CITY OF ONTARIO

Regular City Council/Housing Authority Meeting
MARCH 1, 2022

City Hall
303 East B Street, Ontario, CA 91764

MAYOR PAUL S. LEON • MAYOR PRO TEM ALAN D. WAPNER
COUNCIL MEMBERS JIM W. BOWMAN, DEBRA DORST-PORADA AND RUBEN VALENCIA

CITY CLERK SHEILA MAUTZ • TREASURER JAMES R. MILHISER
CITY MANAGER SCOTT OCHOA • CITY ATTORNEY RUBEN DURAN

WELCOME TO A MEETING OF THE ONTARIO CITY COUNCIL

All documents for public review are on file with the Records Management/City Clerk's Department located at 303 East B Street, Ontario, CA 91764.

Anyone wishing to speak in person during public comment or on a particular item will be required to fill out a blue slip. Blue slips must be turned in prior to public comment beginning or before an agenda item is taken up. The Clerk will not accept blue slips after that time. To comment by email, submit your comments no later than 4:00 p.m. on the day of the meeting by emailing your name, agenda item you are commenting on and your comments to publiccomments@ontarioca.gov. All comments received by the deadline will be forwarded to the City Council for consideration before action is taken on the matter and will be entered into the record.

Comments will be limited to 3 minutes. Speakers will be alerted when they have 1 minute remaining and when their time is up. Speakers are then to return to their seats and no further comments will be permitted.

In accordance with State Law, remarks during public comment are to be limited to subjects within Council's jurisdiction. Remarks on other agenda items will be limited to those items.

Remarks from those seated or standing in the back of the chamber will not permitted. All those wishing to speak including Council and Staff need to be recognized by the Chair before speaking.

WEARING A MASK DURING THE PUBLIC MEETING IS STRONGLY ENCOURAGED.

If you need special assistance or accommodations to participate in this meeting, please contact the City Clerk's office at 909-395-2009. Notification of 48 hours prior to the meeting will help the

City make reasonable arrangements. Equipment for the hearing impaired is available in the Records Management Office.

ORDER OF BUSINESS

The regular City Council and Housing Authority meeting begins with Closed Session and Closed Session Comment at 6:00 p.m., Public Comment at 6:30 p.m. immediately followed by the Regular Meeting and Public Hearings. No agenda item will be introduced for consideration after 10:00 p.m. except by majority vote of the City Council. (EQUIPMENT FOR THE HEARING IMPAIRED AVAILABLE IN THE RECORDS MANAGEMENT OFFICE)

CALL TO ORDER *(OPEN SESSION)*

ROLL CALL

Wapner, Bowman, Dorst-Porada, Valencia, Mayor/Chairman Leon

CLOSED SESSION PUBLIC COMMENT

The Closed Session Public Comment portion of the Council/Housing Authority meeting is limited to a maximum of 3 minutes for each speaker and comments will be limited to matters appearing on the Closed Session. Additional opportunities for further Public Comment will be given during and at the end of the meeting.

REPORT ON CLOSED SESSION

City Attorney

PUBLIC COMMENTS 6:30 p.m.

The Public Comment portion of the Council/Housing Authority meeting is limited to 30 minutes with each speaker given a maximum of 3 minutes. An opportunity for further Public Comment may be given at the end of the meeting. Under provisions of the Brown Act, Council is prohibited from taking action on oral requests.

To comment by email, submit your comments by email no later than 4:00 p.m. on the day of the meeting by emailing your name, agenda item you are commenting on and your comment to publiccomments@ontarioca.gov. All Comments received by the deadline will be forwarded to the City Council for consideration before action is taken on the matter and entered into the record. As previously noted -- if you wish to address the Council, fill out one of the blue slips at the rear of the chambers and give it to the City Clerk.

AGENDA REVIEW/ANNOUNCEMENTS

The City Manager will go over all updated materials and correspondence received after the Agenda was distributed to ensure Council Members have received them. He will also make any necessary recommendations regarding Agenda modifications or announcements regarding Agenda items to be considered.

CONSENT CALENDAR

All matters listed under CONSENT CALENDAR will be enacted by one motion in the form listed below – there will be no separate discussion on these items prior to the time Council votes on them, unless a member of the Council requests a specific item be removed from the Consent Calendar for a separate vote.

Each member of the public wishing to address the City Council on items listed on the Consent Calendar will be given a total of 3 minutes.

---

1. APPROVAL OF MINUTES

PUBLIC HEARINGS

Pursuant to Government Code Section 65009, if you challenge the City's zoning, planning or any other decision in court, you may be limited to raising only those issues you or someone else raised at the public hearing described in this notice, or in written correspondence delivered to the City Council at, or prior to the public hearing. Affidavits of posting compliance, for all items below, are on file with the Records Management Department.

---

11. A PUBLIC HEARING TO CONSIDER: (1) A GENERAL PLAN AMENDMENT (FILE NO. PGPA21-004) FOR THE HOUSING ELEMENT UPDATE TO THE POLICY PLAN (GENERAL PLAN) COMPONENT OF THE ONTARIO PLAN, ADDRESSING STATE MANDATES AND THE SIXTH CYCLE REGIONAL HOUSING NEEDS ALLOCATION (RHNA) AND TO MODIFY THE POLICY PLAN LAND USE PLAN (EXHIBIT LU-01) TO ESTABLISH AN AFFORDABLE HOUSING OVERLAY; (2) A ZONE CHANGE (FILE NO. PZC21-002) MODIFYING THE OFFICIAL ZONING MAP TO ESTABLISH AN "AH" (AFFORDABLE HOUSING) OVERLAY ZONING DISTRICT; AND, (3) A DEVELOPMENT CODE AMENDMENT (FILE NO. PDCA21-001) REVISING SECTION 6.01.035 FOR THE PURPOSE OF ADDING PROVISIONS TO ESTABLISH AN "AH" (AFFORDABLE HOUSING) OVERLAY DISTRICT.

That the City Council consider the following:

A. The adoption of a Resolution approving the use of an Addendum to The Ontario Plan Environmental Impact Report (State Clearinghouse No. 2008101140);
B. The adoption of a Resolution approving the General Plan Amendment, File No. PGPA21-004, for the Housing Element Update to the Policy Plan component of The Ontario Plan, addressing State mandates and the Sixth Cycle Regional Housing Needs Allocation (RHNA) and to modify the Policy Plan Land Use Plan (Exhibit LU-01), establishing the Affordable Housing Overlay;
C. The introduction and waiving of further reading of an Ordinance approving the Zone Change, File No. PZC21-002, revising the Zoning Map to establish the "AH" (Affordable Housing) Overlay zoning district; and
D. The introduction and waiving of further reading of an Ordinance approving the Development Code Amendment, File No. PDCA21-001, adding provision to establish the "AH" (Affordable Housing) Overlay zoning district.

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF ONTARIO, CALIFORNIA, APPROVING THE USE OF AN ADDENDUM TO THE ONTARIO PLAN ENVIRONMENTAL IMPACT REPORT FOR FILE NOS. PGPA21-004, PZC21-002, AND PDCA21-001, FOR WHICH AN INITIAL STUDY WAS PREPARED IN ACCORDANCE WITH THE REQUIREMENTS OF THE CALIFORNIA ENVIRONMENTAL QUALITY ACT, AS AMENDED, AND MAKING FINDINGS IN SUPPORT THEREOF.

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF ONTARIO, CALIFORNIA, APPROVING FILE NO. PGPA21-004, A GENERAL PLAN AMENDMENT UPDATING THE HOUSING ELEMENT OF THE POLICY PLAN AND AN AMENDMENT TO THE LAND USE ELEMENT OF THE POLICY PLAN, REVISING EXHIBIT LU-01, LAND USE PLAN, ESTABLISHING AN AFFORDABLE HOUSING OVERLAY, AND MAKING FINDINGS IN SUPPORT THEREOF (PART OF CYCLE 1 FOR THE 2022 CALENDAR YEAR).

AN ORDINANCE OF THE CITY COUNCIL OF THE CITY OF ONTARIO, CALIFORNIA, APPROVING FILE NO. PZC21-002, A ZONE CHANGE TO MODIFY THE ZONING MAP TO ESTABLISH THE AH (AFFORDABLE HOUSING) ZOINING OVERLAY DISTRICT, AND MAKING FINDINGS IN SUPPORT THEREOF.

AN ORDINANCE OF THE CITY COUNCIL OF THE CITY OF ONTARIO, CALIFORNIA, APPROVING FILE NO. PDCA21-001, A DEVELOPMENT CODE AMENDMENT REVISING SECTION 6.01.035, ADDING PROVISIONS TO ESTABLISH THE AH (AFFORDABLE HOUSING) OVERLAY DISTRICT, AND MAKING FINDINGS IN SUPPORT THEREOF.

12. A PUBLIC HEARING TO CONSIDER 1) CERTIFICATION OF THE ENVIRONMENTAL IMPACT REPORT (STATE CLEARINGHOUSE NO. 2021010318), INCLUDING THE ADOPTION OF A MITIGATION MONITORING AND REPORTING PROGRAM AND A STATEMENT OF OVERRIDING CONSIDERATIONS; 2) A GENERAL PLAN AMENDMENT (FILE NO. PGPA19-004) TO MODIFY THE LAND USE PLAN (EXHIBIT LU-01) OF THE POLICY PLAN (GENERAL PLAN) OF THE ONTARIO PLAN TO CHANGE THE LAND USE DESIGNATIONS FOR 219.39 ACRES OF LAND FROM LOW-MEDIUM DENSITY RESIDENTIAL (5.1-11 DWELLING UNITS PER ACRE) AND BUSINESS PARK (0.6 FAR) TO BUSINESS PARK (0.6 FAR) AND INDUSTRIAL (0.55 FAR), AND MODIFY THE FUTURE BUILDOUT TABLE (EXHIBIT LU-03) TO BE CONSISTENT WITH THE LAND USE DESIGNATION CHANGES; AND 3) A SPECIFIC PLAN (FILE NO. PSP19-001 - SOUTH ONTARIO LOGISTICS CENTER SPECIFIC PLAN) TO ESTABLISH THE LAND USE DISTRICTS, DEVELOPMENT STANDARDS, DESIGN GUIDELINES, AND INFRASTRUCTURE IMPROVEMENTS FOR THE POTENTIAL DEVELOPMENT OF UP TO 5,333,518 SQUARE FEET OF INDUSTRIAL AND BUSINESS PARK LAND USES. THE PROJECT SITE IS BORDERED BY EUCALYPTUS AVENUE ON THE NORTH, MERRILL AVENUE ON THE SOUTH, EXISTING RIGHT-OF-WAY FOR THE FUTURE CAMPUS AVENUE EXTENSION ON THE WEST, AND GROVE AVENUE ON THE EAST (APNS: 1054-071-01, 1054-071-02, 1054-081-03, 1054-091-01, 1054-091-02, 1054-101-01, 1054-101-02, 1054-231-01, 1054-231-02, 1054-241-01, 1054-241-02, 1054-321-01, 1054-321-02, 1054-311-01, 1054-311-02, 1054-051-01, 1054-051-02, 1054-061-01, 1054-061-02, 1054-251-01, 1054-251-02, 1054-301-01, AND 1054-301-02.

That the City Council take the following actions:

A. Consider and adopt the Resolution certifying the Environmental Impact Report (State Clearinghouse No. 2021010318) prepared for the South Ontario Logistics Center Specific Plan, File No. PSP19-001, which includes the adoption of a Statement of Overriding Considerations and Mitigation Monitoring and Reporting Plan;

B. Consider and adopt the Resolution approving a General Plan Amendment (File No. PGPA19-004) modifying the Land Use Element of the Policy Plan component of The Ontario Plan (General Plan), changing the land use designations shown on the Land Use Plan Map (Exhibit LU-1) for 39 acres of land, from Low-Medium Density Residential (5.1-11 dwelling units per acre) and Business Park (0.6 FAR) to Business Park (0.6 FAR) and

Industrial (0.55 FAR), and modify the Future Buildout Table (Exhibit LU-03) to be consistent with the land use designation changes; and

C. Introduce and waive further reading of the Ordinance adopting the South Ontario Logistics Center Specific Plan (File No. PSP19-001).

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF ONTARIO, CALIFORNIA, ADOPTING ENVIRONMENTAL FINDINGS PURSUANT TO THE CALIFORNIA ENVIRONMENTAL QUALITY ACT AND CERTIFYING THE SOUTH ONTARIO LOGISTICS CENTER SPECIFIC PLAN FINAL ENVIRONMENTAL IMPACT REPORT (STATE CLEARINGHOUSE NO. 2021010318), ADOPTING FINDINGS OF OVERRIDING CONSIDERATIONS AND A MITIGATION MONITORING AND REPORTING PROGRAM FOR FILE NO. PGPA19-004, A GENERAL PLAN AMENDMENT, AND FILE NO. PSP19-001, THE SOUTH ONTARIO LOGISTICS CENTER SPECIFIC PLAN, LOCATED WITHIN ONTARIO RANCH AND GENERALLY BORDERED BY EUCALYPTUS AVENUE TO THE NORTH, GROVE AVENUE TO THE EAST, MERRILL AVENUE TO THE SOUTH, AND CAMPUS AVENUE TO THE WEST, AND MAKING FINDINGS IN SUPPORT THEREOF – APNS: 1054-071-01, 1054-071-02, 1054-081-03, 1054-091-01, 1054-091-02, 1054-101-01, 1054-101-02, 1054-231-01, 1054-231-02, 1054-241-01, 1054-241-02, 1054-321-01, 1054-321-02, 1054-311-01, 1054-311-02, 1054-051-01, 1054-051-02, 1054-061-01, 1054-061-02, 1054-251-01, 1054-251-02, 1054-301-01, AND 1054-301-02.

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF ONTARIO, CALIFORNIA, APPROVING FILE NO. PGPA19-004, AN AMENDMENT TO THE LAND USE ELEMENT OF THE POLICY PLAN (GENERAL PLAN), REVISING EXHIBIT LU-01 (OFFICIAL LAND USE PLAN) AND EXHIBIT LU-03 (FUTURE BUILDOUT), AFFECTING PROPERTY BORDERED BY EUCALYPTUS AVENUE TO THE NORTH, MERRILL AVENUE TO THE SOUTH, CAMPUS AVENUE TO THE WEST, AND GROVE AVENUE TO THE EAST, FROM APPROXIMATELY 157.1 ACRES OF LOW-MEDIUM DENSITY RESIDENTIAL (5.1-11 DWELLING UNITS PER ACRE) AND APPROXIMATELY 62.4 ACRES OF BUSINESS PARK (0.6 FAR) TO APPROXIMATELY 184.2 ACRES OF INDUSTRIAL (0.55 FAR) AND APPROXIMATELY 35.2 ACRES OF BUSINESS PARK (0.6 FAR), AND MAKING FINDINGS IN SUPPORT THEREOF—APNS: 1054-071-01, 1054-071-02, 1054-081-03, 1054-091-01, 1054-091-02, 1054-101-01, 1054-101-02, 1054-231-01, 1054-231-02, 1054-241-01, 1054-241-02, 1054-321-01, 1054-321-02, 1054-311-01, 1054-311-02, 1054-051-01, 1054-051-02, 1054-061-01, 1054-061-02, 1054-251-01, 1054-251-02, 1054-301-01, AND 1054-301-02. (SEE ATTACHMENTS 1 AND 2) (PART OF THE GENERAL PLAN AMENDMENT CYCLE ONE FOR THE 2022 CALENDAR YEAR.

AN ORDINANCE OF THE CITY COUNCIL OF THE CITY OF ONTARIO, CALIFORNIA, APPROVING FILE NO. PSP19-001, THE SOUTH ONTARIO LOGISTICS CENTER SPECIFIC PLAN, TO ESTABLISH LAND USE DISTRICTS, DEVELOPMENT STANDARDS, DESIGN GUIDELINES, AND INFRASTRUCTURE IMPROVEMENTS FOR THE POTENTIAL DEVELOPMENT OF UP TO 5,333,518 SQUARE FEET OF INDUSTRIAL AND BUSINESS PARK LAND USES ON 219.39 ACRES OF LAND GENERALLY BORDERED BY EUCALYPTUS AVENUE ON THE NORTH, MERRILL AVENUE ON THE SOUTH, GROVE AVENUE ON THE EAST, AND CAMPUS AVENUE ON THE WEST, AND MAKING

FINDINGS IN SUPPORT THEREOF—APNS: 1054-071-01, 1054-071-02, 1054-081-03, 1054-091-01, 1054-091-02, 1054-101-01, 1054-101-02, 1054-231-01, 1054-231-02, 1054-241-01, 1054-241-02, 1054-321-01, 1054-321-02, 1054-311-01, 1054-311-02, 1054-051-01, 1054-051-02, 1054-061-01, 1054-061-02, 1054-251-01, 1054-251-02, 1054-301-01, AND 1054-301-02.

MINUTES
FEBRUARY 1, 2022
(Not Official Until Approved)

JOINT MEETINGS

Pursuant to AB 361, the regular meetings of the Ontario City Council and Housing Authority were held on Tuesday February 1, 2022 on OntarioTV at www.ontarioca.gov/Agendas/CityCouncil.

CALL TO ORDER

Mayor Leon called the Joint City Council and Ontario Housing Authority meetings to order at 6:02 p.m.

ROLL CALL

PRESENT:	Mayor/Chairman	Paul S. Leon
	Mayor pro Tem/Vice Chair	Alan D. Wapner
	Council/Authority Members:	Jim W. Bowman, Debra Dorst-Porada and Ruben Valencia
ABSENT:	Council/Authority Members:	None.

Also present were City Manager / Executive Director Scott Ochoa, City Attorney/Legal Counsel Ruben Duran, and City Clerk/Secretary Sheila Mautz, all participating virtually.

CLOSED SESSION PUBLIC COMMENT

Mayor Leon inquired whether persons were present who wished to speak to the Closed Session item. Hearing no one, City Attorney Duran announced the matters for discussion, as listed on the agenda, and the City Council recessed to Closed Session at 6:04 p.m. for discussion of the following:

CLOSED SESSION

- GC 54957.6, LABOR NEGOTIATIONS: City Negotiator: City Manager or his designee; Bargaining Units: Ontario Police Officers Association

CALL TO ORDER – OPEN SESSION

Mayor Leon called the City Council and Ontario Housing Authority meetings to order at 6:31p.m.

PLEDGE OF ALLEGIANCE

The Pledge of Allegiance was led by Council Member Dorst-Porada.

INVOCATION

In lieu of the invocation, Mayor Leon led a moment of silence.

REPORT ON CLOSED SESSION

City Attorney Duran announced there was no reportable action.

PUBLIC COMMENTS

Assistant City Clerk announced there were no emailed public comments.

Mayor Leon called upon the first caller:

Elizabeth Skrzat, General Manager with the Chino Basin Water Conservation District, invited City Council to upcoming events.

Giovanni Sanchez, inquired on the status of the Jesus Sanchez case.

Alexis Sanchez, inquired on the status of the Jesus Sanchez case.

Maria Romualdo, requested a letter be sent to Governor Newsom requesting assistance in solving the Jesus Sanchez case.

Cassandra Sanchez, inquired on the status of the Jesus Sanchez case.

Damaris Lopez, inquired on the status of the Jesus Sanchez case and requested more resources to support the Ontario Police Department in solving the pending case.

AGENDA REVIEW/ANNOUNCEMENTS

City Manager Ochoa made no announcements regarding the agenda. He noted he would have the Ontario Police Department continue to stay in contact with the Sanchez family.

CONSENT CALENDAR

Items pulled from Consent: Mayor pro Tem Wapner pulled Item No. 13 from the Consent Calendar for discussion.

MOTION: Moved by Council Member Dorst-Porada, seconded by Council Member Bowman and carried by unanimous roll call vote 5-0, to approve the Consent Calendar as presented, with the exception of Item No. 13.

1. APPROVAL OF MINUTES

The City Council approved minutes for the regular meetings of the City Council and Housing Authority of January 4, 2022, approving the same as on file in the Records Management Department.

2. BILLS & PAYROLL

The City Council considered and adopted an ordinance approving a Zone Change (File No. PZC21-001) amending the zoning designation on 2.77 acres of land located at 1948 South Bon View Avenue, from IL (Light Industrial) to IG (General Industrial). Introduction and first reading took place at a regular meeting on January 18, 2022.

ORDINANCE NO. 3203 AN ORDINANCE OF THE CITY COUNCIL OF THE CITY OF ONTARIO, CALIFORNIA, APPROVING FILE NO. PZC21-001, A ZONE

CHANGE ON 2.77 ACRES OF LAND FROM IL (LIGHT INDUSTRIAL) TO IG (GENERAL INDUSTRIAL), LOCATED AT 1948 SOUTH BON VIEW AVENUE, AND MAKING FINDINGS IN SUPPORT THEREOF—APN: 1050-441-05.

7. A COST SHARING AGREEMENT WITH CHAFFEY JOINT UNION HIGH SCHOOL DISTRICT FOR SCHOOL RESOURCE OFFICERS

The City Council approved and authorized the City Manager to execute a one-year cost sharing agreement with the Chaffey Joint Union High School District for three school resource officers in the amount of $244,000.

8. AMENDMENT TO PUBLIC WORKS CONTRACT FOR CONCRETE REPAIR AND MAINTENANCE AND INSTALLATION OR RECONTRUCTION OF WHEELCHAIR RAMPS SERVICES

The City Council authorized the City Manager to execute Amendment (Change Order) No. 12 in the amount of $159,136 to the existing Public Works Contract for Concrete Repair and Maintenance and Installation or Reconstruction of Wheelchair Ramps Services with CT&T Concrete Paving, Inc. of Diamond Bar, California, for Fiscal Year 2021-22.

9. DESIGN SERVICE AGREEMENT FOR CITYWIDE ON-CALL ARCHITECTURAL SERVICES

The City Council authorized the City Manager to add a contract threshold amount not to exceed $400,000 for On-Call Design Service Agreement with Robert Borders & Associates of Costa Mesa, California.

10. AMENDMENT TO THE MAINTENANCE SERVICES AGREEMENT WITH WEST COAST ARBORIST, INC. FOR TREE MAINTENANCE SERVICES

The City Council authorized the City Manager to execute Amendment No. 11 in the amount of $573,385 to the existing Public Works Contract to perform tree maintenance services with West Coast Arborist, Inc. of Anaheim, California for Fiscal Year 2021-22.

11. AGREEMENT TO PROVIDE FIRE DISPATCH SERVICES TO THE CITY OF CORONA

The City Council authorized the City Manager to execute an agreement with the City of Corona for the Ontario Fire Department to provide fire dispatch services and recover associated costs and fees from the City of Corona.

12. PURCHASE OF REPLACEMENT CARDIAC MONITORS

Authorized the cooperative purchase and delivery of cardiac monitors in the amount of $942,000 from Zoll Medical Corporation of Chelmsford, Massachusetts, consistent with the terms and conditions of NPPGov Contract No. PS20200.

14. DECLARATION OF MANDATORY WATER RESTRICTIONS - STAGE 2

The City Council implemented Stage 2 of the City's Municipal Code Water Conservation Plan.

ITEMS PULLED FOR DISCUSSION:

13. APPROVAL OF TWO-YEAR MEMORANDUM OF UNDERSTANDING(S) ESTABLISHING COMPENSATION AND RELATED BENEFITS FOR SPECIFIED REPRESENTED EMPLOYEE GROUPS INCLUDING AMENDMENTS TO THE COMPENSATION AND BENEFITS PROFILE FOR UNREPRESENTED EMPLOYEES; APPROVAL OF ONE YEAR EXTENSION FOR SPECIFIED PUBLIC SAFETY GROUPS; AND AUTHORIZE THE CITY MANAGER TO MAKE ANY NON-SUBSTNATIVE CHANGES WHICH MAY BE NECESSARY TO IMPLEMENTAITON.

The City Council approved two-year Memorandum of Understanding(s) regarding wages, hours, and other terms and conditions of employment between the City of Ontario and the American Federation of State, County, & Municipal Employees Local 3061 and the Association of Ontario Management Employees from July 1, 2021 through June 30, 2023; approve amendments to the Compensation and Benefits Profiles for Department Heads and Confidential/Specialized Confidential Employees effective July 1, 2021; and contingent upon ratification from specified groups, approve a one-year extension to the Memorandum of Understanding(s) regarding wages, hours, and other terms and conditions of employment between the City of Ontario and the Ontario Professional Firefighters Association and the Ontario Fire Management Group pursuant to actions of these two groups to be taken the morning of February 1, 2022.

Mayor pro Tem Wapner expressed his gratitude for the groups coming to a consensus so quickly.

Council Member Dorst-Porada also thanked the groups for coming to a consensus.

MOTION: Moved by Council Member Bowman, seconded by Council Member Dorst-Porada and carried by unanimous roll call vote 5-0, to approve a Two-Year Memorandum of Understanding(s) Establishing Compensation and Related Benefits.

STAFF MATTERS

City Manager Ochoa made no comments.

COUNCIL MATTERS

Council Member Dorst-Porada spoke on the upcoming windstorm and encouraged residents to stay safe.

Council Member Bowman made no comments.

Council Member Valencia spoke on the upcoming windstorm and encouraged residents to call 911 if they see any fallen electrical lines.

Mayor pro Tem Wapner made no comments.

Mayor Leon encouraged residents to stay safe during the windstorm.

ADJOURNMENT

Mayor Leon adjourned the meetings of the Joint Agencies at 6:57 p.m. and announced the next regular meeting to be held on Tuesday, February 15, 2022.

Respectfully submitted,

CITY OF ONTARIO *Agenda Report* **March 1, 2022**	**SECTION:** **CONSENT CALENDAR**
Department: Police Department Prepared By: Nicole Alvarez Staff Member Presenting: Mike Lorenz, Chief of Police Approved By:	Submitted To: Council/OHA Approved: _____ Continued To: _____ Denied: _____ Item No: 3

SUBJECT: APPLICATION FOR CALIFORNIA OFFICE OF TRAFFIC SAFETY (OTS) FY22/23 SELECTIVE TRAFFIC ENFORCEMENT PROGRAM (STEP) GRANT

RECOMMENDATION: That City Council authorize the City Manager or his designee to execute all documents necessary to apply for and accept a 12-month grant in the amount of $822,400 from the California Office of Traffic Safety (OTS) for participation in the FY22/23 Selective Traffic Enforcement Program (STEP) Grant.

THE FOLLOWING COUNCIL GOALS ARE BEING ACHIEVED:
Maintain the Current High Level of Public Safety
Pursue City's Goals and Objectives by Working with Other Governmental Agencies

FISCAL IMPACT: Grant awards will be announced in July 2022 and the funds will be used for eligible costs incurred from October 1, 2022–September 30, 2023. These grants are reimbursable on a quarterly basis and fund police overtime, education, equipment, supplies, and training to conduct DUI saturation patrols, special traffic enforcement, field enforcement, street racing enforcement and training, education and sobriety checkpoints. The approximate grant funding reimbursement requested is $822,400, and the City is not required to provide matching funds for the grants. If awarded, the approved amount will be included as in a subsequent quarterly budget report to City Council.

BACKGROUND & ANALYSIS: The California Office of Traffic Safety (OTS), through the National Highway Traffic Safety Administration (NHTSA), offers local law enforcement agencies overtime grants to mitigate traffic safety program deficiencies, expand ongoing activities, develop new programs, and conduct sobriety checkpoints. The grant period includes two "National Impaired Driving Campaign" mobilization periods: the Winter Mobilization which occurs around Christmas and New Year's Eve and Summer Mobilization which occurs around Labor Day. Sobriety checkpoints, DUI saturation patrols and special traffic enforcement will be scheduled during each of the highly publicized mobilization periods. Additional operations will continue to be conducted outside the mobilization periods. Each overtime operation and checkpoint will be conducted according to each operation's specific needs, which may require supervisors, officers, technicians, and/or clerical/other staff members. The goal of the OTS grant program includes: (1) reducing the number of people killed in alcohol-involved crashes through the combined efforts of local law

enforcement agencies, California Highway Patrol, and OTS, (2) reduce the total number of traffic collisions that occur within the City, (3) through press releases, inform citizens of increased enforcement and educate drivers that the only way to “avoid” arrest, injury, and/or death is to drive sober, and (4) network with regional law enforcement agencies to conduct multiple joint operations to decrease alcohol related issues such as DUI’s and underage drinking.

SUBJECT: APPLICATION FOR THE CALIFORNIA OFFICE OF TRAFFIC SAFETY (OTS) FY22/23 RIDE- TO-LIVE MOTORCYCLE TRAINING COURSE GRANT

RECOMMENDATION: That City Council authorize the City Manager or his designee to execute all documents necessary to apply for and accept a 12-month grant in the amount of $29,000 from the California Office of Traffic Safety (OTS) for participation in the FY22/23 Ride-to Live Motorcycle Safety Training Course Grant.

THE FOLLOWING COUNCIL GOALS ARE BEING ACHIEVED:
Maintain the Current High Level of Public Safety
Pursue City's Goals and Objectives by Working with Other Governmental Agencies

FISCAL IMPACT: Grant awards will be announced in July 2022 and the funds will be used for eligible costs incurred from October 1, 2022 – September 30, 2023. These grants are reimbursable on a quarterly basis and fund police overtime, education, equipment, supplies, and training to conduct Motorcycle Safety Training courses. The approximate grant funding reimbursement requested is $29,000. The City is not required to provide matching funds for the grant. If awarded, the approved amount will be included in a subsequent quarterly budget report to City Council.

BACKGROUND & ANALYSIS: The California Office of Traffic Safety (OTS), through the National Highway Traffic Safety Administration (NHTSA), offers local law enforcement agencies overtime grants to mitigate traffic safety program deficiencies, expand ongoing activities and develop new programs. The goal is to help reduce the number of persons killed/injured in motorcycle crashes. In conjunction with our OTS STEP grant-funded motorcycle safety enforcement details, the Ontario Police Department Traffic Unit will host our motorcycle rider safety course called “Ride to Live”. This course is a free 8 hour, hands-on motorcycle riding safety class utilizing police motorcycle instructors/officers to teach civilian riders how to safely ride during low-speed motorcycle maneuvering; focusing on proper braking, turning, counter-steering techniques, safely entering traffic, and obstacle/collision avoidance. This training strategy is also designed to earn media attention; enhancing the overall impact of this safety program to the community.

Department: Integrated Waste Prepared By: Benjamin Mayorga Staff Member Presenting: Tito Haes, Executive Director Public Works Reviewed By: Bonnie Tam Approved By:	Submitted To: Council/OHA Approved: _____ Continued To: _____ Denied: _____ Item No: 5

SUBJECT: AUTHORIZE THE PURCHASE OF FLEET VEHICLES

RECOMMENDATION: That the City Council authorize the cooperative purchase and delivery of three (3) Autocar Automated Sideload trucks in the amount of $1,125,000 and two (2) Autocar Roll Off trucks in the amount of $570,000 for the Integrated Waste Department, consistent with the terms and conditions of the Sourcewell Cooperative Contract No. 060920-ATC.

THE FOLLOWING COUNCIL GOALS ARE BEING ACHIEVED:
Operate in a Businesslike Manner

FISCAL IMPACT: The total cost of the vehicles recommended for purchase is $1,695,000. If approved, appropriations for the purchase of vehicles of $1,320,000 in the Integrated Waste Fund and $375,000 in the Integrated Waste Impact DIF Fund will be included in the Fiscal Year 2021-22 Year-End Budget Update.

BACKGROUND & ANALYSIS: With continuous residential and commercial development throughout the city and CalRecycle legislative requirements, the Integrated Waste Department is proactively planning for an increase in refuse, recycling, and organics materials. To maintain an effective level of customer service, the proposed purchase of equipment ensures minimal service interruptions to the customers of Ontario and compliance with CalRecycle's legislative bills AB 341, SB 1383, and AB 1826.

QUANTITY	TYPE	DEPARTMENT	PRICE
3	Automated Side Loader	Integrated Waste	$1,125,000
2	Autocar Roll Off	Integrated Waste	$570,000

Department: Parks & Maintenance Prepared By: Alfredo Banuelos Staff Member Presenting: Tito Haes, Executive Director Public Works Reviewed By: Bonnie Tam Approved By:	Submitted To: Council/OHA Approved: _____ Continued To: _____ Denied: _____ Item No: 6

SUBJECT: PURCHASE OF CALSENSE IRRIGATION CONTROLLERS

RECOMMENDATION: That the City Council authorize the City Manager, or his designee, to execute the Goods and Services Agreement with SiteOne Landscape Supply of Cleveland, Ohio (on file in the Records Management Department) for the procurement of new Calsense Irrigation Controllers for citywide parks and medians in an amount not to exceed $296,817.

THE FOLLOWING COUNCIL GOALS ARE BEING ACHIEVED:
Invest in the City's Infrastructure (Water, Streets, Sewers, Parks, Storm Drains and Public Facilities)

FISCAL IMPACT: The Fiscal Year 2021-22 Adopted Budget includes appropriations of $280,950 in Capital Projects Fund and $15,867 in General Fund for the purchase of Calsense irrigation controllers in the total amount of $296,817.

BACKGROUND & ANALYSIS: The Calsense irrigation controllers model 2000E went out of production at the end of 2021 and parts will no longer be produced. Replacement of the Calsense model 2000E with the 3000E model will give Staff better connectivity and maximize water management savings. It will also allow Staff the ability to access the central command center through their smart phones/tablets and desktop computers.

On December 15, 2021, the City solicited request for proposals (RFPs) for the purchase of Calsense irrigation controllers and received three (3) bids from the following companies:

COMPANY	LOCATION	BID AMOUNT
SiteOne Landscape Supply	Cleveland, Ohio	$296,816.35
Smith Pipe & Supply	Ontario, CA	$311,526.30
Technology International, Inc.	Lake Mary, Florida	$321,553.14

SiteOne Landscape Supply is being recommended based on their bid amount and the ability to deliver the materials in a timely manner.

Department: Engineering Prepared By: Antonio Alejos Staff Member Presenting: Scott Murphy, Executive Director Community Development Reviewed By: Raymond Lee, Khoi Do Approved By:	Submitted To: Council/OHA Approved: _____ Continued To: _____ Denied: _____ Item No: 7

SUBJECT: **A RESOLUTION APPROVING AN IMPROVEMENT AGREEMENT AND IMPROVEMENT SECURITY FOR DEVELOPMENT PLAN NO. PDEV19-027 LOCATED AT THE SOUTHWEST CORNER OF SAN ANTONIO AVENUE AND STATE STREET**

RECOMMENDATION: That the City Council adopt a Resolution approving an Improvement Agreement and Improvement Security for Development Plan No. PDEV19-027 located at the southwest corner of San Antonio Avenue and State Street.

THE FOLLOWING COUNCIL GOALS ARE BEING ACHIEVED:
Invest in the Growth and Evolution of the City's Economy
Focus Resources in Ontario's Commercial and Residential Neighborhoods
Invest in the City's Infrastructure (Water, Streets, Sewers, Parks, Storm Drains and Public Facilities)

FISCAL IMPACT: There is not a direct fiscal impact associated with this action. All public infrastructure improvements required for this development plan will be constructed by the Developer at its sole cost.

BACKGROUND & ANALYSIS: Development Plan No. PDEV19-027 ("Project"), consisting of a 104,078 square foot industrial building on approximately 5 acres of land, as shown on Exhibit A, has been submitted by the Developer, BC State Street, LLC, a Delaware Limited Liability Company. The Project was approved by the Development Advisory Board on November 18, 2019.

Improvements will include AC pavement, curb, gutter, sidewalk, landscaped parkways, fiber optic conduits, fire hydrants, sewer, water, storm drain, and streetlights. Improvements in the parkway will be consistent with current City approved drought measures.

The Developer has entered into an Improvement Agreement with the City for the Project and has posted adequate security to ensure construction of the required public improvements.

This development plan meets all conditions of the Ontario Municipal Code and has been reviewed

and approved by the City Engineer.

RESOLUTION NO. _____

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF ONTARIO, CALIFORNIA, APPROVING AN IMPROVEMENT AGREEMENT AND IMPROVEMENT SECURITY FOR DEVELOPMENT PLAN NO. PDEV19-027 LOCATED AT THE SOUTHWEST CORNER OF SAN ANTONIO AVENUE AND STATE STREET.

WHEREAS, Development Plan No. PDEV19-027 submitted for approval by BC State Street, L.L.C., was approved by the Development Advisory Board of the City of Ontario on November 18, 2019; and

WHEREAS, Development Plan No. PDEV19-027 a 104,078-square foot industrial building on 5.35 acres of land being Parcel "A" as described in the Certificate Compliance for Lot Line Adjustment No. LLA19-017 in the City of Ontario, County of San Bernardino, State of California per document recorded June 22, 2021 as Instrument No. 2021-0282497, both recorded in the County of San Bernardino, State of California; and

WHEREAS, to meet the requirements established as prerequisite to final approval of Development Plan No. PDEV19-027, BC State Street, L.L.C., a Delaware limited liability company has offered the Improvement Agreement together with good and sufficient improvement security, in conformance with the City Attorney's approved format, for approval and execution by the City; and

NOW, THEREFORE, BE IT RESOLVED, by the City Council of the City of Ontario, California, as follows:

1. That said Improvement Agreement be, and the same is, approved and the City Manager is authorized to execute same on behalf of said City, and the City Clerk is authorized to attest thereto; and

2. That said Improvement Security is accepted as good and sufficient, subject to approval as to form and content thereof by the City Attorney; and

The City Clerk of the City of Ontario shall certify as to the adoption of this Resolution.

PASSED, APPROVED, AND ADOPTED this 1st day of March 2022.

CITY OF ONTARIO *Agenda Report* **March 1, 2022**	**SECTION:** **CONSENT CALENDAR**
Department: Fire Department Prepared By: Belinda Ramirez Staff Member Presenting: Ray Gayk, Fire Chief Reviewed By: Jordan T Villwock Approved By:	Submitted To: Council/OHA Approved: _____ Continued To: _____ Denied: _____ Item No: 8

SUBJECT: **A RESOLUTION APPROVING ADDITIONAL FIRE DEPARTMENT CLASSIFICATIONS BE ADDED TO THE TERMS AND CONDITIONS FOR ONTARIO FIRE DEPARTMENT RESPONSES TO AND REIMBURSEMENTS FOR CALIFORNIA FIRE AND RESCUE MUTUAL AID SYSTEM REQUESTS**

RECOMMENDATION: That the City Council adopt a Resolution approving additional fire department classifications to the terms and conditions for Fire Department responses to California Fire and Rescue Mutual Aid System requests to assist State of California and Federal Fire Agencies.

THE FOLLOWING COUNCIL GOALS ARE BEING ACHIEVED:
Operate in a Businesslike Manner
Pursue City's Goals and Objectives by Working with Other Governmental Agencies

FISCAL IMPACT: Approval of the proposed Resolution will ensure that the Ontario Fire Department recovers the maximum amount of reimbursable costs for certain mutual aid assignments. Absent this document, the City would be limited in the number of hours deemed reimbursable.

BACKGROUND & ANALYSIS: The intent of the California Fire Assistance Agreement (CFAA) is to compensate California Fire and Rescue Mutual Aid System Agencies for the cost of assisting the State of California and Federal Agencies. In 2015, it was established that, to be reimbursed from time of initial dispatch from their home base, to the time of return to home base (portal-to-portal), a MOU/MOA, governing body resolution or equivalent document must be on file with the Office of Emergency Services (Cal OES). Without this Agreement, reimbursement would be for actual hours worked while on the incident. In 2015, City Council approved Resolution R2015-039, which specified the positions of Fire Chief, Senior Deputy Fire Chief, Deputy Fire Chief, Battalion Chief, Fire Captain, Fire Engineer, Firefighter, and Nurse Administrator as eligible classifications to respond to these out-of-jurisdiction incidents. The Fire Department is requesting to add the following classifications to be eligible for portal-to portal reimbursement and to respond to out-of-jurisdiction incidents as Radio Operators: Fire Administrative Director, Emergency Manager, Fire Communications Manager, Fire Dispatch Supervisor, Senior Fire Dispatcher and Fire Dispatcher.

RESOLUTION NO. _____

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF ONTARIO, CALIFORNIA, APPROVING THE TERMS AND CONDITIONS FOR FIRE DEPARTMENT RESPONSE AWAY FROM THEIR OFFICIAL DUTY STATION AND ASSIGNED TO AN EMERGENCY INCIDENT.

WHEREAS the City of Ontario (Fire Department) is a public agency located in the County of San Bernardino, State of California; and

WHEREAS, it is the intent of the City of Ontario's desire to provide for fair and legal payment to all its employees for time worked; and

WHEREAS, the City of Ontario has in its employ, Fire Department response personnel including: Fire Administrative Director, Emergency Manager, Fire Communications Manager, Fire Dispatch Supervisor, Senior Fire Dispatcher, and Fire Dispatcher; and

WHEREAS, the City of Ontario will compensate its employees portal-to-portal while in the course of their employment and away from their official duty station and assigned to an emergency incident, in support of an emergency incident, or pre-positioned for emergency response; and

WHEREAS, the City of Ontario will compensate its employees' overtime, in accordance with their current Memorandum of Understanding (MOU), Personnel Rules and Regulations, and/or other directive, while in the course of their employment and away from their official duty station and assigned to an emergency incident, in supportof an emergency incident, or pre-positioned for emergency response.

NOW, THEREFORE, BE IT HEREBY RESOLVED, that the conditions set forth inthis resolution, as stated above, take effect upon adoption by the City of Ontario City Council.

NOW, THEREFORE, BE IT HEREBY RESOLVED, by the Ontario City Council that:

1. Personnel shall be compensated according to the MOU, Personnel Rules and Regulations, and/or other policy directive that identifies personnel compensation in the workplace.

2. For clarification, in the event where the MOU, Personnel Rules and Regulations, and/or other directive does not specify, personnel will be compensated (portal-to-portal) beginning at the time of dispatch to the return to jurisdiction when equipment and personnel are in service and available for agency response.

3. In the event a personnel classification does not have an assigned compensation rate, a "Base Rate" as set forth in an organizational policy, administrative directive, or similar document will be used to compensate such personnel.

4. The City of Ontario Fire Department will maintain a current salary survey or acknowledgement of acceptance of the "Base Rate" on file with the California Governor's Office of Emergency Services, Fire Rescue Division.

5. City of Ontario Fire Department response personnel include: Fire Administrative Director, Emergency Manager, Fire Communications Manager, Fire Dispatch Supervisor, Senior Fire Dispatcher, and Fire Dispatcher.

The City Clerk of the City of Ontario shall certify as to the adoption of this Resolution.

PASSED, APPROVED, AND ADOPTED this 1st day of March 2022.

CITY OF ONTARIO *Agenda Report* **March 1, 2022**	**SECTION:** **CONSENT CALENDAR**
Department: Integrated Waste Prepared By: Benjamin Mayorga Staff Member Presenting: Tito Haes, Executive Director Public Works Reviewed By: Bonnie Tam Approved By:	Submitted To: Council/OHA Approved: _____ Continued To: _____ Denied: _____ Item No: 9

SUBJECT: **A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF ONTARIO, CALIFORNIA, AUTHORIZING THE SUBMITTAL OF A NOTIFICATION OF INTENT TO COMPLY WITH SB 1383 REGULATIONS FOR CALRECYCLE APPROVAL**

RECOMMENDATION: That the City Council adopt a Resolution authorizing the City Manager, or designee, to execute the Department of Resources Recycling and Recovery (CalRecycle) Notification of Intent to Comply with SB 1383 Regulations related documents, in a form approved by the City Attorney.

THE FOLLOWING COUNCIL GOALS ARE BEING ACHIEVED:
Operate in a Businesslike Manner

FISCAL IMPACT: The adoption of the Resolution will assist the City in avoiding administrative civil penalties pursuant to Public Resources Code 145652.5 (a)(1) and (5). There is no fiscal impact associated with adopting the proposed Resolution.

BACKGROUND & ANALYSIS: Pursuant to Public Resources Code sections 145652.5 (a)(1) and (5) Cal Recycle is authorized to administer civil penalties for non-compliance with SB 1383. Due to the COVID-19 pandemic, CalRecycle adopted SB 619 to assist jurisdictions with the implementation of newly enacted regulations in order to avoid potential violations and administrative penalties.

Adoption of the proposed Resolution allows the City of Ontario to secure administrative civil penalty relief for non-compliance with SB 1383.

RESOLUTION NO. _____

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF ONTARIO, CALIFORNIA, ADOPTING A NOTIFICATION OF INTENT TO COMPLY WITH THE SB 1383 REGULATIONS.

WHEREAS, the California Department of Resources Recycling and Recovery ("CalRecycle") adopted regulations to implement Senate Bill 1383 (Lara, Statutes of 2016) ("SB 1383 Regulations"), to achieve organic waste reduction goals established in Health and Safety Code Section 39730.6 through a 50 percent reduction in the level of the statewide disposal of organic waste from the 2014 level by 2020 and a 75 percent reduction in the level of the statewide disposal of organic waste from the 2014 level by 2025; and

WHEREAS, the City of Ontario ("City") is a local jurisdiction required to comply with the SB 1383 Regulations; and

WHEREAS, the City is or expects to be facing continuing violations of the SB 1383 Regulations during the 2022 calendar year; and

WHEREAS, Senate Bill 619 (Laird, Statutes of 2021) amended Public Resources Code Section 42652.5, created a mechanism called a Notification of Intent to Comply through which a local jurisdiction may secure administrative civil penalty relief from any continuing violations of the SB 1383 Regulations for the 2022 calendar year and may be eligible for a broader and longer-term regulatory compliance path, including suspended administrative civil penalties, through a corrective action plan; and

WHEREAS, the City is a local jurisdiction authorized by SB 619 to submit a Notification of Intent to Comply for CalRecycle approval; and

WHEREAS, CalRecycle shall approve a Notification of Intent to Comply that is duly adopted by the jurisdiction by formal written resolution and meets the requirements of SB 619.

NOW, THEREFORE, BE IT RESOLVED BY THE CITY COUNCIL OF THE CITY OF ONTARIO AS FOLLOWS:

SECTION 1. The City Council hereby adopts the Notification of Intent to Comply attached as Exhibit "A," and authorizes and directs the City Clerk to submit the Notification of Intent to Comply to CalRecycle for approval.

SECTION 2. By submitting the Notification of Intent to Comply pursuant to SB 619, the City represents and certifies that it will implement the proposed actions to remedy the violations according to the proposed schedule as approved by CalRecycle and in accordance with SB 619 and the SB 1383 Regulations.

SECTION 3. The City agrees to comply with any maximum compliance deadline in any corrective action plan that CalRecycle, in its sole discretion, determines to be necessary and appropriate under the circumstances for the correction of any violation(s) of the SB 1383 Regulations identified in its Notification of Intent to Comply.

The City Clerk of the City of Ontario shall certify as to the adoption of this Resolution.

PASSED, APPROVED, AND ADOPTED this 1st day of March 2022.

_____
SHEILA MAUTZ, CITY CLERK

(SEAL)

Exhibit “A” Notification of Intent to Comply

Notification of Intent to Comply

CalRecycle is providing this optional form as a convenience to assist jurisdictions (counties, cities, a county and city, or special districts providing solid waste collection services) for purposes of submitting a notification of intent to comply to CalRecycle [see Public Resources Code (PRC) section 42652.5(c)].

A jurisdiction may submit a notification of intent to comply if it is facing continuing violations of the Short-lived Climate Pollutants: Organic Waste Reductions requirements in Title 14 California Code of Regulations (14 CCR). The written notification of intent to comply, adopted by resolution of the jurisdiction's governing body, shall be sent to CalRecycle no later than **March 1, 2022,** to NOIC@CalRecycle.ca.gov.

A jurisdiction shall, at minimum, include the following in its notification:

1. A description, with specificity, of the continuing violations.
2. A detailed explanation of the reasons, supported by documentation, why the local jurisdiction is unable to comply.
3. A description of the impacts of the COVID-19 pandemic on compliance.
4. A description of the proposed actions the local jurisdiction will take to remedy the violations within the timelines established in 14 CCR section 18996.2 with a proposed schedule for doing so. The proposed actions shall be tailored to remedy the violations in a timely manner.

Upon approval by CalRecycle of a jurisdiction's notification and implementation of the intent to comply, a jurisdiction may be eligible for both of the following:

1. Administrative civil penalty relief for the 2022 calendar year pursuant to PRC section 42652.5(d).
2. A corrective action plan pursuant to 14 CCR section 18996.2.
    a. CalRecycle may address through a corrective action plan any violations disclosed in a jurisdiction's notification that will take more than 180 days to correct. In this situation, the proposed actions and schedule in the jurisdiction's approved notification will be in effect until a corrective action plan is issued.

CalRecycle will respond in writing to a jurisdiction within 45 business days of receiving its notification with an approval, disapproval, request for additional information, or timeline for a decision on approval or disapproval. CalRecycle will include details about why a jurisdiction did not meet the requirements for a Notification of Intent to Comply when disapproving the jurisdiction's notification.

Please clearly print or type responses. Attach additional pages as necessary.

☐ (5)

2. A detailed explanation of the reasons why the jurisdiction is unable to comply, supported by documentation, if applicable.

The City is unable to comply with Section 18984.5 Container Contamination Minimization and Section 18984.6 Recordkeeping Requirements for Container Contamination Minimization due to the current personnel levels and necessities to create a new position to conduct route review for prohibited container contaminants on randomly selected containers in a manner that results in all collection routes being reviewed quarterly. Due to the lack of personnel the City is unable to maintain accurate recordkeeping requirements currently.

3. A description of the impacts of the COVID-19 pandemic on compliance.

Due to the impact of COVID -19 on staffing levels from March 2020 until present, we were unable to hire the Route Special position to address CCR section 18984.5 Container Contamination Minimization and 18984.6 Record-keeping Requirements for Container Contamination Minimization. We understand the importance of addressing container contamination and record-keeping throughout the process and expect to hire this position in the upcoming months in 2022 as COVID-19 continues to decrease. When we employ this position, we anticipate minimizing contamination rates effectively, and our record-keeping will be accounted for with our businesses, multi-families, and residents. Thorough route audits and proper documentation will occur throughout this process.

4. Provide a description of the proposed actions the jurisdiction will take to remedy the violations with a proposed schedule for completing each action. The proposed actions shall be tailored to remedy the violations in a timely manner. See optional format below.

14 CCR Section 18984.5 - Container Contamination Minimization

The City will implement the monitoring of contaminants being placed in a collection container by a generator through route reviews and audits.

14 CCR Section 18984.6 - Recordkeeping Requirements for Container Contamination Minimization

The City will implement a system to address the recordkeeping requirements for the prohibition of contaminants being placed in a collection container by a generator.

I hereby certify under penalty of perjury that the information provided herein is true and correct to the best of my knowledge.

Regulatory Requirement: (B.i.) 14 CCR section 18984.1 Three-Container Organic Waste Collection Services **Description**: Not implementing mandatory residential foodwaste collection for all residents. Note: City already provides mandatory greenwaste collection to all residents	
Action	**Proposed Schedule**
TASK 1: *Purchase two additional collection trucks and modify collection routes*	Date to be completed: *4/7/2022*
TASK 2: *The city will work with its hauler to find a facility to accept mixed organic waste.*	Date to be completed: *4/14/2022*

Regulatory Requirement: (B.ii.) 14 CCR section 18984.1 Three-Container Organic Waste Collection Services **Description**: Not implementing mandatory commercial organics collection for all businesses under 2 cubic yards. Note: City already provides mandatory commercial organics collection to all businesses 2 cubic yard or more.	
Action:	**Proposed Schedule**
TASK 1: *Purchase two additional collection trucks and modify collection routes*	Date to be completed: *4/21/2022*
TASK 2: *The city will work with its hauler to acquire and distribute appropriate containers to all commercial accounts. The city will obtain monthly reports from the hauler to monitor full distribution of carts.*	Date to be completed: *4/28/2022*

CITY OF ONTARIO *Agenda Report* **March 1, 2022**	**SECTION:** **CONSENT CALENDAR**
Department: Communications and Community Relations Prepared By: Tricia Almiron Staff Member Presenting: Dan Bell, Communications and Community Relations Director Approved By:	Submitted To: Council/OHA Approved: _____ Continued To: _____ Denied: _____ Item No: 10

SUBJECT: STATE LEGISLATIVE UPDATE

RECOMMENDATION: That the City Council receive and file this report on State Budget and proposed bills.

THE FOLLOWING COUNCIL GOALS ARE BEING ACHIEVED:
Pursue City's Goals and Objectives by Working with Other Governmental Agencies

FISCAL IMPACT: There is no direct fiscal impact associated with the receiving and filing of this item.

BACKGROUND & ANALYSIS: The State Legislature returned to Sacramento in early January and began working on budget and policy issues. California is projected to have a sizable surplus of $45.7 billion. Of this, approximately $20.6 billion is labeled “discretionary” and is not otherwise required to be allocated to schools, pay off debt, or boost reserve accounts. City staff and advocates are working with our local delegation to request funding specifically for the City of Ontario.

As part of Governor Newsom’s January Budget proposal, he requested the Legislature act on several high priority items early in the year, including current year COVID-19 funding and an extension of paid sick leave.

The Budget proposes investing in the transportation system and other related zero-emission vehicles efforts. These items are also included in the Governor’s Five-Year State Infrastructure Package which includes accelerated funding for climate resilience, broadband, housing, clean energy, wildfire protection, drought, and zero-emission vehicles.

The Legislature had until February 18, 2022, to introduce new bills. Attachment A contains a list of legislative bills the City is tracking. Staff will continue to provide updates and positions as policy committees progress.

City of Ontario Bills 2/24/22

AB 84 **(Committee on Budget) Employment: COVID-19: supplemental paid sick leave.**

Status: 2/9/2022-Re-referred to Com. on B. & F.R.

Location: 2/9/2022-S. BUDGET & F.R.

Summary: Would, beginning January 1, 2022, until September 30, 2022, provide for COVID-19 supplemental paid sick leave for covered employees who are unable to work or telework due to certain reasons related to COVID-19, including that the employee is attending a COVID-19 vaccine or vaccine booster appointment for themselves or a family member, or is experiencing symptoms, or caring for a family member experiencing symptoms, related to a COVID-19 vaccine or vaccine booster. The bill would entitle a covered employee to 40 hours of COVID-19 supplemental paid sick leave if that employee either works full time or was scheduled to work, on average, at least 40 hours per week for the employer in the 2 weeks preceding the date the covered employee took COVID-19 supplemental paid sick leave. The bill would provide a different calculation for supplemental paid sick leave for a covered employee who is a firefighter subject to certain work schedule requirements and for a covered employee working fewer or variable hours, as specified.

Position

High Watch

AB 399 **(Salas D) Workers' compensation.**

Status: 1/27/2022-Read third time. Passed. Ordered to the Senate. In Senate. Read first time. To Com. on RLS. for assignment.

Location: 1/27/2022-S. RLS.

Summary: Would, if an employer objects to an injured employee's physician selection because they are outside of the medical provider network, authorize the injured employee to request the medical provider network name and identification number. The bill would require the employer to provide the medical provider network name and identification number to the injured employee within 5 business days of the employee's request.

AB 682 **(Bloom D) Planning and zoning: density bonuses: cohousing buildings.**

Status: 1/27/2022-Read third time. Passed. Ordered to the Senate. In Senate. Read first time. To Com. on RLS. for assignment.

Location: 1/27/2022-S. RLS.

Summary: Current law, commonly referred to as the Density Bonus Law, requires a city or county to provide a developer that proposes a housing development within the city or county with a density bonus and other incentives or concessions, as specified, if the developer agrees to construct, among other options, specified percentages of units for moderate-income, lower income, or very low income households and meets other requirements. This bill would additionally require that a density bonus be provided under these provisions to a developer who agrees to construct a housing development that is a cohousing building, as defined, that meets specified requirements and will contain either 10% of the total square footage for lower income households, as defined, or 5% of the total square footage for very low income households, as defined.

AB 916 **(Salas D) Zoning: accessory dwelling units: bedroom addition.**

Status: 1/27/2022-Read third time. Passed. Ordered to the Senate. In Senate. Read first time. To Com. on RLS. for assignment.

Location: 1/27/2022-S. RLS.

Summary: The Planning and Zoning Law authorizes the legislative body of any county or city to adopt ordinances that regulate the use of buildings, structures, and land as between industry, business, residences, open space, and other purposes.This bill would prohibit a city or county legislative body from adopting or enforcing an ordinance requiring a public hearing as a condition of adding space for additional bedrooms or reconfiguring existing space to increase the bedroom count within an existing house, condominium, apartment, or dwelling. The bill would include findings that ensuring adequate housing is a matter of statewide concern and is not a municipal affair, and that the provision applies to all cities, including charter cities. This bill contains other related provisions and other existing laws.

Position

AB 937 **(Carrillo D) Immigration enforcement.**
Status: 9/10/2021-Failed Deadline pursuant to Rule 61(a)(15). (Last location was INACTIVE FILE on 9/10/2021)(May be acted upon Jan 2022)
Location: 9/10/2021-S. 2 YEAR
Summary: The California Values Act, prohibits a California law enforcement agency from providing a person's release date, or responding to a request for notification of a release date, unless that information is available to the public, and prohibits the transfer of an individual to immigration authorities, as specified, unless the person has been convicted of specified crimes or arrested for a serious or violent felony. This bill would prohibit any state or local agency from arresting or assisting with the arrest, confinement, detention, transfer, interrogation, or deportation of an individual for an immigration enforcement purpose, as specified. The bill would additionally prohibit state or local agencies or courts from using immigration status as a factor to deny or to recommend denial of probation or participation in any diversion, rehabilitation, mental health program, or placement in a credit-earning program or class, or to determine custodial classification level, to deny mandatory supervision, or to lengthen the portion of supervision served in custody.

Oppose

AB 1014 **(McCarty D) Cannabis: retailers: delivery: vehicles.**
Status: 2/1/2022-In Senate. Read first time. To Com. on RLS. for assignment.
Location: 2/1/2022-S. RLS.
Summary: MAUCRSA establishes the Department of Cannabis Control for the administration and enforcement of its provisions. MAUCRSA requires the department to establish a track and trace program for reporting the movement of cannabis and cannabis products throughout the distribution chain that utilizes a unique identifier and is capable of providing specified information. MAUCRSA requires the track and trace program to include an electronic seed to sale software tracking system with data points for the different stages of commercial activity, including, but not limited to, cultivation, harvest, processing, manufacturing, distribution, inventory, and sale. This bill would also require the electronic seed to sale software tracking system to include delivery.

Position

AB 1406 **(Lackey R) Law enforcement agency policies: carrying of equipment.**
Status: 2/1/2022-In Senate. Read first time. To Com. on RLS. for assignment.
Location: 2/1/2022-S. RLS.
Summary: Current law requires law enforcement agencies to maintain a policy on the use of force, as specified. Current law places certain restrictions on the use of force by law enforcement agencies, including prohibiting the use of a choke hold or carotid restraint. This bill would require a law enforcement agency that authorizes peace officers to carry an electroshock device, such as a taser or stun gun that is held and operated in a manner similar to a pistol, to require that device to be holstered or otherwise carried on the lateral side of the body opposite to the side that that officer's primary firearm is holstered.

Position
High Watch

AB 1551 **(Santiago D) Planning and zoning: development bonuses: mixed-use projects.**
Status: 1/27/2022-Read third time. Passed. Ordered to the Senate. In Senate. Read first time. To Com. on RLS. for assignment.
Location: 1/27/2022-S. RLS.
Summary: The Density Bonus Law requires a city or county to provide a developer that proposes a housing development within the city or county with a density bonus and other incentives or concessions, as specified, if the developer agrees to construct specified percentages of units for lower income, very low income, or senior citizen housing, among other things, and meets other requirements. Previously existing law, until January 1, 2022, required a city, county, or city and county to grant a commercial developer a development bonus, as specified, when an applicant for approval of a commercial development had entered into an agreement for partnered housing with an affordable housing developer to contribute affordable housing through a joint project or 2 separate projects encompassing affordable housing. This bill would reenact the above-described provisions regarding the granting of development bonuses to certain projects. The bill would require

a city or county to annually submit to the Department of Housing and Community Development information describing an approved commercial development bonus. The bill would repeal these provisions on January 1, 2028.

Position
High Watch

AB 1597 **(Waldron R) Shoplifting: increased penalties for prior crimes.**
Status: 1/14/2022-Referred to Com. on PUB. S.
Location: 1/14/2022-A. PUB. S.
Summary: Current law, as amended by Proposition 47, provides that a registered sex offender or a person with a prior conviction for certain serious or violent felonies, such as a sexually violent offense, who commits petty theft, is subject to imprisonment in the county jail for up to one year or in the state prison for 16 months, or 2 or 3 years. This bill would reinstate a provision of law that was repealed by Proposition 47 that provides that a person who has been convicted 3 or more times of petty theft, grand theft, or other specified crimes and who is subsequently convicted of petty theft is subject to imprisonment in a county jail not exceeding one year or in a county jail for 18 months or 2 or 3 years.

Position
High Watch

AB 1599 **(Kiley R) Proposition 47: repeal.**
Status: 1/14/2022-Referred to Com. on PUB. S.
Location: 1/14/2022-A. PUB. S.
Summary: The Safe Neighborhoods and Schools Act, enacted as an initiative statute by Proposition 47, as approved by the electors at the November 4, 2014, statewide general election, made various changes relating to theft and the possession of controlled substances, including by, among other things, generally reducing the penalty for those crimes, including reducing the penalty for possession of concentrated cannabis, establishing a procedure by which individuals convicted of those crimes prior to the passage of the act may petition for resentencing under the act, and creating the crime of shoplifting. This bill would repeal the changes and additions made by Proposition 47, except those related to reducing the penalty for possession of concentrated cannabis.

Position
High Watch

AB 1603 **(Salas D) Theft: shoplifting: amount.**
Status: 1/14/2022-Referred to Com. on PUB. S.
Location: 1/14/2022-A. PUB. S.
Summary: Proposition 47 requires shoplifting, defined as entering a commercial establishment with the intent to commit larceny if the value of the property taken does not exceed $950, to be punished as a misdemeanor. Under current law, entering a commercial establishment with the intent to take property exceeding $950 is burglary, punishable as a misdemeanor or a felony. This bill would amend Proposition 47 by reducing the threshold amount for petty theft and shoplifting from $950 to $400. The bill would provide that it shall become effective only when submitted to, and approved by, the voters of California.

Position
High Watch

AB 1641 **(Maienschein D) Sexually violent predators.**
Status: 1/20/2022-Referred to Com. on PUB. S.
Location: 1/20/2022-A. PUB. S.
Summary: Current law provides for the civil commitment of a person who is determined to be a sexually violent predator. Current law requires the Secretary of the Department of Corrections and Rehabilitation to refer certain people for evaluation by the State Department of State Hospitals if the secretary determines that the person may be a sexually violent predator. Current law requires, if the State Department of State Hospitals determines that a person is a sexually violent predator, the Director of State Hospitals to forward a request to a specified county for a petition to be filed for the person to be committed to a facility for mental health treatment. Existing law requires a judge of the superior court to review the petition and to determine whether there is probable cause to believe that the individual is likely to engage in sexually violent predatory criminal behavior upon release. This bill would authorize the use of documentary evidence of the commission of another sexual offense or offenses and the details underlying the commission of another sexual offense at

the probable cause hearing and would prohibit that documentary evidence from being excluded on the basis that it is hearsay evidence.

Position
High Watch

AB 1648 **(Maienschein D) Disaster preparedness: local government: animal wildfire evacuation plan.**
Status: 1/20/2022-Referred to Com. on E.M.
Location: 1/20/2022-A. EMERGENCY MANAGEMENT
Summary: The Office of Emergency Services, in coordination with all interested state agencies with designated response roles in the state emergency plan and interested local emergency management agencies, is required to jointly establish by regulation a standardized emergency management system for use by all emergency response agencies. Current law requires the office to approve and adopt, and incorporate the California Animal Response Emergency System (CARES) program developed under the oversight of the Department of Food and Agriculture into the standardized emergency management system. This bill would require a city or county that requires a kennel license or permit to operate a kennel within its jurisdiction, to require, as a condition for obtaining the kennel license or permit, that the kennel owner create and submit to the city or county an animal natural disaster evacuation plan for any kennel covered by the license or permit.

Position
High Watch

AB 1650 **(Cooper D) Sexually violent predators.**
Status: 1/14/2022-From printer. May be heard in committee February 13.
Location: 1/13/2022-A. PRINT
Summary: Current law authorizes a person who has been committed as a sexually violent predator to petition the court for conditional release, as specified, and if the conditional release is granted, requires the person to be placed in the person's county of domicile prior to the incarceration, except as specified. This bill would declare the intent of the Legislature to enact legislation relating to sexually violent predators.

Position
High Watch

AB 1653 **(Patterson R) Property crimes: regional property crimes task force.**
Status: 1/27/2022-Referred to Com. on PUB. S.
Location: 1/27/2022-A. PUB. S.
Summary: Current law, until January 1, 2026, requires the Department of the California Highway Patrol to coordinate with the Department of Justice to convene a regional property crimes task force to identify geographic areas experiencing increased levels of property crimes and assist local law enforcement with resources, such as personnel and equipment.This bill would specify theft of vehicle parts and accessories as a property crime for consideration by the regional property crimes task force.

Position
High Watch

AB 1674 **(Voepel R) Building standards: photovoltaic requirements: accessory dwelling units.**
Status: 1/27/2022-Referred to Coms. on H. & C.D. and NAT. RES.
Location: 1/27/2022-A. H. & C.D.
Summary: Would prohibit an accessory dwelling unit, as defined, from being considered to be a newly constructed building for purposes of a specified provision of the California Energy Code, which is part of the California Building Standards Code, regarding the photovoltaic requirements for newly constructed buildings that are low-rise residential buildings. The bill would require the State Energy Resources Conservation and Development Commission, commonly known as the Energy Commission, to study exempting accessory dwelling units from specified photovoltaic requirements and make recommendations to the California Building Standards Commission in time for consideration and adoption in the next regularly occurring California Building Standards Code adoption cycle.

Position
High Watch

AB 1685 **(Bryan D) Vehicles: parking violations.**

Status: 2/3/2022-Referred to Coms. on TRANS. and H. & C.D.

Location: 2/3/2022-A. TRANS.

Summary: Current law authorizes a parking citation processing agency, as defined, to collect an unpaid parking penalty by requesting the Department of Motor Vehicles to place a registration hold on the vehicle to which the citations have been issued, or by obtaining a civil judgment against the registered owner of the vehicle, as specified. Current law requires a processing agency to offer a payment plan for unpaid parking citations to qualified indigent persons. This bill would require a processing agency to forgive up to $1,500 in parking fines and fees for a qualified homeless person, as specified.

Position

High Watch

AB 1713 **(Boerner Horvath D) Vehicles: required stops: bicycles.**

Status: 2/3/2022-Referred to Com. on TRANS.

Location: 2/3/2022-A. TRANS.

Summary: Would, until January 1, 2026, require a person who is 18 years of age or older riding a bicycle, when approaching a stop sign at the entrance of an intersection, to yield the right-of-way to any vehicles that have either stopped at or entered the intersection, or that are approaching on the intersecting highway close enough to constitute an immediate hazard, and to pedestrians, as specified, and continue to yield the right-of-way to those vehicles and pedestrians until reasonably safe to proceed. The bill would require other vehicles to yield the right-of-way to a bicycle that, having yielded as prescribed, has entered the intersection. The bill would state that these provisions do not affect the liability of a driver of a motor vehicle as a result of the driver's negligent or wrongful act or omission in the operation of a motor vehicle.

Position

High Watch

AB 1737 **(Holden D) Children's camps: local registration and inspections.**

Status: 2/10/2022-Referred to Coms. on HEALTH and PUB. S.

Location: 2/10/2022-A. HEALTH

Summary: Current law requires the State Public Health Officer to establish rules and regulations establishing minimum standards for organized camps. Current law requires the State Fire Marshal to adopt minimum fire safety regulations for organized camps. Current law requires local health officers to enforce building standards relating to organized camps and the other rules and regulations adopted by the State Public Health Officer. Current law defines "organized camp," for these purposes. Current law requires the Director of Public Health to consider the Camp Standards of the American Camping Association when adopting rules and regulations pursuant to these provisions. This bill would make these provisions applicable to "children's camps" instead of organized camps and would define "children's camp" as a camp that offers daytime or overnight experiences administered by professional adults who provide social, cultural, educational, recreational, or artistic programming to more than 5 children between 3 and 17 years of age for 5 days or longer during at least one season, except as specified. The bill would make other conforming changes in this regard.

Position

High Watch

AB 1748 **(Seyarto R) Exempt surplus land: regional housing need.**

Status: 2/10/2022-Referred to Coms. on L. GOV. and H. & C.D.

Location: 2/10/2022-A. L. GOV.

Summary: Current law prescribes requirements for the disposal of surplus land by a local agency. Current law defines "surplus land" for these purposed to mean land owned in fee simple by any local agency for which the local agency's governing body takes formal action declaring that the land is surplus and is not necessary for the agency's use. Current law provides that an agency is not required to follow the requirements for disposal of surplus land for "exempt surplus land," except as provided. Currentlaw categorizes as "exempt surplus land," surplus land that a local agency is transferring to another local, state, or federal agency for the agency's use. This bill would add to the definition of "exempt surplus land," surplus land that is zoned for a density of up to 30 residential units and is owned by a city or county that demonstrates adequate progress in meeting its share of regional housing need in its annual report, as specified, has constructed an adequate number of housing units to meet its share of regional housing need in the immediately preceding or current housing element cycle, as specified, or is designated as prohousing by the department.

Position

AB 1774 **(Seyarto R) California Environmental Quality Act: water conveyance or storage projects: judicial review.**

Status: 2/10/2022-Referred to Coms. on NAT. RES. and JUD.

Location: 2/10/2022-A. NAT. RES.

Summary: The California Environmental Quality Act (CEQA) requires a lead agency, as defined, to prepare, or cause to be prepared, and certify the completion of an environmental impact report (EIR) on a project that the lead agency proposes to carry out or approve that may have a significant effect on the environment or to adopt a negative declaration if it finds that the project will not have that effect. CEQA also requires a lead agency to prepare a mitigated negative declaration for a project that may have a significant effect on the environment if revisions in the project would avoid or mitigate that effect and there is no substantial evidence that the project, as revised, would have a significant effect on the environment. CEQA establishes a procedure by which a person may seek judicial review of the decision of the lead agency made pursuant to CEQA. This bill would require the Judicial Council to adopt rules of court applicable to actions or proceedings brought to attack, review, set aside, void, or annul the certification or adoption of an environmental impact report for water conveyance or storage projects, as defined, or the granting of project approvals, including any appeals to the court of appeal or the Supreme Court, to be resolved, to the extent feasible, within 270 days of the filing of the certified record of proceedings with the court to an action or proceeding seeking judicial review of the lead agency's action related to those projects.

AB 1835 **(Lackey R) Sexually violent predators: conditional release: placement location.**

Status: 2/18/2022-Referred to Com. on PUB. S.

Location: 2/18/2022-A. PUB. S.

Summary: Current law provides for the civil commitment of a person who is determined to be a sexually violent predator. Current law establishes a procedure by which a person committed as a sexually violent predator may petition for conditional release and requires the court, if it makes a specified determination, to place the person on conditional release. Current law generally requires that a person released on conditional release pursuant to these provisions be placed in the county of domicile and requires the State Department of State Hospitals, or its designee, to consider specified factors when recommending a specific placement for community outpatient treatment, including the concerns and proximity of the victim or the victim's next of kin and the age and profile of the victim or victims in the sexually violent offenses committed by the person subject to placement. This bill would also require, if reasonably possible, a person to be placed at a location within the person's city of domicile, if any, or within a close geographic location within the county of domicile in which the person has family, social ties, or economic ties, and access to reentry services, unless placement within that city or location would pose a risk to the person's victim or victim's next of kin.

Position

AB 1883 **(Quirk-Silva D) Public restrooms.**
Status: 2/18/2022-Referred to Com. on L. GOV.
Location: 2/18/2022-A. L. GOV.
Summary: Current law requires every public agency, as defined, that conducts an establishment serving the public or open to the public and that maintains restroom facilities for the public, to make every water closet available without cost or charge, as provided. Current law also requires publicly and privately owned facilities where the public congregates to be equipped with sufficient temporary or permanent restrooms to meet the needs of the public at peak hours. This bill would require each local government, as defined, to complete an inventory of public restrooms owned and maintained by the local government, either directly or by contract, that are available to the general population in its jurisdiction.

Position
High Watch

AB 1886 **(Cooper D) Public works: definition.**
Status: 2/18/2022-Referred to Com. on L. & E.
Location: 2/18/2022-A. L. & E.
Summary: Current law requires that, except as specified, not less than the general prevailing rate of per diem wages, determined by the Director of Industrial Relations, be paid to workers employed on public works projects. Current law defines the term "public works" for purposes of requirements regarding the payment of prevailing wages to include construction, alteration, demolition, installation, or repair work done under contract and paid for using public funds, except as specified. Existing law makes a willful violation of laws relating to the payment of prevailing wages on public works a misdemeanor.This bill would expand the definition of "public works" to include street sweeping maintenance performed for the preservation, protection, and keeping of any publicly owned or publicly operated street, road, or highway done under contract and paid for in whole or in part out of public funds.

AB 1944 **(Lee D) Local government: open and public meetings.**

Status: 2/18/2022-Referred to Com. on L. GOV.

Location: 2/18/2022-A. L. GOV.

Summary: Current law, the Ralph M. Brown Act, requires, with specified exceptions, that all meetings of a legislative body of a local agency, as those terms are defined, be open and public and that all persons be permitted to attend and participate. Current law, until January 1, 2024, authorizes a local agency to use teleconferencing without complying with those specified teleconferencing requirements in specified circumstances when a declared state of emergency is in effect, or in other situations related to public health. This bill would specify that if a member of a legislative body elects to teleconference from a location that is not public, the address does not need to be identified in the notice and agenda or be accessible to the public when the legislative body has elected to allow members to participate via teleconferencing.

AB 2063 **(Berman D) Density bonuses: affordable housing impact fees.**

Status: 2/15/2022-From printer. May be heard in committee March 17.

Location: 2/14/2022-A. PRINT

Summary: The Density Bonus Law requires a city or county to provide a developer that proposes a housing development in the city or county with a density bonus and other incentives or concessions for the production of lower income housing units, or for the donation of land within the development, if the developer agrees to, among other things, construct a specified percentage of units for very low income, low-income, or moderate-income households or qualifying residents, including lower income students. Current law requires the amount of a density bonus and the number of incentives or concessions a qualifying developer receives to be pursuant to a certain formula based on the total number of units in the housing development, as specified. Existing law prohibits affordable housing impact fees, including inclusionary zoning fees and in-lieu fees, from being imposed on a housing development's affordable units. This bill would prohibit affordable housing impact fees, including inclusionary zoning fees, in-lieu fees, and public benefit fees, from being imposed on a housing development's density bonus units.

AB 2097 **(Friedman D) Residential and commercial development: remodeling, renovations, and additions: parking requirements.**
Status: 2/15/2022-From printer. May be heard in committee March 17.
Location: 2/14/2022-A. PRINT
Summary: The Planning and Zoning Law requires each county and city to adopt a comprehensive, long-term general plan for its physical development, and the development of certain lands outside its boundaries, that includes, among other mandatory elements, a land use element and a conservation element. This bill would prohibit a public agency from imposing a minimum automobile parking requirement, or enforcing a minimum automobile parking requirement, on residential, commercial, or other development if the development is located on a parcel that is within one-half mile of public transit, as defined. When a project provides parking voluntarily, the bill would authorize a public agency to impose specified requirements on the voluntary parking. The bill would prohibit these provisions from reducing, eliminating, or precluding the enforcement of any requirement imposed on a new multifamily or nonresidential development to provide electric vehicle supply equipment installed parking spaces or parking spaces that are accessible to persons with disabilities.

AB 2186 **(Grayson D) Housing Cost Reduction Incentive Program.**
Status: 2/15/2022-From printer. May be heard in committee March 18.
Location: 2/15/2022-A. PRINT
Summary: Existing law establishes, among other housing programs, the Multifamily Housing Program, pursuant to which the Department of Housing and Community Development provides financial assistance in the form of deferred payment loans to pay for the eligible costs of development for specified types of housing projects. Existing law, the Mitigation Fee Act, establishes procedures and limitations with respect to the establishment, increase, or imposition of fees, as defined, as a condition of approval of a development project by a local agency, including requiring the local agency to determine the reasonable relationship between the fee's use and the type of development project on which the fee is imposed.This bill would establish the Housing Cost Reduction Incentive Program, to be administered by the department, for the purpose of reimbursing

cities, counties, and cities and counties for development impact fee waivers or reductions provided to qualified rental housing developments. Upon appropriation, the bill would require the department to provide grants to applicants in an amount equal to 50% of the amount of development impact fee waived or reduced for a qualified rental housing development by issuing a Notice of Funding Availability for each calendar year in which funds are made available for the program, as provided. The bill would require an applicant that receives a grant under the program to use those funds solely for those purposes for which the development impact fee that was waived or reduced would have been used. The bill would require the department to adopt guidelines to implement the program and exempt those guidelines from the rulemaking provisions of the Administrative Procedure Act.

AB 2211 **(Ting D) Shelter crisis: homeless shelters.**
Status: 2/15/2022-From printer. May be heard in committee March 18.
Location: 2/15/2022-A. PRINT
Summary: Current law, among other things, exempts from the California Environmental Quality Act specified actions by a state agency or a city, county, or city and county relating to land owned by a local government to be used for, or to provide financial assistance to, a homeless shelter constructed pursuant to these provisions, and provides that homeless shelters constructed or allowed pursuant to these shelter crisis declarations are not subject to specified laws, including the Special Occupancy Parks Act. Current law defines a "homeless shelter" as a facility with overnight sleeping accommodations, the primary purpose of which is to provide temporary shelter for the homeless that is not in existence after the declared shelter crisis. Current law provides that a temporary homeless shelter community may include supportive and self-sufficiency development services and that a homeless shelter includes a parking lot owned or leased by a city, county, or city and county specifically identified as one allowed for safe parking by homeless and unstably housed individuals. Current law repeals these provisions as of January 1, 2026. This bill would remove the repeal date from these provisions. This bill would provide that a city, county, or city and county is in a shelter crisis if the number of unsheltered homeless persons that comprises the total homeless population within the jurisdiction of the city, county, or city and county is greater, as a percentage, than the combined average of the 49 states in the United States not including California, as determined by the Department of Housing and Community Development, as specified.

AB 2233 **(Quirk-Silva D) Public Housing Loan Fund and Program: Public Housing Financing Authority.**

Status: 2/15/2022-From printer. May be heard in committee March 18.

Location: 2/15/2022-A. PRINT

Summary: Existing law establishes the California Health Facilities Financing Authority (CHFFA) for purposes of administering the California Health Facilities Financing Authority Act. Existing law authorizes, among other things, the authority to make secured or unsecured loans to, or purchase secured or unsecured loans of, any participating health institution in accordance with an agreement between the authority and the participating health institution to refinance indebtedness incurred by that participating health institution or a participating health institution that controls or manages, is controlled or managed by, is under common control or management with, or is affiliated with that participating health institution, in connection with projects undertaken or for health facilities acquired or for working capital.This bill would establish the Public Housing Loan Fund for purposes of establishing and administering, upon appropriation by the Legislature, the Public Housing Loan Program and making loans pursuant to that program. The bill would require CHFFA to administer the fund and program from January 1, 2023, to December 31, 2025, and would require the Public Housing Financing Authority (PHFA), as established on January 1, 2025, in the Treasurer's office by the bill, to administer the fund and program on and after January 1, 2026. The bill would authorize the CHFFA and PHFA to make and award loans from the fund for purposes of the program. This bill would require the CHFFA or PHFA, as applicable, to establish requirements for a local agency to be eligible to receive a loan under the program, including, but not limited to, requiring that the loan be used to cover construction costs for public housing on property owned by the local agency.

AB 2234 **(Rivas, Robert D) Planning and zoning: housing: post-entitlement phase permits.**

Status: 2/15/2022-From printer. May be heard in committee March 18.

Location: 2/15/2022-A. PRINT

Summary: (1)Existing law, the Permit Streamlining Act, which is part of the Planning and Zoning Law, requires each public agency to provide a development project applicant with a list that specifies the information that will be required from any applicant for a development project. The act requires public agencies to approve or disapprove of a development project within certain specified timeframes. Existing law requires a city, county, or special district to provide specified information, including a current schedule of fees, exactions, and affordability requirements applicable to a proposed housing development project, and an archive of impact fee nexus studies, cost of service studies, or equivalent studies, conducted by the city, county, or special district, on its internet website.This bill would require a public agency to create a list of information needed to approve or deny a post-entitlement phase permit, as defined, and to make that list available to all applicants for these permits no later than January 1, 2024. No later than January 1, 2024, the bill would require a public agency to require permits to be applied for, completed, and stored through a process on its internet website, and to accept applications and related documentation by electronic mail until that internet website is established. The bill would require the internet website or electronic mail to list the current processing status of the applicant's permit by the public agency, and would require that status to note whether it is being reviewed by the agency or action is required from the applicant. This bill contains other related provisions and other existing laws.

Position

AB 2264 **(Bloom D) Pedestrian crossing signals.**

Status: 2/17/2022-From printer. May be heard in committee March 19.

Location: 2/16/2022-A. PRINT

Summary: Under current law, a pedestrian control signal showing a "WALK" or approved "Walking Person" symbol means a pedestrian may proceed across the roadway in the direction of the signal. Under current law, a pedestrian facing a flashing "DON'T WALK" or "WAIT" or approved "Upraised Hand" symbol with a "countdown" signal, as specified, means a pedestrian may start crossing the roadway in the direction of the signal but requires the pedestrian to finish crossing prior to the display of the steady "DON'T WALK" or "WAIT" or approved "Upraised Hand" symbol, as specified. This bill would require the Department of Transportation and local authorities to update all pedestrian control signals to operate giving a pedestrian a head start between 3 to 7 seconds to enter an intersection with a corresponding circular green signal, as specified.

Position

High Watch

AB 2319 **(Bonta, Mia D) Surplus land: former military base land.**

Status: 2/17/2022-From printer. May be heard in committee March 19.

Location: 2/16/2022-A. PRINT

Summary: Current law prescribes requirements for the disposal of surplus land by a local agency. Current law defines "surplus land" for these purposes to mean land owned in fee simple by any local agency for which the local agency's governing body takes formal action declaring that the land is surplus and is not necessary for the agency's use. Existing law provides that an agency is not required to follow the requirements for disposal of surplus land for "exempt surplus land" except as provided. Current law categorizes as "exempt surplus land" surplus land that a local agency is transferring to another local, state, or federal agency for the agency's use. This bill would add to the definition of "exempt surplus land," land that is a former military base conveyed by the federal government to a local agency, is subject to certain provisions governing the Alameda Naval Air Station and the Fleet Industrial Supply Center, and meets other specified conditions. This bill contains other related provisions.

Position

High Watch

AB 2328 **(Flora R) Local ordinances: home experience sharing.**

Status: 2/17/2022-From printer. May be heard in committee March 19.

Location: 2/16/2022-A. PRINT

Summary: Current law defines "hosting platform" as a marketplace that is created for the primary purpose of facilitating the rental of a residential unit, as specified. This bill would prohibit a city or county from prohibiting or effectively prohibiting the use of property as a home experience sharing unit. The bill would define "home experience sharing unit" as a privately owned, noncommercial property or residential dwelling unit that is rented partially for a fee for a period of fewer than 18 continuous hours and that does not provide sleeping accommodations to transients. The bill would authorize a city or county to reasonably regulate home experience sharing units to protect the public's health and safety, as specified. This bill contains other related provisions.

High Watch

AB 2334 **(Wicks D) Density Bonus Law: affordability: incentives or concessions in low vehicle travel areas: parking standards: definitions.**

Status: 2/17/2022-From printer. May be heard in committee March 19.

Location: 2/16/2022-A. PRINT

Summary: Current law, referred to as the Density Bonus Law, requires a city or county to provide a developer that proposes a housing development within the city or county with a density bonus and other incentives or concessions, as specified, if the developer agrees to construct specified percentages of units for lower income, very low income, or senior citizen housing, among other things, and meets other requirements. Existing law requires that an applicant agree to, and the city, county, or city and county ensure, the continued affordability of all very low and low-income rental units that qualified the applicant for a density bonus, as provided. This bill, with respect to the affordability requirements applicable to 100% lower income developments, would instead require the rent for the remaining units in the development be set at an amount consistent with the maximum rent levels for lower income households, as those rents and incomes are determined by CTCAC. The bill, with regard to the enforcement of equity sharing agreements for for-sale units, would also permit the local government to defer to the recapture provisions of the public funding source. The bill would also make a technical change to the Density Bonus Law by deleting duplicative provisions relating to for-sale units subject to the above-described provisions.

Position

High Watch

AB 2339 **(Bloom D) Housing element: emergency shelters: regional housing need.**

Status: 2/17/2022-From printer. May be heard in committee March 19.

Location: 2/16/2022-A. PRINT

Summary: The Planning and Zoning Law requires the legislative body of each county and city to adopt a comprehensive, long-term general plan for the physical development of the county or city that includes a housing element. Current law requires that the housing element identify adequate sites for housing, including rental housing, factory-built housing, mobilehomes, and emergency shelters, and make adequate provision for the existing and projected needs of all economic segments of a community. Current law also requires that the housing element include an analysis of potential and actual governmental constraints upon the maintenance, improvement, or development of housing for all income levels. This bill would revise the requirements of the housing

element, as described above, in connection with zoning designations that allow residential use, including mixed use, where emergency shelters are allowed as a permitted use without a conditional use or other discretionary permit. The bill would prohibit a city or county from establishing overlay districts to comply with these provisions.

Status: 2/19/2022-From printer. May be heard in committee March 21.

Location: 2/18/2022-A. PRINT

Summary: The Ralph M. Brown Act requires the meetings of the legislative body of a local agency to be conducted openly and publicly, with specified exceptions. Current law makes agendas of public meetings and other writings distributed to the members of the governing board disclosable public records, with certain exceptions. Current law requires a local agency to make those writings distributed to the members of the governing board available for public inspection at a public office or location that the agency designates. This bill would instead require a local agency to make those writings distributed to the members of the governing board available for public inspection at a public office or location that the agency designates or post the writings on the local agency's internet website in a position and manner that makes it clear that the writing relates to an agenda item for an upcoming meeting.

AB 2668 **(Grayson D) Planning and zoning: housing: streamlined, ministerial approval.**

Status: 2/19/2022-From printer. May be heard in committee March 21.

Location: 2/18/2022-A. PRINT

Summary: Would prohibit a local government from determining that a development, including an application for a modification, is in conflict with the objective planning standards on the basis that application materials are not included, if the application contains sufficient information that would allow a reasonable person to conclude that the development is consistent with the objective planning standards. This bill contains other existing laws.

Position

AB 2719 **(Fong R) California Environmental Quality Act: exemptions: highway safety improvement projects.**

Status: 2/19/2022-From printer. May be heard in committee March 21.

Location: 2/18/2022-A. PRINT

Summary: CEQA includes exemptions from its environmental review requirements for numerous categories of projects, including, among others, emergency projects undertaken, carried out, or approved by a public agency to maintain, repair, or restore an existing highway under specified circumstances. This bill would further exempt from the requirements of CEQA highway safety improvement projects, as defined, undertaken by the Department of Transportation or a local agency.

Position

ACA 1 **(Aguiar-Curry D) Local government financing: affordable housing and public infrastructure: voter approval.**

Status: 4/22/2021-Referred to Coms. on L. GOV. and APPR.

Location: 4/22/2021-A. L. GOV.

Summary: The California Constitution prohibits the ad valorem tax rate on real property from

exceeding 1% of the full cash value of the property, subject to certain exceptions. This measure would create an additional exception to the 1% limit that would authorize a city, county, city and county, or special district to levy an ad valorem tax to service bonded indebtedness incurred to fund the construction, reconstruction, rehabilitation, or replacement of public infrastructure, affordable housing, or permanent supportive housing, or the acquisition or lease of real property for those purposes, if the proposition proposing that tax is approved by 55% of the voters of the city, county, or city and county, as applicable, and the proposition includes specified accountability requirements.

ACA 7 **(Muratsuchi D) Local government: police power: municipal affairs: land use and zoning.**
Status: 3/17/2021-From printer. May be heard in committee April 16.
Location: 3/16/2021-A. PRINT
Summary: Would provide that a county or city ordinance or regulation enacted under the police power that regulates the zoning or use of land within the boundaries of the county or city would prevail over conflicting general laws, with specified exceptions. The measure, in the event of the conflict with a state statute, would also specify that a city charter provision, or an ordinance or regulation adopted pursuant to a city charter, that regulates the zoning or use of land within the boundaries of the city is deemed to address a municipal affair and prevails over a conflicting state statute, except that the measure would provide that a court may determine that a city charter provision, ordinance, or regulation addresses either a matter of statewide concern or a municipal affair if it conflicts with specified state statutes. The measure would make findings in this regard and provide that its provisions are severable.

SB 849 **(Umberg D) Surplus land.**
Status: 2/7/2022-Art. IV. Sec. 8(a) of the Constitution dispensed with. (Ayes 31. Noes 6.) Joint Rule 55 suspended. (Ayes 31. Noes 6.)
Location: 1/14/2022-S. RLS.
Summary: Current law prescribes requirements for the disposal of surplus land by a local agency. Current law exempts from these requirements exempt surplus land, as defined.This bill would make nonsubstantive changes to those provisions.

Position
High Watch

SB 852 **(Dodd D) Climate resilience districts: formation: funding mechanisms.**
Status: 2/7/2022-Art. IV. Sec. 8(a) of the Constitution dispensed with. (Ayes 31. Noes 6.) Joint Rule 55 suspended. (Ayes 31. Noes 6.)
Location: 1/26/2022-S. GOV. & F.
Summary: Current law authorizes certain local agencies to form a community revitalization authority (authority) within a community revitalization and investment area, as defined, to carry out provisions of the Community Redevelopment Law in that area for purposes related to, among other things, infrastructure, affordable housing, and economic revitalization. Existing law provides for the financing of these activities by, among other things, the issuance of bonds serviced by

property tax increment revenues, and requires the authority to adopt a community revitalization and investment plan for the community revitalization and investment area that includes elements describing and governing revitalization activities. This bill would authorize a city, county, city and county, special district, or a combination of any of those entities to form a climate resilience district for the purposes of raising and allocating funding for eligible projects and the operating expenses of eligible projects. The bill would define "eligible project" for these purposes.

Position
High Watch

SB 897 **(Wieckowski D) Accessory dwelling units: junior accessory dwelling units.**
Status: 2/23/2022-Set for hearing March 24.
Location: 2/9/2022-S. HOUSING
Summary: Thee Planning and Zoning Law authorizes a local agency, by ordinance or ministerial approval, to provide for the creation of accessory dwelling units in areas zoned for residential use, as specified. Current law provides that an accessory dwelling unit may either be an attached or detached residential dwelling unit, and prescribes the minimum and maximum unit size requirements, height limitations, and setback requirements that a local agency may establish, including a 16-foot height limitation and a 4-foot side and rear setback requirement.This bill would increase the maximum height limitation that may be imposed by a local agency on an accessory dwelling unit to 25 feet.

Position
High Watch

SB 948 **(Becker D) Housing finance programs: development reserves.**
Status: 2/16/2022-Referred to Com. on HOUSING.
Location: 2/16/2022-S. HOUSING
Summary: Current law establishes various programs and funding sources administered by the Department of Housing and Community Development to enable the development of affordable housing, including the Building Homes and Jobs Act, the Multifamily Housing Program, the Housing for a Healthy California Program, and the Veterans Housing and Homeless Prevention Act of 2014. Under current law governing the State Community Development Block Grant Program, the department is required to distribute funds made available under the program in order to provide decent housing, a suitable living environment, and expand economic opportunities, consistent with federal requirements. Existing federal law also establishes the HOME Investment Partnership Program to, among other things, expand the supply of affordable housing. Existing law designates the department as the state agency responsible for administering the HOME Investment Partnership Act. This bill would prohibit the department from requiring a project-specific transition reserve, as defined, for any unit subject to a qualified project rental or operating subsidy. This bill would create the Pooled Transition Reserve Fund and would continuously appropriate moneys in that fund to the department for the purpose of maintaining a pooled transition reserve to mitigate the impacts on tenant rents from the loss or exhaustion of rental or operating subsidies. This bill would prescribe the sources from which the fund may receive moneys.

Position
High Watch

SB 1100 **(Cortese D) Open meetings: orderly conduct.**
Status: 2/23/2022-Referred to Coms. on GOV. & F. and JUD.
Location: 2/23/2022-S. GOV. & F.
Summary: Would authorize the members of the legislative body conducting a meeting to remove an individual for willfully interrupting the meeting. The bill, except as provided, would require removal to be preceded by a warning, either by the presiding member of the legislative body or a law enforcement officer, that the individual is disrupting the proceedings and a request that the individual curtail their disruptive behavior or be subject to removal. The bill would similarly require a warning before clearing a meeting room for willful interruptions by a group or groups. The bill would define “willfully interrupting” to mean intentionally engaging in behavior during a meeting of a legislative body that substantially impairs or renders infeasible the orderly conduct of the meeting in accordance with law. The term would include failure to comply with a reasonable regulation adopted in accordance with existing law after a warning and request in accordance with the bill, as applicable. By establishing new requirements for local legislative bodies, this bill would impose a state-mandated program.

Position
High Watch

SB 1117 **(Becker D) General plans: environmental justice element.**

Status: 2/23/2022-Referred to Coms. on GOV. & F. and E.Q.

Location: 2/23/2022-S. GOV. & F.

Summary: Existing law, the Planning and Zoning Law, requires the legislative body of a city or county to adopt a comprehensive general plan that includes various elements, including an environmental justice element. Existing law requires a city, county, or city and county to adopt or review the environmental justice element, or the environmental justice goals, policies, and objectives in other elements, upon the adoption or next revision of 2 or more elements concurrently on or after January 1, 2018.This bill would instead require a city, county, or city and county to adopt or review the environmental justice element, as described above, upon the adoption or next revision of one or more elements. By requiring a city, county, or city and county to adopt or review the environmental justice element upon the next revision, as specified, the bill would impose a state-mandated local program. This bill contains other related provisions and other existing laws.

Position

High Watch

SB 1194 **(Allen D) Public restrooms: building standards.**

Status: 2/18/2022-From printer.

Location: 2/17/2022-S. RLS.

Summary: This bill would authorize a city, county, or city and county to require, by ordinance or resolution, that public restrooms constructed within its jurisdiction comply with specified requirements instead of complying with the plumbing standards set forth in the California Building Standards Code. This bill would set bathroom requirements, including, among others, that the occupancy load for each sex be determined by dividing the total occupancy 1/2 , that single-user toilets and bathing rooms, including family or assisted-use toilet rooms and bathing rooms, be identified for use by either sex, that separate facilities be provided for each sex where plumbing fixtures are required, and that separate facilities not be required in specified circumstances.

Position

High Watch

SB 1252 **(Committee on Housing) Housing.**

Status: 2/18/2022-From printer.

Location: 2/17/2022-S. RLS.

Summary: Current law authorizes a city or county that created a subsequently dissolved redevelopment agency to elect to retain the housing assets and functions previously performed by the agency, which entity is referred to as a housing successor. Current law requires that if all or any portion of a redevelopment project was developed with low- or moderate-income housing units and those units were developed with any agency assistance or pursuant to specified provisions, the agency or its successor shall require, by contract, that the housing be made available for rent or purchase to the persons and families of low or moderate income displaced by the redevelopment project and to persons of low or moderate income who are descendants of the person displaced by the redevelopment project and who, at the time of displacement, were not living in the household or had not yet been born, as specified. This bill would additionally require that the housing be made available to those persons and families described above if they meet the income eligibility and other requirements for that housing, and would make other conforming changes.

Position

High Watch

SB 1292 **(Stern D) Accessory dwelling units: setbacks.**

Status: 2/22/2022-From printer.

Location: 2/18/2022-S. RLS.

Summary: The Planning and Zoning Law, among other things, provides for the creation of accessory dwelling units by local ordinance, or, if a local agency has not adopted an ordinance, by ministerial approval, in accordance with specified standards and conditions. Current law prohibits a local agency's accessory dwelling unit ordinance from imposing a setback requirement of more than 4 feet from the side and rear lot lines for an accessory dwelling unit that is not converted from an existing structure or a new structure constructed in the same location and to the same dimensions as an existing structure. This bill would remove the above-described prohibition on a local agency's accessory dwelling unit ordinance, and would instead provide that the rear and side yard setback requirements for accessory dwelling units may be set by the local agency. The bill would authorize an accessory dwelling unit applicant to submit a request to the local agency for an alternative rear and side yard setback requirement if the local agency's setback requirements make the building of

the accessory dwelling unit infeasible. The bill would prohibit any rear and side yard setback requirements established pursuant to these provisions from being greater than those in effect as of January 1, 2020. The bill would specify that if the local agency did not have an accessory dwelling unit ordinance as of January 1, 2020, the applicable rear and side yard setback requirement is 4 feet. This bill contains other related provisions and other existing laws.

Position
High Watch

SB 1333 **(Bates R) Sexually violent predators.**
Status: 2/22/2022-From printer.
Location: 2/18/2022-S. RLS.
Summary: Current law provides for the civil commitment of a person who is determined to be a sexually violent predator. Current law establishes a procedure by which a person committed as a sexually violent predator may petition for conditional release and requires the court, if it makes a specified determination, to place the person on conditional release. Current law requires that a person released on conditional release pursuant to these provisions be placed in the county of domicile unless certain conditions are satisfied. This bill would also require, as a condition to placing a person in a county other than their county of domicile, the proposed designated county of placement to be provided specified evidence prior to the court ordering the person to be placed in a county other than the county of domicile, and the designated county of placement to have a meaningful opportunity to seek appellate review in its appellate court district. This bill contains other related provisions and other existing laws.

Position
High Watch

SB 1354 **(Jones R) Design-build contracting: cities, counties, and cities and counties: compliance with the federal Americans with Disabilities Act of 1990.**
Status: 2/22/2022-From printer.
Location: 2/18/2022-S. RLS.
Summary: Would authorize a city, county, or city and county to use the design-build contracting process to award contracts for constructing projects that are necessary in order to comply with the federal Americans with Disabilities Act of 1990. By expanding design-build authority to include additional projects, the bill would expand the scope of the crime of perjury, thereby imposing a state-mandated local program.

Position
High Watch

SB 1369 **(Wieckowski D) Adaptive reuse projects: by-right: funding.**
Status: 2/22/2022-From printer.
Location: 2/18/2022-S. RLS.
Summary: The California Environmental Quality Act (CEQA) requires a lead agency, as defined, to prepare, or cause to be prepared, and certify the completion of, an environmental impact report on a project that it proposes to carry out or approve that may have a significant effect on the environment or to adopt a negative declaration if it finds that the project will not have that effect. CEQA does not apply to the approval of ministerial projects. This bill would make an adaptive reuse project a use by right in all areas regardless of zoning. The bill would define "adaptive reuse project" to mean any commercial, public, industrial, or office building or structure that has 25-percent occupancy or less, which is converted into a housing development project.

Position
High Watch

SB 1373 **(Kamlager D) Surplus land disposal.**
Status: 2/22/2022-From printer.
Location: 2/18/2022-S. RLS.
Summary: Current law prescribes requirements for the disposal of surplus land by a local agency, as defined. Current law provides that certain dispositions of real property by local agencies are subject to surplus land disposal procedures as they existed on December 31, 2019, without regard to specified amendments that took effect on January 1, 2020, if those dispositions comply with specified requirements and the disposition is completed not later than December 31, 2022. Current law extends the date that the disposition must be completed by to December 31, 2024, for specified properties, including properties related to the Metro North Hollywood Joint Development Project. Current law further extends the dates by which the disposition of property must be completed, as

specified. This bill extend the date by which the disposition of property must be completed to December 31, 2024, if the property is located in a local agency with a population of over 2,000,000 persons and the local agency has either an option agreement duly authorized by the local agency's governing body to purchase the property from the former redevelopment agency, or an exclusive negotiation agreement with a private entity to develop the subject property for economic development or housing purposes.

Position
High Watch

SB 1464 **(Pan D) Law enforcement: public health orders.**
Status: 2/22/2022-From printer.
Location: 2/18/2022-S. RLS.
Summary: Current law requires all sheriffs to execute all lawful orders of a department in their counties. Current law authorizes each sheriff to enforce all orders of the State Department of Public Health or of the local health officer issued for the purpose of preventing the spread of any contagious, infectious, or communicable disease. Current law authorizes each peace officer of every political subdivision of the county to enforce within the area subject to their jurisdiction all orders of the State Department of Public Health or of the local health officer issued for the purpose of preventing the spread of any contagious, infectious, or communicable disease. This bill would instead require those sheriffs and peace officers to enforce those orders.

Position
High Watch

SCA 2 **(Allen D) Public housing projects.**
Status: 1/26/2022-Read. Adopted. (Ayes 37. Noes 0.) Ordered to the Assembly. In Assembly. Read first time. Held at Desk.
Location: 1/26/2022-A. DESK
Summary: The California Constitution prohibits the development, construction, or acquisition of a low-rent housing project, as defined, in any manner by any state public body until a majority of the qualified electors of the city, town, or county in which the development, construction, or acquisition of the low-rent housing project is proposed approve the project by voting in favor at an election, as specified. This measure would repeal these provisions.

Position
High Watch

SCA 9 **(Gonzalez D) Personal rights: right to housing.**
Status: 2/22/2022-From printer. May be acted upon on or after March 21.
Location: 2/18/2022-S. RLS.
Summary: Would declare that the fundamental human right to housing exists in this state. The measure would specify that it is the shared obligation of state and local jurisdictions to respect, protect, and fulfill this right through progressively implemented measures, consistent with available resources, within an aggressive but reasonable timeframe.

CITY OF ONTARIO *Agenda Report* **March 1, 2022**	**SECTION:** **PUBLIC HEARINGS**
Department: Planning Prepared By: Thomas Grahn Staff Member Presenting: Scott Murphy, Executive Director Community Development Reviewed By: Kimberly Ruddins, Charles Mercier, Rudy Zeledon Approved By:	Submitted To: Council/OHA Approved: _____ Continued To: _____ Denied: _____ Item No: 11

SUBJECT: **A PUBLIC HEARING TO CONSIDER: (1) A GENERAL PLAN AMENDMENT (FILE NO. PGPA21-004) FOR THE HOUSING ELEMENT UPDATE TO THE POLICY PLAN (GENERAL PLAN) COMPONENT OF THE ONTARIO PLAN, ADDRESSING STATE MANDATES AND THE SIXTH CYCLE REGIONAL HOUSING NEEDS ALLOCATION (RHNA) AND TO MODIFY THE POLICY PLAN LAND USE PLAN (EXHIBIT LU-01) TO ESTABLISH AN AFFORDABLE HOUSING OVERLAY; (2) A ZONE CHANGE (FILE NO. PZC21-002) MODIFYING THE OFFICIAL ZONING MAP TO ESTABLISH AN "AH" (AFFORDABLE HOUSING) OVERLAY ZONING DISTRICT; AND, (3) A DEVELOPMENT CODE AMENDMENT (FILE NO. PDCA21-001) REVISING SECTION 6.01.035 FOR THE PURPOSE OF ADDING PROVISIONS TO ESTABLISH AN "AH" (AFFORDABLE HOUSING) OVERLAY DISTRICT.**

RECOMMENDATION: That the City Council consider the following:

A. The adoption of a Resolution approving the use of an Addendum to The Ontario Plan Environmental Impact Report (State Clearinghouse No. 2008101140);
B. The adoption of a Resolution approving the General Plan Amendment, File No. PGPA21-004, for the Housing Element Update to the Policy Plan component of The Ontario Plan, addressing State mandates and the Sixth Cycle Regional Housing Needs Allocation (RHNA) and to modify the Policy Plan Land Use Plan (Exhibit LU-01), establishing the Affordable Housing Overlay;
C. The introduction and waiving of further reading of an Ordinance approving the Zone Change, File No. PZC21-002, revising the Zoning Map to establish the "AH" (Affordable Housing) Overlay zoning district; and
D. The introduction and waiving of further reading of an Ordinance approving the Development Code Amendment, File No. PDCA21-001, adding provision to establish the "AH" (Affordable Housing) Overlay zoning district.

THE FOLLOWING COUNCIL GOALS ARE BEING ACHIEVED:
Invest in the Growth and Evolution of the City's Economy

Maintain the Current High Level of Public Safety
Operate in a Businesslike Manner
Pursue City's Goals and Objectives by Working with Other Governmental Agencies
Focus Resources in Ontario's Commercial and Residential Neighborhoods

FISCAL IMPACT: The proposed General Plan Amendment, Zone Change, and Development Code Amendment will have no direct fiscal impact to the City.

BACKGROUND & ANALYSIS: The proposed project is an update to the Housing Element and includes related applications to establish and implement an Affordable Housing Overlay to support the necessary residential densities to achieve the City's Regional Housing Needs Assessment ("RHNA").

GENERAL PLAN AMENDMENT (FILE NO. PGPA21-004) — This General Plan Amendment includes the Housing Element update to the Policy Plan (General Plan) component of The Ontario Plan ("TOP"), addressing State mandates, the 6th Cycle RHNA, and a modification to the Policy Plan Land Use Plan, Exhibit LU-01, ("TOP Map LU-01") to establish an Affordable Housing Overlay.

HOUSING ELEMENT UPDATE — The Housing Element is one of the seven mandated elements of the General Plan, which each city and county in the State is required to periodically adopt (generally every eight years). The Housing Element is required to adequately plan to meet the existing and projected housing needs of all economic segments of the community. This Housing Element Cycle (6th Cycle) covers the RHNA period from October 15, 2021 through October 15, 2029. The Housing Element is the only element of the general plan reviewed and certified by the State to ensure compliance with State law.

PUBLIC PARTICIPATION — The California Government Code requires that local governments make a diligent effort to solicit public participation from all economic segments of the community in the development of the draft Housing Element. The following provides a general timeline describing major milestones in preparing Ontario's draft 2021–2029 Housing Element Update:

- June 14, 2021 – Property Owner Open House – Staff hosted a virtual open house to provide an overview of the TOP 2050 Project and land use designation changes on specific properties as part of the City's housing strategy to fulfill the 6th RHNA Cycle site inventory obligation.
- June 28, 2021 – Community Workshop #1 – Staff hosted a virtual workshop to present the TOP 2050 update, including the City's housing strategy to receive comments, and answer questions from the public.
- July 29, 2021 – Community Workshop #2 – Staff hosted a virtual workshop to facilitate a guided discussion of the environmental justice, community health, and resiliency policies, and share the City's preferred land use plan and housing strategy. The intent of Community Workshop #2 was to further inform the community of policy updates and gather feedback regarding the preferred land use plan.
- August 31, 2021 – In compliance with Senate Bill 18 notification requirements (Tribal Consultation), the City mailed a separate project notice to 16 local tribes identified by the Native American Heritage Commission (NAHC). No consultation requests were received

during the requisite 90-day response period.

- October 14, 2021 – City staff posted the Ontario Housing Element 2021-2029 – Public Review Draft on Ontarioplan.org/TOP2050 and submitted the draft to California Department of Housing and Community Development ("HCD") for a 60-day review.
- December 20, 2021 – The Planning Commission held a duly noticed public hearing on the proposed Housing Element and adopted Resolution Nos. PC21-093, PC21-094, PC21-095, and PC21-096, recommending that City Council approve the Addendum to the Ontario Plan EIR, the General Plan Amendment, the Zone Change, and the Development Code Amendment. No members of the public attended the meeting and Staff did not receive any written or verbal statements. A copy of the Planning Commission staff report, meeting minutes and Resolution Nos. PC21-093, PC21-094, PC21-095, and PC21-096 are included (see Attachment A) .

REGIONAL HOUSING NEEDS ASSESSMENT — The Southern California Association of Governments ("SCAG") is responsible for oversight of the RHNA process for much of Southern California. For the 2021–2029 RHNA planning period, the City has been allocated 20,854 housing units to accommodate the estimated growth needed at various income levels. As required by California law, the Housing Element must identify the City's ability to accommodate this estimated growth through available sites and appropriate zoning. Ontario's 6th RHNA Cycle allocation includes the following:

City of Ontario 6th Cycle RHNA Allocation by Income Category

Income Category (Percent of Area Median Income "AMI")	RHNA Allocation
Very Low (31% to 50%)	5,640
Low (51% to 80%)	3,286
Moderate (81% to 120%)	3,329
Above Moderate (121% or more)	8,599
Total	**20,854**

Source: SCAG 2021

The proposed 2021–2029 Housing Element must demonstrate the City's ability to accommodate the RHNA housing allocation either through production or the availability of properly zoned land that can accommodate additional growth. If adequate sites cannot be identified through existing zoning, the City is required to rezone sites that can accommodate the remaining need at a minimum density of 30 dwelling units per acre, the default density set by the State Department of Housing and Community Development ("HCD"). The City is not required to build residential units in order to meet its RHNA allocation, only to identify potential sites and create the framework allowing the market the opportunity to develop these units.

The proposed 2021–2029 Housing Element Update explores opportunities to accommodate the RHNA through current production, entitled units, and the availability of properly zoned land that can accommodate additional growth. The proposed 2021–2029 Housing Element Update will further identify and address potential and actual governmental and non-governmental constraints on the development of housing for all income levels.

STATE MANDATES INCLUDED WITHIN THE HOUSING ELEMENT UPDATE — The following provides a brief summary of recently adopted State laws that went into effect and were included in the 2021–2029 Housing Element Update. Their overarching premise is to increase the housing supply within the State by permitting more housing in more places and in greater volume.

- SB 330 Housing Crisis Act: Prohibits the downzoning of any residential property without a corresponding increase in another location. Reduces the length of the entitlement process and provides greater certainty on development standards and fees. The offset upzoning must take place concurrently and provide no net loss in residential capacity.
- SB 35 Streamlined Approval for Housing Projects: Expedites the construction of affordable housing in places where the permitting or construction of housing is slower than compared to the RHNA. If housing production of above moderate RHNA is below the annual target, projects with 10 percent low-income housing are eligible for streamlining. If housing production of low-income RHNA is below the annual target, projects with 50 percent low-income housing are eligible for streamlining.
- SB 166 No Net Loss Zoning: Cities must build or maintain capacity for 100 percent of their RHNA requirement throughout the entire planning period.
- AB 1397 Non-Vacant Sites: Provides for increased scrutiny on the development potential for underutilized sites included in the RHNA land inventory.
- AB 72 Increased HCD Enforcement: HCD may revoke certification and report any violations to the Attorney General on a jurisdictions failure to comply.
- AB 686 Housing Discrimination (Affirmatively Furthering Fair Housing ("AFFH"): Jurisdictions must facilitate deliberate action to address, combat, and relieve disparities resulting from past patterns of segregation to foster more inclusive communities.
- AB 167 Housing Accountability Act: Prohibits reducing density, disapproving, or conditioning approvals of a lower/moderate income housing development project or emergency shelter if they comply with zoning and objective development standards.

2021-2029 ONTARIO HOUSING ELEMENT CONTENT — California Housing Element law prescribes the scope and content of the Housing Element. Pursuant to Section 65583 of the California Government Code, the Housing Element must contain a variety of detailed analyses, listed below.

- Analysis of demographic, social, and housing characteristics; current housing needs; and future housing needs due to population and employment growth and change;
- Assessment of Fair Housing ("AFH") consistent with the core elements of the analysis required by the federal Affirmatively Furthering Fair Housing (AFFH) Final Rule of July 16, 2015;
- Analysis of governmental and nongovernmental constraints that affect the development, maintenance, and improvement of housing for all income groups and people with disabilities;
- Inventory of resources available to address the City's housing needs, including available land for housing, financial resources, and administrative capacity to manage housing programs;
- Evaluation of the accomplishments of current housing programs and specific programs to address the development, improvement, and conservation of housing to meet current and

future needs;

- Documentation of public outreach for the Housing Element and the involvement of the public in shaping housing policies and programs for the 2021–2029 Housing Element; and
- Housing goals, policies, and programs to address the production, maintenance, and improvement of housing for all economic segments of the community commensurate with its needs.

The Housing Element encompasses all seven topical areas mentioned here, provides a brief synopsis of issues, and then follows with a complete set of goals, policies, and programs to be implemented over the planning period. The City also prepared a web format for ease of public distribution and use by policymakers and housing providers in implementing programs.

The Housing Element is prepared to be consistent with several policy and program plans mandated by the State. Most importantly, State law requires SCAG to determine the amount of housing needed within its six-county region and allocate a share of the regional housing need to each community. Housing Elements are required to incorporate the estimates of housing need reflected in regional housing plans. The Housing Element is also consistent with the City's Consolidated Plan.

STATE DEPARTMENT OF HOUSING AND COMMUNITY DEVELOPMENT ("HCD") REVIEW — On December 13, 2021, HCD issued a letter (Attachment B) finding that while the draft Housing Element addressed many statuary requirements, revisions will be necessary to comply with State Housing Element law. HCD's review comments focused on the City's Assessment of Fair Housing, the Available Land Inventory, and various Housing Programs. The revised draft 2021–2029 Housing Element Update (Attachment G) is provided in a "Track Changes" version with the original text and additional and/or deleted text identified. State law requires the City Council to consider HCD's comments and make appropriate findings as part of the Housing Element adoption process. Following City Council adoption, the Housing Element will be submitted to HCD for additional review. HCD has 90 days to complete its review of the adopted Housing Element.

AFFORDABLE HOUSING OVERLAY — The proposed General Plan Amendment also proposes to modify the Policy Plan Land Use Plan ("TOP Land Use Map LU-01") to establish an Affordable Housing Overlay. The purpose of the Affordable Housing Overlay is to facilitate housing opportunities within the City through the implementation of the Housing Element. The Affordable Housing Overlay will only apply to those properties identified in Attachment C, Exhibits A – Proposed AH, Affordable Housing Overlay and Exhibit B – Revised LU-01 with AH, Affordable Housing Overlay; and those parcels listed in the Resolution of Approval for PGPA21-004, Attachment A: Housing Element Update, Appendix B: Housing Element Sites Inventory (Parcel List).

As shown in Attachment C, Exhibit B – Revised LU-01 with AH, Affordable Housing Overlay , the Affordable Housing Overlay will apply to those identified parcels generally located: (1) south of Riverside Drive, (2) along East Holt Boulevard between the Cucamonga Creek Channel and Corona Avenue, and (3) areas designated as MU-2 at the northeast corner of West Holt Boulevard and Mountain Avenue. The Affordable Housing Overlay is being established to ensure that there are adequate sites at sufficient residential densities to meet the City's RHNA housing obligation throughout the planning period.

ZONE CHANGE (PZC21-002) — The proposed Zone Change will modify the Zoning Map to establish an Affordable Housing Overlay. The purpose of the Affordable Housing Overlay is to facilitate housing opportunities within the City through the implementation of the Housing Element. The Affordable Housing Overlay will only apply to those properties identified in (Attachment C) Exhibits A – Proposed AH, Affordable Housing Overlay and Exhibit C – Revised Zoning Map with AH, Affordable Housing Overlay; and those parcels listed in the Resolution of Approval for PGPA21-004, Attachment A: Housing Element Update, Appendix B: Housing Element Sites Inventory (Parcel List).

As shown in Attachment C, Exhibit C – Revised Zoning Map with AH, Affordable Housing Overlay , the Affordable Housing Overlay will apply to those identified parcels generally located: (1) south of Riverside Drive, (2) along East Holt Boulevard, between the Cucamonga Creek Channel and Corona Avenue, and (3) areas designated as MU-2 at the northeast corner of West Holt Boulevard and Mountain Avenue. The Affordable Housing Overlay is being established to ensure that there are adequate sites at sufficient residential densities to meet the City's RHNA housing obligation throughout the planning period.

DEVELOPMENT CODE AMENDMENT (PDCA21-001) — The Development Code (Ontario Municipal Code Title 9) provides the legislative framework for the implementation of The Ontario Plan, which states long-term principles, goals, and policies for guiding the growth and development of the City in a manner that achieves Ontario's vision, and promotes and protects the public health, safety, comfort, convenience, prosperity, and welfare of its citizens. Staff has initiated an addition to the Development Code that is necessary to establish provisions of the Development Code as described below. The proposed changes, as they would appear in the Development Code, are included as Attachment C, Exhibit D: Proposed Development Code Amendment of this staff report.

The proposed Development Code Amendment will modify Section 6.01.035, by adding Subparagraph C.6 to establish an AH (Affordable Housing) Overlay District. The purpose of the AH Overlay District standards is to facilitate housing opportunities within the City through the implementation of Housing Element. The AH Overlay District will only apply to those properties identified in Attachment C, Exhibit A – Proposed AH, Affordable Housing Overlay, Exhibit B – Revised LU-01 with AH, Affordable Housing Overlay, Exhibit C – Revised Zoning Map with AH, Affordable Housing Overlay; and those parcels listed in the Resolution of Approval for PGPA21-004, Attachment A: Housing Element Update, Appendix B: Housing Element Sites Inventory (Parcel List).

Generally, the AH Overlay District will do three things:

- It removes the specific plan requirement from sites where that would otherwise be required to develop a specific plan;
- It satisfies new state requirements for sites that are part of the rezoning program by:
    - Allowing by-right development of residential projects if 20 percent of units are affordable to lower incomes.
    - Establishing a minimum density of 20 du/ac.
    - It raises the maximum density on MDR zoned sites from 25 to 30 du/ac, if 25 percent of units are affordable to lower incomes.

PLANNING COMMISSION REVIEW: On December 20, 2021, the Planning Commission conducted a

public hearing and voted (6-0) to recommend City Council approval of the Addendum to The Ontario Plan Environmental Impact Report (State Clearinghouse No. 2008101140), the General Plan Amendment, File No. PGPA21-004, the Zone Change, File No. PZC21-002 and the Development Code Amendment File No. PDCA21-001.

ENVIRONMENTAL REVIEW: The environmental impacts of this project were analyzed in the Addendum to The Ontario Plan Environmental Impact Report (State Clearinghouse No. 2008101140), certified by the City Council on January 27, 2010, and included as Attachment E to this report. This Application introduces no new significant environmental impacts. All previously adopted mitigation measures shall be a condition of project approval, as applicable, and are incorporated herein by this reference.

Exhibit A – Proposed AH, Affordable Housing Overlay Locations

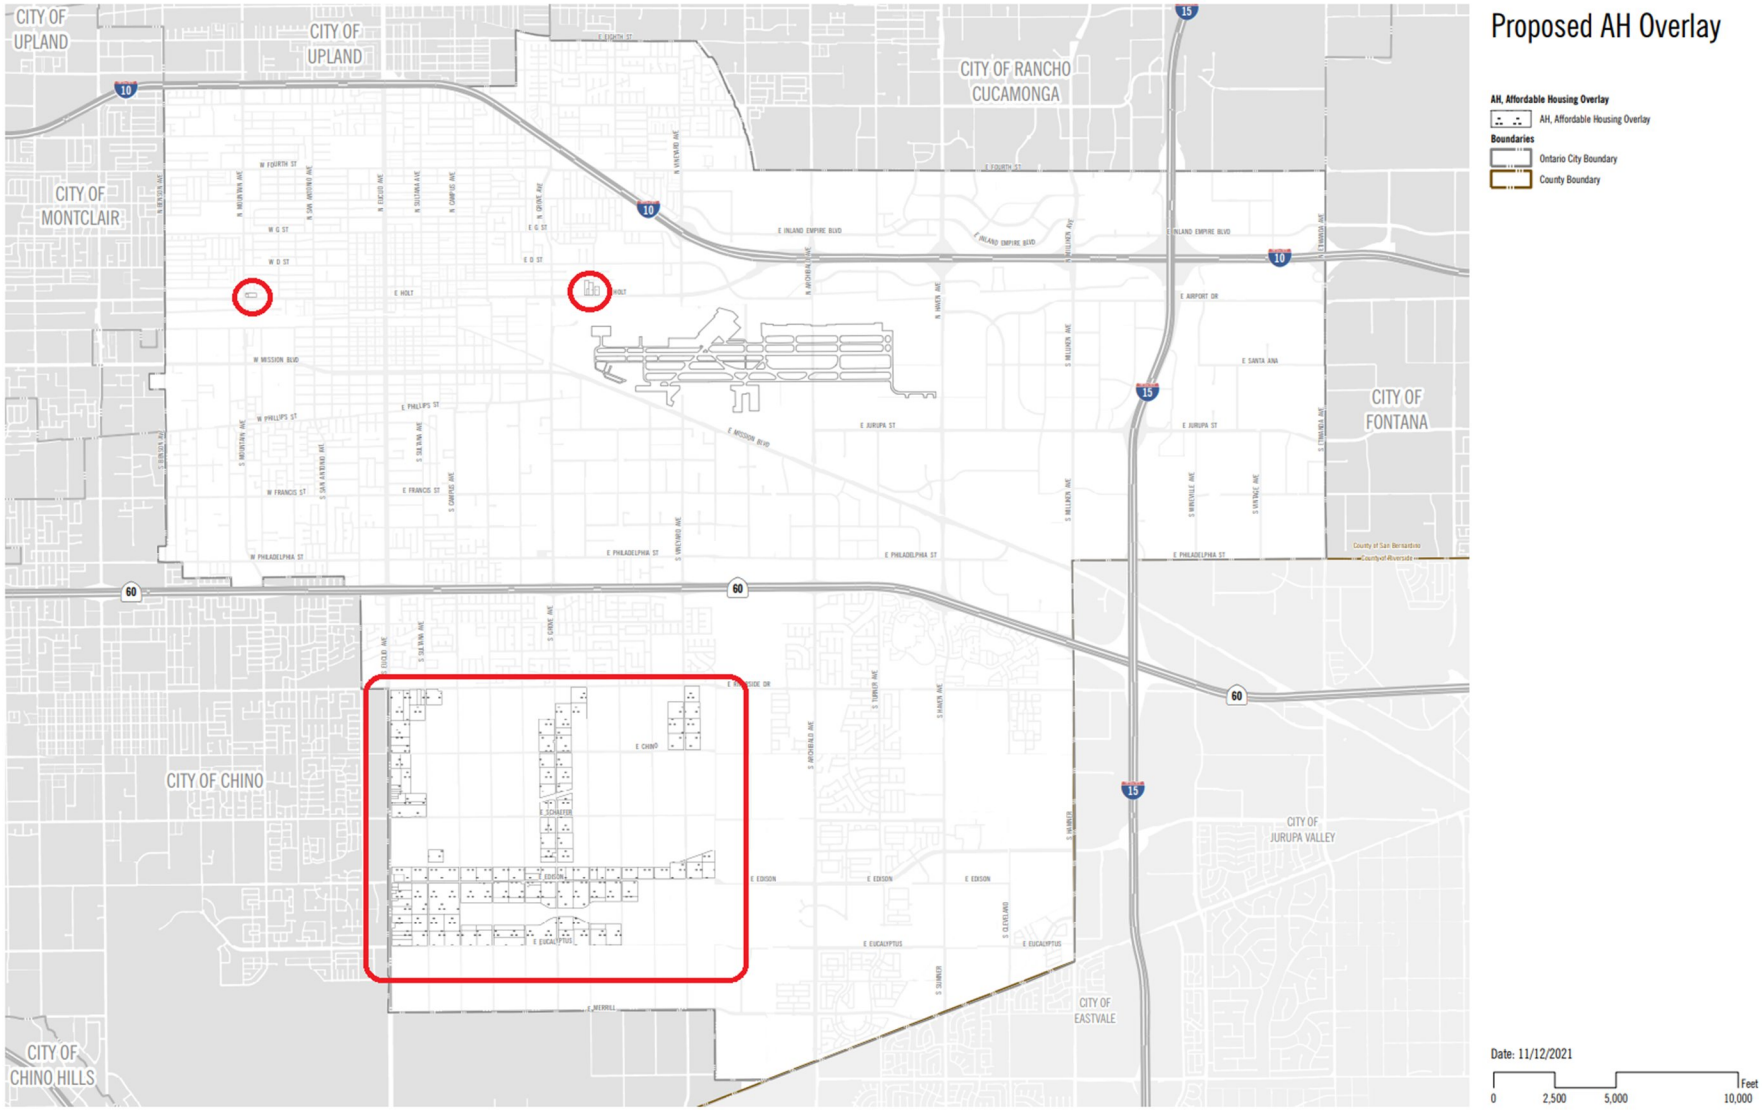

Exhibit B – Revised LU-01 with AH, Affordable Housing Overlay

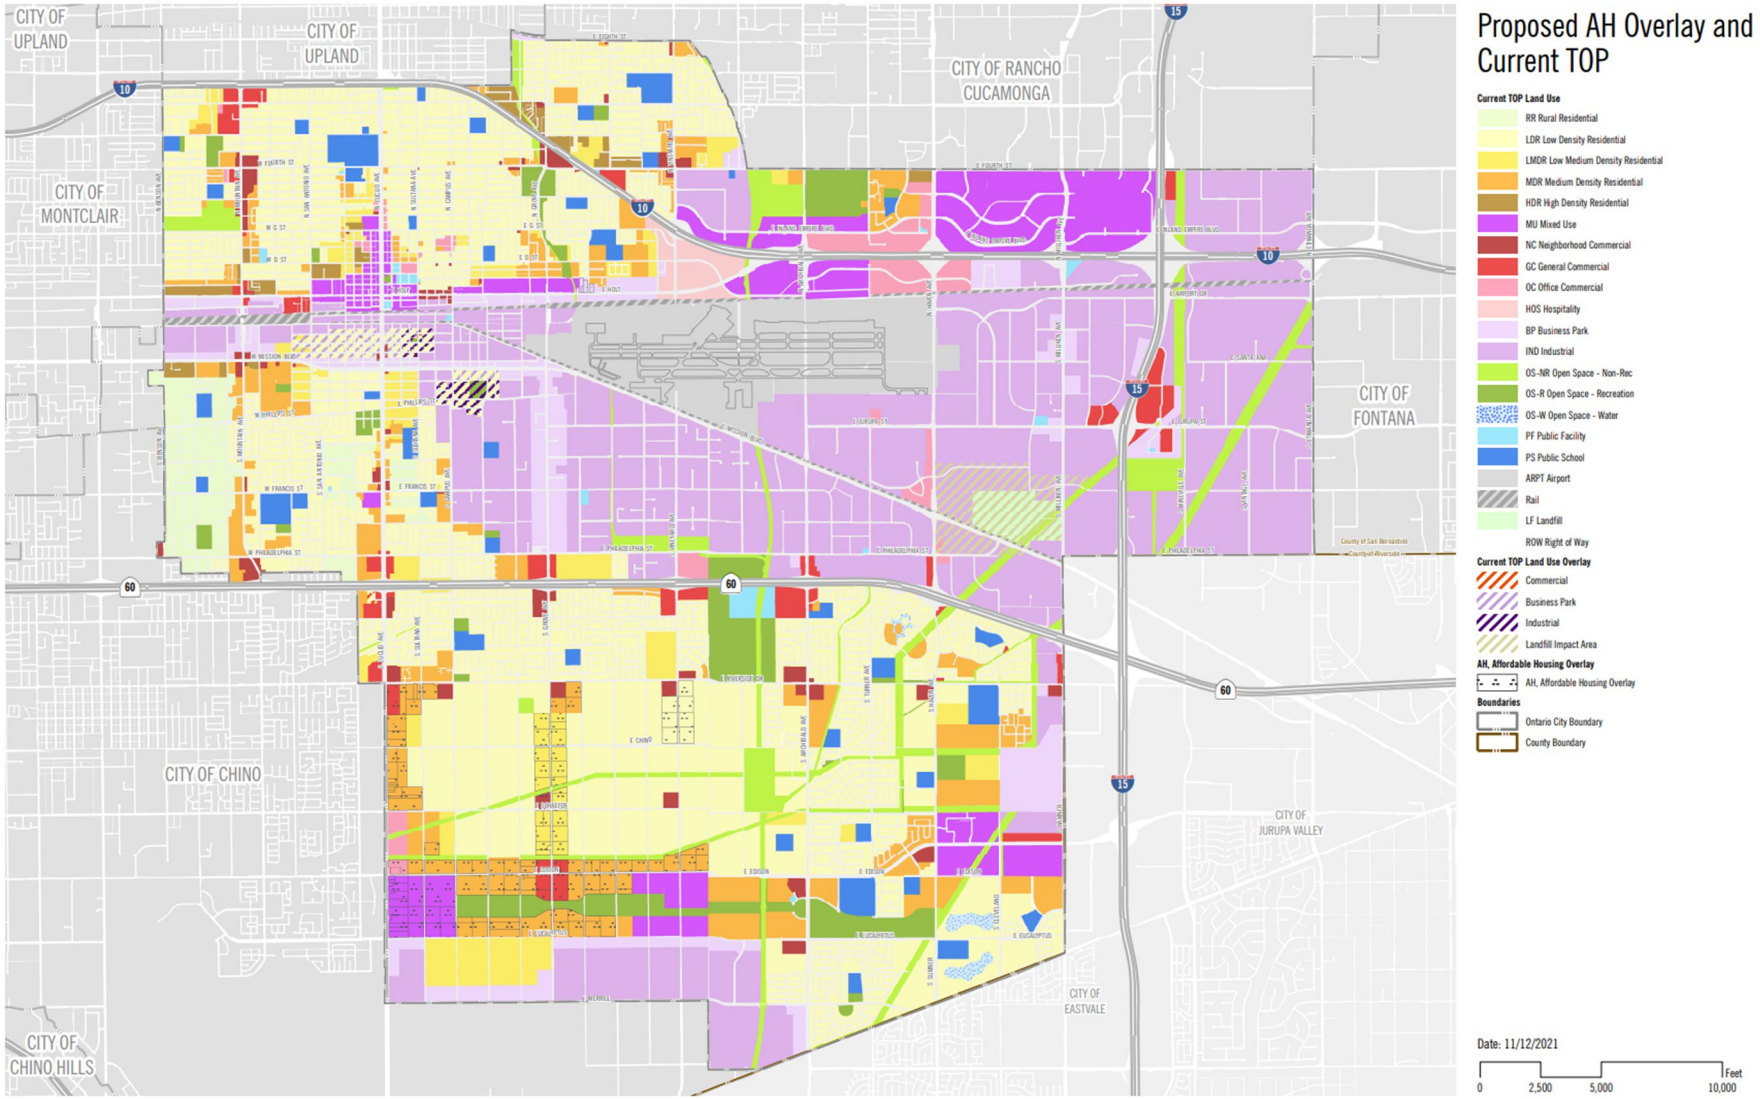

Exhibit C – Revised Zoning Map with AH, Affordable Housing Overlay

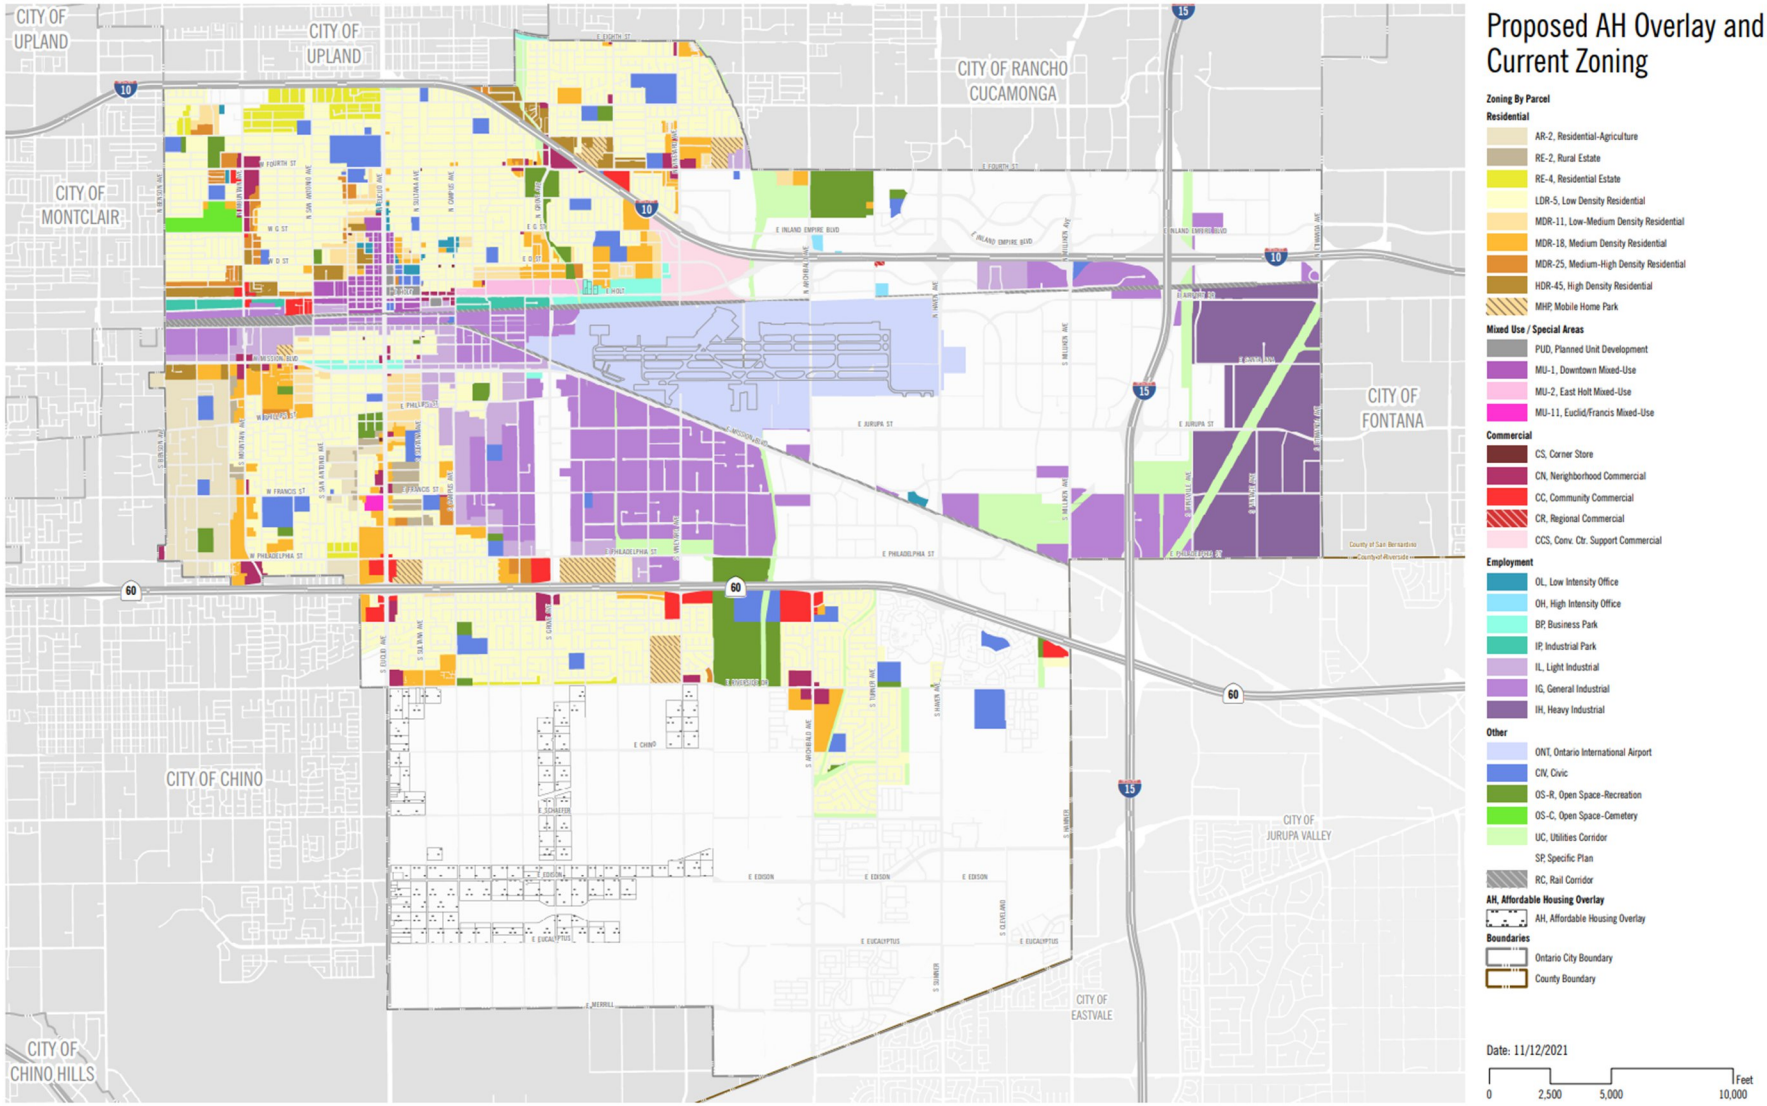

Exhibit D – Proposed Development Code Amendment
Draft DCA Section 6.01.035 (6. AH (Affordable Housing) Overlay District)

(Document follows this page)

Nonconforming Nonresidential Structure) of this Development Code and shall be developed consistent with the standards of the CC zoning district.

(3) *New Residential Development.* New residential development, which is proposed consistent with the Official Land Use Plan (Exhibit LU-01) of the Policy Plan component of The Ontario Plan, shall first require a zone change to the HDR-45 zoning district pursuant to Section 4.01.040 (Zone Changes) of this Development Code, and full compliance with the land use requirements, and development standards and guidelines of the HDR-45 zoning district.

(4) *Protection of ICC Overlay District Land Use and Development Rights.* All land use and development rights granted by the ICC Overlay District shall be transferable to any future owner(s) of property within the ICC Overlay District, and their assigns.

6. AH (Affordable Housing) Overlay District.

a. *Purpose.* The purpose of the AH Overlay District is to facilitate housing opportunities within the community via implementation of required rezone programs pursuant to the City's adopted Housing Element where required for compliance with State Housing Element law.

b. *Applicability.* The herein established rights and responsibilities applicable to the AH Overlay District shall apply to sites identified in the housing inventory, part of the City's Housing Element, located 1) south of Riverside Drive, 2) along East Holt Boulevard between the Cucamonga Creek Channel and Corona Avenue, and 3) areas designated as MU-2 at the northeast corner of West Holt Boulevard and Mountain Avenue.

c. *Definitions.*

(1) **Affordable Housing Project.** Affordable housing projects for the purposes of the affordable housing overlay are defined as follows:

(a) *Tier 1.* Any projects with a residential component with at least 20% of total units are designated as affordable to lower incomes via deed restriction or another mechanism to guarantee affordability for a minimum of 30 years.

(b) *Tier 2.* Any projects with a residential component with at least 25% of total units are designated as affordable to lower incomes via deed restriction or another mechanism to guarantee affordability for a minimum of 30 years.

d. *Development Standards.* The development standards applicable to proposed development in the Affordable Housing Overlay District shall be in accordance with the applicable base zone, other overlay zones, and all applicable provisions of The Development Code, unless otherwise indicated herein, or where necessary to comply with Federal and State law.

(1) **Minimum Density.** Within the AH Overlay District, all new residential development, regardless of affordability, requires a minimum density of 20 dwelling units per acre. The minimum density shall be calculated as an average over the entire project area on sites south of Riverside Drive.

(2) Affordable Housing Projects. Development of affordable housing projects, as defined for the purposes of the affordable housing overlay, shall be allowed by-right within the AH Overlay District and are encouraged in accordance with the following provisions:

(a) *Specific Plan Base Zoning.* Affordable housing projects with a base zoning designation of SP may develop as follows:

(i) *Tier 1 Affordable housing projects:*

- *Medium Density Residential.* Affordable housing projects on properties designated as MDR in the Policy Plan may be developed in accordance with either the SP zoning district or the MDR-25 zoning district.

- *Mixed Use.* Affordable housing projects on properties designated as MU in the Policy Plan may be developed in accordance with either the SP zoning district or a comparable existing zoning implementation tool that aligns with the density and intensity of the proposed project. The following exceptions would apply:

  - *Maximum Density.* The maximum density allowed is equivalent to the maximum density identified for the applicable Mixed-Use area in the Land Use Designations Summary Table (Table LU-02) of the Policy Plan component of The Ontario Plan.

- *Calculating Minimum Density.* If a project with a base designation of SP develops without a specific plan, minimum density shall be calculated as an average over the entire portion of the project area that is within the AH Overlay District.

(ii) *Tier 2 Affordable housing projects:*

- Same as Tier 1, with the following additions:

  - *Medium Density Residential.* Affordable housing projects on properties designated as MDR in the Policy Plan shall allow a maximum density of 25 to 30 dwelling units per acre.

December 13, 2021

Scott Murphy, Executive Director
Community Development Agency
City of Ontario
303 East B Street
Ontario, CA 91764

Dear Scott Murphy:

RE: City of Ontario's 6th Cycle (2021-2029) Draft Housing Element

Thank you for submitting the City of Ontario's (City) draft housing element received for review on October 14, 2021. Pursuant to Government Code section 65585, subdivision (b), the California Department of Housing and Community Development (HCD) is reporting the results of its review. Our review was facilitated by a conversation on December 10, 2021 with Thomas Grahn, Senior Planner; Kimberly Ruddins, Sustainability Program Manager; and your consultants Jennifer Gastelum, Halley Grundy, Nicole West, and Allison Holmstedt.

The draft element addresses many statutory requirements; however, revisions will be necessary to comply with State Housing Element Law (Article 10.6 of the Gov. Code. The enclosed Appendix describes the revisions needed to comply with State Housing Element Law.

As a reminder, the City's 6th cycle housing element was due on October 15, 2021. As of today, the City has not completed the housing element process for the 6th cycle. The City's 5th cycle housing element no longer satisfies statutory requirements. HCD encourages the City to revise the element as described above, adopt, and submit to HCD to regain housing element compliance.

For your information, pursuant to Assembly Bill 1398 (Chapter 358, Statutes of 2021), if a local government fails to adopt a compliant housing element within 120 days of the statutory deadline (October 15, 2021), then any rezoning to accommodate the regional housing needs allocation (RHNA), including for lower-income households, shall be completed no later than one year from the statutory deadline. Otherwise, the local government's housing element will no longer comply with State Housing Element Law, and HCD may revoke its finding of substantial compliance pursuant to Government Code section 65585, subdivision (i).

Public participation in the development, adoption and implementation of the housing element is essential to effective housing planning. Throughout the housing element process, the City should continue to engage the community, including organizations that represent lower-income and special needs households, by making information regularly available and considering and incorporating comments where appropriate.

Pursuant to Government Code section 65583.3, subdivision (b), the City must utilize standards, forms, and definitions adopted by HCD when preparing the sites inventory. Please see HCD's housing element webpage at https://www.hcd.ca.gov/community-development/housing-element/index.shtml for a copy of the form and instructions. The City can reach out to HCD at sitesinventory@hcd.ca.gov for technical assistance. Upon adoption of the housing element, the City must submit an electronic version of the sites inventory with its adopted housing element to sitesinventory@hcd.ca.gov.

Several federal, state, and regional funding programs consider housing element compliance as an eligibility or ranking criteria. For example, the CalTrans Senate Bill (SB) 1 Sustainable Communities grant; the Strategic Growth Council and HCD's Affordable Housing and Sustainable Communities programs; and HCD's Permanent Local Housing Allocation consider housing element compliance and/or annual reporting requirements pursuant to Government Code section 65400. With a compliant housing element, the City will meet housing element requirements for these and other funding sources.

For your information, some general plan element updates are triggered by housing element adoption. HCD reminds the City to consider timing provisions and welcomes the opportunity to provide assistance. For information, please see the Technical Advisories issued by the Governor's Office of Planning and Research at: http://opr.ca.gov/docs/OPR_Appendix_C_final.pdf and http://opr.ca.gov/docs/Final_6.26.15.pdf.

HCD appreciates the hard work and dedication the City's housing element team provided during the review. We are committed to assisting the City in addressing all statutory requirements of State Housing Element Law. If you have any questions or need additional technical assistance, please contact Reid Miller, of our staff, at Reid.Miller@hcd.ca.gov

Sincerely,

Paul McDougall

Senior Program Manager

Enclosure

APPENDIX
CITY OF ONTARIO

The following changes are necessary to bring the City's housing element into compliance with Article 10.6 of the Government Code. Accompanying each recommended change, we cite the supporting section of the Government Code.

Housing element technical assistance information is available on HCD's website at http://www.hcd.ca.gov/community-development/housing-element/housing-element-memos.shtml. Among other resources, the housing element section contains HCD's latest technical assistance tool, *Building Blocks for Effective Housing Elements (Building Blocks),* available at http://www.hcd.ca.gov/community-development/building-blocks/index.shtml and includes the Government Code addressing State Housing Element Law and other resources.

A. Review and Revision

Review the previous element to evaluate the appropriateness, effectiveness, and progress in implementation, and reflect the results of this review in the revised element. (Gov. Code, § 65588 (a) and (b).)

A thorough program-by-program review is necessary to evaluate City's performance in addressing housing goals. As part of this analysis, the element should describe the actual results of the prior element's programs, compare those results to the objectives projected or planned, and based on an evaluation of any differences between what was planned versus achieved, provide a description of how the objectives and programs of the updated element incorporate changes resulting from the evaluation. The element should be revised as follows:

Program 16 (Land Monitoring Program to Meet RHNA): The element should provide a date for when the rezones for the 5th cycle was completed, include information on how many acres were ultimately rezoned and at what densities. The analysis should also specify whether the rezones met all the lower-income RHNA shortfall requirements pursuant to Government Code section 65583.2, subdivisions (h) and (i).

Program 17 (Incentives): Analysis on this program should include whether and what types of incentives were offered to housing projects in the 5th cycle.

Program 18 (Land Acquisition): The element should quantify how many units were developed from the sale of the lands as a part of this program, and at what affordability level.

B. Housing Needs, Resources, and Constraints

1. *Affirmatively further[ing] fair housing in accordance with Chapter 15 (commencing with Section 8899.50) of Division 1 of Title 2…shall include an assessment of fair housing in the jurisdiction. (Gov. Code, § 65583, subd. (c)(10)(A).)*

Regional Patterns and Trends: The element generally describes local patterns and trends but must also analyze Ontario relative to the rest of the region regarding integration and segregation, racially and ethnically concentrated areas of poverty, disparities in access to opportunity and disproportionate housing needs, including displacement risks.

Disproportionate Housing Needs including Displacement Risks: The element includes some local data on cost burdened households (overpayment) and overcrowding (pp. H-84 to H-85). However, the element must evaluate patterns and trends for both within the City and in comparison to the region for overpayment, overcrowding, and substandard housing and must include data and evaluation on persons experiencing homelessness related to protected characteristics and access to opportunities. In addition, the element briefly and generically mentions displacement but must still provide data, analysis, and conclusions.

Contributing Factors: The element includes the contributing factors from the 2020 analysis of impediments to fair housing choice (AI). However, the element must prioritize contributing factors and relate factors to the analysis found in Affirmatively Furthering Fair Housing (AFFH) analysis.

Sites Inventory: The element discusses the proposed number of sites and units relative to income, but it must also address other components of the assessment of fair housing (e.g., R/ECAP, Disparities in Access to Opportunity, Disproportionate Housing Need, including Displacement). The accompanying analysis should address how the sites are identified to improve conditions (or if sites exacerbate conditions, how a program can address the impact) and whether the sites are isolated by income group. For example, the element includes sites within RECAP areas of the City. The element should talk about efforts to improve conditions in these areas. In addition, much of the lower-income need is concentrated the southwest undeveloped portions of the City. The element should discuss whether this strategy potentially isolates a significant number of the housing need for lower-income households and include actions as appropriate, such as additional zoning for a variety of housing choices.

Goals, Priorities, Metrics, and Milestones: The element must be revised to add or modify goals and actions based on the outcomes of a complete analysis. Goals and actions must specifically respond to the analysis and to the identified and prioritized contributing factors to fair housing issues and must be significant and meaningful enough to overcome identified patterns and trends. Actions must have specific commitment, metrics, and milestones as appropriate and must address housing mobility enhancement, new housing choices and affordability in high opportunity areas, place-based strategies for community preservation and revitalization and displacement protection.

For further information about AFFH requirements, please refer to HCD's https://www.hcd.ca.gov/community-development/affh/docs/affh_document_final_4-27-2021.pdf#page=7.

2. *Include an analysis of population and employment trends and documentation of projections and a quantification of the locality's existing and projected needs for all income levels, including extremely low-income households. (Gov. Code, § 65583, subd. (a)(1).)*

   Employment Trends: While the City does provide some analysis of employment trends on Page H-6, it could also provide an analysis of the largest employers in the City as well as the City's unemployment rate.

3. *Include an analysis and documentation of household characteristics, including level of payment compared to ability to pay, housing characteristics, including overcrowding, and housing stock condition. (Gov. Code, § 65583, subd. (a)(2).)*

   Housing Conditions: The element identifies the age of the housing stock (p. H-47). However, it must include analysis of the condition of the existing housing stock and estimate the number of units in need of rehabilitation and replacement. The analysis states a recent windshield survey was completed but could also discuss the results of that survey and identify how many units were found to be in need of rehabilitation and replacement.

4. *An inventory of land suitable and available for residential development, including vacant sites and sites having realistic and demonstrated potential for redevelopment during the planning period to meet the locality's housing need for a designated income level, and an analysis of the relationship of zoning and public facilities and services to these sites. (Gov. Code, § 65583, subd. (a)(3).)*

   The City has a regional housing need allocation (RHNA) of 20,854 housing units, of which 8,926 are for lower-income households. To address this need, the element relies on both vacant and nonvacant sites, including sites in Specific Plan Areas. To demonstrate the adequacy of these sites and strategies to accommodate the City's RHNA, the element must include complete analyses:

   Progress in Meeting the RHNA: The City's RHNA may be reduced by the number of new units built since July 1, 2021. The element indicates (p. H-176) 1,650 units toward the RHNA, but to count these units toward the City's 6th cycle RHNA allocation, the element must also demonstrate their availability in the planning period.

   Realistic Capacity: The element (pp. H-177 to H-205) provides assumptions to calculate residential capacity on identified sites and includes a few examples of recent developments and adjusts assumptions in specific plan areas based on infrastructure availability. However, the element should demonstrate what specific trends, factors, and other evidence led to the assumptions. The estimate of the number of units for each site must be adjusted as necessary, based on the land-use controls and site improvements, typical densities of existing or approved residential developments at a similar affordability level in that jurisdiction, and on the current or planned availability and accessibility of sufficient water, sewer, and dry utilities.

In addition, the element appears to assume residential development on sites with zoning that allows 100 percent non-residential uses, but to support this assumption, the element must analyze the likelihood of residential development in zoning where 100 percent nonresidential uses are allowed. The analysis should be based on factors such as development trends including nonresidential, performance standards requiring residential uses or other relevant factors such as enhanced policies and programs.

Suitability of Nonvacant Sites: The element identifies nonvacant sites to accommodate the regional housing need and provides minimal information on how the existing uses would not impede residential development. However, to demonstrate the potential for additional development on these sites, the element should include a discussion of trends and market conditions to support these assumptions. The element can summarize past experiences converting existing uses to higher density residential development and include current information on development trends and market conditions for redevelopment and relate those trends to the sites identified. In addition, the element should include information to support development at Ontario Hills Mall including identification of any impediments in developing the parking area due to any lease or parking agreements.

Small and Large Sites: Sites larger than ten acres in size or smaller than a half-acre in size is deemed inadequate to accommodate housing for lower-income households unless it is demonstrated, with sufficient evidence, that sites are suitable to accommodate housing for lower-income households. While the element included a few examples about developments with lot consolidation (p. H-180) and states there is recent examples of large greenfield sites developing (p H-201), it must also provide specific examples with the densities, affordability and, if applicable, circumstances leading to development. The element should relate these examples to the sites identified to accommodate the RHNA for lower-income households to demonstrate that these sites can adequately accommodate the City's lower-income housing need. Based on a complete analysis, the City should add or revise programs to include incentives for encouraging development on these sites.

Environmental Constraints: While the element generally describes a few environmental conditions within the City (p. H-192), it must relate those conditions to identified sites and describe any other known environmental or other constraints that could impact housing development on identified sites in the planning period. For example, the element mentions that liquefaction poses a potential environmental barrier to residential development, but it does not specify which sites (if any) in the sites inventory are affected by this constraint.

Zoning For a Variety of Housing Types (Accessory Dwelling Units (ADU)): After a cursory review of the City's ordinance, HCD discovered provisions which were not consistent with State ADU Law. Specifically, the ordinance seems to limit the development of ADU to only sites with an "existing" primary dwelling unit. However, pursuant to Government Code section 65852.2, local agencies must allow ADUs to be created on lots zoned for single-family residences with a proposed or existing single-family residence on the lot. As a result, the element should add a program to update the City's ADU ordinance to comply with state law. HCD will provide additional

information on provisions to address under separate cover. For more information, please consult HCD's ADU Guidebook, published in December 2020, which provides detailed information on new state requirements surrounding ADU development.

5. *An analysis of potential and actual governmental constraints upon the maintenance, improvement, or development of housing for all income levels, including the types of housing identified in paragraph (1) of subdivision (c), and for persons with disabilities as identified in the analysis pursuant to paragraph (7), including land use controls, building codes and their enforcement, site improvements, fees and other exactions required of developers, and local processing and permit procedures... (Gov. Code, § 65583, subd. (a)(5).)*

   Processing and Permit Procedures: While the element includes information about processing times, it should also describe the procedures for typical single family and multifamily development. The analysis should address the approval body, the number of public hearings if any, approval findings and any other relevant information. The analysis should address impacts on housing cost, supply, timing, and approval certainty. For example, the element should identify and analyze approval findings for impacts on approval certainty, the presence of processes or guidelines to promote certainty and add or modify programs as appropriate. In particular, the element should analyze the role of the Development Advisory Board (DAB) which seems to duplicate efforts of planning staff and decision-making responsibilities of the planning commission. The element should describe how this process impacts timeframes for application approval and improves or reduces certainty in the process.

   Codes and their Enforcement: The element must describe and analyze which building code (e.g., 2019) is enforced, any local amendments to the building code and their enforcement for impacts on housing supply and affordability. For additional information and a sample analysis, see the Building Blocks at http://www.hcd.ca.gov/community-development/building-blocks/constraints/codes-and-enforcement-on-offsite-improvement-standards.shtml.

   "Community Oriented Policing" Program: In Program 7, the City states that it will continue to implement "Community Oriented Policing" which includes a Crime-Free Multifamily Housing Program. This Program could be potentially problematic for a number of reasons, and the City should provide further analysis on whether this program could constitute a constraint on providing housing for all income levels throughout the community. Such analysis should address:

   - how the program is enforced or implemented; what entity is charged with implementation and enforcement (e.g., police, code enforcement);
   - whether the program applies to both renters and homeowners;
   - whether the program is enforced against federally subsidized properties, or against housing that serves specific populations (e.g., people re-entering from contact with the criminal legal system or housing serving people with mental health or developmental disabilities);
   - whether the program requires or encourages property owners to conduct a criminal background check; and

- what conduct is covered by the policy, and what locations of alleged criminal activity the ordinance covers (e.g., on the premises or off premises)

6. *An analysis of potential and actual nongovernmental constraints upon the maintenance, improvement, or development of housing for all income levels, including the availability of financing, the price of land, the cost of construction, the requests to develop housing at densities below those anticipated in the analysis required by subdivision (c) of Government Code section 65583.2, and the length of time between receiving approval for a housing development and submittal of an application for building permits for that housing development that hinder the construction of a locality's share of the regional housing need in accordance with Government Code section 65584... (Gov. Code, § 65583, subd. (a)(6).)*

   Approval Time and Requests Lesser Densities: The element must include analysis of requests to develop housing at densities below those identified, the length of time between receiving approval for a housing development and submittal of an application for building permits that potentially. The element must address any hinderance on the development of housing and include programs as appropriate.

7. *Analyze any special housing needs such as elderly; persons with disabilities, including a developmental disability; large families; farmworkers; families with female-heads of households; and families and persons in need of emergency shelter. (Gov. Code, § 65583, subd. (a)(7).)*

   The element indicates on Page H-23 that there are 505 farmworkers employed in fulltime farming occupations in Ontario. However, farmworkers from the broader area and those employed seasonally may also have housing needs, including within the City's boundaries. As a result, the element should acknowledge the housing needs of permanent and seasonal farmworkers at a county-level (e.g., using USDA county-level farmworker data) and include programs as appropriate.

8. *Analyze existing assisted housing developments that are eligible to change to non-low-income housing uses during the next 10 years due to termination of subsidy contracts, mortgage prepayment, or expiration of use restrictions. (Gov. Code, § 65583, subd. (a)(9) through 65583(a)(9)(D).)*

   The element identifies properties at-risk of conversion to market-rate during the planning period (p. H-56). While the element includes most of the required analysis, it should also identify potential sources of funding to ensure the affordable units identified do not convert to market-rate.

C. Housing Programs

1. *Include a program which sets forth a schedule of actions during the planning period, each with a timeline for implementation, which may recognize that certain programs are ongoing, such that there will be beneficial impacts of the programs within the planning period, that the local government is undertaking or intends to undertake to implement the policies and achieve the goals and objectives of the Housing Element*

through the administration of land use and development controls, the provision of regulatory concessions and incentives, and the utilization of appropriate federal and state financing and subsidy programs when available. The program shall include an identification of the agencies and officials responsible for the implementation of the various actions. (Gov. Code, § 65583, subd. (c).)

To have a beneficial impact in the planning period and address the goals of the housing element, programs must be revised with discrete timelines, including, but not limited to, Program 4 (CARES), Program 5 (Neighborhood Plans), and Program 11 (Ontario Ranch). In addition, Program 6 should include quantifiable metrics to measure the effectiveness of the Neighborhood Stabilization program

2. *Identify actions that will be taken to make sites available during the planning period with appropriate zoning and development standards and with services and facilities to accommodate that portion of the city's or county's share of the regional housing need for each income level that could not be accommodated on sites identified in the inventory completed pursuant to paragraph (3) of subdivision (a) without rezoning, and to comply with the requirements of Government Code section 65584.09. Sites shall be identified as needed to facilitate and encourage the development of a variety of types of housing for all income levels, including multifamily rental housing, factory-built housing, mobilehomes, housing for agricultural employees, supportive housing, single-room occupancy units, emergency shelters, and transitional housing.*
*(*Gov. Code, § *65583, subd. (c)(1).)*

   As noted in Finding B4, the element does not include a complete site analysis, therefore, the adequacy of sites and zoning were not established. Based on the results of a complete sites inventory and analysis, the City may need to add or revise programs to address a shortfall of sites or zoning available to encourage a variety of housing types.

   In addition, as mentioned in the element, buildout of the specific plans in the southwest area requires infrastructure improvements that will be provided throughout the planning period. The capacity assumptions for these areas are directly tied to assumptions of when these improvements will be provided. The element should include a program monitoring these provisions to ensure that infrastructure is being provided pursuant to these assumptions so that housing can be developed early in the planning period. The program should include provisions to amend the sites inventory or rezone additional sites should infrastructure not be provided pursuant to the timeframes stated.

3. *Address and, where appropriate and legally possible, remove governmental and nongovernmental constraints to the maintenance, improvement, and development of housing, including housing for all income levels and housing for persons with disabilities. The program shall remove constraints to, and provide reasonable accommodations for housing designed for, intended for occupancy by, or with supportive services for, persons with disabilities. (Gov. Code, § 65583, subd. (c)(3).)*

   As noted in Findings B5 and B6, the element requires a complete analysis of potential governmental and non-governmental constraints. Depending upon the results of that

analysis, the City may need to revise or add programs and address and remove or mitigate any identified constraints.

4. *Promote and affirmatively further fair housing opportunities and promote housing throughout the community or communities for all persons regardless of race, religion, sex, marital status, ancestry, national origin, color, familial status, or disability, and other characteristics protected by the California Fair Employment and Housing Act (Part 2.8 (commencing with Section 12900) of Division 3 of Title 2), Section 65008, and any other state and federal fair housing and planning law. (Gov. Code, § 65583, subd. (c)(5).)*

   As noted in Finding B1, the element must include a complete analysis of AFFH. The element must be revised to add goals and actions based on the outcomes of a complete analysis. Goals and actions must specifically respond to the analysis and to the identified and prioritized contributing factors to fair housing issues and must be significant and meaningful enough to overcome identified patterns and trends. Actions must have specific commitment, metrics, and milestones as appropriate and must address housing mobility enhancement, new housing choices and affordability in high opportunity areas, place-based strategies for community preservation and revitalization and displacement protection.

5. *Develop a plan that incentivizes and promotes the creation of accessory dwelling units that can be offered at affordable rent, as defined in Section 50053 of the Health and Safety Code, for very low, low-, or moderate-income households. For purposes of this paragraph, "accessory dwelling units" has the same meaning as "accessory dwelling unit" as defined in paragraph (4) of subdivision (i) of Section 65852.2. (Gov. Code, § 65583, subd. (c)(7).)*

   Programs must be added or expanded to include incentives to promote the creation and affordability of ADUs. Examples include exploring and pursuing funding, modifying development standards and reducing fees beyond state law, increasing awareness, pre-approved plans and homeowner/applicant assistance tools. Additionally, as noted in Finding B5, the element should include a timeline for updating the City's ADU ordinance to bring it into compliance with state law.

D. Public Participation

Local governments shall make a diligent effort to achieve public participation of all economic segments of the community in the development of the Housing Element, and the element shall describe this effort. (Gov. Code, § 65583, subd. (c)(8).)

While the element provides extensive information on the public participation strategy for the City's 2020-2024 Consolidated Plan, including the Public Outreach and Community Needs Survey, it does not indicate what type of public participation strategy was employed specifically on the housing element update. While there are many components of the consolidated plan and stakeholder consultation process that are applicable to the housing element update, it does not address all of the public outreach requirements under

state housing element law, such as how public outreach and comment impacted the composition of the sites inventory, the formulation of necessary housing element programs, and the uncovering of potential governmental and nongovernment constraints to residential development. This outreach process should be outlined in greater specificity and detail in the adopted element.

In addition, HCD understands the City made the element available to the public concurrent with its submittal to HCD. By not providing an opportunity for the public to review and comment on a draft of the element in advance of submission, the City has not yet complied with statutory mandates to make a diligent effort to encourage the public participation in the development of the element and it reduces HCD's ability to consider public comments in its review. The availability of the document to the public and opportunity for public comment prior to submittal to HCD is essential to the public process and HCD's review. The City must proactively make future revisions available to the public, including any commenters, prior to submitting any revisions to HCD and diligently consider and address comments, including revising the document where appropriate. HCD's future review will consider the extent to which the revised element documents how the City solicited, considered, and addressed public comments in the element. The City's consideration of public comments must not be limited by HCD's findings in this review letter.

CITY OF ONTARIO PLANNING DEPARTMENT

PLANNING COMMISSION STAFF REPORT

December 20, 2021

303 East B Street, Ontario, California 91764 Phone: 909.395.2036 / Fax: 909.395.2420

FILE NOS: PGPA21-004, PZC-21-002, and PDCA21-001

SUBJECT: A General Plan Amendment (File No. PGPA21-004) for the Housing Element update to the Policy Plan (General Plan) component of The Ontario Plan, addressing State mandates and the 6th Cycle Regional Housing Needs Allocation (RHNA) and to modify the Policy Plan Land Use Plan (Exhibit LU-01) to establish the following: 1) a Zone Change (File No. PZC21-002) to modify the Zoning Map to establish an AH (Affordable Housing) zoning district; 2) create an Affordable Housing Overlay; and 3) a Development Code Amendment (File No. PDCA21-001) revising section 6.01.035 for the purpose of adding provisions to establish an AH (Affordable Housing) Overlay District. Staff has prepared an Addendum to The Ontario Plan Environmental Impact Report (State Clearinghouse No. 2008101140), certified by City Council on January 27, 2010. This application introduces no new significant environmental impacts. The proposed project is located within the Airport Influence Area of Ontario International Airport and was evaluated and found to be consistent with the policies and criteria of the Ontario International Airport Land Use Compatibility Plan (ALUCP); **City Initiated. City Council action is required.**

Applicant: City of Ontario

RECOMMENDED ACTION: That the Planning Commission take the following actions:

(1) Adopt a resolution recommending the City Council approve the use of an Addendum to The Ontario Plan Environmental Impact Report (State Clearinghouse No. 2008101140);

(2) Adopt a resolution recommending the City Council approve the General Plan Amendment, File No. PGPA21-004, pursuant to the facts and reasons contained in the staff report and attached resolution;

(3) Adopt a resolution recommending the City Council approve the Zone Change, File No. PZC21-002, pursuant to the facts and reasons contained in the staff report and attached resolution; and

Case Planner:	Thomas Grahn
Planning Director Approval:	
Submittal Date:	

Hearing Body	*Date*	*Decision*	*Action*
DAB	N/A	N/A	N/A
PC	12-20-21	Approval	Recommend
CC	2-15-22		Final

(4) Adopt a resolution recommending the City Council approve the Development Code Amendment, File No. PDCA21-001, pursuant to the facts and reasons contained in the staff report and attached resolution.

PROJECT ANALYSIS: The proposed project is an update to the Housing Element and includes related applications to establish and implement an Affordable Housing Overlay to support the necessary residential densities to achieve the City's Regional Housing Needs Assessment ("RHNA").

(1) General Plan Amendment (File No. PGPA21-004) — This General Plan Amendment includes the Housing Element update to the Policy Plan (general plan) component of The Ontario Plan ("TOP"), addressing State mandates, the 6th Cycle RHNA, and a modification to the Policy Plan Land Use Plan (Exhibit LU-01) to establish an Affordable Housing Overlay.

(a) Housing Element Update — The Housing Element is one of the seven mandated elements of the general plan, which each city and county in the State is required to periodically adopt (generally every eight years). The Housing Element is required to adequately plan to meet the existing and projected housing needs of all economic segments of the community. This Housing Element Cycle (6th Cycle) covers the RHNA period from October 15, 2021 through October 15, 2029. The Housing Element is the only element of the general plan reviewed and certified by the State to ensure compliance with State law.

The City of Ontario ("City") has initiated a process to update its Housing Element, one of the elements of the Policy Plan. The proposed 2021–2029 Housing Element Update constitutes a "project" pursuant to CEQA, and therefore, the City prepared an Addendum to The Ontario Plan Environmental Impact Report ("TOP EIR").

(i) Public Participation — The California Government Code requires that local governments make a diligent effort to solicit public participation from all economic segments of the community in the development of the draft Housing Element. The following provides a general timeline describing major milestones in preparing Ontario's draft 2021-2029 Housing Element Update:

- June 14, 2021 – Property Owner Open House – Staff hosted a virtual open house to provide an overview of the TOP 2050 Project and land use designation changes on specific properties as part of the City's housing strategy to fulfill the 6th RHNA Cycle site inventory obligation.

- June 28, 2021 – Community Workshop #1 – Staff hosted a virtual workshop to present the TOP 2050 update, including the City's housing strategy to receive comments, and answer questions from the public.

- July 29, 2021 – Community Workshop #2 – Staff hosted a virtual workshop to facilitate a guided discussion of the environmental justice, community health, and resiliency policies, and share the City's preferred land use plan and housing strategy. The intent of Community Workshop #2 was to further inform the community of policy updates and gather feedback regarding the preferred land use plan.

- August 31, 2021 – In compliance with Senate Bill 18 notification requirements (Tribal Consultation), the City mailed a separate project notice to 16 local tribes identified by the Native American Heritage Commission (NAHC). No consultation requests were received during the requisite 90-day response period.

- October 14, 2021 – City staff posted the Ontario Housing Element 2021-2029 - Public Review Draft on Ontarioplan.org/TOP2050 and submitted the draft to California Department of Housing and Community Development ("HCD") for a 60-day review.

(ii) Regional Housing Needs Assessment (RHNA) — The Southern California Association of Governments ("SCAG") is responsible for oversight of the RHNA process for Southern California, which includes Ontario. For the 2021–2029 RHNA planning period, the City has been allocated 20,854 housing units to accommodate the estimated growth need at various income levels. As required by California law, the Housing Element must identify the City's ability to accommodate this estimated growth through available sites and appropriate zoning. Ontario's 6th RHNA Cycle allocation includes the following:

City of Ontario 6th Cycle RHNA Allocation by Income Category	
Income Category (Percent of Annual Mean Income)	**RHNA Allocation**
Very Low (31 to 50)	5,640
Low (51 to 80)	3,286
Moderate (81 to 120)	3,329
Above Moderate (121 or more)	8,599
Total	**20,854**

Source: SCAG 2021

The proposed 2021–2029 Housing Element must demonstrate the City's ability to accommodate the RHNA housing allocation either through production or the availability of properly zoned land that can accommodate additional growth. If adequate sites cannot be identified in the existing zoning, the City is required to rezone sites that can accommodate the remaining need at a minimum density of 30 dwelling units per acre, which is the default density set by HCD. The City is not required to build residential units in order to meet its RHNA allocation, only to identify potential sites and create the framework allowing the market the opportunity to develop these units.

The proposed 2021–2029 Housing Element Update explores opportunities to accommodate the RHNA through current production, entitled units, and the availability of properly zoned land that can accommodate additional growth. The proposed Housing Element Update will further identify and address potential and actual governmental and non-governmental constraints on the development of housing for all income levels.

(iii) State Mandates Included Within the Housing Element Update — The following provides a brief summary of recently adopted State laws that effect and were included in the 2021-2029 Housing Element Update. Their overarching premise is to increase the housing supply within the State by permitting more housing in more places and in greater volume.

- SB 330 Housing Crisis Act: Prohibits the downzoning of any residential property without a corresponding increase in another location. Reduces the length of the entitlement process and provides greater certainty on development standards and fees. The offset upzoning must take place concurrently and provide no net loss in residential capacity.

- SB 35 Streamlined Approval for Housing Projects: Expedites the construction of affordable housing in places were the permitting or construction of housing is slower than compared to the RHNA. If housing production of above moderate RHNA is below the annual target, projects with 10 percent low-income housing are eligible for streamlining. If housing production of low-income RHNA is below the annual target, projects with 50 percent low-income housing are eligible for streamlining.

- SB 166 No Net Loss Zoning: Cities must build or maintain capacity for 100 percent of their RHNA requirement throughout the entire planning period.

- AB 1397 Non-Vacant Sites: Provides for increased scrutiny on the development potential for underutilized sites included in the RHNA land inventory.

- AB 72 Increased HCD Enforcement: HCD may revoke certification and report any violations to the Attorney General on a jurisdictions failure to comply.

- AB 686 Housing Discrimination (Affirmatively Furthering Fair Housing ("AFFH")): Jurisdictions must facilitate deliberate action to address, combat, and relieve disparities resulting from past patterns of segregation to foster more inclusive communities.

- AB 167 Housing Accountability Act: Prohibits reducing density, disapproving, or conditioning approvals of a lower/moderate income housing development project or emergency shelter if they comply with zoning and objective development standards.

(iv) 2021-2029 Ontario Housing Element Content — California Housing Element law prescribes the scope and content of the Housing Element. Pursuant to Section 65583 of the California Government Code, the Housing Element must contain a variety of detailed analyses, listed below.

- Analysis of demographic, social, and housing characteristics; current housing needs; and future housing needs due to population and employment growth and change.

- Assessment of Fair Housing ("AFH") consistent with the core elements of the analysis required by the federal Affirmatively Furthering Fair Housing (AFFH) Final Rule of July 16, 2015.

- Analysis of governmental and nongovernmental constraints that affect the development, maintenance, and improvement of housing for all income groups and people with disabilities.

- Inventory of resources available to address the City's housing needs, including available land for housing, financial resources, and administrative capacity to manage housing programs.

- Evaluation of the accomplishments of current housing programs and specific programs to address the development, improvement, and conservation of housing to meet current and future needs.

- Documentation of public outreach for the Housing Element and the involvement of the public in shaping housing policies and programs for the 2021–2029 Housing Element.

- Housing goals, policies, and programs to address the production, maintenance, and improvement of housing for all economic segments of the community commensurate with its needs.

- The Housing Element encompasses all seven topical areas mentioned here, provides a brief synopsis of issues, and then follows with a complete set of goals, policies, and programs to be implemented over the planning period. The City also prepared a web format for ease of public distribution and use by policymakers and housing providers in implementing programs.

The Housing Element is prepared to be consistent with several policy and program plans mandated by the State. Most importantly, State law requires SCAG to determine the amount of housing needed within its six-county region and allocate a share of the regional housing need to each community. Housing Elements are required to incorporate

the estimates of housing need reflected in regional housing plans. The Housing Element is also consistent with the City's Consolidated Plan.

(v) HCD Review — The draft 2021-2029 Housing Element Update was submitted to HCD on October 14, 2021. HCD has 60-days to complete their review of a draft housing element and 90-days to review an adopted housing element. Comments from HCD on the draft Housing Element Update are expected to be received by December 13, 2021, which is after the date of this report being prepared; therefore, staff will provide an oral report on the status of HCD's review comments at the Planning Commission meeting.

(b) Affordable Housing Overlay — The proposed General Plan Amendment also proposes to modify the Policy Plan Land Use Plan (LU-01) to establish an Affordable Housing Overlay. The purpose of the Affordable Housing Overlay is to facilitate housing opportunities within the City through the implementation of the Housing Element. The Affordable Housing Overlay will only apply to those properties identified in Exhibits A – Proposed AH, Affordable Housing Overlay and Exhibit B – Revised LU-01 with AH, Affordable Housing Overlay; and those parcels listed in the Resolution of Approval for PGPA21-004, Attachment A: Housing Element Update, Appendix B: Housing Element Sites Inventory (Parcel List).

As shown in Exhibit B – Revised LU-01 with AH, Affordable Housing Overlay, the Affordable Housing Overlay will apply to those identified parcels generally located: (1) south of Riverside Drive, (2) along East Holt Boulevard between the Cucamonga Creek Channel and Corona Avenue, and (3) areas designated as MU-2 at the northeast corner of West Holt Boulevard and Mountain Avenue. As discussed in the RHNA analysis above (see Section (1)(a)(II)), the Affordable Housing Overlay is being established to ensure that there are adequate sites at sufficient residential densities to meet the City's RHNA housing obligation throughout the planning period.

(2) Zone Change (PZC-21-002) — The proposed Zone Change will modify the Zoning Map to establish an Affordable Housing Overlay. The purpose of the Affordable Housing Overlay is to facilitate housing opportunities within the City through the implementation of Housing Element. The Affordable Housing Overlay will only apply to those properties identified in Exhibits A – Proposed AH, Affordable Housing Overlay and Exhibit C – Revised Zoning Map with AH, Affordable Housing Overlay; and those parcels listed in the Resolution of Approval for PGPA21-004, Attachment A: Housing Element Update, Appendix B: Housing Element Sites Inventory (Parcel List).

As shown in Exhibit C – Revised Zoning Map with AH, Affordable Housing Overlay, the Affordable Housing Overlay will apply to those identified parcels generally located: (1) south of Riverside Drive, (2) along East Holt Boulevard, between the Cucamonga Creek Channel and Corona Avenue, and (3) areas designated as MU-2 at the northeast corner of West Holt Boulevard and Mountain Avenue. As discussed in the RHNA analysis above (see Section (1)(a)(II)), the Affordable Housing Overlay is being established to ensure that

there are adequate sites at sufficient residential densities to meet the City's RHNA housing obligation throughout the planning period.

(3) Development Code Amendment (PDCA21-001) — The Development Code (Ontario Municipal Code Title 9) provides the legislative framework for the implementation of The Ontario Plan, which states long-term principles, goals, and policies for guiding the growth and development of the City in a manner that achieves Ontario's vision, and promotes and protects the public health, safety, comfort, convenience, prosperity, and welfare of its citizens. Staff has initiated an alteration to the Development Code that is necessary to establish provisions of the Development Code, which are described below. The proposed changes, as they would appear in the Development Code, are included as Exhibit D (Proposed Development Code Amendment) of this staff report.

The proposed Development Code Amendment will modify Section 6.01.035, by adding Subparagraph C.6 to establish an AH (Affordable Housing) Overlay District. The purpose of the AH (Affordable Housing) Overlay District standards is to facilitate housing opportunities within the City through the implementation of Housing Element. The AH (Affordable Housing) Overlay District will only apply to those properties identified in Exhibit A – Proposed AH, Affordable Housing Overlay, Exhibit B – Revised LU-01 with AH, Affordable Housing Overlay, Exhibit C – Revised Zoning Map with AH, Affordable Housing Overlay; and those parcels listed in the Resolution of Approval for PGPA21-004, Attachment A: Housing Element Update, Appendix B: Housing Element Sites Inventory (Parcel List).

Generally, the AH (Affordable Housing) Overlay District will do three things:

(a) It removes the specific plan requirement from sites where there is no existing specific plan.

(b) It satisfies new state requirements for sites that are part of the rezoning program by:

(i) Allowing by-right development of residential projects if 20 percent of units are affordable to lower incomes.

(ii) Establishing a minimum density of 20 du/ac.

(c) It raises the maximum density on MDR zoned sites from 25 to 30 du/ac, if 25 percent of units are affordable to lower incomes.

COMPLIANCE WITH THE ONTARIO PLAN: The proposed project is consistent with the principles, goals and policies contained within the Vision, Governance, Policy Plan (General Plan), and City Council Priorities components of TOP. More specifically, the goals and policies of TOP that are furthered by the proposed project are as follows:

(1) City Council Goals.

- Invest in the Growth and Evolution of the City's Economy.
- Maintain the Current High Level of Public Safety.
- Operate in a Businesslike Manner.
- Pursue City's Goals and Objectives by Working with Other Governmental Agencies.
- Focus Resources in Ontario's Commercial and Residential Neighborhoods.
- Invest in the City's Infrastructure (Water, Streets, Sewers, Parks, Storm Drains and Public Facilities).
- Encourage, Provide or Support Enhanced Recreational, Educational, Cultural and Healthy City Programs, Policies and Activities.
- Ensure the Development of a Well Planned, Balanced, and Self-Sustaining Community in the New Model Colony.

(2) Vision.

Distinctive Development:

- Commercial and Residential Development.

➢ Development quality that is broadly recognized as distinctive and not exclusively tied to the general suburban character typical of much of Southern California.

(3) Governance.

Decision Making:

- Goal G1: Sustained decision-making that consistently moves Ontario towards its Vision by using TOP as a framework for assessing choices.

➢ G1-2 Long-term Benefit. We require decisions to demonstrate and document how they add value to the community and support the Ontario Vision.

(4) Policy Plan (General Plan).

Land Use Element:

- Goal LU1: A community that has a spectrum of housing types and price ranges that match the jobs in the City and that make it possible for people to live and work in Ontario and maintain a quality of life.

➢ LU1-1 Strategic Growth. We concentrate growth in strategic locations that help create place and identity, maximize available and planned infrastructure, and foster the development of transit.

➢ LU1-6 Complete Community. We incorporate a variety of land uses and building types in our land use planning efforts that result in a complete community where residents at all stages of life, employers, workers, and visitors have a wide spectrum of choices of where they can live, work, shop and recreate within Ontario. (Refer to Complete Community Section of Community Economics Element).

- Goal LU2: Compatibility between a wide range of uses.

Housing Element:

- Goal H2: Diversity of types of quality housing that are affordable to a range of household income levels, accommodate changing demographics, and support and reinforce the economic sustainability of Ontario.

➢ H2-4 New Model Colony. We support a premier lifestyle community in the Ontario Ranch distinguished by diverse housing, highest design quality, and cohesive and highly amenitized neighborhoods.

➢ H2-5 Housing Design. We require architectural excellence through adherence to City design guidelines, thoughtful site planning, environmentally sustainable practices, and other best practices.

- Goal H5: A full range of housing types and community services that meet the special housing needs for all individuals and families in Ontario, regardless of income level, age, or other status.

➢ H5-2 Family Housing. We support the development of larger rental apartments that are appropriate for families with children, including, as feasible, the provision of services, recreation, and other amenities.

Community Economics Element:

- Goal CE1: A complete community that provides for all incomes and stages of life.

➢ CE1-6 Diversity of Housing. We collaborate with residents, housing providers and the development community to provide housing opportunities for every stage of life; we plan for a variety of housing types and price points to support our workforce, attract business, and foster a balanced community.

- Goal CE2: A City of distinctive neighborhoods, districts, and corridors, where people choose to be.

➢ CE2-1 Development Projects. We require new development and redevelopment to create unique, high-quality places that add value to the community.

➢ CE2-2 Development Review. We require those proposing new development and redevelopment to demonstrate how their projects will create appropriately unique, functional, and sustainable places that will compete well with their competition within the region.

➢ CE2-4 Protection of Investment. We require that new development and redevelopment protect existing investment by providing architecture and urban design of equal or greater quality.

➢ CE2-5 Private Maintenance. We require adequate maintenance, upkeep, and investment in private property because proper maintenance on private property protects property values.

Safety Element:

- Goal S1: Minimized risk of injury, loss of life, property damage and economic and social disruption caused by earthquake-induced and other geologic hazards.

➢ S1-1 Implementation of Regulations and Standards. We require that all new habitable structures be designed in accordance with the most recent California Building Code adopted by the City, including provisions regarding lateral forces and grading.

Community Design Element:

- Goal CD1: A dynamic, progressive city containing distinct neighborhoods and commercial districts that foster a positive sense of identity and belonging among residents, visitors, and businesses.

➢ CD1-1 City Identity. We take actions that are consistent with the City being a leading urban center in Southern California while recognizing the diverse character of our existing viable neighborhoods.

➢ CD1-2 Growth Areas. We require development in growth areas to be distinctive and unique places within which there are cohesive design themes.

➢ CD1-3 Neighborhood Improvement. We require viable existing residential and non-residential neighborhoods to be preserved, protected, and enhanced in accordance with our land use policies.

- Goal CD2: A high level of design quality resulting in public spaces, streetscapes, and developments that are attractive, safe, functional and distinct.

➢ CD2-1 Quality Architecture. We encourage all development projects to convey visual interest and character through:

- Building volume, massing, and height to provide appropriate scale and proportion;
- A true architectural style which is carried out in plan, section and elevation through all aspects of the building and site design and appropriate for its setting; and
- Exterior building materials that are visually interesting, high quality, durable, and appropriate for the architectural style.

➢ CD2-2 Neighborhood Design. We create distinct residential neighborhoods that are functional, have a sense of community, emphasize livability and social interaction, and are uniquely identifiable places through such elements as:

- A pattern of smaller, walkable blocks that promote access, activity and safety;
- Variable setbacks and parcel sizes to accommodate a diversity of housing types;
- Traffic calming measures to slow traffic and promote walkability while maintaining acceptable fire protection and traffic flows;
- Floor plans that encourage views onto the street and de-emphasize the visual and physical dominance of garages (introducing the front porch as the "outdoor living room"), as appropriate; and
- Landscaped parkways, with sidewalks separated from the curb.

➢ CD2-7 Sustainability. We collaborate with the development community to design and build neighborhoods, streetscapes, sites, outdoor spaces, landscaping and buildings to reduce energy demand through solar orientation, maximum use of natural daylight, passive solar and natural ventilation, building form, mechanical and structural systems, building materials and construction techniques.

➢ CD2-8 Safe Design. We incorporate defensible space design into new and existing developments to ensure the maximum safe travel and visibility on pathways, corridors, and open space and at building entrances and parking areas by avoiding physically and visually isolated spaces, maintenance of visibility and accessibility, and use of lighting.

➢ CD2-9 Landscape Design. We encourage durable landscaping materials and designs that enhance the aesthetics of structures, create, and define public and private spaces, and provide shade and environmental benefits.

➢ CD2-13 Entitlement Process. We work collaboratively with all stakeholders to ensure a high degree of certainty in the efficient review and timely processing of all development plans and permits.

HOUSING ELEMENT COMPLIANCE: The proposed 2021-2029 Housing Element Update is mandated by Sections 65580 to 65589 of the California Government Code. State Housing

Element law requires that each city and county identify and analyze existing and projected housing needs within their jurisdiction and prepare goals, policies, and programs to further the development, improvement, and preservation of housing for all economic segments of their community commensurate with local housing needs.

AIRPORT LAND USE COMPATIBILITY PLAN (ALUCP) COMPLIANCE: The California State Aeronautics Act (Public Utilities Code Section 21670 et seq.) requires that an Airport Land Use Compatibility Plan be prepared for all public use airports in the State; and requires that local land use plans and individual development proposals must be consistent with the policies set forth in the adopted Airport Land Use Compatibility Plan. On April 19, 2011, the City Council of the City of Ontario approved and adopted the Ontario International Airport Land use Compatibility Plan ("ALUCP"), establishing the Airport Influence Area for Ontario International Airport, which encompasses lands within parts of San Bernardino, Riverside, and Los Angeles Counties, and limits future land uses and development within the Airport Influence Area, as they relate to noise, safety, airspace protection, and overflight impacts of current and future airport activity. The proposed project is located within the Airport Influence Area of Ontario International Airport and was evaluated and found to be consistent with the policies and criteria of the ALUCP. Any special conditions of approval associated with uses in close proximity to the airport are included in the conditions of approval provided with the attached Resolution.

ENVIRONMENTAL REVIEW: The environmental impacts of this project were analyzed in an Addendum to The Ontario Plan Environmental Impact Report (State Clearinghouse No. 2008101140), certified by the City Council on January 27, 2010, in conjunction with File No. PGPA06-001. This Application introduces no new significant environmental impacts. All previously adopted mitigation measures shall be a condition of project approval, as applicable, and are incorporated herein by this reference.

Exhibit A – Proposed AH, Affordable Housing Overlay Locations

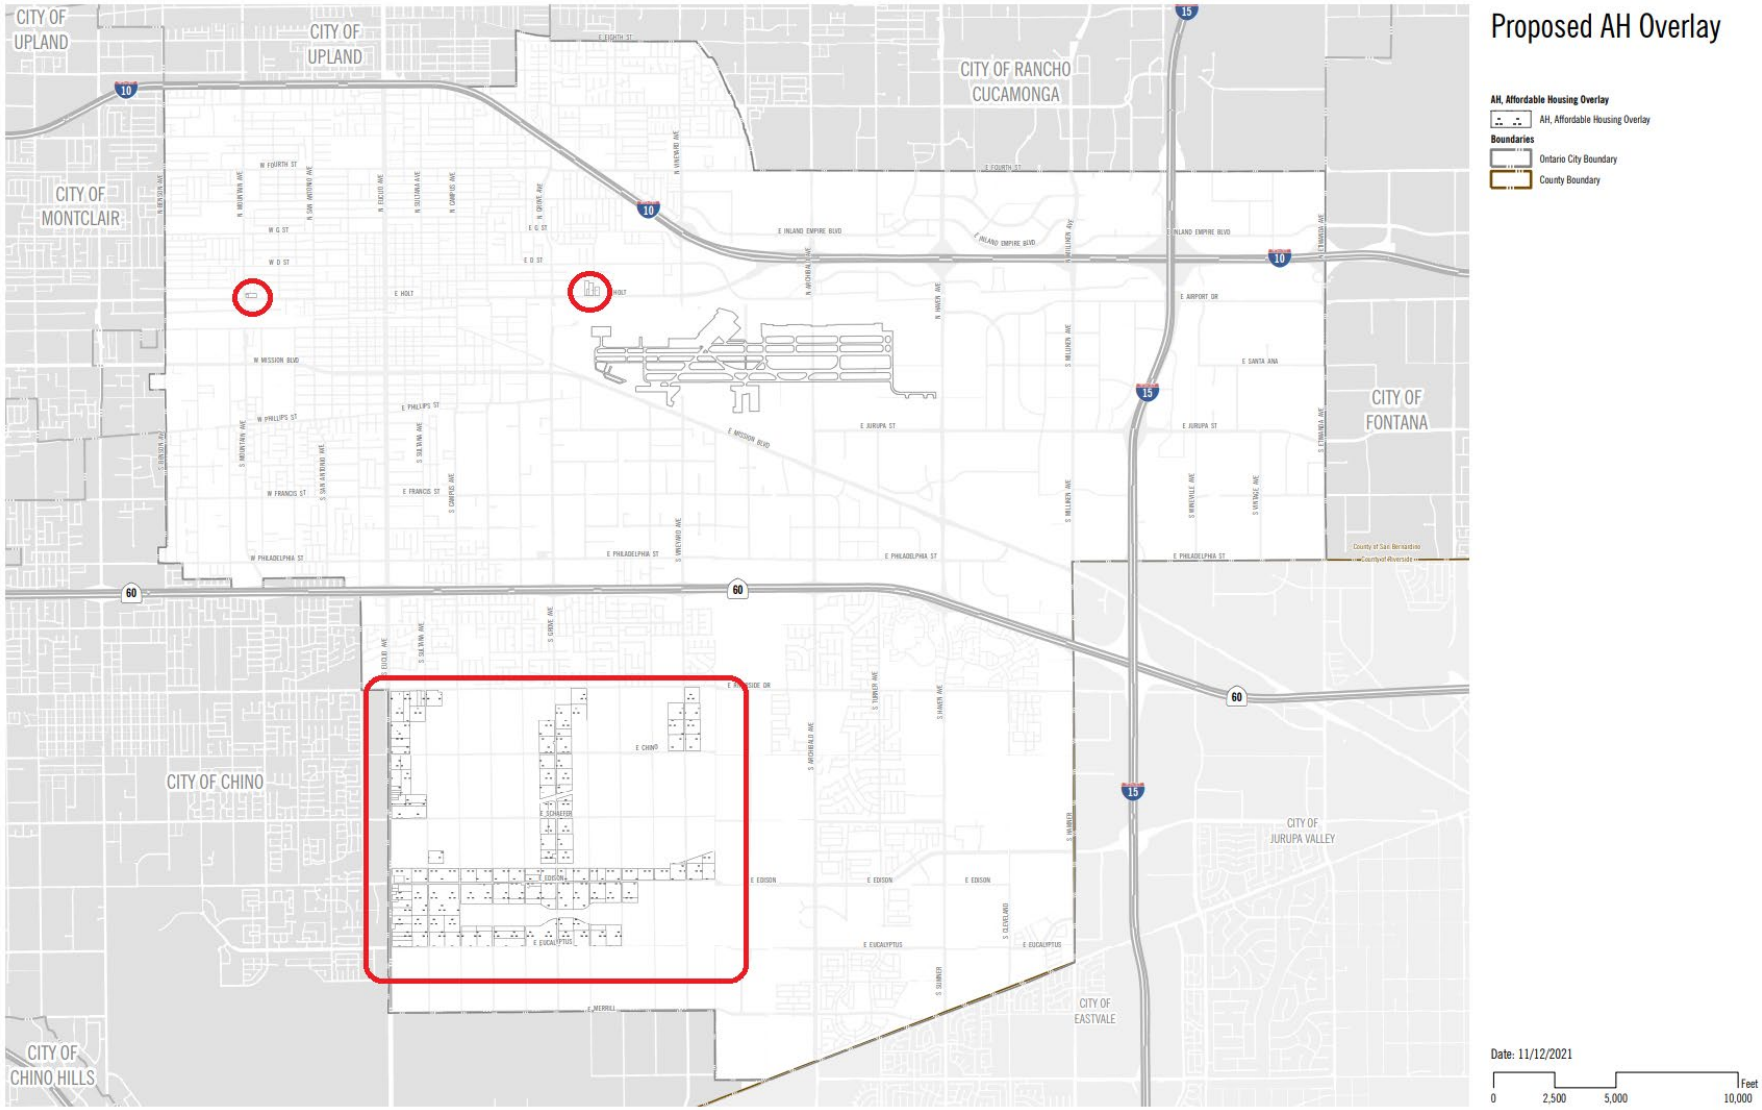

Exhibit B – Revised LU-01 with AH, Affordable Housing Overlay

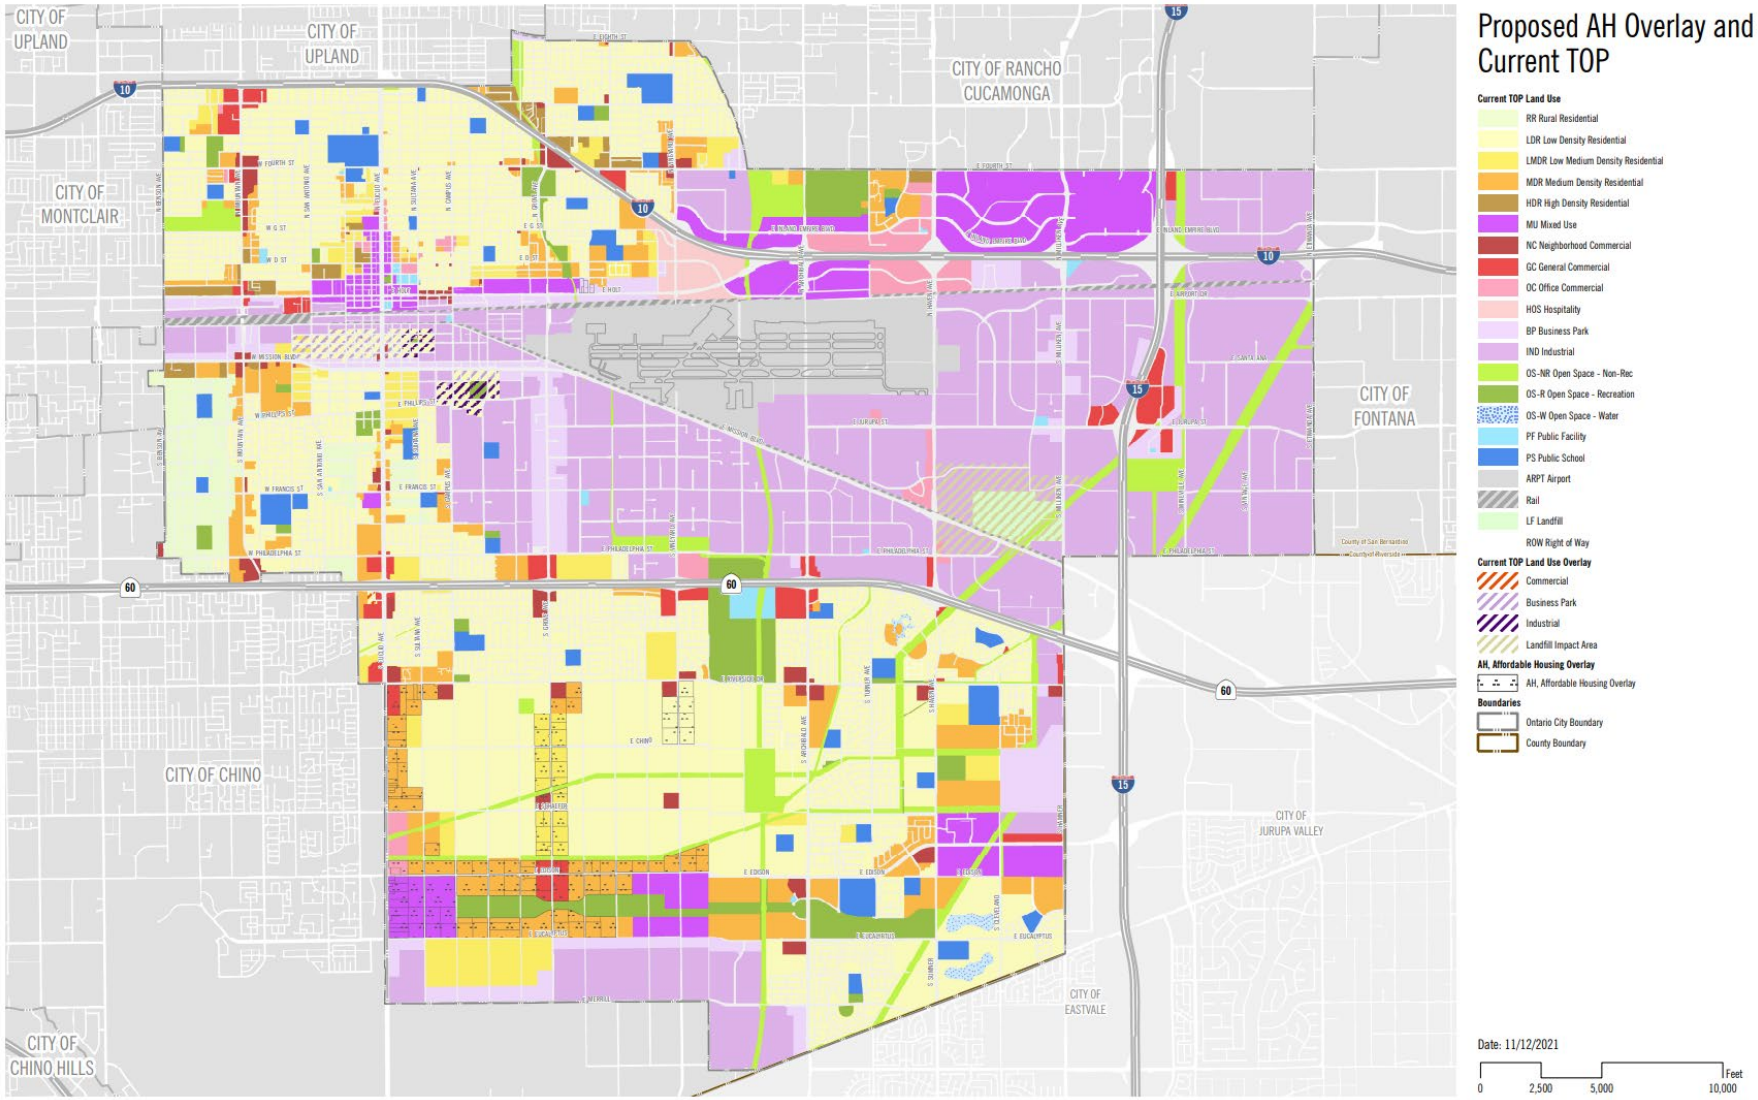

Exhibit C – Revised Zoning Map with AH, Affordable Housing Overlay

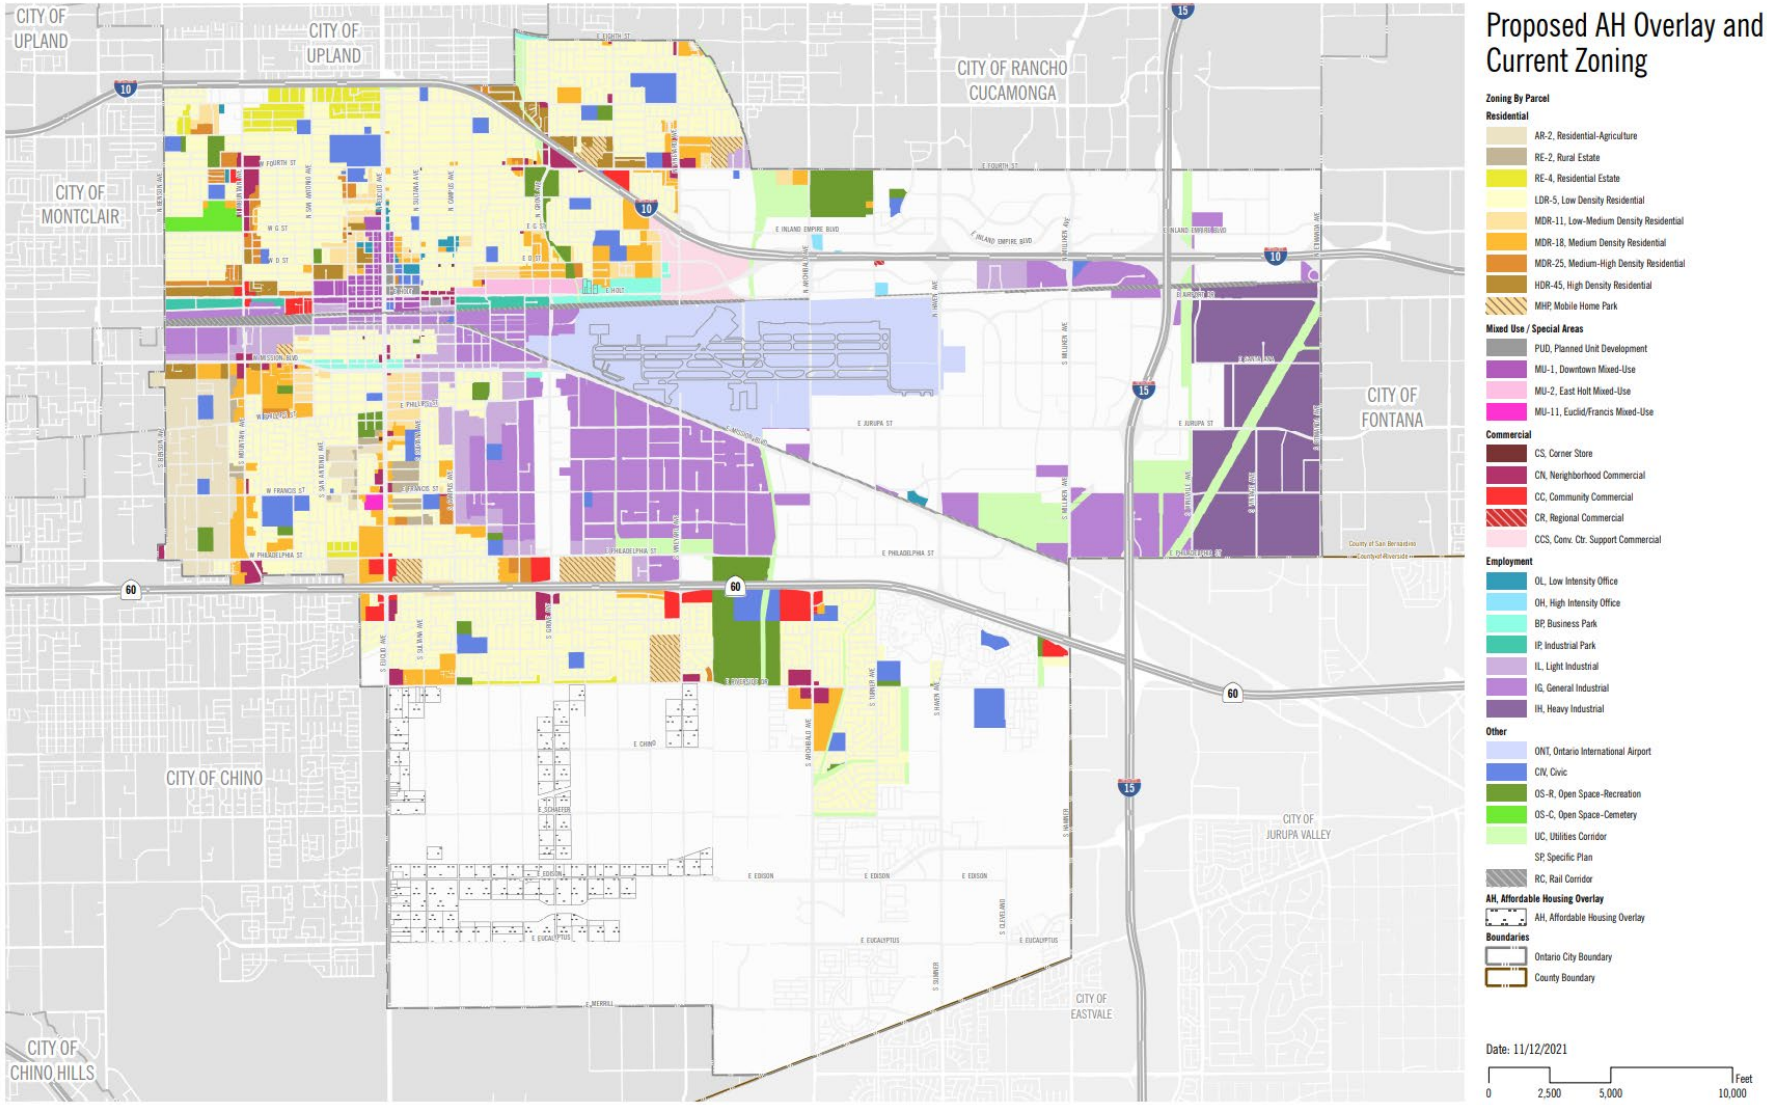

Exhibit D – Proposed Development Code Amendment
Draft DCA Section 6.01.035 (6. AH (Affordable Housing) Overlay District)

(Document follows this page)

Nonconforming Nonresidential Structure) of this Development Code and shall be developed consistent with the standards of the CC zoning district.

(3) *New Residential Development.* New residential development, which is proposed consistent with the Official Land Use Plan (Exhibit LU-01) of the Policy Plan component of The Ontario Plan, shall first require a zone change to the HDR-45 zoning district pursuant to Section 4.01.040 (Zone Changes) of this Development Code, and full compliance with the land use requirements, and development standards and guidelines of the HDR-45 zoning district.

(4) *Protection of ICC Overlay District Land Use and Development Rights.* All land use and development rights granted by the ICC Overlay District shall be transferable to any future owner(s) of property within the ICC Overlay District, and their assigns.

6. AH (Affordable Housing) Overlay District.

a. *Purpose.* The purpose of the AH Overlay District is to facilitate housing opportunities within the community via implementation of required rezone programs pursuant to the City's adopted Housing Element where required for compliance with State Housing Element law.

b. *Applicability.* The herein established rights and responsibilities applicable to the AH Overlay District shall apply to sites identified in the housing inventory, part of the City's Housing Element, located 1) south of Riverside Drive, 2) along East Holt Boulevard between the Cucamonga Creek Channel and Corona Avenue, and 3) areas designated as MU-2 at the northeast corner of West Holt Boulevard and Mountain Avenue.

c. *Definitions.*

(1) **Affordable Housing Project.** Affordable housing projects for the purposes of the affordable housing overlay are defined as follows:

(a) *Tier 1.* Any projects with a residential component with at least 20% of total units are designated as affordable to lower incomes via deed restriction or another mechanism to guarantee affordability for a minimum of 30 years.

(b) *Tier 2.* Any projects with a residential component with at least 25% of total units are designated as affordable to lower incomes via deed restriction or another mechanism to guarantee affordability for a minimum of 30 years.

d. *Development Standards.* The development standards applicable to proposed development in the Affordable Housing Overlay District shall be in accordance with the applicable base zone, other overlay zones, and all applicable provisions of The Development Code, unless otherwise indicated herein, or where necessary to comply with Federal and State law.

(1) **Minimum Density.** Within the AH Overlay District, all new residential development, regardless of affordability, requires a minimum density of 20 dwelling units per acre. The minimum density shall be calculated as an average over the entire project area on sites south of Riverside Drive.

(2) Affordable Housing Projects. Development of affordable housing projects, as defined for the purposes of the affordable housing overlay, shall be allowed by-right within the AH Overlay District and are encouraged in accordance with the following provisions:

(a) *Specific Plan Base Zoning.* Affordable housing projects with a base zoning designation of SP may develop as follows:

(i) *Tier 1 Affordable housing projects:*

- *Medium Density Residential.* Affordable housing projects on properties designated as MDR in the Policy Plan may be developed in accordance with either the SP zoning district or the MDR-25 zoning district.

- *Mixed Use.* Affordable housing projects on properties designated as MU in the Policy Plan may be developed in accordance with either the SP zoning district or a comparable existing zoning implementation tool that aligns with the density and intensity of the proposed project. The following exceptions would apply:

  - *Maximum Density.* The maximum density allowed is equivalent to the maximum density identified for the applicable Mixed-Use area in the Land Use Designations Summary Table (Table LU-02) of the Policy Plan component of The Ontario Plan.

- *Calculating Minimum Density.* If a project with a base designation of SP develops without a specific plan, minimum density shall be calculated as an average over the entire portion of the project area that is within the AH Overlay District.

(ii) *Tier 2 Affordable housing projects:*

- Same as Tier 1, with the following additions:

  - *Medium Density Residential.* Affordable housing projects on properties designated as MDR in the Policy Plan shall allow a maximum density of 25 to 30 dwelling units per acre.

RESOLUTION NO. PC21-093

A RESOLUTION OF THE PLANNING COMMISSION OF THE CITY OF ONTARIO, CALIFORNIA, RECOMMENDING THE CITY COUNCIL ADOPT AN ADDENDUM TO THE ONTARIO PLAN ENVIRONMENTAL IMPACT REPORT FOR FILE NOS. PGPA21-004, PZC-21-002, AND PDCA21-001, FOR WHICH AN INITIAL STUDY WAS PREPARED, IN ACCORDANCE WITH THE REQUIREMENTS OF THE CALIFORNIA ENVIRONMENTAL QUALITY ACT, AS AMENDED, AND MAKING FINDINGS IN SUPPORT THEREOF.

WHEREAS, CITY OF ONTARIO (hereinafter referred to as "Applicant") has filed an Application for the approval of File Nos. PGPA21-004, General Plan Amendment, PZC-21-002, Zone Change, and PDCA21-001, Development Code Amendment, as described in the title of this Resolution (hereinafter referred to as "Application" or "Project"); and

WHEREAS, THE ONTARIO PLAN ("TOP") Environmental Impact Report (State Clearinghouse No. 2008101140) was certified on January 27, 2010 (hereinafter referred to as "Certified EIR"), in which development and use of the Project site was discussed; and

WHEREAS, the Planning Director of the City of Ontario has prepared and approved for attachment to the certified Environmental Impact Report, an Addendum to the Certified EIR (hereinafter referred to as "EIR Addendum") in accordance with the requirements of the California Environmental Quality Act of 1970, together with State and local guidelines implementing said Act, all as amended to date (collectively referred to as "CEQA"); and

WHEREAS, the EIR Addendum concluded that implementation of the Project would not propose additional growth that was not evaluated under the 2010 Certified EIR or change the buildout evaluated under the Approved Project, and no substantial changes in circumstances under CEQA Guidelines Section 15162(a)(2) have occurred since the certification of the 2010 EIR that would indicate new significant impacts or substantially increase the severity of significant impacts previously identified and background environmental conditions have not significantly changed since the certification of the 2010 Certified EIR. Additionally, no information that was not known and could not have been known at the time of the 2010 Certified EIR preparation has been revealed that shows new or substantially greater significant impacts would result under Section 15162(a)(3). There are no new or different mitigation measures that would substantially reduce one or more significant impacts of the Approved Project but that are not adopted. The Proposed Project does not identify or require adoption of any further mitigation measures beyond those provided in the Certified EIR; and

WHEREAS, pursuant to State CEQA Guidelines Section 15164(a), a lead agency shall prepare an addendum to a previously certified EIR if some changes or additions are necessary to a project, but the preparation of a subsequent or supplemental EIR is not required; and

WHEREAS, the City determined that none of the conditions requiring preparation of a subsequent or supplemental EIR would occur from the Project, and that preparation of an Addendum to the Certified EIR was appropriate; and

WHEREAS, the City of Ontario is the lead agency on the Project, and the Planning Commission is the recommending authority for the requested approval to construct and otherwise undertake the Project; and

WHEREAS, the Planning Commission has reviewed and considered the EIR Addendum for the Project, has concluded that none of the conditions requiring preparation of a subsequent of supplemental EIR have occurred, and intends to take actions on the Project in compliance with CEQA and state and local guidelines implementing CEQA; and

WHEREAS, the EIR Addendum for the Project is on file in the Planning Department, located at 303 East B Street, Ontario, CA 91764, are available for inspection by any interested person at that location and are, by this reference, incorporated into this Resolution as if fully set forth herein; and

WHEREAS, Ontario Development Code Table 2.02-1 (Review Matrix) grants the Planning Commission the responsibility and authority to review and make recommendation to City Council on the subject Application; and

WHEREAS, City of Ontario Development Code Division 2.03 (Public Hearings) prescribes the manner in which public notification shall be provided and hearing procedures to be followed, and all such notifications and procedures have been completed; and

WHEREAS, all legal prerequisites to the adoption of this Resolution have occurred.

NOW, THEREFORE, IT IS HEREBY FOUND, DETERMINED, AND RESOLVED by the Planning Commission of the City of Ontario, as follows:

SECTION 1: ***Environmental Determination and Findings.*** As the recommending body for the Project, the Planning Commission has reviewed and considered the information contained in the administrative record for the Project. Based upon the facts and information contained in the administrative record, including all written

and oral evidence presented to the Planning Commission, the Planning Commission finds as follows:

(1) The environmental impacts of this project were reviewed in conjunction with an Addendum to The Ontario Plan ("TOP") Environmental Impact Report— State Clearinghouse No. 2008101140 ("Certified EIR"), which was certified by the Ontario City Council on January 27, 2010, in conjunction with File Nos. PGPA21-004, PZC-21-002, and PDCA21-001; and

(2) The EIR Addendum and administrative record have been completed in compliance with CEQA, the State CEQA Guidelines, and the City of Ontario Local CEQA Guidelines; and

(3) The City's "Guidelines for the Implementation of the California Environmental Quality Act (CEQA)" provide for the use of a single environmental assessment in situations where the impacts of subsequent projects are adequately analyzed. This Application introduces no new significant environmental impacts; and

(4) The EIR Addendum contains a complete and accurate reporting of the environmental impacts associated with the Project, and reflects the independent judgment of the Planning Commission; and

(5) There is no substantial evidence in the administrative record supporting a fair argument that the project may result in significant environmental impacts; and

(6) The proposed project will introduce no new significant environmental impacts beyond those previously analyzed in the Certified EIR, and all mitigation measures previously adopted by the Certified EIR, are incorporated herein by this reference.

SECTION 2: ***Additional Environmental Review Not Required.*** Based on the Addendum, all related information presented to the Planning Commission, and the specific findings set forth in Section 1, above, the Planning Commission finds that the preparation of a subsequent or supplemental Environmental Impact Report is not required for the Project, as the Project:

(1) Does not constitute substantial changes to the Certified EIR that will require major revisions to the Certified EIR due to the involvement of new significant environmental effects or a substantial increase in the severity of previously identified significant effects; and

(2) Does not constitute substantial changes with respect to the circumstances under which the Certified EIR was prepared, that will require major revisions to the

Certified EIR due to the involvement of new significant environmental effects or a substantial increase in the severity of the previously identified significant effects; and

(3) Does not contain new information of substantial importance that was not known and could not have been known with the exercise of reasonable diligence at the time the Certified EIR was certified/adopted, that shows any of the following:

(a) The Project will have one or more significant effects not discussed in the Certified EIR; or

(b) Significant effects previously examined will be substantially more severe than shown in the Certified EIR; or

(c) Mitigation measures or alternatives previously found not to be feasible would in fact be feasible and would substantially reduce one or more significant effects of the Project, but the City declined to adopt such measures; or

(d) Mitigation measures or alternatives considerably different from those analyzed in the Certified EIR would substantially reduce one or more significant effects on the environment, but which the City declined to adopt.

SECTION 3: ***Planning Commission Action.*** Based upon the findings and conclusions set forth in Sections 1 and 2, above, the Planning Commission hereby finds that based upon the entire record of proceedings before it, and all information received, that there is no substantial evidence that the Project will constitute substantial changes to the Certified EIR, and does hereby approve the EIR Addendum, attached hereto as "Attachment A," and incorporated herein by this reference.

SECTION 4: ***Custodian of Records.*** The documents and materials that constitute the record of proceedings on which these findings have been based are located at the City of Ontario City Hall, 303 East "B" Street, Ontario, California 91764. The custodian for these records is the City Clerk of the City of Ontario.

SECTION 5: ***Certification to Adoption.*** The Secretary shall certify to the adoption of the Resolution.

- - - - - - - - - - - - - -

The Secretary Pro Tempore for the Planning Commission of the City of Ontario shall certify as to the adoption of this Resolution.

I hereby certify that the foregoing Resolution was duly and regularly introduced, passed and adopted by the Planning Commission of the City of Ontario at a special meeting thereof held on the 20th day of December 2021, and the foregoing is a full, true and correct copy of said Resolution, and has not been amended or repealed.

Richard Gage
Planning Commission Chairman

ATTEST:

Rudy Zeledon
Planning Director and
Secretary to the Planning Commission

STATE OF CALIFORNIA)
COUNTY OF SAN BERNARDINO)
CITY OF ONTARIO)

I, Gwen Berendsen, Secretary Pro Tempore of the Planning Commission of the City of Ontario, DO HEREBY CERTIFY that foregoing Resolution No. PC21-093, was duly passed and adopted by the Planning Commission of the City of Ontario at their special meeting held on December 20, 2021, by the following roll call vote, to wit:

AYES: Anderson, Dean, DeDiemar, Gage, Lampkin, Willoughby

NOES: None

ABSENT: Ricci

ABSTAIN: None

1 PURPOSE OF THE ADDENDUM

This Addendum has been prepared in accordance with the provisions of the California Environmental Quality Act (CEQA) (California Public Resources Code [PRC] Section 21000 et seq.); the CEQA Guidelines (Title 14, California Code of Regulations [CCR] Section 15000 et seq.); and the rules, regulations, and procedures for implementing CEQA as set forth by the City of Ontario (City). The City is the lead agency under the CEQA.

Section 15164(a) of the CEQA Guidelines states that "the lead agency or a responsible agency shall prepare an addendum to a previously certified EIR if some changes or additions are necessary, but none of the conditions described in Section 15162 calling for preparation of a subsequent EIR have occurred." Pursuant to Section 15162(a) of the CEQA Guidelines, a subsequent Environmental Impact Report (SEIR) or Negative Declaration is only required when:

(1) Substantial changes are proposed in the project which will require major revisions of the previous EIR or negative declaration due to the involvement of new significant environmental effects or a substantial increase in the severity of previously identified significant effects;

(2) Substantial changes occur with respect to the circumstances under which the project is undertaken which will require major revisions of the previous EIR or Negative Declaration due to the involvement of new significant environmental effects or a substantial increase in the severity of previously identified significant effects; or

(3) New information of substantial importance, which was not known and could not have been known with the exercise of reasonable diligence at the time the previous EIR was certified as complete or the Negative Declaration was adopted, shows any of the following:

   (A) The project will have one or more significant effects not discussed in the previous EIR or negative declaration;

   (B) Significant effects previously examined will be substantially more severe than shown in the previous EIR;

   (C) Mitigation measures or alternatives previously found not to be feasible would in fact be feasible, and would substantially reduce one or more significant effects of the project, but the project proponents decline to adopt the mitigation measure or alternative; or

   (D) Mitigation measures or alternatives which are considerably different from those analyzed in the previous EIR would substantially reduce one or more significant effects on the environment, but the project proponents decline to adopt the mitigation measure or alternative.

The Ontario Plan (Ontario General Plan [GP]) and Final Environmental Impact Report (Ontario GP EIR) was adopted by the City Council on January 27, 2010.[1] The Ontario GP is intended to guide the City's growth and development. While the document was not created with an expiration timeline, the information used

[1] City of Ontario. (2010). Monthly Activity Report—Actions Month of: January 2010. Page 2. Retrieved from: https://www.ontarioca.gov/sites/default/files/Ontario-Files/Planning/Monthly-Activity-Reports/january_2010.pdf (Accessed August 19, 2021)

in its creation and goals that were created were based on a 2035 horizon year. Since its certification, the Ontario GP and Ontario GP EIR have been the basis for growth metrics in the City and act as the guidelines for continued development within the City. The Ontario Plan includes six components which create a more comprehensive guideline.

1. **The Vision Component** provides a broad outlook at the City's character and the ideal direction of future growth. This component outlines the intention of the Ontario GP and the foundational concepts necessary for the creation of a prosperous community. These concepts include dynamic balance, a prosperous economy, distinctive development, and recognized leadership.

2. **The Governance Manual** contextualizes the Ontario GP as a business plan for the City. It explains how The Ontario Plan is a tool for decision making and communication.

3. **The Policy Plan** states long-term goals, principles, and policies for achieving Ontario's Vision. This component acts as the direct guide for continued growth and development within the City and fully defines each aspect of life within the City. The policy plan addresses each aspect of life within the City through seven elements:

    a. Land Use
    b. Community Design
    c. Community Economics
    d. Environmental Resources
    e. Safety
    f. Social Resources
    g. Mobility

4. **The City Council Priorities** consist of short term actions and objectives considered by the current City council. These goals span a single fiscal year with the current set of goals to be implemented in the 2020/2021 fiscal year.

5. **Implementation** describes the methods that the City intends to use in order to fully realize the goals of the Ontario GP. These methods include the formation of partnerships with other public or private entities and the adoption of master plans for physical developments or service systems including capital improvement programs and recreation master plans. Other methods relied upon to implement the City's goals include the creation of city initiatives, the consistent continuation of operational programs, and the facilitation of development projects.

6. **Tracking and Feedback** includes a system for public employees and private residents to adequately communicate with City departments and provide transparency in City operations.

2 DESCRIPTION OF PROPOSED PROJECT

2.1 Project Setting and Location

The Project site is located in the western portion of the City on the west side of Bon View Avenue approximately 130 feet north of the northwest corner of the intersection of Cedar Street and Bon View Avenue. **Exhibit 1, Regional Location Map** and **Exhibit 2, Project Vicinity Map** show the Project's location within the overall City as well as the Project's location within the surrounding community, respectively. Regional access to the site would be via California State Highway 60 (CA-60) approximately 0.5 miles south of the Project site with the nearest exit/entrance ramp located approximately 0.7 miles southeast of the Project, at CA-60's intersection with Grove Avenue.

The Project would occupy a 7.47 net acre site within the City and includes the following fifty-five (55) Assessor Parcel Numbers (APNs): 1050-441-05, 1050-441-09, 1050-441-11 through -62, and 1050-441-73. Note: The following APNs are condominium units via a previously recorded condominium plan, which will be removed prior to the Project's construction commencement: 1050-441-11 through -62.

Table 1: Assessor Parcel Numbers

1050-441-05	1050-441-09	1050-441-11	1050-441-12	1050-441-13	1050-441-14	1050-441-15
1050-441-16	1050-441-17	1050-441-18	1050-441-19	1050-441-20	1050-441-21	1050-441-22
1050-441-23	1050-441-24	1050-441-25	1050-441-26	1050-441-27	1050-441-28	1050-441-29
1050-441-30	1050-441-31	1050-441-32	1050-441-33	1050-441-34	1050-441-35	1050-441-36
1050-441-37	1050-441-38	1050-441-39	1050-441-40	1050-441-41	1050-441-42	1050-441-43
1050-441-44	1050-441-45	1050-441-46	1050-441-47	1050-441-48	1050-441-49	1050-441-50
1050-441-51	1050-441-52	1050-441-53	1050-441-54	1050-441-55	1050-441-56	1050-441-57
1050-441-58	1050-441-59	1050-441-60	1050-441-61	1050-441-62	1050-441-73	

The Project site is currently disturbed and developed with industrial uses and other improvements. The northern portion of the Project site contains two multi-tenant industrial buildings and surface lot improvements. The northeastern portion of the Project site includes three driveways connecting to Bon View Avenue. The remainder of the northern portion of the Project site consists of maintained grasses.

The southern portion of the Project site (APN 1050-441-05) contains four buildings, four shed structures, and one driveway connecting to Bon View Avenue. A residential building is located in the southeast corner of the Project site beside a large, shed structure. The southern portion of the Project, beside the residential property, is fully paved and used for parking and outdoor storage. Some trees are also present in both the northern and southern portions of the Project site.

Surrounding land uses include:

North/Northwest: Five (5) industrial warehouse buildings.

South: Non-Conforming residential building with ancillary industrial truck parking/outdoor storage

East: Bon View Avenue and two warehouse buildings.

West: Four (4) warehouse buildings.

The Project site's General Plan land use and zoning designations are as follows:

- General Plan Land Use: Industrial[2]
- Zoning: General Industrial (IG), Light Industrial (IL)[3]

While all the Project parcels have a General Plan land use designation of Industrial, only APN 1050-441-05 is zoned as Light Industrial (IL), while the remaining parcels are zoned General Industrial (IG).

2.2 Project Description

The Project proposes the development of one 174,603 square foot (sf) warehouse building containing 170,103 sf of refrigerated warehouse space and approximately 4,500 sf of two-story office space in the southeast corner of the proposed building. The Project site would have a floor area ratio (FAR) of 0.54 (0.55 FAR is the maximum allowed in Industrial land use areas) and the proposed building would have an approximate building height of 45' (maximum of 55' permitted). Project site improvements would also include surface parking, landscaping, and internal drive aisles. Access to the Project site would be established through two driveways along the eastern portion of the site connecting to Bon View Avenue. The Project is speculative in nature; the end user, their use of the potential refrigerated warehouse space, and their hours of operation are unknown at this time. However, to be conservative, it has been assumed that the building would operate 24 hours per day/7 days per week for the Addendum's Health Risk Assessment (Appendix C) referenced herein. **Exhibit 3, Conceptual Site Plan**, **Exhibit 4.1, Elevations,** and **Exhibit 4.2, Conceptual Elevations** visualizes the proposed Project's dimensions and planned improvements.

2.2.1 Access

Regional

Regional access to the Project site is provided via CA-60, approximately 0.5 mile south of the Project site, with exits at Grove Avenue and Euclid Avenue.

Local

Local access to the Project site is provided via Bon View Avenue which is an 88' Right of Way (ROW) collector street that trends in a north-south direction.

[2] City of Ontario. 2010. Exhibit LU-01 Land Use Plan. https://www.ontarioplan.org/wp-content/uploads/sites/4/2021/05/TOPLUP_Map24x3610_6_20210524_V_1.pdf (accessed August 2021).

[3] City of Ontario. Rev. 2021. Zoning Map. https://www.ontarioca.gov/sites/default/files/Ontario-Files/Planning/Documents/Zoning%20Map/Zoning_20210212.pdf (accessed August 2021).

Project Site

Project site main ingress and egress driveway would be provided via one 40-foot wide driveway (north) and one 30' – 6" wide driveway (south) located along the eastern border of the site along Bon View Avenue. The driveways would connect directly to Bon View Avenue and allow full access movement for both vehicles and trucks.

2.2.2 Parking

The Project would include the provision of 100 standard 9'x18' stalls and 19 12'x45' trailer parking stalls. Per City requirements, the Project is required to provide 98 standard stalls and six trailer stalls, and as such, provides sufficient parking.

2.2.3 Landscaping

The Project is anticipated to landscape approximately 10.14 percent (32,529 sf) of the Project site, which is greater than the minimum required 10 percent (32,529 sf) as required by the Ontario Development Code. For additional detail, please refer to **Exhibit 5, Conceptual Landscape Plan**.

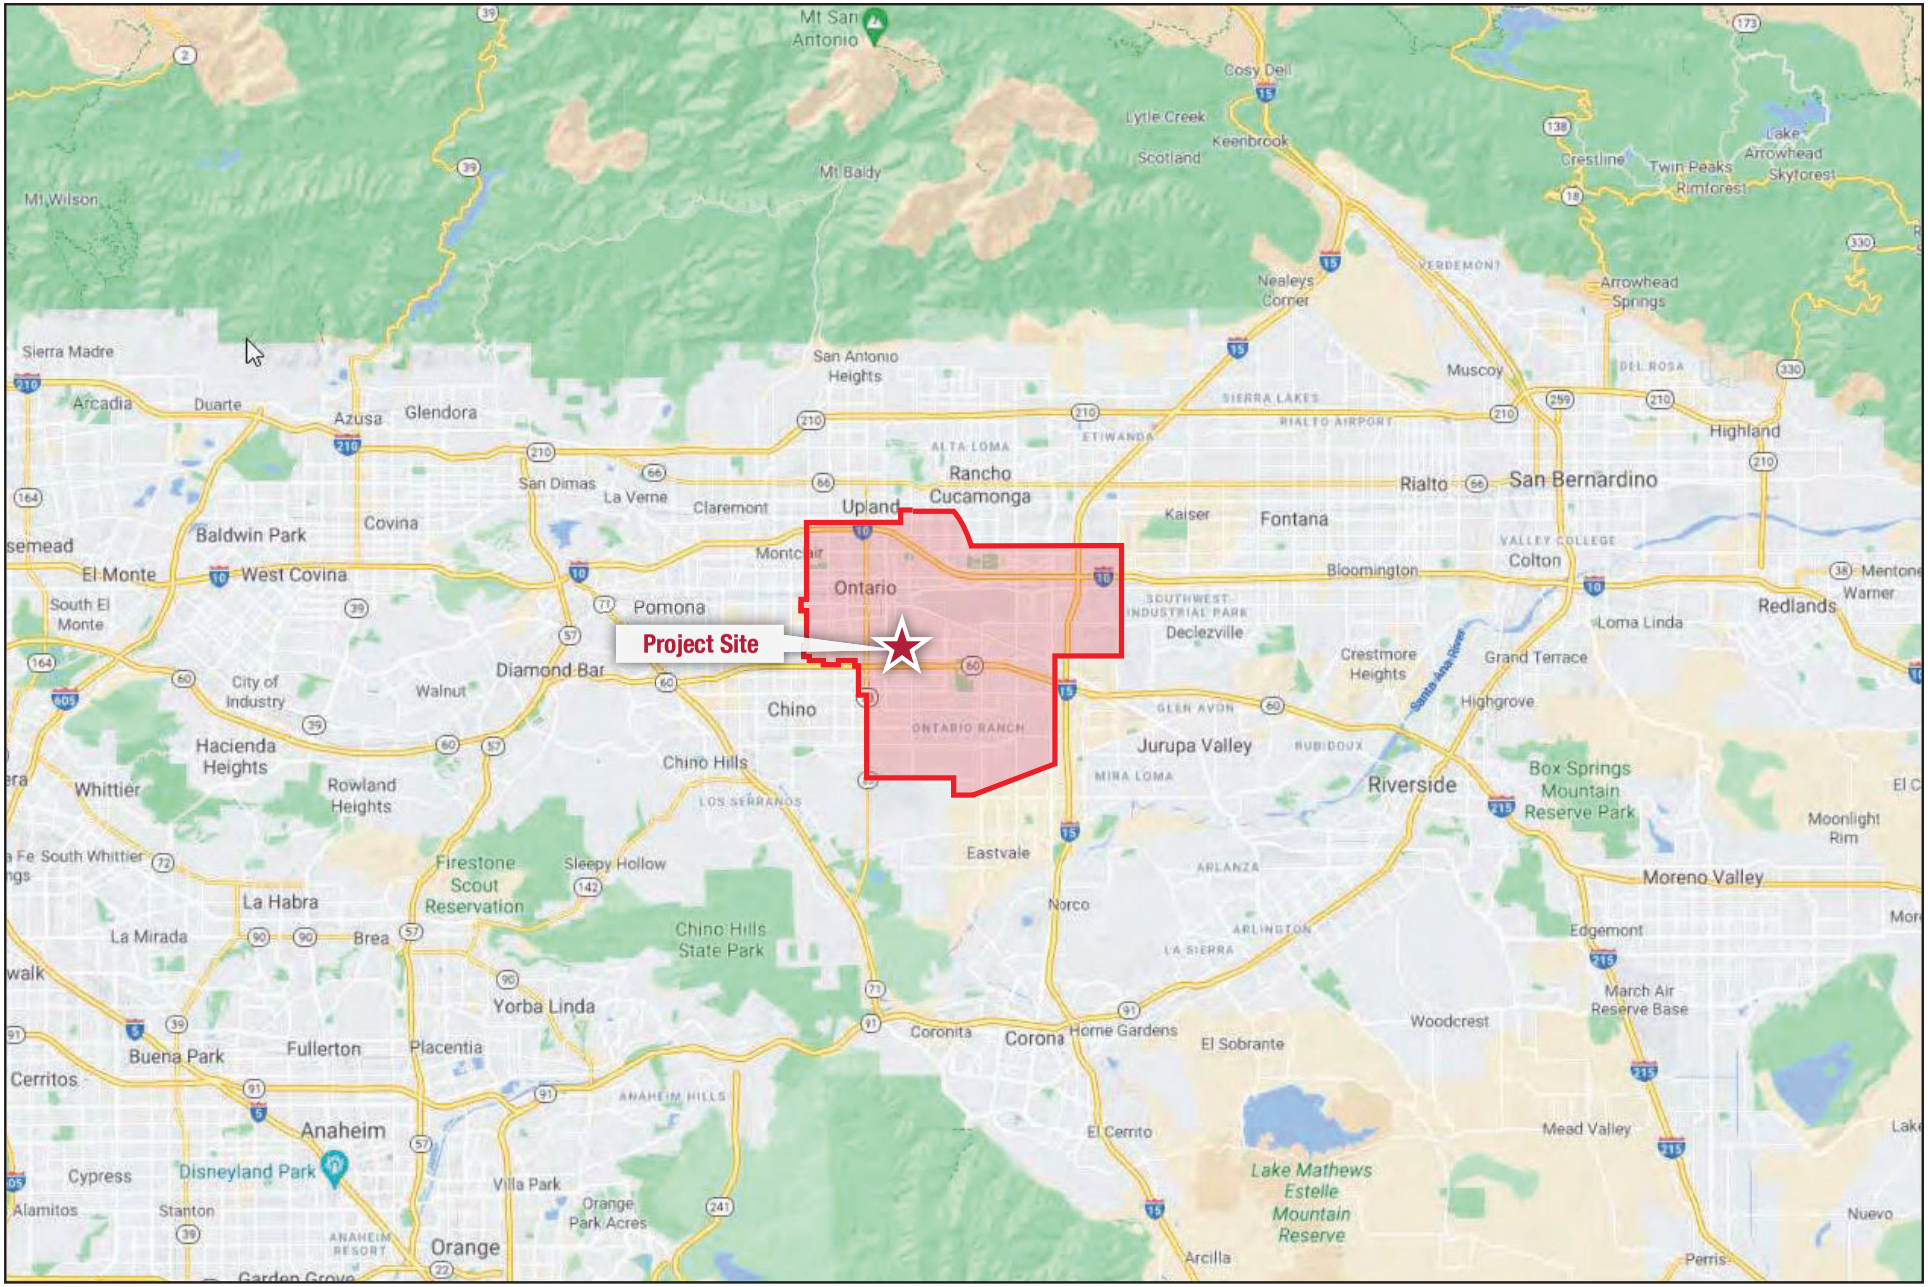
2.2.4 Site Excavation and Grading Activities

The Project site is flat, sloping gently downward from north to the south and west to east, with change in ground surface elevation from approximately 872 feet to 864 feet. The soil cut would be 26,606 cubic yards (cy) and fill would also be 26,606 cy. As such, the Project site is anticipated to balance on-site and no need for soil import or export is anticipated; refer to **Exhibit 6, Conceptual Grading Plan**.

2.2.5 Site Drainage

There are five (5) onsite catch basins which convey stormwater via 12"-18" high-density polyethylene (HDPE) pipes into 206 underground infiltration chambers to treat the stormwater. Depending on the size of the storm event, the stormwater is either (1) entirely conveyed into the storm chambers where it is treated by percolating into the soil, or (2) the 85th percentile percolates into the soil with the excess being discharged directly onto Bon View Avenue (there is no existing public storm drain to tie-into) through two (2) 4'-5' parkway drains; refer to **Exhibit 6, Conceptual Grading Plan**.

2.3 Construction Schedule



Construction is anticipated to begin in July 2022 and is anticipated to require nine (9) months, concluding in April 2023 (est.).

2.4 Project Approvals

The City is the Lead Agency as set forth in CEQA Statute Section 21067 and is responsible for reviewing and approving the Addendum to The Ontario Plan Ontario GP EIR. In addition to the Addendum, the City will consider the following discretionary approvals for the Project:

- **Development Plan** - Design of the proposed site and building improvements.

- **Lot Line Adjustment (LLA)** - Consolidation of three (3) parcels (currently 55 APN's due to an existing, recorded condominium plan that is to be removed prior to the Project's construction commencement) into one parcel.
- **Zone Change** – Rezone of southerly parcel totaling ±2.90 net acres (APN No. 1050-441-05) from Light Industrial (IL) to General Industrial (IG) to remove the existing "split" zoning on the Project site.
- **Certificate of Appropriateness** – Analysis of the approx. 1,008 square foot building located at 1948 S. Bon View Avenue (APN No. 1050-441-05) as a historic resource, and the required treatment thereof.

3 THE ONTARIO PLAN EIR ENVIRONMENTAL IMPACT ANALYSIS SUMMARY

The environmental impact findings of the Ontario GP EIR are summarized below.

No Impact: The Ontario GP EIR determined that no impact would occur with respect to the following environmental topic areas below. These impacts were included in the Ontario GP EIR's "Effects Found Not To Be Significant (EFNTBS)" section (Section 8.0 of the Draft EIR).

- Aesthetics (EFNTBS I(b));
- Hazards and Hazardous Materials (EFNTBS VII(f)); and
- Noise (EFNTBS XI(f)).

Less Than Significant Impact: The Ontario GP EIR identified less than significant impacts in the following environmental topic areas:

- Aesthetics (Impacts 5.1.1 through 5.1.3);
- Air Quality (Impact 5.3-4);
- Biological Resources (Impacts 5.4-1 through 5.4-5);
- Cultural Resources (Impact 5.5-3);
- Geology and Soils (Impacts 5.7-1 through 5.7-3);
- Hazards and Hazardous Materials (Impacts 5.8-1 through 5.8-6);
- Hydrology and Water Quality (Impacts 5.9-1 through 5.9-6);
- Land Use and Planning (Impacts 5.10-1 through 5.10-3);
- Mineral Resources (Impact 5.11-1);
- Population and Housing (Impacts 5.13-1, 5.13-2);
- Public Services (Impacts 5.14-1 through 5.14-4);
- Recreation (Impacts 5.15-1, 5.15-2);
- Transportation/Traffic (Impacts 5.16-2 through 5.16-5); and
- Utilities and Service Systems (Impacts 5.17-2 through 5.17-5).

Less Than Significant Impact with Incorporation of Mitigation: The Ontario GP EIR identified impacts that could be mitigated to less than significant levels with incorporation of mitigation measures in the following environmental topic areas:

- Cultural Resources (Impact 5.5-2);
- Noise (Impact 5.12-4); and
- Utilities and Service Systems (Impact 5.17-1).

Significant and Unavoidable Impact: The Ontario GP EIR identified significant and unavoidable impacts in the following environmental topic areas:

- Agriculture Resources (Impacts 5.2-1 through 5.2-3);
- Air Quality (Impacts 5.3-1, 5.3-2, 5.3-3, 5.3-5, 5.3-6);

- Cultural Resources (Impact 5.5-1);
- Global Climate Change (Impact 5.6-1);
- Noise (Impact 5.12-1, 5.12-2, 5.12-3, 5.12-5, 5.12-6); and
- Transportation/Traffic (Impact 5.16-1).

4 BON VIEW AVENUE WAREHOUSE PROJECT ENVIRONMENTAL IMPACT ANALYSIS AND PROJECT APPROVALS

The scope of the City's review of the Project is set forth in CEQA and the CEQA Guidelines. This review is limited to evaluating the environmental effects associated with the Project when compared to the Ontario GP as set forth in the Ontario GP EIR. This Addendum also reviews new information, if any, of substantial importance that was not known and could not have been known with the exercise of reasonable due diligence at the time the Ontario GP EIR was certified. This evaluation includes a determination as to whether the changes proposed for the Project would result in any new significant impacts or more severe significant impact.

Although CEQA Guidelines Section 15164 does not stipulate the format or content of an Addendum, the topical areas identified in The Ontario Plan EIR were used as guidance for this Addendum. In addition, Section 15164(e) of the CEQA Guidelines states that "A brief explanation of the decision not to prepare a subsequent EIR pursuant to Section 15162 should be included in an addendum to an EIR, the lead agency's findings on the Project, or elsewhere in the record. The explanation must be supported by substantial evidence." This comparative analysis provides the City with the factual basis for determining whether any changes in the Project, any changes in circumstances, or any new information since the Ontario GP EIR was certified would require additional environmental review or preparation of an SEIR.

Pursuant to CEQA Guidelines Section 15162, the City has determined, on the basis of substantial evidence in the light of the whole record, that implementation of the Project does not propose substantial changes to the Ontario GP EIR, no substantial changes in circumstances would occur which would require major revisions to the Ontario GP EIR, and no new information of substantial importance has been revealed since the certification of Ontario GP EIR that would result in either new significant effects or an increase in the severity of previously analyzed significant effects.

A Mitigation Monitoring and Reporting Program (MMRP) was adopted as a part of the Ontario GP EIR that minimized impacts associated with implementation of the Ontario GP EIR. The previously adopted Ontario GP EIR mitigation measures applicable to the Project would be collectively imposed as the Project's MMRP, which is contained in Appendix A.

4.1 Aesthetics

4.1.1 Summary of Previous Environmental Analysis

The Ontario GP EIR concluded that further development of the City as proposed in the Ontario GP would not impact scenic vistas due to continued adherence to the applicable provisions of the Ontario Municipal Code (Ontario MC) and Ontario Development Code. The visual character of the City would be accentuated with the implementation of the Ontario GP and its associated Community Design Element as well as continued compliance with the Ontario MC and Ontario Development Code. Furthermore, the Ontario GP's continued adherence to the Ontario MC and Ontario Development Code was also anticipated to create a less than significant impact from the adverse generation of light and glare.

Impacts associated with scenic resources, long-term visual character, and light/glare were determined to be less than significant. No mitigation measures were deemed necessary.

4.1.2 Analysis of Proposed Project

Threshold (a) Have a substantial adverse effect on a scenic vista? [Ontario GP EIR Impact 5.1-1]

No New or More Severe Impacts: The Project would not have a more severe or substantial adverse effect on a scenic vista than what was originally analyzed in the Ontario GP EIR. The Ontario GP EIR cited the San Gabriel Mountains as the main scenic vista visible from the City. It was concluded that the inclusion of provisions requiring retention of significant natural features and open space preservation of views, contour grading, natural landscaping, and architectural design that blends with the natural terrain of the City would ensure that future development would not interfere with the views of the City's scenic vista.

The San Gabriel Mountains are visible north of the City and Project site. However, views of the San Gabriel Mountains are currently obstructed by existing development. As described in **Section 2.1, Project Setting and Location**, the Project would be developed within an area that has been previously developed for industrial and warehousing uses. This area is heavily developed with multiple warehousing buildings within the Project site as well as adjacent to the Project site to the north, south, east, and west.

Development of the Project would be required to comply with established City regulations regarding development and building dimensions. This includes those presented in Ontario Development Code Section 6.01.025 for industrial zoning districts. The Project would be within the acceptable threshold for building height, which would otherwise further impact views of the San Gabriel Mountains.

Accordingly, no new impacts relative to adverse effects on a scenic vista or a substantial increase in the severity of a previously identified significant impact evaluated in the Ontario GP EIR would occur. Additionally, no new information of substantial importance that was not known and could not have been known at the time the Ontario GP EIR was certified is available that would impact the prior finding of no significant impact.

Mitigation Program

Mitigation Measures from the Ontario GP EIR

None identified in the Ontario GP EIR.

Conclusion

The Project would result in no new or more severe impact on a scenic vista(s). A less than significant impact was identified in the Ontario GP EIR with respect to scenic vistas. The Project would be designed consistent with the applicable guidelines and standards within the Ontario GP, Ontario MC, and Ontario Development Code. Therefore, no new and/or modified mitigation measures are required for issues related to aesthetics.

Threshold (b) Substantially damage scenic resources, including, but not limited to, trees, rock outcroppings, and historic buildings within a scenic highway? [Not analyzed in Ontario GP EIR]

Threshold (c) Conflict with applicable zoning and other regulations governing scenic quality? [Ontario GP EIR Impact 5.1-2]

No New or More Severe Impact: The Project site is not within or adjacent to a scenic highway. No eligible or officially designated highways exist within the City.[4]

The Project would change the site appearance from hosting four warehousing structures, a residential building, and outdoor storage areas to a warehouse building. The Project site is surrounded by land zoned for industrial use with a General Plan land use designation for industrial use. Accordingly, no new impacts relative to adverse aesthetic impacts or a substantial increase in the severity of a previously identified significant impact evaluated in the Ontario GP EIR would occur. As previously stated, the Project would comply with policies presented in the Ontario GP Community Design element. Compliance with the provisions of this element would ensure that the Project would be developed with not only modern architectural design sensibilities and materials, but also consistent with the established visual character of the area.

Mitigation Program

Mitigation Measures from the Ontario GP EIR

None identified in the Ontario GP EIR.

Conclusion

The Project would result in no new or more severe impacts on the City's visual character or quality. A less than significant impact was identified in the Ontario GP EIR with respect to scenic vistas. The Project would be designed consistent with the applicable guidelines and standards within the Ontario GP, Ontario MC, and Ontario Development Code. Therefore, no new and/or modified mitigation measures are required for issues related to aesthetics.

[4] California Department of Transportation (CalTrans). (2018). *California State Scenic Highway System Map.* Retrieved from: https://caltrans.maps.arcgis.com/apps/webappviewer/index.html?id=465dfd3d807c46cc8e8057116f1aacaa (Accessed August 17, 2021)

Threshold (d) Create a new source of substantial light or glare, which would adversely affect day or nighttime views in the area? [Ontario GP EIR Impact 5.1-3]

No New or More Severe Impact: As stated in the Ontario GP EIR, impacts regarding light and glare would remain less than significant as long as future projects complied with Ontario Development Code Section 6.01.025 (cited as Section 9-1.3325 in the Ontario GP EIR).

Consistent with the Ontario Development Code, and as applicable, all exterior lighting shall be adequately controlled and shielded to prevent glare and undesirable illumination to adjacent properties or streets. Adequate lighting levels shall be provided to ensure a safe environment, while not creating areas of intense light or glare. Light fixtures and poles shall also be designed and placed in a manner consistent and compatible with overall site and building design, and high-intensity security lighting fixtures shall not be substituted for site or landscape lighting or general building exterior illumination, but shall be limited to loading and storage locations or other similar service areas. In addition, all lighting provided to illuminate parking areas or buildings shall be positioned so as to direct light away from adjoining properties.

These regulations are considered to be either design measures or existing regulations pursuant to CEQA standards. Incorporation of such features into the Project would ensure proper design, installation, and operation of all exterior lighting, thereby reducing the potential for glare effects or light spillover onto adjacent properties. As such, consistency with the Ontario MC and Ontario Development Code would ensure that potential impacts associated with light and glare would be less than significant. Consistent with the Ontario GP EIR, no mitigation measures are required.

Accordingly, no new or more severe impacts relative to adverse aesthetic impacts would occur. Additionally, no new information of substantial importance that was not known and could not have been known at the time the Ontario GP EIR was certified is available that would impact the prior finding of no significant impact.

Mitigation Program

Mitigation Measures from the Ontario GP EIR

None identified in the Ontario GP EIR.

Conclusion

The Project would result in no new or more severe impacts from light or glare. No significant impacts associated with light and glare are identified in the Ontario GP EIR. The Project would be designed consistent with the applicable guidelines and standards within the Ontario MC and Ontario Development Code. Therefore, no new and/or modified mitigation measures are required for issues related to aesthetics.

Overall Aesthetics Impact Conclusion

With regard to CEQA Statute Section 21166 and the CEQA Guidelines Section 15162(a), the Project would not result in any new or more severe impacts with respect to aesthetics. Therefore, the preparation of a SEIR is not warranted.

4.2 Agricultural and Forestry Resources

4.2.1 Summary of Previous Environmental Analysis

The City of Ontario GP EIR identified the potential of agricultural impacts upon implementation of the Ontario GP due to the lack of agriculturally designated parcels or land. Furthermore, it was identified that no limitations were present in the City's regulations that prevented agriculturally developed lands from transitioning to nonagricultural uses. Significant impacts were anticipated with the buildout of the Ontario GP due to conflicts with established Williamson Contracts and surrounding farms.

4.2.2 Analysis of Proposed Project

Threshold (a) Convert Prime Farmland, Unique Farmland, or Farmland of Statewide Importance (Farmland), as shown on the maps prepared pursuant to the Farmland Mapping and Monitoring Program of the California Resources Agency, to non-agricultural use? [Ontario GP EIR Impact 5.2-1]

Threshold (b) Conflict with existing zoning for agricultural use, or a Williamson Act contract? [Ontario GP EIR Impact 5.2-2]

Threshold (c) Conflict with existing zoning for, or cause rezoning of, forest land (as defined in Public Resources Code section 12220(g)), timberland (as defined by Public Resources Code section 4526), or timberland zoned Timberland Production (as defined by Government Code section 51104(g))? [Not analyzed in Ontario GP EIR] [Updated CEQA Appendix G Threshold]

Threshold (d) Result in the loss of forest land or conversion of forest land to non-forest use? [Not analyzed in Ontario GP EIR] [Updated CEQA Appendix G Threshold]

Threshold (e) Involve other changes in the existing environment which, due to their location or nature, could result in conversion of Farmland, to non-agricultural use or conversion of forest land to no-forest land? [Ontario GP EIR Impact 5.2-3]

No New or More Severe Impact: The Project would be developed in a portion of the City designated for industrial land uses. Furthermore, the parcels in which the Project would occupy are currently developed for industrial and warehousing uses. The parcels are also currently zoned for General Industrial (IG) and Light Industrial (IL) uses which do not include agriculture or forestry. Therefore, the Project site would not be suitable for designation as Prime Farmland, Unique Farmland, Farmland of Statewide Importance, or Williamson Contract agriculture. Furthermore, the developed state of the Project would not cause its redevelopment to affect surrounding farms as no agricultural or forestry uses are adjacent or nearby to the Project site.

As such, no impacts related to the loss of farmland would occur. This is a lower level of impact severity than was found in the Ontario GP EIR. Because of the lack of agricultural impacts, no mitigation measures are necessary.

Mitigation Program

Mitigation Measures from the Ontario GP EIR

None identified in the Ontario GP EIR.

Overall Agricultural and Forestry Resources Impact Conclusion

The Project would result in no new or more severe impact to agricultural or forestry resources. Despite the significant and unavoidable impacts identified in the Ontario GP EIR, no significant impacts to agricultural resources are identified in relation to Project implementation. The Project is located within a previously developed and active area designated for industrial land uses; therefore, no new and/or refined mitigation measures are required for issues related to agricultural or forestry resources.

With regard to CEQA Statute Section 21166 and CEQA Guidelines Section 15162(a), the changes proposed by the Project would not result in any new or more severe impacts with respect to agricultural and forestry resources. Therefore, preparation of a SEIR is not warranted.

4.3 Air Quality

4.3.1 Summary of Previous Environmental Analysis

The Ontario GP EIR concluded that implementation of the Ontario GP would conflict with the Air Quality Management Plan at full buildout. Similarly, in order to reach full buildout, developments would likely exceed South Coast Air Quality Management District (SCAQMD) thresholds established to minimize potential air quality degradation. Further, specific projects would potentially be located nearby developments and operations which produce subpar air quality emissions. Separately, impacts from transportation increases were not expected to generate significant air quality impacts.

4.3.2 Analysis of Proposed Project

Threshold (a) Conflict with or obstruct implementation of the applicable air quality plan? [Ontario GP EIR Impact 5.3-1]

Threshold (b) Violate any air quality standard or contribute substantially to an existing or projected air quality violation. [Ontario GP EIR Impact 5.3-2, 5.3-3] [No longer included in CEQA Appendix G Thresholds]

A Health Risk Assessment (HRA) was conducted for the Project by Kimley-Horn and Associates in August 2021. The results of the HRA are summarized herein and included as Appendix C to this Addendum.

No New or More Severe Impact: The Project site is located in the South Coast Air Basin (Basin) which includes parts of San Bernardino, Los Angeles, and Riverside counties and all of Orange County. The SCAQMD and the California Air Resources Board (CARB) monitor air quality within the Basin.

Air quality plans describe air pollution control strategies and measures to be implemented by a city, county, region, and/or air district. The primary purpose of an air quality plan is to bring an area that does not attain Federal and State air quality standards into compliance with the requirements of the Federal Clean Air Act and California Clean Air Act. In addition, air quality plans are developed to ensure that an area maintains a healthful level of air quality based on the National Ambient Air Quality Standards (NAAQS) and the California Ambient Air Quality Standards (CAAQS). The Air Quality Management Plan (AQMP) is prepared by SCAQMD and the Southern California Association of Governments (SCAG). The AQMP provides policies and control measures that reduce emissions to attain both State and Federal ambient air quality standards.

According to the SCAQMD, a project is consistent with the AQMP if the project would not result in an increase in the frequency or severity of existing air quality violations or cause or contribute to new violations or delay timely attainment of air quality standards or the interim emission reductions specified in the AQMP. The Basin is designated as attainment for criteria pollutants Nitrogen Dioxide (NO_2), Sulfur Dioxide (SO_2) and Lead. However, the Basin is currently in nonattainment for Ozone (O_3). Nitrogen Oxide (NO_x) emissions, a precursor to O_3, are far below the thresholds established by the SCAQMD. Compliance with SCAQMD Rule 1113 would ensure reactive organic gasses (ROG) emissions are below SCAQMD threshold levels. Rule 1113 requires manufacturers, distributors, and end-users of architectural and industrial maintenance coatings to reduce volatile organic compounds (VOC) emissions from the use of these coatings, primarily by placing limits on the VOC content of various coating categories. The Basin is

also in nonattainment for particulate matter 10 microns in diameter or less (PM_{10}) and particulate matter 2.5 microns in diameter or less ($PM_{2.5}$).

The SCAQMD's CEQA Handbook, identifies two key indicators of consistency with the AQMP:

1. Whether a project will result in an increase in the frequency or severity of existing air quality violations or cause or contribute to new violations or delay timely attainment of air quality standards or the interim emission reductions specified in the AQMP.
2. Whether a project will exceed the assumptions in the AQMP based on the year of project buildout and phase.

The Project would be inconsistent with AQMP Criterion 1 since the Project would occupy an area that is currently developed and in use with industrial/warehousing activities and developments. Implementation of the Project would continue these uses at a seemingly larger scale. The larger size and subsequently larger operating activity would inevitably generate an increased rate of emissions. The Project would likely exceed the short-term construction standards as the construction activities would involve both construction of the Project structures and demolition of existing structures. Thus, the potential for significant impacts is anticipated due to the Project's inconsistency with the first criterion.

Concerning Consistency Criterion No. 2, the AQMP contains air pollutant reduction strategies based on SCAG's latest growth forecasts, and SCAG's growth forecasts were defined in consultation with local governments and with reference to local general plans. The Project is consistent with the land use designation and development density presented in the Ontario GP and therefore would not exceed the population or job growth projections used by the SCAQMD to develop the AQMP. Thus, a less than significant impact would occur, as the Project is consistent with the second criterion.

The Ontario GP EIR identified impacts during construction as a significant and unavoidable impact on air quality. Mitigation Measure 3-1 was identified in the Ontario GP EIR to reduce air emissions from implementation of the Ontario GP.

The Ontario GP EIR identified air quality operational impacts associated with the buildout of the Ontario GP as significant and unavoidable. It was concluded in the Ontario GP EIR that no mitigation measures proposed for Impact 5.3-1 would be feasible. As such, no mitigation is included.

Mitigation Program

Mitigation Measures from the Ontario GP EIR

Mitigation measures 3-1 and 3-2 were identified in the Ontario GP EIR.

3-1 ***The City of Ontario Building Department shall require that all new construction projects incorporate feasible mitigation measures to reduce air quality emissions. Potential measures shall be incorporated as conditions of approval for a project and may include:***

- ***Requiring fugitive dust control measures that exceed South Coast Air Quality Management District's Rule 403, such as:***
    - ***Requiring use of nontoxic soil stabilizers to reduce wind erosion.***
    - ***Applying water every four hours to active soil disturbing activities.***

- ***Tarping and/or maintaining a minimum of 24 inches of freeboard on trucks hauling dirt, sand, soil, or other loose materials.***

- ***Using construction equipment rated by the United States Environmental Protection Agency as having Tier 3 or higher exhaust emission limits.***
- ***Ensuring construction equipment is properly serviced and maintained to the manufacturer's standards.***
- ***Limiting nonessential idling of construction equipment to no more than five consecutive minutes.***
- ***Using Super-Compliant VOC paints for coating of architectural surfaces whenever possible. A list of Super-Compliant architectural coating manufactures can be found on the South Coast Air Quality Management District's website at: http://www.aqmd.gov/prdas/brochures/Super-Compliant_AIM.pdf.***

3-2 The City of Ontario shall evaluate new development proposals within the City and require all developments to include access or linkages to alternative modes of transportation, such as transit stops, bike paths, and/or pedestrian paths (e.g., sidewalks).

Conclusion

The Project would result in no new or more severe impact pertaining to conflict with or obstructing implementation of the AQMP. Impacts would remain significant and unavoidable similarly to the certified Ontario GP EIR with no mitigation found feasible. The Project's impacts would be consistent with development in the area and would follow applicable AQMP measures. Therefore, no new or more severe impacts relative to air quality emissions from the previously identified significant impact evaluated in the Ontario GP EIR would occur with implementation of the Project and identified mitigation measures from the Ontario GP EIR. Additionally, no new information of substantial importance that was not known and could not have been known at the time the Ontario GP EIR was certified is available that would change the significance determination in the Ontario GP EIR.

Threshold (c) Result in a cumulatively considerable net increase of any criteria pollutant for which the project region is in non-attainment under an applicable Federal or state ambient air quality standard? [Ontario GP EIR Impact 5.3-2, 5.3-3]

Construction Emissions

No New or More Severe Impact: Construction associated with the Project would generate short-term emissions of criteria air pollutants. The criteria pollutants of primary concern within the Project area include O_3-precursor pollutants (i.e., ROG and NOX) and PM10 and PM2.5. Construction-generated emissions are short term and of temporary duration, lasting only as long as construction activities occur, but would be considered a significant air quality impact if the volume of pollutants generated exceeds the SCAQMD's thresholds of significance. Construction associated with the Project would generate short-term emissions of criteria air pollutants. The criteria pollutants of primary concern within the Project area include O3-precursor pollutants (i.e., ROG and NO_X) and PM_{10} and $PM_{2.5}$. Construction-generated emissions are short term and of temporary duration, lasting only as long as construction activities occur, but would be considered a significant air quality impact if the volume of pollutants generated exceeds the SCAQMD's thresholds of significance.

Fugitive dust emissions may also present a substantial, temporary impact on local air quality. In addition, fugitive dust may be a nuisance to those living and working in the Project vicinity. Uncontrolled dust from construction can become a nuisance and potential health hazard to those living and working nearby. SCAQMD Rules 402 and 403 (prohibition of nuisances, watering of inactive and perimeter areas, track out requirements, etc.), are applicable to the Project. Rule 402 prohibits the discharge from any source whatsoever such quantities of air contaminants or other material which cause injury, detriment, nuisance, or annoyance to any considerable number of persons or to the public, or which endanger the comfort, repose, health, or safety of any such persons or the public, or which cause, or have a natural tendency to cause, injury or damage to business or property. This rule does not apply to odors emanating from agricultural operations necessary for the growing of crops or the raising of fowl or animals. Rule 403 requires fugitive dust sources to implement best available control measures for all sources, and all forms of visible particulate matter are prohibited from crossing any property line. This rule is intended to reduce PM_{10} emissions from any transportation, handling, construction, or storage activity that has the potential to generate fugitive dust.

Project operations-generated emissions would be primarily associated with motor vehicle use and area sources, such as the use of landscape maintenance equipment and architectural coatings. As previously stated, the Project would be required to comply with Rule 1113 in order to minimize emissions due to architectural coatings. Furthermore, the Project would be within the intended usage of the Project site as analyzed in the Ontario GP EIR. The Project's consistency with previously analyzed usage and the temporary nature of construction generated emissions would lead to a similarly significant environmental impact; consistent with the conclusions of the Ontario GP EIR. Despite the significant and unavoidable nature of this impact, mitigation measure 3-2 will continue to be applied.

Mitigation Program

Mitigation Measures from the Ontario GP EIR

See mitigation measure 3-1 and 3-2 from the Ontario GP EIR above.

Conclusion

Air quality impacts related to the Project are within the limit of impacts identified by the SCAQMD. No new impact relative to air quality or a substantial increase in the severity of a previously identified significant impact evaluated in the Ontario GP EIR would occur. Additionally, no new information of substantial importance that was not known and could not have been known at the time the Ontario GP EIR was certified is available that would alter the Ontario GP EIR's significance finding.

Threshold (d) Expose sensitive receptors to substantial pollutant concentrations. [Ontario GP EIR Impact 5.3-2, 5.3-4, 5.3-5]

No New or More Severe Impact: The State CEQA Guidelines indicate that a potentially significant impact could occur if a project would expose sensitive receptors to substantial pollutant concentrations. The Project's potential to expose sensitive receptors to harmful pollutant concentrations was analyzed in a Health Risk Assessment prepared by Kimley-Horn and Associates.[5]

[5] Kimley-Horn and Associates. (2021). Health Risk Assessment Bon View Warehouse City of Ontario, California. Pages 18 through 19.

Construction

The duration of construction activities for the Project is estimated to take approximately nine months. Construction-related activities would result in Project-generated emissions of diesel PM (DPM) from the exhaust of off-road, heavy-duty diesel equipment for site preparation (e.g., clearing, grading); paving; application of architectural coatings; on-road truck travel; and other miscellaneous activities. For construction activity, DPM is the primary toxic air contaminant of concern. On-road diesel-powered haul trucks traveling to and from the construction area to deliver materials and equipment are less of a concern because they would not stay on the site for long durations. Diesel exhaust from construction equipment operating at the site poses a health risk to nearby sensitive receptors. The closest sensitive receptors near the Project site are residential uses located to the south.

As noted above, maximum (worst case) PM_{10} exhaust construction emissions over the entire construction period were used in AERMOD to approximate construction DPM emissions. Risk levels were calculated based on the California Office of Environmental Health Hazard Assessment (OEHHA) guidance document, Air Toxics Hot Spots Program Risk Assessment Guidelines (February 2015). Results of this assessment are summarized in **Table 2, Construction Health Risk**.

Table 2: Construction Health Risk

Exposure Scenario	Pollutant Concentration ($\mu g/m^3$)[1] [2]	Maximum Cancer Risk (Risk per Million)	Chronic Noncancer Hazard	Acute Noncancer Hazard
Construction	0.00017	0.025	0.00003	0.00041
Threshold	N/A	10	1.0	1.0
Threshold Exceeded	**No**	**No**	**No**	**No**

[1] Refer to Appendix A of the Health Risk Assessment
[2] The maximum cancer risk would be experienced at the residences to south of the Project site along Cedar Street.

Results of this Health Risk Assessment indicate that the unmitigated maximum concentration of PM_{10} during construction would be 0.00017 $\mu g/m^3$ and resultant cancer risk of 0.025 in one million, which would not exceed the SCAQMD threshold of 10 in one million. Non-cancer hazards for DPM would be below SCAQMD threshold of 1.0, with a chronic hazard index computed at 0.00003 and an acute hazard index of 0.00041. Therefore, construction risk levels would be less than SCAQMD thresholds and impacts would be less than significant.

Operations

Vehicle DPM emissions were estimated using emission factors for PM_{10} generated with the EMFAC developed by CARB. Truck emissions were modeled with AERMOD to determine pollutant concentrations. As shown in **Table 3, Operational Health Risk**, the unmitigated calculated carcinogenic risk resulting from the Project is 0.88 per million, which would not exceed the SCAQMD threshold of 10 in one million residents. Therefore, the carcinogenic risk associated with the Project would be less than significant.

Table 3: Operational Health Risk

Exposure Scenario	Maximum Cancer Risk (Risk per Million) [1] [2]	Significance Threshold (Risk per Million)	Chronic Noncancer Hazard
Residents	0.88	10	No

[1] Refer to Appendix A of the Health Risk Assessment
[2] The maximum cancer risk would be experienced at the residences to the south of the Project site along Philadelphia Street based on worst-case exposure durations for the Project, 95th percentile breathing rates, and 30-year averaging time.

Non Carcinogenic Hazards

The significance thresholds for Toxic Air Contaminants (TAC) exposure also require an evaluation of non-cancer risk stated in terms of a hazard index. Non-cancer chronic impacts are calculated by dividing the annual average concentration by the Reference Exposure Level (REL) for that substance. The REL is defined as the concentration at which no adverse non-cancer health effects are anticipated. The potential for acute non-cancer hazards is evaluated by comparing the maximum short-term exposure level to an acute REL. RELs are designed to protect sensitive individuals within the population. The calculation of acute non-cancer impacts is similar to the procedure for chronic non-cancer impacts.

Acute and chronic impacts are shown in **Table 4, Chronic and Acute Hazards**. An acute or chronic hazard index of 1.0 is considered individually significant. The hazard index is calculated by dividing the acute or chronic exposure by the reference exposure level. The highest maximum chronic and acute hazard index from the Project would be 0.0002 and 0.0013, respectively. Therefore, non-carcinogenic hazards are calculated to be within acceptable limits and a less than significant impact would occur.

Table 4: Chronic and Acute Hazards

Emissions Sources	Chronic Hazard	Acute Hazard
Operational Trucks	0.0002	0.0013
SCAQMD Threshold	1.0	1.0
Threshold Exceeded	**No**	**No**
Refer to Appendix A of the Health Risk Assessment		

As described above, impacts related to cancer risk would be less than significant. Additionally, noncarcinogenic hazards are calculated to be within acceptable limits. It should be noted that the impacts assess the Project's incremental contribution to health risk impacts, consistent with the SCAQMD guidance and methodology. The SCAQMD has not established separate cumulative thresholds and does not require combining impacts from cumulative projects. The SCAQMD considers projects that do not exceed the project-specific thresholds to generally not be cumulatively significant. Therefore, impacts related to health risk from the Project would be less than significant.

Mitigation Program

Mitigation Measures from the Ontario GP EIR

Mitigation measures 3-1 and 3-3 were identified in the Ontario GP EIR. However, while mitigation measure 3-1 (shown above) is applicable to the Project, mitigation measure 3-3 would not apply to the Project because it is imposed solely upon the City, rather than the Project itself.

Conclusion

Air quality impacts related to the Project are within the limit of impacts identified by the SCAQMD. No new impact relative to air quality or a substantial increase in the severity of a previously identified significant impact evaluated in the Ontario GP EIR would occur. Additionally, no new information of substantial importance that was not known and could not have been known at the time the Ontario GP EIR was certified is available that would alter the Ontario GP EIR's significance finding.

Threshold (e) Result in other emissions (such as those leading to odors) adversely affecting a substantial number of people. [Ontario GP EIR Impact 5.3-6]

The SCAQMD CEQA Air Quality Handbook identifies certain land uses as sources of odors. These land uses include the following: agriculture, wastewater treatment plant, food processing plants, chemical plants, composting, refineries, landfills, diaries, and fiberglass molding. The Project is a warehouse facility and does not propose to include any odor-inducing uses on the Project site. The Project would not be a source of objectionable odors; no impact would occur.

Mitigation Program

Mitigation Measures from the Final EIR

None identified in the Ontario GP EIR.

Conclusion

There are no new potentially significant impacts associated with the Project; therefore, no new and/or refined mitigation measures are required for issues related to air quality.

Overall Air Quality Impact Conclusion

With regard to CEQA Statute Section 21166 and CEQA Guidelines Section 15162(a), the changes proposed by the Project would not result in any new impacts, or increase the severity of the previously identified impacts, with respect to air quality. Therefore, preparation of a SEIR is not warranted.

4.4 Biological Resources

4.4.1 Summary of Previous Environmental Analysis

The Ontario GP EIR concluded that while the City contains suitable habitats for multiple sensitive bird species, their potential for occurrence would be low due to the City's developed nature. However, no sensitive plant species were observed within the City and suitable sensitive species have a low probability of occurring. Additionally, no regional wildlife corridors were observed in the City. Furthermore, subsequent projects would be required to comply with Federal, State, and local policies and regulations. It was concluded that implementation of the Ontario GP would not affect surface or jurisdictional waters, though subsequent projects would be required to comply with Federal, State, and local policies and regulations. Finally, the Ontario GP EIR concluded that implementation of the Ontario GP would not conflict with established habitat plans and that subsequent projects would need to analyze their individual impacts for compliance with habitat conservation plans and programs.

4.4.2 Analysis of Proposed Project

Threshold (a) Have a substantial adverse effect, either directly or through habitat modifications, on any species identified as a candidate, sensitive, or special status species in local or regional plans, policies, or regulations, or by the California Department of Fish and Game or U.S. Fish and Wildlife Service? [Ontario GP EIR Impact 5.4-1]

No New or More Severe Impact: The Project site is currently developed and in active use for industrial warehousing activities. These activities would inherently inhibit the potential for the formation of suitable habitat for both wildlife and sensitive vegetation. A large open grass area exists in the northwest portion of the Project site. However, this area is surrounding on all sides by ongoing industrial areas with consistent human activity. Furthermore, this area of grass would not suitably act as a nesting site for bird species since the few ornamental trees are located adjacent to areas with high human interaction.

According to Figure 5.4-1 of the Ontario GP EIR, the Project location falls outside of the San Bernardino Kangaroo Rat Critical Habitat, Delhi Sands Flower-Loving Fly Ontario Recovery Unit, Oakmont Industrial Group Habitat Conservation Plan for Protection of Delhi Sands Flower-Loving Fly, and California Natural Diversity Database Occurrences (Ontario and Guasti Quadrangles). There were no peregrine falcon or burrowing owl observances within the Project area. In the time since the Ontario GP EIR was certified, the Project site has been developed with industrial uses which would continue to inhibit the natural formation of habitats for special status species or plants. Therefore, impacts to sensitive species and their habitats would be less than significant.

Mitigation Program

Mitigation Measures from the Ontario GP EIR

None identified in the Ontario GP EIR.

Conclusion

The Project would result in no new or more severe impact on natural habitats and sensitive species. A less than significant impact was identified in the Ontario GP EIR with respect to natural habitats and sensitive

species. The Project would be designed consistent with the applicable guidelines and standards within the Ontario GP, Ontario MC, and Ontario Development Code. Therefore, no new and/or modified mitigation measures are required for issues related to biological resources.

Threshold (b) Have a substantial adverse effect on any riparian habitat or other sensitive natural community identified in local or regional plans, policies, and regulations or by the California Department of Fish and Wildlife or U.S. Fish and Wildlife Service? [Ontario GP EIR Impact 5.4-2]

Threshold (c) Have a substantial adverse effect on state or Federally protected wetlands (including, but not limited to, marsh, vernal pool, coastal, etc.) through direct removal, filling, hydrological interruption, or other means? [Ontario GP EIR Impact 5.4-3]

No New or More Severe Impact: The Ontario GP EIR determined that development within the City would not adversely affect the City's surface waters, jurisdictional waters, wetlands, or riparian habitats as the areas that could be considered within these zones would be designated open space and allow for very limited development. Some areas noted as jurisdictional waters are owned and managed by the County. Areas under County management would not be subject to land use controls from the City.

The Project site is previously developed with industrial uses and does not contain wetland or riparian features. A majority of the Project site is developed with industrial uses which does not include natural or manmade surface waters. The undeveloped grassy area in the northwest portion of the Project site does not contain water features and is not located adjacent to any of the City's surface water features. Therefore, no new impacts relative to riparian habitat or other sensitive natural community would be caused due to the Project implementation.

Mitigation Program

Mitigation Measures from the Ontario GP EIR

None identified in the Ontario GP EIR.

Conclusion

The Project would result in no new or more severe impact on aquatic habitats and resources. A less than significant impact was identified in the Ontario GP EIR with respect to these resources. The Project would be designed consistent with the applicable guidelines and standards within the Ontario GP, Ontario MC, and Ontario Development Code. Therefore, no new and/or modified mitigation measures are required for issues related to biological resources.

Threshold (d) Interfere substantially with the movement of any native resident or migratory fish or wildlife species or with established native resident or migratory wildlife corridors, or impede the use of native wildlife nursery sites? [Ontario GP EIR Impact 5.4-4]

No New or More Severe Impact: Refer above to thresholds a and b above. The Ontario GP EIR concluded that the City does not function as a suitable wildlife movement corridor, since the City is mostly developed, with most of the land converted to industrial, commercial, and residential uses. No regional wildlife movement corridors have been identified in the City as most of the City is ill-suited for the purposes of wildlife movement. Local movement corridors would consist of flood control channels and SCE corridors.

As previously stated, the Project has been previously developed with industrial and warehousing uses with manmade landscaping improvements that would not be suitable for the nesting of sensitive species. Trees observed on the Project site were largely ornamental and adjacent to areas of high human traffic. Therefore, the Project site would remain ill-suited for wildlife movement.

Mitigation Program

Mitigation Measures from the Ontario GP EIR

None identified in the Ontario GP EIR.

Conclusion

The Project would result in no new or more severe impact on wildlife movement. A less than significant impact was identified in the Ontario GP EIR. The Project would be designed consistent with the applicable guidelines and standards within the Ontario GP, Ontario MC, and Ontario Development Code. Therefore, no new and/or modified mitigation measures are required for issues related to biological resources.

Threshold (e) Conflict with any local policies or ordinances related to protecting biological resources, such as a tree preservation policy or ordinance? [Ontario GP EIR Impact 5.4-5]

Threshold (f) Conflict with the provisions of an adopted Habitat Conservation Plan, Natural Community Conservation Plan, or other approved local, regional, or state habitat conservation plan? [Ontario GP EIR Impact 5.4-5]

No New or More Severe Impact: The Ontario GP EIR concluded that the majority of the City is outside of a conservation plan or areas of likelihood for sensitive species. According to the Ontario GP EIR, future Projects within established Habitat Conservation Plan areas should fully analyze potential impacts to natural species and special status species. One Habitat Conservation Plan exists within the City. The plan area is a 19-acre area near the intersection of Greystone Drive and the eastern City boundary established to protect the Delhi Sands Flower-Loving Fly (DSFLF). The Project would be outside of this area. Further, a portion of Critical Habitat Unit 4 for San Bernardino kangaroo rat (SBKR) exists in the northeastern corner of the City. The Project site would also be outside of this conservation area. Therefore, due to its existence outside of the City's established Habitat Conservation Plan areas, the Project would be unlikely to substantially affect established Habitat Conservation Plans. Due to the Project site's previously developed state, redevelopment activities would be unlikely to inhibit the goals of Habitat Conservation Plans as the area is currently developed for industrial uses.

Similarly, the Project would not conflict with any local policies or ordinances protecting biological resources. While the Project would remove common shrubs and trees found on site, the Project would comply with the Ontario Development Code Section 1.01.005(L) and 6.05.020. Consistent with the Ontario GP EIR, impacts in this regard are considered less than significant following compliance with the provisions of the Development Code. Additionally, no new information of substantial importance that was not known and could not have been known at the time the Ontario GP EIR was certified is available that would change the finding of less than significant impact under this threshold.

Mitigation Program

Mitigation Measures from the Ontario GP EIR

None identified in the Ontario GP EIR.

Conclusion

The Project would result in no new or more severe impact on conservation plans and policies. A less than significant impact was identified in the Ontario GP EIR. The Project would be designed consistent with the applicable guidelines and standards within the Ontario GP, Ontario MC, and Ontario Development Code. Therefore, no new and/or modified mitigation measures are required for issues related to biological resources.

Overall Biological Resources Impacts Conclusion

With regard to CEQA Section 21166 and CEQA Guidelines Section 15162(a), the changes proposed by the Project would not result in any new impacts, or increase the severity of the previously identified impacts, with respect to biological resources. Therefore, preparation of a SEIR is not warranted.

4.5 Cultural Resources

4.5.1 Summary of Previous Environmental Analysis

The Ontario GP EIR concluded that implementation of the Ontario GP would result in potential impacts to the City's historical resources. This is attributed to the potential demolition of Tier III resources, since the Ontario GP would strongly encourage the preservation of Tier II resources and require the preservation of Tier I resources. As well, the Ontario GP EIR found that while impacts to archeological resources would be low, there is the potential to encounter previously unknown paleontological resources. As well, Bellevue Cemetery was identified as a Native American burial site. Potential impacts to Native American resources were found to be potentially significant but not unavoidable with the proper use of mitigation.

4.5.2 Analysis of Proposed Project

A Cultural Resource Technical Report (CRTR) was created for the Project by Sapphos Environmental, Inc. in August 2021. The results of the CRTR are summarized herein and included as Appendix B to this Addendum.

Threshold (a) Cause a substantial adverse change in the significance of a historical resource pursuant Section 15064.5? [Ontario GP Impact 5.5-1]

Threshold (b) Cause a substantial adverse change in the significance of an archaeological resource pursuant to CEQA Guidelines Section 15064.5? [Ontario GP Impact 5.5-1 and 5.5-2]

No New or More Severe Impact: The Ontario GP found that despite the implementation of policies in the Ontario GP, there was still a present risk for future developments to significantly impact historical resources. These risks were concluded to remain significant and unavoidable even after mitigation. However, a CRTR was conducted for the Project which included both a field survey of the Project area as well as record searches of the California Historical Resources Inventory Database (CHRID), the National Register of Historic Places (NRHP), the California Register of Historic Resources (CRHR), California Historical Landmarks, California Points of Interest, the City of Sierra Madre Historical Landmarks, and the South Central Coastal Information Center (SCCIC). Literature reviews were also conducted to determine if the proposed Project would have the potential to have a significant impact on previously recorded historical resources.[6]

The field survey conducted for the CRTR encountered no cultural resources within the Project site that would be deemed substantial or significant. The Project site was observed as heavily disturbed, with piles of fill material, rubble and modern construction debris scattered across the property.[7] Similarly, the records search for the Project site found no significant cultural resources within the project site or 0.25-mile buffer study area.[8] Furthermore, Project implementation would include the preparation of a Tier 3 Determination for consideration by the Historic Preservation Subcommittee (HPSC) along with the necessary Certificate of Appropriateness entitlement application (see Section 2.4 for more detail). This process would further reduce the potential for substantial impacts.[9] Mitigation is also proposed in order

[6] Sapphos Environmental, Inc. (2021). *1948 S. Bon View Avenue, Ontario, California Cultural Resources Technical Report*. Page 21.
[7] Ibid. Page 22.
[8] Ibid. Page 24.
[9] Ibid Page 25.

to further minimize potential impacts. With mitigation implemented, impacts would be less than significant.

Mitigation Program

Mitigation Measures from the Ontario GP EIR

Mitigation measures 5-1 through 5-4 were proposed within the Ontario GP EIR to mitigate potential impacts. However, mitigation measure 5-1 is not applicable since the Project is not within a Focus area as demarcated by Figure 3-4 of the Ontario GP EIR. As well, mitigation measures 5-2 through 5-4 are not applicable to the Project, since neither a Specific Plan or General Plan Amendment are proposed as part of the Project and no signs of cultural or historical resources were identified in or around the Project site.

Conclusion

The Project would result in no new or more severe impact on a historic or archaeological resource. No new or more severe impact from previously identified significant impacts evaluated in the Ontario GP would occur. Furthermore, no new information of substantial importance that was not known and could not have been known at the time the Ontario GP was certified is available that would impact the prior finding of less than significant impact with mitigation under this threshold. The above-referenced mitigation measures from the Ontario GP EIR are applicable.

Threshold (c) Directly or indirectly destroy a unique paleontological resource or site or unique geologic feature. [Ontario GP Impact 5.5-2] [No longer included in this section per the 2021 CEQA Appendix G Thresholds]

No new or More Significant Impact: Paleontological resources and geologic features are discussed discussion 4.6(f) below.

Threshold (d) Disturb any human remains, including those interred outside of formal cemeteries? [Ontario GP Impact 5.5-3]

No new or More Significant Impact: The CRTR found that no cemeteries or burial sites were observed as a result of the review of historic aerial photographs and historic topographic maps. As well, it was determined that the potential to encounter human remains were low based on the inherent characteristics and location of the Project area. However, tribal cultural resources may be encountered during ground moving activities. In order to minimize potential impacts, the Project would incorporate Standard Condition No. 1 from Public Resources Code Section 5097. This would allow impacts to remain less than significant.

Mitigation Program

Mitigation Measures from the Ontario GP EIR

No mitigation measures are proposed within the Ontario GP EIR. However, compliance with Public Resources Code Section 5097.98 (Standard Condition No. 1 shown below) is proposed in the Ontario GP EIR to ensure no significant impacts.

Standard Condition No. 1

> ***If the County Coroner determines that the remains are or are believed to be Native American, s/he shall notify the Native American Heritage Commission (NAHC) in Sacramento within 24 hours. In accordance with Section 5097.98 of the California PRC, the NAHC shall immediately notify the person(s) it believes to be the Most Likely Descendant of the deceased Native American. The descendants shall complete their inspection and make a recommendation within 48 hours of being granted access to the site. The designated Native American representative would then determine, in consultation with the Los Angeles County Metropolitan Transportation Authority (Metro), the disposition of the human remains. The Most Likely Descendant's recommendation shall be followed if feasible and may include scientific removal and non-destructive analysis of the human remains and any items associated with Native American burials. If Metro rejects the Most Likely Descendant's recommendations, the agency shall rebury the remains with appropriate dignity on the property in a location that will not be subject to further subsurface disturbance (14 California Code of Regulations §15064.5(e)).***

Conclusion

The Project would result in no new or more severe impact pertaining to the disturbance of human remains. The Project is consistent with the Ontario GP EIR. The CRTR did not find new potentially significant impacts associated with the Project regarding historical or archaeological resource, or human remains; therefore, no mitigation measures are required, but the Project must comply with the above referenced applicable FEIR mitigation measures.

Overall Cultural Resources Impacts Conclusion

With regard to CEQA Statute Section 21166 and CEQA Guidelines Section 15162(a), the changes proposed by the Project would not result in any new or more severe impacts with respect to cultural resources. Therefore, preparation of an SEIR is not warranted.

4.6 Geology and Soils

4.6.1 Summary of Previous Environmental Analysis

The Ontario GP EIR concluded that implementation of the Ontario GP would not result in significant impacts relative to geology and soils, and no mitigation was identified as necessary to reduce potential impacts.

4.6.2 Analysis of Proposed Project

Threshold (a) Directly or indirectly cause potential substantial adverse effects, including the risk loss, injury, or death involving:

(i) Rupture of a known earthquake fault, as delineated on the most recent Alquist-Priolo Earthquake Fault Zoning Map issued by the State Geologist for the area or based on other substantial evidence of a known fault? Refer to Division of Mines and Geology Special Publication 42. [Ontario GP EIR Impact 5.7-1]

(ii) Strong seismic ground shaking? [Ontario GP EIR Impact 5.7-1]

(iii) Seismic-related ground failure, including liquefaction? [Ontario GP EIR Impact 5.7-1]

(iv) Landslides? [Not analyzed in the Ontario GP EIR]

Faulting and Seismicity

No New or More Severe Impact: The Alquist-Priolo Zones Special Studies Act defines active faults as those that have experienced surface displacement or movement during the last 11,000 years. The Ontario GP EIR identifies eight fault zones near the City. According to the Ontario GP EIR, none exist beneath the Project area boundaries. According to Figure 5.7-2 of the Ontario GP EIR the nearest fault line to the Project site is the Chino Central Valley Fault, located approximately five miles southwest of the Project site. Furthermore, all development would comply with the applicable Federal, State, and local regulations regarding seismicity and fault hazards such as the California Building Code (CBC) which was adopted on January 1, 2020. The CBC includes detailed design requirements related to structural design, soils and foundations, and grading to ensure that public safety risks due to seismic shaking are minimized to levels below significant.

Liquefaction and Landslides

No New or More Severe Impact: The general liquefaction susceptibility of the site was determined by research of the San Bernardino County Official Land Use Plan, General Plan, and Geologic Hazard Overlay. Map FH27C[10] for the Chino USGS quadrangle indicates that the Project site is not located within an area of liquefaction or landslide susceptibility. Based on the mapping performed by the County, liquefaction is not considered to be a design concern for this Project.

[10] San Bernardino County General Plan. 2007. *Geologic Hazard Overlays*. Available at http://www.sbcounty.gov/Uploads/lus/GeoHazMaps/FH27C_20100309.pdf. Accessed August 8, 2021

Mitigation Program

Mitigation Measures from the Ontario GP EIR

None identified in the Ontario GP EIR.

Conclusion

The Project would result in no new or more severe impact due to susceptibility to landslide, liquefaction, or seismic effects. A less than significant impact was identified in the Ontario GP EIR. The Project would be designed consistent with the applicable guidelines and standards within the Ontario GP, Ontario MC, and Ontario Development Code. Therefore, no new and/or modified mitigation measures are required for issues related to geological hazards.

Threshold (b) Result in substantial erosion or loss of topsoil? [Ontario GP EIR Impact 5.7-2]

Threshold (c) Be located on a geologic unit or soil that is unstable, or that would become unstable as a result of the Project, and potentially result in on- or off-site landslide, lateral spreading, subsidence, liquefaction or collapse? [Ontario GP EIR Impact 5.7-2]

Threshold (d) Be located on expansive soil, as defined in Table 18-1-B of the Uniform Building Code, creating substantial direct or indirect risks to life or property? [Ontario GP EIR Impact 5.7-2]

No New or More Severe Impact: The Ontario GP EIR concluded that soils within the City have the potential to generate hazards in the form of ground subsistence, erosion, and unstable soils. It was determined that future projects' compliance with the CBC would reduce impacts from unstable soils to insignificant levels. Further, future projects' adoption of National Pollutant Discharge Elimination System (NPDES) permits and accompanied Stormwater Pollution Prevention Plans (SWPPPs) would reduce potential risks of erosion.

The Project would not result in significant soil erosion or loss of topsoil because of the previously disturbed and developed nature of the Project site and the limited size and scope of the Project. Grading increases the potential for erosion by removing protective vegetation, changing natural drainage patterns, and constructing slopes. In addition, the City requires an erosion/dust control plan for projects located within this area. The Project would also be required to comply with all requirements set forth in the NPDES permit for construction activities (e.g., implementation of Best Management Practices [BMPs] through preparation of a SWPPP), reducing potential impacts to less than significant levels.

Additionally, the Project would also be required to comply with the CBC and undergo review of grading plans by the City Engineer who would ensure no significant impacts would occur.

Mitigation Program

Mitigation Measures from the Ontario GP EIR

None identified in the Ontario GP EIR.

Conclusion

The Project would result in no new or more severe impact due to susceptibility to hazards from land failure and erosion. A less than significant impact was identified in the Ontario GP EIR. The Project would be designed consistent with the applicable guidelines and standards within the Ontario GP, Ontario MC, and Ontario Development Code. Therefore, no new and/or modified mitigation measures are required for issues related to geological hazards.

Threshold (e) Have soils incapable of adequately supporting the use of septic tanks or alternative wastewater disposal systems where sewer are not available for the disposal of waste water? [Ontario GP EIR Impact 5.7-3]

No New or More Severe Impact: The Ontario GP EIR notes that septic tanks are not used within the City as wastewater is serviced by the Inland Empire Utilities Agency (IEUA). Therefore, the Project would not require the support of septic tank usage. Further, the previous development which currently occupies the Project area would similarly utilize the IEUA instead of septic tanks. Furthermore, according to the Phase I study conducted for the Project, no underground storage tanks (USTs) were observed during reconnaissance of the Project site.[11] Therefore, the Project would not propose the development of septic tanks and would not require the removal of septic tanks or other underground tanks.

Mitigation Program

Mitigation Measures from the Ontario GP EIR

None identified in the Ontario GP EIR.

Conclusion

The Project would result in no new or more severe impact due to the presence of septic tanks. A less than significant impact was identified in the Ontario GP EIR. The Project would be designed consistent with the applicable guidelines and standards within the Ontario GP, Ontario MC, and Ontario Development Code. Therefore, no new and/or modified mitigation measures are required for issues related to soil hazards in relation to septic systems.

Threshold (f) Directly or indirectly destroy a unique paleontological resource or site or unique geologic feature? [Not analyzed in the Ontario GP EIR]

As previously stated, the Project site has been previously developed with residential and industrial uses which would have involved ground moving activities such as land clearing and grading during their construction. Redevelopment of the site would be unlikely to encounter new paleontological features. Similarly, unique geological features would be unlikely to be encountered due to the developed state of the Project site. Impacts are anticipated to be less than significant.

Mitigation Program

Mitigation Measures from the Ontario GP EIR

None identified in the Ontario GP EIR.

[11] Orion Environmental Inc. *Phase I Environmental Site Assessment South Bon View Avenue and East Cedar Street Ontario, California dated April 2021*. Page 4-4.

Conclusion

The Project would result in no new or more severe impact due to the presence of paleontological resources. A less than significant impact was identified in the Ontario GP EIR. The Project would be designed consistent with the applicable guidelines and standards within the Ontario GP, Ontario MC, and Ontario Development Code. Therefore, no new and/or modified mitigation measures are required for issues related to paleontological resources.

Overall Geology and Soils Impacts Conclusion

With regard to CEQA Section 21166 and CEQA Guidelines Section 15162(a), the changes proposed by the Project would not result in any new impacts, or increase the severity of the previously identified impacts, with respect to geology and soils. Therefore, preparation of a SEIR is not warranted.

4.7 Greenhouse Gas Emissions (Global Climate Change)

4.7.1 Summary of Previous Environmental Analysis

The Ontario GP EIR concluded that the buildout of the City would generate a significant and unavoidable impact due to greenhouse gas (GHG) emissions. This was based on both emissions from construction and operations of each land use type. However, the Ontario GP EIR maintained that the City would be compliant with the established policies within the Senate Bill (SB) 375 Sustainable Communities Strategies (SCS) and SCAG SCS. Therefore, impacts regarding climate change policies were concluded to be less than significant.

4.7.2 Analysis of Proposed Project

Threshold (a) Generate greenhouse gas emissions, either directly or indirectly, that may have a significant impact on the environment, based on any applicable threshold of significance. [Ontario GP EIR Impact 5.6-1]

Threshold (b) Conflict with any applicable plan, policy or regulation of an agency adopted for the purpose of reducing the emissions of greenhouse gases. [Ontario GP EIR Impact 5.6-1]

A Health Risk Assessment (HRA) was conducted for the Project by Kimley-Horn and Associates in August 2021. The results of the HRA are summarized herein and included as Appendix C to this Addendum.

Background

Global climate change refers to changes in average climatic conditions on Earth as a whole, including temperature, wind patterns and precipitation. Global temperatures are moderated by naturally occurring atmospheric gases, including water vapor, carbon dioxide (CO_2), methane (CH_4), and nitrous oxide (N_2O), as well as hydrofluorocarbons (HFCs), perfluorocarbons (PFCs), and sulfur hexafluoride (SF_6). These GHGs allow solar radiation (sunlight) into the Earth's atmosphere but prevent radiative heat from escaping, thus warming the Earth's atmosphere. GHGs are emitted by both natural processes and human activities. Concentrations of GHG have increased in the atmosphere since the industrial revolution. Human activities that generate GHG emissions include combustion of fossil fuels (CO_2 and N_2O); natural gas generated from landfills, fermentation of manure and cattle farming (CH_4); and industrial processes such as nylon and nitric acid production (N_2O).

GHGs have varying global warming potential (GWP). The GWP is the potential of a gas or aerosol to trap heat in the atmosphere; it is the "cumulative radiative forcing effect of a gas over a specified time horizon resulting from the emission of a unit mass of gas relative to a reference gas." The reference gas for GWP is CO_2; therefore, CO_2 has a GWP factor of 1. The other main GHGs that have been attributed to human activity include CH_4, which has a GWP factor of 28, and N_2O, which has a GWP factor of 265. When accounting for GHGs, all types of GHG emissions are expressed in terms of CO_2 equivalents (CO_2e) and are typically quantified in metric tons (MT) or million metric tons (MMT).

Assembly Bill (AB) 32, the California Global Warming Solutions Act of 2006, established a State goal of reducing GHG emissions to 1990 levels by the year 2020, which would require a reduction of approximately 173 MMT net CO_2e below "business as usual" emission levels. SB 97, a companion bill, directed the California Natural Resources Agency (Resources Agency) to certify and adopt guidelines for

the mitigation of GHGs or the effects of GHG emissions. SB 97 was the State Legislature's directive to the Resources Agency to specifically establish that GHG emissions and their impacts are appropriate subjects for CEQA analysis. Executive Order (EO) S-3-05 was enacted in June 2005 and calls for an 80 percent reduction below 1990 levels by 2050. SB 32 was signed into law in 2016 and establishes an interim GHG emission reduction goal for the State to reduce GHG emissions to 40 percent below 1990 levels by the year 2030.

No New or Severe Impact: The Ontario Plan GP found that a significant unavoidable impact would occur from GHG emissions as a result of the Ontario GP implementation. It was calculated that through buildout, construction emissions in the City could average approximately 16,533 MT of CO_2e per year. This was found to be a cumulatively considerable amount of GHG emissions. Operations activities within the City at full buildout would be 13.6 MMT. Although no numeric threshold was adopted at the time of the Ontario GP EIR, the emissions generated were still considered significant.

The Project site would maintain its current land use designations which were adopted with the Ontario GP EIR. Therefore, the land uses would remain consistent with those analyzed for the Ontario GP and the existing developments on the Project site. Since the Project would involve the demolition of existing structures despite the continuation of existing land uses, it is anticipated that emissions would remain significant. However, the Project would be developed in consistency with the Ontario GP and Ontario MC. The provisions within these codes were found to suitably comply with applicable plans, policies, or regulations regarding GHG emissions. The Project would be required to comply with both Federal and State regulations regarding air quality and GHG emissions. Therefore, impacts would remain significant; consistent with the Ontario GP EIR.

Mitigation Program

Mitigation Measures from the Ontario GP EIR

Mitigation measures 6-1 through 6-6 are included in the Ontario GP EIR to mitigate impacts associated with climate change aggravating GHG emissions due to noncompliance with established policies and regulations. All of the Ontario GP EIR mitigation measures (6-1 through 6-5) are imposed solely upon the City, and are therefore not applicable to the Project.

Conclusion

The Project would result in no new or more severe impact on GHG emissions. A significant and unavoidable impact was identified in the Ontario GP EIR. The Project would be designed consistent with the applicable guidelines and standards within the Ontario GP, Ontario MC, and Ontario Development Code. Therefore, no new and/or modified mitigation measures are required for issues related to GHG emissions.

Overall Greenhouse Gas Emissions Impacts Conclusion

With regard to CEQA Section 21166 and CEQA Guidelines Section 15162(a), the changes proposed by the Project would not result in any new impacts, or increase the severity of the previously identified impacts, with respect to GHG emissions. Therefore, preparation of a SEIR is not warranted.

4.8 Hazards and Hazardous Materials

4.8.1 Summary of Previous Environmental Analysis

The Ontario GP EIR concluded that implementation of the Ontario GP would not generate significant impacts in relation to hazardous materials. Furthermore, no mitigation was deemed necessary for each impact.

4.8.2 Analysis of Proposed Project

Threshold (a) Create a significant hazard to the public or the environment through the routine transport, use, or disposal of hazardous materials. [Ontario GP EIR Impact 5.8-1]

Threshold (b) Create a significant hazard to the public or the environment through reasonably foreseeable upset and accident conditions involving the release of hazardous materials into the environment. [Ontario GP EIR Impact 5.8-1]

Threshold (c) Emit hazardous emissions or handle hazardous or acutely hazardous materials, substance, or waste within one-quarter mile of an existing or proposed school. [Ontario GP EIR Impact 5.8-1]

A Phase I Environmental Site Assessment was conducted for the Project by Orion Environmental, Inc. in April 2021. The results of the Phase I Environmental Site Assessment are summarized herein and included as Appendix D to this Addendum.

No New or More Severe Impact: The proposed construction activities would involve the transport, use, and disposal of hazardous materials such as paints, solvents, oils, grease, and caulking which are typical with construction sites, including the construction of warehouse facilities. In addition, hazardous materials would be needed for fueling and servicing construction equipment on the site. These types of materials are not acutely hazardous, and all storage, handling, use, and disposal of these materials are regulated by Federal and State requirements, which the Project construction activities are required to strictly adhere to. These regulations include: the Federal Occupational Safety and Health Act and Hazardous Materials Transportation Act; Title 8 of the California Code of Regulations (CalOSHA), and the State Unified Hazardous Waste and Hazardous Materials Management Regulatory Program. As a result, routine transport and use of hazardous materials during construction would be less than significant. Furthermore, the risks related to upset or accident conditions involving the release of hazardous materials into the environment would be adequately addressed through compliance with existing Federal, State, and local regulations.

Project operations would involve warehouse/logistics type uses that may involve the use and storage of common hazardous materials such as oils, paints, solvents, and cleaning products. Also, building mechanical systems and grounds and landscape maintenance could also use a variety of products formulated with hazardous materials, including fuels, cleaners, lubricants, adhesives, sealers, and pesticides/herbicides. The routine transport, use, or disposal of hazardous materials would be limited to materials and solvents used for maintenance and operation of the facility, including the upkeep of landscaping and cleaning products. Furthermore, the use of these materials would not pose substantial risk to the surrounding population and would not affect nearby school, despite the nearby Bon View Elementary School located approximately 0.2 mile southeast of the Project site.

Furthermore, hazardous materials would be used and stored in accordance with applicable regulations and such uses would be required to comply with Federal and State laws to reduce the potential consequences of hazardous materials accidents. With the implementation of the most current industry BMPs, this would protect human health and the environment should any accidental spills or releases of hazardous materials occur during operation of the Project. No new impact or increase in the severity of an identified impact would therefore occur with implementation of the Project.

Mitigation Program

Mitigation Measures from the Ontario GP EIR

None identified in the Ontario GP EIR.

Conclusion

The Project would result in no new or more severe impact due to the transport or storage of hazardous materials. A less than significant impact was identified in the Ontario GP EIR. The Project would be designed consistent with the applicable guidelines and standards within the Ontario GP, Ontario MC, and Ontario Development Code. Therefore, no new and/or modified mitigation measures are required for issues related to hazardous materials.

Threshold (d) Be located on a site which is included on a list of hazardous materials compiled pursuant to Government Code Section 65962.5 and, as a result, would it create a significant hazard to the public or the environment? [Ontario GP EIR Impact 5.8-2]

No New or More Severe Impact: Project site reconnaissance conducted for the Phase I study found no physical signs of previous hazardous material spills. No documented historical occurrences of hazardous material spills were found. No USTs were identified on the Project site while aboveground storage tanks included multiple compressed gas tanks and cylinders. The compressed gas tanks included one empty 55-gallon drum and two empty canisters of acetone. Hazardous material storage on-site included cleaning solutions for general housekeeping, paints, solvents, and oils. The storage of these materials was found to be in good condition and had not led to spills or environmental contamination.[12]

Waste storage on the Project site included a containment pallet of four 55-gallon drums of hazardous waste oil. Waste collection on-site was observed to include the recycling of materials such as metals, cardboards, and plastics. No oil staining was observed around the storage containers or waste receptacles. Waste storage containers on-site were confirmed to be in good condition with no sign of leakage or damage to the surrounding environment.[13] The Phase I assessment found that the previous uses of the Project site are unlikely to pose an environmental risk from continued usage of the Project site. Surrounding uses nearby the Project site were found to be unlikely to pose environmental risks to the Project site based on various conditions (i.e., distance from Target Property, groundwater flow direction, and absence of reported environmental regulatory violations).[14]

According to the Ontario GP EIR, the City contains eight Leaking Underground Storage Tank (LUST) sites which could still be leaking hazardous materials. However, based on the updated Cortese site list

[12] Orion Environmental Inc. *Phase I Environmental Site Assessment South Bon View Avenue and East Cedar Street Ontario, California*. Page 4-4.
[13] Ibid Pages 4-4 through 4-5.
[14] Ibid. Pages 5-5 through 5-6.

maintained by the California Department of Toxic Substances Control (DTSC), the City does not contain any active hazardous waste substance sites.[15] Potential hazards to construction workers and the public may occur as a result of construction activities on existing sites that could be contaminated. Future development of any of these documented hazardous materials sites would require prior remediation and cleanup under the supervision of the DTSC in order to meet Federal, State, and local standards.

Furthermore, the Project site has been previously developed with industrial and warehousing uses which would be consistent with the proposed uses. Because the proposed uses would be similar to the existing uses, no new impacts are anticipated as part of the Project and no new mitigation measures are recommended. Impacts would remain less than significant without mitigation applied.

Mitigation Program

Mitigation Measures from the Ontario GP EIR

None identified in the Ontario GP EIR.

Conclusion

The Project would result in no new or more severe impact due to the hazardous waste site. A less than significant impact was identified in the Ontario GP EIR. The Project would be designed consistent with the applicable guidelines and standards within the Ontario GP, Ontario MC, and Ontario Development Code. Therefore, no new and/or modified mitigation measures are required for issues related to hazardous materials.

Threshold (e) For a Project located within an airport land use plan, or where such a plan has not been adopted, within two miles of a public airport or public use airport, result in a safety hazard or excessive noise for people residing or working the project area? [Ontario GP EIR Impact 5.8-3]

Threshold (f) For a project in the vicinity of a private airstrip, result in a safety hazard for people residing or working in the project area. [Ontario GP EIR Impact 5.8-4] [Not included in the updated CEQA Appendix G Thresholds]

No New or More Severe Impact: The Ontario GP EIR concluded that although the City contains portions of the Los Angeles/Ontario International Airport (LAONT) and Chino Airport land use compatibility zones, the established land use policies within each zone would limit risks from future development. The Project is outside of the Chino Airport compatibility area entirely. However, the Project remains inside of the LAONT compatibility area. Despite this, the Project is outside of the LAONT safety zones as established by the Ontario International Airport Land Use Compatibility Plan which was updated in June 2018.[16] The

[15] Department of Toxic Substances Control. (2021). EnviroStor. https://www.envirostor.dtsc.ca.gov/public/search.asp?page=5&cmd=search&business_name=&main_street_name=&city=&zip=&county=&status=ACT%2CBKLG%2CCOM&branch=&site_type=CSITES%2CFUDS&npl=&funding=&reporttitle=HAZARDOUS+WASTE+AND+SUBSTANCES+SITE+LIST+%28CORTESE%29&reporttype=CORTESE&Federal_superfund=&state_response=&voluntary_cleanup=&school_cleanup=&operating=&post_closure=&non_operating=&corrective_action=&tiered_permit=&evaluation=&spec_prog=&national_priority_list=&senate=&congress=&assembly=&critical_pol=&business_type=&case_type=&searchtype=&hwmp_site_type=&cleanup_type=&ocieerp=&hwmp=False&permitted=&pc_permitted=&inspections=&inspectionsother=&complaints=&censustract=&cesdecile=&school_district=&orderby=city (accessed August 8, 2021).

[16] The Ontario International Airport – Inter Agency Collaborative (ONT-IAC). (2018). Ontario International Airport Land Use Compatibility Plan (July 2018 Amendment) Map 2-2. Retrieved from: https://www.ont-iac.com/wp-content/uploads/2019/02/ONT-AIA-policy-map-2-2.pdf (Accessed August 9, 2021)

Project would therefore not conflict with the established airport land use plans and would not result in a safety hazard.

Mitigation Program

Mitigation Measures from the Ontario GP EIR

None identified in the Ontario GP EIR.

Conclusion

The Project would result in no new or more severe impact due to proximity to airports. A less than significant impact was identified in the Ontario GP EIR. The Project would be designed consistent with the applicable guidelines and standards within the Ontario GP, Ontario MC, and Ontario Development Code. Therefore, no new and/or modified mitigation measures are required for issues related to airport land use plans.

Threshold (g) Impair implementation of or physically interfere with an adopted emergency response plan or emergency evacuation plan. [Ontario GP EIR Impact 5.8-5]

No New or More Severe Impacts: The Ontario GP EIR concluded that the City's updated Local Hazard Mitigation Plan and regional emergency connections would provide proper emergency response and evacuation in cases of emergency. The City's Local Hazard Mitigation Plan establishes that interstates would serve as emergency evacuation routes.[17] The Project would not interfere with interstate capacity and would not include modifications to highway systems within the City. Furthermore, the Project would not modify the roadway in a way that would inhibit the traversal of emergency responders. Two driveways would be developed along Bon View Avenue to connect the Project site to the City's circulation network. This process would not impede the City's emergency response capacity and would allow for greater response to potential emergencies within the Project site.

As such, future development within Project boundaries would not interfere with an adopted emergency response plan and/or the emergency evacuation plan and less than significant impacts would occur. Accordingly, no new or more severe impact from a previously identified significant impact evaluated in the Ontario GP EIR would occur. Additionally, no new information of substantial importance that was not known and could not have been known at the time the Ontario GP EIR was certified is available that would change the impact finding.

Mitigation Program

Mitigation from the Ontario GP EIR

None identified in the Ontario GP EIR.

Conclusion

The Project would result in no new or more severe impact due to the inhibition of emergency access. A less than significant impact was identified in the Ontario GP EIR. The Project would be designed consistent

[17] City of Ontario. (2018). City of Ontario 2018 Hazard Mitigation Plan. Page 4-102. Retrieved from: https://www.ontarioca.gov/sites/default/files/Ontario-Files/Emergency-Management/ReadyOntario/city_of_ontario_2018_hmp.pdf (Accessed August 9, 2021)

with the applicable guidelines and standards within the Ontario GP, Ontario MC, and Ontario Development Code. Therefore, no new and/or modified mitigation measures are required for issues related to emergency response capabilities.

Threshold (h) Expose people or structures, either directly or indirectly, to a significant risk of loss, injury, or death involving wildland fires. [Ontario GP EIR Impact 5.8-6]

No New or More Severe Impacts: The Project would not expose people or structures to a risk of loss, injury or death involving wildland fires, including where wildlands are adjacent to urbanized areas or where residences are intermixed with wildlands. The Project site is located within an urbanized area and is surrounded by development on all sides. The Project site is not located within or adjacent to land designated as a very high fire hazard severity zone (VHFHSZ).[18] Impacts related to wildland fires would not be significant. Accordingly, no new or more severe impact from a previously identified significant impact evaluated in the Ontario GP EIR would occur. Additionally, no new information of substantial importance that was not known and could not have been known at the time the Ontario GP EIR was certified is available that would change the impact finding.

Mitigation Program

Mitigation from the Ontario GP EIR

None identified in the Ontario GP EIR.

Conclusion

The Project would result in less than significant impacts in relation to wildland fires. A less than significant impact was also identified in the Ontario GP EIR. The Project would be designed consistent with the applicable guidelines and standards within the Ontario GP, Ontario MC, and Ontario Development Code. Therefore, no new and/or modified mitigation measures are required for issues related to wildland fires.

Overall Hazards and Hazardous Materials-Related Impacts Conclusion

With regard to CEQA Section 21166 and CEQA Guidelines Section 15162(a), the changes proposed by the Project would not result in any new impacts, or increase the severity of the previously identified impacts, with respect to hazards and hazardous materials. Therefore, preparation of a SEIR is not warranted.

[18] CAL FIRE FRAP (2021). Fire Hazard Severity Zone Viewer. https://egis.fire.ca.gov/FHSZ/ (Accessed August 9, 2021).

4.9 Hydrology and Water Quality

4.9.1 Summary of Previous Environmental Analysis

The Ontario GP EIR concluded that implementation of the Ontario GP would not result in significant impacts relative to hydrology and water quality, and no mitigation is necessary to reduce potential impacts.

4.9.2 Analysis of Proposed Project

Threshold (a) Violate any water quality standards or waste discharge requirements or otherwise substantially degrade surface or groundwater quality? [Ontario GP EIR Impact 5.9-4]

Threshold (i) Conflict with or obstruct implementation of a water quality control plan or sustainable groundwater management plan? [Ontario GP EIR Impact 5.9-4]

No New or More Severe Impact: The Project would result in no new or more severe impacts as it pertains to any conflicts with water quality and groundwater plans. Based on the Ontario GP EIR findings, implementation of NPDES and SWPPP BMPS would effectively minimize impacts associated with water quality. As such, the Project would comply with Federal, State, and local regulations regarding the maintenance of water quality standards. This includes the development of an NPDES permit and the associated SWPPP. BMPs included in these permits may include actions such as:

- Site design standards that maximize permeable areas, use porous pavements, and focus on natural drainage systems;
- Structural source control that minimizes pollution of stormwater by such means as paving trash storage areas and fueling areas with impervious surfaces, and grading such areas to block run-off; and
- Treatment Control measures that Remove pollutants from stormwater by filtration, media absorption, or other means.

Therefore, no new and/or modified mitigation measures are required for issues related to potential water degradation through Project implementation.

Mitigation Program

Mitigation Measures from the Ontario GP EIR

None identified in the Ontario GP EIR.

Conclusion

The Project would result in no new or more severe impact due to water quality degradation. A less than significant impact was identified in the Ontario GP EIR. The Project would be designed consistent with the applicable guidelines and standards within the Ontario GP, Ontario MC, and Ontario Development Code. Therefore, no new and/or modified mitigation measures are required for issues related to water quality.

Threshold (b) Substantially decrease groundwater supplies or interfere substantially with groundwater recharge such that the project may impede sustainable groundwater management of the basin? [Ontario GP EIR Impact 5.9-2]

The majority of the Project area is developed and urbanized, therefore, development of the area would not cause a significant increase in impervious surfaces and therefore would not substantially impact groundwater supplies or interfere with groundwater recharge. The Project would not introduce a new inconsistent use to the Project area which would exceed the usages estimated with the land use designation associated with the Project. Therefore, the Project would not deplete or otherwise substantially degrade surface or groundwater quality, nor would it substantially decrease groundwater supplies or interfere substantially with groundwater recharge such that the Project may impede sustainable groundwater management of the basins.

The Project therefore would not result in new or more severe impacts related to groundwater. Additionally, no new information of substantial importance that was not known and could not have been known at the time the Ontario GP EIR was certified is available that would change the impact determination. Accordingly, the Project would not significantly impact local groundwater recharge. Impacts would be less than significant.

Mitigation Program

Mitigation Measures from the Ontario GP EIR

None identified in the Ontario GP EIR.

Conclusion

The Project would result in no new or more severe impact due to groundwater degradation. A less than significant impact was identified in the Ontario GP EIR. The Project would be designed consistent with the applicable guidelines and standards within the Ontario GP, Ontario MC, and Ontario Development Code. Therefore, no new and/or modified mitigation measures are required for issues related to groundwater.

Threshold (c) Substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river, or through the addition of impervious surfaces in a manner which would result in a substantial erosion or siltation on- or off-site. [Not analyzed in the Ontario GP EIR]

Threshold (d) Substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river, or through the addition of impervious surfaces in a manner which would substantially increase the rate or amount of surface runoff in a manner which would result in flooding on- or offsite? [Ontario GP Impact 5.9-1]

Threshold (e) Substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river, or through the addition of impervious surfaces in a manner which would create or contribute runoff water which would exceed the capacity of existing or planned storm water drainage systems or provide substantial additional sources of polluted runoff. [Ontario GP Impact 5.9-1]

No New or More Severe Impact: As stated in the Ontario GP EIR, stormwater infrastructure would be designed to accommodate flows added through the implementation of the Ontario GP. As stated in **Section 4.6, Geology and Soils**, future projects including the Project would be required to attain an NPDES permit and associated SWPPP. These two processes and the associated BMPs would adequately minimize potential off-site water quality impacts. Construction-related BMPs would be identified based on site-specific conditions during preparation of a SWPPP for the future development project. Long term operational BMPs would be identified through issuance of an NPDES permit through the Regional Water Quality Control Board (RWQCB) and would include water quality features to ensure that runoff is treated prior to discharge into the storm drain or regional conveyance facilities. Furthermore, based on the state of the Project site and consistency with existing uses, it is anticipated that the Project would not violate any water quality standards or waste discharge requirements.

The Project would also result in no new or more severe impact from erosion or siltation. Based on the Ontario GP EIR findings, the Project site is not located in an area prone to the previously mentioned natural or manmade disasters. Thus, the Project would not substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river or through the addition of impervious surfaces, in a manner which would create the above-mentioned disasters. A less than significant impact is anticipated from Project implementation. No new impact or increase in the severity of an identified impact would therefore occur with implementation of the Project.

Threshold (f) Substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river, or through the addition of impervious surfaces in a manner which would in flood hazard, tsunami, or seiche zones, risk release of pollutants due to project inundation? [Ontario GP Impact 5.9-3, 5.9-10]

Threshold (g) Substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river, or through the addition of impervious surfaces in a manner which would impede or redirect flood flows? [Ontario GP Impact 5.9-3]

No New or More Severe Impact: According to Ontario GP EIR Figure 5.9-2, the Project site is not located within a Federal Emergency Management Agency (FEMA) designated 100-year floodplain. Further, the current FEMA Flood Insurance Rate Map (FIRM) for the Project area shows that it lies outside of known flood hazard zones. The Project involves the development of industrial warehousing facility in an area previously occupied by similar uses.

The Project would result in no new or more severe impacts as it pertains to flood hazard, tsunami, or seiche zones, or risk the release of pollutants due to Project inundation. Based on the Ontario GP EIR findings, the Project site is not located in an area prone to the previously mentioned natural or manmade disasters. Thus, no pollutants would be released due to inundation by seiche, tsunami, or mudflow. Therefore, the Project would not involve the development of residential structures or impede flood flows.

Mitigation Program

Mitigation Measures from the Ontario GP EIR

None identified in the Ontario GP EIR.

Conclusion

The Project would result in no new or more severe impact due to flood risks. A less than significant impact was identified in the Ontario GP EIR. The Project would be designed consistent with the applicable guidelines and standards within the Ontario GP, Ontario MC, and Ontario Development Code. Therefore, no new and/or modified mitigation measures are required for issues related to flooding.

Threshold (i) Expose people or structures to a significant risk of loss, injury or death involving flooding, including flooding as a result of the failure of a levee or dam? [Ontario GP Impact 5.9-3] [Not included in the 2021 CEQA Appendix G Thresholds]

No New or More Severe Impact: According to the Ontario GP EIR Figure 5.9-2, the Project site is located within the San Antonio Creek Dam Failure Inundation area. This would leave the Project site potentially flooded to a depth of up to four feet. However, it is stated that dam failure for the San Antonio Creek Dam is very low due to the City's low potential for significant ground shaking earthquakes.[19] Furthermore, according to Ontario GP EIR Figure 5.9-2, in a case of dam failure, dam inundation would arrive at the Project site in approximately three to four hours, which would be enough to time to evacuate personnel and minimize human injury and hazards.

Mitigation Program

Mitigation Measures from the Ontario GP EIR

None identified in the Ontario GP EIR.

Conclusion

The Project would result in no new or more severe impact due to flood risks. A less than significant impact was identified in the Ontario GP EIR. The Project would be designed consistent with the applicable guidelines and standards within the Ontario GP, Ontario MC, and Ontario Development Code. Therefore, no new and/or modified mitigation measures are required for issues related to flooding.

Overall Hydrology and Water Quality-Related Impacts Conclusion

With regard to CEQA Section 21166 and CEQA Guidelines Section 15162(a), the changes proposed by the Project would not result in any new impacts, or increase the severity of the previously identified impacts, with respect to hydrology and water quality. Therefore, preparation of a SEIR is not warranted.

[19] City of Ontario. (2009). The Ontario Plan Draft EIR. 5.9 Hydrology. Page 5.9-23. Costa Mesa, CA: The Planning Center.

4.10 Land Use and Planning

4.10.1 Summary of Previous Environmental Analysis

According to the Ontario GP EIR, implementation of the Ontario GP would not divide an established community. The Ontario GP includes a range of industrial, commercial, public, and residential uses. The Ontario GP EIR concluded that implementation of the Ontario GP would not result in significant impacts relative to land use and planning, and no mitigation is necessary to reduce potential impacts.

4.10.2 Analysis of Proposed Project

Threshold (a) Physically divide an established community? [Ontario GP Impact 5.10-1]

No New or More Severe Impact: The Project site is largely developed with, and surrounded by, industrial warehousing uses (see Section 2.1 for more detail). Consistent with the Ontario GP EIR, the Project would not divide an established community. The Project proposes to implement a warehouse/logistics facility. The Project would be similar and consistent with surrounding uses. Existing development within the Project area is already divided by the existing local roadway network, including Bon View Avenue, and the Project is not anticipated to create additional physical barriers between these uses. Therefore, there are no new or more severe impacts.

Mitigation Program

Mitigation Measures from the Ontario GP EIR

None identified in the Ontario GP EIR.

Conclusion

The Project would result in no new or more severe land use impacts. A less than significant impact was identified in the Ontario GP EIR. The Project would be designed consistent with the applicable guidelines and standards within the Ontario GP, Ontario MC, and Ontario Development Code. Therefore, no new and/or modified mitigation measures are required for issues related to land use.

Threshold (b) Cause a significant environmental impact due to a conflict with any land use plan, policy, or regulation adopted for the purpose of avoiding or mitigating an environmental effect? [Ontario GP EIR Impact 5.10-2]

No New or More Severe Impact: No potentially significant impacts related to land use and planning are identified in the Ontario GP EIR. The Project would not require an amendment to the Ontario Plan EIR Land Use Element, because warehousing uses are permitted uses by right within industrial zones. As such, the Project would be consistent with applicable land use plans, including the Ontario GP. The Project does, however, propose the implementation of a Zone Change for the Project site's southern parcel (APN 1050-441-05) from zoning designation Light Industrial (IL) to General Industrial (IG). The Zone Change is intended to create a consistent zoning designation throughout the Project site. This change, however, is not expected to substantially affect established land use policies since both zoning designations allow for the Project's proposed uses. The Project would therefore not cause a significant

environmental impact due to a conflict with any land use plan, policy, or regulation adopted for the purpose of avoiding or mitigating an environmental effect.

Mitigation Program

Mitigation Measures from the Ontario GP EIR

None identified in the Ontario GP EIR.

Conclusion

The Project would result in no new or more severe land use impacts. A less than significant impact was identified in the Ontario GP EIR. The Project would be designed consistent with the applicable guidelines and standards within the Ontario GP, Ontario MC, and Ontario Development Code. Therefore, no new and/or modified mitigation measures are required for issues related to land use.

Threshold (c) Conflict with any applicable habitat conservation plan or natural community conservation plan. [Ontario GP EIR Impact 5.10-3] [Not included in the 2021 CEQA Appendix G Thresholds]

See Section 4.4, threshold (f) above.

Mitigation Program

Mitigation Measures from the Ontario GP EIR

None identified in the Ontario GP EIR.

Conclusion

The Project would result in no new or more severe land use impacts. A less than significant impact was identified in the Ontario GP EIR. The Project would be designed consistent with the applicable guidelines and standards within the Ontario GP, Ontario MC, and Ontario Development Code. Therefore, no new and/or modified mitigation measures are required for issues related to land use.

Overall Land Use and Planning Impacts Conclusion

With regard to CEQA Section 21166 and CEQA Guidelines Section 15162(a), the changes proposed by the Project would not result in any new impacts, or increase the severity of the previously identified impacts, with respect to land use and planning. Therefore, preparation of a SEIR is not warranted.

4.11 Mineral Resources

4.11.1 Summary of Previous Environmental Analysis

According to the Ontario GP EIR, two areas in the City are classified as Mineral Resource Zone (MRZ)-2: one is in the northwestern portion of the City and the second is along the eastern City boundary. These two areas total approximately 6,132 acres, or approximately 19 percent of the City's area; see Figure 5.11-1, Mineral Resource Zones of the Ontario GP EIR. The remainder of the City, approximately 81 percent of its area, is MRZ-3, where the significance of mineral deposits is unknown. Mineral resources in the City are limited to construction aggregates such as sand and gravel. There are currently no permitted mining operations in the City.

The Ontario GP EIR concluded that according to the Ontario Plan, it is not anticipated that the City would contain known deposits of precious gemstones, ores, or unique, or rare minerals within the Project vicinity and development projects would not result in significant impacts relative to mineral resources, and no mitigation measures were implemented.

4.11.2 Analysis of Proposed Project

Threshold (a) Result in the loss of availability of a known mineral resource that would be of value to the region and the residents of the state? [Ontario GP EIR Impact 5.11-1]

Threshold (b) Result in the loss of availability of a locally important mineral resource recovery site delineated on a local general plan, specific plan, or other land use plan? [Ontario GP EIR Impact 5.11-1]

No New or More Severe Impact: Consistent with the Ontario GP EIR conclusions, the Project site is not located in an area known to contain mineral resources that would be of value to the region and the residents of the State.[20] Additionally, implementation of the Project would not result in the loss of availability of a locally important mineral resources recovery site delineated in the Ontario GP or on California Department of Conservation mapping. No new or more severe impact relative to mineral resources not already evaluated in the Ontario GP EIR would occur with implementation of the Project. A less than significant impact would occur.

Mitigation Program

Mitigation Measures from the Ontario GP EIR

None identified in the Ontario GP EIR.

Overall Mineral Resources Impacts Conclusion

With regard to CEQA Section 21166 and CEQA Guidelines Section 15162(a), the changes proposed by the Project would not result in any new impacts, or increase the severity of the previously identified impacts, with respect to mineral resources. Therefore, preparation of a SEIR is not warranted.

[20] California Department of Conservation. 2021. *Mineral Land Classification.* https://maps.conservation.ca.gov/cgs/informationwarehouse/index.html?map=mlc (accessed August 21, 2021).

4.12 Noise

4.12.1 Summary of Previous Environmental Analysis

The Ontario GP EIR considered noise from construction activities as well as noise from operations during full buildout of the Ontario GP, including vehicle traffic the potential exposure of nearby residents and other sensitive receptors to noise. With implementation of mitigation measures, all noise impacts were determined to remain significant and unavoidable, with the exception of Ontario GP EIR 5.12-4, whose impact was deemed less than significant. The potential for significant levels of groundborne vibrations and noise would be sufficiently mitigated to less than significant levels.

4.12.2 Analysis of Proposed Project

Threshold (a) Generation of a substantial temporary or permanent increase in ambient noise levels in the vicinity of the project in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies? [Ontario GP EIR Impact 5.12-1, 5.12-2]

Threshold (c) A substantial permanent increase in ambient noise levels in the project vicinity above levels existing without the project. [Ontario GP EIR Impact 5.12-1, 5.12-2] [Not included in the 2021 CEQA Appendix G Thresholds]

No New or More Severe Impact: The Ontario GP EIR found that the buildout of the Ontario GP would create increased traffic which would generate substantial amounts of noise within the City. This would also affect sensitive receptors due to the citywide increase of ambient noise levels.

Figure 5.12-1 of the Ontario GP EIR shows that existing noise levels in the Project area was between 60 to 65 decibels (dBA). The City projected that these noise levels would remain the same as shown in Figure 5.12-6 of the Ontario GP EIR. Noise levels for the Project would be similar to those currently generated at the Project site due to the similarity of the proposed uses with the existing uses. The Project does not include roadway improvements which would alter traffic patterns in the surrounding area. According to Figure 5.12-8 of the Ontario GP EIR, the Project site is not bounded by roadways which would experience increased noise levels. Because the Project would be consistent with the existing land use of the Project area, future noise impacts would be accounted for through the findings of the Ontario GP EIR. However, despite the significant impact identified in the Ontario GP EIR, the Project would occupy a specific area of the City which would not experience increased noise levels through the buildout of the Ontario GP.

Mitigation was found to not be suitable to reduce the significance of Impact 5.12-1 in the Ontario GP EIR, however, because the Project is unlikely to generate a significant amount of noise compared to the City's projections, mitigation is not required, and impacts would be less than significant. However, mitigation measure 12-1 was found suitable to reduce the significance of Impact 5.12-2 in the Ontario GP EIR.

Mitigation Program

Mitigation Measures from the Final EIR

Mitigation measure 12-1 was proposed in the Ontario GP EIR. However, mitigation measure 12-1 is not applicable to the Project because the Project (1) does not involve a noise-sensitive use and (2) is not located within the 65 dBA CNEL contour line.

Conclusion

The Project would result in no new or more severe land use impacts. A significant and unavoidable impact was identified in the Ontario GP EIR. The Project would be designed consistent with the applicable guidelines and standards within the Ontario GP, Ontario MC, and Ontario Development Code. Despite the significant impacts identified in the Ontario GP EIR, Project impacts would be less than significant and no new and/or modified mitigation measures are required for issues related to noise levels.

Threshold (b) Generation of excessive groundborne vibration or groundborne noise levels? [Ontario GP EIR Impact 5.12-3, 5.12-4]

No New or More Severe Impact: The Ontario GP EIR found that groundborne vibrations due to construction activities had the potential to create significant impacts at full buildout of the Ontario GP. Construction of the Project could generate varying degrees of groundborne vibration depending on the construction procedure and the construction equipment used.

According to Ontario MC Section 5.29-04, manufacturing and industrial noise limits are 70 dBA during the 7 am to 10 pm period, and 70 dBA during the 10 pm to 7 am period. Furthermore, the Ontario GP states that vibrational annoyance are likely to occur once decibel velocity (VdB) exceeds 78 VdB within 25 feet of the sensitive receptor and structural damage is likely to occur once Root Mean Square (RMS) velocity exceeds 0.2 inches per second (in/sec) within 25 feet of a sensitive receptor. The nearest sensitive receptors are the multi-family residential uses approximately 200 feet south of the Project boundary.

Noise levels can be calculated using the following equation: Lv(D) = Lv(25 feet) - (30 x log10(D/25 feet)). Vibrational levels can be calculated using the following equation: $PPV_{equip} = PPV_{ref} \times (25/D)^{1.5}$. For these equations, PPV_{equip} = the peak particle velocity in in/sec of the equipment adjusted for the distance; PPV_{ref} = the reference vibration level in in/sec, D = the distance from the equipment to the receiver, and L_v = the vibrational level.[21]

Table 7-4 of the Federal Transit Administration (FTA) Transit Noise and Vibration Impact Assessment Manual lists construction equipment noise and vibration levels at 25 feet (112 VdB). **Table 5, Typical Construction Equipment Noise and Vibration Levels** displays noise levels at 200 feet using the above noise and vibration equations.

[21] Federal Transit Administration. (2018). *Transit Noise and Vibration Impact Assessment Manual*. Page 185.

Table 5: Typical Construction Equipment Noise and Vibration Levels

Equipment	PPV at 25 Feet (in/sec)	PPV at 200 Feet (in/sec)	Exceed Threshold? (.2 in/sec)	Velocity at 25 Feet (VdB)	Velocity at 200 Feet (VdB)	Exceed Threshold? (78 VdB)

Source: Federal Transit Administration. (2018). *Transit Noise and Vibration Impact Assessment Manual. Table 7-4*. Page 184.

The Project would generate vibrational levels well below the acceptable thresholds established by the FTA. Similarly, use of construction equipment would not generate noise levels beyond established levels except in the upper range of impact pile drivers. However, the upper range is not consistently used during construction activities and would occur in short-term temporary events. The typical range is more indicative of average equipment usage.

It is also acknowledged that construction activities would occur throughout the Project site and would not be concentrated at the point closest to the nearest residential structure. Therefore, vibration impacts associated with the Project would be less than significant.

Once operational, the Project would not be a source of groundborne vibration. Operations of the Project would include truck deliveries. Due to the rapid drop-off rate of ground-borne vibration and the short duration of the associated events, vehicular traffic-induced ground-borne vibration is rarely perceptible beyond the roadway right-of-way, and rarely results in vibration levels that cause damage to buildings in the vicinity. The nearest sensitive receptors are approximately 200 feet from the Project boundary. At 200 feet, impacts would be less than significant in this regard.

Mitigation Program

Mitigation Measures from the Final EIR

Mitigation measures 12-2 and 12-3 were proposed in the Ontario GP EIR. However, mitigation measures 12-2 and 12-3 are not applicable because the Project would not generate noise or vibrations above established thresholds and is not directly adjacent to the Union Pacific Railroad or Southern California Regional Rail Authority main lines.

Conclusion

No new impacts or a substantial increase in the severity of a previously identified significant impact evaluated in the Ontario GP EIR would occur. Additionally, no new information of substantial importance that was not known and could not have been known at the time the Ontario GP EIR was certified is available that would impact the prior finding of no significant impact under this issue area.

Threshold (d) A substantial temporary or periodic increase in ambient noise levels in the project vicinity above levels existing without the project? [Ontario GP EIR Impact 5.12-5] [Not included in the 2021 CEQA Appendix G Thresholds]

Construction

Construction-related activities would temporarily increase ambient noise levels in the Project vicinity. Construction-related noise levels at and near the Project site would fluctuate depending on the level and type of construction activity on a given day. The analysis performed in the Final EIR used conservative assumptions to calculate worst-case construction noise levels. Noise from Project construction activities could be audible at nearby residential uses. Construction noise would be intermittent and last for several days or a few weeks. Short-term noise impacts associated with excavation, earthmoving, and construction activities would be considered less than significant if: 1) construction activities are limited to daytime hours; 2) construction equipment is equipped with noise control filters, as appropriate; and 3) construction activity is monitored to ensure that noise reduction specifications and guidelines are met. Project construction would be implemented in accordance with these conditions. It is not anticipated that construction of the Project would result in new short-term noise impacts or increase the severity of impacts previously analyzed in the Final EIR. Additionally, the Project would be required to comply with Mitigation Measure 12-4. Therefore, no further environmental review is required.

Mitigation Program

Mitigation Measures from the Final EIR

Mitigation Measure 12-4 was identified in the Ontario GP EIR. However, mitigation measure 12-4 is not applicable to the Project since the analysis within this Addendum EIR provides suitable substantiation for the anticipation of less than significant noise impacts.

Conclusion

Mitigation Measure 12-4 would reduce construction noise levels. Additionally, no new information of substantial importance that was not known and could not have been known at the time the Ontario GP EIR was certified is available that would impact the prior finding of no significant impact under this issue area.

Threshold (e, f) For a project located within the vicinity of a private airstrip or an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project expose people residing or working in the project area to excessive noise levels? [Ontario GP EIR Impact 5.12-6]

No New or More Severe Impact: The Ontario International Airport is located approximately 1.4 miles northeast of the Project site. As stated in Section 4.8 (threshold f) above, the Project site is located within the Airport Influence Area of the LAONT. However, the Project site is located within the 60- 65 dB CNEL

noise impact zone of the airport.[22] The Project's proximity would not likely be significantly affected by overhead aircraft noise. According to Table 2-3 of the LAONT land use plan, industrial uses are considered normally compatible for noise levels ranging from less than 60 dBA to 70 dBA.[23] Additionally, the Project site is not located within the vicinity of a private airstrip. Accordingly, no new impact or a substantial increase in the severity of a previously identified significant impact evaluated in the Ontario GP EIR would occur. Additionally, no new information of substantial importance that was not known and could not have been known at the time the Ontario GP EIR was certified is available that would change the impact finding.

Mitigation Program

Mitigation Measures from the Final EIR

Ontario GP EIR mitigation measure 12-1 would be used to minimize impacts. However, mitigation measure 12-1 is not applicable to the Project because the Project (1) does not involve a noise-sensitive use and (2) is not located within the 65 dBA CNEL contour line.

Conclusion

There are no new potentially significant impacts associated with the Project; therefore, no new and/or refined mitigation measures are required.

Overall Noise Impact Conclusion

With regard to CEQA Statute Section 21166 and CEQA Guidelines Section 15162(a), the changes proposed by the Project would not result in any new impacts, or increase the severity of the previously identified impacts, with respect to noise. Therefore, preparation of a SEIR is not warranted.

[23] Ibid. Table 2-3. Retrieved from: https://www.ont-iac.com/wp-content/uploads/2019/02/ALUCP-Chap-2-Table-2-3-Noise-Criteria-Amendment-July-2018-Final-Doc.pdf (Accessed August 9, 2021)

4.13 Population and Housing

4.13.1 Summary of Previous Environmental Analysis

According to the Ontario GP EIR, buildout of the Ontario GP would not result in any significant impacts to existing residential units within the City. Should future development proposals result in the potential for displacement of residential uses, each development application would be reviewed on a case-by-case basis for impacts. As such, the Ontario GP EIR concluded that impacts in this regard would be less than significant and no mitigation measures were recommended.

4.13.2 Analysis of Proposed Project

Threshold (a) Induce substantial unplanned population growth in an area, either directly (for example, by proposing new homes and businesses) or indirectly (for example, through extension of roads or other infrastructure)? [Ontario GP EIR Impact 5.13-1]

No New or More Severe Impact: The Ontario GP EIR concluded that the implementation of the Ontario GP would include population growth that exceeded SCAG projections. SCAG projections for 2035 were 337,095, and the Ontario GP anticipated a population of 360,851 persons. However, impacts were anticipated to be less than significant due to the creation of balanced land uses.

The Project would not induce population growth through the introduction of housing because no housing is associated with the development. Furthermore, the Project would not propose modifications to land uses and would involve similar activities to those currently conducted on the Project site. While the construction phase may temporarily generate employment, these jobs would not remain constant enough to generate population growth.

SB 330, the Housing Accountability Act, which is part of the Planning and Zoning Law, prohibits a local agency from disapproving, or conditioning approval in a manner that renders infeasible, a housing development project for very low, low-, or moderate-income households or an emergency shelter unless the local agency makes specified written findings based on a preponderance of the evidence in the record. In this instance, SB 330 is not applicable because as previously noted, the Project does not propose any housing and the Project site is not zoned for residential development. Due to the continuation of similar land uses, a less than significant impact would occur.

Mitigation Program

Mitigation Measures from the Final EIR

No mitigation measures were identified in the Ontario GP EIR.

Conclusion

There are no new potentially significant impacts associated with the Project; therefore, no new and/or refined mitigation measures are required.

Threshold (b) Displace substantial numbers of existing people or housing, necessitating the construction of replacement housing elsewhere? [Ontario GP EIR Impact 5.13-2]

No New or More Severe Impact: The Project involves the development of new industrial uses in an area that is currently occupied by industrial warehousing land uses. The Project would be consistent with the established land use designations of the Project area and therefore the Ontario GP. As the Project does not remove currently occupied housing, or reduce the City's capacity for housing, the provision of replacement housing would not be necessary. No impact would occur in this regard.

Mitigation Program

Mitigation Measures from the Final EIR

No mitigation measures were identified in the Ontario GP EIR.

Conclusion

There are no new potentially significant impacts associated with the Project; therefore, no new and/or refined mitigation measures are required.

Overall Population and Housing Impact Conclusion

With regard to CEQA Statute Section 21166 and CEQA Guidelines Section 15162(a), the changes proposed by the Project would not result in any new impacts, or increase the severity of the previously identified impacts, with respect to population and housing. Therefore, preparation of a SEIR is not warranted.

4.14 Public Services

4.14.1 Summary of Previous Environmental Analysis

The Ontario GP EIR concluded that there is potential for service needs to increase relative to fire protection, police protection, and schools with the implementation of the Ontario GP. However, these increases in population would still remain within the City's service capacity. The Ontario GP EIR also concluded that implementation of the Ontario GP would not significantly increase the demand for library services that would require construction of additional library facilities.

Threshold (a) Result in a substantial adverse physical impact associated with the provision of new or physically altered governmental facilities, need for new or physically altered governmental facilities, the construction of which could cause significant environmental impacts, in order to maintain acceptable service ratios, response times or other performance objectives for fire protection services, police protection services, school services, parks services, and other public facilities*?* [Ontario GP EIR Impact 5.14-1, 5.14-2, 5.14-3, 5.14-4]

No New or More Severe Impact: The Project does not include or require construction of any new or physically altered fire protection, police protection, school, or other public facilities. Prior to commencement of construction activities, the Project plans would be reviewed by applicable local agencies to ensure compliance with the Ontario MC and Ontario Development Code, as well as all applicable regulations to ensure adequate site signage, lighting, and other crime safety preventative measures. This includes fair use fees which are sourced from developers that are distributed to City services such as fire and police protection facilities. The nearest Ontario Fire Department (OFD) station is OFD Station 3 located approximately 0.8 miles northeast of the Project site. The nearest Ontario Police Department (OPD) is approximately 2.4 miles southeast of the Project site.

Construction of the Project would not result in adverse physical impacts associated with the provision of or need for new or physically altered public facilities, and would not adversely affect service ratios, response times, or other performance objectives. Compliance with applicable local regulations would ensure that Project construction would result in a less than significant impact to public services.

Since the Project site is already served by the existing fire station, and the Project would be constructed pursuant to existing California Fire Code regulations, the Project would not result in the need for new or physically altered police and/or fire department facilities that could cause significant environmental impacts.

The Project does not have a residential component and would therefore not directly introduce new residents to the City that would require public services.

No new information of substantial importance that was not known and could not have been known at the time the Ontario GP EIR was certified is available. Impacts to fire protection, police protection, schools, and other public facilities are anticipated to be less than significant. Lastly, the Project's payment of the General City Development Impact Fees, a portion of which is allocated to the fire department(s), would aid in offsetting any potential impacts.

Mitigation Program

Mitigation Measures from the Ontario GP EIR

No mitigation measures were identified in the Ontario GP EIR.

Overall Public Services Impact Conclusion

With regard to CEQA Statute Section 21166 and CEQA Guidelines Section 15162(a), the changes proposed by the Project would not result in any new or more severe impacts from the previously identified impacts, with respect to public services. Therefore, preparation of an SEIR is not warranted.

4.15 Recreation

4.15.1 Summary of Previous Environmental Analysis

The Ontario GP EIR concluded that future development associated with the Ontario GP would not result in a significant impact due to the inclusion of helpful policies. Although Project could create temporary employment opportunities through the construction phase, the overall use would be consistent with the established land use.

4.15.2 Analysis of Proposed Project

Threshold (a) Would the project increase the use of existing neighborhood and regional parks or other recreational facilities such that substantial physical deterioration of the facility would occur or be accelerated? [Ontario GP EIR Impact 5.15-1]

Threshold (b) Does the project include recreational facilities or require the construction or expansion of recreational facilities which might have an adverse physical effect on the environment? [Ontario GP EIR Impact 5.15-1]

No New or More Severe Impact: The Ontario GP EIR concluded that the population growth included in the implementation of the Ontario GP would increase demand for parkland and open space beyond the preferred ratio of three acres per 1,000 residents and would necessitate a policy change to increase this ratio to 5 acres per 1,000 residents (currently Policy PR1-5). Policy PR1-6 also provides a minimum of two acres of developed private park space per 1,000 residents.

The Project does not include residential uses which would directly increase the City's population or demands on park facilities. Specifically, the Project is not anticipated to substantially increase the use of existing neighborhood and regional parks or other recreational facilities such that substantial physical deterioration of the facility would occur or be accelerated, nor would it include recreational facilities or require the construction or expansion of recreational facilities which might have an adverse physical effect on the environment.

Mitigation Program

Mitigation Measures from the Ontario GP EIR

No mitigation measures were proposed in the Ontario GP EIR.

Overall Recreation Impact Conclusion

With regard to CEQA Statute Section 21166 and CEQA Guidelines Section 15162(a), the changes proposed by the Project would not result in any new or more severe impacts from the previously identified impacts, with respect to recreation. Therefore, preparation of an SEIR is not warranted.

4.16 Transportation

4.16.1 Summary of Previous Environmental Analysis

The Ontario GP EIR identified one impact area which would create significant and unavoidable impacts. The Ontario GP EIR found that through the buildout of the Ontario GP, traffic would increase and lower the service levels of intersections within the City significantly. Mitigation is proposed in order to reduce this impact; however, the impact was determined to be significant and unavoidable regardless of mitigation. Other potential impacts due to the implementation of the Project were found to be less than significant without the need for mitigation.

4.16.2 Analysis of Proposed Project

Threshold (a, g) Conflict with a program, plan, ordinance or policy addressing the circulation system, including transit, roadway, bicycle and pedestrian facilities? [Updated to 2021 CEQA Appendix G Thresholds] [Ontario GP Impact 5.16-1 and 5.16-5]

Threshold (b) Would the project conflict or be inconsistent with CEQA Guidelines section 15064.3, subdivision (b)? [Ontario GP Impact 5.16-1]

No New or More Severe Impact: The Ontario GP EIR did not study the intersections nearest to the Project site. However, the nearest major intersections would remain at a level of service (LOS) that is suitable and less than significant. These intersections include Campus Avenue and Philadelphia Street, Grove Avenue and Francis Avenue, and Grove Avenue and Philadelphia Street.

The Project would involve the development of a warehousing facility that is consistent with the land use designations and regulations of the Project area. Furthermore, the Project would be developed similarly to the current existing uses which consist of industrial structures and activities. The Project would not include roadway modification to adjacent streets (Cedar Street and Bon View Avenue) apart from the replacement of the five (5) existing driveways with two (2) proposed driveways to provide ingress and egress to/from the Project site. The similarity between the existing uses and the Project imply that traffic intensity would not substantially change. Further, the intersections studied by the Ontario GP EIR show a less than significant LOS through the implementation of the Ontario GP.

As well, The Project also does not include roadway improvements that would modify pedestrian, mass transit, or bicycle infrastructure. Roadways would continue to function under their current form.

Moreover, with respect to CEQA Guidelines section 15064.3 regarding the Project's vehicles miles traveled (VMT) impact, the Project is screened out from VMT due to its location within a low VMT generating zone. Therefore, impacts from the Project would be less than significant.

Mitigation Program

Mitigation Measures from the Ontario GP EIR

The Ontario GP EIR proposed mitigation measure 16-1 to minimize impacts to less than significant. However, mitigation measure 16-1 is imposed solely upon the City, and is therefore not applicable to the proposed Project.

Conclusion

The Project would not further exceed roadway usage capacities or traffic thresholds established within the City. No new impacts or a substantial increase in the severity of the previously identified significant impact evaluated in the Ontario GP EIR would occur. Additionally, no new information of substantial importance that was not known and could not have been known at the time the Ontario GP EIR was certified that would impact the prior finding under this issue area.

Threshold (c) Result in a change in air traffic patterns, including either an increase in traffic levels or a change in location that results in substantial safety risks? [Ontario GP EIR Impact 5.16-2] [Not included in the 2021 CEQA Appendix G Thresholds]

No New or More Severe Impact: The Project does not involve the modification of air traffic infrastructure, plans, or policies. No impact would occur.

Mitigation Program

None identified in the Ontario GP EIR.

Conclusion

No new impacts or a substantial increase in the severity of a previously identified significant impact evaluated in the Ontario GP EIR would occur. Additionally, no new information of substantial importance that was not known and could not have been known at the time the Ontario GP EIR was certified that would impact the prior finding of no significant impact under this issue area.

Threshold (d) Substantially increase hazards due to a design feature (e.g., sharp curves or dangerous intersections) or incompatible uses (e.g., farm equipment) [Ontario GP EIR Impact 5.16-3]

Threshold (e) Result in inadequate emergency access? [Ontario GP EIR Impact 5.16-3]

No New or More Severe Impact: The Project's geometric design features, including the entrances and internal driveway system, have been designed to meet the standards for the turning radii of large trucks with trailers. This is also beneficial for the access of emergency response equipment, including a ladder fire truck. The Project area is currently developed, and no agricultural activities occur in the Project area; therefore, there would be no incompatible use with farm equipment.

Furthermore, the Ontario GP EIR found that the surrounding intersections would operate at a sufficient LOS. Despite Bon View Avenue not being analyzed in the Ontario GP EIR, the replacement of the five (5) existing driveways with two (2) proposed driveways is not expected to create hazardous driving conditions. The Project would, therefore, generate a less than significant traffic hazard impact, and no mitigation would be required.

Project construction activities could require the restriction of public access in its duration. Standard construction safety measures would also be applied which would include appropriate signage and flagmen visible to approaching motorists and pedestrians indicating access options and warnings. Emergency access would also be maintained during Project operations through the dual driveway access connected to Bon View Avenue. Therefore, impacts would be less than significant.

Mitigation Program

Mitigation Measures from the Ontario GP EIR

None identified in the Ontario GP EIR.

Conclusion

The Project would result in no or more severe new impact as it pertains to geometric design feature or incompatible uses. No new impacts or a substantial increase in the severity of a previously identified significant impact evaluated in the Ontario GP EIR would occur. Additionally, no new information of substantial importance that was not known and could not have been known at the time the Ontario GP EIR was certified is available that would impact the prior finding of no significant impact under this issue area.

Threshold (f) Result in inadequate parking capacity? [Ontario GP EIR Impact 5.16-4] [Not included in the 2021 CEQA Appendix G Thresholds]

No New or More Severe Impact: Parking requirements for the Project site's land use designation require that for the development of warehousing, one parking space be provided for every 1,000 square feet for the initial 20,000 square feet of gross floor area, and one parking space provided for every 2,000 square feet thereafter. Additionally, the Project would be required to provide one (1) trailer parking space for every four (4) dock doors. Therefore, the proposed 174,603-square foot warehouse Project with twenty three (23) dock doors would be required to provide 97 auto parking stalls and 6 trailer stalls to maintain compliance with the Ontario Development Code. The Project is proposing 100 standard parking stalls and 19 trailer stalls, thereby exceeding the required parking for the Project site, and resulting in a less than significant impact.

Mitigation Program

Mitigation Measures from the Ontario GP EIR

None identified in the Ontario GP EIR.

Conclusion

The Project would result in no or more severe new impact as it pertains to parking capacity. No new impacts or a substantial increase in the severity of a previously identified significant impact evaluated in the Ontario GP EIR would occur. Additionally, no new information of substantial importance that was not known and could not have been known at the time the Ontario GP EIR was certified is available that would impact the prior finding of no significant impact under this issue area.

Overall Transportation Impact Conclusion

The Project would result in no or more severe new impact to transportation systems. With regard to CEQA Statute Section 21166 and CEQA Guidelines Section 15162(a), the changes proposed by the Project would not result in any new impacts, or increase the severity of the previously identified impacts, with respect to transportation. Therefore, preparation of an SEIR analysis is not warranted.

4.17 Utilities and Service Systems

4.17.1 Summary of Previous Environmental Analysis

The Ontario GP EIR concluded that implementation of the Ontario GP would not result in significant impacts relative to utilities and service systems. However, the implementation of the below referenced mitigation measures was recommended.

4.17.2 Analysis of Proposed Project

Threshold (a,e,h) Require or result in the relocation or construction of new or expanded water, wastewater treatment or storm water drainage, electric power, natural gas, or telecommunications facilities, the construction or relocation of which could cause significant environmental effects? [Ontario GP EIR Impact 5.17-1, 5.17-3, 5.17-5]

Threshold (b) Have sufficient water supplies available to serve the project and reasonably foreseeable future development during normal, dry and multiple dry years? [Ontario GP EIR Impact 5.17-1]

No New or More Severe Impact: The Project is proposed for development in a manner that has been accounted for in the Ontario GP EIR, including the potential water and wastewater required for the site. The Project would generate a water demand of 2,290 gallons per day per acre (gpd/ac).[24] The 7.47 net acre Project site area would require approximately 17,106 gallons per day (gpd) or 19.16 acre-feet a year (AFY). This would have only comprised approximately 0.04 percent of the projected supply at the time of the Ontario GP EIR (47,741 acre-feet). Based on the updated Urban Water Management Plan (UWMP), this would comprise 0.05 percent of the 2015 existing water supply (36,153 acre-feet). The Project would also comprise 0.04 percent of the water supply in the year 2025 (43,709 acre-feet).

Because the Project's proposed warehousing use is consistent with the Project site's existing and proposed zoning districts (General Industrial (IG) and Light Industrial (IL)), the Project is anticipated to have a negligible impact on the previously mentioned resources. Additionally, the Ontario GP EIR determined that impacts to storm water drainage facilities would be less than significant. The Project would not create or contribute runoff water that would exceed the capacity of existing or planned storm water drainage systems or provide additional sources of polluted runoff.

The Ontario GP EIR concluded that sufficient stormwater infrastructure exists to service the buildout of the Ontario GP while projecting the development of new stormwater facilities in undeveloped areas. The Project would occupy a portion of the City which has been previously developed with current industrial uses. The Project would not require the development of additional stormwater facilities. As discussed in **Section 4.9, Hydrology and Water Quality**, the Project would be required to comply with an adopted NPDES and associated SWPPP containing BMPs meant to minimize impacts from drainage.

Furthermore, as previously addressed, the Project would be required to prepare a SWPPP that details construction and post-construction measures to control surface runoff in a manner that is consistent with master planning efforts. Therefore, associated impacts are considered less than significant with mitigation

[24] Ontario Municipal Utilities Company (2016). 2015 Urban Water Management Plan. Appendix B. Page 16. Retrieved from: https://www.ontarioca.gov/sites/default/files/Ontario-Files/Municipal-Utilities-Company/2015_urban_water_management_plan_update_9-18-2018.pdf (accessed August 9, 2021)

applied. Accordingly, no new or more severe impact from a previously identified significant impact evaluated in the Ontario GP EIR would occur.

Mitigation Program

Mitigation Measures from the Ontario GP EIR

The Ontario GP EIR identified mitigation measures 17-1, 17-2, and 17-3 to reduce potential impacts. However all of these mitigation measures (17-1 through 17-3) are imposed solely on the City, and are therefore not applicable to the Project.

Conclusion

The Project would result in no new or more severe new impact as it pertains to placement of utilities and sewer systems. Additionally, no new information of substantial importance that was not known and could not have been known at the time the Ontario GP EIR was certified is available that would impact the prior finding of no significant impact.

Threshold (c) Would exceed wastewater treatment requirements of the applicable Regional Water Quality Control Board? [Ontario GP EIR Impact 5.17-2] [Not included the 2021 CEQA Appendix G Thresholds]

Threshold (d) Would result in a determination by the wastewater treatment provider which serves or may serve the project that it has inadequate capacity to serve the project's projected demand in addition to the provider's existing commitments? [Ontario GP EIR Impact 5.17-2]

No New or More Severe Impact: See discussion for Threshold (a) above. The City is a member agency of the IEUA, which provides the City contracting privileges with the IEUA for off-site collection, treatment, disposal, and reuse. The Ontario GP EIR concluded that the buildout of the Ontario GP would generate approximately 56.4 million gallons per day (mgd) of wastewater. The City has a total wastewater treatment capacity of 108 mgd.

The wastewater generated by the Project would be approximately 18,875 gallons per day or 0.019 mgd based on wastewater generation rates previously approved by IEUA (2,500 gallons per day per acre for industrial use). This represents a nominal increase in wastewater generation and is within the assumptions of the previous analysis contained within the Ontario GP EIR. No significant impacts are anticipated with respect to providing adequate wastewater facilities to serve the Project.

Mitigation Program

No mitigation was proposed for this impact in the Ontario GP EIR.

Conclusion

The Project would result in no new or more severe impact as it pertains to wastewater treatment capacity. Additionally, no new information of substantial importance that was not known and could not have been known at the time the Ontario GP EIR was certified is available that would impact the prior finding of no significant impact to wastewater treatment systems.

Threshold (f) Generate solid waste in excess of State or local standards, or in excess of the capacity of local infrastructure, or otherwise impair the attainment of solid waste reduction goals? [Ontario GP EIR Impact 5.17-4]

Threshold (g) Comply with federal, state, and local management and reduction statutes and regulations related to solid waste? [Ontario GP EIR Impact 5.17-4]

No New or More Severe Impact: The Ontario GP EIR determined that the Ontario GP would not result in significant impacts relative to solid waste. Implementation of the Project would be expected to generate additional waste during the temporary, short-term construction phase, as well as the long-term operational phase.

Solid waste service for the City is provided by the El Sobrante Landfill located southeast of the City. According to the California Department of Resources Recycling and Recovery (CalRecycle), the landfill has a maximum throughput of 16,054 tons per day. This landfill has a maximum permitted capacity of approximately 209.9 million cubic yards, and the landfill has a remaining capacity of approximately 144 million cubic yards. The landfill has an expected operational life through 2051.[25]

According to the Ontario GP EIR, trash is generated at a rate of 1.85 tons per employee per year (tons/employee/year). According to the SCAG Employment Density Study, warehouse uses in San Bernardino County generate employees at a rate of one employee every 2,111 square feet. For the 174,603 square foot warehouse that would amount to approximately 82 employees. These 82 employees would therefore generate approximately 153tons of solid waste. This amounts to approximately one percent of the El Sobrante daily throughput. Furthermore, the Project would occupy an area currently occupied by a similar use. The removal and replacement of that use would further minimize the additional solid waste generated by the Project.

Additionally, the Project, as with all other development in the City, would be required to adhere to City ordinances with respect to waste reduction and recycling. As a result, no impacts related to State and local statutes governing solid waste are anticipated and no mitigation is required. Consistent with the Ontario GP EIR, the Project would have a less than significant impact.

Mitigation Program

Mitigation Measures from the Ontario GP EIR

No mitigation was identified for the Ontario GP EIR.

Conclusion

The Project would result in no new or more severe impact as it pertains to conflict with solid waste standards and regulations. Additionally, no new information of substantial importance that was not known and could not have been known at the time the Ontario GP EIR was certified is available that would impact the prior finding of no significant impact to solid waste generation.

[25] CalRecycle. 2021. *El Sobrante Landfill.* https://www2.calrecycle.ca.gov/SolidWaste/SiteActivity/Details/2280?siteID=2402 (Accessed August 9, 2021).

Overall Utility and Service Systems Impact Conclusion

With regard to CEQA Statute Section 21166 and CEQA Guidelines Section 15162(a), the changes proposed by the Project would not result in any new or more severe impacts from the previously identified impacts with respect to utilities and service systems. Therefore, preparation of an SEIR is not warranted.

4.18 Tribal Cultural Resources

The revised CEQA Guidelines include a new separate discussion for Tribal Cultural Resources (TCRs). This section briefly examines potential impacts related to TCRs that could result from implementation of the Project. The analysis is based primarily on confidential cultural resource studies conducted for the Project. Public Resource Code (PRC) language relevant to the TCR thresholds is below:

PRC Section 21074 defines a TCR as follows:

(a) "Tribal cultural resources" are either of the following:

  (1) Sites, features, places, cultural landscapes, sacred places, and objects with cultural value to a California Native American tribe that are either of the following:

    (A) Included or determined to be eligible for inclusion in the California Register of Historical Resources.

    (B) Included in a local register of historical resources as defined in subdivision (k) of Section 5020.1.

  (2) A resource determined by the lead agency, in its discretion and supported by substantial evidence, to be significant pursuant to criteria set forth in subdivision (c) of Section 5024.1. In applying the criteria set forth in subdivision (c) of Section 5024.1 for the purposes of this paragraph, the lead agency shall consider the significance of the resource to a California Native American tribe.

(b) A cultural landscape that meets the criteria of subdivision (a) above is a tribal cultural resource to the extent that the landscape is geographically defined in terms of the size and scope of the landscape.

(c) A historical resource described in Section 21084.1, a unique archaeological resource as defined in subdivision (g) of Section 21083.2, or a "nonunique archaeological resource" as defined in subdivision (h) of Section 21083.2 may also be a tribal cultural resource if it conforms with the criteria of subdivision (a).

Subdivision (k) of PRC Section 5020.1 is as follows:

(k) "Local register of historical resources" means a list of properties officially designated or recognized as historically significant by a local government pursuant to a local ordinance or resolution.

Subdivision (c) of PRC Section 5024.1 is as follows:

(c) A resource may be listed as an historical resource in the California Register if it meets any of the following National Register of Historic Places criteria:

  (1) Is associated with events that have made a significant contribution to the broad patterns of California's history and cultural heritage.

  (2) Is associated with the lives of persons important in our past.

  (3) Embodies the distinctive characteristics of a type, period, region, or method of construction, or represents the work of an important creative individual, or possesses high artistic values.

  (4) Has yielded, or may be likely to yield, information important in prehistory or history.

4.18.1 Analysis of Proposed Project

Would the project cause a substantial adverse change in the significance of a tribal cultural resource, defined in Public Resources Code section 21074 as either a site, feature, place, cultural landscape that is geographically defined in terms of the size and scope of the landscape, sacred place, or object with cultural value to a California Native American tribe, and that is:

Threshold (a) **Listed or eligible for listing in the California Register of Historical Resources, or in a local register of historical resources as defined in Public Resources Code section 5020.1(k), or**

Threshold (b) **A resource determined by the lead agency, in its discretion and supported by substantial evidence, to be significant pursuant to criteria set forth in subdivision (c) of Public Resources Code Section 5024.1. In applying the criteria set forth in subdivision (c) of Public Resources Code Section 5024.1, the lead agency shall consider the significance of the resource to a California Native American tribe?**

A Cultural Resource Technical Report (CRTR) was created for the Project by Sapphos Environmental, Inc. in August 2021. The CRTR creation included a cultural resources records search described in Section 4.5 above, reconnaissance-level pedestrian cultural resources survey, and Sacred Lands File (SLF) Search with the NAHC. The result of the SLF check conducted through the NAHC found that there were potential sacred lands within the USGS 7.5 Quadrangle that the Project was within. However, this area is expansive, and it was deemed unlikely that any sacred lands were within the specific Project area due to its small scale and developed nature.[26]

Assembly Bill (AB) 52, does not apply to this Project as the CEQA document is an Addendum to the Ontario GP EIR and not subject to the provisions of AB 52. Furthermore, record searches and the field survey did not reveal the presence of tribal cultural resources or burial sites within the area. [27]

Evidence collected during the creation of the CRTR indicated a lack of tribal cultural resources, thereby minimizing potential for the discovery of previously undocumented cultural resources within the Project area. However, Standard Condition No. 1 from Public Resources Code Section 5097.98 would be implemented to ensure that any tribal cultural resource encountered during Project development would be handled correctly and respectfully. Based on the above, a less than significant impact would occur.

Mitigation Program

Mitigation Measures from the Ontario GP EIR

No mitigation measures are proposed within the Ontario GP EIR. However, compliance with Public Resources Code Section 5097.98 (Standard Condition No. 1 shown below) is proposed in the Ontario GP EIR to ensure no significant impacts.

Conclusion

No new impact related to tribal cultural resources would occur.

[26] Sapphos Environmental, Inc. (2021). *1948 S. Bon View Avenue, Ontario, California Cultural Resources Technical Report*. Page 25.
[27] Ibid Page 26.

Overall Tribal Cultural Resources Impacts Conclusion

With regard to CEQA Statute Section 21166 and CEQA Guidelines Section 15162(a), the changes proposed by the Project would not result in any new or more severe impacts with respect to tribal cultural resources. Therefore, preparation of an SEIR is not warranted.

4.19 Energy

The revised CEQA Guidelines include a new separate discussion for energy resources. This section briefly examines potential impacts related to energy resources that could result from implementation of the Project.

Threshold (a) Result in potentially significant environmental impact due to wasteful, inefficient, or unnecessary consumption of energy resources, during project construction or operation?

Threshold (b) Conflict with or obstruct a state or local plan for renewable energy or energy efficiency?

Energy usage was analyzed in the Ontario Plan EIR Section 5.17, Utilities and Service Systems. The Ontario GP EIR concluded that although the buildout associated with the Ontario GP would inevitably increase energy demand within the City, energy demands would be able to be accommodated by existing service providers Southern California Edison (SCE) for electricity and Southern California Gas Company (SCG) for natural gas. As well, the construction of additional energy infrastructure within the City would be conducted by the City's energy providers.

The Project would redevelop a previously developed portion of the City with industrial warehousing uses. These uses would be consistent with the Ontario GP and the buildout analyzed in the Ontario GP EIR. As well, construction and operation of the Project would be required to comply with all relevant Federal, State, and local regulations involving energy usage, including the CBC.

The Project is not anticipated to result in an impact on the environment due to wasteful, inefficient, or unnecessary consumption of energy resources. A less than significant impact would occur from energy consumption from the Project implementation.

Mitigation Program

Mitigation Measures from the Ontario GP EIR

No mitigation measures were identified in the Ontario GP EIR.

Conclusion

No new or more significant impact from energy consumption would occur.

Overall Energy Impact Conclusion

With regard to CEQA Section 21166 and CEQA Guidelines Section 15162(a), the changes proposed by the Project would not result in any new impacts, or increase the severity of the previously identified impacts, with respect to energy. Therefore, preparation of a SEIR is not warranted.

4.20 Wildfire

The revised CEQA Guidelines include a new separate discussion for Wildfire hazards. This section briefly examines potential impacts related to wildfire hazards that could result from implementation of the Project.

4.20.1 Analysis of Proposed Project

Threshold (a) Substantially impair an adopted emergency response plan or emergency evacuation plan?

Threshold (b) Due to slope, prevailing winds, and other factors, exacerbate wildfire risks, and thereby expose project occupants to pollutant concentrations from a wildfire or the uncontrolled spread of a wildfire?

Threshold (c) Require the installation or maintenance of associated infrastructure (such as roads, fuel breaks, emergency water sources, power lines or other utilities) that may exacerbate fire risk or that may result in temporary or ongoing impacts to the environment?

Threshold (d) Expose people or structures to significant risks, including downslope or downstream flooding or landslides, as a result of runoff, post-fire slope instability, or drainage changes?

The Ontario GP EIR assessed that the City was at increased risk of wildfire hazards due to its location within Southern California. This risk was attributed to the region's lower rate of precipitation, topography, and native vegetation. However, the development modern fire-resistant materials and tools have greatly reduced these risks. As well, the City's continued compliance with State Fire Codes further reduce the risks of wildfire.

As stated in Impact discussion 4.8(h), the Project site is not located within or adjacent to land designated as a very high fire hazard severity zone.[28] Furthermore, the Project site is located in a flat/leveled area which does not include wild habitat and is not located near hillsides. The Project site is surrounded by a fully developed industrial area in all directions. Additionally, the Project site would not require the installation of additional roads, fuel breaks, emergency water sources, or other features that could result in fire risks.

Finally, as discussed in ***Section 4.6*** and ***Section 4.9***, the Project site is not exposed to flooding, landslides, runoff conditions. Therefore, a less than significant impact is expected to occur.

Mitigation Program

Mitigation Measures from the Ontario GP EIR

No mitigation measures were identified in the Ontario GP EIR.

Conclusion

No new or more significant impacts due to wildfire risks would occur.

[28] CAL FIRE FRAP (2021). Fire Hazard Severity Zone Viewer. https://egis.fire.ca.gov/FHSZ/ (Accessed August 9, 2021).

Overall Wildfire Impact Conclusion

With regard to CEQA Statute Section 21166 and CEQA Guidelines Section 15162(a), the changes proposed by the Project would not result in any new or more severe impacts with respect to Wildfire. Therefore, preparation of an SEIR is not warranted.

This page intentionally left blank.

5 DETERMINATION OF APPROPRIATE CEQA DOCUMENTATION

The following discussion lists the appropriate subsections of Sections 15162 and 15164 of the CEQA Guidelines and provides justification for the City to make a determination of the appropriate CEQA document for the Project, based on the environmental analysis provided above.

CEQA Guidelines Section 15162 – Subsequent EIRs and Negative Declarations

(a) When an EIR has been certified or a negative declaration adopted for a project, no subsequent EIR shall be prepared for that Project unless the lead agency determines, on the basis of substantial evidence in light of the whole record, one or more of the following:

(1) Substantial changes are proposed in the Project which will require major revisions of the previous EIR or negative declaration due to the involvement of new significant environmental effects or a substantial increase in the severity of previously identified significant effects.

The City proposes to implement the Project within the context of the Ontario GP EIR, as described in this Addendum. As discussed in the Environmental Impact Analysis section of this Addendum, no new or more severe significant environmental effects beyond what was evaluated in the Ontario GP EIR would occur.

(2) Substantial changes occur with respect to the circumstances under which the project is undertaken which will require major revisions of the previous EIR or negative declaration due to the involvement of new significant environmental effects or a substantial increase in the severity of previously identified significant effects.

As documented herein, no circumstances associated with the location, type, setting, or operations of the Project have substantively changed beyond what was evaluated in the Ontario GP EIR; and none of the Project elements would result in new or more severe significant environmental effects than previously identified. No major revisions to the Ontario GP EIR are required.

(3) New information of substantial importance, which was not known and could not have been known with the exercise of reasonable diligence at the time the previous EIR was certified as complete or the negative declaration was adopted, shows any of the following:

(A) The project will have one or more significant environmental effects not discussed in the previous EIR or negative declaration;

No new significant environmental effects beyond those addressed in the Ontario GP EIR were identified.

(B) Significant effects previously examined will be substantially more severe than shown in the previous EIR;

Significant Project-related effects previously examined would not be more severe than were disclosed in the Ontario GP EIR as a result of the Project. Impacts associated with all environmental resource areas would be the same as or less than disclosed in the adopted Ontario GP EIR. Implementation of the Project within the context of the Ontario GP would not substantially increase the severity of previously identified impacts.

(C) Mitigation measures or alternatives previously found not to be feasible would in fact be feasible, and would substantially reduce one or more significant effects of the project, but the project proponents decline to adopt the mitigation measure or alternative; or

No mitigation measures or alternatives were found infeasible in the certified Ontario GP EIR.

(D) Mitigation measures or alternatives which are considerably different from those analyzed in the previous EIR would substantially reduce one or more significant effects on the environment, but the project proponents decline to adopt the mitigation measure or alternative.

No other mitigation measures or feasible alternatives have been identified that would substantially reduce significant impacts.

(b) If changes to a project or its circumstances occur or new information becomes available after adoption of a negative declaration, the lead agency shall prepare a subsequent EIR if required under subsection (a). Otherwise, the lead agency shall determine whether to prepare a subsequent negative declaration, an addendum, or no further documentation.

Subsequent to certification of the Ontario GP EIR in June 2009, additional technical analyses were performed for the Project and are the subject of this Addendum. Based on the analysis in this document, the Project would not result in any new significant environmental effects nor would it increase the severity of significant effects previously identified in the Ontario GP EIR. None of the conditions listed under subsection (a) would occur that would require preparation of a subsequent EIR.

(c) Once a project has been approved, the lead agency's role in project approval is completed, unless further discretionary approval on that project is required. Information appearing after an approval does not require reopening of that approval. If after the project is approved, any of the conditions described in subsection (a) occurs, a subsequent EIR or negative declaration shall only be prepared by the public agency which grants the next discretionary approval for the project, if any. In this situation, no other Responsible Agency shall grant an approval for the project until the subsequent EIR has been certified or subsequent negative declaration adopted.

None of the conditions listed in subsection (a) would occur as a result of the Project. No SEIR is required.

CEQA Guidelines Section 15164 – Addendum to an EIR or Negative Declaration

(a) The lead agency or responsible agency shall prepare an addendum to a previously certified EIR if some changes or additions are necessary, but none of the conditions described in Section 15162 calling for preparation of a subsequent EIR have occurred.

As described above, none of the conditions described in the CEQA Guidelines Section 15162 calling for the preparation of a SEIR have occurred.

(b) An addendum to an adopted negative declaration may be prepared if only minor technical changes or additions are necessary or none of the conditions described in Section 15162 calling for the preparation of a subsequent EIR or negative declaration have occurred.

None of the conditions described in Section 15162 calling for preparation of a subsequent EIR would occur as a result of the Project. Therefore, an addendum to the certified Ontario GP EIR is the appropriate CEQA document for the Project.

(c) An addendum need not be circulated for public review but can be included in or attached to the Ontario GP EIR or adopted negative declaration.

This Addendum will be attached to the Ontario GP EIR and maintained in the administrative record files at the City.

(d) The decision-making body shall consider the addendum with the Ontario GP EIR or adopted negative declaration prior to making a decision on the project.

The City will consider this Addendum with the Ontario GP EIR prior to making a decision on the Project.

(e) A brief explanation of the decision not to prepare a subsequent EIR pursuant to Section 15162 should be included in an addendum to an EIR, the lead agency's required findings on the Project, or elsewhere in the record. The explanation must be supported by substantial evidence.

This document provides substantial evidence for City records to support the preparation of this Addendum for the Project.

This page intentionally left blank.

6 CONCLUSION

This Addendum has been prepared in accordance with the provisions of the CEQA Statute and the CEQA Guidelines to document the finding that none of the conditions or circumstances that would require preparation of a SEIR, pursuant to Section 15162 and Section 15164 of the CEQA Guidelines, exist in connection with the Project. No major revisions would be required to the Ontario GP EIR prepared for the Ontario GP as a result of the Project. No new significant environmental impacts have been identified. Since the certification of the Ontario GP EIR, there has been no new information showing that mitigation measures or alternatives once considered infeasible are now feasible or showing that there are feasible new mitigation measures or alternatives substantially different from those analyzed in the EIR that the City declined to adopt. Therefore, preparation of a SEIR is not required and the appropriate CEQA document for the Project is this Addendum to the Ontario GP EIR. This document will be maintained in the administrative record files at the City.

APPENDIX A

MITIGATION MONITORING AND REPORTING PROGRAM

Mitigation Measures	Responsibility for Implementation	Timing	Responsibility for Monitoring	Monitor (Signature Required) (Date of Compliance)
AIR QUALITY				

MM 3-1: The City of Ontario Building Department shall require that all new construction projects incorporate feasible mitigation measures to reduce air quality emissions. Potential measures shall be incorporated as conditions of approval for a project and may include:
• Requiring fugitive dust control measures that exceed South Coast Air Quality Management District's Rule 403, such as:
  ○ Requiring use of nontoxic soil stabilizers to reduce wind erosion.
  ○ Applying water every four hours to active soil disturbing activities.
  ○ Tarping and/or maintaining a minimum of 24 inches of freeboard on trucks hauling dirt, sand, soil, or other loose materials.
• Using construction equipment rated by the United States Environmental Protection Agency as having Tier 3 or higher exhaust emission limits.
• Ensuring construction equipment is properly serviced and maintained to the manufacturer's standards.
• Limiting nonessential idling of construction equipment to no more than five consecutive minutes.
• Using Super-Compliant VOC paints for coating of architectural surfaces whenever possible. A list of Super-Compliant architectural coating manufactures can be found on the South Coast Air Quality Management District's website at: http://www.aqmd.gov/prdas/brochures/Super-Compliant_AIM.pdf.
	Project Applicant	Ongoing during construction	City of Ontario Building Department	

MM 3-2: The City of Ontario shall evaluate new development proposals within the City and require all developments to include access or linkages to alternative modes of transportation, such as transit stops, bike paths, and/or pedestrian paths (e.g., sidewalks).	Project Applicant	Prior to Issuance of Building Permit	City of Ontario Building Department

EXECUTIVE SUMMARY

The proposed project is located at 1948 S. Bon View Avenue in the City of Ontario (city), within San Bernardino County, California. The proposed project is located within the Ontario U.S. Geological Survey (USGS) 7.5-minute quadrangle map, on the center of the city. The site is operated as an industrial property.

The project proposes the development of one 175,047-square-foot (sf) building containing 170,547 sf of warehousing space and 4,500 sf of office space split between two floors. The office portion of the building would be located in its southeast corner. The project site has a proposed floor-area ratio (FAR) of 0.54, with a maximum of 0.55 allowed in Industrial land use areas. Project site improvements would also include surface parking, landscaping, and internal drive aisles. Access to the project site would be established through two driveways along the eastern portion of the site connecting to Bon View Avenue.

The purpose of this Cultural Resources Technical Report (CRTR) is to provide the client with a cultural resources assessment for the project such that construction, operation, and maintenance may be undertaken in a manner that avoids known or observed cultural resources afforded consideration pursuant to the California Environmental Quality Act (CEQA) to the maximum extent feasible and practicable. The term cultural resources within this report refers to a historical resource under CEQA, defined as "a resource listed in, or determined eligible by the State Historical Resources Commission, for listing in the California Register of Historical Resources or a resource included in a local register of historical resources," including built and archaeological resources.[1] Additionally, this CRTR addresses tribal cultural resources as required by CEQA. Where it is infeasible to avoid impacts, the consideration of mitigation measures and alternatives would be required.

Historical and Archaeological Resources

The consideration of potential impacts was based on an archives and records search; literature review; coordination with the Native American Heritage Commission (NAHC), and a site visit of the project area completed on August 12, 2021.

No (0) previously recorded historical resources or archaeological sites and no (0) previously recorded prehistoric or historic isolates have been identified in the study area. One locally eligible City of Ontario (City) Historic Landmark is located within the proposed project site, and no (0) designated City Landmarks are located within a 0.25-mile radius of the project site. The results of the Sacred Lands File search conducted by the Native American Heritage Commission were negative. No new archaeological resources were identified during the archaeological pedestrian survey.

[1] California Environmental Quality Act Statue and Guidelines 2021, Section 15054.5 (a)(1)(2).

Cemeteries and Human Remains

There are no formal cemeteries located within the proposed project area. In addition, there are no known human remains, grave goods, or funerary objects within the proposed project area.

Tribal Cultural Resources

As a result of the request for review of the Sacred Lands File (SLF) from the NAHC, it has been determined that there are no sacred lands recorded on the same 7.5-minute-scale quadrangle (approximately 50 square miles) as the project site.

Recommendations

This CRTR resulted in the determination that the proposed project would result in less than significant impacts to listed or eligible for listing cultural resources from construction, operation, and maintenance of the proposed project.

SECTION 1.0
INTRODUCTION

The subject property is located at 1948 S. Bon View Avenue, Ontario, San Bernardino County, California. This Cultural Resource Technical Report (CRTR) was prepared to demonstrate compliance with the California Environmental Quality Act (CEQA); specifically, Appendix G of the CEQA Guidelines for historical resources and tribal cultural resources (see Section 2.2, *Project Description* for full project description).

1.1 GOAL OF THE CULTURAL RESOURCES TECHNICAL REPORT

This CRTR has been prepared to provide a historical and tribal cultural resources assessment for the proposed project such that construction, operation, and maintenance may be undertaken in a manner that avoids known or observed cultural resources afforded consideration pursuant to CEQA to the maximum extent feasible and practicable. This analysis was undertaken to determine if the proposed project would result in significant impacts to cultural resources, requiring the consideration of mitigation measures or alternatives in accordance with CEQA regulations.[2]

1.2 METHODS

This report was prepared by Sapphos Environmental, Inc. The identification of existing resources and evaluation of potential impacts is based on information gathered from published and unpublished literature, South Central Coastal Information Center (SCCIC) June 2021 record search results, August 2021 Native American Heritage Commission results, California Office of Historic Resources Built Environment Directory, a review of current and historic maps and aerial photographs, and a site visit completed on August 12, 2021, to characterize the existing conditions relative to cultural and tribal cultural resources. In addition, an intensive pedestrian archaeological survey of any unpaved, or non-landscaped areas was performed by a qualified archaeologist on August 12, 2021.

1.3 SCOPE OF INVESTIGATION

The investigation covers the areas required by CEQA including historical resources, archaeological resources, human remains, and tribal cultural resources. Databases were reviewed for the project site and a 0.25-mile buffer.

[2] Section 15064.5 (b) CEQA Guidelines.

2.1 PROJECT LOCATION

The proposed project is located at 1948 S. Bon View Avenue, Ontario, San Bernardino County, California (Figure 2.1-1, *Vicinity Map*; Figure 2.1-2, *Project Area Map*). The property is bounded by E. Francis Avenue to the north; S. Bon View Avenue to the east; E. Cedar Street to the south, and properties on the east side of S. Campus Avenue to the west. The project site is situated in the central portion of the city and is surrounded by commercial and industrial development to the south, north, east, and west.

2.2 PROJECT DESCRIPTION

The project proposes the development of one 175,047-square-foot (sf) building containing 170,547 sf of warehousing space and 4,500 sf of office space split between two floors. The office portion of the building would be located in its southeast corner. The project site has a proposed floor-area ratio (FAR) of 0.54, with a maximum of 0.55 allowed in Industrial land use areas. Project site improvements would also include surface parking, landscaping, and internal drive aisles. Access to the project site would be established through two driveways along the eastern portion of the site connecting to Bon View Avenue. The project is speculative in nature; the end user and their hours of operation are unknown at this time. However, to be conservative, it has been assumed that the building would operate 24 hours per day/7 days per week.

Regional access to the project site is provided via CA-60, approximately 0.48 mile south of the project site with exits at Grove Avenue and Euclid Avenue. Local access to the project site is provided via Bon View Avenue which an 88-foot-wide right-of-way (ROW) collector street that trends in a north-south direction. Project site main ingress and egress driveway would be provided via one 40-foot-wide, and one 30-foot-wide driveway located along the eastern border of the site along Bon View Avenue. The driveways would connect directly to Bon View Avenue and allow full access movement for both vehicles and trucks.

The project would include the provision of 100 standard 9-foot by 18-foot stalls and 17 trailer parking stalls. A project of this size would be required to provide 98 standard stalls and 6 trailer stalls. The project is anticipated to landscape approximately 10.02 percent (32,596 sf) of the project site which is higher the minimum required 10 percent (32,529 sf) as required by the City's zoning code.

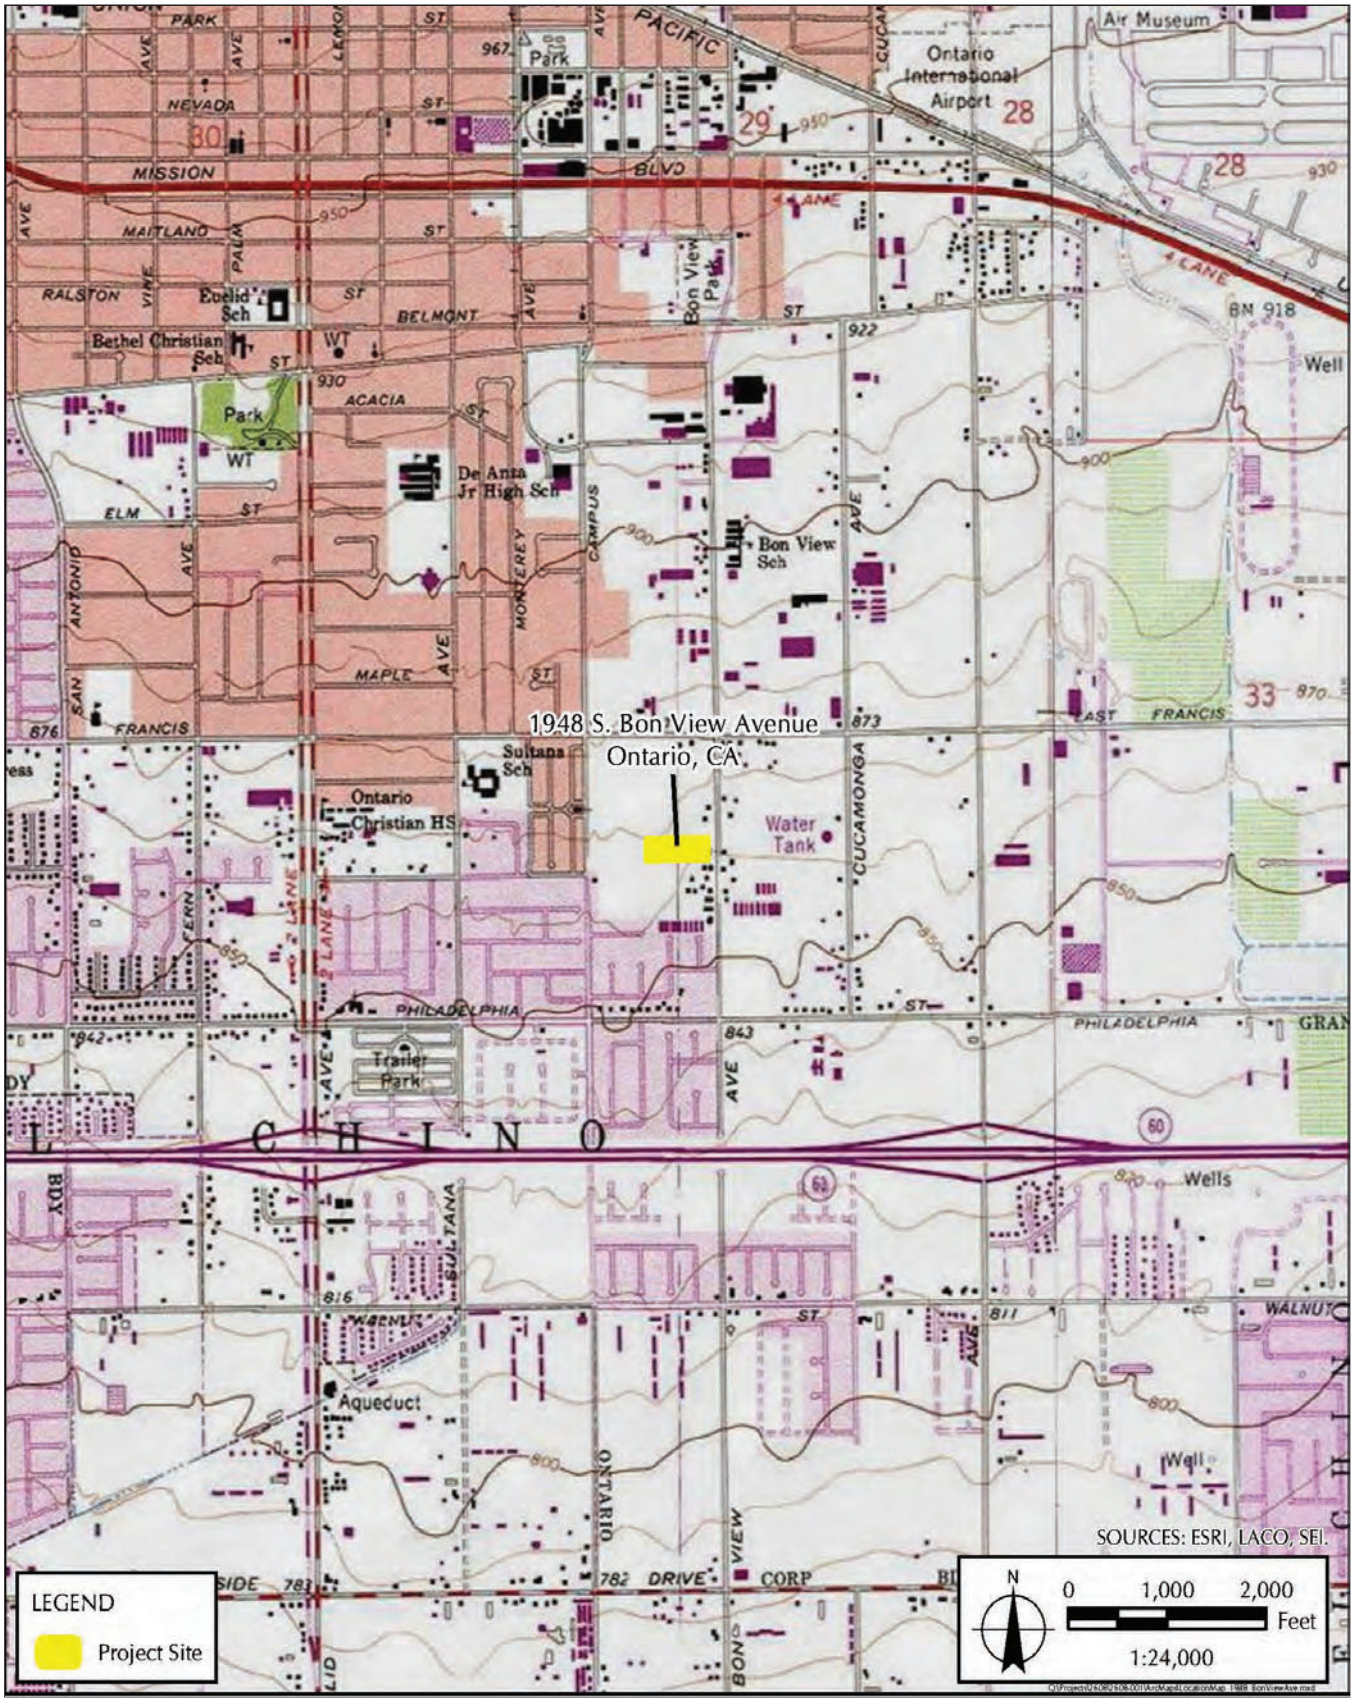

FIGURE 2.1-1
Vicinity Map

FIGURE 2.1-2
Project Area Map

SECTION 3.0
REGULATORY FRAMEWORK

This section of the report identifies the primary state laws and regulations that govern the conservation and protection of cultural resources that must be considered during the decision-making process for projects that have the potential to adversely affect cultural resources.

California Environmental Quality Act

Pursuant to CEQA, a *historical resource* is a resource listed in, or eligible for listing in, the California Register of Historical Resources (California Register). In addition, resources included in a local register of historic resources or identified as significant in a local survey conducted in accordance with state guidelines are also considered historical resources under CEQA, unless a preponderance of the facts demonstrates otherwise. According to CEQA, the fact that a resource is not listed in or determined eligible for listing in the California Register or is not included in a local register or survey shall not preclude a Lead Agency, as defined by CEQA, from determining that the resource may be a historical resource as defined in California Public Resources Code Section 5024.1.

CEQA applies to archaeological resources when (1) the archaeological resource satisfies the definition of a historical resource or (2) the archaeological resource satisfies the definition of a "unique archaeological resource." A *unique archaeological resource* is an archaeological artifact, object, or site that has a high probability of meeting any of the following criteria:

1. The archaeological resource contains information needed to answer important scientific research questions and there is a demonstrable public interest in that information.

2. The archaeological resource has a special and particular quality such as being the oldest of its type or the best available example of its type.

3. The archaeological resource is directly associated with a scientifically recognized important prehistoric or historic event or person.

Appendix G of the CEQA Guidelines[3] provides a set of sample questions that guide the evaluation of potential impacts with regard to cultural resources.

Would the proposed project:

(a) Cause a substantial adverse change in the significance of an historical resource as defined in §15064.5?

(b) Cause a substantial adverse change in the significance of an archaeological resource as defined in §15064.5?

[3] California Code of Regulations, Title 14, Chapter 3. Amended 6 October 2005. Guidelines for the Implementation of the California Environmental Quality Act, Appendix G.

(c) Directly or indirectly destroy a unique paleontological resource or site or unique geologic feature?

(d) Disturb any human remains, including those interred outside of formal cemeteries?

California Register of Historical Resources

Created in 1992 and implemented in 1998, the California Register is "an authoritative guide in California to be used by state and local agencies, private groups, and citizens to identify the State's historical resources and to indicate what properties are to be protected, to the extent prudent and feasible, from substantial adverse change." Certain properties, including those listed in or formally determined eligible for listing in the National Register of Historic Places (National Register) and California Historical Landmarks (CHLs) numbered 770 and higher, are automatically included in the California Register. Other properties recognized under the California Points of Historical Interest program, identified as significant in historic resources surveys, or designated by local landmarks programs may be nominated for inclusion in the California Register. A resource, either an individual property or a contributor to a historic district, may be listed in the California Register if the State Historical Resources Commission determines that it meets one or more of the following criteria, which are modeled on National Register criteria:

Criterion 1: It is associated with events that have made a significant contribution to the broad patterns of California's history and cultural heritage.

Criterion 2: It is associated with the lives of persons important in our past.

Criterion 3: It embodies the distinctive characteristics of a type, period, region, or method of construction; represents the work of an important creative individual; or possesses high artistic values.

Criterion 4: It has yielded, or may be likely to yield, information important in history or prehistory.

Resources nominated to the California Register must retain enough of their historic character or appearance to be recognizable as historical resources and to convey the reasons for their significance. It is possible that a resource whose integrity does not satisfy National Register criteria may still be eligible for listing in the California Register. A resource that has lost its historic character or appearance may still have sufficient integrity for the California Register if, under Criterion 4, it maintains the potential to yield significant scientific or historical information or specific data. Resources that have achieved significance within the past 50 years also may be eligible for inclusion in the California Register, provided that enough time has lapsed to obtain a scholarly perspective on the events or individuals associated with the resource.[4]

California Historical Landmarks[5]

CHLs are buildings, structures, sites, or places that have anthropological, cultural, military, political, architectural, economic, scientific or technical, religious, experimental, or other value and that have been determined to have statewide historical significance by meeting at least one of the criteria listed below. The resource must also be approved for designation by the County Board of Supervisors (or the City or Town Council in whose jurisdiction it is located), be recommended by the State Historical Resources Commission, and be officially designated by the Director of California State Parks. The specific standards in use now were first applied in the designation of CHL No. 770. CHLs No. 770 and above are automatically listed in the California Register. To be eligible for designation as a Landmark, a resource must meet at least one of the following criteria:

- The first, last, only, or most significant of its type in the state or within a large geographic region (Northern, Central, or Southern California)
- Associated with an individual or group having a profound influence on the history of California
- A prototype of, or an outstanding example of, a period, style, architectural movement or construction or one of the more notable works or the best surviving work in a region of a pioneer architect, designer, or master builder

California Points of Historical Interest[6]

California Points of Historical Interest are sites, buildings, features, or events that are of local (city or county) significance and have anthropological, cultural, military, political, architectural, economic, scientific or technical, religious, experimental, or other value. Points of Historical Interest designated after December 1997 and recommended by the State Historical Resources Commission are also listed in the California Register. No historical resource may be designated as both a Landmark and a Point. If a Point is later granted status as a Landmark, the Point designation will be retired. In practice, the Point designation program is most often used in localities that do not have a locally enacted cultural heritage or preservation ordinance. To be eligible for designation as a Point of Historical Interest, a resource must meet at least one of the following criteria:

- The first, last, only, or most significant of its type within the local geographic region (city or county)
- Associated with an individual or group having a profound influence on the history of the local area
- A prototype of, or an outstanding example of, a period, style, architectural movement or construction or one of the more notable works or the best surviving work in the local region of a pioneer architect, designer, or master builder

Native American Heritage Commission, Public Resources Code Sections 5097.9–5097.991

Section 5097.91 of the Public Resources Code established the NAHC, whose duties include the inventory of places of religious or social significance to Native Americans and the identification of known graves and cemeteries of Native Americans on private lands. Under Section 5097.9, a state policy of noninterference with the free expression or exercise of Native American religion was articulated along with a prohibition of severe or irreparable damage to Native American sanctified cemeteries, places of worship, religious or ceremonial sites or sacred shrines located on public property. Section 5097.98 specifies a protocol to be followed when the NAHC receives notification of a discovery of Native American human remains from a county coroner. Section 5097.5 defines as a misdemeanor the unauthorized disturbance or removal of archaeological, historic, or paleontological resources located on public lands.

California Native American Graves Protection and Repatriation Act of 2001

Codified in the California Health and Safety Code Sections 8010–8030, the California Native American Graves Protection and Repatriation Act (Cal NAGPRA) is consistent with the federal NAGPRA. Intended to "provide a seamless and consistent state policy to ensure that all California Native American human remains and cultural items be treated with dignity and respect," Cal NAGPRA also encourages and provides a mechanism for the return of remains and cultural items to lineal descendants. Section 8025 established a Repatriation Oversight Commission to oversee this process. The Act also provides a process for non-federally recognized tribes to file claims with agencies and museums for repatriation of human remains and cultural items.

Assembly Bill (AB) 52

AB 52 requires lead agencies to consult with California Native American Tribes that request such consultation prior to the agency's release of a Notice of Preparation of an Environmental Impact Report or Notice of Intent of a Mitigated Negative Declaration on or after July 1, 2015.

Health and Safety Code, Sections 7050 and 7052

Health and Safety Code, Section 7050.5, declares that, in the event of the discovery of human remains outside a dedicated cemetery, ground disturbance must cease, and the county coroner must be notified. Section 7052 establishes a felony penalty for mutilating, disinterring, or otherwise disturbing human remains, except by relatives.

Penal Code, Section 622.5

Penal Code, Section 622.5, provides misdemeanor penalties for injuring or destroying objects of historic or archaeological interest located on public or private lands but specifically excludes the landowner.

City of Ontario

Section 9-1.2615 established Historic Landmark eligibility criteria as follows:

Historic Landmarks. Historic Landmarks shall include any property designated as an Historic Landmark prior to September 1, 2003 or any Historical Resource designated under this ordinance as an Historic Landmark.

Any Historical Resource may be designated an Historic Landmark by the City Council pursuant to Section 9-1.2620 if:

1. It meets the criteria for listing in the National Register of Historic Places; or
2. It meets the criteria for listing in the California Register of Historic Resources; or
3. It meets one or more of the following criteria:
    a. It exemplifies or reflects special elements of the City's history;
    b. It is identified with persons or events significant in local, state, or national history;
    c. It is representative of the work of a notable builder, designer, architect, or artist;
    d. It embodies distinguishing architectural characteristics of a style, type, period, or method of construction;
    e. It is a noteworthy example of the use of indigenous materials or craftsmanship;
    f. It embodies elements that represent a significant structural, engineering, or architectural achievement or innovation;
    g. It has a unique location, a singular physical characteristic, or is an established and familiar visual feature of a neighborhood, community or the City; or,
    h. It is one of the few remaining examples in the City, region, state, or nation possessing distinguishing characteristics of an architectural or historical type or specimen.

This section of the report characterizes the baseline conditions for cultural resources. This section includes information on prehistoric period context, regional ethnography, and regional and local historic context.

4.1 PREHISTORIC CONTEXT

This section of the report characterizes the baseline conditions for cultural resources and historic properties. The current project area lies at the geographic and cultural intersection of three prominent ethnohistoric territorial ranges. These include the Gabrielino, the Serrano, and the Cahuilla. Therefore, this section includes information on prehistoric period context, the three regional ethnographies, and regional and local historic context.

4.2 PREHISTORY

It is generally agreed that human occupation of Southern California began at least 10,000 years before present (BP). The archaeological record indicates that between approximately 10,000 and 6,000 years BP, a predominantly hunting and gathering economy existed, characterized by archaeological sites containing numerous projectile points and the remains of butchered large animals. The most heavily exploited species were likely those species still alive today. Bones of extinct species have been found in the region but, unlike other regions of the continent, are not definitively associated with cultural artifacts in California. Although small animal bones and plant grinding tools are rarely found within archaeological sites of this period, small game and vegetal foods were likely exploited on a widespread basis. A lack of intact stratified cultural deposits from this period suggests small groups practiced high residential mobility during this.

The three major periods of prehistory for the greater Southern California region have been refined by research using radiocarbon dates from archaeological sites in coastal Southern California:[7,8]

- Millingstone Period (6,000–1,000 B.C., or about 8,000–3,000 years ago)
- Intermediate Period (1,000 B.C.–A.D. 650, or 3,000–1,350 years ago)
- Late Prehistoric Period (A.D. 650–about A.D. 1800, or 1,350–200 years ago)

Around 6,000 years BP, a shift in focus from hunting toward a greater reliance on vegetal resources occurred. Archaeological evidence of this trend consists of a much greater number of milling tools (e.g., metates and manos) for processing seeds and other vegetable matter. This period, known to archaeologists as the Millingstone Period, was a long period of time characterized by small, mobile groups that likely relied on a seasonal round of settlements that included both inland and coastal residential bases. Seeds from sage and grasses, rather than acorns, provided calories and carbohydrates. Faunal remains from sites dating to this period indicate the same animals were still

[8] Mason, R.D., and M.L. Peterson. 1994. Newport Coast Archaeological Project: Newport Coast Settlement Systems, Analysis, and Discussion. On file at South Central Coastal Archaeological Center, California State University, Fullerton.

being hunted during this era. Inland Millingstone sites are characterized by numerous manos, metates, and hammerstones. Shell middens are common at coastal Millingstone sites. Coarse-grained lithic materials, such as quartzite and rhyolite, are more common than fine-grained materials in flaked stone tools from this time. Projectile points are found in archaeological sites from this period, but they are far fewer in number than from sites dating to before 6,000 years BP. An increase in the size of groups and the stability of settlements is indicated by deep, extensive middens at some sites from this period.[9]

In sites post-dating roughly 3,000 years BP, archaeological evidence indicates the reliance on both plant gathering and hunting continued and was more specialized and locally adapted to particular environments. Mortars and pestles were added to metates and manos for grinding seeds and other vegetable material. Chipped-stone tools became more refined and specialized, and bone tools were more common. During this period, new peoples from the Great Basin began entering Southern California. These immigrants, who spoke an Uto-Aztecan language, seem to have displaced or absorbed the earlier population of Hokan-speaking peoples. The exact time of their entry into the region is not known; however, they were present in Southern California during the final phase of prehistory. During this period, population densities were higher than before; and settlement became concentrated in villages and communities along the coast and interior valleys.[10,11] During the Intermediate Period, mortars and pestles appeared, indicating the beginning of acorn exploitation. Use of the acorn, a high-calorie, storable food source, probably allowed greater sedentism and facilitated an increased level of social organization. Large projectile points from archaeological sites of this period indicate that the bow and arrow, a hallmark of the Late Prehistoric Period, had not yet been introduced; and hunting was likely accomplished using the *atlatl* (spear thrower) instead. Settlement patterns during this time are not well understood. The semi-sedentary settlement pattern characteristic of the Late Prehistoric Period may have begun during the Intermediate Period, although territoriality may not yet have developed partially because of lower population densities. Regional subcultures also started to develop, each with its own geographical territory and language or dialect. [12,13,14] These were most likely the basis for the groups encountered by the first Europeans during the 18th century.[15] Despite the regional differences, many material culture traits were shared among groups, indicating a great deal of interaction.[16] The Late Prehistoric Period is better understood than earlier periods largely through ethnographic analogy made possible by ethnographic and anthropological research of the descendants of these groups in in the late 19th and early 20th centuries.

4.3 GABRIELENO ARCHAEOLOGY AND ETHNOGRAPHY

The Shoshonean migration marks the arrival of Uto-Aztecan speakers to Southern California. The Gabrieleno, a branch of Shoshonean, arrived around 500 BC. Their language has been identified as Cupon language which is part of the larger Uto-Aztecan.[17]

At the time of Spanish contact, the Gabrieleno inhabited a rich coastal and inland region of Southern California consisting of present-day Los Angeles and Orange Counties and extending into western Riverside County, including San Nicolas, San Clemente and Santa Catalina Islands.[18] Second only to the Chumash, the Gabrielino were the wealthiest, most populous, and most powerful ethnic group in Southern California.[19] Settlement pattern studies concluded there is a presence of both primary villages that were occupied year-round and secondary temporary camps inhabited at various times of the season. Both primary and temporary settlements seemed to be located near water sources.[20]

Their culture was very similar to that of the Chumash despite marked differences in language, mortuary practices, and the manufacture and use of pottery. The Gabrieleno influenced cultures as far north as the San Joaquin Valley Yokuts, as far east as the Colorado River, and south into Baja California.

The majority of Gabrieleno artifacts reflect an ornate craftsmanship with everyday use items often decorated with asphaltum and shell inlaid, paintings and rare minerals. The Gabrieleno established a well-versed economic system focusing on trading goods, food reserves, and disturbed resources. The Gabrieleno quarried steatite from Santa Catalina Island and often traded with neighboring tribes. Steatite items are highly diagnostic of the Gabrieleno, and it was used to make pipes, animal carvings, cooking vessels, and ornaments.[21]

The Gabrieleno houses were circular structures thatched with tule, fern, or *carrizo* (weeds). Some houses were recorded as large as 60 feet in diameter. Sweathouses, menstrual huts, and ceremonial enclosures were other common structures found in villages.[22] Unfortunately, most of the

Chaney. Santa Barbara, CA: USDI Minerals Management Service and The Santa Barbara Museum of Natural History, 541–5.

Gabrielenos were gone long before systematic ethnographic studies could be completed. As a result, knowledge of their cultural and lifeways is sparse.[23]

4.4 SERRANO ARCHAEOLOGY AND ETHNOGRAPHY

The Serrano language is classified as being within the Takik language family.[24] The Serrano lived in the San Bernardino Mountains east of the Cajon Pass to as far east as present-day Twentynine Palms and as far south as the Yucaipa Valley.[25] The Serrano had exogamous moieties made up of exogamous, patrilineal clans. Lineage and clan leaders were hereditary ceremonial leaders who controlled sacred bundles and lived in ceremonial houses.[26]

The Serrano were organized into local lineages occupying favored territories but rarely claiming any territory far from the lineage's home base.[27] The estimated population of the Serrano before European contact was between 1,500 and 2,500. It is difficult to estimate the number of Serranos living in each village; however, it is likely that the villages held only as many Serranos as could be accommodated by water sources.[28]

The Serrano lived in dwellings which were circular, domed structures built over an excavated area. These structures were built with fire pits and primarily served as sleeping areas. Ceremonial houses were the only other buildings in the villages and were normally occupied by the village priest.[29]

In the Serrano artifact assemblage, it is noted to be similar to that of the neighboring Cahuilla and includes musical instruments such as rattles and flutes; utensils and ornaments such as fire drills, mortars, metates, pipes, beads, awls, and projectile points from wood, shell, bone, and stone. The Serrano were talented pottery and basket makers. Their pots were made of coiled clay smoothed out with a paddle and set in the sun to dry before being fired in a pit. Serrano Brown ware was sometimes decorated with designs of circles and lines of either red or black.[30]

The Serrano were also known for their petroglyphs. Abstract and geometric designs are often seen with representational figures of sheep, lizards (zoomorphs) and human beings (anthropomorphs).

Researchers have proposed that the petroglyphs were records of important events, rough maps, and artistic representations of native life.[31]

4.5 CAHUILLA ARCHAEOLOGY AND ETHNOGRAPHY

The Cahuilla occupied a roughly 2,400-square-mile territory that covered a wide ecological range extending from the San Jacinto Mountains to the desert to the Salton Sea and was divided into geographical areas claimed by corporate groups called a *Sib*, composed of several lineages and villages.[32] The territory was in a strategic location that provided access to resources through trade, as it was bisected by the major trade route, the Coco-Maricopa Trail. In addition, the territory was located at the periphery of two other routes, the Santa Fe Trail (which connected what is now the city of Needles to Cajon Pass) and the Yuman Trail which crossed the Borrego Desert, beginning in the city of Yuma and ending in San Diego.[33] The Cahuilla, although separated from neighboring tribes by geographical features, still interacted with groups such as the Serrano, with whom the Cahuilla shared a similar ecological base, subsistence system, social and political structure, and belief system. They also regularly interacted with the Gabrieleno, a group essential in the diffusion of ideas and natural resources from the coast to inland.[34]

Cahuilla settlements were occupied year-round, with portions of the population, (sometimes up to one-half or two-thirds) practicing residential mobility patterns. This residential mobility was marked by faction groups leaving the main settlements for days or weeks at a time to engage in hunting, gathering, and trading activities. The settlements were located near ecological and geographical features, such as rivers, springs, or caves and canyons to maximize availability of resources. Hunting and gathering resources such as acorns, mesquite, pinyon, cacti, tubers, and wild game remained the primary lifeway through this time. Agriculture was minimally practiced and did not have a profound effect on settlement or subsistence patterns. The Cahuilla maximized food storage with the use of large granaries near households and ceremonial structures.[35]

The first extensive contact with Europeans occurred when the Juan Bautista de Anza expedition passed through the area, setting up a trade route to provide resources to the missions by land. While the first contact was hostile, later interaction included baptisms (at the surrounding missions) and, eventually, the adoption by the Cahuilla of Euro-American cattle and agricultural practices. The Cahuilla managed to maintain their political and economic autonomy through the Spanish period, Mexican period, and into the American pioneer period. A smallpox epidemic in 1863

decimated a large part of the population and weakened their sovereignty. The Cahuilla remained (for the most part) on their own lands until 1877 when reservations were established.[36]

4.6 HISTORIC CONTEXT

Regional History

Euro-American settlement began in the area in the early 1800s as persons seeking land and fortunes made their way west from the mid-west and east coast of the United States (U.S.) or north from what is now known as Mexico. The Catholic missionaries were a catalyst in the expansion of Euro-American influences in this region. A group of missionaries, Native Americans, and soldiers from the San Gabriel Mission named San Bernardino in honor of the feast day of San Bernardino of Sienna when they entered the valley on May 10, 1810.[37] The Mission San Gabriel initially attempted to expand its influence in the San Bernardino Valley when Father Dumetz was sent to the valley in 1810 to establish the mission station known as Politana. An earthquake in 1812 followed by raids from neighboring Native American tribes caused a lull of interest in the Politana by the Mission San Gabriel. [38] Beginning in the 1830s, the Mission San Gabriel established a branch at the Asistencia (California Historical Landmark No. 42).[39] The Asistencia is currently located in the Mission District in eastern Loma Linda.[40] During the years 1822 through 1827, the Mission Fathers traveled the San Bernardino-Sonora Road, also known as the Emigrant or Mormon Trail, (California Point of Historical Interest No. 96), which traversed Redlands, Old San Bernardino, Colton, and Agua Mansa, from the Mission San Gabriel to the San Bernardino Asistencia.[41] After Mexico achieved independence from Spain in 1821, the Mexican government seized ownership of church properties through the Secularization Act of 1833, and lands were redistributed as ranchos through a tribute system.[42] This land redistribution by the Mexican government fostered the development of ranchos in what is now known as California.

As a result of the Mexican government seizing control of church properties, the Asistencia was largely abandoned by the late 1830s. The Lugo family, under leadership of Jose del Carmen Lugo, moved into the former Asistencia buildings in order to establish a colony.[43] Slover Mountain, also known as El Cerrito Solo, was the natural landmark used for establishing the boundaries of the Lugos' land grant within the San Bernardino Rancho.[44] What became known as San Bernardino County originally consisted of the following ranchos: Canon de Santa Ana, Jurupa and El Rincon,

Cucamonga, Santa Ana del Chino, San Bernardino, and Muscupiabe.[45] The ranchos largely subsisted on cattle ranching and raising crops which were irrigated from the Mill Creek Zanja and other irrigation ditches.

In an effort to gain territory, the U.S. seized the territory of Texas from the Mexican government, which resulted in the Mexican-American War. The State of California was annexed by the U.S. in 1848 through the Treaty of Guadalupe Hidalgo which ended the Mexican-American War (California Point of Historical Interest No. 151).[46] The end of the war further paved the way for Euro-American settlement from the east. Ontario was sectioned as part of the public land survey system and was not owned as a rancho.

City of Ontario

The following historic context is quoted from the City of Ontario's "History."[47]

> *It was in the first week of August 1881 when George Chaffey, a Canadian engineer, viewed the wastes known as the Cucamonga Desert and decided that this patch of land, if properly watered, could become productive and profitable. George and his brother William bought the "San Antonio lands," 6,218 acres with water rights for $60,000. This was the nucleus of their new model colony. They subsequently expanded to the Southern Pacific Railroad tracks on the south. On the north, they took in the Kincaid Ranch at San Antonio Canyon, an all-important source of water.*

[45] Schuiling, Walter C. 1984. *San Bernardino County: Land of Contrasts*. Brightwaters, NY: Windsor Publications.

[46] State of California Office of Historic Preservation. 2009. California Historical Landmarks: Los Angeles County Accessed January 12, 2009. Available at: http://www.ohp.parks.ca.gov/?page_id=21476

[47] City of Ontario. "Facts and History." Available at: https://www.ontarioca.gov/FactsAndHistory

The Ontario Colony lands were quickly surveyed and went on sale in November 1882. The centerpiece was Euclid Avenue, eight miles long and two hundred feet wide, the twin "driveways" separated by a parkway which was seeded in grass and lined with pepper trees. George named Euclid Avenue after the great Greek mathematician whose book Elements of Geometry had been a favorite subject for George in school.

The primary requirement, which had to be met before the land could be utilized, was that water had to be found and brought to the town. Chaffey laid miles of cement pipe for this purpose and later the San Antonio Water Co. drove a tunnel into the head of the canyon to tap the underground flow—then an innovation in the field. The need for electric power to lift water from deep wells led to the establishment of the Ontario Power Co.

Another innovation in the settlement of Ontario was the provision, whereby, purchasers of land automatically received shares in the water company. This would ensure purchasers that a share of water proportional to their acreage would be piped to their land. This eliminated many problems that faced settlers elsewhere, where land rights and water rights were kept separate.

The results of George Chaffey's labors showed what could be achieved. All too soon, however, the Chaffey brothers went off to Australia to attempt a repeat performance of their success as city planners here.

Charles Frankish became the guiding force during Ontario's early years. No matter what the activity he undertook, Frankish always threw himself into his work and was determined to do the best possible job.

In 1887, Ontario's unique "gravity mule car" made its first run on Euclid Avenue. Charles Frankish and Godfrey Stamm established the Ontario and San Antonio Heights R.R. Co. Engineer John Tays of Upland added the pull-out trailer that allowed the mules to coast downhill after each laborious pull from Holt to Twenty–Fourth Street. The mule car served until 1895, when it was replaced by an electric streetcar and returned temporarily when a flood damaged the electrical generator in the powerhouse.

On Dec 10th, 1891, Ontario was incorporated as a city of the sixth class under the California Constitution. It adopted a City Council-City Manager form of government. The mayor was at first called the "President of the Board," and was chosen by the Council, or the Board of Trustees as it was then called, from among their number. Subsequently, the law was changed to allow the people to elect the mayor directly.

Ontario first developed as an agricultural community, largely but not exclusively devoted to citrus. A few of the lovely Victorian "grove houses" still survive, relics of the days when growers could pretend that they were living the graceful lives of the old Spanish dons—until it came time for harvest.

Chaffey College, which was located where the Chaffey brothers put it until 1960, originally emphasized agricultural subjects to give the growers a hand. It was there that Prof. George Weldon developed the Babcock peach, an adaptation to California's mild winters. The college has moved to Rancho Cucamonga now, but Chaffey High School is still on what was originally a joint campus

.

Even though the groves have gone from the West End, Ontario is still close to the "ton-mile center" of the industry. In addition to oranges, the production of peaches, walnuts, lemons and grapes was also important to the growth of Ontario and the adjoining city of Upland.

In 1923, Judge Archie Mitchell, Waldo Waterman, and some other airplane enthusiasts established Latimer Field. From that time on, the town became increasingly aviation conscious. Urban growth pushed the fliers progressively east, until they took up their present location, the Ontario International Airport. During World War II, this was a busy training center for pilots of the hot Lockheed P-38 "Lightning" twin-boom fighter.

Since World War II, Ontario has become a much more diversified community. The mean temperature of 61 degrees and the average rainfall of 18.4" continues to attract more residents. The city has expanded from the 0.38 square mile area incorporated back in 1891, up to almost 50 square miles. The economy now reflects an industrial and manufacturing base. Ten thousand acres are zoned for industrial use. With three major railroads, the San Bernardino, Pomona, and Devore Freeways (10, 60, and 15), and the Ontario International Airport. Ontario is well provided with major transportation resources. Its proximity to Los Angeles ensures that Ontario will continue to grow in the years ahead.

Ontario's official song is "Beautiful Ontario," written by Paul Coronel in 1960. The official flower is the Charlotte Armstrong rose, developed by local nurseryman John Armstrong and named for his first wife. At different times, Ontario has adopted as its slogan or motto each of the following: The Model Colony; The Model City; The City That Charms; Ontario Offers Opportunity; Pulse of the Inland Empire; Stop and Grow with Ontario; Gateway to the Inland Empire; A Balanced Community; The Gateway to Southern California; and Southern California's Next Urban Center.

SECTION 5.0
METHODS

This section of the report describes the methods employed in the characterization and evaluation of cultural and tribal cultural resources within the proposed project study area. The study methods were designed to provide the substantial evidence required to address the scope of analysis recommended in Section 15064.5 of the CEQA regulations related to cultural resources, Native American sacred sites, and human remains.

5.1 RECORDS SEARCH

Cultural Resources Records Search

A background records search was conducted to identify previously documented cultural resources within or near the project site. A record search was conducted at the South Central Coastal Information Center, located at California State University, Fullerton, by staff on June 9, 2021. A Sacred Lands File search was conducted by the Native American Heritage Commission on August 24, 2021. The California Office of Historic Preservation Built Environment Resource Directory and City of Ontario California Historical Resources Inventory Database (CHRID) were reviewed on August 17, 2021. National, state, and local inventories of cultural resources were examined to identify significant events and personages, development patterns, and unique interpretations of architectural styles. The following inventories were consulted:

- National Register of Historic Places (2021)
- California Register of Historical Resources (2021)
- California Historical Landmarks
- California Points of Historical Interest
- City of Sierra Madre Historical Landmarks (Historical Landmarks)

Staff conducted a record search at SCCIC on June 9, 2021 and included a 0.25-mile radius around the project site. The purpose of the literature search was to identify cultural resources previously recorded within and around the project site.

5.2 LITERATURE REVIEW

A literature review was completed to determine if the proposed project would have the potential to have a significant impact on previously recorded historical resources, thus requiring the consideration of avoidance and minimization measures, in accordance with CEQA Regulations. Research included the examination of published and unpublished literature, local libraries, historic context statements, databases of previously completed surveys in the area, and a review of current and historic maps and aerial photographs. Historic aerial photographs were available and reviewed for the years 1952, 1953, 1954, 1964, 1972, 1977, 1978, 1980, 1994, 2002, 2003, 2005, 2009, 2010, 2012, 2014, 2016, and 2018. Additionally, historic topographic maps were available and reviewed for the years 1894, 1896, 1898, 1900, 1904, 1907, 1910, 1913, 1915, 1920, 1927, 1928, 1931, 1933, 1940, 1941, 1947, 1958, 1964, 1967, 1974, 1988, 1994, 1999, 2012, 2015, and 2018.

5.3 ARCHAEOLOGICAL FIELD SURVEY

All cultural resource work was carried out under the direct supervision of qualified archaeologists who meet the Secretary of the Interior's *Professional Qualification Standards* for Archaeology and History, and in accordance with the procedures for compliance with CEQA. Key cultural resources personnel who conducted the field survey and prepared the technical report include Sapphos Environmental, Inc.'s Mr. Daniel Woodward, MA, (RPA #989900) who is on the Riverside County Planning Department Cultural Consultant List as Professional Archaeologist.

Sapphos Environmental, Inc. archaeologists, Mr. Woodward conducted pedestrian archaeological field survey of the project area on August 12, 2021, to document the existing conditions of the portion of open land in the project area. The project area was surveyed using transects spaced no greater than 15 meters apart. Mr. Woodward were equipped with a sub-meter accurate GPS unit recording spatial data and documented the survey area and all findings with a high-resolution digital camera. The area surveyed was open area in the SW portion of the project and consisted of approximately 0.8 acre of surface area. The overall ground visibility during the pedestrian survey was fair (approximately 30 percent). The project area is heavily disturbed, with piles of fill material, rubble and modern construction debris scattered across the property (Figure 5.3-1, *Overview of Project Area*). Sapphos Environmental archaeologists followed the Secretary of the Interior's *Standards and Guidelines for Archaeology and Historic Preservation*[48] during the fieldwork.

The archaeologist examined exposed ground surface for artifacts (e.g., flaked stone tools, tool-making debris, milling tools, ceramics), faunal remains (e.g., marine shell and bone), soil discoloration that might indicate the presence of a cultural midden, and features indicative of the former presence of structures or buildings (e.g., standing exterior walls, postholes, foundations) or historic debris (e.g., metal, glass, ceramics). Exposed subsurface soils resulting from rodent and other animal burrows were consistently identified and were visually inspected for cultural resources.

Appropriate personal protective equipment (i.e., snake gaiters, safety glasses, high-visibility safety vests, and appropriate boots) were used during the survey. Weather was ideal for survey; clear and sunny with a light breeze and a relative 85 degrees Fahrenheit. Survey methods included close-interval 5-meter systematic transects and examination of all rodent spoil piles, exposed soil profiles, and disturbances. Extra time and effort were given to the examination of these disturbances in areas of decreased ground visibility, thereby supplementing the typical pedestrian survey methods with more intensive efforts.

[48] Federal Register. 29 September 1983. *Volume 48, Number 190, 44716.*

Figure 5.3-1. Overview of Project Area
SOURCE: *Sapphos Environmental, Inc., 2021*

This section of the report characterizes the baseline conditions for cultural resources; evaluates the potential for the proposed project to result in significant direct, indirect, or cumulative impacts, and identifies feasible measures capable of avoiding or reducing the significant impacts to cultural resources that would result from reasonably foreseeable development of the proposed project.

6.1 SUMMARY OF FINDINGS

A records search was conducted at the SCCIC on June 9, 2021. Results of the records search indicated that there have been zero (0) resources identified within the project site or 0.25-mile buffer study area. A search of the BERD indicated zero (0) properties were identified within the project site; however, one (1) property is located within the 0.25-mile buffer study area. One (1) report was identified within the 0.25-mile buffer study area (Table 6.1-1, *Previous Surveys within the Study Area*).

TABLE 6.1-1
PREVIOUS SURVEYS WITHIN THE STUDY AREA

Report No.	Year	Report Title	Within Project Site	Author
SB-03901	2003	Cultural Resource Assessment: Cingular Wireless Facility #SB 245-01, Ontario, San Bernardino County, CA.	No	Caprice Harper

6.2 CULTURAL RESOURCES

The 2021 SCCIC records search indicated that there are no previously recorded cultural resources located within the project site or 0.25-mile buffer study area.

A review of the BERD indicated 840 E. Francis Street was previously indicated and assigned a status code of 7N, or "Needs to be reevaluated - formerly coded as may become NR eligible with specific conditions." No additional resources were identified in the records and database searches (Table 6.2-1, *Resources within the Study Area*).

TABLE 6.2-1
RESOURCES WITHIN THE STUDY AREA

Primary No.	Address	Property Type	Status Code	Within Project Site
36-015808	840 E. Francis Street	Building	7N	N

Local Agencies

City of Ontario

The results of the City of Ontario California Historical Resource Inventory Database (CHRID) review were negative for the project site and a 0.25-mile search radius.

6.3 RESULTS OF THE PHASE I ARCHAEOLOGICAL RESOURCES SURVEY

The pedestrian archaeological resources survey was completed for the proposed project site on August 12, 2021. No cultural resources were identified during the survey.

6.4 NATIVE AMERICAN SACRED SITES AND HUMAN REMAINS

The results of the request for review of the SLF from the NAHC are negative; therefore, there are no sacred land within the project footprint. The record searches, supplemental research, and field surveys did not reveal any known cemeteries or burial sites within the action area.

6.5 IMPACT ANALYSIS

Based on the desktop review, record search results, site visit, and a review of Section 15064.5 (b) of the CEQA Guidelines, Sapphos Environmental, Inc. has determined that there would be a less than significant impact to cultural resources as a result of the proposed project.

Section 15064.5 (b) states "a project with an effect that may cause a substantial adverse change in the significance of an historical resource is a project that may have a significant effect on the environment. Substantial adverse change in the significance of an historical resource means physical demolition, destruction, relocation, or alteration of the resource or its immediate surroundings such that the significance of an historical resource would be materially impaired."[49]

A Statement of Overring Considerations was adopted with The Ontario Plan (General Plan) Environmental Impact Report (EIR) for the demolition of Tier 3 historic properties. Tier 1 and 2 historic properties require preparation of an EIR. The subject property is not currently on the Historic Resource Inventory, but staff will recommend the addition to the Historic Preservation Subcommittee- HPSC (the keeper) and will prepare a Tier 3 Determination for consideration. This process will be initiated with submittal of entitlement applications and the Certificate of Appropriateness for demolition application. Thus, a finding of less than significant impacts is recommended for the proposed project.

[49] Section 15064.5 (b)(1) CEQA Guidelines, 177. 2021.

SECTION 7.0
CONCLUSION AND RECOMMENDATIONS

This section of the report provides the conclusions and recommendations for minimizing potential impacts to cultural resources from the proposed project.

There are no previously recorded cultural resources on file with the SCCIC within the proposed project area or 0.25-mile buffer. The subject property is a Tier 3 property per The Ontario Plan and mitigation measures were previously approved through the Statement of Overriding Consideration.

Based on the negative archaeological resource survey, and because no archaeological resources were identified through the SCCIC records search, there is a low probability to encounter archaeological resources based on the inherent characteristics and location of the project area.

There were no cemeteries or burial sites observed as a result of the review of historic aerial photographs and historic topographic maps. There is a low probability to encounter human remains based on the inherent characteristics and location of the project area based on this review. Through the implementation of project design features, impacts to cultural resources are anticipated to be less than significant. Therefore, the proposed project would not result in a substantial adverse change to a historical resource (Section 15064.5(b) of the CEQA Guidelines.

VOC	volatile organic compound

1 INTRODUCTION

The purpose of this Health Risk Assessment (HRA) is to evaluate potential health risks associated with Toxic Air Contaminants (TAC) including Diesel Particulate Matter (DPM) resulting from the implementation of the proposed the Bon View Project (Project). This HRA was prepared in accordance with the requirements of the South Coast Air Quality Management District (SCAQMD) and guidance from the Office of Environmental Health Hazard Assessment (OEHHA) to determine if health risks are likely to occur from the Project. Technical data is included as see Appendix A: Modeling Data.

1.1 Project Location and Setting

The Project site is located at the northwest corner of South Bon View Avenue and East Cedar Street in the City of Ontario, California (City), County of San Bernardino (County), California. The site is generally located in the western portion of the City, approximately 0.50-mile north of State Route 60 (SR-60) and 0.65-mile east of Euclid Avenue (SR-83). Local access to the site is provided via Cedar Street to the south and Bon View Avenue to the east; refer to Exhibit 1: Regional Location Map and Exhibit 2: Project Vicinity Map.

The Project site is a rectangular lot that contains vacant parcels**.** The site's existing land use designation is Industrial; the existing zoning is Light Industrial (IL) and General Industrial (IG). Immediate surrounding properties consist of industrial uses to the north, east, south, and west; multi-family residential uses are located further to the south of the Project site along Cedar Street.

1.2 Project Description

The proposed Project would involve the construction of a 175,047 square-foot (sf) warehouse building on an approximately 7.47-acre site, with associated facilities and improvements including approximately 4,500 square feet of office space, vehicle parking, loading dock doors, trailer parking, onsite landscaping, and related on-site and off-site improvements; refer to Exhibit 3: Conceptual Site Plan. The building height would be a approximately 45 feet and have a Floor Area Ratio (FAR) of 0.54.

2 ENVIRONMENTAL SETTING

2.1 Climate

The general region lies in the semi-permanent high-pressure zone of the eastern Pacific. The climate is mild and tempered by cool sea breezes. The usually mild climatological pattern is interrupted infrequently by periods of extremely hot weather, winter storms, or Santa Ana winds. The extent and severity of the air pollution problem in the South Coast Air Basin (SCAB) is a function of the area's natural physical characteristics (weather and topography), as well as man-made influences (development patterns and lifestyle). Factors such as wind, sunlight, temperature, humidity, rainfall, and topography all affect the accumulation and/or dispersion of pollutants throughout the SCAB. These factors along with applicable regulations are discussed below.

The average annual temperature varies little throughout the SCAB, averaging 75 degrees Fahrenheit (°F). However, with a less-pronounced oceanic influence, the eastern inland portions of the SCAB show greater variability in annual minimum and maximum temperatures. All portions of the SCAB have had recorded temperatures over 100°F in recent years.

2.2 Meteorology

Although the SCAB has a semi-arid climate, the air near the surface is moist due to the presence of a shallow marine layer. Except for infrequent periods when dry, continental air is brought into the SCAB by offshore winds, the ocean effect is dominant. Periods with heavy fog are frequent, and low stratus clouds, occasionally referred to as "high fog," are a characteristic climate feature. Annual average relative humidity is 70 percent at the coast and 57 percent in the eastern part of the SCAB. Precipitation in the SCAB is typically nine to 14 inches annually and is rarely in the form of snow or hail due to typically warm weather. The frequency and amount of rainfall is greater in the coastal areas of the SCAB.

A temperature inversion is defined as an increase in temperature with height, or to the layer within which such an increase occurs. The height of the inversion is important in determining pollutant concentration. When the inversion is approximately 2,500 feet above sea level, the sea breezes carry the pollutants inland to escape over the mountain slopes or through the passes. At a height of 1,200 feet, the terrain prevents the pollutants from entering the upper atmosphere, resulting in a settlement in the foothill communities. Below 1,200 feet, the inversion puts a tight lid on pollutants, concentrating them in a shallow layer over the entire SCAB. Usually, inversions are lower before sunrise than during the day. Mixing heights for inversions are lower in the summer and more persistent, being partly responsible for the high levels of ozone (O_3) observed during summer months in the SCAB. Smog in southern California is generally the result of these temperature inversions combining with coastal day winds and local mountains to contain the pollutants for long periods of time, allowing them to form secondary pollutants by reacting with sunlight. The SCAB has a limited ability to disperse these pollutants due to typically low wind speeds.

The area in which the Project is located offers clear skies and sunshine yet is still susceptible to air inversions. These inversions trap a layer of stagnant air near the ground, where it is then further loaded with pollutants. These inversions cause haziness, which is caused by moisture, suspended dust, and a variety of chemical aerosols emitted by trucks, automobiles, furnaces, and other sources.

2.3 Toxic Air Contaminants

Toxic Air Contaminants (TACs) are airborne substances capable of causing short-term (acute) and long-term (chronic or carcinogenic, i.e. cancer causing) adverse human health effects (i.e. injury or illness). TACs include both organic and inorganic chemical substances. They may be emitted from a variety of common sources including gasoline stations, automobiles, dry cleaners, industrial operations, and painting operations. The current California list of TACs includes approximately 200 compounds, including particulate emissions from diesel-fueled engines.

Hazardous Air Pollutants (HAP) is a term used by the Federal Clean Air Act (FCAA) that includes a variety of pollutants generated or emitted by industrial production activities. Identified as TACs under the California Clean Air Act (CCAA), ten have been singled out through ambient air quality data as being the most substantial health risk in California. Direct exposure to these pollutants has been shown to cause cancer, birth defects, damage to the brain and nervous system, and respiratory disorders. The California Air Resources Board (CARB) provides emission inventories for only the larger air basins.

TACs do not have ambient air quality standards because no safe levels of TACs can be determined. Instead, TAC impacts are evaluated by calculating the health risks associated with a given exposure. The requirements of the Air Toxic "Hot Spots" Information and Assessment Act (Assembly Bill [AB] 2588) apply to facilities that use, produce, or emit toxic chemicals. Facilities subject to the toxic emission inventory requirements of the act must prepare and submit toxic emission inventory plans and reports, and periodically update those reports.

Toxic contaminants often result from fugitive emissions during fuel storage and transfer activities, and from leaking valves and pipes. For example, the electronics industry, including semiconductor manufacturing, uses highly toxic chlorinated solvents in semiconductor production processes. Sources of air toxics go beyond industry, however. Automobile exhaust also contains toxic air pollutants such as benzene and 1,3-butadiene. In California, on-road diesel-fueled engines contribute approximately 24 percent of the statewide total, with an additional 71 percent attributed to other mobile sources such as construction and mining equipment, agricultural equipment, and transport refrigeration units. Stationary sources contribute about 5 percent of total DPM. It should be noted that CARB has developed several plans and programs to reduce diesel emissions such as the Diesel Risk Reduction Plan (DRRP), the Statewide Portable Equipment Registration Program (PERP), and the Diesel Off-Road Reporting System (DOORS). The PERP and DOORS programs allow owners or operators of portable engines and certain other types of equipment can register their units in order to operate their equipment throughout California without having to obtain individual permits from local air districts.

Diesel exhaust and many individual substances contained in it (including arsenic, benzene, formaldehyde, and nickel) have the potential to contribute to mutations in cells that can lead to cancer. Long-term exposure to diesel exhaust particles poses the highest cancer risk of any TAC evaluated by OEHHA. CARB estimates that about 70 percent of the cancer risk that the average Californian faces from breathing toxic air pollutants stems from diesel exhaust particles.

In its comprehensive assessment of diesel exhaust, OEHHA analyzed more than 30 studies of people who worked around diesel equipment, including truck drivers, railroad workers, and equipment operators. The studies showed these workers were more likely to develop lung cancer than workers not exposed to diesel emissions. These studies provide strong evidence that long-term occupational exposure to diesel exhaust increases the risk of lung cancer. Using information from OEHHA's assessment, CARB estimates that diesel

particle levels measured in California's air in 2000 could cause 540 "excess" cancers in a population of 1 million people over a 70-year lifetime. Other researchers and scientific organizations, including the National Institute for Occupational Safety and Health, have calculated cancer risks from diesel exhaust similar to those developed by OEHHA and CARB.

Exposure to diesel exhaust can have immediate health effects. Diesel exhaust can irritate the eyes, nose, throat, and lungs, and it can cause coughs, headaches, lightheadedness, and nausea. In studies with human volunteers, diesel exhaust particles made people with allergies more susceptible to the materials to which they are allergic, such as dust and pollen. Exposure to diesel exhaust also causes inflammation in the lungs, which may aggravate chronic respiratory symptoms and increase the frequency or intensity of asthma attacks.

Diesel engines are a major source of fine particulate pollution. The elderly and people with emphysema, asthma, and chronic heart and lung disease are especially sensitive to fine-particle pollution. Numerous studies have linked elevated particle levels in the air to increased hospital admissions, emergency room visits, asthma attacks, and premature deaths among those suffering from respiratory problems. Because children's lungs and respiratory systems are still developing, they are also more susceptible than healthy adults to fine particles. Exposure to fine particles is associated with increased frequency of childhood illnesses and can also reduce lung function in children. In California, diesel exhaust particles have been identified as a carcinogen.

2.4 Sensitive Receptors

Sensitive populations are more susceptible to the effects of air pollution than is the general population. Sensitive receptors that are in proximity to localized sources of toxics are of particular concern. Land uses considered sensitive receptors include residences, schools, playgrounds, childcare centers, long-term health care facilities, rehabilitation centers, convalescent centers, and retirement homes. Sensitive land uses surrounding the Project consist of multi-family and single-family residences. The nearest sensitive land uses nearest to the Project are shown in Table 1: Sensitive Receptors.

Table 1: Sensitive Receptors

Receptor Description	Distance and Direction from the Project
Multi-Family Residences	155 feet to the south
Single-Family Residences	480 feet to the southwest
Multi-Family Residences	730 feet to the west

Source: Google Earth, 2021.

3 REGULATORY SETTING

3.1 Federal

Federal Clean Air Act

The FCAA was amended in 1990 to address the numerous air pollutants that are known to cause or may reasonably be anticipated to cause adverse effects to human health or adverse environmental effects. 188 specific pollutants and chemical groups were initially identified as HAPs, and the list has been modified over time. The FCAA Amendments included new regulatory programs to control acid deposition and for the issuance of stationary source operating permits.

In 2001, the United States Environmental Protection Agency (EPA) issued its first Mobile Source Air Toxics Rule, which identified 21 mobile source air toxic (MSAT) compounds as being HAPs that required regulation. A subset of six of these MSAT compounds were identified as having the greatest influence on health and included benzene, 1,3-butadiene, formaldehyde, acrolein, acetaldehyde, and DPM. More recently, the EPA issued a second MSAT Rule in February 2007, which generally supported the findings in the first rule and provided additional recommendations of compounds having the greatest impact on health. The rule also identified several engine emission certification standards that must be implemented. Unlike the criteria pollutants, toxics do not have National Ambient Air Quality Standards (NAAQS) making evaluation of their impacts more subjective.

National Emissions Standards for Hazardous Air Pollutants (NESHAPs) were incorporated into a greatly expanded program for controlling toxic air pollutants. The provisions for attainment and maintenance of the NAAQS were substantially modified and expanded. Other revisions included provisions regarding stratospheric ozone protection, increased enforcement authority, and expanded research programs.

Section 112 of the FCAA Amendments governs the federal control program for HAPs. NESHAPs are issued to limit the release of specified HAPs from specific industrial sectors. These standards are technology-based, meaning that they represent the best available control technology an industrial sector could afford. The level of emissions controls required by NESHAPs are not based on health risk considerations because allowable releases and resulting concentrations have not been determined to be safe for the general public. The FCAA does not establish air quality standards for HAPs that define legally acceptable concentrations of these pollutants in ambient air.

Federal Emissions Standards for On-Road Trucks

To reduce emissions from on-road, heavy-duty diesel trucks, the U.S. EPA established a series of increasingly strict emission standards for new engines, starting in 1988. The U.S. EPA promulgated the final and cleanest standards with the 2007 Heavy-Duty Highway Rule.[1] The PM emission standard of 0.01 gram per horsepower-hour (g/hp-hr) is required for new vehicles beginning with model year 2007. Also, the NO_X and nonmethane hydrocarbon (NMHC) standards of 0.20 g/hp-hr and 0.14 g/hp-hr, respectively, were phased in together between 2007 and 2010 on a percent of sales basis: 50 percent from 2007 to 2009 and 100 percent in 2010.

[1] United States Environmental Protection Agency (U.S. EPA), *Control of Air Pollution from New Motor Vehicles: Heavy-Duty Engine and Vehicle Standards and Highway Diesel Fuel Sulfur Control Requirements*, Final Rule. 40 Code of Federal Regulations, Parts 69, 80, and 86. January 18, 2001.

Emission Standards for Nonroad Diesel Engines

To reduce emissions from off-road diesel equipment, the U.S. EPA established a series of cleaner emission standards for new off-road diesel engines. Tier 1 standards were phased in from 1996 to 2000 (year of manufacture), depending on the engine horsepower category. Tier 2 standards were phased in from 2001 to 2006. Tier 3 standards were phased in from 2006 to 2008. Tier 4 standards, which generally require add-on emission control equipment to attain them, are being phased in from 2008 to 2015.

3.2 State of California

California Air Resources Board

CARB's statewide comprehensive air toxics program was established in 1983 with AB 1807 the Toxic Air Contaminant Identification and Control Act (Tanner Air Toxics Act of 1983). AB 1807 created California's program to reduce exposure to air toxics and sets forth a formal procedure for CARB to designate substances as TACs. Once a TAC is identified, CARB adopts an airborne toxics control measure (ATCM) for sources that emit designated TACs. If there is a safe threshold for a substance at which there is no toxic effect, the control measure must reduce exposure to below that threshold. If there is no safe threshold, the measure must incorporate toxics best available control technology (T-BACT) to minimize emissions.
CARB also administers the state's mobile source emissions control program and oversees air quality programs established by state statute, such as AB 2588. Under AB 2588, TAC emissions from individual facilities are quantified and prioritized by the air quality management district or air pollution control district. High priority facilities are required to perform a health risk assessment and, if specific thresholds are exceeded, required to communicate the results to the public in the form of notices and public meetings. In September 1992, the AB 2588 was amended by Senate Bill (SB) 1731 which required facilities that pose a significant health risk to the community to reduce their risk through a risk management plan.

Diesel Risk Reduction Plan

The identification of DPM as a TAC in 1998 led CARB to adopt the Risk Reduction Plan to Reduce Particulate Matter Emissions from Diesel-Fueled Engines and Vehicles (DRRP) in October 2000. The DRRP's goals include an 85 percent reduction in DPM by 2020 from the 2000 baseline.[2] CARB estimates that emissions of DPM in 2035 will be less than half those in 2010, further reducing statewide cancer risk and non-cancer health effects.[3] The DRRP includes regulations to establish cleaner new diesel engines, cleaner in-use diesel engines (retrofits), and cleaner diesel fuel.

Truck and Bus Regulation Reducing Emissions from Existing Diesel Vehicles

On December 12, 2008, CARB approved the Truck and Bus Regulation to significantly reduce particulate matter (PM) and oxides of nitrogen (NO_X) emissions from existing diesel vehicles operating in California. The regulation requires diesel trucks and buses that operate in California to be upgraded to reduce emissions. Heavier trucks were required to be retrofitted with PM filters beginning January 1, 2012, and

[2] California Air Resources Board, *Risk Reduction Plan to Reduce Particulate Matter Emissions from Diesel-Fueled Engines and Vehicles*, October 2000.
[3] California Air Resources Board, *Overview: Diesel Exhaust & Health*, available at: https://ww2.arb.ca.gov/resources/overview-diesel-exhaust-and-health, accessed May 10, 2021.

older trucks were required to be replaced starting January 1, 2015. By January 1, 2023, nearly all trucks and buses would need to have 2010 model year engines or equivalent.

The regulation applies to most privately and federally-owned diesel fueled trucks and buses and to privately and publicly owned school buses with a gross vehicle weight rating (GVWR) greater than 14,000 pounds. Small fleets with three or fewer diesel trucks can delay compliance for heavier trucks and there are several extensions for low-mileage construction trucks, early PM filter retrofits, adding cleaner vehicles, and other situations. Privately and publicly owned school buses have different requirements.

Heavy-Duty Vehicle Idling Emission Reduction Program

The purpose of the CARB ATCM to Limit Diesel-Fueled Commercial Motor Vehicle Idling is to reduce public exposure to diesel particulate matter and criteria pollutants by limiting the idling of diesel-fueled commercial vehicles. The driver of any vehicle subject to this ATCM is prohibited from idling the vehicle's primary diesel engine for greater than five minutes at any location and is prohibited from idling a diesel-fueled auxiliary power system (APS) for more than five minutes to power a heater, air conditioner, or any ancillary equipment on the vehicle if it has a sleeper berth and the truck is located within 100 feet of a restricted area (homes and schools).

CARB Final Regulation Order, Requirements to Reduce Idling Emissions from New and In-Use Trucks, beginning in 2008, would require that new 2008 and subsequent model-year heavy-duty diesel engines be equipped with an engine shutdown system that automatically shuts down the engine after 300 seconds of continuous idling operation once the vehicle is stopped, the transmission is set to "neutral" or "park", and the parking brake is engaged.

CalEnviroScreen

The California Office of Environmental Health Hazard Assessment (OEHHA) has developed CalEnviroScreen 3.0, which is a mapping tool that helps identify California communities that are most affected by many sources of pollution, and where people are often especially vulnerable to pollution's effects. CalEnviroScreen uses environmental, health, and socioeconomic information to produce scores for every census tract in the State. The scores are mapped so that different communities can be compared. An area with a high score is one that experiences a much higher pollution burden than areas with low scores.

According to CalEnviroScreen, the Project site is located within Census Tract 6071001813, which is within the 95-100th percentile. The residential uses to the south of the Project site are located within Census Tract 6071001810, which is within the 80-85th percentile. It should be noted that the CalEnviroScreen scores are not an expression of health risk, and do not provide quantitative information on increases in cumulative impacts for specific sites or projects. Further, as a comparative screening tool, the results do not provide a basis for determining when differences between scores are significant in relation to public health or the environment.

CARB Advanced Clean Truck Regulation

CARB adopted the Advanced Clean Truck Regulation in June 2020 requiring truck manufacturers to transition from diesel trucks and vans to electric zero-emission trucks beginning in 2024. By 2045, every new truck sold in California is required to be zero-emission. This rule directly addresses disproportionate

risks and health and pollution burdens and puts California on the path for an all zero-emission short-haul drayage fleet in ports and railyards by 2035, and zero-emission "last-mile" delivery trucks and vans by 2040. The Advanced Clean Truck Regulation accelerates the transition of zero-emission medium-and heavy-duty vehicles from Class 2b to Class 8. The regulation has two components including a manufacturer sales requirement, and a reporting requirement:

- Zero-Emission Truck Sales: Manufacturers who certify Class 2b through 8 chassis or complete vehicles with combustion engines are required to sell zero-emission trucks as an increasing percentage of their annual California sales from 2024 to 2035. By 2035, zero-emission truck/chassis sales need to be 55 percent of Class 2b – 3 truck sales, 75 percent of Class 4 – 8 straight truck sales, and 40 percent of truck tractor sales.

- Company and Fleet Reporting: Large employers including retailers, manufacturers, brokers and others would be required to report information about shipments and shuttle services. Fleet owners, with 50 or more trucks, would be required to report about their existing fleet operations. This information would help identify future strategies to ensure that fleets purchase available zero-emission trucks and place them in service where suitable to meet their needs.

3.3 REGIONAL

South Coast Air Quality Management District

The CCAA provides the SCAQMD with the authority to manage transportation activities at indirect sources and regulate stationary source emissions. Indirect sources of pollution are generated when minor sources collectively emit a substantial amount of pollution. An example of this would be the motor vehicles at an intersection, a mall, and on highways. As a State agency, CARB regulates motor vehicles and fuels for their emissions.

Air Toxics Control Plan

The Air Toxics Control Plan (March 2000, revised March 26, 2004) is a planning document designed to examine the overall direction of the SCAQMD's air toxics control program. It includes development and implementation of strategic initiatives to monitor and control air toxics emissions. Control strategies that are deemed viable and are within the SCAQMD's jurisdiction will each be brought to the SCAQMD Board for further consideration through the normal public review process. Strategies that are to be implemented by other agencies will be developed in a cooperative effort, and the progress will be reported back to the Board periodically.

Multiple Air Toxics Exposure Study

The SCAQMD conducted an in-depth analysis of the toxic air contaminants and their resulting health risks for all of Southern California. The Multiple Air Toxics Exposure Study in the SCAB (MATES IV) shows that cancer risk has decreased more than 50 percent between MATES III (2008) and MATES IV (2015).

MATES IV is the most comprehensive dataset documenting the ambient air toxic levels and health risks associated with the SCAB emissions. Therefore, MATES IV study represents the baseline health risk for a cumulative analysis. MATES IV estimates the average excess cancer risk level from exposure to TACs is less than 400 in one million basin-wide. These model estimates were based on monitoring data collected at

ten fixed sites within the SCAB. None of the fixed monitoring sites are near the Project site. However, MATES IV has extrapolated the excess cancer risk levels throughout the SCAB by modeling the specific grids. MATES IV modeling predicted an excess cancer risk of 772 in one million for the Project area.[4] DPM is included in this cancer risk along with all other TAC sources. DPM accounts for 68 percent of the total risk shown in MATES IV. The SCAQMD is currently preparing MATES V, which will be the latest comprehensive study of levels of toxic air pollutants the region, MATES V will include an advanced monitoring component with a focus on refinery emissions.

Assembly Bill 617 – Community Air Protection Program

Passed by the California legislature in 2017, AB 617 is a law that focuses on reducing air pollution in environmental justice communities throughout the State. AB 617 requires a statewide strategy with focused actions for communities heavily impacted by air pollution. These actions include developing community air monitoring plans (CAMPs) and/or community emissions reduction plans (CERPs) to reduce emissions of toxic air contaminants (TACs) and criteria pollutants. The San Bernardino/Muscoy area was among three communities chosen for the program. The project site is approximately 17 miles west of the CERP's boundary and approximately 16.5 miles west of the emissions study area boundary.

The San Bernardino/Muscoy CERP outlines the actions and commitments to reduce air pollution for the San Bernardino/Muscoy community. Implementation of the CERP is estimated to reduce NO_X emissions by 40 to 50 tons per year and PM emissions by 0.5 to 0.6 tons per year. The CERP's goal is to cut NO_X and PM emissions 10 percent by 2024 and 21 percent and 15 percent, respectively, by 2029.

CERP implementation is to take place over approximately five years. Once adopted, the CERP would allow the SCAQMD to provide incentive funds to accelerate the replacement of old trucks with technology that is cleaner than required, focus enforcement to ensure rule compliance, develop new rules to reduce emissions, work with land use agencies to develop emissions reducing policies, and implement school programs to reduce indoor levels of pollution. The CERP does not includes project-specific requirements but would allow the SCAQMD and CARB to implement emissions reducing measures. Therefore, no further analysis is warranted.

[4] South Coast Air Quality Management District, *MATES IV Estimated Risk*, https://scaqmd-online.maps.arcgis.com/apps/webappviewer/index.html?id=470c30bc6daf4ef6a43f0082973ff45f

4 SIGNIFICANCE CRITERIA AND METHODOLOGY

4.1 Health Risk Analysis Thresholds

Project health risks are determined by examining the types and levels of air toxics generated and the associated impacts on factors that affect air quality. While the final determination of significance thresholds is within the purview of the lead agency pursuant to the State CEQA Guidelines, the SCAQMD recommends that the following air pollution thresholds be used by lead agencies in determining whether the impacts from the Project are significant. If the lead agency finds that the Project has the potential to exceed the air pollution thresholds, the Project should be considered significant. The thresholds for air toxic emissions are as follows:

- **Cancer Risk:** Emit contaminants that exceed the maximum individual cancer risk of 10 in one million.
- **Non-Cancer Risk:** Emit contaminants that exceed the maximum hazard quotient of 1 in one million.

Cancer risk is expressed in terms of expected incremental incidence per million population. The SCAQMD has established an incidence rate of 10 persons per million as the maximum acceptable incremental cancer risk due to DPM exposure. This threshold serves to determine whether or not a given project has a potentially significant development-specific and cumulative impact. The 10 in one million standard is a health-protective significance threshold. A risk level of 10 in one million implies a likelihood that up to 10 persons, out of one million equally exposed people would contract cancer if exposed continuously (24 hours per day) to the levels of toxic air contaminants over a specified duration of time. This risk would be an excess cancer that is in addition to any cancer risk borne by a person not exposed to these air toxics. To put this risk in perspective, the risk of dying from accidental drowning is 1,000 in a million which is 100 times more than the SCAQMD's threshold of 10 in one million.

The SCAQMD has also established non-carcinogenic risk parameters for use in HRAs. Noncarcinogenic risks are quantified by calculating a "hazard index," (HI) expressed as the ratio between the ambient pollutant concentration and its toxicity or Reference Exposure Level (REL). An REL is a concentration at or below which health effects are not likely to occur. A hazard index less than 1.0 means that adverse health effects are not expected. Within this analysis, non-carcinogenic exposures less than 1.0 are considered less than significant.

4.2 Methodology

This HRA evaluates potential health risks associated with the emission of diesel particulate matter resulting from the implementation of the proposed Project. Construction equipment and associated heavy-duty truck traffic generate diesel exhaust, which is a known TAC. Diesel exhaust from construction equipment operating at the site poses a health risk to nearby sensitive receptors. Operational activities would also include the use of heavy-duty diesel trucks.

Construction Sources

Construction would generate DPM emissions from the use of off-road diesel equipment required for demolition, grading and excavation, paving, and other construction activities. For construction activity, DPM is the primary toxic air contaminant of concern. On-road diesel-powered haul trucks traveling to and

from the construction area to deliver materials and equipment were included in the analysis, although they are typically less of a concern because they would not stay on the site for long durations. Diesel exhaust from construction equipment operating at the site potentially poses a health risk to nearby sensitive receptors. The closest sensitive receptors to the Project site are residences located 155 feet away from the south boundary of the Project site.

Health-related risks associated with diesel-exhaust emissions are primarily linked to long-term exposure and the associated risk of contracting cancer. The use of diesel-powered construction equipment would be episodic and would occur throughout the Project site. Construction activities would limit idling to no more than five minutes, which would further reduce nearby sensitive receptors' exposure to temporary and variable DPM emissions. Furthermore, even during the most intense period of construction, emissions of DPM would be generated from different locations on the Project Site rather than in a single location because different types of construction activities (e.g., site preparation and building construction) would not occur at the same place at the same time.

Operational Sources

Due to the increased truck traffic from the Project, the resulting emissions could also result in pollutant concentrations at existing sensitive receptors. Average daily trips from truck traffic to the Project were obtained from the Project Traffic Impact Study (May 2021). Emission rates for vehicle running and idling for PM_{10} (DPM) was calculated using trip data and CARB 2017 EMission FACtor model version 1.0.2 (EMFAC)[5] data for San Bernardino County; refer to Appendix A. The emissions rate was calculated using 2022 emissions factors since Project construction would be completed in late-2021. The third trimester exposure used opening year (2022) emissions factors, 2-year factors (for infant exposure) reflect years 2023 and 2024 using 2023 emissions factors, 14-year average factors (for child exposure during years 2-16) reflect emissions during the first 14 years of operation after infancy (2025 to 2038) using 2025 emissions factors, and the second 14 years of exposure (years 2039-2052) using 2039 emissions factors were used for assessment of exposure during years 16 to 30 and were derived for the South Coast Portion of San Bernardino County. The analysis includes onsite idling and truck traffic on the following roadways and vehicle speeds are:

- Bon View Avenue (25 to 40 miles per hour)
- Philadelphia Street (40 miles per hour)
- Euclid Avenue (40 miles per hour)
- Grove Avenue (40 miles per hour)
- Onsite Truck Traffic (15 miles per hour)

Dispersion Modeling

The air dispersion modeling for the HRA was performed using the U.S. EPA AERMOD dispersion model. AERMOD is a steady-state, multiple-source, Gaussian dispersion model designed for use with emission sources situated in terrain where ground elevations can exceed the stack heights of the emission sources (not a factor in this case). AERMOD requires hourly meteorological data consisting of wind vector, wind speed, temperature, stability class, and mixing height. Surface and upper air meteorological data is provided by the SCAQMD. Surface and upper air meteorological data from the Fontana Monitoring Station was selected as being the most representative for meteorology based on proximity to the Project site.

[5] California Air Resources Board, *EMFAC 2017 Web Database,* www.arb.ca.gov/emfac/2017/, accessed February 2021.

The AERMOD emission source for construction are line volume sources (comprised of smaller adjacent volume sources)[6] throughout the Project site. Heavy duty vehicle emissions were assigned a release height (i.e., average stack height) of 12 feet (3.6 meters), and a plume height of 20.4 feet (6.22 meters). AERMOD was run to obtain the 1-hour and annual average concentration in micrograms per cubic meter ($\mu g/m^3$) of PM_{10} at the nearby sensitive receptors. According to the SCAQMD's Supplemental Guidelines for Preparing Risk Assessments for AB 2588, air dispersion modeling is required to estimate annual average concentrations to calculate the Maximum Individual Cancer Risk (MICR), the maximum chronic HI, the zones of impact, and excess cancer burden, as well as peak hourly concentrations to calculate the health impact from substances with acute non-cancer health effects. To achieve these goals, a receptor grid was placed over the Project site to cover the zone of impact. According to the SCAQMD, in order "to identify the maximum impacted receptors (i.e. peak cancer risk and peak hazard indices) a grid spacing of 100 meters or less must be used" (see page 16 of SCAQMD's Supplemental Guidelines). Due to the size of the Project site, receptors were modeled with a 50-meter grid spacing. In addition, National Elevation Dataset (NED) terrain data was imported into AERMOD for the Project. The modeling and analysis were prepared in accordance with the SCAQMD Modeling Guidance for AERMOD.[7]

Note that the concentration estimate developed using this methodology is conservative and is not a specific prediction of the actual concentrations that would occur at the Project site any one point in time. Actual 1-hour and annual average concentrations are dependent on many variables, particularly the number and type of vehicles and equipment operating at specific distances during time periods of adverse meteorology. A health risk computation was performed to determine the risk of developing an excess cancer risk calculated on these worst-case exposure duration scenarios. The chronic and carcinogenic health risk calculations are based on the standardized equations contained in the OEHHA Guidance Manual. Only the risk associated with the worst-case location of the Project was assessed.

Health Risk Computation

A health risk computation was performed to determine the risk of developing an excess cancer risk calculated on a 30-year exposure scenario using CARB's Risk Assessment Stand Alone Tool (RAST). The chronic and carcinogenic health risk calculations are based on the standardized equations contained in the U.S. EPA *Human Health Evaluation Manual* (1991) and the OEHHA Guidance Manual (2015).

Risk and Hazard Assessment

Cancer Risk

Based on the OEHHA methodology, residential inhalation cancer risk from annual average DPM and benzene concentrations are calculated by multiplying the daily inhalation dose, cancer potency factor, age sensitivity factor (ASF), frequency of time spent at home, and exposure duration divided by averaging time, yielding the excess cancer risk. These factors are discussed in more detail below. It is important to note that exposure duration is based on continual heavy truck operation along nearby roadways. Exposure through inhalation (Dose-air) is a function of breathing rate, exposure frequency, and concentration of

[6] Construction emissions would occur from heavy-duty equipment operating throughout the Project site. These sources were characterized as multiple volume sources (modeled as adjacent line volume sources that cover the disturbed areas of the project site) to represent construction equipment.

[7] South Coast Air Quality Management District, *SCAQMD Modeling Guidance for AERMOD*, http://www.aqmd.gov/home/air-quality/meteorological-data/modeling-guidance, accessed February 17, 2020.

substance in the air. To estimate cancer risk, the dose was estimated by applying the following formula to each ground-level concentration:

$$\text{Dose-air} = C_{air}*(BR/BW)*A*EF*10^{-6}$$

Dose-air =	dose through inhalation (mg/kg/day)
C_{air} =	air concentration (µg/m^3) from air dispersion model
(DBR/BW) =	daily breathing rate normalized to body weight (L/kg bodyweight-day)
A =	inhalation absorption factor (unitless)
EF =	exposure frequency (approximately 350 days per year for residential)
10^{-6} =	conversion factor (micrograms to milligrams, liters to cubic meters)

OEHHA developed ASFs to consider the increased sensitivity to carcinogens during early-life exposure. Fraction of time at home (FAH) during the day is used to adjust exposure duration and cancer risk from a specific facility's emissions, based on the assumption that exposure to the facility's emissions are not occurring away from home. The factors used in the health risk assessment are shown in Table 2: Default Age Sensitivity Factors, Fraction of Time at Home, And Daily Breathing Rates.

Table 2: Default Age Sensitivity Factors, Fraction of Time at Home, and Daily Breathing Rates

Age	Default Age Sensitivity Factor[1] (ASF)	Fraction of Time at Home (FAH)	Daily Breathing Rate (L/kg BW-day[2])
Third trimester	10	100%	361
0 to 2 years	10	100%	1,090
Ages 2 through 15 years	3	100%	745
Ages 16 and greater	1	73%	335

1. Accounts for potential increased sensitivity to carcinogens during childhood.
2. 95th percentile daily breathing rate normalized to body weight (L/kg body weight - day)

Source: California Office of Environmental Health Hazard Assessment, *Air Toxics Program Guidance Manual for the Preparation of Health Risk Assessments*, February 2015.

To estimate the cancer risk, the dose is multiplied by the cancer potency factor, the ASF, the exposure duration divided by averaging time, and the frequency of time spent at home (for residents only):

$$Risk_{inh\text{-}res} = (Dose_{air}*CPF*ASF*(ED/AT)*FAH)$$

$Risk_{inh\text{-}res}$ =	residential inhalation cancer risk (potential chances per million)
$Dose_{air}$ =	daily dose through inhalation (mg/kg-day)
CPF =	inhalation cancer potency factor (mg/kg-day^{-1})
ASF =	age sensitivity factor for a specified age group (unitless)
ED =	exposure duration (years)
AT =	averaging time of lifetime cancer risk (years)
FAH =	fraction of time spent at home (unitless)

Chronic Non-Cancer Hazard

Non-cancer chronic impacts are calculated by dividing the annual average concentration by the REL for that substance. The REL is defined as the concentration at which no adverse non-cancer health effects are anticipated. The following equation was used to determine the non-cancer risk:

$$\text{Hazard Quotient} = C_i/REL_i$$

C_i = concentration in the air of substance i (annual average concentration in µg/m^3)
REL_i = chronic noncancer Reference Exposure Level for substance (µg/m^3)

Acute Non-Cancer Hazard

The potential for acute non-cancer hazards is evaluated by comparing the maximum short-term exposure level to an acute REL. RELs are designed to protect sensitive individuals within the population. The calculation of acute non-cancer impacts is similar to the procedure for chronic non-cancer impacts. The equation is as follows:

Acute HQ = Maximum Hourly Air Concentration (µg/m^3) / Acute REL (µg/m^3)

Health Risk Computation

A health risk computation was performed to determine the risk of developing an excess cancer risk calculated on a 30-year exposure scenario using CARB's Risk Assessment Stand Alone Tool (RAST). Health risk were analyzed at the point of maximum impact and are a conservative estimate. The pollutant concentrations are then used to estimate the long-term cancer health risk to an individual as well as the non-cancer chronic health index.

The off-site impacts would occur from the diesel trucks accessing the proposed Project. The cancer and chronic health risks are based on the annual average concentration of PM_{10} (used as a proxy for DPM). As DPM does not have short-term toxicity values, acute risks were conservatively evaluated using hourly PM_{10} concentrations and the REL for acrolein. The chronic and carcinogenic health risk calculations are based on the standardized equations contained in the U.S. EPA *Human Health Evaluation Manual* (1991) and the OEHHA Guidance Manual (2015).

5 POTENTIAL HEALTH RISK IMPACTS

CARB identified DPM as a TAC in 1998. Mobile sources (including trucks, buses, automobiles, trains, ships, and farm equipment) are by far the largest source of diesel emissions. The exhaust from diesel engines includes hundreds of different gaseous and particulate components, many of which are toxic. Diesel exhaust is emitted from a broad range of on- and off-road diesel engines. As the Project is proposed near existing residences, an analysis of DPM was performed using the EPA-approved AERMOD model.

5.1 Construction Health Risk Analysis

The duration of construction activities for the Project is estimated to take approximately nine months. Construction-related activities would result in Project-generated emissions of diesel PM from the exhaust of off-road, heavy-duty diesel equipment for site preparation (e.g., clearing, grading); paving; application of architectural coatings; on-road truck travel; and other miscellaneous activities. For construction activity, diesel PM is the primary toxic air contaminant of concern. On-road diesel-powered haul trucks traveling to and from the construction area to deliver materials and equipment are less of a concern because they would not stay on the site for long durations. Diesel exhaust from construction equipment operating at the site poses a health risk to nearby sensitive receptors. The closest sensitive receptors near the Project site are residential uses located to the south.

As noted above, maximum (worst case) PM_{10} exhaust construction emissions over the entire construction period were used in AERMOD to approximate construction DPM emissions. Risk levels were calculated based on the California Office of Environmental Health Hazard Assessment (OEHHA) guidance document, Air Toxics Hot Spots Program Risk Assessment Guidelines (February 2015). Results of this assessment are summarized in Table 3: Construction Risk.

Table 3: Construction Risk

Exposure Scenario	Pollutant Concentration ($\mu g/m^3$)[1,2]	Maximum Cancer Risk (Risk per Million)	Chronic Noncancer Hazard	Acute Noncancer Hazard
Construction	0.00017	0.025	0.00003	0.00041
Threshold	*N/A*	*10*	*1.0*	*1.0*
Threshold Exceeded	**No**	**No**	**No**	**No**

1. Refer to Appendix A.
2. The maximum cancer risk would be experienced at the residences to south of the Project site along Cedar Street.

Results of this assessment indicate that the unmitigated maximum concentration of PM_{10} during construction would be 0.00017 $\mu g/m^3$ and resultant cancer risk of 0.025 in one million, which would not exceed the SCAQMD threshold of 10 in one million. Non-cancer hazards for diesel PM would be below SCAQMD threshold of 1.0, with a chronic hazard index computed at 0.00003 and an acute hazard index of 0.00041. Therefore, construction risk levels would be less than SCAQMD thresholds and impacts would be less than significant.

5.2 Operational Health Risk Analysis

Carcinogenic Risk

Vehicle DPM emissions were estimated using emission factors for PM_{10} generated with the EMFAC developed by CARB. Truck emissions were modeled with AERMOD to determine pollutant concentrations. As shown in Table 4: Operational Risk, the unmitigated calculated carcinogenic risk resulting from the Project is 0.88 per million, which would not exceed the SCAQMD threshold of 10 in one million residents. Therefore, the carcinogenic risk associated with the Project would be less than significant.

Table 4: Operational Risk

Exposure Scenario	Maximum Cancer Risk (Risk per Million)[1, 2]	Significance Threshold (Risk per Million)	Exceeds Significance Threshold?
Residents	0.88	10	No

1. Refer to Appendix A.
2. The maximum cancer risk would be experienced at the residences to the south of the Project site along Philadelphia Street based on worst-case exposure durations for the Project, 95th percentile breathing rates, and 30-year averaging time.

5.3 Non-Carcinogenic Hazards

The significance thresholds for TAC exposure also require an evaluation of non-cancer risk stated in terms of a hazard index. Non-cancer chronic impacts are calculated by dividing the annual average concentration by the REL for that substance. The REL is defined as the concentration at which no adverse non-cancer health effects are anticipated. The potential for acute non-cancer hazards is evaluated by comparing the maximum short-term exposure level to an acute REL. RELs are designed to protect sensitive individuals within the population. The calculation of acute non-cancer impacts is similar to the procedure for chronic non-cancer impacts.

Acute and chronic impacts are shown in Table 5: Chronic and Acute Hazards. An acute or chronic hazard index of 1.0 is considered individually significant. The hazard index is calculated by dividing the acute or chronic exposure by the reference exposure level. The highest maximum chronic and acute hazard index from the Project would be 0.0002 and 0.0013, respectively. Therefore, non-carcinogenic hazards are calculated to be within acceptable limits and a less than significant impact would occur.

Table 5: Chronic and Acute Hazards

Emissions Sources	Chronic Hazard	Acute Hazard
Operational Trucks	0.0002	0.0013
SCAQMD Threshold	*1.0*	*1.0*
Threshold Exceeded?	**No**	**No**

Refer to Appendix A: Modeling Data.

Conclusion

As described above, impacts related to cancer risk would be less than significant. Additionally, non-carcinogenic hazards are calculated to be within acceptable limits. It should be noted that the impacts assess the Project's incremental contribution to health risk impacts, consistent with the SCAQMD

guidance and methodology. The SCAQMD has not established separate cumulative thresholds and does not require combining impacts from cumulative projects. The SCAQMD considers projects that do not exceed the project-specific thresholds to generally not be cumulatively significant.[8] Therefore, impacts related to health risk from the Project would be less than significant.

Mitigation Measures: No mitigation is required.

Level of Significance: Less than significant impact.

Subject: **Phase I Environmental Site Assessment**
Northwest Corner of South Bon View Avenue and East Cedar Street
Ontario, California

Dear Mr. McKune:

Orion Environmental Inc., at the request of Panattoni Development Company, Inc. (Panattoni), has prepared this report documenting a Phase I Environmental Target Property Assessment for the approximately 7.5-acre property located at 21 through 52, 1906, 1914, 1930, 1944, and 1948 South Bon View Avenue (Assessor's Parcel Numbers 1050-441-05, 1050-441-09, 1050-441-11 through 1050-441-62, and 1050-441-73) in Ontario, California. We appreciate the opportunity to provide environmental services to Panattoni. If you have questions or comments regarding this report, please contact Steve Hash at 562/988-2755 or shash@orionenv.com.

Very truly yours,

ORION ENVIRONMENTAL INC.

Steve Hash, P.E.
Senior Project Engineer

Mike Purchase, P.E.
Vice President

EXECUTIVE SUMMARY

Orion Environmental Inc. (Orion), at the request of Panattoni Development Company, Inc. (Panattoni), performed a Phase I Environmental Target Property Assessment (ESA) and Tier 1 Vapor Encroachment Screening (VES) of the property located at 21 through 52, 1906, 1914, 1930, 1944, and 1948 South Bon View Avenue, Ontario, California (Target Property). The Target Property consists of multiple parcels with an area of approximately 7.5-acres identified by Assessor's Parcel Numbers (APN's) 1050-441-05, 1050-441-09, 1050-441-11 through 1050-441-62, and 1050-441-73. The Target Property is located in a developed area of Ontario predominantly characterized by industrial developments.

According to historical documentation, the Target Property was used for agricultural purposes from at least the 1930's until the 1980's. Historical operations at adjoining or nearby properties appear to have included orchards, but Orion did not identify any records indicating pesticide-intensive agricultural operations at the Target Property. The Target Property was partially developed in the 1980's and currently includes (1) two commercial condominiums with various commercial/industrial operations, (2) a metals fabrication operation, and (3) a single-family residence. The northern and northeastern portions of the Target Property have remained undeveloped.

Orion conducted this Phase I ESA in general accordance with the scope and limitations of ASTM *Standard Practice for ESAs* (E1527-13) unless otherwise noted. Similarly, the Vapor Screening Evaluation was conducted in accordance with ASTM's *Standard Guide for Vapor Encroachment Screening on a Property Involved in Real Estate Transactions* (E2600-15). The purpose of the Phase I ESA was to identify recognized environmental conditions (RECs) and vapor encroachment conditions (VECs) as defined in the aforementioned ASTM Standards. The ESA included a review of local regulatory agency files, review of State and federal regulatory databases, Target Property reconnaissance, and interviews with current employees at the Target Property.

Orion did not identify any RECs, historical RECs (HREC), controlled RECs (CRECs), or VECs during the Phase I ESA based on historical Target Property use, historical documentation, interviews, and Target Property reconnaissance. Orion observed an apparently fresh water-sand mixture on the paved ground surface of the Target Property near previously decommissioned metals polishing equipment that contained caked sand/mud. Orion

identified the presence of this mixture as a *de minimis* condition because of the potential presence of metals. Historical records indicated that hazardous materials and wastes were present at the Target Property including halogenated solvents, but no records identified a release of chemicals to the environment. Similarly, hazardous waste oil was observed in labeled drums on secondary containment during reconnaissance, although no leaks or staining were observed in the vicinity of the drums.

Based on information from the San Bernardino County Assessor's Office, the single-family residence at the Target Property was constructed in 1979, while the remaining industrial structures were built in the 1980's and 1990's. Asbestos and lead sampling of existing structures at 1944 and 1948 South Bon View Avenue were performed by others during December 2018. The results indicated that (1) non-friable asbestos was present in 50 percent of roofing material samples collected and (2) lead-based paint does not appear to be present in painted surfaces.

After completing this Phase I ESA, Orion recommends the following:

1. A hazardous materials survey should be performed prior to demolition of existing structures to further evaluate the potential presence of asbestos or lead at the Target Property.

2. Based on the historical use of halogenated solvents, petroleum hydrocarbons, and metals, a Soil Management Plan should be prepared for potential future site redevelopment activities.

3. Samples of the caked sand/mud and water-sand mixture should be collected and analyzed for metals to appropriately characterize and manage these materials before removal and offsite disposal.

The Executive Summary section of this report is only intended to represent a brief summary of findings and is not a detailed account of all the information documented in this report. The report should be reviewed in its entirety before drawing any final conclusions as to potential environmental conditions associated with the Target Property.

1.0 INTRODUCTION

Orion was retained by Panattoni to perform a Phase I ESA at the property located at 21 through 52, 1906, 1914, 1930, 1944, and 1948 South Bon View Avenue, Ontario, California (Target Property; Figures 1 and 2). The Target Property consists of multiple parcels with an area of approximately 7.5-acres identified by APNs 1050-441-05, 1050-441-09, 1050-441-11 through 1050-441-62, and 1050-441-73. The work was conducted in general accordance with Orion's proposal dated 3 March 2021 and approved by Panattoni on 7 April 2021. The following sections summarize the Phase I ESA objectives and scope of work including potential non-scope considerations.

1.1 Objectives

The objectives of the Phase I ESA were to evaluate whether the Target Property may have been impacted by releases of hazardous materials from past or present activities at the Target Property or adjacent and nearby properties, which are considered Recognized Environmental Conditions (RECs). ASTM Standard E1527-13 defines a REC as:

> ***REC:*** *"the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. De minimis conditions are not recognized environmental conditions."*

The term REC includes hazardous substances or petroleum products even under conditions in compliance with laws. The term is not intended to include *de minimis* conditions that generally do not pose a material risk of harm to public health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate government agencies. An example of *de minimis* conditions would include accidental leaks and spills associated with current Target Property operations.

In addition, the Phase I ESA was conducted to identify controlled or historical RECs (CRECs and HRECs, respectively) at the Target Property or surrounding properties. ASTM Standard E1527-13 defines CRECs and HRECs as the following:

> ***CREC:*** *"a recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the*

satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls)."

HREC: *"a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls)."*

Data gaps may have been identified during the Phase I ESA process and are discussed later in this report. ASTM Standard E1527-13 defines data gaps as:

Data Gap: *"a lack or inability to obtain information required by this practice despite good faith efforts by the environmental professional to gather such information. Data gaps may result from incompleteness in any of the activities required by this practice, including, but not limited to site reconnaissance (for example, an inability to conduct the site visit), and interviews (for example, an inability to interview the key site manager, regulatory officials, etc.).*

A Tier 1 Vapor Encroachment Screening (VES) was conducted to identify any Vapor Encroachment Conditions (VECs) present at the Target Property or resulting from adjacent or nearby properties. ASTM Standard E2600-15 defines VECs as *"the presence or likely presence of chemical of concern vapors in the vadose zone of the target property caused by the release of vapors from contaminated soil and/or groundwater on or near the target property as identified by Tier 1 or Tier 2 procedures."* Tier 1 Screening is conducted using information gathered during the Phase I ESA and is used to identify the presence of VECs at the Target Property. Tier 2 Screening is conducted if a VEC is identified by the Tier 1 Screening and would include numeric screening criteria to provide greater certainty to the existence of a VEC.

1.2 Scope of Work

To meet these objectives, Orion conducted the following scope of work in accordance with ASTM Standards E1527-13 and E2600-15 unless otherwise noted:

- ☐ Target Property and vicinity reconnaissance

- ☐ Interview(s) with Target Property owner representative(s)
- ☐ Review of historical information
- ☐ Review of State and federal environmental database information
- ☐ Preparation of this report.

1.3 ASTM Non-Scope Considerations

ASTM non-scope considerations are sometimes assessed concurrently with a Phase I ESA, but were not included in Orion's approved scope of work defined in the aforementioned proposal. Examples of non-scope considerations include:

- ☐ Asbestos-containing building materials
- ☐ Lead-based paint
- ☐ Lead in drinking water
- ☐ Radon
- ☐ Non-liquid polychlorinated biphenyls
- ☐ Regulatory compliance
- ☐ Diffuse anthropogenic pollution
- ☐ Biological agents
- ☐ Health and safety
- ☐ Industrial hygiene
- ☐ Indoor air quality
- ☐ Mold
- ☐ Cultural and historic resources
- ☐ Ecological resources
- ☐ Endangered species
- ☐ Wetlands

2.0 SOURCES OF INFORMATION

Orion used various sources of information to perform the Phase I ESA for the Target Property. Historical documentation was obtained through Environmental Risk Information Services (ERIS), of Toronto, Ontario, Canada. ERIS searched databases for historical Sanborn maps, city directories, topographic maps, aerial photographs, water well records, and regulatory records using the search radii defined in ASTM Standards E1527-13 and E2600-15. To evaluate the potential presence of oil and natural gas wells, Orion reviewed the California Department of Conservation Division of Oil, Gas, and Geothermal Resources (DOGGR) online database. Similarly, Orion reviewed the California Department of Water Resources (DWR) online database of well completion reports. Orion also contacted the following agencies to request records related to the Target Property:

- City of Ontario Fire Department
- City of Ontario Building Department
- City of Ontario Public Works Department
- San Bernardino County Fire Protection District (Fire Department)
- San Bernardino County Environmental Health Services
- San Bernardino County Assessor's Office.

In addition, Panattoni provided Orion with a copy of a Phase I ESA conducted for 1944 and 1948 South Bon View Avenue dated 26 November 2018. The Phase I ESA was prepared by Robin Environmental Management (REM) of San Dimas, California, on behalf of HK Ventures, Inc., UTR Diversified I, LLC, and UTR 1948 Bon View, LLC, of Brea, California (REM, 2018). Orion reviewed the Phase I ESA prepared by REM and incorporated findings into this report with references, as needed. No RECs were identified by REM as part of their Phase I ESA. Orion also reviewed a copy of an asbestos and lead survey report prepared for 1944 and 1948 South Bon View by Ambient Environmental, Inc. (Ambient), in December 2020 (Ambient, 2020).

Target Property reconnaissance was performed to observe for current land use conditions and physical indications of possible usage, storage, spillage, or dumping of hazardous, toxic, or petroleum substances on Target Property and, when possible, on adjacent properties. Historical documentation was compiled from the State and federal databases defined in ASTM Standards E1527-13 and E2600-15 (Appendix A). The results of historical

database searches and agency correspondence are summarized in Section 5 of this Phase I ESA report, while ERIS's database report is in Appendix B.

3.0 SITE DESCRIPTION

The following sections summarize the Target Property location and vicinity, physical setting, geology and hydrogeology, and nearby water and oil and gas wells.

3.1 Target Property Location and Vicinity

The Target Property is located at the northwest corner of South Bon View Avenue and East Cedar Street, Ontario, California, in an area predominantly characterized by mixed-use commercial and industrial properties (Figure 2). The Target Property consists of multiple parcels with an area of approximately 7.5-acres identified by APNs 1050-441-05, 1050-441-09, 1050-441-11 through 1050-441-62, and 1050-441-73. Based on information provided by Panattoni, a total of 13 entities own portions of the Target Property, which has been developed to include a commercial condominium with various commercial/industrial operations (1914 and 1930 South Bon View Avenue); metals fabrication company JLMC Inc. Custom Metals Fabricators (JLMC; 1944 South Bon View Avenue); and a single-family residence (1948 South Bon View Avenue). Remaining portions of the Target Property are undeveloped. The Target Property is adjoined by commercial/industrial properties to the north, south, and west and South Bon View Avenue to the east (Figure 2). The following table summarizes adjoining properties and properties in the immediate vicinity of the Target Property.

Direction Relative to Target Property	Address	Parcel Number	Current Land Use
North	1856 S. Bon View Ave.	1050-431-26	Industrial
East	1915 S. Bon View Ave.	1050-451-04	Industrial
East	1945 S. Bon View Ave.	1050-451-03	Industrial
East-Southeast	901 E. Cedar St.	1050-451-07	Industrial
South	1954 & 1958 S. Bon View Ave.	1050-441-04	Industrial
West-Southwest	799 E. Cedar St.	1050-441-72	Industrial
West	1999 S. Campus Ave.	1050-441-68	Industrial
West	1939 S. Campus Ave.	1050-441-65	Industrial
West	780 E. Francis St.	1050-431-17	Industrial

3.2 Physical Setting

The average elevation of the Target Property is approximately 870 feet above mean sea level with the Target Property topography sloping downward towards the south-southeast based on U.S. Geological Survey (USGS) 7.5- and 15-minute topographic maps and Target Property reconnaissance. Outside of the existing buildings, the developed portion of the Target Property is predominantly covered in asphalt with grass and planters along the eastern property boundaries. The undeveloped portions of the Target Property at 21 through 52 and 1906 South Bon View Avenue (APNs 1050-441-31 through 1050-441-62 and 1050-441-09) are unpaved and predominantly grass. Surface and storm water are directed to two municipal drains near the eastern and southeastern boundaries of 1930 South Bon View Avenue.

3.3 Target Property Geology and Hydrogeology

USGS sources indicate that the Target Property is primarily underlain by Pliocene- to Holocene-aged quaternary alluvium and marine deposits. According to the Soil Survey Geographic database, the Target Property is underlain by Tujunga loamy sand, which is classified as Class A soils with high water transmission and low runoff potential when thoroughly wet. Based in subsurface investigations conducted at properties within the Phase I ESA search radius, shallow soils have been classified as silty sands and well- and poorly-graded sands to a maximum depth explored of 80 feet below ground surface (bgs; Clayton Group Services, Inc., 2006).

The Target Property is located within the South Coast Hydrologic Region, Upper Santa Ana Valley Basin, Chino Subbasin No. 8-002.01 (California Department of Water Resources, 2003). Groundwater within the subbasin is reported to drain southward toward the Santa Ana River. Based on subsurface investigations conducted at a property approximately 1.2 miles north of the Target Property, shallow groundwater in the area generally flows to the south-southwest with a depth to groundwater estimated as greater than 300 feet bgs (Geosyntec Consultants, 2021). For the purposes of the Phase I ESA, Orion assumed the groundwater flow direction beneath the Target Property as southwest.

3.4 Nearby Water and Oil and Gas Wells

A total of 5 federal USGS wells and 78 well completion records were identified within 1 mile of the Target Property in historical records. Two records were identified in Public Water Systems Violations (PWSV) and Enforcement Data and Safe Drinking Water Information System (EDSDWIS) databases for Public Water System (PWS) No. CA3610034, which is part of the Ontario Municipal Utilities Company. The PWSV and EDSDWIS records were associated with 1425 South Bon View Avenue, which is the location of an Ontario Parks Department facility based on public mapping tools. Based on Geotracker, State Water Well No. 3610034-029 is also located at 1425 South Bon View Avenue and screened from 300 to 330 feet bgs and 342 to 368 feet bgs. During the 2014 sampling event, the contaminant of concern 1,2,3-tricloropropane was detected at a concentration equal to the California maximum contaminant level (MCL) of 0.005 micrograms per liter. Remaining contaminants of concern (i.e., benzene, tetrachloroethane, trichloroethene, etc.) were either below detection limits or MCLs. The closest federal USGS monitoring location was listed as approximately 0.5-mile east-northeast of the Target Property and listed as a storm sewer drain. Remaining water wells are greater than 0.5 mile from the Target Property and are not considered a concern for the purposes of this Phase I ESA. Based on online DOGGR records, the Target Property is not within the administrative boundary of an oil field and no oil and gas wells were identified within 1 mile of the Target Property.

4.0 SITE RECONNAISSANCE AND INTERVIEWS

4.1 Target Property Reconnaissance Methodology and Observations

On 13 April 2021, Orion personnel conducted reconnaissance of the Target Property under the supervision of Mr. Larry Ramoneda of RamCo Sheet Metal and Jose Monge of JLMC. The Target Property was observed for current land use conditions and physical indications of possible usage, storage, spillage, or dumping of hazardous substances or petroleum products on Target Property and, when possible, on adjacent properties.

Orion did not observe underground storage tanks (USTs); polychlorinated bi-phenyl (PCB)-containing equipment; active, inactive, or abandoned wells; floor drains, sumps, and drywells; odors; septic systems or cesspools; pools of liquid; pits, ponds, or lagoons; signs of stressed vegetation; or other petroleum product transmission/storage during reconnaissance. The following sections summarize Target Property reconnaissance observations with photographs in Appendix D.

4.1.1 Building Interior and Exterior

Based on information from the San Bernardino County Assessor's Office, the single-family residence at the Target Property was constructed in 1979, while the remaining industrial structures were built in the 1980's and 1990's. The following sections summarize the results of Orion's site reconnaissance and interviews as well as Orion's review of previous asbestos and lead sampling performed at portions of the Target Property by others.

The existing commercial condominium buildings at 1914 and 1930 South Bon View Avenue (Buildings 1 and 2) are accessible by two paved driveways on the east sides of the property (Figure 2). Both driveways slope southeast away from the buildings and surrounding paved areas. The buildings are surrounded by paved areas that include vehicle parking and pedestrian walkways. Each building contains 10 individual units with offices, restrooms, and a garage for each unit (total of 20 units). The first and second stories of the northwest portion of the buildings contain office spaces and janitorial supply closets. Orion noted the tenants currently occupying each unit when this information was readily available based on signage. The following table summarizes the use of each unit and equipment stored at each location:

Unit Number	Operation *(Tenant)*	Equipment/Chemicals Stored
1	X-Ray Photography *(Netshapes)*	X-Ray photography equipment and film development chemicals
2 and 3	Metals Machine Shop *(Materials Testing Lab)*	Fabrication equipment and oil/lubricant
4, 13, 14, 17 and 19	Car Storage *(Larry Ramoneda)*	Vintage cars, hydraulic lifts, small quantities of paint thinner, motor oils, and paints
5	Car Restoration *(Unknown)*	Hydraulic lift, motor oil, hydraulic lubricant, and small quantities of solvents
6	Landscaping *(Unknown)*	One truck and trailer with landscaping/land mowing equipment and two 5-gallon polyethylene fuel canisters
7	Car Repair *(Unknown)*	Parts cleaner, motor oil, alkaline solvent solution, and hydraulic lift
8	Acoustic Paneling *(SoCal Acoustical)*	Wood and foam
9	Office Supplies Sales *(AEG Solutions)*	Paper/office supply products
10	Car Repair *(Unknown)*	Car storage, motor oil, acetone, and paint thinner
11	Furniture Painting *(JC Vintage Furniture)*	Paints and solvents for furniture restoration
12 and 20	Vehicle Parts Manufacturing *(Atlas Truck Parts & Tarps)*	Parts cleaner, sand blaster, hydraulic equipment and parts storage, air compressor, alkaline solvent solution, and compressed gases
15	Metals Fabrication *(RamCo Sheet Metal)*	Sheet metal fabrication equipment
16	Utility Planning *(J's Pipeline Construction)*	Standard offices equipment and supplies
18	Ice Cream Vendor *(Unknown)*	Ice cream carts and freezers

The property at 1944/1948 South Bon View Avenue (1050-441-05) consists of an industrial development operated by JLMC and a single-family residence at the eastern property boundary. The property is accessible by one gated and paved driveway on the east. The driveway slopes southeast towards Bon View Avenue and away from industrial portions of the property. The property is surrounded by paved areas that include vehicle parking with the exception of the residence, which is surrounded by landscaping. The industrial development consists of four structures used for metals fabrication (Buildings 3 and 4), office administration (Building 5), and garage storage (Building 6; Figure 2). The single-family residence is occupied and shares the garage storage space with JLMC. The interior and exterior of the residence were briefly observed and no obvious signs of contamination were present.

JLMC manufactures metal bins and stores propane tanks, compressed gases, and scrap metal roll off bins on the exterior of Building 3, which is a 3-sided roofed structure. Building 3

contains welding bays and fabrication machinery all of which appeared to be in good condition. No hoods were observed over any of the equipment. Building 4 contained sheet metal and metal parts storage areas as well as a water jet polishing unit. Orion observed a water-sand mixture on the asphalt ground surface near an area that reportedly contained an old water-jet polishing unit that was previously removed. The water-sand mixture led back to what appeared to be a metal containment pad for the old water jet polishing unit that contained an approximately 6-inch-thick layer of caked sand/mud. Immediately beyond this pad to the south was cracked pavement with patches of weedy grass and vines. Mr. Monge of JLMC indicated that the old equipment was removed and replaced 5 years ago and metals from any polishing or sanding were contained inside the equipment and are not in the observed caked sand/mud. The caked material reportedly has not been removed yet because it's biodegradable, although Orion has not confirmed the composition of these material as of this Phase I ESA report. The replacement water jet appeared to be in good condition and no staining or liquids observed in that area. While the presence of the apparently fresh water-sand mixture on the ground is noteworthy as the liquid may contain levels of metals, Orion considers this a *de minimis* finding for the Target Property because the issue appeared isolated and in a paved portion of the property. Additional information regarding chemicals and materials usage and wastes at JLMC are in Sections 4.1.3 and 4.1.4.

As discussed in Section 3.2, undeveloped portions of the Target Property at 21 through 52 and 1906 South Bon View Avenue (APNs 1050-441-31 through 1050-441-62 and 1050-441-09) are unpaved and predominantly grass. Orion walked the perimeter and transected the undeveloped area not identify any staining, distressed vegetation, or other indications of contamination. Municipal trash was observed in localized areas near South Bon View Avenue.

4.1.2 Utilities

Orion observed evidence of aboveground and underground municipal utilities throughout the Target Property. The City of Ontario provides potable water and sewer services for the Target Property, while electricity and natural gas are provided by Southern California Edison and the Southern California Gas Company, respectively. Additional utilities observed included fire alarms, landscape irrigation, streetlights, landline telephone, and fire suppression lines. As discussed in Section 3.2, surface and storm water are directed to two

municipal drains near the eastern and southeastern boundaries of 1930 South Bon View Avenue.

4.1.3 Chemicals and Materials Usage

Orion did not observe evidence of any USTs at the Target Property during reconnaissance, while aboveground storage tanks (ASTs) were limited to compressed gas tanks and cylinders. An area on the southern exterior of Building No. 3 of JLMC is designated for compressed gases including nitrogen, carbon dioxide, argon, and propane. The compressed gases are used to operate welding, fabrication equipment, and forklifts. One unlabeled empty 55-gallon drum and two empty canisters of acetone

Various cleaning solutions used for general housekeeping were observed in bathrooms and offices through the properties. Various paints, solvents, and oils were observed in multiple units on the 1914 and 1930 properties as well as on the 1944 property. In general, areas where paints, solvents, and oils were stored were in good condition with no observed staining or spills.

Orion observed two parts cleaning stations with self-contained reservoirs for an alkaline solvent solution in Unit Nos. 7 and 12 and the equipment appeared to be in good condition. The parts cleaning equipment in Unit No. 7 is mounted directly to a storage drum. The tenant at Unit No. 12 indicated their storage drum-mounted equipment is maintained by the third-party manufacturer including periodic replacement of the alkaline solution. No spills of the alkaline solution were reported during Target Property reconnaissance or in historical documentation.

4.1.4 Wastes

Orion observed a roofed waste storage area inside Building 3 of JLMC (Figure 2). The storage area contained one secondary containment pallet with four 55-gallon drums at the time of Target Property reconnaissance. The drums and containment pallet appeared to be in good condition and were labeled as containing non-Resource Conservation and Recovery Act (RCRA) hazardous waste oil.

Trash and metals recycling were observed outside of the commercial industrial units and the JLMC building to the west and south and included wooden pallets, cardboard boxes, and metal scraps. Metal scraps were observed in containers outside of the JLMC buildings

and the scraps did not appear oily. Orion did not observe oil or oil staining around the dumpsters. At the time of Target Property reconnaissance, all dumpsters were open with no covers or padlocks. The dumpsters appeared to be in good condition, but did not appear to be equipped with secondary containment.

4.1.5 Adjacent Properties

As summarized in Section 3.1, the Target Property is surrounded by commercial/industrial properties to the north, east, and west and with residential properties to the south across East Cedar Street. Based on observations from South Bon View Avenue, Orion did not identify land use conditions and physical indications of possible usage, storage, spillage, or dumping of hazardous, toxic, or petroleum substances at nearby properties. Orion did not attempt to enter nearby properties as they are private. Orion did not identify any RECs associated with nearby properties based on Target Property reconnaissance.

4.2 Interviews

As discussed in Section 4.1, Orion completed reconnaissance of the Target Property on 12 April 2021 under the supervision of Mr. Larry Ramoneda of RamCo Sheet Metal and Jose Monge of JLMC. Mr. Ramoneda has reportedly been a tenant or owner at the Target Property for 25 years, while Mr. Monge's employment tenure at JLMC is unknown. Mr. Ramoneda and Mr. Monge were unaware of any current or historical cases of environmental contamination that required agency directive actions.

5.0 RECORDS REVIEW

Orion requested historical regulatory and property information for the Target Property through ERIS as summarized in Section 2.0. Orion reviewed the compiled documents and the results are summarized in the sections below.

5.1 Sanborn Map Review

Sanborn fire insurance maps are available for 12,000 communities in the U.S. from 1867 to present. Sanborn maps were initially produced for the insurance industry to provide fire risk information for buildings or other structures. According to ERIS, no Sanborn maps are available for the Target Property as the area is reportedly unmapped.

5.2 Historical Aerial Photography Review

Orion reviewed a total of 16 historical aerial photographs taken between 1935 and 2020. Observations regarding the Target Property history based on the photographs are summarized below.

Year	Notes
1935	The Target Property and surrounding areas appear as agricultural areas. The Target Property appears to be divided into two distinct parcels, each largely agricultural with a building located along the eastern boundary. Adjoining properties to the south, southeast, and northwest appear to be occupied by orchards.
1938	The Target Property and surrounding areas remain relatively unchanged from the previous description.
1946	Some orchards at surrounding properties appear to have been replaced with crops.
1952	Structures appear to have been erected at surrounding properties to the east, northeast, and south. The Target Property and surrounding areas remain agricultural.
1960	The northern adjoining property has been converted to an orchard. Additional structures have been erected at the adjoining property to the south. Nearby properties to the northwest have been developed and now comprise residential neighborhoods. Properties south and southeast of the Target Property have been developed to comprise residences or agricultural facilities.
1966	Properties west of the Target Property have been developed and now comprise residential neighborhoods.
1976	Properties north and northeast of the Target Property have been developed and now comprise large warehouses. The Target Property and adjoining properties remain agricultural.
1980	Properties south and southwest of the Target Property have been developed and now comprise residential neighborhoods. A large warehouse facility appears in the southern portion of the Target Property, which otherwise remains largely undeveloped.

Year	Notes
1985	Two additional warehouse facilities have been erected at the Target Property. Properties south of the Target Property have been developed to comprise additional residences. Nearby properties north of the Target Property have been developed to comprise large industrial facilities.
1994	Northern and northeastern adjoining properties have been developed and now comprise large industrial facilities. Orchards are no longer present in the Target Property vicinity.
2002	Surrounding properties to the east have been developed.
2005, 2010, 2012, 2018, and 2020	The Target Property and surrounding areas remain generally unchanged from the previous description.

Based on review of aerial photographs, the Target Property and adjoining properties were previously used as agricultural land from at least the 1930's and remained generally undeveloped until the 1980's. Historical agricultural operations likely included the use of agricultural chemicals (e.g., pesticides, herbicides, and fertilizers). Orchards were observed at surrounding properties until the early 1908's. However, Orion did not observe any signs of pesticide production. Orion does not consider historical agricultural use a REC without additional lines of evidence regarding potential historical pesticide production or application.

5.3 Historical Topographic Map Review

Orion reviewed a total of 11 7.5- and 15-minute USGS topographic maps of the area dating from 1897 to 2015 (Appendix B). Orion did not identify any RECs as a result of the historical topographic map review. Observations regarding the Target Property history based on topographic maps are summarized in the table below.

Year	Notes
1897, 1900, 1903	The Target Property area is located in the Santa Ana Del Chino land grant. The Target Property is located south of the Pacific Railroad and east of the Narrow Gauge Railroad and the Chino Branch of the Pacific Railroad.
1933, 1942	The Target Property area is located on Bon View Avenue, between East Francis and East Ely Streets. The Narrow Gauge Railroad is no longer depicted. Gas tanks are shown approximately 1.1 miles north of the Target Property. Additional unspecified tanks are shown approximately 0.9 mile west of the Target Property.
1954	Three schools (Grove School, Euclid School, and Cypress School) are shown within 1.5 miles of the Target Property. A sewage disposal facility is shown approximately 0.7-mile northwest of the Target Property. The Ontario International Airport is shown approximately 1.7 miles northeast of the Target Property. Unspecified wells are shown approximately 1.2 miles southeast of the Target Property. Increased developments are shown northwest of the Target Property.

Year	Notes
1967	An aqueduct is shown approximately 0.9-mile southwest of the Target Property. Four additional schools (Ontario Christian High School, Sultana School, De Anza Junior High School, and Bon View School) are shown within approximately 0.6-mile of the Target Property.
1973	California State Route 60 is shown approximately 0.5-mile south of the Target Property. The Narrow Gauge Railroad is no longer shown. This is consistent in all maps after this date.
1981	Increased developments are shown to the west and south of the Target Property. A water tank is shown approximately 0.3-mile east of the Target Property.
2015	Euclid Avenue, located approximately 0.7-mile west of the Target Property, is shown as California State Route 80. Increased developments are shown to the south of the Target Property.

5.4 City Directory Review

Orion reviewed historical City directory listings for the Target Property and adjacent properties based on registries from 1926 to 2018. None of the addresses associated with the Target Property was not listed in the registries until 1931 when two occupants were identified as a poultry farm and a private individual. Commercial and industrial businesses were first listed at Target Property addresses beginning in 1988. The properties associated with 21 through 52 South Bon View Avenue were not listed in any of the city directories reviewed as part of this Phase I ESA. The following table summarizes registered owners and/or occupants for surrounding properties.

City Directory Listings for Surrounding Properties					
Address[a]	**Direction Relative to Target Property**	**Groundwater Gradient**	**Distance from Target Property (miles)**	**Years**	**Registered Owners/Occupants[b]**
Target Property					
1906 S. Bon View Avenue	N/A[c]	N/A	N/A	1965 – 2001	Individual

(a) All addresses are in the City of Ontario unless noted otherwise.
(b) Abbreviations and company descriptions are written as described in the city directories and company websites.
(c) N/A – not applicable.

Surrounding properties on East Cedar Street were not listed under their present-day addresses in the City directory prior to 2001. Upgradient addresses along South Bon View Avenue are predominantly commercial and industrial facilities. Addresses immediately south of the Target Property along East Cedar Street appear to be private residences, with commercial and industrial facilities located to the southeast and southwest, which is consistent with observations made during site reconnaissance. Orion did not identify any RECs as a result of the City directory review.

5.5 Database Review

ERIS identified 64 properties within ASTM-defined search radii in agency records. A complete list of these properties and records is in Table 1. Properties within the search area that contained records related to historical or current environmental impacts, hazardous wastes, or regulatory violations are discussed in more detail and are summarized in the table below. The locations of properties discussed in detail in Section 5.5 are also shown on

Figure 3. Select properties are unlikely to pose environmental risks to the Target Property based on various conditions (i.e., distance from Target Property, groundwater flow direction, and absence of reported environmental regulatory violations) are not discussed in detail in this section. No unplottable records were identified by ERIS within 1 mile of the Target Property.

(a) All addresses are in the City of Ontario unless noted.
(b) Database abbreviations are defined as follows:
CERS HAZ – California Environmental Reporting System (CERS) Hazardous Waste Sites
CERS TANK – CERS Tanks
CERCLIS – Comprehensive Environmental Response, Compensation, and Liability Information System
ENVIROSTOR – California EnviroStor Data Management System list of corrective action sites, tiered permit sites, historical Target sites, and evaluation/investigation sites
HAZNET – Hazardous Waste Manifest Data
HHSS – Historical Hazardous Substance Storage Information Database
INS COMP ENF – ENVIROSTOR Inspection, Compliance, and Enforcement
LUST – Leaking Underground Storage Tank
PCB – PCB Notifiers
RCRA SQG – RCRA Small Quantity Generator (SQG)

SANBERN CUPA – San Bernardino County Certified Unified Program Agency (CUPA)
UST SWEEPS – UST Statewide Environmental Evaluation and Planning System
(c) "--" – Not applicable.

Orion identified five closed LUST cases between 0.5- and 1.0-mile upgradient to cross gradient of the Target Property. Each case involved potential petroleum contamination of soil and was closed between 1986 and 2000. ASTM Standard E127-13 defines the minimum search radius for State leaking storage tank lists as 0.5 mile. Orion did not identify any historical or current LUST cases within this search radius. Based on case closure and relative distance to the Target Property, Orion does not consider these upgradient closed LUST cases a REC for the Target Property.

5.5.1 1914 and 1930 South Bon View Avenue (Target Property)

Two commercial condominiums are located at 1914 and 1930 South Bon View Avenue that each consist of 10 individual units (total of 20 units) with various commercial/industrial operations. Historical records related to hazardous materials and wastes at this portion of the Target Property are summarized below.

- *Larry Ramoneda*: As discussed in Section 4.2, Mr. Larry Ramoneda of RamCo Sheet Metal has reportedly been a tenant or owner at the Target Property for 25 years. A record from the HAZNET database indicated that Mr. Ramoneda obtained a hazardous waste identified number in 2008 that became inactive on 11 January 2009. While a unit number was not specified in the HAZNET record, Mr. Ramoneda owns Unit Nos. 4, 13, 14, 15, 17, and 19 of the commercial condominium and RamCo Sheet Metal currently occupies Unit No. 15. As discussed in Section 4.1.1, Orion observed small quantities of solvents, motor oils, and paints in Mr. Ramoneda's units. Mr. Ramoneda indicated that waste oils are brought to retail automotive parts stores for recycling during reconnaissance.

- *ABS Global Inc.*: Permitted facility with the SANBERN CUPA that reportedly contained 1 to 3 hazardous materials specified as special chemicals. The facility permit became inactive on 28 February 2016. This record was reported for "Unit 3" of 1914 South Bon View Avenue. Currently, Unit No. 3 of the Target Property contains a metals machine shop. Orion observed oils and lubricants in Unit No. 3 during site reconnaissance, but no hazardous materials or wastes were observed or reported.

- *Nova Men Auto Repair*: Permitted facility with the SANBERN CUPA that was reportedly a special generator of hazardous wastes. A record from the HAZNET database reported that this entity disposed of approximately 5 tons

of oil-water separation sludge in 2002. The facility special generator permit became inactive on 31 August 2007. This record was reported for "No. 4" of 1914 South Bon View Avenue, which is currently owned by Mr. Ramoneda and used for car storage.

- *Multi Tech Products*: Permitted facility with the SANBERN CUPA that was reportedly handled hazardous materials. The facility permit became inactive on 31 March 2006. This record was reported for "Unit 12" of 1914 South Bon View Avenue, which is currently occupied by Atlas Tarps & Parts, Inc. (Atlas), a manufacturer of vehicle tarp systems.

- *Column Engineering*: Permitted facility with the SANBERN CUPA that was reportedly a conditionally-exempt small quantity generator (CESQG) of hazardous wastes. Column Engineering intermittently disposed of halogenated solvents between 1996 and 2008 with the largest volume (approximately 0.46 ton) reported in 2001. The facility CESQG permit became inactive on 31 July 2019. This record was reported for "20" of 1914 South Bon View Avenue, which is currently occupied by Atlas.

- *Quality Offset Printers*: Permitted facility with the SANBERN CUPA that was reportedly a CESQG of hazardous wastes. Quality Offset Printers intermittently disposed of liquids with halogenated organics between 2000 and 2008 with the largest volume (approximately 0.08 ton) reported in 2001. This record was reported for "No. 14" of 1914 South Bon View Avenue, which is currently owned by Mr. Ramoneda and used for car storage.

While it is noteworthy that this portion of the Target Property consisted of operations that handled or disposed of hazardous wastes, Orion did not observe or identify records indicating a release to the environment has occurred at 1914 South Bon View Avenue and does not consider the historical records summarized above a concern for the Target Property.

5.5.2 1944 South Bon View Avenue (Target Property)

JLMC currently occupies 1944 South Bon View Avenue with operations focusing on sheet metal fabrication. JLMC is currently a permitted facility with the SANBERN CUPA and reportedly a CESQG of hazardous wastes. JLMC disposed of approximately 0.6 ton of unspecified organic liquid mixture during 1997 and approximately 0.3 ton of organic solids in 2003. The Fire Department inspects JLMC and no violations were identified in Orion's Phase I ESA records review, although REM indicated that manifests were not available for review during a 2018 inspection event (REM, 2018). As discussed in Sections 4.1.3 and

4.1.4, Orion observed four 55-gallon drums of non-RCRA hazardous waste oil on secondary containment in Building 3 and compressed gases and empty acetone containers on the exterior of Building 3 during reconnaissance, but no signs of leaks, spills, or surface staining in these areas (Figure 2).

Based on the Phase I ESA report prepared by REM, Flo-Bin Rentals started leasing the western portion of 1944 South Bon View Avenue for storage in 2016. As reported by REM, Flo-Bin Rentals disposed of 0.25 and 2.04 tons of organic solids in 2016 and 2017, respectively (REM, 2018). Based on Orion's records review, the HAZNET database contained a record for Flo-Bin Rentals, but the record did not contain any details regarding hazardous waste disposal. Orion does not consider historical records associated with 1944 South Bon View Avenue a concern for the Target Property considering the absence of documented releases to the environment.

5.5.3 R&I Industries, Inc.

(0.04-mile upgradient/cross gradient)

The R & I Industries, Inc. (R&I Industries), property is currently a permitted facility with the SANBERN CUPA and reportedly a CESQG of hazardous wastes. R & I Industries is a metals fabricator that offers laser cutting, waterjet cutting, shearing, forming with press brakes, folding, tube bending, CNC turret punching, and welding based on their website (https://rimetal.com). Violations relating to hazardous waste storage were identified for 2016 and 2020 in CERS HAZ including improper labeling of storage drums and deficiencies in facility documentation. However, the facility returned to compliance for each documented violation. No inspection documentation was available after 2020. Orion did not identify any records related to a release to the environment and does not consider this property a concern or REC for the Target Property.

5.5.4 Greenline Laboratories, Inc.

(0.047-mile upgradient/cross gradient)

The Greenline Laboratories, Inc. (Greenline), property is currently a permitted facility with the SANBERN CUPA that contains hazardous materials. Greenline is a manufacturer of industrial, sanitary, food service, and specialty products according to their website (https://greenlinelabs.com). Based on the CERS HAZ database, Greenline was issued violations for deficient facility documentation in 2015 and 2018, but returned to

compliance for each documented violation. No inspection documentation was available after 2018. Orion did not identify any records related to a release to the environment and does not consider this property a concern or REC for the Target Property.

5.5.5 Sky Systems Co., Inc.

(0.075-mile cross gradient)

The Sky Systems Co., Inc. (Sky Systems), property is currently a permitted facility with the SANBERN CUPA that contains hazardous materials. Sky Systems specializes in bag-in-box packaging systems with general and foamy soaps and a variety of other sanitary products based on their website (https://www.skysystemscoinc.com/). Based on the CERS HAZ database, Greenline was issued violations for deficient facility documentation in 2016 and 2019, but returned to compliance for each documented violation. No inspection documentation was available after 2019. Orion did not identify any records related to a release to the environment and does not consider this property a concern or REC for the Target Property.

5.5.6 Tom Guilfoyle – 840 E. Francis Street

(0.12-mile upgradient/cross gradient)

The property at 840 E. Francis Street contained a 500-gallon UST that reportedly contained vehicle fuel. The UST was removed in 1991 based on the UST SWEEPS database. Orion did not identify any other records related to this UST including the conditions of the tank or subsurface upon removal. While it is noteworthy that this property historically contained a fuel tank, Orion does not consider this property a concern or REC for the Target Property without documentation related to a potential release of field products to the subsurface.

5.5.7 Riviera Tube Bending & Mfg. Co.

(0.12-mile cross gradient)

The Riviera Tube Bending & Mfg. Co. (Riviera Tube) property was permitted with SANBERN CUPA as a handler and generator or hazardous wastes until 31 August 2005. Based on Orion's records review, Riviera Tube was as small-quantity generator of benzene, tetrachloroethylene, trichloroethylene, and ignitable wastes. While the presence of these chemicals in close proximity to the Target Property is noteworthy, Orion did not identify any records related to a release to the environment and does not consider this property a concern or REC for the Target Property.

5.5.8 Lighting Resources, LLC

(0.15- to 0.17-mile upgradient/cross gradient)

The Lighting Resources, LLC (Lighting Resources), property is separated from the Target Property to the north by a commercial development and E. Francis Street. Lighting Resources handles lighting waste, mercury-containing devices, and intact PCB-containing lighting ballasts and operates under a Standardized Hazardous Waste Facility Permit, Series A (Permit). Lighting Resources stores and crushes spent lamps and stores PCB containing light ballasts. End caps are collected and transported offsite for further recycling, while crushed glass and any mercury-containing powder is collected and transported offsite for recycling as a hazardous waste (Department of Toxic Substances Control [DTSC], 2020). Lighting Resources has a documented history of violations including failing to manage containers properly and maintain and operate permitted equipment to minimize the possibility of releasing mercury-containing phosphor powder because of a leakage in 2013. This violation resulted in a Consent Order and financial penalty.

More recently, the DTSC issued a violation in 2020 based on observations of white powder on lamp crushing equipment (Lamp Machine), the floor beneath, and the roof of the building where the equipment vents. The Lamp Machine uses a remanufacturing process to crush the outer glass of fluorescent lamps and separate the glass, metal end caps, and mercury-containing phosphor powder. The remanufacturing process utilizes an enclosed machine with vacuum system. The vacuum system connects to a High-Efficiency Particulate Air (HEPA) filtration system and an activated carbon canister, which absorbs mercury vapor before discharging to the atmosphere. The vacuum system maintains a negative pressure to prevent phosphor dust and mercury vapor from leaking and contaminating the surrounding breathing space. Under the approved Permit, Lighting Resources is required to monitor mercury vapor every 2 hours and collect periodic grab samples of crushed glass for laboratory analysis of mercury (DTSC, 2020).

DTSC conducted a facility inspection during June 2019 and observed white powders on the reportedly poorly sealed floor near the Lamp Machine. Wipe samples collected from the floor underneath the Lamp Machine contained a mercury concentration of 3.4 micrograms per wipe, which is greater than the regulatory limit. Similarly, the results of "sweep" samples showed mercury concentrations of 0.662 milligrams per kilogram. A previous inspection

was cited where DTSC indicated mercury levels in a room next to the Lamp Machine were unsafe and warranted donning a mask. Lighting Resources reportedly committed to retaining a licensed engineer to design a "secondary containment system" and committed to re-sealing the floor of their warehouse with an epoxy coating (DTSC, 2020). During March 2021, Lighting Resources was issued three Class 2, minor violations for improper storage and labeling of universal wastes, but these violations were listed as returned to compliance in the summary of inspection observations (DTSC, 2021). It should be noted that Orion did not observe white power at the Target Property during reconnaissance. While the potential release of mercury to the environment through emissions is noteworthy, Orion does not consider the Lighting Resources property a REC for the Target Property without additional lines of evidence indicating widespread and sustained discharge of mercury-containing emissions from this facility.

5.5.9 Warfield Electric Co., Inc.

(0.17-mile upgradient)

The Warfield Electric Co., Inc. (Warfield Electric), is a motor and motor component manufacturer. The property was identified as a Small Quantity Generator (SQG) in RCRA SQG under U.S. Environmental Protection Agency (EPA) federal identification number CAR000072769. According to the RCRA SQG database, Warfield Electric is a SQG of tetrachloroethylene (PCE). As a chlorinated volatile organic compound (VOC), PCE is a drinking water contaminant that can be highly mobile in groundwater and is not readily degraded by naturally occurring processes. However, as of January 2021 there have been no Compliance Monitoring or Enforcement violation records associated with the Warfield Electric facility. Although the upgradient presence of PCE should be noted, Orion does not consider the property to be a REC to the Target Property based on the lack of evidence suggesting the occurrence or likely occurrence of a release of hazardous materials at the Warfield Electric facility.

5.5.10 Allied Mechanical Products

(0.22-mile upgradient)

The Allied Mechanical Products facility fabricates and manufactures aerospace components and machinery. This facility appears in both the CERS TANK and SANBERN CUPA databases as an active large quantity generator, onsite waste-generating recycler, and hazardous materials storage facility with at least one reported onsite AST. According to the

CERS TANK database, the property has been cited for various violations between 2013 and 2020 relating to the improper labeling, storage, and documentation of hazardous materials, including mislabeling drums containing hazardous wastes as "Nonhazardous" and leaving containers of hazardous waste open when not in use. All violations have been resolved and returned to compliance. Although violations involving hazardous waste storage at an upgradient property is noteworthy, Orion does not consider the property to be a REC to the Target Property without records indicating a release of hazardous materials to the environment.

5.5.11 Southtown Industrial Park

(0.23-mile upgradient)

The Southtown Industrial Park property appears to be a collection of commercial/industrial buildings including a construction management company. The property was identified in both the HHSS and UST SWEEPS databases as having historically contained two petroleum USTs. The USTs were both installed in 1979 and contained unleaded motor vehicle fuel. Orion did not identify any other records related to these USTs including the dates of removal or the tank or subsurface conditions upon removal. While it is noteworthy that this property historically contained a fuel tank, Orion does not consider this property a concern or REC for the Target Property without records indicating a release to the environment.

5.5.12 Ontario Drums

(0.39-mile upgradient/cross gradient)

Ontario Drums was a Superfund site (EPA ID No. CA000906085) that involved the release of an unknown amount of an unidentified hazardous material. In May 2004, an abandoned commercial transportation trailer reportedly containing 138 steel and poly drums was discovered at 1516 South Bon View Avenue. The property was and is currently occupied by a towing service company and the abandoned trailer was not affiliated with the normal site operations. A highly corrosive liquid was observed to be leaking from the drums, through the bottom of the trailer, and onto the soil. As part of the emergency response, the trailer was towed from the property and all drums were removed from the trailer and placed into salvage drums to contain the leakage. According to a 25 May 2004 memorandum, removal of contaminated soil was considered sufficient to address impacts to the environment without the need for long term remediation (EPA, 2004). The Ontario Drums site represents a release to the environment of a hazardous substance. However, the source

of the release appeared to be removed immediately after detection along with impacted environmental media. As discussed in Section 3.3, groundwater is estimated to be at a depth greater than 300 feet bgs and was unlikely to be impacted by the release. Orion does not consider the release a REC or HREC for the Target Property based on (1) the apparent speed and effectiveness of the emergency response in removing the source of the release, (2) the relatively deep groundwater table, (3) the lack of evidence suggesting another release is likely to occur based on current site operations, and (4) the lack of regulatory agency-mandated long-term remediation.

5.5.13 Oakwood Interiors Site

(0.67-mile upgradient)

The Oakwood Interiors Site has historically been used for industrial operations including automotive polishing, plating, and finishing from approximately 1964 until 1992. Historical operations required the use of solvents, heavy metals, hydraulic fluids, biocides, and sulfuric acid. In 1996, Oakwood Interiors, began occupying the site as a furniture manufacturer. Under this operator, chemicals including stain, acetone, water-based lacquer thinner, and motor oil were stored at the site in 55-gallon drums. Waste at the site was also stored in 55-gallon drums and transported offsite by a licensed hazardous materials transporter.

Historical site operations and chemical use appear to have contributed to the release of VOCs, semi-volatile organic compounds (SVOCs), and metals to soil and groundwater. Subsurface site investigations conducted between 1988 and 1991 indicated that chromium and nickel were present in soil at maximum concentrations of 1,950 milligrams per kilogram (mg/kg) and 2,900 mg/kg, respectively. A Phase I ESA conducted in 1992 identified environmental concerns including stained soils and pavement, evidence of chromium and nickel spills, former petroleum USTs, and storage of hazardous chemicals (Clayton Group Services, 2006).

In 2000, the DTSC and the property owner entered into a voluntary cleanup agreement (VCA) to address nickel, chromium, and petroleum hydrocarbon contamination at the site. In 2008, the City of Ontario placed a land use restriction on the property prohibiting future use as a residence, school, hospital, childcare facility, or elderly care facility, citing unacceptable cancer risks (City of Ontario, 2008). Additionally, the concrete/asphalt cover to be maintained to eliminate risk to current and future commercial/industrial workers. Pursuant to the land use restriction covenant, the property owner must inspect the property

on an annual basis and submit a report documenting observations and any violations. According to the most recent annual inspection report dated January 2021, the concrete/asphalt cover is in acceptable condition and no covenant violations were noted (Infrastructure Engineering Corporation, 2021).

Remaining impacts in soil are separated from groundwater, which is estimated to be at a depth greater than 300 feet bgs. VOCs detected in soil vapor samples were below California Human Health Screening Levels with the exception of PCE and 1,1-dichloroethane. Subsequent risk assessment indicated that risk levels were below applicable thresholds for commercial/industrial scenarios, while the potential residential scenario was not evaluated. DTSC expressed concerns regarding construction and intrusive workers and recommended appropriate actions be taken to address these scenarios such avoiding fugitive emissions. Orion has not identified a REC or CREC for the target property based on (1) the relative distance from the target property and (2) the separation between impacted soil and groundwater at the Oakwood Interiors Site.

5.5.14 Sunshine Cleaners – Driftwood Village

(0.75-mile downgradient)

Sunshine Cleaners is a dry-cleaning facility located in a multi-tenant commercial shopping center. Between approximately 1982 and 1990, Safeway Cleaners conducted dry-cleaning operations at a unit within the shopping center, while Sunshine Cleaners has had ongoing operations since 1990. Together these two facilities comprise EnviroStor Case No. 60002433 in the DTSC Site Cleanup Program, which was opened in December 2016 to investigate and remediate trichloroethylene (TCE) and PCE in soil, soil vapor, and indoor air. Based on investigation activities conducted between 2016 and 2019, groundwater does not appear to have been impacted by TCE, PCE, or other chlorinated VOCs. Soil samples collected in 2019 indicated concentrations of VOCs were generally below laboratory reporting limits across the site. Soil vapor samples collected in 2019 indicated PCE concentrations ranging from below laboratory reporting limits to 10,300 ug/m^3, with maximum concentrations occurring at a depth of 60 feet bgs. According to a 2019 Abbreviated Site Assessment Report, impacts to soil vapor have not been fully delineated, but PCE concentrations exceeding regulatory screening levels for commercial properties do not appear to extend beyond the property boundary (Civil-Environmental-Survey Group, 2019). As of the date of this Phase I ESA report, EnviroStor Case No. 60002433 remains

open to further investigate and remediate the extend of soil vapor impacts. Orion has not identified a REC for the Target Property based on relative downgradient distance and the apparent lack of impacts to groundwater.

5.5.15 Woodcrest Elementary/Jr. High School

(0.94-mile downgradient)

The Woodcrest Elementary/Junior High School property currently consists of Liberty Elementary School and Woodcrest Junior High School. Prior uses at the property have included agricultural farming prior to 1954 and dairy operations between approximately 1962 and 1992. Based on historical records, no hazardous materials appear to have been released at the property. However, soil vapor investigations conducted in 1999 indicated that maximum methane concentrations of 186,000 parts per million by volume (ppmv) were present at the property. Historically elevated methane concentrations were likely attributed to former dairy operations. Concentrations of methane between the lower and upper explosive limits (50,000 and 150,000 ppmv, respectively) can pose an explosion risk if an ignition source is present. A methane mitigation management system was installed between 2003 and 2005 with approval from the DTSC. The system operated between 2005 and 2011 under EnviroStore Case No. 36010007. The DTSC issued a no further remedial action certification in 2011 after methane concentrations decreased below regulatory screening levels of 5,000 ppmv (Miller Brooks Environmental, 2000). Orion has not identified a REC for the Target Property based on relative downgradient distance and regulatory closure.

5.6 Local Agency Review

Orion contacted local agencies defined in Section 2.0 for records associated with the Target Property and neighboring properties. Orion did not identify any RECs after reviewing local agency records that were available at the time of this report. Findings from the records review are summarized below and copies of the records are in Appendix E.

Agency	Findings
City of Ontario Fire Department	Minor violations related to housekeeping, documentation, and permitting were identified for the Target Property, but no records indicative of a release to the environment. Records for neighboring properties were not obtained.

Agency	Findings
City of Ontario Building Department	The properties associated with 1914, 1930, 1944 and 1948 S. Bon View Avenue have undergone multiple tenant improvement projects requiring building permits since the late 1970's. One violation was identified for the property associated with 1948 S. Bon View Avenue relating to the lack of necessary permits for construction project in 1981. No reports of permit violations were found in agency records for the other addresses associated with the Target Property. Records for neighboring properties were not obtained.
City of Ontario Public Works Department	No records associated with the Target Property address were found and records for neighboring properties were not obtained.
SBC Fire Protection District	Records indicate that as of March 2019, JLMC is an active, conditionally exempt SQG of hazardous materials at the facility located at 1944 S. Bon View Avenue. One complaint was identified for the JLMC facility relating to the illegal shipment of materials and cutting of metals. The complaint was closed after an investigation was unable to verify the allegations. Various occupants of facilities associated with 1914 and 1930 S. Bon View Avenue have historically had permits to generate, handle, or store hazardous materials, but these permits are currently inactive. No site remediation records or permits for the removal, installation, or modification of USTs were found for any addresses associated with the Target Property. Records for neighboring properties were not obtained.
SBC Environmental Health Department	No records associated with the Target Property address were found and records for neighboring properties were not obtained.

5.7 Vapor Encroachment Screening (VES)

Orion conducted a Tier 1 VES in conjunction with the Phase I ESA at the subject Target Property using default Area of Concern parameters and minimum search distances defined in ASTM E2600-15. The Tier I VES was conducted to evaluate whether a vapor encroachment condition (VEC) exists from subsurface contaminants at or near the Target Property. Orion has not identified any VECs and considers a minor spill reported at the Target Property a *de minimis* condition and no LUST-related records were identified within the Area of Concern. While Ontario Drums and the Oakwood Interiors Site are outside the Area of Concern, Orion evaluated these properties for potential VECs considering the documented releases to the environment and associated remedial responses. However, Orion has not identified a VEC related to the releases based on the information presented in Section 5.5. Details of the Tier 1 VES are included in Appendix F.

6.0 NON-SCOPE CONSIDERATIONS

Non-scope issues as per Section 13 of the ASTM E1527-13 were not addressed as part of this Phase I ESA as discussed in Section 1.3 of this report. However, Orion reviewed an asbestos and lead survey report prepared by Ambient on behalf of HK Ventures for the portion of the Target Property at 1944 and 1948 South Bon View Avenue. Ambient performed the survey during November 2018 and summarized the results in a report submitted to HK Ventures during December 2018 (Ambient, 2018). Ambient reported that the property consisted of three single-story buildings, one single-story residence with a detached garage, and storage sheds. Exterior walls were covered with wood or metal siding extending up to the roof level, while interior walls and ceilings were covered with drywall and joint compound or exposed metal or wood. Floors were covered with hardwood, vinyl flooring with associated mastic, ceramic tile, or exposed concrete. Roofs were covered with typical composite roofing and associated mastic. The heating, ventilation, and air conditioning (HVAC) system was metal ducting with fiberglass insulation. After performing a visual inspection, Ambient collected samples from accessible homogeneous building materials for analysis of (1) asbestos content using polarized light microscopy by EPA Method 600/R-93-116 Visual Area Estimation and (2) lead content using x-ray fluorescence (Ambient, 2020). The results indicated that (1) non-friable asbestos was present in 50 percent of roofing material samples collected and (2) lead-based paint does not appear to be present in painted surfaces. Orion did not conduct lead or asbestos surveys to confirm the presence or absence of these materials at the Target Property.

7.0 SUMMARY AND CONCLUSIONS

Based on Target Property reconnaissance, interviews, and historical file reviews, Orion has not identified any RECs, CRECs, HRECs, or VECs for the Target Property. According to historical documentation, the Target Property was used for agricultural purposes from at least the 1930's until the 1980's. Historical operations at adjoining or nearby properties appear to have included an orchard, but Orion did not identify any records indicating pesticide-intensive agricultural operations at the Target Property.

Orion observed an apparently fresh water-sand mixture on the paved ground surface of the Target Property near previously decommissioned metals polishing equipment that contained caked sand/mud. Orion identified the presence of this mixture as a *de minimis* condition because of the potential presence of metals. Historical records indicated that hazardous materials and wastes were present at the Target Property including halogenated solvents, but no records identified a release of chemicals to the environment. Similarly, hazardous waste oil was observed in labeled drums on secondary containment during reconnaissance, although no leaks or staining were observed in the vicinity of the drums.

Based on information from the San Bernardino County Assessor's Office, the single-family residence at the Target Property was constructed in 1979, while the remaining industrial structures were built in the 1980's and 1990's. Asbestos and lead sampling of existing structures at 1944 and 1948 South Bon View Avenue were performed by others during December 2018. The results indicated that (1) non-friable asbestos was present in 50 percent of roofing material samples collected and (2) lead-based paint does not appear to be present in painted surfaces.

After completing this Phase I ESA, Orion recommends the following:

1. A hazardous materials survey should be performed prior to demolition of existing structures to further evaluate the potential presence of asbestos or lead at the Target Property.

2. Based on the historical use of halogenated solvents, petroleum hydrocarbons, and metals, a Soil Management Plan should be prepared for potential future site redevelopment activities.

3. Samples of the caked sand/mud and water-sand mixture should be collected and analyzed for metals to appropriately characterize and manage these materials before removal and offsite disposal.

9.0 RELIANCE AND LIMITATIONS

Orion has prepared this report for the exclusive use of Panattoni Development Company, Inc., Bon View Land 10, LLC, and BV Investments 10, LLC, as it pertains to the property located at 21 through 52, 1906, 1914, 1930, 1944, and 1948 South Bon View Avenue in Ontario, California. Any use of or reliance on this report by a third party shall be at such party's sole risk.

The scope of this environmental Target Property assessment was limited to visual observation of surface conditions at the Target Property, interviews with personnel familiar with the Target Property, and a review of reasonably available relevant data. The data reviewed included reports and literature issued by federal, State, and local agencies. Orion has not conducted an independent investigation of the accuracy of these secondary sources and has assumed them to be accurate and complete. Sampling and analysis were not conducted for asbestos, radon, lead-based paint, and lead in drinking water. Investigations of the following conditions were not part of the scope of work and would not have been revealed by the investigation:

- Naturally occurring toxics
- Toxicity of substances common in current habitable environments, such as stored household products, building materials, and consumables
- Biological pathogens
- A contaminant plume below the ground surface originating from an offsite source
- Contaminants or contaminant concentrations that do not violate present regulatory standards but that may violate future such standards
- Unknown Target Property contamination, such as "midnight dumping" or accidental spillage of waste other than the debris observed and noted in this report.

No warranty or guarantee concerning the findings and conclusions of this ESA is offered or intended. Rather, it is represented that the scope and performance of the professional services rendered are in accordance with the current state of practice being conducted in the Target Property region by similarly qualified practitioners.

10.0 ENVIRONMENTAL PROFESSIONAL STATEMENT

Orion declares that, to the best of our professional knowledge and belief, we meet the definition of "environmental professional" as defined in Part 312.10 of Title 40 of the Code of Federal Regulations (40 CFR). Orion personnel have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. We have developed and performed all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Steve Hash, PE
Senior Project Engineer

(a) Database acronyms are defined as follows:
CDL - Clandestine Drug Lab Sites
CERCLIS - Comprehensive Environmental Response, Compensation, and Liability Information System
CERS HAZ - California Environmental Reporting System (CERS) Hazardous Waste Sites
CERS Tank - CERS Tanks
CHMIRS - California Hazardous Material Incident Report System
CLEANUP SITES - List of Cleanup Program sites in the state of California made available through the State Water Resources Control Board (SWRCB)
DELISTED HAZ - Delisted CERS Hazardous Waste Sites
DELISTED TNK - Delisted Storage Tanks that were removed by the SWRCB in California's Environmental Protection Agency and the Cal FIRE Office of State Fire Marshal
EMISSIONS - Toxic pollutant emissions facilities
ENVIROSTOR - California EnviroStor Data Management System list of corrective action sites, tiered permit sites, historical sites, and evaluation/investigation sites
ERNS - Emergency Response Notification System
FINDS/FRS - Facility Index/Facility Registry Service
HAZNET - Hazardous Waste Manifest Data
HHSS - Historical Hazardous Substance Storage Information Database
HIST TANK - Historical Hazardous Substance Storage Container Information
HWP - ENVIROSTOR Hazardous Waste Facility
ICIS - Integrated Compliance Information System
INS COMP ENF - ENVIROSTOR Inspection, Compliance, and Enforcement
LUST - Leaking Underground Storage Tanks within the Cleanup Sites in the GeoTracker database
PCB - PCB Notifiers
RCRA LQG - RCRA Large Quantity Generator
RCRA NON GEN - Resource Conservation and Recovery Act (RCRA) verified Non-generator
RCRA SQG - RCRA Small Quantity Generator
RCRA TSD - RCRA non-corrective action sites listed as Treatment, Storage, and/or Disposal facilities of hazardous waste
SANBERN CUPA - San Bernardino County Certified Unified Program Agency (CUPA)
SEMS - Superfund Enterprise Management System (SEMS) List 8R Active Site Inventory
SSTS - Section Seven Tracking System list of active EPA-registered foreign and domestic pesticide-producing and device-producing establishments
UST SWEEPS - Underground Storage Tank Statewide Environmental Evaluation and Planning System
VCP - Voluntary Cleanup Program.
(b) VES - Vapor Encroachment Screening.
(c) "--" - Not applicable.
(d) N/A - Not available.

APPENDIX A

LIST OF FEDERAL AND STATE REGULATORY DATABASES

APPENDIX A
LIST OF FEDERAL AND STATE REGULATORY DATABASES

Orion reviewed the following regulatory agency databases to obtain information on potential environmental liabilities. Search radii for each database are defined in ASTM International's *Standard Practice for Environmental Target Property Assessments: Phase I Environmental Target Property Assessment Process (E1527-13)* and *Standard Guide for Vapor Encroachment Screening on a Property Involved in Real Estate Transactions (E2600-15)*.

- Federal sources:
  - National Priority List (NPL)
  - Delisted NPL
  - Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS)
  - CERCLIS No Further Remedial Action Planned (NFRAP)
  - Resource Conservation and Recovery Act (RCRA) databases including:
    - RCRA corrective action sites (CORRACTS)
    - Hazardous waste treatment, storage, and disposal (TSD) facilities
    - TSD facilities with reported violations
    - Large and small quantity hazardous waste generators
  - Federal institutional control and engineering control registries
  - Emergency Response Notification System (ERNS) list of reported releases of oil and hazardous substances
  - Toxic Release Inventory System (TRIS)
- State sources:
  - Hazardous waste sites identified for investigation or remediation
  - State-equivalent NPL
  - State-equivalent CERCLIS
  - Landfill and/or solid waste disposal sites including the Solid Waste Information System (SWIS)
  - Leaking storage tank lists
  - Registered storage tank lists
  - Institutional control and engineering control registries
  - Voluntary cleanup sites
  - Brownfield sites
  - California Environmental Protection Agency (CalEPA)
  - Santa Ana Regional Water Quality Control Board (RWQCB)
  - Department of Toxic Substances Control (DTSC).

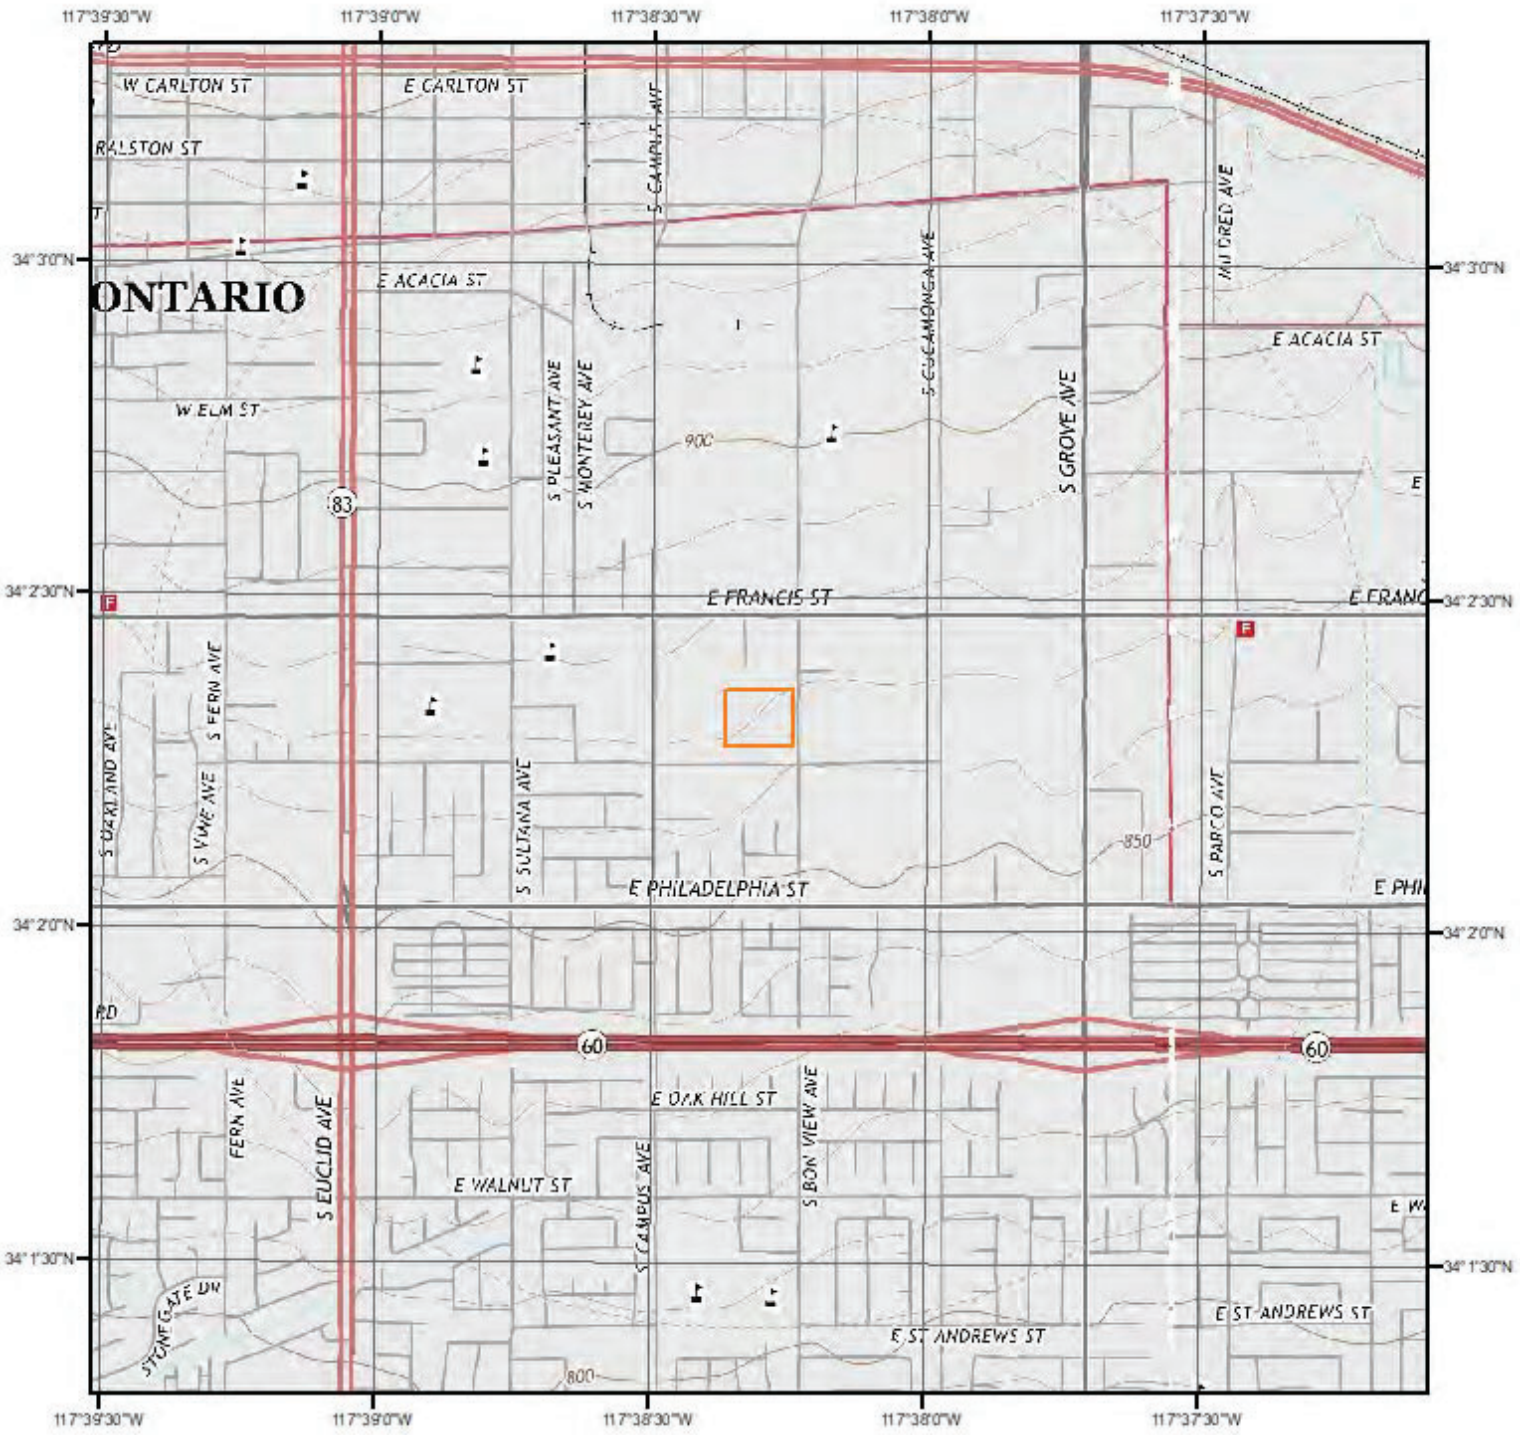
Appendix....44
Liability Notice....46



The ERIS ***Physical Setting Report - PSR*** provides comprehensive information about the physical setting around a site and includes a complete overview of topography and surface topology, in addition to hydrologic, geologic and soil characteristics. The location and detailed attributes of oil and gas wells, water wells, public water systems and radon are also included for review.

The compilation of both physical characteristics of a site and additional attribute data is useful in assessing the impact of migration of contaminants and subsequent impact on soils and groundwater.

Disclaimer

This Report does not provide a full environmental evaluation for the site or adjacent properties. Please see the terms and disclaimer at the end of the Report for greater detail.

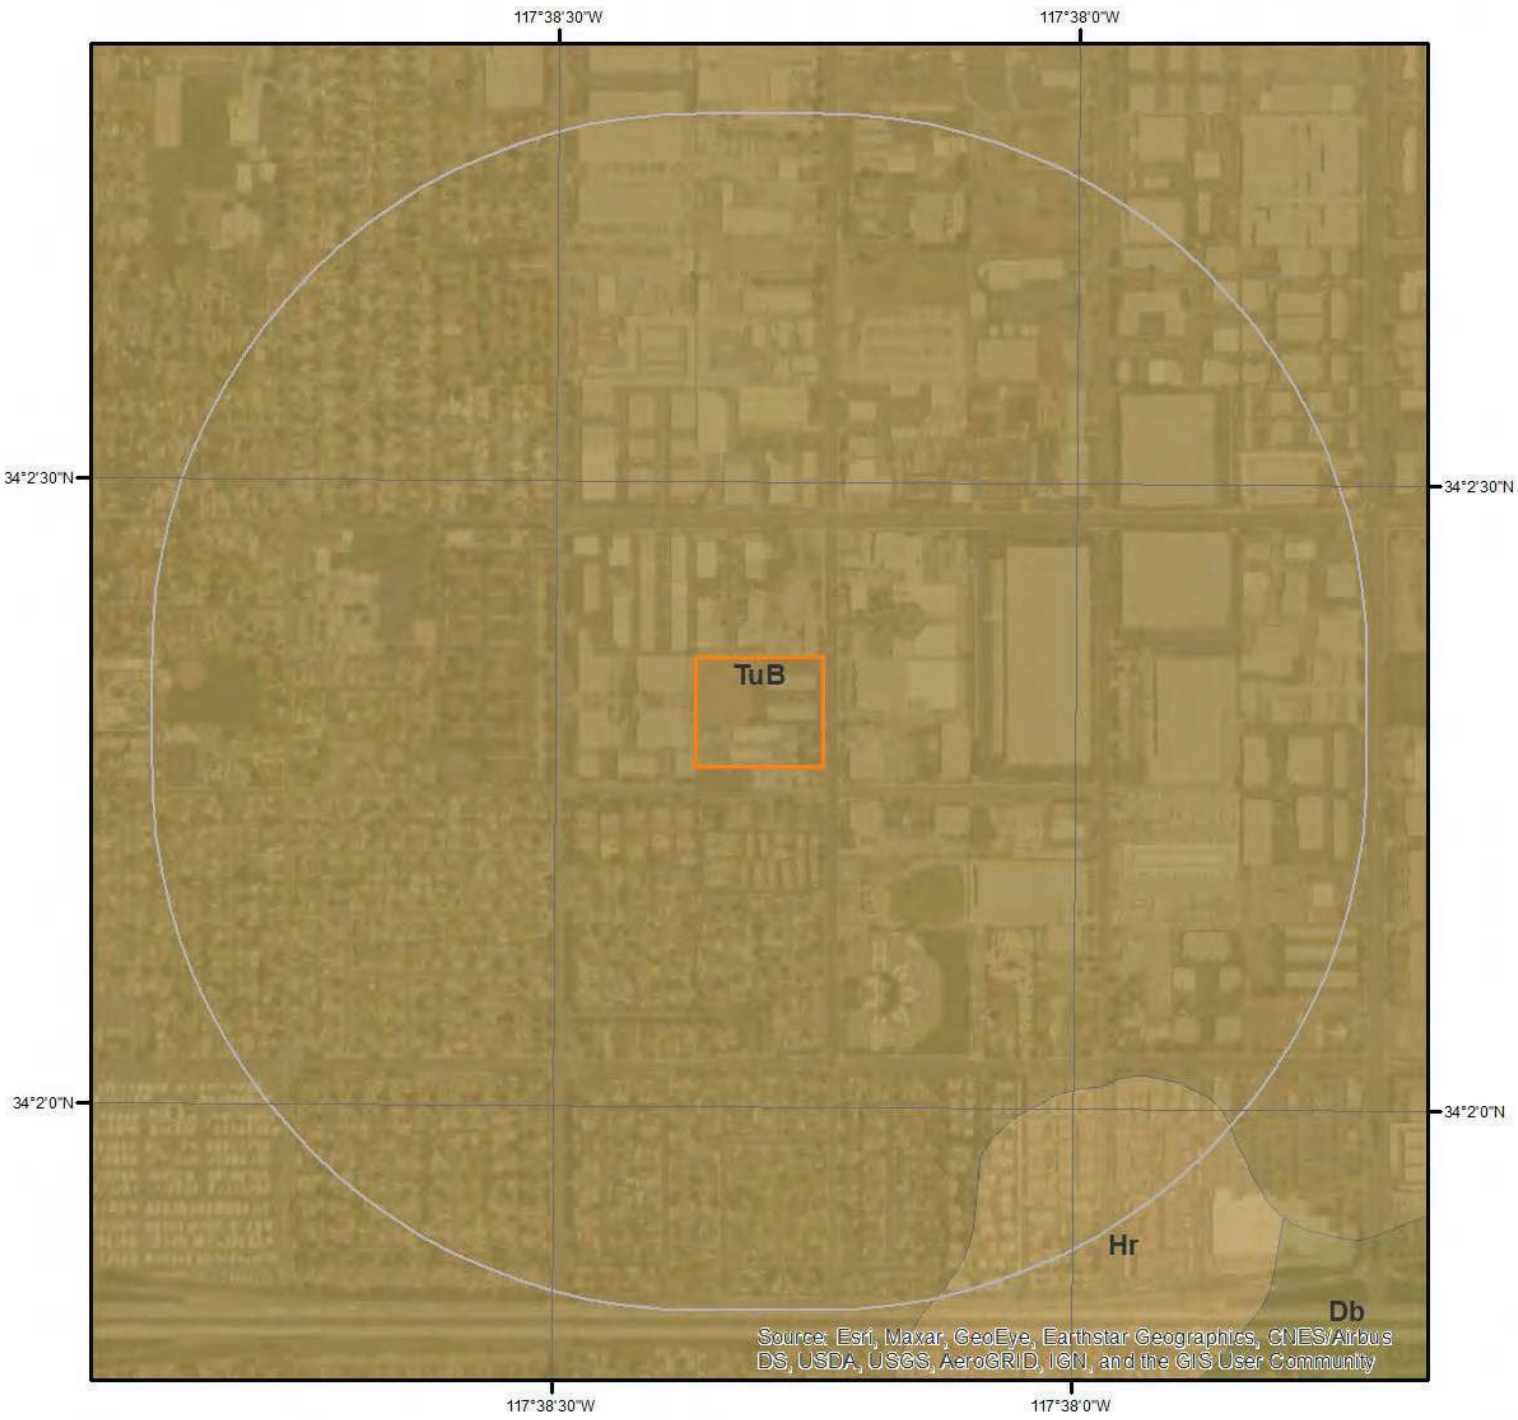
Geologic Units

This maps shows geologic units in the area. Please refer to the report for detailed descriptions.

ERIS



Geologic Information

The previous page shows USGS geology information. Detailed information about each unit is provided below.

Geologic Unit Q

Unit Name:	Quaternary alluvium and marine deposits
Unit Age:	Pliocene to Holocene
Primary Rock Type:	alluvium
Secondary Rock Type:	terrace
Unit Description:	Alluvium, lake, playa, and terrace deposits; unconsolidated and semi-consolidated. Mostly nonmarine, but includes marine deposits near the coast.

Soil Information

SSURGO Soils

This maps shows SSURGO soil units around the target property. Please refer to the report for detailed soil descriptions.

Soil Information

The previous page shows a soil map using SSURGO data from USDA Natural Resources Conservation Service. Detailed information about each unit is provided below.

Map Unit Hr (0.26%)

Map Unit Name:	Hilmar loamy fine sand
Bedrock Depth - Min:	null
Watertable Depth - Annual Min:	null
Drainage Class - Dominant:	Somewhat poorly drained
Hydrologic Group - Dominant:	C - Soils in this group have moderately high runoff potential when thoroughly wet. Water transmission through the soil is somewhat restricted.

Major components are printed below

Hilmar(85%)

horizon A(0cm to 33cm)	Loamy fine sand
horizon C1(33cm to 41cm)	Loamy sand
horizon C2(41cm to 58cm)	Loamy sand
horizon 2C3(58cm to 152cm)	Stratified loamy sand to loam

Component Description:

Minor map unit components are excluded from this report.

Map Unit: Hr - Hilmar loamy fine sand

Component: Hilmar (85%)
The Hilmar component makes up 85 percent of the map unit. Slopes are 0 to 2 percent. This component is on alluvial fans, alluvial plains. The parent material consists of alluvium derived from granite. Depth to a root restrictive layer is greater than 60 inches. The natural drainage class is somewhat poorly drained. Water movement in the most restrictive layer is moderately high. Available water to a depth of 60 inches (or restricted depth) is moderate. Shrink-swell potential is low. This soil is rarely flooded. It is not ponded. There is no zone of water saturation within a depth of 72 inches. Organic matter content in the surface horizon is about 1 percent. Nonirrigated land capability classification is 4w. This soil does not meet hydric criteria. The calcium carbonate equivalent within 40 inches, typically, does not exceed 3 percent. The soil has a slightly saline horizon within 30 inches of the soil surface.

Component: Delhi (10%)
Generated brief soil descriptions are created for major soil components. The Delhi soil is a minor component.

Component: Tujunga (5%)
Generated brief soil descriptions are created for major soil components. The Tujunga soil is a minor component.

Map Unit TuB (99.74%)

Map Unit Name:	Tujunga loamy sand, 0 to 5 percent slopes
Bedrock Depth - Min:	null
Watertable Depth - Annual Min:	null
Drainage Class - Dominant:	Somewhat excessively drained
Hydrologic Group - Dominant:	A - Soils in this group have low runoff potential when thoroughly wet. Water is transmitted freely through the soil.

Major components are printed below

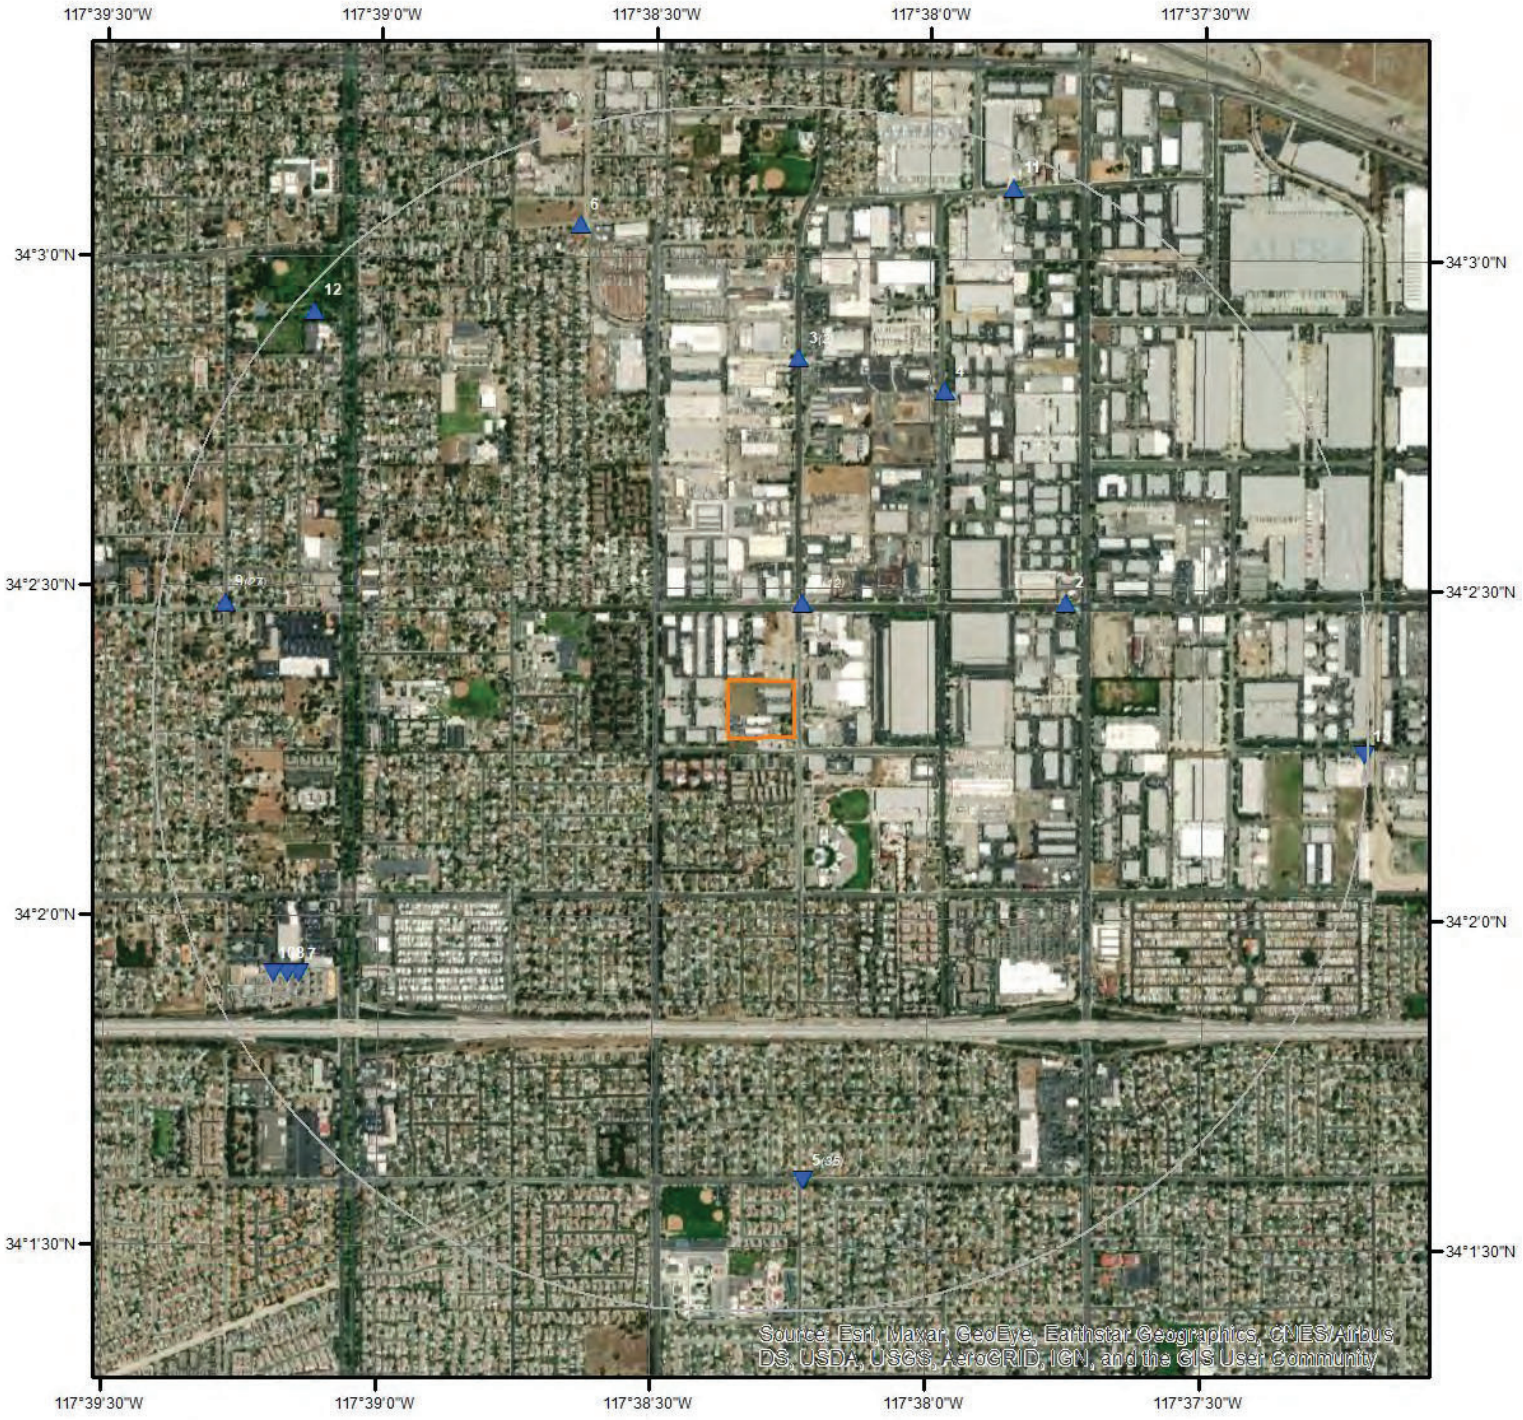
Tujunga(85%)

horizon A(0cm to 15cm)	Loamy sand
horizon C1(15cm to 46cm)	Loamy sand
horizon C2(46cm to 152cm)	Loamy sand

Component Description:

Soil Information

Minor map unit components are excluded from this report.



Map Unit: TuB - Tujunga loamy sand, 0 to 5 percent slopes

Component: Tujunga (85%)
The Tujunga, loamy sand component makes up 85 percent of the map unit. Slopes are 0 to 5 percent. This component is on alluvial fans, alluvial plains. The parent material consists of alluvium derived from granite. Depth to a root restrictive layer is greater than 60 inches. The natural drainage class is somewhat excessively drained. Water movement in the most restrictive layer is high. Available water to a depth of 60 inches (or restricted depth) is low. Shrink-swell potential is low. This soil is rarely flooded. It is not ponded. There is no zone of water saturation within a depth of 72 inches. Organic matter content in the surface horizon is about 1 percent. Nonirrigated land capability classification is 4e. This soil does not meet hydric criteria.

Component: Tujunga (10%)
Generated brief soil descriptions are created for major soil components. The Tujunga soil is a minor component.

Component: Hanford (5%)
Generated brief soil descriptions are created for major soil components. The Hanford soil is a minor component.

Radon Information

This section lists any relevant radon information found for the target property.

Federal EPA Radon Zone for *SAN BERNARDINO* County: **2**

Zone 1: Counties with predicted average indoor radon screening levels greater than 4 pCi/L
Zone 2: Counties with predicted average indoor radon screening levels from 2 to 4 pCi/L
Zone 3: Counties with predicted average indoor radon screening levels less than 2 pCi/L

Federal Area Radon Information for *SAN BERNARDINO* County

No Measures/Homes:	17
Geometric Mean:	0.5
Arithmetic Mean:	0.7
Median:	0.7
Standard Deviation:	1
Maximum:	2.9
% >4 pCi/L:	0
% >20 pCi/L:	0
Notes on Data Table:	TABLE 1. Screening indoor radon data from the EPA/State Residential Radon Survey of California conducted during 1989-90. Data represent 2-7 day charcoal canister measurements from the lowest level of each home tested.

Appendix

Federal Sources

FEMA National Flood Hazard Layer — **FEMA FLOOD**

The National Flood Hazard Layer (NFHL) data incorporates Flood Insurance Rate Map (FIRM) databases published by the Federal Emergency Management Agency (FEMA), and any Letters Of Map Revision (LOMRs) that have been issued against those databases since their publication date. The FIRM Database is the digital, geospatial version of the flood hazard information shown on the published paper FIRMs. The FIRM Database depicts flood risk information and supporting data used to develop the risk data. The FIRM Database is derived from Flood Insurance Studies (FISs), previously published FIRMs, flood hazard analyses performed in support of the FISs and FIRMs, and new mapping data, where available.

Indoor Radon Data — **INDOOR RADON**

Indoor radon measurements tracked by the Environmental Protection Agency(EPA) and the State Residential Radon Survey.

Public Water Systems Violations and Enforcement Data — **PWSV**

List of drinking water violations and enforcement actions from the Safe Drinking Water Information System (SDWIS) made available by the Drinking Water Protection Division of the US EPA's Office of Groundwater and Drinking Water. Enforcement sensitive actions are not included in the data released by the EPA. Address information provided in SWDIS may correspond either with the physical location of the water system, or with a contact address.

Radon Zone Level — **RADON ZONE**

Areas showing the level of Radon Zones (level 1, 2 or 3) by county. This data is maintained by the Environmental Protection Agency (EPA).

Safe Drinking Water Information System (SDWIS) — **SDWIS**

The Safe Drinking Water Information System (SDWIS) contains information about public water systems as reported to US Environmental Protection Agency (EPA) by the states. Addresses may correspond with the location of the water system, or with a contact address.

Soil Survey Geographic database — **SSURGO**

The Soil Survey Geographic database (SSURGO) contains information about soil as collected by the National Cooperative Soil Survey at the Natural Resources Conservation Service (NRCS). Soil maps outline areas called map units. The map units are linked to soil properties in a database. Each map unit may contain one to three major components and some minor components.

U.S. Fish & Wildlife Service Wetland Data — **US WETLAND**

The U.S. Fish & Wildlife Service Wetland layer represents the approximate location and type of wetlands and deepwater habitats in the United States.

USGS Current Topo — **US TOPO**

US Topo topographic maps are produced by the National Geospatial Program of the U.S. Geological Survey (USGS). The project was launched in late 2009, and the term "US Topo" refers specifically to quadrangle topographic maps published in 2009 and later.

USGS Geology — **US GEOLOGY**

Seamless maps depicting geological information provided by the United States Geological Survey (USGS).

USGS National Water Information System — **FED USGS**

The U.S. Geological Survey (USGS)'s National Water Information System (NWIS) is the nation's principal repository of water resources data. This database includes comprehensive information of well-construction details, time-series data for gage height, streamflow, groundwater level, and precipitation and water use data.

State Sources

Oil and Gas Wells — **OGW**

A list of Oil and Gas well locations. This is provided by California's Department of Conservation Division of

Appendix

Oil, Gas and Geothermal Resources.

Periodic Groundwater Level Measurement Locations — **MONITOR WELLS**

Locations of groundwater level monitoring wells in the Department of Water Resources (DWR)'s Periodic Groundwater Levels dataset. The DWR Periodic Groundwater Levels dataset contains seasonal and long-term groundwater level measurements collected by the Department of Water Resources and cooperating agencies.

Well Completion Reports — **WATER WELLS**

List of wells from the Well Completion Reports data made available by the California Department of Water Resources' (DWR) Online System for Well Completion Reports (OSWCR). Please note that the majority of well completion reports have been spatially registered to the center of the 1x1 mile Public Land Survey System section that the well is located in.

Liability Notice

Reliance on information in Report: The Physical Setting Report (PSR) DOES NOT replace a full Phase I Environmental Site Assessment but is solely intended to be used as a review of environmental databases and physical characteristics for the site or adjacent properties.

License for use of information in Report: No page of this report can be used without this cover page, this notice and the project property identifier. The information in Report(s) may not be modified or re-sold.

Your Liability for misuse: Using this Service and/or its reports in a manner contrary to this Notice or your agreement will be in breach of copyright and contract and ERIS may obtain damages for such mis-use, including damages caused to third parties, and gives ERIS the right to terminate your account, rescind your license to any previous reports and to bar you from future use of the Service.

No warranty of Accuracy or Liability for ERIS: The information contained in this report has been produced by ERIS Information Inc. ("ERIS") using various sources of information, including information provided by Federal and State government departments. The report applies only to the address and up to the date specified on the cover of this report, and any alterations or deviation from this description will require a new report. RE: CITY DIRECTORY RESEARCH
S. Bon View Avenue and E. Cedar Street
S. Bon View Avenue and E. Cedar Street Ontario, CA

Thank you for contacng ERIS f or an City Directory Search for the site described above. Our staff has conducted a reverse lisng City Dir ectory search to determine prior occupants of the subject site and adjacent properes. W e have provided the nearest addresses(s) when adjacent addresses are not listed. If we have searched a range of addresses, all addresses in that range found in the Directory are included.

Note: Reverse Lisng Dir ectories generally are focused on more highly developed areas. Newly developed areas may be covered in the more recent years, but the older directories will tend to cover only the "central" parts of the city. To complete the search, we have either uliz ed the ACPL, Library of Congress, State Archives, and/or a regional library or history center as well as mulple digiz ed directories. These do not claim to be a complete collecon of all r everse lisng city dir ectories produced.

ERIS has made every effort to provide accurate and complete informaon but shall not be held liable f or missing, incomplete or inaccurate informaon. To complete this search we used the general range(s) below to search for relevant findings. If you believe there are addional addr esses or streets that require searching please contact us at 866-517-5204.

Search Criteria:
1742-2048 of S Bon View Avenue
709-995 of E Cedar Street

Notice: IMPORTANT LIMITATIONS and YOUR LIABILITY

Reliance on information in Report: This report DOES NOT replace a full Phase I Environmental Site Assessment but is solely intended to be used as database review of environmental records.

License for use of information in Report: No page of this report can be used without this cover page, this notice and the project property identifier. The information in Report(s) may not be modified or re-sold.

Your Liability for misuse: Using this Service and/or its reports in a manner contrary to this Notice or your agreement will be in breach of copyright and contract and ERIS may obtain damages for such mis-use, including damages caused to third parties, and gives ERIS the right to terminate your account, rescind your license to any previous reports and to bar you from future use of the Service.

No warranty of Accuracy or Liability for ERIS: The information contained in this report has been produced by ERIS Information Inc. ("ERIS") using various sources of information, including information provided by Federal and State government departments. The report applies only to the address and up to the date specified on the cover of this report, and any alterations or deviation from this description will require a new report. This report and the data contained herein does not purport to be and does not constitute a guarantee of the accuracy of the information contained herein and does not constitute a legal opinion nor medical advice. Although ERIS has endeavored to present you with information that is accurate, ERIS disclaims, any and all liability for any errors, omissions, or inaccuracies in such information and data, whether attributable to inadvertence, negligence or otherwise, and for any consequences arising therefrom. Liability on the part of ERIS is limited to the monetary value paid for this report.

Trademark and Copyright: You may not use the ERIS trademarks or attribute any work to ERIS other than as outlined above. This Service and Report (s) are protected by copyright owned by ERIS Information Inc. Copyright in data used in the Service or Report(s) (the "Data") is owned by ERIS or its licensors. The Service, Report(s) and Data may not be copied or reproduced in whole or in any substantial part without prior written consent of ERIS.

Regulated Programs

EI ID: 10043443 **EI Description:** Hazardous Waste Generator

EI ID: 10043443 **EI Description:** Chemical Storage Facilities

Violations

Violation Date: 11/01/2016 **Violation Source:** CERS
Violation Program: HW **Violation Division:** San Bernardino County Fire Department
Citation: HSC 6.5 Multiple - California Health and Safety Code, Chapter 6.5, Section(s) Multiple
Violation Notes:

Returned to compliance on 09/01/2017. Failure to obtain an EPA ID Number (CCR 66262.12(a)) The EPA id was found to be inactive. Submit the provided forms to the DTSC to update and activate the number.

Violation Description:

Hazardous Waste Generator Program - Administration/Documentation - General

Violations

Violation Date: 11/01/2016 **Violation Source:** CERS
Violation Program: HMRRP **Violation Division:** San Bernardino County Fire Department
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Notes:

Returned to compliance on 11/30/2016. The business plan was last submitted in 2013. The plan must be updated yearly before March1st.

Violation Description:

Failure to annually review and electronically certify that the business plan is complete and accurate on or before the annual due date.

Violations

Violation Date: 01/15/2020 **Violation Source:** CERS
Violation Program: HMRRP **Violation Division:** San Bernardino County Fire Department
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Notes:

Returned to compliance on 01/16/2020. OBSERVATION: The facility site map submitted via CERS was missing north orientation, hazardous waste storage area, and accurate locations for all hazardous materials. CERS ID#10043443. CORRECTIVE ACTION: Update the facility site map by adding north orientation, hazardous waste storage area, and accurate locations for all hazardous materials. Submit the completed Certificate of Compliance (CofC) to this Division indicating that the facility site map has been updated and resubmitted via CERS.

Violation Description:

Failure to complete and electronically submit a site map with all required content.

Violations

Violation Date: 07/25/2018 ***Violation Source:*** CERS
Violation Program: HMRRP ***Violation Division:*** San Bernardino County Fire Department
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Notes:

Returned to compliance on 07/30/2018. OBSERVATION: The plan was last submitted on 2/3/2017. Ensure that the plan is updated yearly before March 1st. It was also found that the emergency response plan was incomplete. CORRECTIVE ACTION: Review and certify the business plan within 30 days and yearly after that. Upload all portions of the emergency response plan.

Violation Description:

Failure to annually review and electronically certify that the business plan is complete and accurate on or before the annual due date.

Violations

Violation Date: 07/25/2018 ***Violation Source:*** CERS
Violation Program: HMRRP ***Violation Division:*** San Bernardino County Fire Department
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Notes:

Returned to compliance on 08/01/2018. OBSERVATION: Hazardous materials (alcohol and propane) were observed in reportable quantities that were not listed on the CERS inventory. A portion of the facility map was found in the emergency response plan section. CORRECTIVE ACTION: Submit an update to the plan to include the hazardous materials identified during the inspection in the hazardous materials inventory of the California Environmental Reporting System (CERS) and move the map to the maps section.

Violation Description:

Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.

Violations

Violation Date: 05/06/2015 ***Violation Source:*** CERS
Violation Program: HMRRP ***Violation Division:*** San Bernardino County Fire Department
Citation: HSC 6.95 25508(d) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(d)
Violation Notes:

Returned to compliance on 07/30/2018. To date, no business plan has yet been submitted to this department or to the CERS website. This plan must be submitted to the CERS website within 30 days. Failure to do so may result in formal enforcement action being taken by this department.

Violation Description:

Failure to complete and/or electronically submit a business plan when storing/handling a hazardous material at or above reportable quantities.

Violations

Violation Date: 05/06/2015 ***Violation Source:*** CERS
Violation Program: HMRRP ***Violation Division:*** San Bernardino County Fire Department
Citation: HSC 6.95 25507 - California Health and Safety Code, Chapter 6.95, Section(s) 25507
Violation Notes:

Returned to compliance on 07/30/2018. A business plan has been requested in the past, however no plan has yet been established by paper or electronically. The CERS ID# is 10313695. Once your account is established in the California Environmental Reporting System, use your CERS ID# to access your existing record to establish your business plan.

Violation Description:

Failure to adequately establish and implement a business plan when storing/handling a hazardous material at or above reportable quantities.

Site History:

Lighting Resources LLC (LRL) originally operated under this EPA ID but the County of San Bernardino Fire Department requested LRL to change their ID in 2004. During the same time, they changed their name from Lighting Resources Inc to LLC so they made a Class 1 Permit Modification to reflect these changes and was issued a new permit with the updated name and EPA ID in 2005. Thus, this facility is being tracked under a new EPA ID # CAR000156125.

July 2020 - September 2020

Permit application currently under technical review of revised permit application in response to 2nd NOD.

FACILITY DESCRIPTION/HISTORY

The Lighting Resources facility (Facility) is located at 805 East Francis Street, Ontario, California 91761, in San Bernardino County at latitude 34 degrees 02' 30" and longitude 117 degrees 30' 15". The Facility is located in an area zoned for light industrial. The nearest residential zone is about 0.1 mile away.

The owners of the facility are Lighting Resources, LLC at 805 East Francis Street, Ontario, California 91761; and Thumos, LLC, 4054 Mission Boulevard, Montclair, California 91763. LRL has been operating under a Standardized Hazardous Waste Facility Permit, Series A, issued June 24, 1996, which authorized LRL to operate as an off-site hazardous waste treatment and storage facility.

LRL, which is also a registered hazardous waste transporter, collects and transports spent fluorescent lamps, High Intensity Discharge (HID) lamps, other spent mercury-containing lamps, mercury-containing instruments (e.g. manometers) and intact PCB-containing lighting ballasts to its Facility. The collection of mercury-containing instruments is incidental to the primary lamp recycling operations. LRL also accepts the above described wastes from other transporters. The hazardous waste management activities occur mainly inside a warehouse building, storage trailers, and paved area outside of the warehouse building.

PERMITTING REGULATORY DESCRIPTION/HISTORY

The first permit was issued in 1996 and renewed once in 2007. The current permit will expire in 2017. Since the permit was issued in 2007, LRL has made no permit modifications. Six units are regulated under this permit.

(1) Lamp Machine (treatment)
The Lamp Machine is a demanufacturing machine into which lamps are manually fed. Fluorescent lamps are allowed to enter the system at a rate of up to one per second, up to a maximum of 32,000 lamps per day.
(2) HID Glove Box (treatment)
This is used to manually disassemble and recover mercury-containing powders from HID lamps. The maximum permitted treatment capacity is 4,800 lamps and/or mercury-containing devices per day.
(3) Lamp Storage Area (storage)
The maximum permitted storage capacity of the Lamp Storage Area is twenty-seven (27) pallets. Each pallet store no more than 1,300 fluorescent and/or HID lamps.
(4) HID Storage Area (storage)
The maximum permitted storage capacity of the HID Storage Area is seven (7) pallets. Each pallet store no more than 1,300 fluorescent and/or HID lamps.
(5) Hazardous Waste Storage Area (storage)
The maximum number of flasks stored inside or outside of drums shall not exceed four (4). The maximum drum limit shall not exceed eighty-two (82) drums plus up to four (4) drums that contain one (1) flask in each drum, for a maximum limit of eighty-six (86) drums.
(6) Trailer Storage Area (storage)
Intact fluorescent and/or HID lamps are stored inside of the trailers prior to introduction into the recycling processes. The maximum permitted storage capacity of each trailer is ten (10) pallets. Each pallet store no more than 1,300 fluorescent and/or HID lamps.

There are currently no corrective action/cleanup activities being conducted by DTSC or the Regional Water Quality Control Board at the facility.

FACILITY DESCRIPTION/HISTORY

The Lighting Resources facility (Facility) is located at 805 East Francis Street, Ontario, California 91761, in San Bernardino County at latitude 34 degrees 02' 30" and longitude 117 degrees 30' 15". The Facility is located in an area zoned for light industrial. The nearest residential zone is about 0.1 mile away.

The owners of the facility are Lighting Resources, LLC at 805 East Francis Street, Ontario, California 91761; and Thumos, LLC, 4054 Mission Boulevard, Montclair, California 91763. LRL has been operating under a Standardized Hazardous Waste Facility Permit, Series A, issued June 24, 1996, which authorized LRL to operate as an off-site hazardous waste treatment and storage facility.

LRL, which is also a registered hazardous waste transporter, collects and transports spent fluorescent lamps, High Intensity Discharge (HID) lamps, other spent mercury-containing lamps, mercury-containing instruments (e.g. manometers) and intact PCB-containing lighting ballasts to its Facility. The collection of mercury-containing instruments is incidental to the primary lamp recycling operations. LRL also accepts the above described wastes from other transporters. The hazardous waste management activities occur mainly inside a warehouse building, storage trailers, and paved area outside of the warehouse building.

PERMITTING REGULATORY DESCRIPTION/HISTORY

The first permit was issued in 1996 and renewed once in 2007. The current permit will expire in 2017. Since the permit was issued in 2007, LRL has made no permit modifications. Six units are regulated under this permit.

(1) Lamp Machine (treatment)
The Lamp Machine is a demanufacturing machine into which lamps are manually fed. Fluorescent lamps are allowed to enter the system at a rate of up to one per second, up to a maximum of 32,000 lamps per day.
(2) HID Glove Box (treatment)

This is used to manually disassemble and recover mercury-containing powders from HID lamps. The maximum permitted treatment capacity is 4,800 lamps and/or mercury-containing devices per day.
(3) Lamp Storage Area (storage)
The maximum permitted storage capacity of the Lamp Storage Area is twenty-seven (27) pallets. Each pallet store no more than 1,300 fluorescent and/or HID lamps.
(4) HID Storage Area (storage)
The maximum permitted storage capacity of the HID Storage Area is seven (7) pallets. Each pallet store no more than 1,300 fluorescent and/or HID lamps.
(5) Hazardous Waste Storage Area (storage)
The maximum number of flasks stored inside or outside of drums shall not exceed four (4). The maximum drum limit shall not exceed eighty-two (82) drums plus up to four (4) drums that contain one (1) flask in each drum, for a maximum limit of eighty-six (86) drums.
(6) Trailer Storage Area (storage)
Intact fluorescent and/or HID lamps are stored inside of the trailers prior to introduction into the recycling processes. The maximum permitted storage capacity of each trailer is ten (10) pallets. Each pallet store no more than 1,300 fluorescent and/or HID lamps.

There are currently no corrective action/cleanup activities being conducted by DTSC or the Regional Water Quality Control Board at the facility.

Site History:

Lighting Resources LLC (LRL) originally operated under this EPA ID but the County of San Bernardino Fire Department requested LRL to change their ID in 2004. During the same time, they changed their name from Lighting Resources Inc to LLC so they made a Class 1 Permit Modification to reflect these changes and was issued a new permit with the updated name and EPA ID in 2005. Thus, this facility is being tracked under a new EPA ID # CAR000156125.

Census Tract: 6071001813
Calenviro Screen Percentile Sc: 96-100% (highest scores)
Site Facility Type: CLOSED - PERMIT AUTHORITY: Standardized
Facility History:

Lighting Resources LLC (LRL) originally operated under this EPA ID but the County of San Bernardino Fire Department requested LRL to change their ID in 2004. During the same time, they changed their name from Lighting Resources Inc to LLC so they made a Class 1 Permit Modification to reflect these changes and was issued a new permit with the updated name and EPA ID in 2005. Thus, this facility is being tracked under a new EPA ID # CAR000156125.

Permit application currently under technical review of revised permit application in response to 2nd NOD.

FACILITY DESCRIPTION/HISTORY

The Lighting Resources facility (Facility) is located at 805 East Francis Street, Ontario, California 91761, in San Bernardino County at latitude 34 degrees 02' 30" and longitude 117 degrees 30' 15". The Facility is located in an area zoned for light industrial. The nearest residential zone is about 0.1 mile away.

The owners of the facility are Lighting Resources, LLC at 805 East Francis Street, Ontario, California 91761; and Thumos, LLC, 4054 Mission Boulevard, Montclair, California 91763. LRL has been operating under a Standardized Hazardous Waste Facility Permit, Series A, issued June 24, 1996, which authorized LRL to operate as an off-site hazardous waste treatment and storage facility.

LRL, which is also a registered hazardous waste transporter, collects and transports spent fluorescent lamps, High Intensity Discharge (HID) lamps, other spent mercury-containing lamps, mercury-containing instruments (e.g. manometers) and intact PCB-containing lighting ballasts to its Facility. The collection of mercury-containing instruments is incidental to the primary lamp recycling operations. LRL also accepts the above described wastes from other transporters. The hazardous waste management activities occur mainly inside a warehouse building, storage trailers, and paved area outside of the warehouse building.

PERMITTING REGULATORY DESCRIPTION/HISTORY

The first permit was issued in 1996 and renewed once in 2007. The current permit will expire in 2017. Since the permit was issued in 2007, LRL has made no permit modifications. Six units are regulated under this permit.

(1) Lamp Machine (treatment)
The Lamp Machine is a demanufacturing machine into which lamps are manually fed. Fluorescent lamps are allowed to enter the system at a rate of up to one per second, up to a maximum of 32,000 lamps per day.
(2) HID Glove Box (treatment)
This is used to manually disassemble and recover mercury-containing powders from HID lamps. The maximum permitted treatment capacity is 4,800 lamps and/or mercury-containing devices per day.
(3) Lamp Storage Area (storage)
The maximum permitted storage capacity of the Lamp Storage Area is twenty-seven (27) pallets. Each pallet store no more than 1,300 fluorescent and/or HID lamps.
(4) HID Storage Area (storage)
The maximum permitted storage capacity of the HID Storage Area is seven (7) pallets. Each pallet store no more than 1,300 fluorescent and/or HID lamps.
(5) Hazardous Waste Storage Area (storage)
The maximum number of flasks stored inside or outside of drums shall not exceed four (4). The maximum drum limit shall not exceed eighty-two (82) drums plus up to four (4) drums that contain one (1) flask in each drum, for a maximum limit of eighty-six (86) drums.
(6) Trailer Storage Area (storage)
Intact fluorescent and/or HID lamps are stored inside of the trailers prior to introduction into the recycling processes. The maximum permitted storage capacity of each trailer is ten (10) pallets. Each pallet store no more than 1,300 fluorescent and/or HID lamps.

There are currently no corrective action/cleanup activities being conducted by DTSC or the Regional Water Quality Control Board at the facility.

Violations

Violation Date: 08/08/2013 ***Violation Source:*** CERS
Violation Program: HW ***Violation Division:*** San Bernardino County Fire Department
Citation: HSC 6.67 Multiple - California Health and Safety Code, Chapter 6.67, Section(s) Multiple
Violation Notes:

Returned to compliance on 09/16/2013. Failure to keep hazardous waste containers closed when not in active use (CCR 66265.173(a))

Violation Description:

Haz Waste Generator Program - Operations/Maintenance - General

Violations

Violation Date: 08/08/2013 ***Violation Source:*** CERS
Violation Program: HW ***Violation Division:*** San Bernardino County Fire Department
Citation: HSC 6.5 25143.9 - California Health and Safety Code, Chapter 6.5, Section(s) 25143.9
Violation Notes:

Returned to compliance on 09/23/2013.

Violation Description:

Failure to meet the following requirements of excluded recyclable materials:
1) Used or reused as an ingredient in an industrial process to make a product if the material is not being reclaimed,
2) Used or reused as a safe and effective substitute for commercial products if the material is not being reclaimed,
3) Returned to the original process from which the material was generated, without first being reclaimed, if the material is returned as a substitute for raw material feedstock, and the process uses raw materials as principal feedstocks,
4) The material is recycled and used at the same facility at which the material was generated, or by the same corporate entity,
5) The material is recycled within the applicable generator accumulation time,
6) The material is managed in accordance with all applicable requirements for generators of hazardous wastes,
7) If the material is held in a container or tank, the container or tank is labeled, marked, and placarded in accordance with the department's hazardous waste labeling, marking, and placarding requirements which are applicable to generators, except that the container or tank shall be labeled or marked clearly with the words "Excluded Recyclable Material" instead of the words "Hazardous Waste,"
8) If the material is used oil, the containers, aboveground tanks, and fill pipes used to transfer oil into underground storage tanks shall also be labeled and clearly marked with the words "Used Oil",
9) The owner or operator of the business location where the material is located has a business plan that meets the following minimal requirements: emergency response plans and procedures, which specifically address the material or that meets the emergency response and contingency requirements which are applicable to generators of hazardous waste, and
10) The material shall be stored and handled in accordance with all local ordinances and codes.

Violations

Violation Date: 02/19/2020 ***Violation Source:*** CERS
Violation Program: APSA ***Violation Division:*** San Bernardino County Fire Department
Citation: HSC 6.67 25270.4.5 (a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5 (a)
Violation Notes:

Returned to compliance on 03/11/2020. OBSERVATION: The SPCC plan was last reviewed and approved on 9/27/2013. The plan must be reviewed and udpated every 5 years. CORRECTIVE ACTION: Submit a signed statement indicating that the 5-year review has been performed, documented and SPCC plan amended if necessary.

Violation Description:

Failure to complete a review and evaluation of the SPCC Plan at least once every five years, document the completion of the review, and sign a statement as to whether the SPCC Plan will be amended.

Violations

Violation Date: 02/19/2020 ***Violation Source:*** CERS

RAT Def: Response action that requires expeditious attention to reduce imminent and substantial dangers to human health, welfare, or the environment or an emergency response required within hours or days to address acute situations involving actual or potential threat to human health, the environment, or real or personal property due to the release of a hazardous substance. Characterization of a removal action as removal, not immediate removal or planned removal, started at the beginning of FY 1987. This code now takes the place of immediate removal (IR) and planned removal (PR).

School District:

Past Use that Caused Contam: METAL PLATING - CHROME

Potential Media Affected: OTHER GROUNDWATER AFFECTED (USES OTHER THAN DRINKING WATER), SOIL

Potential Contamin of Concern:

ARSENIC

Site History:

The site was owned by Cirus & Bernette Harding until 1961. The southern 3 acres were acquired by Montclair Motor Homes Inc. The earliest known industrial use was for the storage and repair of motor homes by Montclair. The site was leased in 1964 to Keystone Bumper and Automotive. Activities included distribution of automotive wheels and bumpers used for polishing, plating, and final finishing of wheels and bumpers. In 1968 Keystone became the owner and sole tenant. In the 1980's, Intermark Inc. acquired Keystone. Keystone Company's name changed to Dynmark in 1985 and filed bankruptcy in 1991. In 1992, the operations terminated. Dynmark conducted six different types of operations in Bldg. 3: paint line, plating line, paint spray booth, casting and aluminum machining, a strip line, and a casting and machining area. Chemicals used were cleaning solution, chromic acid and phosphate rinsing solution, and hexavalent chromium. Nickel and zinc chemicals were used in dip tanks to plate the wheels. Biocides were reportedly used in the coolant tower. Hydraulic fluid and dye lubricant were used to operate and maintain the casting machinery. Molten aluminum, sulfuric acid, and lead were also used. The site was vacant from 1992 until 1996 when Bon View purchased it from the U.S. Bankruptcy Court and converted the facility into an Oak Furniture manufacturing business. The chemicals used in furniture manufacturing consisted of stain, acetone, water-based lacquer thinner, and motor oil stored in approximately 30 55-gallon drums. The name of the current occupant of the site is Oakwood Interiors located at 1333 South Bonview Avenue in Ontario, CA. The site is in an industrial area. The site was bought by the City of Ontario and remodeled for municipal offices.

The site was investigated and certified with a land use covenant due to contamination left in place with LUC inspections conducted annually to ensure that the contamination under the cap is not disturbed.

Status: CERTIFIED O&M - LAND USE RESTRICTIONS ONLY - LAND USE RESTRICTIONS

Document Type: Site Characterization Report
Date Completed: 11/6/2006
Comments: The objective of the SI is to further assess the site for the possible presence of elevated concentrations of various chemical compounds at the site. This SI report describes site investigation activities performed to provide additional subsurface information to supplement previous environmental investigations performed at the Site. Based upon the results of the site investigation, the nature and extent of the contaminants have been delineated such that potential risks to human health and the environment can be conservatively assessed. DTSC's previous comments regarding the SI have been adequately addressed. Therefore, DTSC hereby approves the SI.

Title: Voluntary Cleanup Agreement

Cleanup Status: ACTIVE AS OF 10/1/2016
Cleanup Oversight Agencies: DTSC - SITE CLEANUP PROGRAM - LEAD AGENCY
School District:
Past Use that Caused Contam: DRY CLEANING
Potential Media Affected: INDOOR AIR, SOIL, SOIL VAPOR
Potential Contamin of Concern:

TETRACHLOROETHYLENE (PCE), TRICHLOROETHYLENE (TCE)

Site History:

The Site is comprised of two units (former and current dry cleaning operations) within an approximately 8-acre, multi-tenant, commercial shopping center. Prior to the initial development in 1982 as Driftwood Village shopping center, the property consisted primarily of agricultural use, including residential use as early as the 1930s. Two units conducted dry cleaning operations: 1) Safeway Cleaners, a former tenant which occupied a unit as early as 1982 to approximately 1989/1990; and 2) Sunshine Cleaners, a current tenant, has occupied a unit as early as 1990 to the present. The Site is currently surrounded by a gas station (northeast), residential us (north and west), agricultural (south), and commercial use (east).

A Voluntary Cleanup Agreement (VCA) to investigate and remediate the Site (originally defined as the entire 8-acre shopping center) under DTSC oversight was fully executed on December 12, 2016. Subsequently, the First Amendment to the VCA, which re-defined the Site as the two units which conducted dry cleaning operations, was executed in October 2018.

After a revised workplan proposing soil and soil vapor sampling activities was submitted in August 2017, DTSC approved the workplan with two conditions in November 2017. Fieldwork activities to collect soil and soil vapor samples commenced in February 2018. An assessment report with the results was submitted in March 2018. Based on the report, which indicated detections of perchloroethylene (PCE), DTSC determined that additional site characterization was necessary. In November 2018, DTSC conditionally approved an addendum to the workplan which proposed additional investigation activities to determine the extent of contamination with soil and soil vapor sampling and to assess potential vapor intrusion with indoor air sampling. The majority of fieldwork activities were completed in March 2019; however, additional soil vapor sampling and the second round of indoor air sampling were subsequently conducted. A report presented results of the soil, soil vapor, and indoor air sampling activities; the report indicated that additional soil

vapor investigation is necessary to determine the extent of contamination.

The Additional Assessment Workplan proposing additional soil vapor investigation activities, as modified, was determined acceptable for implementation by DTSC in March 2020. Associated field activities were scheduled to commence in March 2020. A Periodic Soil Vapor Sampling Workplan, in conjunction with DTSC comments, was acceptable for implementation by DTSC in April 2020. Periodic soil vapor sampling is to be conducted on a semi-annual frequency (for at least two years) beginning May 2020. A single report, Report of Results for Periodic Sampling and Site Assessment, which presented results of implementing the Additional Assessment Workplan and initial semi-annual soil vapor sampling event was submitted in July 2020. In August 2020, DTSC issued a response letter indicating the Site was not adequately characterized, provided comments to the Report, and requested a workplan proposing additional site characterization.

School District: CHINO VALLEY UNIFIED SCHOOL DISTRICT
Past Use that Caused Contam: AGRICULTURAL - ROW CROPS
Potential Media Affected: SOIL VAPOR
Potential Contamin of Concern:

HYDROGEN SULFIDE, METHANE, NITRATE

Site History:

The site is approximately 28-acres of former agricultural land, portions of which were developed in 1992 as the Woodcrest Junior High and the City of Ontario Kimball Park. The site was occupied by the Ferreira Dairy from approximately 1960 to 1992. Dairy facilities included rural residential structures, hay storage sheds, animal pens, and three water retention ponds. All dairy facilities were removed in 1992. The Kimball Park is approximately 6-acres and is owned by the City of Ontario. Chino Valley Unified School District plans to use the park for its sports activities under a joint use agreement. The Woodcrest Junior High was subsequently divided into two school sites, the approximately 12-acres Woodcrest Junior High and the approximately 10-acres Liberty Elementary School. The entire site includes the park, the junior high and the elementary school.

Unplottable Report

No unplottable records were found that may be relevant for the search criteria.

Appendix: Database Descriptions

Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. ERIS updates databases as set out in ASTM Standard E1527-13, Section 8.1.8 Sources of Standard Source Information:

"Government information from nongovernmental sources may be considered current if the source updates the information at least every 90 days, or, for information that is updated less frequently than quarterly by the government agency, within 90 days of the date the government agency makes the information available to the public."

Standard Environmental Record Sources

Federal

Formerly Utilized Sites Remedial Action Program: DOE FUSRAP

The U.S. Department of Energy (DOE) established the Formerly Utilized Sites Remedial Action Program (FUSRAP) in 1974 to remediate sites where radioactive contamination remained from the Manhattan Project and early U.S. Atomic Energy Commission (AEC) operations. The DOE Office of Legacy Management (LM) established long-term surveillance and maintenance (LTS&M) requirements for remediated FUSRAP sites. DOE evaluates the final site conditions of a remediated site on the basis of risk for different future uses. DOE then confirms that LTS&M requirements will maintain protectiveness.

Government Publication Date: Mar 4, 2017

National Priority List: NPL

National Priorities List (Superfund)-NPL: EPA's (United States Environmental Protection Agency) list of the most serious uncontrolled or abandoned hazardous waste sites identified for possible long-term remedial action under the Superfund program. The NPL, which EPA is required to update at least once a year, is based primarily on the score a site receives from EPA's Hazard Ranking System. A site must be on the NPL to receive money from the Superfund Trust Fund for remedial action.

Government Publication Date: Feb 23, 2021

National Priority List - Proposed: PROPOSED NPL

Includes sites proposed (by the EPA, the state, or concerned citizens) for addition to the NPL due to contamination by hazardous waste and identified by the Environmental Protection Agency (EPA) as a candidate for cleanup because it poses a risk to human health and/or the environment.

Government Publication Date: Feb 23, 2021

Deleted NPL: DELETED NPL

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Government Publication Date: Feb 23, 2021

SEMS List 8R Active Site Inventory: SEMS

The Superfund Program has deployed the Superfund Enterprise Management System (SEMS), which integrates multiple legacy systems into a comprehensive tracking and reporting tool. This inventory contains active sites evaluated by the Superfund program that are either proposed to be or are on the National Priorities List (NPL) as well as sites that are in the screening and assessment phase for possible inclusion on the NPL. The Active Site Inventory Report displays site and location information at active SEMS sites. An active site is one at which site assessment, removal, remedial, enforcement, cost recovery, or oversight activities are being planned or conducted.

Government Publication Date: Jan 28, 2021

Inventory of Open Dumps, June 1985: ODI

The Resource Conservation and Recovery Act (RCRA) provides for publication of an inventory of open dumps. The Act defines "open dumps" as facilities which do not comply with EPA's "Criteria for Classification of Solid Waste Disposal Facilities and Practices" (40 CFR 257).

Government Publication Date: Jun 1985

SEMS List 8R Archive Sites: SEMS ARCHIVE

The Superfund Enterprise Management System (SEMS) Archived Site Inventory displays site and location information at sites archived from SEMS. An archived site is one at which EPA has determined that assessment has been completed and no further remedial action is planned under the Superfund program at this time.

Government Publication Date: Jan 28, 2021

Comprehensive Environmental Response, Compensation and Liability Information System - CERCLIS: CERCLIS

Superfund is a program administered by the United States Environmental Protection Agency (EPA) to locate, investigate, and clean up the worst hazardous waste sites throughout the United States. CERCLIS is a database of potential and confirmed hazardous waste sites at which the EPA Superfund program has some involvement. It contains sites that are either proposed to be or are on the National Priorities List (NPL) as well as sites that are in the screening and assessment phase for possible inclusion on the NPL. The EPA administers the Superfund program in cooperation with individual states and tribal governments; this database is made available by the EPA.

Government Publication Date: Oct 25, 2013

EPA Report on the Status of Open Dumps on Indian Lands: IODI

Public Law 103-399, The Indian Lands Open Dump Cleanup Act of 1994, enacted October 22, 1994, identified congressional concerns that solid waste open dump sites located on American Indian or Alaska Native (AI/AN) lands threaten the health and safety of residents of those lands and contiguous areas. The purpose of the Act is to identify the location of open dumps on Indian lands, assess the relative health and environment hazards posed by those sites, and provide financial and technical assistance to Indian tribal governments to close such dumps in compliance with Federal standards and regulations or standards promulgated by Indian Tribal governments or Alaska Native entities.

Government Publication Date: Dec 31, 1998

CERCLIS - No Further Remedial Action Planned: CERCLIS NFRAP

An archived site is one at which EPA has determined that assessment has been completed and no further remedial action is planned under the Superfund program at this time. The Archive designation means that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL). This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Government Publication Date: Oct 25, 2013

CERCLIS Liens: CERCLIS LIENS

A Federal Superfund lien exists at any property where EPA has incurred Superfund costs to address contamination ("Superfund site") and has provided notice of liability to the property owner. A Federal CERCLA ("Superfund") lien can exist by operation of law at any site or property at which EPA has spent Superfund monies. This database is made available by the United States Environmental Protection Agency (EPA).

Government Publication Date: Jan 30, 2014

RCRA CORRACTS-Corrective Action: RCRA CORRACTS

RCRA Info is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. At these sites, the Corrective Action Program ensures that cleanups occur. EPA and state regulators work with facilities and communities to design remedies based on the contamination, geology, and anticipated use unique to each site.

Government Publication Date: Jan 22, 2021

RCRA non-CORRACTS TSD Facilities: RCRA TSD

RCRA Info is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. This database includes Non-Corrective Action sites listed as treatment, storage and/or disposal facilities of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA).

Government Publication Date: Jan 22, 2021

RCRA Generator List: RCRA LQG

RCRA Info is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Large Quantity Generators (LQGs) generate 1,000 kilograms per month or more of hazardous waste or more than one kilogram per month of acutely hazardous waste.

Government Publication Date: Jan 22, 2021

RCRA Small Quantity Generators List: RCRA SQG

RCRA Info is the EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Small Quantity Generators (SQGs) generate more than 100 kilograms, but less than 1,000 kilograms, of hazardous waste per month.

Government Publication Date: Jan 22, 2021

RCRA Very Small Quantity Generators List: RCRA VSQG

RCRA Info is the EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Very Small Quantity Generators (VSQG) generate 100 kilograms or less per month of hazardous waste, or one kilogram or less per month of acutely hazardous waste. Additionally, VSQG may not accumulate more than 1,000 kilograms of hazardous waste at any time.

Government Publication Date: Jan 22, 2021

RCRA Non-Generators: RCRA NON GEN

RCRA Info is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Non-Generators do not presently generate hazardous waste.

Government Publication Date: Jan 22, 2021

Federal Engineering Controls-ECs: FED ENG

Engineering controls (ECs) encompass a variety of engineered and constructed physical barriers (e.g., soil capping, sub-surface venting systems, mitigation barriers, fences) to contain and/or prevent exposure to contamination on a property. This database is made available by the United States Environmental Protection Agency (EPA).

Government Publication Date: Feb 23, 2021

Federal Institutional Controls- ICs: FED INST

Institutional controls are non-engineered instruments, such as administrative and legal controls, that help minimize the potential for human exposure to contamination and/or protect the integrity of the remedy. Although it is EPA's (United States Environmental Protection Agency) expectation that treatment or engineering controls will be used to address principal threat wastes and that groundwater will be returned to its beneficial use whenever practicable, ICs play an important role in site remedies because they reduce exposure to contamination by limiting land or resource use and guide human behavior at a site.

Government Publication Date: Feb 23, 2021

Land Use Control Information System: LUCIS

The LUCIS database is maintained by the U.S. Department of the Navy and contains information for former Base Realignment and Closure (BRAC) properties across the United States.

Government Publication Date: Sep 1, 2006

Emergency Response Notification System: ERNS 1982 TO 1986

Database of oil and hazardous substances spill reports controlled by the National Response Center. The primary function of the National Response Center is to serve as the sole national point of contact for reporting oil, chemical, radiological, biological, and etiological discharges into the environment anywhere in the United States and its territories.

Government Publication Date: 1982-1986

Emergency Response Notification System: ERNS 1987 TO 1989

Database of oil and hazardous substances spill reports controlled by the National Response Center. The primary function of the National Response Center is to serve as the sole national point of contact for reporting oil, chemical, radiological, biological, and etiological discharges into the environment anywhere in the United States and its territories.

Government Publication Date: 1987-1989

Emergency Response Notification System: ERNS

Database of oil and hazardous substances spill reports made available by the United States Coast Guard National Response Center (NRC). The NRC fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. These data contain initial incident data that has not been validated or investigated by a federal/state response agency.

Government Publication Date: Nov 9, 2020

The Assessment, Cleanup and Redevelopment Exchange System (ACRES) Brownfield Database: FED BROWNFIELDS

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties protects the environment, reduces blight, and takes development pressures off greenspaces and working lands. This database is made available by the United States Environmental Protection Agency (EPA).

Government Publication Date: Jan 6, 2021

FEMA Underground Storage Tank Listing: FEMA UST

The Federal Emergency Management Agency (FEMA) of the Department of Homeland Security maintains a list of FEMA owned underground storage tanks.

Government Publication Date: Dec 31, 2017

Facility Response Plan: FRP

List of facilities that have submitted Facility Response Plans (FRP) to EPA. Facilities that could reasonably be expected to cause "substantial harm" to the environment by discharging oil into or on navigable waters are required to prepare and submit Facility Response Plans (FRPs). Harm is determined based on total oil storage capacity, secondary containment and age of tanks, oil transfer activities, history of discharges, proximity to a public drinking water intake or sensitive environments.

Government Publication Date: Dec 2, 2020

Historical Gas Stations: HIST GAS STATIONS

This historic directory of service stations is provided by the Cities Service Company. The directory includes Cities Service filling stations that were located throughout the United States in 1930.

Government Publication Date: Jul 1, 1930

Petroleum Refineries: REFN

List of petroleum refineries from the U.S. Energy Information Administration (EIA) Refinery Capacity Report. Includes operating and idle petroleum refineries (including new refineries under construction) and refineries shut down during the previous year located in the 50 States, the District of Columbia, Puerto Rico, the Virgin Islands, Guam, and other U.S. possessions. Survey locations adjusted using public data.

Government Publication Date: Jul 10, 2020

Petroleum Product and Crude Oil Rail Terminals: BULK TERMINAL

List of petroleum product and crude oil rail terminals made available by the U.S. Energy Information Administration (EIA). Includes operable bulk petroleum product terminals located in the 50 States and the District of Columbia with a total bulk shell storage capacity of 50,000 barrels or more, and/or the ability to receive volumes from tanker, barge, or pipeline; also rail terminals handling the loading and unloading of crude oil that were active between 2017 and 2018. Petroleum product terminals comes from the EIA-815 Bulk Terminal and Blender Report, which includes working, shell in operation, and shell idle for several major product groupings. Survey locations adjusted using public data.

Government Publication Date: Apr 28, 2020

LIEN on Property: SEMS LIEN

The EPA Superfund Enterprise Management System (SEMS) provides LIEN information on properties under the EPA Superfund Program.

Government Publication Date: Jan 28, 2021

Superfund Decision Documents: SUPERFUND ROD

This database contains a listing of decision documents for Superfund sites. Decision documents serve to provide the reasoning for the choice of (or) changes to a Superfund Site cleanup plan. The decision documents include Records of Decision (ROD), ROD Amendments, Explanations of Significant Differences (ESD), along with other associated memos and files. This information is maintained and made available by the US EPA (Environmental Protection Agency).

Government Publication Date: Feb 23, 2021

State

State Response Sites: RESPONSE

A list of identified confirmed release sites where the Department of Toxic Substances Control (DTSC) is involved in remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk. This database is state equivalent NPL.

Government Publication Date: Jan 13, 2021

EnviroStor Database: ENVIROSTOR

The EnviroStor Data Management System is made available by the Department of Toxic Substances Control (DTSC). Includes Corrective Action sites, Tiered Permit sites, Historical Sites and Evaluation/Investigation sites. This database is state equivalent CERCLIS.

Government Publication Date: Jan 13, 2021

Delisted State Response Sites: DELISTED ENVS

Sites removed from the list of State Response Sites made available by the EnviroStor Data Management System, Department of Toxic Substances Control (DTSC).

Government Publication Date: Jan 13, 2021

Solid Waste Information System (SWIS): SWF/LF

The Solid Waste Information System (SWIS) database made available by the Department of Resources Recycling and Recovery (CalRecycle) contains information on solid waste facilities, operations, and disposal sites throughout the State of California. The types of facilities found in this database include landfills, transfer stations, material recovery facilities, composting sites, transformation facilities, waste tire sites, and closed disposal sites.

Government Publication Date: Feb 8, 2021

Solid Waste Disposal Sites with Waste Constituents Above Hazardous Waste Levels: SWRCB SWF

This is a list of solid waste disposal sites identified by California State Water Resources Control Board with waste constituents above hazardous waste levels outside the waste management unit.

Government Publication Date: Sep 20, 2006

EnviroStor Hazardous Waste Facilities: HWP

A list of hazardous waste facilities including permitted, post-closure and historical facilities found in the Department of Toxic Substances Control (DTSC) EnviroStor database.

Government Publication Date: Jan 13, 2021

Sites Listed in the Solid Waste Assessment Test (SWAT) Program Report: SWAT

In a 1993 Memorandum of Understanding, the State Water Resources Control Board (SWRCB) agreed to submit a comprehensive report on the Solid Waste Assessment Test (SWAT) Program to the California Integrated Waste Management Board (CIWMB). This report summarizes the work completed to date on the SWAT Program, and addresses both the impacts that leakage from solid waste disposal sites (SWDS) may have upon waters of the State and the actions taken to address such leakage.

Government Publication Date: Dec 31, 1995

Construction and Demolition Debris Recyclers: C&D DEBRIS RECY

This listing of Construction and Demolition Debris Recyclers is maintained by the California Intergrated Waste Management Board-common C&D materials include lumber, drywall, metals, masonry (brick, concrete, etc.), carpet, plastic, pipe, rocks, dirt, paper, cardboard, or green waste related to land development.

Government Publication Date: Jun 20, 2018

Recycling Centers: RECYCLING

This list of Certified Recycling Centers that are operating under the state of California's Beverage Container Recycling Program is maintained by the California Department of Resources Recycling and Recovery.

Government Publication Date: Nov 2, 2020

Listing of Certified Processors: PROCESSORS

This list of Certified Processors that are operating under the state of California's Beverage Container Recycling Program is maintained by the California Department of Resources Recycling and Recovery.

Government Publication Date: Oct 27, 2020

Listing of Certified Dropoff, Collection, and Community Service Programs: CONTAINER RECY

This list of Certified Dropoff, Collection, and Community Service Programs (non-buyback) operating under the state of California's Beverage Container Recycling Program is maintained by the California Department of Resources Recycling and Recovery.

Government Publication Date: Dec 16, 2020

Land Disposal Sites: LDS

Land Disposal Sites in GeoTracker, the State Water Resources Control Board (SWRCB)'s data management system. The Land Disposal program regulates of waste discharge to land for treatment, storage and disposal in waste management units. Waste management units include waste piles, surface impoundments, and landfills.

Government Publication Date: Mar 9, 2021

Leaking Underground Fuel Tank Reports: LUST

List of Leaking Underground Storage Tanks within the Cleanup Sites data in GeoTracker database. GeoTracker is the State Water Resources Control Board's (SWRCB) data management system for managing sites that impact groundwater, especially those that require groundwater cleanup (Underground Storage Tanks, Department of Defense and Site Cleanup Program) as well as permitted facilities such as operating Underground Storage Tanks. The Leak Prevention Program that overlooks LUST sites is the SWRCB in California's Environmental Protection Agency.

Government Publication Date: Mar 9, 2021

Delisted Leaking Storage Tanks: DELISTED LST

List of Leaking Underground Storage Tanks (LUST) cleanup sites removed from GeoTracker, the State Water Resources Control Board (SWRCB)'s database system, as well as sites removed from the SWRCB's list of UST Case closures.

Government Publication Date: Mar 9, 2021

Permitted Underground Storage Tank (UST) in GeoTracker: UST

List of Permitted Underground Storage Tank (UST) sites made available by the State Water Resources Control Board (SWRCB) in California's Environmental Protection Agency (EPA).

Government Publication Date: Mar 23, 2021

Proposed Closure of Underground Storage Tank Cases: UST CLOSURE

List of UST cases that are being considered for closure by either the California Environmental Protection Agency, State Water Resources Control Board or the Executive Director that have been posted for a 60-day public comment period.

Government Publication Date: Feb 2, 2021

Historical Hazardous Substance Storage Information Database: HHSS

The Historical Hazardous Substance Storage database contains information collected in the 1980s from facilities that stored hazardous substances. The information was originally collected on paper forms, was later transferred to microfiche, and recently indexed as a searchable database. When using this database, please be aware that it is based upon self-reported information submitted by facilities which has not been independently verified. It is unlikely that every facility responded to the survey and the database should not be expected to be a complete inventory of all facilities that were operating at that time. This database is maintained by the California State Water Resources Control Board's (SWRCB) Geotracker.

Government Publication Date: Aug 27, 2015

Statewide Environmental Evaluation and Planning System: UST SWEEPS

The Statewide Environmental Evaluation and Planning System (SWEEPS) is a historical listing of active and inactive underground storage tanks made available by the California State Water Resources Control Board (SWRCB).

Government Publication Date: Oct 1, 1994

Aboveground Storage Tanks: AST

A statewide list from 2009 of aboveground storage tanks (ASTs) made available by the Cal FIRE Office of the State Fire Marshal (OSFM). This list is no longer maintained or updated by the Cal FIRE OSFM.

Government Publication Date: Aug 31, 2009

SWRCB Historical Aboveground Storage Tanks: AST SWRCB

A list of aboveground storage tanks made available by the California State Water Resources Control Board (SWRCB). Effective January 1, 2008, the Certified Unified Program Agencies (CUPAs) are vested with the responsibility and authority to implement the Aboveground Petroleum Storage Act (APSA).

Government Publication Date: Dec 1, 2007

Oil and Gas Facility Tanks: TANK OIL GAS

Locations of oil and gas tanks that fall under the jurisdiction of the Geologic Energy Management Division of the California Department of Conservation (CalGEM) (CCR 1760). CalGEM was formerly the Division of Oil, Gas, and Geothermal Resources (DOGGR).

Government Publication Date: Feb 12, 2021

Delisted Storage Tanks: DELISTED TNK

This database contains a list of storage tank sites that were removed by the State Water Resources Control Board (SWRCB) in California's Environmental Protection Agency (EPA) and the Cal FIRE Office of State Fire Marshal (OSFM).

Government Publication Date: Mar 18, 2021

California Environmental Reporting System (CERS) Tanks: CERS TANK

List of sites in the California Environmental Protection Agency (CalEPA) Regulated Site Portal which fall under the Aboveground Petroleum Storage and Underground Storage Tank regulatory programs. The CalEPA oversees the statewide implementation of the Unified Program which applies regulatory standards to protect Californians from hazardous waste and materials.

Government Publication Date: Feb 9, 2021

Delisted California Environmental Reporting System (CERS) Tanks: DELISTED CTNK

This database contains a list of Aboveground Petroleum Storage and Underground Storage Tank sites that were removed from in the California Environmental Protection Agency (CalEPA) Regulated Site Portal.

Government Publication Date: Feb 9, 2021

Historical Hazardous Substance Storage Container Information - Facility Summary: HIST TANK

The State Water Resources Control Board maintained the Hazardous Substance Storage Containers listing and inventory in th 1980s. This facility summary lists historic tank sites where the following container types were present: farm motor vehicle fuel tanks; waste tanks; sumps; pits, ponds, lagoons, and others; and all other product tanks. This set, published in May 1988, lists facility and owner information, as well as the number of containers. This data is historic and will not be updated.

Government Publication Date: May 27, 1988

Site Mitigation and Brownfields Reuse Program Facility Sites with Land Use Restrictions: LUR

The Department of Toxic Substances Control (DTSC) Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents land use restrictions that are active. Some sites have multiple land use restrictions.

Government Publication Date: Jan 13, 2021

CALSITES Database: CALSITES

This historical database was maintained by the Department of Toxic Substance Control (DTSC) for more than a decade. CALSITES contains information on Brownfield properties with confirmed or potential hazardous contamination. In 2006, DTSC introduced EnviroStor as the latest Brownfields site database.

Government Publication Date: May 1, 2004

Hazardous Waste Management Program Facility Sites with Deed / Land Use Restrictions: HLUR

The Department of Toxic Substances Control (DTSC) Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Government Publication Date: Feb 18, 2021

Deed Restrictions and Land Use Restrictions: DEED

List of Deed Restrictions, Land Use Restrictions and Covenants in GeoTracker made available by the State Water Resources Control Board (SWRCB) in California's Environmental Protection Agency. A deed restriction (land use covenant) may be required to facilitate the remediation of past environmental contamination and to protect human health and the environment by reducing the risk of exposure to residual hazardous materials.

Government Publication Date: Mar 9, 2021

Voluntary Cleanup Program: VCP

List of sites in the Voluntary Cleanup Program made available by the Department of Toxic Substances and Control (DTSC). The Voluntary Cleanup Program was designed to respond to lower priority sites. Under the Voluntary Cleanup Program, DTSC enters site-specific agreements with project proponents for DTSC oversight of site assessment, investigation, and/or removal or remediation activities, and the project proponents agree to pay DTSC's reasonable costs for those services.

Government Publication Date: Jan 13, 2021

GeoTracker Cleanup Program Sites: CLEANUP SITES

A list of Cleanup Program sites in the state of California made available by The State Water Resources Control Board (SWRCB) of the California Environmental Protection Agency (EPA). SWRCB tracks leaking underground storage tank cleanups as well as other water board cleanups.

Government Publication Date: Mar 9, 2021

Delisted County Records: DELISTED COUNTY

Records removed from county or CUPA databases. Records may be removed from the county lists made available by the respective county departments because they are inactive, or because they have been deemed to be below reportable thresholds.

Government Publication Date: Apr 1, 2021

Tribal

Leaking Underground Storage Tanks (LUSTs) on Indian Lands: INDIAN LUST
LUSTs on Tribal/Indian Lands in Region 9, which includes California.
Government Publication Date: Apr 8, 2020

Underground Storage Tanks (USTs) on Indian Lands: INDIAN UST
USTs on Tribal/Indian Lands in Region 9, which includes California.
Government Publication Date: Apr 8, 2020

Delisted Tribal Leaking Storage Tanks: DELISTED ILST
Leaking Underground Storage Tank facilities which have been removed from the Regional Tribal LUST lists made available by the EPA.
Government Publication Date: Apr 14, 2020

Delisted Tribal Underground Storage Tanks: DELISTED IUST
Underground Storage Tank facilities which have been removed from the Regional Tribal UST lists made available by the EPA.
Government Publication Date: Apr 14, 2020

County

San Bernardino County - CUPA List: SANBERN CUPA
A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in San Bernardino County. This list is made available by San Bernardino County Fire Department which is the CUPA for all areas of the County except the city of Victorville.
Government Publication Date: Mar 4, 2021

Additional Environmental Record Sources

Federal

PFOA/PFOS Contaminated Sites: PFAS NPL
List of sites where PFOA or PFOS contaminants have been found in drinking water or soil. Made available by the Federal Environmental Protection Agency (EPA).
Government Publication Date: Mar 1, 2021

Facility Registry Service/Facility Index: FINDS/FRS
The Facility Registry Service (FRS) is a centrally managed database that identifies facilities, sites, or places subject to environmental regulations or of environmental interest. FRS creates high-quality, accurate, and authoritative facility identification records through rigorous verification and management procedures that incorporate information from program national systems, state master facility records, and data collected from EPA's Central Data Exchange registrations and data management personnel. This list is made available by the Environmental Protection Agency (US EPA).
Government Publication Date: Nov 2, 2020

Toxics Release Inventory (TRI) Program: TRIS
The EPA's Toxics Release Inventory (TRI) is a database containing data on disposal or other releases of over 650 toxic chemicals from thousands of U. S. facilities and information about how facilities manage those chemicals through recycling, energy recovery, and treatment. One of TRI's primary purposes is to inform communities about toxic chemical releases to the environment.
Government Publication Date: Feb 19, 2020

Perfluorinated Alkyl Substances (PFAS) Releases: PFAS TRI

List of Toxics Release Inventory (TRI) facilities at which the reported chemical is a Per- or polyfluorinated alkyl substance (PFAS) included in the Environmental Protection Agency (EPA)'s consolidated PFAS Master List of PFAS Substances. The EPA's Toxics Release Inventory (TRI) is a database containing data on disposal or other releases of over 650 toxic chemicals from thousands of U.S. facilities and information about how facilities manage those chemicals through recycling, energy recovery, and treatment.

Government Publication Date: Feb 19, 2020

Perfluorinated Alkyl Substances (PFAS) Water Quality: PFAS WATER

The Water Quality Portal (WQP) is a cooperative service sponsored by the United States Geological Survey (USGS), the Environmental Protection Agency (EPA), and the National Water Quality Monitoring Council (NWQMC). This listing includes records from the Water Quality Portal where the characteristic (environmental measurement) is in the Environmental Protection Agency (EPA)'s consolidated PFAS Master List of PFAS Substances.

Government Publication Date: Jul 20, 2020

Hazardous Materials Information Reporting System: HMIRS

US DOT - Department of Transportation Pipeline and Hazardous Materials Safety Administration (PHMSA) Incidents Reports Database taken from Hazmat Intelligence Portal, U.S. Department of Transportation.

Government Publication Date: Sep 1, 2020

National Clandestine Drug Labs: NCDL

The U.S. Department of Justice ("the Department") provides this data as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy.

Government Publication Date: Oct 5, 2020

Toxic Substances Control Act: TSCA

The Environmental Protection Agency (EPA) is amending the Toxic Substances Control Act (TSCA) section 8(a) Inventory Update Reporting (IUR) rule and changing its name to the Chemical Data Reporting (CDR) rule.

The CDR enables EPA to collect and publish information on the manufacturing, processing, and use of commercial chemical substances and mixtures (referred to hereafter as chemical substances) on the TSCA Chemical Substance Inventory (TSCA Inventory). This includes current information on chemical substance production volumes, manufacturing sites, and how the chemical substances are used. This information helps the Agency determine whether people or the environment are potentially exposed to reported chemical substances. EPA publishes submitted CDR data that is not Confidential Business Information (CBI).

Government Publication Date: Apr 11, 2019

Hist TSCA: HIST TSCA

The Environmental Protection Agency (EPA) is amending the Toxic Substances Control Act (TSCA) section 8(a) Inventory Update Reporting (IUR) rule and changing its name to the Chemical Data Reporting (CDR) rule.

The 2006 IUR data summary report includes information about chemicals manufactured or imported in quantities of 25,000 pounds or more at a single site during calendar year 2005. In addition to the basic manufacturing information collected in previous reporting cycles, the 2006 cycle is the first time EPA collected information to characterize exposure during manufacturing, processing and use of organic chemicals. The 2006 cycle also is the first time manufacturers of inorganic chemicals were required to report basic manufacturing information.

Government Publication Date: Dec 31, 2006

FTTS Administrative Case Listing: FTTS ADMIN

An administrative case listing from the Federal Insecticide, Fungicide, & Rodenticide Act (FIFRA) and Toxic Substances Control Act (TSCA), together known as FTTS. This database was obtained from the Environmental Protection Agency's (EPA) National Compliance Database (NCDB). The FTTS and NCDB was shut down in 2006.

Government Publication Date: Jan 19, 2007

FTTS Inspection Case Listing: FTTS INSP

An inspection case listing from the Federal Insecticide, Fungicide, & Rodenticide Act (FIFRA) and Toxic Substances Control Act (TSCA), together known as FTTS. This database was obtained from the Environmental Protection Agency's (EPA) National Compliance Database (NCDB). The FTTS and NCDB was shut down in 2006.

Government Publication Date: Jan 19, 2007

Potentially Responsible Parties List: PRP

Early in the cleanup process, the Environmental Protection Agency (EPA) conducts a search to find the potentially responsible parties (PRPs). EPA looks for evidence to determine liability by matching wastes found at the site with parties that may have contributed wastes to the site.

Government Publication Date: Feb 23, 2021

State Coalition for Remediation of Drycleaners Listing: SCRD DRYCLEANER

The State Coalition for Remediation of Drycleaners (SCRD) was established in 1998, with support from the U.S. Environmental Protection Agency (EPA) Office of Superfund Remediation and Technology Innovation. Coalition members are states with mandated programs and funding for drycleaner site remediation. Current members are Alabama, Connecticut, Florida, Illinois, Kansas, Minnesota, Missouri, North Carolina, Oregon, South Carolina, Tennessee, Texas, and Wisconsin.

Government Publication Date: Nov 08, 2017

Integrated Compliance Information System (ICIS): ICIS

The Integrated Compliance Information System (ICIS) is a system that provides information for the Federal Enforcement and Compliance (FE&C) and the National Pollutant Discharge Elimination System (NPDES) programs. The FE&C component supports the Environmental Protection Agency's (EPA) Civil Enforcement and Compliance program activities. These activities include Compliance Assistance, Compliance Monitoring and Enforcement. The NPDES program supports tracking of NPDES permits, limits, discharge monitoring data and other program reports.

Government Publication Date: Jan 6, 2021

Drycleaner Facilities: FED DRYCLEANERS

A list of drycleaner facilities from Enforcement and Compliance History Online (ECHO) online search. The Environmental Protection Agency (EPA) tracks facilities that possess NAIC and SIC codes that classify businesses as drycleaner establishments.

Government Publication Date: Feb 17, 2021

Delisted Drycleaner Facilities: DELISTED FED DRY

List of sites removed from the list of Drycleaner Facilities (sites in the EPA's Integrated Compliance Information System (ICIS) with NAIC or SIC codes identifying the business as a drycleaner establishment).

Government Publication Date: Feb 17, 2021

Formerly Used Defense Sites: FUDS

Formerly Used Defense Sites (FUDS) are properties that were formerly owned by, leased to, or otherwise possessed by and under the jurisdiction of the Secretary of Defense prior to October 1986, where the Department of Defense (DoD) is responsible for an environmental restoration. This list is published by the U.S. Army Corps of Engineers.

Government Publication Date: Jan 28, 2020

Former Military Nike Missile Sites: FORMER NIKE

This information was taken from report DRXTH-AS-IA-83A016 (Historical Overview of the Nike Missile System, 12/1984) which was performed by Environmental Science and Engineering, Inc. for the U.S. Army Toxic and Hazardous Materials Agency Assessment Division. The Nike system was deployed between 1954 and the mid-1970's. Among the substances used or stored on Nike sites were liquid missile fuel (JP-4); starter fluids (UDKH, aniline, and furfuryl alcohol); oxidizer (IRFNA); hydrocarbons (motor oil, hydraulic fluid, diesel fuel, gasoline, heating oil); solvents (carbon tetrachloride, trichloroethylene, trichloroethane, stoddard solvent); and battery electrolyte. The quantities of material a disposed of and procedures for disposal are not documented in published reports. Virtually all information concerning the potential for contamination at Nike sites is confined to personnel who were assigned to Nike sites. During deactivation most hardware was shipped to depot-level supply points. There were reportedly instances where excess materials were disposed of on or near the site itself at closure. There was reportedly no routine site decontamination.

Government Publication Date: Dec 1, 1984

PHMSA Pipeline Safety Flagged Incidents: PIPELINE INCIDENT

A list of flagged pipeline incidents made available by the U.S. Department of Transportation (US DOT) Pipeline and Hazardous Materials Safety Administration (PHMSA). PHMSA regulations require incident and accident reports for five different pipeline system types.

Government Publication Date: Jul 7, 2020

Material Licensing Tracking System (MLTS): MLTS

A list of sites that store radioactive material subject to the Nuclear Regulatory Commission (NRC) licensing requirements. This list is maintained by the NRC. As of September 2016, the NRC no longer releases location information for sites. Site locations were last received in July 2016.

Government Publication Date: Aug 5, 2020

Historic Material Licensing Tracking System (MLTS) sites: HIST MLTS

A historic list of sites that have inactive licenses and/or removed from the Material Licensing Tracking System (MLTS). In some cases, a site is removed from the MLTS when the state becomes an "Agreement State". An Agreement State is a State that has signed an agreement with the Nuclear Regulatory Commission (NRC) authorizing the State to regulate certain uses of radioactive materials within the State.

Government Publication Date: Jan 31, 2010

Mines Master Index File: MINES

The Master Index File (MIF) contains mine identification numbers issued by the Department of Labor Mine Safety and Health Administration (MSHA) for mines active or opened since 1971. Note that addresses may or may not correspond with the physical location of the mine itself.

Government Publication Date: Nov 3, 2020

Surface Mining Control and Reclamation Act Sites: SMCRA

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by the Office of Surface Mining Reclamation and Enforcement (OSMRE) to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of Abandoned Mine Land (AML) impacts, as well as information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

Government Publication Date: Dec 18, 2020

Mineral Resource Data System: MRDS

The Mineral Resource Data System (MRDS) is a collection of reports describing metallic and nonmetallic mineral resources throughout the world. Included are deposit name, location, commodity, deposit description, geologic characteristics, production, reserves, resources, and references. This database contains the records previously provided in the Mineral Resource Data System (MRDS) of USGS and the Mineral Availability System/Mineral Industry Locator System (MAS/MILS) originated in the U.S. Bureau of Mines, which is now part of USGS. The USGS has ceased systematic updates of the MRDS database with their focus more recently on deposits of critical minerals while providing a well-documented baseline of historical mine locations from USGS topographic maps.

Government Publication Date: Mar 15, 2006

Uranium Mill Tailings Radiation Control Act Sites: URANIUM

The Legacy Management Office of the Department of Energy (DOE) manages radioactive and chemical waste, environmental contamination, and hazardous material at over 100 sites across the U.S. The L.M. Office manages this database of sites registered under the Uranium Mill Tailings Control Act (UMTRCA).

Government Publication Date: Mar 4, 2017

Alternative Fueling Stations: ALT FUELS

List of alternative fueling stations made available by the US Department of Energy's Office of Energy Efficiency & Renewable Energy. Includes Biodiesel stations, Ethanol (E85) stations, Liquefied Petroleum Gas (Propane) stations, Ethanol (E85) stations, Natural Gas stations, Hydrogen stations, and Electric Vehicle Supply Equipment (EVSE). The National Renewable Energy Laboratory (NREL) obtains information about new stations from trade media, Clean Cities coordinators, a Submit New Station form on the Station Locator website, and through collaborating with infrastructure equipment and fuel providers, original equipment manufacturers (OEMs), and industry groups.

Government Publication Date: Jan 18, 2021

Registered Pesticide Establishments: SSTS

List of active EPA-registered foreign and domestic pesticide-producing and device-producing establishments based on data from the Section Seven Tracking System (SSTS). The Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) Section 7 requires that facilities producing pesticides, active ingredients, or devices be registered. The list of establishments is made available by the EPA.

Government Publication Date: Mar 31, 2020

Polychlorinated Biphenyl (PCB) Notifiers: PCB

Facilities included in the national list of facilities that have notified the United States Environmental Protection Agency (EPA) of Polychlorinated Biphenyl (PCB) activities. Any company or person storing, transporting or disposing of PCBs or conducting PCB research and development must notify the EPA and receive an identification number.

Government Publication Date: Nov 19, 2020

State

Dry Cleaning Facilities: DRYCLEANERS

A list of drycleaner related facilities that have EPA ID numbers. These are facilities with certain SIC codes: power laundries, family and commercial, linen supply, commercial laundry, dry cleaning and pressing machines - Coin Operated Laundry and Dry Cleaning. This is provided by the Department of Toxic Substance Control.

Government Publication Date: Feb 22, 2021

Delisted Drycleaners: DELISTED DRYCLEANERS

Sites removed from the list of drycleaner related facilities that have EPA ID numbers, made available by the California Department of Toxic Substance Control.

Government Publication Date: Feb 22, 2021

Non-Toxic Dry Cleaning Incentive Program: DRYC GRANT

A list of grant recipients of the Non-Toxic Dry Cleaning Incentive Program made available by the California Air Resources Board (CARB). The program provides grants to eligible dry cleaning businesses to assist them in transitioning away from PERC machines to alternative non-toxic and non-smog forming technologies.

Government Publication Date: Feb 28, 2018

Per- and Polyfluoroalkyl Substances (PFAS): PFAS

List of sites from the State Water Resources Control Board (SWRCB)'s GeoTracker at which one or more of the potential contaminants of concern are in the PFAS Master List of PFAS Substances made available by the Environmental Protection Agency (US EPA).

Government Publication Date: Mar 9, 2021

PFOA/PFOS Groundwater: PFAS GW

A list of water wells from the Groundwater Ambient Monitoring and Assessment Program (GAMA) Groundwater Information System with the groundwater chemical perfluorooctanoic acid (PFOA) (NL = 0.014 UG/L) or perfluorooctanoic sulfonate (PFOS) (NL = 0.013 UG/L). The GAMA Groundwater Information System search is made available by California Water Boards.

Government Publication Date: Oct 22, 2020

Hazardous Waste and Substances Site List - Site Cleanup: HWSS CLEANUP

The Hazardous Waste and Substances Sites (Cortese) List is a planning document used by the State, local agencies and developers to comply with the California Environmental Quality Act requirements in providing information about the location of hazardous materials release sites. This list is published by California Department of Toxic Substance Control.

Government Publication Date: Nov 10, 2020

List of Hazardous Waste Facilities Subject to Corrective Action: DTSC HWF

This is a list of hazardous waste facilities identified in Health and Safety Code (HSC) § 25187.5. These facilities are those where Department of Toxic Substances Control (DTSC) has taken or contracted for corrective action because a facility owner/operator has failed to comply with a date for taking corrective action in an order issued under HSC § 25187, or because DTSC determined that immediate corrective action was necessary to abate an imminent or substantial endangerment.

Government Publication Date: Jul 18, 2016

EnviroStor Inspection, Compliance, and Enforcement: INSP COMP ENF

A list of permitted facilities with inspections and enforcements tracked in the Department of Toxic Substance Control (DTSC) EnviroStor.

Government Publication Date: Oct 7, 2020

School Property Evaluation Program Sites: SCH

A list of sites registered with The Department of Toxic Substances Control (DTSC) School Property Evaluation and Cleanup (SPEC) Division. SPEC is responsible for assessing, investigating and cleaning up proposed school sites. The Division ensures that selected properties are free of contamination or, if the properties were previously contaminated, that they have been cleaned up to a level that protects the students and staff who will occupy the new school.

Government Publication Date: Jan 13, 2021

California Hazardous Material Incident Report System (CHMIRS): CHMIRS

A list of reported hazardous material incidents, spills, and releases from the California Hazardous Material Incident Report System (CHMIRS). This list has been made available by the California Office of Emergency Services (OES).

Government Publication Date: Jan 21, 2021

Historical California Hazardous Material Incident Report System (CHMIRS): HIST CHMIRS

A list of reported hazardous material incidents, spills, and releases from the California Hazardous Material Incident Report System (CHMIRS) prior to 1993. This list has been made available by the California Office of Emergency Services (OES).

Government Publication Date: Jan 1, 1993

Hazardous Waste Manifest Data: HAZNET

A list of hazardous waste manifests received each year by Department of Toxic Substances Control (DTSC). The volume of manifests is typically 900,000 - 1,000,000 annually, representing approximately 450,000 - 500,000 shipments.
Government Publication Date: Oct 24, 2016

Historical Hazardous Waste Manifest Data: HIST MANIFEST
A list of historic hazardous waste manifests received by the Department of Toxic Substances Control (DTSC) from year the 1980 to 1992. The volume of manifests is typically 900,000 - 1,000,000 annually, representing approximately 450,000 - 500,000 shipments.
Government Publication Date: Dec 31, 1992

DTSC Registered Hazardous Waste Transporters: HW TRANSPORT
The California Department of Toxic Substances Control (DTSC) maintains this list of Registered Hazardous Waste Transporters.
Government Publication Date: Oct 19, 2020

Registered Waste Tire Haulers: WASTE TIRE
This list of registered waste tire haulers is maintained by the California Department of Resources Recycling and Recovery.
Government Publication Date: Dec 16, 2020

California Medical Waste Management Program Facility List: MEDICAL WASTE
This list of Medical Waste Management Program Facilities is maintained by the California Department of Public Health. The Medical Waste Management Program (MWMP) regulates the generation, handling, storage, treatment, and disposal of medical waste by providing oversight for the implementation of the Medical Waste Management Act (MWMA). The MWMP permits and inspects all medical waste off-site treatment facilities, medical waste transporters, and medical waste transfer stations. This list contains transporters, treatment, and transfer facilities.
Government Publication Date: Dec 31, 2020

Historical Cortese List: HIST CORTESE
List of sites which were once included on the Cortese list. The Hazardous Waste and Substances Sites (Cortese) List is a planning document used by the State, local agencies and developers to comply with the California Environmental Quality Act requirements for providing information about the location of hazardous sites.
Government Publication Date: Nov 13, 2008

Cease and Desist Orders and Cleanup and Abatement Orders: CDO/CAO
The California Environment Protection Agency "Cortese List" of active Cease and Desist Orders (CDO) and Cleanup and Abatement Orders (CAO). This list contains many CDOs and CAOs that do NOT concern the discharge of wastes that are hazardous materials. Many of the listed orders concern, as examples, discharges of domestic sewage, food processing wastes, or sediment that do not contain hazardous materials, but the Water Boards' database does not distinguish between these types of orders.
Government Publication Date: Feb 16, 2012

California Environmental Reporting System (CERS) Hazardous Waste Sites: CERS HAZ
List of sites in the California Environmental Protection Agency (CalEPA) Regulated Site Portal which fall under the following regulatory programs: Hazardous Chemical Management, Hazardous Waste Onsite Treatment, Household Hazardous Waste Collection, Hazardous Waste Generator, RCRA LQ HW Generator. The CalEPA oversees the statewide implementation of the Unified Program which applies regulatory standards to protect Californians from hazardous waste and materials.
Government Publication Date: Feb 9, 2021

Delisted Environmental Reporting System (CERS) Hazardous Waste Sites: DELISTED HAZ
This database contains a list of sites that were removed from the California Environmental Protection Agency (CalEPA) in the following regulatory programs: Hazardous Chemical Management, Hazardous Waste Onsite Treatment, Household Hazardous Waste Collection, Hazardous Waste Generator, RCRA LQ HW Generator.
Government Publication Date: Nov 29, 2018

Sites in GeoTracker: GEOTRACKER
GeoTracker is the State Water Resource Control Boards' data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater. This is a list of sites in GeoTracker that aren't otherwise categorized as LUST, Land Disposal Sites (LDS), Cleanup Sites, or sites having Waste Discharge Requirements (WDR). This listing includes program types such as Underground Injection Control (UIC), Confined Animal Facilities (CAF), Irrigated Lands Regulatory Program, plans, and non-case information.
Government Publication Date: Mar 9, 2021

Mines Listing: MINE

This list includes mine site locations extracted from the Mines Online database, maintained by the California Department of Conservation. Mines Online (MOL) is an interactive web map designed with GIS features that provide information such as the mine name, mine status, commodity sold, location, and other mine specific data. Please note: Mine location information is provided to assist experts in determining the location of mine operators in accordance with California Civil Code section 1103.4 and reflects information reported by mine operators in annual reports provided under Public Resources Code section 2207. While the Division of Mine Reclamation (DMR) attempts to populate MOL with accurate location information, the DMR cannot guarantee the accuracy of operator reported location information.

Government Publication Date: Jan 12, 2021

Recorded Environmental Cleanup Liens: LIEN

The California Department of Toxic Substance Control (DTSC) maintains this list of liens placed upon real properties. A lien is utilized by the DTSC to obtain reimbursement from responsible parties for costs associated with the remediation of contaminated properties.

Government Publication Date: Nov 16, 2020

Waste Discharge Requirements: WASTE DISCHG

List of sites in California State Water Resources Control Board (SWRCB) Waste Discharge Requirements (WDRs) Program in California, made available by the SWRCB via GeoTracker. The WDR program regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

Government Publication Date: Mar 9, 2021

Toxic Pollutant Emissions Facilities: EMISSIONS

A list of criteria and toxic pollutant emissions data for facilities in California made available by the California Environmental Protection Agency - Air Resources Board (ARB). Risk data may be based on previous inventory submittals. The toxics data are submitted to the ARB by the local air districts as requirement of the Air Toxics "Hot Spots" Program. This program requires emission inventory updates every four years.

Government Publication Date: Dec 31, 2018

Clandestine Drug Lab Sites: CDL

The Department of Toxic Substances Control (DTSC) maintains a listing of drug lab sites. DTSC is responsible for removal and disposal of hazardous substances discovered by law enforcement officials while investigating illegal/clandestine drug laboratories.

Government Publication Date: Jan 19, 2021

Tribal

No Tribal additional environmental record sources available for this State.

County

San Bernardino County - Medical Waste Facility List: SANBERN MED WSTE

This list of San Bernardino County medical waste facilities is maintained by the County of San Bernardino Department of Public Health Medical Waste Program. The Medical Waste Program regulates generators of medical waste based on the Medical Waste Management Act. The program inspects medical waste facilities, facilities with on-site medical waste treatment units, and common storage areas annually. This program also investigates complaints regarding mishandling of medical waste and facilities that may be operating without a valid health permit. Some facilities that may generate medical waste include hospitals, skilled nursing facilities, blood banks, and doctors, dental and veterinarian offices.

Government Publication Date: Dec 22, 2020

Definitions

Database Descriptions: This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

Detail Report: This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

Distance: The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

Direction: The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

Elevation: The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

Executive Summary: This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

Map Key: The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

Unplottables: These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.

APPENDIX C

USER QUESTIONNAIRE

PHASE I ENVIRONMENTAL SITE ASSESSMENT – ASTM 1527-13
USER QUESTIONNAIRE

In order to qualify for one of the Landowner Liability Protections offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the "Brownfields Amendments") the user should provide the following information (if available) to the environmental professional.

1) Title Review - Environmental cleanup liens that are filed or recorded against the site (40 CFR 312.25). ***Are you aware of any environmental cleanup liens against the property that are filed or recorded under federal, tribal, state or local law?*** **NO**

2) Activity and land use limitations that are in place on the site or that have been filed or recorded in a registry (40 CFR 312.26). ***Are you aware of any activity and use limitations (AULs), such as engineering controls, land use restrictions or institutional controls that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state or local law?*** **NO**

3) Specialized knowledge or experience of the person seeking to qualify for the LLP (40 CFR 312.28). ***Do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?***

NO

4) Relationship of the purchase price to the fair market value of the property if it were not contaminated (40 CFR 312.29). ***Does the purchase price being paid for this property reasonably reflect the fair market value of the property?*** **YES**

If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?

5) Commonly known or reasonably ascertainable information about the property (40 CFR 312.30). ***Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases of hazardous materials?***

(a.) Do you know the past uses of the property? **NO**

(b.) Do you know of specific chemicals that are present or once were present at the property? **NO**

(c.) Do you know of spills or other chemical releases that have taken place at the property? **NO**

(d.) Do you know of any environmental cleanups that have taken place at the property? **NO**

User's Initials TM

Property Name ___Bon View

6) The degree of obviousness of the presence, or likely presence, of contamination at the property, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31). ***Based on your knowledge and experience related to the property are there any obvious indicators that point to the presence, or likely presence, of contamination at the property?***

NO

7) Proceedings Involving the Property Pursuant to ASTM E 1527-13 §10.9, ***As the user of this ESA do you know of (1) any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the property; (2) any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the property; and (3) any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products?***

NO

SIGNATURE

I have completed this *User Questionnaire* to the best of my actual knowledge only, and provided readily available information, if any, as stated in this document to the environmental professional as of the following date. The information contained in this document does not constitute a warranty or guarantee of any kind as to the accuracy of any third party information provided, and the undersigned disclaims any liability for the reliance on any such information by others.

LICENSED CONTRACTOR'S DECLARATION

I hereby affirm that I am licensed under provisions of Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code and my license is in full force and effect

SIGNATURE _____ DATE 11/26/84

OWNER-BUILDER DECLARATION

I hereby affirm that I am exempt from the Contractor's License Law for the following reason (Sec. 7031.5 Business and Professions Code): Any city or county which requires a permit to construct, alter, improve, demolish or repair any structure, prior to its issuance also requires the applicant for such permit to file a signed statement that he is licensed pursuant to the provisions of the Contractors License Law (Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code) or that he is exempt therefrom, and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars ($500).

I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or through his own employees, provided that such improvements are not intended or offered for sale. If however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he did not build or improve for the purpose of sale.)

I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a contractor(s) licensed pursuant to the Contractor's License Law.)

I am exempt under Sec. _____ B & P.C. for this reason _____

I hereby affirm that I am exempt from the Contractor's License Law for the following reason (Sec. 7031.5, Business and Professions Code): Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance also requires the applicant for such permit to file a signed statement that he is licensed pursuant to the provisions of the Contractor's License Law, Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code or that he is exempt therefrom, and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars ($500):

as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or through his own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he did not build or improve for the purpose of sale.)

as owner of the property am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a contractor(s) licensed pursuant to the Contractor's License Law.)

I am exempt under Sec. _____ B & P C for this reason _____

LICENSED CONTRACTOR'S DECLARATION

I hereby affirm that I am licensed under provisions of Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code and that my license is in full force and effect

SIGNATURE _____ 11-14-85 DATE

OWNER—BUILDER DECLARATION

I hereby affirm that I am exempt from the Contractor's License Law for the following reason (Sec. 7031.5, Business and Professions Code: Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance also requires the applicant for such permit to file a signed statement that he is licensed pursuant to the provisions of the Contractor's License Law (Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code) or that he is exempt therefrom and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars ($500):

I as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or through his own employees, provided that such improvements are not intended or offered for sale. However, the "builder" will have the burden of proving that he did not build or improve for the purpose of sale.)

I as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, who contracts for such projects with a contractor(s) licensed pursuant to the Contractor's License Law.)

I am exempt under Sec. _____ B. & P.C. for the reason _____

Date _____ Owner _____

WORKERS' COMPENSATION DECLARATION

I have and will maintain a certificate of consent to self-insure or a certificate of Workers' Compensation Insurance or a certified copy thereof (Sec. 3800, Labor Code).

Policy No. _____ Company _____

Copy certified and filed with the City _____. Certified copy is hereby furnished.

CERTIFICATE OF EXEMPTION FROM WORKERS' COMPENSATION INSURANCE

I certify that this work does not be completed under this permit is for one hundred dollars ($100) valuation or less.)

I certify that in the performance of the work for which this permit is issued, I shall not employ any person in any manner so as to become subject to the Workers' Compensation Laws of California.

IMPORTANT: If after making this Certificate of Exemption you should become subject to the Workers' Compensation provisions of the Labor Code, you must forthwith comply with such provisions or this permit shall be deemed revoked.

CONSTRUCTION LENDING AGENCY

I hereby affirm that there is a construction lending agency for the performance of the work for which this permit is issued (Sec. 3097, Civ. Code).

Lender's Name _____

LICENSED CONTRACTOR'S DECLARATION

I hereby affirm that I am licensed under provisions of Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code and my license is in full force and effect.

SIGNATURE _____ DATE _____

OWNER – BUILDER DECLARATION

I hereby affirm that I am exempt from the Contractor's License Law for the following reason (Sec. 7031.5, Business and Professions Code): Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance also requires the applicant for such permit to file a signed statement that he is licensed pursuant to the provisions of the Contractor's License Law (Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code) or that he is exempt therefrom, and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars ($500).

I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon and who does such work himself or through his own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he did not build or improve for the purpose of sale.)

I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a contractor(s) licensed pursuant to the Contractor's License Law.)

I am exempt under Sec. _____ B.&P.C. for this reason _____

Date 3-25-87 Owner X _____

WORKER'S COMPENSATION DECLARATION

I hereby affirm that I have a certificate of consent to self-insure or a certificate of Workers' Compensation Insurance, or a certified copy thereof (Sec. 3800, Labor Code).

Policy No. _____ Company _____

Copy is filed with the City. ☐ Certified copy is hereby furnished.

CERTIFICATE OF EXEMPTION FROM WORKERS' COMPENSATION INSURANCE

(This section need not be completed if the permit is for one hundred dollars ($100) valuation or less.)

X I certify that in the performance of the work for which this permit is issued, I shall not employ any person in any manner so as to become subject to the Workers' Compensation Laws of California.

AGENT TO APPLICANT: If after making this Certificate of Exemption you should become subject to the Workers' Compensation provisions of the Labor Code, you must forthwith comply with such provisions or this permit shall be deemed revoked.

CONSTRUCTION LENDING AGENCY

I hereby affirm that there is a construction lending agency for the performance of the work for which this permit is issued (Sec. 3097, Civil Code).

Lender's Name _____

Lender's Address _____

I certify that I have read this application and state that the above information is correct. LICENSED CONTRACTOR'S DECLARATION

I hereby affirm that I am licensed under provisions of Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code and my license is in full force and effect

SIGNATURE DATE

OWNER—BUILDER DECLARATION

I hereby affirm that I am exempt from the Contractor's License Law for the following reason (Sec. 7031.5, Business and Professions Code): Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance also requires the applicant for such permit to file a signed statement that he is licensed pursuant to the provisions of the Contractor's License Law (Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code) or that he is exempt therefrom, and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars ($500).

X as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or through his own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he did not build or improve for the purpose of sale.)

as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a contractor(s) licensed pursuant to the Contractor's License Law.)

I am exempt under Sec. ____ B & P C for this reason ____

9-19-83 Owner

WORKERS' COMPENSATION DECLARATION

I hereby affirm that I have a certificate of consent to self-insure or a certificate of Workers' Compensation Insurance or a certificate of exemption, as provided by Sec. 3800, Labor Code.

Policy No. ____ Company ____

Copy to be filed with the City

Certified copy is hereby furnished

CERTIFICATE OF EXEMPTION FROM WORKERS' COMPENSATION INSURANCE

This certificate need not be completed if the permit is for one hundred dollars ($100) valuation or less.

X I certify that in the performance of the work for which this permit is issued, I shall not employ any person in any manner so as to become subject to the Workers' Compensation Laws of California.

NOTICE TO APPLICANT: If, after making this Certificate of Exemption, you should become subject to the Workers' Compensation provisions of the Labor Code, you must forthwith comply with such provisions or this permit shall be deemed revoked.

LICENSED CONTRACTOR'S DECLARATION

I hereby affirm that I am licensed under provisions of Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code, and my license is in full force and effect.

LICENSE NO _____ DATE _____

OWNER – BUILDER DECLARATION

I hereby affirm that I am exempt from the Contractor's License Law for the following reason (Sec. 7031.5 Business and Professions Code): Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance also requires the applicant for such permit to file a signed statement that he is licensed pursuant to the provisions of the Contractor's License Law (commencing with Section 7000) of Division 3 of the Business and Professions Code or that he is exempt therefrom and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars ($500):

I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or through his own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he did not build or improve for the purpose of sale.)

I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a contractor(s) licensed pursuant to the Contractor's License Law.)

I am exempt under Sec. B & PC for this reason

LICENSED CONTRACTOR'S DECLARATION

I hereby affirm that I am licensed under provisions of Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code, and my license is in full force and effect

1-17-85

SIGNATURE DATE

OWNER—BUILDER DECLARATION

I hereby affirm that I am exempt from the Contractor's License Law for the following reason (Sec. 7031.5, Business and Professions Code): Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance also requires the applicant for such permit to file a signed statement that he is licensed pursuant to the provisions of the Contractor's License Law (Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code) or that he is exempt therefrom, and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars ($500).

I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or through his own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he did not build or improve for the purpose of sale.)

I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a contractor(s) licensed pursuant to the Contractor's License Law.)

I am exempt under Sec. _____ B & P C for this reason _____

WORKERS' COMPENSATION DECLARATION

I hereby affirm that I have a certificate of consent to self-insure or a certificate of Workers' Compensation Insurance or a certified copy thereof (Sec. 3800, Labor Code.)

550417 Company Hanover 4-1-85

X Copy is filed with the City. Certified copy is hereby furnished.

CERTIFICATE OF EXEMPTION FROM WORKERS' COMPENSATION INSURANCE

This section need not be completed if the permit is for one hundred dollars ($100) valuation or less.

I certify that in the performance of the work for which this permit is issued, I shall not employ any person in any manner so as to become subject to the Workers' Compensation Laws of California.

WARNING TO APPLICANT: If after making this Certificate of Exemption you should become subject to the Workers' Compensation provisions of the Labor Code, you must forthwith comply with such provisions or this permit shall be deemed revoked.

CONSTRUCTION LENDING AGENCY

I hereby affirm that there is a construction lending agency for the performance of the work for which this permit is issued (Sec. 3097, Civil Code).

Lender's Name _____

Lender's Address _____

I certify that I have read this application and state that the above information is correct. I agree to comply with all city and county ordinances and state laws relating to building construction, and hereby authorize representatives of this city to enter the above-mentioned property for inspection purposes.

I hereby affirm that I am licensed under provisions of Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code, and my license is in full force and effect.

X [signature] 4-23-86 DATE

OWNER - BUILDER DECLARATION

I hereby affirm that I am exempt from the Contractor's License Law for the following reason: (Sec. 7031.5 Business and Professions Code: Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance, also requires the applicant for such permit to file a signed statement that he is licensed pursuant to the provisions of the Contractor's License Law (Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code) or that he is exempt therefrom and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars ($500):

I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044 Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or through his own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he did not build or improve for the purpose of sale.)

I, as owner of the property, am exempt from the Contractor's License Law because I will be subcontracting all of the construction work. (Sec. 7044 Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a contractor(s) licensed pursuant to the Contractor's License Law.)

B & PC for this reason

WORKERS' COMPENSATION DECLARATION

I hereby affirm that I have a certificate of consent to self-insure, or a certificate of Workers' Compensation Insurance, or a certificate of exemption, as provided for by Section 3700 of the Labor Code, for the performance of the work for which this permit is issued.

209673.1 Safeco 2-10-87

CERTIFICATE OF EXEMPTION FROM WORKERS' COMPENSATION INSURANCE

I certify that in the performance of the work for which this permit is issued, I shall not employ any person in any manner so as to become subject to the Workers' Compensation laws of California.

CT

If, after making this certificate of exemption, I should become subject to the Workers' Compensation provisions of Section 3700 of the Labor Code, I shall forthwith comply with those provisions.

This permit shall be deemed revoked if I become subject to the Workers' Compensation provisions of the Labor Code unless I have complied with those provisions.

CONSTRUCTION LENDING AGENCY

I hereby affirm that there is a construction lending agency for the performance of the work for which this permit is issued.

X [signature] Date 4-23-86

I agree to comply with all city and county ordinances and state laws relating to building construction, and hereby authorize representatives of this city to enter upon the above-mentioned property for inspection purposes.

X [signature] Date 4-23-86

VALIDATION

This permit becomes void if work or construction authorized is not commenced within 180 days of its issuance. This permit becomes void if work or construction authorized is suspended or abandoned for a period of 180 days after work or construction is commenced.

LICENSED CONTRACTOR'S DECLARATION

I hereby affirm that I am licensed under provisions of Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code and my license is in full force and effect

SIGNATURE 9/27/85 DATE

OWNER—BUILDER DECLARATION

I hereby affirm that I am exempt from the Contractor's License Law for the following reason (Sec. 7031.5 Business and Professions Code: Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance also requires the applicant for such permit to file a signed statement that he is licensed pursuant to the provisions of the Contractor's License Law (Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code) or that he is exempt therefrom and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars ($500):

I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or through his own employees, provided that such improvements are not intended or offered for sale. However, the builder or improver who sells within one year of completion of the owner-builder will have the burden of proving that he did not build or improve for the purpose of sale.)

I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and contracts for such projects with a contractor(s) licensed pursuant to the Contractor's License Law.)

I am exempt under Sec. _____ B & P C for this reason _____

LICENSED CONTRACTOR'S DECLARATION

I hereby affirm that I am licensed under provisions of Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code and my license is in full force and effect

LIC. NO. DATE

OWNER—BUILDER DECLARATION

I hereby affirm that I am exempt from the Contractor's License Law for the following reason (Sec. 7031.5 Business and Professions Code): Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance also requires the applicant for such permit to file a signed statement that he is licensed pursuant to the provisions of the Contractor's License Law (Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code) or that he is exempt therefrom, and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars ($500).

I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or through his own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he did not build or improve for the purpose of sale.)

I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a contractor(s) licensed pursuant to the Contractor's License Law.)

I am exempt under Sec. 6&P.C. for this reason

Date 3-31-81 Owner

WORKERS' COMPENSATION DECLARATION

I hereby affirm that I have a certificate of consent to self-insure or a certificate of Workers' Compensation Insurance or a certificate of exemption, as provided by Section 3700 of the Labor Code.

Policy No. Company

I certify that in the performance of the work for which this permit is issued, I shall not employ any person in any manner so as to become subject to the Workers' Compensation Laws of California.

I certify that I have complied with the requirements of Section 3700 of the Labor Code, and that if after making this Certificate of Exemption I become subject to the Workers' Compensation provisions of Section 3700 of the Labor Code, I will forthwith comply with such provisions or this permit shall be deemed revoked.

Certified copy is hereby furnished

CERTIFICATE OF EXEMPTION FROM WORKERS' COMPENSATION INSURANCE

(This section need not be completed if the permit is for one hundred dollars ($100) valuation or less.)

I certify that in the performance of the work for which this permit is issued, I shall not employ any person in any manner so as to become subject to the Workers' Compensation Laws of California.

WARNING: Failure to secure workers' compensation coverage is unlawful, and shall subject an employer to criminal penalties and civil fines up to one hundred thousand dollars ($100,000), in addition to the cost of compensation, damages as provided for in Section 3706 of the Labor Code, interest, and attorney's fees.

I certify that in the performance of the work for which this permit is issued, I shall not employ any person in any manner so as to become subject to the Workers' Compensation Laws of California. If after making this Certificate of Exemption I become subject to the Workers' Compensation provisions of Section 3700 of the Labor Code, I must forthwith comply with such provisions or this permit shall be deemed revoked.

CONSTRUCTION LENDING AGENCY

I hereby affirm that there is a construction lending agency for the performance of the work for which this permit is issued (Sec. 3097, Civil Code).

Name

I hereby affirm that I have read this application and state that the above information is correct. I agree to comply with all city and county ordinances and state laws relating to building construction, and hereby authorize representatives of this city to enter upon the above-mentioned property for inspection purposes.

Signature of Applicant or Agent Date 3-31-81

VALIDATION

Application validated by this office. This form constitutes a permit to do the work described herein. This permit will expire if work is not started within 120 days of issuance or if work is abandoned for more than 120 days.

LICENSED CONTRACTOR'S DECLARATION

I hereby affirm that I am licensed under provisions of Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code and my license is in full force and effect.

X Russell C. Strang 1/23/

SIGNATURE DATE

OWNER - BUILDER DECLARATION

I hereby affirm that I am exempt from the Contractor's License Law for the following reason (Sec. 7031.5, Business and Professions Code: Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance also requires the applicant for such permit to file a signed statement that he is licensed pursuant to the provisions of the Contractor's License Law (Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code) or that he is exempt therefrom and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars ($500):

I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or through his own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he did not build or improve for the purpose of sale.).

I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a contractor(s) licensed pursuant to the Contractor's License Law.)

LICENSED CONTRACTOR'S DECLARATION

I hereby affirm that I am licensed under provisions of Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code and my license is in full force and effect

SIGNATURE Patricia Smith 4-28-86 DATE

OWNER-BUILDER DECLARATION

I hereby affirm that I am exempt from the Contractor's License Law for the following reason (Sec. 7031.5 Business and Professions Code: Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance also requires the applicant for such permit to file a signed statement that he is licensed pursuant to the provisions of the Contractor's License Law (Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code) or that he is exempt therefrom, and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars ($500):

I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or through his own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he did not build or improve for the purpose of sale.)

I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a contractor(s) licensed pursuant to the Contractor's License Law.)

I am exempt under Sec. _____ B. & P.C. for this reason _____

WORKERS' COMPENSATION DECLARATION

I have and will maintain a certificate of consent to self-insure for workers' compensation, as provided for by Section 3700 of the Labor Code, for the performance of the work for which this permit is issued.

I have and will maintain workers' compensation insurance, as required by Section 3700 of the Labor Code, for the performance of the work for which this permit is issued. My workers' compensation insurance carrier and the policy number are 03-719 St Compfund 4-1-87

Attached copy is hereby furnished
CERTIFICATE OF EXEMPTION FROM
WORKERS' COMPENSATION INSURANCE

I certify that in the performance of the work for which this permit is issued, I shall not employ any person in any manner so as to become subject to the workers' compensation laws of California.

I understand that after making this Certificate of Exemption, should be come subject to the Workers' Compensation provisions of Section 3700 of the Labor Code, I shall forthwith comply with those provisions or this permit shall be deemed revoked.

CONSTRUCTION LENDING AGENCY

I hereby affirm that there is a construction lending agency for the performance of the work for which this permit is issued.

Name _____

I agree to comply with all city and county ordinances and state laws relating to building construction, and hereby authorize representatives of this city to enter upon the above-mentioned property for inspection purposes.

Patricia Smith 4-28-86
P.O. Box 994
Upland 91785

VALUATION [illegible]

A [illegible] posted on this space shall be void or invalid unless the owner or authorized agent has signed the application. This permit becomes void if work or construction authorized is not commenced within 180 days, or if construction or work is abandoned for a period of 180 days after work is commenced.

LICENSED CONTRACTOR'S DECLARATION

I hereby affirm that I am licensed under provisions of Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code and my license is in full force and effect.

SIGNATURE _____ DATE _____

OWNER - BUILDER DECLARATION

I hereby affirm that I am exempt from the Contractor's License Law for the following reason: Sec. 7031.5 Business and Professions Code: Any city or county which requires a permit to construct, alter, improve, demolish or repair any structure, prior to its issuance also requires the applicant for such permit to file a signed statement that he is licensed pursuant to the provisions of the Contractor's License Law (Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code) or that he is exempt therefrom and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars ($500).

I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or through his own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he did not build or improve for the purpose of sale.).

I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a contractor(s) licensed pursuant to the Contractor's License Law).

LICENSED CONTRACTORS DECLARATION

I hereby affirm under penalty of perjury that I am licensed under provisions of Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code, and my license is in full force and effect.

License Class _____ License No. _____

Expiration Date _____ Contractor Signature _____

OWNER-BUILDER DECLARATION

I hereby affirm under penalty of perjury that I am exempt from the Contractors License Law for the following reason (Sec. 7031.5, Business and Professions Code: Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance, also requires the applicant for such permit to file a signed statement that he or she is licensed pursuant to the provisions of the Contractors License Law Chapter 9 (commencing with Sectin 7000) of Division 3 of the Business and Professions Code) or that he or she is exempt therefrom and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars ($500).:

☒ I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business and Professions Code: The Contractors License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or herself or through his or her own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he or she did not build or improve for the purpose of sale.).

☐ I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code: The Contractors License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a contractor(s) licensed pursuant to the Contractors License Law.).

☐ I am exempt under Sec. _____ Business and Professions Code for this reason: _____

Date 8/18/99 Owner _____

WORKERS' COMPENSATION DECLARATION

I hereby affirm under penalty of perjury one of the following declarations:

☐ I have and will maintain a certificate of consent to self-insure for workers' compensation, as provided for by Section 3700 of the Labor Code, for the performance of the work for which this permit is issued.

☐ I have and will maintain workers' compensation insurance, as required by Section 3700 of the Labor Code, for the performance of the work for which this permit is issued. My workers' compensation insurance carrier and policy number are:

Carrier _____ Expiration Date _____

Policy Number _____

☐ (This section need not be completed if the permit is for one hundred dollars [$100] or less)
I certify that in the performance of the work for which this permit is issued, I shall not employ any person in any manner so as to become subject to the workers' compensation laws of California, and agree that if I should become subject to the workers' compensation provisions of Section 3700 of the Labor Code, I shall forthwith comply with those provisions.

Date: _____ Applicant: _____

WARNING: FAILURE TO SECURE WORKERS; COMPENSATION COVERAGE IS UNLAWFUL, AND SHALL SUBJECT AN EMPLOYER TO CRIMINAL PENALTIES AND CIVIL FINES UP TO ONE HUNDRED THOUSAND DOLLARS ($100,000), IN ADDITION TO THE COST OF COMPENSATION, DAMAGES AS PROVIDED FOR IN SECTION 3706 OF THE LABOR CODE, INTEREST, AND ATTORNEY'S FEES.

CONSTRUCTION LENDING AGENCY

I hereby affirm under penalty of perjury that there is a construction lending agency for the performance of the work for which this permit is issued (Sec. 3097, Civ. C.).

Lender's Name _____

Lender's Address _____

DIVISION OF INDUSTRIAL SAFETY PERMIT CERTIFICATION

The California Health and Safety Code requires a Division of Industrial Safety Permit as a prerequisite to permit issuance unless the applicant signs one of the certificates below.

☐ I certify that no excavation 5 feet or more feet in depth, into which a person is required to descend, will be made in connection with work authorized by this permit, and that no building, structure, scaffolding, falsework, or demolition or dismantling thereof, will be more than 36 feet high.

☒ As owner/builder I will not employ anyone to do work which would require a permit from the Division of Industrial Safety, as noted above unless such person ha a permit form that division.

Division of Industrial Safety Permit Number _____

I certify that I have read this application and state that the above information is correct. I agree to comply with all city and county ordinances and state laws relating to building construction, and hereby authorize representatives of this city to enter upon the above-mentioned property for inspection purposes.

LICENSED CONTRACTOR'S DECLARATION

I hereby affirm that I am licensed under provisions of Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code and my license is in full force and effect

TM-MAUK DEVELOPMENT INC. 9/16/8 DATE

OWNER—BUILDER DECLARATION

I hereby affirm that I am exempt from the Contractor's License Law for the following reason (Sec. 7031.5 Business and Professions Code): Any city or county which requires a permit to construct, alter, improve, demolish or repair any structure, prior to its issuance also requires the applicant for such permit to file a signed statement that he is licensed pursuant to the provisions of the Contractor's License Law (Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code) or that he is exempt therefrom and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars ($500).

I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or through his own employees, provided that such improvements are not intended or offered for sale. If however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he did not build or improve for the purpose of sale.)

I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who contracts with a contractor(s) licensed pursuant to the Contractor's License Law.)

I am exempt under Sec. B & P.C. for the reason

Owner

WORKERS' COMPENSATION DECLARATION

I hereby affirm that I have a certificate of consent to self-insure, or a certificate of Workers' Compensation Insurance, or a certificate of exemption, as provided by Section 3700 of the Labor Code, for the performance of the work for which this permit is issued.

My Workers' Compensation Insurance carrier and policy number are:

Carrier STATE FARM Policy Number

X Certified copy is hereby furnished
CERTIFICATE OF EXEMPTION FROM WORKERS' COMPENSATION INSURANCE

This certificate is executed when the permit is for one hundred dollars ($100) valuation or less.

I certify that in the performance of the work for which this permit is issued, I shall not employ any person in any manner so as to become subject to the Workers' Compensation Laws of California.

WARNING: FAILURE TO SECURE WORKERS' COMPENSATION COVERAGE IS UNLAWFUL, AND SHALL SUBJECT AN EMPLOYER TO CRIMINAL PENALTIES AND CIVIL FINES UP TO ONE HUNDRED THOUSAND DOLLARS ($100,000), IN ADDITION TO THE COST OF COMPENSATION, DAMAGES AS PROVIDED FOR IN SECTION 3706 OF THE LABOR CODE, INTEREST, AND ATTORNEY'S FEES.

I also agree that in the case of the failure of myself or my contractor to secure workers' compensation coverage as required by Section 3700 of the Labor Code, I shall forthwith comply with such provisions or this permit shall be deemed revoked.

CONSTRUCTION LENDING AGENCY

I hereby affirm that there is a construction lending agency for the performance of the work for which this permit is issued (Sec. 3097, Civil Code).

Lender's Name METRO BANK

Lender's Address 3130 WILSHIRE BLVD. L.A. 90024

I certify that I have read this application and state that the above information is correct. I agree to comply with all city and county ordinances and state laws relating to building construction, and hereby authorize representatives of this city to enter upon the above-mentioned property for inspection purposes.

Signature (Owner or Authorized Agent) Date 9/16/8

Address 210 S. HACIENDA BL.

City HACIENDA HEIGHTS CA 91745

VALIDATION

This permit becomes void if work or construction authorized is not commenced within 180 days, or if construction or work is suspended or abandoned for a period of 180 days (Sec. 305(d) Uniform Building Code). To remain valid, permittee must request inspection and obtain approval before work is suspended or abandoned for more than 180 days.

I hereby affirm that I am licensed under provisions of Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code and my license is in full force and effect.

SIGNATURE DATE

OWNER—BUILDER DECLARATION

I hereby affirm that I am exempt from the Contractor's License Law for the following reason (Sec. 7031.5 Business and Professions Code): Any city or county which requires a permit to construct, alter, improve, demolish or repair any structure, prior to its issuance also requires the applicant for such permit to file a signed statement that he is licensed pursuant to the provisions of the Contractor's License Law (Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code) or that he is exempt therefrom, and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars ($500).

I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or through his own employees, provided that such improvements are not intended or offered for sale. If however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he did not build or improve for the purpose of sale.)

I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a contractor(s) licensed pursuant to the Contractor's License Law.)

I am exempt under Sec. 6&P.C. for this reason

OWNER – BUILDER DECLARATION

I hereby affirm that I am exempt from the Contractor's License Law for the following reason (Sec. 7031.5 Business and Professions Code: Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance also requires the applicant for such permit to file a signed statement that he is licensed pursuant to the provisions of the Contractor's License Law (Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code) or that he is exempt therefrom and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars ($500):

I, as owner of the property or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or through his own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he did not build or improve for the purpose of sale.).

I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a contractor(s) licensed pursuant to the Contractor's License Law.)

CERTIFICATE OF EXEMPTION FROM WORKERS' COMPENSATION INSURANCE

I certify that in the performance of the work for which this permit is issued, I shall not employ any person in any manner so as to become subject to the Workers' Compensation Laws of California.

WARNING: Failure to secure workers' compensation coverage is unlawful, and shall subject an employer to criminal penalties and civil fines up to one hundred thousand dollars ($100), in addition to the cost of compensation, damages as provided for in Section 3706 of the Labor Code, interest, and attorney's fees.

I am aware of the provisions of Section 3700 of the Labor Code which requires every employer to be insured against liability for Workers' Compensation or to undertake self-insurance in accordance with the provisions of that code, and I will comply with such provisions before commencing the performance of the work of this permit. If, after making this Certificate of Exemption, you should become subject to the Workers' Compensation provisions of Section 3700 of the Labor Code, you must forthwith comply with such provisions or this permit shall be deemed revoked.

CONSTRUCTION LENDING AGENCY

I hereby affirm that there is a construction lending agency for the performance of the work for which this permit is issued (Sec. 3097, Civil Code).

LICENSED CONTRACTOR'S DECLARATION

I hereby affirm that I am licensed under provisions of Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code and my license is in full force and effect.

NAME DATE

OWNER--BUILDER DECLARATION

I hereby affirm that I am exempt from the Contractor's License Law for the following reason (Sec. 7031.5, Business and Professions Code: Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance, requires the applicant for such permit to file a signed statement that he is licensed pursuant to the Contractor's License Law (Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code) or that he is exempt therefrom, and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars ($500):

I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or through his own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he did not build or improve for the purpose of sale.)

I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a contractor(s) licensed pursuant to the Contractor's License Law.)

I am exempt under Sec. B & P C for this reason

VALIDATION

This permit application must be signed. This permit application shall expire by limitation and become null and void if the building or work authorized by such permit is not commenced within 180 days from the date of such permit, or if the building or work authorized by such permit is suspended or abandoned for a period of 180 days at any time after work is commenced. A one-time extension may be granted for a period not exceeding 180 days. The fee specified in the Uniform Building Code, as adopted by the City of Ontario, is set forth in Resolution No. 80-33 of the City Council of the City of Ontario, as amended by Resolution No. 80-89 and Resolution No. 80-90, and may be altered only by resolution of the City Council of said City. Determination of value or valuation under any of the provisions of any code adopted by the City of Ontario shall be made by the Building Official. The value or valuation so determined shall be final unless appealed to the Board of Appeals as provided for in the Uniform Building Code, as adopted by the City of Ontario.

LICENSED CONTRACTOR'S DECLARATION

I hereby affirm that I am licensed under provisions of Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code, and my license is in full force and effect.

X [signature] 2-7-91
LICENSE DATE

OWNER-BUILDER DECLARATION

I hereby affirm that I am exempt from the Contractor's License Law for the following reason (Sec. 7031.5 Business and Professions Code: Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance also requires the applicant for such permit to file a signed statement that he is licensed pursuant to the provisions of the Contractor's License Law (Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code) or that he is exempt therefrom, and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars ($500):

I, as owner of the property or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who does such improvements himself or through his own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he did not build or improve for the purpose of sale.).

I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a contractor(s) licensed pursuant to the Contractor's License Law.).

I am exempt under Sec. _____ B. & P.C. for this reason _____

Date _____ Owner _____

WORKER'S COMPENSATION DECLARATION

I hereby affirm that I have a certificate of consent to self-insure or a certificate of Worker's Compensation Insurance or a certified copy thereof (Sec. 3800, Labor Code).

DIVISION OF INDUSTRIAL SAFETY PERMIT CERTIFICATION

The California Health and Safety Code requires that the Division of Industrial Safety review plans and specifications for the construction of certain buildings, structures, and other works of improvement, unless the application is one of the certain types listed.

I certify that excavation 5 feet or more in depth, into which a person is required to descend, will be made in connection with work authorized by this permit, and that the excavation will be shored or sloped as required by the safety orders of the Division of Industrial Safety, or that the excavation will be less than 5 feet in depth.

As owner-builder, I will not employ anyone to work within any excavation 5 feet or more in depth unless such employee is working in an excavation for which the shoring or sloping and other protective systems have been approved by the Division of Industrial Safety, or unless I have obtained a permit from the Division of Industrial Safety to work in such excavation without such approval.

DIVISION OF INDUSTRIAL SAFETY PERMIT CERTIFICATION

The California Health and Safety Code requires a Division of Industrial Safety Permit as a prerequisite to permit issuance unless the applicant signs one of the certificates below.

- ☒ I certify that no excavation 5 feet or more feet in depth, into which a person is required to descend, will be made in connection with work authorized by this permit, and that no building, structure, scaffolding, falsework, or demolition or dismantling thereof, will be more than 36 feet high.
- ☐ As owner/builder I will not employ anyone to do work which would require a permit from the Division of Industrial Safety, as noted above unless such person has a permit from that division.

Division of Industrial Safety Permit Number _____

I certify that I have read this application and state that the above information is correct. I agree to comply with all city and county ordinances and state laws relating to building construction, and hereby authorize representatives of this county to enter upon the above-mentioned property for inspection purposes.

X [illegible] 2/10/95

Signature of Applicant or Agent Date

EXPIRATION AND REFUND NOTICE

Applications for which no permit is issued within 180 days from the date of application shall expire. Permits shall expire if work does not commence within 180 days of issuance of such permit or if the work is suspended or abandoned for a period of 180 days. Fees paid are not refundable after one (1) year from date of payment. All fees paid may not be refundable.

Expiration Date 12-31-99 Contractor Signature James K Manning

OWNER-BUILDER DECLARATION

I hereby affirm under penalty of perjury that I am exempt from the Contractors License Law for the following reason (Sec. 7031.5, Business and Professions Code: Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance, also requires the applicant for such permit to file a signed statement that he or she is licensed pursuant to the provisions of the Contractors License Law Chapter 9 (commencing with Sectin 7000) of Division 3 of the Business and Professions Code) or that he or she is exempt therefrom and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars ($500).:

☐ I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business and Professions Code: The Contractors License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or herself or through his or her own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he or she did not build or improve for the purpose of sale.).

☐ I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code: The Contractors License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a contractor(s) licensed pursuant to the Contractors License Law.).

☐ I am exempt under Sec. _____ Business and Professions Code for this reason:

Date _____ Owner _____

WORKERS' COMPENSATION DECLARATION

I hereby affirm under penalty of perjury one of the following declarations:

☐ I have and will maintain a certificate of consent to self-insure for workers' compensation, as provided for by Section 3700 of the Labor Code, for the performance of the work for which this permit is issued.

☐ I have and will maintain workers' compensation insurance, as required by Section 3700 of the Labor Code, for the performance of the work for which this permit is issued. My workers' compensation insurance carrier and policy number are:

Carrier _____ Expiration Date _____

Policy Number _____

☒ (This section need not be completed if the permit is for one hundred dollars [$100] or less)
I certify that in the performance of the work for which this permit is issued, I shall not employ any person in any manner so as to become subject to the workers' compensation laws of California, and agree that if I should become subject to the workers' compensation provisions of Section 3700 of the Labor Code, I shall forthwith comply with those provisions.

Date: 5-31-98 Applicant: Manning Electric

WARNING: FAILURE TO SECURE WORKERS' COMPENSATION COVERAGE IS UNLAWFUL, AND SHALL SUBJECT AN EMPLOYER TO CRIMINAL PENALTIES AND CIVIL FINES UP TO ONE HUNDRED THOUSAND DOLLARS ($100,000), IN ADDITION TO THE COST OF COMPENSATION, DAMAGES AS PROVIDED FOR IN SECTION 3706 OF THE LABOR CODE, INTEREST, AND ATTORNEY'S FEES.

CONSTRUCTION LENDING AGENCY

I hereby affirm under penalty of perjury that there is a construction lending agency for the performance of the work for which this permit is issued (Sec. 3097, Civ. C.).

Lender's Name _____

Lender's Address _____

DIVISION OF INDUSTRIAL SAFETY PERMIT CERTIFICATION

The California Health and Safety Code requires a Division of Industrial Safety Permit as a prerequisite to permit issuance unless the applicant signs one of the certificates below.

☐ I certify that no excavation 5 feet or more feet in depth, into which a person is required to descend, will be made in connection with work authorized by this permit, and that no building, structure, scaffolding, falsework, or demolition or dismantling thereof, will be more than 36 feet high.

☐ As owner/builder I will not employ anyone to do work which would require a permit from the Division of Industrial Safety, as noted above unless such person ha a permit form that division.

VALUATION

The applicant for this permit shall comply with all applicable laws regulating construction in the jurisdiction. The issuance of a permit or approval of plans, specifications and computations shall not be construed to be a permit for, or an approval of any violation of any of the provisions of the Building Code or of any other ordinance of the jurisdiction. A permit presuming to give authority to violate or cancel the provisions of the Building Code or other ordinances of the jurisdiction shall not be valid. The issuance of a permit based on plans, specifications and other data shall not prevent the building official from requiring the correction of errors in the plans, specifications and other data. The building official is also authorized to prevent occupancy or use of a structure where in violation of this code or of any other ordinances of this jurisdiction. Permits presuming to give authority to violate or cancel the provisions of this code or other ordinances of the jurisdiction shall not be valid. Any permit issued shall become invalid if the authorized work is not commenced within 180 days after its issuance, or if the authorized work is suspended or abandoned for a period of 180 days after the time of commencing the work. Before such work can be recommenced, a new permit shall be first obtained and the fee therefor shall be one-half the amount required for a new permit for such work, provided no changes have been made or will be made in the original plans and specifications for such work, and provided further that such suspension or abandonment has not exceeded one year. One or more extensions of time, for periods not exceeding 180 days each, may be allowed for the permit. The extension shall be requested in writing and justifiable cause demonstrated.

SUBJECT: CERTIFIED RECORD SEARCH FINDINGS
1914, 1930, 1944, AND 1948 SOUTH BON VIEW AVENUE, ONTARIO, CALIFORNIA

This is to confirm that the San Bernardino County Hazardous Materials Division has identified records that may pertain to the subject site, as described in your request for records search.

The file(s) shown below have been retrieved for review. If you wish to view the original documents, please e-mail this office at hazmatrecords@sbcfire.org to arrange an appointment for a file review.

ACTIVE PERMIT FACILITIES: (Regulatory files for facilities with annual operating permits to maintain underground storage tanks, handle hazardous materials, and/or generate hazardous waste. Files include permits, inspections, reports, test results, correspondence, and related materials. Files will also include any underground tank removal/construction activity records and site remediation/contamination records for facilities still in operation).

JLMC, Inc. 1944 S. Bon View Ontario	FA0004143 ~ Est. # 90021567 ~ CERS ID. 10040932 Hazardous Material 2-10 Chemicals Handler Permit Conditionally Exempt Small Qty. Generator Permit (Last CERS Submission: 03/01/2019)

INACTIVE PERMIT AND/OR NON-PERMIT FACILITIES: (Inactive regulatory files for formerly permitted facilities that maintained underground storage tanks, stored hazardous materials, and/or generated hazardous waste and/or facilities with underground storage tanks removed and/or materials and waste removed.
Files will also include any underground tank removal/construction activity records and site remediation/ contamination records for facilities no longer operating underground tanks).

Net Shapes 1914 S. Bon View Ontario	Est. # 91024296 Hazardous Materials Handler Permit
ABS Global Inc. 1914 S. Bon View Unit 3 Ontario	FA0010805 Hazardous Materials 1-3 Chemicals Special Handler Permit

BOARD OF DIRECTORS

Robert A. Lovingood, First District | Janice Rutherford, Second District | Dawn Rowe, Third District | Curt Hagman, Chairman, Fourth District | Josie Gonzales, Vice Chair, Fifth District

Leonard X. Hernandez
Chief Executive Officer

Nova Men Auto Repair 1914 S. Bon View #4 Ontario	FA0010493 Special Generator Permit
Mazza Construction 1930 Bon View Ave. #12 Ontario	Est. # 93029272 Hazardous Materials Handler Permit
Multi Tech Products 1930 Bon View #12 Ontario	FA0008135 Hazmat Handler Permit
Column Engineering Inc. 1930 S. Bon View Ave. #20 Ontario	FA0002444 ~ Est. # 92029090 Limited Quantity Generator Permit
Quality Offset Printers 1930 S. Bon View Ave. #14 Ontario	FA0005477 ~ Est. # 92029015 Limited Quantity Generator Permit

PERMITS TO REMOVE/INSTALL/MODIFY TANKS UNDERGROUND:

No record of permits to remove/install/modify tanks underground identified in this search.

HAZ MAT INCIDENT RESPONSE ACTIVITY: (other records of spill notifications and/or complaints not listed below may also exist in facility permit files).

JLMC, Inc. 1944 S. Bon View Ave. Ontario	CO0033129 02/14/2017 Complaint: Operations being conducted at this facility that they are illegally shipping materials and cutting metals that do not fall under permitting regulations and can impact the water jet systems. Investigation: Unable to verify complaint. Complaint closed.

SITE REMEDIATION: (Underground Storage Tank Clean-Up under Local Oversight Program or Voluntary Hazardous Waste Clean-Up activity under Local Jurisdiction) (documents may be included in regular active or inactive permit files listed above).

No record of site remediation identified in this search overseen by our department.

Records searched include permit database systems for facilities with permits as hazardous waste generators, hazardous materials handlers, and/or underground storage tanks, including inactive and/or out of business records; logs of permits issued for the removal and/or installation of underground storage tanks; records and databases pertaining to illicit dumping and releases; records of non-permitted facilities; sites undergoing remediation for contaminated soil and/or groundwater; and incidents responded to by the hazardous materials emergency response team. Records date back to mid- 1980's.

Records consist of 8 files, approximately 5" thick, combined. If you wish to view the original documents, please e-mail this office at hazmatrecords@sbcfire.org to arrange an appointment.

Respectfully,

Donna Juday

Notice: IMPORTANT INFORMATION:

Service: Client has used a service offered by ERIS Information Inc. ("**ERIS**") to generate this report based upon certain search parameters set by Client, or in the case of ERIS's Vapor Encroachment Screening Tool and Checklist, certain search parameters set by ERIS and modified by Client (the "**Service**"). This report contains the results of a search conducted by ERIS of environmental records maintained by third parties. ERIS does not maintain, and has no responsibility for the accuracy or completeness of, such records.

Agreement: Client's use of the Service and any report generated thereby is subject to the Master Services Agreement previously entered into by Client and ERIS, or the terms and conditions accepted by Client in electronically submitting a request for the Service, (the "**Agreement**") and no provision of this Notice shall modify the Agreement. To the extent there is a conflict between any provision of this Notice and any provision of the Agreement, the latter shall control.

Liability Limitation: ERIS's liability for the Service and this report shall be limited to the amount paid by Client for this report and as otherwise set forth in the Agreement. Although in preparing this report ERIS has endeavored to present information that is accurate, ERIS will not have any liability for any errors, omissions or inaccuracies in such information, even if ERIS sets, or Client modifies, the parameters used to conduct the search.

Reliance on Report: This report (1) applies only to the address and the date specified on the cover page of this report and (2) is not a substitute for a Phase I Environmental Site Assessment, a Vapor Encroachment Assessment or any other similar assessment. It is solely intended to be used as a database search of current environmental records maintained by third parties, and Client should not rely on this report for any purpose for which it is not intended. Client may, in Client's discretion, modify search parameters within some of the tools of the Service that may affect the results for which ERIS is not responsible.

License for Use of Report: Client is licensed to use this report solely for its intended purpose as set forth in this Notice and the Agreement. No page of this report may be used by Client without including this report's cover page, this Notice and the project property identifier.

Client Liability: Use of the Service or this report in a manner contrary to this Notice or the Agreement will be a breach of contract and an infringement of ERIS's copyright and other intellectual property rights, for which ERIS will be entitled to damages and other remedies. In addition, upon any such breach or infringement, ERIS may terminate the Agreement, Client's account with ERIS, Client's license to use any reports previously generated for Client pursuant to the Service, and Client's future use of the Service.

Warranty Disclaimer: **EXCEPT AS EXPRESSLY SET FORTH IN THE AGREEMENT, ERIS MAKES NO WARRANTY OR REPRESENTATION REGARDING THE SERVICE, THIS REPORT OR THE RESULTS OF ANY SEARCH CONDUCTED BY CLIENT USING THE SERVICE.**

Ownership: Client may not use any of ERIS's trademarks or attribute any work product to ERIS other than as expressly set forth in this Notice or the Agreement. The Service and this reports are owned by ERIS (or its licensors) and protected by copyright and other intellectual property rights. No portion of this report may be, in whole or in part, modified, reproduced or transferred to a third party by Client, without the prior written consent of ERIS.

Executive Summary

This Report was produced through the ERIS Vapor Screening Tool. The ERIS Vapor Screening Tool and this report output are designed to help those in conducting a Vapor Encroachment Screening on a Property Involved in Real Estate Transactions under the ASTM Standard Designation E2600 – 15.

The following table lists the data sources searched and any hits in the Area of Concern (AOC) that have been included in the report. The search distances listed are based on search distances used in the Database Report and the search results are grouped based on the minimum default search distances for Chemicals of Concern (COCs) and Petroleum Hydrocarbon Chemicals of Concern (PHCOCs) as outlined in E2600-15. The default AOC may be expanded or reduced by the environmental professional (adjusted AOC) using experience and professional judgment.

ASTM Category: State and Tribal registered storage tank lists
Others

Vapor Encroachment Details

Impact on Target Property: VEC does not exist

Conditions: NPCOC and PCOC

Groundwater Flow Gradient:

Flow is based on the following:

Preferential Pathway:

Geological Attributes - Hydraulic Barrier:

Geological Attributes - Physical Barrier:

Geological Attributes - Soil Geology:

Comments:

The standard environmental record sources are reviewed and identified that there are not known or suspected sources of COC-contamination within the established area of concern (AOC). (ASTM E2600 8.3.1)
Chemical usage and waste generation/disposal, but no evidence of a release to the environment.

Vapor Encroachment Details

Impact on Target Property:	VEC does not exist
Conditions:	Non-Petroleum Chemicals of Concern (NPCOC)
Groundwater Flow Gradient:	Up-Gradient
Flow is based on the following:	
Preferential Pathway:	
Geological Attributes - Hydraulic Barrier:	
Geological Attributes - Physical Barrier:	

Geological Attributes - Soil Geology:

Comments:

The standard environmental record sources are reviewed and identified that there are not known or suspected sources of COC-contamination within the established area of concern (AOC). (ASTM E2600 8.3.1)
Pesticide usage is associated with these records, but no records were identified that indicate a release to the environment.
