) copies of Water Quality Management Plan (WQMP), including one (1) copy of the approved Preliminary WQMP (PWQMP).**
18. ☐ One (1) copy of Hydrology/Drainage study
19. ☒ **One (1) copy of Soils/Geology report**
20. ☒ **Payment for Parcel Map processing fee**

21. ☒ **Three (3) copies of Parcel Map**

22. ☒ **One (1) copy of approved Tentative Map**

23. ☒ **One (1) copy of Preliminary Title Report (current within 30 days)**

24. ☒ **One (1) copy of Traverse Closure Calculations**

25. ☒ **One (1) set of supporting documents and maps (legible copies): referenced improvement plans (full size), referenced record final maps/parcel maps (full size, 18"x26"), Assessor's Parcel map (full size, 11"x17"), recorded documents such as deeds, lot line adjustments, easements, etc.**

26. ☒ **Two (2) copies of Engineering Report and an electronic file (include PDF format electronic submittal) for recycled water use**

27. ☐ Other: _____

# CITY OF ONTARIO
## MEMORANDUM

**TO:** **Edmelynne Hutter, Senior Planner**
**Planning Department**

**FROM:** **Mike Gerken, Deputy Fire Chief/Fire Marshal**
**Fire Department**

**DATE:** **May 24, 2021**

**SUBJECT:** **PMTT21-010 - A Parcel Map to subdivide 13.07 acres of land into three (3) parcels located at southeast corner of Jurupa Street and Milliken Avenue, within the Office/R-D and Warehouse/Distribution land use districts of the Toyota Business Park Specific Plan (APN(s): 0238-121-75). Related File(s): PDEV21-018.**

---

☒ The plan **does** adequately address Fire Department requirements at this time.

☒ Standard Conditions of Approval apply, as stated below.

---

**SITE AND BUILDING FEATURES:**

A. 2019 CBC Type of Construction: Type III-B

B. Type of Roof Materials: Panelized

C. Ground Floor Area(s): Building A = 113,067 Sq. Ft.
Building B = 48,205 Sq. Ft.

D. Number of Stories: 1 with Mezzanine

E. Total Square Footage: Building A = 118,067 Sq. Ft.
Building B = 50,705 Sq. Ft.

F. 2019 CBC Occupancy Classification(s): B/S1/F1

## CONDITIONS OF APPROVAL:

### 1.0 GENERAL

☒ 1.1 The following are the Ontario Fire Department ("Fire Department") requirements for this development project, based on the current edition of the California Fire Code (CFC), and the current versions of the Fire Prevention Standards ("Standards.") It is recommended that the applicant or developer transmit a copy of these requirements to the on-site contractor(s) and that all questions or concerns be directed to the Bureau of Fire Prevention, at (909) 395-2029. For copies of Ontario Fire Department Standards please access the City of Ontario website at www.ontarioca.gov/Fire/Prevention.

☒ 1.2 These Fire Department conditions of approval are to be included on any and all construction drawings.

### 2.0 FIRE DEPARTMENT ACCESS

☒ 2.1 Fire Department vehicle access roadways shall be provided to within 150 ft. of all portions of the exterior walls of the first story of any building, unless specifically approved. Roadways shall be paved with an all-weather surface and shall be a minimum of twenty-four (24) ft. wide. See Standard #B-004.

☒ 2.2 In order to allow for adequate turning radius for emergency fire apparatus, all turns shall be designed to meet the minimum twenty five feet (25') inside and forty-five feet (45') outside turning radius per Standard #B-005.

☒ 2.3 Fire Department access roadways that exceed one hundred and fifty feet (150') in length shall have an approved turn-around per Standard #B-002.

☒ 2.4 Access drive aisles which cross property lines shall be provided with CC&Rs, access easements, or reciprocating agreements, and shall be recorded on the titles of affected properties, and copies of same shall be provided at the time of building plan check.

☒ 2.5 "No Parking-Fire Lane" signs and /or red painted curbs with lettering are required to be installed in interior access roadways, in locations where vehicle parking would obstruct the minimum clear width requirement. Installation shall be per Standard #B-001.

☒ 2.6 Security gates or other barriers on fire access roadways shall be provided with a Knox brand key switch or padlock to allow Fire Department access. See Standards #B-003, B-004 and H-001.

☒ 2.7 Any time PRIOR to on-site combustible construction and/or storage, a minimum twenty-four (24) ft. wide circulating all weather access roads shall be provided to within 150 ft. of all portions of the exterior walls of the first story of any building, unless specifically approved by fire department and other emergency services.

## 3.0 WATER SUPPLY

☒ 3.1 The required fire flow per Fire Department standards, based on the 2019 California Fire Code, Appendix B, is 3750 gallons per minute (g.p.m.) for 4 hours at a minimum of 20 pounds per square inch (p.s.i.) residual operating pressure.

☒ 3.2 Off-site (public) fire hydrants are required to be installed on all frontage streets, at a minimum spacing of three hundred foot (300') apart, per Engineering Department specifications.

☒ 3.3 Buildings that exceed 100,000 square feet in floor area shall provide an onsite looped fire protection water line around the building(s.) The loops shall be required to have two or more points of connection from a public circulating water main.

☒ 3.4 The public water supply, including water mains and fire hydrants, shall be tested and approved by the Engineering Department and Fire Department prior to combustible construction to assure availability and reliability for firefighting purposes.

## 4.0 FIRE PROTECTION SYSTEMS

☒ 4.3 An automatic fire sprinkler system is required. The system design shall be in accordance with National Fire Protection Association (NFPA) Standard 13. All new fire sprinkler systems, except those in single family dwellings, which contain twenty (20) sprinkler heads or more shall be monitored by an approved listed supervising station. An application along with detailed plans shall be submitted, and a construction permit shall be issued by the Fire Department, prior to any work being done.

☒ 4.5 Fire Department Connections (FDC) shall be located on the address side of the building within one hundred fifty feet (150') of a public fire hydrant on the same side of the street. Provide identification for all fire sprinkler control valves and fire department connections per Standard #D-007. Raised curbs adjacent to Fire Department connection(s) shall be painted red, five feet either side, per City standards.

☒ 4.6 A fire alarm system is required. The system design shall be in accordance with National Fire Protection Association (NFPA) Standard 72. An application along with detailed plans shall be submitted, and a construction permit shall be issued by the Fire Department, prior to any work being done.

☒ 4.7 Portable fire extinguishers are required to be installed prior to occupancy per Standard #C-001. Please contact the Fire Prevention Bureau to determine the exact number, type and placement required.

## 5.0 BUILDING CONSTRUCTION FEATURES

☒ 5.1 The developer/general contractor is to be responsible for reasonable periodic cleanup of the development during construction to avoid hazardous accumulations of combustible trash and debris both on and off the site.

☒ 5.2 Approved numbers or addresses shall be placed on all new and existing buildings in such a position as to be plainly visible and legible from the street or road fronting the property. Homes

that do not front street shall be provided with an address entry sign at the street. Address numbers shall contrast with their background. See Section 9-1 6.06 of the Ontario Municipal Code and Standards #H-003 and #H-002.

☒ 5.6 Knox ® brand key-box(es) shall be installed in location(s) acceptable to the Fire Department. All Knox boxes shall be monitored for tamper by the building fire alarm system. See Standard #H-001 for specific requirements.

☒ 5.7 Placards shall be installed in acceptable locations on buildings that store, use or handle hazardous materials in excess of the quantities specified in the CFC. Placards shall meet the requirements of National Fire Protection Association (NFPA) Standard 704.

# CITY OF ONTARIO
## MEMORANDUM

**TO:** **Edmelynne Hutter, Senior Planner**

**FROM:** **Officer Bill Lee, Police Department**

**DATE:** **May 19, 2021**

**SUBJECT:** **PMTT21-010- A DEVELOPMENT PLAN TO CONSTRUCT TWO (2) INDUSTRIAL BUILDINGS TOTALING 168,772 SQUARE FEET, LOCATED AT THE SOUTHEAST CORNER OF JURUPA STREET AND MILLIKEN AVENUE. RELATED FILE: PDEV21-018.**

---

The "Standard Conditions of Approval" contained in Resolution No. 2017-027 apply. The applicant shall read and be thoroughly familiar with these conditions, including, but not limited to, the requirements below.

- Required lighting for all walkways, driveways, doorways, parking lots, hallways and other areas used by the public shall be provided. Lights shall operate via photosensor. Photometrics shall be provided to the Police Department and include the types of fixtures proposed and demonstrate that such fixtures meet the vandal-resistant requirement. Planned landscaping shall not obstruct lighting.
- Rooftop addresses shall be installed on the buildings as stated in the Standard Conditions. The numbers shall be at a minimum 6 feet tall and 2 foot wide, in reflective white paint on a flat black background, and oriented with the bottom of the numbers towards the addressed street. Associated letters shall also be included.
- The Applicant shall comply with construction site security requirements as stated in the Standard Conditions.

The Applicant is invited to contact Officer Bill Lee at (909) 408-1672 with any questions or concerns regarding these conditions.

# AIRPORT LAND USE COMPATIBILITY PLANNING
## CONSISTENCY DETERMINATION REPORT

ONTARIO AIRPORT PLANNING

Project File No.: PDEV21-018& PMTT21-010

Address: SEC Jurupa Street & Milliken Avenue

APN: 0238-121-75

Existing Land Use: Vacant and Industrial Building

Proposed Land Use: Development Plan to construct 2 industrial buildings totaling 168,772 SF and Tentative Parcel Map to subdivide 13.07 acres into 3 parcels

Site Acreage: 13.07 Proposed Structure Height: 41 FT

ONT-IAC Project Review: n/a

Airport Influence Area: ONT

Reviewed By: Lorena Mejia

**SUBJECT:** **A PUBLIC HEARING TO CONSIDER THE ARTS DISTRICT WEST PLANNED UNIT DEVELOPMENT (FILE NO. PUD22-001), ESTABLISHING DEVELOPMENT STANDARDS, DESIGN GUIDELINES AND INFRASTRUCTURE REQUIREMENTS TO FACILITATE A COMMERCIAL DEVELOPMENT ON 0.86-ACRE OF LAND LOCATED AT 125 WEST EMPORIA STREET, WITHIN THE MU-1/LUA-2N (DOWNTOWN MIXED-USE/ARTS DISTRICT - NORTH) AND EA (EUCLID AVENUE OVERLAY) ZONING DISTRICTS (APN: 1049-059-14)**

**RECOMMENDATION:** That the City Council consider and waive further reading of an ordinance approving the Arts District West Planned Unit Development, File No. PUD22-001, establishing development standards, design guidelines, and infrastructure requirements to facilitate a commercial development at 125 West Emporia Street.

**THE FOLLOWING COUNCIL GOALS ARE BEING ACHIEVED:**
**Invest in the Growth and Evolution of the City's Economy**
**Operate in a Businesslike Manner**
**Focus Resources in Ontario's Commercial and Residential Neighborhoods**

**FISCAL IMPACT:** The proposed Planned Unit Development will facilitate the development of two commercial buildings totaling 33,787 square feet, resulting in increased on-going property tax revenues for the City, and the one-time payment to the City of plan check fees and development impact fees.

**BACKGROUND & ANALYSIS:** The Project site is a 0.86-acre parcel of land located at 125 West Emporia Street, within the MU-1/LUA-2N (Downtown Mixed-Use/Arts District – North) and EA (Euclid Avenue Overlay) zoning districts. The Project Site is developed with a paved public parking lot located at the easterly terminus of Emporia Street, where Euclid Avenue is approximately 20 feet below grade. Surrounding the Project Site are several historic buildings that are occupied by mix of land uses including light industrial, office, commercial, residential, and civic buildings constructed in varying architectural styles.

The Policy Plan specifies that the Downtown Mixed-Use Area is to be implemented through the

approval of an Area Plan or Planned Unit Development prior to the development of properties within the Area. In compliance with this requirement, the Applicant has submitted the Arts District West Planned Unit Development (included as Attachment A to the Ordinance), which is consistent with this vision, and the goals and policies of the Policy Plan.

The purpose of the Planned Unit Development is to secure a fuller realization of the Policy Plan than would otherwise result from the strict application of present zoning district regulations and to: [a] promote high standards in urban design; [b] encourage the development of exceptionally high quality, mixed-use, medium to high intensity projects, while establishing regulations and standards for uses with unique regulatory and design needs; and [c] ensure harmonious relationships with surrounding land uses. In addition, the Planned Unit Development is intended to function as a set of planning and design principles, development regulations, and performance standards to guide and govern the development of the 0.86-acre site. The Arts District West Planned Unit Development will facilitate the development of retail and commercial services that will help achieve the City's goals to economically revitalize and aesthetically enhance the historic downtown area.

A Planned Unit Development is comparable to a Specific Plan in that it sets development regulations that are unique to a specific area. However, it is also unlike a Specific Plan in that a Planned Unit Development is typically intended to apply to a single development project or several interrelated development projects that function together as a single, comprehensive project.

Key components of the Arts District West Planned Unit Development include the following:

- Land Use and Development Regulations — Consistent with the requirements of the MU-1 (Downtown Mixed-Use) zoning district, the proposed Arts District West Planned Unit Development allows for uses intended as a dynamic destination for locals and tourists, while creating a fulfilling urban experience energized by artistic, educational, and commercial participants. The focus of the Area is to increase the number of collaborated events and programs within the Area, with the intent to attract visitors, promote economic vitality, and boost revenue. Street fairs, artist festivals, restaurants, galleries, work/live lofts, breweries, and artisan co-ops will contribute to the physical and cultural diversity of the Arts District. The development regulations set forth in the Arts District West Planned Unit Development will govern the placement, height, and bulk of permitted buildings and structures and establish locational criteria for vehicular access to site, parking and loading requirements, landscape, sign standards; and identify historic preservation features to be incorporated and/or considered for development plans. Buildings may be developed to a maximum height of 35 feet. Building setbacks are limited to 0 to 5 feet from the Euclid Avenue right-of-way and 0 to 3.5 feet from the Emporia Street right-of-way, 0 feet from the interior and rear (adjacent to the rail) property lines.

- Landscaping and Drainage — Landscaping elements provide significant contributions to the aesthetic quality and character of the Arts District West Planned Unit Development, with respect to public and private spaces. Water conservation shall be provided through low water using plant materials, hydro zones, water efficient irrigation and weather-based controllers consistent with Assembly Bill 1881 and other applicable State laws.

- Design Guidelines — Section 6.8 (Architectural Character\Details) of the Arts District West Planned Unit Development complies with the Ontario Downtown Design Guidelines of the historic downtown area. The Downtown Ontario Design Guidelines were adopted in 1998 to guide the physical revitalization of Ontario's historic downtown. The Guidelines provide architectural and design principals, as well as design concepts for downtown districts. The project area is located within the Education Center, a mixed-use area with a focus on commercial, retail, public, and educational uses. The design principles and desired architectural features for the mixed-use blocks are derived from the architectural style and elements set forth in Section 3.5.3 of the Downtown Design Guidelines, with respect to storefront modulation, entrances, roof design, mechanical equipment, building elements (cornices, storefront frame, mid-floor panel, transom windows, bulkheads), awnings, materials, and colors.

On February 22, 2022, the Planning/Historic Preservation Commission conducted a public hearing to consider the above described Arts District West Planned Unit Development. After considering all public testimony on the application, the Planning Commission unanimously voted (7-0) to approve a resolution recommending that the City Council approve the Planned Unit Development. In conjunction with the proposed Planned Unit Development, the Planning/Historic Preservation Commission approved a Tentative Parcel Map No. 20394 (File No. PMTT21-009), which will subdivide the 0.86-acre Project site into a single lot to establish 22 commercial airspace condominium units, a Development Plan (File No. PDEV21-017) to construct two commercial buildings totaling 33,787 square feet, and a Certificate of Appropriateness (File No. PHP21-021) to allow for the construction of the proposed Project within the Euclid Avenue Overlay Zoning District.

**HOUSING ELEMENT COMPLIANCE:** The project is consistent with the Housing Element of the Policy Plan (General Plan) component of The Ontario Plan, as the Project site is not one of the properties in the Available Land Inventory contained in Table A-3 (Available Land by Planning Area) of the Housing Element Technical Report Appendix.

**AIRPORT LAND USE COMPATIBILITY PLAN COMPLIANCE:** The California State Aeronautics Act (Public Utilities Code Section 21670 et seq.) requires that an Airport Land Use Compatibility Plan be prepared for all public use airports in the State; and requires that local land use plans and individual development proposals must be consistent with the policies set forth in the adopted Airport Land Use Compatibility Plan. On April 19, 2011, the City Council of the City of Ontario approved and adopted the Ontario International Airport Land use Compatibility Plan ("ALUCP"), establishing the Airport Influence Area for Ontario International Airport, which encompasses lands within parts of San Bernardino, Riverside, and Los Angeles Counties, and limits future land uses and development within the Airport Influence Area, as they relate to noise, safety, airspace protection, and overflight impacts of current and future airport activity. The proposed project is located within the Airport Influence Area of Ontario International Airport and was evaluated and found to be consistent with the policies and criteria of the ALUCP. Any special conditions of approval associated with uses in close proximity to the airport are included in the conditions of approval provided with the attached Resolution.

**ENVIRONMENTAL REVIEW:** The Project is categorically exempt from the requirements of the California Environmental Quality Act ("CEQA") pursuant to Section 15332 (Class 32, Infill

Development Projects) of the CEQA Guidelines, and meets all of the following conditions: (A) the proposed Project is consistent with the applicable general plan designation and all applicable general plan policies as well as with applicable zoning designation and regulations; (B) the proposed development occurs within city limits and the area being developed is 0.86-acre, less than the maximum 5-acre threshold, and is substantially surrounded by urban land uses; (C) the Project site has no value as habitat for endangered, rare, or threatened species; (D) approval of the Project would not result in any significant effects relating to traffic, noise, air quality, or water quality; and (E) the site is adequately served by all required utilities and public services.

CITY OF ONTARIO PLANNING DEPARTMENT

# PLANNING COMMISSION STAFF REPORT

**February 22, 2022**

303 East B Street, Ontario, California 91764 Phone: 909.395.2036 / Fax: 909.395.2420

**FILE NOS:** PUD22-001, PMTT21-009(TPM 20394), PDEV21-017, and PHP21-021

**SUBJECT:** A request for the following entitlements: [1] a Planned Unit Development (File No. PUD22-001) to establish development standards, design guidelines, and infrastructure requirements for the Project site; [2] a Tentative Parcel Map (File No. PMTT21-009 (TPM 20394)) to subdivide a 0.86-acre property into a single lot to establish 22 commercial airspace condominium units; [3] a Development Plan (File No. PDEV21-017) to construct two commercial buildings totaling 33,787 square feet; and [4] a Certificate of Appropriateness (File No. PHP21-021) to allow for the construction of the proposed Project within the Euclid Avenue Overlay Zoning District. The Project Site is located at 125 West Emporia Street, within the MU-1/LUA-2N (Downtown Mixed-Use/Arts District – North) and EA (Euclid Avenue Overlay) zoning districts. (APN: 1049-059-14) **submitted by RWSS Development LLC. City Council action is required.**

**PROPERTY OWNER:** City of Ontario

---

**RECOMMENDED ACTION:** That the Planning/Historic Preservation Commission consider and adopt the following:

(1) A resolution recommending the City Council approve File No. PUD22-001; and

(2) Resolutions approving File Nos. PMTT21-009 (TPM 20394), PDEV21-017, and PHP21-021, pursuant to the facts and reasons contained in the staff report and attached resolutions, and subject to the conditions of approval contained in the departmental reports included as "Attachment A" to each respective resolution.

***Figure 1: Project Location***

**PROJECT SETTING:** The Project site is comprised of 0.86-acre of land located at the easterly terminus of Emporia Street, north of the Union Pacific Railroad right-of-

way, at 125 West Emporia Street, as depicted in Figure 1: Project Location Map. Emporia Street terminates at the Project site where Euclid Avenue is approximately 20 feet below grade. Located within the proposed Downtown Historic District, the site is currently developed with a paved public parking lot. The Emporia Street frontage is improved with a 5-foot-wide scored sidewalk, rock curb in poor condition, and a 7-foot-wide parkway with mature Washingtonia filifera (California palm) and heritage Grevillea robusta (silk oak) street trees. Surrounding the Project site are several historic buildings, including the Pacific Electric Bus Depot (Local Landmark No. 37) located at the northeast corner of Laurel Avenue and Emporia Street, the Old Post Office (Local Landmark No. 38) located at the southeast corner of Laurel Avenue and Transit Street, the Charles Frankish Building (Local Landmark No. 12 and listed on the National Register) located at the southwest corner of Transit Street and Euclid Avenue, the Salvation Army building (Eligible Historic Resource) located at the northwest corner of Emporia Street and Euclid Avenue, the Ontario Museum of History and Art located at the southeast corner of Euclid Avenue and Transit Street, and the Euclid Avenue median and parkway (Local Landmark No. 67 and listed on the National Register). Other development in the area includes a mix of light industrial, office, commercial, residential, and civic buildings constructed in varying architectural styles and construction dates. The existing surrounding land uses, zoning, and general plan are summarized in the "Surrounding Zoning & Land Uses" table located in the Technical Appendix of this report.

## PROJECT ANALYSIS:

(1) Background — During Ontario's early settlement period, several grand Victorian style homes were constructed for prominent city pioneers along Emporia Street, facing the railroad tracks, in a marketing strategy to attract town settlers, which was referred to as "Developer's Row." The Project site was part of Developer's Row but was developed as a parking lot in the 1950s, which is presently underutilized. In the 1980s, the Euclid Avenue Grade Separation project was constructed, providing an underpass for trucks and passenger vehicles, and a bridge for railway lines (Southern and Union Pacific Railroads) that altered street intersections/connections on Euclid Avenue, within the surrounding area. Due to the grade separation, Emporia Street's direct access to Euclid Avenue was eliminated and cul-de-sacs were constructed on the east and west side of Euclid Avenue, limiting access to the parking lot. The Euclid Avenue public right-of-way, from Philadelphia Street to Interstate 10, was designated as Local Landmark No. 67 on January 16, 2001. On August 10, 2005, the Euclid Avenue right-of-way, from Philadelphia Street in Ontario to 24th Street in Upland, was listed on the National Register of Historic Places as a significant cultural landscape.

The Ontario Plan describes the Downtown Mixed-Use Area as an intensive vertical and horizontal mixture of retail, office, and residential uses in a pedestrian friendly atmosphere, where the historic character is prominent. The most intensive uses are envisioned along Euclid Avenue and Holt Boulevard. The Downtown Mixed-Use Area is the historic core of Ontario, which has a unique blend of historic, social and cultural

uses set in a compact street grid. The Downtown Mixed-Use Area includes the Civic Center, City library and surrounding diverse residential neighborhoods that provide increased demand for retail opportunities along Euclid Avenue, Holt Boulevard and B Street.

The Policy Plan specifies that the Downtown Mixed-Use Area is to be implemented through the approval of an Area Plan or Planned Unit Development ("PUD") prior to the development of properties within the Area. In compliance with this requirement, the Applicant has submitted the Art District West Planned Unit Development (included as Attachment A to the attached PUD Resolution), which is consistent with this vision, and the goals and policies of the Policy Plan.

The purpose of the PUD is to secure a fuller realization of the Policy Plan than would result from the strict application of present zoning district regulations and to: [a] promote high standards in urban design; [b] encourage the development of exceptionally high quality, mixed-use, medium to high intensity projects, while establishing regulations and standards for uses with unique regulatory and design needs; and [c] ensure harmonious relationships with surrounding land uses. In addition, the Art District West Planned Unit Development ("ADWPUD") is intended to function as a set of planning and design principles, development regulations, and performance standards to guide and govern the development of the 0.86-acre site. The ADWPUD will facilitate the development of retail and commercial services that will help achieve the City's goals to economically revitalize and aesthetically enhance the historic downtown area.

A PUD is comparable to a Specific Plan in that it sets development regulations that are unique to a specific area; however, it is also unlike a Specific Plan in that a PUD is typically intended to apply to a single development project or several interrelated development projects that function together as a single, comprehensive project.

On April 21, 2021, the Applicant submitted four applications to facilitate the development of the Project site, as follows:

- A Planned Unit Development (File No. PUD22-001: Art District West Planned Unit Development) to establish development standards, design guidelines, and infrastructure requirements for the Project site;

- A Certificate of Appropriateness (File No. PHP21-021) to allow for the construction of the proposed Project within the Euclid Avenue Overlay Zoning District and ensure that the development does not cause an adverse effect on the character-defining features of Euclid Avenue;

- A Tentative Parcel Map (File No. PMTT21-009 (TPM 20394)) to subdivide 0.86-acre of land into single lot for condominium purposes; and

- A Development Plan (File No. PDEV21-017) to construct two commercial buildings totaling 33,787 square feet.

On February 7, 2022, the Development Advisory Board ("DAB") conducted a hearing to consider the Tentative Parcel Map (File No. PMTT21-009 (TPM 20394)) and Development Plan (File No. PDEV21-017), and concluded the hearing, voting to recommend that the Planning Commission approve the Applications subject to conditions of approval, which are included as attachments to the Planning Commission resolutions.

On February 10, 2022, the Historic Preservation Subcommittee considered the Certificate of Appropriateness (File No. PHP21-021) application and recommended Historic Preservation Planning Commission approval.

(2) Planned Unit Development (File No. PUD22-001: Art District West PUD)

a. Land Use and Development Regulation — Consistent with the requirements of the MU-1 (Downtown Mixed-Use) zoning district, the proposed PUD allows for uses intended as a dynamic destination for locals and tourists, while creating a fulfilling urban experience energized by artistic, educational, and commercial participants. The focus of the Area is to increase the number of collaborated events and programs within the Area, with the intent to attract visitors, promote economic vitality, and boost revenue. Street fairs, artist festivals, restaurants, galleries, work/live lofts, breweries, and artisan co-ops will contribute to the physical and cultural diversity of the Arts District. The development regulations set forth in the ADWPUD will govern the placement, height, and bulk of permitted buildings and structures; to establish locational criteria for vehicular access to site, parking and loading requirements, landscape, sign standards; and identify historic preservation features to be incorporated and/or considered for development plans. Buildings may be developed to a maximum height of 35 feet. Building setbacks are limited to 0 to 5 feet from the Euclid Avenue right-of-way and 0 to 3.5 feet from the Emporia Street right-of-way, 0 feet from the interior and rear (adjacent to the rail) property lines.

b. Landscaping and Drainage — Landscaping elements provide significant contributions to the aesthetic quality and character of the ADWPUD, with respect to public and private spaces. Water conservation shall be provided through low water using plant materials, hydro zones, water efficient irrigation and weather-based controllers consistent with Assembly Bill 1881 and other applicable State laws.

c. Off-Street Parking — Parking requirements within the ADWPUD will be governed by the established parking requirements of the City of Ontario Development Code. The ADWPUD allows one parking space within each

Car Condo Unit to be counted towards the required parking for the vehicle storage (Car Condo) use. In addition, the Ontario Development Code allows parking to be analyzed using the Downtown Ontario Parking Model.

d. Design Guidelines — Section 6.8 (*Architectural Character\Details)* of the ADWPUD complies with the Ontario Downtown Design Guidelines of the historic downtown area. The Downtown Ontario Design Guidelines were adopted in 1998 to guide the physical revitalization of Ontario's historic downtown. The Guidelines provide architectural and design principals, as well as design concepts for downtown districts. The project area is located within the Education Center, a mixed-use area with a focus on commercial, retail, public, and educational uses. The design principles and desired architectural features for the mixed-use blocks are derived from the architectural style and elements set forth in Section 3.5.3 of the Downtown Design Guidelines, with respect to storefront modulation, entrances, roof design, mechanical equipment, building elements (cornices, storefront frame, mid-floor panel, transom windows, bulkheads), awnings, materials, and colors.

(3) Tentative Parcel Map (File No. PMTT21-009 / TPM 20394) — The proposed Tentative Parcel Map (TPM 20394) will subdivide the 0.86-acre Project site into a single numbered lot for condominium purposes (see Exhibit B—Tentative Parcel Map) and one lettered lot consisting of private drive aisles, parking areas, and common open space. The condominium plan will establish 22 commercial condominium units that will be recorded with the Department of Real Estate, delineating the airspace for each unit, off-street parking, and common areas. The Development Code does not include provisions for a minimum lot size or project size within the MU-1/LUA-2N (Downtown Mixed-Use/Arts District – North) zoning district; however, it does require the approval of a PUD, which was filed concurrently with the Tentative Parcel Map and Development Plan. Final approval of the Tentative Parcel Map and Development Plan is contingent upon the City Council adopting the PUD for the Project site. Additionally, the proposed map will be required to provide Covenants, Conditions, and Restrictions ("CC&R's"), which will establish the rules, regulations, rights, and responsibilities of the property owner's association and condominium owners.

(4) Development Plan (File No. PDEV21-017)

a. Site Design/Building Layout — Proposed, is the construction of two commercial buildings totaling 33,787 square feet (see Exhibit C—Site Plan, attached). Building A (front building) is 9,669 square feet in size and is centrally located along the northern portion of the site, oriented in an east-west configuration, with the primary entrance facing north, towards Emporia Street. The building contains a 3,455-square-foot flex-space (for

retail uses and public/private art activities) six "Car Condo" suites and mezzanine areas totaling 6,214 square feet designed for the storage of personal vehicles (such as cars and recreational vehicles), and a trash enclosure and restrooms totaling 576 square feet. Two off-street parking lots are located to the east and west of Building A.

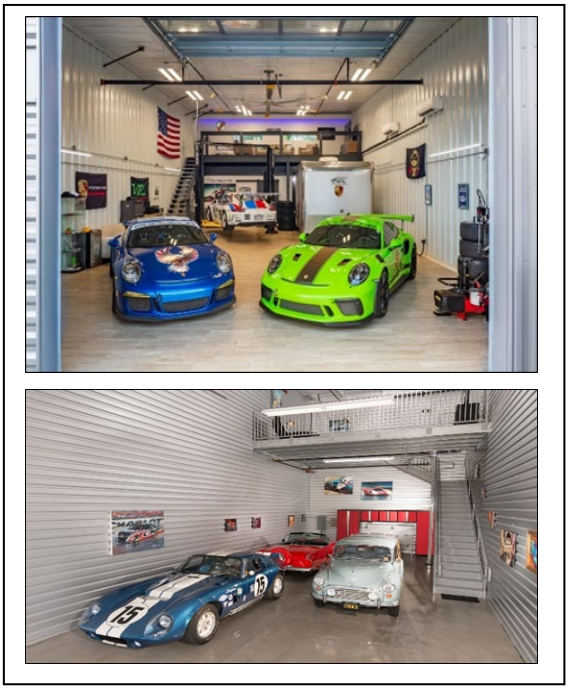

***Figure 2: Car Condo Examples***

Building B (rear building), located along the east, south and west property lines, is 24,012 square feet in size and is configured in a U-shape. The building contains a 2,470-square-foot retail space with mezzanine designed to accommodate a tap room with both ground and second floor outdoor patio areas located at the northeast corner of the site. The remainder of the building is 21,542 square feet in size and is divided into fourteen Car Condo suites.

There is a total of 20 car condo suites proposed within portions of Buildings A and B. The ADWPUD defines car condos as space you own and customize to house your vehicles. The car condos offer car aficionados a safe, secure, and private space to store and display their vehicles (sports, classic, racing, exotics, hot rods, and/or other collectible cars), motorized toys, and/or personal treasures. Each unit includes a mezzanine area that can be customized to include a loft area, office, TV viewing area and/or refreshment kitchenette area (See Figure 2: Car Condo Examples, below). The unit's footprint range in size from 420 to 1,836 square feet, which range from 30 to 68 feet in depth and 14 to 68 feet in width. Residential occupancy of the Car Condo units will be prohibited by the CC&Rs.

b. Site Access/Circulation — The Project site will be accessed from two points along Emporia Street (see Exhibit C—Site Plan, attached). The driveways are located at the northwest and northeast corners of the Project site, immediately to the east and west of Building A. A 20-foot to 35-foot-wide U-shaped drive-aisle is proposed between Buildings A and B, connecting the two points of access and providing on-site circulation and access to each Car Condo unit.

c. Parking — The ADWPUD requires the Project to provide off-street parking at the rates required by the Development Code and allows one parking

space within each Car Condo Unit to be counted towards the required parking for the vehicle storage (Car Condo) use. The Project has provided off-street parking pursuant to the "Drinking Places" and "General Business Offices" parking standards specified in the Development Code. The Project requires a total of 59 passenger vehicle parking spaces and 29 parking spaces have been provided, resulting in a deficit of 30 parking spaces. Table 1, below, provides the off-street parking calculations for the proposed Project.

| ***Table 1: On-Site Parking Summary Table*** | | | | |
|---|---|---|---|---|
| ***Type of Use*** | ***Building Area*** | ***Parking Ratio*** | ***Spaces Required*** | ***Spaces Provided*** |
| ***Motor Vehicle Storage (Car Condos):*** | 27,756 SF | 1 space per Car Condo Unit | 20 | 20 |
| ***Restaurant/ Drinking Place (Tap Room):*** | 2,470 SF | 10 spaces per 1,000 SF (0.01/SF) of GFA | 25 | 9 |
| ***Office (Flex Space):*** | 3,455 SF | General Business Office – 4 spaces per 1,000 SF (0.004/SF) of GFA | 14 | |
| **TOTAL** | | | **59** | **29** |
| **Parking Deficit** | | | | **(-30)** |

Although, the Project does not provide sufficient off-street parking, the Project site is located within the Downtown Mixed Use District, which pursuant to the Ontario Development Code, allows parking to be analyzed using the City's Downtown Ontario Parking Model (see Exhibit G—Downtown Parking Model Blocks Map, attached). The Downtown Parking Model specifically evaluates each block within the Downtown Area and calculates the parking demand on an hourly basis, from 6:00 A.M. to 12:00 A.M. Additionally, it allows a project's parking demands to be met by utilizing the available parking on the project site block, in combination with the surrounding blocks. The Project site is located on Block 72 (see Exhibit H—Parking Model Blocks Map: Blocks 67, 68, 71, and 72, attached) and can accommodate a total of 14 parking spaces (5 on-street and 9 on-site). The surrounding blocks utilized to analyze the parking demand for the proposed Project include:

- Block 67 (City of Ontario Community Improvement Office), located north of the Project site, which provides 92 parking spaces (32 on-street and 60 off-street);
- Block 68 (multiple-family units, retail, office and service uses), located northwest of the Project site, which provides 65 parking spaces (20 on-street and 45 off-street); and
- Block 71 (live/work units), located directly west of the Project site, which provides 38 parking spaces (11 on-street and 27 off-street).

The Tables 2 and 3, below, illustrate the available parking for Blocks 67, 68, 71 and 72, with the proposed uses. Within Table 4 (see Technical Appendix), the Parking Model found a deficit of 1 to 14 parking spaces on Blocks 71 and 72, between the hours of 10:00 A.M. to 8:00 P.M.; however, there is a surplus of 56 to 100 parking spaces within the combined four Blocks, addressing any single block deficiencies. Therefore, staff has determined that based upon the Downtown Ontario Parking Model, sufficient parking exists on the Project site and its' surrounding blocks, to support the proposed Project.

| ***Table 2: Available Public Parking with Proposed Use: Daytime Hours (8:00 A.M.–3:00 P.M.)*** | | | | | | | | | |

d. Architecture — A contemporary industrial inspired architectural design is proposed to complement the surrounding historic buildings and context of the historic downtown area (see Exhibit D—Conceptual Elevations and Exhibit E—Project Rendering, attached). Building's A and B are single-story buildings with a two-story massing (27 feet to 30 feet) consistent with the existing surrounding buildings located to the north and west of the Project site. Both buildings will incorporate a combination of vertical corrugated metal panels, horizontal flat metal siding, brick veneer, metal canopies, storefront glazing, and a contrasting color palette that includes black, grey, brown, and red tones.

The eastern elevation of Building B will be prominently seen from Euclid Avenue. The tap room was strategically located on the northeast corner of the site as part of Building B, to provide a prominent architectural element facing Euclid Avenue. The tap room portion of the building incorporates a brick veneer, a 20-foot-long blade sign and a round tower element designed to have the appearance of a beer vat. The upper portion of the tower is treated with horizontal corrugated metal siding and a metal roof, and the ground floor incorporates deep recessed clear storefront glazing that allow views of the beer vat design from Euclid Avenue. To the west of the tower, the Project is also incorporating a ground floor and second story outdoor patio that will face Emporia Street and be visible from Euclid Avenue, which has been integrated into the overall design of the building and features similar building materials.

The Project illustrates similar architectural features, building placement, scale and massing to the surrounding historic buildings and within the context of the historic

downtown area. The Project is appropriate in scale and massing and through use of materials and design and will not detract or adversely affect the historic character of neither Euclid Avenue nor the proposed Downtown Historic District. This is exemplified through the use of:

- Articulation in storefront modulation through color and material changes, bulkhead/base, glass roll up doors, storefront glazing, and enhanced accent banding; and

- Articulation in the building parapet, roof lines, and a corner tower element which serves to accentuate the building's entries and openings, and breaks up large expanses of building wall; and

- A mix of exterior colors, materials, finishes and fixtures; and

- Incorporation of base and top treatments defined by changes in color, materials, and recessed wall areas. Designed to ensure that it's massing and proportion, along with its colors and architectural detailing, are consistent on all building walls, giving a four-sided (360-degree) appearance; and

- Utilizing strong and identifiable building forms using the corner tower element to demarcate street intersections.

Furthermore, the Project demonstrates the type of development and architecture promoted by the proposed ADWPUD. The Project incorporates the design principles and the desired architectural features of the proposed ADWPUD using:

- Simple, yet varied massing, with wall openings that create shadow line and provide visual relief; and

- Incorporation of human-scaled details such as canopies, transparent windows, and windows displays. These are required at public entrances and along heavily trafficked outdoor areas; and

- Providing highly visible public entrances, oriented to streets and outdoor spaces; with shop entrances clearly expressed with recesses, overhangs, special materials, and detailing; and

- Creating visual interest by using at least three different building materials on building facades including brick, flat metal siding, and corrugated metal panels.

e. Landscaping — Landscaping elements provide significant contributions to the aesthetic quality and character of Euclid Avenue and the historic downtown area, with respect to public and private spaces. The proposed landscape design highlights building and driveway entries and softens the appearance of the building along Emporia Street. Due to the

configuration of the proposed buildings, landscaping is primarily featured along the Emporia Street frontage and the northwestern parking lot. The proposed landscape plant pallet includes Ginko Biloba, Tabebuia Impetiginosa, Prunus Cerasifera 24-inch and 36-inch box size trees, 8 shrub varieties (Hemerocallis hybrid, Ruellia brittoniana, Rosea Floribunda, Rosmarinus Officinalis, Loropetalum chinensis, atropurpurea, Lanvendula agustina, Tulbaghia violacea and Pittosporum) and one groundcover variety (Phyla nodifolia). The existing parkway and sidewalk will be altered to accommodate the two proposed driveways which will require the removal of two heritage Grevillea robusta (Silk Oak) trees and the onsite relocation one Washingtonia filifera (California Palm) within the parkway. The Project has been conditioned to replace the two Grevillea robusta trees with trees that are equal in trunk diameter onsite and/or pay appropriate mitigation fees to City of Ontario Historic Preservation Fund. Moreover, the proposed landscaping, hardscape and lighting has been designed to complement the architecture of the proposed building and enhance vehicular entries, pedestrian walkways, and other key locations throughout the Project site.

f. Utilities (drainage, sewer) — Public utilities (water and sewer) are available to serve the Project. Furthermore, the Applicant has submitted a Preliminary Water Quality Management Plan ("PWQMP"), which establishes the Project's compliance with storm water discharge/water quality requirements. The PWQMP includes site design measures that capture runoff and pollutant transport by minimizing impervious surfaces and maximizes low impact development ("LID") best management practices ("BMPs"), such as retention and infiltration, biotreatment, and evapotranspiration. The onsite drainage will be conveyed to an underground chamber located on the northwest portion of the Project site underneath the parking lot and any overflow drainage will be conveyed to the curb and gutter along Emporia Street.

(5) Certificate of Appropriateness (File No. PHP21-021) — Section 6.01.035, Overlay Zoning Districts of the Ontario Development Code, requires Certificate of Appropriateness approval for any development project within the Euclid Avenue Overlay zoning district. The Euclid Avenue Overlay zoning district is intended to recognize, protect, and enhance the visual character and quality of Euclid Avenue as a major scenic and historic resource of the City, and to identify and safeguard Euclid Avenue's position on the National Register of Historic Places. The intent of the Overlay zoning district is not to create a false sense of history with any new development along the Euclid Avenue Corridor, but rather to ensure that new development does not adversely impact the visual character-defining features of Euclid Avenue, such as the 60-foot-wide landscaped median, rock curbs, and King's Standard lampposts. Additionally, all new construction should be compatible with the surrounding developments in site design, massing and scale.

The Secretary of the Interior Standards for the Treatment of Historic Properties, also referred to as "the Standards," provide a critical part of the framework of the national preservation program and are widely used at the federal, state and local levels to guide work on historic resources and have been incorporated into the ADWPUD. The Standards state that alterations will not destroy historic features and spatial relationships that characterize the historic resource, and that new work will be differentiated from the old and will be compatible with historic materials, features, size, scale, and proportion, and massing to protect the integrity of the resource.

The west side of Euclid Avenue, from Holt Boulevard to the project site, can be characterized as early twentieth century commercial development which includes the First National Bank constructed in the Art Deco style of architecture in 1928, the McCann Building constructed in the Commercial style of architecture in 1917, the Envoy Hotel also constructed in the Commercial style of architecture in 1920, the Frankish Building constructed in a simplified Italianate architectural style in 1916, and the Salvation Army Building constructed in Art Deco style of architecture in 1930. These buildings are constructed of brick and concrete, are 2 and 3 stories in height with first floor commercial and have a zero setback from the Euclid Avenue property line. Prominent character-defining features include classic storefronts with large display windows, bulkheads (base), transom windows, mid-panel banding, a mix of materials and colors, and vertical columns in the Art Deco style buildings.

Across Emporia Street from the project site is the historic Pacific Electric Bus Depot. The building was constructed in a brick Commercial style of architecture in 1928. The single-story brick building is square in floorplan, has a parapet roof, and a storefront. Adjacent to the project site is the Emporia Street Lofts (work/live units). The buildings were originally constructed for an industrial manufacturing purpose in 1968 but were adaptively reused in 2003 to allow commercial and residential mixed-uses within a flexible space. The buildings are designed with two-stories, brick and stucco finishes and have a parapet roof.

The Project is a two-story construction featuring elements from Emporia Street Lofts (work/live units) to the west and the Salvation Army Building to the north. The corner tower element faces Euclid Avenue and Emporia Street providing emphasis to the entrance which is similar to the corner entrances of the Frankish Building and Salvation Army Building. In addition, Euclid Avenue is situated approximately 20-feet below grade of the Project site ultimately minimizing the visual impacts to Euclid Avenue.

On February 10, 2022, the Historic Preservation Subcommittee ("HPSC") reviewed the project and recommended approval to the Planning/Historic Preservation Commission, subject to conditions of approval and are attached to this report.

The Planning Commission, serving as the Historic Preservation Commission, must consider and clearly establish certain findings of facts for all Certificate of Appropriateness applications. The proposed project is appropriate because:

(1) ***The proposed project will not detrimentally change, destroy or adversely affect any significant architectural feature of the resource***. While there are no identified historic resources within the Project site, the site has frontage along historic Euclid Avenue and is within the Proposed Downtown Historic District. Through appropriate scale, massing and use of materials, the new construction is compatible with the surrounding buildings and therefore, will not detrimentally change, destroy or adversely affect any significant architectural feature of the resource.

(2) ***The proposed project will not detrimentally change, destroy or adversely affect the historic character or value of the resource.*** While there are no identified historic resources within the Project site, the Project has frontage along historic Euclid Avenue and is within the Proposed Downtown Historic District. The Project proposes appropriate building massing and scale, site design, building layout, and architecture that is in keeping with the area.

(3) ***The proposed project will be compatible with the exterior character-defining features of the historic resource.*** Although the Project site is not considered historic, the Project site has frontage along historic Euclid Avenue and is within the proposed Downtown Historic District. Through enhanced architectural elements, including the tower feature, the proposed project does not detract from the visual character of Euclid Avenue and is compatible with the Proposed Downtown Historic District.

(4) ***The proposed project will not adversely affect or detract from the character of the historic district.*** Through compatible architectural elements the proposed project does not detract from the visual character of Euclid Avenue and is compatible with the Proposed Downtown Historic District.

**COMPLIANCE WITH THE ONTARIO PLAN:** The proposed Project is consistent with the principles, goals and policies contained within the Vision, Governance, Policy Plan (General Plan), and City Council Priorities components of The Ontario Plan (TOP). More specifically, the goals and policies of TOP that are furthered by the proposed project are as follows:

(1) City Council Goals.

- Invest in the Growth and Evolution of the City's Economy
- Maintain the Current High Level of Public Safety
- Operate in a Businesslike Manner
- Focus Resources in Ontario's Commercial and Residential Neighborhoods
- Invest in the City's Infrastructure (Water, Streets, Sewers, Parks, Storm Drains and Public Facilities)

(2) Vision.

**Distinctive Development:**

- Commercial and Residential Development

➢ Development quality that is broadly recognized as distinctive and not exclusively tied to the general suburban character typical of much of Southern California.

(3) Governance.

**Decision Making:**

- Goal G1: Sustained decision-making that consistently moves Ontario towards its Vision by using The Ontario Plan as a framework for assessing choices.

➢ G1-2 Long-term Benefit. We require decisions to demonstrate and document how they add value to the community and support the Ontario Vision.

(4) Policy Plan (General Plan)

**Land Use Element:**

- Goal LU1: A community that has a spectrum of housing types and price ranges that match the jobs in the City and that make it possible for people to live and work in Ontario and maintain a quality of life.

➢ LU1-1 Strategic Growth. We concentrate growth in strategic locations that help create place and identity, maximize available and planned infrastructure, and foster the development of transit.

➢ LU1-6 Complete Community: We incorporate a variety of land uses and building types in our land use planning efforts that result in a complete community where residents at all stages of life, employers, workers and visitors have a wide spectrum of choices of where they can live, work, shop and recreate within Ontario. (Refer to Complete Community Section of Community Economics Element).

- Goal LU2: Compatibility between a wide range of uses.

➢ LU2-6: Infrastructure Compatibility: We require infrastructure to be aesthetically pleasing and in context with the community character.

**Community Economics Element:**

- Goal CE2: A City of distinctive neighborhoods, districts, and corridors, where people choose to be.

- CE2-1 Development Projects. We require new development and redevelopment to create unique, high-quality places that add value to the community.

- CE2-2 Development Review. We require those proposing new development and redevelopment to demonstrate how their projects will create appropriately unique, functional and sustainable places that will compete well with their competition within the region.

- CE2-4 Protection of Investment. We require that new development and redevelopment protect existing investment by providing architecture and urban design of equal or greater quality.

- CE2-5 Private Maintenance. We require adequate maintenance, upkeep, and investment in private property because proper maintenance on private property protects property values.

**Safety Element:**

- Goal S1: Minimized risk of injury, loss of life, property damage and economic and social disruption caused by earthquake-induced and other geologic hazards.

- S1-1 Implementation of Regulations and Standards. We require that all new habitable structures be designed in accordance with the most recent California Building Code adopted by the City, including provisions regarding lateral forces and grading.

**Community Design Element:**

- Goal CD1: A dynamic, progressive city containing distinct neighborhoods and commercial districts that foster a positive sense of identity and belonging among residents, visitors, and businesses.

- CD1-1 City Identity. We take actions that are consistent with the City being a leading urban center in Southern California while recognizing the diverse character of our existing viable neighborhoods.

- CD1-2 Growth Areas. We require development in growth areas to be distinctive and unique places within which there are cohesive design themes.

- CD1-3 Neighborhood Improvement. We require viable existing residential and non-residential neighborhoods to be preserved, protected, and enhanced in accordance with our land use policies.

- Goal CD2: A high level of design quality resulting in public spaces, streetscapes, and developments that are attractive, safe, functional and distinct.

- CD2-1 Quality Architecture. We encourage all development projects to convey visual interest and character through:

  - Building volume, massing, and height to provide appropriate scale and proportion;
  - A true architectural style which is carried out in plan, section and elevation through all aspects of the building and site design and appropriate for its setting; and
  - Exterior building materials that are visually interesting, high quality, durable, and appropriate for the architectural style.

- CD2-7 Sustainability. We collaborate with the development community to design and build neighborhoods, streetscapes, sites, outdoor spaces, landscaping and buildings to reduce energy demand through solar orientation, maximum use of natural daylight, passive solar and natural ventilation, building form, mechanical and structural systems, building materials and construction techniques.

- CD2-8 Safe Design. We incorporate defensible space design into new and existing developments to ensure the maximum safe travel and visibility on pathways, corridors, and open space and at building entrances and parking areas by avoiding physically and visually isolated spaces, maintenance of visibility and accessibility, and use of lighting.

- CD2-9 Landscape Design. We encourage durable landscaping materials and designs that enhance the aesthetics of structures, create and define public and private spaces, and provide shade and environmental benefits.

- CD2-10 Surface Parking Areas. We require parking areas visible to or used by the public to be landscaped in an aesthetically pleasing, safe and environmentally sensitive manner. Examples include shade trees, pervious surfaces, urban run-off capture and infiltration, and pedestrian paths to guide users through the parking field.

- CD2-11 Entry Statements. We encourage the inclusion of amenities, signage and landscaping at the entry to neighborhoods, commercial centers, mixed use areas, industrial developments, and public places that reinforce them as uniquely identifiable places.

- CD2-12 Site and Building Signage. We encourage the use of sign programs that utilize complementary materials, colors, and themes. Project signage should be designed to effectively communicate and direct users to various aspects of the development and complement the character of the structures.

- CD2-13 Entitlement Process. We work collaboratively with all stakeholders to ensure a high degree of certainty in the efficient review and timely processing of all development plans and permits.

- Goal CD3: Vibrant urban environments that are organized around intense buildings, pedestrian and transit areas, public plazas, and linkages between and within developments that are conveniently located, visually appealing and safe during all hours.

  - CD3-1 Design. We require that pedestrian, vehicular, bicycle and equestrian circulation on both public and private property be coordinated and designed to maximize safety, comfort, and aesthetics.

  - CD3-3 Building Entrances. We require all building entrances to be accessible and visible from adjacent streets, sidewalks or public open spaces.

  - CD3-5 Paving. We require sidewalks and road surfaces to be of a type and quality that contributes to the appearance and utility of streets and public spaces.

  - CD3-6 Landscaping. We utilize landscaping to enhance the aesthetics, functionality and sustainability of streetscapes, outdoor spaces and buildings.

- Goal CD5: A sustained level of maintenance and improvement of properties, buildings and infrastructure that protects the property values and encourages additional public and private investments.

  - CD5-1 Maintenance of Buildings and Property. We require all public and privately-owned buildings and property (including trails and easements) to be properly and consistently maintained.

  - CD5-2 Maintenance of Infrastructure. We require the continual maintenance of infrastructure.

**HOUSING ELEMENT COMPLIANCE:** The Project is consistent with the Housing Element of the Policy Plan (General Plan) component of The Ontario Plan, as the Project site is not one of the properties in the Available Land Inventory contained in Table A-3 (Available Land by Planning Area) of the Housing Element Technical Report Appendix.

**AIRPORT LAND USE COMPATIBILITY PLAN (ALUCP) COMPLIANCE:** The California State Aeronautics Act (Public Utilities Code Section 21670 et seq.) requires that an Airport Land Use Compatibility Plan be prepared for all public use airports in the State; and requires that local land use plans and individual development proposals must be consistent with the policies set forth in the adopted Airport Land Use Compatibility Plan. On April 19, 2011, the City Council of the City of Ontario approved and adopted the Ontario International Airport Land use Compatibility Plan ("ALUCP"), establishing the Airport Influence Area for Ontario International Airport, which encompasses lands within parts of San Bernardino, Riverside, and Los Angeles Counties, and limits future land uses and development within the Airport Influence Area, as they relate to noise, safety, airspace protection, and overflight impacts of current and future airport activity. The

proposed project is located within the Airport Influence Area of Ontario International Airport and was evaluated and found to be consistent with the policies and criteria of the ALUCP. Any special conditions of approval associated with uses in close proximity to the airport are included in the conditions of approval provided with the attached Resolution.

**ENVIRONMENTAL REVIEW:** The Project is categorically exempt from the requirements of the California Environmental Quality Act ("CEQA") pursuant to Section 15332 (Class 32, Infill Development Projects) of the CEQA Guidelines and meets all of the following conditions: (a) the proposed Project is consistent with the applicable general plan designation and all applicable general plan policies as well as with applicable zoning designation and regulations; (b) the proposed development occurs within city limits and the area being developed is 0.86-acre, less than the maximum 5-acre threshold, and is substantially surrounded by urban land uses; (c) the Project site has no value as habitat for endangered, rare, or threatened species; (d) approval of the Project would not result in any significant effects relating to traffic, noise, air quality, or water quality; and (e) the site is adequately served by all required utilities and public services.

**CONDITIONS OF APPROVAL:** See attached department reports.

## TECHNICAL APPENDIX:

**Surrounding Zoning and Land Use:**

| | *Existing Land Use* | *General Plan Designation* | *Zoning Designation* |
|---|---|---|---|
| *Site* | Parking Lot | Downtown Mixed-Use District | MU-1/LUA-2N (Downtown Mixed-Use/Arts District – North) and EA (Euclid Avenue Overlay) |

RESOLUTION NO. PC22-007

A RESOLUTION OF THE PLANNING/HISTORIC PRESERVATION COMMISSION OF THE CITY OF ONTARIO, CALIFORNIA, RECOMMENDING THE CITY COUNCIL APPROVE FILE NO. PUD22-001, A PLANNED UNIT DEVELOPMENT (ART DISTRICT WEST PLANNED UNIT DEVELOPMENT) TO ESTABLISH DEVELOPMENT STANDARDS, DESIGN GUIDELINES AND INFRASTRUCTURE REQUIREMENTS ON 0.86-ACRE PROPERTY LOCATED AT 125 WEST EMPORIA STREET, WITHIN THE MU-1/LUA-2N (DOWNTOWN MIXED-USE/ARTS DISTRICT – NORTH) AND EA (EUCLID AVENUE OVERLAY) ZONING DISTRICTS, AND MAKING FINDINGS IN SUPPORT THEREOF—APN: 1049-059-14.

WHEREAS, RWSS DEVELOPMENT LLC. ("Applicant") has filed an Application for the approval of a Planned Unit Development, File No. PUD22-001, as described in the title of this Resolution (hereinafter referred to as "Application" or "Project"); and

WHEREAS, the Application applies to 0.86-acre of land located at the eastern terminus of Emporia Street, north of the Southern Pacific Railroad right-of-way, at 125 West Emporia Street within the within the MU-1/LUA-2N (Downtown Mixed-Use/Arts District – North) and EA (Euclid Avenue Overlay) zoning districts, and is currently developed with a paved public parking lot; and

WHEREAS, the property to the north of the Project site is within the MU-1/LUA-2N (Downtown Mixed-Use/Arts District – North) and EA (Euclid Avenue Overlay) zoning district and is developed with Office/Personal Services (Rojas Enterprises). The property to the east is within the CIV (Civic) zoning district and is developed with Ontario Museum of History and Art. The property to the south is within the RC (Rail Corridor) zoning district and is developed with a railroad for the Union Pacific Railroad. The property to the west is within the MU-1/LUA-2N (Downtown Mixed-Use/Arts District – North) zoning district and is developed with Work/Live Lofts (Emporia Street Lofts); and

WHEREAS, Ontario Plan describes the Downtown Mixed-Use Area as an intensive vertical and horizontal mixture of retail, office, and residential uses in a pedestrian friendly atmosphere, where the historic character is prominent. The most intensive uses are envisioned along Euclid Avenue and Holt Boulevard. The Downtown Mixed-Use Area is the historic core of Ontario, which has a unique blend of historic, social, and cultural uses set in a compact street grid. The Downtown Mixed-Use Area includes the Civic Center, City library and surrounding diverse residential neighborhoods that provide increased demand for retail opportunities along Euclid Avenue, Holt Boulevard and B Street; and

WHEREAS, the Policy Plan specifies that the Downtown Mixed-Use Area is to be implemented through the approval of an Area Plan or Planned Unit Development (“PUD”)

prior to the development of properties within the Area. In compliance with this requirement, the Applicant has submitted the Art District West Planned Unit Development (included as Attachment A), which is consistent with this vision, and the goals and policies of the Policy Plan; and

WHEREAS, the purpose of the PUD is to secure a fuller realization of the Policy Plan than would result from the strict application of present zoning district regulations and to: [a] promote high standards in urban design; [b] encourage the development of exceptionally high quality, mixed-use, medium to high intensity projects, while establishing regulations and standards for uses with unique regulatory and design needs; and [c] ensure harmonious relationships with surrounding land uses; and

WHEREAS, the Art District West Planned Unit Development ("ADWPUD") is intended to function as a set of planning and design principles, development regulations, and performance standards to guide and govern the development of the 0.86-acre site. The ADWPUD will facilitate the development of retail and commercial services that will help achieve the City's goals to economically revitalize and aesthetically enhance the historic downtown area; and

WHEREAS, a PUD is comparable to a Specific Plan in that it sets development regulations that are unique to a specific area; however, it is also unlike a Specific Plan in that a PUD is typically intended to apply to a single development project or several interrelated development projects that function together as a single, comprehensive project; and

WHEREAS, the Project was submitted in conjunction with a Tentative Parcel Map (File No. PMTT21-009 (TPM 20394)) to subdivide 0.86-acre of land into a single lot to establish 22 commercial airspace condominium units, a Development Plan (File No. PDEV21-017) to construct two commercial buildings totaling 33,787 square feet, and a Certificate of Appropriateness (File No. PHP21-021) to allow for the construction of the proposed Project within the Euclid Avenue Overlay Zoning District; and

WHEREAS, the Application is a project pursuant to the California Environmental Quality Act, commencing with Public Resources Code Section 21000 (hereinafter referred to as "CEQA"); and

WHEREAS, the Project is exempt from CEQA pursuant to a categorical exemption (listed in CEQA Guidelines Article 19, commencing with Section 15300) and the application of that categorical exemption is not barred by one of the exceptions set forth in CEQA Guidelines Section 15300.2; and

WHEREAS, Ontario Development Code Table 2.02-1 (Review Matrix) grants the Planning/Historic Preservation Commission the responsibility and authority to review and make recommendation to City Council on the subject Application; and

WHEREAS, the Project has been reviewed for consistency with the Housing Element of the Policy Plan component of The Ontario Plan, as State Housing Element law (as prescribed in Government Code Sections 65580 through 65589.8) requires that development Projects must be consistent with the Housing Element, if upon consideration of all its aspects, it is found to further the purposes, principals, goals, and policies of the Housing Element; and

WHEREAS, the Project is located within the Airport Influence Area of Ontario International Airport, which encompasses lands within parts of San Bernardino, Riverside, and Los Angeles Counties, and is subject to, and must be consistent with, the policies and criteria set forth in the Ontario International Airport Land Use Compatibility Plan ("ALUCP"), which applies only to jurisdictions within San Bernardino County, and addresses the noise, safety, airspace protection, and overflight impacts of current and future airport activity; and

WHEREAS, City of Ontario Development Code Division 2.03 (Public Hearings) prescribes the manner in which public notification shall be provided and hearing procedures to be followed, and all such notifications and procedures have been completed; and

WHEREAS, on February 22, 2022, the Planning/Historic Preservation Commission of the City of Ontario conducted a hearing to consider the Project, and concluded said hearing on that date; and

WHEREAS, all legal prerequisites to the adoption of this Resolution have occurred.

NOW, THEREFORE, IT IS HEREBY FOUND, DETERMINED, AND RESOLVED by the Planning/Historic Preservation Commission of the City of Ontario, as follows:

SECTION 1: ***Environmental Determination and Findings.*** As the recommending authority for the Project, the Planning/Historic Preservation Commission has reviewed and considered the information contained in the administrative record for the Project. Based upon the facts and information contained in the administrative record, including all written and oral evidence presented to the Planning/Historic Preservation Commission, the Planning/Historic Preservation Commission finds as follows:

(1) The administrative record has been completed in compliance with CEQA, the State CEQA Guidelines, and the City of Ontario Local CEQA Guidelines; and

(2) The Project is categorically exempt from environmental review pursuant to Section 15332 (Class 32, Infill Development Projects) of the CEQA Guidelines and meets all of the following conditions: (a) the proposed Project is consistent with the applicable general plan designation and all applicable general plan policies as well as with applicable zoning designation and regulations; (b) the proposed development occurs within city limits and the area being developed is 0.86-acre, less than the maximum 5-acre threshold, and is substantially surrounded by urban land uses; (c) the Project site has no value as habitat for endangered, rare, or threatened species; (d) approval of the Project would not result in any significant effects relating to traffic, noise, air quality, or water quality; and (e) the site is adequately served by all required utilities and public services; and

(3) The application of the categorical exemption is not barred by one of the exceptions set forth in CEQA Guidelines Section 15300.2; and

(4) The determination of CEQA exemption reflects the independent judgment of the Planning/Historic Preservation Commission.

SECTION 2: ***Housing Element Compliance.*** Pursuant to the requirements of California Government Code Chapter 3, Article 10.6, commencing with Section 65580, as the recommending authority for the Project, the Planning/Historic Preservation Commission finds that based on the facts and information contained in the Application and supporting documentation, at the time of Project implementation, the Project is consistent with the Housing Element of the Policy Plan (General Plan) component of The Ontario Plan, as the Project site is not one of the properties in the Available Land Inventory contained in Table A-3 (Available Land by Planning Area) of the Housing Element Technical Report Appendix.

SECTION 3: ***Ontario International Airport Land Use Compatibility Plan ("ALUCP") Compliance.*** The California State Aeronautics Act (Public Utilities Code Section 21670 et seq.) requires that an Airport Land Use Compatibility Plan be prepared for all public use airports in the State; and requires that local land use plans and individual development proposals must be consistent with the policies set forth in the adopted Airport Land Use Compatibility Plan. On April 19, 2011, the City Council of the City of Ontario approved and adopted the ALUCP, establishing the Airport Influence Area for Ontario International Airport (hereinafter referred to as "ONT"), which encompasses lands within parts of San Bernardino, Riverside, and Los Angeles Counties, and limits future land uses and development within the Airport Influence Area, as they relate to noise, safety, airspace protection, and overflight impacts of current and future airport activity. As the recommending authority for the Project, the Planning/Historic Preservation Commission has reviewed and considered the facts and information contained in the Application and supporting documentation against the ALUCP compatibility factors, including [1] Safety Criteria (ALUCP Table 2-2) and Safety Zones (ALUCP Map 2-2), [2] Noise Criteria (ALUCP Table 2-3) and Noise Impact Zones (ALUCP Map 2-3), [3]

Airspace protection Zones (ALUCP Map 2-4), and [4] Overflight Notification Zones (ALUCP Map 2-5). As a result, the Planning/Historic Preservation Commission, therefore, finds and determines that the Project, when implemented in conjunction with the conditions of approval, will be consistent with the policies and criteria set forth within the ALUCP.

SECTION 4: ***Concluding Facts and Reasons.*** Based upon the substantial evidence presented to the Planning/Historic Preservation Commission during the above-referenced hearing, and upon the specific findings set forth in Sections 1 through 3, above, the Planning/Historic Preservation Commission hereby concludes as follows:

(1) ***The proposed PUD, or amendment thereto, is consistent with the goals, policies, plans and exhibits of the Vision, Policy Plan (General Plan), and City Council Priorities components of The Ontario Plan.*** The proposed Project is located within the Downtown Mixed Use land use district of the Policy Plan Land Use Map, and the LUA-2N (Arts District - North) of the MU-1 (Downtown Mixed-Use) and EA (Euclid Avenue Overlay) zoning districts. The development standards and conditions under which the proposed Project will be constructed and maintained, is consistent with the goals, policies, plans, and exhibits of the Vision, Policy Plan (General Plan), and City Council Priorities components of The Ontario Plan.

(2) ***The proposed PUD, or amendment thereto, would not be detrimental to the public interest, health, safety, convenience, or general welfare of the City.*** The City has required certain safeguards, and has required certain changes, which have been established to ensure that: [i] the purposes of the Planned Unit Development are maintained; [ii] the Project will not endanger the public health, safety or general welfare; [iii] the Project will not result in any significant environmental impacts; [iv] the Project will be in harmony with the area in which it is located; and [v] the Project will be in full conformity with the Vision, City Council Priorities and Policy Plan components of The Ontario Plan.

(3) ***In the case of an application affecting specific property, the proposed PUD, or amendment thereto, will not adversely affect the harmonious relationship with adjacent properties and land uses.*** A thorough review and analysis of the proposed Project and its potential to adversely impact properties surrounding the subject site was completed by City staff. As a result of this review, certain design considerations were incorporated into the Project to mitigate identified impacts to an acceptable level, including the use of upgraded materials, the inclusion of certain architectural design elements on building exteriors, intensified landscape elements, and decorative hardscape elements.

(4) ***In the case of an application affecting specific property, the subject site is physically suitable, including, but not limited to, parcel size, shape, access,***

***and availability of utilities, for the request and anticipated development.*** In preparing the proposed PUD, a thorough review and analysis of the proposed project and the Project site's physical suitability for the proposed Project was completed, including analysis of the Project size, shape, intensity of development, building height, building setbacks, site access, site landscaping and drainage, fences and walls, vehicle circulation, pedestrian connections, availability of mass transit, necessary street dedication and easements, public right-of-way improvements, availability of utilities and other infrastructure needs, off-street parking and circulation, building orientation and streetscapes, architectural character, building materials and color, and site signage.

(5) ***The proposed PUD is superior to that which could be obtained through the application of the Development Code or a specific plan.*** The proposed PUD addresses aspects of the project that are specifically related to the Development Plan proposed in conjunction with the PUD application, including necessary building setbacks, site access points, off-street parking and site circulation, and architectural character.

SECTION 5: ***Planning/Historic Preservation Commission Action.*** Based upon the findings and conclusions set forth in Sections 1 through 4, above, the Planning/Historic Preservation Commission hereby RECOMMENDS THE CITY COUNCIL APPROVES the herein described Application, subject to each and every condition set forth in the Department reports attached hereto as "Attachment A," and incorporated herein by this reference.

SECTION 6: ***Indemnification.*** The Applicant shall agree to defend, indemnify and hold harmless, the City of Ontario or its agents, officers, and employees from any claim, action or proceeding against the City of Ontario or its agents, officers or employees to attack, set aside, void, or annul this approval. The City of Ontario shall promptly notify the applicant of any such claim, action, or proceeding, and the City of Ontario shall cooperate fully in the defense.

SECTION 7: ***Custodian of Records.*** The documents and materials that constitute the record of proceedings on which these findings have been based are located at the City of Ontario City Hall, 303 East "B" Street, Ontario, California 91764. The custodian for these records is the City Clerk of the City of Ontario.

SECTION 8: ***Certification to Adoption.*** The Secretary shall certify to the adoption of the Resolution.

- - - - - - - - - - - - - -

The Secretary Pro Tempore for the Planning/Historic Preservation Commission of the City of Ontario shall certify as to the adoption of this Resolution.

I hereby certify that the foregoing Resolution was duly and regularly introduced, passed and adopted by the Planning/Historic Preservation Commission of the City of Ontario at a regular meeting thereof held on the 22nd day of February 2022, and the foregoing is a full, true and correct copy of said Resolution, and has not been amended or repealed.

Rick Gage
Planning/Historic Preservation
Commission Chairman

ATTEST:

Rudy Zeledon
Planning Director and
Secretary to the Planning/Historic
Preservation Commission

STATE OF CALIFORNIA )
COUNTY OF SAN BERNARDINO )
CITY OF ONTARIO )

I, Gwen Berendsen, Secretary Pro Tempore of the Planning/Historic Preservation Commission of the City of Ontario, DO HEREBY CERTIFY that foregoing Resolution No. PC22-007, was duly passed and adopted by the Planning/Historic Preservation Commission of the City of Ontario at their regular meeting held on February 22, 2022, by the following roll call vote, to wit:

AYES: Anderson, Dean, DeDiemar, Gage, Lampkin, Ricci, Willoughby

NOES: None

ABSENT: None

ABSTAIN: None

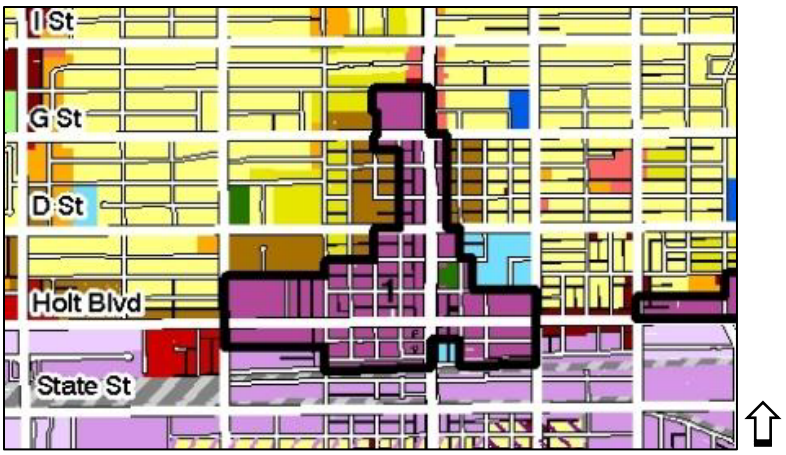
# 1. INTRODUCTION

This document is intended to function as a set of planning and design principles, development regulations and performance standards to guide and govern the development of a 0.86-acre parcel of land located on the southeast corner of Laurel Avenue and Emporia Street (see Exhibit 1-1, PUD Location Map).

The project site is located within the Ontario Plan Downtown Mixed-Use District, which requires the establishment of a Planned Unit Development (PUD) prior to development. The PUD fulfills the requirements of MU-1/LUA-2N (Downtown Mixed-Use/Arts District – North) zoning district, as set forth in Ontario Development Code Section 4.01.030 (Planned Unit Developments (PUD) and Amendments). The Art District West Planned Unit Development (PUD) will replace the existing zone district designations and zoning standards that apply to the affected property. Unless otherwise defined herein, definitions and interpretations contained in the Development Code shall apply. City staff and private developers will rely on this PUD to determine whether precise plans for development ("Development Plans") will adequately meet the City's land use and design objectives.

Exhibit 1-1: PUD Location Map



# 2. PUD OBJECTIVES

## 2.1 THE ONTARIO PLAN (TOP) CONSISTENCY

The Ontario Plan (TOP) Policy Plan (General Plan) designates the project area and surrounding properties as MU-1 (Downtown Mixed-Use). The Ontario Plan describes the Downtown Mixed-Use Area as an intensive vertical and horizontal mixture of retail, office, and residential uses in a pedestrian friendly atmosphere where the historic character is prominent. The most intensive uses are envisioned along Euclid Avenue and Holt Boulevard. The Downtown Mixed-Use Area is the historic heart of Ontario, which has a unique blend of historic, social and cultural uses set in a compact street grid. The Downtown Mixed-Use Area includes the Civic Center, City library and surrounding diverse residential neighborhoods that provide increased demand for retail opportunities along Euclid Avenue, Holt Boulevard and B Street. The densities and intensities of the mixed-use designation represented within The Ontario Plan (TOP) are the intended level of anticipated development; however, individual projects may vary depending upon an approved master plan, such as an area plan, specific plan, or planned unit development.

Exhibit 1-2: TOP Policy Plan Downtown Mixed-Use Area

The West Art District PUD is consistent with the principles, goals, and policies contained within the components that make up The Ontario Plan (TOP), including: (1) Vision, (2) Policy Plan (General Plan), and (3) City Council Priorities. The policies furthered by this PUD are as follows:

1. Vision

   On February 13, 2007, the Ontario City Council adopted The Ontario Vision. The central theme that motivates the Vision is – *"A sustained, community-wide prosperity which continuously adds value and yields benefits."* Everything the City does and every action the City takes is done with the simple yet comprehensive theme in mind, from the design quality of the built environment, to the intent of designing socio-economic programs, to the way in which its leaders govern as a community. In discussing a Vision that would endure for the lifetime of The Ontario Plan (30 years or more), the City

Council recognized that there are four components that serve as the basic building blocks that set the foundation for a unified and prosperous community. These foundational blocks must be expressed and widely accepted throughout the Plan's lifetime. They are:

1. A **Dynamic Balance** that enables our community to confront the continued dynamic growth of the region and technological change with confidence and a sense of opportunity.
2. A **Prosperous Economy** that sustains the perception and reality of prosperity across our entire community that positively impacts all the people of Ontario and is broadly – though not uniformly – shared.
3. **Distinctive Development** that integrates our varied and diverse focal points, districts, villages, and neighborhoods to provide a feeling of coherence without sacrificing uniqueness.
4. **Recognized Leadership** in local governance that stimulates excellence and serves to unify the people of Ontario in support of best practices in conducting public endeavors.

The Art District West PUD will implement the Ontario Vision in several ways that will further the City's desire to be a sustainable and prosperous community.

DISTINCTIVE DEVELOPMENT

Commercial and Residential Development

- The PUD will support, the City's Civic Center area, new multifamily developments and surrounding existing residential neighborhoods by providing the increased demand for retail uses and artistic uses in a more pedestrian friendly atmosphere.

- The PUD will seek to ensure additional mix of retail uses in the downtown that will provide additional services to the surrounding community and Civic Center area.

Design Quality

- The PUD will require a well-designed project(s) that covey's visual interest and character through:

  - Appropriate scale and massing
  - Architectural style and design that are complementary and appropriate for its setting.
  - The use of high-quality materials that will create visual interest, high quality, durable and appropriate for the architectural style.
  - Appropriate Site Planning to ensure building orientation visibility from the street, adequate number of driveways, sidewalks, building setbacks, parking lot orientation, adequate refuse storage areas and well-designed street frontages.

Public Safety

- The PUD will ensure that proper exterior lighting standards be located and designed to minimize direct glare beyond parking lots and future residential development/ or mixed-use projects in the downtown area. In addition, the Ontario Police Department requires that all lighting standards comply with a one-foot candle illumination to provide a level of security and public safety within the retail center.

2. Policy Plan

LAND USE ELEMENT

LU1 Balance

Goal LU1: A community that has a spectrum of housing types and price ranges that match the jobs in the City and that make it possible for people to live and work in Ontario and maintain a quality of life.

The PUD, through the development of retail, commercial uses and artistic uses, will help provide jobs to support the existing and new development within the surrounding downtown area.

Policies

- *LU1-3 Adequate Capacity. We require adequate infrastructure and services for all development.*

  The PUD, along with the future development entitlements for the site, will require the necessary infrastructure to serve the site and provide the necessary right-of-way dedication for street widening.

- *LU1-4 Mobility. We require development and urban design, where appropriate, that reduces reliance on the automobile and capitalizes on multi-modal transportation opportunities.*

  TOP Mobility Element System (Figure M-1) identifies Holt Boulevard as a future Bus Rapid Transit (BRT) Corridor. The PUD will seek to capitalize pedestrian traffic, vehicle and future BRT ensuring a mix of retail, commercial and artistic uses that will provide a variety of goods and services to the surrounding community and the future Buss Rapid Transit (BRT) users.

LU2 Compatibility

Goal LU2: Compatibility between a wide range of uses.

The PUD, through land use regulations for permitted uses, have ensured that those permitted uses allowed within the PUD are compatible with the MU-1/LUA-2N (Downtown Mixed-Use/Arts District – North) and surrounding area and not allow those uses that may have potential to create adverse impacts to the surrounding area.

Policies:

- *LU2-1: Land Use Decisions: We minimize adverse impacts on adjacent properties when considering land use and zoning requests.*

  The project area is zoned MU-1/LUA-2N (Downtown Mixed-Use/Arts District – North) and requires that a PUD be implemented for the project area to establish the development standards, land use regulations and design guidelines. The permitted uses within PUD have been established to provide retail, commercial and artistic uses to serve the downtown, Civic Center and surrounding residential area. Careful consideration has been given to ensure that permitted uses that may have potential to create adverse impacts to the surrounding area are not allowed.

- *LU2-2 Buffers. We require new uses to provide mitigation or buffers between existing uses where potential adverse impacts could occur.*

  The PUD, through the site planning, requires the that future building(s) developed on the site shall be placed along the frontage of Emporia Street to keep a buffer between the Southern Pacific Railroad to the south of the project and the future and existing developments to the north.

- *LU2-4 Regulation of Nuisances. We regulate the location, concentration and operations of potential nuisances.*

  The project area is zoned MU-1/LUA-2N (Downtown Mixed-Use/Arts District – North) and requires that a PUD be implemented for the project area to establish the development standards, land use regulations and design guidelines. The permitted uses within PUD have been established to provide retail, commercial and artistic uses to serve the downtown, Civic Center and surrounding residential area. Careful consideration has been given to ensure that permitted uses that may have potential to create adverse impacts to the surrounding area are not allowed. Those uses with operations that may have potential to create nuisances, will require discretionary approval through the Conditional Use Permit process.

- *LU2-5 Regulation of Uses. We regulate the location, concentration and operations of uses that have impacts on surrounding land uses.* The project area is zoned MU-1/LUA-2N (Downtown Mixed-Use/Arts District – North) and requires that a PUD be implemented for the project area to establish the development standards, land use regulations and design guidelines. The permitted uses within PUD have been established to provide retail, commercial and artistic uses to serve the downtown, Civic Center and surrounding residential area. Careful consideration has been given

to ensure that permitted uses that may have potential to create adverse impacts to the surrounding area are not allowed.

LU3 Flexibility

Goal LU3: Staff, regulations and processes that support and allow flexible response to conditions and circumstances in order to achieve the Vision.

- *LU3-1 Development Standards. We maintain clear development standards which allow flexibility to achieve our Vision.*

  To provide flexibility the densities and intensities of the mixed-use designation represented within TOP are the intended level of anticipated development; however, individual projects may vary depending upon an approved master plan, such as an area plan, specific plan, or planned unit development. The project area is zoned MU-1/LUA-2N (Downtown Mixed-Use/Arts District – North) and requires that a PUD be implemented for the project area to establish the development standards, land use regulations and design guidelines. The development standards within the PUD are intended to ensure quality and appropriate development to achieve TOP Vision for well-designed projects that covey visual interest.

COMMUNITY ECONOMICS ELEMENT

CE1 Complete Community

Goal CE1: A complete community that provides for all incomes and stages of life.

The permitted uses within PUD have been established to provide retail, commercial and artistic uses to enhance the economic growth of downtown and serve the surrounding residential areas.

Policies:

- *CE1-7 Retail Goods and Services. We seek to ensure a mix of retail businesses that provide the full continuum of goods and services for the community.*

  The permitted uses within PUD have been established to provide retail, commercial and artistic uses to serve the downtown and surrounding residential areas. These retail, commercial and artistic uses that will help to revitalize the downtown area and enhance its economic growth by much needed commercial and retail opportunities.

CE2 Place-Making

Goal CE2: A City of distinctive neighborhoods, districts, and corridors, where people choose to be.

The PUD will seek to ensure a mix a retail, commercial and artistic uses that will provide a variety of goods and services for the downtown and surrounding area. The PUD will seek to help revitalize the downtown area and enhance its economic growth by creating retail, commercial and artistic uses that provide opportunities within a historic downtown setting. The PUD area will be distinctive through the requirement of well-designed project(s) that respect and complement the historic context of downtown consist with the Downtown Ontario Design Guidelines (Adopted in 1998) through:

- Appropriate scale and massing
- Architectural style and design that are complementary and appropriate to for its setting.
- The use of high-quality materials that will create visual interest, high quality, durable and appropriate for the architectural style.
- Appropriate site planning to ensure building orientation visibility from the street, adequate number of driveways and sidewalks. Building setbacks, parking lot orientation, adequate refuse storage areas and well-designed street frontages.

MOBILITY ELEMENT

M3 Public Transit

Goal M3: A public transit system that is a viable alternative to automobile travel and meets basic transportation needs of the transit dependent.

TOP Mobility Element System (Figure M-1) identifies Euclid Avenue as a future Bus Rapid Transit (BRT) Corridor. The PUD will seek to capitalize pedestrian traffic, vehicle and future BRT ensuring a mix of retail and commercial uses and business that will provide a variety of goods and service to the surrounding community and the future Buss Rapid Transit (BRT) users. The PUD, along with the future development entitlements for the site, will require the necessary infrastructure to serve the site and provide the necessary rights-of-way dedication for street widening.

Policies:

- *M3-4 Bus Rapid Transit (BRT) Corridors. We work with regional transit agencies to implement BRT service to target destinations and along corridors, as shown in the Transit Plan.*

  TOP Mobility Element System (Figure M-1) identifies Euclid Avenue as future Bus Rapid Transit (BRT) Corridor. The PUD will seek to capitalize pedestrian traffic,

vehicle and future BRT ensuring a mix of retail, commercial and artistic uses and business that will provide a variety of goods and service to the surrounding community and the future Buss Rapid Transit (BRT) users. The PUD, along with the future development entitlements for the site, will require the necessary infrastructure to serve the site and provide the necessary rights-of-way dedication for street widening.

COMMUNITY DESIGN

CD1 Image & Identity

Goal CD1: A dynamic, progressive city containing distinct neighborhoods and commercial districts that foster a positive sense of identity and belonging among residents, visitors, and businesses.

- To provide flexibility the densities and intensities of the mixed-use designation represented within TOP are the intended level of anticipated development; however, individual projects may vary depending upon an approved master plan, such as an area plan, specific plan, or planned unit development. The project area is zoned MU-1/LUA-2N (Downtown Mixed-Use/Arts District – North) and requires that a PUD be implemented for the project area to establish the development standards, land use regulations and design guidelines. The development standards within the PUD are intended to ensure quality and appropriate development to achieve TOP Vision for well-designed projects that covey visual that respect and complement the historic context of downtown.

Policies:

- *CD1-2 Growth Areas. We require development in growth areas to be distinctive and unique places within which there are cohesive design themes*.

  The PUD will seek to ensure a mix a retail, commercial and artistic uses that will provide a variety of goods and services for the downtown and surrounding area. The PUD will seek to help revitalize the downtown area and enhance its economic growth by creating retail, commercial and artistic uses that will provide opportunities within a historic downtown setting. The PUD area will be distinctive through the requirement of well-designed project(s) that respect and complement the historic context of downtown consist with the Downtown Ontario Design Guidelines (Adopted in 1998) through:

  - Appropriate scale and massing
  - Architectural style and design that are complementary and appropriate to for its setting.
  - The use of high-quality materials that will create visual interest, high quality, durable and appropriate for the architectural style.

- Appropriate site planning to ensure building orientation visibility from the street, adequate number of driveways and sidewalks. Building setbacks, parking lot orientation, adequate refuse storage areas and well-designed street frontages.

- *CD1-4 Transportation Corridors. We will enhance our major transportation corridors within the City through landscape, hardscape, signage and lighting*.

  TOP Mobility Element System (Figure M-1) identifies Holt Boulevard as future Bus Rapid Transit (BRT) Corridor. The PUD will seek to capitalize pedestrian traffic, vehicle and future BRT ensuring a mix of retail, commercial and artistic business that will provide a variety of goods and service to the surrounding community and the future Buss Rapid Transit (BRT) users.

CD2 Design Quality

Goal CD2: A high level of design quality resulting in public spaces, streetscapes, and developments that are attractive, safe, functional and distinct.

Policies:

- *CD2-1 Quality Architecture.* We encourage all development projects to convey visual interest and character through:

  - Building volume, massing, and height to provide appropriate scale and proportion;
  - A true architectural style which is carried out in plan, section and elevation through all aspects of the building and site design and appropriate for its setting; and
  - Exterior building materials that are visually interesting, high quality, durable, and appropriate for the architectural style.

  The PUD will seek to help revitalize the downtown area and enhance its economic growth by creating retail, commercial and artistic opportunities within a historic downtown setting. The PUD area will be distinctive through the requirement of well-designed project(s) that respect and complement the historic context of downtown consist with the Downtown Ontario Design Guidelines (Adopted in 1998) through:

  - Appropriate scale and massing
  - Architectural style and design that are complementary and appropriate to for its setting.
  - The use of high-quality materials that will create visual interest, high quality, durable and appropriate for the architectural style.
  - Appropriate site planning to ensure building orientation visibility from the street, adequate number of driveways and sidewalks. Building setbacks,

parking lot orientation, adequate refuse storage areas and well-designed street frontages.

- *CD2-3 Commercial Centers. We desire commercial centers to be distinctive, pedestrian friendly, functional and vibrant with a range of businesses, places to gather, and connectivity to the neighborhoods they serve.*

  The permitted uses within PUD have been established to provide retail, commercial and artistic uses to serve the downtown, Civic Center, Arts District and surrounding residential area. The PUD will seek to capitalize on the downtown location by ensuring a mix a retail, commercial and artistic uses that will easily accessed by pedestrians through downtowns unique grid street pattern design.

- *CD2-5 Streetscapes. We design new and, when necessary, retrofit existing streets to improve walkability, bicycling and transit integration, strengthen connectivity, and enhance community identity through improvements to the public right of way such as sidewalks, street trees, parkways, curbs, street lighting and street furniture.*

  The PUD, along with the future development entitlements for the site, will require the necessary infrastructure to serve the site and provide the necessary right-of-way dedication and/or improvements.

- *CD2-9 Landscape Design. We encourage durable landscaping materials and designs that enhance the aesthetics of structures, create and define public and private spaces, and provide shade and environmental benefits.*

  The PUD development standards will ensure landscape design and materials will be used to enhance the aesthetics of structure(s), create and define public and private spaces, and provide shade and environmental benefits.

- *CD2-10 Surface Parking Areas. We require parking areas visible to or used by the public to be landscaped in an aesthetically pleasing, safe and environmentally sensitive manner. Examples include shade trees, pervious surfaces, urban run-off capture and infiltration, and pedestrian paths to guide users through the parking field.*

  The PUD development standards will ensure water conservation be provided through low water using plant materials, hydro zones, water efficient irrigation and weather-based controllers. Landscaped areas may be used for storm water infiltration through vegetated swales, retention basins, or dry wells as needed with the use of appropriate planting materials. Broad canopy shade trees will be used to reduce heat gain on buildings, paving and parking areas

City Council Priorities

- Invest in the Growth and Evolution of the City's Economy
- Maintain the Current High Level of Public Safety
- Operate in a Businesslike Manner
- Pursue City's Goals and Objectives by Working with Other Governmental Agencies
- Focus Resources in Ontario's Commercial and Residential Neighborhoods
- Invest in the City's Infrastructure (Water, Streets, Sewers, Parks, Storm Drains and Public Facilities)
- Encourage, Provide or Support Enhanced Recreational, Educational, Cultural and Healthy City Programs, Policies and Activities
- Ensure the Development of a Well Planned, Balanced, and Self-Sustaining Community in Ontario Ranch

## 2.2 CENTER CITY REDEVELOPMENT PLAN OBJECTIVES

The Center City Project Area encompasses the historic Euclid Avenue District, as well as East Holt Boulevard. Ontario's City Hall and surrounding Civic Center, Senior Center, Ovitt Family Community Library, the Museum of History and Art, Ontario Town Square, and the Law School of the University of La Verne are all within the Center City Project Area. Development is designed to create an immediate and positive identity transforming the area into a comfortable place to stroll and be seen.

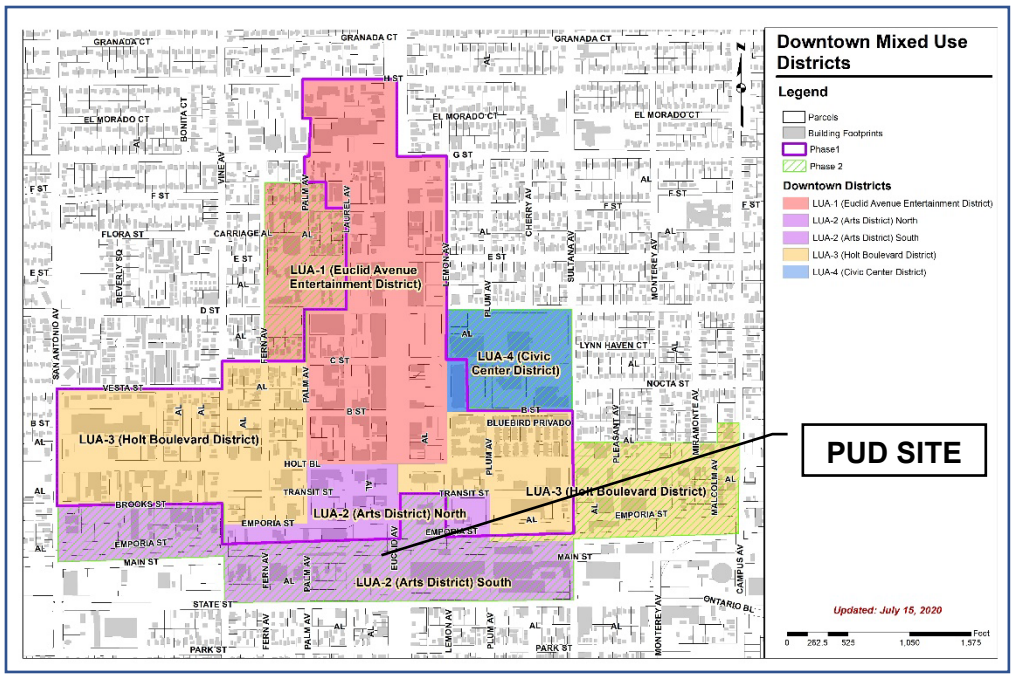
The current goals of the Center City Project include:

- Encourage development of a high intensity, multi-use central business district and surrounding neighborhoods that maximize the economic productivity of the commercial areas and maximize the housing opportunities of the residential areas.

- Apply innovative mixed-use urban design that maintains a flexible approach to allow for changing opportunities over a long-term, phased revitalization effort.

- Create a healthy and exciting urban environment, with the ability to work, live, shop and play within a small area, combine daytime and nighttime use and conserve energy and resources through mixed use development.

- Cluster activity centers within walking distance of each other, supported by a pedestrian network that provides an enjoyable pedestrian flow.



## 2.3 MU-1/LUA-2N (Downtown Mixed-Use/Arts District – North)

The project is located within MU-1/LUA-2N (Downtown Mixed-Use/Arts District – North) zoning district (see Exhibit 1-3, MU-1 (Downtown Mixed Use) Districts Map). The Arts District is intended as a dynamic destination for locals and tourists, while creating a fulfilling urban experience energized by artistic, educational, and commercial participants. The focus of the Area

is to increase the number of collaborated events and programs within the Area, with the intent to attract visitors, promote economic vitality, and boost revenue. Street fairs, artist festivals, restaurants, galleries, work/live lofts, breweries, and artisan co-ops will contribute to the physical and cultural diversity of the Arts District.

The Arts District North is intended to accommodate a mix of work/live lofts, artisan co-ops, restaurants, galleries, breweries, and other commercial uses intended to strengthen the economic base of the area.

Exhibit 1-3: MU-1 (Downtown Mixed Use) Districts Map

## 2.3 PUD DISTRICT PURPOSE AND OBJECTIVES

The Art District West Planned Unit Development (PUD) is intended to function as a set of planning and design principles, development regulations, and performance standards to guide and govern the development of the 0.86-acre site. This PUD will facilitate the development of retail, commercial and artistic services that will help achieve the City's goals to economically revitalize and aesthetically enhance the historic downtown area.

The objectives of the PUD District are to:

- Promote development projects that are consistent with the land use/downtown revitalization objectives of the Center City Redevelopment Project area.
- Promote the revitalization the downtown area and enhance its economic growth by creating retail uses within a historic downtown setting.

- Promote community retail, commercial and artistic uses to meet the needs of the downtown residents, Civic Center visitors and surrounding residential neighborhoods.
- Promote the development of outdoor patio as part of the commercial development providing for social and pedestrian interaction.
- Orient commercial buildings along the frontage of Emporia Street and Euclid Avenue to create an accessible urban edge and sense of arrival and appropriate relationships among new and existing adjacent land uses.
- Provide for a circulation network which promotes pedestrian walkways and bicycle activity as alternative modes of travel while also providing for safe and efficient movement of automobile travel through the project site.
- Incorporate a landscape to enhance and compliment the urban environment along Emporia Street and the Euclid Avenue slope along the eastern boundary of the site.

# 3. LAND USE PLAN

## 3.1 LAND USE DESIGNATION

This PUD establishes the MU-1 Commercial district and the land use designations, as shown on Exhibit 1-4, Permitted Use Table, for the project limits. Retail, commercial and artistic uses are strongly encouraged to accommodate a mix of artisan co-ops, restaurants, galleries, breweries, and other commercial uses intended to strengthen the economic base of the downtown area.

**Exhibit 1-4: PUD Land Use Plan**

## 3.2 PERMITTED USES

Table 3-1 (Permitted Uses) shows the allowable land use, activity or facility permitted within the Mixed Use 1 (MU-1) Commercial District of the Art District West PUD. A land use not listed in Table 3-1 shall be considered a prohibited land use. For a land uses like those listed in Table 3-1, but not expressly stated in the PUD, the Planning Director or her/his designee has the authority to make a determination of applicability of the similar land uses.

## Table 3-2: Permitted Uses

**"P"** (Permitted) shall mean the land use, activity, or facility within the specified zoning district is permitted by right of being in the proper zoning district.

"**C**" (Conditionally Permitted) shall mean the land use, activity, or facility within the specified zoning district is subject to the granting of a Conditional Use Permit pursuant to Section 4.02.015 (Conditional Use Permits) of the Ontario Development Code.

**"A"** (Administratively Permitted) shall mean the land use, activity, or facility within the specified zoning district is subject to the granting of an Administrative Use Permit pursuant to Section 4.03.015 (Administrative Use Permits) of the Ontario Development Code.

**"NP"** (Not Permitted) shall mean the land use, activity, or facility within the specified zoning district is not permitted by right of being in the proper zoning district.

All other uses not listed as Permitted or Conditional are prohibited unless a finding can be made by the Planning Director that the use is similar to, and no more objectionable than, a permitted or conditional use.

| Land Use | MU-1 Commercial | Notes |

## Table 3-2: Permitted Uses

**"P"** (Permitted) shall mean the land use, activity, or facility within the specified zoning district is permitted by right of being in the proper zoning district.

"**C**" (Conditionally Permitted) shall mean the land use, activity, or facility within the specified zoning district is subject to the granting of a Conditional Use Permit pursuant to Section 4.02.015 (Conditional Use Permits) of the Ontario Development Code.

**"A"** (Administratively Permitted) shall mean the land use, activity, or facility within the specified zoning district is subject to the granting of an Administrative Use Permit pursuant to Section 4.03.015 (Administrative Use Permits) of the Ontario Development Code.

**"NP"** (Not Permitted) shall mean the land use, activity, or facility within the specified zoning district is not permitted by right of being in the proper zoning district.

All other uses not listed as Permitted or Conditional are prohibited unless a finding can be made by the Planning Director that the use is similar to, and no more objectionable than, a permitted or conditional use.

| Land Use | MU-1 Commercial | Notes |
|---|---|---|
| **DAY CARE FACILITIES** | | |
| Commercial Daycare | **NP** | |
| **EATING DRINKING PLACES AND FOOD SERVICES** | | |
| Restaurants (Sit Down / Full Service) | **P** | |

### Notes

1. In the MU-1 zoning district, live entertainment is administratively permitted only in conjunction with a bona fide restaurant or alcoholic beverage manufacturer's tasting room, tap room, pub or wine room.
2. See Ontario Development Code Section 5.03.037 (Artisan Small-Scale and Micro Manufacturing Facilities)
3. See Section 4.4 Car Condo (Vehicle) Store Regulations

# 4. DEVELOPMENT REGULATIONS

This section sets forth the standards to govern the placement, height, and bulk of permitted buildings and structures; to establish locational criteria for vehicular access to site, parking and loading requirements, landscape, sign standards; and identify historic preservation features to be incorporated and/or considered for development plans. Unless otherwise stated herein, all development within the project area shall meet the applicable standards and requirements of the Ontario Development Code.

## 4.1 INTENSITY

Commercial retail uses within the mixed-use district are allowed a Floor Area Ratio (FAR) of up to 1.0. Floor Area Ratio is calculated by dividing the building square footage by the net lot area (after right-of-way dedications).

## 4.2 BUILDING HEIGHT

The buildings within the MU-1 PUD Commercial district area shall be a maximum of 35 feet or consistent with scale and height of the adjacent buildings along Emporia Street. Architectural projections, such as parapet articulations, cornices, towers, etc. may be constructed at a height of 25% above the prescribed height of the zoning district.

## 4.3 BUIDING\PARKING SETBACKS

All setbacks shall be measured from the ultimate property lines after all dedications to develop streets to the ultimate right-of-way width (Table 4-1, Building Setback(s)). Placement of buildings, structures, fences, walls, utility facilities, yards, etc. will be based on the street right-of-way and property line dimensions.

| Table 4-1: Building(s) Setbacks | | |
|---|---|---|
| **MU-1 Commercial District Development Standards** | | |
| **Requirements** | **MU-1 Commercial District** | **Additional Requirements** |
| **Building Development Standards** | | |
| 1. Emporia Street Setback | 0 Feet Minimum<br>3.5 Feet Maximum | Building Architectural features/ awnings may encroach into the right-of-way, subject to the California Building Code requirements. |
| 2. Euclid Avenue Street Setback | 0 Feet Minimum<br>5 Feet Maximum | Building Architectural features/ awnings may encroach into the right-of-way, subject to the California Building Code requirements.<br>Edge of slope (right-of -way), along the Euclid Avenue Street side frontage, shall be landscaped. |
| 3. Interior Side Property Setbacks<br>4. Rear Property Setbacks | 0 Feet Minimum<br>0 Feet Minimum | Setback areas shall be landscaped |
| **Site Development Standards** | | |
| 1. Minimum Landscape Coverage | N/A | All setback areas, building entry areas shall be landscaped. |
| 2. Minimum Parking Space or Drive Aisle Setbacks to face of curb | 5 feet | Setback areas shall be landscaped. |
| 3. Minimum Parking Space or Drive Aisle Setbacks to Interior Side Property Lines | 5 Feet | Setback areas shall be landscaped. |
| 4. Minimum Parking Space or Drive Aisle to buildings, walls or fences | 5 Feet | Setback areas shall be landscaped. |

## 4.4 LANDSCAPING

Landscaping elements provide significant contributions to the aesthetic quality and character of the Art District West PUD, with respect to public and private spaces. Detailed landscape/irrigation plans shall be included in the Development Plan submittals for the PUD. The plan shall specify all landscape and hardscape elements for the development plan site and indicate how the improvements will coordinate with the other sites within the PUD. The landscape plans shall show the location of all ground mounted utility structures such as transformers, back flow prevention devices, trash enclosures, and HVAC equipment and indicate the methods for screening these items. All utility structures and equipment shall be screened from view of the public streets and adjacent development.

Water conservation shall be provided through low water using plant materials, hydro zones, water efficient irrigation and weather-based controllers. Landscaped areas may be used for storm water infiltration through vegetated swales, retention basins, or dry wells as needed with the use of appropriate planting materials. Broad canopy shade trees shall be used to reduce heat gain on buildings, paving and parking areas. The plan shall identify all existing trees on site and preserve them where possible. The landscape design shall meet the requirements of the Landscape Development Standards outlined in the Ontario Development Code and shall create well-functioning spaces within a sustainable design.

Landscaping shall be used on the site to show transition from adjacent uses, define a circulation pattern on the lot, screen the parking lot from the street, highlight entries, provide shade for parking as well as outdoor seating areas, and to soften the appearance of the building.

Developments shall comply with the following:

- All setback areas, building entry areas shall be landscaped.
- At a minimum, landscaping shall include 15-gallon trees planted no more than 20 FT on center, within minimum 5-FT wide planters.
- A suitable plant material (grasses, ivy, etc.) should be used as ground cover in planters.

Street trees shall comply with the variety, size, and spacing as directed by the City of Ontario Master Street Tree Plan.

4.5 EQUIPMENT AND MECHANICAL SCREENING

All roof mounted and ground mounted equipment shall be fully screened from view of the public street and adjacent developments. The location of items shall be designed to allow screening with landscape materials, walls, architectural features, parapet walls, etc. Screening shall be designed to be integrated into the design of the project.

Ladders for roof access shall be mounted on the inside of the building or shall be completely concealed from public view.

4.6 FENCES AND WALLS

Fences and walls within the project area shall be made of decorative materials which are compatible with the overall architectural character of the development within the PUD area. All fences and walls shall be in scale with the development to fulfill such needs as screening and security.

Fences, walls and hedges within the project area shall comply with Engineering Corner Sight Distance Standards and other applicable standards. All decorative walls, monuments and/or other similar features shall not encroach into the public street right-of-way.

Walls shall be limited to a maximum of four (4) feet in height within any street frontage areas. Interior or rear walls shall be a maximum of six (6) feet in height.

Walls shall be an integral design of the building architecture and feature similar finished material, reveal lines, trim, etc.

4.5 CAR CONDO (VEHICLE) STORAGE REGULATIONS

Car Condominiums are space you own and customize – much more than just a place to house your car; they're a lifestyle (Artform) that is being embraced by car aficionados of all sports, classic, racing, exotics, hot rods and collectible cars. Car Condos works similar to a regular condominium. The developer handles the permits and construction, and then the buyer builds out the inside of the unit the way they want.

Car Condos offer car enthusiasts a safe, secure and private space to store and display their vehicles, other motorized toys and treasures. The condo units can be customized to include a loft area for an office, TV viewing area and refreshment kitchenette area.

The following standards shall govern the establishment and operation of Car Condos (Vehicle Storage) are intended to result in facilities that are well designed, maintained and enhance the Arts Districts area in which they are located in.

Car Condo (Vehicle Storage) facilities shall comply with the following:

1. Covenants, Conditions, and Restrictions (CC&Rs) will be required to be recorded for the condominium car units and subject to City review and approval. CC&Rs shall include the following:

**(a)** CC&Rs shall be prepared for the Project and shall be recorded prior to the issuance of a building permit.

**(b)** The CC&Rs shall be in a form and contain provisions satisfactory to the City. The articles of incorporation for the property owner's association and the CC&Rs shall be reviewed and approved by the City.

CC&Rs shall ensure reciprocal parking and access between parcels, and common maintenance of:

**(i)** Landscaping and irrigation systems within common areas;

**(ii)** Landscaping and irrigation systems within parkways adjacent to the project site, including that portion of any public highway right-of-way between the property line

or right-of-way boundary line and the curb line and also the area enclosed within the curb lines of a median divider (Ontario Municipal Code Section 7-3.03), pursuant to Ontario Municipal Code Section 5-22-02;

**(iii)** Shared parking facilities and access drives; and

**(iv)** Utility and drainage easements.

**(c)** CC&Rs shall include authorization for the City's local law enforcement officers to enforce City and State traffic and penal codes within the project area.

**(d)** The CC&Rs shall grant the City of Ontario the right of enforcement of the CC&R provisions.

**(e)** A specific methodology/procedure shall be established within the CC&Rs for enforcement of its provisions by the City of Ontario, if adequate maintenance of the development does not occur, such as, but not limited to, provisions that would grant the City the right of access to correct maintenance issues and assess the property owners association for all costs incurred.

2. All motor vehicle storage shall include the keeping of automobiles, trucks, vans, recreational vehicles and watercraft, motorcycles, trailers, forklifts, and any inoperative vehicle, regardless of vehicle type.
3. The indoor storage of motor vehicles shall comply with all applicable requirements of the fire and building codes.
4. Any use that creates excessive noise, dust, hazardous materials or pollutants, or result in obvious fire hazards or negatively impact the reasonable use and enjoyment of other units are not permitted.
5. Minor vehicle maintenance (oil change, detailing, tune-ups, etc.) is allowed provided that the work does not reasonable interfere or negatively impact other units. Painting, bodywork or welding is not permitted.
6. Car washing is allowed, subject to National Pollutant Discharge Elimination System (NPDES) and City regulations.
7. The units may not be used for residential living. Loft office areas, kitchenette (sink, refrigerator, microwave) TV lounge areas, bathrooms and showers are permitted.
8. All vehicles, trailers and/or accessories must be stored within the enclosed unit. No outside storage is allowed.
9. Retail sales or commercial office uses from units is prohibited.
10. Retail or wholesale sales of vehicles from units is prohibited.
11. No exterior sign, placard, picture, advertisement, name or notice may be installed or displayed on any part of the outside exterior of a unit.

# 5. CIRCULATION, PARKING, & INFRASTRUCTURE

Access to the site will be limited to Emporia Street only.

## 5.1 PEDESTRIAN CONNECTIONS

Pedestrian connections shall be provided to each building from the public street within the PUD site. The Mixed-Use Commercial land use district shall also provide pedestrian pathways/sidewalks, along Emporia Street, to connect to the residential, work\live lofts and commercial developments surrounding the PUD area.

## 5.2 PUBLIC RIGHT-OF-WAY IMPROVEMENTS

The public right-of-way shall be improved with each proposed development. The public right-of-way improvements required are to include but are not limited to the following: street pavement, curb and gutter, parkway landscaping, parkway irrigation, public sidewalk, traffic signing and striping, streetlights, bus stop, bus shelter and amenities. The extent of the required improvements shall be determined for each development plan. At a minimum, the improvements shall incorporate all items along the street frontages of the properties to be developed with proper transitioning if the entire block frontage is not being installed with a development.

## 5.3 INFRASTRUCTURE

There is an existing 6-inch water line within Emporia Street that shall serve the PUD site, which connects to a 4-inch STL in Laurel Avenue (undersized). The water main will be required to be upsized, possibly to a 12-inch - required size and limits to be determined by the fire flow test. However, it is likely that the upsize will take place from the intersection of Holt Boulevard and Laurel Avenue, south to the intersection of Emporia Street and Laurel Avenue, due east to the end of the cul-de-sac to provide adequate fire service.

Wastewater flows for the PUD site will be designed to use an existing 8-inch sewer line located within Emporia Street.

On-site stormwater drainage facilities shall be provided to capture and infiltrate a 2-yr, 24-hour storm event, consistent with the San Bernardino County Stormwater Program's Water Quality Management Plan (WQMP) requirements for new development projects. Stormwater capture and infiltration facilities may include the utilization of vegetated swales, depressed landscaped basins, pervious concrete pavement or underground stormwater retention/infiltration vaults. All building roof and paved area runoff shall be directed into depressed landscaped swales, trenches or basins, within the development, in order to comply with the requirement to capture and infiltrate the 2-yr, 24-hour storm event runoff.

The Applicant/Developer will be responsible to design and construct street improvements, along property frontage of Emporia Street, in accordance with conditions issued by City’s Engineering Land Development Division. These, and all other street improvements required herein, shall include, but not limited to, concrete curb and gutter, sidewalk, LED streetlights, signing and striping, and parkway landscaping.

Existing Street light fixtures, along Emporia Street will be required to be replaced with City-approved LED equivalent fixtures. Refer to the Traffic and Transportation Design Guidelines for LED fixture requirements. The type of street lighting will be determined at the time of development.

## 5.4 PARKING

Parking shall be provided on-site at the rates required by the City of Ontario Development Code. One parking space within each Car Condo Unit may be counted towards required parking for vehicle storage use. In addition, the Downtown Parking Model may be used to obtain required parking for uses within the PUD.

The Downtown Ontario Parking Model was created in 2002 to provide a means of assessing parking demand and capacity in the downtown area. As in most downtowns, on-site parking is not typically attainable due to as-built conditions, including small lots, historic buildings with no setbacks, alley loaded streets, and excessive lot coverage. The Excel-based parking model specifically evaluates demand based on land use and capacity at maximum build out on an hour-by-hour and block-by-block basis. The model provides an estimate of parking availability (on-site and street parking combined) with shared parking within the downtown district as the premise.

# 6. DESIGN GUIDELINES

The following design guidelines are intended as a reference to assist the designer in understanding the City's goals and objectives for high quality commercial development. The guidelines compliment the mandatory development standards contained in Subsection 4 (Development Regulation) above.

Design principles and examples of desired styling elements to guide the development within the downtown are set forth in the Downtown Ontario Design Guidelines ("Guidelines"), adopted by the Ontario City Council on August 18, 1998. The design guidelines in this PUD are general in nature and may be interpreted with some flexibility in their application to specific projects. The guidelines will be utilized during the City's development review process to encourage the highest level of design quality, while at the same time providing the flexibility necessary to encourage creativity on the part of the project designer(s). As such, some variations from the Guidelines are permitted, provided that the integrity of the urban design and historic preservation principles is not compromised. To safeguard the integrity of the historic district, a Certificate of Appropriateness is required for development.

## 6.1 SITE DESIGN

The site design shall minimize pedestrian/vehicle conflicts by creating opportunities for building entry plazas, outdoor dining, and landscaped pathways that promote safe and convenient pedestrian movement.

## 6.2 BUILDING ORIENTATION

Buildings should be oriented towards Emporia Street. Frontages should be enhanced with entry elements, interesting architecture, enhanced materials, and pedestrian scale to provide connection between the development and the street. Windows and entries should face the street avoiding blank walls dominating public views. Stores with entries not visible from the street may be oriented towards pedestrian open space. The building entries may be located on the side of the building so long as strong pedestrian connection is maintained through wide walkways, enhanced pavers, plazas, appropriately scaled lighting and/or other similar features. Rear entrances, if needed, should be secondary in nature.

## 6.3 BUILDING STREET SIDE SETBACKS

The sides of buildings along street edges shall be landscaped within the setback to soften the building's appearance as well as designed with windows or design elements.

## 6.4 STREET FRONTAGE AND PARKING LOTS

Parking lots should generally be placed away from streets. Street frontages shall be broken up with buildings, landscaping, plazas, and other pedestrian features. Continuous parking lots along the street frontage should be avoided. Any parking along street edges shall be setback with a landscaped buffer to minimize the dominant feeling of the automobile along the street. Continuous

parking stalls may be interrupted by landscaped islands no more than 10 stalls apart. Parking lots are encouraged to be interconnected rather than separated for each building. Separated parking lots encourage customers to drive from store to store. Parking lots shall not be visible from the Euclid Avenue corridor.

## 6.5 SERVICE AND STORAGE AREAS

Loading areas and storage areas are to be located behind or to the side of buildings (West side) siting onto Emporia Street. These features must be screened with walls and landscaping as much as possible from public view of streets, residences, and pedestrian walkways. Loading areas and storage areas should not conflict with pedestrian walkways.

## 6.6 REFUSE CONTAINERS

Refuse containers and equipment shall be easily accessed by service vehicles. Service facilities such as trash enclosures, loading zones and yard areas shall be designed, located and oriented to have a minimal visual impact on the development within the PUD area. Trash enclosures shall be designed to coordinate with the architecture, colors and materials of the style of the development and shall be located to provide adequate access for trash pickup without encroaching on access drives or landscaped areas. Trash enclosures shall be designed and constructed with a solid roof cover which shall also be designed to match the architecture of the development. The enclosure may be designed to be incorporated into the building, subject to City review/approval, in order to scree the enclosure appropriately.

## 6.7 SIDEWALKS

Sidewalks shall be located along natural pedestrian travel paths. Sidewalks should be a minimum of 5’ wide along pedestrian pathways.

## 6.8 ARCHITECTURAL CHARACTER\DETAILS

The project area is located within Ontario’s historic downtown area and shall comply with the Downtown Ontario Design Guidelines. The Downtown Ontario Design Guidelines were adopted in 1998 to guide the physical revitalization of Ontario’s historic downtown. The Guidelines provide architectural and design principals, as well as design concepts for downtown districts. The project area is located within the Education Center, a mixed-use area with a focus on commercial, retail, public, and educational uses.

The design principles and desired architectural features for the mixed-use blocks are derived from the architectural style and elements set forth in Section 3.5.3 of the Downtown Design Guidelines, with respect to storefront modulation, entrances, roof design, mechanical equipment, building elements (cornices, storefront frame, mid-floor panel, transom windows, bulkheads), awnings, materials and colors. Those guidelines, together with the following, shall be incorporated into the Development Plans and Certificates of Appropriateness for each block, subject to final interpretation by the Planning/Historic Preservation Commission and City Council.

Architectural Character

- Create an architectural character that compliments the various styles within the historic downtown by using similar proportions, building details and building material.
- New buildings should appear to fit in contextually with existing historic buildings by using similar proportions, articulation, building details and building material.
- The overall character should feel like a modern interpretation of a traditional American small town.
- Create compatibility between the mixed-use architecture and the residential architecture within the downtown area; the introduction of unifying elements such as similar materials and colors should be considered; however, "sameness" is discouraged.

Massing & Scale

- Employ simple, yet varied massing, with wall openings that create shadow line and provide visual relief. Monolithic buildings and extensive blank wall surfaces are not allowed.
- Emphasize massing and height of corner elements
- Building increments should be a maximum of 50 feet in width. Buildings that exceed fifty
- (50) feet of frontage should use various architectural devices to replicate the building increments and pattern of the existing downtown including horizontal breaks and offsets every 25 to 50 feet
- The upper portion of the buildings should reflect the same increment of articulation as the ground level (storefront level)
- The cornices and moldings at the top of facades should also reflect the vertical massing (increments) of the building
- Use strong and identifiable building forms to demarcate street intersections for instance, a taller building mass, tower element/clock tower, or cupola may be considered.
- Where adjacent buildings will be of varying heights, they should be sensitively designed to promote a compatible transition in massing and avoid abrupt changes in scale along the streetscape.

Articulation & Fenestration

- Design buildings with 3-dimensional quality; building facades should be based upon a pleasing set of proportions and a clear pattern of building openings.
- Differentiate between the base, middle and top levels of a building; for instance, street-oriented shops may feature a 1) a bulkhead; 2) display windows; and 3) transom and detailed cornice.
- Avoid monotonous or blank facades on a building; buildings shall be articulated on all sides. Use fenestration (windows and doors), as well as changes in wall plane, material, texture, color, etc. to create shadow lines and articulate building walls.
- Provide highly visible public entrances, preferably oriented to streets and outdoor spaces; shop entrances may be clearly expressed with recesses, overhangs, special materials, and/or detailing.

- Require a high degree of street level transparency, especially along sidewalks, important outdoor spaces and heavily trafficked areas; the use of reflective, opaque, and darkly tinted glass should be restricted.

Architectural Details

- Use architectural details to enhance a building's appearance. Careful detailing is especially appropriate at the base of buildings, along cornices, eaves, parapets or ridge tops, and around entries and windows.
- Incorporate human-scaled details such as canopies and awnings, transparent windows and windows displays. These are required at public entrances and along heavily trafficked outdoor areas.
- Design architectural features and details as an integral part of the building; architectural features, including canopies and awnings, should not appear "tacked-on."

Storefront Guidelines

- Storefronts should provide an individual look for each store or establishment while still blending in with the overall design.
- Storefronts shall incorporate high quality building materials. A durable base material (18 inches high min.) such as brick, tile, exterior cement plaster, or pre-cast architectural concrete shall be used. Storefront glazing and exterior plaster shall not terminate at the ground plane.
- Storefront glazing shall be clear glass to permit clear views into the interior space. The amount of such glass shall provide a balance between high visibility into the store interior and architectural character/quality.
- Entrance doors shall be of a traditional style and transparent as possible; however, an all glass door is prohibited.
- No part of any open doors shall extend into the public right-of-way.
- Storefront openings should not exceed 30 feet in width without the interruption of a vertical building element (column or wall).
- Storefront openings may extend up to 16 feet in height; the height should range from 8 to 16 feet.

Materials & Colors

- Use materials that exhibit permanence and quality, and that unify a building's appearance on all sides; materials and colors should accentuate the architectural details of the building and promote visual harmony. Brick, tile, pre-cast architectural concrete, wood, stone veneers or stucco are preferred.
- To create visual interest, use at least 3 different building materials on building facades. Materials may be used to highlight a building entrance or distinguish the building base.
- Any awnings shall be comprised of durable, heat, dust and mildew-resistant canvas materials that are designed to withstand the rigors of the Ontario climate. Vinyl or other shiny materials are prohibited. However, canopies are preferred over awnings.

Roofs/Rooftop Equipment

- Express roofs in a visually interesting manner that complements the composition of the building and surrounding area, (i.e., use sculpted roof forms or a strong and attractively detailed cornice).
- Locate and/or screen rooftop equipment, including ladders and antenna devices, so that it is not visible from streets and adjacent buildings; methods of rooftop screening should be integral to the building's form.
- All mechanical units shall be screened from public view and from adjacent existing buildings (preferably with roof forms).
- When roof decks and mechanical units are visible from adjacent developments, they should be as unobtrusive as possible and painted to match finish roof material.

## 6.9 OUTDOOR DINING AREAS

Outdoor dining areas adjacent to a street level eating or drinking establishment are encouraged along Emporia Street and Euclid Avenue. Any such areas shall be designed in accordance with the provisions set forth in Section 2A.7 of the Downtown Ontario Design Guidelines, plus any additional features that may be required as part of on-sale alcoholic beverages. Outdoor dining along Euclid Avenue, if proposed within the rights-of way, will require an agreement with the California Department of Transportation, since this is street is within a State right-of-

## 6.10 SIGNS

All commercial signs shall be designed in accordance with the criteria set forth in Section 2C of the Downtown Ontario Design Guidelines.

## 6.11 LIGHTING

All lighting of facades, decorative fixtures, store window interiors, awnings, and signs shall be designed in accordance with the criteria set forth in Section 2D of the Downtown Ontario Design Guidelines.

On-site lighting must be directed away or shielded from adjacent streets, and adjacent properties. All exterior lighting shall be of an indirect nature, coming from under eaves and canopies, or at ground level, with in landscaped areas.

Exterior lighting fixtures should be a decorative and reinforce the architectural style of the building.

Light standards less than 15 FT in height (including lighting bollards) should illuminate all street sidewalks and connecting walkways and are encouraged throughout the project.

# 7. HISTORIC PRESERVATION

## 7.1 HISTORIC CONTEXT AND BACKGROUND

The project area that comprises the PUD established by this document is located within the City's Historic Downtown District. Founded by the Chaffey Brothers in the 1880's, Ontario was a coined a "model irrigation colony" by an Act of Congress in 1904. The Chaffey Brothers bought 6,218 acres of the Cucamonga Ranch in 1882 after the Southern Pacific Railway extended its service to the west. Approximately 640 acres were set aside for the community of Ontario, with half of that endowed to the Chaffey Agricultural College. The rest of the acreage was utilized as agricultural land. The primary feature of the Chaffey city plan was the two-hundred-foot-wide Euclid Avenue. Several innovations included the provision for water rights for each landowner, electric lights, and an electric railway. The gravity Mule Car that ran along the length of Euclid from 1888 to 1895 provided interest to its visitors as did the historic fountain that displayed Ontario's water supply system. The median still exists today and has been a center of public activity since its inception. The present downtown took shape from the original irrigation system and land subdivision pattern established by the Chaffey Brothers in the 1880's as it grew evenly northwards away from the railroad lines. The area within the current Downtown almost exactly matches the original boundaries of the Model Colony.

As a part of the recognition of Ontario's rich heritage, the City Council in July 1991 adopted a Historic Preservation Ordinance. The purpose of the Ordinance was:

1. To safeguard the City's unique historical heritage as embodied and reflected in the City's architectural history and patterns of cultural development;
2. To foster civic and neighborhood pride and a sense of identity based on the recognition and use of Historical Resources; and
3. To preserve diverse architectural styles, patterns of development, and design preferences reflecting phases of the City's history and to encourage complementary contemporary design and construction and inspire a more livable urban environment.

The PUD area has side street frontage along Euclid Avenue. The public right-of-way of Euclid Avenue from Philadelphia Street to the I-10 was designated as Local Landmark No. 67 on January 16, 2001 by the Ontario City Council. On August 10, 2005, the public right-of-way of Euclid Avenue from Philadelphia Street in Ontario to 24th Street in Upland was listed on the National Register of Historic Places as a significant cultural landscape. The public right-of way includes north and south bound streets, sidewalks, light fixtures, parkways, median, trees, and stone and concrete curbs and gutters. Contributing character-defining features include the 60-foot wide median, historic rock curb, scored sidewalks, King standard light posts, double planting of California pepper trees (Schinus molle), silk oaks trees (Grevillea robusta), and other mature vegetation such as deodar trees (Cedrus deodara) and Canary Island palms (Phoenix canariensis). All proposed developments within the PUD area will require a Certificate of Appropriateness to

ensure alterations and building forms (design, scale/massing and site layout) are appropriate to the character of the historic Euclid Avenue frontage (Right-of-way).

## 7.2 EXISTING HISTORIC RESOURCES

The PUD area does not contain any potential or proposed historic resources. However, the area is located within the Proposed Downtown Historic District. As such, a Certificate of Appropriateness will be required with all proposed developments within the PUD area to ensure no adverse impacts to the proposed and designated historic resources occur as a result of development. Infill and new construction, including building forms (design, scale/massing and site layout) and architectural elements, shall be developed in a manner that adheres to the Secretary of Interior Standards for the Treatment of Historic Resources, the City of Ontario Development Code, and the Ontario Design Guidelines.

# 8. ADMINISTRATION

## 8.1 ITEMS NOT ADDRESSED IN PUD

Any terms, requirements, or regulations not addressed within the PUD document shall be governed by the City of Ontario Development Code, the regulations of the Mixed-Use zones and City Standards.

## 8.2 DEVELOPMENT APPLICATIONS

Development Plans for the development of each individual parcel within the PUD area, along with fees and other required items, shall be submitted for review and approval per the requirements contained in Chapter 2, *Administration and Procedures*, of the City of Ontario Development Code and the General Application.

## 8.3 ADMINISTRATIVE EXCEPTIONS

Deviation from the development standards set forth in this document may be granted up to a maximum of ten (10%) percent by the Zoning Administrator. Any deviation that is greater than (10%) percent shall require Variance approval.

ORDINANCE NO. _____

AN ORDINANCE OF THE CITY COUNCIL OF THE CITY OF ONTARIO, CALIFORNIA, APROVING FILE NO. PUD22-001, THE ARTS DISTRICT WEST PLANNED UNIT DEVELOPMENT, ESTABLISHING DEVELOPMENT STANDARDS, DESIGN GUIDELINES, AND INFRASTRUCTURE REQUIREMENTS FOR 0.86-ACRE OF LAND LOCATED AT 125 WEST EMPORIA STREET, WITHIN MU-1/LUA-2N (DOWNTOWN MIXED-USE/ARTS DISTRICT – NORTH) AND EA (EUCLID AVENUE OVERLAY) ZONING DISTRICTS, AND MAKING FINDINGS IN SUPPORT THEREOF—APN: 1049-059-14.

WHEREAS, RWSS DEVELOPMENT LLC ("Applicant") has filed an Application requesting approval of the Arts District West Planned Unit Development, File No. PUD22-001, as described in the title of this Ordinance (hereinafter referred to as "Application" or "Project"); and

WHEREAS, the Application applies to 0.86-acre of land located at the eastern terminus of Emporia Street, north of the Union Pacific Railroad right-of-way, at 125 West Emporia Street, within the MU-1/LUA-2N (Downtown Mixed-Use/Arts District – North) and EA (Euclid Avenue Overlay) zoning districts, and is currently developed with a paved public parking lot; and

WHEREAS, the Ontario Plan describes the Downtown Mixed-Use Area as an intensive vertical and horizontal mixture of retail, office, and residential uses in a pedestrian friendly atmosphere, where the historic character is prominent. The most intensive uses are envisioned along Euclid Avenue and Holt Boulevard. The Downtown Mixed-Use Area is the historic core of Ontario, which has a unique blend of historic, social, and cultural uses set in a compact street grid. The Downtown Mixed-Use Area includes the Civic Center, City library and surrounding diverse residential neighborhoods that provide increased demand for retail opportunities along Euclid Avenue, Holt Boulevard, and B Street; and

WHEREAS, the Policy Plan specifies that the Downtown Mixed-Use Area is to be implemented through the adoption of an Area Plan or Planned Unit Development (“PUD”) prior to the development of properties within the Area. In compliance with this requirement, the Applicant has submitted the Art District West Planned Unit Development (included as Attachment A), which is consistent with this vision, and the goals and policies of the Policy Plan; and

WHEREAS, the purpose of the PUD is to secure a fuller realization of the Policy Plan than would result from the strict application of present zoning district regulations and to: [a] promote high standards in urban design; [b] encourage the development of exceptionally high quality, mixed-use, medium to high intensity projects, while establishing regulations and standards for uses with unique regulatory and design needs; and [c] ensure harmonious relationships with surrounding land uses. In addition, the Art District West Planned Unit Development (“ADWPUD”) is intended to function as a set of

planning and design principles, development regulations, and performance standards to guide and govern the development of the 0.86-acre site. The ADWPUD will facilitate the development of retail and commercial services that will help achieve the City's goals to economically revitalize and aesthetically enhance the historic downtown area; and

WHEREAS, a PUD is comparable to a Specific Plan in that it sets development regulations that are unique to a specific area; however, it is also unlike a Specific Plan in that a PUD is typically intended to apply to a single development project or several interrelated development projects that function together as a single, comprehensive project; and

WHEREAS, in conjunction with the proposed ADWPUD, the Planning/Historic Preservation Commission approved a Tentative Parcel Map (File No. PMTT21-009 (TPM 20394)) to subdivide 0.86-acre of land into a single lot to establish 22 commercial airspace condominium units, a Development Plan (File No. PDEV21-017) to construct two commercial buildings totaling 33,787 square feet, and a Certificate of Appropriateness (File No. PHP21-021) to allow for the construction of the proposed Project within the Euclid Avenue Overlay Zoning District; and

WHEREAS, the Application is a project pursuant to the California Environmental Quality Act (Public Resources Code Section 21000 et seq.) ("CEQA"); and

WHEREAS, the Project is exempt from CEQA pursuant to a categorical exemption (listed in CEQA Guidelines Article 19, commencing with Section 15300) and the application of that categorical exemption is not barred by one of the exceptions set forth in CEQA Guidelines Section 15300.2; and

WHEREAS, Ontario Development Code Table 2.02-1 (Review Matrix) grants the City Council the responsibility and authority to review and act on the subject Application; and

WHEREAS, the Project is located within the Airport Influence Area of Ontario International Airport, which encompasses lands within parts of San Bernardino, Riverside, and Los Angeles Counties, and is subject to, and must be consistent with, the policies and criteria set forth in the Ontario International Airport Land Use Compatibility Plan ("ALUCP"), which applies only to jurisdictions within San Bernardino County, and addresses the noise, safety, airspace protection, and overflight impacts of current and future airport activity; and

WHEREAS, City of Ontario Development Code Division 2.03 (Public Hearings) prescribes the manner in which public notification shall be provided and hearing procedures to be followed, and all such notifications and procedures have been completed; and

WHEREAS, on February 22, 2022, the Planning/Historic Preservation Commission of the City of Ontario conducted a hearing to consider the Project, and concluded said hearing on that date, voting to issue Resolution No. PC22-007, recommending the City Council approve the Application; and

WHEREAS, on March 15, 2022, the City Council of the City of Ontario conducted a hearing to consider the Project, and concluded said hearing on that date; and

WHEREAS, all legal prerequisites to the adoption of this Ordinance have occurred.

NOW, THEREFORE, IT IS HEREBY FOUND, DETERMINED, AND ORDAINED by the City Council of the City of Ontario, as follows:

SECTION 1. ***Environmental Determination and Findings.*** As the decision-making body for the Project, the City Council has reviewed and considered the information contained in the administrative record for the Project. Based upon the facts and information contained in the administrative record, including all written and oral evidence presented to the City Council, the City Council finds as follows:

(1) The administrative record has been completed in compliance with CEQA, the State CEQA Guidelines, and the City of Ontario Local CEQA Guidelines; and

(2) The Project is categorically exempt from environmental review pursuant to Section 15332 (Class 32, Infill Development Projects) of the CEQA Guidelines and meets all of the following conditions: (a) the proposed Project is consistent with the applicable general plan designation and all applicable general plan policies as well as with applicable zoning designation and regulations; (b) the proposed development occurs within city limits and the area being developed is 0.86-acre, less than the maximum 5-acre threshold, and is substantially surrounded by urban land uses; (c) the Project site has no value as habitat for endangered, rare, or threatened species; (d) approval of the Project would not result in any significant effects relating to traffic, noise, air quality, or water quality; and (e) the site is adequately served by all required utilities and public services; and

(3) The application of the categorical exemption is not barred by one of the exceptions set forth in CEQA Guidelines Section 15300.2; and

(4) The determination of CEQA exemption reflects the independent judgment of the City Council.

SECTION 2. ***Housing Element Compliance.*** Pursuant to the requirements of California Government Code Chapter 3, Article 10.6, commencing with Section 65580, as the decision-making body for the Project, the City Council finds that based on the facts and information contained in the Application and supporting documentation, at the time of Project implementation, the project is consistent with the Housing Element of the Policy Plan (General Plan) component of The Ontario Plan, as the project site is not one of the properties in the Available Land Inventory contained in Table A-3 (Available Land by Planning Area) of the Housing Element Technical Report Appendix.

SECTION 3. ***Ontario International Airport Land Use Compatibility Plan ("ALUCP") Compliance.*** The California State Aeronautics Act (Public Utilities Code Section 21670 et seq.) requires that an Airport Land Use Compatibility Plan be prepared for all public use airports in the State; and requires that local land use plans and individual development proposals must be consistent with the policies set forth in the adopted Airport Land Use Compatibility Plan. On April 19, 2011, the City Council of the City of

Ontario approved and adopted the Ontario International Airport Land use Compatibility Plan ("ALUCP"), establishing the Airport Influence Area for Ontario International Airport ("ONT"), which encompasses lands within parts of San Bernardino, Riverside, and Los Angeles Counties, and limits future land uses and development within the Airport Influence Area, as they relate to noise, safety, airspace protection, and overflight impacts of current and future airport activity. As the decision-making body for the Project, the City Council has reviewed and considered the facts and information contained in the Application and supporting documentation against the ALUCP compatibility factors, including [1] Safety Criteria (ALUCP Table 2-2) and Safety Zones (ALUCP Map 2-2), [2] Noise Criteria (ALUCP Table 2-3) and Noise Impact Zones (ALUCP Map 2-3), [3] Airspace protection Zones (ALUCP Map 2-4), and [4] Overflight Notification Zones (ALUCP Map 2-5). As a result, the City Council, therefore, finds and determines that the Project, when implemented in conjunction with the conditions of approval, will be consistent with the policies and criteria set forth within the ALUCP.

SECTION 4. ***Concluding Facts and Reasons.*** Based upon the substantial evidence presented to the City Council during the above-referenced hearing, and upon the specific findings set forth in Section 1 through 3, above, the City Council hereby concludes as follows:

(1) ***The proposed PUD, or amendment thereto, is consistent with the goals, policies, plans and exhibits of the Vision, Policy Plan (General Plan), and City Council Priorities components of The Ontario Plan.*** The proposed Project is located within the Downtown Mixed Use land use district of the Policy Plan Land Use Map, and the LUA-2N (Arts District - North) of the MU-1 (Downtown Mixed-Use) and EA (Euclid Avenue Overlay) zoning districts. The development standards and conditions under which the proposed Project will be constructed and maintained, is consistent with the goals, policies, plans, and exhibits of the Vision, Policy Plan (General Plan), and City Council Priorities components of The Ontario Plan.

(2) ***The proposed PUD, or amendment thereto, would not be detrimental to the public interest, health, safety, convenience, or general welfare of the City.*** The City has required certain safeguards, and has required certain changes, which have been established to ensure that: [i] the purposes of the Planned Unit Development are maintained; [ii] the Project will not endanger the public health, safety or general welfare; [iii] the Project will not result in any significant environmental impacts; [iv] the Project will be in harmony with the area in which it is located; and [v] the Project will be in full conformity with the Vision, City Council Priorities and Policy Plan components of The Ontario Plan.

(3) ***In the case of an application affecting specific property, the proposed PUD, or amendment thereto, will not adversely affect the harmonious relationship with adjacent properties and land uses.*** A thorough review and analysis of the proposed Project and its potential to adversely impact properties surrounding the subject site was completed by City staff. As a result of this review, certain design considerations were incorporated into the Project to mitigate identified impacts to an acceptable level, including the use of upgraded materials, the inclusion of certain architectural design elements on building exteriors, intensified landscape elements, and decorative hardscape elements.

(4) ***In the case of an application affecting specific property, the subject site is physically suitable, including, but not limited to, parcel size, shape, access, and availability of utilities, for the request and anticipated development.*** In preparing the proposed PUD, a thorough review and analysis of the proposed project and the Project site's physical suitability for the proposed Project was completed, including analysis of the Project size, shape, intensity of development, building height, building setbacks, site access, site landscaping and drainage, fences and walls, vehicle circulation, pedestrian connections, availability of mass transit, necessary street dedication and easements, public right-of-way improvements, availability of utilities and other infrastructure needs, off-street parking and circulation, building orientation and streetscapes, architectural character, building materials and color, and site signage.

(5) ***The proposed PUD is superior to that which could be obtained through the application of the Development Code or a specific plan.*** The proposed PUD addresses aspects of the project that are specifically related to the Development Plan proposed in conjunction with the PUD application, including necessary building setbacks, site access points, off-street parking and site circulation, and architectural character.

SECTION 5. ***City Council Action.*** Based upon the findings and conclusions set forth in Sections 1 through 4, above, the City Council hereby APPROVES the herein described PUD, attached hereto as "Attachment A," and incorporated herein by this reference.

SECTION 6. ***Indemnification.*** The Applicant shall agree to defend, indemnify, and hold harmless, the City of Ontario or its agents, officers, and employees from any claim, action or proceeding against the City of Ontario or its agents, officers or employees to attack, set aside, void, or annul this approval. The City of Ontario shall promptly notify the applicant of any such claim, action, or proceeding, and the City of Ontario shall cooperate fully in the defense.

SECTION 7. ***Custodian of Records.*** The documents and materials that constitute the record of proceedings on which these findings have been based are located at the City of Ontario City Hall, 303 East "B" Street, Ontario, California 91764. The custodian for these records is the City Clerk of the City of Ontario.

SECTION 8. ***Severability.*** If any section, sentence, clause or phrase of this Ordinance or the application thereof to any entity, person or circumstance is held for any reason to be invalid or unconstitutional, such invalidity or unconstitutionality shall not affect other provisions or applications of this Ordinance which can be given effect without the invalid provision or application, and to this end the provisions of this Ordinance are severable. The People of the City of Ontario hereby declare that they would have adopted this Ordinance and each section, sentence, clause or phrase thereof, irrespective of the fact that any one or more section, subsections, sentences, clauses or phrases be declared invalid or unconstitutional.

SECTION 9. ***Effective Date.*** This Ordinance shall become effective 30 days following its adoption.

SECTION 10. ***Publication and Posting.*** The Mayor shall sign this Ordinance and the City Clerk shall certify as to the adoption and shall cause a summary thereof to be published at least once, in a newspaper of general circulation in the City of Ontario, California within 15 days following the adoption. The City Clerk shall post a certified copy of this ordinance, including the vote for and against the same, in the Office of the City Clerk, in accordance with Government Code Section 36933.

PASSED, APPROVED, AND ADOPTED this ____ day of _____ 2022.

# 1. INTRODUCTION

This document is intended to function as a set of planning and design principles, development regulations and performance standards to guide and govern the development of a 0.86-acre parcel of land located on the southeast corner of Laurel Avenue and Emporia Street (see Exhibit 1-1, PUD Location Map).

The project site is located within the Ontario Plan Downtown Mixed-Use District, which requires the establishment of a Planned Unit Development (PUD) prior to development. The PUD fulfills the requirements of MU-1/LUA-2N (Downtown Mixed-Use/Arts District – North) zoning district, as set forth in Ontario Development Code Section 4.01.030 (Planned Unit Developments (PUD) and Amendments). The Art District West Planned Unit Development (PUD) will replace the existing zone district designations and zoning standards that apply to the affected property. Unless otherwise defined herein, definitions and interpretations contained in the Development Code shall apply. City staff and private developers will rely on this PUD to determine whether precise plans for development ("Development Plans") will adequately meet the City's land use and design objectives.

Exhibit 1-1: PUD Location Map

# 2. PUD OBJECTIVES

## 2.1 THE ONTARIO PLAN (TOP) CONSISTENCY

The Ontario Plan (TOP) Policy Plan (General Plan) designates the project area and surrounding properties as MU-1 (Downtown Mixed-Use). The Ontario Plan describes the Downtown Mixed-Use Area as an intensive vertical and horizontal mixture of retail, office, and residential uses in a pedestrian friendly atmosphere where the historic character is prominent. The most intensive uses are envisioned along Euclid Avenue and Holt Boulevard. The Downtown Mixed-Use Area is the historic heart of Ontario, which has a unique blend of historic, social and cultural uses set in a compact street grid. The Downtown Mixed-Use Area includes the Civic Center, City library and surrounding diverse residential neighborhoods that provide increased demand for retail opportunities along Euclid Avenue, Holt Boulevard and B Street. The densities and intensities of the mixed-use designation represented within The Ontario Plan (TOP) are the intended level of anticipated development; however, individual projects may vary depending upon an approved master plan, such as an area plan, specific plan, or planned unit development.

Exhibit 1-2: TOP Policy Plan Downtown Mixed-Use Area

The West Art District PUD is consistent with the principles, goals, and policies contained within the components that make up The Ontario Plan (TOP), including: (1) Vision, (2) Policy Plan (General Plan), and (3) City Council Priorities. The policies furthered by this PUD are as follows:

1. Vision

   On February 13, 2007, the Ontario City Council adopted The Ontario Vision. The central theme that motivates the Vision is – *"A sustained, community-wide prosperity which continuously adds value and yields benefits."* Everything the City does and every action the City takes is done with the simple yet comprehensive theme in mind, from the design quality of the built environment, to the intent of designing socio-economic programs, to the way in which its leaders govern as a community. In discussing a Vision that would endure for the lifetime of The Ontario Plan (30 years or more), the City

Council recognized that there are four components that serve as the basic building blocks that set the foundation for a unified and prosperous community. These foundational blocks must be expressed and widely accepted throughout the Plan's lifetime. They are:

1. A **Dynamic Balance** that enables our community to confront the continued dynamic growth of the region and technological change with confidence and a sense of opportunity.
2. A **Prosperous Economy** that sustains the perception and reality of prosperity across our entire community that positively impacts all the people of Ontario and is broadly – though not uniformly – shared.
3. **Distinctive Development** that integrates our varied and diverse focal points, districts, villages, and neighborhoods to provide a feeling of coherence without sacrificing uniqueness.
4. **Recognized Leadership** in local governance that stimulates excellence and serves to unify the people of Ontario in support of best practices in conducting public endeavors.

The Art District West PUD will implement the Ontario Vision in several ways that will further the City's desire to be a sustainable and prosperous community.

DISTINCTIVE DEVELOPMENT

Commercial and Residential Development

- The PUD will support, the City's Civic Center area, new multifamily developments and surrounding existing residential neighborhoods by providing the increased demand for retail uses and artistic uses in a more pedestrian friendly atmosphere.

- The PUD will seek to ensure additional mix of retail uses in the downtown that will provide additional services to the surrounding community and Civic Center area.

Design Quality

- The PUD will require a well-designed project(s) that covey's visual interest and character through:

  - Appropriate scale and massing
  - Architectural style and design that are complementary and appropriate for its setting.
  - The use of high-quality materials that will create visual interest, high quality, durable and appropriate for the architectural style.
  - Appropriate Site Planning to ensure building orientation visibility from the street, adequate number of driveways, sidewalks, building setbacks, parking lot orientation, adequate refuse storage areas and well-designed street frontages.

Public Safety

- The PUD will ensure that proper exterior lighting standards be located and designed to minimize direct glare beyond parking lots and future residential development/ or mixed-use projects in the downtown area. In addition, the Ontario Police Department requires that all lighting standards comply with a one-foot candle illumination to provide a level of security and public safety within the retail center.

2. Policy Plan

LAND USE ELEMENT

LU1 Balance

Goal LU1: A community that has a spectrum of housing types and price ranges that match the jobs in the City and that make it possible for people to live and work in Ontario and maintain a quality of life.

The PUD, through the development of retail, commercial uses and artistic uses, will help provide jobs to support the existing and new development within the surrounding downtown area.

Policies

- *LU1-3 Adequate Capacity. We require adequate infrastructure and services for all development.*

  The PUD, along with the future development entitlements for the site, will require the necessary infrastructure to serve the site and provide the necessary right-of-way dedication for street widening.

- *LU1-4 Mobility. We require development and urban design, where appropriate, that reduces reliance on the automobile and capitalizes on multi-modal transportation opportunities.*

  TOP Mobility Element System (Figure M-1) identifies Holt Boulevard as a future Bus Rapid Transit (BRT) Corridor. The PUD will seek to capitalize pedestrian traffic, vehicle and future BRT ensuring a mix of retail, commercial and artistic uses that will provide a variety of goods and services to the surrounding community and the future Buss Rapid Transit (BRT) users.

LU2 Compatibility

Goal LU2: Compatibility between a wide range of uses.

The PUD, through land use regulations for permitted uses, have ensured that those permitted uses allowed within the PUD are compatible with the MU-1/LUA-2N (Downtown Mixed-Use/Arts District – North) and surrounding area and not allow those uses that may have potential to create adverse impacts to the surrounding area.

Policies:

- *LU2-1: Land Use Decisions: We minimize adverse impacts on adjacent properties when considering land use and zoning requests.*

  The project area is zoned MU-1/LUA-2N (Downtown Mixed-Use/Arts District – North) and requires that a PUD be implemented for the project area to establish the development standards, land use regulations and design guidelines. The permitted uses within PUD have been established to provide retail, commercial and artistic uses to serve the downtown, Civic Center and surrounding residential area. Careful consideration has been given to ensure that permitted uses that may have potential to create adverse impacts to the surrounding area are not allowed.

- *LU2-2 Buffers. We require new uses to provide mitigation or buffers between existing uses where potential adverse impacts could occur.*

  The PUD, through the site planning, requires the that future building(s) developed on the site shall be placed along the frontage of Emporia Street to keep a buffer between the Southern Pacific Railroad to the south of the project and the future and existing developments to the north.

- *LU2-4 Regulation of Nuisances. We regulate the location, concentration and operations of potential nuisances.*

  The project area is zoned MU-1/LUA-2N (Downtown Mixed-Use/Arts District – North) and requires that a PUD be implemented for the project area to establish the development standards, land use regulations and design guidelines. The permitted uses within PUD have been established to provide retail, commercial and artistic uses to serve the downtown, Civic Center and surrounding residential area. Careful consideration has been given to ensure that permitted uses that may have potential to create adverse impacts to the surrounding area are not allowed. Those uses with operations that may have potential to create nuisances, will require discretionary approval through the Conditional Use Permit process.

- *LU2-5 Regulation of Uses. We regulate the location, concentration and operations of uses that have impacts on surrounding land uses.* The project area is zoned MU-1/LUA-2N (Downtown Mixed-Use/Arts District – North) and requires that a PUD be implemented for the project area to establish the development standards, land use regulations and design guidelines. The permitted uses within PUD have been established to provide retail, commercial and artistic uses to serve the downtown, Civic Center and surrounding residential area. Careful consideration has been given

to ensure that permitted uses that may have potential to create adverse impacts to the surrounding area are not allowed.

LU3 Flexibility

Goal LU3: Staff, regulations and processes that support and allow flexible response to conditions and circumstances in order to achieve the Vision.

- *LU3-1 Development Standards. We maintain clear development standards which allow flexibility to achieve our Vision.*

  To provide flexibility the densities and intensities of the mixed-use designation represented within TOP are the intended level of anticipated development; however, individual projects may vary depending upon an approved master plan, such as an area plan, specific plan, or planned unit development. The project area is zoned MU-1/LUA-2N (Downtown Mixed-Use/Arts District – North) and requires that a PUD be implemented for the project area to establish the development standards, land use regulations and design guidelines. The development standards within the PUD are intended to ensure quality and appropriate development to achieve TOP Vision for well-designed projects that covey visual interest.

COMMUNITY ECONOMICS ELEMENT

CE1 Complete Community

Goal CE1: A complete community that provides for all incomes and stages of life.

The permitted uses within PUD have been established to provide retail, commercial and artistic uses to enhance the economic growth of downtown and serve the surrounding residential areas.

Policies:

- *CE1-7 Retail Goods and Services. We seek to ensure a mix of retail businesses that provide the full continuum of goods and services for the community.*

  The permitted uses within PUD have been established to provide retail, commercial and artistic uses to serve the downtown and surrounding residential areas. These retail, commercial and artistic uses that will help to revitalize the downtown area and enhance its economic growth by much needed commercial and retail opportunities.

CE2 Place-Making

Goal CE2: A City of distinctive neighborhoods, districts, and corridors, where people choose to be.

The PUD will seek to ensure a mix a retail, commercial and artistic uses that will provide a variety of goods and services for the downtown and surrounding area. The PUD will seek to help revitalize the downtown area and enhance its economic growth by creating retail, commercial and artistic uses that provide opportunities within a historic downtown setting. The PUD area will be distinctive through the requirement of well-designed project(s) that respect and complement the historic context of downtown consist with the Downtown Ontario Design Guidelines (Adopted in 1998) through:

- Appropriate scale and massing
- Architectural style and design that are complementary and appropriate to for its setting.
- The use of high-quality materials that will create visual interest, high quality, durable and appropriate for the architectural style.
- Appropriate site planning to ensure building orientation visibility from the street, adequate number of driveways and sidewalks. Building setbacks, parking lot orientation, adequate refuse storage areas and well-designed street frontages.

MOBILITY ELEMENT

M3 Public Transit

Goal M3: A public transit system that is a viable alternative to automobile travel and meets basic transportation needs of the transit dependent.

TOP Mobility Element System (Figure M-1) identifies Euclid Avenue as a future Bus Rapid Transit (BRT) Corridor. The PUD will seek to capitalize pedestrian traffic, vehicle and future BRT ensuring a mix of retail and commercial uses and business that will provide a variety of goods and service to the surrounding community and the future Buss Rapid Transit (BRT) users. The PUD, along with the future development entitlements for the site, will require the necessary infrastructure to serve the site and provide the necessary rights-of-way dedication for street widening.

Policies:

- *M3-4 Bus Rapid Transit (BRT) Corridors. We work with regional transit agencies to implement BRT service to target destinations and along corridors, as shown in the Transit Plan.*

  TOP Mobility Element System (Figure M-1) identifies Euclid Avenue as future Bus Rapid Transit (BRT) Corridor. The PUD will seek to capitalize pedestrian traffic,

vehicle and future BRT ensuring a mix of retail, commercial and artistic uses and business that will provide a variety of goods and service to the surrounding community and the future Buss Rapid Transit (BRT) users. The PUD, along with the future development entitlements for the site, will require the necessary infrastructure to serve the site and provide the necessary rights-of-way dedication for street widening.

COMMUNITY DESIGN

CD1 Image & Identity

Goal CD1: A dynamic, progressive city containing distinct neighborhoods and commercial districts that foster a positive sense of identity and belonging among residents, visitors, and businesses.

- To provide flexibility the densities and intensities of the mixed-use designation represented within TOP are the intended level of anticipated development; however, individual projects may vary depending upon an approved master plan, such as an area plan, specific plan, or planned unit development. The project area is zoned MU-1/LUA-2N (Downtown Mixed-Use/Arts District – North) and requires that a PUD be implemented for the project area to establish the development standards, land use regulations and design guidelines. The development standards within the PUD are intended to ensure quality and appropriate development to achieve TOP Vision for well-designed projects that covey visual that respect and complement the historic context of downtown.

Policies:

- *CD1-2 Growth Areas. We require development in growth areas to be distinctive and unique places within which there are cohesive design themes.*

  The PUD will seek to ensure a mix a retail, commercial and artistic uses that will provide a variety of goods and services for the downtown and surrounding area. The PUD will seek to help revitalize the downtown area and enhance its economic growth by creating retail, commercial and artistic uses that will provide opportunities within a historic downtown setting. The PUD area will be distinctive through the requirement of well-designed project(s) that respect and complement the historic context of downtown consist with the Downtown Ontario Design Guidelines (Adopted in 1998) through:

  - Appropriate scale and massing
  - Architectural style and design that are complementary and appropriate to for its setting.
  - The use of high-quality materials that will create visual interest, high quality, durable and appropriate for the architectural style.

- Appropriate site planning to ensure building orientation visibility from the street, adequate number of driveways and sidewalks. Building setbacks, parking lot orientation, adequate refuse storage areas and well-designed street frontages.

- *CD1-4 Transportation Corridors. We will enhance our major transportation corridors within the City through landscape, hardscape, signage and lighting*.

  TOP Mobility Element System (Figure M-1) identifies Holt Boulevard as future Bus Rapid Transit (BRT) Corridor. The PUD will seek to capitalize pedestrian traffic, vehicle and future BRT ensuring a mix of retail, commercial and artistic business that will provide a variety of goods and service to the surrounding community and the future Buss Rapid Transit (BRT) users.

CD2 Design Quality

Goal CD2: A high level of design quality resulting in public spaces, streetscapes, and developments that are attractive, safe, functional and distinct.

Policies:

- *CD2-1 Quality Architecture.* We encourage all development projects to convey visual interest and character through:

  - Building volume, massing, and height to provide appropriate scale and proportion;
  - A true architectural style which is carried out in plan, section and elevation through all aspects of the building and site design and appropriate for its setting; and
  - Exterior building materials that are visually interesting, high quality, durable, and appropriate for the architectural style.

  The PUD will seek to help revitalize the downtown area and enhance its economic growth by creating retail, commercial and artistic opportunities within a historic downtown setting. The PUD area will be distinctive through the requirement of well-designed project(s) that respect and complement the historic context of downtown consist with the Downtown Ontario Design Guidelines (Adopted in 1998) through:

  - Appropriate scale and massing
  - Architectural style and design that are complementary and appropriate to for its setting.
  - The use of high-quality materials that will create visual interest, high quality, durable and appropriate for the architectural style.
  - Appropriate site planning to ensure building orientation visibility from the street, adequate number of driveways and sidewalks. Building setbacks,

parking lot orientation, adequate refuse storage areas and well-designed street frontages.

- *CD2-3 Commercial Centers. We desire commercial centers to be distinctive, pedestrian friendly, functional and vibrant with a range of businesses, places to gather, and connectivity to the neighborhoods they serve.*

  The permitted uses within PUD have been established to provide retail, commercial and artistic uses to serve the downtown, Civic Center, Arts District and surrounding residential area. The PUD will seek to capitalize on the downtown location by ensuring a mix a retail, commercial and artistic uses that will easily accessed by pedestrians through downtowns unique grid street pattern design.

- *CD2-5 Streetscapes. We design new and, when necessary, retrofit existing streets to improve walkability, bicycling and transit integration, strengthen connectivity, and enhance community identity through improvements to the public right of way such as sidewalks, street trees, parkways, curbs, street lighting and street furniture.*

  The PUD, along with the future development entitlements for the site, will require the necessary infrastructure to serve the site and provide the necessary right-of-way dedication and/or improvements.

- *CD2-9 Landscape Design. We encourage durable landscaping materials and designs that enhance the aesthetics of structures, create and define public and private spaces, and provide shade and environmental benefits.*

  The PUD development standards will ensure landscape design and materials will be used to enhance the aesthetics of structure(s), create and define public and private spaces, and provide shade and environmental benefits.

- *CD2-10 Surface Parking Areas. We require parking areas visible to or used by the public to be landscaped in an aesthetically pleasing, safe and environmentally sensitive manner. Examples include shade trees, pervious surfaces, urban run-off capture and infiltration, and pedestrian paths to guide users through the parking field.*

  The PUD development standards will ensure water conservation be provided through low water using plant materials, hydro zones, water efficient irrigation and weather-based controllers. Landscaped areas may be used for storm water infiltration through vegetated swales, retention basins, or dry wells as needed with the use of appropriate planting materials. Broad canopy shade trees will be used to reduce heat gain on buildings, paving and parking areas

City Council Priorities

- Invest in the Growth and Evolution of the City's Economy
- Maintain the Current High Level of Public Safety
- Operate in a Businesslike Manner
- Pursue City's Goals and Objectives by Working with Other Governmental Agencies
- Focus Resources in Ontario's Commercial and Residential Neighborhoods
- Invest in the City's Infrastructure (Water, Streets, Sewers, Parks, Storm Drains and Public Facilities)
- Encourage, Provide or Support Enhanced Recreational, Educational, Cultural and Healthy City Programs, Policies and Activities
- Ensure the Development of a Well Planned, Balanced, and Self-Sustaining Community in Ontario Ranch

## 2.2 CENTER CITY REDEVELOPMENT PLAN OBJECTIVES

The Center City Project Area encompasses the historic Euclid Avenue District, as well as East Holt Boulevard. Ontario's City Hall and surrounding Civic Center, Senior Center, Ovitt Family Community Library, the Museum of History and Art, Ontario Town Square, and the Law School of the University of La Verne are all within the Center City Project Area. Development is designed to create an immediate and positive identity transforming the area into a comfortable place to stroll and be seen.

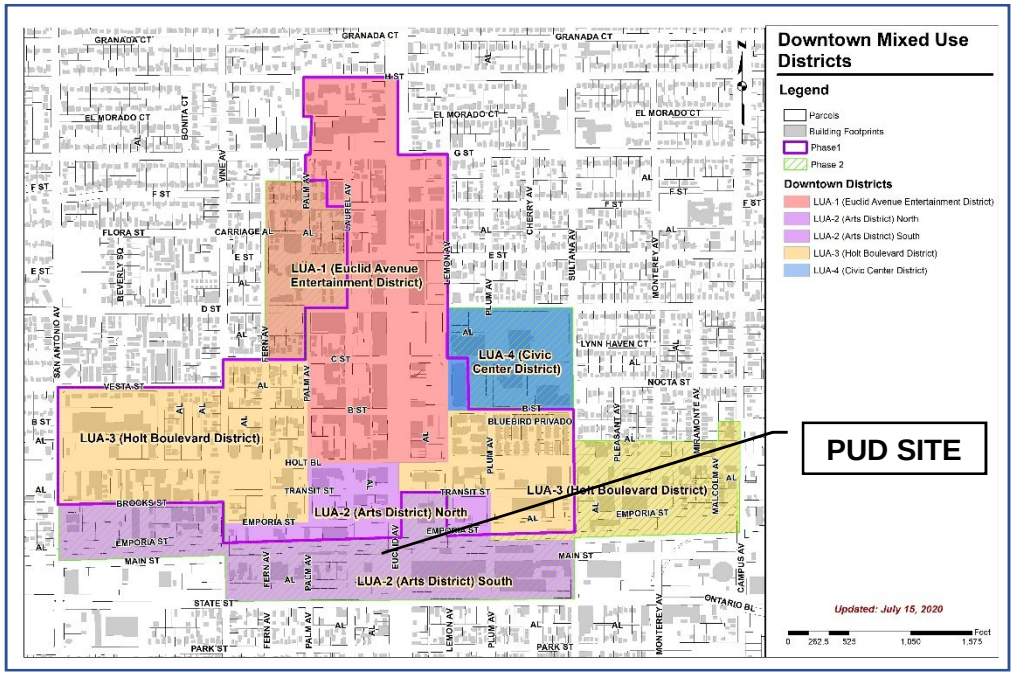
The current goals of the Center City Project include:

- Encourage development of a high intensity, multi-use central business district and surrounding neighborhoods that maximize the economic productivity of the commercial areas and maximize the housing opportunities of the residential areas.

- Apply innovative mixed-use urban design that maintains a flexible approach to allow for changing opportunities over a long-term, phased revitalization effort.

- Create a healthy and exciting urban environment, with the ability to work, live, shop and play within a small area, combine daytime and nighttime use and conserve energy and resources through mixed use development.

- Cluster activity centers within walking distance of each other, supported by a pedestrian network that provides an enjoyable pedestrian flow.



## 2.3 MU-1/LUA-2N (Downtown Mixed-Use/Arts District – North)

The project is located within MU-1/LUA-2N (Downtown Mixed-Use/Arts District – North) zoning district (see Exhibit 1-3, MU-1 (Downtown Mixed Use) Districts Map). The Arts District is intended as a dynamic destination for locals and tourists, while creating a fulfilling urban experience energized by artistic, educational, and commercial participants. The focus of the Area

is to increase the number of collaborated events and programs within the Area, with the intent to attract visitors, promote economic vitality, and boost revenue. Street fairs, artist festivals, restaurants, galleries, work/live lofts, breweries, and artisan co-ops will contribute to the physical and cultural diversity of the Arts District.

The Arts District North is intended to accommodate a mix of work/live lofts, artisan co-ops, restaurants, galleries, breweries, and other commercial uses intended to strengthen the economic base of the area.

Exhibit 1-3: MU-1 (Downtown Mixed Use) Districts Map

## 2.3 PUD DISTRICT PURPOSE AND OBJECTIVES

The Art District West Planned Unit Development (PUD) is intended to function as a set of planning and design principles, development regulations, and performance standards to guide and govern the development of the 0.86-acre site. This PUD will facilitate the development of retail, commercial and artistic services that will help achieve the City's goals to economically revitalize and aesthetically enhance the historic downtown area.

The objectives of the PUD District are to:

- Promote development projects that are consistent with the land use/downtown revitalization objectives of the Center City Redevelopment Project area.
- Promote the revitalization the downtown area and enhance its economic growth by creating retail uses within a historic downtown setting.

- Promote community retail, commercial and artistic uses to meet the needs of the downtown residents, Civic Center visitors and surrounding residential neighborhoods.
- Promote the development of outdoor patio as part of the commercial development providing for social and pedestrian interaction.
- Orient commercial buildings along the frontage of Emporia Street and Euclid Avenue to create an accessible urban edge and sense of arrival and appropriate relationships among new and existing adjacent land uses.
- Provide for a circulation network which promotes pedestrian walkways and bicycle activity as alternative modes of travel while also providing for safe and efficient movement of automobile travel through the project site.
- Incorporate a landscape to enhance and compliment the urban environment along Emporia Street and the Euclid Avenue slope along the eastern boundary of the site.

# 3. LAND USE PLAN

## 3.1 LAND USE DESIGNATION

This PUD establishes the MU-1 Commercial district and the land use designations, as shown on Exhibit 1-4, Permitted Use Table, for the project limits. Retail, commercial and artistic uses are strongly encouraged to accommodate a mix of artisan co-ops, restaurants, galleries, breweries, and other commercial uses intended to strengthen the economic base of the downtown area.

**Exhibit 1-4: PUD Land Use Plan**

## 3.2 PERMITTED USES

Table 3-1 (Permitted Uses) shows the allowable land use, activity or facility permitted within the Mixed Use 1 (MU-1) Commercial District of the Art District West PUD. A land use not listed in Table 3-1 shall be considered a prohibited land use. For a land uses like those listed in Table 3-1, but not expressly stated in the PUD, the Planning Director or her/his designee has the authority to make a determination of applicability of the similar land uses.

## Table 3-2: Permitted Uses

**"P"** (Permitted) shall mean the land use, activity, or facility within the specified zoning district is permitted by right of being in the proper zoning district.

"**C**" (Conditionally Permitted) shall mean the land use, activity, or facility within the specified zoning district is subject to the granting of a Conditional Use Permit pursuant to Section 4.02.015 (Conditional Use Permits) of the Ontario Development Code.

**"A"** (Administratively Permitted) shall mean the land use, activity, or facility within the specified zoning district is subject to the granting of an Administrative Use Permit pursuant to Section 4.03.015 (Administrative Use Permits) of the Ontario Development Code.

**"NP"** (Not Permitted) shall mean the land use, activity, or facility within the specified zoning district is not permitted by right of being in the proper zoning district.

All other uses not listed as Permitted or Conditional are prohibited unless a finding can be made by the Planning Director that the use is similar to, and no more objectionable than, a permitted or conditional use.

| Land Use | MU-1 Commercial | Notes |
|---|---|---|
| **MEDICAL** | | |
| Animal Hospital/Veterinarian | **NP** | |
| Medical Office | **NP** | |
| **MEDICAL OFFICE/FAMILY CLINIC** | | |
| Pharmacies and Drug Stores | **NP** | |
| Pharmacies and Drug Stores with Drive-thru Facilities | **NP** | |
| Industrial Clinic | **NP** | |
| **PUBLIC FACILITIES** | | |
| Police / Fire Station | **P** | |
| Police Storefront / Substation | **P** | |
| **RELIGIOUS** | | |
| Religious Assembly | **C** | |
| **NON-PROFIT/SERVICE ORGANIZATIONS 501 (C) (3) (PER DEVELOPMENT CODE SECTION 9-101305 N)** | | |
| Campaign Offices | **P** | |
| Charitable, Philanthropic, Service and Other Non-Profit Organization Offices | **P** | |
| Charitable Distribution Services (i.e. Food Banks, etc.) | **NP** | |
| **ALCOHOL** | | |
| Alcoholic Beverage Sales for Off-Premise Consumption | **C** | |
| Alcoholic Beverage Sales for On-Premise Consumption GFA than 10,000 SF | **A/C** | **1** |
| Alcoholic Beverage Sales for On-Premise Consumption GFA more than 10,000 SF | **C** | **1** |
| Liquor Store | **NP** | |
| **AUTOMOBILE RELATED SERVICES** | | |
| Automotive Parts and Accessories Stores (Retail Sales Only) | **P** | |
| Indoor Vehicle (Car Condos) storage and display | **P** | **3** |
| Automotive Services (i.e. Tune-Up, Emission Tests, Batteries, etc.<br>No use of impact wrenches or other equipment that could create noise impacts.) | **NP** | |
| Minor Repair (i.e. Brakes, tires, radiators, electrical, etc.) | **NP** | |
| Gas Stations | **NP** | |
| Tire Stores | **NP** | |
| Car Wash – Full | **NP** | |
| **TELECOMMUNICATIONS FACILITIES** | | |
| Wireless Telecommunications Facility (Refer to the Development Code) | | |

## Table 3-2: Permitted Uses

**"P"** (Permitted) shall mean the land use, activity, or facility within the specified zoning district is permitted by right of being in the proper zoning district.

"**C**" (Conditionally Permitted) shall mean the land use, activity, or facility within the specified zoning district is subject to the granting of a Conditional Use Permit pursuant to Section 4.02.015 (Conditional Use Permits) of the Ontario Development Code.

**"A"** (Administratively Permitted) shall mean the land use, activity, or facility within the specified zoning district is subject to the granting of an Administrative Use Permit pursuant to Section 4.03.015 (Administrative Use Permits) of the Ontario Development Code.

**"NP"** (Not Permitted) shall mean the land use, activity, or facility within the specified zoning district is not permitted by right of being in the proper zoning district.

All other uses not listed as Permitted or Conditional are prohibited unless a finding can be made by the Planning Director that the use is similar to, and no more objectionable than, a permitted or conditional use.

| Land Use | MU-1 Commercial | Notes |
|---|---|---|
| **DAY CARE FACILITIES** | | |
| Commercial Daycare | **NP** | |
| **EATING DRINKING PLACES AND FOOD SERVICES** | | |
| Restaurants (Sit Down / Full Service) | **P** | |
| Banquet Facilities in conjunction with a restaurant | **P** | |
| Bar/Cocktail Lounge | **C** | |
| Tap Room, Pub, Wine Bar (Including Tastings) | **A** | |
| Fast Food | **P** | |
| Fast Food with Drive-thru Facilities | **NP** | |
| Caterers | **P** | |
| **ENTERTAINMENT AND RECREATION** | | |
| Live Entertainment (in conjunction with restaurant use only) – GFA than 10,000 SF | **A/P** | |
| Live Entertainment (in conjunction with restaurant use only) – GFA 10,000 or more SF | **C** | |
| **OFFICES** | | |
| Administrative, Professional, and Other Offices | **P** | |
| **RETAIL** | | |

| Promotors of Preforming Arts, Sports and Similar (offices only) | **P** | |
| Independent Artist, Writers, and Performers (office only) | **P** | |

### Notes

1. In the MU-1 zoning district, live entertainment is administratively permitted only in conjunction with a bona fide restaurant or alcoholic beverage manufacturer's tasting room, tap room, pub or wine room.
2. See Ontario Development Code Section 5.03.037 (Artisan Small-Scale and Micro Manufacturing Facilities)
3. See Section 4.4 Car Condo (Vehicle) Store Regulations

# 4. DEVELOPMENT REGULATIONS

This section sets forth the standards to govern the placement, height, and bulk of permitted buildings and structures; to establish locational criteria for vehicular access to site, parking and loading requirements, landscape, sign standards; and identify historic preservation features to be incorporated and/or considered for development plans. Unless otherwise stated herein, all development within the project area shall meet the applicable standards and requirements of the Ontario Development Code.

## 4.1 INTENSITY

Commercial retail uses within the mixed-use district are allowed a Floor Area Ratio (FAR) of up to 1.0. Floor Area Ratio is calculated by dividing the building square footage by the net lot area (after right-of-way dedications).

## 4.2 BUILDING HEIGHT

The buildings within the MU-1 PUD Commercial district area shall be a maximum of 35 feet or consistent with scale and height of the adjacent buildings along Emporia Street. Architectural projections, such as parapet articulations, cornices, towers, etc. may be constructed at a height of 25% above the prescribed height of the zoning district.

## 4.3 BUIDING\PARKING SETBACKS

All setbacks shall be measured from the ultimate property lines after all dedications to develop streets to the ultimate right-of-way width (Table 4-1, Building Setback(s)). Placement of buildings, structures, fences, walls, utility facilities, yards, etc. will be based on the street right-of-way and property line dimensions.

| Table 4-1: Building(s) Setbacks | | |
|---|---|---|
| **MU-1 Commercial District Development Standards** | | |
| **Requirements** | **MU-1 Commercial District** | **Additional Requirements** |
| **Building Development Standards** | | |
| 1. Emporia Street Setback | 0 Feet Minimum<br>3.5 Feet Maximum | Building Architectural features/ awnings may encroach into the right-of-way, subject to the California Building Code requirements. |
| 2. Euclid Avenue Street Setback | 0 Feet Minimum<br>5 Feet Maximum | Building Architectural features/ awnings may encroach into the right-of-way, subject to the California Building Code requirements.<br>Edge of slope (right-of -way), along the Euclid Avenue Street side frontage, shall be landscaped. |
| 3. Interior Side Property Setbacks<br>4. Rear Property Setbacks | 0 Feet Minimum<br>0 Feet Minimum | Setback areas shall be landscaped |
| **Site Development Standards** | | |
| 1. Minimum Landscape Coverage | N/A | All setback areas, building entry areas shall be landscaped. |
| 2. Minimum Parking Space or Drive Aisle Setbacks to face of curb | 5 feet | Setback areas shall be landscaped. |
| 3. Minimum Parking Space or Drive Aisle Setbacks to Interior Side Property Lines | 5 Feet | Setback areas shall be landscaped. |
| 4. Minimum Parking Space or Drive Aisle to buildings, walls or fences | 5 Feet | Setback areas shall be landscaped. |

## 4.4 LANDSCAPING

Landscaping elements provide significant contributions to the aesthetic quality and character of the Art District West PUD, with respect to public and private spaces. Detailed landscape/irrigation plans shall be included in the Development Plan submittals for the PUD. The plan shall specify all landscape and hardscape elements for the development plan site and indicate how the improvements will coordinate with the other sites within the PUD. The landscape plans shall show the location of all ground mounted utility structures such as transformers, back flow prevention devices, trash enclosures, and HVAC equipment and indicate the methods for screening these items. All utility structures and equipment shall be screened from view of the public streets and adjacent development.

Water conservation shall be provided through low water using plant materials, hydro zones, water efficient irrigation and weather-based controllers. Landscaped areas may be used for storm water infiltration through vegetated swales, retention basins, or dry wells as needed with the use of appropriate planting materials. Broad canopy shade trees shall be used to reduce heat gain on buildings, paving and parking areas. The plan shall identify all existing trees on site and preserve them where possible. The landscape design shall meet the requirements of the Landscape Development Standards outlined in the Ontario Development Code and shall create well-functioning spaces within a sustainable design.

Landscaping shall be used on the site to show transition from adjacent uses, define a circulation pattern on the lot, screen the parking lot from the street, highlight entries, provide shade for parking as well as outdoor seating areas, and to soften the appearance of the building.

Developments shall comply with the following:

- All setback areas, building entry areas shall be landscaped.
- At a minimum, landscaping shall include 15-gallon trees planted no more than 20 FT on center, within minimum 5-FT wide planters.
- A suitable plant material (grasses, ivy, etc.) should be used as ground cover in planters.

Street trees shall comply with the variety, size, and spacing as directed by the City of Ontario Master Street Tree Plan.

## 4.5 EQUIPMENT AND MECHANICAL SCREENING

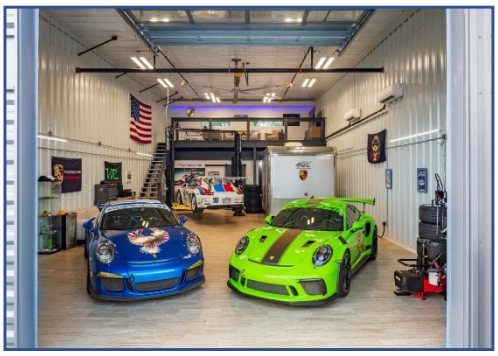
All roof mounted and ground mounted equipment shall be fully screened from view of the public street and adjacent developments. The location of items shall be designed to allow screening with landscape materials, walls, architectural features, parapet walls, etc. Screening shall be designed to be integrated into the design of the project.

Ladders for roof access shall be mounted on the inside of the building or shall be completely concealed from public view.

## 4.6 FENCES AND WALLS

Fences and walls within the project area shall be made of decorative materials which are compatible with the overall architectural character of the development within the PUD area. All fences and walls shall be in scale with the development to fulfill such needs as screening and security.

Fences, walls and hedges within the project area shall comply with Engineering Corner Sight Distance Standards and other applicable standards. All decorative walls, monuments and/or other similar features shall not encroach into the public street right-of-way.



Walls shall be limited to a maximum of four (4) feet in height within any street frontage areas. Interior or rear walls shall be a maximum of six (6) feet in height.

Walls shall be an integral design of the building architecture and feature similar finished material, reveal lines, trim, etc.

4.5 CAR CONDO (VEHICLE) STORAGE REGULATIONS

Car Condominiums are space you own and customize – much more than just a place to house your car; they're a lifestyle (Artform) that is being embraced by car aficionados of all sports, classic, racing, exotics, hot rods and collectible cars. Car Condos works similar to a regular condominium. The developer handles the permits and construction, and then the buyer builds out the inside of the unit the way they want.

Car Condos offer car enthusiasts a safe, secure and private space to store and display their vehicles, other motorized toys and treasures. The condo units can be customized to include a loft area for an office, TV viewing area and refreshment kitchenette area.

The following standards shall govern the establishment and operation of Car Condos (Vehicle Storage) are intended to result in facilities that are well designed, maintained and enhance the Arts Districts area in which they are located in.

Car Condo (Vehicle Storage) facilities shall comply with the following:

1. Covenants, Conditions, and Restrictions (CC&Rs) will be required to be recorded for the condominium car units and subject to City review and approval. CC&Rs shall include the following:

**(a)** CC&Rs shall be prepared for the Project and shall be recorded prior to the issuance of a building permit.

**(b)** The CC&Rs shall be in a form and contain provisions satisfactory to the City. The articles of incorporation for the property owner's association and the CC&Rs shall be reviewed and approved by the City.

CC&Rs shall ensure reciprocal parking and access between parcels, and common maintenance of:

**(i)** Landscaping and irrigation systems within common areas;

**(ii)** Landscaping and irrigation systems within parkways adjacent to the project site, including that portion of any public highway right-of-way between the property line

or right-of-way boundary line and the curb line and also the area enclosed within the curb lines of a median divider (Ontario Municipal Code Section 7-3.03), pursuant to Ontario Municipal Code Section 5-22-02;

**(iii)** Shared parking facilities and access drives; and

**(iv)** Utility and drainage easements.

**(c)** CC&Rs shall include authorization for the City's local law enforcement officers to enforce City and State traffic and penal codes within the project area.

**(d)** The CC&Rs shall grant the City of Ontario the right of enforcement of the CC&R provisions.

**(e)** A specific methodology/procedure shall be established within the CC&Rs for enforcement of its provisions by the City of Ontario, if adequate maintenance of the development does not occur, such as, but not limited to, provisions that would grant the City the right of access to correct maintenance issues and assess the property owners association for all costs incurred.

2. All motor vehicle storage shall include the keeping of automobiles, trucks, vans, recreational vehicles and watercraft, motorcycles, trailers, forklifts, and any inoperative vehicle, regardless of vehicle type.
3. The indoor storage of motor vehicles shall comply with all applicable requirements of the fire and building codes.
4. Any use that creates excessive noise, dust, hazardous materials or pollutants, or result in obvious fire hazards or negatively impact the reasonable use and enjoyment of other units are not permitted.
5. Minor vehicle maintenance (oil change, detailing, tune-ups, etc.) is allowed provided that the work does not reasonable interfere or negatively impact other units. Painting, bodywork or welding is not permitted.
6. Car washing is allowed, subject to National Pollutant Discharge Elimination System (NPDES) and City regulations.
7. The units may not be used for residential living. Loft office areas, kitchenette (sink, refrigerator, microwave) TV lounge areas, bathrooms and showers are permitted.
8. All vehicles, trailers and/or accessories must be stored within the enclosed unit. No outside storage is allowed.
9. Retail sales or commercial office uses from units is prohibited.
10. Retail or wholesale sales of vehicles from units is prohibited.
11. No exterior sign, placard, picture, advertisement, name or notice may be installed or displayed on any part of the outside exterior of a unit.

# 5. CIRCULATION, PARKING, & INFRASTRUCTURE

Access to the site will be limited to Emporia Street only.

## 5.1 PEDESTRIAN CONNECTIONS

Pedestrian connections shall be provided to each building from the public street within the PUD site. The Mixed-Use Commercial land use district shall also provide pedestrian pathways/sidewalks, along Emporia Street, to connect to the residential, work\live lofts and commercial developments surrounding the PUD area.

## 5.2 PUBLIC RIGHT-OF-WAY IMPROVEMENTS

The public right-of-way shall be improved with each proposed development. The public right-of-way improvements required are to include but are not limited to the following: street pavement, curb and gutter, parkway landscaping, parkway irrigation, public sidewalk, traffic signing and striping, streetlights, bus stop, bus shelter and amenities. The extent of the required improvements shall be determined for each development plan. At a minimum, the improvements shall incorporate all items along the street frontages of the properties to be developed with proper transitioning if the entire block frontage is not being installed with a development.

## 5.3 INFRASTRUCTURE

There is an existing 6-inch water line within Emporia Street that shall serve the PUD site, which connects to a 4-inch STL in Laurel Avenue (undersized). The water main will be required to be upsized, possibly to a 12-inch - required size and limits to be determined by the fire flow test. However, it is likely that the upsize will take place from the intersection of Holt Boulevard and Laurel Avenue, south to the intersection of Emporia Street and Laurel Avenue, due east to the end of the cul-de-sac to provide adequate fire service.

Wastewater flows for the PUD site will be designed to use an existing 8-inch sewer line located within Emporia Street.

On-site stormwater drainage facilities shall be provided to capture and infiltrate a 2-yr, 24-hour storm event, consistent with the San Bernardino County Stormwater Program's Water Quality Management Plan (WQMP) requirements for new development projects. Stormwater capture and infiltration facilities may include the utilization of vegetated swales, depressed landscaped basins, pervious concrete pavement or underground stormwater retention/infiltration vaults. All building roof and paved area runoff shall be directed into depressed landscaped swales, trenches or basins, within the development, in order to comply with the requirement to capture and infiltrate the 2-yr, 24-hour storm event runoff.

The Applicant/Developer will be responsible to design and construct street improvements, along property frontage of Emporia Street, in accordance with conditions issued by City’s Engineering Land Development Division. These, and all other street improvements required herein, shall include, but not limited to, concrete curb and gutter, sidewalk, LED streetlights, signing and striping, and parkway landscaping.

Existing Street light fixtures, along Emporia Street will be required to be replaced with City-approved LED equivalent fixtures. Refer to the Traffic and Transportation Design Guidelines for LED fixture requirements. The type of street lighting will be determined at the time of development.

## 5.4 PARKING

Parking shall be provided on-site at the rates required by the City of Ontario Development Code. One parking space within each Car Condo Unit may be counted towards required parking for vehicle storage use. In addition, the Downtown Parking Model may be used to obtain required parking for uses within the PUD.

The Downtown Ontario Parking Model was created in 2002 to provide a means of assessing parking demand and capacity in the downtown area. As in most downtowns, on-site parking is not typically attainable due to as-built conditions, including small lots, historic buildings with no setbacks, alley loaded streets, and excessive lot coverage. The Excel-based parking model specifically evaluates demand based on land use and capacity at maximum build out on an hour-by-hour and block-by-block basis. The model provides an estimate of parking availability (on-site and street parking combined) with shared parking within the downtown district as the premise.

# 6. DESIGN GUIDELINES

The following design guidelines are intended as a reference to assist the designer in understanding the City's goals and objectives for high quality commercial development. The guidelines compliment the mandatory development standards contained in Subsection 4 (Development Regulation) above.

Design principles and examples of desired styling elements to guide the development within the downtown are set forth in the Downtown Ontario Design Guidelines ("Guidelines"), adopted by the Ontario City Council on August 18, 1998. The design guidelines in this PUD are general in nature and may be interpreted with some flexibility in their application to specific projects. The guidelines will be utilized during the City's development review process to encourage the highest level of design quality, while at the same time providing the flexibility necessary to encourage creativity on the part of the project designer(s). As such, some variations from the Guidelines are permitted, provided that the integrity of the urban design and historic preservation principles is not compromised. To safeguard the integrity of the historic district, a Certificate of Appropriateness is required for development.

## 6.1 SITE DESIGN

The site design shall minimize pedestrian/vehicle conflicts by creating opportunities for building entry plazas, outdoor dining, and landscaped pathways that promote safe and convenient pedestrian movement.

## 6.2 BUILDING ORIENTATION

Buildings should be oriented towards Emporia Street. Frontages should be enhanced with entry elements, interesting architecture, enhanced materials, and pedestrian scale to provide connection between the development and the street. Windows and entries should face the street avoiding blank walls dominating public views. Stores with entries not visible from the street may be oriented towards pedestrian open space. The building entries may be located on the side of the building so long as strong pedestrian connection is maintained through wide walkways, enhanced pavers, plazas, appropriately scaled lighting and/or other similar features. Rear entrances, if needed, should be secondary in nature.

## 6.3 BUILDING STREET SIDE SETBACKS

The sides of buildings along street edges shall be landscaped within the setback to soften the building's appearance as well as designed with windows or design elements.

## 6.4 STREET FRONTAGE AND PARKING LOTS

Parking lots should generally be placed away from streets. Street frontages shall be broken up with buildings, landscaping, plazas, and other pedestrian features. Continuous parking lots along the street frontage should be avoided. Any parking along street edges shall be setback with a landscaped buffer to minimize the dominant feeling of the automobile along the street. Continuous

parking stalls may be interrupted by landscaped islands no more than 10 stalls apart. Parking lots are encouraged to be interconnected rather than separated for each building. Separated parking lots encourage customers to drive from store to store. Parking lots shall not be visible from the Euclid Avenue corridor.

## 6.5 SERVICE AND STORAGE AREAS

Loading areas and storage areas are to be located behind or to the side of buildings (West side) siting onto Emporia Street. These features must be screened with walls and landscaping as much as possible from public view of streets, residences, and pedestrian walkways. Loading areas and storage areas should not conflict with pedestrian walkways.

## 6.6 REFUSE CONTAINERS

Refuse containers and equipment shall be easily accessed by service vehicles. Service facilities such as trash enclosures, loading zones and yard areas shall be designed, located and oriented to have a minimal visual impact on the development within the PUD area. Trash enclosures shall be designed to coordinate with the architecture, colors and materials of the style of the development and shall be located to provide adequate access for trash pickup without encroaching on access drives or landscaped areas. Trash enclosures shall be designed and constructed with a solid roof cover which shall also be designed to match the architecture of the development. The enclosure may be designed to be incorporated into the building, subject to City review/approval, in order to scree the enclosure appropriately.

## 6.7 SIDEWALKS

Sidewalks shall be located along natural pedestrian travel paths. Sidewalks should be a minimum of 5’ wide along pedestrian pathways.

## 6.8 ARCHITECTURAL CHARACTER\DETAILS

The project area is located within Ontario’s historic downtown area and shall comply with the Downtown Ontario Design Guidelines. The Downtown Ontario Design Guidelines were adopted in 1998 to guide the physical revitalization of Ontario’s historic downtown. The Guidelines provide architectural and design principals, as well as design concepts for downtown districts. The project area is located within the Education Center, a mixed-use area with a focus on commercial, retail, public, and educational uses.

The design principles and desired architectural features for the mixed-use blocks are derived from the architectural style and elements set forth in Section 3.5.3 of the Downtown Design Guidelines, with respect to storefront modulation, entrances, roof design, mechanical equipment, building elements (cornices, storefront frame, mid-floor panel, transom windows, bulkheads), awnings, materials and colors. Those guidelines, together with the following, shall be incorporated into the Development Plans and Certificates of Appropriateness for each block, subject to final interpretation by the Planning/Historic Preservation Commission and City Council.

Architectural Character

- Create an architectural character that compliments the various styles within the historic downtown by using similar proportions, building details and building material.
- New buildings should appear to fit in contextually with existing historic buildings by using similar proportions, articulation, building details and building material.
- The overall character should feel like a modern interpretation of a traditional American small town.
- Create compatibility between the mixed-use architecture and the residential architecture within the downtown area; the introduction of unifying elements such as similar materials and colors should be considered; however, "sameness" is discouraged.

Massing & Scale

- Employ simple, yet varied massing, with wall openings that create shadow line and provide visual relief. Monolithic buildings and extensive blank wall surfaces are not allowed.
- Emphasize massing and height of corner elements
- Building increments should be a maximum of 50 feet in width. Buildings that exceed fifty
- (50) feet of frontage should use various architectural devices to replicate the building increments and pattern of the existing downtown including horizontal breaks and offsets every 25 to 50 feet
- The upper portion of the buildings should reflect the same increment of articulation as the ground level (storefront level)
- The cornices and moldings at the top of facades should also reflect the vertical massing (increments) of the building
- Use strong and identifiable building forms to demarcate street intersections for instance, a taller building mass, tower element/clock tower, or cupola may be considered.
- Where adjacent buildings will be of varying heights, they should be sensitively designed to promote a compatible transition in massing and avoid abrupt changes in scale along the streetscape.

Articulation & Fenestration

- Design buildings with 3-dimensional quality; building facades should be based upon a pleasing set of proportions and a clear pattern of building openings.
- Differentiate between the base, middle and top levels of a building; for instance, street-oriented shops may feature a 1) a bulkhead; 2) display windows; and 3) transom and detailed cornice.
- Avoid monotonous or blank facades on a building; buildings shall be articulated on all sides. Use fenestration (windows and doors), as well as changes in wall plane, material, texture, color, etc. to create shadow lines and articulate building walls.
- Provide highly visible public entrances, preferably oriented to streets and outdoor spaces; shop entrances may be clearly expressed with recesses, overhangs, special materials, and/or detailing.

- Require a high degree of street level transparency, especially along sidewalks, important outdoor spaces and heavily trafficked areas; the use of reflective, opaque, and darkly tinted glass should be restricted.

Architectural Details

- Use architectural details to enhance a building's appearance. Careful detailing is especially appropriate at the base of buildings, along cornices, eaves, parapets or ridge tops, and around entries and windows.
- Incorporate human-scaled details such as canopies and awnings, transparent windows and windows displays. These are required at public entrances and along heavily trafficked outdoor areas.
- Design architectural features and details as an integral part of the building; architectural features, including canopies and awnings, should not appear "tacked-on."

Storefront Guidelines

- Storefronts should provide an individual look for each store or establishment while still blending in with the overall design.
- Storefronts shall incorporate high quality building materials. A durable base material (18 inches high min.) such as brick, tile, exterior cement plaster, or pre-cast architectural concrete shall be used. Storefront glazing and exterior plaster shall not terminate at the ground plane.
- Storefront glazing shall be clear glass to permit clear views into the interior space. The amount of such glass shall provide a balance between high visibility into the store interior and architectural character/quality.
- Entrance doors shall be of a traditional style and transparent as possible; however, an all glass door is prohibited.
- No part of any open doors shall extend into the public right-of-way.
- Storefront openings should not exceed 30 feet in width without the interruption of a vertical building element (column or wall).
- Storefront openings may extend up to 16 feet in height; the height should range from 8 to 16 feet.

Materials & Colors

- Use materials that exhibit permanence and quality, and that unify a building's appearance on all sides; materials and colors should accentuate the architectural details of the building and promote visual harmony. Brick, tile, pre-cast architectural concrete, wood, stone veneers or stucco are preferred.
- To create visual interest, use at least 3 different building materials on building facades. Materials may be used to highlight a building entrance or distinguish the building base.
- Any awnings shall be comprised of durable, heat, dust and mildew-resistant canvas materials that are designed to withstand the rigors of the Ontario climate. Vinyl or other shiny materials are prohibited. However, canopies are preferred over awnings.

Roofs/Rooftop Equipment

- Express roofs in a visually interesting manner that complements the composition of the building and surrounding area, (i.e., use sculpted roof forms or a strong and attractively detailed cornice).
- Locate and/or screen rooftop equipment, including ladders and antenna devices, so that it is not visible from streets and adjacent buildings; methods of rooftop screening should be integral to the building's form.
- All mechanical units shall be screened from public view and from adjacent existing buildings (preferably with roof forms).
- When roof decks and mechanical units are visible from adjacent developments, they should be as unobtrusive as possible and painted to match finish roof material.

## 6.9 OUTDOOR DINING AREAS

Outdoor dining areas adjacent to a street level eating or drinking establishment are encouraged along Emporia Street and Euclid Avenue. Any such areas shall be designed in accordance with the provisions set forth in Section 2A.7 of the Downtown Ontario Design Guidelines, plus any additional features that may be required as part of on-sale alcoholic beverages. Outdoor dining along Euclid Avenue, if proposed within the rights-of way, will require an agreement with the California Department of Transportation, since this is street is within a State right-of-

## 6.10 SIGNS

All commercial signs shall be designed in accordance with the criteria set forth in Section 2C of the Downtown Ontario Design Guidelines.

## 6.11 LIGHTING

All lighting of facades, decorative fixtures, store window interiors, awnings, and signs shall be designed in accordance with the criteria set forth in Section 2D of the Downtown Ontario Design Guidelines.

On-site lighting must be directed away or shielded from adjacent streets, and adjacent properties. All exterior lighting shall be of an indirect nature, coming from under eaves and canopies, or at ground level, with in landscaped areas.

Exterior lighting fixtures should be a decorative and reinforce the architectural style of the building.

Light standards less than 15 FT in height (including lighting bollards) should illuminate all street sidewalks and connecting walkways and are encouraged throughout the project.

# 7. HISTORIC PRESERVATION

## 7.1 HISTORIC CONTEXT AND BACKGROUND

The project area that comprises the PUD established by this document is located within the City's Historic Downtown District. Founded by the Chaffey Brothers in the 1880's, Ontario was a coined a "model irrigation colony" by an Act of Congress in 1904. The Chaffey Brothers bought 6,218 acres of the Cucamonga Ranch in 1882 after the Southern Pacific Railway extended its service to the west. Approximately 640 acres were set aside for the community of Ontario, with half of that endowed to the Chaffey Agricultural College. The rest of the acreage was utilized as agricultural land. The primary feature of the Chaffey city plan was the two-hundred-foot-wide Euclid Avenue. Several innovations included the provision for water rights for each landowner, electric lights, and an electric railway. The gravity Mule Car that ran along the length of Euclid from 1888 to 1895 provided interest to its visitors as did the historic fountain that displayed Ontario's water supply system. The median still exists today and has been a center of public activity since its inception. The present downtown took shape from the original irrigation system and land subdivision pattern established by the Chaffey Brothers in the 1880's as it grew evenly northwards away from the railroad lines. The area within the current Downtown almost exactly matches the original boundaries of the Model Colony.

As a part of the recognition of Ontario's rich heritage, the City Council in July 1991 adopted a Historic Preservation Ordinance. The purpose of the Ordinance was:

1. To safeguard the City's unique historical heritage as embodied and reflected in the City's architectural history and patterns of cultural development;
2. To foster civic and neighborhood pride and a sense of identity based on the recognition and use of Historical Resources; and
3. To preserve diverse architectural styles, patterns of development, and design preferences reflecting phases of the City's history and to encourage complementary contemporary design and construction and inspire a more livable urban environment.

The PUD area has side street frontage along Euclid Avenue. The public right-of-way of Euclid Avenue from Philadelphia Street to the I-10 was designated as Local Landmark No. 67 on January 16, 2001 by the Ontario City Council. On August 10, 2005, the public right-of-way of Euclid Avenue from Philadelphia Street in Ontario to 24th Street in Upland was listed on the National Register of Historic Places as a significant cultural landscape. The public right-of way includes north and south bound streets, sidewalks, light fixtures, parkways, median, trees, and stone and concrete curbs and gutters. Contributing character-defining features include the 60-foot wide median, historic rock curb, scored sidewalks, King standard light posts, double planting of California pepper trees (Schinus molle), silk oaks trees (Grevillea robusta), and other mature vegetation such as deodar trees (Cedrus deodara) and Canary Island palms (Phoenix canariensis). All proposed developments within the PUD area will require a Certificate of Appropriateness to

ensure alterations and building forms (design, scale/massing and site layout) are appropriate to the character of the historic Euclid Avenue frontage (Right-of-way).

## 7.2 EXISTING HISTORIC RESOURCES

The PUD area does not contain any potential or proposed historic resources. However, the area is located within the Proposed Downtown Historic District. As such, a Certificate of Appropriateness will be required with all proposed developments within the PUD area to ensure no adverse impacts to the proposed and designated historic resources occur as a result of development. Infill and new construction, including building forms (design, scale/massing and site layout) and architectural elements, shall be developed in a manner that adheres to the Secretary of Interior Standards for the Treatment of Historic Resources, the City of Ontario Development Code, and the Ontario Design Guidelines.

# 8. ADMINISTRATION

## 8.1 ITEMS NOT ADDRESSED IN PUD

Any terms, requirements, or regulations not addressed within the PUD document shall be governed by the City of Ontario Development Code, the regulations of the Mixed-Use zones and City Standards.

## 8.2 DEVELOPMENT APPLICATIONS

Development Plans for the development of each individual parcel within the PUD area, along with fees and other required items, shall be submitted for review and approval per the requirements contained in Chapter 2, *Administration and Procedures,* of the City of Ontario Development Code and the General Application.

## 8.3 ADMINISTRATIVE EXCEPTIONS

Deviation from the development standards set forth in this document may be granted up to a maximum of ten (10%) percent by the Zoning Administrator. Any deviation that is greater than (10%) percent shall require Variance approval.
