CITY OF ONTARIO

Regular City Council/Housing Authority Meeting
JUNE 20, 2023

City Hall
303 East B Street, Ontario, CA 91764

MAYOR PAUL S. LEON • MAYOR PRO TEM DEBRA DORST-PORADA
COUNCIL MEMBERS ALAN D. WAPNER, JIM W. BOWMAN AND RUBEN VALENCIA

CITY CLERK SHEILA MAUTZ • TREASURER JAMES R. MILHISER
CITY MANAGER SCOTT OCHOA • CITY ATTORNEY RUBEN DURAN

WELCOME TO A MEETING OF THE ONTARIO CITY COUNCIL

All documents for public review are on file with the Records Management/City Clerk's Department located at 303 East B Street, Ontario, CA 91764.

Anyone wishing to speak in person during public comment or on a particular item will be required to fill out a blue slip. Blue slips must be turned in prior to public comment beginning or before an agenda item is taken up. The Clerk will not accept blue slips after that time. To comment by email, submit your comments no later than 4:00 p.m. on the day of the meeting by emailing your name, agenda item you are commenting on and your comments to publiccomments@ontarioca.gov. All comments received by the deadline will be forwarded to the City Council for consideration before action is taken on the matter and will be entered into the record.

Comments will be limited to 3 minutes. Speakers will be alerted when they have 1 minute remaining and when their time is up. Speakers are then to return to their seats and no further comments will be permitted.

In accordance with State Law, remarks during public comment are to be limited to subjects within Council's jurisdiction. Remarks on other agenda items will be limited to those items.

Remarks from those seated or standing in the back of the chamber will not permitted. All those wishing to speak including Council and Staff need to be recognized by the Chair before speaking.

ACCOMODATIONS

If you need special assistance or accommodations to participate in this meeting, please contact the City Clerk's office at 909-395-2009. Notification of 48 hours prior to the meeting will help the City make reasonable arrangements. Equipment for the hearing impaired is available in the Records Management Office.

ORDER OF BUSINESS

The regular City Council and Housing Authority meeting begins with Closed Session and Closed Session Comment at 5:30 p.m. Public Comment at 6:30 p.m. immediately followed by the Regular Meeting and Public Hearings. No agenda item will be introduced for consideration after 10:00 p.m. except by majority vote of the City Council.

CALL TO ORDER *(OPEN SESSION)*

ROLL CALL

Dorst-Porada, Wapner, Bowman, Valencia, Mayor/Chairman Leon

CLOSED SESSION PUBLIC COMMENT

The Closed Session Public Comment portion of the Council/Housing Authority meeting is limited to a maximum of 3 minutes for each speaker and comments will be limited to matters appearing on the Closed Session. Additional opportunities for further Public Comment will be given during and at the end of the meeting.

SPECIAL CEREMONIES

ONTARIO 5K REINDEER RUN & RUDOLPH'S DASH CHECK PRESENTATION TO ONTARIO-MONTCLAIR SCHOOLS FOUNDATION

That the City Council present the Ontario-Montclair Schools Foundation with a check for the proceeds of the 2022 Ontario 5K Reindeer Run & Rudolph's DASH.

PUBLIC COMMENTS 6:30 P.M.

The Public Comment portion of the Council/Housing Authority meeting is limited to 30 minutes with each speaker given a maximum of 3 minutes. An opportunity for further Public Comment may be given at the end of the meeting. Under provisions of the Brown Act, Council is prohibited from taking action on oral requests.

To comment by email, submit your comments by email no later than 4:00 p.m. on the day of the meeting by emailing your name, agenda item you are commenting on and your comment to publiccomments@ontarioca.gov. All Comments received by the deadline will be forwarded to the City Council for consideration before action is taken on the matter and entered into the record. As previously noted -- if you wish to address the Council, fill out one of the blue slips at the rear of the chambers and give it to the City Clerk.

AGENDA REVIEW/ANNOUNCEMENTS

The City Manager will go over all updated materials and correspondence received after the Agenda was distributed to ensure Council Members have received them. He will also make any necessary recommendations regarding Agenda modifications or announcements regarding Agenda items to be considered.

CONSENT CALENDAR

All matters listed under CONSENT CALENDAR will be enacted by one motion in the form listed below – there will be no separate discussion on these items prior to the time Council votes on them, unless a member of the Council requests a specific item be removed from the Consent Calendar for a separate vote.

Each member of the public wishing to address the City Council on items listed on the Consent Calendar will be given a total of 3 minutes.

---

1. APPROVAL OF MINUTES

Minutes for the regular meetings of the City Council and Housing Authority of May 16, 2023 and approving same as on file in the Records Management Department.

CITY OF ONTARIO *Agenda Report* **June 20, 2023**	**SECTION:** **SPECIAL CEREMONIES**
Department: Recreation & Community Services Prepared By: Danielle Guevara Staff Member Presenting: Nicholas S. Gonzalez, Recreation & Community Services Director Approved By:	Submitted To: Council/OHA Approved: _____ Continued To: _____ Denied: _____ Item No:

SUBJECT: ONTARIO 5K REINDEER RUN & RUDOLPH'S DASH CHECK PRESENTATION TO ONTARIO-MONTCLAIR SCHOOLS FOUNDATION

RECOMMENDATION: That the City Council present the Ontario-Montclair Schools Foundation with a check for the proceeds of the 2022 Ontario 5K Reindeer Run & Rudolph's DASH.

THE FOLLOWING COUNCIL GOALS ARE BEING ACHIEVED:
Encourage, Provide or Support Enhanced Recreational, Educational, Cultural and Healthy City Programs, Policies and Activities

FISCAL IMPACT: The City enters into an agreement annually with the Ontario-Montclair Schools Foundation to split proceeds from this yearly event. As part of that agreement, 75% of the proceeds go to Ontario-Montclair Promise Scholars and 25% of the proceeds go to the City's Empowerment Scholarship program. The adjusted net proceeds for the 2022 event were $73,615.46, which are accounted for in the Recreation & Community Services Department's revenue account. There is no impact to the General Fund.

BACKGROUND & ANALYSIS: Each year the Recreation & Community Services Department partners with the Ontario-Montclair Schools Foundation (OMSF) to support and promote the 5K Reindeer Run & Rudolph's DASH, including seeking sponsors and marketing the event. OMSF garners district-wide support and volunteers. Additionally, OMSF assists with the event's promotion, marketing, and administrative support. In 2022, the 5K Reindeer Run & Rudolph's DASH brought 3,377 runners and $43,800 in sponsorship packages.

The Ontario-Montclair Promise Scholars is an award-winning program designed to assist Ontario-Montclair youth by helping prepare them for their journey toward a college education. Ontario-Montclair Promise Scholars utilizes the proceeds from the event to provide college and career curriculum in each K-6 classroom, take field trips to colleges, host parent presentations, plan college fairs, and assist students with college applications and financial aid forms.

The City's Empowerment Scholarship allows Ontario community members from low-income backgrounds to participate in fee-based recreation activities that will enrich their lives. Community

members can apply for Empowerment Scholarship funds by visiting the city website www.OntarioCA.gov/Recreation.

The adjusted net proceeds for this event were $73,615.46. Per the agreement between the City of Ontario and Ontario-Montclair Schools Foundation, $55,211.60 will benefit the Promise Scholars program, and $18,403.86 will fund the City's Empowerment Scholarships.

A. Accepted a written petition from Prologis LP, Research ("Landowner"), to create a Community Facilities District ("CFD") and to waive certain procedural matters, under the Mello-Roos Community Facilities Act of 1982; and
B. Adopted a Resolution of Intention to establish City of Ontario Community Facilities District No. 61 (Merrill Commerce Center Services), authorize the associated levy of special taxes therein; and set a public hearing for the formation of the CFD as part of the regularly scheduled City Council meeting on Tuesday, June 20, 2023.

RESOLUTION NO. 2023-034 A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF ONTARIO, CALIFORNIA, OF INTENTION TO ESTABLISH A COMMUNITY FACILITIES DISTRICT PROPOSED TO BE NAMED CITY OF ONTARIO COMMUNITY FACILITIES DISTRICT NO. 61 (MERRILL COMMERCE CENTER SERVICES) AND TO AUTHORIZE THE LEVY OF A SPECIAL TAX.

8. AN AMENDMENT TO THE PROFESSIONAL SERVICES AGREEMENT WITH HINDERLITER DE LLAMAS & ASSOCIATES (HDL) FOR SALES TAX CONSULTING AND REVENUE RECOVERY SERVICES AND AN AMENDMENT TO THE PROFESSIONAL SERVICES AGREEMENT WITH HDL COREN & CONE FOR PROPERTY TAX SERVICES

The City Council authorized the City Manager or his designee to execute the following amendments:

A. An Amendment with Hinderliter de Llamas & Associates adding indirect cost recovery to the scope of work, increasing compensation for a new not-to-exceed amount of $1,700,000 with an expiration of June 30, 2025, and an option to add two (2) additional one-year terms to the agreement; and
B. An Amendment for the HdL Coren & Cone agreement to increase compensation for a new not-to-exceed amount of $172,605 with an expiration of June 30, 2025, and an option to add two (2) additional one-year terms to the agreement.

9. A GRANT APPLICATION FROM THE ADMINISTRATION FOR COMMUNITY LIVING FOR THE ACTIVE SENIOR ON THE GO PROGRAM

The City Council authorized the City Manager, or his designee, to execute all documents necessary to apply for and accept a 12-month grant in the amount of $439,094 from the Administration for Community Living (ACL), a division of the U.S.

Department of Health and Human Services, for the Recreation & Community Services Department's Active Seniors on the Go program.

10. FISCAL YEAR 2022-23 THIRD QUARTER BUDGET UPDATE REPORT

A. The City Council approved the budget adjustments and recommendations as presented in the Fiscal Year 2022-23 Third Quarter Budget Update Report (Exhibit A), and adopt a Resolution pertaining to the City Clerk and Treasurer salary;
B. The City Council approve a revised Salary Schedule (Exhibit B) and for Unrepresented Part-time employees and authorize the City Manager to approve sta□ng programs and the assigned salary grade placement for each Part-Time classification with the recommendation of the Human Resources / Risk Management agency.

RESOLUTION NO. 2023-035 A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF ONTARIO, CALIFORNIA, SETTING THE COMPENSATION OF THE CITY CLERK AND CITY TREASURER AND RESCINDING PREVIOUS RESOLUTION NO. 2014-016.

PUBLIC HEARING

11. A PUBLIC HEARING TO CONSIDER ADOPTION OF A RESOLUTION TO UPDATE THE CITY'S DEVELOPMENT IMPACT FEES (DIF) MASTER FACILITIES PLAN

The City Council considered and adopted a Resolution to update the City's Development Impact Fees (DIF) Master Facilities Plan.

RESOLUTION NO. 2023-036 A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF ONTARIO, CALIFORNIA, ADOPTING THE DEVELOPMENT IMPACT FEES (DIF) MASTER FACILITIES PLAN UPDATE.

Notice of public hearing was duly given and affidavits of compliance are on file in the Records Management Department. There were no written communications.

Mayor Leon opened the public hearing and inquired if anyone was interested in speaking to the item. Hearing no one, Mayor Leon closed the public hearing and opened the item for Council discussion.

MOTION: Moved by Council Member Bowman seconded by Mayor pro Tem Dorst-Porada and carried by a unanimous vote 4-0, with Council Member Wapner absent, to adopt Resolution No. 2023-036.

12. A PUBLIC HEARING TO CONSIDER FILE NO. PUD22-005, A PLANNED UNIT DEVELOPMENT FOR A 2.38-ACRE PARCEL OF LAND LOCATED AT THE NORTHEAST CORNER OF EUCLID AVENUE AND D STREET, BORDERED BY E STREET ON THE NORTH AND LEMON AVENUE ON THE EAST

The City Council introduced and waived further reading of an Ordinance approving File No. PUD22-005, the D Block Planned Unit Development, establishing development standards and design guidelines to facilitate a commercial and residential mixed-use development located at the northeast corner of Euclid Avenue and D Street.

ORDINANCE NO. 3248 (FIRST READING) AN ORDINANCE OF THE CITY COUNCIL OF THE CITY OF ONTARIO, CALIFORNIA, APPROVING FILE NO. PUD22-005, A PLANNED UNIT DEVELOPMENT TO ESTABLISH DEVELOPMENT AND PERFORMANCE STANDARDS AND DESIGN GUIDELINES FOR 2.38-ACRES OF LAND LOCATED AT THE NORTHEAST CORNER OF EUCLID AVENUE AND D STREET, BORDERED BY E STREET ON THE NORTH AND LEMON AVENUE ON THE EAST WITHIN THE LUA-1 (EUCLID AVENUE ENTERTAINMENT) OF THE MU-1 (DOWNTOWN MIXED USE) ZONING DISTRICT, AND MAKING FINDINGS IN SUPPORT THEREOF - APNS: 1048-363-05, 1048-363-04, 1048-363-03 AND 1048-363-02.

Notice of public hearing was duly given and affidavits of compliance are on file in the Records Management Department. There was one written communication from Matthew Gelfand in support.

Mayor Leon opened the public hearing and inquired if anyone was interested in speaking to the item. Hearing no one, Mayor Leon closed the public hearing and opened the item for Council discussion.

MOTION: Moved by Council Member Bowman seconded by Mayor pro Tem Dorst-Porada and carried by a unanimous vote 4-0, with Council Member Wapner absent, introduce Ordinance No. 3248.

13. A PUBLIC HEARING TO CONSIDER THE ADOPTION OF AN ORDINANCE APPROVING A DEVELOPMENT AGREEMENT (FILE NO. PDA21-005) BETWEEN THE CITY OF ONTARIO AND GROVE LAND VENTURE LLC, TO ESTABLISH THE TERMS AND CONDITIONS ASSOCIATED WITH TENTATIVE PARCEL MAP 20161 (FILE NO. PMTT20-011), A 159.95 ACRE PROPERTY BORDERED BY EUCALYPTUS AVENUE TO THE NORTH, BON VIEW AVENUE TO THE WEST, MERRILL AVENUE TO THE SOUTH, AND GROVE AVENUE TO THE EAST, WITHIN THE INDUSTRIAL AND BUSINESS PARK LAND USE DISTRICTS OF THE SOUTH ONTARIO LOGISTICS CENTER SPECIFIC PLAN (FILE NO. PSP19-001) AND MAKING FINDINGS IN SUPPORT THEREOF - APNS: 1054-071-01, 1054-071-02, 1054-081-03, 1054-091-01, 1054-091-02, 1054-101-01, 1054-101-02, 1054-231-01, 1054-231-02, 1054-241-01, 1054-241-02, 1054-311-01, 1054-311-02, 1054-321-01 AND 1054-321-02)

The City Council introduced and waived further reading of an Ordinance approving a Development Agreement (File No. PDA21-005) between the City of Ontario and Grove Land Venture LLC, to establish the terms and conditions associated with Tentative Parcel Map 20161 (File No. PMTT20-011), a 159.95-acre property bordered by Eucalyptus Avenue to the north, Bon View Avenue to the west, Merrill Avenue to the south, and Grove Avenue to the east, within the Industrial and Business Park land use districts of the South Ontario Logistics Center Specific Plan.

ORDINANCE NO. 3249 (FIRST READING) AN ORDINANCE OF THE CITY COUNCIL OF THE CITY OF ONTARIO, CALIFORNIA, APPROVING FILE NO. PDA21-005, A DEVELOPMENT AGREEMENT BETWEEN THE CITY OF ONTARIO AND GROVE LAND VENTURE LLC, TO ESTABLISH THE TERMS AND CONDITIONS ASSOCIATED WITH TENTATIVE PARCEL MAP 20161 (FILE NO. PMTT20-011), A 159.95 ACRE PROPERTY BORDERED BY EUCALYPTUS AVENUE TO THE NORTH, BON VIEW AVENUE TO THE WEST, MERRILL AVENUE TO THE SOUTH, AND GROVE AVENUE TO THE EAST, WITHIN THE INDUSTRIAL AND BUSINESS PARK LAND USE DISTRICTS OF THE SOUTH ONTARIO LOGISTICS CENTER SPECIFIC PLAN (FILE NO. PSP19-001) AND MAKING FINDINGS IN SUPPORT THEREOF - APNS: 1054-071-01, 1054-071-02, 1054-081-03, 1054-091-01, 1054-091-02, 1054-101-01, 1054-101-02, 1054-231-01, 1054-231-02, 1054-241-01, 1054-241-02, 1054-311-01, 1054-311-02, 1054-321-01 AND 1054-321-02.

Notice of public hearing was duly given and affidavits of compliance are on file in the Records Management Department. There were no written communications.

Mayor Leon opened the public hearing and inquired if anyone was interested in speaking to the item. Hearing no one, Mayor Leon closed the public hearing and opened the item for Council discussion.

MOTION: Moved by Mayor pro Tem Dorst-Porada seconded by Council Member Bowman and carried by a unanimous vote 4-0, with Council Member Wapner absent, introduce Ordinance No. 3249.

14. A PUBLIC HEARING TO CONSIDER AN AMENDMENT TO THE SOUTH ONTARIO LOGISTICS CENTER SPECIFIC PLAN (FILE NO. PSPA22-008), TO REMOVE A 71.6-ACRE PORTION OF THE SPECIFIC PLAN, IN CONJUNCTION WITH A ZONE CHANGE (FILE NO. PZC23-001) LOCATED SOUTH OF EUCALYPTUS AVENUE, NORTH OF MERRILL AVENUE, WEST OF BON VIEW AVENUE, AND EAST OF CAMPUS AVENUE

The City Council took the following actions:

A. Adopted a Resolution approving File No. PSPA22-008, an Amendment to the South Ontario Logistics Center Specific Plan, including map and textual changes, to remove 71.6 acres from the Specific Plan; and

B. Introduced and waived further reading of an Ordinance adopting File No. PZC23-001, a Zone Change to establish the SP/AG (Specific Plan/Agriculture Overlay) zoning district on the Project site.

RESOLUTION NO. 2023-037 A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF ONTARIO, CALIFORNIA, APPROVING FILE NO. PSPA22-008, AMENDING THE SOUTH ONTARIO LOGISTICS CENTER SPECIFIC PLAN, INCLUDING MAP AND TEXTUAL CHANGES TO REMOVE A 71.6-ACRE PORTION OF LAND GENERALLY LOCATED SOUTH OF EUCALYPTUS AVENUE, NORTH OF MERRILL AVENUE, WEST OF BON VIEW AVENUE, AND EAST OF CAMPUS AVENUE FROM THE SPECIFIC PLAN, AND MAKING FINDINGS IN SUPPORT THEREOF - APNS: 1054-051-01, 1054-051-02, 1054-061-01, 1054-061-02, 1054-251-01, 1054-251-02, 1054-301-01 AND 1054-301-02.

ORDINANCE NO. 3250 (FIRST READING) AN ORDINANCE OF THE CITY COUNCIL OF THE CITY OF ONTARIO, CALIFORNIA, APPROVING FILE NO. PZC23-001, A REQUEST TO ESTABLISH THE SP(AG) (SPECIFIC PLAN/AGRICULTURE OVERLAY) ZONING DISTRICT ON THE 71.6-ACRE PROJECT SITE GENERALLY LOCATED SOUTH OF EUCALYPTUS AVENUE, NORTH OF MERRILL AVENUE, WEST OF BON VIEW AVENUE, AND EAST OF CAMPUS AVENUE, AND MAKING FINDINGS IN SUPPORT THEREOF - APNS: 1054-051-01, 1054-051-02, 1054-061-01, 1054-061-02, 1054-251-01, 1054-251-02, 1054-301-01 AND 1054-301-02.

Notice of public hearing was duly given and affidavits of compliance are on file in the Records Management Department. There were no one written communications.

Mayor Leon opened the public hearing and inquired if anyone was interested in speaking to the item.

Randy Bekendam, spoke in opposition of the item.

Hearing no one else, Mayor Leon closed the public hearing and opened the item for Council discussion. City Manager Ochoa and Executive Director of Community Development Scott Murphy provided additional information for Council.

MOTION: Moved by Mayor pro Tem Dorst-Porada seconded by Council Member Bowman and carried by a unanimous vote 4-0, with Council Member Wapner absent, adopt Resolution No. 2023-037 and introduce Ordinance No. 3250.

STAFF MATTERS

City Manager Ochoa made no comments.

COUNCIL MATTERS

Mayor pro Tem Dorst-Porada announced upcoming events in the City and encouraged local participation with the Inland Empire Utilities Agency.

Mayor Leon spoke regarding the Inland Empire Utilities Agency.

Council Member Bowman had no comments.

Council Member Valencia invited residents to a law enforcement memorial at the Ontario Town Square hosted by the Ontario Police Department.

ADJOURNMENT

Mayor Leon adjourned the meetings of the Joint Agencies at 8:06 p.m. in memory of Patrick Jones and announced the next regular meeting on June 6, 2023.

Respectfully submitted,

CITY OF ONTARIO *Agenda Report* **June 20, 2023**	**SECTION:** **CONSENT CALENDAR**
Department: Financial Services Prepared By: Nathaniel Gibson Staff Member Presenting: Armen Harkalyan, Executive Director of Finance Reviewed By: Cecilia House, . . Approved By:	Submitted To: Council/OHA Approved: _____ Continued To: _____ Denied: _____ Item No: 3

SUBJECT: ANNUAL LEVY OF ASSESSMENTS WITHIN ONTARIO PARKWAY MAINTENANCE ASSESSMENT DISTRICT NOS. 1, 2, 3 AND 4 FOR FISCAL YEAR 2023-24

RECOMMENDATION: That the City Council adopt Resolutions pertaining to the levy of assessments within Ontario Parkway Maintenance Assessment District (OPMAD) Nos. 1, 2, 3 and 4:

A. A Resolution initiating proceedings and ordering the preparation of an Engineer's Report for each district relating to the annual levy of assessments;
B. A Resolution giving preliminary approval of the Engineer's Report;
C. A Resolution for District Nos. 1, 2 and 3, and a Resolution for District No. 4, declaring the City's intention to levy the special assessments for Fiscal Year 2023-24 and set the date of July 18, 2023, for a Public Hearing on each district in accordance with the Landscaping and Lighting Act of 1972.

THE FOLLOWING COUNCIL GOALS ARE BEING ACHIEVED:
Operate in a Businesslike Manner
Focus Resources in Ontario's Commercial and Residential Neighborhoods

FISCAL IMPACT: As proposed, special assessment revenue will generate approximately $287,360 from OPMAD Nos. 1, 2 and 3, and $367,087 from OPMAD No. 4 during Fiscal Year 2023-24. The total cost of $474,714 for operation and maintenance within OPMAD Nos. 1, 2 and 3 will exceed the assessment revenues by $187,354. The difference of $187,354 will be funded as follows: $186,980 as a transfer from the General Fund and the balance of $374 from the district 3 reserves. These amounts are included in the Fiscal Year 2023-24 Adopted Budget. The special assessment for OPMAD No. 4 is sufficient to pay all expenses within this service area.

BACKGROUND & ANALYSIS: The first of these districts was formed in 1976 pursuant to the Landscaping and Lighting Act of 1972 (the 1972 Act). Additional territories are annexed to the districts from time to time as development proceeds. The districts were formed to help minimize the continually increasing cost of maintaining and operating the landscaping along public streets where the property owners do not have direct access to the landscaping. A special assessment is

levied annually on benefiting properties for the cost of operation and maintenance of certain parkway landscaping facilities within the districts. The City's Public Works Agency establishes the annual operation and maintenance costs and administers the maintenance of the landscaping. Annually, an Engineer's Report for each district must be prepared which apportions these costs to each parcel within the districts. The locations of the districts are shown on the attached maps.

OPMAD Nos. 1, 2, and 3 are comprised of single-family residential developments. Due to varying characteristics, the districts are organized into benefit zones and/or maintenance areas. Each zone/maintenance area is assessed for only the operation and maintenance of the facilities from which it receives special direct benefit. The total assessment for each maintenance area is then apportioned to its constituent parcels.

Special assessment revenue will be generated in the combined amount of $287,360 from OPMAD Nos. 1, 2 and 3. The assessed tax rates for Fiscal Year 2022-23, and the proposed and maximum tax rates for Fiscal Year 2023-24, are shown in Exhibit A.

OPMAD No. 4 is comprised of single-family residential tracts and the Ontario Mills development area. The district is organized into 6 maintenance areas. Each maintenance area is assessed for only the operation and maintenance of the facilities from which it receives direct special benefit. The total assessment for each maintenance area is then apportioned to its constituent parcels.

The assessments for OPMAD No. 4 will generate a total of $367,087. OPMAD No. 4 will generate sufficient revenue to pay all expenses within the service area. The assessed tax rates for Fiscal Year 2022-23, and the maximum and proposed tax rates for Fiscal Year 2023-24, are shown in Exhibit A.

Pursuant to the 1972 Act, Engineer's Reports have been prepared for each district and are on file with the Records Management Department. Each report includes plans and specifications for the improvements and maintenance, an estimate of costs, a diagram of the area proposed to be assessed, and an assessment of the costs to the various parcels within each district.

A public hearing is required for each district prior to adoption of the proposed assessments. A combined public hearing will be held on July 18, 2023 for the purpose of accepting comments and written protests. At the conclusion of the public hearing, the City Council will consider adoption of Resolutions confirming the assessments and ordering the levy of the assessments for tax year 2023-24. Notice of the public hearing for the levy of assessments will be published in the local newspaper, in accordance with the applicable statutes.

RESOLUTION NO. _____

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF ONTARIO, CALIFORNIA, ORDERING THE PREPARATION OF THE ASSESSMENT ENGINEER'S REPORTS PURSUANT TO THE PROVISIONS OF DIVISION 15, PART 2, OF THE STREETS AND HIGHWAYS CODE OF THE STATE OF CALIFORNIA, FOR PROCEEDINGS FOR THE ANNUAL ASSESSMENT LEVY WITHIN ONTARIO PARKWAY MAINTENANCE ASSESSMENT DISTRICTS NO. 1, 2, 3 AND 4 FOR FISCAL YEAR 2023-24.

WHEREAS, the City Council of the City of Ontario, California, previously formed maintenance districts pursuant to the terms and provisions of the "Landscaping and Lighting Act of 1972," being Division 15, Part 2, of the Streets and Highways Code of the State of California (the "1972 Act"), known and designated as

CITY OF ONTARIO
PARKWAY MAINTENANCE ASSESSMENT DISTRICTS NO. 1, 2, 3 AND 4

(the "Districts"); and

WHEREAS, at this time the City Council desires to initiate proceedings to provide for the annual levy of assessments for the ensuing fiscal year to provide for the annual costs for maintenance of improvements within the Districts; and

WHEREAS, the proceedings for the annual levy of assessments shall relate to the fiscal year commencing July 1, 2023, and ending June 30, 2024; and

WHEREAS, there has been submitted to this City Council for its consideration at this time, maps showing the boundaries of the area affected by the levy of the assessment for the above-referenced fiscal year, and inventory maps showing and describing in general the works of improvement proposed to be maintained in said Districts, said description being sufficient to identify the works of improvement and the areas proposed to be assessed for said maintenance thereof.

NOW, THEREFORE, IT IS HEREBY RESOLVED as follows:

SECTION 1. That the above recitals are all true and correct.

SECTION 2. That the maps entitled

CITY OF ONTARIO
PARKWAY MAINTENANCE ASSESSMENT DISTRICTS NO. 1, 2, 3 AND 4
BOUNDARY AND INVENTORY MAPS

attached hereto, as submitted to this City Council, showing the boundaries of the proposed areas to be assessed and showing the works of improvement to be maintained, are hereby approved, and a copy thereof shall be on file in the Records Management Department and open to public inspection. The parcels and properties within said area are those proposed to be assessed to pay the costs and expenses for said maintenance work.

SECTION 3. That the proposed maintenance work within the area proposed to be assessed shall be for certain landscaping and appurtenant improvements, as said maintenance work is set forth in the Reports to be presented to this City Council for consideration.

SECTION 4. That the Assessment Engineer, Harris & Associates, is hereby ordered to prepare and file with this City Council the Assessment Engineer's Reports relating to said annual assessment and levy in accordance with the provisions of 1972 Act, Article XIIID of the Constitution of the State of California ("Article XIIID"), and the Proposition 218 Omnibus Implementation Act (Government Code Section 53750 and following) (the "Implementation Act") (the 1972 Act, Article XIIID and the Implementation Act are referred to collectively as the "Assessment Law").

SECTION 5. That upon completion, said Assessment Engineer's Reports shall be filed with the City Clerk, who shall then submit the same to this City Council for its consideration pursuant to the Assessment Law.

The City Clerk of the City of Ontario shall certify as to the adoption of this Resolution.

PASSED, APPROVED, AND ADOPTED this 20th day of June 2023.

RESOLUTION NO. _____

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF ONTARIO, CALIFORNIA, APPROVING THE ASSESSMENT ENGINEER'S REPORTS FOR THE ANNUAL LEVY OF ASSESSMENTS WITHIN ONTARIO PARKWAY MAINTENANCE ASSESSMENT DISTRICTS NO. 1, 2, 3 AND 4 FOR FISCAL YEAR 2023-24.

WHEREAS, the City Council of the City of Ontario, California, pursuant to the provisions of Division 15, Part 2, of the Streets and Highways Code of the State of California (the "1972 Act"), Article XIIID of the Constitution of the State of California ("Article XIIID"), and the Proposition 218 Omnibus Implementation Act (Government Code Section 53750 and following) (the "Implementation Act") (the 1972 Act, Article XIIID and the Implementation Act are referred to collectively as the "Assessment Law"), did, by previous Resolution, order the preparation of the Assessment Engineer's Reports for the annual levy of assessments for the referenced Fiscal Year in the maintenance assessment districts known and designated as

CITY OF ONTARIO
PARKWAY MAINTENANCE ASSESSMENT DISTRICTS NO. 1, 2, 3 AND 4
(the "Districts"); and

WHEREAS, there has now been presented to this City Council the Assessment Engineer's Reports as required by the Assessment Law and as previously directed by Resolution; and

WHEREAS, this City Council has now examined and reviewed the Assessment Engineer's Reports as presented, and is satisfied with each and all of the items and documents as set forth therein, and is satisfied that the assessments on a preliminary basis, have been spread in accordance with the special benefits received from the improvements to be maintained, as set forth in said Assessment Engineer's Reports.

NOW, THEREFORE, IT IS HEREBY RESOLVED as follows:

SECTION 1. That the above recitals are all true and correct.

SECTION 2. That the Assessment Engineer's Reports as presented, consisting of the following:

A. Plans and specifications describing the general nature, location, and extent of the improvements to be maintained and the extent of such maintenance;

B. An estimate of the cost of the maintenance of the improvements for the Districts for the referenced fiscal year;

C. A diagram for each District, showing the area and properties proposed to be assessed; and

D. An annual assessment for the referenced Fiscal Year of the estimated costs of the maintenance of those improvements to be maintained during such Fiscal Year, assessing the net amount upon all assessable lots and/or parcels within the Districts in proportion to the special benefits received;

are hereby approved on a preliminary basis and are ordered to be filed in the Records Management Department as a permanent record and to remain open to public inspection.

SECTION 3. That the City Clerk shall certify to the passage and adoption of this Resolution, and the minutes of this meeting shall so reflect the presentation of the Assessment Engineer's Reports.

The City Clerk of the City of Ontario shall certify as to the adoption of this Resolution.

PASSED, APPROVED, AND ADOPTED this 20th day of June 2023.

RESOLUTION NO. _____

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF ONTARIO, CALIFORNIA, DECLARING ITS INTENTION TO PROVIDE FOR AN ANNUAL LEVY AND COLLECTION OF ASSESSMENTS FOR FISCAL YEAR 2023-24 IN ONTARIO PARKWAY MAINTENANCE ASSESSMENT DISTRICTS NO. 1, 2 AND 3, PURSUANT TO THE PROVISIONS OF DIVISION 15, PART 2, OF THE STREETS AND HIGHWAYS CODE OF THE STATE OF CALIFORNIA, AND SETTING A TIME AND PLACE FOR A PUBLIC HEARING THEREON.

WHEREAS, the City Council of the City of Ontario, California, has previously formed landscaping maintenance assessment districts pursuant to the terms and provisions of the "Landscaping and Lighting Act of 1972," being Division 15, Part 2, of the Streets and Highways Code of the State of California, in what is known and designated as

CITY OF ONTARIO
PARKWAY MAINTENANCE ASSESSMENT DISTRICTS NO. 1, 2 AND 3

(hereinafter referred to as the Districts); and

WHEREAS, at this time, this City Council desires to conduct proceedings to provide for the annual levy of assessments for the ensuing fiscal year, to provide for the costs and expenses necessary for continual maintenance of improvements within said Districts; and

WHEREAS, at this time, there has been presented and approved by this City Council, the Engineer's Reports as required by law, and this City Council desires to conduct the proceedings for said annual levy.

NOW, THEREFORE, IT IS HEREBY RESOLVED as follows:

SECTION 1. That the above recitals are all true and correct.

SECTION 2. That the public interest and convenience requires, and it is the intention of this City Council, to undertake proceedings for the annual levy and collection of special assessments for the continual maintenance of certain improvements, all to service and benefit said Districts as said area is shown and delineated on the maps as previously approved by this City Council and on file in the Records Management Department, open to public inspection, and herein so referenced and made a part hereof, and proposed changes thereto are set forth in the Engineer’s Reports, incorporated herein as a part hereof.

REPORT

SECTION 3. That the Engineer's Reports regarding the annual levy for said Districts, which Reports are for maintenance for said fiscal year, are hereby approved and are directed to be filed in the Records Management Department.

ASSESSMENT

SECTION 4. That the public interest and convenience requires, and it is the intention of this City Council to order the annual assessment levy for the Districts as set forth and described in said Engineer's Reports, and further it is determined to be in the best public interest and convenience to levy and collect annual assessments to pay the costs and expenses of said maintenance and improvement as estimated in said Reports.

DESCRIPTION OF MAINTENANCE

SECTION 5. The assessments levied and collected shall be for the maintenance of certain parkway landscaping and appurtenant improvements, as set forth in the Engineer's Reports, referenced and so incorporated herein.

COUNTY AUDITOR

SECTION 6. The County Auditor shall enter on the County Assessment Roll the amount of the assessments, and the County Tax Collector shall collect said assessments at the time and in the same manner as County taxes are collected. After collection by the County, the net amount of the assessments, after the deduction of any compensation due to the County for collection, shall be paid to the Treasurer for purposes of paying for the costs and expenses of said Districts.

SPECIAL FUND

SECTION 7. That all monies collected shall be deposited in a special fund. Payment shall be made out of said fund only for the purpose provided for in this Resolution, and in order to expedite the making of this maintenance and improvement, the City Council may transfer into said fund as it may deem necessary to expedite the proceedings. Any such transfer shall be repaid out of the proceeds of the assessments provided for in this Resolution.

BOUNDARIES OF DISTRICTS

SECTION 8. Said contemplated maintenance work is in the opinion of this City Council, of direct benefit to the properties within the boundaries of the Districts, and this City Council makes the costs and expenses of said maintenance chargeable upon the Districts, which Districts said City Council hereby declares to be the Districts benefited by said improvement and maintenance, and to be further assessed to pay the costs and expenses thereof. Said Districts shall include each and every parcel of land within the boundaries of said Districts, as said Districts are shown on the maps as approved by this City Council and on file in the Records Management Department.

PUBLIC PROPERTY

SECTION 9. Any lots or parcels of land known as public property, as the same are defined in Section 22663 of Division 15, Part 2, of the Streets and Highways Code of the State of California, which are included within the boundaries of the Districts, shall be omitted and exempt from any assessment to be made under these proceedings to cover any of the costs and expenses of said improvement and maintenance work.

PUBLIC HEARING

SECTION 10. NOTICE IS HEREBY GIVEN THAT A PUBLIC HEARING WILL BE HELD THE 18th DAY OF JULY, 2023, AT THE HOUR OF 6:30 O'CLOCK P.M., IN THE REGULAR MEETING OF THE CITY COUNCIL, BEING IN THE COUNCIL CHAMBERS, WHICH IS THE TIME AND PLACE FIXED BY THIS CITY COUNCIL FOR THE HEARING OF PROTESTS OR OBJECTIONS IN REFERENCE TO THE ANNUAL LEVY OF ASSESSMENTS, TO THE EXTENT OF THE MAINTENANCE, BY PROPERTY OWNERS AFFECTED HEREBY AND ANY OTHER MATTERS CONTAINED IN THIS RESOLUTION; PROVIDED, THAT, IN THE EVENT THE JULY 18, 2023 CITY COUNCIL MEETING IS HELD VIA TELECONFERENCE AND/OR VIDEO CONFERENCE ONLY, THE MEANS BY WHICH THE PUBLIC MAY OBSERVE SUCH PUBLIC HEARING AND OFFER PUBLIC COMMENT SHALL BE PRESCRIBED IN THE NOTICE AND AGENDA FOR SUCH CITY COUNCIL MEETING. ANY PERSONS WHO WISH TO OBJECT TO THE PROCEEDINGS FOR THE ANNUAL LEVY SHOULD FILE A WRITTEN PROTEST WITH THE CITY CLERK PRIOR TO THE TIME SET AND SCHEDULED FOR SAID PUBLIC HEARING.

NOTICE

SECTION 11. That the City Clerk is hereby authorized and directed to publish, pursuant to Government Code Section 6061, a copy of this Resolution in the INLAND VALLEY DAILY BULLETIN, a newspaper of general circulation within said City, said publication shall be made one time and not less than ten (10) days before the date set for the Public Hearing.

SECTION 12. That this Resolution shall take effect immediately upon its adoption.

SECTION 13. For any and all information relating to the proceedings, protest procedure, any documentation and/or information of a procedural or technical nature, your attention is directed to the below listed person at the local agency or department so designated:

Cecilia House
City of Ontario
303 East “B” Street
Ontario, California 91764
(909) 395-2088

The City Clerk of the City of Ontario shall certify as to the adoption of this Resolution.

PASSED, APPROVED, AND ADOPTED this 20th day of June 2023.

RESOLUTION NO. _____

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF ONTARIO, CALIFORNIA, DECLARING ITS INTENTION TO PROVIDE FOR AN ANNUAL LEVY AND COLLECTION OF ASSESSMENTS FOR FISCAL YEAR 2023-24 IN ONTARIO PARKWAY MAINTENANCE ASSESSMENT DISTRICT NO. 4, PURSUANT TO THE PROVISIONS OF DIVISION 15, PART 2, OF THE STREETS AND HIGHWAYS CODE OF THE STATE OF CALIFORNIA, AND SETTING A TIME AND PLACE FOR A PUBLIC HEARING THEREON.

WHEREAS, the City Council of the City of Ontario, California, has previously formed a landscaping maintenance assessment district, and authorized the levy of assessments therein pursuant to the terms and provisions of the "Landscaping and Lighting Act of 1972," being Division 15, Part 2, of the Streets and Highways Code of the State of California (the "1972 Act"), Article XIIID of the Constitution of the State of California ("Article XIIID"), and the Proposition 218 Omnibus Implementation Act (Government Code Section 53750 and following) (the "Implementation Act") (the 1972 Act, Article XIIID and the Implementation Act are referred to collectively as the "Assessment Law") in what is known and designated as

CITY OF ONTARIO
PARKWAY MAINTENANCE ASSESSMENT DISTRICT NO. 4

(the "District"); and

WHEREAS, the City Council previously undertook proceedings as required by the Assessment Law to consider the approval of the levy of (a) maximum annual assessments to finance the estimated costs of the maintenance of all of the improvements to ultimately be maintained upon the completion and acceptance thereof for maintenance, assessing the net amount upon all assessable lots and/or parcels within the District in proportion to the special benefits received; together with a formula pursuant to which such maximum assessment may be adjusted annually for inflation, and (b) an initial annual assessment of the estimated costs of the maintenance of those improvements to be maintained during such Fiscal Year, assessing the net amount upon all assessable lots and/or parcels within the District in proportion to the special benefits received; and

WHEREAS, upon the conclusion of the public hearing related to the proposed levy of the maximum annual assessments referred to in the preceding recital, the assessment ballots submitted in favor of the maximum annual assessments and the assessment ballots received in opposition to the levy of the maximum annual assessments were tabulated with assessment ballots weighted according to the proportional financial obligation of the affected properties; and

WHEREAS, as a result of the tabulation of the assessment ballots submitted, it was determined that the assessment ballots submitted, and not withdrawn, in favor of the proposed maximum annual assessment exceeded the assessment ballots submitted, and not withdrawn, in opposition to the levy of the maximum annual assessment; and

WHEREAS, this City Council has initiated proceedings to provide for the annual levy of assessments for the referenced Fiscal Year, to finance the costs and expenses necessary for continual maintenance of improvements within said District; and

WHEREAS, at this time, there has been presented and approved by this City Council, the Assessment Engineer's Report as required by the Assessment Law, and this City Council desires to conduct the proceedings to authorize said annual levy; and

WHEREAS, the proposed annual assessments for the referenced Fiscal Year as set forth in the Assessment Engineer's Report do not exceed the maximum annual assessments as previously authorized to be levied and, therefore, the proposed levy of assessments for the referenced Fiscal Year are not deemed to be "increased" over the maximum annual assessments.

NOW, THEREFORE, IT IS HEREBY RESOLVED as follows:

RECITALS

SECTION 1. That the above recitals are all true and correct.

IMPROVEMENTS AND MAINTENANCE

SECTION 2. That the public interest and convenience requires, and it is the intention of this City Council, to undertake proceedings for the annual levy and collection of special assessments for the continual maintenance of the improvements described below, all to service and specially benefit the properties within said District as said area is shown and delineated on a map as previously approved by this City Council and on file in the Records Management Department, open to public inspection, and herein so referenced and made a part hereof.

The improvements to be maintained include the landscaping, planting, shrubbery, trees, irrigation systems, hardscapes, fixtures, sidewalks within designated medians, parkways, other public rights-of-way and dedicated easements specially benefiting the properties within the District.

The maintenance of such landscaping shall include the furnishing of services and materials for the ordinary and usual maintenance and servicing of the improvements, including:

(a) Repair, removal, or replacement of all or any part of any improvement;

(b) Providing for the life, growth, health, and beauty of the improvements, including cultivation, irrigation, trimming, spraying, fertilizing, and/or treating for disease and injury; and

(c) The removal of trimmings, rubbish, and debris.

The annual assessment for the referenced Fiscal Year shall be levied only for those improvements completed or projected to be completed and accepted by this City Council for maintenance prior to or during said Fiscal Year.

ASSESSMENT ENGINEER'S REPORT

SECTION 3. That the Assessment Engineer's Report regarding the annual levy for said District, which Report is for maintenance for the said Fiscal Year, is hereby approved and is directed to be filed in the Records Management Department. Reference is made to such Report for a full and detailed description of the improvements to be maintained, the boundaries of the District and any zones therein, and the proposed assessments upon assessable lots and parcels of land within the District.

ASSESSMENT

SECTION 4. That the public interest and convenience requires, and it is the intention of this City Council to order the annual assessment levy for the District as set forth and described in said Assessment Engineer's Report, and further it is determined to be in the best public interest and convenience to levy and collect annual assessments to pay the costs and expenses of said maintenance and improvement as estimated in the Assessment Engineer's Report.

BOUNDARIES OF DISTRICT

SECTION 5. Said contemplated maintenance work is in the opinion of this City Council, of direct benefit to the properties within the boundaries of the District, and this City Council makes the costs and expenses of said maintenance chargeable upon a District, which District said City Council hereby declares to be the District benefited by said improvement and maintenance, and to be further assessed to pay the costs and expenses thereof. Said District shall include each and every parcel of land within the boundaries of said District, as said District is shown on a map as approved by this City Council and on file in the Records Management Department, and so designated by the name of the District.

PUBLIC HEARING

SECTION 6. NOTICE IS HEREBY GIVEN THAT A PUBLIC HEARING WILL BE HELD THE 18th DAY OF JULY, 2023, AT THE HOUR OF 6:30 O'CLOCK P.M., IN THE REGULAR MEETING OF THE CITY COUNCIL, BEING IN THE COUNCIL CHAMBERS, WHICH IS THE TIME AND PLACE FIXED BY THIS CITY COUNCIL FOR THE HEARING OF PROTESTS OR OBJECTIONS IN REFERENCE TO THE ANNUAL LEVY OF ASSESSMENTS, TO THE EXTENT OF THE MAINTENANCE, BY ANY INTERESTED PERSON AND ANY OTHER MATTERS CONTAINED IN THIS RESOLUTION; PROVIDED, THAT, IN THE EVENT THE JULY 18, 2023 CITY COUNCIL MEETING IS HELD VIA TELECONFERENCE AND/OR VIDEO CONFERENCE ONLY, THE MEANS BY WHICH THE PUBLIC MAY OBSERVE SUCH PUBLIC HEARING AND OFFER PUBLIC COMMENT SHALL BE PRESCRIBED IN THE NOTICE AND AGENDA FOR SUCH CITY COUNCIL MEETING. ANY PERSONS WHO WISH TO OBJECT TO THE PROCEEDINGS FOR THE ANNUAL LEVY SHOULD FILE A WRITTEN PROTEST WITH THE CITY CLERK PRIOR TO THE TIME SET AND SCHEDULED FOR SAID PUBLIC HEARING.

NOTICE

SECTION 7. That the City Clerk is hereby authorized and directed to publish, pursuant to Government Code Section 6061, a copy of this Resolution in the INLAND VALLEY DAILY BULLETIN, a newspaper of general circulation within said City, said publication shall be made one time and not less than ten (10) days before the date set for the Public Hearing.

EFFECTIVE DATE OF RESOLUTION

SECTION 8. That this Resolution shall take effect immediately upon its adoption.

PROCEEDING INQUIRIES

SECTION 9. For any and all information relating to the proceedings, protest procedure, any documentation and/or information of a procedural or technical nature, your attention is directed to the below listed person at the local agency or department so designated:

Cecilia House
City of Ontario
303 East “B” Street

CITY OF ONTARIO *Agenda Report* **June 20, 2023**	**SECTION:** **CONSENT CALENDAR**
Department: Financial Services Prepared By: Nathaniel Gibson Staff Member Presenting: Armen Harkalyan, Executive Director of Finance Reviewed By: Cecilia House, . . Approved By:	Submitted To: Council/OHA Approved: _____ Continued To: _____ Denied: _____ Item No: 4

SUBJECT: ANNUAL LEVY OF ASSESSMENTS WITHIN STREET LIGHTING MAINTENANCE DISTRICT NOS. 1 AND 2 FOR FISCAL YEAR 2023-24

RECOMMENDATION:

That the City Council adopt Resolutions pertaining to the levy of assessments within Street Lighting Maintenance District (SLMD) Nos. 1 and 2:

A. A Resolution initiating proceedings and ordering the preparation of an Engineer's Report for each district relating to the annual levy of assessments;
B. A Resolution giving preliminary approval of the Engineer's Reports; and
C. A Resolution for each district declaring the City's intention to levy the special assessments for Fiscal Year 2023-24 and set the date of July 18, 2023, for a Public Hearing on each district in accordance with the Landscaping and Lighting Act of 1972.

THE FOLLOWING COUNCIL GOALS ARE BEING ACHIEVED:
Operate in a Businesslike Manner
Focus Resources in Ontario's Commercial and Residential Neighborhoods

FISCAL IMPACT: As proposed, special assessment revenue will be generated in the amount of $339,815 from SLMD No. 1 and $102,417 from SLMD No. 2 during Fiscal Year 2023-24. A portion of the facilities within SLMD No. 1 provide general benefit to the public at large and cannot be funded with the assessment. The amount of general benefit is $7,972. This amount will be provided from the General Fund and will be included in the Fiscal Year 2023-24 Budget.

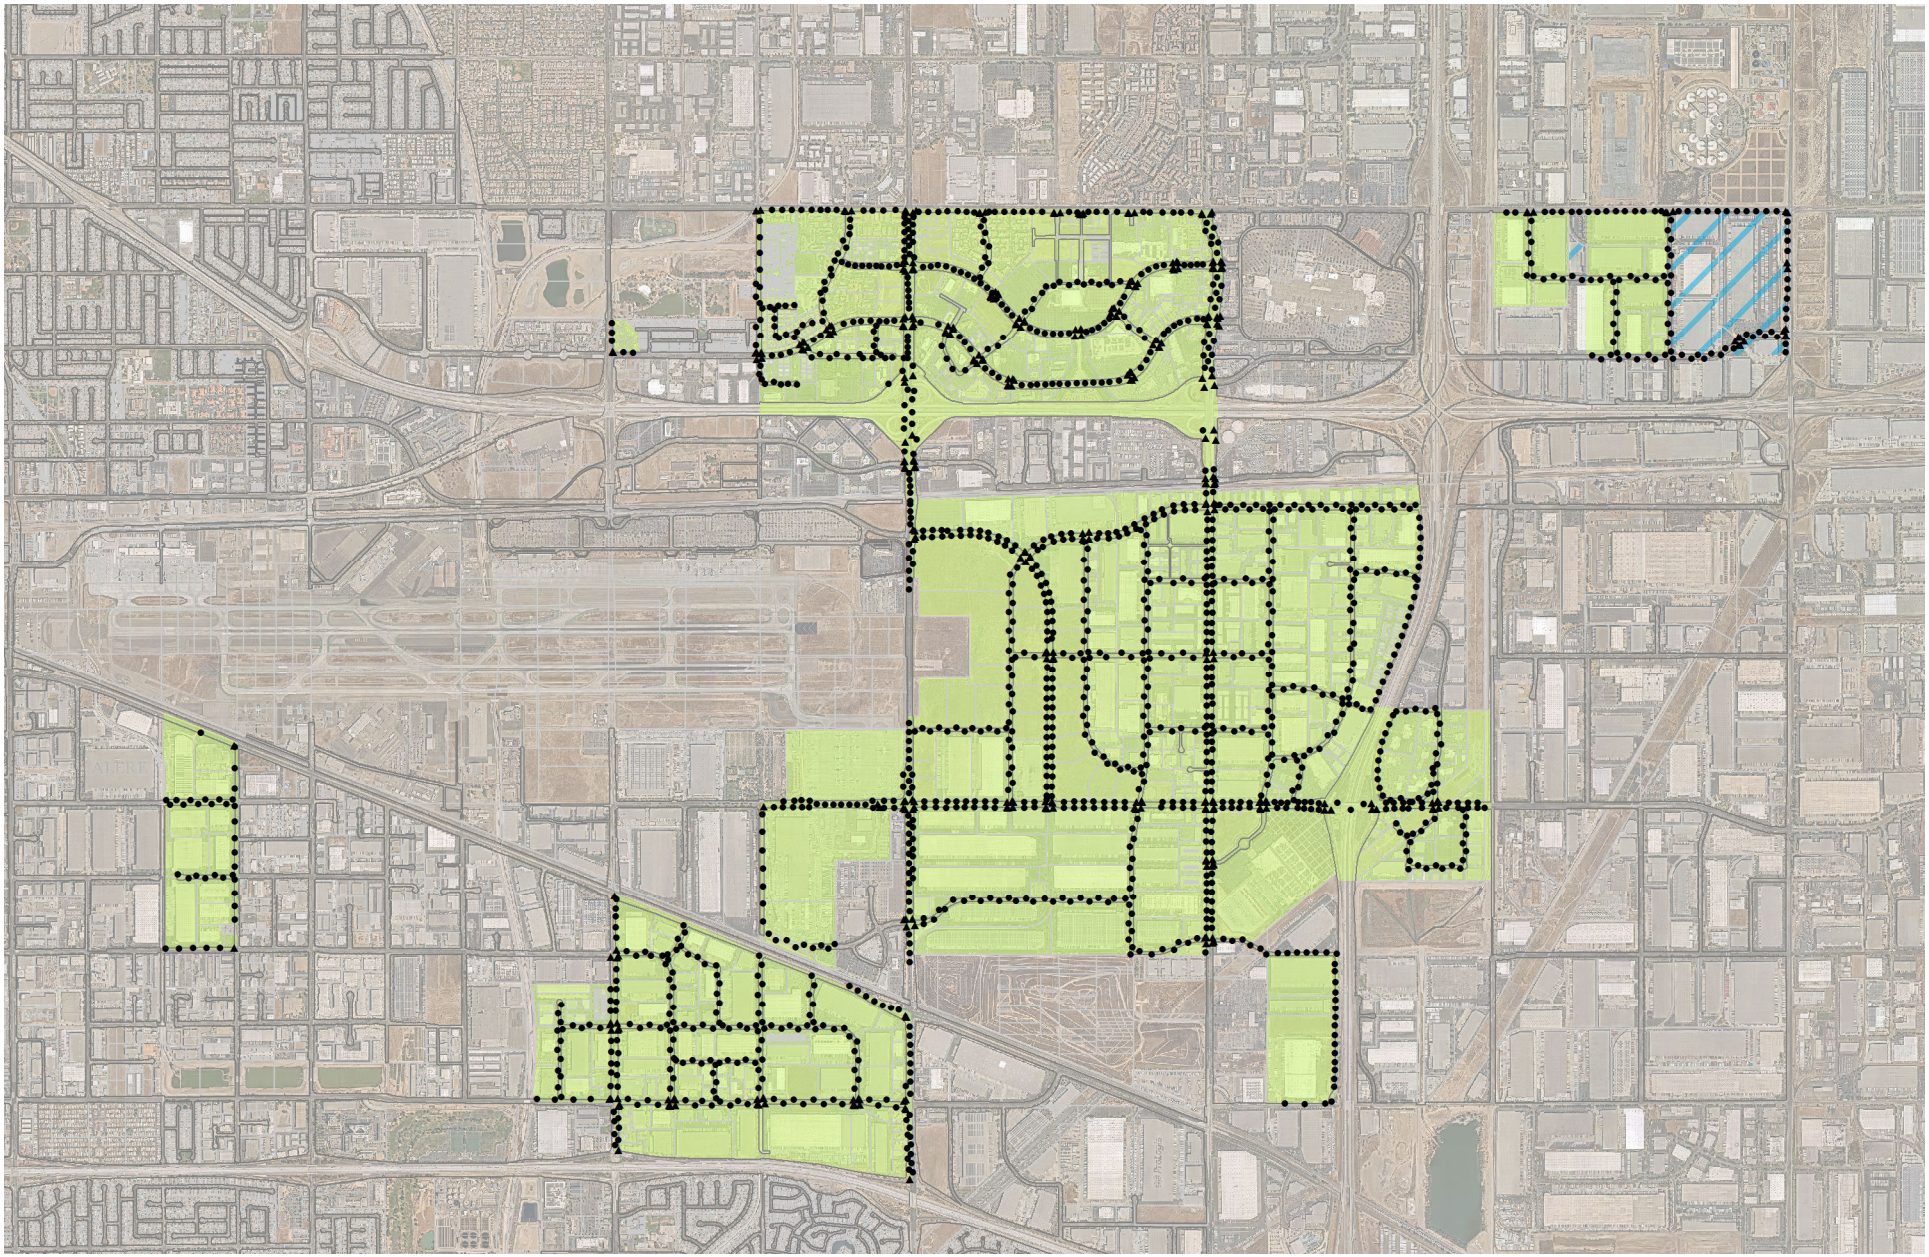
BACKGROUND & ANALYSIS: Street Lighting Maintenance District No. 1 was formed in 1984, and Street Lighting Maintenance District No. 2 was formed in 1999, pursuant to the Landscaping and Lighting Act of 1972 (the 1972 Act), to help minimize the continually increasing cost for maintaining and operating the City's street lighting system. A special assessment is levied annually on benefiting properties for the cost of maintenance and operation of certain street lighting facilities within the districts. The locations of the districts are shown on the attached maps.

The City's Public Works Agency establishes the annual maintenance costs and maintains the street lighting system. An Engineer's Report for each district must be prepared annually, apportioning the costs to each parcel within the districts. The districts are comprised of commercial, industrial and some multi-family residential properties. Due to varying characteristics, the districts are organized into benefit zones and/or maintenance areas. Each zone/maintenance area is assessed for only the operation and maintenance of the facilities from which it receives direct special benefit. The total assessment for each zone/maintenance area is then apportioned to its constituent parcels. Therefore, the assessments are unique and specific to each individual parcel of property.

The City contracted with Harris and Associates to perform a Capital Replacement Study for SLMD 1 and 2. The study established a capital replacement plan which set the initial year replacement requirement amount higher and will gradually decrease over the years. The capital replacement cost for Fiscal Year 2023-24 is $189,896 and CPI is 7.3%. Capital replacement of $189,896 was apportioned as follows: ($117,637 for SLMD 1, zone 2000-1; $24,332 for SLMD 1, zone 2000-2; and $47,927 for SLMD 2).

The total assessment during tax year 2022-23 was $315,643 in SLMD No. 1, and $95,480 in SLMD No. 2. The City's proposed Fiscal Year 2023-24 assessment for the two street light maintenance districts is based on the previous year's actual expenses. The proposed total assessments for tax year 2023-24 are $339,815 in SLMD No. 1, and $102,417 in SLMD No. 2. A portion of the facilities within SLMD No. 1 provide general benefit to the public at large and cannot be funded with the assessment. The amount of this general benefit is $7,972 for Fiscal Year 2023-24. The general benefit will rely on a General Fund subsidy and is included in the City's adopted budget for Fiscal Year 2023-24. The assessed tax rates for Fiscal Year 2022-23, and the proposed and maximum tax rates for Fiscal Year 2023-24, are shown in Exhibit A.

Pursuant to the 1972 Act, Engineer's Reports have been prepared for each district, and are on file with the Records Management Department. Each report includes plans and specifications for the improvements being operated and maintained, an estimate of costs, a diagram of the area proposed to be assessed, and an assessment of the costs to the various parcels within the districts.



A public hearing is required for each district prior to adoption of the proposed assessments. A combined public hearing will be held on July 18, 2023, for the purpose of accepting comments and written protests for both districts. At the conclusion of the public hearing the City Council will consider adoption of Resolutions confirming the assessments and ordering the levy of the assessments for tax year 2023-24. Notice of the public hearing for the levy of assessments will be published in the local newspaper, in accordance with the applicable statutes.

EXHIBIT A

Street Lighting Maintenance Districts Proposed Levy Rates FY 23-24

		Prior Year 2022-23	Maximum 2023-24	Proposed 2023-24

RESOLUTION NO. _____

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF ONTARIO, CALIFORNIA, ORDERING THE PREPARATION OF THE ASSESSMENT ENGINEER'S REPORTS PURSUANT TO THE PROVISIONS OF DIVISION 15, PART 2, OF THE STREETS AND HIGHWAYS CODE OF THE STATE OF CALIFORNIA, FOR PROCEEDINGS FOR THE ANNUAL ASSESSMENT LEVY WITHIN ONTARIO STREET LIGHTING MAINTENANCE DISTRICTS NO. 1 AND NO. 2 FOR FISCAL YEAR 2023-24.

WHEREAS, the City Council of the City of Ontario, California, previously formed maintenance districts pursuant to the terms and provisions of the "Landscaping and Lighting Act of 1972," being Division 15, Part 2, of the Streets and Highways Code of the State of California (the "1972 Act"), known and designated as

CITY OF ONTARIO
STREET LIGHTING MAINTENANCE DISTRICTS NO. 1 AND 2

(the "Districts"); and

WHEREAS, at this time the City Council desires to initiate proceedings to provide for the annual levy of assessments for the referenced Fiscal Year to provide for the annual costs for maintenance of improvements within the Districts; and

WHEREAS, the proceedings for the annual levy of assessments shall relate to the Fiscal Year commencing July 1, 2023, and ending June 30, 2024; and

WHEREAS, there has been submitted to this City Council for its consideration at this time, maps showing the boundaries of the areas affected by the levy of the assessments for the above-referenced Fiscal Year, and inventory maps showing and describing in general the works of improvement proposed to be maintained in said Districts, said description being sufficient to identify the works of improvement and the areas proposed to be assessed for said maintenance thereof.

NOW, THEREFORE, BE IT RESOLVED by the City Council of the City of Ontario as follows:

SECTION 1. That the above recitals are all true and correct.

SECTION 2. That the maps entitled

CITY OF ONTARIO
STREET LIGHTING MAINTENANCE DISTRICTS NO. 1 AND 2
BOUNDARY MAP AND INVENTORY MAPS

attached hereto, as submitted to this City Council, showing the boundaries of the proposed areas to be assessed and showing the works of improvement to be maintained,

are hereby approved, and a copy thereof shall be on file in the Records Management Department and open to public inspection. The proposed parcels and properties within said areas are those to be assessed to pay the costs and expenses for said maintenance work.

SECTION 3. That the proposed maintenance work within the areas proposed to be assessed shall be for street lighting and signal and appurtenant improvements, as said maintenance work is set forth in the Reports to be presented to this City Council for consideration.

SECTION 4. That the Assessment Engineer, Harris & Associates, is hereby ordered to prepare and file with this City Council the Assessment Engineer's Reports relating to said annual assessment and levy in accordance with the provisions of 1972 Act, Article XIIID of the Constitution of the State of California ("Article XIIID"), and the Proposition 218 Omnibus Implementation Act (Government Code Section 53750 and following) (the "Implementation Act") (the 1972 Act, Article XIIID and the Implementation Act are referred to collectively as the "Assessment Law").

SECTION 5. That upon completion, said Assessment Engineer's Reports shall be filed with the City Clerk, who shall then submit the same to this City Council for its consideration pursuant to the Assessment Law.

The City Clerk of the City of Ontario shall certify as to the adoption of this Resolution.

PASSED, APPROVED, AND ADOPTED this 20th day of June 2023.

RESOLUTION NO. _____

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF ONTARIO, CALIFORNIA, APPROVING THE ASSESSMENT ENGINEER'S REPORTS FOR THE ANNUAL LEVY OF ASSESSMENTS WITHIN ONTARIO STREET LIGHTING MAINTENANCE DISTRICTS NO. 1 AND NO. 2 FOR FISCAL YEAR 2023-24.

WHEREAS, the City Council of the City of Ontario, California, pursuant to the provisions of Division 15, Part 2, of the Streets and Highways Code of the State of California (the "1972 Act"), Article XIIID of the Constitution of the State of California ("Article XIIID"), and the Proposition 218 Omnibus Implementation Act (Government Code Section 53750 and following) (the "Implementation Act") (the 1972 Act, Article XIIID and the Implementation Act are referred to collectively as the "Assessment Law"), did, by previous Resolution, order the preparation of the Assessment Engineer's Reports for the annual levy of assessments for the referenced Fiscal Year in the maintenance assessment districts known and designated as

CITY OF ONTARIO
STREET LIGHTING MAINTENANCE DISTRICTS NO. 1 AND 2

(the "Districts"); and

WHEREAS, there has now been presented to this City Council the Assessment Engineer's Reports as required by the Assessment Law and as previously directed by Resolution; and

WHEREAS, this City Council has now examined and reviewed the Assessment Engineer's Reports as presented, and is satisfied with each and all of the items and documents as set forth therein, and is satisfied that the assessments on a preliminary basis, have been assessed in accordance with the special benefits received from the improvements to be maintained, as set forth in said Assessment Engineer's Reports.

NOW, THEREFORE, BE IT RESOLVED by the City Council of the City of Ontario as follows:

SECTION 1. That the above recitals are all true and correct.

SECTION 2. That the Assessment Engineer's Reports as presented, consisting of the following:

A. Plans and specifications describing the general nature, location, and extent of the improvements to be maintained and the extent of such maintenance for each District;

B. An estimate of the cost of the maintenance of the improvements for each District for the referenced Fiscal Year;

C. A diagram for each District, showing the area and properties proposed to be assessed; and

D. An annual assessment within each District for the referenced Fiscal Year of the estimated costs of the maintenance of those improvements to be maintained during such Fiscal Year, assessing the net amount upon all assessable lots and/or parcels within each District in proportion to the special benefits received;

are hereby approved on a preliminary basis and are ordered to be filed in the Records Management Department as a permanent record and to remain open to public inspection.

SECTION 3. That the City Clerk shall certify to the passage and adoption of this Resolution, and the minutes of this meeting shall so reflect the presentation of the Assessment Engineer's Reports.

PASSED, APPROVED, AND ADOPTED this 20th day of June 2023.

RESOLUTION NO. _____

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF ONTARIO, CALIFORNIA, DECLARING ITS INTENTION TO PROVIDE FOR AN ANNUAL LEVY AND COLLECTION OF ASSESSMENTS FOR FISCAL YEAR 2023-24 IN ONTARIO STREET LIGHTING MAINTENANCE DISTRICT NO. 1 PURSUANT TO THE PROVISIONS OF DIVISION 15, PART 2, OF THE STREETS AND HIGHWAYS CODE OF THE STATE OF CALIFORNIA, AND SETTING A TIME AND PLACE FOR A PUBLIC HEARING THEREON.

WHEREAS, the City Council of the City of Ontario, California, has previously formed a street lighting maintenance assessment district pursuant to the terms and provisions of the "Landscaping and Lighting Act of 1972," being Division 15, Part 2, of the Streets and Highways Code of the State of California (the “1972 Act”), in what is known and designated as

CITY OF ONTARIO
STREET LIGHTING MAINTENANCE DISTRICT NO. 1
(hereinafter referred to as the District); and

WHEREAS, the City Council has previously undertaken proceedings as required by the 1972 Act, Article XIIID of the Constitution of the State of California (“Article XIIID”), and the Proposition 218 Omnibus Implementation Act (Government Code Section 53750 and following) (the “Implementation Act and, together with the 1972 Act and Article XIIID, the “Assessment Law”) to approve and has approved the levy of maximum annual assessments to finance the estimated costs of the maintenance of all of the improvements to be maintained, assessing the net amount upon all assessable lots and/or parcels within the District in proportion to the special benefits received; together with a formula pursuant to which such maximum assessments may be adjusted annually for inflation; and

WHEREAS, at this time, this City Council desires to conduct proceedings to provide for the annual levy of assessments for the referenced Fiscal Year, to provide for the costs and expenses necessary for continual maintenance of improvements within said District; and

WHEREAS, at this time, there has been presented and approved by this City Council, the Engineer's Report as required by law, and this City Council desires to conduct the proceedings for said annual levy; and

WHEREAS, the proposed annual assessments for the referenced Fiscal Year as set forth in the Assessment Engineer’s Report do not exceed the maximum annual assessments as previously authorized to be levied and, therefore, the proposed levy of assessments for the referenced Fiscal Year are not deemed to be “increased” over the maximum annual assessments.

NOW, THEREFORE, BE IT RESOLVED by the City Council of the City of Ontario as follows:

SECTION 1. That the above recitals are all true and correct.

SECTION 2. That the public interest and convenience requires, and it is the intention of this City Council, to undertake proceedings for the annual levy and collection of special assessments for the continual maintenance of certain improvements, all to service and specially benefit said District as said area is shown and delineated on the maps as previously approved by this City Council and on file in the Records Management Department, open to public inspection, and herein so referenced and made a part hereof, and proposed changes thereto are set forth in the Engineer's Report, incorporated herein as a part hereof.

REPORT

SECTION 3. That the Engineer's Report regarding the annual levy for said District, which Report is for maintenance for said Fiscal Year, is hereby approved and is directed to be filed in the Records Management Department. Reference is made to such Report for a full and detailed description of the improvements to be maintained, the boundaries of the District and the zones therein, and the proposed assessments on assessable lots and parcels of land within the District.

ASSESSMENT

SECTION 4. That the public interest and convenience requires, and it is the intention of this City Council to order the annual assessment levy for the District as set forth and described in said Engineer's Report, and further it is determined to be in the best public interest and convenience to levy and collect annual assessments to pay the costs and expenses of said maintenance and improvement as estimated in said Report.

DESCRIPTION OF MAINTENANCE

SECTION 5. The assessments levied and collected shall be for the maintenance of certain street lighting and appurtenant improvements, as set forth in the Engineer's Report, referenced and so incorporated herein.

COUNTY AUDITOR

SECTION 6. The County Auditor shall enter on the County Assessment Roll the amount of the assessments, and the County Tax Collector shall collect said assessments at the time and in the same manner as County taxes are collected. After collection by the County, the net amount of the assessments, after the deduction of any compensation due to the County for collection, shall be paid to the Treasurer for purposes of paying for the costs and expenses of said District.

SPECIAL FUND

SECTION 7. That all monies collected shall be deposited in a special fund. Payment shall be made out of said fund only for the purpose provided for in this Resolution, and in order to expedite the making of this maintenance and improvement, the City Council may transfer into said fund as it may deem necessary to expedite the proceedings. Any such transfer shall be repaid out of the proceeds of the assessments provided for in this Resolution.

BOUNDARIES OF DISTRICT

SECTION 8. Said contemplated maintenance work is in the opinion of this City Council, of special benefit to the properties within the boundaries of the District, and this City Council makes the costs and expenses of said maintenance chargeable upon the District, which District said City Council hereby declares to be the District specially benefited by said improvement and maintenance, and to be further assessed to pay the costs and expenses thereof. Said District shall include each and every parcel of land within the boundaries of said District, as said District is shown on the maps as approved by this City Council and on file in the Records Management Department.

PUBLIC HEARING

SECTION 9. NOTICE IS HEREBY GIVEN THAT A PUBLIC HEARING WILL BE HELD THE 18th DAY OF JULY, 2023, AT THE HOUR OF 6:30 O'CLOCK P.M., IN THE REGULAR MEETING OF THE CITY COUNCIL, BEING IN THE COUNCIL CHAMBERS, WHICH IS THE TIME AND PLACE FIXED BY THIS CITY COUNCIL FOR THE HEARING OF PROTESTS OR OBJECTIONS IN REFERENCE TO THE ANNUAL LEVY OF ASSESSMENTS, TO THE EXTENT OF THE MAINTENANCE, BY PROPERTY OWNERS AFFECTED HEREBY AND ANY OTHER MATTERS CONTAINED IN THIS RESOLUTION; PROVIDED, THAT, IN THE EVENT THE JULY 18, 2023 CITY COUNCIL MEETING IS HELD VIA TELECONFERENCE AND/OR VIDEO CONFERENCE ONLY, THE MEANS BY WHICH THE PUBLIC MAY OBSERVE SUCH PUBLIC HEARING AND OFFER PUBLIC COMMENT SHALL BE PRESCRIBED IN THE NOTICE AND AGENDA FOR SUCH CITY COUNCIL MEETING. ANY PERSONS WHO WISH TO OBJECT TO THE PROCEEDINGS FOR THE ANNUAL LEVY SHOULD FILE A WRITTEN PROTEST WITH THE CITY CLERK PRIOR TO THE TIME SET AND SCHEDULED FOR SAID PUBLIC HEARING.

NOTICE

SECTION 10. That the City Clerk is hereby authorized and directed to publish, pursuant to Government Code Section 6061, a copy of this Resolution in the INLAND VALLEY DAILY BULLETIN, a newspaper of general circulation within said City, said publication shall be made one time and not less than ten (10) days before the date set for the Public Hearing.

SECTION 11. That this Resolution shall take effect immediately upon its adoption.

SECTION 12. For any and all information relating to the proceedings, protest procedure, any documentation and/or information of a procedural or technical nature, your attention is directed to the below listed person at the local agency or department so designated:

Cecilia House
City of Ontario
303 East “B” Street
Ontario, California 91764
(909) 395-2088

The City Clerk of the City of Ontario shall certify as to the adoption of this Resolution.

PASSED, APPROVED, AND ADOPTED this 20th day of June 2023.

RESOLUTION NO. _____

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF ONTARIO, CALIFORNIA, DECLARING ITS INTENTION TO PROVIDE FOR AN ANNUAL LEVY AND COLLECTION OF ASSESSMENTS FOR FISCAL YEAR 2023-24 IN ONTARIO STREET LIGHTING MAINTENANCE DISTRICT NO. 2, PURSUANT TO THE PROVISIONS OF DIVISION 15, PART 2, OF THE STREETS AND HIGHWAYS CODE OF THE STATE OF CALIFORNIA, AND SETTING A TIME AND PLACE FOR A PUBLIC HEARING THEREON.

WHEREAS, the City Council of the City of Ontario, California, has previously formed a street lighting maintenance assessment district, and authorized the levy of assessments therein pursuant to the terms and provisions of the "Landscaping and Lighting Act of 1972," being Division 15, Part 2, of the Streets and Highways Code of the State of California (the "1972 Act"), Article XIIID of the Constitution of the State of California ("Article XIIID"), and the Proposition 218 Omnibus Implementation Act (Government Code Section 53750 and following) (the "Implementation Act") (the 1972 Act, Article XIIID and the Implementation Act are referred to collectively as the "Assessment Law") in what is known and designated as

CITY OF ONTARIO
STREET LIGHTING MAINTENANCE DISTRICT NO. 2
(the "District"); and

WHEREAS, the City Council previously undertook proceedings as required by the Assessment Law to consider the approval of the levy of (a) maximum annual assessments to finance the estimated costs of the maintenance of all of the improvements to ultimately be maintained upon the completion and acceptance thereof for maintenance, assessing the net amount upon all assessable lots and/or parcels within the District in proportion to the special benefits received; together with a formula pursuant to which such maximum assessment may be adjusted annually for inflation, and (b) an initial annual assessment of the estimated costs of the maintenance of those improvements to be maintained during such Fiscal Year, assessing the net amount upon all assessable lots and/or parcels within the District in proportion to the special benefits received; and

WHEREAS, upon the conclusion of the public hearing related to the proposed levy of the maximum annual assessments referred to in the preceding recital, the assessment ballots submitted in favor of the maximum annual assessments and the assessment ballots received in opposition to the levy of the maximum annual assessments were tabulated with assessment ballots weighted according to the proportional financial obligation of the affected properties; and

WHEREAS, as a result of tabulation of the assessments ballots submitted, it was determined that the assessment ballots submitted, and not withdrawn, in favor of the proposed maximum annual assessment exceeded the assessment ballots submitted, and not withdrawn, in opposition to the levy of maximum annual assessment, and

WHEREAS, this City Council has initiated proceedings to provide for the annual levy of assessments for the referenced Fiscal Year, to finance the costs and expenses necessary for continual maintenance of improvements within said District; and

WHEREAS, at this time, there has been presented and approved by this City Council, the Assessment Engineer's Report as required by the Assessment Law, and this City Council desires to conduct the proceedings to authorize said annual levy; and

WHEREAS, the proposed annual assessments for the referenced Fiscal Year as set forth in the Assessment Engineer's Report do not exceed the maximum annual assessments as previously authorized to be levied and, therefore, the proposed levy of assessments for the referenced Fiscal Year are not deemed to be "increased" over the maximum annual assessments.

NOW, THEREFORE, BE IT RESOLVED by the City Council of the City of Ontario as follows:

RECITALS

SECTION 1. That the above recitals are all true and correct.

IMPROVEMENTS AND MAINTENANCE

SECTION 2. That the public interest and convenience requires, and it is the intention of this City Council, to undertake proceedings for the annual levy and collection of special assessments for the continual maintenance of the improvements described below, all to service and specially benefit the properties within said District as said area is shown and delineated on a map as previously approved by this City Council and on file in the Records Management Department, open to public inspection, and herein so referenced and made a part hereof:

The improvements to be maintained include street lighting facilities specially benefiting the properties within the District. Such street lighting facilities include all works or improvements used or useful for street lighting, including luminaires, poles, supports, tunnels, manholes, vaults, conduits, pipes, wires, conductors, guys, stubs, platforms, braces, transformers, insulators, contacts, switches, capacitors, meters, communications circuits, appliances, attachments and appurtenances.

The maintenance of such street lighting facilities shall include the furnishing of services and materials for the ordinary and usual maintenance and servicing of the street lighting facilities, including:

(a) Repair, removal, or replacement of all or any part of any street lighting facility; and
(b) The provision of electric current for the operation of such street lighting facilities.

Reference is made to the Assessment Engineer's Report for further information regarding the improvements to be maintained and the scope of such maintenance.

The annual assessment for the referenced Fiscal Year shall be levied only for those improvements completed or projected to be completed and accepted by this City Council for maintenance prior to or during said Fiscal Year.

ASSESSMENT ENGINEER'S REPORT

SECTION 3. That the Assessment Engineer's Report regarding the annual levy for said District, which Report is for maintenance for the said Fiscal Year, is hereby approved and is directed to be filed in the Records Management Department. Reference is made to such Report for a full and detailed description of the improvements to be maintained, the boundaries of the District and any zones therein, and the proposed assessments upon assessable lots and parcels of land within the District.

ASSESSMENT

SECTION 4. That the public interest and convenience requires, and it is the intention of this City Council to order the annual assessment levy for the District as set forth and described in said Assessment Engineer's Report, and further it is determined to be in the best public interest and convenience to levy and collect annual assessments to pay the costs and expenses of said maintenance and improvement as estimated in the Assessment Engineer's Report.

BOUNDARIES OF DISTRICT

SECTION 5. Said contemplated maintenance work is in the opinion of this City Council, of direct benefit to the properties within the boundaries of the District, and this City Council makes the costs and expenses of said maintenance chargeable upon a District, which District said City Council hereby declares to be the District benefited by said improvement and maintenance, and to be further assessed to pay the costs and expenses thereof. Said District shall include each and every parcel of land within the boundaries of said District, as said District is shown on a map as approved by this City Council and on file in the Records Management Department, and so designated by the name of the District.

PUBLIC HEARING

SECTION 6. NOTICE IS HEREBY GIVEN THAT A PUBLIC HEARING WILL BE HELD THE 18th DAY OF JULY, 2023, AT THE HOUR OF 6:30 O'CLOCK P.M., IN THE REGULAR MEETING OF THE CITY COUNCIL, BEING IN THE COUNCIL CHAMBERS, WHICH IS THE TIME AND PLACE FIXED BY THIS CITY COUNCIL FOR THE HEARING OF PROTESTS OR OBJECTIONS IN REFERENCE TO THE ANNUAL LEVY OF ASSESSMENTS, TO THE EXTENT OF THE MAINTENANCE, BY ANY INTERESTED PERSON AND ANY OTHER MATTERS CONTAINED IN THIS RESOLUTION; PROVIDED, THAT, IN THE EVENT THE JULY 18, 2023 CITY COUNCIL MEETING IS HELD VIA TELECONFERENCE AND/OR VIDEO CONFERENCE ONLY, THE MEANS BY WHICH THE PUBLIC MAY OBSERVE SUCH PUBLIC HEARING AND OFFER PUBLIC COMMENT SHALL BE PRESCRIBED IN THE NOTICE AND AGENDA FOR SUCH CITY COUNCIL MEETING. ANY PERSONS WHO WISH TO OBJECT TO

THE PROCEEDINGS FOR THE ANNUAL LEVY SHOULD FILE A WRITTEN PROTEST WITH THE CITY CLERK PRIOR TO THE TIME SET AND SCHEDULED FOR SAID PUBLIC HEARING.

NOTICE

SECTION 7. That the City Clerk is hereby authorized and directed to publish, pursuant to Government Code Section 6061, a copy of this Resolution in the INLAND VALLEY DAILY BULLETIN, a newspaper of general circulation within said City, said publication shall be made one time and not less than ten (10) days before the date set for the Public Hearing.

EFFECTIVE DATE OF RESOLUTION

SECTION 8. That this Resolution shall take effect immediately upon its adoption.

PROCEEDING INQUIRIES

SECTION 9. For any and all information relating to the proceedings, protest procedure, any documentation and/or information of a procedural or technical nature, your attention is directed to the below listed person at the local agency or department so designated:

Cecilia House
City of Ontario
303 East “B” Street
Ontario, California 91764
(909) 395-2088

The City Clerk of the City of Ontario shall certify as to the adoption of this Resolution.

PASSED, APPROVED, AND ADOPTED this 20th day of June 2023.

CITY OF ONTARIO *Agenda Report* **June 20, 2023**	**SECTION:** **CONSENT CALENDAR**
Department: Financial Services Prepared By: Cruz Torres Staff Member Presenting: Armen Harkalyan, Executive Director of Finance Reviewed By: Cecilia House Approved By:	Submitted To: Council/OHA Approved: _____ Continued To: _____ Denied: _____ Item No: 5

SUBJECT: DECLARATION AND DISPOSITION OF SURPLUS REDEMPTION FUNDS IN ASSESSMENT DISTRICTS 106 AND 108

RECOMMENDATION: That the City Council consider and adopt the attached resolutions declaring surplus amounts remaining in the redemption funds of Assessment Districts 106 and 108, and further resolve that the surplus funds for these districts be used for maintenance (capital replacement) of the public improvements funded by the districts.

THE FOLLOWING COUNCIL GOALS ARE BEING ACHIEVED:
Operate in a Businesslike Manner
Focus Resources in Ontario's Commercial and Residential Neighborhoods
Invest in the City's Infrastructure (Water, Streets, Sewers, Parks, Storm Drains and Public Facilities)

FISCAL IMPACT: As proposed, the total amount of surplus in the redemption funds for Assessment Districts 106 and 108 are $165,195 and $140,666, respectively. Designating the use of surplus funds for maintenance of the improvements funded by such districts will provide the City with additional funds to perform needed maintenance and will directly benefit the property within such districts. The City, including the agencies of Ontario Municipal Utilities Company, Public Works, and Community Development, will be able to use the surplus to fund capital replacement projects in these districts. After City Council approval, one of the aforementioned departments will be able to include the surplus amounts in their budget update to City Council in the next quarterly budget update for Fiscal Year 2023-24.

BACKGROUND & ANALYSIS: The City formed Assessment District 106 and 108 to finance various improvements including streets, storm drain, and streetlight improvements within the district, and issued approximately $23.5 million Special Assessment Bonds to finance the improvements in the districts. Boundaries of the Assessment Districts are as follows: AD 106 is located south of Jurupa Street, north of both Philadelphia Street and Mission Boulevard, west of Wineville Avenue and east of Haven Avenue; and AD 108 is located south of Fourth Street, north of Interstate 10, west of Interstate 15, and east of Milliken Avenue. Maps for both districts are attached as Exhibit B. The districts have no outstanding bonds, and the last debt service payment was made in September of

2020. All of the public improvements that were planned for the districts have been completed, and the districts have surplus funds remaining in their respective redemption funds. The estimated balance remaining in Assessment Districts 106 and 108 are $165,195 and $140,666, respectively, and each district has their own fund. Eligible improvement uses are listed in the Summary of Closed Districts Table, attached as Exhibit A.

RESOLUTION NO. _____

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF ONTARIO, CALIFORNIA, MAKING A DETERMINATION REGARDING SURPLUS AMOUNTS REMAINING IN AND FROM AND REDEMPTION FUND OF ASSESSMENT DISTRICT NO. 106, AND DIRECTING THE DISPOSITION OF SUCH SURPLUS AMOUNTS.

WHEREAS, the City Council (the "City Council") of the City of Ontario (the "City"), pursuant to the Municipal Improvement Act of 1913 (being Division 12 of the California Streets and Highways Code), conducted proceedings for the formation of a special assessment district designated as "Assessment District No. 106" (the "Assessment District") to finance certain public improvements (the "Improvements"); and

WHEREAS, the City issued bonds (the "Bonds") to finance certain Improvements within the Assessment District pursuant to The Improvement Bond Act of 1915 (being division 10 of the California Streets and Highways Code) (the "Bond Act"); and

WHEREAS, the Bonds have been fully paid and are no longer outstanding; and

WHEREAS, the Improvements have been completed, all claims from the improvement fund for the Assessment District (the "Improvement Fund") have been paid and there are no amounts remaining in the Improvement Fund; and

WHEREAS, Section 8784 of the Bond Act provides that after payment of all bonds and the interest thereon, that surplus in the redemption fund shall (a) first be applied to repayment to a city of any special taxes levied by it for the purpose of advancing funds under Part 13 (commencing with Section 8800) of the Bond Act, less its recovery on the sale or redemption of the properties assessed, and also of any costs incurred by it under the Bond Act, (b) that the remainder shall be repaid in accordance with the provisions of Section 8783 of the Bond Act to persons paying supplemental assessments, if any, and (c) that the balance may be proportionately credited upon the final installments due upon the assessments securing the bonds and repaid to those persons whose assessments have been previously paid or may be transferred to the general fund of such city; and

WHEREAS, all Bonds and the interest thereon have been fully paid, there are no amounts to be repaid to the City for any special taxes levied by it for the purpose of advancing funds under Part 13 (commencing with Section 8800) of the Bond Act, and there are no amounts to be repaid to persons paying or who paid supplemental assessments pursuant to Section 8783 of the Bond Act; and

WHEREAS, as of the date hereof, there is an amount of not less than $165,194.93 in or from the redemption fund for the Assessment District (the "Redemption Fund"); and

WHEREAS, the City Council desires to determine that all amounts remaining on deposit in or from the Redemption Fund are surplus amounts, and to direct such surplus amounts to be applied to pay the costs of maintenance of the Improvements within the

Assessment District, which includes the furnishing of services and materials for the ordinary and usual maintenance, operation and servicing of any Improvement, including repair, removal or replacement of all or any part of any Improvement.

NOW, THEREFORE, BE IT RESOLVED by the City Council of the City of Ontario as follows:

SECTION 1. The foregoing recitals are true and correct.

SECTION 2. All amounts on deposit in or from the Redemption Fund are hereby determined to be surplus for purposes of Section 8784 of the Bond Act. Such surplus amounts are hereby directed to be applied to the payment of costs of maintenance of the Improvements within the Assessment District, which includes the furnishing of services and materials for the ordinary and usual maintenance, operation and servicing of any Improvement, including repair, removal or replacement of all or any part of any Improvement.

The City Council finds that such use of the surplus amounts would benefit the property within the Assessment District.

SECTION 3. All actions heretofore taken by the officers, employees and agents of the City with respect to surplus amounts remaining in the Redemption Fund, or in connection with or related to any of the matters referred to herein, are hereby approved, confirmed and ratified.

SECTION 4. The officers, employees and agents of the City are hereby authorized and directed to take all actions and do all things that they, or any of them, may deem necessary or desirable to accomplish the purposes of this Resolution and not inconsistent with the provisions hereof.

SECTION 5. This Resolution shall take effect immediately upon its adoption.

The City Clerk of the City of Ontario shall certify as to the adoption of this Resolution.

PASSED, APPROVED and ADOPTED this 20th day of June 2023.

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF ONTARIO, CALIFORNIA, MAKING A DETERMINATION REGARDING SURPLUS AMOUNTS REMAINING IN AND FROM AND REDEMPTION FUND OF ASSESSMENT DISTRICT NO. 108, AND DIRECTING THE DISPOSITION OF SUCH SURPLUS AMOUNTS.

WHEREAS, the City Council (the "City Council") of the City of Ontario (the "City"), pursuant to the Municipal Improvement Act of 1913 (being Division 12 of the California Streets and Highways Code), conducted proceedings for the formation of a special assessment district designated as "Assessment District No. 108" (the "Assessment District") to finance certain public improvements (the "Improvements"); and

WHEREAS, the City issued bonds (the "Bonds") to finance certain Improvements within the Assessment District pursuant to The Improvement Bond Act of 1915 (being division 10 of the California Streets and Highways Code) (the "Bond Act"); and

WHEREAS, the Bonds have been fully paid and are no longer outstanding; and

WHEREAS, the Improvements have been completed, all claims from the improvement fund for the Assessment District (the "Improvement Fund") have been paid and there are no amounts remaining in the Improvement Fund; and

WHEREAS, Section 8784 of the Bond Act provides that after payment of all bonds and the interest thereon, that surplus in the redemption fund shall (a) first be applied to repayment to a city of any special taxes levied by it for the purpose of advancing funds under Part 13 (commencing with Section 8800) of the Bond Act, less its recovery on the sale or redemption of the properties assessed, and also of any costs incurred by it under the Bond Act, (b) that the remainder shall be repaid in accordance with the provisions of Section 8783 of the Bond Act to persons paying supplemental assessments, if any, and (c) that the balance may be proportionately credited upon the final installments due upon the assessments securing the bonds and repaid to those persons whose assessments have been previously paid or may be transferred to the general fund of such city; and

WHEREAS, all Bonds and the interest thereon have been fully paid, there are no amounts to be repaid to the City for any special taxes levied by it for the purpose of advancing funds under Part 13 (commencing with Section 8800) of the Bond Act, and there are no amounts to be repaid to persons paying or who paid supplemental assessments pursuant to Section 8783 of the Bond Act; and

WHEREAS, as of the date hereof, there is an amount of not less than $140,666.10 in or from the redemption fund for the Assessment District (the "Redemption Fund"); and

WHEREAS, the City Council desires to determine that all amounts remaining on deposit in or from the Redemption Fund are surplus amounts, and to direct such surplus amounts to be applied to pay the costs of maintenance of the Improvements within the Assessment District, which includes the furnishing of services and materials for the

ordinary and usual maintenance, operation and servicing of any Improvement, including repair, removal or replacement of all or any part of any Improvement;

NOW, THEREFORE, BE IT RESOLVED by the City Council of the City of Ontario as follows:

SECTION 1. The foregoing recitals are true and correct.

SECTION 2. All amounts on deposit in or from the Redemption Fund are hereby determined to be surplus for purposes of Section 8784 of the Bond Act. Such surplus amounts are hereby directed to be applied to the payment of costs of maintenance of the Improvements within the Assessment District, which includes the furnishing of services and materials for the ordinary and usual maintenance, operation and servicing of any Improvement, including repair, removal or replacement of all or any part of any Improvement.

The City Council finds that such use of the surplus amounts would benefit the property within the Assessment District.

SECTION 3. All actions heretofore taken by the officers, employees and agents of the City with respect to surplus amounts remaining in the Redemption Fund, or in connection with or related to any of the matters referred to herein, are hereby approved, confirmed and ratified.

SECTION 4. The officers, employees and agents of the City are hereby authorized and directed to take all actions and do all things that they, or any of them, may deem necessary or desirable to accomplish the purposes of this Resolution and not inconsistent with the provisions hereof.

SECTION 5. This Resolution shall take effect immediately upon its adoption.

The City Clerk of the City of Ontario shall certify as to the adoption of this Resolution.

CITY OF ONTARIO *Agenda Report* **June 20, 2023**	**SECTION:** **CONSENT CALENDAR**
Department: Engineering Prepared By: Jay Bautista Staff Member Presenting: Scott Murphy, Executive Director Community Development Approved By:	Submitted To: Council/OHA Approved: _____ Continued To: _____ Denied: _____ Item No: 6

SUBJECT: AN AGREEMENT FOR THE OPERATIONS AND MAINTENANCE OF THE WEST VALLEY CONNECTOR BUS RAPID TRANSIT PROJECT

RECOMMENDATION: That the City Council approve an Agreement (on file in the Records Management Department) with Omnitrans for the operations and maintenance of the West Valley Connector Bus Rapid Transit Project; and authorize the City Manager or designee to execute said Agreement, future amendments and related documents.

THE FOLLOWING COUNCIL GOALS ARE BEING ACHIEVED:
Pursue City's Goals and Objectives by Working with Other Governmental Agencies
Focus Resources in Ontario's Commercial and Residential Neighborhoods
Invest in the City's Infrastructure (Water, Streets, Sewers, Parks, Storm Drains and Public Facilities)

FISCAL IMPACT: There is not a direct fiscal impact associated with this action. This Agreement is a requirement of the previously approved agreement between the City and SBCTA for construction of the West Valley Connector project and simply establishes the operations and maintenance obligations of each party.

BACKGROUND & ANALYSIS: The San Bernardino County Transportation Authority (SBCTA), in cooperation with Omnitrans and the cities of Pomona, Montclair, Ontario, and Rancho Cucamonga, is constructing Phase 1 of the West Valley Connector Bus Rapid Transit (BRT) Project (Project). The Project is a 19-mile corridor from downtown Pomona to Victoria Gardens in Rancho Cucamonga located primarily along Holt Avenue/Boulevard and Foothill Boulevard in the counties of Los Angeles and San Bernardino, California. The Project proposes limited stops, providing speed and quality improvements to the public transit system within the corridor. The Project includes approximately 3.5 miles of dedicated BRT lanes with center-running stations on Holt Boulevard in Ontario. In addition, Transit Signal Priority (TSP) is included at the signalized intersections identified through a collaborative transportation operations analysis reviewed and approved by the City. The BRT system will be operated by Omnitrans and is scheduled to begin operation in late 2025.

SBCTA entered into separate Cooperative Agreements with Omnitrans and each participating city documenting their mutual roles and responsibilities to develop the Project. Those agreements anticipated that Omnitrans and each City making commitments to operate and maintain certain facilities and improvements installed as part of the Project. This Agreement is the culmination of that commitment between Omnitrans and the City and establishes the ongoing operations and maintenance of the improvements installed within Ontario as part of the Project. Obligations of the City include granting Omnitrans access to the stations, providing routine patrol and police services at the stations, and water usage at the stations. Project improvements within the public right of way, with the exception of the stations, will be maintained by the City.

CITY OF ONTARIO *Agenda Report* **June 20, 2023**	**SECTION:** **CONSENT CALENDAR**
Department: Municipal Services Prepared By: Manuel Rebolledo Staff Member Presenting: Tito Haes, Executive Director Public Works Reviewed By: Bonnie Tam, Andrea Ampig Approved By:	Submitted To: Council/OHA Approved: _____ Continued To: _____ Denied: _____ Item No: 7

SUBJECT: **AN AMENDMENT TO THE GOODS AND SERVICES AGREEMENT WITH CITRUS MOTORS ONTARIO, INC. FOR THE PROCUREMENT OF FORD OEM PARTS AND SERVICES**

RECOMMENDATION: That the City Council approve and authorize the City Manager or his designee to execute Amendment No. 4 to the Goods & Services Agreement (on file with the Records Management Department) with Citrus Motors Ontario, Inc., of Ontario, California, for the procurement of Ford original equipment manufacturer parts and repair services, exercising the final one-year extension of the Agreement, and extending the term of the Agreement to June 30, 2024, in an amount not-to-exceed $150,000.

THE FOLLOWING COUNCIL GOALS ARE BEING ACHIEVED:
Maintain the Current High Level of Public Safety
Operate in a Businesslike Manner

FISCAL IMPACT: The Fiscal Year 2023-24 Adopted Budget includes appropriations in the Equipment Services Fund for the procurement of Ford original equipment manufacturer (OEM) parts and repair services. The total compensation paid by the City will be contingent upon actual services provided at the contracted rates set forth in the agreement and shall not exceed $530,000 over the five-year term.

BACKGROUND & ANALYSIS: The City owns, operates, maintains, and repairs over 700 vehicles and pieces of equipment to keep them safe and operational. The Fleet Services Department relies on vendors to supply parts and perform certain repairs to our fleet.

On August 18, 2019, the City Council awarded Bid No. 1151 and entered into a one-year agreement for $95,000 with four one-year extensions with Citrus Motors Ontario, Inc. The contract was amended in 2020, 2021, and 2022, to exercise the first three option years and increase the contract amount by $95,000 each year. Due to supply chain shortages and price increases in raw materials, Staff now recommends increasing the total authorized contract amount to ensure the Fleet Services Department can continue to maintain and service vehicles quickly and keep them operational.

CITY OF ONTARIO *Agenda Report* **June 20, 2023**	**SECTION:** **CONSENT CALENDAR**

SUBJECT: **AN AMENDMENT TO THE GOODS AND SERVICES AGREEMENT WITH SOUTHERN COUNTIES LUBRICANTS LLC FOR THE PROCUREMENT OF FLEET OILS, LUBRICANTS, AND COOLANTS**

RECOMMENDATION: That the City Council approve and authorize the City Manager or his designee to execute Amendment No. 3 (on file with the Records Management Department) to the Goods and Services Agreement with Southern Counties Lubricants LLC, of Orange, California, in the amount of $200,000, increasing the total not-to-exceed contract amount to $460,000 for the procurement of fleet oils, lubricants, and coolants.

THE FOLLOWING COUNCIL GOALS ARE BEING ACHIEVED:
Maintain the Current High Level of Public Safety
Operate in a Businesslike Manner

FISCAL IMPACT: The Fiscal Year 2023-24 Adopted Budget includes appropriations of $200,000 in the Equipment Services Fund for the procurement of fleet oils, lubricants, and coolants. The total compensation paid by the City will be contingent upon actual services provided at the contracted rates set forth in the agreement and shall not exceed $460,000 over the five-year term.

BACKGROUND & ANALYSIS: The City owns, operates, and maintains over 700 vehicles and pieces of equipment that require scheduled replacement of oils, lubricants and coolants to maximize their useful life.

On September 3, 2019, the City Council approved Bid No. 1165 and entered into a one-year agreement with Southern Counties Lubricants, LLC. Amendment No. 1 entered on July 1, 2020 extended the term of the Agreement to June 30, 2021. Amendment No. 2 entered on June 1, 2021 extended the term of the Agreement to June 30, 2024. Staff recommends increasing the total authorized compensation of this contract to ensure the Fleet Services Department can continue to maintain and service vehicles quickly and keep them operational.

SUBJECT: **AN AMENDMENT TO THE MAINTENANCE SERVICES AGREEMENT WITH FUEL SERV, INC. FOR ON-CALL GARAGE AND FUEL SITE MAINTENANCE AND REPAIR SERVICES**

RECOMMENDATION: That the City Council authorize the City Manager or his designee to execute Amendment No. 2 to the Maintenance Services Agreement (on File in the Records Management Department) with Fuel Serv, Inc. of Montclair, California, in the amount of $130,000, increasing the total not-to-exceed contract amount to $570,000 and extending the term of the Agreement to June 30, 2024, for garage and fuel site maintenance and repair services.

THE FOLLOWING COUNCIL GOALS ARE BEING ACHIEVED:
Maintain the Current High Level of Public Safety
Operate in a Businesslike Manner

FISCAL IMPACT: The Fiscal Year 2023-24 Adopted Budget includes appropriations in the Equipment Services Fund for garage and fuel site maintenance and repair services. The recommended Amendment increases the authorized contract amount by $130,000, for a new total not-to-exceed contract amount of $570,000. The total compensation paid by the City will be contingent upon actual services provided at the contracted rates set forth in the agreement and shall not exceed $570,000 over the five-year term.

BACKGROUND & ANALYSIS: On June 21, 2021, the City Council authorized the City Manager to execute Amendment No. 1 to the Maintenance Services Agreement with Fuel Serv, Inc. with the option to extend the Agreement for one additional year. The City's fueling equipment provides fuel for fleet vehicles and data for regulatory agencies' required reports. Services provided in the Agreement include installation of fuel tracking equipment on fleet vehicles, scheduled regulatory inspections, testing of the City's fuel sites required by state and local governing agencies, and maintenance on garage equipment to ensure safe and efficient operation.

SUBJECT: AN AMENDMENT TO THE GOODS AND SERVICES AGREEMENT WITH DANIELS TIRE SERVICE FOR TIRE REPAIR AND RETREADING

RECOMMENDATION: That the City Council approve and authorize the City Manager or his designee to execute Amendment No. 5 (on file with the Records Management Department) to the Goods and Services Agreement with Daniels Tire Service of Santa Fe Springs, California, in the amount of $200,000, increasing the total not-to-exceed contract amount to $800,000 and extending the term of the Agreement to June 30, 2024, for tire repair and retreading.

THE FOLLOWING COUNCIL GOALS ARE BEING ACHIEVED:
Maintain the Current High Level of Public Safety
Operate in a Businesslike Manner

FISCAL IMPACT: The Fiscal Year 2023-24 Adopted Budget includes appropriations in the Equipment Services Fund for tire repair and retreading. The recommended Amendment increases the authorized contract amount by $200,000, for a new total not-to-exceed contract amount of $800,000. The total compensation paid by the City will be contingent upon actual services provided at the contracted rates set forth in the Agreement and shall not exceed $800,000 over the five-year term.

BACKGROUND & ANALYSIS: The City owns, operates, and maintains over 700 vehicles and pieces of equipment that require tire repair and retreading to maximize the tire's useful life and minimize replacement costs. During Fiscal Year 2022-23, the Fleet Services Department recapped over 900 tires on the City's fleet of vehicles and equipment.

On July 16, 2019, the City Council approved the award of Bid No. 1135 to Daniels Tire Service, and entered into a one-year Goods & Services Agreement with four one-year options at the City's sole discretion. Staff recommends increasing the total authorized compensation by $200,000 for Fiscal Year 2023-24 to ensure the Fleet Services Department can continue to maintain and repair vehicles quickly and keep them operational so they can provide services to the City of Ontario residents.

CITY OF ONTARIO *Agenda Report* **June 20, 2023**	**SECTION:** **CONSENT CALENDAR**
Department: Municipal Services Prepared By: Manuel Rebolledo Staff Member Presenting: Tito Haes, Executive Director Public Works Reviewed By: Bonnie Tam, Andrea Ampig Approved By:	Submitted To: Council/OHA Approved: _____ Continued To: _____ Denied: _____ Item No: 11

SUBJECT: AN AMENDMENT TO THE GOODS AND SERVICES AGREEMENT WITH DANIELS TIRE SERVICE FOR THE PROCUREMENT OF NEW TIRES AND TIRE CASINGS

RECOMMENDATION: That the City Council approve and authorize the City Manager or his designee to execute Amendment No. 4 (on file with the Records Management Department) to the Goods and Services Agreement with Daniels Tire Service of Santa Fe Springs, California, in the amount of $220,000, increasing the total not-to-exceed contract amount to $960,000 and extending the term of the Agreement to June 30, 2024, for the procurement of new tires and tire casings.

THE FOLLOWING COUNCIL GOALS ARE BEING ACHIEVED:
Maintain the Current High Level of Public Safety
Operate in a Businesslike Manner

FISCAL IMPACT: The Fiscal Year 2023-24 Adopted Budget includes appropriations in the Equipment Services Fund for the procurement of new tires and tire casings. The recommended Amendment increases the authorized contract amount by $220,000 for a new total not-to-exceed contract amount of $960,000. The total compensation paid by the City will be contingent upon actual services provided at the contracted rates set forth in the Agreement and shall not exceed $960,000 over the five-year term.

BACKGROUND & ANALYSIS: The City owns, operates, and maintains over 700 vehicles and pieces of equipment that require the replacement of tires when they have maximized their useful life due to normal wear and tear or become flat from road debris and no longer safe to use. During Fiscal Year 2022-23, the Fleet Services Department replaced 3,745 tires on the City's fleet of vehicles and equipment.

On February 5, 2019, the City Council awarded Bid No. 1062 and entered into a two-year agreement for $160,000 with two one-year extensions with Daniels Tire Service. Staff is recommending extending the contract one additional year for a full five-year contract term. Due to supply chain shortages and price increases in raw materials, Staff recommends increasing the total authorized amount by $220,000 for Fiscal Year 2023-24 to ensure the Fleet Services Department can continue to maintain and repair vehicles quickly and keep them operational.

CITY OF ONTARIO *Agenda Report* **June 20, 2023**	**SECTION:** **CONSENT CALENDAR**
Department: Municipal Services Prepared By: Manuel Rebolledo Staff Member Presenting: Tito Haes, Executive Director Public Works Reviewed By: Bonnie Tam, Andrea Ampig Approved By:	Submitted To: Council/OHA Approved: _____ Continued To: _____ Denied: _____ Item No: 12

SUBJECT: **AMENDMENTS TO THE GOODS AND SERVICES AGREEMENTS WITH FIX AUTO SOUTH ONTARIO, LOS ANGELES TRUCK CENTERS AND INLAND BODY AND PAINT CENTER FOR VEHICLE COLLISION REPAIR SERVICES**

RECOMMENDATION: That the City Council take the following actions:

A. Approve and authorize the City Manager or his designee to execute Amendment No. 1 to the Goods and Services Agreement (on file with the Records Management Department) with Fix Auto of South Ontario (formerly California Collision Center), of Ontario, California, in the amount of $200,000, increasing the total not-to-exceed contract amount to $470,000, and extending the Agreement for up to two (2) one-year options for vehicle collision repair services;
B. Approve and authorize the City Manager or his designee to execute Amendment No. 1 to the Goods and Services Agreement (on file with the Records Management Department) with Los Angeles Truck Centers, of Whittier, California, in the amount of $250,000, increasing the total not-to-exceed contract amount to $475,000, and extending the Agreement for up to two (2) one-year options for vehicle collision repair services; and
C. Approve and authorize the City Manager or his designee to execute Amendment No. 2 (on file with the Records Management Department) to the Goods and Services Agreement with Inland Body and Paint Center, of Fontana, California, in the amount of $290,000, increasing the total not-to-exceed contract amount to $500,000, and extending the Agreement for up to two (2) one-year options for vehicle collision repair services.

THE FOLLOWING COUNCIL GOALS ARE BEING ACHIEVED:
Maintain the Current High Level of Public Safety
Operate in a Businesslike Manner

FISCAL IMPACT: The Fiscal Year 2023-24 Adopted Budget includes appropriations from the Equipment Services Fund for the procurement of vehicle collision repair services.

Fix Auto South Ontario

The recommended Amendment increases the authorized contract amount for option year one by $100,000 for Fiscal Year 2023-24, for a new total not-to-exceed contract amount of $370,000. The contract amount of option year two is $100,000, for a new total not-to-exceed contract amount of $470,000. The total compensation paid by the City will be contingent upon actual services provided at the contracted rates set forth in the Agreement and shall not exceed $470,000 over the five-year term.

Los Angeles Truck Centers

The recommended Amendment increases the authorized contract amount for option year one by $125,000 for Fiscal Year 2023-24, for a new total not-to-exceed contract amount of $350,000. The contract amount of option year two is $125,000, for a new total not-to-exceed contract amount of $475,000. The total compensation paid by the City will be contingent upon actual services provided at the contracted rates set forth in the Agreement and shall not exceed $475,000 over the five-year term.

Inland Body and Paint Center

The recommended Amendment increases the authorized contract amount for option year one by $145,000 for Fiscal Year 2023-24, for a new total not-to-exceed contract amount of $355,000. The contract amount of option year two is $145,000, for a new total not-to-exceed contract amount of $500,000. The total compensation paid by the City will be contingent upon actual services provided at the contracted rates set forth in the Agreement and shall not exceed $500,000 over the five-year term.

BACKGROUND & ANALYSIS: The City owns, operates, maintains, and repairs over 700 vehicles and pieces of equipment to keep them safe and operational. The Fleet Services Department relies on vendors to supply parts and perform certain repairs to our fleet.

On September 15, 2020, the City Council awarded Bid No. 1338 and entered into three-year Agreements with Fix Auto of South Ontario (formerly California Collision Center), Los Angeles Truck Centers, and Inland Body and Paint. Due to supply chain shortages and price increases in raw materials, Staff recommends increasing the total authorized compensation of these contracts to ensure the Fleet Services Department can continue to maintain and service vehicles quickly and keep them operational.

SUBJECT: **AMENDMENTS TO THE GOODS AND SERVICES AGREEMENTS WITH LOS ANGELES TRUCK CENTERS AND SOUTHERN CALIFORNIA FLEET SERVICES FOR THE PROCUREMENT OF MEDIUM AND HEAVY-DUTY VEHICLE PARTS AND REPAIRS**

RECOMMENDATION: That the City Council take the following actions:

A. Approve and authorize the City Manager or his designee to execute Amendment No. 1 to the Goods and Services Agreement (on file with the Records Management Department) with Los Angeles Truck Centers, of Whittier, California, for the procurement of medium and heavy-duty vehicle parts, and repairs, in the amount of $400,000, increasing the total not-to-exceed contract amount to $700,000 and extend the term of the Agreement for up to two (2) one-year options; and
B. Approve and authorize the City Manager or his designee to execute Amendment No. 1 to the Goods and Services Agreement (on file with the Records Management Department) with Southern California Fleet Services, of Corona, California, for the procurement of medium and heavy-duty vehicle parts and repairs, in the amount of $80,000, increasing the total not-to-exceed contract amount to $200,000 and extend the term of the Agreement for up to two (2) one-year options.

THE FOLLOWING COUNCIL GOALS ARE BEING ACHIEVED:
Maintain the Current High Level of Public Safety
Operate in a Businesslike Manner

FISCAL IMPACT: The Fiscal Year 2023-24 Adopted Budget includes appropriations from the Equipment Services Fund for the procurement of medium and heavy-duty vehicle parts and repairs.

The recommended Amendment for Los Angeles Truck Centers increases the authorized contract amount for option year one by $200,000, for Fiscal Year 2023-24 and option year two by $200,000 for a new total not-to-exceed contract amount of $700,000. The total compensation paid by the City will be contingent upon actual services provided at the contracted rates set forth in the Agreement and shall not exceed $700,000 over the five-year term.

The recommended Amendment for Southern California Fleet Services increases the authorized contract amount for option year one by $40,000 for Fiscal Year 2023-24 and option year two by $40,000, for a new total not-to-exceed contract amount of $200,000. The total compensation paid by the City will be contingent upon actual services provided at the contracted rates set forth in the Agreement and shall not exceed $200,000 over the five-year term.

BACKGROUND & ANALYSIS: The City owns, operates, maintains, and repairs over 700 vehicles and pieces of equipment to keep them safe and operational. The Fleet Services Department relies on vendors to supply parts and perform certain repairs to our fleet.

On August 18, 2020, the City Council awarded Bid No. 1337 and entered into three-year Agreements with Los Angeles Truck Centers and Southern California Fleet Services. Staff recommends increasing the total authorized compensation of these Agreements to ensure the Fleet Services Department can continue to maintain and service vehicles quickly and keep them operational.

CITY OF ONTARIO *Agenda Report* **June 20, 2023**	**SECTION:** **CONSENT CALENDAR**
Department: Municipal Services Prepared By: Manuel Rebolledo Staff Member Presenting: Tito Haes, Executive Director Public Works Reviewed By: Bonnie Tam Approved By:	Submitted To: Council/OHA Approved: _____ Continued To: _____ Denied: _____ Item No: 14

SUBJECT: PRE-AUTHORIZE THE PURCHASE OF FLEET VEHICLES WITH NATIONAL AUTO FLEET GROUP

RECOMMENDATION: That the City Council pre-authorize the cooperative purchase and delivery of thirty-three (33) Ford Police Utility Vehicles for the Police Department from National Auto Fleet Group of Watsonville, California, consistent with the terms and conditions of the Sourcewell Cooperative Contract #091521-NAF in the amount of $1,512,500 plus a 20% contingency of $302,500 for a total not-to-exceed amount of $1,815,000.

THE FOLLOWING COUNCIL GOALS ARE BEING ACHIEVED:
Maintain the Current High Level of Public Safety
Operate in a Businesslike Manner

FISCAL IMPACT: The Fiscal Year 2023-24 Adopted Budget includes appropriations from the Equipment Services Fund for the purchase of Police vehicles. The total cost of the vehicles recommended for purchase is $1,512,500 plus a 20% contingency of $302,500 to mitigate any unforeseen issues with supply chain surcharges and manufacturer price increases, for a total not-to-exceed amount of $1,815,000.

BACKGROUND & ANALYSIS: The fifteen (15) vehicles recommended for replacement in this action have outlived their useful life and is no longer cost effective to maintain them. They are scheduled for replacement pursuant to ongoing efforts to reduce expenses and maximize useful life expectancy while ensuring safe and reliable operations. This procurement action will result in the replaced vehicles being available to surplus, with any auction sale proceeds returning to the Equipment Service Fund. The eighteen (18) vehicle additions requested by the Police Department are a result of growth throughout the City leading to increased operations.

In general conformation with the provisions of Government Code Section 54201 through 54204, Ontario Municipal Code Section 2-6.29 allows for the purchase of supplies and equipment through cooperative purchasing programs, pursuant to California Government Code Section 6502 and City of Ontario Resolution No. 91-141. Cooperative purchasing allows the City to pool its procurement

power with other public agencies to obtain lower pricing than otherwise might be possible.

QUANTITY	TYPE	AGENCY	PRICE
33	Ford Police Utility Vehicles	Police Department	$1,815,000

SUBJECT: AMENDMENTS TO THE ON-CALL ARCHITECTURAL SERVICES AGREEMENT WITH ROBERT BORDERS AND ASSOCIATES FOR VARIOUS CITYWIDE PROJECTS

RECOMMENDATION: That the City Council take the following actions:

A. Authorize the City Manager or his designee to execute Amendment No. 14 to the Design Services Agreement with Robert Borders and Associates of Costa Mesa, California, for the Sam Alba Park Restroom Renovation Project in the amount of $7,550 for a total not-to-exceed contract amount of $467,018;
B. Authorize the City Manager or his designee to complete and execute Amendment No. 15 to the Design Services Agreement with Robert Borders and Associates of Costa Mesa, California, for the Community Development Block Wall on Mountain Avenue Project in the amount of $6,380 for a total not-to-exceed contract amount of $473,398; and
C. Authorize the City Manager or his designee to execute all documents required for the completion of the project including, but not limited to, contracts, agreements, assessments, easements, reduction of retention accounts, and filing a notice of completion at the conclusion of all construction related activities.

THE FOLLOWING COUNCIL GOALS ARE BEING ACHIEVED:
Invest in the City's Infrastructure (Water, Streets, Sewers, Parks, Storm Drains and Public Facilities)

FISCAL IMPACT: The Fiscal Year 2023-24 Adopted Budget includes appropriations in the Community Development Block Grant (CDBG) Fund for the Sam Alba Park Restroom Renovation and Community Development Block Wall on Mountain Avenue Projects. The recommended Amendment No. 14 will increase the contract amount by $7,550 for a total contract amount not-to-exceed $467,018. The recommended Amendment No. 15 will increase the total contract amount by $6,380, for a total contract amount not-to-exceed $473,398. The total contract amount of $473,398 for the On-Call Agreement with Robert Borders and Associates includes On-Call work performed for various citywide projects.

BACKGROUND & ANALYSIS:

Sam Alba Park Restroom Renovation Project

The City receives an annual allocation from the CDBG program. The CDBG program is federal funding that is administered by the U.S. Department of Housing and Urban Development. CDBG funds can be used by local jurisdictions to support programs that benefit low and moderate-income areas and people, including infrastructure, community facilities and parks, and public services.

Approximately 500 square feet of the existing Sam Alba Park Restroom will be demolished and a new pre-fabricated restroom with one male and one female stall will be installed to meet the Americans with Disabilities Act (ADA) access requirements, improve infrastructure, and provide improved security monitoring for the Ontario Police Department. A total of $709,524 has been budgeted for the Sam Alba Restroom Renovation Project in the FY 2023-24 Capital Improvement Program Budget. Previously, design services were performed for the project totaling $52,675. Staff recommends performing additional design services for construction drawing revisions for a total amount of $7,550.

Community Block Wall on Mountain Avenue Project

On February 7, 2023, the City Council approved Amendment No. 13 for Robert Borders and Associates to design a community block wall and install landscaping on a public easement along Mountain Avenue between D Street and G Street. Due to project scope changes, additional funding is required for the Design Services to complete the project.

SUBJECT: A MAINTENANCE SERVICES AGREEMENT WITH BEAR ELECTRICAL SOLUTIONS, INC. FOR TRAFFIC SIGNAL MAINTENANCE SERVICES

RECOMMENDATION: That the City Council approve and authorize the City Manager or designee to execute a three-year Maintenance Services Agreement (on file in the Records Management Department) with Bear Electrical Solutions, Inc., of Alviso, California, to provide traffic signal maintenance and repair services for a not-to-exceed amount of $775,500 per year and $2,326,500 for the term of the contract.

THE FOLLOWING COUNCIL GOALS ARE BEING ACHIEVED:
Operate in a Businesslike Manner
Invest in the City's Infrastructure (Water, Streets, Sewers, Parks, Storm Drains and Public Facilities)

FISCAL IMPACT: The Agreement is for a three-year term with an optional two-year extension. The contract amount is for $705,000 plus a 10% contingency of $70,500 for a total authorized expenditure of $775,500 per year with an overall three year not-to exceed amount of $2,326,500. The Fiscal Year 2023-24 Adopted Budget includes the annual appropriations for services. If approved, appropriations will be added to the future years' budgets consistent with the annual budget adoption process.

BACKGROUND & ANALYSIS: Traffic signals contribute to the safety and security of pedestrians, bicycles, vehicles, homeowners, and businesses. Currently, there are approximately 230 traffic signals in the City that will be maintained through this proposed contract. The services to be performed, in general, consist of routine preventative maintenance, extraordinary maintenance, and additional maintenance of traffic signal systems for locations that are the responsibility of the City of Ontario.

In May 2023, the City solicited proposals for the traffic signal maintenance services. The City received 2 proposals from the following companies:

COMPANY	LOCATION
Bear Electrical Solutions, Inc,	Alviso, CA
Yunex LLC	Riverside, CA

After a thorough review of the proposals submitted, consideration was given to the overall proposal, experience of each company and team members, pricing, and references. Bear Electrical Solutions, Inc., has a large workforce of International Municipal Signal Association (ISMA) certified technicians and a large fleet of vehicles and equipment which ensures they have the resources to provide service to the City of Ontario without disruption, 24 hours per day, 365 days a year, including all holidays. Based on their combined qualifications and pricing, Staff recommends that the City enter into a Maintenance Services Agreement with Bear Electrical Solutions, Inc.

SUBJECT: A RESOLUTION TO STAND AGAINST ANTISEMITISM AND HATRED

RECOMMENDATION: That the City Council adopt a Resolution denouncing and condemning antisemitism and all forms of hatred.

THE FOLLOWING COUNCIL GOALS ARE BEING ACHIEVED:
Maintain the Current High Level of Public Safety

FISCAL IMPACT: There is no direct fiscal impact associated with this action.

BACKGROUND & ANALYSIS:

Antisemitism is a persistent issue that continues to affect communities around the world. It is characterized by acts of hatred, discrimination, and prejudice against Jewish individuals and the Jewish community. Anti-Semitic incidents can range from hate speech and vandalism to physical violence, posing a serious threat to the safety, well-being, and sense of belonging of Jewish residents. The City of Ontario takes great pride in diversity and respect for all people, and the Jewish Community is an important part of the City's fabric, recognizing our diversity as a key strength for the City and our character.

RESOLUTION NO. _____

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF ONTARIO, CALIFORNIA, CONDEMNING AND REJECTING ANTISEMITISM AND SUPPORTING THE INTERNATIONAL HOLOCAUST REMEMBRANCE ALLIANCE BY AFFIRMING ONTARIO'S COMMITMENT TO ENSURING OUR COMMUNITY IS A SAFE AND WELCOMING PLACE.

WHEREAS, the City of Ontario is committed to inclusion and advancement of diversity and equity for people of all races, ethnicities, national origins, religions, ages, genders, and backgrounds; and

WHEREAS, the City of Ontario takes great pride in diversity and respect for all people, and the Jewish community is an important part of the City's fabric, recognizing our diversity as a key strength for the City and our character; and

WHEREAS, the City of Ontario supports national, state, and local government efforts directed at eradicating antisemitism and all forms of hatred, and supports expanded education programs, including Holocaust programs, to counter intolerance and discrimination; and

WHEREAS, the City of Ontario condemns antisemitism in all its forms, including: hatred and prejudice directed towards Jewish community members; stereotypes or conspiracy theories about Jews; Holocaust denial or distortion, and; extremist indoctrination or recruitment related to any form of antisemitism; and

WHEREAS, the City of Ontario affirms that hatred and bias in any form are not acceptable in our community; and

WHEREAS, any victims of antisemitism in the City of Ontario are urged to report any incidents — as hate crimes or bias-related events — so that local law enforcement can respond, track such incidents, and bring perpetrators to justice.

NOW, THEREFORE, BE IT RESOLVED by the City Council of the City of Ontario as follows:

SECTION 1. That the City of Ontario condemns all forms of hate, racism, and violence perpetrated, tolerated, or encouraged by any group or individual.

SECTION 2. That the City of Ontario supports our Jewish community members and condemns racism, intolerance, hate, and violent attacks against them.

SECTION 3. That the City of Ontario recognizes the International Holocaust Remembrance Alliance's (IHRA) working definition of antisemitism as "a certain perception of Jews, which may be expressed as hatred towards Jews. Rhetorical and physical manifestations of antisemitism are directed toward Jewish or non-Jewish individuals and/or their property, toward Jewish community institutions and religious facilities."

SECTION 4. That the City of Ontario will continue to work alongside the American Jewish Committee, the Anti-Defamation League, the United States Conference of Mayors, and Jewish Federation of the Greater San Gabriel and Pomona Valleys to combat and denounce antisemitism.

SECTION 5. The City Clerk shall certify the adoption of this Resolution.

The City Clerk of the City of Ontario shall certify as to the adoption of this Resolution.

PASSED, APPROVED, AND ADOPTED this 20th day of June 2023.

SUBJECT: AN AMENDMENT WITH STANTEC CONSULTING SERVICES INC. FOR THE ON-CALL DESIGN SERVICES AGREEMENT FOR THE VINEYARD AVENUE SEWER DIVERSION

RECOMMENDATION: That the City Council approve and authorize the City Manager, or designee to execute Amendment No. 10 to the On-Call Design Services Agreement (on file in the Records Management Department) with Stantec Consulting Services, Inc., of Irvine, California, for a total-not-to-exceed amount of $256,295, and a term through May 6, 2024.

THE FOLLOWING COUNCIL GOALS ARE BEING ACHIEVED:
Focus Resources in Ontario's Commercial and Residential Neighborhoods
Invest in the City's Infrastructure (Water, Streets, Sewers, Parks, Storm Drains and Public Facilities)

FISCAL IMPACT: Proposed Amendment No. 10 to Stantec Consulting Services, Inc. (Stantec) will increase the existing agreement by $256,295 for a total revised Agreement not-to-exceed amount of $1,446,418. Fiscal Year 2022-23 Adopted Capital Improvement Program includes appropriations from the Sewer Capital Fund for these services. The City and Stantec have agreed to the fixed billing rates and Stantec will be compensated for the scope of work at the approved billing rates. There is no impact to the General Fund.

BACKGROUND & ANALYSIS:

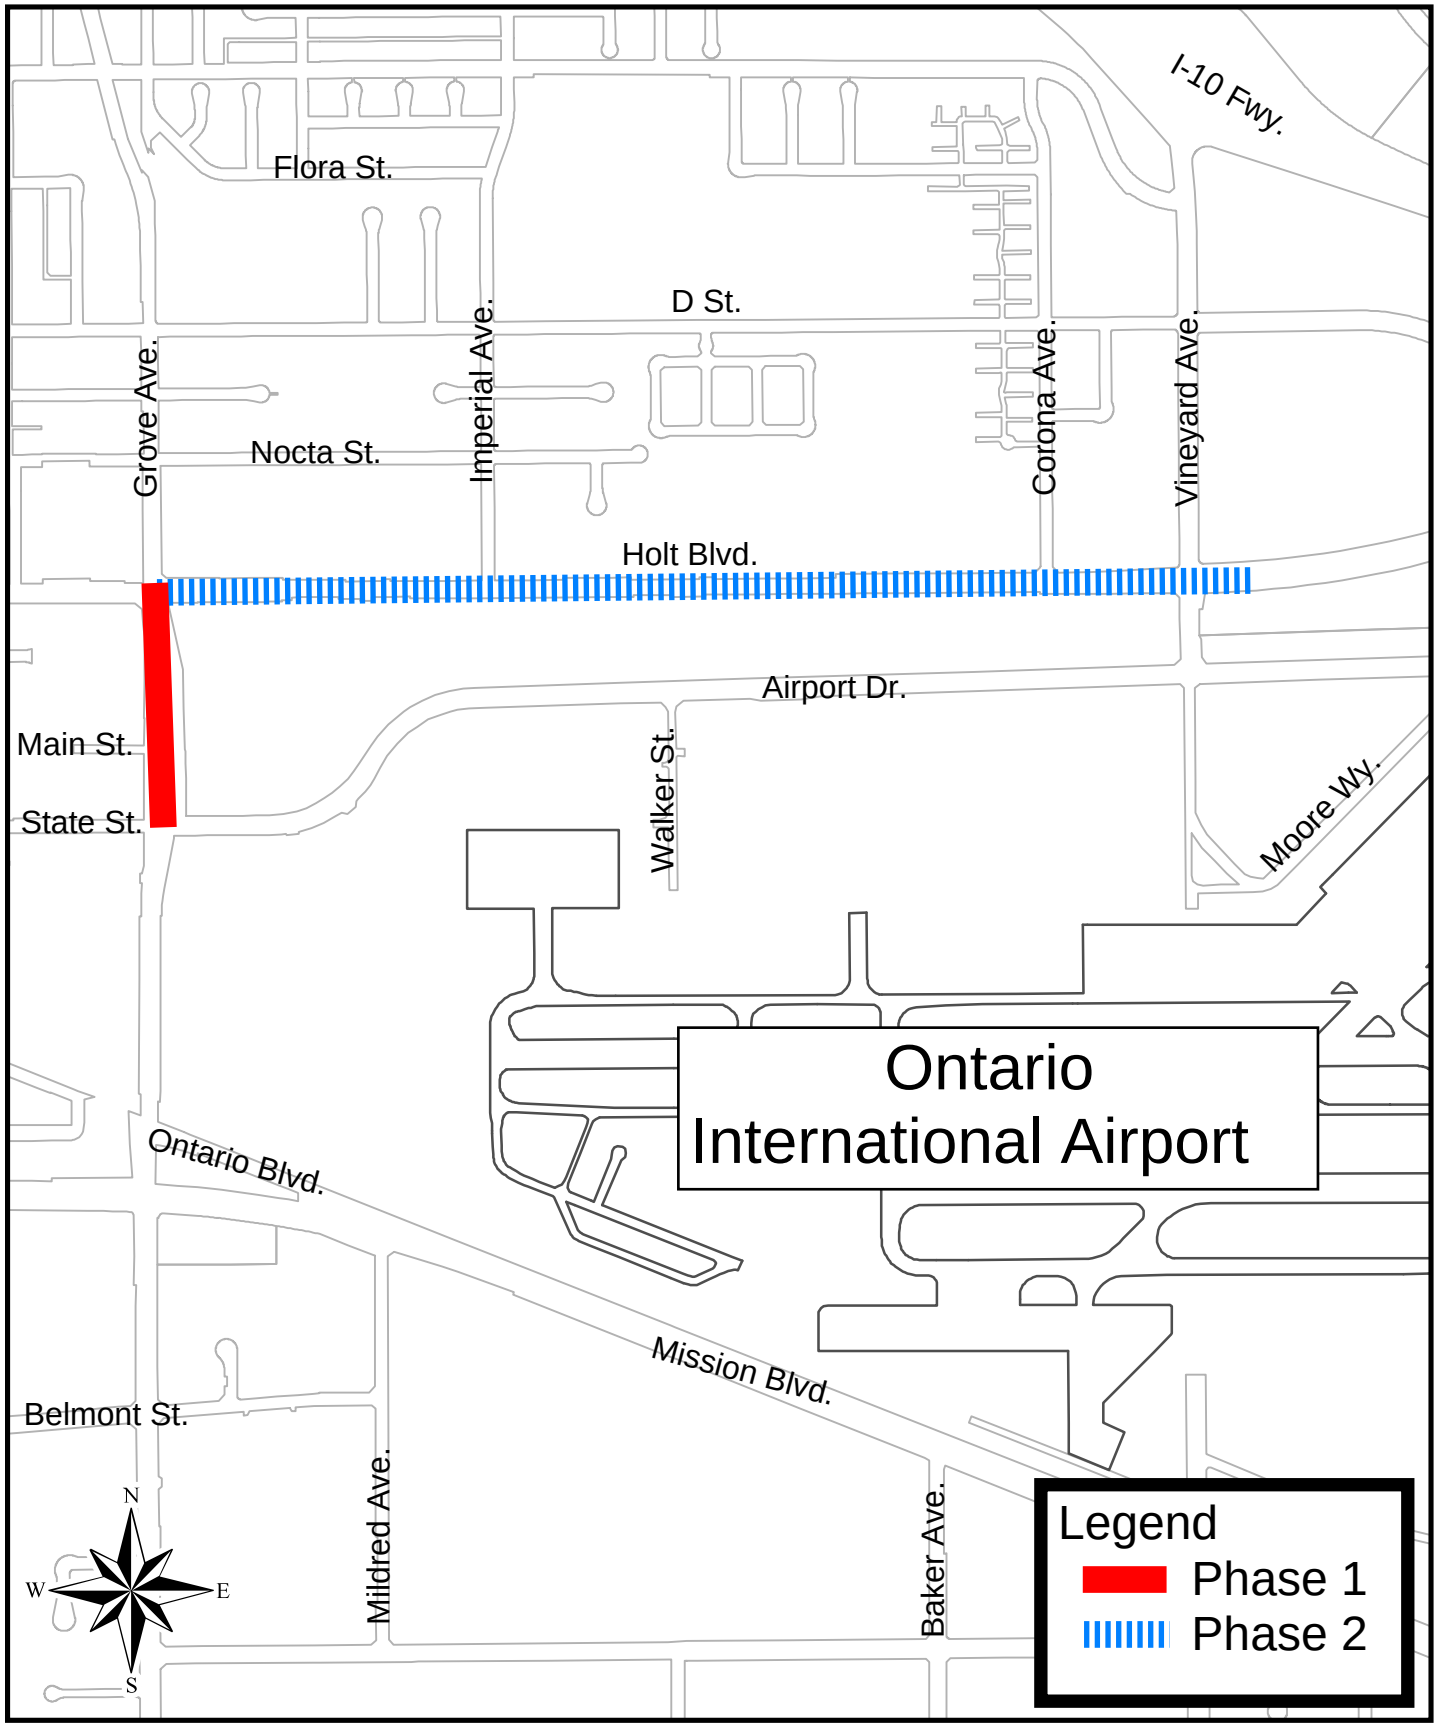
The City's sewer system is divided into separate sewersheds, each conveying wastewater towards regional Inland Empire Utilities Agency (IEUA) treatment facilities. Sewershed No. 3 is identified by the City's Sewer Master Plan (SMP) as a 3,070-acre region, generally located near the center of the Old Model Colony west of Vineyard Avenue and Cucamonga Creek. Future capacity deficiencies in Sewershed No. 3 (SS3) were identified in the SMP, in Vineyard Avenue south of Holt Boulevard to Airport Drive, and in an easement within the Ontario Airport west of Vineyard Avenue south of Airport Drive based on new development and the City's latest land use plan. To mitigate the future capacity deficiencies, the SMP identified the need for future sewer capital projects.

In October of 2018, the City awarded Stantec a Professional Design Services Agreement to perform a feasibility study to evaluate different solutions to mitigate the future deficiencies in SS3. This study, which was completed in July of 2020, made two separate recommendations to alleviate these deficiencies. The first is the construction of approximately 7,500 linear feet of 21-inch sewer in Holt Boulevard, between Vineyard Avenue and Grove Avenue, and in Grove Avenue, between Holt Boulevard and Airport Drive, that will redirect flows from Vineyard Ave to an existing 21-inch City sewer in Grove Avenue. The second recommendation is the construction of approximately 48 linear feet of 15-inch sewer in the intersection of Grove Avenue and Holt Boulevard to redirect flows from the City's existing 12-inch Holt Boulevard sewer into IEUA's 36-inch sewer in Holt Boulevard.

In May of 2019, City Council awarded On-Call Design Services Agreements with Stantec and two other consultants. Stantec and the other consultants were selected using a qualifications-based selection-process. The agreements were awarded as three-year agreements with two (2) additional one (1) year periods consistent with City Council approved budgets. As projects arise, Staff will request proposals from the consultants and amend the original agreement with revised scope of works and costs.

In November of 2020, Stantec was tasked to prepare construction documents for the Vineyard Avenue Sewer Diversion Project under their On-Call Design Service Agreement. The project design is currently at 90% completion. Concurrently, there are two other on-going projects that will also impact the entire Holt Boulevard sewer alignment, including the intersection at Grove Avenue, namely the San Bernardino County Transportation Authority's (SBCTA) West Valley Bus Rapid Transit (BRT) project and the City's Grove Avenue and Holt Boulevard Intersection Widening project.

In order to mitigate scheduling conflicts with all three projects, Staff solicited a proposal from Stantec in May of 2023 to prepare two individual phased construction packages for the Vineyard Avenue Sewer Diversion Project (Exhibit A). The phasing scope also includes continued coordination with SBCTA, San Bernardino County Flood Control District and Union Pacific Rail Road (UPRR), additional geotechnical investigation for the design of trenchless construction through the intersection of Holt Boulevard and Grove Avenue, traffic impact analysis and traffic control plans, an alignment revision along Holt Boulevard to accommodate median improvements that will be constructed as part of SBCTA's BRT project, and bid support services for both phases.



The first phase, Grove Avenue, which includes the UPRR Crossing and Intersection of Grove Avenue and Holt Boulevard, will be prioritized to allow for the construction of the sewer improvements as quickly as possible. The other two on-going projects will be coordinated such that they may be constructed after the first phase of sewer improvements are completed. The second phase of sewer improvements, Holt Boulevard, from easterly of the Grove Avenue and Holt Boulevard intersection to Vineyard Avenue, will be constructed as soon as practicable following completion of the BRT project.

Staff is recommending approval of Amendment No. 10 with Stantec for the On-Call Design Services Agreement based upon Stantec's qualifications, familiarity with the Project and performance in preparing the contract documents.

CITY OF ONTARIO *Agenda Report* **June 20, 2023**	**SECTION:** **CONSENT CALENDAR**
Department: Utilities Prepared By: Claudia Hernandez Staff Member Presenting: Scott Burton, Utilities General Manager Reviewed By: Dennice Raygoza, Albert G Gastelum, Michael Sigsbee Approved By:	Submitted To: Council/OHA Approved: _____ Continued To: _____ Denied: _____ Item No: 19

SUBJECT: **ADOPTION OF AN ORDINANCE AMENDMENT CHAPTER 8B, OF TITLE 6, SECTIONS 6-8.49 AND 6-8.50 OF THE ONTARIO MUNICIPAL CODE RELATING TO COLLECTION AND PAYMENT AND THE DISABLED PERSON'S AND SENIOR CITIZEN'S DISCOUNT**

RECOMMENDATION: That the City Council adopt an Ordinance amending Chapter 8B, of Title 6, Sections 6-8.49 and 6-8.50, of the Ontario Municipal Code relating to Collection and Payment and the Disabled Person's and Senior Citizen's Discount.

THE FOLLOWING COUNCIL GOALS ARE BEING ACHIEVED:
Operate in a Businesslike Manner

FISCAL IMPACT: There is no new fiscal impact anticipated from the proposed updates to Section 6–8.49 relating to the collection and payment provisions of the Ontario Municipal Code. The annual fiscal impact to fund the Disabled Person's and Senior Citizen's Discount program will be subject to future City Council approved budgets and the number of eligible participants that meet the program qualifications, currently anticipated to be approximately $200,000 per year, and will be shared between the Utility Enterprise Funds and the General Fund.

BACKGROUND & ANALYSIS: On June 6, 2023, the City Council introduced and waived further reading of an ordinance approving Municipal Code amendments to Section 6-8.49, Collection and Payment, and Section 6-8.50, Chapter 8B, Disabled Person's and Senior Citizen's Discount.

The changes to Section 6-8.49 of the Municipal Code, Collection and Payment, include updating bill due dates, when an account becomes past due, when late charges and penalties are assessed, and the processes for discontinuation of water services for non-payment for residential and commercial customers to comply with the California Water Shutoff Protection Act (SB 998). The administrative policies and procedures for the City's utility bills will be updated to reflect the changes in the Municipal Code.

In compliance with the State mandated water shutoff moratorium and as a requirement of participating in financial assistance programs such as the California Arrearage Payment Program (CAPP) and the Low-Income Household Water Assistance Program (LIHWAP) funded by the American Rescue Plan Act (ARPA) on behalf of the City's utility customers, late fees and penalties have not been charged during the COVID-19 pandemic. These financial assistance programs have provided over $2 million in direct utility bill payment assistance to the City's utility customers to date, but most of the programs are set to end later this year. Updating the City's program guidelines and resuming charging and collecting late fees would coincide with the state rescinding the California COVID-19 state of emergency and the federal end to the COVID-19 national public health emergency.

Changes to Section 6-8.50, Chapter 8B, Disabled Person's and Senior Citizen's Discount, include updating the income qualifications to match those included in SB 998, at or below 200% of federal poverty level, and changing the discount from a percentage, currently 10%, to a flat $15 per month, to be periodically updated and approved by the City Council. The administrative policies and procedures regarding the funding, income qualifications, and other qualifying requirements and operational guidelines to provide and administer these discounts will be updated as well.

The goal of providing these discounts is to assist disabled and senior low-income residents by making their utility bills more affordable so that they will be more able and more likely to stay current with their payments. This is also a financial and resource benefit to the City as it helps avoid costly "turn off" and "turn on" services and delinquent bill collection services. However, the annual household income requirements included in the Ontario Municipal Code are outdated and not in line with other similar program requirements. Updating the income qualifications to match those included in SB 998 and similar programs offered by other cities and utilities, such as Southern California Edison and Southern California Gas Company, will allow for more participation by the City's disabled and senior customers. The change to the discount from a percentage to a flat $15 per month, like the current average monthly discount for these customers, will streamline program administration and help promote water conservation goals.

ORDINANCE NO. _____

AN ORDINANCE OF THE CITY COUNCIL OF THE CITY OF ONTARIO, CALIFORNIA, AMENDING CHAPTER 8B (WATER SERVICES) OF TITLE 6 (SANITATION AND HEALTH) OF THE ONTARIO MUNICIPAL CODE, RELATING TO WATER ACCOUNTS, PAYMENTS, AND SENIOR/DISABLED DISCOUNTS.

WHEREAS, Chapter 8B of Title 6 of the Ontario Municipal Code contains provisions relating to water service accounts, payments, and a senior/disabled discount program available to certain customers of the Ontario Municipal Utilities Company; and

WHEREAS, in 2018, the California Legislature adopted Senate Bill 998 ("SB 998") which adopted new and expanded protections regarding discontinuation of residential water service for nonpayment and related matters; and

WHEREAS, the City previously adopted an administrative policy pursuant to SB 998 and desires to make related changes to the Municipal Code provisions concerning water service accounts and payments, including residential and non-residential delinquencies, and other water customer account procedures; and

WHEREAS, the City also desires to update the provisions of its Disabled Person's and Senior Citizen's Discount Program established under the Municipal Code.

NOW THEREFORE, IT IS HEREBY FOUND, DETERMINED, AND ORDAINED by the City Council of the City of Ontario as follows:

SECTION 1. The Recitals set forth above are incorporated herein and made an operative part of this Ordinance.

SECTION 2. Subsections (n) through (p), inclusive, of Section 6-8.45 of Chapter 8B (Water Services) of Title 6 (Sanitation and Health) of the Ontario Municipal Code are hereby amended and reordered to read as follows:

(n) Single-family residential" means all developed parcels with one (1) single-family detached housing unit, and/or any single-family residential unit that is served water by an individual water meter.

(o) Utilities Customer Services Department" means the Utilities Customer Services Department of the Municipal Utilities Company.

(p) Utilities Customer Services Director" means the Director of the Utilities Customer Services Department of the Municipal Utilities Company, or his or her authorized representative.

SECTION 3. Section 6-8.49 of Chapter 8B (Water Services) of Title 6 (Sanitation and Health) of the Ontario Municipal Code is hereby amended to read as follows:

Sec. 6-8.49. Collection and payment.

(a) Unified billing system. The City may use a unified billing system for City-furnished services. The charges for water, refuse, storm water abatement, and wastewater services may be billed on the water bill and collected as one (1) item. Failure to pay the amount due in full for any of the services may result in the discontinuation of water services as provided below.

(b) Utility bill payment. Utility bills shall be due and payable to the Utilities Customer Services Department on the bill date to the customer of record. Any utility bill remaining unpaid eighteen (18) business days after such bill date shall be deemed past due and a late charge and penalties will be applied as set forth in §§ 1-2.06 and 1-2.07 of the Ontario Municipal Code. Should a residential account remain unpaid for a period of sixty (60) calendar days from the past due date, water service to the property may be disconnected for nonpayment after the City provides notice pursuant to the City's administrative policy on discontinuation of residential water service, described in paragraph (c) below. Should a non-residential account remain unpaid from thirty (30) calendar days from the past due date, water service to the property may be disconnected for non-payment after mailed notice to the customer of record at least ten (10) calendar days prior to termination.

Residential water customers may contest or appeal a bill in the manner described in the City's adopted policy for discontinuation of residential water service. Non-residential customers may contest or appeal a bill using the same dispute and appeal procedures described in the policy for discontinuation of residential water service.

(c) Disconnection of Residential Water Service. The City Manager may adopt and amend a written administrative policy on discontinuation of residential water service for nonpayment pursuant to Section 6-8.46, and such policy shall be available on the City's website. Such policy may include, but may not be limited to, supplementary provisions concerning billing procedures, discontinuation of service, notification procedures, restoration of service, procedures to contest or appeal a bill, extensions or other alternative payment arrangements, protections available to qualified low-income customers, procedures for becoming a customer of the City under specified circumstances, and related matters. To the extent a policy adopted pursuant to this section conflicts with any provisions of this chapter, this chapter shall control. Except as expressly provided in this section or the policy, the policy shall not apply to non-residential customers.

(d) Water turn on/off. Once terminated, service shall not be turned on again except upon payment of all amounts due on the utility account, including all late charges and penalties, and the cost of making a service call to turn the water off and/or on. The fee to cover the cost of making a service call to turn the water off and/or on shall be set forth in an ordinance adopted by the City Council. Residential customers who demonstrate a household income below 200 percent of the federal poverty line may be eligible for reduced turn-on fees pursuant to applicable law and as further described in the City's policy on discontinuation of residential water service.

(e) Customer liability. Failure to receive a bill shall not relieve the customer of liability. Any amount due shall be deemed a debt to the City, and is subject to the provisions set forth in §§ 1-2.06 and 1-2.07 of the Municipal Code.

(f) Special bill rate. Special bills, split bills, any other irregular bills, or bills covering irregular billing periods, shall be calculated by the Municipal Utilities Company; provided, however, the adjusted rate so made shall be reasonable in accordance with the rate schedule set forth in this section.

(g) Determination of minimum charges. For the purpose of determining minimum charges as set forth in this section, each separate meter connected to the water system shall be charged on individual readiness-to-serve meter fee and commodity charge.

SECTION 5. Section 6-8.50 of Chapter 8B (Water Services) of Title 6 (Sanitation and Health) of the Ontario Municipal Code is hereby amended to read as follows:

Sec. 6-8.50. Disabled person's and Senior Citizen's discount.

(a) Disabled person defined. A “disabled person” for the purposes of this section is an adult who has a mental or physical disability that, in the opinion of a licensed physician, renders him or her incapable of being gainfully employed.

(b) Eligible household. An eligible household for the purpose of this section is a separately billed dwelling unit, which (1) is occupied by a person age sixty-five (65) or older or by a disabled person, and (2) has annual gross household income at or below 200% of federal poverty level. The City may establish detailed qualifications and requirements for demonstrating annual gross household income in a written administrative policy adopted pursuant to Section 6-8.46.

(c) Applications. Applications for an eligible household discount shall be submitted in writing to the Utilities Customer Services Director. The application shall be on a form provided by the Utilities Customer Services Director, shall be completed to show the information elicited by the form and shall be signed under penalty of perjury by the applicant. When the discount is sought based upon a disabled person, the application shall be accompanied by a physician’s certificate stating that the person is a disabled person within the meaning of subsection (a) of this section. The Utilities Customer Services Director shall determine whether a household is an eligible household for the purpose of this section and his or her determination shall be final.

(d) Discount. The charges for water, refuse and wastewater service provided to an eligible household shall be discounted by an amount approved by the City Council pursuant to an ordinance or resolution. The discount shall be available only to customers with individually metered residential water service. The discount shall be in effect for a one (1) year period, which shall begin as determined by the City Council (e.g., upon approval of an individual application, upon the start of the following fiscal year, etc.). To renew the discount for an additional year, the customer must complete and return a renewal application to the City's Utilities Customer Services Department. A renewal notice

shall be mailed to the Customer with the utilities bill at or before the end of each year of eligibility. The discount offered under this subsection is subject to City Council approval through the annual budget process and the availability of funds allocated to fund the discount.

(e) Termination of eligibility. A household shall no longer be an eligible household if the Utilities Customer Services Department does not receive a renewal application, if any of the eligibility criteria set forth in subsection (b) cease to exist, or if funds to provide the discount are unavailable pursuant to subsection (d).

SECTION 6. Subsection (a) of Section 6-8.52 of Chapter 8B (Water Services) of Title 6 (Sanitation and Health) of the Ontario Municipal Code is hereby amended to read as follows:

(a) Application for service. Before water is turned on by the City for any purpose, the consumer shall apply for new service, at least one (1) business day before desired date of service, in which he or she guarantees payment of future utility bills for the service requested. The customer applying for service shall be held responsible for said utility bills until the service is discontinued on the next business day after the City is notified to discontinue service. Charges for service may be required to be paid until the requested date of discontinuance or such later date that providing for the one (1) business day advance notice requirement. When such notice is not received by the City, the customer shall be required to pay for service until one (1) business day after the City has knowledge that the customer has vacated the premises or otherwise discontinued service. No tenant applying for residential utility services shall be required to pay any charges or penalties on account of non-payment of charges by a previous tenant. The City may require that tenants seeking to establish service provide a written lease or rental agreement along with signed authorization from the landlord or property owner to ensure that the tenant is authorized to occupy the property and initiate utility services; provided, however, that the City will not require that service to tenants be furnished on the account of the landlord or property owner unless the property owner voluntarily agrees to that requirement in writing by completing a consent form provided by the City. The City shall require an applicant for utility services or restoration of services after turn-off for a delinquent bill to make an advance payment equal to twice the estimated monthly bill for water, refuse and wastewater services, provided that no such advance payment shall be less than Eighty Dollars ($80.00).

SECTION 7. If any section, sentence, clause, or phrase of this Ordinance of the application thereof to any entity, person, or circumstance is held for any reason to be invalid or unconstitutional by a court of competent jurisdiction, such invalidity or unconstitutionality shall not affect other provisions or applications of the Ordinance which can be given effect without the invalid provision or application, and to this end the provisions of this Ordinance are severable. The People of the City of Ontario hereby declare that they would have adopted this Ordinance and each section, sentence, clause or phrase thereof, irrespective of the fact that any one or more section, subsections, sentences, clauses, or phrases by declared invalid or unconstitutional.

SECTION 8. The City Council finds that adoption of this Ordinance is exempt from the California Environmental Quality Act ("CEQA") pursuant to Section 15358 (the activity will not result in a direct or reasonably foreseeable indirect physical change in the environment) of the CEQA Guidelines, California Code of Regulations, Title 14, Chapter 3, because it has no potential for resulting in physical change to the environment, directly or indirectly. Moreover, the City Council finds that this Ordinance is also exempt under CEQA pursuant to Guidelines Section 15061(b)(3) (there exists no possibility that the activity will have a significant adverse effect on the environment).

SECTION 9. This Ordinance shall become effective thirty (30) days after its adoption by the City Council.

SECTION 10. The Mayor shall sign this Ordinance and the City Clerk shall certify as to the adoption and shall cause a summary thereof to be published at least once, in a newspaper of general circulation in the City of Ontario, California within fifteen (15) days of the adoption. The City Clerk shall post a certified copy of this Ordinance, including the vote for and against the same, in the Office of the City Clerk, in accordance with Government Code Section 36933.

PASSED, APPROVED, AND ADOPTED this 20th day of June 2023.

CITY OF ONTARIO *Agenda Report* **June 20, 2023**	**SECTION:** **CONSENT CALENDAR**
Department: Utilities Prepared By: Joline Neal Staff Member Presenting: Scott Burton, Utilities General Manager Reviewed By: Dennice Raygoza, Albert G Gastelum, Michael Sigsbee Approved By:	Submitted To: Council/OHA Approved: _____ Continued To: _____ Denied: _____ Item No: 20

SUBJECT: A PROFESSIONAL SERVICES AGREEMENT WITH BABCOCK LABORATORIES, INC. FOR ANALYTICAL LABORATORY SERVICES

RECOMMENDATION: That the City Council approve and authorize the City Manager, or designee to execute a Professional Services Agreement (on file in the Records Management Department) with Babcock Laboratories, Inc., of Riverside, California, for Analytical Laboratory Services in the amount of $200,000 for Fiscal Year 2023-2024, with the option to extend the Agreement for up to three successive one-year periods; and authorize the annual cost of $200,000 per year consistent with City Council approved budgets, for a total not-to-exceed contract amount of $800,000.

THE FOLLOWING COUNCIL GOALS ARE BEING ACHIEVED:
Operate in a Businesslike Manner
Invest in the City's Infrastructure (Water, Streets, Sewers, Parks, Storm Drains and Public Facilities)

FISCAL IMPACT:

The Fiscal Year 2023-24 Adopted Budget includes appropriations from the Water Operating Fund for Analytical Laboratory Services.

The recommended Agreement amount is for a total-not-to-exceed amount of $200,000. The initial term of the Agreement will be from July 1, 2023, to June 30, 2024. At the City's discretion, up to three additional one-year extensions may be executed. Prices for the first year are fixed, after the first year, any proposed increase in fees will be negotiable annually but will not exceed 5% per year. Should the City exercise all three successive one-year extensions, the projected total amount to be expensed for the four years would amount to a not-to-exceed of $800,000. Actual expenditures will be based on listed prices and actual need for services, consistent with the City Council approved budgets for the Water Operating Fund. There is no impact to the General Fund.

BACKGROUND & ANALYSIS: The City must ensure that all regulatory monitoring and reporting is performed correctly, timely, and in a manner that meets all Federal and State requirements. The U.S. Environmental Protection Agency and the State Water Resources Control Board (Division of Drinking Water) require the City to monitor the quality of water at each source and at selected locations throughout the potable drinking water system in accordance with the Federal Safe Drinking Water Act and California Code of Regulations, Title 22, Division 4, Chapter 15.

On April 3, 2023, three proposals were received for Bid No. 1617 for Analytical Laboratory Services for the City's Drinking Water and Wastewater Monitoring.

Company	Location
Babcock Laboratories, Inc.	Riverside, CA
Enthalpy Analytical, LLC	Orange, CA
Eurofins Eaton Analytical, LLC	Pomona, CA

All proposals received were reviewed and evaluated for factors advantageous to the City, including fee proposal, environmental laboratory accreditation program, proficiency testing, qualifications and experience, availability and location, ability to perform required analyses, and quality/responsiveness of proposal. Of the three proposals, Babcock Laboratories, Inc. demonstrated the best qualifications, experience, and cost analysis for analytical services needed by the City.

CITY OF ONTARIO *Agenda Report* **June 20, 2023**	**SECTION:** **CONSENT CALENDAR**
Department: Economic Development Prepared By: Peter Pallesen Staff Member Presenting: Jennifer McLain Hiramoto, Economic Development Director Reviewed By: Charity Hernandez Approved By:	Submitted To: Council/OHA Approved: _____ Continued To: _____ Denied: _____ Item No: 21

SUBJECT: AN AMENDMENT TO A PROFESSIONAL SERVICES AGREEMENT WITH RDC-S111, INC. FOR LANDSCAPE, ARCHITECTURE, AND URBAN DESIGN CONSULTING

RECOMMENDATION: That the City Council authorize the City Manager or his designee to execute Amendment No. 1 to the Professional Services Agreement (on file in the Records Management Department) with RDC-S111, Inc. of Long Beach, California, to provide additional services for the City's Regional Sports Complex located at Vineyard and Riverside Drive in the amount of $49,150 for a new not-to-exceed total of $290,912.

THE FOLLOWING COUNCIL GOALS ARE BEING ACHIEVED:
Invest in the Growth and Evolution of the City's Economy
Invest in the City's Infrastructure (Water, Streets, Sewers, Parks, Storm Drains and Public Facilities)
Ensure the Development of a Well Planned, Balanced, and Self-Sustaining Community in Ontario Ranch

FISCAL IMPACT: The recommended Amendment No. 1 increases the authorized contract amount by $49,150 for a total contract amount not-to-exceed $290,912. Appropriations are included in the Capital Projects Fund in the FY 2023-24 Adopted Budget.

BACKGROUND & ANALYSIS: On October 18, 2022, City Council approved the Professional Services Agreement for Landscape, Architecture, and Urban Design services between the City and RDC-S111, Inc. The original agreement expires on July 30, 2023. This Amendment No. 1 to the agreement will extend the term of the agreement to December 31, 2023 and expand the scope of of services that are to be rendered by RDC-S111, Inc. to begin the design stage for the City's Regional Sports Complex, a public facility on approximately 180 acres of agricultural land located east of Vineyard Avenue between East Riverside Drive and Chino Avenue, the City is engaging RDC-S111, dba Studio One Eleven, to prepare conceptual planning and visioning studies that can be used to set the direction for a portion of the sports park. The scope of work includes high-level design services which will deliver base drawings and preliminary sketch concepts, an illustrative site plan, a conceptual aerial view, and three rendered perspective views of the design intent.

CITY OF ONTARIO *Agenda Report* **June 20, 2023**	**SECTION:** **CONSENT CALENDAR**
Department: Economic Development Prepared By: Karla Tavera Staff Member Presenting: Jennifer McLain Hiramoto, Economic Development Director Approved By:	Submitted To: Council/OHA Approved: _____ Continued To: _____ Denied: _____ Item No: 22

SUBJECT: A RESOLUTION APPROVING THE LEVY OF THE ASSESSMENTS FOR FISCAL YEAR 2023-24 FOR THE DOWNTOWN ONTARIO COMMUNITY BENEFIT DISTRICT

RECOMMENDATION: That the City Council adopt a Resolution for the Downtown Ontario Improvement Association (DOIA) authorizing the levying of the special assessments for Fiscal Year 2023-24.

THE FOLLOWING COUNCIL GOALS ARE BEING ACHIEVED:
Invest in the Growth and Evolution of the City's Economy
Operate in a Businesslike Manner
Focus Resources in Ontario's Commercial and Residential Neighborhoods

FISCAL IMPACT: The Fiscal Year 2023-24 Adopted Budget includes appropriations of $145,000 from the General Fund for the parcels owned by the City and approximately $30,000 from the Ontario Housing Authority (OHA) Fund for the parcels owned by the OHA. Should there be any adjustments and/or corrections to the assessment amounts, the appropriations will be included in the next quarterly budget update to the City Council.

BACKGROUND & ANALYSIS: On August 20, 2019, the City Council approved the formation of the Downtown Ontario Community Benefit District (CBD) for an initial five-year term. The objective of the CBD is to provide enhanced services and improvements benefiting downtown businesses and property owners by increasing economic activity and enhancing the value of commercial, retail, and residential property.

As a key component of the overall downtown revitalization strategy, the implementation of the CBD has resulted in a cleaner downtown, new businesses, and is supporting the transformation of the downtown into an 18-hour vibrant hub of retail and residential activity.

California Streets and Highway Code, Section 36650, the law governing CBD requirements and processes, requires that the City Council authorize the levying of the assessments and approve an Annual Report. On February 21, 2023, the City Council approved the Fiscal Year 2022-23 Annual Report submitted by the Downtown Ontario Improvement Association (DOIA). This report is

consistent with the components outlined in the District Management Plan.

The following items are highlights of the Annual Report: Civil Sidewalk Improvements; Marketing/District Identity/Placemaking; and Administration. To continue levying the special assessment with the CBD program for the next fiscal year, the City Council must adopt a Resolution to approve this levying of assessments for Fiscal Year 2023-24. The CBD Board of Directors voted on May 25, 2023, in favor of a 2% increase on the property assessments. The details of this increase can be found in Exhibit A, which provides a breakdown of the assessment roll based on Assessment Parcel Numbers. The total assessments for all 204 parcels within the CBD for Fiscal Year 2023-24 equal $480,747. The City owns 70 parcels, representing approximately $155,000 in property assessments.

RESOLUTION NO. _____

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF ONTARIO, CALIFORNIA, APPROVING THE LEVY OF THE ASSESSMENTS FOR FISCAL YEAR 2023-24 FOR THE DOWNTOWN ONTARIO COMMUNITY BENEFIT DISTRICT.

WHEREAS, on August 20, 2019, the City Council approved a Management District Plan entitled the “Downtown Ontario CBD Management District Plan” (the “Management District Plan”).

WHEREAS, the City Council conducted the public hearing on August 20, 2019, at which ballots cast in favor of and in opposition to proposed assessment and formation of the Downtown Ontario Community Benefit ("District" or “CBD”) for a five-year term were tabulated; and

WHEREAS, of the ballots cast, property owners representing a majority of the total assessments voted in favor of the proposed assessment and formation of the CBD; and

WHEREAS, on August 20, 2019, the City Council adopted Resolution No. 2019-108 to establish the District and approve the levy of assessments commencing with FY 2019-2020, and ending with FY 2023-2024 with the provision for maximum five percent (5%) annual increases for the term of the CBD; and

WHEREAS, Streets and Highways Code Section 36650 requires the improvement association of a property-based community benefit district submit an Annual Report to the legislative body for approval beginning its second year of operation and each year thereafter; and

WHEREAS, on February 21, 2023 the City Council approved the FY 2022-23 Annual Report submitted by the Downtown Ontario Improvement Association (“DOIA).

NOW, THEREFORE, BE IT RESOLVED, by the City Council of the City of Ontario, California, as follows:

SECTION 1. That the CBD assessments to be levied for FY 2023-24, attached hereto as Exhibit 1, are hereby approved for submittal to the San Bernardino County Assessor for the period beginning July 1, 2023 and ending June 30, 2024.

SECTION 2. That Willdan Financial Services is hereby authorized to file all required documents and notice of assessments, in accordance with Section 3114 of the Streets and Highways Code, with the San Bernardino County Recorder.

SECTION 3. That the City Treasurer shall deposit all CBD assessments remitted into the fund established for the District for distribution to the District by the Director of Finance in accordance with the approved Management District plan.

The City Clerk of the City of Ontario shall certify as to the adoption of this Resolution.

PASSED, APPROVED, AND ADOPTED this 20th day of June 2023.

CITY OF ONTARIO *Agenda Report* **June 20, 2023**	**SECTION:** **CONSENT CALENDAR**
Department: Police Department Prepared By: Mary Salem Staff Member Presenting: Mike Lorenz, Chief of Police Reviewed By: Lizceth Zazueta Approved By:	Submitted To: Council/OHA Approved: _____ Continued To: _____ Denied: _____ Item No: 23

SUBJECT: **AN AMENDMENT TO EXTEND THE PROFESSIONAL AGREEMENT FOR JAIL AND TRANSPORTATION SERVICES WITH UNIVERSAL PROTECTION SERVICES LP, ALLIED UNIVERAL PROTECTION SERVICES**

RECOMMENDATION: That the City Council approve and authorize the City Manager or his designee to execute the third Amendment to the Professional Services Agreement (on file with Records Management) to increase the contracted dollar amount with Universal Protection Services LP, Allied Universal Protection Services of Atlanta, Georgia by $625,342, which would increase the total not-to-exceed to $2,331,738 and extend the term for one year.

THE FOLLOWING COUNCIL GOALS ARE BEING ACHIEVED:
Maintain the Current High Level of Public Safety
Pursue City's Goals and Objectives by Working with Other Governmental Agencies

FISCAL IMPACT: The recommended Amendment increases the authorized contract by $625,342 for a total not to exceed amount of $2,331,738. The Fiscal Year 2023-24 Adopted Budget includes appropriations of $625,342 for booking, jail and transportation services. The City will be billed for actual services provided during the one year extension period.

BACKGROUND & ANALYSIS: Booking, jail and transportation services are used to reduce the amount of time spent by sworn officers transporting prisoners to West Valley Detention Center. First implemented in 2006 as a result of a comprehensive Police Department staffing study, the outsourcing of transport services has reduced thousands of hours per year officers would spend providing these services. The original agreement was executed with G4S and assigned to Allied Universal in 2021 through a Consent to Assignment Agreement.

Universal Protection Services LP, Allied Universal Protection Services, has provided these services to the City of Ontario since 2006. Universal Protection Services LP, Allied Universal Protection Services has demonstrated the ability to provide quality and responsive services to meet the needs of the Police Department. Universal Protection Services LP, Allied Universal Protection Services meets the standards of the California Boards of Corrections and is accredited with the American Correctional Association. Universal Protection Services LP, Allied Universal Protection Services has been an outstanding vendor and have shown they can be counted on to ensure no shortage in services.

CITY OF ONTARIO *Agenda Report* **June 20, 2023**	**SECTION:** **CONSENT CALENDAR**
Department: Community Life & Culture Prepared By: Lacey A Rightmer Staff Member Presenting: Helen McAlary, Executive Director Community Life and Culture Approved By:	Submitted To: Council/OHA Approved: _____ Continued To: _____ Denied: _____ Item No: 24

SUBJECT: **A GOODS AND SERVICES AGREEMENT FOR LIBRARY MATERIALS INCLUDING CATALOGING AND PROCESSING SERVICES AND ONLINE COLLECTION ANALYSIS TOOL**

RECOMMENDATION: That the City Council take the following actions:

A. Approve and authorize the City Manager or designee to execute a three-year agreement (on file in the Records Management Department) with Baker & Taylor, Inc. of Charlotte, North Carolina, with an annual amount of $380,000 and a total compensation not to exceed $1,900,000 for five years for the purchase of library materials including cataloging and processing services and subscription to an online library collection analysis tool; and
B. Authorize the extension of the Agreement for up to two additional one-year periods consistent with City Council approved budgets.

THE FOLLOWING COUNCIL GOALS ARE BEING ACHIEVED:
Encourage, Provide or Support Enhanced Recreational, Educational, Cultural and Healthy City Programs, Policies and Activities

FISCAL IMPACT: The Fiscal Year 2023-24 Adopted Budget includes appropriations in the General Fund for library materials such as books, audio recordings and DVDs, cataloging and processing services, and a subscription to an online library collection analysis tool for collection maintenance. The annual not-to-exceed amount for this Agreement is $380,000 and has a total compensation not-to-exceed amount of $1,900,000 over the period of five years. Expenditures in any year of the proposed Agreement will be based on the actual purchases and services rendered at the fixed discounted and contract service rates. Funding for all future years of the Agreement will be consistent with the respective years' adopted budgets.

BACKGROUND & ANALYSIS: The Library purchases approximately 32,000 books, DVDs, and audio recordings for community use each year. Staff recommends the continued consolidation of library material purchases through a primary vendor and augmented by a limited number of secondary vendors.

Large library material vendors order and warehouse materials from multiple publishers and can negotiate reduced costs because of their volume purchases. Those vendors then provide books at scheduled discounts below most publisher's retail prices. In addition, cataloging and processing services will be provided by Baker & Taylor, which includes but are not limited to cataloging to current library standards, applying labels, adding the library's property stamp, and providing polyester covers to protect books and other materials.

In April 2023, the City solicited proposals for the provision of library materials with services. Three proposals were received and only Baker & Taylor fully met the bid criteria and standards necessary to perform this work.

Vendor	Location
Baker & Taylor, Inc.	Charlotte, NC
Brodart Co.	Williamsport, PA
Midwest Tape	Holland, OH

Baker & Taylor, located in Charlotte, North Carolina, submitted a proposal that met all required specifications with a base processing cost per book of $4.25. Based on their proposal, credentials, pricing, products offered, and favorable references, Staff recommends awarding a Goods and Services Agreement to Baker & Taylor.

CITY OF ONTARIO *Agenda Report* **June 20, 2023**	**SECTION:** **CONSENT CALENDAR**
Department: Economic Development Prepared By: Karla Tavera Staff Member Presenting: Jennifer McLain Hiramoto, Economic Development Director Approved By:	Submitted To: Council/OHA Approved: _____ Continued To: _____ Denied: _____ Item No: 25

SUBJECT: **AN AMENDMENT TO THE OPERATING COVENANT AND TAX SHARING AGREEMENTS WITH NIKE, CARDINAL HEALTH AND RGH ENTERPRISES, CONCRETE HOLDING, AND HOME DEPOT**

RECOMMENDATION: That the City Council take the following actions:

A. Adopt a Resolution approving Amendments to the Operating Covenant Agreement, (on file with the Records Management Department) by and between the City of Ontario and the following corporations: Nike Retail Services, Inc., Cardinal Health, 200, LLC. and RGH Enterprises, Inc., Concrete Holding Company of California, Inc., and Home Depot U.S.A., Inc. and
B. Authorize the City Manager or his designee to execute the Amendments to the Agreements.

THE FOLLOWING COUNCIL GOALS ARE BEING ACHIEVED:
Invest in the Growth and Evolution of the City's Economy
Operate in a Businesslike Manner

FISCAL IMPACT: There is no direct fiscal impact associated with this action.

BACKGROUND & ANALYSIS: The Bradley-Burns Uniform Local Sales and Use Tax Law authorizes counties and cities to impose local sales and use taxes in conformity with the Sales and Use Tax Law. The City of Ontario receives one percent (1%) of all taxable sales generated within the City under this law. Sales and Use Tax revenues are an important source of revenue for the City, which are used to provide essential City services, such as police, fire, infrastructure maintenance and community facilities.

On November 8, 2022, Ontario voters approved Measure Q, which increases the City's sale tax from the previous rate of 7.75% to 8.75%. This will generate additional revenue to be used for the services, projects and programs that will benefit Ontario residents. This sales tax increase went into effect on April 1, 2023.

This sales tax applies to all retail sales of goods and merchandise except those sales specifically exempted by law. This sales tax rate also applies to businesses with whom the City currently have Operating Covenant Agreements (OCA). The purpose of OCAs is to generate additional revenue for the City, and create jobs that will revitalize an underserved area of the City and result in community and public improvements that might not otherwise be available to the community for many years. Rather than increasing the amount of sales tax that is shared by the City, four businesses (Nike Retail Services, Inc., Home Depot U.S.A. Inc., Concrete Holding Company of California, Inc., and Cardinal Health, 200, LLC., and RGH Enterprises, Inc.) have agreed that the increased sales tax revenue created by the passage of Measure Q will not be included in the calculation of the City's covenant payments to these businesses.

RESOLUTION NO. _____

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF ONTARIO, CALIFORNIA, APPROVING AMENDMENTS TO THE OPERATING COVENANT AND TAX SHARING AGREEMENTS WITH NIKE RETAIL SERVICES, INC., CARDINAL HEALTH, 200, LLC. AND RGH ENTERPRISES, INC., CONCRETE HOLDING COMPANY OF CALIFORNIA, INC., AND HOME DEPOT U.S.A., INC.

WHEREAS, the City of Ontario ("City") has entered into Operative Covenant and Tax Sharing Agreements with numerous business, including, but not limited to, Nike, Cardinal Health and RGH, Concrete Holding, and Home Depot; and

WHEREAS, the purpose of the Operating Covenant and Tax Sharing Agreement is to encourage the creation of jobs as well as additional investment within the community in return for a share of sales tax revenue from the City; and

WHEREAS, on November 8, 2022, City residents approved Measure Q, which increases the City's sales tax from the current rate of 7.75% to .8.75%; and

WHEREAS, the Operative Covenant and Tax Sharing Agreements are silent on the treatment of the increased sales tax implemented by Measure Q; and

WHEREAS, Nike, Cardinal Health and RGH, Concrete Holding, and Home Depot have agreed to enter into amendments to their respective Operating Covenant and Tax Sharing Agreements in order to explicitly exclude the increased sales tax revenue implemented by Measure Q and keep the calculation of payments at pre-Measure Q levels.

NOW THEREFORE, BE IT RESOLVED, by the City Council of the City of Ontario as follows:

SECTION 1. Incorporation of Recitals. The foregoing recitals are true and correct, are incorporated and made an operative part of this Resolution.

SECTION 2. Approval of Amendment. The City Council hereby approves amendments to the Operating Covenant and Tax Sharing Agreements with Nike, Cardinal Health and RGH, Concrete Holding, and Home Depot, in the form presented to the City Council, and attached hereto as Exhibit A.

SECTION 3. Authority. Without the requirement of any further approval of the City Council, the City Manager or designee is authorized to do all of the following: (a) execute the amendments to the Operative Covenant and Tax Sharing Agreements with Nike, Cardinal Health and RGH, Concrete Holding, and Home Depot; (b) make non-substantive changes or modifications to the amendments deemed necessary by the City Manager; and (c) take any action and execute all documents and agreements necessary to implement this Resolution and the amendments, and to administer the City's obligations, responsibilities, and duties to be performed thereunder.

SECTION 4. CEQA. The City Council finds this Resolution is not subject to the California Environmental Quality Act (CEQA) in that the activity is covered by the general rule that CEQA applies only to projects which have the potential for causing a significant effect on the environment. Where it can be seen with certainty, as in this case, that there is no possibility that the activity in question may have a significant effect on the environment, the activity is not subject to CEQA.

SECTION 5. Severability. If any provision of this Resolution or the application thereof to any person or circumstance is held invalid, such invalidity shall not affect other provisions or applications, and to this end the provisions of this Resolution are declared to be severable.

SECTION 6. Effective Date. This Resolution shall become effective immediately upon its adoption.

The City Clerk of the City of Ontario shall certify as to the adoption of this Resolution.

PASSED, APPROVED, AND ADOPTED this 6th day of June 2023.

EXHIBIT A

AMENDMENTS TO OPERATING
COVENANT AND TAX SHARING AGREEMENTS

FIRST AMENDMENT
TO
OPERATING COVENANT AND TAX SHARING AGREEMENT

between

THE CITY OF ONTARIO,
a California municipal corporation

and

NIKE RETAIL SERVICES, INC.
a Oregon corporation

1. PARTIES AND EFFECTIVE DATE

1.1 Parties to this First Amendment. This First Amendment to the Operating Covenant and Tax Sharing Agreement ("First Amendment") is entered into between the City of Ontario, a California municipal corporation ("City") and Nike Retail Services, Inc. ("Owner"). City and Owner are sometimes referred to herein individually as a "Party" and collectively as "Parties."

1.2 Effective Date. The Effective Date of this First Amendment is on the date last signed by either Party below.

2. RECITALS AND REPRESENTATIONS

2.1 The City and the Owner have entered into that certain Operating Covenant and Tax Sharing Agreement, dated September 15, 2020, for the purpose of establishing an arrangement whereby the Owner agreed to, among other things, develop and operate a facility and receive certain operating covenant payments (the "Original Agreement").

2.2 On November 8, 2022, Ontario residents approved Measure Q, which increases the City's sales tax from the current rate of 7.75% to 8.75%.

2.3. The Parties now desire to amend the Original Agreement in order to clarify the impact of the passage of Measure Q on the tax sharing provisions of the Original Agreement.

3. TERMS

3.1 Incorporation of Recitals. The recitals listed above are true and correct and are hereby incorporated herein by this reference.

3.2 Treatment of Measure Q Sales Tax Increase. Owner understands and agrees that the increased sales tax revenue created by the passage of Measure Q shall not be included in the calculation of the Covenant Payment as outlined in Section 3.2.1 of the Original Agreement. For the avoidance of doubt, the calculation of the Covenant Payment shall continue be calculated using the following calculation:

> "The consideration to be paid to the Owner in exchange for the Covenants and Owner's performance of its obligations set forth in this Covenant Agreement, and subject to satisfaction of all conditions precedent thereto, shall consist of City's payment to the Owner for each Computation Quarter during the Eligibility Period that the City receives Sales Tax Revenue, and amount equal to the sum of fifty percent (50%) of the Sales Tax Revenues attributable to annual taxable sales at the Facility received by the City ("Covenant Payment"). The City's obligations under this Section 3.2 are contingent on a Computation Quarter-to-Quarter basis and, for each Computation Quarter, City's obligations to make any payments hereunder are expressly contingent upon the Owner having, for the entirety of such Computation Quarter, completely fulfilled its mater obligations under this Covenant Agreement, including, without limitation, the Covenants. Should such condition precedent not be satisfied for each Computation

Quarter, then City shall have no obligation under this Section 3.2 to make any Covenant Payments to Owner in such Computation Quarter.

The definition of "Sales Tax Revenues" as defined in Section 1.3.16 of the Original Agreement is amended and the last sentence of this section is replaced with the following:

"Sales Tax Revenues shall not include: (i) Penalty Assessments; (ii) any Sales Tax levied by, collected for or allocated to the State of California, the County of San Bernardino, or a district or any entity (including an allocation to a statewide or countywide pool); (iii) any administrative fee charged by the CDTFA; (iv) any Sales Tax subject to any sharing, rebate, offset or other charge imposed pursuant to any applicable provision of federal, state or local (except City's) law, rule or regulation; (v) any Sales Tax attributable to any transaction not consummated within the Eligibility Period; (vi) the Transactions and Use Tax approved by the passage of Measure Q in 2022; or (vii) any Sales Tax (or other funds measured by Sales Tax) required by the State of California to be paid over to another public entity (including the State) or set aside and/or pledged to a specific use other than for deposit into or payment from the City's general fund."

3.3 Full Force. Except as amended by this First Amendment, all provisions of the Original Agreement, including without limitation the indemnity and insurance provisions, shall remain in full force and effect and shall govern the actions of the Parties under this First Amendment.

3.4 Electronic Transmission. A manually signed copy of this First Amendment which is transmitted by facsimile, email or other means of electronic transmission shall be deemed to have the same legal effect as delivery of an original executed copy of this First Amendment for all purposes. This First Amendment may be signed using an electronic signature.

3.5 Counterparts. This First Amendment may be signed in counterparts, each of which shall constitute an original.

between

THE CITY OF ONTARIO,
a California municipal corporation

and

CARDINAL HEALTH, 200, LLC
A Delaware Limited Liability Company

AND

RGH ENTERPRISES, INC.
An Ohio Corporation

1. PARTIES AND EFFECTIVE DATE

1.1 Parties to this **First** Amendment. This **First** Amendment to the Operating Covenant and Tax Sharing Agreement **("First** Amendment") is entered into between the City of Ontario, a California municipal corporation ("City") and **Cardinal Health, 200, LLC and RGH Enterprises, Inc.** ("Owner"). City and Owner are sometimes referred to herein individually as a "Party" and collectively as "Parties."

1.2 Effective Date. The Effective Date of this First Amendment is on the date last signed by either Party below.

2. RECITALS AND REPRESENTATIONS

2.1 The City and the Owner have entered into that certain Operating Covenant and Tax Sharing Agreement, March, 20 2018, for the purpose of establishing an arrangement whereby the Owner agreed to, among other things, develop and operate a facility and receive certain operating covenant payments (the "Original Agreement").

2.2 On November 8, 2022, Ontario residents approved Measure Q, which increases the City's sales tax from the current rate of 7.75% to 8.75%.

2.3. The Parties now desire to amend the Original Agreement in order to clarify the impact of the passage of Measure Q on the tax sharing provisions of the Original Agreement.

3. TERMS

3.1 Incorporation of Recitals. The recitals listed above are true and correct and are hereby incorporated herein by this reference.

3.2 Treatment of Measure Q Sales Tax Increase. Owner understands and agrees that the increased sales tax revenue created by the passage of Measure Q shall not be included in the calculation of the Covenant Payment as outlined in Section 3.2.1 of the Original Agreement. For the avoidance of doubt, the calculation of the Covenant Payment shall continue be calculated using the following calculation:

> "The consideration to be paid to Owner and Lessee in exchange for the Owner's and Lessee's satisfaction of the Covenants set forth in this Covenant Agreement, and subject to satisfaction of all conditions precedent thereto, shall consist of City's payment to Owner and Lessee for each Computation Quarter during the Eligibility Period that the City receives Sales Tax Revenue, as follow:
>
> (a) For the period commencing April 1, 2018, and continuing until this Covenant Agreement is terminated, City shall pay to Owner an amount equal to fifty percent (50%) of the Sales Tax Revenues attributable to annual taxable sales paid quarterly by Owner, in accordance with Section 3.2.2 below.

(b) For the period commencing April 1, 2018 and continuing until this Covenant Agreement is terminated, City shall pay to Lessee an amount equal to fifty percent (50%) of Sales Tax Revenues received by City in excess of Base Sales Tax Amount attributable to the annual taxable sales paid quarterly by Lessee, in accordance with Section 3.2.3 below."

The definition of "Sales Tax Revenues" as defined in Section 1.3.19 of the Original Agreement is amended and the last sentence of this section is replaced with the following:

"Sales Tax Revenues shall not include: (i) Penalty Assessments; (ii) any Sales Tax levied by, collected for or allocated to the State of California, the County of San Bernardino, or a district or any entity (including an allocation to a statewide or countywide pool) other than City; (iii) any administrative fee charged by the CDTFA; (iv) any Sales Tax subject to any sharing, rebate, offset or other charge imposed pursuant to any applicable provision of federal, state or local (except City's) law, rule or regulation; (v) any Sales Tax attributable to any transaction not consummated within the Eligibility Period; (vi) the Transactions and Use Tax approved by the passage of Measure Q in 2022; or (vi) any Sales Tax (or other funds measured by Sales Tax) required by the State of California to be paid over to another public entity (including the State) or set aside and/or pledged to a specific use other than for deposit into or payment from the City's general fund."

Additionally, all references to the California State Board of Equalization ("BOE") in the Original Agreement shall mean and refer to the current state administrative body, the California Department of Tax and Fee Administration ("CDTFA").

3.3 Full Force. Except as amended by this First Amendment, all provisions of the Original Agreement, including without limitation the indemnity and insurance provisions, shall remain in full force and effect and shall govern the actions of the Parties under this First Amendment.

3.4 Electronic Transmission. A manually signed copy of this First Amendment which is transmitted by facsimile, email or other means of electronic transmission shall be deemed to have the same legal effect as delivery of an original executed copy of this First Amendment for all purposes. This First Amendment may be signed using an electronic signature.

3.5 Counterparts. This First Amendment may be signed in counterparts, each of which shall constitute an original.

Title

FIRST AMENDMENT
TO
OPERATING COVENANT AND TAX SHARING AGREEMENT

between

THE CITY OF ONTARIO,
a California municipal corporation

and

CONCRETE HOLDING COMPANY OF CALIFORNIA, INC.

a Delaware corporation

1. PARTIES AND EFFECTIVE DATE

1.1 Parties to this First Amendment. This First Amendment to the Operating Covenant and Tax Sharing Agreement ("First Amendment") is entered into between the City of Ontario, a California municipal corporation ("City") and Concrete Holding Company of California, Inc. ("Owner"). City and Owner are sometimes referred to herein individually as a "Party" and collectively as "Parties."

1.2 Effective Date. The Effective Date of this First Amendment is on the date last signed by either Party below.

2. RECITALS AND REPRESENTATIONS

2.1 The City and the Owner have entered into that certain Operating Covenant and Tax Sharing Agreement, December 18, 2018, for the purpose of establishing an arrangement whereby the Owner agreed to, among other things, develop and operate a facility and receive certain operating covenant payments (the "Original Agreement").

2.2 On November 8, 2022, Ontario residents approved Measure Q, which increases the City's sales tax from the current rate of 7.75% to 8.75%.

2.3. The Parties now desire to amend the Original Agreement in order to clarify the impact of the passage of Measure Q on the tax sharing provisions of the Original Agreement.

3. TERMS

3.1 Incorporation of Recitals. The recitals listed above are true and correct and are hereby incorporated herein by this reference.

3.2 Treatment of Measure Q Sales Tax Increase. Owner understands and agrees that the increased sales tax revenue created by the passage of Measure Q shall not be included in the calculation of the Covenant Payment as outlined in Section 3.2.2 of the Original Agreement. For the avoidance of doubt, the calculation of the Covenant Payment shall continue be calculated using the following calculation:

> "The consideration to be paid to the Owner in exchange for the Covenants and Owner's performance of its obligations set forth in this Covenant Agreement, and subject to satisfaction of all conditions precedent thereto, shall consist of City's payment to the Owner for each Computation Quarter during the Eligibility Period that the City receives Sales Tax Revenue, an amount equal to (a) the sum of (1) fifty percent (50%) of the Sales Tax Revenues attributable to annual taxable sales for the calendar year which includes such Computation Quarter, as determined on a cumulative basis for such calendar year, plus (b) an amount equal to fifty percent (50%) of the Sales Tax Revenues attributable to Owner's self-accrual of use tax which is directly allocated to the City, including, without limitation, in connection with Owner's purchase of machinery and equipment from outside of California during such Computation Quarter. Any such payment due pursuant to this Section shall not be due unless Owner has completely fulfilled its material obligations under this Covenant Agreement, including, without

limitation, the Covenants. Should such condition precedent not be satisfied for each Computation Quarter, then City shall have no obligation under this Section 3.2 to make any Covenant Payments to Owner in such Computation Quarter."

The definition of "Sales Tax Revenues" as defined in Section 1.3.19 of the Original Agreement is amended and the last sentence of this section is replaced with the following:

"Sales Tax Revenues shall not include: (i) Penalty Assessments; (ii) any Sales Tax levied by, collected for or allocated to the State of California, the County of San Bernardino, or a district or any entity (including an allocation to a statewide or countywide pool) other than City; (iii) any administrative fee charged by the CDTFA; (iv) any Sales Tax subject to any sharing, rebate, offset or other charge imposed pursuant to any applicable provision of federal, state or local (except City's) law, rule or regulation; (v) any Sales Tax attributable to any transaction not consummated within the Eligibility Period; (vi) the Transactions and Use Tax approved by the passage of Measure Q in 2022; or (vi) any Sales Tax (or other funds measured by Sales Tax) required by the State of California to be paid over to another public entity (including the State) or set aside and/or pledged to a specific use other than for deposit into or payment from the City's general fund."

3.3 Full Force. Except as amended by this First Amendment, all provisions of the Original Agreement, including without limitation the indemnity and insurance provisions, shall remain in full force and effect and shall govern the actions of the Parties under this First Amendment.

3.4 Electronic Transmission. A manually signed copy of this First Amendment which is transmitted by facsimile, email or other means of electronic transmission shall be deemed to have the same legal effect as delivery of an original executed copy of this First Amendment for all purposes. This First Amendment may be signed using an electronic signature.

3.5 Counterparts. This First Amendment may be signed in counterparts, each of which shall constitute an original.

FIRST AMENDMENT
TO
OPERATING COVENANT AGREEMENT

between

THE CITY OF ONTARIO,
a California municipal corporation

and

HOME DEPOT U.S.A., INC.
a Delaware corporation

1. PARTIES AND EFFECTIVE DATE

1.1 Parties to this First Amendment. This First Amendment to the Operating Covenant Agreement ("First Amendment") is entered into between the City of Ontario, a California municipal corporation ("City") and Home Depot U.S.A., Inc. ("Owner"). City and Owner are sometimes referred to herein individually as a "Party" and collectively as "Parties."

1.2 Effective Date. The Effective Date of this First Amendment is on the date last signed by either Party below.

2. RECITALS AND REPRESENTATIONS

2.1 The City and the Owner have entered into that certain Operating Covenant Agreement, dated June 23, 2021, for the purpose of establishing an arrangement whereby the Owner agreed to, among other things, lease and operate a facility and receive certain operating covenant payments (the "Original Agreement").

2.2 On November 8, 2022, Ontario residents approved Measure Q, which increases the City's sales tax from the current rate of 7.75% to 8.75%.

2.3. The Parties now desire to amend the Original Agreement in order to clarify the impact of the passage of Measure Q on the tax sharing provisions of the Original Agreement.

3. TERMS

3.1 Incorporation of Recitals. The recitals listed above are true and correct and are hereby incorporated herein by this reference.

3.2 Treatment of Measure Q Sales Tax Increase. Owner understands and agrees that the increased sales tax revenue created by the passage of Measure Q shall not be included in the calculation of the Covenant Payment as outlined in Section 3.2.1 of the Original Agreement. For the avoidance of doubt, the calculation of the Covenant Payment shall continue be calculated using the following calculation:

> "The consideration to be paid to the Owner in exchange for the Covenants and Owner's performance of its obligations set forth in this Covenant Agreement, and subject to satisfaction of all conditions precedent thereto, shall consist of City's payment to the Owner for each Computation Quarter during the Eligibility Period that the City receives Sales Tax Revenue, an amount equal to the sum of fifty percent (50%) of the Sales Tax Revenues attributable to annual taxable sales at the E-Commerce Distribution Facility received by the City ("Covenant Payment"). The City's obligations under this Section 3.2 are contingent on a Computation Quarter-to-Quarter basis and, for each Computation Quarter, City's obligations to make any payments hereunder are expressly contingent upon Owner having, for the entirety of such Computation Quarter, completely fulfilled its material obligations under this Covenant Agreement, including, without limitation, the Covenants. Should such condition precedent not be satisfied for each Computation

Quarter, then City shall have no obligation under this Section 3.2 to make any Covenant Payments to Owner in such Computation Quarter."

The definition of "Sales Tax Revenues" as defined in Section 1.3.18 of the Original Agreement is amended and the last sentence of this section is replaced with the following:

"Sales Tax Revenues shall not include: (i) Penalty Assessments; (ii) any Sales Tax levied by, collected for or allocated to the State of California, the County of San Bernardino, or a district or any entity (including an allocation to a statewide or countywide pool); (iii) any administrative fee charged by the CDTFA; (iv) any Sales Tax subject to any sharing, rebate, offset or other charge imposed pursuant to any applicable provision of federal, state or local (except City's) law, rule or regulation; (v) any Sales Tax attributable to any transaction not consummated within the Eligibility Period; (vi) the Transactions and Use Tax approved by the passage of Measure Q in 2022; or (vii) any Sales Tax (or other funds measured by Sales Tax) required by the State of California to be paid over to another public entity (including the State) or set aside and/or pledged to a specific use other than for deposit into or payment from the City's general fund."

3.3 Full Force. Except as amended by this First Amendment, all provisions of the Original Agreement, including without limitation the indemnity and insurance provisions, shall remain in full force and effect and shall govern the actions of the Parties under this First Amendment.

3.4 Electronic Transmission. A manually signed copy of this First Amendment which is transmitted by facsimile, email or other means of electronic transmission shall be deemed to have the same legal effect as delivery of an original executed copy of this First Amendment for all purposes. This First Amendment may be signed using an electronic signature.

3.5 Counterparts. This First Amendment may be signed in counterparts, each of which shall constitute an original.

CITY OF ONTARIO *Agenda Report* **June 20, 2023**	**SECTION:** **PUBLIC HEARINGS**
Department: Financial Services Prepared By: Cruz Torres Staff Member Presenting: Armen Harkalyan, Executive Director of Finance Reviewed By: Cecilia House Approved By:	Submitted To: Council/OHA Approved: _____ Continued To: _____ Denied: _____ Item No: 26

SUBJECT: **A PUBLIC HEARING TO CONSIDER A RESOLUTION REGARDING THE FORMATION OF THE CITY OF ONTARIO COMMUNITY FACILITIES DISTRICT NO. 61 (MERRILL COMMERCE CENTER); AND INTRODUCTION OF AN ORDINANCE LEVYING SPECIAL TAXES**

RECOMMENDATION: That the City Council consider and:

A. Adopt a Resolution of Formation of Community Facilities District No. 61 (Merrill Commerce Center), authorizing the levy of special taxes within the community facilities district,
B. Adopt a Resolution calling a special election for City of Ontario Community Facilities District No. 61 (Merrill Commerce Center);
C. Adopt a Resolution declaring the results of the special election and directing the recording of a Notice of Special Tax Lien; and
D. Introduce and waive further reading of an ordinance levying special taxes within City of Ontario Community Facilities District No. 61 (Merrill Commerce Center)

THE FOLLOWING COUNCIL GOALS ARE BEING ACHIEVED:
Operate in a Businesslike Manner
Focus Resources in Ontario's Commercial and Residential Neighborhoods
Ensure the Development of a Well Planned, Balanced, and Self-Sustaining Community in Ontario Ranch

FISCAL IMPACT: The use of Mello-Roos financing in the Merrill Commerce Center Services development is projected to generate approximately $986,000 to fund Administrative Fees and Municipal Services. The use of Mello-Roos financing is critical in achieving the City Councils goal to "Ensure the Development of a Well Planned, Balanced, and Self-Sustaining Community in Ontario Ranch." The use of Mello-Roos financing for the Merrill Commerce Center Services development will not generate funds for facilities; therefore, bonds will not be issued as part of this formation. The General Fund will be reimbursed approximately $940,000 for Municipal Services after the administrative expenses are deducted. City Council approval will be required in future years to process annual special tax levies.

BACKGROUND & ANALYSIS: The Mello-Roos Community Facilities Act of 1982 provides local government, with the consent from a majority of the property owners, the authority to establish community facilities districts for the purpose of levying special taxes to finance municipal services. Municipal services that may be funded by a community facilities district include police protection services, fire protection, and suppression services, ambulance and paramedic services, maintenance and lighting of parks, parkways, streets, roads, and open space, flood and storm drain protection services and maintenance and operation of any real property or tangible property with an estimated useful life of five or more years that is owned by the governmental entity.

On May 16, 2023, the City Council approved Resolution No. 2023-034, a Resolution of Intention to establish City of Ontario Community Facilities District No. 61 (Merrill Commerce Center) and authorize the levy of special taxes within the district. The Resolution of Intention set the public hearing date for the regularly scheduled City Council meeting on June 20, 2023, to consider formation matters.

Prologis LP, Research, has provided a written petition to the City requesting formation of a community facilities district for the Merrill Commerce Center Services in Ontario Ranch. The Merrill Commerce Center project addresses the development of approximately 385.61 gross acres located west of Carpenter Avenue, east of Grove Avenue, south of Eucalyptus Avenue, and north of Merrill Avenue. At build out, the project is expected to include 7,341,068 square feet of business park/industrial space.

Included, as part of the Resolution of Formation is the proposed Rate and Method of Apportionment of Special Tax for the District. The term and structure of the Rate and Method of Apportionment of Special Tax for the Merrill Commerce Center project are consistent with those of previously adopted Rates and Methods of Apportionment for Ontario Ranch community facilities districts. This ensures that the special tax rates levied on all residential property owners in community facilities districts in Ontario Ranch are developed in a consistent and equivalent manner. In addition, under the provisions of the Mello-Roos Act, to ensure that home buyers are making an informed decision, all residential builders in the Ontario Ranch districts will be required to disclose the maximum annual special tax amount to each homeowner before entering into a sales contract.

Attached are three Resolutions and an Ordinance. The first attached Resolution establishes the community facilities district, with the rate and method of apportionment of special taxes and authorizes the levy of special taxes within the district. The second attached Resolution calls for a special landowner election to be held on June 20, 2023. The third attached Resolution declares the results of the election, including a statement from the City Clerk as to the canvass of ballots, and directs the recording of the Notice of Special Tax Lien. The attached Ordinance authorizes the levying of special taxes.

RESOLUTION NO. _____

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF ONTARIO, CALIFORNIA, OF FORMATION OF THE CITY OF ONTARIO COMMUNITY FACILITIES DISTRICT NO. 61 (MERRILL COMMERCE CENTER SERVICES), AUTHORIZING THE LEVY OF A SPECIAL TAX WITHIN THE COMMUNITY FACILITIES DISTRICT AND ESTABLISHING AN APPROPRIATIONS LIMIT FOR THE COMMUNITY FACILITIES DISTRICT.

WHEREAS, on May 16, 2023, the City Council (the "City Council") of the City of Ontario (the "City"), pursuant to the Mello-Roos Community Facilities Act of 1982 (the "Act"), adopted a resolution entitled "A Resolution of the City Council of the City of Ontario, California, of Intention to Establish a Community Facilities District Proposed to be Named City of Ontario Community Facilities District No. 61 (Merrill Commerce Center Services) and to Authorize the Levy of a Special Tax" (the "Resolution of Intention"), stating its intention to establish a community facilities district (the "Community Facilities District") proposed to be named City of Ontario Community Facilities District No. 61 (Merrill Commerce Center Services), to authorize the levy of a special tax (the "Special Tax") within the Community Facilities District to finance certain services and setting the date for a public hearing to be held on the establishment of the Community Facilities District; and

WHEREAS, pursuant to the Resolution of Intention, notice of said public hearing was published in the *Inland Valley Daily Bulletin*, a newspaper of general circulation published in the area of the Community Facilities District, in accordance with the Act; and

WHEREAS, on this date, the City Council opened, conducted and closed said public hearing; and

WHEREAS, pursuant to the Resolution of Intention, each officer of the City who is or will be responsible for providing one or more of the proposed types of services was directed to study, or cause to be studied, the proposed Community Facilities District and, at or before said public hearing, file a report with the City Council containing a brief description of the services by type that will in his or her opinion be required to adequately meet the needs of the Community Facilities District, and his or her estimate of the cost of providing such services, and such officers were also directed to estimate the fair and reasonable cost of the incidental expenses proposed to be paid; and

WHEREAS, said report was so filed with the City Council and made a part of the record of said public hearing; and

WHEREAS, at the hearing, the testimony of all persons for or against the establishment of the Community Facilities District, the extent of the Community Facilities District and the furnishing of the specified types of services was heard; and

WHEREAS, written protests against the establishment of the Community Facilities District, the furnishing of any specified type or types of services within the Community Facilities District or the levying of the Special Tax were not made or filed at or before said hearing by 50% or more of the registered voters, or six registered voters, whichever is

more, residing within the territory proposed to be included in the Community Facilities District, or the owners of one-half or more of the area of land in the territory proposed to be included in the Community Facilities District and not exempt from the Special Tax; and

WHEREAS, there has been filed with the City Clerk of the City a letter from the Registrar of Voters of the County of San Bernardino indicating that no persons were registered to vote within the territory of the proposed Community Facilities District as of May 10, 2023, which demonstrates that 12 or more persons have not been registered to vote within the territory of the proposed Community Facilities District for each of the 90 days preceding the close of said public hearing;

NOW, THEREFORE, BE IT RESOLVED by the City Council of the City of Ontario as follows:

SECTION 1. The foregoing recitals are true and correct.

SECTION 2. The Community Facilities District is hereby established pursuant to the Act.

SECTION 3. The Community Facilities District is hereby named "City of Ontario Community Facilities District No. 61 (Merrill Commerce Center Services)."

SECTION 4. The services (the "Services") proposed to be financed by the Community Facilities District pursuant to the Act are described under the caption "Services" on Exhibit A hereto. The incidental expenses proposed to be incurred are described under the caption "Incidental Expenses" on Exhibit A hereto. No facilities are proposed to be financed by the Community Facilities District.

SECTION 5. The proposed Special Tax to be levied within the Community Facilities District has not been precluded by majority protest pursuant to Section 53324 of the Act.

SECTION 6. Except where funds are otherwise available, the Special Tax sufficient to pay for all Services, secured by recordation of a continuing lien against all nonexempt real property in the Community Facilities District, will be annually levied within the Community Facilities District. The rate and method of apportionment of the Special Tax (the "Rate and Method"), in sufficient detail to allow each landowner within the proposed Community Facilities District to estimate the maximum amount that he or she will have to pay, is described in Exhibit B attached hereto, which is by this reference incorporated herein. The obligation to pay the Special Tax may not be prepaid and permanently satisfied. The Special Tax will be collected in the same manner as ordinary *ad valorem* property taxes or in such other manner as the City Council shall determine, including direct billing of the affected property owners.

SECTION 7. The Special Tax may only finance the Services to the extent that they are in addition to those provided in the territory of the Community Facilities District before the Community Facilities District is created. The Services may not supplant services already available within that territory when the Community Facilities District is created.

SECTION 8. The name, address and telephone number of the office that will be responsible for preparing annually a current roll of Special Tax levy obligations by assessor's parcel number and that will be responsible for estimating further Special Tax levies pursuant to Section 53340.2 of the Act are as follows: Management Analyst, Financial Services, City of Ontario, 303 East B Street, Ontario, California 91764, (909) 395-2341.

SECTION 9. Upon recordation of a notice of special tax lien pursuant to Section 3114.5 of the California Streets and Highways Code, a continuing lien to secure each levy of the Special Tax shall attach to all nonexempt real property in the Community Facilities District and this lien shall continue in force and effect until the Special Tax obligation is prepaid and permanently satisfied and the lien canceled in accordance with law or until collection of the tax by the City Council ceases.

SECTION 10. The boundary map of the Community Facilities District has been recorded in San Bernardino County in Book 91 at Page 10 of Maps of Assessments and Community Facilities Districts in the San Bernardino County Recorder's Office (Document No. 2023-0120927).

SECTION 11. The annual appropriations limit, as defined by subdivision (h) of Section 8 of Article XIII B of the California Constitution, of the Community Facilities District is hereby established at $83,000,000.

SECTION 12. Pursuant to the provisions of the Act, the levy of the Special Tax and a proposition to establish the appropriations limit specified above shall be subject to the approval of the qualified electors of the Community Facilities District at a special election. The City Council hereby finds and determines that that no persons were registered to vote within the territory of the proposed Community Facilities District as of May 10, 2023, and that 12 or more persons have not been registered to vote within the territory of the Community Facilities District for each of the 90 days preceding the close of the public hearing held by the City Council on the establishment of the Community Facilities District. Accordingly, pursuant to Section 53326 of the Act, the vote shall be by the landowners of the Community Facilities District and each person who is the owner of land as of the close of said public hearings, or the authorized representative thereof, shall have one vote for each acre or portion of an acre that he or she owns within the Community Facilities District not exempt from the Special Tax. The voting procedure shall be by mailed or hand-delivered ballot.

SECTION 13. The City Council hereby finds and determines that all proceedings up to and including the adoption of this Resolution were valid and in conformity with the requirements of the Act. In accordance with Section 53325.1 of the Act, such finding shall be final and conclusive.

SECTION 14. All actions heretofore taken by the officers, employees and agents of the City with respect to the establishment of the Community Facilities District, or in connection with or related to any of the matters referred to herein, are hereby approved, confirmed and ratified.

SECTION 15. The officers, employees and agents of the City are hereby authorized and directed to take all actions and do all things that they, or any of them, may deem necessary or desirable to accomplish the purposes of this Resolution and not inconsistent with the provisions hereof.

SECTION 16. This Resolution shall take effect immediately upon its adoption.

The City Clerk of the City of Ontario shall certify as to the adoption of this Resolution.

PASSED, APPROVED, AND ADOPTED this 20th day of June 2023.

EXHIBIT A

SERVICES AND INCIDENTAL EXPENSES

Services

The types of services to be financed by the Community Facilities District are police protection services, fire protection and suppression services, ambulance and paramedic services, maintenance and lighting of parks, parkways, streets, roads and open space, flood and storm protection services, maintenance and operation of fiber optic telecommunication, wireless communication and public safety camera systems and maintenance and operation of any real property or other tangible property with an estimated useful life of five or more years that is owned by the City.

Incidental Expenses

The incidental expenses proposed to be incurred include the costs associated with the creation of the Community Facilities District, determination of the amount of taxes, collection of taxes, payment of taxes, or costs otherwise incurred in order to carry out the authorized purposes of the Community Facilities District.

EXHIBIT B

PROPOSED RATE AND METHOD OF APPORTIONMENT OF SPECIAL TAX

CITY OF ONTARIO
COMMUNITY FACILITIES DISTRICT NO. 61
(MERRILL COMMERCE CENTER SERVICES)

RATE AND METHOD OF APPORTIONMENT OF SPECIAL TAX

A Special Tax shall be levied on all Assessor's Parcels in the City of Ontario Community Facilities District No. 61 (Merrill Commerce Center Services) ("CFD No. 61") and collected each Fiscal Year commencing in Fiscal Year 2023-24, in an amount determined by the City Council of the City of Ontario through the application of the Rate and Method of Apportionment, as described below. All of the real property in CFD No. 61, unless exempted by law or by the provisions hereof, shall be taxed for the purposes, to the extent, and in the manner herein provided.

A. DEFINITIONS

The terms as may hereinafter be set forth have the following meanings:

"Act" means the Mello-Roos Community Facilities Act of 1982, as amended, being Chapter 2.5 of Part 1 of Division 2 of Title 5 of the California Government Code.

"Administrative Expenses" means the following actual or reasonably estimated costs directly related to the administration of CFD No. 61: the costs of computing the Special Taxes and preparing the annual Special Tax collection schedules (whether by the City or CFD No. 61 or both); the costs of collecting the Special Taxes (whether by the County or otherwise); the costs associated with preparing Special Tax disclosure statements and responding to public inquiries regarding the Special Taxes; the costs of the City or CFD No. 61 related to an appeal of the Special Tax; the City's administration fees and third party expenses; the costs of City staff time and reasonable overhead related to CFD No. 61; and amounts estimated or advanced by the City or CFD No. 61 for any other administrative purposes of CFD No. 61, including attorney's fees and other costs related to commencing and pursuing to completion any foreclosure of delinquent Special Taxes.

"Assessor's Parcel" means a lot or parcel shown on an Assessor's Parcel Map with an assigned Assessor's Parcel Number.

"Assessor's Parcel Map" means an official map of the Assessor of the County designating parcels by Assessor's Parcel Number.

"Assessor's Parcel Number" means, with respect to an Assessor's Parcel, that number assigned to such Assessor's Parcel by the County for purposes of identification.

"CFD Administrator" means an official of the City responsible for determining the Special Tax Requirement, providing for the levy and collection of the Special Tax, and performing the other duties provided for herein.

"CFD No. 61" means City of Ontario Community Facilities District No. 61 (Merrill Commerce Center Services).

"City" means the City of Ontario, California.

"City Council" means the City Council of the City, acting as the legislative body of CFD No. 61.

"County" means the County of San Bernardino.

"Fiscal Year" means the period starting July 1 and ending on the following June 30.

"Gated Community Attached Dwelling Unit" means a Unit within any residential building containing two or more dwelling units (including attached condominiums, townhouses, duplexes, triplexes, and apartments) within a gated community that, within such community, is primarily served by private interior streets.

"Land Use Class" means any of the classes listed in Table 1 below.

"Lower Income Household Welfare Exemption Property" means, for each Fiscal Year, an Assessor's Parcel within the boundaries of CFD No. 61 that is subject to a welfare exemption under subdivision (g) of Section 214 of the California Revenue and Taxation Code (or any successor statute), as indicated in the most recent County assessor's roll finalized prior to such Fiscal Year.

"Maximum Special Tax" means, with respect to an Assessor's Parcel of Taxable Property, the maximum Special Tax determined in accordance with Section C below that can be levied in any Fiscal Year on such Assessor's Parcel of Taxable Property.

"Multiple Family Dwelling Unit" means a Unit within any residential building containing two or more dwelling units, including attached condominiums, townhomes, duplexes, triplexes, and apartments, but excluding Gated Community Attached Dwelling Units.

"Non-Residential" means any buildings that are for commercial lodging use, commercial retail use, institutional use (e.g., churches, private schools), commercial restaurant use, office use, or industrial use.

"Non-Residential Property" means, for each Fiscal Year, an Assessor's Parcel for which a building permit for new construction was issued after January 1, 2021, and before May 1 of the prior Fiscal Year, for a Non-Residential use.

"Property Owner Association Property" means, for each Fiscal Year, property within the boundaries of CFD No. 61 that was owned by a property owner association, including any master or sub-association, as of January 1 of the prior Fiscal Year.

"Proportionately" means that the ratio of the actual Special Tax levy to the Maximum Special Tax is equal for all Assessor's Parcels of Taxable Property.

"Public Property" means, for each Fiscal Year, property within the boundaries of CFD No. 61 that is (a) owned by, irrevocably offered to, or dedicated to the federal government, the State, the County, the City, or any local government or other public agency or (b) encumbered by an easement for purposes of public or utility right-of-way that makes impractical its use for any purpose other than that set forth in such easement, provided that any property leased by a public agency to a private entity and subject to taxation under Section 53340.1 of the Act shall be taxed and classified according to its use.

"Rate and Method of Apportionment" means this Rate and Method of Apportionment of Special Tax.

"Residential Property" means, for each Fiscal Year, an Assessor's Parcel for which a building permit for new construction of one or more Units was issued after January 1, 2021, and before May 1 of the prior Fiscal Year.

"Services" means the services authorized to be financed, in whole or in part, by CFD No. 61, including: police protection services; fire protection and suppression services; ambulance and paramedic services; maintenance and lighting of parks, parkways, streets, roads, and open space; flood and storm protection services; and maintenance and operation of any real property or other tangible property with an estimated useful life of five or more years that is owned by the City.

"Single Family Detached Dwelling Unit" means any residential building containing only one Unit on one legal lot, including single family residences and single family detached residential condominium units.

"Special Tax" means the special tax authorized by the qualified electors of CFD No. 61 to be levied within the boundaries of CFD No. 61.

"Special Tax Requirement" means the amount necessary in any Fiscal Year to pay the cost of the Services, Administrative Expenses, and an amount equal to Special Tax delinquencies based on the historical delinquency rate for Special Taxes, as determined by the CFD Administrator.

"Square Footage" or **"Sq. Ft."** means, with respect to a building of Non-Residential Property, the gross floor area square footage reflected on the original construction building permit, or as set forth in other official records maintained by the City's Building Department or other appropriate means selected by CFD No. 61, for such building, plus any square footage subsequently added to a building of Non-Residential Property after issuance of a building permit for expansion or renovation of such building.

"State" means the State of California.

"Taxable Property" means, for each Fiscal Year, all Assessor's Parcels of Residential Property and Non-Residential Property within the boundaries of CFD No. 61 which are not exempt from the Special Tax pursuant to law or Section E below.

"Unit" means an individual single-family detached or attached home, townhome, condominium, apartment unit, or other residential dwelling unit, including each separate living area within a half-plex, duplex, triplex, fourplex, or other residential structure.

B. ASSIGNMENT TO LAND USE CATEGORIES

Each Fiscal Year, beginning with Fiscal Year 2023-24, all Taxable Property within CFD No. 61 shall be classified as Residential Property (Single Family Detached Dwelling Unit, Multiple Family Dwelling Unit, or Gated Community Attached Dwelling Unit) or Non-Residential Property and shall be subject to Special Taxes in accordance with the Rate and Method of Apportionment as determined pursuant to Sections C and D below.

C. MAXIMUM SPECIAL TAX

The Maximum Special Tax for each Assessor's Parcel classified as Taxable Property shall be determined by reference to Table 1 below.

TABLE 1
MAXIMUM SPECIAL TAX

Land Use Class	Maximum Special Tax Fiscal Year 2023-24
Residential Property:	
Single Family Detached Dwelling Unit	$1,501.46 per Unit
Multiple Family Dwelling Unit	$1,301.19 per Unit
Gated Community Attached Dwelling Unit	$1,091.19 per Unit
Non-Residential Property	$0.273800 per Sq. Ft.

On January 1 of each Fiscal Year, commencing January 1, 2024, the Maximum Special Tax to be applied in the next Fiscal Year shall be subject to an automatic increase at a rate equal to 4.0% of the amount in effect for the prior Fiscal Year.

In some instances an Assessor's Parcel of Taxable Property may contain more than one Land Use Class. The Maximum Special Tax levied on such Assessor's Parcel shall be the sum of the Maximum Special Tax for all Units of Residential Property and Square Footage of Non-Residential Property (based on the applicable building permits, final subdivision map, parcel map, condominium plan, or other recorded County map) located on that Assessor's Parcel.

D. METHOD OF APPORTIONMENT OF THE SPECIAL TAX

Each Fiscal Year, beginning with Fiscal Year 2023-24, the CFD Administrator shall determine the Special Tax Requirement. The Special Tax shall then be levied Proportionately on each Assessor's Parcel of Taxable Property up to 100% of the applicable Maximum Special Tax for such Assessor's Parcel, until the Special Tax Requirement is satisfied. However, the Special Tax levied in any Fiscal Year shall not increase by more than 4.0% of the amount of the Special Tax levied in the prior Fiscal Year.

E. EXEMPTIONS

Notwithstanding anything in this Rate and Method of Apportionment to the contrary, no Special Tax shall be levied on Public Property or Property Owner Association Property.

No Special Tax shall be levied on Lower Income Household Welfare Exemption Property; provided, however, that if, in any Fiscal Year, applicable law does not require that Lower Income Household Welfare Exemption Property be exempt from some portion, or all, of the Special Tax, such portion, or all, of the Special Tax shall be levied on such property in accordance with this Rate and Method of Apportionment based on the Land Use Class to which the Assessor's Parcel is assigned.

F. APPEALS

Any property owner may file a written appeal of the Special Tax with CFD No. 61 claiming that the amount or application of the Special Tax is not correct. The appeal must be filed not later than one calendar year after having paid the Special Tax that is disputed, and the appellant must be current in all payments of Special Taxes. In addition, during the term of the appeal process, all Special Taxes levied must be paid on or before the payment date established when the levy was made.

The appeal must specify the reasons why the appellant claims the Special Tax is in error. The CFD Administrator shall review the appeal, meet with the appellant if the CFD Administrator deems necessary, and advise the appellant of its determination.

If the property owner disagrees with the CFD Administrator's decision relative to the appeal, the owner may then file a written appeal with the City Council, whose subsequent decision shall be final and binding on all interested parties. If the decision of the CFD Administrator or subsequent decision by the City Council requires the Special Tax to be modified or changed in favor of the property owner, then the CFD Administrator shall determine if sufficient Special Tax revenue is available to make cash refund. If a cash refund cannot be made, then an adjustment shall be made to credit future Special Tax levy(ies).

This procedure shall be exclusive and its exhaustion by any property owner shall be a condition precedent to filing any legal action by such owner.

G. MANNER OF COLLECTION

The Special Taxes shall be collected in the same manner and at the same time as ordinary *ad valorem* property taxes; provided, however, that the Special Taxes may be collected in such other manner as the City Council shall determine, including direct billing of affected property owners.

H. TERM OF SPECIAL TAX

The Special Tax shall continue to be levied indefinitely on an annual basis on all Taxable Property in CFD No. 61.

RESOLUTION NO. _____

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF ONTARIO, CALIFORNIA, CALLING A SPECIAL ELECTION FOR CITY OF ONTARIO COMMUNITY FACILITIES DISTRICT NO. 61 (MERRILL COMMERCE CENTER SERVICES)

WHEREAS, on this date, the City Council (the "City Council") of the City of Ontario (the "City"), pursuant to the Mello-Roos Community Facilities Act of 1982 (the "Act"), adopted a resolution entitled "A Resolution of the City Council of the City of Ontario, California, of Formation of the City of Ontario Community Facilities District No. 61 (Merrill Commerce Center Services), Authorizing the Levy of a Special Tax within the Community Facilities District and Establishing an Appropriations Limit for the Community Facilities District" (the "Resolution of Formation"), establishing City of Ontario Community Facilities District No. 61 (Merrill Commerce Center Services) (the "Community Facilities District"), authorizing the levy of a special tax (the "Special Tax") within the Community Facilities District and establishing an appropriations limit of $83,000,000 for the Community Facilities District; and

WHEREAS, pursuant to the provisions of the Resolution of Formation, the propositions to levy the Special Tax within the Community Facilities District and to establish an appropriations limit for the Community Facilities District are to be submitted to the qualified electors of the Community Facilities District as required by the Act; and

WHEREAS, the City Council desires to designate the City Clerk of the City (the "City Clerk") as the election official for the special election provided for herein; and

WHEREAS, there has been filed with the City Clerk a letter from the Registrar of Voters of the County of San Bernardino indicating that no persons were registered to vote within the territory of the proposed Community Facilities District as of May 10, 2023, and, which demonstrates that 12 or more persons have not been registered to vote within the territory of the Community Facilities District for each of the 90 days preceding the close of the public hearings on the establishment of the Community Facilities District; and

WHEREAS, there has been filed with the City Clerk consents and waivers of all of the landowners of record in the Community Facilities District waiving any time limit specified by Section 53326 of the Act and any requirement pertaining to the conduct of said special election, consenting to the holding of said special election on June 20, 2023 and waiving any impartial analysis, arguments or rebuttals, as set forth in Sections 53326 and 53327 of the Act; and

WHEREAS, the City Clerk has concurred in said waivers and has concurred in holding said special election on June 20, 2023.

NOW, THEREFORE, BE IT RESOLVED by the City Council of the City of Ontario as follows:

SECTION 1. The foregoing recitals are true and correct.

SECTION 2. Pursuant to Sections 53326 and 53325.7 of the Act, the propositions to levy the Special Tax within the Community Facilities District and to establish such appropriations limit of the Community Facilities District shall be submitted to the qualified electors of the Community Facilities District at an election called therefor as provided below.

SECTION 3. The City Clerk is hereby designated as the official to conduct said election.

SECTION 4. As authorized by Section 53353.5 of the Act, the propositions to levy the Special Tax within the Community Facilities District and to establish such appropriations limit for the Community Facilities District shall be combined into one ballot proposition.

SECTION 5. The City Council hereby finds and determines that no persons were registered to vote within the territory of the proposed Community Facilities District as of May 10, 2023, and that 12 or more persons have not been registered to vote within the territory of the Community Facilities District for each of the 90 days preceding the close of the public hearings heretofore held by the City Council on the establishment of the Community Facilities District. Accordingly, pursuant to Section 53326 of the Act, the vote shall be by the landowners of the Community Facilities District and each person who is the owner of land as of the close of said public hearings, or the authorized representative thereof, shall have one vote for each acre or portion of an acre that he or she owns within the Community Facilities District not exempt from the Special Tax.

SECTION 6. The City Council hereby finds and determines that the qualified electors of the Community Facilities District have unanimously consented (a) to the waiver of any time limit specified by Section 53326 of the Act and any requirement pertaining to the conduct of said election, (b) to the holding of said election on June 20, 2023, and (c) to the waiver of any impartial analysis, arguments or rebuttals, as set forth in Sections 53326 and 53327 of the Act. The City Council hereby finds and determines that the City Clerk has concurred in said waivers and has concurred in holding said election on June 20, 2023.

SECTION 7. The City Council hereby calls a special election to submit to the qualified electors of the Community Facilities District the combined proposition to levy the Special Tax within the Community Facilities District and to establish an appropriations limit of the Community Facilities District in the amount of $83,000,000, which election shall be held at 303 East B Street, Ontario, California, on June 20, 2023, provided, that, in the event the June 20, 2023 City Council meeting is held via teleconference and/or videoconference only, the means by which the public may observe such public hearings and offer public comment would be as prescribed in the notice and agenda for such City Council meeting. The City Council has caused to be provided to the City Clerk, as the official to conduct said election, the Resolution of Formation, a certified map of sufficient scale and clarity to show the boundaries of the Community Facilities District, and a sufficient description to allow the City Clerk to determine the boundaries of the Community Facilities District.

The voted ballots shall be returned to the City Clerk not later than 7:30 p.m. on June 20, 2023; provided, however, that if all of the qualified electors have voted prior to such time, the election may be closed with the concurrence of the City Clerk.

SECTION 8. Pursuant to Section 53326 of the Act, the election shall be conducted by mail or hand-delivered ballot pursuant to Section 4000 *et. seq.* of the California Elections Code. Except as otherwise provided in the Act, the provisions of law regulating elections of the City, insofar as they may be applicable, will govern the election.

SECTION 9. The form of the ballot for said election is attached hereto as Exhibit A and by this reference incorporated herein, and such form of ballot is hereby approved. The City Clerk shall cause to be delivered to each of the qualified electors of the Community Facilities District a ballot in said form. Each ballot shall indicate the number of votes to be voted by the respective landowner to which it pertains.

Each ballot shall be accompanied by all supplies and written instructions necessary for the use and return of the ballot. The identification envelope for return of the ballot shall be enclosed with the ballot, shall have the return postage prepaid, and shall contain: (a) the name and address of the landowner, (b) a declaration, under penalty of perjury, stating that the voter is the owner of record or the authorized representative of the landowner entitled to vote and is the person whose name appears on the identification envelope, (c) the printed name, signature and address of the voter, (d) the date of signing and place of execution of the declaration described in clause (b) above, and (e) a notice that the envelope contains an official ballot and is to be opened only by the canvassing board.

Analysis and arguments with respect to the ballot proposition are hereby waived, as provided in Section 53327 of the Act.

SECTION 10. The City Clerk shall accept the ballots of the qualified electors in the office of the City Clerk at 303 East B Street, Ontario, California, to and including 7:30 p.m. on June 20, 2023, whether said ballots be personally delivered or received by mail. The City Clerk shall have available ballots which may be marked at said location on the election day by said qualified electors.

SECTION 11. The City Council hereby determines that the services financed by the Community Facilities District are necessary to meet increased demands placed upon local agencies as a result of development occurring in the Community Facilities District.

SECTION 12. All actions heretofore taken by the officers, employees and agents of the City with respect to the special election called for herein, or in connection with or related to any of the matters referred to herein, are hereby approved, confirmed and ratified.

SECTION 13. The officers, employees and agents of the City are hereby authorized and directed to take all actions and do all things that they, or any of them, may deem necessary or desirable to accomplish the purposes of this Resolution and not inconsistent with the provisions hereof.

SECTION 14. This Resolution shall take effect immediately upon its adoption.

The City Clerk of the City of Ontario shall certify as to the adoption of this Resolution.

PASSED, APPROVED, AND ADOPTED this 20th day of June 2023.

OFFICIAL BALLOT

CITY OF ONTARIO
JUNE 20, 2023

SPECIAL ELECTION

This ballot is for a special, landowner election. The number of votes to be voted pursuant to this ballot is ____.

INSTRUCTIONS TO VOTERS:

To vote on the measure, mark a cross (+ or X) in the voting square after the word "YES" or after the word "NO". All distinguishing marks or erasures are forbidden and make the ballot void. If you wrongly mark, tear, or deface this ballot, return it to the City Clerk of the City of Ontario and obtain another.

CITY OF ONTARIO
COMMUNITY FACILITIES DISTRICT NO. 61
(MERRILL COMMERCE CENTER SERVICES)

MEASURE SUBMITTED TO VOTE OF VOTERS: Shall the City of Ontario Community Facilities District No. 61 (Merrill Commerce Center Services) (the "Community Facilities District") be authorized to levy a special tax in order to finance certain services and shall the annual appropriations limit of the Community Facilities District be established in the amount of $83,000,000, all as specified in the Resolution entitled "A Resolution of the City Council of the City of Ontario, California, of Formation of the City of Ontario Community Facilities District No. 61 (Merrill Commerce Center Services), Authorizing the Levy of a Special Tax within the Community Facilities District and Establishing an Appropriations Limit for the Community Facilities District," adopted by the City Council of the City of Ontario on June 20, 2023?	Yes: ☐ No: ☐

RESOLUTION NO. _____

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF ONTARIO, CALIFORNIA, DECLARING RESULTS OF A SPECIAL ELECTION AND DIRECTING RECORDING OF NOTICE OF SPECIAL TAX LIEN.

WHEREAS, on June 20, 2023, the City Council (the "City Council") of the City of Ontario (the "City"), pursuant to the Mello-Roos Community Facilities Act of 1982 (the "Act"), adopted a resolution entitled "A Resolution of the City Council of the City of Ontario, California, Calling Special Election for City of Ontario Community Facilities District No. 61 (Merrill Commerce Center Services)" (the "Resolution Calling Election"), calling for a special election of the qualified electors within City of Ontario Community Facilities District No. 61 (Merrill Commerce Center Services) (the "Community Facilities District"); and

WHEREAS, pursuant to the terms of the Resolution Calling Election and the provisions of the Act, the special election was held on June 20, 2023; and

WHEREAS, the City Clerk of the City (the "City Clerk") has certified the canvass of the returns of the election and has filed a Canvass and Statement of Results of Election (the "Canvass"), a copy of which is attached hereto as Exhibit A;

NOW, THEREFORE, BE IT RESOLVED by the City Council of the City of Ontario as follows:

SECTION 1. The foregoing recitals are true and correct.

SECTION 2. The City Council has received, reviewed and hereby accepts the Canvass.

SECTION 3. The City Council hereby finds and declares that the ballot proposition submitted to the qualified electors of the Community Facilities District pursuant to the Resolution Calling Election has been passed and approved by such electors in accordance with Section 53328 and Section 53325.7 of the Act.

SECTION 4. The City Clerk is hereby directed to execute and cause to be recorded in the office of the County Recorder of the County of San Bernardino a notice of special tax lien in the form required by the Act, said recording to occur no later than fifteen days following adoption by the City Council of this Resolution.

SECTION 5. All actions heretofore taken by the officers, employees and agents of the City with respect to the special election, or in connection with or related to any of the matters referred to herein, are hereby approved, confirmed and ratified.

SECTION 6. The officers, employees and agents of the City are hereby authorized and directed to take all actions and do all things that they, or any of them, may deem necessary or desirable to accomplish the purposes of this Resolution and not inconsistent with the provisions hereof.

SECTION 7. This Resolution shall take effect immediately upon its adoption.

The City Clerk of the City of Ontario shall certify as to the adoption of this Resolution.

PASSED, APPROVED, AND ADOPTED this 20th day of June 2023.

ORDINANCE NO. _____

AN ORDINANCE OF THE CITY COUNCIL OF THE CITY OF ONTARIO, CALIFORNIA, LEVYING A SPECIAL TAX WITHIN THE CITY OF ONTARIO COMMUNITY FACILITIES DISTRICT NO. 61 (MERRILL COMMERCE CENTER SERVICES).

WHEREAS, on May 16, 2023, the City Council (the "City Council") of the City of Ontario (the "City"), pursuant to the Mello-Roos Community Facilities Act of 1982 (the "Act"), adopted a resolution entitled "A Resolution of the City Council of the City of Ontario, California, of Intention to Establish a Community Facilities District Proposed to be Named City of Ontario Community Facilities District No. 61 (Merrill Commerce Center Services) and to Authorize the Levy of a Special Tax" stating its intention to establish City of Ontario Community Facilities District No. 61 (Merrill Commerce Center Services) (the "Community Facilities District"), to authorize the levy of a special tax (the "Special Tax") within the Community Facilities District and to finance certain services (the "Services"); and

WHEREAS, on June 20, 2023, the City Council held a noticed public hearing on the establishment of the Community Facilities District, as required by the Act; and

WHEREAS, subsequent to the close of said hearing, the City Council adopted resolutions entitled "A Resolution of the City Council of the City of Ontario, California, of Formation of the City of Ontario Community Facilities District No. 61 (Merrill Commerce Center Services), Authorizing the Levy of a Special Tax within the Community Facilities District and Establishing an Appropriations Limit for the Community Facilities District" (the "Resolution of Formation") and "A Resolution of the City Council of the City of Ontario, California, Calling Special Election for City of Ontario Community Facilities District No. 61 (Merrill Commerce Center Services)," which resolutions established the Community Facilities District, authorized the levy of the Special Tax within the Community Facilities District and called an election within the Community Facilities District on the proposition of levying the Special Tax within the Community Facilities District and establishing an appropriations limit of the Community Facilities District, respectively; and

WHEREAS, on June 20, 2023, an election was held in which the qualified electors of the Community Facilities District approved said proposition by more than the two-thirds vote required by the Act.

THE CITY COUNCIL OF THE CITY OF ONTARIO DOES ORDAIN AS FOLLOWS:

SECTION 1. The City Council hereby authorizes and levies the Special Tax within the Community Facilities District pursuant to Sections 53328 and 53340 of the Act, at the rate and in accordance with the method of apportionment set forth in Exhibit B to the Resolution of Formation (the "Rate and Method of Apportionment"). The Special Tax is hereby levied commencing in fiscal year 2023-24 and in each fiscal year thereafter until the last fiscal year in which such Special Tax is authorized to be levied pursuant to the Rate and Method of Apportionment.

SECTION 2. The City Council may, in accordance with subdivision (b) of Section 53340 of the Act, provide, by resolution, for the levy of the Special Tax in future tax years at the same rate or at a lower rate than the rate provided by this Ordinance. In no event shall the Special Tax be levied on any parcel within the Community Facilities District in excess of the maximum tax specified therefor in the Rate and Method of Apportionment.

SECTION 3. The Special Tax shall be levied on all of the parcels in the Community Facilities District, unless exempted by law or by the Rate and Method of Apportionment.

SECTION 4. The proceeds of the Special Tax shall only be used to pay, in whole or in part, the cost of providing the Services and incidental expenses pursuant to the Act.

SECTION 5. The Special Tax shall be collected in the same manner as ordinary *ad valorem* property taxes are collected and shall be subject to the same penalties and the same procedure, sale and lien priority in the case of delinquency as is provided for *ad valorem* taxes, unless another procedure is adopted by the City Council.

SECTION 6. If for any reason any portion of this Ordinance is found to be invalid, or if the Special Tax is found inapplicable to any particular parcel within the Community Facilities District, by a court of competent jurisdiction, the balance of this Ordinance and the application of the Special Tax to the remaining parcels within the Community Facilities District shall not be affected.

SECTION 7. The Mayor shall sign this Ordinance and the City Clerk shall certify as to the adoption and shall cause a summary thereof to be published at least once, in a newspaper of general circulation in the City of Ontario, California within fifteen (15) days of the adoption. The City Clerk shall post a certified copy of this ordinance, including the vote for and against the same, in the Office of the City Clerk, in accordance with Government Code Section 36933.

CITY OF ONTARIO *Agenda Report* **June 20, 2023**	**SECTION:** **PUBLIC HEARINGS**
Department: Development Administration Prepared By: Derrick E Womble Staff Member Presenting: Scott Murphy, Executive Director Community Development Approved By:	Submitted To: Council/OHA Approved: _____ Continued To: _____ Denied: _____ Item No: 27

SUBJECT: **A PUBLIC HEARING TO CONSIDER AN ORDINANCE MODIFYING THE PROCESSING AND ADMINISTRATION FEE FOR THE DEVELOPMENT IMPACT FEE (DIF) DEFERRAL PROGRAM**

RECOMMENDATION: That the City Council introduce and waive further reading of an Ordinance modifying the processing and administration fee for the Development Impact Fee (DIF) Deferral Program.

THE FOLLOWING COUNCIL GOALS ARE BEING ACHIEVED:
Invest in the Growth and Evolution of the City's Economy
Operate in a Businesslike Manner
Invest in the City's Infrastructure (Water, Streets, Sewers, Parks, Storm Drains and Public Facilities)

FISCAL IMPACT: The Development Impact Fee (DIF) Deferral Program requires a processing and administration fee of $7,500 for deferral agreements. A review of the cost to process and administer the individual deferral agreements between the City of Ontario and the participating developers has occurred and concluded that a reduction in the fee to $4,000 is appropriate. The reduced fee will continue to cover the City's costs for initiating and administering the deferral agreements. The DIF Deferral Program will continue to address the City Council' s long-standing direction that new development generates enough revenue to fund required City infrastructure without reliance on financial resources of the City's General Fund.

BACKGROUND & ANALYSIS: On February 18, 2020, the City Council adopted Ordinance No. 3156, establishing a permanent DIF Deferral Program city-wide for residential and non-residential development, allowing developers the option to defer certain DIF from building permit issuance to final inspection. Ordinance No. 3156 set a processing and administration fee of $7,500 (estimated fee).

With a number of deferral agreements having been completed, Staff has conducted a review of the actual time and cost associated with individual agreements and concluded that a reduction in the processing and administration fee to $4,000 is appropriate. The revised fee will continue to cover

the City's costs for administering the fee deferral agreements.

The proposed Ordinance shall not modify or change any other terms or provisions previously established by Ordinance No. 3156, which shall remain in full force and effect. Any subsequent changes to the processing and administration fee shall be modified as part of the Citywide Fee Schedule update, approved by resolution of the City Council.

ORDINANCE NO. _____

AN ORDINANCE OF THE CITY COUNCIL OF THE CITY OF ONTARIO, CALIFORNIA, MODIFYING THE PROCESSING AND ADMINISTRATION FEE FOR THE DEVELOPMENT IMPACT FEE ("DIF") DEFERRAL PROGRAM.

WHEREAS, on June 23, 2003, the City Council of the City of Ontario (the "City Council") adopted Resolution No. 2003-039 to establish policies for the implementation of the new and modified Development Impact Fees ("DIF"). Resolution No. 2003-039 requires the payment of DIF no more than five (5) days prior to the issuance of building permits; and

WHEREAS, on July 1, 2003, the City Council adopted Ordinance Nos. 2779 and 2780 to implement new and modified DIF in recognition of the need to finance adequate infrastructure and other public improvements and facilities made necessary by new development in the City of Ontario (the "City"); and

WHEREAS, on February 18, 2020, the City Council adopted Ordinance No. 3156, establishing a permanent DIF Deferral Program city-wide for residential and non-residential development, allowing developers the option to defer certain DIF; and

WHEREAS, Ordinance No. 3156 established an Administrative Processing Fee of seven thousand five hundred dollars ($7,500); and

WHEREAS, a review of the estimated costs to process and administer the individual agreements between the City and the participating developers has occurred and concluded a modification to the Administrative Processing Fee is necessary; and

WHEREAS, the City Council, as the City's governing body, has the authority to establish and modify policies and fees for the implementation of the City's DIF Deferral Program; and

WHEREAS, City of Ontario Development Code Division 2.03 (Public Hearings) prescribes the manner in which public notification shall be provided and hearing procedures to be followed, and all such notifications and procedures have been completed; and

WHEREAS, on June 20, 2023, the City Council of the City of Ontario conducted a hearing and concluded said hearing on that date; and

WHEREAS, all legal prerequisites to the adoption of this Ordinance have occurred.

NOW, THEREFORE, IT IS HEREBY FOUND, DETERMINED, AND ORDAINED by the City Council of the City of Ontario, as follows:

SECTION 1: Section 7 of Ordinance No. 3156 is hereby amended to read as follows:

Processing and Administration Fee. A processing and administration fee is hereby authorized to be collected at the time the agreement is executed. The amount of the fee shall be specified in the City Fee Schedule, which may only be revised by a duly adopted resolution of the City Council. The fee is based upon the City's estimated costs to process and administer the individual agreements between the City and the participating developer and the costs of tracking and eventual collection of the deferred fees.

SECTION 2. The adoption of this Ordinance shall not modify or change any other terms or provisions previously established by Ordinance No. 3156, which shall remain in full force and effect.

SECTION 3. ***Effective Date.*** This Ordinance shall become effective 30 days following its adoption.

SECTION 4. ***Publication and Posting.*** The Mayor shall sign this Ordinance and the City Clerk shall certify as to the adoption and shall cause a summary thereof to be published at least once, in a newspaper of general circulation in the City of Ontario, California within 15 days following the adoption. The City Clerk shall post a certified copy of this ordinance, including the vote for and against the same, in the Office of the City Clerk, in accordance with Government Code Section 36933.

CITY OF ONTARIO *Agenda Report* **June 20, 2023**	**SECTION:** **PUBLIC HEARINGS**
Department: Development Administration Prepared By: Derrick E Womble Staff Member Presenting: Scott Murphy, Executive Director Community Development Approved By:	Submitted To: Council/OHA Approved: _____ Continued To: _____ Denied: _____ Item No: 28

SUBJECT: **A PUBLIC HEARING TO CONSIDER THE ADOPTION OF AN ORDINANCE APPROVING A DEVELOPMENT AGREEMENT (FILE NO. PDA21-006) BETWEEN THE CITY OF ONTARIO AND EUCLID LAND VENTURE 2 LLC**

RECOMMENDATION: That the City Council introduce and waive further reading of an Ordinance approving a Development Agreement (File No. PDA21-006) between the City of Ontario and Euclid Land Venture 2 LLC, to establish the terms and conditions associated with Tentative Parcel Map No. 20517 (File No. PMTT22-005), an 80-acre property bordered by Eucalyptus, Campus, Merrill, and Sultana Avenues, within the Business Park and Industrial General land use district of the Ontario Ranch Business Park Specific Plan.

THE FOLLOWING COUNCIL GOALS ARE BEING ACHIEVED:
Invest in the Growth and Evolution of the City's Economy
Operate in a Businesslike Manner
Invest in the City's Infrastructure (Water, Streets, Sewers, Parks, Storm Drains and Public Facilities)
Ensure the Development of a Well Planned, Balanced, and Self-Sustaining Community in Ontario Ranch

FISCAL IMPACT: The proposed Development Agreement (File No. PDA21-006) will not have a direct impact on the City's General Fund. The Development Agreement will provide funding from the formation of a Community Facilities District (CFD) for City services and facilities required to support the Ontario Ranch Business Park Specific Plan (Specific Plan) development, thereby mitigating the increased costs associated with such services. In addition, the City will receive public service funding fees plus development impact, compliance processing, licensing, and permitting fees. No General Fund revenue will be used to support the Ontario Ranch development.

BACKGROUND & ANALYSIS: The Ontario Ranch financial commitments required for construction of properties within a specific plan are substantial. Therefore, in order to adequately forecast these costs and gain assurance that the project may proceed under the existing policies, rules, and regulations, Euclid Land Venture 2 LLC (Owner), has requested that the City enter into negotiations to create a Development Agreement (Agreement).

The Agreement is proposed outside of the NMC Builders' Construction Agreement development area and was established in coordination between the City Attorney and the Owner's legal counsel. The provisions of the Agreement are consistent with the commitments to assure adequate public infrastructure improvements are constructed or funded by the Owner.

The Agreement proposes to include 80 acres of land within the Industrial and Business Park land use districts of the Specific Plan, as shown on the attached Exhibit A. The Agreement grants the Owner a vested right to develop Tentative Parcel Map 20517 (the Map), provided the Owner complies with the terms and conditions of the Specific Plan and related Environmental Impact Report (EIR).

The Map (see attached Exhibit B) is bordered by Eucalyptus, Campus, Merrill, and Sultana Avenues, and proposes to subdivide 80 acres of land into six (6) parcels, for the potential development of six (6) industrial buildings totaling 1,559,204 square feet for business park and industrial uses.

The term of the Agreement is for 10 years, with a 5-year option to renew. The main points of the Agreement address funding for all new City expenses created by the project, which includes: Development Impact Fees (DIF) for construction of public improvements (i.e. streets and bridges, sewer, water, storm drain and fiber); Public Service Funding to ensure adequate provisions of public services (police, fire and other public services); and the creation of a Community Facilities District (CFD) for the maintenance of public facilities. Additionally, the Owner shall pay in lieu-fees to the City for the future construction and completion of Ontario Ranch Regional Water and Storm Drain improvements.

In considering the Agreement at their meeting on May 23, 2023, the Planning Commission found the Agreement to be consistent with State law, The Ontario Plan, and the City's Development Agreement policies. As a result, the Planning Commission adopted Resolution No. PC23-037 with a 4 to 0 vote, recommending City Council approval of the Agreement.

ENVIRONMENTAL REVIEW: The environmental impacts of this project were previously reviewed in conjunction with the Ontario Ranch Business Park Specific Plan Amendment (File No. PSPA21-002), for which a Final Subsequent Environmental Impact Report (State Clearinghouse No. 2019050018) was certified by the City Council on October 18, 2022. This application introduces no new significant environmental impacts. All previously adopted mitigation measures are a condition of Project approval and are incorporated herein by this reference.

FILE NO: PDA21-006

SUBJECT: A public hearing to consider a Development Agreement (File No. PDA21-006) between the City of Ontario and Euclid Land Venture 2 LLC, to establish the terms and conditions associated with Tentative Parcel Map No. 20517 (File No. PMTT22-005), an 80 acre property bordered by Eucalyptus, Campus, Merrill, and Sultana Avenues, located within the Business Park and Industrial General land use districts of the Ontario Ranch Business Park Specific Plan; (APNs: 1054-041-01, 1054-041-02, 1054-031-01, 1054-031-02, 1054-261-01, 1054-261-02, 1054-291-01, 1054-291-02); **submitted by Euclid Land Venture 2 LLC. City Council action is required.**

PROPERTY OWNER: Euclid Land Venture 2 LLC, a Delaware limited liability company

---

RECOMMENDED ACTION: That the Planning Commission consider and recommend City Council adoption of an Ordinance approving the Development Agreement (File No. PDA21-006) between the City of Ontario and Euclid Land Venture 2 LLC, pursuant to the facts and reasons contained in the staff report and attached resolution.

PROJECT SETTING: The project site is comprised of 80 acres of land bordered by Eucalyptus Campus, Merrill, and Sultana Avenues, within the Industrial and Business Park land use districts of the Ontario Ranch Business Park Specific Plan and is depicted in Figure 1: Project Location.

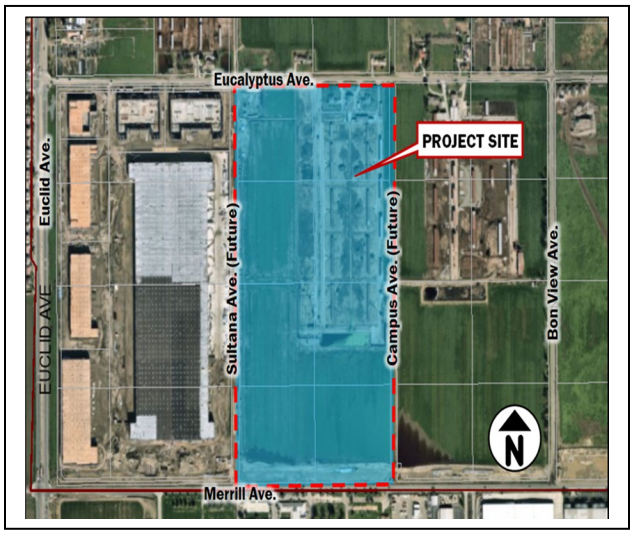

Figure 1: Project Location

PROJECT ANALYSIS:

(1) Background — The Ontario Ranch Business Park Specific Plan (File No. PSP18-002) ("Specific Plan") was approved, and the related Environmental Impact Report ("Certified EIR"; State Clearinghouse No. 2019050018) was certified by the City Council on September 15, 2020.

On October 4, 2022, the City Council approved Ontario Ranch Business Park Specific Plan Amendment (File No. PSPA21-002), which revised Specific Plan to include and assign land use

Case Planner:	Derrick Womble, Departmental Administrator
Planning Director Approval:	
Submittal Date:	07/01/2021

CC	06/20/2023		Final

designations to the Project site and adopted the related Subsequent Environmental Impact Report for the Certified EIR.

On February 17, 2022, the Applicant submitted the subject Tentative Parcel Map 20517 (File No. PMTT22-005) in conjunction with a Development Plan (File No. PDEV22-008) to facilitate the construction of Planning Areas 3 and 4 of the Specific Plan, consisting of three (3) business park buildings totaling 218,104 square feet and three (3) industrial buildings totaling 1,341,100 square feet respectively.

The Ontario Ranch financial commitments required for construction of properties within a specific plan are substantial. Therefore, in order to adequately forecast these costs and gain assurance that the project may proceed under the existing policies, rules, and regulations, Euclid Land Venture 2 LLC ("Owner"), has requested that the City enter into negotiations to create a Development Agreement ("Agreement").

In accordance with California Government Code Section 65865, which in part states that that "[a]ny city… may enter into a Development Agreement with any person having a legal or equitable interest in real property for the development of such property…" and California Government Code Section 65865.52, which in part states that "a Development Agreement shall specify the duration of the Agreement, the permitted uses of the property… and may include conditions, terms, restrictions…," the City of Ontario adopted Resolution No. 2002-100 setting forth the procedures and requirements for consideration of Development Agreements. Pursuant to these procedures and requirements, staff entered into negotiations with the Owner to create a Development Agreement for consideration by the Planning Commission and City Council.

The Agreement is proposed outside of the NMC Builders' Construction Agreement development area and was established in coordination between the City Attorney and the Owner's legal counsel. The provisions of the Agreement are consistent with the commitments to assure adequate public infrastructure improvements are constructed or funded by the Owner.

(2) Staff Analysis — The Agreement proposes to include 80 acres of land within the Industrial and Business Park land use districts of the Specific Plan, as shown on the attached Exhibit A. The Agreement grants the Owner a vested right to develop Tentative Parcel Map 20517 (the "Map"), provided the Owner complies with the terms and conditions of the Specific Plan and related EIR.

The Map (see attached Exhibit B) is bordered by Eucalyptus, Campus, Merrill, and Sultana Avenues, and proposes to subdivide 80 acres of land into six (6) parcels, for the potential development of six (6) industrial buildings totaling 1,559,204 square feet for business park and industrial uses.

The term of the Agreement is for 10 years, with a 5 year option to renew. The main points of the Agreement address funding for all new City expenses created by the project,

which includes: Development Impact Fees ("DIF") for construction of public improvements (i.e. streets and bridges, sewer, water, storm drain and fiber); Public Service Funding to ensure adequate provisions of public services (police, fire and other public services); and the creation of a Community Facilities District ("CFD") for the maintenance of public facilities. Additionally, Owner shall pay in lieu-fees to the City for the future construction and completion of Ontario Ranch Regional Water and Storm Drain improvements.

Staff finds that the Agreement is consistent with State law, The Ontario Plan, and the City's Development Agreement policies. As a result, staff is recommending approval of the application to the Planning Commission. If the Planning Commission finds the Agreement is acceptable, a recommendation of approval to the City Council would be appropriate.

PUBLIC NOTIFICATION: The subject Agreement was advertised as a public hearing in at least one newspaper of general circulation in the City of Ontario (the Inland Valley Daily Bulletin newspaper). In addition, notices were mailed to all owners of real property located within a minimum of 300 feet of the exterior boundaries of the property that is the subject of the hearing, as shown on the records of the County Assessor.

CORRESPONDENCE: As of the preparation of this Resolution, Planning Department staff has not received any written or verbal communications from the owners or occupants of properties surrounding the Project site or from the public in general, regarding the subject Agreement.

AGENCY/DEPARTMENT REVIEWS: Each City agency/department has been provided the opportunity to review and comment on the subject Agreement and recommend requirements to be imposed upon the Project. At the time of the Resolution preparation, infrastructure requirements were provided and are included within the subject Agreement to the attached Resolution as "Attachment A."

AIRPORT LAND USE COMPATIBILITY PLAN (ALUCP) COMPLIANCE: The California State Aeronautics Act (Public Utilities Code Section 21670 et seq.) requires that an Airport Land Use Compatibility Plan be prepared for all public use airports in the State; and requires that local land use plans and individual development proposals must be consistent with the policies set forth in the adopted Airport Land Use Compatibility Plan.

On April 19, 2011, the City Council of the City of Ontario approved and adopted the ONT ALUCP, establishing the Airport Influence Area for Ontario International Airport, which encompasses lands within parts of San Bernardino, Riverside, and Los Angeles Counties, and limits future land uses and development within the Airport Influence Area, as they relate to noise, safety, airspace protection, and overflight impacts of current and future airport activity. As the recommending body for the Project, the Planning Commission has reviewed and considered the facts and information contained in the Application and supporting documentation against the ONT ALUCP compatibility factors, including [1] Safety Criteria (ONT ALUCP Table 2-2) and Safety Zones (ONT ALUCP Map 2-2), [2] Noise

Criteria (ONT ALUCP Table 2-3) and Noise Impact Zones (ONT ALUCP Map 2-3), [3] Airspace protection Zones (ONT ALUCP Map 2-4), and [4] Overflight Notification Zones (ONT ALUCP Map 2-5). As a result, the Planning Commission, therefore, finds and determines that the Project, when implemented in conjunction with the conditions of approval, will be consistent with the policies and criteria set forth within the ONT ALUCP.

On August 2, 2022, the City Council of the City of Ontario approved and adopted a Development Code Amendment to establish the Chino Airport ("CNO") Overlay Zoning District ("OZD") and Reference I, Chino Airport Land Use Compatibility Plan ("CNO ALUCP"). The CNO OZD and CNO ALUCP established the Airport Influence Area for Chino Airport, solely within the City of Ontario, and limits future land uses and development within the Airport Influence Area, as they relate to safety, airspace protection, and overflight impacts of current and future airport activity. The CNO ALUCP is consistent with policies and criteria set forth within the Caltrans 2011 California Airport Land Use Planning Handbook. The proposed Project is located within the Airport Influence Area of Chino Airport and was evaluated and found to be consistent with the California Airport Land Use Planning Handbook and the CNO ALUCP. As the recommending body for the Project, the Planning Commission has reviewed and considered the facts and information contained in the Application and supporting documentation against the CNO ALUCP compatibility factors, including Safety, Airspace Protection, Overflight. As a result, the Planning Commission, therefore, finds and determines that the Project, when implemented in conjunction with the conditions of approval, will be consistent with the policies and criteria set forth within the California Airport Land Use Planning Handbook and the Chino ALUCP.

COMPLIANCE WITH THE ONTARIO PLAN: The proposed Project is consistent with the principles, goals and policies contained within the Vision, Governance, Policy Plan (general plan), and City Council Priorities components of The Ontario Plan ("TOP"). More specifically, the goals and policies of TOP that are furthered by the proposed Project are as follows:

(1) City Council Goals.

- Invest in the Growth and Evolution of the City's Economy
- Operate in a Businesslike Manner
- Focus Resources in Ontario's Commercial and Residential Neighborhoods
- Invest in the City's Infrastructure (Water, Streets, Sewers, Parks, Storm Drains and Public Facilities)
- Ensure the Development of a Well Planned, Balanced, and Self-Sustaining Community in the New Model Colony

(2) Vision.

Distinctive Development:

- Commercial and Residential Development

➢ Development quality that is broadly recognized as distinctive and not exclusively tied to the general suburban character typical of much of Southern California.

(3) Governance.

Decision Making:

- Goal G1: Sustained decision-making that consistently moves Ontario towards its Vision by using The Ontario Plan as a framework for assessing choices.

➢ G 1-2. Long-term Benefit. We require decisions to demonstrate and document how they add value to the community and support the Ontario Vision.

(4) Policy Plan (General Plan)

Land Use Element:

- Goal LU-1 Balance: A community that has a spectrum of housing types and price ranges that match the jobs in the City and that make it possible for people to live and work in Ontario and maintain a quality of life.

➢ LU-1.1 Strategic Growth. We concentrate growth in strategic locations that help create place and identity, maximize available and planned infrastructure, foster the development of transit, and support the expansion of the active and multimodal transportation networks throughout the City.

➢ LU-1.6 Complete Community. We incorporate a variety of land uses and building types in our land use planning efforts that result in a complete community where residents at all stages of life, employers, workers, and visitors have a wide spectrum of choices of where they can live, work, shop and recreate within Ontario.

- Goal LU-2 Compatibility: Compatibility between a wide range of uses and a resultant urban patterns and forms.

➢ LU-2.6 Infrastructure Compatibility. We require infrastructure to be aesthetically pleasing and in context with the community character.

Community Economics Element:

- Goal CE-1 Complete Community: A complete community that provides for all incomes and stages of life.

- CE-2.1 Development Projects. We require new development and redevelopment to create unique, high-quality places that add value to the community.

- CE-2.2 Development Review. We require those proposing new development and redevelopment to demonstrate how their projects will create appropriately unique, functional, and sustainable places that will compete well with their competition within the region.

- CE-2.4 Protection of Investment. We require that new development and redevelopment protect existing investment by providing architecture and urban design of equal or greater quality.

- CE-2.5 Private Maintenance. We require adequate maintenance, upkeep, and investment in private property because proper maintenance on private property protects property values.

Safety Element:

- Goal S-1 Seismic & Geologic Hazards: Minimized risk of injury, loss of life, property damage, and economic and social disruption caused by earthquake-induced and other geologic hazards.

- S-1.1 Implementation of Regulations and Standards. We require that all new habitable structures be designed in accordance with the most recent California Building Code adopted by the City, including provisions regarding lateral forces and grading.

Community Design Element:

- Goal CD-1 Image & Identity: A dynamic, progressive city containing distinct and complete places that foster a positive sense of identity and belonging among residents, visitors, and businesses.

- CD-1.1 City Identity. We take actions that are consistent with the City being a leading urban center in Southern California while recognizing, enhancing, and preserving the character of our existing viable neighborhoods.

- CD-1.2 Growth Areas. We establish Place Types in urban, mixed use, and transit-oriented areas to foster the City's identity as a premier community and require new development within each Place Type to incorporate prescribed urban patterns, forms, and placemaking priorities.

- CD-1.3 Existing Neighborhoods. We require the existing character of viable residential and non-residential neighborhoods be preserved, protected, and enhanced.

- Goal CD-2 Design Quality: A high level of design quality resulting in neighborhoods, public spaces, parks, and streetscapes that are attractive, safe, functional, human-scale, and distinct.

➢ CD-2.1 Quality Building Design and Architecture. We encourage all development projects to convey visual interest and character through:

- Building volume, massing, and height to provide context-appropriate scale and proportion;
- A true architectural style which is carried out in plan, section, and elevation through all aspects of the building and site design and appropriate for its setting; and
- Exterior building materials that are articulated, high quality, durable, and appropriate for the architectural style.

➢ CD-2.2 Neighborhood Design. We create distinct residential neighborhoods that promote a sense of community and identity by emphasizing access, connectivity, livability, and social interaction through such elements as:

- A pattern of smaller, walkable blocks that promote activity, safety, and access to nearby amenities and services;
- Varied parcel sizes and lot configurations to accommodate a diversity of housing types;
- Traffic calming measures to slow traffic and promote walkability while maintaining acceptable traffic flows and emergency evacuation access;
- Floor plans that encourage views onto the street and de-emphasize the visual and physical dominance of garages (introducing the front porch as the "outdoor living room"), as appropriate; and
- Landscaped parkways, with sidewalks separated from the curb and designed to maximize safety, comfort, and aesthetics for all users.

➢ CD-2.7 Sustainability. We collaborate with the development community to design and build neighborhoods, streetscapes, sites, outdoor spaces, landscaping, and buildings to reduce energy demand through solar orientation, maximum use of natural daylight, passive solar and natural ventilation, building form, mechanical and structural systems, building materials, and construction techniques.

➢ CD-2.8 Safe Design. We incorporate defensible space design into new and existing developments to ensure the maximum safe travel and visibility on pathways, corridors, and open space and at building entrances and parking areas by avoiding physically and visually isolated spaces, maintaining visibility and accessibility, and using lighting.

➢ CD-2.9 Landscape Design. We encourage durable, sustainable, and drought-tolerant landscaping materials and designs that enhance the aesthetics of

structures, create and define public and private spaces, and provide shade and environmental benefits.

- CD-2.10 Parking Areas. We require all development, including single-family residential, to minimize the visual impact of surface, structured, and garage parking areas visible from the public realm in an aesthetically pleasing, safe and environmentally sensitive manner. Examples include:

  - Surface parking: Shade trees, pervious surfaces, urban run-off capture and infiltration, and pedestrian paths to guide users through the parking field;
  - Structured parking: facade articulation, screening, appropriate lighting, and landscaping; and
  - Garage parking: providing access to single-family residential garages through alley access, recessing garages from the frontage to emphasize front doors or active living spaces.

- CD-2.11 Entry Statements. We encourage the inclusion of amenities, signage, and landscaping at the entry to neighborhoods, commercial centers, mixed use areas, industrial developments, and public places that reinforce them as uniquely identifiable places.

- CD-2.12 Site and Building Signage. We encourage the use of sign programs that utilize complementary materials, colors, and themes. Project signage should be designed to effectively communicate and direct users to various aspects of the development and complement the character of the structures.

- CD-2.13 Entitlement Process. We work collaboratively with all stakeholders to ensure a high degree of certainty in the efficient review and timely processing of all development plans and permits.

- Goal CD-3 Urban, Mixed Use, and Transit-Oriented Place Types: Vibrant urban environments that are organized around intense buildings, pedestrian and transit areas, public plazas, and linkages between and within developments that are conveniently located, visually appealing and safe during all hours.

- CD-3.2 Comfortable, Human-Scale Public Realm. We require that public spaces, including streets, parks, and plazas on both public and private property be designed to maximize safety, comfort and aesthetics and connect to the citywide pedestrian, vehicular, and bicycle networks.

- CD-3.3 Complete and Connected Network. We require that pedestrian, vehicular, and bicycle circulation on both public and private property be coordinated to provide connections internally and externally to adjacent neighborhoods and properties (existing and planned) through a system of local roads and trails that promote walking and biking to nearby destinations (including existing and planned parks,

commercial areas, and transit stops) and are designed to maximize safety, comfort, and aesthetics.

- CD-3.4 Context-Aware and Appropriate Design. We require appropriate building and site design that complements existing development, respects the intent and identity of the Place Type, and provides appropriate transitions and connections between adjacent uses to ensure compatibility of scale, maintain an appropriate level of privacy for each use, and minimize potential conflicts.

- CD-3.5 Active Frontages. We create lively pedestrian streetscapes by requiring primary building, business, and residential entrances, outdoor dining, and storefronts be located on ground floors adjacent to sidewalks or public spaces and designed to maximize safety, comfort, aesthetics, and the intended functionality (as defined by the Place Type).

- CD-3.6 Managed Infrastructure. We collaborate with developers and property owners to facilitate development that realizes the envisioned character and functionality of the Place Type through the use of green and shared infrastructure within each Place Type.

- Goal CD-5 Protection of Investment: A sustained level of maintenance and improvement of properties, buildings, and infrastructure that protects the property values and encourages additional public and private investments.

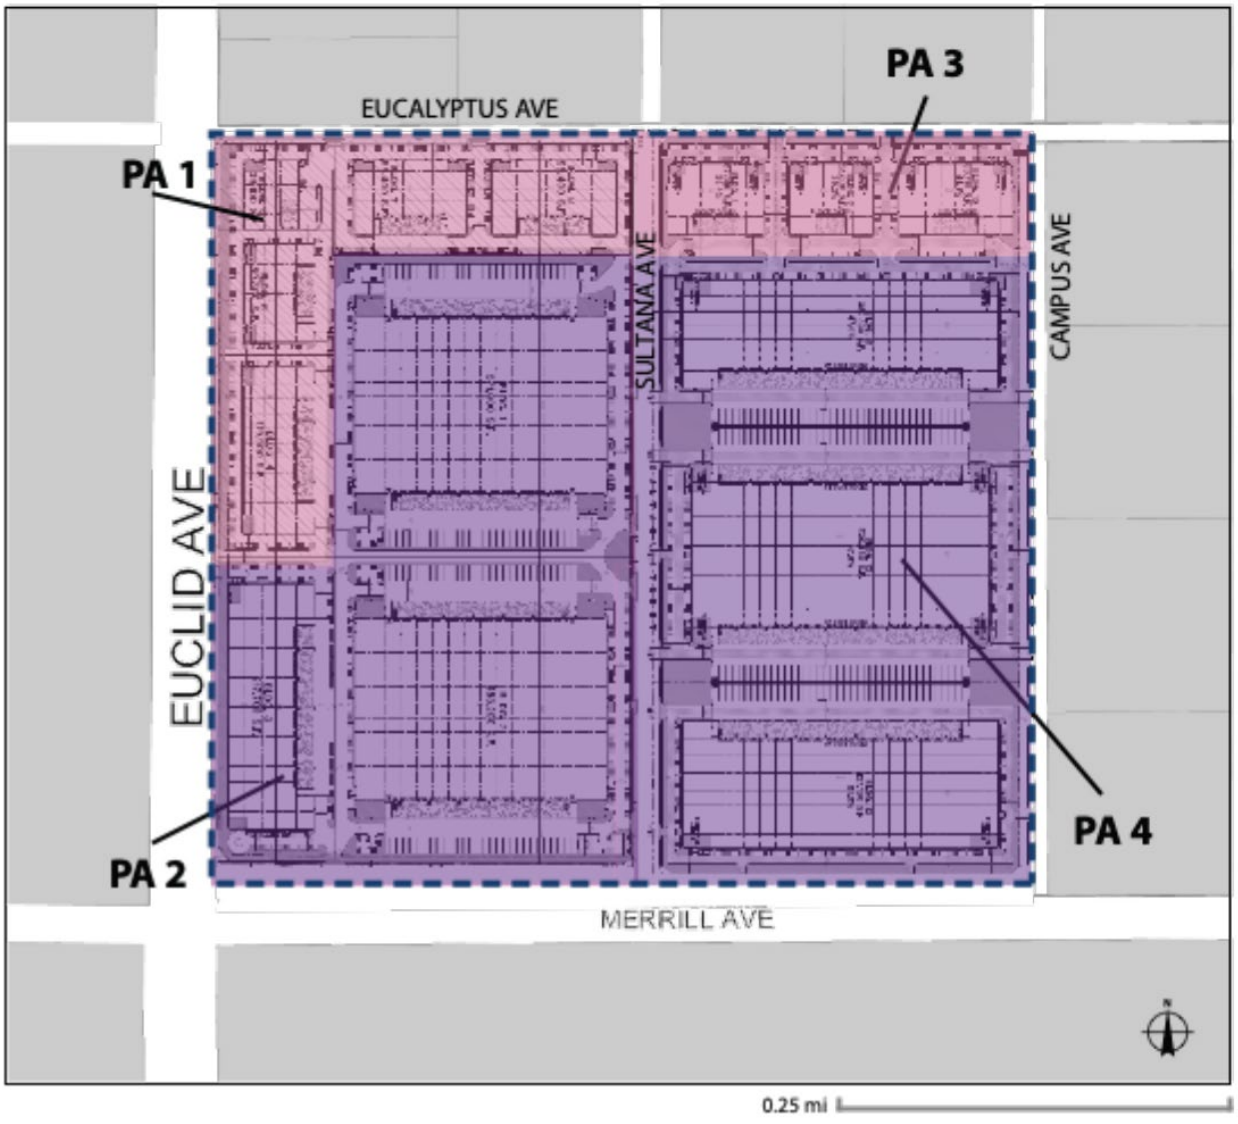
- CD-5.1 Maintenance of Buildings and Property. We require all public and privately-owned buildings and property (including trails and easements) to be properly and consistently maintained.

- CD-5.2 Maintenance of Infrastructure. We require the continual maintenance of infrastructure.

HOUSING ELEMENT COMPLIANCE: The Project is consistent with the Housing Element of the Policy Plan (general plan) component of The Ontario Plan, as the Project site is not one of the properties in the Housing Element Sites contained in Tables B-1 and B-2 (Housing Element Sites Inventory) of the Housing Element Technical Report.

ENVIRONMENTAL REVIEW: The environmental impacts of this project were previously reviewed in conjunction with the Ontario Ranch Business Park Specific Plan Amendment (File No. PSPA21-002), for which a Final Subsequent Environmental Impact Report (State Clearinghouse No. 2019050018) was certified by the City Council on October 18, 2022. This application introduces no new significant environmental impacts. All previously adopted mitigation measures are a condition of Project approval and are incorporated herein by this reference.

Exhibit A— ONTARIO RANCH BUSINESS PARK SPECIFIC PLAN LAND USE MAP



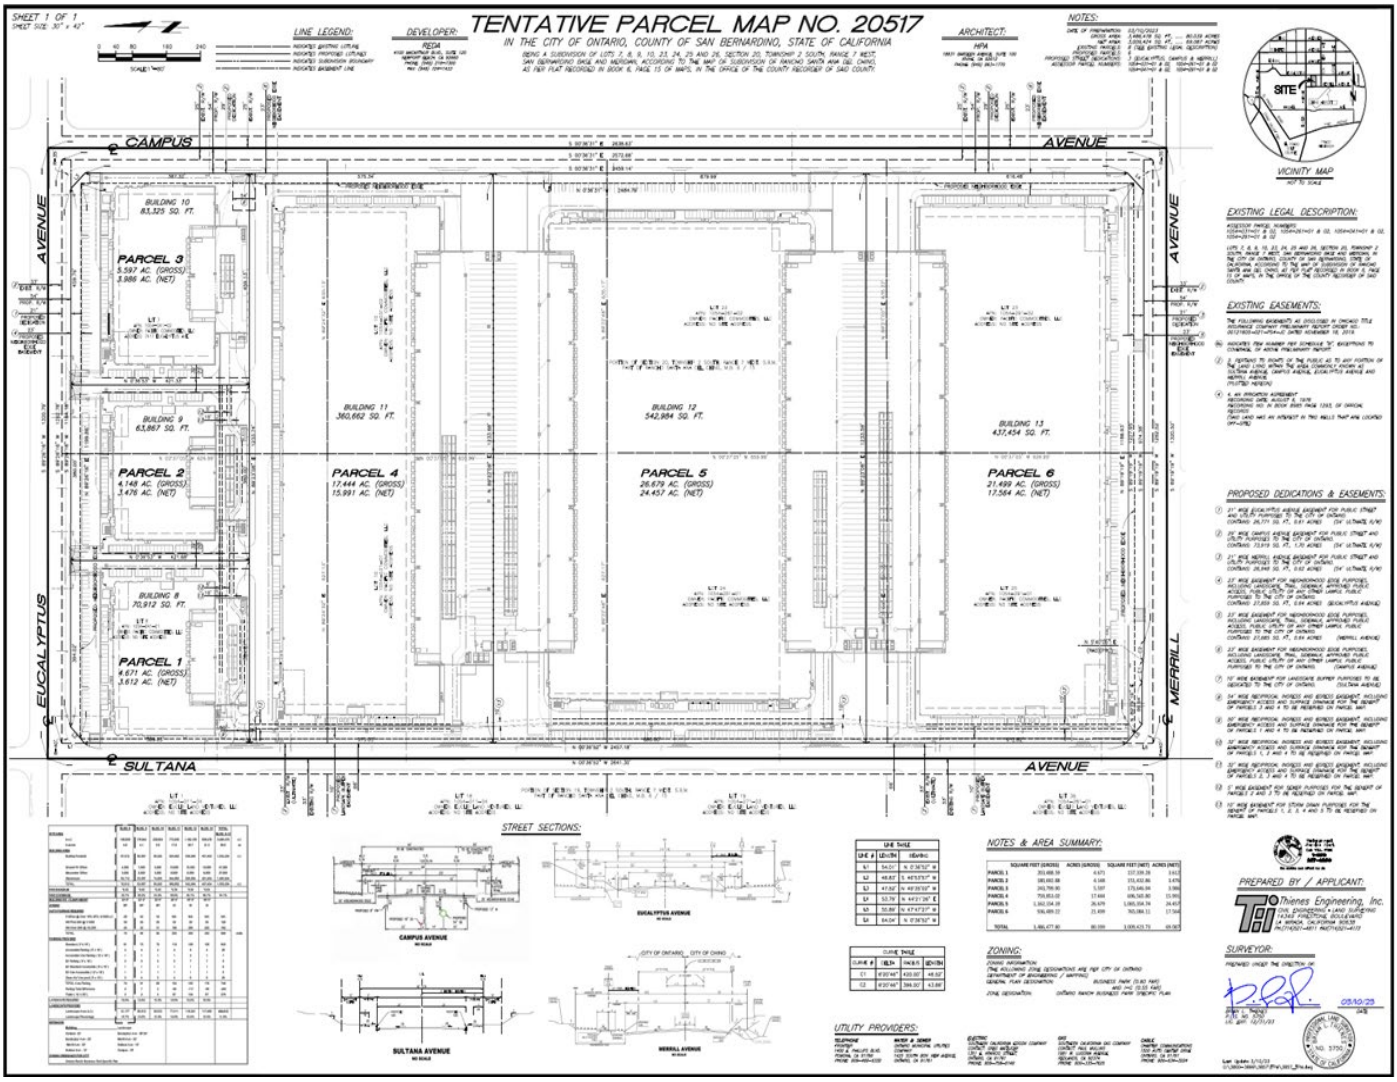


Exhibit B— TENTATIVE PARCEL MAP 20517

RESOLUTION NO. PC23-037

A RESOLUTION OF THE PLANNING COMMISSION OF THE CITY OF ONTARIO, CALIFORNIA, RECOMMENDING THE CITY COUNCIL APPROVE FILE NO. PDA21-006, A DEVELOPMENT AGREEMENT BETWEEN THE CITY OF ONTARIO AND EUCLID LAND VENTURE 2 LLC, TO ESTABLISH THE TERMS AND CONDITIONS ASSOCIATED WITH TENTATIVE PARCEL MAP NO. 20517 (FILE NO. PMTT22-005), AN 80 ACRE PROPERTY BORDERED BY EUCALYPTUS, CAMPUS, MERRILL, AND SULTANA AVENUES, LOCATED WITHIN THE BUSINESS PARK AND INDUSTRIAL GENERAL LAND USE DISTRICTS OF THE ONTARIO RANCH BUSINESS PARK SPECIFIC PLAN; APNS: 1054-041-01, 1054-041-02, 1054-031-01, 1054-031-02, 1054-261-01, 1054-261-02, 1054-291-01, 1054-291-02

WHEREAS, Euclid Land Venture 2 LLC ("Applicant") has filed an Application for the approval of a Development Agreement, File No. PDA21-006, as described in the title of this Resolution (hereinafter referred to as "Application" or "Project"); and

WHEREAS, the Application applies to 80 acres of land generally bordered by Eucalyptus, Campus, Merrill, and Sultana Avenues, located within the Business Park and Industrial General land use districts of the Ontario Ranch Business Park Specific Plan; and

WHEREAS, the Applicant has submitted a Tentative Parcel Map 20517 (File No. PMTT22-005) to subdivide 80 acres of land into six (6) parcels, to facilitate the potential development of 1,559,204 square feet of business park and industrial uses; and

WHEREAS, the environmental impacts of this project were previously reviewed in conjunction with the Ontario Ranch Business Park Specific Plan Amendment (File No. PSPA21-002), for which an Environmental Impact Report — State Clearinghouse No. 2019050018 — (hereinafter referred to as "Certified EIR") was adopted by the City Council on October 18, 2022, and this Application introduces no new significant environmental impacts; and

WHEREAS, Ontario Development Code Table 2.02-1 (Review Matrix) grants the Planning Commission the responsibility and authority to review and make recommendation to the City Council on the subject Application; and

WHEREAS, the Project has been reviewed for consistency with the Housing Element of the Policy Plan component of The Ontario Plan, as State Housing Element law (as prescribed in Government Code Sections 65580 through 65589.8) requires that development projects must be consistent with the Housing Element, if upon consideration

of all its aspects, it is found to further the purposes, principals, goals, and policies of the Housing Element; and

WHEREAS, the Project is located within the Airport Influence Area of Ontario International Airport, which encompasses lands within parts of San Bernardino, Riverside, and Los Angeles Counties, and is subject to, and must be consistent with, the policies and criteria set forth in the Ontario International Airport Land Use Compatibility Plan (hereinafter referred to as "ALUCP"), which applies only to jurisdictions within San Bernardino County, and addresses the noise, safety, airspace protection, and overflight impacts of current and future airport activity; and

WHEREAS, City of Ontario Development Code Division 2.03 (Public Hearings) prescribes the manner in which public notification shall be provided and hearing procedures to be followed, and all such notifications and procedures have been completed; and

WHEREAS, on May 23, 2023, the Planning Commission of the City of Ontario conducted a hearing to consider the Project, and concluded said hearing on that date; and

WHEREAS, all legal prerequisites to the adoption of this Resolution have occurred.

NOW, THEREFORE, IT IS HEREBY FOUND, DETERMINED, AND RESOLVED by the Planning Commission of the City of Ontario, as follows:

SECTION 1: ***Environmental Determination and Findings.*** As the recommending authority for the Project, the Planning Commission has reviewed and considered the information contained in the previous Certified Subsequent EIR (the “Certified EIR”) and supporting documentation. Based upon the facts and information contained in the previous Certified EIR and supporting documentation, the Planning Commission finds as follows:

(1) The environmental impacts of this project were previously reviewed in conjunction with the Ontario Ranch Business Park Specific Plan Amendment (File No. PSPA21-002), for which a Certified EIR was adopted by the City Council on October 18, 2022; and

(2) The previous Certified EIR contains a complete and accurate reporting of the environmental impacts associated with the Project; and

(3) The previous Certified EIR was completed in compliance with CEQA and the Guidelines promulgated thereunder; and

(4) The previous Certified EIR reflects the independent judgment of the Planning Commission; and

(5) The proposed project will introduce no new significant environmental impacts beyond those previously analyzed in the previous Certified EIR, and all mitigation measures previously adopted with the Certified EIR, are incorporated herein by this reference.

SECTION 2: ***Subsequent or Supplemental Environmental Review Not Required.*** Based on the information presented to the Planning Commission, and the specific findings set forth in Section 1, above, the Planning Commission finds that the preparation of a subsequent or supplemental Certified EIR is not required for the Project, as the Project:

(1) Does not constitute substantial changes to the Certified EIR that will require major revisions to the Certified EIR due to the involvement of new significant environmental effects or a substantial increase in the severity of previously identified significant effects; and

(2) Does not constitute substantial changes with respect to the circumstances under which the Certified EIR was prepared, that will require major revisions to the Certified EIR due to the involvement of new significant environmental effects or a substantial increase in the severity of the previously identified significant effects; and

(3) Does not contain new information of substantial importance that was not known and could not have been known with the exercise of reasonable diligence at the time the Certified EIR was certified/adopted, that shows any of the following:

(a) The project will have one or more significant effects not discussed in the Certified EIR; or

(b) Significant effects previously examined will be substantially more severe than shown in the Certified EIR; or

(c) Mitigation measures or alternatives previously found not to be feasible would in fact be feasible and would substantially reduce one or more significant effects of the Project, but the City declined to adopt such measures; or

(d) Mitigation measures or alternatives considerably different from those analyzed in the Certified EIR would substantially reduce one or more significant effects on the environment, but which the City declined to adopt.

SECTION 3: ***Housing Element Compliance.*** Pursuant to the requirements of California Government Code Chapter 3, Article 10.6, commencing with Section 65580, as the recommending authority for the Project, the Planning Commission finds that based on the facts and information contained in the Application and supporting documentation, at the time of Project implementation, the project is consistent with the Housing Element of the Policy Plan (General Plan) component of The Ontario Plan, as the project site is not one of the properties in the Housing Element Sites Inventory contained in Tables B-1 and B-2 of the Housing Element Technical Report.

SECTION 4: ***Airport Land Use Compatibility Plan ("ALUCP") Compliance.*** The California State Aeronautics Act (Public Utilities Code Section 21670 et seq.) requires that an Airport Land Use Compatibility Plan be prepared for all public use airports in the State; and requires that local land use plans and individual development proposals must be consistent with the policies set forth in the adopted Airport Land Use Compatibility Plan.

(1) On April 19, 2011, the City Council of the City of Ontario approved and adopted the Ontario International Airport Land use Compatibility Plan, establishing the Airport Influence Area for Ontario International Airport, which encompasses lands within parts of San Bernardino, Riverside, and Los Angeles Counties, and limits future land uses and development within the Airport Influence Area, as they relate to noise, safety, airspace protection, and overflight impacts of current and future airport activity. As the recommending body for the Project, the Planning Commission has reviewed and considered the facts and information contained in the Application and supporting documentation against the ONT ALUCP compatibility factors, including [1] Safety Criteria (ONT ALUCP Table 2-2) and Safety Zones (ONT ALUCP Map 2-2), [2] Noise Criteria (ONT ALUCP Table 2-3) and Noise Impact Zones (ONT ALUCP Map 2-3), [3] Airspace protection Zones (ONT ALUCP Map 2-4), and [4] Overflight Notification Zones (ONT ALUCP Map 2-5). As a result, the Planning Commission, therefore, finds and determines that the Project, when implemented in conjunction with the conditions of approval, will be consistent with the policies and criteria set forth within the ONT ALUCP; and

(2) On August 2, 2022, the City Council of the City of Ontario approved and adopted a Development Code Amendment to establish the Chino Airport ("CNO") Overlay Zoning District ("OZD") and Reference I, Chino Airport Land Use Compatibility Plan ("CNO ALUCP"). The CNO OZD and CNO ALUCP established the Airport Influence Area for Chino Airport, solely within the City of Ontario, and limits future land uses and development within the Airport Influence Area, as they relate to safety, airspace protection, and overflight impacts of current and future airport activity. The CNO ALUCP is consistent with policies and criteria set forth within the Caltrans 2011 California Airport Land Use Planning Handbook. The proposed Project is located within the Airport Influence Area of Chino Airport and was evaluated and found to be consistent with the California Airport Land Use Planning Handbook and the CNO ALUCP. As the

recommending body for the Project, the Planning Commission has reviewed and considered the facts and information contained in the Application and supporting documentation against the CNO ALUCP compatibility factors, including Safety, Airspace Protection, Overflight. As a result, the Planning Commission, therefore, finds and determines that the Project, when implemented in conjunction with the conditions of approval, will be consistent with the policies and criteria set forth within the California Airport Land Use Planning Handbook and the Chino ALUCP.

SECTION 5: ***Concluding Facts and Reasons.*** Based upon the substantial evidence presented to the Planning Commission during the above-referenced hearing, and upon the specific findings set forth in Section 1 through 4, above, the Planning Commission hereby concludes as follows:

(1) The Development Agreement applies to approximately 80 acres of land bordered by Eucalyptus, Campus, Merrill, and Sultana Avenues, located within the Business Park and Industrial General land use districts of the Ontario Ranch Business Park Specific Plan Amendment (File No. PSPA21-002); and

(2) The Development Agreement establishes parameters for the development of land within the Ontario Ranch Business Park Specific Plan. The Development Agreement also grants the Applicant, the right to develop, the ability to quantify the fees; and establish the terms and conditions that apply to those projects. These terms and conditions are consistent with The Ontario Plan Policy Plan (General Plan), design guidelines and development standards for the Ontario Ranch Business Park Specific Plan; and

(3) The Development Agreement grants the Owner a vested right to develop Tentative Parcel Map 20517 (File No. PMTT22-005) as long as the Owner complies with the terms and conditions of the Ontario Ranch Business Park Specific Plan and EIR. Tentative Parcel Map 20517 is bordered by Eucalyptus, Campus, Merrill, and Sultana Avenues, and proposes to subdivide 80 acres of land into six (6) parcels, to facilitate the potential development of 1,559,204 square feet of business park and industrial uses; and

(4) The Development Agreement has been prepared in conformance with the goals and policies of The Ontario Plan Policy Plan (General Plan); and

(5) The Development Agreement does not conflict with the Land Use Policies of The Ontario Plan Policy Plan (General Plan) and will provide for development, within the district, in a manner consistent with the Policy Plan and with related development; and

(6) This Development Agreement will promote the goals and objectives of the Land Use Element of the Policy Plan; and

(7) This Development Agreement will not be materially injurious or detrimental to the adjacent properties and will not have a significant impact on the environment or the surrounding properties. The environmental impacts of this project were previously reviewed in conjunction with the Ontario Ranch Business Park Specific Plan Amendment (File No. PSPA21-002), for which a Final Subsequent Environmental Impact Report (State Clearinghouse No. 2019050018) was certified by City Council on October 18, 2022; and

(8) This Application introduces no new significant environmental impacts. All previously adopted mitigation measures are a condition of project approval and are incorporated herein by this reference.

SECTION 6: ***Planning Commission Action.*** Based upon the findings and conclusions set forth in Sections 1 through 5, above, the Planning Commission hereby RECOMMENDS THE CITY COUNCIL APPROVES the herein described Application, subject to each and every condition set forth in the Development Agreement (File No. PDA21-006) attached hereto as "Attachment A," and incorporated herein by this reference.

SECTION 7: ***Indemnification.*** The Applicant shall agree to defend, indemnify and hold harmless, the City of Ontario or its agents, officers, and employees from any claim, action or proceeding against the City of Ontario or its agents, officers or employees to attack, set aside, void, or annul this approval. The City of Ontario shall promptly notify the applicant of any such claim, action, or proceeding, and the City of Ontario shall cooperate fully in the defense.

SECTION 8: ***Custodian of Records.*** The documents and materials that constitute the record of proceedings on which these findings have been based are located at the City of Ontario City Hall, 303 East "B" Street, Ontario, California 91764. The custodian for these records is the City Clerk of the City of Ontario.

SECTION 9: ***Certification to Adoption.*** The Secretary shall certify to the adoption of the Resolution.

- - - - - - - - - - - - - -

The Secretary Pro Tempore for the Planning Commission of the City of Ontario shall certify as to the adoption of this Resolution.

I hereby certify that the foregoing Resolution was duly and regularly introduced, passed and adopted by the Planning Commission of the City of Ontario at a regular meeting thereof held on the 23rd day of May 2023, and the foregoing is a full, true and correct copy of said Resolution, and has not been amended or repealed.

Richard Gage
Planning Commission Vice-Chairperson

_____, 2023

San Bernardino County, California

DEVELOPMENT AGREEMENT NO. PDA21-006

This Development Agreement (hereinafter "Agreement") is dated for reference purposes only as of the ____ day of _____, 2023 by and among the City of Ontario, a California municipal corporation (hereinafter "CITY"), and Euclid Land Venture 2, LLC, a Delaware limited liability company (hereinafter "OWNER"):

RECITALS

WHEREAS, CITY is authorized to enter into binding development agreements with persons having legal or equitable interests in real property for the development of such property, pursuant to Section 65864, et seq. of the Government Code and Section 4.01.015 of the Ontario Development Code; and

WHEREAS, OWNER has requested CITY to enter into a development agreement and proceedings have been taken in accordance with the rules and regulations of CITY; and

WHEREAS, by electing to enter into this Agreement, CITY shall bind future City Councils of CITY by the obligations specified herein and limit the future exercise of certain governmental and proprietary powers of CITY; and

WHEREAS, the terms and conditions of this Agreement have undergone extensive review by CITY and the City Council and have been found to be fair, just and reasonable; and

WHEREAS, the best interests of the citizens of the CITY and the public health, safety and welfare will be served by entering into this Agreement; and

WHEREAS, all of the procedures of the California Environmental Quality Act, Pub. Res. Code § 21000, et seq. ("CEQA") have been met with respect to the Project and the Agreement in that certain Ontario Ranch Business Park Specific Plan Amendment Subsequent Environmental Impact Report (State Clearinghouse No. 2019050018) (the "FEIR"); and

WHEREAS, on October 18, 2022, the City Council found and determined that the FEIR was prepared in accordance with the requirements of CEQA and adequately describes the impacts of the Project described in the FEIR, which included consideration of this Agreement; and

WHEREAS, this Agreement and the Project are consistent with the CITY's Comprehensive General Plan and the Ontario Ranch Business Park Specific Plan; and

WHEREAS, all actions taken and approvals given by CITY have been duly taken or approved in accordance with all applicable legal requirements for notice, public hearings, findings, votes, and other procedural matters; and

WHEREAS, development of the Project Site, as more particularly described and depicted in **Exhibits A** and **B**, respectively (the "Property") in accordance with this Agreement will provide substantial benefits to CITY and will further important policies and goals of CITY; and

WHEREAS, this Agreement will eliminate uncertainty in planning and provide for the orderly development of the Property, ensure progressive installation of necessary improvements, provide for public services appropriate to the development of the Project, and generally serve the purposes for which development agreements under Section 65864 et seq. of the Government Code are intended; and

WHEREAS, OWNER has incurred and will in the future incur substantial costs in order to assure development of the Property in accordance with this Agreement; and

WHEREAS, OWNER has incurred and will in the future incur substantial costs in excess of the generally applicable requirements in order to assure vesting of legal rights to develop the Property in accordance with this Agreement.

COVENANTS

NOW, THEREFORE, in consideration of the above recitals and of the mutual covenants hereinafter contained and for other good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged, the parties agree as follows:

1. DEFINITIONS AND EXHIBITS.

1.1 Definitions. The following terms when used in this Agreement shall be defined as follows:

1.1.1 "Agreement" means this Development Agreement.

1.1.2 "CITY" means the City of Ontario, California, a California municipal corporation.

1.1.3 "Development" means the improvement of the Property for the purposes of completing the structures, improvements and facilities comprising the Project including, but not limited to: grading; the construction of public infrastructure and public facilities related to the Project whether located within or outside the Property; the construction of buildings and structures; and the installation of landscaping. "Development" does not include the maintenance, repair, reconstruction or redevelopment of any building, structure, improvement or facility after the construction and completion thereof.

1.1.4 "Development Approvals" means all permits and other entitlements for use subject to approval or issuance by CITY in connection with development of the Property including, but not limited to:

(a) general plans and general plan amendments; and specific plans and specific plan amendments;

(b) tentative and final subdivision and parcel maps;

(c) development plan review.

1.1.5 "Development Exaction" means any requirement of CITY in connection with or pursuant to any Land Use Regulation or Development Approval for the dedication of land, the construction of improvements or public facilities, or the payment of fees in order to lessen, offset, mitigate or compensate for the impacts of development on the environment or other public interests.

1.1.6 "Development Impact Fee" means a monetary exaction, other than a tax or special assessment, whether characterized as a fee or a tax and whether established for a broad class of projects by legislation of general applicability or imposed on a specific project on an ad hoc basis, that is charged by a local agency to the applicant in connection with approval of a development project for the purpose of defraying all or a portion of the cost of public facilities related to the development project, and, for purposes of this Agreement only, includes fees collected under development agreements adopted pursuant to Article 2.5 of the Government Code (commencing with Section 65864) of Chapter 4. For purposes of this Agreement only, "Development Impact Fee" shall not include processing fees and charges imposed by CITY to cover the estimated actual costs to CITY of processing applications for Development Approvals or for monitoring compliance with any Development Approvals granted or issued, including, without limitation, fees for zoning variances; zoning changes; use permits; building inspections; building permits; filing and processing applications and petitions filed with the local agency formation commission or conducting preliminary proceedings or proceedings under the Cortese-Knox-Hertzberg Local Government Reorganization Act of 2000, Division 3 (commencing with Section 56000) of Title 5 of the Government Code; the processing of maps under the provisions of the Subdivision Map Act, Division 2 (commencing with Section 66410) of Title 7 of the Government Code; or planning services under the authority of Chapter 3 (commencing with Section 65100) of Division 1 of Title 7 of the Government Code, fees and charges as described in Sections 51287, 56383, 57004, 65104, 65456, 65863.7, 65909.5, 66013, 66014, and 66451.2 of the Government Code, Sections 17951, 19132.3, and 19852 of the Health and Safety Code, Section 41901 of the Public Resources Code, and Section 21671.5 of the Public Utilities Code, as such codes may be amended or superseded, including by amendment or replacement.

1.1.7 "Development Plan" means the Existing Development Approvals and the Existing Land Use Regulations applicable to development of the Property.

1.1.8 "Effective Date" means the date that the ordinance approving this Agreement goes into effect.

1.1.9 "Existing Development Approvals" means all Development Approvals approved or issued on or prior to the Effective Date. Existing Development Approvals includes the Approvals incorporated herein as Exhibit "C" and all other Approvals which are a matter of public record on the Effective Date.

1.1.10 "Existing Land Use Regulations" means all Land Use Regulations in effect on the date of the first reading of the ordinance adopting and approving this Agreement. Existing Land Use Regulations includes the Regulations incorporated herein as Exhibit "D" and all other Land Use Regulations that are in effect and a matter of public record on such date.

1.1.11 "General Plan" means The Ontario Plan adopted on August 16, 2022, as amended up to the date of the first reading of the ordinance adopting and approving this Agreement.

1.1.12 "Improvement" or "Improvements" means those public improvements required to support the development of the Project as described in the Parcel Map conditions for Parcel Map No. 20517 ("Parcel Map") as further described in Exhibit "E" and depicted in Exhibit “F”(together, the "Infrastructure Improvements Exhibit").

1.1.13 "Land Use Regulations" means all ordinances, resolutions, codes, rules, regulations and official policies of CITY governing the development and use of land, including, without limitation, the permitted use of land, the density or intensity of use, subdivision requirements, timing and phasing of development, the maximum height and size of buildings, the provisions for reservation or dedication of land for public purposes, and the design, improvement and construction standards and specifications applicable to the development of the Property. "Land Use Regulations" does not include any CITY ordinance, resolution, code, rule, regulation or official policy, governing:

(a) the conduct of businesses, professions, and occupations;

(b) taxes and assessments;

(c) the control and abatement of nuisances;

(d) the granting of encroachment permits and the conveyance of similar rights and interests that provide for the use of or the entry upon public property;

(e) the exercise of the power of eminent domain.

1.1.14 "Mortgagee" means a mortgagee of a mortgage, a beneficiary under a deed of trust or any other security-device lender, and their successors and assigns.

1.1.15 "OWNER" means the persons and entities listed as owner on page 1 of this Agreement and their permitted successors in interest to all or any part of the Property.

1.1.16 "Owner Affiliate" shall mean, (i) any entity that directly or indirectly controls, is controlled by, or is under common control with OWNER, or (ii) an entity at least a majority of whose economic interest is owned by OWNER. For purposes of this definition, the term “control” means the power to direct the management of such entity through voting rights, ownership or contractual obligations.

1.1.17 “Phase” means the development area described in the Infrastructure Improvements Exhibit to this Agreement.

1.1.18 “Phase 2 Water Participation Fee” means the fee paid to the CITY for the Project, to fund the Property’s respective share of the project costs of the design and construction of the Phase 2 Water Improvements by the CITY. The Phase 2 Water Participation Fee shall be the calculated amount of the Regional Water DIF for the Project based upon the number of square feet, acreage, and land use category for non-residential square footage of the Project.

1.1.19 "Project" means the development of the Property contemplated by the Development Plan, as such Plan may be further defined, enhanced or modified pursuant to the provisions of this Agreement.

1.1.20 "Property" means the real property described on Exhibit "A" and shown on Exhibit "B" to this Agreement.

1.1.21 "Reservations of Authority" means the rights and authority excepted from the assurances and rights provided to OWNER under this Agreement and reserved to CITY under Section 3.4 of this Agreement.

1.1.22 "Specific Plan" means that certain specific plan adopted by the City Council, and entitled, "Ontario Ranch Business Park Specific Plan”.

1.1.23 "Subsequent Development Approvals" means all discretionary Development Approvals required subsequent to the Effective Date in connection with development of the Property. Subsequent Development Approvals shall be deemed to be subject to the provisions of this Agreement, without any further action needed on the part of either the CITY or OWNER.

1.1.24 "Subsequent Land Use Regulations" means any discretionary Land Use Regulations adopted and effective after the Effective Date of this Agreement.

1.2 Exhibits. The following documents are attached to, and by this reference made a part of, this Agreement:

Exhibit "A" — Legal Description of the Property.

Exhibit "B" — Map showing Property and its location.

Exhibit "C" — Existing Development Approvals.

Exhibit "D" — Existing Land Use Regulations.

Exhibit "E" — Description of Required Infrastructure Improvements

Exhibit "F" — Depiction of Infrastructure Improvements Exhibits

Exhibit "G" – Form of Certificate of DIF Credit to be issued by CITY

2. GENERAL PROVISIONS.

2.1 Binding Effect of Agreement. The Property is hereby made subject to this Agreement. Development of the Property is hereby authorized and shall be carried out only in accordance with the terms of this Agreement.

2.2 Ownership of Property. OWNER represents and covenants that it is the owner of fee simple title or the lessee or an optionee of the Property or a portion(s) thereof. To the extent applicable, OWNER has obtained written consent from the current fee owner of the Property agreeing to the terms of this Agreement and the recordation thereof.

2.3 Term. The term of this Agreement shall commence on the Effective Date and shall continue for an initial term of ten (10) years thereafter unless this term is modified or extended pursuant to the provisions of this Agreement. Upon approval by the City Manager, without the need for City Council approval, the term of this Agreement may be extended for an additional five (5) years following expiration of the initial ten (10) year term, provided the following have occurred:

(a) OWNER provides at least 180 days written notice to CITY prior to expiration of the initial term; and

(b) OWNER is not then in uncured default of this Agreement.

2.4 Assignment.

2.4.1 Right to Assign. OWNER shall have the right to sell, transfer or assign the Property in whole or in part (provided that no such partial transfer shall violate the Subdivision Map Act, Government Code Section 66410, et seq.), to any person, partnership, limited liability company, joint venture, firm or corporation at any time during the term of this Agreement; provided, however, that any such sale, transfer or assignment shall include the assignment and assumption of the rights, duties and obligations arising under or from this Agreement with respect to the portion of the Property sold and be made in strict compliance with the following:

(a) Except as expressly provided for herein, no sale, transfer or assignment of any right or interest under this Agreement shall be made unless made together with the sale, transfer or assignment of all or a part of the Property.

(b) Concurrent with any such sale, transfer or assignment, or within fifteen (15) business days thereafter, OWNER shall notify CITY's City Manager, in writing, of such sale, transfer or assignment and shall provide CITY with: (1) an executed agreement, in a form reasonably acceptable to CITY, by the purchaser, transferee or assignee and providing therein that the purchaser, transferee or assignee expressly and unconditionally assumes all the duties and obligations of OWNER under this Agreement with respect to the portion of the Property so sold, transferred or assigned.

(c) Any sale, transfer or assignment not made in strict compliance with the foregoing conditions shall constitute a default by OWNER under this Agreement. Notwithstanding the failure of any purchaser, transferee or assignee to execute the agreement required by Paragraph (b) of this Subsection 2.4.1, the burdens of this Agreement shall be binding upon such purchaser, transferee or assignee, but the benefits of this Agreement shall not inure to such purchaser, transferee or assignee until and unless such agreement is executed. The City Manager shall have the authority to review, consider and either approve, conditionally approve, or deny any proposed sale, transfer or assignment that is not made in compliance with this section 2.4.

(d) Notwithstanding the foregoing, OWNER shall have the right to assign this Agreement to an Owner Affiliate subject to the notice requirements to CITY as described in Paragraph (b) of this Section 2.4.1, above.

2.4.2 Release of Transferring Owner. Notwithstanding any sale, transfer or assignment, a transferring OWNER shall continue to be obligated under this Agreement unless such transferring owner is given a release in writing by CITY, which release shall be provided by CITY upon the full satisfaction by such transferring owner of the following conditions:

(a) OWNER no longer has a legal or equitable interest in all or any part of the portion of the Property sold, transferred or assigned.

(b) OWNER is not then in default under this Agreement.

(c) OWNER has provided CITY with the notice and executed an agreement as required under Paragraph (b) of Subsection 2.4.1 above.

(d) The purchaser, transferee or assignee provides CITY with security equivalent to any security previously provided by OWNER (if any) to secure performance of its obligations hereunder which are to be performed upon portion of the Property sold, transferred or assigned.

2.4.3 Effect of Assignment and Release of Obligations. In the event of a sale, transfer or assignment pursuant to the provisions of Section 2.4.1 and notwithstanding the release provisions of Section 2.4.2 above:

(a) The assignee shall be liable for the performance of all obligations of OWNER with respect to transferred property, but shall have no obligations with respect to the portions of the Property, if any, not transferred (the "Retained Property").

(b) The owner of the Retained Property shall be liable for the performance of all obligations of OWNER with respect to Retained Property, but shall have no further obligations with respect to the transferred property.

(c) The assignee's exercise, use and enjoyment of the Property or portion thereof shall be subject to the terms of this Agreement to the same extent as if the assignee were the OWNER.

2.4.4 Subsequent Assignment. Any subsequent sale, transfer or assignment after an initial sale, transfer or assignment shall be made only in accordance with and subject to the terms and conditions of this Section 2.4.

2.4.5 Termination of Agreement With Respect to Individual Lots Upon Sale to Public and Completion of Construction. The provisions of Subsection 2.4.1 shall not apply to the sale or lease (for a period longer than one (1) year) of any parcel which has been finally subdivided and is individually (and not in "bulk") sold or leased to a member of the public or other ultimate user of the parcel. Notwithstanding any other provisions of this Agreement, this Agreement shall terminate with respect to any lot and such lot shall be released and no longer be subject to this Agreement without the execution or recordation of any further document upon satisfaction of both of the following conditions:

(a) The lot has been finally subdivided and individually (and not in "bulk") sold or leased (for a period longer than one (1) year) to a member of the public or other ultimate user; and,

(b) A certificate of occupancy has been issued for a building on the parcel, and the fees set forth under Section 4 of this Agreement have been paid.

2.4.6 Partial Assignment and Assumption. CITY and OWNER agree OWNER may partially assign its obligations and rights under this Agreement, and all amendments hereto, to a purchaser, transferee or assignee of a lot, which has been subdivided subject to provisions of a partial assignment and assumption agreement in a form approved by CITY. Any such complete and executed partial assignment and assumption of this Agreement shall be submitted to CITY for approval pursuant to Section 2.4.1 of this Agreement. Within thirty (30) days following such complete submittal, CITY shall review, and if the above conditions are satisfied, may approve the partial assignment and release and notify the purchasor, transferee or assignee in writing thereof. No such release approved pursuant to this Subsection 2.4.6 shall cause, or otherwise affect, a release of OWNER from the duties and obligations under this Agreement that are retained by OWNER and excluded from the transfer or assignment.

2.5 Amendment or Cancellation of Agreement. This Agreement may be amended or cancelled in whole or in part only in the manner provided for in Government Code Section 65868.1. Any amendment of this Agreement, which amendment has been requested by OWNER, shall be considered by the CITY only upon the payment of the applicable processing charge. This provision shall not limit any remedy of CITY or OWNER as provided by this Agreement. Either party or successor in interest, may propose an amendment to or cancellation, in whole or in part, of this Agreement. Any amendment or cancellation shall be by mutual consent of the parties or their successors in interest except as provided otherwise in this Agreement or in Government Code Section 65865.1. For purposes of this section, the term "successor in interest" shall mean any person having a legal or equitable interest in the whole of the Property, or any portion thereof as to which such person wishes to amend or cancel this Agreement. The procedure for proposing and adopting an amendment to, or cancellation of, in whole or in part, this Agreement shall be the same as the procedure for adopting and entering into this Agreement in the

first instance. Notwithstanding the foregoing sentence, if the CITY initiates the proposed amendment to, or cancellation of, in whole or in part, this Agreement, CITY shall first give notice to the OWNER of its intention to initiate such proceedings at least sixty (60) days in advance of the giving the public notice of intention to consider the amendment or cancellation.

2.6 Minor Modification. Upon the written application of OWNER, minor modifications and changes to the Development Plan including modifications to building design or footprint (not affecting minimum setbacks), parking layout and design, and landscape area design may be approved by the Director of the Planning Department without the need to amend this Development Agreement. Other changes in the Development Plan shall be processed pursuant to the City Zoning Ordinance. It is also contemplated by CITY and OWNER that OWNER may, from time to time, seek amendments to one or more of the Development Approvals. Any such amendments are contemplated by CITY and OWNER as being within the scope of this Agreement as long as they are consistent with the Land Use Regulations and shall, upon approval by CITY, continue to constitute the Development Approvals as referenced herein. The parties agree that any such modifications or amendments shall not constitute an amendment to this Agreement nor require an amendment to this Agreement.

2.7 Termination. This Agreement shall be deemed terminated and of no further effect upon the occurrence of any of the following events:

(a) Expiration of the stated term of this Agreement as set forth in Section 2.3.

(b) Entry of a final judgment setting aside, voiding or annulling the adoption of the ordinance approving this Agreement.

(c) The adoption of a referendum measure overriding or repealing the ordinance approving this Agreement.

(d) Completion of the Project in accordance with the terms of this Agreement including issuance of all required occupancy permits and acceptance by CITY or applicable public agency of all required dedications.

Termination of this Agreement shall not constitute termination of any other land use entitlements approved for the Property. Upon the termination of this Agreement, no party shall have any further right or obligation hereunder except with respect to any obligation to have been performed prior to such termination or with respect to any default in the performance of the provisions of this Agreement which has occurred prior to such termination or with respect to any obligations which are specifically set forth as surviving this Agreement. Upon such termination, any public facilities and service mitigation fees paid pursuant to Section 4.2 of this Agreement by OWNER to CITY on which construction has not yet begun shall be refunded to OWNER by CITY within ten (10) business days.

2.8 Notices.

(a) As used in this Agreement, "notice" includes, but is not limited to, the communication of notice, request, demand, approval, statement, report, acceptance, consent, waiver, appointment or other communication required or permitted hereunder.

(b) All notices shall be in writing and shall be considered given either: (i) when delivered in person, including, without limitation, by courier, to the recipient named below; or (ii) on the date of delivery shown on the return receipt, after deposit in the United States mail in a sealed envelope as either registered or certified mail with return receipt requested, and postage and postal charges prepaid, and addressed to the recipient named below. All notices shall be addressed as follows:

If to CITY:
Scott Ochoa, City Manager
City of Ontario
303 East "B" Street
Ontario, CA 91764

If to OWNER:
Jeff Johnston
Euclid Land Venture 2, LLC
c/o Real Estate Development Associates
4450 MacArthur Blvd., Suite 100
Newport Beach, CA 92660
jjohnston@redallc.com

With a copy to:
Ruben Duran, City Attorney
Best Best & Krieger, LLP
2855 E Guasti Road
Ontario, CA 91761

With a copy to:
Matt Fogt, Esq.
Allen Matkins Leck Gamble Mallory& Natsis, LLP
2010 Main Street, 8th Floor
Irvine, CA 92614

Either party may, by notice given at any time, require subsequent notices to be given to another person or entity, whether a party or an officer or representative of a party, or to a different address, or both. Notices given before actual receipt of notice of change shall not be invalidated by the change.

3. DEVELOPMENT OF THE PROPERTY.

3.1 Rights to Develop. Subject to the terms of this Agreement including the Reservations of Authority in Section 3.4, OWNER shall have a vested right to develop the Property in accordance with, and to the extent of, the Development Plan. The Project shall remain subject to all Subsequent Development Approvals required to complete the Project as contemplated by the Development Plan. Except as otherwise provided in this Agreement, the permitted uses of the Property, the density and intensity of use, the maximum height and size of proposed buildings, and provisions for reservation and dedication of land for public purposes shall be those set forth in the Development Plan.

3.2 Effect of Agreement on Land Use Regulations. Except as otherwise provided under the terms of this Agreement including the Reservations of Authority in Section 3.4,

the rules, regulations and official policies governing permitted uses of the Property, the density and intensity of use of the Property, the maximum height and size of proposed buildings, and the design, improvement and construction standards and specifications applicable to development of the Property shall be the Existing Land Use Regulations. In connection with any Subsequent Development Approval, CITY shall exercise discretion in accordance with the same manner as it exercises its discretion under its police powers, including the Reservations of Authority set forth herein; provided however, that such discretion shall not prevent development of the Property for the uses and to the density or intensity of development set forth in this Agreement.

3.3 Timing of Development. The parties acknowledge that OWNER cannot at this time predict when or the rate at which phases of the Property will be developed. Such decisions depend upon numerous factors which are not within the control of OWNER, such as market orientation and demand, interest rates, absorption, completion and other similar factors. Since the California Supreme Court held in Pardee Construction Co. v. City of Camarillo (1984) 37 Cal. 3d 465, that the failure of the parties therein to provide for the timing of development resulted in a later adopted initiative restricting the timing of development to prevail over such parties' agreement, it is the parties' intent to cure that deficiency by acknowledging and providing that OWNER shall have the right to develop the Property in such order and at such rate and at such times as OWNER deems appropriate within the exercise of its subjective business judgment.

3.3.1 Infrastructure Improvement Exhibit. Attached hereto as Exhibits “E” and "F" are a description and depiction, respectively, of the Improvements needed for the development of the Property. In the event of any discrepancy between Exhibit E and Exhibit F, Exhibit F shall control.

3.4 Reservations of Authority.

3.4.1 Limitations, Reservations and Exceptions. Notwithstanding any other provision of this Agreement, the CITY shall not be prevented from applying new rules, regulations and policies upon the OWNER, nor shall a development agreement prevent the CITY from denying or conditionally approving any subsequent development project application on the basis of such new rules, regulations and policies where the new rules, regulations and policies consist of the following:

(a) Processing fees by CITY to cover costs of processing applications for development approvals or for monitoring compliance with any development approvals;

(b) Procedural regulations relating to hearing bodies, petitions, applications, notices, findings, records and any other matter of procedure;

(c) Regulations, policies and rules governing engineering and construction standards and specifications applicable to public and private improvements, including all uniform codes adopted by the CITY and any local amendments to those codes adopted by the CITY; provided however that, OWNER shall have a vested right to develop the Property in accordance with, and to the extent of, the standards and specifications that

are expressly identified in the Specific Plan and the building codes in effect as of the Effective Date;

(d) Regulations that may conflict with this Agreement and the Development Plan but that are reasonably necessary to protect the occupants of the Project and/or of the immediate community from a condition perilous to their health or safety;

(e) Regulations that do not conflict with those rules, regulations and policies set forth in this Agreement or the Development Plan and which do not impose additional obligations, costs, and expenses on OWNER or the Project;

(f) Regulations that may conflict with this Agreement but to which the OWNER consents.

3.4.2 Subsequent Development Approvals. This Agreement shall not prevent CITY, in acting on Subsequent Development Approvals, from applying Subsequent Land Use Regulations that do not conflict with the Development Plan and/or the Existing Development Approvals, nor shall this Agreement prevent CITY from denying or conditionally approving any Subsequent Development Approval on the basis of the Existing Land Use Regulations or any Subsequent Land Use Regulation not in conflict with the Development Plan and/or the Existing Development Approvals.

3.4.3 Modification or Suspension by State or Federal Law. In the event that State or Federal laws or regulations, enacted after the Effective Date of this Agreement, prevent or preclude compliance with one or more of the provisions of this Agreement, such provisions of this Agreement shall be modified or suspended as may be necessary to comply with such State or Federal laws or regulations, provided, however, that this Agreement shall remain in full force and effect to the extent it is not inconsistent with such laws or regulations and to the extent such laws or regulations do not render such remaining provisions impractical to enforce. In the event OWNER alleges that such State or Federal laws or regulations preclude or prevent compliance with one or more provisions of this Agreement, and the CITY does not agree, the OWNER may, at its sole cost and expense, seek declaratory relief (or other similar non-monetary remedies); provided however, that nothing contained in this Section 3.4.3 shall impose on CITY any monetary liability for contesting such declaratory relief (or other similar non-monetary relief).

3.4.4 Intent. The parties acknowledge and agree that CITY is restricted in its authority to limit its police power by contract and that the foregoing limitations, reservations and exceptions are intended to reserve to CITY all of its police power which cannot be so limited. This Agreement shall be construed, contrary to its stated terms if necessary, to reserve to CITY all such power and authority which cannot be restricted by contract.

3.5 Public Works; Utilities. If OWNER is required by this Agreement or a condition of Project approval to construct any public works facilities which will be dedicated to CITY or any other public agency upon completion, and if required by applicable laws to do so,

OWNER shall perform such work in the same manner and subject to the same standards as would be applicable to CITY or such other public agency should it have undertaken such construction. As a condition of development approval, OWNER shall connect the Project to all utilities necessary to provide adequate water, recycled water, sewer, gas, electric, and other utility services necessary for the Project, as further described and depicted in the Infrastructure Improvements Exhibit. As a further condition of development approval, OWNER shall to the extent possible contract with the CITY for CITY-owned or operated utilities for this purpose, for such price and on such terms as may be available to similarly situated customers in the CITY. As a further condition of development approval, to the extent OWNER does not own the Property in fee simple, OWNER will provide to CITY the written consent from the current fee owner of the Property agreeing to the terms of this Agreement and the recordation thereof, pursuant to Section 2.2.

3.5.1 OWNER agrees that development of the Project shall require the construction of storm drain Improvements from the Property described in Exhibit E and depicted in Exhibit F. OWNER shall be responsible for payment of a fee in-lieu (the "Euclid Avenue Storm Drain In-Lieu Fee) of actual construction of the ultimate Euclid Avenue storm drain Improvements, south of Merrill Avenue, depicted in Exhibit F. OWNER shall pay the CITY, prior to the request for occupancy of any building on the Property, Two Million Eight Hundred Eighty Thousand Four Hundred Fifty Dollars ($2,880,450). Upon OWNER'S complete payment of the Euclid Avenue Storm Drain In-Lieu Fee, the CITY shall issue a Certificate of DIF Credit in the Regional Storm Drain category equal to the amount paid to the CITY. Such Regional Storm Drain DIF Certificate shall be issued by CITY within thirty (30) business days of the receipt of such required payment. OWNER and CITY agree that CITY may issue grading, building and other required permits for OWNER to initiate construction of structures for the Property according to plans approved by CITY, and OWNER agrees that OWNER shall not request and CITY shall not issue a final occupancy permit for any buildings prior to payment of the Euclid Avenue Storm Drain In-Lieu Fee and construction of the storm drain Improvements described in Exhibit E and depicted in Exhibit F. CITY and OWNER mutually acknowledge and agree, that upon OWNER's complete payment of the Euclid Avenue Storm Drain In-Lieu Fee, such obligation shall be deemed satisfied and CITY shall not hold up a request for final occupancy permit for any buildings on the Property, based on the actual construction and completion of the ultimate Euclid Avenue storm drain Improvements. CITY agrees that OWNER may request that CITY issue temporary certificates of occupancy on a building-by-building basis prior to completion of the storm drain improvements.

3.5.2 OWNER agrees that development of the Project shall require the construction of street Improvements as described in Exhibit E and depicted in Exhibit F. OWNER and CITY agree that CITY may issue grading, building and other required permits for OWNER to initiate construction of structures for the Property according to plans approved by CITY, and OWNER agrees that OWNER shall not request, and CITY shall not issue a final occupancy permit for any buildings on the Property prior to Substantial Completion of the street Improvements as described in Exhibit E and depicted in Exhibit F. For purposes of the foregoing, street Improvements shall be deemed

"Substantially Complete" even if the final lift of pavement has not been completed (i.e., OWNER may install the final lift after completion of all other construction). CITY agrees that OWNER may request that CITY issue temporary certificates of occupancy on a building-by-building basis prior to completion and subject to final acceptance by CITY of the street Improvements. OWNER agrees that the street improvements shall be completed and subject to final acceptance by CITY prior to the release of any security for the construction of the street improvements. OWNER and CITY agree that a portion of the street Improvements described in Exhibit E and depicted in Exhibit F may be constructed by others, or pursuant to a cooperative agreement with others. If such street Improvements are constructed by others, or in cooperation with others, and are completed and accepted by CITY prior to OWNER's request to CITY of the required grading, building or other required permits for OWNER to initiate construction of structures for the Property, then OWNER shall not be required to construct those street Improvements constructed and completed by others and accepted by CITY.

3.5.3 OWNER agrees that development of the Property shall require the construction of water utility Improvements as described in Exhibit E and depicted in Exhibit F consisting generally of the construction of the potable water Improvements to serve the Property as described in Exhibit E and depicted in Exhibit F. OWNER and CITY agree that CITY may issue grading, building and other required permits for OWNER to initiate construction of structures for the Property according to plans approved by CITY upon completion of sufficient water improvements to serve the Property from at least one point of connection. OWNER and CITY agree that OWNER may, in-lieu of utilizing recycled water during grading and construction, utilize water from existing agricultural wells on the Property subject to the terms of a separate Well Use Agreement between the CITY and OWNER. OWNER agrees that OWNER shall not request and CITY shall not issue a final occupancy permit for any buildings on the Property until the completion of the potable water improvements described in Exhibit E and depicted in Exhibit F. City agrees that OWNER may request that CITY issue temporary certificates of occupancy on a building-by-building basis prior to completion of the water improvements if there is available permanent water service from a minimum of two (2) points of connection and sufficient water is available for fire protection purposes for any buildings while under construction. OWNER and CITY agree that a portion of the water Improvements described in Exhibit E and depicted in Exhibit F may be constructed by others, or pursuant to a cooperative agreement with others. If such water Improvements are constructed by others, or in cooperation with others, and are completed and accepted by CITY prior to OWNER's request to CITY of the required grading, building or other required permits for OWNER to initiate construction of structures for the Property, then OWNER shall not be required to construct those water Improvements constructed and completed by others and accepted by CITY.

3.5.4 OWNER agrees that development of the Property shall require the construction of sewer Improvements as described in Exhibit E and depicted in Exhibit F. OWNER and CITY agree that CITY may issue grading, building and other required permits for OWNER to initiate construction of structures for the Property according to plans approved by CITY, and OWNER agrees that OWNER shall not request and CITY shall not issue a final occupancy permit for any buildings prior to completion of the sewer

improvements described in Exhibit E and depicted in Exhibit F. CITY agrees that OWNER may request that CITY issue temporary certificates of occupancy on a building-by-building basis prior to the completion of the sewer improvements described in Exhibit E and depicted in Exhibit F. OWNER and CITY agree that a portion of the sewer Improvements described in Exhibit E and depicted in Exhibit F may be constructed by others, or pursuant to a cooperative agreement with others. If such sewer Improvements are constructed by others, or in cooperation with others, and are completed and accepted by CITY prior to OWNER's request to CITY of the required grading, building or other required permits for OWNER to initiate construction of structures for the Property, then OWNER shall not be required to construct those sewer Improvements constructed and completed by others and accepted by CITY.

3.5.5 OWNER agrees that development of the Property shall require the construction of recycled water utility improvements to serve the Property, consisting generally of the construction of recycled water utility Improvements as described in Exhibit E and depicted in Exhibit F. OWNER and CITY agree that the CITY may issue grading, building and other required permits for OWNER to initiate construction of structures for the Property according to plans approved by CITY upon completion of sufficient water and recycled water improvements to serve the Property from at least one point of connection and OWNER agrees that OWNER shall not request and CITY shall not issue any occupancy permit for any buildings on the Property until the completion of the water improvements described in Exhibit E and depicted in Exhibit F. CITY agrees that OWNER may request a temporary occupancy permit for a building and, if OWNER requests that a temporary certificate of occupancy be issued for a building prior to the completion of the extension of permanent master planned recycled water utility Improvements to serve the Property that CITY may consider such request and may issue temporary certificates of occupancy on a building-by-building basis prior to completion of recycled water improvements if there is available permanent recycled water service connection and sufficient recycled water is available. OWNER and CITY agree that all, or a portion of, the permanent master planned recycled water utility Improvements described in Exhibit E and depicted in Exhibit F may be constructed by others. If such recycled water utility Improvements are constructed by others and completed and accepted by CITY prior to OWNER'S request to CITY of the required grading, building, or other required permits for OWNER to initiate construction of structures for the Property, then OWNER shall not be required to construct those permanent master planned recycled water utility Improvements.

3.5.6 OWNER agrees that development of the Property shall require the construction of fiber optic communications infrastructure, at OWNER's sole cost and expense, as described in the attached Exhibit E and depicted in Exhibit F consisting generally of the construction of fiber optic communications infrastructure to serve the Property. OWNER and CITY agree that CITY may issue grading, building and other required permits for OWNER to initiate construction of structures for the Property according to plans approved by CITY and OWNER agrees that OWNER shall not request and CITY shall not issue a final occupancy permit for any buildings prior to completion of the fiber optic communications infrastructure, as described in Exhibit E and depicted in Exhibit F. CITY agrees that OWNER may request that CITY issue temporary certificates

of occupancy on a building-by-building basis prior to the completion of the fiber optic communications infrastructure, as described in Exhibit E and depicted in Exhibit F.

3.6 Acquisition of Offsite Provision of Real Property Interests. In any instance where OWNER is required by any Development Approval or Land Use Regulation to construct any public improvement on land not owned by OWNER ("Offsite Improvements"), the CITY and OWNER shall cooperate in acquiring the necessary legal interest ("Offsite Property") as described below in Section 3.7. This Section 3.6 is not intended by the parties to impose upon the OWNER an enforceable duty to acquire land or construct any public improvements on land not owned by OWNER, except to the extent that the OWNER elects to proceed with the development of the Project, and then only in accordance with valid conditions imposed by the CITY upon the development of the Project under the Subdivision Map Act or other legal authority.

3.7 Real Property Interests.

3.7.1 CITY Acquisition of Offsite Property. In the event OWNER is required to construct any public improvements on land not owned by OWNER, Sections 3.7.1 and 3.7.2 shall control the acquisition of the Offsite Property. If the OWNER is unable to acquire such Offsite Property, and following the written request from the OWNER to CITY, CITY agrees to use reasonable and diligent good faith efforts to acquire the Offsite Property from the owner or owners of record by negotiation to the extent permitted by law and consistent with this Agreement. If CITY is unable to acquire the Offsite Property by negotiation within thirty (30) days after OWNER'S written request, CITY may, initiate proceedings utilizing its power of eminent domain to acquire the Offsite Property at a public hearing noticed and conducted in accordance with California Code of Civil Procedure Section 1245.235 for the purpose of considering the adoption of a resolution of necessity concerning the Offsite Property, subject to the conditions set forth in this Section 3.7.1 The CITY and OWNER acknowledge that the timelines set forth in this Section 3.7.1 represent the maximum time periods which CITY and OWNER reasonably believe will be necessary to complete the acquisition of any Offsite Property. CITY agrees to use reasonable good faith efforts to complete the actions described within lesser time periods, to the extent that it is reasonably able to do so, consistent with the legal constraints imposed upon CITY.

3.7.2 Owner's Option to Terminate Proceedings. CITY shall provide written notice to OWNER no later than fifteen (15) days prior to making an offer to the owner of the Offsite Property. At any time within that fifteen (15) day period, OWNER may, at its option, notify CITY that it wants CITY to cease all acquisition proceedings with respect to that Offsite Property, whereupon CITY shall cease such proceedings. CITY may provide written notice to OWNER no later than fifteen (15) days prior to the date of the hearing on CITY's intent to consider the adoption of a resolution of necessity as to any Offsite Property. At any time within that fifteen (15) day period, OWNER may, at its option, notify CITY that it wants CITY to cease condemnation proceedings, whereupon CITY shall cease such proceedings. If OWNER does not notify CITY to cease condemnation proceedings within said fifteen (15) day period, then the CITY may proceed to consider and act upon the Offsite Property resolution of necessity. If CITY adopts such resolution

of necessity, then CITY may institute condemnation proceedings and file a complaint in condemnation and seek an order of immediate possession with respect to the Offsite Property.

3.8 Regulation by Other Public Agencies. It is acknowledged by the parties that other public agencies not within the control of CITY possess authority to regulate aspects of the development of the Property separately from or jointly with CITY and this Agreement does not limit the authority of such other public agencies. CITY agrees to cooperate fully, at no cost to CITY, with OWNER in obtaining any required permits or compliance with the regulations of other public agencies provided such cooperation is not in conflict with any laws, regulations or policies of the CITY.

3.9 Tentative Parcel Maps. With respect to applications by OWNER for tentative parcel maps for portions of the Property, CITY agrees that OWNER may file and process tentative maps in accordance with Chapter 4.5 (commencing with Section 66498.1) of Division 2 of Title 7 of the California Government Code and the applicable provisions of CITY's subdivision ordinance, as the same may be amended from time to time. In accordance with the provisions of Section 66452.6 of the Government Code, each tentative subdivision map or tentative parcel map, heretofore or hereafter approved in connection with development of the Property, shall be deemed to have been granted an extension of time to and until the expiration, cancellation, or termination of this Agreement.

3.10 Specific Plan Charge. Pursuant to Government Code section 65456, the City Council may consider adopting a specific plan charge upon persons seeking CITY approvals that are required to be consistent with the Specific Plan. Any such charges shall, in the aggregate, defray, but not exceed, the estimated cost of preparation, adoption, and administration of the Specific Plan, including costs incurred pursuant to the California Environmental Quality Act (Pub. Resources Code, §§ 21000 et seq.). As nearly as can be estimated, the charges shall be a prorated amount in accordance with the applicant's relative benefit derived from the Specific Plan. If such charges are adopted, the CITY shall use such charges to reimburse the OWNER who originally paid the cost of preparing the Specific Plan, including costs incurred pursuant to the California Environmental Quality Act (Pub. Resources Code, §§ 21000 et seq.) to the extent the OWNER paid more than its relative benefit from the Specific Plan. Such charges, if adopted, shall be imposed on persons seeking CITY approvals that are required to be consistent with the Specific Plan, to the extent such person(s) has/have not entered into a reimbursement agreement with, and satisfactory to, the person(s) originally responsible for the cost of preparing the Specific Plan, including costs incurred pursuant to CEQA.

4. PUBLIC BENEFITS.

4.1 Intent. The parties acknowledge and agree that development of the Property will result in substantial public needs that will not be fully met by the Development Plan and further acknowledge and agree that this Agreement confers substantial private benefits on OWNER that should be balanced by commensurate public benefits. Accordingly, the parties intend to provide consideration to the public to balance the private benefits

conferred on OWNER by providing more fully for the satisfaction of the public needs resulting from the Project.

4.2 Development Impact Fees.

4.2.1 Amount of Development Impact Fee. Development Impact Fees (DIF) shall be paid by OWNER. The Development Impact Fee amounts to be paid by OWNER shall be the amounts that are in effect at the time such amounts are due. Nothing contained in this Agreement shall affect the ability of the CITY to impose new Development Impact Fees or amend the amounts of existing Development Impact Fees. Additionally, nothing contained in this Agreement shall affect the ability of other public agencies that are not controlled by CITY to impose and amend, from time to time, Development Impact Fees established or imposed by such other public agencies, even though such Development Impact Fees may be collected by CITY.

4.2.2 Time of Payment. The Development Impact Fees required pursuant to Section 4.2.1 shall be paid to CITY prior to the issuance of building permit for each applicable building (subject to the application/use of available fee deferrals or credits), except for the Species, Habitat Conservation, and Open Space Mitigation Development Impact Fee, which shall be paid by OWNER to CITY prior to the issuance of a grading permit.

4.3 Responsibility for Construction of Public Improvements.

4.3.1 Timely Construction of Public Infrastructure. The phasing of the area wide infrastructure construction within the vicinity of the Project shall be as approved by the CITY. OWNER shall be responsible for the timely construction and completion of all public infrastructure required for the Project as described and depicted in the Infrastructure Improvements Exhibit and any and all parcel map conditions. Unless otherwise specified in the Parcel Map conditions, and subject to the provisions of Section 3.5 and 3.6, all other required Improvements for the parcel map, shall be substantially completed and operational prior to, and as a condition precedent to, OWNER requesting and CITY's granting of a final occupancy permit for any buildings to be constructed on the Property within the applicable parcel map. All Infrastructure and Improvements shall be completed as required by the Subdivision Agreement/Parcel Map conditions for Parcel Map No. 20517.

4.3.3 Construction of Public Infrastructure by Third Parties. CITY and OWNER acknowledge that a portion of the Improvements described in Exhibit E and depicted in Exhibit F are necessary for the development of surrounding properties within the Ontario Ranch and the other property owners are also obligated to construct the Improvements or portions thereof. As such, CITY agrees that OWNER's obligation to construct the Improvements may be satisfied by third party owners pursuant to separate written agreements between OWNER and said third party undertaking the construction of the Improvements. Nothing in this Agreement shall be construed to prohibit the coordination of the construction of the Improvements between private parties, including the allocation of costs for the construction of the Improvements. Notwithstanding anything to the

contrary herein, any applicable DIF Credits may be transferred and assigned from one (1) party to another with respect to the construction of the Improvements and such transfer or assignment shall not require the conveyance of any real property.

4.3.4 Availability and Use of Recycled Water. OWNER agrees that recycled water shall be available and utilized by OWNER for all construction-related water uses including prior to, and during, any grading of the Property. OWNER and CITY agree that OWNER may, in-lieu of utilizing recycled water during grading and construction, utilize water from existing agricultural wells on the Property subject to the terms of a separate Well Use Agreement between the CITY and OWNER.

4.3.5 Construction of DIF Program Infrastructure. To the extent OWNER is required to construct and completes construction of public improvements that are included in CITY's Development Impact Fee Program, CITY agrees that CITY shall issue DIF Credit in accordance with the provisions of a separate Fee Credit Agreement between CITY and OWNER. Limitations on the use of DIF Credit issued to OWNER to offset OWNER's DIF payment obligations shall also be subject to the provisions of a separate Fee Credit Agreement. OWNER may be eligible to receive DIF Credit from OWNER's construction of DIF Program Infrastructure. Any such DIF Credit shall be subject to a Fee Credit Agreement between CITY and OWNER. CITY and OWNER agree that the Fee Credit Agreement between CITY and OWNER shall comply with CITY's adopted policies applicable to such agreements.

4.4 Public Services Funding Fee.

4.4.1 Requirement for Payment of Public Services Funding Fee. In order to ensure that the adequate provision of public services, including without limitation, police, fire and other public safety services, are available to each Project in a timely manner, OWNER shall pay to CITY a "Public Services Funding Fee." The Public Services Funding Fee shall apply to residential and non-residential uses as set forth below.

4.4.2 Public Services Funding Fee Amount. OWNER shall pay a Public Services Funding fee in a single installment payment in the amount of Seventy-Five Cents ($.75) per square foot of each non-residential building. The single installment for non-residential uses shall be due and payable on a building-by-building basis prior to the issuance of the building permit for a non-residential building. The amount of the Single Installment for non-residential uses shall automatically increase by percentage increase (but no decrease) in the Consumer Price Index (Riverside – San Bernardino – Ontario, CA), (December 2017=100) over the preceding year on January 1st of each year, beginning on January 1, 2024. OWNER may exercise the option to pay any single installment amounts for the remainder of the non-residential square footage within the Project on or before December 31st, before the Single Installment amount is automatically increased.

4.5 Water Availability.

4.5.1 Water Availability. The Property requires the completion of the Phase 2 Water Improvements (Phase 2A and 2B) for permanent water system capacity and supply. Until the Phase 2 Water Improvements are fully constructed and completed, OWNER acknowledges that the Project shall have sufficient water capacity and supply on an interim basis made available through the construction of the Potable Water Improvements (as described in Exhibit E), the Phase 2A Water Improvements, and the Interim Chino Avenue Loop depicted in Exhibit F. OWNER acknowledges and agrees that the CITY shall not issue final certificates of occupancy for the Project until the completion of the Potable Water Improvements (as described in Exhibit E), the Phase 2A Water Improvements and the Interim Chino Avenue Loop, as depicted in Exhibit F. OWNER further acknowledges and agrees the Property requires the Phase 2 Water Improvements as depicted in Exhibit F.

4.5.2 Phase 2 Water Construction Fee. Prior to CITY's issuance of a grading permit for any parcel of the Property (each, a "Grading Permit"), OWNER shall pay to CITY the applicable Phase 2 Water Construction Fee. The Phase 2 Water Construction Fee shall be calculated based on the following formula: (a) the regional water development impact fee, based on the square footage of developable property and the approved land use category for each Phase of the Project (the "Base Regional Water DIF"), PLUS (b) OWNER's pro rata share of the difference between the total projected cost of construction of the Phase 2 Water Improvements (the "Pro Rata Share") and the Base Regional Water DIF. To determine the Pro Rata Share, which may fluctuate over time, CITY shall, at the time OWNER applies for a Grading Permit, calculate the total projected cost of construction of the Phase 2 Water Improvements and subtract from that amount (y) all Phase 2 Water Construction Fees previously collected and (z) the aggregate Base Regional Water DIF to be paid by OWNER and all developers then at that time obligated to pay a Base Regional Water DIF specifically for use of the Phase 2 Water Improvements (together, the "Phase 2 Water Developers"). If the difference is zero or a number less than zero, then there is no Pro Rata Share and the Phase 2 Water Construction Fee shall equal the sum of all Base Regional Water DIF to be paid by all Phase 2 Water Developers. If the difference results in a positive number, the funding gap (the "Funding Gap") shall be divided by the total acreage of land to be developed by the Phase 2 Water Developers to obtain a Funding Gap "per acre" amount (the "Funding Gap Per Acre Amount"). Each Phase 2 Water Developer's respective total acreage to be developed shall then be multiplied by the Funding Gap Per Acre Amount to obtain each Phase 2 Water Developer's Pro Rata Share, which will then be added to each Phase 2 Water Developer's Base Regional Water DIF to obtain the Phase 2 Water Construction Fee due and payable at the time of issuance of the applicable Grading Permit.

4.5.3 DIF Credit for Phase 2 Water Construction Fees. Within thirty (30) days of OWNER's payment of each Phase 2 Water Construction Fee, CITY shall issue a certificate of DIF Credit which may be used to offset OWNER's DIF obligations in the Regional Water DIF Category. The form of the Certificate of DIF Credit shall be as described in Exhibit G, attached hereto and incorporated herein. OWNER acknowledges that any Regional Water DIF Credit issued to OWNER shall not be used to satisfy Phase 2 Water Construction Fees and may only be used to offset OWNER's DIF obligations in the Regional Water DIF Category.

4.5.4 Additional Contributions for Phase 2 Water Improvements. OWNER acknowledges and agrees that, as of the Effective Date of this Agreement, the CITY does not have sufficient funding to construct and complete the Phase 2 Water Improvements. OWNER agrees to provide the CITY with additional contributions for the Phase 2 Water Improvements prior to the issuance of a Grading Permit for any Phase within the Project, pursuant to the Pro Rata Share calculation as set forth in Section 4.5.2 above. OWNER acknowledges and agrees that the CITY has the right to conduct subsequent reviews of the available funding for the construction of, or continuation of the construction of, the Phase 2 Water Improvements. If at any time outside of OWNER's submission of a request for a Grading Permit the CITY determines that there is not sufficient funding for the construction of, or continuation of the construction of, the Phase 2 Water Improvements necessary to support current and anticipated future development within the Ontario Ranch area served by the Phase 2 Water Improvements, OWNER agrees to pay such subsequent additional contribution payment necessary from the OWNER (on a pro rata basis with other Phase 2 Water Developers then existing at the time) to the CITY to initiate construction of, or continue construction of, the Phase 2 Water Improvements. The CITY shall determine OWNER's additional contribution amount (above and beyond OWNER's Pro Rata Share) and such amount shall be due and payable to the CITY within thirty (30) days of written notice from the CITY to OWNER.

4.5.5 Future Reimbursement of Pro Rata Share of Phase 2 Water Construction Fees. OWNER agrees that the CITY will be responsible for the construction and completion of the Phase 2 Water Improvements, as depicted in Exhibit F. Subject to the successful completion of the Phase 2 Water Improvements, CITY and OWNER shall meet periodically and/or as needed from the date of completion of the Phase 2 Water Improvements, to jointly develop a plan and mutually enter into an agreement for the reimbursement of OWNER's Pro Rata Share of Phase 2 Water Construction Fees that may be reimbursed from future development in the 925 Zone as depicted in the City's Domestic Water Master Plan, following any reallocation of each Phase 2 Water Developer's Pro Rata Share, CITY's collection of additional Regional Water DIF in connection with construction of the Phase 2 Water Improvements, and after the completion of the Phase 2 Water Improvements. Such agreement shall be approved at the sole discretion of the Ontario City Council.

4.6 Compliance with Public Benefits Requirements.

4.6.1 Failure to Provide Public Benefits. In the event OWNER fails or refuses to comply with any condition referenced in Section 4.1 through 4.5, or challenges (whether administratively or through legal proceedings) the imposition of such conditions, OWNER shall be deemed in default of this Agreement, thereby entitling CITY to any and all remedies available to it, including, without limitation, the right of CITY to withhold OWNER's Project-related building permits, certificates of occupancy, or discretionary approvals, without liability. Nothing herein shall waive OWNER's right to assert a default (or failure to perform) by CITY has excused OWNER's performance under this Agreement.

5. FINANCING OF PUBLIC IMPROVEMENTS.

5.1 Financing Mechanism(s). OWNER agrees that, prior to the recordation of any Parcel Map, the property subject to such Parcel Map shall be included in a CFD to finance CITY services through annual special taxes that will initially be Twenty-Seven Cents ($.27) per square foot for non-residential buildings. These amounts shall be subject to an automatic increase at a rate not to exceed four (4%) percent per year. Depending on the fiscal year that the CFD is formed and the CFD tax is levied, the annual special taxes may be higher. CITY shall be the sole and exclusive lead agency in the formation of any CFD, assessment district or other public financing mechanism within the Property; provided however, that the proceeds of any such CFD, assessment district, or financing mechanism may be used, subject to restrictions that may be imposed by applicable law, for the purposes of acquiring, constructing or maintaining public facilities to be owned or operated by other public agencies, including, without limitation those facilities owned or operated by a school district. In addition to the rights of the CITY pursuant to section 5.1 hereof, CITY shall have the right, but not the obligation, to condition the formation of any CFD, assessment district or other public financing mechanism within the Property on the OWNER mitigating all Project-related impacts to the applicable school district(s) as required by such school district(s). Written evidence by such school district(s) may be required by the CITY as the condition to the formation of any CFD, assessment district or other public financing mechanism within the Property, or any steps preliminary thereto, including, without limitation, the adoption of any resolution of intention to form such CFD, assessment district or other public financing mechanism within the Property. It is not the intent of the parties hereto, by this provision, to prohibit or otherwise limit CITY's ability to take any and all necessary steps requisite to the formation of the CFD to finance CITY services through annual special taxes as set forth in this Section 5.1. Formation of any CFD, assessment district or other public financing mechanism within the Property, shall be subject to CITY's ability to make all findings required by applicable law and complying with all applicable legal procedures and requirements including, without limitation, CITY's public financing district policies as such policies may be amended from time to time. Notwithstanding the foregoing, it is acknowledged and agreed by the parties that nothing contained in this Agreement shall be construed as requiring CITY or the City Council to form any such district.

6. [OMITTED]

7. REVIEW FOR COMPLIANCE.

7.1 Periodic and Special Reviews.

7.1.1 Time for and Initiation of Periodic Review. The CITY shall review this Agreement every twelve (12) months from the Effective Date in order to ascertain the good faith compliance by the OWNER with the terms of this Agreement. The OWNER shall submit an Annual Monitoring Report to CITY, in a form acceptable to the City Manager, along with any applicable processing charge within ten (10) days after each anniversary date of the Effective Date of this Agreement. Within fifteen (15) days after the receipt of the Annual Monitoring Report, CITY shall review the Annual Monitoring

Report. Prior to the expiration of the fifteen (15) day review period, CITY shall either issue a notice of continuing compliance or a notice of non-compliance and a notice of CITY's intent to conduct a Special Review pursuant to Sections 7.1.2 through 7.1.6. Issuance of a notice of continuing compliance may be issued by the City Manager or his designee.

7.1.2 Initiation of Special Review. A special review may be called either by agreement between the parties or by initiation in one or more of the following ways:

(a) Recommendation of the Planning staff;

(b) Affirmative vote of at least four (4) members of the Planning Commission; or

(c) Affirmative vote of at least three (3) members of the City Council.

7.1.3 Notice of Special Review. The City Manager shall begin the special review proceeding by giving notice that the CITY intends to undertake a special review of this Agreement to the OWNER. Such notice shall be given at least ten (10) days in advance of the time at which the matter will be considered by the Planning Commission.

7.1.4 Public Hearing. The Planning Commission shall conduct a hearing at which the OWNER must demonstrate good faith compliance with the terms of this Agreement. The burden of proof on this issue is upon the OWNER.

7.1.5 Findings Upon Public Hearing. The Planning Commission shall determine upon the basis of substantial evidence whether or not the OWNER has, for the period under review, complied in good faith with the terms and conditions of this Agreement.

7.1.6 Procedure Upon Findings.

(a) If the Planning Commission finds and determines on the basis of substantial evidence that the OWNER has complied in good faith with the terms and conditions of this Agreement during the period under review, the review for that period is concluded.

(b) If the Planning Commission finds and determines on the basis of substantial evidence that the OWNER has not complied in good faith with the terms and conditions of this Agreement during the period under review, the Planning Commission may recommend to the City Council to modify or terminate this Agreement.

(c) The OWNER may appeal a determination pursuant to paragraph (b) to the City Council in accordance with the CITY's rule for consideration of appeals in zoning matters generally.

7.2 Proceedings Upon Modification or Termination. If, upon a finding under Section 7.1.6(b), the CITY determines to proceed with modification or termination of this Agreement, the CITY shall give notice to the property OWNER of its intention so to do. The notice shall contain:

(a) The time and place of the hearing;

(b) A statement as to whether or not the CITY proposes to terminate or to modify this Agreement; and

(c) Other information that the CITY considers necessary to inform the OWNER of the nature of the proceeding.

7.3 Hearing on Modification or Termination. At the time and place set for the hearing on modification or termination, the OWNER shall be given an opportunity to be heard. The OWNER shall be required to demonstrate good faith compliance with the terms and conditions of this Agreement. The burden of proof on this issue shall be on the OWNER. If the City Council finds, based upon substantial evidence in the administrative record, that the OWNER has not complied in good faith with the terms and conditions of the agreement, the City Council may terminate this Agreement or modify this Agreement and impose those conditions to the action it takes as it considers necessary to protect the interests of the CITY. The decision of the City Council shall be final, subject only to judicial review pursuant to Section 1094.5 of the Code of Civil Procedure.

7.4 Certificate of Agreement Compliance. If, at the conclusion of a Periodic or Special Review, OWNER is found to be in compliance with this Agreement, CITY shall, upon written request by OWNER, issue a Certificate of Agreement Compliance ("Certificate") to OWNER stating that after the most recent Periodic or Special Review and based upon the information known or made known to the Planning Director and City Council that (1) this Agreement remains in effect and (2) OWNER is not in default. The Certificate shall be in recordable form, shall contain information necessary to communicate constructive record notice of the finding of compliance, shall state whether the Certificate is issued after a Periodic or Special Review and shall state the anticipated date of commencement of the next Periodic Review. OWNER may record the Certificate with the County Recorder. Whether or not the Certificate is relied upon by assignees or other transferees or OWNER, CITY shall not be bound by a Certificate if a default existed at the time of the Periodic or Special Review, but was concealed from or otherwise not known to the Planning Director or City Council.

8. [OMITTED]

9. DEFAULT AND REMEDIES.

9.1 Remedies in General. It is acknowledged by the parties that CITY would not have entered into this Agreement if it were to be liable in damages under this Agreement, or with respect to this Agreement or the application thereof. In general, each of the parties hereto may pursue any remedy at law or equity available for the breach of any provision of this Agreement, except that (i) CITY shall not be liable in damages to OWNER, or to any successor in interest of OWNER, or to any other person, and OWNER covenants not to sue for damages or claim any damages and (ii) OWNER shall not be liable in damages to CITY, or to any other person, and CITY covenants not to sue for damages or claim any damages:

(a) For any breach of this Agreement or for any cause of action which arises out of this Agreement; or

(b) For the taking, impairment or restriction of any right or interest conveyed or provided under or pursuant to this Agreement; or

(c) Arising out of or connected with any dispute, controversy or issue regarding the application or interpretation or effect of the provisions of this Agreement.

9.2 Specific Performance. The parties acknowledge that money damages and remedies at law generally are inadequate and specific performance and other non-monetary relief are particularly appropriate remedies for the enforcement of this Agreement and should be available to all parties for the following reasons:

(a) Money damages are unavailable against CITY and OWNER as provided in Section 9.1 above.

(b) Due to the size, nature and scope of the Project, it may not be practical or possible to restore the Property to its natural condition once implementation of this Agreement has begun. After such implementation, OWNER may be foreclosed from other choices it may have had to utilize the Property or portions thereof. OWNER has invested significant time and resources and performed extensive planning and processing of the Project in agreeing to the terms of this Agreement and will be investing even more significant time and resources in implementing the Project in reliance upon the terms of this Agreement, and it is not possible to determine the sum of money which would adequately compensate OWNER for such efforts.

9.3 Release. Except for non-damage remedies, including the remedies of judicial review and of specific performance as provided for in Sections 7.3 and 9.2, respectively,, OWNER, for itself, its successors and assignees, hereby releases the CITY, its officers, agents and employees from any and all claims, demands, actions, or suits of any kind or nature arising out of any liability, known or unknown, present or future, including, but not limited to, any claim or liability, based or asserted, pursuant to Article I, Section 19 of the California Constitution, the Fifth Amendment of the United States Constitution, or any other law or ordinance which seeks to impose any other liability or damage, whatsoever, upon the CITY because it entered into this Agreement or because of the terms of this Agreement.

9.4 Termination or Modification of Agreement for Default of OWNER. Subject to the provisions contained in Sections 7.2 and 7.3 herein, CITY may terminate or modify this Agreement for any failure of OWNER to perform any material duty or obligation of OWNER under this Agreement, or to comply in good faith with the terms of this Agreement (hereinafter referred to as "default"); provided, however, CITY may terminate or modify this Agreement pursuant to this Section only after providing written notice to OWNER of default setting forth the nature of the default and the actions, if any, required by OWNER to cure such default and, where the default can be cured, OWNER has failed to take such

actions and cure such default within 60 days after the effective date of such notice or, in the event that such default cannot be cured within such 60 day period but can be cured within a longer time, has failed to commence the actions necessary to cure such default within such 60 day period and to diligently proceed to complete such actions and cure such default.

9.5 Termination of Agreement for Default of CITY. OWNER may terminate this Agreement only in the event of a default by CITY in the performance of a material term of this Agreement and only after providing written notice to CITY of default setting forth the nature of the default and the actions, if any, required by CITY to cure such default and, where the default can be cured, CITY has failed to take such actions and cure such default within 60 days after the effective date of such notice or, in the event that such default cannot be cured within such 60 day period but can be cured within a longer time, has failed to commence the actions necessary to cure such default within such 60 day period and to diligently proceed to complete such actions and cure such default.

10. THIRD PARTY LITIGATION.

10.1 General Plan Litigation. CITY has determined that this Agreement is consistent with the General Plan, as such General Plan exists as of the Effective Date ("General Plan"), and that the General Plan meets all requirements of law. OWNER has reviewed the General Plan and concurs with CITY's determination. CITY shall have no liability in damages under this Agreement for any failure of CITY to perform under this Agreement or the inability of OWNER to develop the Property as contemplated by the Development Plan or this Agreement as the result of a judicial determination that on the Effective Date, or at any time thereafter, the General Plan, or portions thereof, are invalid or inadequate or not in compliance with law.

10.2 Third Party Litigation Concerning Agreement. OWNER shall defend, at its expense, including attorneys' fees, indemnify, and hold harmless CITY, its agents, officers and employees from any claim, action or proceeding against CITY, its agents, officers, or employees to attack, set aside, void, or annul the approval of this Agreement or the approval of any permit granted pursuant to this Agreement. CITY shall promptly notify OWNER of any such claim, action or proceeding, and CITY shall cooperate in the defense. If CITY fails to promptly notify OWNER of any such claim, action or proceeding, or if CITY fails to cooperate in the defense, OWNER shall not thereafter be responsible to defend, indemnify, or hold harmless CITY. CITY may in its discretion participate in the defense of any such claim, action or proceeding.

10.3 Indemnity. In addition to the provisions of Section 10.2 above, OWNER shall indemnify and hold CITY, its officers, agents, employees and independent contractors free and harmless from any liability whatsoever, based or asserted upon any act or omission of OWNER, its officers, agents, employees, subcontractors and independent contractors, for property damage, bodily injury, or death (OWNER's employees included) or any other element of damage of any kind or nature, to the extent relating to or in any way connected with or arising from the activities contemplated hereunder, including, but not limited to, the study, design, engineering, construction, completion, failure and

conveyance of the public improvements, save and except claims for damages arising through the sole active negligence or sole willful misconduct of CITY. OWNER shall defend, at its expense, including attorneys' fees, CITY, its officers, agents, employees and independent contractors in any legal action based upon such alleged acts or omissions. CITY may in its discretion participate in the defense of any such legal action. OWNER's indemnity obligation shall terminate following CITY's legal acceptance of (i.e. taking of title to) the Improvements.

10.4 Environment Assurances. OWNER shall indemnify and hold CITY, its officers, agents, and employees free and harmless from any liability, to the extent based or asserted, upon any act or omission of OWNER, its officers, agents, employees, subcontractors, predecessors in interest, successors, assigns and independent contractors for any violation of any federal, state or local law, ordinance or regulation relating to industrial hygiene or to environmental conditions on, under or about the Property during OWNER'S period of ownership of the Property, including, but not limited to, soil and groundwater conditions caused by OWNER, and OWNER shall defend, at its expense, including attorneys' fees, CITY, its officers, agents and employees in any action based or asserted upon any such alleged act or omission. CITY may in its discretion participate in the defense of any such action.

10.5 Reservation of Rights. With respect to Sections 10.2, 10.3 and 10.4 herein, CITY reserves the right to either (1) approve the attorney(s) which OWNER selects, hires or otherwise engages to defend CITY hereunder, which approval shall not be unreasonably withheld, or (2) conduct its own defense, provided, however, that OWNER shall reimburse CITY forthwith for any and all reasonable expenses incurred for such defense, including attorneys' fees, upon billing and accounting therefor.

10.6 Survival. The provisions of this Sections 10.1 through 10.6, inclusive, shall survive the termination of this Agreement.

11. MORTGAGEE PROTECTION.

11.1 Mortgagee Protection. The parties hereto agree that this Agreement shall not prevent or limit OWNER, in any manner, at OWNER's sole discretion, from encumbering the Property or any portion thereof or any improvement thereon by any mortgage, deed of trust or other security device securing financing with respect to the Property. CITY acknowledges that the lenders providing such financing may require certain Agreement interpretations and modifications and agrees upon request, from time to time, to meet with OWNER and representatives of such lenders to negotiate in good faith any such request for interpretation or modification. CITY will not unreasonably withhold its consent to any such requested interpretation or modification provided such interpretation or modification is consistent with the intent and purposes of this Agreement. Any Mortgagee of the Property shall be entitled to the following rights and privileges:

(a) Neither entering into this Agreement nor a breach of this Agreement shall defeat, render invalid, diminish or impair the lien of any mortgage on the Property made in good faith and for value, unless otherwise required by law.

(b) The Mortgagee of any mortgage or deed of trust encumbering the Property, or any part thereof, which Mortgagee, has submitted a request in writing to the CITY in the manner specified herein for giving notices, shall be entitled to receive written notification from CITY of any default by OWNER in the performance of OWNER's obligations under this Agreement.

(c) If CITY timely receives a request from a Mortgagee requesting a copy of any notice of default given to OWNER under the terms of this Agreement, CITY shall provide a copy of that notice to the Mortgagee within ten (10) days of sending the notice of default to OWNER. The Mortgagee shall have the right, but not the obligation, to cure the default during the remaining cure period allowed such party under this Agreement.

(d) Any Mortgagee who comes into possession of the Property, or any part thereof, pursuant to foreclosure of the mortgage or deed of trust, or deed in lieu of such foreclosure, shall take the Property, or part thereof, subject to the terms of this Agreement. Notwithstanding any other provision of this Agreement to the contrary, no Mortgagee shall have an obligation or duty under this Agreement to perform any of OWNER's obligations or other affirmative covenants of OWNER hereunder, or to guarantee such performance; provided, however, that to the extent that any covenant to be performed by OWNER is a condition precedent to the performance of a covenant by CITY, the performance thereof shall continue to be a condition precedent to CITY's performance hereunder, and further provided that any sale, transfer or assignment by any Mortgagee in possession shall be subject to the provisions of Section 2.4 of this Agreement

(e) In the event of a default by OWNER, any Mortgagee shall have the right to remedy, or cause to be remedied, such default within sixty (60) days following the later to occur of (i) the date of Mortgagee's receipt of the notice referred to in Section 9.4 above, or (ii) the expiration of the period provided herein for OWNER to remedy or cure such default, and CITY shall accept such performance by or at the insistence of the Mortgagee as if the same had been timely made by OWNER; provided, however, that (i) if such default is not capable of being cured within the timeframes set forth in this Section and Mortgagee commences to cure the default within such timeframes, then Mortgagee shall have such additional time as is required to cure the default so long as Mortgagee diligently prosecutes the cure to completion and (ii) if possession of the Property (or portion thereof) is required to effectuate such cure or remedy, the Mortgagee shall be deemed to have timely cured or remedied if it commences the proceedings necessary to obtain possession thereof within sixty (60) days after receipt of the copy of the notice, diligently pursues such proceedings to completion, and, after obtaining possession, diligently completes such cure or remedy.

12. MISCELLANEOUS PROVISIONS.

12.1 Recordation of Agreement. This Agreement and any amendment or cancellation thereof shall be recorded with the San Bernardino County Recorder by the City Clerk within ten (10) days after the CITY executes this Agreement, as required by Section 65868.5 of the Government Code. If the parties to this Agreement or their successors in interest amend or cancel this Agreement as provided for herein and in Government Code

Section 65868, or if the CITY terminates or modifies the agreement as provided for herein and in Government Code Section 65865.1 for failure of the applicant to comply in good faith with the terms or conditions of this Agreement, the City Clerk shall have notice of such action recorded with the San Bernardino County Recorder.

12.2 Entire Agreement. This Agreement sets forth and contains the entire understanding and agreement of the parties, and there are no oral or written representations, understandings or ancillary covenants, undertakings or agreements which are not contained or expressly referred to herein. No testimony or evidence of any such representations, understandings or covenants shall be admissible in any proceeding of any kind or nature to interpret or determine the terms or conditions of this Agreement.

12.3 Severability. If any term, provision, covenant or condition of this Agreement shall be determined invalid, void or unenforceable, the remainder of this Agreement shall not be affected thereby to the extent such remaining provisions are not rendered impractical to perform taking into consideration the purposes of this Agreement. Notwithstanding the foregoing, the provision of the Public Benefits set forth in Section 4 of this Agreement, including the payment of the fees set forth therein, are essential elements of this Agreement and CITY would not have entered into this Agreement but for such provisions, and therefore in the event such provisions are determined to be invalid, void or unenforceable, this entire Agreement shall be null and void and of no force and effect whatsoever.

12.4 Interpretation and Governing Law. This Agreement and any dispute arising hereunder shall be governed and interpreted in accordance with the laws of the State of California. This Agreement shall be construed as a whole according to its fair language and common meaning to achieve the objectives and purposes of the parties hereto, and the rule of construction to the effect that ambiguities are to be resolved against the drafting party shall not be employed in interpreting this Agreement, all parties having been represented by counsel in the negotiation and preparation hereof.

12.5 Section Headings. All section headings and subheadings are inserted for convenience only and shall not affect any construction or interpretation of this Agreement.

12.6 Singular and Plural. As used herein, the singular of any word includes the plural.

12.7 Joint and Several Obligations. Pursuant to Section 2.4, if at any time during the term of this Agreement the Property is subsequently owned, in whole or in part, by more than one owner, all obligations of such owners under this Agreement shall be joint and several, and the default of any such owner shall be the default of all such owners. Notwithstanding the foregoing, no owner of a single lot which has been finally subdivided and sold to such owner as a member of the general public or otherwise as an ultimate user shall have any obligation under this Agreement except as provided under Section 4 hereof.

12.8 Time of Essence. Time is of the essence in the performance of the provisions of this Agreement as to which time is an element.

12.9 Waiver. Failure by a party to insist upon the strict performance of any of the provisions of this Agreement by the other party, or the failure by a party to exercise its rights upon the default of the other party, shall not constitute a waiver of such party's right to insist and demand strict compliance by the other party with the terms of this Agreement thereafter.

12.10 No Third-Party Beneficiaries. This Agreement is made and entered into for the sole protection and benefit of the parties and their successors and assigns. No other person shall have any right of action based upon any provision of this Agreement.

12.11 Force Majeure. Neither party shall be deemed to be in default where failure or delay in performance of any of its obligations under this Agreement is caused by floods, earthquakes, other Acts of God, fires, wars, riots or similar hostilities, strikes and other labor difficulties beyond the party's control, (including the party's employment force), government regulations, governmental orders related to statewide or national pandemics, any third party court actions challenging the Project (including but not limited to writs of mandate, restraining orders or injunctions), or other causes beyond the party's control. If any such events shall occur, the term of this Agreement and the time for performance by either party of any of its obligations hereunder may be extended by the written agreement of the parties for the period of time that such events prevented such performance, provided that the term of this Agreement shall not be extended under any circumstances for more than five (5) years.

12.12 Mutual Covenants. The covenants contained herein are mutual covenants and also constitute conditions to the concurrent or subsequent performance by the party benefited thereby of the covenants to be performed hereunder by such benefited party.

12.13 Successors in Interest. The burdens of this Agreement shall be binding upon, and the benefits of this Agreement shall inure to, all successors in interest to the parties to this Agreement. All provisions of this Agreement shall be enforceable as equitable servitudes and constitute covenants running with the land. Each covenant to do or refrain from doing some act hereunder with regard to development of the Property: (a) is for the benefit of and is a burden upon every portion of the Property; (b) runs with the Property and each portion thereof; and, (c) is binding upon each party and each successor in interest during ownership of the Property or any portion thereof.

12.14 Counterparts. This Agreement may be executed by the parties in counterparts, which counterparts shall be construed together and have the same effect as if all of the parties had executed the same instrument.

12.15 Jurisdiction and Venue. Any action at law or in equity arising under this Agreement or brought by a party hereto for the purpose of enforcing, construing or determining the validity of any provision of this Agreement shall be filed and tried in the Superior Court of the County of San Bernardino, State of California, and the parties hereto waive all provisions of law providing for the filing, removal or change of venue to any other court.

12.16 Project as a Private Undertaking. It is specifically understood and agreed by and between the parties hereto that the development of the Project is a private development, that neither party is acting as the agent of the other in any respect hereunder, and that each party is an independent contracting entity with respect to the terms, covenants and conditions contained in this Agreement. No partnership, joint venture or other association of any kind is formed by this Agreement. The only relationship between CITY and OWNER is that of a government entity regulating the development of private property and the owner of such property.

12.17 Further Actions and Instruments. Each of the parties shall cooperate with and provide reasonable assistance to the other to the extent contemplated hereunder in the performance of all obligations under this Agreement and the satisfaction of the conditions of this Agreement. Upon the request of either party at any time, the other party shall promptly execute, with acknowledgment or affidavit if reasonably required, and file or record such required instruments and writings and take any actions as may be reasonably necessary under the terms of this Agreement to carry out the intent and to fulfill the provisions of this Agreement or to evidence or consummate the transactions contemplated by this Agreement. The City Manager may delegate his powers and duties under this Agreement to an Assistant City Manager or other management level employee of the CITY.

12.18 Eminent Domain. No provision of this Agreement shall be construed to limit or restrict the exercise by CITY of its power of eminent domain.

12.19 Agent for Service of Process. In the event OWNER is not a resident of the State of California or it is an association, partnership or joint venture without a member, partner or joint venturer resident of the State of California, or it is a foreign corporation, then in any such event, OWNER shall file with the Planning Director, upon its execution of this Agreement, a designation of a natural person residing in the State of California, giving his or her name, residence and business addresses, as its agent for the purpose of service of process in any court action arising out of or based upon this Agreement, and the delivery to such agent of a copy of any process in any such action shall constitute valid service upon OWNER. If for any reason service of such process upon such agent is not feasible, then in such event OWNER may be personally served with such process out of this County and such service shall constitute valid service upon OWNER. OWNER is amenable to the process so served, submits to the jurisdiction of the Court so obtained and waives any and all objections and protests thereto.

12.20 Estoppel Certificate. Within thirty (30) business days following a written request by any of the parties, the other party shall execute and deliver to the requesting party a statement certifying that (i) either this Agreement is unmodified and in full force and effect or there have been specified (date and nature) modifications to the Agreement, but it remains in full force and effect as modified; and (ii) either there are no known current uncured defaults under this Agreement or that the responding party alleges that specified (date and nature) defaults exist. The statement shall also provide any other reasonable information requested. The failure to timely deliver this statement shall constitute a conclusive presumption that this Agreement is in full force and effect without modification

except as may be represented by the requesting party and that there are no uncured defaults in the performance of the requesting party, except as may be represented by the requesting party. OWNER shall pay to CITY all costs incurred by CITY in connection with the issuance of estoppel certificates requested by OWNER under this Section 12.20 prior to CITY's issuance of such certificates.

12.21 Authority to Execute. The person or persons executing this Agreement on behalf of OWNER warrants and represents that he or she/they have the authority to execute this Agreement on behalf of his or her/their corporation, partnership or business entity and warrants and represents that he or she/they has/have the authority to bind OWNER to the performance of its obligations hereunder.

12.22 Prevailing Wage. OWNER, for itself, its successors, and assigns, agrees, covenants, and warrants that the development of the Property, if any, shall comply with all applicable federal and state labor laws (including, without limitation, the requirement under California law to pay prevailing wages and hire apprentices), and all obligations as set forth herein.12.22.1 CITY makes no representations concerning prevailing wages in compliance with California Labor Code Section 1770 et seq.

12.22.2 OWNER acknowledges and agrees that it shall be independently responsible for reviewing the applicable laws and regulations with respect to the payment of prevailing wages and complying therewith. OWNER shall bear all risks of payment or non-payment of prevailing wages under California law and/or the implementation of Labor Code Section 1781, as the same may be amended from time to time, and/or any other similar law.

12.22.3 The foregoing indemnity shall survive termination of this Agreement and shall continue after completion of the construction and development of the Property by OWNER, its successors or assigns. OWNER shall be solely responsible for determining and effectuating compliance with such laws.

12.22.4 OWNER, ON BEHALF OF ITSELF, ITS SUCCESSORS, AND ASSIGNS, WAIVES AND RELEASES CITY FROM ANY RIGHT OF ACTION THAT MAY BE AVAILABLE TO OWNER PURSUANT TO LABOR CODE SECTION 1781 OR THE DAVIS BACON ACT. RELATIVE TO THE WAIVER AND RELEASE CONTAINED IN THIS SECTION 12.22, OWNER ACKNOWLEDGES THE PROTECTIONS OF CIVIL CODE SECTION 1542, WHICH READS AS FOLLOWS: A GENERAL RELEASE DOES NOT EXTEND TO CLAIMS THAT THE CREDITOR OR RELEASING PARTY DOES NOT KNOW OR SUSPECT TO EXIST IN HIS OR HER FAVOR AT THE TIME OF EXECUTING THE RELEASE, WHICH IF KNOWN BY HIM OR HER MUST HAVE MATERIALLY AFFECTED HIS OR HER SETTLEMENT WITH THE DEBTOR OR RELEASED PARTY.

INITIALS. BY INITIALING BELOW, OWNER KNOWINGLY AND VOLUNTARILY WAIVES THE PROVISIONS OF SECTION 1542 SOLELY WITH THE MATTERS WHICH ARE THE SUBJECT OF THE FOREGOING WAIVERS AND RELEASES:

DESCRIPTION OF REQUIRED IMPROVEMENTS

OWNER shall design, construct, and complete the following Street, Sewer, Storm Drain, Potable Water, Recycled Water, and Fiber Optic improvements, prior to OWNER's request for any final certificate of occupancy permit for any building within the Property.

1. OWNER shall design, construct, and complete the following Improvements, Potable Water (WT), Storm Drain (SD), Streets (ST), Sewer (SW), Recycled Water (RW), and Fiber Optics (FO), as described, prior to OWNER's request for final occupancy of the first building:

    a. WT on Sultana Avenue between Eucalyptus Avenue and Merrill Avenue.

    b. WT on Campus Avenue between Eucalyptus Avenue and Merrill Avenue.

    c. WT on Eucalyptus Avenue between Sultana Avenue and Grove Avenue (Local Water DIF Project WT-011).

    d. WT on Eucalyptus Avenue between Grove Avenue and Carpenter Avenue (*Regional Water DIF Project, portion of Phase 2A Water*).

    e. WT on Merrill Avenue between Sultana Avenue and Carpenter Avenue (Local Water DIF Project WT-011).

    f. SW (Western Trunk Sewer) on Euclid Avenue between Kimball Avenue and Merrill Avenue (Regional Sewer DIF Project SW-002).

    g. SW (Western Trunk Sewer) on Merrill Avenue between Euclid Avenue and Campus Avenue (Regional Sewer DIF Project SW-002).

    h. SW on Sultana Avenue between Merrill Avenue and Eucalyptus Avenue.

    i. SW on Campus Avenue between Merrill Avenue and Eucalyptus Avenue.

    j. RW on Sultana Avenue between Eucalyptus Avenue and Merrill Avenue.

k. RW on Merrill Avenue between Sultana Avenue and Campus Avenue (Local Water DIF Project WT-016).

l. RW on Campus Avenue between Merrill Avenue and Eucalyptus Avenue.

m. SD onsite detention shall be designed, constructed, and completed by ONWER prior to issuance of the first building permit. However, OWNER is eligible to request from CITY a grading permit prior to completion of the SD onsite detention.

n. SD on Sultana Avenue between Eucalyptus Avenue and Merrill Avenue.

o. SD on Merrill Avenue between Euclid Avenue and Sultana Avenue.

p. SD on Merrill Avenue between Sultana Avenue and Campus Avenue.

q. SD on Campus Avenue between Eucalyptus Avenue and Merrill Avenue.

r. SD bleeder line or alternative interim connection at the discretion of the City Engineer, on Euclid Avenue south of Merrill Avenue. This shall connect to the SD on Merrill Avenue between Euclid Avenue and Campus Avenue.

s. Two (2) Debris Separation Baffle Boxes at the intersections of Euclid Avenue and Merrill Avenue.

t. Full half ST improvements on the south half and circulation land improvements on the north half of Eucalyptus Avenue, from Sultana Avenue to Campus Avenue.

u. Full half ST improvements on both sides of Merrill Avenue, between Euclid Avenue and Carpenter Avenue.

v. Full half ST improvements on the west side and circulation lane improvements on the east side of Campus Avenue, between Eucalyptus Avenue and Merrill Avenue.

w. Full half ST improvements on the east side and circulation lane improvements on the west side of Sultana Avenue, between Eucalyptus Avenue and Merrill Avenue.

x. Traffic Signals at Sultana Avenue and Eucalyptus Avenue, Sultana Avenue and Merrill Avenue, Campus Avenue and Eucalyptus Avenue, and Campus and Merrill Avenues.

y. Traffic Signal modifications at Euclid Avenue and Eucalyptus Avenue, and Euclid Avenue and Merrill Avenue.

z. FO on Eucalyptus Avenue between Sultana Avenue and Campus Avenue.

aa. FO on Merrill Avenue between Sultana Avenue and Campus Avenue.

bb. FO on Sultana Avenue between Eucalyptus Avenue and Merrill Avenue.

cc. FO on Campus Avenue between Eucalyptus Avenue and Merrill Avenue.

2. CITY shall design, construct, and complete the Phase 2 Water (WT) Improvements and Interim Chino Avenue Loop. The Phase 2 Water Improvements will be constructed by the CITY in phases, with the initial improvements, designated as Phase 2A Water Improvements, Interim Chino Avenue Loop, and Phase 2B Water Improvements as described below.

    a. Phase 2A Water Improvements shall consist of the following:

        i. WT on Grove Avenue between Eucalyptus Avenue and Chino Avenue (Regional Water DIF Project WT-010).

    b. Interim Chino Avenue Loop shall consist of the following:

        i. WT on Chino Avenue between Cucamonga Channel and Grove Avenue, which will provide the second point of connection from the 1010 Pressure Zone (Local Water DIF Project WT-009).

        ii. Pressure Reducing Station at Grove Avenue and Chino Avenue, which will provide the second point of connection from 1010 Pressure Zone (Future Local Water DIF Project WT-009).

OWNER shall pay one hundred percent (100%) of the costs to construct the Phase 2A Improvements and the Interim Chino Avenue Loop, within forty-five (45) days from the Effective Date of this Agreement, and such payment shall be the "Phase 2A Water Payment". The costs in the foregoing sentence shall equal the actual bid amount of the awarded contracts for the work, plus fifteen percent (15%). Upon OWNER's full and complete payment to CITY, the CITY shall issue a Certificate of DIF Credit in the Regional Water Category and/or the Local Adjacent Water Category, as appropriate. Each DIF Water Certificate shall be issued by CITY within thirty (30) days of the receipt of such required payment. CITY shall not issue any building permits until receipt of the full Phase 2A Water Payment.

c. Phase 2B Water Improvements shall consist of the following:

   i. WT on Francis Street between Grove Avenue and Bon View Avenue (Regional Water DIF Project WT-010).

   ii. WT on Bon View Avenue between Francis Street and the Bon View Reservoir Site (Regional Water DIF Project WT-010).

   iii. WT – Nine (9) Million Gallon reservoir at Bon View Reservoir Site (Regional Water DIF Project WT-014).

   iv. WT – Two (2) Groundwater Production Wells in vicinity of Bon View Reservoir Site (Regional Water DIF Project WT-007).

   v. WT on Grove Avenue between Chino Avenue and Francis Street (Regional Water DIF Project WT-010). The final design and alignment north of Riverside Drive is subject to change at the reasonable discretion of the CITY.

   The Phase 2B Water Improvements will be constructed by the CITY and funded by OWNER, pursuant to Section 4.5 of this Agreement. CITY and OWNER mutually agree and understand, that with completion of Phase 2A and the Interim Chino Avenue Loop, the project will be utilizing interim water supply and storage capacity from the 1010' Pressure Zone and OWNER will be required to participate in the funding of future Phase 2 Water Improvements to support the permanent water supply and storage needs of future development within Ontario Ranch.

ORDINANCE NO. _____

AN ORDINANCE OF THE CITY COUNCIL OF THE CITY OF ONTARIO, CALIFORNIA, APPROVING FILE NO. PDA21-006, A DEVELOPMENT AGREEMENT BETWEEN THE CITY OF ONTARIO AND EUCLID LAND VENTURE 2 LLC, TO ESTABLISH THE TERMS AND CONDITIONS ASSOCIATED WITH TENTATIVE PARCEL MAP NO. 20517 (FILE NO. PMTT22-005), AN 80 ACRE PROPERTY BORDERED BY EUCALYPTUS, CAMPUS, MERRILL, AND SULTANA AVENUES, LOCATED WITHIN THE BUSINESS PARK AND INDUSTRIAL GENERAL LAND USE DISTRICTS OF THE ONTARIO RANCH BUSINESS PARK SPECIFIC PLAN AND MAKING FINDINGS IN SUPPORT THEREOF—APNS: 1054-041-01, 1054-041-02, 1054-031-01, 1054-031-02, 1054-261-01, 1054-261-02, 1054-291-01, AND 1054-291-02.

WHEREAS, Euclid Land Venture 2 LLC ("Applicant") has filed an Application for the approval of a Development Agreement, File No. PDA21-006, as described in the title of this Resolution (hereinafter referred to as "Application" or "Project"); and

WHEREAS, the Application applies to 80 acres of land generally bordered by Eucalyptus, Campus, Merrill, and Sultana Avenues, located within the Business Park and Industrial General land use districts of the Ontario Ranch Business Park Specific Plan; and

WHEREAS, the Applicant has submitted a Tentative Parcel Map 20517 (File No. PMTT22-005) to subdivide 80 acres of land into six (6) parcels, to facilitate the potential development of 1,559,204 square feet of business park and industrial uses; and

WHEREAS, the environmental impacts of this project were previously reviewed in conjunction with the Ontario Ranch Business Park Specific Plan Amendment (File No. PSPA21-002), for which an Environmental Impact Report — State Clearinghouse No. 2019050018 — (hereinafter referred to as "Certified EIR") was adopted by the City Council on October 18, 2022, and this Application introduces no new significant environmental impacts; and

WHEREAS, Ontario Development Code Table 2.02-1 (Review Matrix) grants the City Council the responsibility and authority to review and act on the subject Application; and

WHEREAS, the Project is located within the Airport Influence Area of Ontario International Airport ("ONT"), which encompasses lands within parts of San Bernardino, Riverside, and Los Angeles Counties, and is subject to, and must be consistent with, the policies and criteria set forth in the Ontario International Airport Land Use Compatibility Plan (ALUCP), which applies only to jurisdictions within San Bernardino County, and addresses the noise, safety, airspace protection, and overflight impacts of current and future airport activity; and

WHEREAS, City of Ontario Development Code Division 2.03 (Public Hearings) prescribes the manner in which public notification shall be provided and hearing procedures to be followed, and all such notifications and procedures have been completed; and

WHEREAS, the Project has been reviewed for consistency with the Housing Element of the Policy Plan component of The Ontario Plan, as State Housing Element law (as prescribed in Government Code Sections 65580 through 65589.8) requires that development projects must be consistent with the Housing Element, if upon consideration of all its aspects, it is found to further the purposes, principals, goals, and policies of the Housing Element; and

WHEREAS, on May 23, 2023, the Planning Commission of the City of Ontario conducted a hearing to consider the Project, and concluded said hearing on that date, voting to issue Resolution No. PC23-037 recommending the City Council approve the Application; and

WHEREAS, on June 20, 2023, the City Council of the City of Ontario conducted a hearing to consider the Project, and concluded said hearing on that date; and

WHEREAS, all legal prerequisites to the adoption of this Resolution have occurred.

NOW, THEREFORE, IT IS HEREBY FOUND, DETERMINED, AND ORDAINED by the City Council of the City of Ontario, as follows:

SECTION 1. ***Environmental Determination and Findings.*** As the decision-making body for the Project, the City Council has reviewed and considered the information contained in the administrative record for the Project. Based upon the facts and information contained in the administrative record, including all written and oral evidence presented to the City Council, the City Council finds as follows:

(1) The environmental impacts of this project were previously reviewed in conjunction with the Ontario Ranch Business Park Specific Plan Amendment (File No. PSPA21-002), for which a Certified EIR was adopted by the City Council on October 18, 2022; and

(2) The previous Certified EIR contains a complete and accurate reporting of the environmental impacts associated with the Project; and

(3) The previous Certified EIR was completed in compliance with CEQA and the Guidelines promulgated thereunder; and

(4) The previous Certified EIR reflects the independent judgment of the Planning Commission; and

(5) The proposed project will introduce no new significant environmental impacts beyond those previously analyzed in the previous Certified EIR, and all mitigation measures previously adopted with the Certified EIR, are incorporated herein by this reference.

SECTION 2. ***Subsequent or Supplemental Environmental Review Not Required.*** Based on the information presented to the City Council and the specific findings set forth in Section 1, above, the City Council finds that the preparation of a subsequent or supplemental Certified EIR is not required for the Project, as the Project:

(1) Does not constitute substantial changes to the Certified EIR that will require major revisions to the Certified EIR due to the involvement of new significant environmental effects or a substantial increase in the severity of previously identified significant effects; and

(2) Does not constitute substantial changes with respect to the circumstances under which the Certified EIR was prepared, that will require major revisions to the Certified EIR due to the involvement of new significant environmental effects or a substantial increase in the severity of the previously identified significant effects; and

(3) Does not contain new information of substantial importance that was not known and could not have been known with the exercise of reasonable diligence at the time the Certified EIR was certified/adopted, that shows any of the following:

(a) The project will have one or more significant effects not discussed in the Certified EIR; or

(b) Significant effects previously examined will be substantially more severe than shown in the Certified EIR; or

(c) Mitigation measures or alternatives previously found not to be feasible would in fact be feasible and would substantially reduce one or more significant effects of the Project, but the City declined to adopt such measures; or

(d) Mitigation measures or alternatives considerably different from those analyzed in the Certified EIR would substantially reduce one or more significant effects on the environment, but which the City declined to adopt.

SECTION 3. ***Housing Element Compliance.*** Pursuant to the requirements of California Government Code Chapter 3, Article 10.6, commencing with Section 65580, as the decision making body for the Project, the City Council finds that based on the facts and information contained in the Application and supporting documentation, at the time of Project implementation, the project is consistent with the Housing Element of the Policy Plan (General Plan) component of The Ontario Plan, as the project site is not one of the properties in the Housing Element Sites Inventory contained in Tables B-1 and B-2 of the Housing Element Technical Report.

SECTION 4. ***Airport Land Use Compatibility Plan ("ALUCP") Compliance.*** The California State Aeronautics Act (Public Utilities Code Section 21670 et seq.) requires that an Airport Land Use Compatibility Plan be prepared for all public use airports in the State; and requires that local land use plans and individual development proposals must be consistent with the policies set forth in the adopted Airport Land Use Compatibility Plan.

(1) On April 19, 2011, the City Council of the City of Ontario approved and adopted the Ontario International Airport Land use Compatibility Plan, establishing the Airport Influence Area for Ontario International Airport, which encompasses lands within parts of San Bernardino, Riverside, and Los Angeles Counties, and limits future land uses and development within the Airport Influence Area, as they relate to noise, safety, airspace protection, and overflight impacts of current and future airport activity. As the decision-making body for the Project, the City Council has reviewed and considered the facts and information contained in the Application and supporting documentation against the ONT ALUCP compatibility factors, including [1] Safety Criteria (ONT ALUCP Table 2-2) and Safety Zones (ONT ALUCP Map 2-2), [2] Noise Criteria (ONT ALUCP Table 2-3) and Noise Impact Zones (ONT ALUCP Map 2-3), [3] Airspace protection Zones (ONT ALUCP Map 2-4), and [4] Overflight Notification Zones (ONT ALUCP Map 2-5). As a result, the City Council, therefore, finds and determines that the Project, when implemented in conjunction with the conditions of approval, will be consistent with the policies and criteria set forth within the ONT ALUCP; and

(2) On August 2, 2022, the City Council of the City of Ontario approved and adopted a Development Code Amendment to establish the Chino Airport ("CNO") Overlay Zoning District ("OZD") and Reference I, Chino Airport Land Use Compatibility Plan ("CNO ALUCP"). The CNO OZD and CNO ALUCP established the Airport Influence Area for Chino Airport, solely within the City of Ontario, and limits future land uses and development within the Airport Influence Area, as they relate to safety, airspace protection, and overflight impacts of current and future airport activity. The CNO ALUCP is consistent with policies and criteria set forth within the Caltrans 2011 California Airport Land Use Planning Handbook. The proposed Project is located within the Airport Influence Area of Chino Airport and was evaluated and found to be consistent with the California Airport Land Use Planning Handbook and the CNO ALUCP. As the decision-making body for the Project, the City Council has reviewed and considered the facts and information contained in the Application and supporting documentation against the CNO ALUCP compatibility factors, including Safety, Airspace Protection, Overflight. As a result, the City Council, therefore, finds and determines that the Project, when implemented in conjunction with the conditions of approval, will be consistent with the policies and criteria set forth within the California Airport Land Use Planning Handbook and the Chino ALUCP.

SECTION 5. ***Concluding Facts and Reasons.*** Based upon the substantial evidence presented to the City Council during the above-referenced hearing, and upon the specific findings set forth in Section 1 through 4, above, the City Council hereby concludes as follows:

(1) The Development Agreement applies to approximately 80 acres of land bordered by Eucalyptus, Campus, Merrill, and Sultana Avenues, located within the Business Park and Industrial General land use districts of the Ontario Ranch Business Park Specific Plan Amendment (File No. PSPA21-002); and

(2) The Development Agreement establishes parameters for the development of land within the Ontario Ranch Business Park Specific Plan. The Development Agreement also grants the Applicant, the right to develop, the ability to quantify the fees;

and establish the terms and conditions that apply to those projects. These terms and conditions are consistent with The Ontario Plan Policy Plan (General Plan), design guidelines and development standards for the Ontario Ranch Business Park Specific Plan; and

(3) The Development Agreement grants the Owner a vested right to develop Tentative Parcel Map 20517 (File No. PMTT22-005) as long as the Owner complies with the terms and conditions of the Ontario Ranch Business Park Specific Plan and EIR. Tentative Parcel Map 20517 is bordered by Eucalyptus, Campus, Merrill, and Sultana Avenues, and proposes to subdivide 80 acres of land into six (6) parcels, to facilitate the potential development of 1,559,204 square feet of business park and industrial uses; and

(4) The Development Agreement has been prepared in conformance with the goals and policies of The Ontario Plan Policy Plan (General Plan); and

(5) The Development Agreement does not conflict with the Land Use Policies of The Ontario Plan Policy Plan (General Plan) and will provide for development, within the district, in a manner consistent with the Policy Plan and with related development; and

(6) This Development Agreement will promote the goals and objectives of the Land Use Element of the Policy Plan; and

(7) This Development Agreement will not be materially injurious or detrimental to the adjacent properties and will not have a significant impact on the environment or the surrounding properties. The environmental impacts of this project were previously reviewed in conjunction with the Ontario Ranch Business Park Specific Plan Amendment (File No. PSPA21-002), for which a Final Subsequent Environmental Impact Report (State Clearinghouse No. 2019050018) was certified by City Council on October 18, 2022; and

(8) This Application introduces no new significant environmental impacts. All previously adopted mitigation measures are a condition of project approval and are incorporated herein by this reference.

SECTION 6. ***City Council Action.*** Based upon the findings and conclusions set forth in Sections 1 through 5, above, the City Council hereby APPROVES the herein described Development Agreement (File No. PDA21-006), attached hereto as "Attachment A," and incorporated herein by this reference.

SECTION 7. ***Indemnification.*** The Applicant shall agree to defend, indemnify and hold harmless, the City of Ontario or its agents, officers, and employees from any claim, action or proceeding against the City of Ontario or its agents, officers or employees to attack, set aside, void, or annul this approval. The City of Ontario shall promptly notify the applicant of any such claim, action, or proceeding, and the City of Ontario shall cooperate fully in the defense.

SECTION 8. ***Custodian of Records.*** The documents and materials that constitute the record of proceedings on which these findings have been based are located at the City of Ontario City Hall, 303 East "B" Street, Ontario, California 91764. The custodian for these records is the City Clerk of the City of Ontario.

SECTION 9. ***Severability.*** If any section, sentence, clause or phrase of this Ordinance or the application thereof to any entity, person or circumstance is held for any reason to be invalid or unconstitutional, such invalidity or unconstitutionality shall not affect other provisions or applications of this Ordinance which can be given effect without the invalid provision or application, and to this end the provisions of this Ordinance are severable. The People of the City of Ontario hereby declare that they would have adopted this Ordinance and each section, sentence, clause or phrase thereof, irrespective of the fact that any one or more section, subsections, sentences, clauses or phrases be declared invalid or unconstitutional.

SECTION 10. ***Effective Date.*** This Ordinance shall become effective 30 days following its adoption.

SECTION 11. ***Publication and Posting.*** The Mayor shall sign this Ordinance and the City Clerk shall certify as to the adoption and shall cause a summary thereof to be published at least once, in a newspaper of general circulation in the City of Ontario, California within 15 days following the adoption. The City Clerk shall post a certified copy of this ordinance, including the vote for and against the same, in the Office of the City Clerk, in accordance with Government Code Section 36933.

DEVELOPMENT AGREEMENT NO. PDA21-006

This Development Agreement (hereinafter "Agreement") is dated for reference purposes only as of the ____ day of _____, 2023 by and among the City of Ontario, a California municipal corporation (hereinafter "CITY"), and Euclid Land Venture 2, LLC, a Delaware limited liability company (hereinafter "OWNER"):

RECITALS

WHEREAS, CITY is authorized to enter into binding development agreements with persons having legal or equitable interests in real property for the development of such property, pursuant to Section 65864, et seq. of the Government Code and Section 4.01.015 of the Ontario Development Code; and

WHEREAS, OWNER has requested CITY to enter into a development agreement and proceedings have been taken in accordance with the rules and regulations of CITY; and

WHEREAS, by electing to enter into this Agreement, CITY shall bind future City Councils of CITY by the obligations specified herein and limit the future exercise of certain governmental and proprietary powers of CITY; and

WHEREAS, the terms and conditions of this Agreement have undergone extensive review by CITY and the City Council and have been found to be fair, just and reasonable; and

WHEREAS, the best interests of the citizens of the CITY and the public health, safety and welfare will be served by entering into this Agreement; and

WHEREAS, all of the procedures of the California Environmental Quality Act, Pub. Res. Code § 21000, et seq. ("CEQA") have been met with respect to the Project and the Agreement in that certain Ontario Ranch Business Park Specific Plan Amendment Subsequent Environmental Impact Report (State Clearinghouse No. 2019050018) (the "FEIR"); and

WHEREAS, on October 18, 2022, the City Council found and determined that the FEIR was prepared in accordance with the requirements of CEQA and adequately describes the impacts of the Project described in the FEIR, which included consideration of this Agreement; and

WHEREAS, this Agreement and the Project are consistent with the CITY's Comprehensive General Plan and the Ontario Ranch Business Park Specific Plan; and

WHEREAS, all actions taken and approvals given by CITY have been duly taken or approved in accordance with all applicable legal requirements for notice, public hearings, findings, votes, and other procedural matters; and

WHEREAS, development of the Project Site, as more particularly described and depicted in **Exhibits A** and **B**, respectively (the "Property") in accordance with this Agreement will provide substantial benefits to CITY and will further important policies and goals of CITY; and

WHEREAS, this Agreement will eliminate uncertainty in planning and provide for the orderly development of the Property, ensure progressive installation of necessary improvements, provide for public services appropriate to the development of the Project, and generally serve the purposes for which development agreements under Section 65864 et seq. of the Government Code are intended; and

WHEREAS, OWNER has incurred and will in the future incur substantial costs in order to assure development of the Property in accordance with this Agreement; and

WHEREAS, OWNER has incurred and will in the future incur substantial costs in excess of the generally applicable requirements in order to assure vesting of legal rights to develop the Property in accordance with this Agreement.

COVENANTS

NOW, THEREFORE, in consideration of the above recitals and of the mutual covenants hereinafter contained and for other good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged, the parties agree as follows:

1. DEFINITIONS AND EXHIBITS.

1.1 Definitions. The following terms when used in this Agreement shall be defined as follows:

1.1.1 "Agreement" means this Development Agreement.

1.1.2 "CITY" means the City of Ontario, California, a California municipal corporation.

1.1.3 "Development" means the improvement of the Property for the purposes of completing the structures, improvements and facilities comprising the Project including, but not limited to: grading; the construction of public infrastructure and public facilities related to the Project whether located within or outside the Property; the construction of buildings and structures; and the installation of landscaping. "Development" does not include the maintenance, repair, reconstruction or redevelopment of any building, structure, improvement or facility after the construction and completion thereof.

1.1.4 "Development Approvals" means all permits and other entitlements for use subject to approval or issuance by CITY in connection with development of the Property including, but not limited to:

(a) general plans and general plan amendments; and specific plans and specific plan amendments;

(b) tentative and final subdivision and parcel maps;

(c) development plan review.

1.1.5 "Development Exaction" means any requirement of CITY in connection with or pursuant to any Land Use Regulation or Development Approval for the dedication of land, the construction of improvements or public facilities, or the payment of fees in order to lessen, offset, mitigate or compensate for the impacts of development on the environment or other public interests.

1.1.6 "Development Impact Fee" means a monetary exaction, other than a tax or special assessment, whether characterized as a fee or a tax and whether established for a broad class of projects by legislation of general applicability or imposed on a specific project on an ad hoc basis, that is charged by a local agency to the applicant in connection with approval of a development project for the purpose of defraying all or a portion of the cost of public facilities related to the development project, and, for purposes of this Agreement only, includes fees collected under development agreements adopted pursuant to Article 2.5 of the Government Code (commencing with Section 65864) of Chapter 4. For purposes of this Agreement only, "Development Impact Fee" shall not include processing fees and charges imposed by CITY to cover the estimated actual costs to CITY of processing applications for Development Approvals or for monitoring compliance with any Development Approvals granted or issued, including, without limitation, fees for zoning variances; zoning changes; use permits; building inspections; building permits; filing and processing applications and petitions filed with the local agency formation commission or conducting preliminary proceedings or proceedings under the Cortese-Knox-Hertzberg Local Government Reorganization Act of 2000, Division 3 (commencing with Section 56000) of Title 5 of the Government Code; the processing of maps under the provisions of the Subdivision Map Act, Division 2 (commencing with Section 66410) of Title 7 of the Government Code; or planning services under the authority of Chapter 3 (commencing with Section 65100) of Division 1 of Title 7 of the Government Code, fees and charges as described in Sections 51287, 56383, 57004, 65104, 65456, 65863.7, 65909.5, 66013, 66014, and 66451.2 of the Government Code, Sections 17951, 19132.3, and 19852 of the Health and Safety Code, Section 41901 of the Public Resources Code, and Section 21671.5 of the Public Utilities Code, as such codes may be amended or superseded, including by amendment or replacement.

1.1.7 "Development Plan" means the Existing Development Approvals and the Existing Land Use Regulations applicable to development of the Property.

1.1.8 "Effective Date" means the date that the ordinance approving this Agreement goes into effect.

1.1.9 "Existing Development Approvals" means all Development Approvals approved or issued on or prior to the Effective Date. Existing Development Approvals includes the Approvals incorporated herein as Exhibit "C" and all other Approvals which are a matter of public record on the Effective Date.

1.1.10 "Existing Land Use Regulations" means all Land Use Regulations in effect on the date of the first reading of the ordinance adopting and approving this Agreement. Existing Land Use Regulations includes the Regulations incorporated herein as Exhibit "D" and all other Land Use Regulations that are in effect and a matter of public record on such date.

1.1.11 "General Plan" means The Ontario Plan adopted on August 16, 2022, as amended up to the date of the first reading of the ordinance adopting and approving this Agreement.

1.1.12 "Improvement" or "Improvements" means those public improvements required to support the development of the Project as described in the Parcel Map conditions for Parcel Map No. 20517 ("Parcel Map") as further described in Exhibit "E" and depicted in Exhibit “F”(together, the "Infrastructure Improvements Exhibit").

1.1.13 "Land Use Regulations" means all ordinances, resolutions, codes, rules, regulations and official policies of CITY governing the development and use of land, including, without limitation, the permitted use of land, the density or intensity of use, subdivision requirements, timing and phasing of development, the maximum height and size of buildings, the provisions for reservation or dedication of land for public purposes, and the design, improvement and construction standards and specifications applicable to the development of the Property. "Land Use Regulations" does not include any CITY ordinance, resolution, code, rule, regulation or official policy, governing:

(a) the conduct of businesses, professions, and occupations;

(b) taxes and assessments;

(c) the control and abatement of nuisances;

(d) the granting of encroachment permits and the conveyance of similar rights and interests that provide for the use of or the entry upon public property;

(e) the exercise of the power of eminent domain.

1.1.14 "Mortgagee" means a mortgagee of a mortgage, a beneficiary under a deed of trust or any other security-device lender, and their successors and assigns.

1.1.15 "OWNER" means the persons and entities listed as owner on page 1 of this Agreement and their permitted successors in interest to all or any part of the Property.

1.1.16 "Owner Affiliate" shall mean, (i) any entity that directly or indirectly controls, is controlled by, or is under common control with OWNER, or (ii) an entity at least a majority of whose economic interest is owned by OWNER. For purposes of this definition, the term “control” means the power to direct the management of such entity through voting rights, ownership or contractual obligations.

1.1.17 “Phase” means the development area described in the Infrastructure Improvements Exhibit to this Agreement.

1.1.18 “Phase 2 Water Participation Fee” means the fee paid to the CITY for the Project, to fund the Property’s respective share of the project costs of the design and construction of the Phase 2 Water Improvements by the CITY. The Phase 2 Water Participation Fee shall be the calculated amount of the Regional Water DIF for the Project based upon the number of square feet, acreage, and land use category for non-residential square footage of the Project.

1.1.19 "Project" means the development of the Property contemplated by the Development Plan, as such Plan may be further defined, enhanced or modified pursuant to the provisions of this Agreement.

1.1.20 "Property" means the real property described on Exhibit "A" and shown on Exhibit "B" to this Agreement.

1.1.21 "Reservations of Authority" means the rights and authority excepted from the assurances and rights provided to OWNER under this Agreement and reserved to CITY under Section 3.4 of this Agreement.

1.1.22 "Specific Plan" means that certain specific plan adopted by the City Council, and entitled, "Ontario Ranch Business Park Specific Plan”.

1.1.23 "Subsequent Development Approvals" means all discretionary Development Approvals required subsequent to the Effective Date in connection with development of the Property. Subsequent Development Approvals shall be deemed to be subject to the provisions of this Agreement, without any further action needed on the part of either the CITY or OWNER.

1.1.24 "Subsequent Land Use Regulations" means any discretionary Land Use Regulations adopted and effective after the Effective Date of this Agreement.

1.2 Exhibits. The following documents are attached to, and by this reference made a part of, this Agreement:

Exhibit "A" — Legal Description of the Property.

Exhibit "B" — Map showing Property and its location.

Exhibit "C" — Existing Development Approvals.

Exhibit "D" — Existing Land Use Regulations.

Exhibit "E" — Description of Required Infrastructure Improvements

Exhibit "F" — Depiction of Infrastructure Improvements Exhibits

Exhibit "G" – Form of Certificate of DIF Credit to be issued by CITY

2. GENERAL PROVISIONS.

2.1 Binding Effect of Agreement. The Property is hereby made subject to this Agreement. Development of the Property is hereby authorized and shall be carried out only in accordance with the terms of this Agreement.

2.2 Ownership of Property. OWNER represents and covenants that it is the owner of fee simple title or the lessee or an optionee of the Property or a portion(s) thereof. To the extent applicable, OWNER has obtained written consent from the current fee owner of the Property agreeing to the terms of this Agreement and the recordation thereof.

2.3 Term. The term of this Agreement shall commence on the Effective Date and shall continue for an initial term of ten (10) years thereafter unless this term is modified or extended pursuant to the provisions of this Agreement. Upon approval by the City Manager, without the need for City Council approval, the term of this Agreement may be extended for an additional five (5) years following expiration of the initial ten (10) year term, provided the following have occurred:

(a) OWNER provides at least 180 days written notice to CITY prior to expiration of the initial term; and

(b) OWNER is not then in uncured default of this Agreement.

2.4 Assignment.

2.4.1 Right to Assign. OWNER shall have the right to sell, transfer or assign the Property in whole or in part (provided that no such partial transfer shall violate the Subdivision Map Act, Government Code Section 66410, et seq.), to any person, partnership, limited liability company, joint venture, firm or corporation at any time during the term of this Agreement; provided, however, that any such sale, transfer or assignment shall include the assignment and assumption of the rights, duties and obligations arising under or from this Agreement with respect to the portion of the Property sold and be made in strict compliance with the following:

(a) Except as expressly provided for herein, no sale, transfer or assignment of any right or interest under this Agreement shall be made unless made together with the sale, transfer or assignment of all or a part of the Property.

(b) Concurrent with any such sale, transfer or assignment, or within fifteen (15) business days thereafter, OWNER shall notify CITY's City Manager, in writing, of such sale, transfer or assignment and shall provide CITY with: (1) an executed agreement, in a form reasonably acceptable to CITY, by the purchaser, transferee or assignee and providing therein that the purchaser, transferee or assignee expressly and unconditionally assumes all the duties and obligations of OWNER under this Agreement with respect to the portion of the Property so sold, transferred or assigned.

(c) Any sale, transfer or assignment not made in strict compliance with the foregoing conditions shall constitute a default by OWNER under this Agreement. Notwithstanding the failure of any purchaser, transferee or assignee to execute the agreement required by Paragraph (b) of this Subsection 2.4.1, the burdens of this Agreement shall be binding upon such purchaser, transferee or assignee, but the benefits of this Agreement shall not inure to such purchaser, transferee or assignee until and unless such agreement is executed. The City Manager shall have the authority to review, consider and either approve, conditionally approve, or deny any proposed sale, transfer or assignment that is not made in compliance with this section 2.4.

(d) Notwithstanding the foregoing, OWNER shall have the right to assign this Agreement to an Owner Affiliate subject to the notice requirements to CITY as described in Paragraph (b) of this Section 2.4.1, above.

2.4.2 Release of Transferring Owner. Notwithstanding any sale, transfer or assignment, a transferring OWNER shall continue to be obligated under this Agreement unless such transferring owner is given a release in writing by CITY, which release shall be provided by CITY upon the full satisfaction by such transferring owner of the following conditions:

(a) OWNER no longer has a legal or equitable interest in all or any part of the portion of the Property sold, transferred or assigned.

(b) OWNER is not then in default under this Agreement.

(c) OWNER has provided CITY with the notice and executed an agreement as required under Paragraph (b) of Subsection 2.4.1 above.

(d) The purchaser, transferee or assignee provides CITY with security equivalent to any security previously provided by OWNER (if any) to secure performance of its obligations hereunder which are to be performed upon portion of the Property sold, transferred or assigned.

2.4.3 Effect of Assignment and Release of Obligations. In the event of a sale, transfer or assignment pursuant to the provisions of Section 2.4.1 and notwithstanding the release provisions of Section 2.4.2 above:

(a) The assignee shall be liable for the performance of all obligations of OWNER with respect to transferred property, but shall have no obligations with respect to the portions of the Property, if any, not transferred (the "Retained Property").

(b) The owner of the Retained Property shall be liable for the performance of all obligations of OWNER with respect to Retained Property, but shall have no further obligations with respect to the transferred property.

(c) The assignee's exercise, use and enjoyment of the Property or portion thereof shall be subject to the terms of this Agreement to the same extent as if the assignee were the OWNER.

2.4.4 Subsequent Assignment. Any subsequent sale, transfer or assignment after an initial sale, transfer or assignment shall be made only in accordance with and subject to the terms and conditions of this Section 2.4.

2.4.5 Termination of Agreement With Respect to Individual Lots Upon Sale to Public and Completion of Construction. The provisions of Subsection 2.4.1 shall not apply to the sale or lease (for a period longer than one (1) year) of any parcel which has been finally subdivided and is individually (and not in "bulk") sold or leased to a member of the public or other ultimate user of the parcel. Notwithstanding any other provisions of this Agreement, this Agreement shall terminate with respect to any lot and such lot shall be released and no longer be subject to this Agreement without the execution or recordation of any further document upon satisfaction of both of the following conditions:

(a) The lot has been finally subdivided and individually (and not in "bulk") sold or leased (for a period longer than one (1) year) to a member of the public or other ultimate user; and,

(b) A certificate of occupancy has been issued for a building on the parcel, and the fees set forth under Section 4 of this Agreement have been paid.

2.4.6 Partial Assignment and Assumption. CITY and OWNER agree OWNER may partially assign its obligations and rights under this Agreement, and all amendments hereto, to a purchaser, transferee or assignee of a lot, which has been subdivided subject to provisions of a partial assignment and assumption agreement in a form approved by CITY. Any such complete and executed partial assignment and assumption of this Agreement shall be submitted to CITY for approval pursuant to Section 2.4.1 of this Agreement. Within thirty (30) days following such complete submittal, CITY shall review, and if the above conditions are satisfied, may approve the partial assignment and release and notify the purchasor, transferee or assignee in writing thereof. No such release approved pursuant to this Subsection 2.4.6 shall cause, or otherwise affect, a release of OWNER from the duties and obligations under this Agreement that are retained by OWNER and excluded from the transfer or assignment.

2.5 Amendment or Cancellation of Agreement. This Agreement may be amended or cancelled in whole or in part only in the manner provided for in Government Code Section 65868.1. Any amendment of this Agreement, which amendment has been requested by OWNER, shall be considered by the CITY only upon the payment of the applicable processing charge. This provision shall not limit any remedy of CITY or OWNER as provided by this Agreement. Either party or successor in interest, may propose an amendment to or cancellation, in whole or in part, of this Agreement. Any amendment or cancellation shall be by mutual consent of the parties or their successors in interest except as provided otherwise in this Agreement or in Government Code Section 65865.1. For purposes of this section, the term "successor in interest" shall mean any person having a legal or equitable interest in the whole of the Property, or any portion thereof as to which such person wishes to amend or cancel this Agreement. The procedure for proposing and adopting an amendment to, or cancellation of, in whole or in part, this Agreement shall be the same as the procedure for adopting and entering into this Agreement in the

first instance. Notwithstanding the foregoing sentence, if the CITY initiates the proposed amendment to, or cancellation of, in whole or in part, this Agreement, CITY shall first give notice to the OWNER of its intention to initiate such proceedings at least sixty (60) days in advance of the giving the public notice of intention to consider the amendment or cancellation.

2.6 Minor Modification. Upon the written application of OWNER, minor modifications and changes to the Development Plan including modifications to building design or footprint (not affecting minimum setbacks), parking layout and design, and landscape area design may be approved by the Director of the Planning Department without the need to amend this Development Agreement. Other changes in the Development Plan shall be processed pursuant to the City Zoning Ordinance. It is also contemplated by CITY and OWNER that OWNER may, from time to time, seek amendments to one or more of the Development Approvals. Any such amendments are contemplated by CITY and OWNER as being within the scope of this Agreement as long as they are consistent with the Land Use Regulations and shall, upon approval by CITY, continue to constitute the Development Approvals as referenced herein. The parties agree that any such modifications or amendments shall not constitute an amendment to this Agreement nor require an amendment to this Agreement.

2.7 Termination. This Agreement shall be deemed terminated and of no further effect upon the occurrence of any of the following events:

(a) Expiration of the stated term of this Agreement as set forth in Section 2.3.

(b) Entry of a final judgment setting aside, voiding or annulling the adoption of the ordinance approving this Agreement.

(c) The adoption of a referendum measure overriding or repealing the ordinance approving this Agreement.

(d) Completion of the Project in accordance with the terms of this Agreement including issuance of all required occupancy permits and acceptance by CITY or applicable public agency of all required dedications.

Termination of this Agreement shall not constitute termination of any other land use entitlements approved for the Property. Upon the termination of this Agreement, no party shall have any further right or obligation hereunder except with respect to any obligation to have been performed prior to such termination or with respect to any default in the performance of the provisions of this Agreement which has occurred prior to such termination or with respect to any obligations which are specifically set forth as surviving this Agreement. Upon such termination, any public facilities and service mitigation fees paid pursuant to Section 4.2 of this Agreement by OWNER to CITY on which construction has not yet begun shall be refunded to OWNER by CITY within ten (10) business days.

2.8 Notices.

(a) As used in this Agreement, "notice" includes, but is not limited to, the communication of notice, request, demand, approval, statement, report, acceptance, consent, waiver, appointment or other communication required or permitted hereunder.

(b) All notices shall be in writing and shall be considered given either: (i) when delivered in person, including, without limitation, by courier, to the recipient named below; or (ii) on the date of delivery shown on the return receipt, after deposit in the United States mail in a sealed envelope as either registered or certified mail with return receipt requested, and postage and postal charges prepaid, and addressed to the recipient named below. All notices shall be addressed as follows:

If to CITY:
Scott Ochoa, City Manager
City of Ontario
303 East "B" Street
Ontario, CA 91764

If to OWNER:
Jeff Johnston
Euclid Land Venture 2, LLC
c/o Real Estate Development Associates
4450 MacArthur Blvd., Suite 100
Newport Beach, CA 92660
jjohnston@redallc.com

With a copy to:
Ruben Duran, City Attorney
Best Best & Krieger, LLP
2855 E Guasti Road
Ontario, CA 91761

With a copy to:
Matt Fogt, Esq.
Allen Matkins Leck Gamble Mallory& Natsis, LLP
2010 Main Street, 8th Floor
Irvine, CA 92614

Either party may, by notice given at any time, require subsequent notices to be given to another person or entity, whether a party or an officer or representative of a party, or to a different address, or both. Notices given before actual receipt of notice of change shall not be invalidated by the change.

3. DEVELOPMENT OF THE PROPERTY.

3.1 Rights to Develop. Subject to the terms of this Agreement including the Reservations of Authority in Section 3.4, OWNER shall have a vested right to develop the Property in accordance with, and to the extent of, the Development Plan. The Project shall remain subject to all Subsequent Development Approvals required to complete the Project as contemplated by the Development Plan. Except as otherwise provided in this Agreement, the permitted uses of the Property, the density and intensity of use, the maximum height and size of proposed buildings, and provisions for reservation and dedication of land for public purposes shall be those set forth in the Development Plan.

3.2 Effect of Agreement on Land Use Regulations. Except as otherwise provided under the terms of this Agreement including the Reservations of Authority in Section 3.4,

the rules, regulations and official policies governing permitted uses of the Property, the density and intensity of use of the Property, the maximum height and size of proposed buildings, and the design, improvement and construction standards and specifications applicable to development of the Property shall be the Existing Land Use Regulations. In connection with any Subsequent Development Approval, CITY shall exercise discretion in accordance with the same manner as it exercises its discretion under its police powers, including the Reservations of Authority set forth herein; provided however, that such discretion shall not prevent development of the Property for the uses and to the density or intensity of development set forth in this Agreement.

3.3 Timing of Development. The parties acknowledge that OWNER cannot at this time predict when or the rate at which phases of the Property will be developed. Such decisions depend upon numerous factors which are not within the control of OWNER, such as market orientation and demand, interest rates, absorption, completion and other similar factors. Since the California Supreme Court held in Pardee Construction Co. v. City of Camarillo (1984) 37 Cal. 3d 465, that the failure of the parties therein to provide for the timing of development resulted in a later adopted initiative restricting the timing of development to prevail over such parties' agreement, it is the parties' intent to cure that deficiency by acknowledging and providing that OWNER shall have the right to develop the Property in such order and at such rate and at such times as OWNER deems appropriate within the exercise of its subjective business judgment.

3.3.1 Infrastructure Improvement Exhibit. Attached hereto as Exhibits “E” and "F" are a description and depiction, respectively, of the Improvements needed for the development of the Property. In the event of any discrepancy between Exhibit E and Exhibit F, Exhibit F shall control.

3.4 Reservations of Authority.

3.4.1 Limitations, Reservations and Exceptions. Notwithstanding any other provision of this Agreement, the CITY shall not be prevented from applying new rules, regulations and policies upon the OWNER, nor shall a development agreement prevent the CITY from denying or conditionally approving any subsequent development project application on the basis of such new rules, regulations and policies where the new rules, regulations and policies consist of the following:

(a) Processing fees by CITY to cover costs of processing applications for development approvals or for monitoring compliance with any development approvals;

(b) Procedural regulations relating to hearing bodies, petitions, applications, notices, findings, records and any other matter of procedure;

(c) Regulations, policies and rules governing engineering and construction standards and specifications applicable to public and private improvements, including all uniform codes adopted by the CITY and any local amendments to those codes adopted by the CITY; provided however that, OWNER shall have a vested right to develop the Property in accordance with, and to the extent of, the standards and specifications that

are expressly identified in the Specific Plan and the building codes in effect as of the Effective Date;

(d) Regulations that may conflict with this Agreement and the Development Plan but that are reasonably necessary to protect the occupants of the Project and/or of the immediate community from a condition perilous to their health or safety;

(e) Regulations that do not conflict with those rules, regulations and policies set forth in this Agreement or the Development Plan and which do not impose additional obligations, costs, and expenses on OWNER or the Project;

(f) Regulations that may conflict with this Agreement but to which the OWNER consents.

3.4.2 Subsequent Development Approvals. This Agreement shall not prevent CITY, in acting on Subsequent Development Approvals, from applying Subsequent Land Use Regulations that do not conflict with the Development Plan and/or the Existing Development Approvals, nor shall this Agreement prevent CITY from denying or conditionally approving any Subsequent Development Approval on the basis of the Existing Land Use Regulations or any Subsequent Land Use Regulation not in conflict with the Development Plan and/or the Existing Development Approvals.

3.4.3 Modification or Suspension by State or Federal Law. In the event that State or Federal laws or regulations, enacted after the Effective Date of this Agreement, prevent or preclude compliance with one or more of the provisions of this Agreement, such provisions of this Agreement shall be modified or suspended as may be necessary to comply with such State or Federal laws or regulations, provided, however, that this Agreement shall remain in full force and effect to the extent it is not inconsistent with such laws or regulations and to the extent such laws or regulations do not render such remaining provisions impractical to enforce. In the event OWNER alleges that such State or Federal laws or regulations preclude or prevent compliance with one or more provisions of this Agreement, and the CITY does not agree, the OWNER may, at its sole cost and expense, seek declaratory relief (or other similar non-monetary remedies); provided however, that nothing contained in this Section 3.4.3 shall impose on CITY any monetary liability for contesting such declaratory relief (or other similar non-monetary relief).

3.4.4 Intent. The parties acknowledge and agree that CITY is restricted in its authority to limit its police power by contract and that the foregoing limitations, reservations and exceptions are intended to reserve to CITY all of its police power which cannot be so limited. This Agreement shall be construed, contrary to its stated terms if necessary, to reserve to CITY all such power and authority which cannot be restricted by contract.

3.5 Public Works; Utilities. If OWNER is required by this Agreement or a condition of Project approval to construct any public works facilities which will be dedicated to CITY or any other public agency upon completion, and if required by applicable laws to do so,

OWNER shall perform such work in the same manner and subject to the same standards as would be applicable to CITY or such other public agency should it have undertaken such construction. As a condition of development approval, OWNER shall connect the Project to all utilities necessary to provide adequate water, recycled water, sewer, gas, electric, and other utility services necessary for the Project, as further described and depicted in the Infrastructure Improvements Exhibit. As a further condition of development approval, OWNER shall to the extent possible contract with the CITY for CITY-owned or operated utilities for this purpose, for such price and on such terms as may be available to similarly situated customers in the CITY. As a further condition of development approval, to the extent OWNER does not own the Property in fee simple, OWNER will provide to CITY the written consent from the current fee owner of the Property agreeing to the terms of this Agreement and the recordation thereof, pursuant to Section 2.2.

3.5.1 OWNER agrees that development of the Project shall require the construction of storm drain Improvements from the Property described in Exhibit E and depicted in Exhibit F. OWNER shall be responsible for payment of a fee in-lieu (the "Euclid Avenue Storm Drain In-Lieu Fee) of actual construction of the ultimate Euclid Avenue storm drain Improvements, south of Merrill Avenue, depicted in Exhibit F. OWNER shall pay the CITY, prior to the request for occupancy of any building on the Property, Two Million Eight Hundred Eighty Thousand Four Hundred Fifty Dollars ($2,880,450). Upon OWNER'S complete payment of the Euclid Avenue Storm Drain In-Lieu Fee, the CITY shall issue a Certificate of DIF Credit in the Regional Storm Drain category equal to the amount paid to the CITY. Such Regional Storm Drain DIF Certificate shall be issued by CITY within thirty (30) business days of the receipt of such required payment. OWNER and CITY agree that CITY may issue grading, building and other required permits for OWNER to initiate construction of structures for the Property according to plans approved by CITY, and OWNER agrees that OWNER shall not request and CITY shall not issue a final occupancy permit for any buildings prior to payment of the Euclid Avenue Storm Drain In-Lieu Fee and construction of the storm drain Improvements described in Exhibit E and depicted in Exhibit F. CITY and OWNER mutually acknowledge and agree, that upon OWNER's complete payment of the Euclid Avenue Storm Drain In-Lieu Fee, such obligation shall be deemed satisfied and CITY shall not hold up a request for final occupancy permit for any buildings on the Property, based on the actual construction and completion of the ultimate Euclid Avenue storm drain Improvements. CITY agrees that OWNER may request that CITY issue temporary certificates of occupancy on a building-by-building basis prior to completion of the storm drain improvements.

3.5.2 OWNER agrees that development of the Project shall require the construction of street Improvements as described in Exhibit E and depicted in Exhibit F. OWNER and CITY agree that CITY may issue grading, building and other required permits for OWNER to initiate construction of structures for the Property according to plans approved by CITY, and OWNER agrees that OWNER shall not request, and CITY shall not issue a final occupancy permit for any buildings on the Property prior to Substantial Completion of the street Improvements as described in Exhibit E and depicted in Exhibit F. For purposes of the foregoing, street Improvements shall be deemed

"Substantially Complete" even if the final lift of pavement has not been completed (i.e., OWNER may install the final lift after completion of all other construction). CITY agrees that OWNER may request that CITY issue temporary certificates of occupancy on a building-by-building basis prior to completion and subject to final acceptance by CITY of the street Improvements. OWNER agrees that the street improvements shall be completed and subject to final acceptance by CITY prior to the release of any security for the construction of the street improvements. OWNER and CITY agree that a portion of the street Improvements described in Exhibit E and depicted in Exhibit F may be constructed by others, or pursuant to a cooperative agreement with others. If such street Improvements are constructed by others, or in cooperation with others, and are completed and accepted by CITY prior to OWNER's request to CITY of the required grading, building or other required permits for OWNER to initiate construction of structures for the Property, then OWNER shall not be required to construct those street Improvements constructed and completed by others and accepted by CITY.

3.5.3 OWNER agrees that development of the Property shall require the construction of water utility Improvements as described in Exhibit E and depicted in Exhibit F consisting generally of the construction of the potable water Improvements to serve the Property as described in Exhibit E and depicted in Exhibit F. OWNER and CITY agree that CITY may issue grading, building and other required permits for OWNER to initiate construction of structures for the Property according to plans approved by CITY upon completion of sufficient water improvements to serve the Property from at least one point of connection. OWNER and CITY agree that OWNER may, in-lieu of utilizing recycled water during grading and construction, utilize water from existing agricultural wells on the Property subject to the terms of a separate Well Use Agreement between the CITY and OWNER. OWNER agrees that OWNER shall not request and CITY shall not issue a final occupancy permit for any buildings on the Property until the completion of the potable water improvements described in Exhibit E and depicted in Exhibit F. City agrees that OWNER may request that CITY issue temporary certificates of occupancy on a building-by-building basis prior to completion of the water improvements if there is available permanent water service from a minimum of two (2) points of connection and sufficient water is available for fire protection purposes for any buildings while under construction. OWNER and CITY agree that a portion of the water Improvements described in Exhibit E and depicted in Exhibit F may be constructed by others, or pursuant to a cooperative agreement with others. If such water Improvements are constructed by others, or in cooperation with others, and are completed and accepted by CITY prior to OWNER's request to CITY of the required grading, building or other required permits for OWNER to initiate construction of structures for the Property, then OWNER shall not be required to construct those water Improvements constructed and completed by others and accepted by CITY.

3.5.4 OWNER agrees that development of the Property shall require the construction of sewer Improvements as described in Exhibit E and depicted in Exhibit F. OWNER and CITY agree that CITY may issue grading, building and other required permits for OWNER to initiate construction of structures for the Property according to plans approved by CITY, and OWNER agrees that OWNER shall not request and CITY shall not issue a final occupancy permit for any buildings prior to completion of the sewer

improvements described in Exhibit E and depicted in Exhibit F. CITY agrees that OWNER may request that CITY issue temporary certificates of occupancy on a building-by-building basis prior to the completion of the sewer improvements described in Exhibit E and depicted in Exhibit F. OWNER and CITY agree that a portion of the sewer Improvements described in Exhibit E and depicted in Exhibit F may be constructed by others, or pursuant to a cooperative agreement with others. If such sewer Improvements are constructed by others, or in cooperation with others, and are completed and accepted by CITY prior to OWNER's request to CITY of the required grading, building or other required permits for OWNER to initiate construction of structures for the Property, then OWNER shall not be required to construct those sewer Improvements constructed and completed by others and accepted by CITY.

3.5.5 OWNER agrees that development of the Property shall require the construction of recycled water utility improvements to serve the Property, consisting generally of the construction of recycled water utility Improvements as described in Exhibit E and depicted in Exhibit F. OWNER and CITY agree that the CITY may issue grading, building and other required permits for OWNER to initiate construction of structures for the Property according to plans approved by CITY upon completion of sufficient water and recycled water improvements to serve the Property from at least one point of connection and OWNER agrees that OWNER shall not request and CITY shall not issue any occupancy permit for any buildings on the Property until the completion of the water improvements described in Exhibit E and depicted in Exhibit F. CITY agrees that OWNER may request a temporary occupancy permit for a building and, if OWNER requests that a temporary certificate of occupancy be issued for a building prior to the completion of the extension of permanent master planned recycled water utility Improvements to serve the Property that CITY may consider such request and may issue temporary certificates of occupancy on a building-by-building basis prior to completion of recycled water improvements if there is available permanent recycled water service connection and sufficient recycled water is available. OWNER and CITY agree that all, or a portion of, the permanent master planned recycled water utility Improvements described in Exhibit E and depicted in Exhibit F may be constructed by others. If such recycled water utility Improvements are constructed by others and completed and accepted by CITY prior to OWNER'S request to CITY of the required grading, building, or other required permits for OWNER to initiate construction of structures for the Property, then OWNER shall not be required to construct those permanent master planned recycled water utility Improvements.

3.5.6 OWNER agrees that development of the Property shall require the construction of fiber optic communications infrastructure, at OWNER's sole cost and expense, as described in the attached Exhibit E and depicted in Exhibit F consisting generally of the construction of fiber optic communications infrastructure to serve the Property. OWNER and CITY agree that CITY may issue grading, building and other required permits for OWNER to initiate construction of structures for the Property according to plans approved by CITY and OWNER agrees that OWNER shall not request and CITY shall not issue a final occupancy permit for any buildings prior to completion of the fiber optic communications infrastructure, as described in Exhibit E and depicted in Exhibit F. CITY agrees that OWNER may request that CITY issue temporary certificates

of occupancy on a building-by-building basis prior to the completion of the fiber optic communications infrastructure, as described in Exhibit E and depicted in Exhibit F.

3.6 Acquisition of Offsite Provision of Real Property Interests. In any instance where OWNER is required by any Development Approval or Land Use Regulation to construct any public improvement on land not owned by OWNER ("Offsite Improvements"), the CITY and OWNER shall cooperate in acquiring the necessary legal interest ("Offsite Property") as described below in Section 3.7. This Section 3.6 is not intended by the parties to impose upon the OWNER an enforceable duty to acquire land or construct any public improvements on land not owned by OWNER, except to the extent that the OWNER elects to proceed with the development of the Project, and then only in accordance with valid conditions imposed by the CITY upon the development of the Project under the Subdivision Map Act or other legal authority.

3.7 Real Property Interests.

3.7.1 CITY Acquisition of Offsite Property. In the event OWNER is required to construct any public improvements on land not owned by OWNER, Sections 3.7.1 and 3.7.2 shall control the acquisition of the Offsite Property. If the OWNER is unable to acquire such Offsite Property, and following the written request from the OWNER to CITY, CITY agrees to use reasonable and diligent good faith efforts to acquire the Offsite Property from the owner or owners of record by negotiation to the extent permitted by law and consistent with this Agreement. If CITY is unable to acquire the Offsite Property by negotiation within thirty (30) days after OWNER'S written request, CITY may, initiate proceedings utilizing its power of eminent domain to acquire the Offsite Property at a public hearing noticed and conducted in accordance with California Code of Civil Procedure Section 1245.235 for the purpose of considering the adoption of a resolution of necessity concerning the Offsite Property, subject to the conditions set forth in this Section 3.7.1 The CITY and OWNER acknowledge that the timelines set forth in this Section 3.7.1 represent the maximum time periods which CITY and OWNER reasonably believe will be necessary to complete the acquisition of any Offsite Property. CITY agrees to use reasonable good faith efforts to complete the actions described within lesser time periods, to the extent that it is reasonably able to do so, consistent with the legal constraints imposed upon CITY.

3.7.2 Owner's Option to Terminate Proceedings. CITY shall provide written notice to OWNER no later than fifteen (15) days prior to making an offer to the owner of the Offsite Property. At any time within that fifteen (15) day period, OWNER may, at its option, notify CITY that it wants CITY to cease all acquisition proceedings with respect to that Offsite Property, whereupon CITY shall cease such proceedings. CITY may provide written notice to OWNER no later than fifteen (15) days prior to the date of the hearing on CITY's intent to consider the adoption of a resolution of necessity as to any Offsite Property. At any time within that fifteen (15) day period, OWNER may, at its option, notify CITY that it wants CITY to cease condemnation proceedings, whereupon CITY shall cease such proceedings. If OWNER does not notify CITY to cease condemnation proceedings within said fifteen (15) day period, then the CITY may proceed to consider and act upon the Offsite Property resolution of necessity. If CITY adopts such resolution

of necessity, then CITY may institute condemnation proceedings and file a complaint in condemnation and seek an order of immediate possession with respect to the Offsite Property.

3.8 Regulation by Other Public Agencies. It is acknowledged by the parties that other public agencies not within the control of CITY possess authority to regulate aspects of the development of the Property separately from or jointly with CITY and this Agreement does not limit the authority of such other public agencies. CITY agrees to cooperate fully, at no cost to CITY, with OWNER in obtaining any required permits or compliance with the regulations of other public agencies provided such cooperation is not in conflict with any laws, regulations or policies of the CITY.

3.9 Tentative Parcel Maps. With respect to applications by OWNER for tentative parcel maps for portions of the Property, CITY agrees that OWNER may file and process tentative maps in accordance with Chapter 4.5 (commencing with Section 66498.1) of Division 2 of Title 7 of the California Government Code and the applicable provisions of CITY's subdivision ordinance, as the same may be amended from time to time. In accordance with the provisions of Section 66452.6 of the Government Code, each tentative subdivision map or tentative parcel map, heretofore or hereafter approved in connection with development of the Property, shall be deemed to have been granted an extension of time to and until the expiration, cancellation, or termination of this Agreement.

3.10 Specific Plan Charge. Pursuant to Government Code section 65456, the City Council may consider adopting a specific plan charge upon persons seeking CITY approvals that are required to be consistent with the Specific Plan. Any such charges shall, in the aggregate, defray, but not exceed, the estimated cost of preparation, adoption, and administration of the Specific Plan, including costs incurred pursuant to the California Environmental Quality Act (Pub. Resources Code, §§ 21000 et seq.). As nearly as can be estimated, the charges shall be a prorated amount in accordance with the applicant's relative benefit derived from the Specific Plan. If such charges are adopted, the CITY shall use such charges to reimburse the OWNER who originally paid the cost of preparing the Specific Plan, including costs incurred pursuant to the California Environmental Quality Act (Pub. Resources Code, §§ 21000 et seq.) to the extent the OWNER paid more than its relative benefit from the Specific Plan. Such charges, if adopted, shall be imposed on persons seeking CITY approvals that are required to be consistent with the Specific Plan, to the extent such person(s) has/have not entered into a reimbursement agreement with, and satisfactory to, the person(s) originally responsible for the cost of preparing the Specific Plan, including costs incurred pursuant to CEQA.

4. PUBLIC BENEFITS.

4.1 Intent. The parties acknowledge and agree that development of the Property will result in substantial public needs that will not be fully met by the Development Plan and further acknowledge and agree that this Agreement confers substantial private benefits on OWNER that should be balanced by commensurate public benefits. Accordingly, the parties intend to provide consideration to the public to balance the private benefits

conferred on OWNER by providing more fully for the satisfaction of the public needs resulting from the Project.

4.2 Development Impact Fees.

4.2.1 Amount of Development Impact Fee. Development Impact Fees (DIF) shall be paid by OWNER. The Development Impact Fee amounts to be paid by OWNER shall be the amounts that are in effect at the time such amounts are due. Nothing contained in this Agreement shall affect the ability of the CITY to impose new Development Impact Fees or amend the amounts of existing Development Impact Fees. Additionally, nothing contained in this Agreement shall affect the ability of other public agencies that are not controlled by CITY to impose and amend, from time to time, Development Impact Fees established or imposed by such other public agencies, even though such Development Impact Fees may be collected by CITY.

4.2.2 Time of Payment. The Development Impact Fees required pursuant to Section 4.2.1 shall be paid to CITY prior to the issuance of building permit for each applicable building (subject to the application/use of available fee deferrals or credits), except for the Species, Habitat Conservation, and Open Space Mitigation Development Impact Fee, which shall be paid by OWNER to CITY prior to the issuance of a grading permit.

4.3 Responsibility for Construction of Public Improvements.

4.3.1 Timely Construction of Public Infrastructure. The phasing of the area wide infrastructure construction within the vicinity of the Project shall be as approved by the CITY. OWNER shall be responsible for the timely construction and completion of all public infrastructure required for the Project as described and depicted in the Infrastructure Improvements Exhibit and any and all parcel map conditions. Unless otherwise specified in the Parcel Map conditions, and subject to the provisions of Section 3.5 and 3.6, all other required Improvements for the parcel map, shall be substantially completed and operational prior to, and as a condition precedent to, OWNER requesting and CITY's granting of a final occupancy permit for any buildings to be constructed on the Property within the applicable parcel map. All Infrastructure and Improvements shall be completed as required by the Subdivision Agreement/Parcel Map conditions for Parcel Map No. 20517.

4.3.3 Construction of Public Infrastructure by Third Parties. CITY and OWNER acknowledge that a portion of the Improvements described in Exhibit E and depicted in Exhibit F are necessary for the development of surrounding properties within the Ontario Ranch and the other property owners are also obligated to construct the Improvements or portions thereof. As such, CITY agrees that OWNER's obligation to construct the Improvements may be satisfied by third party owners pursuant to separate written agreements between OWNER and said third party undertaking the construction of the Improvements. Nothing in this Agreement shall be construed to prohibit the coordination of the construction of the Improvements between private parties, including the allocation of costs for the construction of the Improvements. Notwithstanding anything to the

contrary herein, any applicable DIF Credits may be transferred and assigned from one (1) party to another with respect to the construction of the Improvements and such transfer or assignment shall not require the conveyance of any real property.

4.3.4 Availability and Use of Recycled Water. OWNER agrees that recycled water shall be available and utilized by OWNER for all construction-related water uses including prior to, and during, any grading of the Property. OWNER and CITY agree that OWNER may, in-lieu of utilizing recycled water during grading and construction, utilize water from existing agricultural wells on the Property subject to the terms of a separate Well Use Agreement between the CITY and OWNER.

4.3.5 Construction of DIF Program Infrastructure. To the extent OWNER is required to construct and completes construction of public improvements that are included in CITY's Development Impact Fee Program, CITY agrees that CITY shall issue DIF Credit in accordance with the provisions of a separate Fee Credit Agreement between CITY and OWNER. Limitations on the use of DIF Credit issued to OWNER to offset OWNER's DIF payment obligations shall also be subject to the provisions of a separate Fee Credit Agreement. OWNER may be eligible to receive DIF Credit from OWNER's construction of DIF Program Infrastructure. Any such DIF Credit shall be subject to a Fee Credit Agreement between CITY and OWNER. CITY and OWNER agree that the Fee Credit Agreement between CITY and OWNER shall comply with CITY's adopted policies applicable to such agreements.

4.4 Public Services Funding Fee.

4.4.1 Requirement for Payment of Public Services Funding Fee. In order to ensure that the adequate provision of public services, including without limitation, police, fire and other public safety services, are available to each Project in a timely manner, OWNER shall pay to CITY a "Public Services Funding Fee." The Public Services Funding Fee shall apply to residential and non-residential uses as set forth below.

4.4.2 Public Services Funding Fee Amount. OWNER shall pay a Public Services Funding fee in a single installment payment in the amount of Seventy-Five Cents ($.75) per square foot of each non-residential building. The single installment for non-residential uses shall be due and payable on a building-by-building basis prior to the issuance of the building permit for a non-residential building. The amount of the Single Installment for non-residential uses shall automatically increase by percentage increase (but no decrease) in the Consumer Price Index (Riverside – San Bernardino – Ontario, CA), (December 2017=100) over the preceding year on January 1st of each year, beginning on January 1, 2024. OWNER may exercise the option to pay any single installment amounts for the remainder of the non-residential square footage within the Project on or before December 31st, before the Single Installment amount is automatically increased.

4.5 Water Availability.

4.5.1 Water Availability. The Property requires the completion of the Phase 2 Water Improvements (Phase 2A and 2B) for permanent water system capacity and supply. Until the Phase 2 Water Improvements are fully constructed and completed, OWNER acknowledges that the Project shall have sufficient water capacity and supply on an interim basis made available through the construction of the Potable Water Improvements (as described in Exhibit E), the Phase 2A Water Improvements, and the Interim Chino Avenue Loop depicted in Exhibit F. OWNER acknowledges and agrees that the CITY shall not issue final certificates of occupancy for the Project until the completion of the Potable Water Improvements (as described in Exhibit E), the Phase 2A Water Improvements and the Interim Chino Avenue Loop, as depicted in Exhibit F. OWNER further acknowledges and agrees the Property requires the Phase 2 Water Improvements as depicted in Exhibit F.

4.5.2 Phase 2 Water Construction Fee. Prior to CITY's issuance of a grading permit for any parcel of the Property (each, a "Grading Permit"), OWNER shall pay to CITY the applicable Phase 2 Water Construction Fee. The Phase 2 Water Construction Fee shall be calculated based on the following formula: (a) the regional water development impact fee, based on the square footage of developable property and the approved land use category for each Phase of the Project (the "Base Regional Water DIF"), PLUS (b) OWNER's pro rata share of the difference between the total projected cost of construction of the Phase 2 Water Improvements (the "Pro Rata Share") and the Base Regional Water DIF. To determine the Pro Rata Share, which may fluctuate over time, CITY shall, at the time OWNER applies for a Grading Permit, calculate the total projected cost of construction of the Phase 2 Water Improvements and subtract from that amount (y) all Phase 2 Water Construction Fees previously collected and (z) the aggregate Base Regional Water DIF to be paid by OWNER and all developers then at that time obligated to pay a Base Regional Water DIF specifically for use of the Phase 2 Water Improvements (together, the "Phase 2 Water Developers"). If the difference is zero or a number less than zero, then there is no Pro Rata Share and the Phase 2 Water Construction Fee shall equal the sum of all Base Regional Water DIF to be paid by all Phase 2 Water Developers. If the difference results in a positive number, the funding gap (the "Funding Gap") shall be divided by the total acreage of land to be developed by the Phase 2 Water Developers to obtain a Funding Gap "per acre" amount (the "Funding Gap Per Acre Amount"). Each Phase 2 Water Developer's respective total acreage to be developed shall then be multiplied by the Funding Gap Per Acre Amount to obtain each Phase 2 Water Developer's Pro Rata Share, which will then be added to each Phase 2 Water Developer's Base Regional Water DIF to obtain the Phase 2 Water Construction Fee due and payable at the time of issuance of the applicable Grading Permit.

4.5.3 DIF Credit for Phase 2 Water Construction Fees. Within thirty (30) days of OWNER's payment of each Phase 2 Water Construction Fee, CITY shall issue a certificate of DIF Credit which may be used to offset OWNER's DIF obligations in the Regional Water DIF Category. The form of the Certificate of DIF Credit shall be as described in Exhibit G, attached hereto and incorporated herein. OWNER acknowledges that any Regional Water DIF Credit issued to OWNER shall not be used to satisfy Phase 2 Water Construction Fees and may only be used to offset OWNER's DIF obligations in the Regional Water DIF Category.

4.5.4 Additional Contributions for Phase 2 Water Improvements. OWNER acknowledges and agrees that, as of the Effective Date of this Agreement, the CITY does not have sufficient funding to construct and complete the Phase 2 Water Improvements. OWNER agrees to provide the CITY with additional contributions for the Phase 2 Water Improvements prior to the issuance of a Grading Permit for any Phase within the Project, pursuant to the Pro Rata Share calculation as set forth in Section 4.5.2 above. OWNER acknowledges and agrees that the CITY has the right to conduct subsequent reviews of the available funding for the construction of, or continuation of the construction of, the Phase 2 Water Improvements. If at any time outside of OWNER's submission of a request for a Grading Permit the CITY determines that there is not sufficient funding for the construction of, or continuation of the construction of, the Phase 2 Water Improvements necessary to support current and anticipated future development within the Ontario Ranch area served by the Phase 2 Water Improvements, OWNER agrees to pay such subsequent additional contribution payment necessary from the OWNER (on a pro rata basis with other Phase 2 Water Developers then existing at the time) to the CITY to initiate construction of, or continue construction of, the Phase 2 Water Improvements. The CITY shall determine OWNER's additional contribution amount (above and beyond OWNER's Pro Rata Share) and such amount shall be due and payable to the CITY within thirty (30) days of written notice from the CITY to OWNER.

4.5.5 Future Reimbursement of Pro Rata Share of Phase 2 Water Construction Fees. OWNER agrees that the CITY will be responsible for the construction and completion of the Phase 2 Water Improvements, as depicted in Exhibit F. Subject to the successful completion of the Phase 2 Water Improvements, CITY and OWNER shall meet periodically and/or as needed from the date of completion of the Phase 2 Water Improvements, to jointly develop a plan and mutually enter into an agreement for the reimbursement of OWNER's Pro Rata Share of Phase 2 Water Construction Fees that may be reimbursed from future development in the 925 Zone as depicted in the City's Domestic Water Master Plan, following any reallocation of each Phase 2 Water Developer's Pro Rata Share, CITY's collection of additional Regional Water DIF in connection with construction of the Phase 2 Water Improvements, and after the completion of the Phase 2 Water Improvements. Such agreement shall be approved at the sole discretion of the Ontario City Council.

4.6 Compliance with Public Benefits Requirements.

4.6.1 Failure to Provide Public Benefits. In the event OWNER fails or refuses to comply with any condition referenced in Section 4.1 through 4.5, or challenges (whether administratively or through legal proceedings) the imposition of such conditions, OWNER shall be deemed in default of this Agreement, thereby entitling CITY to any and all remedies available to it, including, without limitation, the right of CITY to withhold OWNER's Project-related building permits, certificates of occupancy, or discretionary approvals, without liability. Nothing herein shall waive OWNER's right to assert a default (or failure to perform) by CITY has excused OWNER's performance under this Agreement.

5. FINANCING OF PUBLIC IMPROVEMENTS.

5.1 Financing Mechanism(s). OWNER agrees that, prior to the recordation of any Parcel Map, the property subject to such Parcel Map shall be included in a CFD to finance CITY services through annual special taxes that will initially be Twenty-Seven Cents ($.27) per square foot for non-residential buildings. These amounts shall be subject to an automatic increase at a rate not to exceed four (4%) percent per year. Depending on the fiscal year that the CFD is formed and the CFD tax is levied, the annual special taxes may be higher. CITY shall be the sole and exclusive lead agency in the formation of any CFD, assessment district or other public financing mechanism within the Property; provided however, that the proceeds of any such CFD, assessment district, or financing mechanism may be used, subject to restrictions that may be imposed by applicable law, for the purposes of acquiring, constructing or maintaining public facilities to be owned or operated by other public agencies, including, without limitation those facilities owned or operated by a school district. In addition to the rights of the CITY pursuant to section 5.1 hereof, CITY shall have the right, but not the obligation, to condition the formation of any CFD, assessment district or other public financing mechanism within the Property on the OWNER mitigating all Project-related impacts to the applicable school district(s) as required by such school district(s). Written evidence by such school district(s) may be required by the CITY as the condition to the formation of any CFD, assessment district or other public financing mechanism within the Property, or any steps preliminary thereto, including, without limitation, the adoption of any resolution of intention to form such CFD, assessment district or other public financing mechanism within the Property. It is not the intent of the parties hereto, by this provision, to prohibit or otherwise limit CITY's ability to take any and all necessary steps requisite to the formation of the CFD to finance CITY services through annual special taxes as set forth in this Section 5.1. Formation of any CFD, assessment district or other public financing mechanism within the Property, shall be subject to CITY's ability to make all findings required by applicable law and complying with all applicable legal procedures and requirements including, without limitation, CITY's public financing district policies as such policies may be amended from time to time. Notwithstanding the foregoing, it is acknowledged and agreed by the parties that nothing contained in this Agreement shall be construed as requiring CITY or the City Council to form any such district.

6. [OMITTED]

7. REVIEW FOR COMPLIANCE.

7.1 Periodic and Special Reviews.

7.1.1 Time for and Initiation of Periodic Review. The CITY shall review this Agreement every twelve (12) months from the Effective Date in order to ascertain the good faith compliance by the OWNER with the terms of this Agreement. The OWNER shall submit an Annual Monitoring Report to CITY, in a form acceptable to the City Manager, along with any applicable processing charge within ten (10) days after each anniversary date of the Effective Date of this Agreement. Within fifteen (15) days after the receipt of the Annual Monitoring Report, CITY shall review the Annual Monitoring

Report. Prior to the expiration of the fifteen (15) day review period, CITY shall either issue a notice of continuing compliance or a notice of non-compliance and a notice of CITY's intent to conduct a Special Review pursuant to Sections 7.1.2 through 7.1.6. Issuance of a notice of continuing compliance may be issued by the City Manager or his designee.

7.1.2 Initiation of Special Review. A special review may be called either by agreement between the parties or by initiation in one or more of the following ways:

(a) Recommendation of the Planning staff;

(b) Affirmative vote of at least four (4) members of the Planning Commission; or

(c) Affirmative vote of at least three (3) members of the City Council.

7.1.3 Notice of Special Review. The City Manager shall begin the special review proceeding by giving notice that the CITY intends to undertake a special review of this Agreement to the OWNER. Such notice shall be given at least ten (10) days in advance of the time at which the matter will be considered by the Planning Commission.

7.1.4 Public Hearing. The Planning Commission shall conduct a hearing at which the OWNER must demonstrate good faith compliance with the terms of this Agreement. The burden of proof on this issue is upon the OWNER.

7.1.5 Findings Upon Public Hearing. The Planning Commission shall determine upon the basis of substantial evidence whether or not the OWNER has, for the period under review, complied in good faith with the terms and conditions of this Agreement.

7.1.6 Procedure Upon Findings.

(a) If the Planning Commission finds and determines on the basis of substantial evidence that the OWNER has complied in good faith with the terms and conditions of this Agreement during the period under review, the review for that period is concluded.

(b) If the Planning Commission finds and determines on the basis of substantial evidence that the OWNER has not complied in good faith with the terms and conditions of this Agreement during the period under review, the Planning Commission may recommend to the City Council to modify or terminate this Agreement.

(c) The OWNER may appeal a determination pursuant to paragraph (b) to the City Council in accordance with the CITY's rule for consideration of appeals in zoning matters generally.

7.2 Proceedings Upon Modification or Termination. If, upon a finding under Section 7.1.6(b), the CITY determines to proceed with modification or termination of this Agreement, the CITY shall give notice to the property OWNER of its intention so to do. The notice shall contain:

(a) The time and place of the hearing;

(b) A statement as to whether or not the CITY proposes to terminate or to modify this Agreement; and

(c) Other information that the CITY considers necessary to inform the OWNER of the nature of the proceeding.

7.3 Hearing on Modification or Termination. At the time and place set for the hearing on modification or termination, the OWNER shall be given an opportunity to be heard. The OWNER shall be required to demonstrate good faith compliance with the terms and conditions of this Agreement. The burden of proof on this issue shall be on the OWNER. If the City Council finds, based upon substantial evidence in the administrative record, that the OWNER has not complied in good faith with the terms and conditions of the agreement, the City Council may terminate this Agreement or modify this Agreement and impose those conditions to the action it takes as it considers necessary to protect the interests of the CITY. The decision of the City Council shall be final, subject only to judicial review pursuant to Section 1094.5 of the Code of Civil Procedure.

7.4 Certificate of Agreement Compliance. If, at the conclusion of a Periodic or Special Review, OWNER is found to be in compliance with this Agreement, CITY shall, upon written request by OWNER, issue a Certificate of Agreement Compliance ("Certificate") to OWNER stating that after the most recent Periodic or Special Review and based upon the information known or made known to the Planning Director and City Council that (1) this Agreement remains in effect and (2) OWNER is not in default. The Certificate shall be in recordable form, shall contain information necessary to communicate constructive record notice of the finding of compliance, shall state whether the Certificate is issued after a Periodic or Special Review and shall state the anticipated date of commencement of the next Periodic Review. OWNER may record the Certificate with the County Recorder. Whether or not the Certificate is relied upon by assignees or other transferees or OWNER, CITY shall not be bound by a Certificate if a default existed at the time of the Periodic or Special Review, but was concealed from or otherwise not known to the Planning Director or City Council.

8. [OMITTED]

9. DEFAULT AND REMEDIES.

9.1 Remedies in General. It is acknowledged by the parties that CITY would not have entered into this Agreement if it were to be liable in damages under this Agreement, or with respect to this Agreement or the application thereof. In general, each of the parties hereto may pursue any remedy at law or equity available for the breach of any provision of this Agreement, except that (i) CITY shall not be liable in damages to OWNER, or to any successor in interest of OWNER, or to any other person, and OWNER covenants not to sue for damages or claim any damages and (ii) OWNER shall not be liable in damages to CITY, or to any other person, and CITY covenants not to sue for damages or claim any damages:

(a) For any breach of this Agreement or for any cause of action which arises out of this Agreement; or

(b) For the taking, impairment or restriction of any right or interest conveyed or provided under or pursuant to this Agreement; or

(c) Arising out of or connected with any dispute, controversy or issue regarding the application or interpretation or effect of the provisions of this Agreement.

9.2 Specific Performance. The parties acknowledge that money damages and remedies at law generally are inadequate and specific performance and other non-monetary relief are particularly appropriate remedies for the enforcement of this Agreement and should be available to all parties for the following reasons:

(a) Money damages are unavailable against CITY and OWNER as provided in Section 9.1 above.

(b) Due to the size, nature and scope of the Project, it may not be practical or possible to restore the Property to its natural condition once implementation of this Agreement has begun. After such implementation, OWNER may be foreclosed from other choices it may have had to utilize the Property or portions thereof. OWNER has invested significant time and resources and performed extensive planning and processing of the Project in agreeing to the terms of this Agreement and will be investing even more significant time and resources in implementing the Project in reliance upon the terms of this Agreement, and it is not possible to determine the sum of money which would adequately compensate OWNER for such efforts.

9.3 Release. Except for non-damage remedies, including the remedies of judicial review and of specific performance as provided for in Sections 7.3 and 9.2, respectively,, OWNER, for itself, its successors and assignees, hereby releases the CITY, its officers, agents and employees from any and all claims, demands, actions, or suits of any kind or nature arising out of any liability, known or unknown, present or future, including, but not limited to, any claim or liability, based or asserted, pursuant to Article I, Section 19 of the California Constitution, the Fifth Amendment of the United States Constitution, or any other law or ordinance which seeks to impose any other liability or damage, whatsoever, upon the CITY because it entered into this Agreement or because of the terms of this Agreement.

9.4 Termination or Modification of Agreement for Default of OWNER. Subject to the provisions contained in Sections 7.2 and 7.3 herein, CITY may terminate or modify this Agreement for any failure of OWNER to perform any material duty or obligation of OWNER under this Agreement, or to comply in good faith with the terms of this Agreement (hereinafter referred to as "default"); provided, however, CITY may terminate or modify this Agreement pursuant to this Section only after providing written notice to OWNER of default setting forth the nature of the default and the actions, if any, required by OWNER to cure such default and, where the default can be cured, OWNER has failed to take such

actions and cure such default within 60 days after the effective date of such notice or, in the event that such default cannot be cured within such 60 day period but can be cured within a longer time, has failed to commence the actions necessary to cure such default within such 60 day period and to diligently proceed to complete such actions and cure such default.

9.5 Termination of Agreement for Default of CITY. OWNER may terminate this Agreement only in the event of a default by CITY in the performance of a material term of this Agreement and only after providing written notice to CITY of default setting forth the nature of the default and the actions, if any, required by CITY to cure such default and, where the default can be cured, CITY has failed to take such actions and cure such default within 60 days after the effective date of such notice or, in the event that such default cannot be cured within such 60 day period but can be cured within a longer time, has failed to commence the actions necessary to cure such default within such 60 day period and to diligently proceed to complete such actions and cure such default.

10. THIRD PARTY LITIGATION.

10.1 General Plan Litigation. CITY has determined that this Agreement is consistent with the General Plan, as such General Plan exists as of the Effective Date ("General Plan"), and that the General Plan meets all requirements of law. OWNER has reviewed the General Plan and concurs with CITY's determination. CITY shall have no liability in damages under this Agreement for any failure of CITY to perform under this Agreement or the inability of OWNER to develop the Property as contemplated by the Development Plan or this Agreement as the result of a judicial determination that on the Effective Date, or at any time thereafter, the General Plan, or portions thereof, are invalid or inadequate or not in compliance with law.

10.2 Third Party Litigation Concerning Agreement. OWNER shall defend, at its expense, including attorneys' fees, indemnify, and hold harmless CITY, its agents, officers and employees from any claim, action or proceeding against CITY, its agents, officers, or employees to attack, set aside, void, or annul the approval of this Agreement or the approval of any permit granted pursuant to this Agreement. CITY shall promptly notify OWNER of any such claim, action or proceeding, and CITY shall cooperate in the defense. If CITY fails to promptly notify OWNER of any such claim, action or proceeding, or if CITY fails to cooperate in the defense, OWNER shall not thereafter be responsible to defend, indemnify, or hold harmless CITY. CITY may in its discretion participate in the defense of any such claim, action or proceeding.

10.3 Indemnity. In addition to the provisions of Section 10.2 above, OWNER shall indemnify and hold CITY, its officers, agents, employees and independent contractors free and harmless from any liability whatsoever, based or asserted upon any act or omission of OWNER, its officers, agents, employees, subcontractors and independent contractors, for property damage, bodily injury, or death (OWNER's employees included) or any other element of damage of any kind or nature, to the extent relating to or in any way connected with or arising from the activities contemplated hereunder, including, but not limited to, the study, design, engineering, construction, completion, failure and

conveyance of the public improvements, save and except claims for damages arising through the sole active negligence or sole willful misconduct of CITY. OWNER shall defend, at its expense, including attorneys' fees, CITY, its officers, agents, employees and independent contractors in any legal action based upon such alleged acts or omissions. CITY may in its discretion participate in the defense of any such legal action. OWNER's indemnity obligation shall terminate following CITY's legal acceptance of (i.e. taking of title to) the Improvements.

10.4 Environment Assurances. OWNER shall indemnify and hold CITY, its officers, agents, and employees free and harmless from any liability, to the extent based or asserted, upon any act or omission of OWNER, its officers, agents, employees, subcontractors, predecessors in interest, successors, assigns and independent contractors for any violation of any federal, state or local law, ordinance or regulation relating to industrial hygiene or to environmental conditions on, under or about the Property during OWNER'S period of ownership of the Property, including, but not limited to, soil and groundwater conditions caused by OWNER, and OWNER shall defend, at its expense, including attorneys' fees, CITY, its officers, agents and employees in any action based or asserted upon any such alleged act or omission. CITY may in its discretion participate in the defense of any such action.

10.5 Reservation of Rights. With respect to Sections 10.2, 10.3 and 10.4 herein, CITY reserves the right to either (1) approve the attorney(s) which OWNER selects, hires or otherwise engages to defend CITY hereunder, which approval shall not be unreasonably withheld, or (2) conduct its own defense, provided, however, that OWNER shall reimburse CITY forthwith for any and all reasonable expenses incurred for such defense, including attorneys' fees, upon billing and accounting therefor.

10.6 Survival. The provisions of this Sections 10.1 through 10.6, inclusive, shall survive the termination of this Agreement.

11. MORTGAGEE PROTECTION.

11.1 Mortgagee Protection. The parties hereto agree that this Agreement shall not prevent or limit OWNER, in any manner, at OWNER's sole discretion, from encumbering the Property or any portion thereof or any improvement thereon by any mortgage, deed of trust or other security device securing financing with respect to the Property. CITY acknowledges that the lenders providing such financing may require certain Agreement interpretations and modifications and agrees upon request, from time to time, to meet with OWNER and representatives of such lenders to negotiate in good faith any such request for interpretation or modification. CITY will not unreasonably withhold its consent to any such requested interpretation or modification provided such interpretation or modification is consistent with the intent and purposes of this Agreement. Any Mortgagee of the Property shall be entitled to the following rights and privileges:

(a) Neither entering into this Agreement nor a breach of this Agreement shall defeat, render invalid, diminish or impair the lien of any mortgage on the Property made in good faith and for value, unless otherwise required by law.

(b) The Mortgagee of any mortgage or deed of trust encumbering the Property, or any part thereof, which Mortgagee, has submitted a request in writing to the CITY in the manner specified herein for giving notices, shall be entitled to receive written notification from CITY of any default by OWNER in the performance of OWNER's obligations under this Agreement.

(c) If CITY timely receives a request from a Mortgagee requesting a copy of any notice of default given to OWNER under the terms of this Agreement, CITY shall provide a copy of that notice to the Mortgagee within ten (10) days of sending the notice of default to OWNER. The Mortgagee shall have the right, but not the obligation, to cure the default during the remaining cure period allowed such party under this Agreement.

(d) Any Mortgagee who comes into possession of the Property, or any part thereof, pursuant to foreclosure of the mortgage or deed of trust, or deed in lieu of such foreclosure, shall take the Property, or part thereof, subject to the terms of this Agreement. Notwithstanding any other provision of this Agreement to the contrary, no Mortgagee shall have an obligation or duty under this Agreement to perform any of OWNER's obligations or other affirmative covenants of OWNER hereunder, or to guarantee such performance; provided, however, that to the extent that any covenant to be performed by OWNER is a condition precedent to the performance of a covenant by CITY, the performance thereof shall continue to be a condition precedent to CITY's performance hereunder, and further provided that any sale, transfer or assignment by any Mortgagee in possession shall be subject to the provisions of Section 2.4 of this Agreement

(e) In the event of a default by OWNER, any Mortgagee shall have the right to remedy, or cause to be remedied, such default within sixty (60) days following the later to occur of (i) the date of Mortgagee's receipt of the notice referred to in Section 9.4 above, or (ii) the expiration of the period provided herein for OWNER to remedy or cure such default, and CITY shall accept such performance by or at the insistence of the Mortgagee as if the same had been timely made by OWNER; provided, however, that (i) if such default is not capable of being cured within the timeframes set forth in this Section and Mortgagee commences to cure the default within such timeframes, then Mortgagee shall have such additional time as is required to cure the default so long as Mortgagee diligently prosecutes the cure to completion and (ii) if possession of the Property (or portion thereof) is required to effectuate such cure or remedy, the Mortgagee shall be deemed to have timely cured or remedied if it commences the proceedings necessary to obtain possession thereof within sixty (60) days after receipt of the copy of the notice, diligently pursues such proceedings to completion, and, after obtaining possession, diligently completes such cure or remedy.

12. MISCELLANEOUS PROVISIONS.

12.1 Recordation of Agreement. This Agreement and any amendment or cancellation thereof shall be recorded with the San Bernardino County Recorder by the City Clerk within ten (10) days after the CITY executes this Agreement, as required by Section 65868.5 of the Government Code. If the parties to this Agreement or their successors in interest amend or cancel this Agreement as provided for herein and in Government Code

Section 65868, or if the CITY terminates or modifies the agreement as provided for herein and in Government Code Section 65865.1 for failure of the applicant to comply in good faith with the terms or conditions of this Agreement, the City Clerk shall have notice of such action recorded with the San Bernardino County Recorder.

12.2 Entire Agreement. This Agreement sets forth and contains the entire understanding and agreement of the parties, and there are no oral or written representations, understandings or ancillary covenants, undertakings or agreements which are not contained or expressly referred to herein. No testimony or evidence of any such representations, understandings or covenants shall be admissible in any proceeding of any kind or nature to interpret or determine the terms or conditions of this Agreement.

12.3 Severability. If any term, provision, covenant or condition of this Agreement shall be determined invalid, void or unenforceable, the remainder of this Agreement shall not be affected thereby to the extent such remaining provisions are not rendered impractical to perform taking into consideration the purposes of this Agreement. Notwithstanding the foregoing, the provision of the Public Benefits set forth in Section 4 of this Agreement, including the payment of the fees set forth therein, are essential elements of this Agreement and CITY would not have entered into this Agreement but for such provisions, and therefore in the event such provisions are determined to be invalid, void or unenforceable, this entire Agreement shall be null and void and of no force and effect whatsoever.

12.4 Interpretation and Governing Law. This Agreement and any dispute arising hereunder shall be governed and interpreted in accordance with the laws of the State of California. This Agreement shall be construed as a whole according to its fair language and common meaning to achieve the objectives and purposes of the parties hereto, and the rule of construction to the effect that ambiguities are to be resolved against the drafting party shall not be employed in interpreting this Agreement, all parties having been represented by counsel in the negotiation and preparation hereof.

12.5 Section Headings. All section headings and subheadings are inserted for convenience only and shall not affect any construction or interpretation of this Agreement.

12.6 Singular and Plural. As used herein, the singular of any word includes the plural.

12.7 Joint and Several Obligations. Pursuant to Section 2.4, if at any time during the term of this Agreement the Property is subsequently owned, in whole or in part, by more than one owner, all obligations of such owners under this Agreement shall be joint and several, and the default of any such owner shall be the default of all such owners. Notwithstanding the foregoing, no owner of a single lot which has been finally subdivided and sold to such owner as a member of the general public or otherwise as an ultimate user shall have any obligation under this Agreement except as provided under Section 4 hereof.

12.8 Time of Essence. Time is of the essence in the performance of the provisions of this Agreement as to which time is an element.

12.9 Waiver. Failure by a party to insist upon the strict performance of any of the provisions of this Agreement by the other party, or the failure by a party to exercise its rights upon the default of the other party, shall not constitute a waiver of such party's right to insist and demand strict compliance by the other party with the terms of this Agreement thereafter.

12.10 No Third-Party Beneficiaries. This Agreement is made and entered into for the sole protection and benefit of the parties and their successors and assigns. No other person shall have any right of action based upon any provision of this Agreement.

12.11 Force Majeure. Neither party shall be deemed to be in default where failure or delay in performance of any of its obligations under this Agreement is caused by floods, earthquakes, other Acts of God, fires, wars, riots or similar hostilities, strikes and other labor difficulties beyond the party's control, (including the party's employment force), government regulations, governmental orders related to statewide or national pandemics, any third party court actions challenging the Project (including but not limited to writs of mandate, restraining orders or injunctions), or other causes beyond the party's control. If any such events shall occur, the term of this Agreement and the time for performance by either party of any of its obligations hereunder may be extended by the written agreement of the parties for the period of time that such events prevented such performance, provided that the term of this Agreement shall not be extended under any circumstances for more than five (5) years.

12.12 Mutual Covenants. The covenants contained herein are mutual covenants and also constitute conditions to the concurrent or subsequent performance by the party benefited thereby of the covenants to be performed hereunder by such benefited party.

12.13 Successors in Interest. The burdens of this Agreement shall be binding upon, and the benefits of this Agreement shall inure to, all successors in interest to the parties to this Agreement. All provisions of this Agreement shall be enforceable as equitable servitudes and constitute covenants running with the land. Each covenant to do or refrain from doing some act hereunder with regard to development of the Property: (a) is for the benefit of and is a burden upon every portion of the Property; (b) runs with the Property and each portion thereof; and, (c) is binding upon each party and each successor in interest during ownership of the Property or any portion thereof.

12.14 Counterparts. This Agreement may be executed by the parties in counterparts, which counterparts shall be construed together and have the same effect as if all of the parties had executed the same instrument.

12.15 Jurisdiction and Venue. Any action at law or in equity arising under this Agreement or brought by a party hereto for the purpose of enforcing, construing or determining the validity of any provision of this Agreement shall be filed and tried in the Superior Court of the County of San Bernardino, State of California, and the parties hereto waive all provisions of law providing for the filing, removal or change of venue to any other court.

12.16 Project as a Private Undertaking. It is specifically understood and agreed by and between the parties hereto that the development of the Project is a private development, that neither party is acting as the agent of the other in any respect hereunder, and that each party is an independent contracting entity with respect to the terms, covenants and conditions contained in this Agreement. No partnership, joint venture or other association of any kind is formed by this Agreement. The only relationship between CITY and OWNER is that of a government entity regulating the development of private property and the owner of such property.

12.17 Further Actions and Instruments. Each of the parties shall cooperate with and provide reasonable assistance to the other to the extent contemplated hereunder in the performance of all obligations under this Agreement and the satisfaction of the conditions of this Agreement. Upon the request of either party at any time, the other party shall promptly execute, with acknowledgment or affidavit if reasonably required, and file or record such required instruments and writings and take any actions as may be reasonably necessary under the terms of this Agreement to carry out the intent and to fulfill the provisions of this Agreement or to evidence or consummate the transactions contemplated by this Agreement. The City Manager may delegate his powers and duties under this Agreement to an Assistant City Manager or other management level employee of the CITY.

12.18 Eminent Domain. No provision of this Agreement shall be construed to limit or restrict the exercise by CITY of its power of eminent domain.

12.19 Agent for Service of Process. In the event OWNER is not a resident of the State of California or it is an association, partnership or joint venture without a member, partner or joint venturer resident of the State of California, or it is a foreign corporation, then in any such event, OWNER shall file with the Planning Director, upon its execution of this Agreement, a designation of a natural person residing in the State of California, giving his or her name, residence and business addresses, as its agent for the purpose of service of process in any court action arising out of or based upon this Agreement, and the delivery to such agent of a copy of any process in any such action shall constitute valid service upon OWNER. If for any reason service of such process upon such agent is not feasible, then in such event OWNER may be personally served with such process out of this County and such service shall constitute valid service upon OWNER. OWNER is amenable to the process so served, submits to the jurisdiction of the Court so obtained and waives any and all objections and protests thereto.

12.20 Estoppel Certificate. Within thirty (30) business days following a written request by any of the parties, the other party shall execute and deliver to the requesting party a statement certifying that (i) either this Agreement is unmodified and in full force and effect or there have been specified (date and nature) modifications to the Agreement, but it remains in full force and effect as modified; and (ii) either there are no known current uncured defaults under this Agreement or that the responding party alleges that specified (date and nature) defaults exist. The statement shall also provide any other reasonable information requested. The failure to timely deliver this statement shall constitute a conclusive presumption that this Agreement is in full force and effect without modification

except as may be represented by the requesting party and that there are no uncured defaults in the performance of the requesting party, except as may be represented by the requesting party. OWNER shall pay to CITY all costs incurred by CITY in connection with the issuance of estoppel certificates requested by OWNER under this Section 12.20 prior to CITY's issuance of such certificates.

12.21 Authority to Execute. The person or persons executing this Agreement on behalf of OWNER warrants and represents that he or she/they have the authority to execute this Agreement on behalf of his or her/their corporation, partnership or business entity and warrants and represents that he or she/they has/have the authority to bind OWNER to the performance of its obligations hereunder.

12.22 Prevailing Wage. OWNER, for itself, its successors, and assigns, agrees, covenants, and warrants that the development of the Property, if any, shall comply with all applicable federal and state labor laws (including, without limitation, the requirement under California law to pay prevailing wages and hire apprentices), and all obligations as set forth herein.12.22.1 CITY makes no representations concerning prevailing wages in compliance with California Labor Code Section 1770 et seq.

12.22.2 OWNER acknowledges and agrees that it shall be independently responsible for reviewing the applicable laws and regulations with respect to the payment of prevailing wages and complying therewith. OWNER shall bear all risks of payment or non-payment of prevailing wages under California law and/or the implementation of Labor Code Section 1781, as the same may be amended from time to time, and/or any other similar law.

12.22.3 The foregoing indemnity shall survive termination of this Agreement and shall continue after completion of the construction and development of the Property by OWNER, its successors or assigns. OWNER shall be solely responsible for determining and effectuating compliance with such laws.

12.22.4 OWNER, ON BEHALF OF ITSELF, ITS SUCCESSORS, AND ASSIGNS, WAIVES AND RELEASES CITY FROM ANY RIGHT OF ACTION THAT MAY BE AVAILABLE TO OWNER PURSUANT TO LABOR CODE SECTION 1781 OR THE DAVIS BACON ACT. RELATIVE TO THE WAIVER AND RELEASE CONTAINED IN THIS SECTION 12.22, OWNER ACKNOWLEDGES THE PROTECTIONS OF CIVIL CODE SECTION 1542, WHICH READS AS FOLLOWS: A GENERAL RELEASE DOES NOT EXTEND TO CLAIMS THAT THE CREDITOR OR RELEASING PARTY DOES NOT KNOW OR SUSPECT TO EXIST IN HIS OR HER FAVOR AT THE TIME OF EXECUTING THE RELEASE, WHICH IF KNOWN BY HIM OR HER MUST HAVE MATERIALLY AFFECTED HIS OR HER SETTLEMENT WITH THE DEBTOR OR RELEASED PARTY.

INITIALS. BY INITIALING BELOW, OWNER KNOWINGLY AND VOLUNTARILY WAIVES THE PROVISIONS OF SECTION 1542 SOLELY WITH THE MATTERS WHICH ARE THE SUBJECT OF THE FOREGOING WAIVERS AND RELEASES:

Existing Development Approvals

On July 28, 2020, the Planning Commission:

a) Approved Resolution No. PC20-048, recommending the City Council certify the Environmental Impact Report (SCH #2019050018) for the Ontario Ranch Business Park Specific Plan (File No. PSP18-002).

b) Approved Resolution No. PC20-049, recommending the City Council approve the General Plan Amendment (File No. PGPA18-008).

c) Approved Resolution No. PC20-050, recommending the City Council approve the Ontario Ranch Business Park Specific Plan (File No. PSP18-002).

On September 15, 2020, the City Council:

a) Adopted Resolution No. 2020-159, certifying the Environmental Impact Report (SCH #2019050018) for the Ontario Ranch Business Park Specific Plan (File No. PSP18-002).

b) Adopted Resolution No. 2020-160, approving the General Plan Amendment (File No. PGPA18-008).

On October 6, 2020, the City Council:

a) Adopted Ordinance No. 3168, approving the Ontario Ranch Business Park Specific Plan.

On August 30, 2022, the Planning Commission:

a) Approved Resolution No. PC22-053, recommending the City Council certify the project Subsequent Environmental Impact Report (SCH#2019050018) for the Ontario Ranch Business Park Specific Plan Amendment (PSPA21-002).

b) Approved Resolution No. PC22-054, recommending the City Council approve File No. PSPA21-002, an amendment to the Ontario Ranch Business Park Specific Plan.

DESCRIPTION OF REQUIRED IMPROVEMENTS

OWNER shall design, construct, and complete the following Street, Sewer, Storm Drain, Potable Water, Recycled Water, and Fiber Optic improvements, prior to OWNER's request for any final certificate of occupancy permit for any building within the Property.

1. OWNER shall design, construct, and complete the following Improvements, Potable Water (WT), Storm Drain (SD), Streets (ST), Sewer (SW), Recycled Water (RW), and Fiber Optics (FO), as described, prior to OWNER's request for final occupancy of the first building:

    a. WT on Sultana Avenue between Eucalyptus Avenue and Merrill Avenue.

    b. WT on Campus Avenue between Eucalyptus Avenue and Merrill Avenue.

    c. WT on Eucalyptus Avenue between Sultana Avenue and Grove Avenue (Local Water DIF Project WT-011).

    d. WT on Eucalyptus Avenue between Grove Avenue and Carpenter Avenue (*Regional Water DIF Project, portion of Phase 2A Water*).

    e. WT on Merrill Avenue between Sultana Avenue and Carpenter Avenue (Local Water DIF Project WT-011).

    f. SW (Western Trunk Sewer) on Euclid Avenue between Kimball Avenue and Merrill Avenue (Regional Sewer DIF Project SW-002).

    g. SW (Western Trunk Sewer) on Merrill Avenue between Euclid Avenue and Campus Avenue (Regional Sewer DIF Project SW-002).

    h. SW on Sultana Avenue between Merrill Avenue and Eucalyptus Avenue.

    i. SW on Campus Avenue between Merrill Avenue and Eucalyptus Avenue.

    j. RW on Sultana Avenue between Eucalyptus Avenue and Merrill Avenue.

k. RW on Merrill Avenue between Sultana Avenue and Campus Avenue (Local Water DIF Project WT-016).

l. RW on Campus Avenue between Merrill Avenue and Eucalyptus Avenue.

m. SD onsite detention shall be designed, constructed, and completed by ONWER prior to issuance of the first building permit. However, OWNER is eligible to request from CITY a grading permit prior to completion of the SD onsite detention.

n. SD on Sultana Avenue between Eucalyptus Avenue and Merrill Avenue.

o. SD on Merrill Avenue between Euclid Avenue and Sultana Avenue.

p. SD on Merrill Avenue between Sultana Avenue and Campus Avenue.

q. SD on Campus Avenue between Eucalyptus Avenue and Merrill Avenue.

r. SD bleeder line or alternative interim connection at the discretion of the City Engineer, on Euclid Avenue south of Merrill Avenue. This shall connect to the SD on Merrill Avenue between Euclid Avenue and Campus Avenue.

s. Two (2) Debris Separation Baffle Boxes at the intersections of Euclid Avenue and Merrill Avenue.

t. Full half ST improvements on the south half and circulation land improvements on the north half of Eucalyptus Avenue, from Sultana Avenue to Campus Avenue.

u. Full half ST improvements on both sides of Merrill Avenue, between Euclid Avenue and Carpenter Avenue.

v. Full half ST improvements on the west side and circulation lane improvements on the east side of Campus Avenue, between Eucalyptus Avenue and Merrill Avenue.

w. Full half ST improvements on the east side and circulation lane improvements on the west side of Sultana Avenue, between Eucalyptus Avenue and Merrill Avenue.

x. Traffic Signals at Sultana Avenue and Eucalyptus Avenue, Sultana Avenue and Merrill Avenue, Campus Avenue and Eucalyptus Avenue, and Campus and Merrill Avenues.

y. Traffic Signal modifications at Euclid Avenue and Eucalyptus Avenue, and Euclid Avenue and Merrill Avenue.

z. FO on Eucalyptus Avenue between Sultana Avenue and Campus Avenue.

aa. FO on Merrill Avenue between Sultana Avenue and Campus Avenue.

bb. FO on Sultana Avenue between Eucalyptus Avenue and Merrill Avenue.

cc. FO on Campus Avenue between Eucalyptus Avenue and Merrill Avenue.

2. CITY shall design, construct, and complete the Phase 2 Water (WT) Improvements and Interim Chino Avenue Loop. The Phase 2 Water Improvements will be constructed by the CITY in phases, with the initial improvements, designated as Phase 2A Water Improvements, Interim Chino Avenue Loop, and Phase 2B Water Improvements as described below.

    a. Phase 2A Water Improvements shall consist of the following:

        i. WT on Grove Avenue between Eucalyptus Avenue and Chino Avenue (Regional Water DIF Project WT-010).

    b. Interim Chino Avenue Loop shall consist of the following:

        i. WT on Chino Avenue between Cucamonga Channel and Grove Avenue, which will provide the second point of connection from the 1010 Pressure Zone (Local Water DIF Project WT-009).

        ii. Pressure Reducing Station at Grove Avenue and Chino Avenue, which will provide the second point of connection from 1010 Pressure Zone (Future Local Water DIF Project WT-009).

OWNER shall pay one hundred percent (100%) of the costs to construct the Phase 2A Improvements and the Interim Chino Avenue Loop, within forty-five (45) days from the Effective Date of this Agreement, and such payment shall be the "Phase 2A Water Payment". The costs in the foregoing sentence shall equal the actual bid amount of the awarded contracts for the work, plus fifteen percent (15%). Upon OWNER's full and complete payment to CITY, the CITY shall issue a Certificate of DIF Credit in the Regional Water Category and/or the Local Adjacent Water Category, as appropriate. Each DIF Water Certificate shall be issued by CITY within thirty (30) days of the receipt of such required payment. CITY shall not issue any building permits until receipt of the full Phase 2A Water Payment.

c. Phase 2B Water Improvements shall consist of the following:

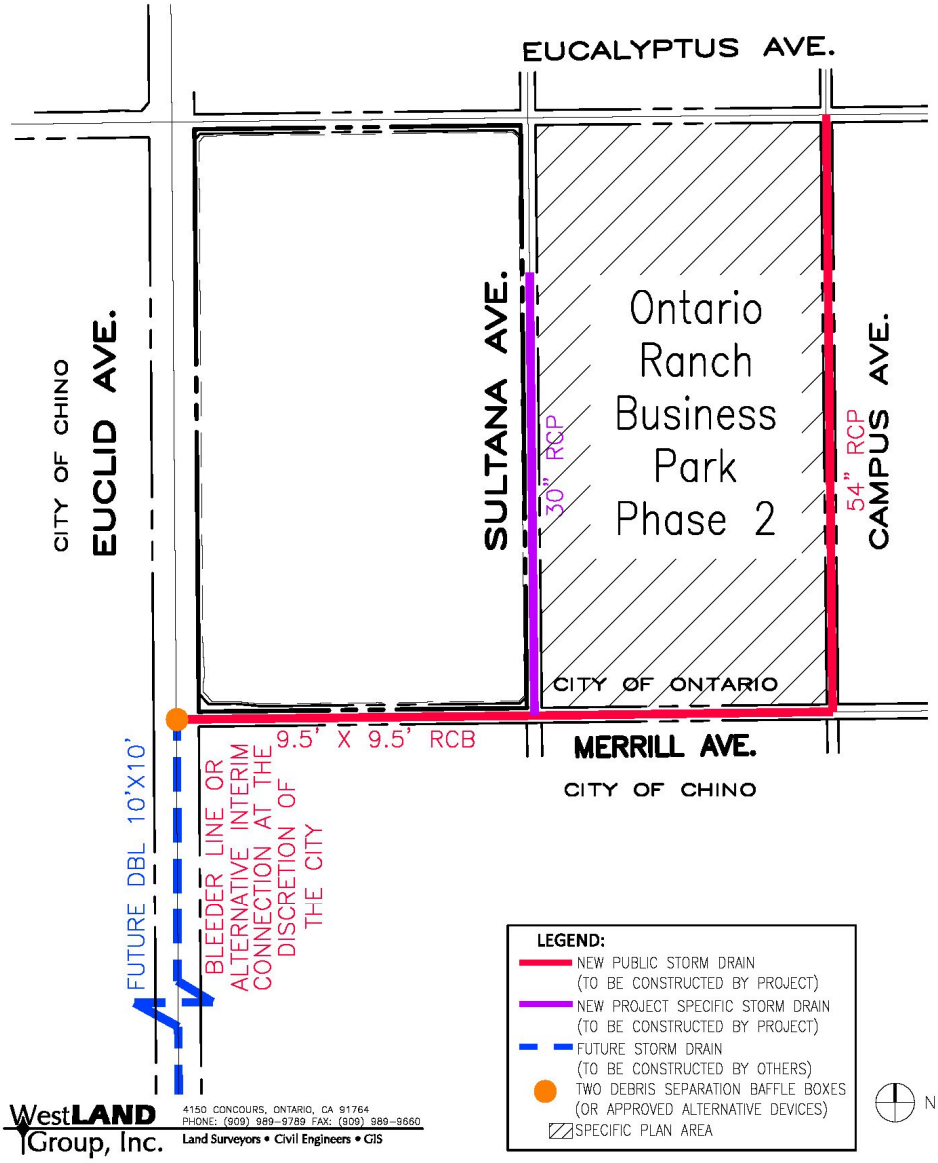
   i. WT on Francis Street between Grove Avenue and Bon View Avenue (Regional Water DIF Project WT-010).

   ii. WT on Bon View Avenue between Francis Street and the Bon View Reservoir Site (Regional Water DIF Project WT-010).

   iii. WT – Nine (9) Million Gallon reservoir at Bon View Reservoir Site (Regional Water DIF Project WT-014).

   iv. WT – Two (2) Groundwater Production Wells in vicinity of Bon View Reservoir Site (Regional Water DIF Project WT-007).

   v. WT on Grove Avenue between Chino Avenue and Francis Street (Regional Water DIF Project WT-010). The final design and alignment north of Riverside Drive is subject to change at the reasonable discretion of the CITY.



The Phase 2B Water Improvements will be constructed by the CITY and funded by OWNER, pursuant to Section 4.5 of this Agreement. CITY and OWNER mutually agree and understand, that with completion of Phase 2A and the Interim Chino Avenue Loop, the project will be utilizing interim water supply and storage capacity from the 1010' Pressure Zone and OWNER will be required to participate in the funding of future Phase 2 Water Improvements to support the permanent water supply and storage needs of future development within Ontario Ranch.

FORM OF CERTIFICATE OF REGIONAL DIF CREDIT

Pursuant to Section 4.5.3 of this Agreement by and between the City of Ontario and _____, dated _____, 20__, the terms and definitions of which are hereby incorporated herein by this reference and hereinafter called the "Development Agreement', the City of Ontario hereby certifies that OWNER is entitled to the following amount and nature of DIF Credits in the Regional Water DIF Infrastructure Category:

Amount of Credit: $_____

_____
Scott Ochoa, City Manager

Dated:_____

CITY OF ONTARIO *Agenda Report* **June 20, 2023**	**SECTION:** **PUBLIC HEARINGS**
Department: Development Administration Prepared By: Derrick E Womble Staff Member Presenting: Scott Murphy, Executive Director Community Development Approved By:	Submitted To: Council/OHA Approved: _____ Continued To: _____ Denied: _____ Item No: 29

SUBJECT: **A PUBLIC HEARING TO CONSIDER THE ADOPTION OF AN ORDINANCE APPROVING A DEVELOPMENT AGREEMENT (FILE NO. PDA22-005) BETWEEN THE CITY OF ONTARIO AND RB ONTARIO LLC**

RECOMMENDATION: That the City Council introduce and waive further reading of an Ordinance approving a Development Agreement (File No. PDA22-005) between the City of Ontario and RB Ontario LLC, to establish the terms and conditions associated with Tentative Tract Map 20536 (File No. PMTT22-021), a 23.2-acre property located approximately 875 feet south of the intersection of Riverside Drive and Archibald Avenue, within Planning Area 1 (Neighborhood 2) land use district of the Countryside Specific Plan.

THE FOLLOWING COUNCIL GOALS ARE BEING ACHIEVED:
Invest in the Growth and Evolution of the City's Economy
Operate in a Businesslike Manner
Focus Resources in Ontario's Commercial and Residential Neighborhoods
Invest in the City's Infrastructure (Water, Streets, Sewers, Parks, Storm Drains and Public Facilities)
Ensure the Development of a Well Planned, Balanced, and Self-Sustaining Community in Ontario Ranch

FISCAL IMPACT: The proposed Development Agreement (File No. PDA22-005) will not have a direct impact on the City's General Fund. The Development Agreement will provide funding from the formation of a Community Facilities District (CFD) for City services and facilities required to support the Countryside Specific Plan development, thereby mitigating the increased costs associated with such services. In addition, the City will receive public service funding fees plus development impact, compliance processing, licensing, and permitting fees. No General Fund revenue will be used to support the Ontario Ranch development.

BACKGROUND & ANALYSIS: The Ontario Ranch financial commitments required for construction of properties within a specific plan are substantial. Therefore, in order to adequately forecast these costs and gain assurance that the project may proceed under the existing policies, rules, and regulations, RB Ontario LLC (Applicant), has requested that the City enter into negotiations to create

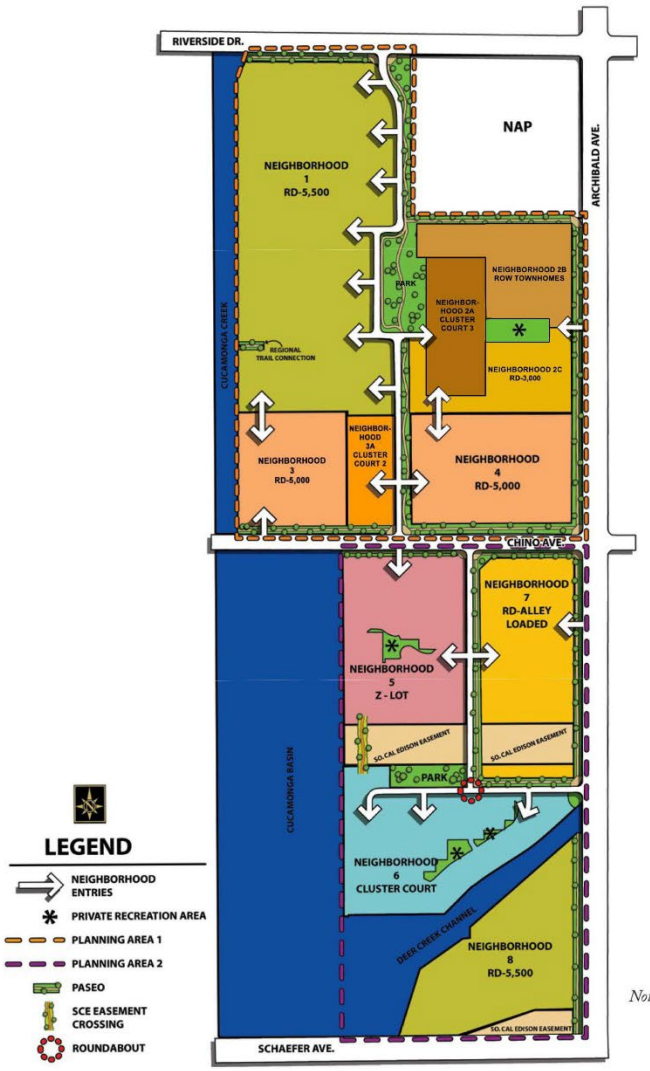
a Development Agreement (Agreement).

The Agreement proposes to include 23.2 acres of land within the Planning Area 1 (Neighborhood 2) land use district of the Specific Plan, as shown on the attached Exhibit A. The Agreement grants the Applicant a vested right to develop Tentative Tract Map 20536 (the Map), provided the Applicant complies with the terms and conditions of the Specific Plan and related EIR.

The Map (see attached Exhibit B) is located 875 feet south of the intersection of Riverside Drive and Archibald Avenue and proposes to subdivide 23.2 acres of land for condominium purposes, into 141 numbered lots and 27 lettered lots, to facilitate the development of 265 dwelling units, park land, private recreation area, private drives, and private alleys.

The term of the Agreement is for 10 years, with a 5-year option to extend. The main points of the Agreement address funding for all new City expenses created by the project, which includes: Development Impact Fees (DIF) for construction of public improvements (i.e. streets and bridges, sewer, water, storm drain and fiber); Public Service Funding to ensure adequate provisions of public services (police, fire and other public services); and the creation of a Community Facilities District (CFD) for the maintenance of public facilities.

It is important to note the Applicant is currently in negotiations with the current Owners to purchase the property. The Agreement shall be executed and recorded upon the acquisition of the property by the Applicant. In the event the Applicant is unable to acquire the property, the Agreement and Ordinance shall become null and void and of no further force and effect.



In considering the Agreement at their meeting on May 23, 2023, the Planning Commission found the Agreement to be consistent with State law, The Ontario Plan, and the City's Development Agreement policies. As a result, the Planning Commission adopted Resolution No. PC23-041 with a 4 to 0 vote, recommending City Council approval of the Agreement.

ENVIRONMENTAL REVIEW: An Addendum to the Countryside Specific Plan Environmental Impact Report (State Clearinghouse No. 2004071001), which was certified by the City Council on April 18, 2006, was prepared to be consistent with The Ontario Plan 2050 and associated Supplemental Environmental Impact Report (SEIR) (State Clearinghouse No. 2021070364), which was certified by the City Council on August 16, 2022. This application introduces no new significant environmental impacts. All previously adopted mitigation measures are a condition of Project approval and are incorporated herein by this reference.

May 23, 2023

303 East B Street, Ontario, California 91764 Phone: 909.395.2036 / Fax: 909.395.2420

FILE NO: PDA22-005

SUBJECT: A public hearing to consider a Development Agreement (File No. PDA22-005) between the City of Ontario and RB Ontario LLC, to establish the terms and conditions associated with Tentative Tract Map 20536 (File No. PMTT22-021), a 23.2 acre property located approximately 875 feet south of the intersection of Riverside Drive and Archibald Avenue, within Planning Area 1 (Neighborhood 2) land use district of the Countryside Specific Plan (File No. PSP04-001). APNs: 0218-111-60, 0218-111-61; **submitted by RB Ontario LLC. City Council action is required.**

PROPERTY OWNER: Robert B. Barth and Yang K. Barth, Trustees of the Barth Family Trust

---

RECOMMENDED ACTION: That the Planning Commission consider and recommend City Council adoption of an Ordinance approving the Development Agreement (File No. PDA22-0205) between the City of Ontario and RB Ontario LLC, pursuant to the facts and reasons contained in the staff report and attached Resolution.

PROJECT SETTING: The project site is comprised of 23.2 acres of land located approximately 875 south of the intersection of Riverside Drive and Archibald Avenue, within Planning Area 1 (Neighborhood 2) land use district of the Countryside Specific Plan, and is depicted in Figure 1: Project Location.

PROJECT ANALYSIS:

(1) Background — The Countryside Specific Plan, File No. PSP04-001 (the "Specific Plan") was approved, and the related Environmental Impact Report ("Certified EIR"; State Clearinghouse No. 2004071001) was certified by the City Council on April 18, 2006. The Specific Plan established the land use designations, development standards, and design guidelines on 178 gross acres of land, which included the potential development of 819 dwelling units and approximately 9.4 acres of paseos and parks throughout the Specific Plan Area.

Case Planner:	Derrick Womble, Departmental Administrator
Planning Director Approval:	
Submittal Date:	09/21/2022

Hearing Body	*Date*	*Decision*	*Action*
DAB	N/A	N/A	N/A
PC	05/23/2023	Approval	Recommend
CC	06/20/2023		Final

On August 16, 2022, the City Council certified The Ontario Plan 2050 Update Supplemental Environmental Impact Report ("SEIR") in conjunction with The Ontario Plan 2050 ("TOP 2050") (File No. PGPA20-002) General Plan update. Within the TOP 2050 and SEIR, the Project site land use was designated and analyzed as Low Medium Density Residential (5.1 to 11.0 du/ac) and Medium Density Residential (11.1 to 25.0 du/ac). The previous land use designation was Low Density Residential (2.1 to 5.0 du/ac).

The Applicant has submitted applications for a Specific Plan Amendment ("SPA") (File No. PSPA22-002) and Tentative Tract Map No. 20536 (File No. PMTT22-021) to facilitate the construction of 265 single-family and multiple-family dwellings on the Project site.

The Ontario Ranch financial commitments required for construction of properties within a specific plan are substantial. Therefore, in order to adequately forecast these costs and gain assurance that the project may proceed under the existing policies, rules, and regulations, RB Ontario LLC ("Applicant"), has requested that the City enter into negotiations to create a Development Agreement ("Agreement").

In accordance with California Government Code Section 65865, which in part states that that "[a]ny city… may enter into a Development Agreement with any person having a legal or equitable interest in real property for the development of such property…" and California Government Code Section 65865.52, which in part states that "a Development Agreement shall specify the duration of the Agreement, the permitted uses of the property… and may include conditions, terms, restrictions…," the City of Ontario adopted Resolution No. 2002-100 setting forth the procedures and requirements for consideration of Development Agreements. Pursuant to these procedures and requirements, staff entered into negotiations with the Applicant to create a Development Agreement for consideration by the Planning Commission and City Council.

The proposed Agreement is based on the model Development Agreement that was developed in coordination with the City Attorney and legal counsel for NMC Builders. This model Development Agreement is consistent with the provisions of the Construction Agreement. The terms of the agreement between NMC Builders' members requires that members of the LLC enter into Development Agreements that are consistent with the provisions of the Construction Agreement and are consistent with the commitments to assure adequate public infrastructure improvements are constructed by the Applicant.

(2) Staff Analysis — The Agreement proposes to include 23.2 acres of land within the Planning Area 1 (Neighborhood 2) land use districts of the Specific Plan, as shown on the attached Exhibit A. The Agreement grants the Applicant a vested right to develop Tentative Tract Map 20536 (the "Map"), provided the Applicant complies with the terms and conditions of the Specific Plan and related EIR.

The Map (see attached Exhibit B) is located 875 feet south of the intersection of Riverside Drive and Archibald Avenue, and proposes to subdivide 23.2 acres of land for

condominium purposes, into 141 numbered lots and 27 lettered lots, to facilitate the development of 265 dwelling units, park land, private recreation area, private drives, and private alleys.

The term of the Agreement is for 10 years, with a 5 year option to renew. The main points of the Agreement address funding for all new City expenses created by the project, which includes: Development Impact Fees ("DIF") for construction of public improvements (i.e. streets and bridges, sewer, water, storm drain and fiber); Public Service Funding to ensure adequate provisions of public services (police, fire and other public services); and the creation of a Community Facilities District ("CFD") for the maintenance of public facilities.

It is important to note the Applicant is currently in negotiations with the current Owners to purchase the property. The Agreement shall be executed and recorded upon the acquisition of the property by the Applicant. In the event the Applicant is unable to acquire the property, the Agreement shall become null and void and of no further force and effect.

Staff finds that the Agreement is consistent with State law, The Ontario Plan, and the City's Development Agreement policies. As a result, staff is recommending approval of the application to the Planning Commission. If the Planning Commission finds the Agreement is acceptable, a recommendation of approval to the City Council would be appropriate.

PUBLIC NOTIFICATION: The subject Agreement was advertised as a public hearing in at least one newspaper of general circulation in the City of Ontario (the Inland Valley Daily Bulletin newspaper). In addition, notices were mailed to all owners of real property located within a minimum of 300 feet of the exterior boundaries of the property that is the subject of the hearing, as shown on the records of the County Assessor.

CORRESPONDENCE: As of the preparation of this Resolution, Planning Department staff has not received any written or verbal communications from the owners or occupants of properties surrounding the Project site or from the public in general, regarding the subject Agreement.

AGENCY/DEPARTMENT REVIEWS: Each City agency/department has been provided the opportunity to review and comment on the subject Agreement and recommend requirements to be imposed upon the Project. At the time of the Resolution preparation, infrastructure requirements were provided and are included within the subject Agreement to the attached Resolution as "Attachment A."

AIRPORT LAND USE COMPATIBILITY PLAN (ALUCP) COMPLIANCE: The California State Aeronautics Act (Public Utilities Code Section 21670 et seq.) requires that an Airport Land Use Compatibility Plan be prepared for all public use airports in the State; and requires that local land use plans and individual development proposals must be consistent with the policies set forth in the adopted Airport Land Use Compatibility Plan.

On April 19, 2011, the City Council of the City of Ontario approved and adopted the ONT ALUCP, establishing the Airport Influence Area for Ontario International Airport, which encompasses lands within parts of San Bernardino, Riverside, and Los Angeles Counties, and limits future land uses and development within the Airport Influence Area, as they relate to noise, safety, airspace protection, and overflight impacts of current and future airport activity. As the recommending authority for the Project, the Planning Commission has reviewed and considered the facts and information contained in the Application and supporting documentation against the ONT ALUCP compatibility factors, including [1] Safety Criteria (ONT ALUCP Table 2-2) and Safety Zones (ONT ALUCP Map 2-2), [2] Noise Criteria (ONT ALUCP Table 2-3) and Noise Impact Zones (ONT ALUCP Map 2-3), [3] Airspace protection Zones (ONT ALUCP Map 2-4), and [4] Overflight Notification Zones (ONT ALUCP Map 2-5). As a result, the Planning Commission, therefore, finds and determines that the Project, when implemented in conjunction with the conditions of approval, will be consistent with the policies and criteria set forth within the ONT ALUCP.

COMPLIANCE WITH THE ONTARIO PLAN: The proposed Project is consistent with the principles, goals and policies contained within the Vision, Governance, Policy Plan (general plan), and City Council Priorities components of The Ontario Plan ("TOP"). More specifically, the goals and policies of TOP that are furthered by the proposed Project are as follows:

(1) City Council Goals.

- Invest in the Growth and Evolution of the City's Economy
- Operate in a Businesslike Manner
- Focus Resources in Ontario's Commercial and Residential Neighborhoods
- Invest in the City's Infrastructure (Water, Streets, Sewers, Parks, Storm Drains and Public Facilities)
- Ensure the Development of a Well Planned, Balanced, and Self-Sustaining Community in the New Model Colony

(2) Vision.

Distinctive Development:

- Commercial and Residential Development

➢ Development quality that is broadly recognized as distinctive and not exclusively tied to the general suburban character typical of much of Southern California.

(3) Governance.

Decision Making:

- Goal G1: Sustained decision-making that consistently moves Ontario towards its Vision by using The Ontario Plan as a framework for assessing choices.

  - G 1-2. Long-term Benefit. We require decisions to demonstrate and document how they add value to the community and support the Ontario Vision.

(4) Policy Plan (General Plan)

Land Use Element:

- Goal LU-1 Balance: A community that has a spectrum of housing types and price ranges that match the jobs in the City and that make it possible for people to live and work in Ontario and maintain a quality of life.

  - LU-1.1 Strategic Growth. We concentrate growth in strategic locations that help create place and identity, maximize available and planned infrastructure, foster the development of transit, and support the expansion of the active and multimodal transportation networks throughout the City.

  - LU-1.6 Complete Community. We incorporate a variety of land uses and building types in our land use planning efforts that result in a complete community where residents at all stages of life, employers, workers, and visitors have a wide spectrum of choices of where they can live, work, shop and recreate within Ontario.

- Goal LU-2 Compatibility: Compatibility between a wide range of uses and a resultant urban patterns and forms.

  - LU-2.6 *Infrastructure Compatibility*. We require infrastructure to be aesthetically pleasing and in context with the community character.

Housing Element:

- Goal H-2 Housing Supply & Diversity: Diversity of types of quality housing that are affordable to a range of household income levels, accommodate changing demographics, and support and reinforce the economic sustainability of Ontario.

  - H-2.4 Ontario Ranch. We support a premier lifestyle community in the Ontario Ranch, distinguished by diverse housing, highest design quality, and cohesive and highly amenitized neighborhoods.

  - H-2.5 Housing Design. We require architectural excellence through adherence to City design guidelines, thoughtful site planning, environmentally sustainable practices, and other best practices.

Community Economics Element:

- Goal CE-1 Complete Community: A complete community that provides for all incomes and stages of life.

  - CE-1.6 Diversity of Housing. We collaborate with residents, housing providers, and the development community to provide housing opportunities for every stage of life; we plan for a variety of housing types and price points to encourage the development of housing supportive of our efforts to attract business in growing sectors of the community while being respectful of existing viable uses.

- Goal CE-2 Placemaking: A City of distinctive neighborhoods, districts, corridors, and centers where people choose to be.

  - CE-2.1 *Development Projects*. We require new development and redevelopment to create unique, high-quality places that add value to the community.

  - CE-2.2 *Development Review*. We require those proposing new development and redevelopment to demonstrate how their projects will create appropriately unique, functional, and sustainable places that will compete well with their competition within the region.

  - CE-2.4 *Protection of Investment*. We require that new development and redevelopment protect existing investment by providing architecture and urban design of equal or greater quality.

  - CE-2.5 *Private Maintenance*. We require adequate maintenance, upkeep, and investment in private property because proper maintenance on private property protects property values.

Safety Element:

- Goal S-1 Seismic & Geologic Hazards: Minimized risk of injury, loss of life, property damage, and economic and social disruption caused by earthquake-induced and other geologic hazards.

  - *S-1.1 Implementation of Regulations and Standards*. We require that all new habitable structures be designed in accordance with the most recent California Building Code adopted by the City, including provisions regarding lateral forces and grading.

Community Design Element:

- Goal CD-2 Design Quality: A high level of design quality resulting in neighborhoods, public spaces, parks, and streetscapes that are attractive, safe, functional, human-scale, and distinct.

➢ CD-2.1 Quality Building Design and Architecture. We encourage all development projects to convey visual interest and character through:

- Building volume, massing, and height to provide context-appropriate scale and proportion;
- A true architectural style which is carried out in plan, section, and elevation through all aspects of the building and site design and appropriate for its setting; and
- Exterior building materials that are articulated, high quality, durable, and appropriate for the architectural style.

➢ CD-2.2 Neighborhood Design. We create distinct residential neighborhoods that promote a sense of community and identity by emphasizing access, connectivity, livability, and social interaction through such elements as:

- A pattern of smaller, walkable blocks that promote activity, safety, and access to nearby amenities and services;
- Varied parcel sizes and lot configurations to accommodate a diversity of housing types;
- Traffic calming measures to slow traffic and promote walkability while maintaining acceptable traffic flows and emergency evacuation access;
- Floor plans that encourage views onto the street and de-emphasize the visual and physical dominance of garages (introducing the front porch as the "outdoor living room"), as appropriate; and
- Landscaped parkways, with sidewalks separated from the curb and designed to maximize safety, comfort, and aesthetics for all users.

➢ CD-2.7 *Sustainability*. We collaborate with the development community to design and build neighborhoods, streetscapes, sites, outdoor spaces, landscaping, and buildings to reduce energy demand through solar orientation, maximum use of natural daylight, passive solar and natural ventilation, building form, mechanical and structural systems, building materials, and construction techniques.

➢ CD-2.8 Safe Design. We incorporate defensible space design into new and existing developments to ensure the maximum safe travel and visibility on pathways, corridors, and open space and at building entrances and parking areas by avoiding physically and visually isolated spaces, maintaining visibility and accessibility, and using lighting.

➢ CD-2.9 *Landscape Design*. We encourage durable, sustainable, and drought-tolerant landscaping materials and designs that enhance the aesthetics of structures, create and define public and private spaces, and provide shade and environmental benefits.

➢ CD-2.10 *Parking Areas*. We require all development, including single-family residential, to minimize the visual impact of surface, structured, and garage parking areas visible from the public realm in an aesthetically pleasing, safe and environmentally sensitive manner. Examples include:

- Surface parking: Shade trees, pervious surfaces, urban run-off capture and infiltration, and pedestrian paths to guide users through the parking field;
- Garage parking: providing access to single-family residential garages through alley access, recessing garages from the frontage to emphasize front doors or active living spaces.

➢ CD-2.11 *Entry Statements*. We encourage the inclusion of amenities, signage, and landscaping at the entry to neighborhoods, commercial centers, mixed use areas, industrial developments, and public places that reinforce them as uniquely identifiable places.

➢ CD-2.12 *Site and Building Signage*. We encourage the use of sign programs that utilize complementary materials, colors, and themes. Project signage should be designed to effectively communicate and direct users to various aspects of the development and complement the character of the structures.

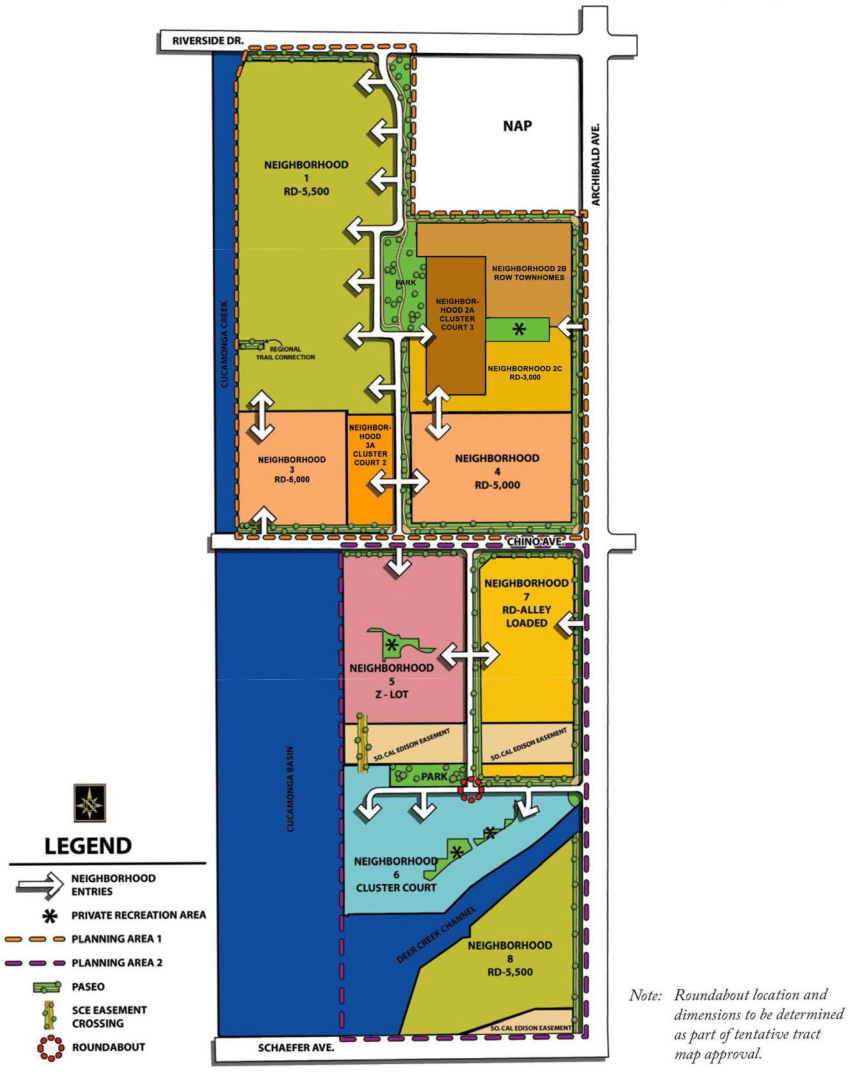
➢ CD-2.13 *Entitlement Process*. We work collaboratively with all stakeholders to ensure a high degree of certainty in the efficient review and timely processing of all development plans and permits.

- Goal CD-5 Protection of Investment: A sustained level of maintenance and improvement of properties, buildings, and infrastructure that protects the property values and encourages additional public and private investments.

➢ CD-5.1 *Maintenance of Buildings and Property*. We require all public and privately-owned buildings and property (including trails and easements) to be properly and consistently maintained.

➢ CD-5.2 *Maintenance of Infrastructure*. We require the continual maintenance of infrastructure.

HOUSING ELEMENT COMPLIANCE: Pursuant to the requirements of California Government Code Chapter 3, Article 10.6, commencing with Section 65580, as the recommending authority for the Project, the Planning Commission finds that based on the facts and information contained in the Application and supporting documentation, at the time of Project implementation, the Project is consistent with the Housing Element of the Policy Plan (General Plan) component of The Ontario Plan, as the Project site is not one of the properties in the Housing Element Sites contained in Tables B-1 and B-2 (Housing Element Sites Inventory) of the Housing Element Technical Report.



ENVIRONMENTAL REVIEW: An Addendum to the Countryside Specific Plan Environmental Impact Report (State Clearinghouse No. 2004071001), which was certified by the City Council on April 18, 2006, was prepared to be consistent with The Ontario Plan 2050 and associated Supplemental Environmental Impact Report (SEIR) (State Clearinghouse No. 2021070364), which was certified by the City Council on August 16, 2022. This application introduces no new significant environmental impacts. All previously adopted mitigation measures are a condition of Project approval and are incorporated herein by this reference.

Exhibit B— TENTATIVE TRACT MAP 20536

RESOLUTION NO. PC23-041

A RESOLUTION OF THE PLANNING COMMISSION OF THE CITY OF ONTARIO, CALIFORNIA, RECOMMENDING THE CITY COUNCIL APPROVE FILE NO. PDA22-005, A DEVELOPMENT AGREEMENT BETWEEN THE CITY OF ONTARIO AND RB ONTARIO LLC, TO ESTABLISH THE TERMS AND CONDITIONS ASSOCIATED WITH TENTATIVE TRACT MAP NO. 20536 (FILE NO. PMTT22-021), A 23.2 ACRE PROPERTY LOCATED APPROXIMATELY 875 FEET SOUTH OF THE INTERSECTION OF RIVERSIDE DRIVE AND ARCHIBALD AVENUE, WITHIN PLANNING AREA 1 (NEIGHBORHOOD 2) LAND USE DISTRCT OF THE COUNTRYSIDE SPECIFIC PLAN (FILE NO. PSP04-001). APNS: 0218-111-60, 0218-111-61

WHEREAS, RB Ontario LLC ("Applicant") has filed an Application for the approval of a Development Agreement, File No. PDA22-005, as described in the title of this Resolution (hereinafter referred to as "Application" or "Project"); and

WHEREAS, the Application applies to 23.2 acres of land located approximately 875 south of the intersection of Riverside Drive and Archibald Avenue, within Planning Area 1 (Neighborhood 2) land use district of the Countryside Specific Plan; and

WHEREAS, the Applicant has submitted a Tentative Tract Map 20536 (File No. PMTT22-021) to subdivide 23.2 acres of land into 141 numbered lots and 27 lettered lots, to facilitate the potential development of 265 dwelling units, parkland, private recreation area, private drives, and private alleys; and

WHEREAS, an Addendum to the Countryside Specific Plan Environmental Impact Report (State Clearinghouse No. 2004071001), which was certified by the City Council on April 18, 2006, was prepared to be consistent with The Ontario Plan 2050 and associated Supplemental Environmental Impact Report (SEIR) (State Clearinghouse No. 2021070364), which was certified by the City Council on August 16, 2022. This application introduces no new significant environmental; and

WHEREAS, Ontario Development Code Table 2.02-1 (Review Matrix) grants the Planning Commission the responsibility and authority to review and make recommendations to the City Council on the subject Application; and

WHEREAS, the Project has been reviewed for consistency with the Housing Element of the Policy Plan component of The Ontario Plan, as State Housing Element law (as prescribed in Government Code Sections 65580 through 65589.8) requires that development projects must be consistent with the Housing Element, if upon consideration of all its aspects, it is found to further the purposes, principals, goals, and policies of the Housing Element; and

WHEREAS, the Project is located within the Airport Influence Area of Ontario International Airport, which encompasses lands within parts of San Bernardino, Riverside, and Los Angeles Counties, and is subject to, and must be consistent with, the policies and criteria set forth in the Ontario International Airport Land Use Compatibility Plan (hereinafter referred to as "ALUCP"), which applies only to jurisdictions within San Bernardino County, and addresses the noise, safety, airspace protection, and overflight impacts of current and future airport activity; and

WHEREAS, City of Ontario Development Code Division 2.03 (Public Hearings) prescribes the manner in which public notification shall be provided and hearing procedures to be followed, and all such notifications and procedures have been completed; and

WHEREAS, as the first action on the Project, on May 23, 2023, the Planning Commission issued a Resolution recommending the City Council adopt the EIR Addendum, finding that the proposed Project introduces no new significant environmental impacts and applying all previously adopted mitigation measures to the Project, which were incorporated by reference; and

WHEREAS, on May 23, 2023, the Planning Commission of the City of Ontario conducted a hearing to consider the Project, and concluded said hearing on that date; and

WHEREAS, all legal prerequisites to the adoption of this Resolution have occurred.

NOW, THEREFORE, IT IS HEREBY FOUND, DETERMINED, AND RESOLVED by the Planning Commission of the City of Ontario, as follows:

SECTION 1: ***Environmental Determination and Findings.*** As the recommending authority for the Project, the Planning Commission has reviewed and considered the information contained in the Addendum, the initial study, and the administrative record for the Project, including all written and oral evidence provided during the comment period. Based upon the facts and information contained in the Addendum, the initial study, and the administrative record, including all written and oral evidence presented to the Planning Commission, the Planning Commission finds as follows:

(1) The environmental impacts of the Project were reviewed in conjunction with an Addendum to Countryside Specific Plan Environmental Impact Report (State Clearinghouse No. 200407100; certified by the Ontario City Council on April 16, 2006 in conjunction with File No. PSP04-001), was prepared to be consistent with The Ontario Plan 2050 and associated Supplemental Environmental Impact Report (SEIR) (State

Clearinghouse No. 2021070364), which was certified by the City Council on August 16, 2022; and

(2) The EIR Addendum and administrative record have been completed in compliance with CEQA, the State CEQA Guidelines, and the City of Ontario Local CEQA Guidelines; and

(3) The City's "Guidelines for the Implementation of the California Environmental Quality Act (CEQA)" provide for the use of a single environmental assessment in situations where the impacts of subsequent projects are adequately analyzed. This Application introduces no new significant environmental impacts; and

(4) All previously adopted mitigation measures shall be a condition of project approval, as they are applicable to the Project, and are incorporated herein by this reference; and

(5) The EIR Addendum contains a complete and accurate reporting of the environmental impacts associated with the Project, and reflects the independent judgment of the Planning Commission; and

(6) There is no substantial evidence in the administrative record supporting a fair argument that the project may result in significant environmental impacts.

SECTION 2: ***Subsequent or Supplemental Environmental Review Not Required.*** Based on the EIR Addendum, all related information presented to the Planning Commission, and the specific findings set forth in Section 1, above, the Planning Commission finds that the preparation of a subsequent or supplemental Certified EIR is not required for the Project, as the Project:

(1) Does not constitute substantial changes to the Certified EIR that will require major revisions to the Certified EIR due to the involvement of new significant environmental effects or a substantial increase in the severity of previously identified significant effects; and

(2) Does not constitute substantial changes with respect to the circumstances under which the Certified EIR was prepared, that will require major revisions to the Certified EIR due to the involvement of new significant environmental effects or a substantial increase in the severity of the previously identified significant effects; and

(3) Does not contain new information of substantial importance that was not known and could not have been known with the exercise of reasonable diligence at the time the Certified EIR was certified/adopted, that shows any of the following:

(a) The Project will have one or more significant effects not discussed in the Certified EIR; or

(b) Significant effects previously examined will be substantially more severe than shown in the Certified EIR; or

(c) Mitigation measures or alternatives previously found not to be feasible would in fact be feasible and would substantially reduce one or more significant effects of the Project, but the City declined to adopt such measures; or

(d) Mitigation measures or alternatives considerably different from those analyzed in the Certified EIR would substantially reduce one or more significant effects on the environment, but which the City declined to adopt.

SECTION 3: ***Housing Element Compliance.*** Pursuant to the requirements of California Government Code Chapter 3, Article 10.6, commencing with Section 65580, as the recommending authority for the Project, the Planning Commission finds that based upon the facts and information contained in the Application and supporting documentation, at the time of Project implementation, the project is consistent with the Housing Element of the Policy Plan (General Plan) component of The Ontario Plan, as the project site is not one of the properties in the Housing Element Sites Inventory contained in Tables B-1 and B-2 of the Housing Element Technical Report.

SECTION 4: ***Airport Land Use Compatibility Plan ("ALUCP") Compliance.*** The California State Aeronautics Act (Public Utilities Code Section 21670 et seq.) requires that an Airport Land Use Compatibility Plan be prepared for all public use airports in the State; and requires that local land use plans and individual development proposals must be consistent with the policies set forth in the adopted Airport Land Use Compatibility Plan.

(1) On April 19, 2011, the City Council of the City of Ontario approved and adopted the Ontario International Airport Land use Compatibility Plan, establishing the Airport Influence Area for Ontario International Airport, which encompasses lands within parts of San Bernardino, Riverside, and Los Angeles Counties, and limits future land uses and development within the Airport Influence Area, as they relate to noise, safety, airspace protection, and overflight impacts of current and future airport activity. As the recommending body for the Project, the Planning Commission has reviewed and considered the facts and information contained in the Application and supporting documentation against the ONT ALUCP compatibility factors, including [1] Safety Criteria (ONT ALUCP Table 2-2) and Safety Zones (ONT ALUCP Map 2-2), [2] Noise Criteria (ONT ALUCP Table 2-3) and Noise Impact Zones (ONT ALUCP Map 2-3), [3] Airspace protection Zones (ONT ALUCP Map 2-4), and [4] Overflight Notification Zones (ONT ALUCP Map 2-5). As a result, the Planning Commission, therefore, finds and determines

that the Project, when implemented in conjunction with the conditions of approval, will be consistent with the policies and criteria set forth within the ONT ALUCP.

SECTION 5: ***Concluding Facts and Reasons.*** Based upon the substantial evidence presented to the Planning Commission during the above-referenced hearing, and upon the specific findings set forth in Sections 1 through 4 above, the Planning Commission hereby concludes as follows:

(1) The Development Agreement applies to approximately 23.2 acres of land located approximately 875 feet south of the intersection of Riverside Drive and Archibald Avenue, within Planning Area 1 (Neighborhood 2) land use district of the Countryside Specific Plan (File No. PSP04-001); and

(2) The Development Agreement establishes parameters for the development of land within the Countryside Specific Plan. The Development Agreement also grants the Applicant, the right to develop, the ability to quantify the fees; and establish the terms and conditions that apply to those projects. These terms and conditions are consistent with The Ontario Plan Policy Plan (General Plan), design guidelines and development standards for the Countryside Specific Plan; and

(3) The Development Agreement grants the Applicant a vested right to develop Tentative Parcel Map 20536 (File No. PMTT22-021) as long as the Applicant complies with the terms and conditions of the Countryside Specific Plan and EIR. Tentative Tract Map 20536 is located approximately 875 feet south of the intersection of Riverside Drive and Archibald Avenue, within Planning Area 1 (Neighborhood 2) land use district of the Countryside Specific Plan, and proposes to subdivide 23.2 acres of land into 141 numbered lots and 27 lettered lots, to facilitate the development of 265 dwelling units, parkland, private recreation area, private drives, and private alleys; and

(4) The Development Agreement has been prepared in conformance with the goals and policies of The Ontario Plan Policy Plan (General Plan); and

(5) The Development Agreement does not conflict with the Land Use Policies of The Ontario Plan Policy Plan (General Plan) and will provide for development, within the district, in a manner consistent with the Policy Plan and with related development; and

(6) This Development Agreement will promote the goals and objectives of the Land Use Element of the Policy Plan; and

(7) This Development Agreement will not be materially injurious or detrimental to the adjacent properties and will not have a significant impact on the environment or the surrounding properties. An Addendum to the Countryside Specific Plan Environmental

Impact Report (State Clearinghouse No. 2004071001), which was certified by the City Council on April 18, 2006, was prepared to be consistent with The Ontario Plan 2050 and associated Supplemental Environmental Impact Report (SEIR) (State Clearinghouse No. 2021070364), which was certified by the City Council on August 16, 2022; and

(8) This Application introduces no new significant environmental impacts. All previously adopted mitigation measures are a condition of project approval and are incorporated herein by this reference.

SECTION 6: ***Planning Commission Action.*** Based upon the findings and conclusions set forth in Sections 1 through 5, above, the Planning Commission hereby RECOMMENDS THE CITY COUNCIL APPROVE the herein described Application, subject to each and every condition set forth in the Development Agreement (File No. PDA22-005) attached hereto as "Attachment A," and incorporated herein by this reference.

SECTION 7: ***City Council Required Actions***. Approval of this Application is contingent upon City Council approving the following:

(a) Countryside Specific Plan Amendment (File No. PSPA22-002);
(b) EIR Addendum to the Countryside Specific Plan (File No. PSP04-001); and
(c) Applicant's acquisition of the property.

If the City Council does not approve the Specific Plan Amendment (File No. PSPA22-002), EIR Addendum to the Countryside Specific Plan (File No. PSP04-001), and/or the Applicant does not acquire the property, this Resolution should become null and void and of no further force and effect.

SECTION 8: ***Indemnification.*** The Applicant shall agree to defend, indemnify and hold harmless, the City of Ontario or its agents, officers, and employees from any claim, action or proceeding against the City of Ontario or its agents, officers or employees to attack, set aside, void, or annul this approval. The City of Ontario shall promptly notify the applicant of any such claim, action, or proceeding, and the City of Ontario shall cooperate fully in the defense.

SECTION 9: ***Custodian of Records.*** The documents and materials that constitute the record of proceedings on which these findings have been based are located at the City of Ontario City Hall, 303 East "B" Street, Ontario, California 91764. The custodian for these records is the City Clerk of the City of Ontario.

SECTION 10: ***Certification to Adoption.*** The Secretary shall certify to the adoption of the Resolution.

- - - - - - - - - - - - - -

The Secretary Pro Tempore for the Planning Commission of the City of Ontario shall certify as to the adoption of this Resolution.

I hereby certify that the foregoing Resolution was duly and regularly introduced, passed and adopted by the Planning Commission of the City of Ontario at a regular meeting thereof held on the 23rd day of May 2023, and the foregoing is a full, true and correct copy of said Resolution, and has not been amended or repealed.

Richard Gage
Planning Commission Vice-Chairperson

DEVELOPMENT AGREEMENT NO. PDA22-005

This Development Agreement (hereinafter "Agreement") is entered into effective as of the ____ day of _____, 2023 by and among the City of Ontario, a California municipal corporation (hereinafter "CITY"), and RB Ontario LLC, a Delaware limited liability company (hereinafter "OWNER"):

RECITALS

WHEREAS, CITY is authorized to enter into binding development agreements with persons having legal or equitable interests in real property for the development of such property, pursuant to Section 65864, et seq. of the Government Code; and

WHEREAS, OWNER has requested CITY to enter into a development agreement and proceedings have been taken in accordance with the rules and regulations of CITY; and

WHEREAS, by electing to enter into this Agreement, CITY shall bind future City Councils of CITY by the obligations specified herein and limit the future exercise of certain governmental and proprietary powers of CITY; and

WHEREAS, the terms and conditions of this Agreement have undergone extensive review by CITY and the City Council and have been found to be fair, just and reasonable; and

WHEREAS, the best interests of the citizens of the CITY and the public health, safety and welfare will be served by entering into this Agreement; and

WHEREAS, all of the procedures of the California Environmental Quality Act have been met with respect to the Project and the Agreement in that Countryside Specific Plan (State Clearinghouse No. 2006051081 (the "FEIR"). The City Council found and determined that the FEIR was prepared in accordance with the requirements of the California Environmental Quality Act and adequately describes the impacts of the project described in the FEIR, which included consideration of this Agreement; and

WHEREAS, this Agreement and the Project are consistent with the CITY's Comprehensive General Plan and the Countryside Specific Plan; and

WHEREAS, all actions taken and approvals given by CITY have been duly taken or approved in accordance with all applicable legal requirements for notice, public hearings, findings, votes, and other procedural matters; and

WHEREAS, development of the Property in accordance with this Agreement will provide substantial benefits to CITY and will further important policies and goals of CITY; and

WHEREAS, this Agreement will eliminate uncertainty in planning and provide for the orderly development of the Property, ensure progressive installation of necessary

improvements, provide for public services appropriate to the development of the Project, and generally serve the purposes for which development agreements under Sections 65864 et seq. of the Government Code are intended; and

WHEREAS, OWNER has incurred and will in the future incur substantial costs in excess of the generally applicable requirements in order to assure vesting of legal rights to develop the Property in accordance with this Agreement; and

WHEREAS, the Property is located in an area of the City of Ontario that has been known as the "New Model Colony" area and the New Model Colony area has now been renamed as "Ontario Ranch."; and

WHEREAS, the property developer/owners are made aware of the South Archibald Trichloroethylene (TCE) Plume Disclosure Letter (Exhibit "G"). Property owner may wish to provide the attached Letter as part of the Real Estate Transfer Disclosure requirements under California Civil Code Section 1102 et seq. This may include notifications in the Covenants, Conditions and Restrictions (CC&Rs) or other documents related to property transfer and disclosures. Additional information on the plume is available from the Santa Ana Regional Water Quality Control Board at http://geotracker.waterboards.ca.gov/profile_report.asp?global_id=T10000004658.

COVENANTS

NOW, THEREFORE, in consideration of the above recitals and of the mutual covenants hereinafter contained and for other good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged, the parties agree as follows:

1. DEFINITIONS AND EXHIBITS.

1.1 Definitions. The following terms when used in this Agreement shall be defined as follows:

1.1.1 "Agreement" means this Development Agreement.

1.1.2 "CITY" means the City of Ontario, California, a California municipal corporation.

1.1.3 "Construction Agreement" means that certain Agreement for the Financing and Construction of Phases I and II Infrastructure Improvements to Serve an Easterly Portion of the New Model Colony, entered into between the CITY and NMC Builders as of the 4th day of October, 2005, and all amendments thereto and "Construction Agreement Amendment" means that First Amended and Restated Agreement for the Financing and Construction of Limited Infrastructure Improvements to Serve and Easterly Portion of the New Model Colony entered into between the CITY and NMC Builders as of the 21st day of August 2012.

1.1.4 “Development” means the improvement of the Property for the purposes of completing the structures, improvements and facilities comprising the Project including, but not limited to: grading; the construction of public infrastructure and public facilities related to the Project whether located within or outside the Property; the construction of buildings and structures; and the installation of landscaping. “Development” does not include the maintenance, repair, reconstruction or redevelopment of any building, structure, improvement or facility after the construction and completion thereof.

1.1.5 “Development Approvals” means all permits and other entitlements for use subject to approval or issuance by CITY in connection with development of the Property including, but not limited to:

(a) specific plans and specific plan amendments;

(b) tentative and final subdivision and parcel maps;

(c) development plan review;

(d) conditional use permits (including model home use permits), public use permits and plot plans;

(e) zoning;

(f) grading and building permits.

1.1.6 “Development Exaction” means any requirement of CITY in connection with or pursuant to any Land Use Regulation or Development Approval for the dedication of land, the construction of improvements or public facilities, or the payment of fees in order to lessen, offset, mitigate or compensate for the impacts of development on the environment or other public interests.

1.1.7 “Development Impact Fee” means a monetary exaction, other than a tax or special assessment, whether characterized as a fee or a tax and whether established for a broad class of projects by legislation of general applicability or imposed on a specific project on an ad hoc basis, that is charged by a local agency to the applicant in connection with approval of a development project for the purpose of defraying all or a portion of the cost of public facilities related to the development project, and, for purposes of this Agreement only, includes fees collected under development agreements adopted pursuant to Article 2.5 of the Government Code (commencing with Section 65864) of Chapter 4, For purposes of this Agreement only, "Development Impact Fee" shall not include processing fees and charges imposed by CITY to cover the estimated actual costs to CITY of processing applications for Development Approvals or for monitoring compliance with any Development Approvals granted or issued, including, without limitation, fees for zoning variances; zoning changes; use permits; building inspections; building permits; filing and processing applications and petitions filed with the local agency formation commission or conducting preliminary proceedings or proceedings under the Cortese-Knox-Hertzberg Local Government Reorganization Act of 2000,

Division 3 (commencing with Section 56000) of Title 5 of the Government Code; the processing of maps under the provisions of the Subdivision Map Act, Division 2 (commencing with Section 66410) of Title 7 of the Government Code; or planning services under the authority of Chapter 3 (commencing with Section 65100) of Division 1 of Title 7 of the Government Code, fees and charges as described in Sections 51287, 56383, 57004, 65104, 65456, 65863.7, 65909.5, 66013, 66014, and 66451.2 of the Government Code, Sections 17951, 19132.3, and 19852 of the Health and Safety Code, Section 41901 of the Public Resources Code, and Section 21671.5 of the Public Utilities Code, as such codes may be amended or superceded, including by amendment or replacement.

1.1.8 "Development Plan" means the Existing Development Approvals and the Existing Land Use Regulations applicable to development of the Property.

1.1.9 "Effective Date" means the date that the ordinance approving this Agreement goes into effect.

1.1.10 "Existing Development Approvals" means all Development Approvals approved or issued prior to the Effective Date. Existing Development Approvals includes the Approvals incorporated herein as Exhibit "C" and all other Approvals which are a matter of public record on the Effective Date.

1.1.11 "Existing Land Use Regulations" means all Land Use Regulations in effect on the Effective Date. Existing Land Use Regulations includes the Regulations incorporated herein as Exhibit "D" and all other Land Use Regulations that are in effect and a matter of public record on the Effective Date.

1.1.12 "General Plan" means the General Plan adopted on August 16, 2022.

1.1.13 "Improvement" or "Improvements" means those public improvements required to support the development of the Project as described in the Tract Map conditions for Tract No. 20536 as further described in Exhibit "E" and depicted in Exhibit "F" (the "Infrastructure Improvements Exhibit").

1.1.14 "Land Use Regulations" means all ordinances, resolutions, codes, rules, regulations and official policies of CITY governing the development and use of land, including, without limitation, the permitted use of land, the density or intensity of use, subdivision requirements, timing and phasing of development, the maximum height and size of buildings, the provisions for reservation or dedication of land for public purposes, and the design, improvement and construction standards and specifications applicable to the development of the Property. "Land Use Regulations" does not include any CITY ordinance, resolution, code, rule, regulation or official policy, governing:

(a) the conduct of businesses, professions, and occupations;

(b) taxes and assessments;

(c) the control and abatement of nuisances;

(d) the granting of encroachment permits and the conveyance of similar rights and interests that provide for the use of or the entry upon public property;

(e) the exercise of the power of eminent domain.

1.1.15 “Mortgagee” means a mortgagee of a mortgage, a beneficiary under a deed of trust or any other security-device lender, and their successors and assigns.

1.1.16 “Net MDD” means net maximum daily water demand.

1.1.17 “NMC Builders” means the consortium of investors and developers responsible for the construction of infrastructure within the New Model Colony incorporated as NMC Builders, LLC.

1.1.17 “Model Units” means a maximum of ten (10) model units, private common recreation facilities and sales facilities constructed by OWNER prior to the construction of any Production units and not offered for sale and occupancy for a period of time after the issuance of permits for Production Units.

1.1.18 “OWNER” means the persons and entities listed as owner on page 1 of this Agreement and their permitted successors in interest to all or any part of the Property.

1.1.19 “Production Unit(s)” means all units constructed for sale and occupancy by OWNER and excludes the specified number of Model Units constructed by OWNER for promotion of sales.

1.1.20 “Project” means the development of the Property contemplated by the Development Plan, as such Plan may be further defined, enhanced or modified pursuant to the provisions of this Agreement.

1.1.21 “Property” means the real property described on Exhibit “A” and shown on Exhibit “B” to this Agreement.

1.1.22 “Reservations of Authority” means the rights and authority excepted from the assurances and rights provided to OWNER under this Agreement and reserved to CITY under Section 3.6 of this Agreement.

1.1.23 “Specific Plan” means that certain specific plan adopted by the City Council, and entitled, “Countryside Specific Plan.”

1.1.24 "Storm Water Treatment Capacity Availability” means a designated portion of the total Storm Water Treatment Capacity Availability made available through the completion of construction of a Phase of regional storm water treatment facilities by the NMC Builders LLC as described in the Construction Agreement Amendment. The amount, in acres, of Storm Water Treatment Capacity Availability required for the issuance of a grading permit shall be based upon the factors and assumptions listed in the Construction Agreement Amendment.

1.1.25 "Subsequent Development Approvals" means all Development Approvals required subsequent to the Effective Date in connection with development of the Property.

1.1.26 "Subsequent Land Use Regulations" means any Land Use Regulations adopted and effective after the Effective Date of this Agreement.

1.1.27 "Water Availability Equivalent (WAE)" means a designated portion of the total Net MDD made available through the construction of each Phase described in the Water Phasing Plan of the Construction Agreement. The number of Water Availability Equivalents (of portions thereof) required for the issuance of each building permit shall be based upon water demand factors and assumptions listed in the Construction Agreement and Construction Agreement Amendment as "Water Availability Equivalents by Land Use" for each land use category.

1.2 Exhibits. The following documents are attached to, and by this reference made a part of, this Agreement:

Exhibit "A" — Legal Description of the Property.

Exhibit "B" — Map showing Property and its location.

Exhibit "C" — Existing Development Approvals.

Exhibit "D" — Existing Land Use Regulations.

Exhibit "E" — Description of Required Infrastructure Improvements

Exhibit "F" — Depiction of Required Infrastructure Improvements Exhibit

Exhibit "G" - Form of Plume Disclosure Letter

2. GENERAL PROVISIONS.

2.1 Binding Effect of Agreement. The Property is hereby made subject to this Agreement. Development of the Property is hereby authorized and shall be carried out only in accordance with the terms of this Agreement.

2.2 Ownership of Property. OWNER represents and covenants that it is the owner of the fee simple title to the Property or a portion thereof, or has the right to acquire fee simple title to the Property or a portion thereof from the current owner(s) thereof. To the extent OWNER does not own fee simple title to the Property, OWNER shall obtain written consent from the current fee owner of the Property agreeing to the terms of this Agreement and the recordation thereof.

2.3 Term. The term of this Agreement shall commence on the Effective Date and shall continue for an initial term of ten (10) years thereafter unless this term is modified or extended pursuant to the provisions of this Agreement. The term of this

Agreement may be extended for an additional five (5) years following expiration of the initial ten (10) year term, provided the following have occurred:

(a) OWNER provides at least 180 days written notice to CITY prior to expiration of the initial term; and

(b) In non-mixed use and residential use only projects, the OWNER shall have obtained, as applicable, building permits for at least seventy percent (70%) of the actual number of residential units permitted under this Agreement; and

(c) OWNER is not then in uncured default of this Agreement.

2.4 Assignment.

2.4.1 Right to Assign. OWNER shall have the right to sell, transfer or assign the Property in whole or in part (provided that no such partial transfer shall violate the Subdivision Map Act, Government Code Section 66410, et seq.), to any person, partnership, limited liability company, joint venture, firm or corporation at any time during the term of this Agreement; provided, however, that any such sale, transfer or assignment shall include the assignment and assumption of the rights, duties and obligations arising under or from this Agreement and be made in strict compliance with the following:

(a) No sale, transfer or assignment of any right or interest under this Agreement shall be made unless made together with the sale, transfer or assignment of all or a part of the Property. OWNER may be required to provide disclosure that the Property is within the South Archibald Trichloroethylene (TCE) Plume. OWNER may wish to provide the attached Disclosure Letter (Exhibit G) as part of the Real Estate Transfer Disclosure requirements under California Civil Code Section 1102 et seq.

(b) Concurrent with any such sale, transfer or assignment, or within fifteen (15) business days thereafter, OWNER shall notify CITY's City Manager, in writing, of such sale, transfer or assignment and shall provide CITY with: (1) an executed agreement, in a form reasonably acceptable to CITY, by the purchaser, transferee or assignee and providing therein that the purchaser, transferee or assignee expressly and unconditionally assumes all the duties and obligations of OWNER under this Agreement with respect to the portion of the Property so sold, transferred or assigned; and (2) the payment of the applicable processing charge to cover the CITY's review and consideration of such sale, transfer or assignment.

(c) Any sale, transfer or assignment not made in strict compliance with the foregoing conditions shall constitute a default by OWNER under this Agreement. Notwithstanding the failure of any purchaser, transferee or assignee to execute the agreement required by Paragraph (b) of this Subsection 2.4.1, the burdens of this Agreement shall be binding upon such purchaser, transferee or assignee, but the benefits of this Agreement shall not inure to such purchaser, transferee or assignee until and unless such agreement is executed. The City Manager shall have the authority to review,

consider and either approve, conditionally approve, or deny any proposed sale, transfer or assignment that is not made in compliance with this section 2.4.

2.4.2 Release of Transferring Owner. Notwithstanding any sale, transfer or assignment, a transferring OWNER shall continue to be obligated under this Agreement unless such transferring owner is given a release in writing by CITY, which release shall be provided by CITY upon the full satisfaction by such transferring owner of the following conditions:

(a) OWNER no longer has a legal or equitable interest in all or any part of the portion of the Property sold, transferred or assigned.

(b) OWNER is not then in default under this Agreement.

(c) OWNER has provided CITY with the notice and executed agreement required under Paragraph (b) of Subsection 2.4.1 above.

(d) The purchaser, transferee or assignee provides CITY with security equivalent to any security previously provided by OWNER to secure performance of its obligations hereunder.

2.4.3 Effect of Assignment and Release of Obligations. In the event of a sale, transfer or assignment pursuant to the provisions of Section 2.4.2 above:

(a) The assignee shall be liable for the performance of all obligations of OWNER with respect to transferred property, but shall have no obligations with respect to the portions of the Property, if any, not transferred (the "Retained Property").

(b) The owner of the Retained Property shall be liable for the performance of all obligations of OWNER with respect to Retained Property, but shall have no further obligations with respect to the transferred property.

(c) The assignee's exercise, use and enjoyment of the Property or portion thereof shall be subject to the terms of this Agreement to the same extent as if the assignee were the OWNER.

2.4.4 Subsequent Assignment. Any subsequent sale, transfer or assignment after an initial sale, transfer or assignment shall be made only in accordance with and subject to the terms and conditions of this Section 2.4.

2.4.5 Termination of Agreement with Respect to Individual Lots Upon Sale to Public and Completion of Construction. The provisions of Subsection 2.4.1 shall not apply to the sale or lease (for a period longer than one year) of any lot which has been finally subdivided and is individually (and not in "bulk" meaning more than one) sold or leased to a member of the public or other ultimate user. Notwithstanding any other provisions of this Agreement, this Agreement shall terminate with respect to any lot and such lot shall be released and no longer be subject to this Agreement without the

execution or recordation of any further document upon satisfaction of both of the following conditions:

(a) The lot has been finally subdivided and individually (and not in "bulk") sold or leased (for a period longer than one year) to a member of the public or other ultimate user; and,

(b) A certificate of occupancy has been issued for a building on the lot, and the fees set forth under Section 4 of this Agreement have been paid.

2.5 Amendment or Cancellation of Agreement. This Agreement may be amended or cancelled in whole or in part only in the manner provided for in Government Code Section 65868.1. Any amendment of this Agreement, which amendment has been requested by OWNER, shall be considered by the CITY only upon the payment of the applicable processing charge. This provision shall not limit any remedy of CITY or OWNER as provided by this Agreement. Either Party or successor in interest, may propose an amendment to or cancellation, in whole or in part, of this Agreement. Any amendment or cancellation shall be by mutual consent of the parties or their successors in interest except as provided otherwise in this Agreement or in Government Code Section 65865.1. For purposes of this section, the term "successor in interest" shall mean any person having a legal or equitable interest in the whole of the Property, or any portion thereof as to which such person wishes to amend or cancel this Agreement. The procedure for proposing and adopting an amendment to, or cancellation of, in whole or in part, this Agreement shall be the same as the procedure for adopting and entering into this Agreement in the first instance. Notwithstanding the foregoing sentence, if the CITY initiates the proposed amendment to, or cancellation of, in whole or in part, this Agreement, CITY shall first give notice to the OWNER of its intention to initiate such proceedings at least sixty (60) days in advance of the giving the public notice of intention to consider the amendment or cancellation.

2.5.1 Amendment to Reflect Consistency With Future Amendments to the Construction Agreement. To the extent any future amendment to the Construction Agreement provides for modifications to rights or obligations that differ from or alter the same or similar rights or obligations contained in this Development Agreement, OWNER reserves the right to request an amendment to the Development Agreement to reflect any or all of such modifications.

2.6 Termination. This Agreement shall be deemed terminated and of no further effect upon the occurrence of any of the following events:

(a) Expiration of the stated term of this Agreement as set forth in Section 2.3.

(b) Entry of a final judgment setting aside, voiding or annulling the adoption of the ordinance approving this Agreement.

(c) The adoption of a referendum measure overriding or repealing the ordinance approving this Agreement.

(d) Completion of the Project in accordance with the terms of this Agreement including issuance of all required occupancy permits and acceptance by CITY or applicable public agency of all required dedications.

Termination of this Agreement shall not constitute termination of any other land use entitlements approved for the Property. Upon the termination of this Agreement, no party shall have any further right or obligation hereunder except with respect to any obligation to have been performed prior to such termination or with respect to any default in the performance of the provisions of this Agreement which has occurred prior to such termination or with respect to any obligations which are specifically set forth as surviving this Agreement. Upon such termination, any public facilities and services mitigation fees paid pursuant to Section 4.2 of this Agreement by OWNER to CITY for residential units on which construction has not yet begun shall be refunded to OWNER by CITY.

2.7 Notices.

(a) As used in this Agreement, "notice" includes, but is not limited to, the communication of notice, request, demand, approval, statement, report, acceptance, consent, waiver, appointment or other communication required or permitted hereunder.

(b) All notices shall be in writing and shall be considered given either: (i) when delivered in person, including, without limitation, by courier, to the recipient named below; or (ii) on the date of delivery shown on the return receipt, after deposit in the United States mail in a sealed envelope as either registered or certified mail with return receipt requested, and postage and postal charges prepaid, and addressed to the recipient named below. All notices shall be addressed as follows:

If to CITY:
Scott Ochoa, City Manager
City of Ontario
303 East "B" Street
Ontario, CA 91764

with a copy to:
Ruben Duran, City Attorney
Best Best & Krieger, LLP
2855 E Guasti Road
Ontario, CA 91761

If to OWNER:
RB Ontario LLC
Attn: Jeff Ragland
11766 Wilshire Blvd., Suite 820
Los Angeles, CA 90025

with a copy to:
Cox Castle
Attn: Kenneth Bley
2029 Century Park East, Suite 2100
Los Angeles, CA 90067
kbley@coxcastle.com

(c) Either party may, by notice given at any time, require subsequent notices to be given to another person or entity, whether a party or an officer or representative of a party, or to a different address, or both. Notices given before actual receipt of notice of change shall not be invalidated by the change.

3. DEVELOPMENT OF THE PROPERTY.

3.1 Rights to Develop. Subject to the terms of this Agreement including the Reservations of Authority, OWNER shall have a vested right to develop the Property in accordance with, and to the extent of, the Development Plan. The Project shall remain subject to all Subsequent Development Approvals required to complete the Project as contemplated by the Development Plan. Except as otherwise provided in this Agreement, the permitted uses of the Property, the density and intensity of use, the maximum height and size of proposed buildings, and provisions for reservation and dedication of land for public purposes shall be those set forth in the Development Plan.

3.2 Effect of Agreement on Land Use Regulations. Except as otherwise provided under the terms of this Agreement including the Reservations of Authority, the rules, regulations and official policies governing permitted uses of the Property, the density and intensity of use of the Property, the maximum height and size of proposed buildings, and the design, improvement and construction standards and specifications applicable to development of the Property shall be the Existing Land Use Regulations. In connection with any Subsequent Development Approval, CITY shall exercise discretion in accordance with the same manner as it exercises its discretion under its police powers, including the Reservations of Authority set forth herein; provided however, that such discretion shall not prevent development of the Property for the uses and to the density or intensity of development set forth in this Agreement.

3.3 Timing of Development. The parties acknowledge that OWNER cannot at this time predict when or the rate at which phases of the Property will be developed. Such decisions depend upon numerous factors which are not within the control of OWNER, such as market orientation and demand, interest rates, absorption, completion and other similar factors. Since the California Supreme Court held in Pardee Construction Co. v. City of Camarillo (1984) 37 Ca1. 3d 465, that the failure of the parties therein to provide for the timing of development resulted in a later adopted initiative restricting the timing of development to prevail over such parties' agreement, it is the parties' intent to cure that deficiency by acknowledging and providing that OWNER shall have the right to develop the Property in such order and at such rate and at such times as OWNER deems appropriate within the exercise of its subjective business judgment.

3.3.1 Infrastructure Improvement Exhibit. Attached hereto as Exhibits "E" and "F" are a description and depiction, respectively, of the improvements needed for the development of the Property. In the event of any discrepancy between Exhibit E and Exhibit F, Exhibit F shall control.

3.4 Requirement for Public Infrastructure Improvements. Development of the Property is contingent in part on the phasing of area-wide infrastructure improvements over which the OWNER has control. The issuance of building permits by CITY for Model Units and Production Units is, in general, contingent on OWNER's completion of needed infrastructure improvements and the availability of improvements and services to serve the Property.

3.4.1 Attached hereto as Exhibit "E" and Exhibit "F" are the description and depiction of the infrastructure improvements needed for the development of the Property ("the Infrastructure Improvement Exhibit").

3.4.2 Subject to the prior submittal by OWNER and approval by CITY of a plan to provide sufficient public infrastructure for the construction of a maximum number of ten (10) Model Units, private common recreation facilities and sales facilities. CITY may issue a maximum of ten (10) building permits for Model Units, private common recreation facilities and sales facilities. The plan to be submitted by OWNER for CITY approval shall describe the utilities and other infrastructure necessary to provide sufficient fire protection and other public health and safety requirements for the Model Units and other facilities.

3.5 Changes and Amendments. The parties acknowledge that refinement and further development of the Project will require Subsequent Development Approvals and may demonstrate that changes are appropriate and mutually desirable in the Existing Development Approvals. In the event OWNER finds that a change in the Existing Development Approvals is necessary or appropriate, OWNER shall apply for a Subsequent Development Approval to effectuate such change and CITY shall process and act on such application in accordance with the Existing Land Use Regulations, except as otherwise provided by this Agreement including the Reservations of Authority. If approved, any such change in the Existing Development Approvals shall be incorporated herein as an addendum to Exhibit "C", and may be further changed from time to time as provided in this Section. Unless otherwise required by law, as determined in CITY's reasonable discretion, a change to the Existing Development Approvals shall be deemed "minor" and not require an amendment to this Agreement provided such change does not:

(a) Alter the permitted uses of the Property as a whole; or,

(b) Increase the density or intensity of use of the Property as a whole; or,

(c) Increase the maximum height and size of permitted buildings; or,

(d) Delete a requirement for the reservation or dedication of land for public purposes within the Property as a whole; or,

(e) Constitute a project requiring a subsequent or supplemental environmental impact report pursuant to Section 21166 of the Public Resources Code.

3.6 Reservations of Authority.

3.6.1 Limitations, Reservations and Exceptions. Notwithstanding any other provision of this Agreement, the CITY shall not be prevented from applying new rules, regulations and policies upon the OWNER, nor shall a development agreement prevent the CITY from denying or conditionally approving any

subsequent development project application on the basis of such new rules, regulations and policies where the new rules, regulations and policies consist of the following:

(a) Processing fees by CITY to cover costs of processing applications for development approvals or for monitoring compliance with any development approvals;

(b) Procedural regulations relating to hearing bodies, petitions, applications, notices, findings, records and any other matter of procedure;

(c) Regulations, policies and rules governing engineering and construction standards and specifications applicable to public and private improvements, including all uniform codes adopted by the CITY and any local amendments to those codes adopted by the CITY; provided however that, OWNER shall have a vested right to develop the Property in accordance with, and to the extent of, the standards and specifications that are expressly identified in the Specific Plan;

(d) Regulations that may conflict with this Agreement and the Development Plan but that are reasonably necessary to protect the residents of the project and/or of the immediate community from a condition perilous to their health or safety;

(e) Regulations that do not conflict with those rules, regulations and policies set forth in this Agreement or the Development Plan;

(f) Regulations that may conflict but to which the OWNER consents.

3.6.2 Subsequent Development Approvals. This Agreement shall not prevent CITY, in acting on Subsequent Development Approvals, from applying Subsequent Land Use Regulations that do not conflict with the Development Plan, nor shall this Agreement prevent CITY from denying or conditionally approving any Subsequent Development Approval on the basis of the Existing Land Use Regulations or any Subsequent Land Use Regulation not in conflict with the Development Plan.

3.6.3 Modification or Suspension by State or Federal Law. In the event that State or Federal laws or regulations, enacted after the Effective Date of this Agreement, prevent or preclude compliance with one or more of the provisions of this Agreement, such provisions of this Agreement shall be modified or suspended as may be necessary to comply with such State or Federal laws or regulations, provided, however, that this Agreement shall remain in full force and effect to the extent it is not inconsistent with such laws or regulations and to the extent such

laws or regulations do not render such remaining provisions impractical to enforce. In the event OWNER alleges that such State or Federal laws or regulations preclude or prevent compliance with one or more provisions of this Agreement, and the CITY does not agree, the OWNER may, at its sole cost and expense, seek declaratory relief (or other similar non-monetary remedies); provided however, that nothing contained in this Section 3.6.3 shall impose on CITY any monetary liability for contesting such declaratory relief (or other similar non-monetary relief) and OWNER shall comply with Section 9 of this Agreement and cover any reasonable CITY costs and expenses involved with the declaratory relief.

3.6.4 Intent. The parties acknowledge and agree that CITY is restricted in its authority to limit its police power by contract and that the foregoing limitations, reservations and exceptions are intended to reserve to CITY all of its police power which cannot be so limited. This Agreement shall be construed, contrary to its stated terms if necessary, to reserve to CITY all such power and authority which cannot be restricted by contract.

3.7 Public Works; Utilities. If OWNER is required by this Agreement to construct any public works facilities which will be dedicated to CITY or any other public agency upon completion, and if required by applicable laws to do so, OWNER shall perform such work in the same manner and subject to the same requirements as would be applicable to CITY or such other public agency should it have undertaken such construction. As a condition of development approval, OWNER shall connect the Project to all utilities necessary to provide adequate water, recycled water, sewer, gas, electric, and other utility service to the Project. As a further condition of development approval, OWNER shall contract with the CITY for CITY-owned or operated utilities for this purpose, for such price and on such terms as may be available to similarly situated customers in the CITY.

3.7.1 OWNER agrees that development of the Project shall require the construction of storm drain improvements as described in Exhibit E and depicted in Exhibit F. OWNER agrees that no building permits shall be issued by CITY for Production Units prior to completion of the storm drain improvements, as described in Exhibit E and depicted in Exhibit F.

3.7.2 OWNER agrees that development of the Project shall require the construction of street improvements as described in Exhibit E and depicted in Exhibit F. OWNER agrees that no building permits shall be issued by CITY for Production Units prior to completion of the street improvements, as described in Exhibit E and depicted in Exhibit F.

3.7.3 OWNER agrees that development of the Property shall require the construction of water and recycled water improvements as described in Exhibit E and depicted in Exhibit F. OWNER agrees that no building permits shall be issued by CITY for Production Units prior to completion of the water and recycled water improvements as described in Exhibit E and depicted in Exhibit F. OWNER also agrees that recycled water shall be available and utilized by OWNER for all

construction-related water uses including prior to, and during, any grading of the Property.

3.7.4 OWNER agrees that development of the Property shall require the construction of sewer improvements, as described in the attached Exhibit E and depicted in Exhibit F. OWNER agrees that no building permits shall be issued by CITY for Production Units prior to completion of the sewer improvements, as described in Exhibit E and depicted in Exhibit F.

3.7.5 OWNER agrees that development of the Property shall require the extension of fiber optic communications improvements as described in the attached Exhibit E and depicted in Exhibit F. OWNER agrees that no building permits shall be issued by CITY for Production Units prior to completion of the fiber optic communication improvements, as described in Exhibit E and depicted in Exhibit F.

3.8 Acquisition of Offsite Provision of Real Property Interests. In any instance where OWNER is required by any Development Approval or Land Use Regulation and the Construction Agreement to construct any public improvement on land not owned by OWNER ("Offsite Improvements"), the CITY and OWNER shall cooperate in acquiring the necessary legal interest ("Offsite Property") in accordance with the procedures set forth in Section 2.4 of the Construction Agreement. This section 3.8 is not intended by the parties to impose upon the OWNER an enforceable duty to acquire land or construct any public improvements on land not owned by OWNER, except to the extent that the OWNER elects to proceed with the development of the Project, and then only in accordance with valid conditions imposed by the CITY upon the development of the Project under the Subdivision Map Act or other legal authority.

3.8.1 CITY Acquisition of Non-Construction Agreement Offsite Property. In the event OWNER is required to construct any public improvements on land not owned by OWNER, but such requirement is not based upon the Construction Agreement, Sections 3.8.1 and 3.8.2 shall control the acquisition of the necessary property interest(s) ("Non-Construction Agreement Offsite Property"). If the OWNER is unable to acquire such Non-Construction Agreement Offsite Property, and following the written request from the OWNER to CITY, CITY agrees to use reasonable and diligent good faith efforts to acquire the Non-Construction Agreement Offsite Property from the owner or owners of record by negotiation to the extent permitted by law and consistent with this Agreement. If CITY is unable to acquire the Non-Construction Agreement Offsite Property by negotiation within thirty (30) days after OWNER'S written request, CITY shall, initiate proceedings utilizing its power of eminent domain to acquire that Non-Construction Agreement Subject Property at a public hearing noticed and conducted in accordance with California Code of Civil Procedure Section 1245.235 for the purpose of considering the adoption of a resolution of necessity concerning the Non-Construction Agreement Offsite Property, subject to the conditions set forth in this Section 3.8. The CITY and OWNER acknowledge that the timelines set forth in this Section 3.8.1 represent the maximum time periods which CITY and OWNER reasonably

believe will be necessary to complete the acquisition of any Non-Construction Agreement Offsite Property. CITY agrees to use reasonable good faith efforts to complete the actions described within lesser time periods, to the extent that it is reasonably able to do so, consistent with the legal constraints imposed upon CITY.

3.8.2 Owner's Option to Terminate Proceedings. CITY shall provide written notice to OWNER no later than fifteen (15) days prior to making an offer to the owner of the Non-Construction Agreement Offsite Property. At any time within that fifteen (15) day period, OWNER may, at its option, notify CITY that it wants CITY to cease all acquisition proceedings with respect to that Non-Construction Agreement Offsite Property, whereupon CITY shall cease such proceedings. CITY shall provide written notice to OWNER no later than fifteen (15) days prior to the date of the hearing on CITY'S intent to consider the adoption of a resolution of necessity as to any Non-Construction Agreement Offsite Property. At any time within that fifteen (15) day period, OWNER may, at its option, notify CITY that it wants CITY to cease condemnation proceedings, whereupon CITY shall cease such proceedings. If OWNER does not notify CITY to cease condemnation proceedings within said fifteen (15) day period, then the CITY may proceed to consider and act upon the Non-Construction Agreement Offsite Property resolution of necessity. If CITY adopts such resolution of necessity, then CITY shall diligently institute condemnation proceedings and file a complaint in condemnation and seek an order of immediate possession with respect to the Non-Construction Agreement Offsite Property.

3.9 Regulation by Other Public Agencies. It is acknowledged by the parties that other public agencies not within the control of CITY possess authority to regulate aspects of the development of the Property separately from or jointly with CITY and this Agreement does not limit the authority of such other public agencies. CITY agrees to cooperate fully, at no cost to CITY, with OWNER in obtaining any required permits or compliance with the regulations of other public agencies provided such cooperation is not in conflict with any laws, regulations or policies of the CITY.

3.10 Tentative Tract Maps; Extension. With respect to applications by OWNER for tentative subdivision maps for portions of the Property, CITY agrees that OWNER may file and process tentative maps in accordance with Chapter 4.5 (commencing with Section 66498.1) of Division 2 of Title 7 of the California Government Code and the applicable provisions of CITY's subdivision ordinance, as the same may be amended from time to time. In accordance with the provisions of Section 66452.6 of the Government Code, each tentative subdivision map or tentative parcel map, heretofore or hereafter approved in connection with development of the Property, shall be deemed to have been granted an extension of time to and until the date that is five (5) years following the Effective Date of this Agreement.; The CITY's City Council may, in its discretion, extend any such map for an additional period of up to five (5) years beyond its original term, so long as the subdivider files a written request for an extension with the City prior to the expiration of the initial five (5) year term.

4. PUBLIC BENEFITS.

4.1 Intent. The parties acknowledge and agree that development of the Property will result in substantial public needs that will not be fully met by the Development Plan and further acknowledge and agree that this Agreement confers substantial private benefits on OWNER that should be balanced by commensurate public benefits. Accordingly, the parties intend to provide consideration to the public to balance the private benefits conferred on OWNER by providing more fully for the satisfaction of the public needs resulting from the Project.

4.2 Development Impact Fees.

4.2.1 Amount of Development Impact Fee. Development Impact Fees (DIF) shall be paid by OWNER. The Development Impact Fee amounts to be paid by OWNER shall be the amounts that are in effect at the time such amounts are due. Nothing contained in this Agreement shall affect the ability of the CITY to impose new Development Impact Fees or amend the amounts of existing Development Impact Fees. Additionally, nothing contained in this Agreement shall affect the ability of other public agencies that are not controlled by CITY to impose and amend, from time to time, Development Impact Fees established or imposed by such other public agencies, even though such Development Impact Fees may be collected by CITY.

4.2.2 Time of Payment. The Development Impact Fees required pursuant to Subsection 4.2.1 shall be paid to CITY prior to the issuance of building permit for each applicable residential or other unit, except for the Open Space and Habitat Acquisition Development Impact fee, which shall be paid by OWNER to CITY prior to the issuance of a grading permit. Deferral of the payment of Development Impact Fees may be granted pursuant to a separate agreement approved by City pursuant to City policy.

4.2.3 Parkland and Quimby Act Fees. Pursuant to the General Plan (Ontario Plan) Goal PR1, Policy PR1-5 (achievement of a park standard of 5 acres of parkland per 1,000 residents) OWNER shall provide improved parks, developed in accordance with the City's park standards in an amount equal to two (2) acres per 1,000 of projected population without credit, reimbursement, offset or consideration from City. Such areas shall either be dedicated to the City or transferred to a homeowners' association. If approved by the City Manager, OWNER may satisfy this requirement through the development of non-public recreation facilities such as private recreational clubhouses or pool facilities. Credit for such private recreational facilities areas shall be limited to a maximum of 50% of the foregoing park development requirement. If OWNER's Project does not provide dedicated and developed park acreage equal to two (2) acres per 1,000 projected population, OWNER shall pay a fee in-lieu equal to the per acre estimated costs of acquisition and development of parkland in the City's Development Impact Fee for the calculated park acreage deficiency, at the time the fee becomes due and payable to the City. Such in-lieu fee shall be due and

payable prior to the issuance of the first building permit for Production Units issued to OWNER. Any park dedication and/or improvements in excess of such two (2) acres per thousand standard, provided such park has been developed in accordance with the City's park standards and is open to the public generally, shall entitle OWNER to a credit toward its obligations under the Quimby Act (Gov. Code, § 64477) and the City's implementing ordinance and/or resolution (collectively "**Quimby Act Obligations**"), and to the extent OWNER's Quimby Act Obligations are satisfied, OWNER shall be entitled to have the City acquire such developed and publicly available parks as Non-Program Interests in accordance with Section 4.3.3 below.

4.3 Responsibility for Construction of Public Improvements.

4.3.1 Timely Construction of Public Infrastructure. The phasing of the areawide infrastructure construction within the New Model Colony will be as approved by the CITY. OWNER shall be responsible for the timely construction and completion of all public infrastructure required for the Project as shown on the attached Exhibit "F" and any and all tentative tract map conditions. Unless otherwise specified in the Subdivision Agreement/Tract Map conditions, all other required Improvements for each Tract Map, shall be completed and operational prior to, and as a condition precedent to, OWNER requesting and CITY's granting of the first building permit for Production Units for each such Tract Map. All Infrastructure and Improvements shall be completed as required by the Subdivision Agreement/Tract Map conditions for Tract Map No. 20536.

4.3.2 Construction of DIF Program Infrastructure (Construction Agreement). To the extent OWNER is required to construct and completes construction of public improvements that are included in CITY's Development Impact Fee Program and the Construction Agreement between CITY and NMC Builders LLC, CITY agrees that CITY shall issue DIF Credit in accordance with the provisions of the Construction Agreement and any amendments thereto. Use of DIF Credit issued to OWNER as a member of NMC Builders LLC to offset OWNER's DIF payment obligations shall also be subject to the provisions of the Construction Agreement and any amendments thereto.

4.3.3 Construction of DIF Program Infrastructure (Non-Construction Agreement). To the extent OWNER is required to construct and completes construction of public improvements that are included in CITY's Development Impact Fee Program and such public improvements are not included the Construction Agreement between CITY and NMC Builders LLC, CITY agrees that CITY shall issue DIF Credit in accordance with the provisions of a separate Fee Credit Agreement between CITY and OWNER. Limitation on the use of DIF Credit issued to OWNER to offset OWNER's DIF payment obligations shall also be subject to the provisions of a separate Fee Credit Agreement. CITY and OWNER agree that the Fee Credit Agreement between CITY and OWNER shall comply with CITY's adopted policies applicable to such agreements.

4.3.4 Construction of Public Infrastructure by Third Parties. CITY and OWNER acknowledge the Improvements described in Exhibit E and depicted in Exhibit F are required for the development of the Property, surrounding properties within the Ontario Ranch and the other property owners are also obligated to construct the Improvements or portions thereof. As such, CITY agrees that OWNER's obligation to construct the Improvements may be satisfied by third party owners pursuant to separate written agreements between OWNER and said third party undertaking the construction of the Improvements. Nothing in this Agreement shall be construed to prohibit the coordination of the construction of the Improvements between private parties, including the allocation of costs for the construction of the Improvements. Notwithstanding anything to the contrary herein, any applicable DIF Credits may be transferred and assigned from one (1) party to another with respect to the construction of the Improvements and such transfer or assignment shall not require the conveyance of any real property.

4.4 Affordable Housing Requirement.

4.4.1 Affordable Housing- Number of Units. OWNER shall provide a minimum number of affordable housing units, equivalent to 10% of the OWNER's total approved residential units within the Project, that are affordable to very low, low and moderate income households. Such requirement for affordable housing shall be met through one, or a combination of one or more, of the options provided in the following Sections 4.4.2.1 through 4.4.2.5. For the purposes of this Section, any term not defined in this Agreement shall be as defined by California Community Redevelopment Law (California Health and Safety Code Section 33000 et seq.).

4.4.2 Affordability Spread. Of the total number of residential dwelling units specified in Section 4.4.1, to be constructed or rehabilitated pursuant to Sections 4.4.2.1 or 4.4.2.2 respectively, thirty percent (30%) shall be available to very low income, thirty percent (30%) shall be available to low income and forty percent (40%) shall be available to moderate income households. "**Households**" shall be as defined by California Health and Safety Code Section 50053.

4.4.2.1 New Construction. If OWNER elects to fully or partially satisfy the affordable housing requirement by the construction of new residential units, it shall construct and restrict the affordability of residential dwelling units within its Project or, at OWNER's option and with the approval of the City, within another project elsewhere within the City. The affordable units constructed shall be intermingled with other units as part of the Project, and shall be built to the same construction, design and aesthetic standards, as well as number of rooms, as other units constructed as part of that OWNER's Project. In addition, the percentage ratio of affordable units offered for sale versus those offered for rent shall equal the percentage ratio of other units offered for sale versus for rent within OWNER's Project. Such construction shall be completed no later than the date that is five (5) years following the issuance of the first building permit for OWNER's Project; provided however

that to the extent OWNER has not constructed the required percentage of units, based on the number of building permits for non-restricted units, OWNER shall, prior to the issuance of such building permits, provide security (in the form and substance approved by the City Manager and City Attorney) to City in order to ensure the faithful completion of such required percentage of construction of affordable units. If OWNER elects the option of constructing new affordable units, a detailed Affordable Housing Agreement specifying terms for the allowable monthly housing costs or rents (as applicable) and maintenance and occupancy standards shall be prepared, executed and recorded against such units as a condition to the issuance of a building permit. The Affordable Housing Agreement shall hold a recorded priority position senior to any other non-statutory lien or encumbrance affecting the unit.

4.4.2.2 Rehabilitation. If OWNER elects to fully or partially satisfy the affordable housing requirement by the substantial rehabilitation of existing residential units in the City, it shall substantially rehabilitate and restrict the affordability of, the number of residential units specified in Section 4.4.1, provided that such units shall be provided elsewhere within the City. The rehabilitation work shall be substantial and of high quality and shall also address any deferred property maintenance issues on the property. "**Substantial rehabilitation**" shall mean rehabilitated multi-family rented dwelling units with three or more units and the value of the rehabilitation constitutes 25 percent of the after rehabilitation value of the dwelling, inclusive of land value pursuant to Health and Safety Code Section 33413(b)(2)(A)(iii-iv) as such section exists as of the Effective Date of this Agreement. If OWNER chooses the option of rehabilitation of existing housing units within the City, a detailed Affordable Housing Agreement specifying the terms for the allowable month housing costs or rents (as applicable) and maintenance and occupancy standards shall be prepared, executed and recorded against such units as a condition to the issuance of a building permit. Such rehabilitation shall be completed no later than the date that is five (5) years following the issuance of the first building permit for OWNER's Project; provided however that to the extent OWNER has not rehabilitated the required percentage of units, based on the number of building permits, OWNER shall, prior to the issuance of such building permits, provide security (in the form and substance approved by the City Manager and City Attorney) to the City in order to ensure the faithful completion of such required percentage of rehabilitation.

4.4.2.3 In-Lieu Fee. If OWNER has not fully complied with the requirements of Section 4.4.1 by providing the minimum number of affordable units through the construction of new affordable units or by the substantial rehabilitation of existing units, shall pay an "**Affordability In-Lieu Fee**". If OWNER has not provided any affordable residential units by construction or rehabilitation, the Affordability In-Lieu fee shall be equal to

Two Dollars Sixty-One Cents ($3.12) per square foot of residential development within OWNER's Project or, if pre-paid as set forth below, Two Dollars Twenty-Eight Cents ($2.74) per square foot of residential development within OWNER's Project. If OWNER has partially complied with the requirements of Section 4.4.1 by construction or rehabilitation of less than the minimum number of units, then the Affordability In-lieu Fee shall be recalculated and reduced in consideration of the number and type of affordable units provided. The Affordability In-Lieu Fee shall be paid by OWNER to City no later than prior to the issuance of each building permit within OWNER's Project based on the square footage of the residential unit for which such building permit is sought; provided however that OWNER may, at OWNER's election, pre-pay such Affordability In-Lieu Fee by paying such Affordability In-Lieu Fee within thirty (30) days following the earliest discretionary approval by the City for OWNER's Project, including, but not limited to, any general plan amendment, specific plan adoption, development agreement, tentative map approval, variance, conditional use permit, or resolution of intention to form any public financing mechanism. The Two Dollars, Thirty-Seven Cents ($3.12) and the Two Dollars Seven Cents ($2.74) per square foot amounts shall automatically be increased annually, commencing on July 1, 2023, and automatically each July 1 thereafter. Such adjustment shall be based on the percentage increase (but no decrease) in the Consumer Price Index (Riverside - San Bernardino - Ontario, CA), (December 2017=100) over the preceding year. The pre-paid Affordability In-Lieu Fee shall be calculated based on the maximum floor area ratio (FAR) permitted within the General Plan and any applicable FAR contained within the applicable specific plan, whichever is greater, and the Maximum Development Density. For purposes of this Agreement, "**Maximum Development Density**" shall be determined by multiplying the OWNER's Project's density for residential development potential as set forth in the General Plan or the applicable Specific Plan, whichever is less, by the net acreage of land within OWNER's Project. All "Affordability In-Lieu Fees" collected by the City shall be used to promote the construction of affordable housing within the City.

4.4.2.4 Affordability Covenants. Prior to the issuance of the first building permit for any affordable unit, the City and OWNER shall enter into an Affordable Housing Agreement Affordability shall be assured for a period of forty-five (45) years for for-sale units and fifty-five (55) years for rentals. For rental units, base rents shall be established by the City and rental adjustments required by the City shall be performed on an annual basis. In addition, the Affordable Housing Agreement shall impose maximum occupancy limits of 2 occupants per bedroom plus 1 additional occupant per dwelling unit, and a requirement for the owner or tenant to properly maintain each dwelling unit.

4.4.2.5 Transfer of Affordable Project. No transfer of title to any affordable

housing project shall occur without the prior written consent of the City. In the event OWNER transfers title to any affordable housing project required to be constructed pursuant to this Agreement to a non-profit entity, or other entity, that receives an exemption from ad valorem real property taxes, the City shall be required to assure payment of an annual in lieu fee to the City on July 1 of each year equal to one-tenth of one percent (0.1%) of the assessed value of such project. The City may permit OWNER to satisfy this obligation by recorded covenants against the property and enforceable against said entity by the City. Any such covenants shall be approved by the Planning Director and the City Attorney.

4.5 Schools Obligations.

4.5.1 Written Evidence of Compliance with Schools Obligations.
OWNER shall, either through joint or individual agreements between OWNER and the applicable school district(s), shall satisfy its new school obligations. The new school obligations for the Mountain View School District in the Ontario Ranch area have been projected to include the acquisition or dedication of school sites for, and construction of, up to eight (8) schools. Of these eight (8) schools, six (6) are to be elementary (K-5) grade schools and two (2) are to be middle grade schools. The new school obligations for the Chaffey Joint Union High School District in the Ontario Ranch area have been projected to include the dedication of a school site for, and construction of, an additional high school. The new school obligations for the applicable school district shall be met by a combination of the following: (1) designating and dedicating school site(s) within the Property as set forth in the General Plan, and/or (2) paying school impact fees, (3) entering into a joint mitigation agreement or individual mitigation agreements, or (4) any combination of the foregoing. Written evidence of approval by the applicable school district that OWNER has met their school obligations may be required by the City as the condition to the issuance by the City of any entitlements for OWNER's Project. In the event OWNER is unable to provide such written evidence from the applicable school district(s), the City shall have the right to decline to honor any DIF Credit, Certificates of MDD Availability, Certificates of Storm Water Treatment Capacity Availability, or any combination thereof, presented by such OWNER, without liability to the City. To the extent that a joint mitigation agreement is approved by the applicable school district(s), and OWNER is a participant in good standing in such mitigation agreement, OWNER shall be deemed to have mitigated its new school obligations under this Section 4.4.1.

4.6 Public Services Funding Fee.

4.6.1 Requirement for Payment of Public Services Funding Fee. In order to ensure that the adequate provision of public services, including without limitation, police, fire and other public safety services, are available to the residents of each Project in a timely manner, OWNER shall pay to CITY a "**Public Services Funding Fee**." The Public Services Funding Fee shall apply to residential and non-residential uses as set forth below.

4.6.2 Public Services Funding Fee Amount. OWNER shall pay a Public Services Funding fee in the total amount of Two Thousand Four Hundred Ninety dollars and Seventy Eight Cents ($2,490.78) per residential dwelling unit. The Public Services Funding Fee shall be paid in one (1) installment within one hundred eighty (180) calendar days after the effective date of the Development Agreement or in two (2) installments, at OWNER's option, as follows:

4.6.2.1 First Installment (Residential uses). The First Installment of the Public Services Funding Fee shall be One Thousand Two Hundred Forty Five dollars and Thirty Nine Cents ($1,245.39) per residential dwelling unit. The First Installment shall be based upon the "**Maximum Development Density**" of the OWNER Project, as defined in Section 3.7.2.3 of the First Amended and Restated Construction Agreement. The First Installment shall be due and payable 30 days following the effective date of the Development Agreement.

If the First installment amount is not paid for all residential dwelling units within the Project (based on the Maximum Development Density, or the number of units described on "B Maps" if approved) by January 1, 2024, the amount of the First Installment shall be increased. Such increase shall be based on the percentage increase (but no decrease) in the Consumer Price Index (Riverside - San Bernardino - Ontario, CA) (December 2017=100) over the preceding year. Additionally, the amount shall be further increased automatically by the percentage increase in the Consumer Price Index (Riverside - San Bernardino - Ontario, CA) (December 2017=100) on each January 1 thereafter.

4.6.2.2 Second Installment (Residential Uses). The Second Installment of the Public Services Funding Fee shall be One Thousand Two Hundred Forty Five dollars and Thirty Nine Cents ($1,245.39) per residential unit. The Second Installment shall be paid at the time of the issuance of each building permit for the Project. The amount of the Second Installment shall increase automatically by percentage increase (but no decrease) in the Consumer Price Index (Riverside - San Bernardino - Ontario, CA) (December 2017=100) over the preceding year on January 1st of each year, beginning on January 1, 2024. OWNER may exercise the option to pay the Second Installment amount for all residential units, a portion of the residential units, or for the remainder of the residential units within OWNER's Project on or before each December 31st, before the Second Installment amount is automatically increased.

4.6.2.3 Single Installment (Non-residential Uses). A single installment payment of the Public Services Funding Fee shall be required in the amount of Seventy Five Cents ($.75) per square foot of non-residential buildings. The single installment for non-residential uses shall be due and payable prior to the issuance of the building permit for a non-residential building. The amount of the Single Installment for non-residential uses shall automatically

increase by percentage increase (but no decrease) in the Consumer Price Index (Riverside - San Bernardino - Ontario, CA), (December 2017=100) over the preceding year on January 1st of each year, beginning on January 1, 2024. OWNER may exercise the option to pay any single installment amounts for the remainder of the non-residential square footage within the Project on or before December 31st, before the Single Installment amount is automatically increased.

4.7 Net MDD/Water Availability Equivalents.

4.7.1 Assigned Net MDD/Water Availability Equivalents. The City has agreed with NMC Builders LLC to reserve exclusively for Members of NMC Builders, including OWNER, Net MDD made available through the construction of water system improvements funded by NMC Builders LLC. NMC Builders has assigned to OWNER its allocable share of the Net MDD issued by City. The provisions of the Construction Agreement Amendment requires that the City shall not approve a final tract map or issue building permits or certificates of occupancy for the area of development within the New Model Colony served by the water system improvements funded by NMC Builders LLC, except to the bearer of an Assignment of Net MDD Water Availability.

4.7.2 Use of Assigned Net MDD Water Availability. OWNER shall provide evidence of sufficient Net MDD Water Availability Equivalents (or portions thereof) prior to and as a condition precedent to, the City's approval of any and all tract maps for the Property. The amount of Net MDD Water Availability Equivalents required for City's approval of a tract map shall be based upon water demand factors and assumptions listed in Exhibit C-2R of the Construction Agreement Amendment as "Water Demand Equivalents by Land Use" for each land use category.

4.7.3 Requirement for other Water System Improvements. A Certificate of Net MDD Availability is evidence only of available water capacity and does not satisfy any other conditions applicable to an OWNER's Project, including those relating to design and construction of master-planned potable water and recycled water transmission and distribution system for the respective pressure zone and other public infrastructure requirements.

4.7.4 Effectiveness of Agreement. Notwithstanding anything set forth in this Agreement, CITY and OWNER each acknowledge, confirm, and agree that (i) the CITY approval of this Agreement and (ii) the effectiveness of this Agreement, in each case, are conditioned upon OWNER's admission to NMC Builders as a "Member" (if not already a Member) thereof pursuant to the terms and conditions of the operating agreement of NMC Builders within thirty (30) days following the Effective Date of this Agreement. OWNER'S failure to maintain membership in NMC Builders LLC is and shall be a Default under this Agreement.

4.8 Storm Water Capacity Availability.

4.8.1 Requirement for Storm Water Treatment Capacity Availability. OWNER shall provide evidence of sufficient Storm Water Treatment Capacity Availability as reserved in a Certificate of Storm Water Treatment Capacity Availability the same manner and subject to the same limitations as provided for the assignment of Certificates of Net MDD Availability in Section 4.7 of this Agreement.

4.8.2 Use of Storm Water Treatment Capacity Availability. The amount of Storm Water Treatment Capacity Availability required for the issuance of a grading permit to OWNER shall be based upon the Net Residential Acreage of the area to be graded regardless of the corresponding use.

4.8.3 Requirement for other Storm Water Improvements. The Certificate of Storm Water Treatment Capacity Availability is evidence only of available storm water treatment capacity and does not satisfy any other conditions applicable to a particular development project, including those relating to on-site water treatment, water quality, connection to the storm water collection system, or other public infrastructure requirements.

4.9 Maintenance of Open Space. OWNER shall provide for the ongoing maintenance of all park, common areas and open space areas within the Project as more particularly set forth in the Specific Plan, through a homeowners' association as approved by the CITY. Covenants, conditions and restrictions establishing any homeowners' association shall be approved by the Planning Director and City Attorney.

4.10 Compliance with Public Benefits Requirements.

4.10.1 Failure to Provide Public Benefits. In the event OWNER fails or refuses to comply with any condition referenced in Section 4.1 through 4.10, or challenges (whether administratively or through legal proceedings) the imposition of such conditions, OWNER shall be deemed in default of this Agreement pursuant to Section 8.4 hereof, thereby entitling the City to any and all remedies available to it, including, without limitation, the right of the City to withhold OWNER's Project-related building permits, certificates of occupancy, or discretionary approvals, without liability.

5. FINANCING OF PUBLIC IMPROVEMENTS.

5.1 Financing Mechanism(s). In accordance with the Memorandum of Agreement between the CITY and NMC Builders, CITY will cooperate with OWNER in the formation of a CFD, or CFDs, to include all of the Project, to provide a financing mechanism to reimburse the OWNER for funds paid to NMC Builders LLC for OWNER's share of the costs of public infrastructure pursuant to the Construction Agreement and to acquire other public facilities constructed by OWNER subject to the provisions of the Memorandum of Agreement between CITY and NMC Builders LLC. Notwithstanding such reimbursements and acquisitions, OWNER shall remain entitled to DIF Credits as provided for in Article 3 of the Construction Agreement and/or as provided for in a separate Fee Credit Agreement between CITY and OWNER. OWNER agrees that, prior

to the recordation of any Tract Map for the Property, the Property shall be included in a CFD to finance City services through annual special taxes that will initially be $1,443.71 per Single Family Detached Dwelling Unit, $1,251.15 per Multiple-Family Dwelling Unit, $1,048.96 per Gated Apartment Community Dwelling Unit, and $0.27 per square foot for Non-Residential buildings. These amounts shall be subject to an automatic increase at a rate not to exceed four (4%) percent per year, unless otherwise modified by the CITY. CITY shall be the sole and exclusive lead agency in the formation of any CFD, assessment district or other public financing mechanism within the Property; provided however, that the proceeds of any such CFD, assessment district, or financing mechanism may be used, subject to restrictions that may be imposed by applicable law, for the purposes of acquiring, constructing or maintaining public facilities to be owned or operated by other public agencies, including, without limitation those facilities owned or operated by a school district. In addition to the rights of the CITY pursuant to section 5.2 hereof, CITY shall have the right, but not the obligation, to condition the formation of any CFD, assessment district or other public financing mechanism within the Property on the OWNER mitigating all Project-related impacts to the applicable school district(s) as required by such school district(s). Written evidence by such school district(s) may be required by the CITY as the condition to the formation of any CFD, assessment district or other public financing mechanism within the Property, or any steps preliminary thereto, including, without limitation, the adoption of any resolution of intention to form such CFD, assessment district or other public financing mechanism within the Property. It is not the intent of the parties hereto, by this provision, to prohibit or otherwise limit the City's ability to take any and all necessary steps requisite to the formation of the CFD to finance City services through annual special taxes as set forth in this Section 5.1. Formation of any CFD, assessment district or other public financing mechanism within the Property, shall be subject to CITY's ability to make all findings required by applicable law and complying with all applicable legal procedures and requirements including, without limitation, CITY's public financing district policies as such policies may be amended from time to time. Notwithstanding the foregoing, it is acknowledged and agreed by the parties that nothing contained in this Agreement shall be construed as requiring CITY or the City Council to form any such district or to issue and sell bonds.

6. REVIEW FOR COMPLIANCE.

6.1 Periodic and Special Reviews.

6.1.1 Time for and Initiation of Periodic Review. The CITY shall review this Agreement every twelve (12) months from the Effective Date in order to ascertain the good faith compliance by the OWNER with the terms of this Agreement. The OWNER shall submit an Annual Monitoring Report to CITY, in a form acceptable to the City Manager, along with any applicable processing charge within ten (10) days after each anniversary date of the Effective Date of this Agreement. Within fifteen (15) days after the receipt of the Annual Monitoring Report, CITY shall review the Annual Monitoring Report. Prior to the expiration of the fifteen (15) day review period, CITY shall either issue a notice of continuing compliance or a notice of non-compliance and a notice of CITY's intent to conduct a Special Review

pursuant to Sections 6.1.2 through 6.1.6. Issuance of a notice of continuing compliance may be issued by the City Manager or his designee.

6.1.2 Initiation of Special Review. A special review may be called either by agreement between the parties or by initiation in one or more of the following ways:

(1) Recommendation of the Planning staff;

(2) Affirmative vote of at least four (4) members of the Planning Commission; or

(3) Affirmative vote of at least three (3) members of the City Council.

6.1.3 Notice of Special Review. The City Manager shall begin the special review proceeding by giving notice that the CITY intends to undertake a special review of this Agreement to the OWNER. Such notice shall be given at least ten (10) days in advance of the time at which the matter will be considered by the Planning Commission.

6.1.4 Public Hearing. The Planning Commission shall conduct a hearing at which the OWNER must demonstrate good faith compliance with the terms of this Agreement. The burden of proof on this issue is upon the OWNER.

6.1.5 Findings Upon Public Hearing. The Planning Commission shall determine upon the basis of substantial evidence whether or not the OWNER has, for the period under review, complied in good faith with the terms and conditions of this Agreement.

6.1.6 Procedure Upon Findings.

(a) If the Planning Commission finds and determines on the basis of substantial evidence that the OWNER has complied in good faith with the terms and conditions of this Agreement during the period under review, the review for that period is concluded.

(b) If the Planning Commission finds and determines on the basis of substantial evidence that the OWNER has not complied in good faith with the terms and conditions of this Agreement during the period under review, the Planning Commission may recommend to the City Council to modify or terminate this Agreement.

(c) The OWNER may appeal a determination pursuant to paragraph (b) to the City Council in accordance with the CITY's rule for consideration of appeals in zoning matters generally.

6.2 Proceedings Upon Modification or Termination. If, upon a finding under Section 6.1.6(b), the CITY determines to proceed with modification or termination of this Agreement, the CITY shall give notice to the property OWNER of its intention so to do. The notice shall contain:

(a) The time and place of the hearing;

(b) A statement as to whether or not the CITY proposes to terminate or to modify this Agreement; and

(c) Other information that the CITY considers necessary to inform the OWNER of the nature of the proceeding.

6.3 Hearing on Modification or Termination. At the time and place set for the hearing on modification or termination, the OWNER shall be given an opportunity to be heard. The OWNER shall be required to demonstrate good faith compliance with the terms and conditions of this Agreement. The burden of proof on this issue shall be on the OWNER. If the City Council finds, based upon substantial evidence in the administrative record, that the OWNER has not complied in good faith with the terms and conditions of the agreement, the City Council may terminate or modify this Agreement and impose those conditions to the action it takes as it considers necessary to protect the interests of the CITY. The decision of the City Council shall be final, subject only to judicial review pursuant to Section 1094.5 of the Code of Civil Procedure.

6.4 Certificate of Agreement Compliance. If, at the conclusion of a Periodic or Special Review, OWNER is found to be in compliance with this Agreement, CITY shall, upon written request by OWNER, issue a Certificate of Agreement Compliance ("Certificate") to OWNER stating that after the most recent Periodic or Special Review and based upon the information known or made known to the Planning Director and City Council that (1) this Agreement remains in effect and (2) OWNER is not in default. The Certificate shall be in recordable form, shall contain information necessary to communicate constructive record notice of the finding of compliance, shall state whether the Certificate is issued after a Periodic or Special Review and shall state the anticipated date of commencement of the next Periodic Review. OWNER may record the Certificate with the County Recorder. Whether or not the Certificate is relied upon by assignees or other transferees or OWNER, CITY shall not be bound by a Certificate if a default existed at the time of the Periodic or Special Review, but was concealed from or otherwise not known to the Planning Director or City Council.

7. [RESERVED]

8. DEFAULT AND REMEDIES.

8.1 Remedies in General. It is acknowledged by the parties that CITY would not have entered into this Agreement if it were to be liable in damages under this Agreement, or with respect to this Agreement or the application thereof.

In general, each of the parties hereto may pursue any remedy at law or equity available for the breach of any provision of this Agreement, except that CITY shall not be liable in damages to OWNER, or to any successor in interest of OWNER, or to any other person, and OWNER covenants not to sue for damages or claim any damages:

(a) For any breach of this Agreement or for any cause of action which arises out of this Agreement; or

(b) For the taking, impairment or restriction of any right or interest conveyed or provided under or pursuant to this Agreement; or

(c) Arising out of or connected with any dispute, controversy or issue regarding the application or interpretation or effect of the provisions of this Agreement.

8.2 Specific Performance. The parties acknowledge that money damages and remedies at law generally are inadequate and specific performance and other non-monetary relief are particularly appropriate remedies for the enforcement of this Agreement and should be available to all parties for the following reasons:

(a) Money damages are unavailable against CITY as provided in Section 8.1 above.

(b) Due to the size, nature and scope of the project, it may not be practical or possible to restore the Property to its natural condition once implementation of this Agreement has begun. After such implementation, OWNER may be foreclosed from other choices it may have had to utilize the Property or portions thereof. OWNER has invested significant time and resources and performed extensive planning and processing of the Project in agreeing to the terms of this Agreement and will be investing even more significant time and resources in implementing the Project in reliance upon the terms of this Agreement, and it is not possible to determine the sum of money which would adequately compensate OWNER for such efforts.

8.3 Release. Except for nondamage remedies, including the remedy of specific performance and judicial review as provided for in Section 6.5, OWNER, for itself, its successors and assignees, hereby releases the CITY, its officers, agents and employees from any and all claims, demands, actions, or suits of any kind or nature arising out of any liability, known or unknown, present or future, including, but not limited to, any claim or liability, based or asserted, pursuant to Article I, Section 19 of the California Constitution, the Fifth Amendment of the United States Constitution, or any other law or ordinance which seeks to impose any other liability or damage, whatsoever, upon the CITY because it entered into this Agreement or because of the terms of this Agreement.

8.4 Termination or Modification of Agreement for Default of OWNER. Subject to the provisions contained in Subsections 6.2 and 6.3 herein, CITY may terminate or modify this Agreement for any failure of OWNER to perform any material duty or obligation of OWNER under this Agreement, or to comply in good faith with the terms of this Agreement (hereinafter referred to as "default"); provided, however, CITY may terminate

or modify this Agreement pursuant to this Section only after providing written notice to OWNER of default setting forth the nature of the default and the actions, if any, required by OWNER to cure such default and, where the default can be cured, OWNER has failed to take such actions and cure such default within 60 days after the effective date of such notice or, in the event that such default cannot be cured within such 60 day period but can be cured within a longer time, has failed to commence the actions necessary to cure such default within such 60 day period and to diligently proceed to complete such actions and cure such default.

8.5 Termination of Agreement for Default of CITY. OWNER may terminate this Agreement only in the event of a default by CITY in the performance of a material term of this Agreement and only after providing written notice to CITY of default setting forth the nature of the default and the actions, if any, required by CITY to cure such default and, where the default can be cured, CITY has failed to take such actions and cure such default within 60 days after the effective date of such notice or, in the event that such default cannot be cured within such 60 day period but can be cured within a longer time, has failed to commence the actions necessary to cure such default within such 60 day period and to diligently proceed to complete such actions and cure such default.

9. THIRD PARTY LITIGATION.

9.1 General Plan Litigation. CITY has determined that this Agreement is consistent with its Comprehensive General Plan, as such General Plan exists as of the Effective Date ("General Plan"), and that the General Plan meets all requirements of law. OWNER has reviewed the General Plan and concurs with CITY's determination. CITY shall have no liability in damages under this Agreement for any failure of CITY to perform under this Agreement or the inability of OWNER to develop the Property as contemplated by the Development Plan of this Agreement as the result of a judicial determination that on the Effective Date, or at any time thereafter, the General Plan, or portions thereof, are invalid or inadequate or not in compliance with law.

9.2 Third Party Litigation Concerning Agreement. OWNER shall defend, at its expense, including attorneys' fees, indemnify, and hold harmless CITY, its agents, officers and employees from any claim, action or proceeding against CITY, its agents, officers, or employees to attack, set aside, void, or annul the approval of this Agreement or the approval of any permit granted pursuant to this Agreement. CITY shall promptly notify OWNER of any such claim, action or proceeding, and CITY shall cooperate in the defense. If CITY fails to promptly notify OWNER of any such claim, action or proceeding, or if CITY fails to cooperate in the defense, OWNER shall not thereafter be responsible to defend, indemnify, or hold harmless CITY. CITY may in its discretion participate in the defense of any such claim, action or proceeding.

9.3 Indemnity. In addition to the provisions of 9.2 above, OWNER shall indemnify and hold CITY, its officers, agents, employees and independent contractors free and harmless from any liability whatsoever, based or asserted upon any act or omission of OWNER, its officers, agents, employees, subcontractors and independent contractors, for property damage, bodily injury, or death (OWNER's employees included)

or any other element of damage of any kind or nature, relating to or in any way connected with or arising from the activities contemplated hereunder, including, but not limited to, the study, design, engineering, construction, completion, failure and conveyance of the public improvements, save and except claims for damages arising through the sole active negligence or sole willful misconduct of CITY. OWNER shall defend, at its expense, including attorneys' fees, CITY, its officers, agents, employees and independent contractors in any legal action based upon such alleged acts or omissions. CITY may in its discretion participate in the defense of any such legal action.

9.4 Environment Assurances. OWNER shall indemnify and hold CITY, its officers, agents, and employees free and harmless from any liability, based or asserted, upon any act or omission of OWNER, its officers, agents, employees, subcontractors, predecessors in interest, successors, assigns and independent contractors for any violation of any federal, state or local law, ordinance or regulation relating to industrial hygiene or to environmental conditions on, under or about the Property, including, but not limited to, soil and groundwater conditions, and OWNER shall defend, at its expense, including attorneys' fees, CITY, its officers, agents and employees in any action based or asserted upon any such alleged act or omission. CITY may in its discretion participate in the defense of any such action.

9.5 Reservation of Rights. With respect to Sections 9.2, 9.3 and 9.4 herein, CITY reserves the right to either (1) approve the attorney(s) which OWNER selects, hires or otherwise engages to defend CITY hereunder, which approval shall not be unreasonably withheld, or (2) conduct its own defense, provided, however, that OWNER shall reimburse CITY forthwith for any and all reasonable expenses incurred for such defense, including attorneys' fees, upon billing and accounting therefor.

9.6 Survival. The provisions of this Sections 9.1 through 9.6, inclusive, shall survive the termination of this Agreement.

10. MORTGAGEE PROTECTION.

The parties hereto agree that this Agreement shall not prevent or limit OWNER, in any manner, at OWNER's sole discretion, from encumbering the Property or any portion thereof or any improvement thereon by any mortgage, deed of trust or other security device securing financing with respect to the Property. CITY acknowledges that the lenders providing such financing may require certain Agreement interpretations and modifications and agrees upon request, from time to time, to meet with OWNER and representatives of such lenders to negotiate in good faith any such request for interpretation or modification. CITY will not unreasonably withhold its consent to any such requested interpretation or modification provided such interpretation or modification is consistent with the intent and purposes of this Agreement. Any Mortgagee of the Property shall be entitled to the following rights and privileges:

(a) Neither entering into this Agreement nor a breach of this Agreement shall defeat, render invalid, diminish or impair the lien of any mortgage on the Property made in good faith and for value, unless otherwise required by law.

(b) The Mortgagee of any mortgage or deed of trust encumbering the Property, or any part thereof, which Mortgagee, has submitted a request in writing to the CITY in the manner specified herein for giving notices, shall be entitled to receive written notification from CITY of any default by OWNER in the performance of OWNER's obligations under this Agreement.

(c) If CITY timely receives a request from a Mortgagee requesting a copy of any notice of default given to OWNER under the terms of this Agreement, CITY shall provide a copy of that notice to the Mortgagee within ten (10) days of sending the notice of default to OWNER. The Mortgagee shall have the right, but not the obligation, to cure the default during the remaining cure period allowed such party under this Agreement.

(d) Any Mortgagee who comes into possession of the Property, or any part thereof, pursuant to foreclosure of the mortgage or deed of trust, or deed in lieu of such foreclosure, shall take the Property, or part thereof, subject to the terms of this Agreement. Notwithstanding any other provision of this Agreement to the contrary, no Mortgagee shall have an obligation or duty under this Agreement to perform any of OWNER's obligations or other affirmative covenants of OWNER hereunder, or to guarantee such performance; provided, however, that to the extent that any covenant to be performed by OWNER is a condition precedent to the performance of a covenant by CITY, the performance thereof shall continue to be a condition precedent to CITY's performance hereunder, and further provided that any sale, transfer or assignment by any Mortgagee in possession shall be subject to the provisions of Section 2.4 of this Agreement.

11. MISCELLANEOUS PROVISIONS.

11.1 Recordation of Agreement. This Agreement and any amendment or cancellation thereof shall be recorded with the San Bernardino County Recorder by the City Clerk within the ten (10) days after the CITY executes this Agreement, as required by Section 65868.5 of the Government Code. If the parties to this Agreement or their successors in interest amend or cancel this Agreement as provided for herein and in Government Code Section 65868, or if the CITY terminates or modifies the agreement as provided for herein and in Government Code Section 65865.1 for failure of the applicant to comply in good faith with the terms or conditions of this Agreement, the City Clerk shall have notice of such action recorded with the San Bernardino County Recorder.

11.2 Entire Agreement. This Agreement sets forth and contains the entire understanding and agreement of the parties, and there are no oral or written representations, understandings or ancillary covenants, undertakings or agreements which are not contained or expressly referred to herein. No testimony or evidence of any such representations, understandings or covenants shall be admissible in any proceeding of any kind or nature to interpret or determine the terms or conditions of this Agreement.

11.3 Severability. If any term, provision, covenant or condition of this Agreement shall be determined invalid, void or unenforceable, the remainder of this Agreement shall not be affected thereby to the extent such remaining provisions are not rendered impractical to perform taking into consideration the purposes of this Agreement.

Notwithstanding the foregoing, the provision of the Public Benefits set forth in Section 4 of this Agreement, including the payment of the fees set forth therein, are essential elements of this Agreement and CITY would not have entered into this Agreement but for such provisions, and therefore in the event such provisions are determined to be invalid, void or unenforceable, this entire Agreement shall be null and void and of no force and effect whatsoever.

11.4 Interpretation and Governing Law. This Agreement and any dispute arising hereunder shall be governed and interpreted in accordance with the laws of the State of California. This Agreement shall be construed as a whole according to its fair language and common meaning to achieve the objectives and purposes of the parties hereto, and the rule of construction to the effect that ambiguities are to be resolved against the drafting party shall not be employed in interpreting this Agreement, all parties having been represented by counsel in the negotiation and preparation hereof.

11.5 Section Headings. All section headings and subheadings are inserted for convenience only and shall not affect any construction or interpretation of this Agreement.

11.6 Singular and Plural. As used herein, the singular of any word includes the plural.

11.7 Joint and Several Obligations. Subject to section 2.4, if at any time during the term of this Agreement the Property is owned, in whole or in part, by more than one owner, all obligations of such owners under this Agreement shall be joint and several, and the default of any such owner shall be the default of all such owners. Notwithstanding the foregoing, no owner of a single lot which has been finally subdivided and sold to such owner as a member of the general public or otherwise as an ultimate user shall have any obligation under this Agreement except as provided under Section 4 hereof.

11.8 Time of Essence. Time is of the essence in the performance of the provisions of this Agreement as to which time is an element.

11.9 Waiver. Failure by a party to insist upon the strict performance of any of the provisions of this Agreement by the other party, or the failure by a party to exercise its rights upon the default of the other party, shall not constitute a waiver of such party's right to insist and demand strict compliance by the other party with the terms of this Agreement thereafter.

11.10 No Third Party Beneficiaries. This Agreement is made and entered into for the sole protection and benefit of the parties and their successors and assigns. No other person shall have any right of action based upon any provision of this Agreement.

11.11 Force Majeure. Neither party shall be deemed to be in default where failure or delay in performance of any of its obligations under this Agreement is caused by floods, earthquakes, other Acts of God, fires, wars, riots or similar hostilities, strikes and other labor difficulties beyond the party's control, (including the party's employment force), government regulations, court actions (such as restraining orders or injunctions), or other

causes beyond the party's control. If any such events shall occur, the term of this Agreement and the time for performance by either party of any of its obligations hereunder may be extended by the written agreement of the parties for the period of time that such events prevented such performance, provided that the term of this Agreement shall not be extended under any circumstances for more than five (5) years.

11.12 Mutual Covenants. The covenants contained herein are mutual covenants and also constitute conditions to the concurrent or subsequent performance by the party benefited thereby of the covenants to be performed hereunder by such benefited party.

11.13 Successors in Interest. The burdens of this Agreement shall be binding upon, and the benefits of this Agreement shall inure to, all successors in interest to the parties to this Agreement. All provisions of this Agreement shall be enforceable as equitable servitudes and constitute covenants running with the land. Each covenant to do or refrain from doing some act hereunder with regard to development of the Property: (a) is for the benefit of and is a burden upon every portion of the Property; (b) runs with the Property and each portion thereof; and, (c) is binding upon each party and each successor in interest during ownership of the Property or any portion thereof.

11.14 Counterparts. This Agreement may be executed by the parties in counterparts, which counterparts shall be construed together and have the same effect as if all of the parties had executed the same instrument.

11.15 Jurisdiction and Venue. Any action at law or in equity arising under this Agreement or brought by a party hereto for the purpose of enforcing, construing or determining the validity of any provision of this Agreement shall be filed and tried in the Superior Court of the County of San Bernardino, State of California, and the parties hereto waive all provisions of law providing for the filing, removal or change of venue to any other court.

11.16 Project as a Private Undertaking. It is specifically understood and agreed by and between the parties hereto that the development of the Project is a private development, that neither party is acting as the agent of the other in any respect hereunder, and that each party is an independent contracting entity with respect to the terms, covenants and conditions contained in this Agreement. No partnership, joint venture or other association of any kind is formed by this Agreement. The only relationship between CITY and OWNER is that of a government entity regulating the development of private property and the owner of such property.

11.17 Further Actions and Instruments. Each of the parties shall cooperate with and provide reasonable assistance to the other to the extent contemplated hereunder in the performance of all obligations under this Agreement and the satisfaction of the conditions of this Agreement. Upon the request of either party at any time, the other party shall promptly execute, with acknowledgment or affidavit if reasonably required, and file or record such required instruments and writings and take any actions as may be reasonably necessary under the terms of this Agreement to carry out the intent and to fulfill the provisions of this Agreement or to evidence or consummate the transactions

contemplated by this Agreement. The City Manager may delegate his powers and duties under this Agreement to an Assistant City Manager or other management level employee of the CITY.

11.18 Eminent Domain. No provision of this Agreement shall be construed to limit or restrict the exercise by CITY of its power of eminent domain.

11.19 Agent for Service of Process. In the event OWNER is not a resident of the State of California or it is an association, partnership or joint venture without a member, partner or joint venturer resident of the State of California, or it is a foreign corporation, then in any such event, OWNER shall file with the Planning Director, upon its execution of this Agreement, a designation of a natural person residing in the State of California, giving his or her name, residence and business addresses, as its agent for the purpose of service of process in any court action arising out of or based upon this Agreement, and the delivery to such agent of a copy of any process in any such action shall constitute valid service upon OWNER. If for any reason service of such process upon such agent is not feasible, then in such event OWNER may be personally served with such process out of this County and such service shall constitute valid service upon OWNER. OWNER is amenable to the process so served, submits to the jurisdiction of the Court so obtained and waives any and all objections and protests thereto. OWNER for itself, assigns and successors hereby waives the provisions of the Hague Convention (Convention on the Service Abroad of Judicial and Extra Judicial Documents in Civil or Commercial Matters, 20 U.S.T. 361, T.I.A.S. No. 6638).

11.20 Estoppel Certificate. Within thirty (30) business days following a written request by any of the parties, the other party shall execute and deliver to the requesting party a statement certifying that (i) either this Agreement is unmodified and in full force and effect or there have been specified (date and nature) modifications to the Agreement, but it remains in full force and effect as modified; and (ii) either there are no known current uncured defaults under this Agreement or that the responding party alleges that specified (date and nature) defaults exist. The statement shall also provide any other reasonable information requested. The failure to timely deliver this statement shall constitute a conclusive presumption that this Agreement is in full force and effect without modification except as may be represented by the requesting party and that there are no uncured defaults in the performance of the requesting party, except as may be represented by the requesting party. OWNER shall pay to CITY all costs incurred by CITY in connection with the issuance of estoppel certificates under this Section 11.20 prior to CITY's issuance of such certificates.

11.21 Authority to Execute. The person or persons executing this Agreement on behalf of OWNER warrants and represents that he or she/they have the authority to execute this Agreement on behalf of his or her/their corporation, partnership or business entity and warrants and represents that he or she/they has/have the authority to bind OWNER to the performance of its obligations hereunder.

11.22 Prevailing Wage. OWNER, for itself, its successors, and assigns, agrees, covenants, and warrants that the development of the Property, if any, shall

comply with all applicable federal and state labor laws (including, without limitation, the requirement under California law to pay prevailing wages and hire apprentices), and all obligations as set forth herein.

11.22.1 CITY makes no representations concerning prevailing wages in compliance with California Labor Code Section 1770 et seq.

11.22.2. OWNER acknowledges and agrees that it shall be independently responsible for reviewing the applicable laws and regulations with respect to the payment of prevailing wages and complying therewith. OWNER shall bear all risks of payment or non-payment of prevailing wages under California law and/or the implementation of Labor Code Section 1781, as the same may be amended from time to time, and/or any other similar law.

11.22.3 The foregoing indemnity shall survive termination of this Agreement and shall continue after completion of the construction and development of the Property by OWNER, its successors or assigns. OWNER shall be solely responsible for determining and effectuating compliance with such laws.

11.22.4 OWNER, ON BEHALF OF ITSELF, ITS SUCCESSORS, AND ASSIGNS, WAIVES AND RELEASES CITY FROM ANY RIGHT OF ACTION THAT MAY BE AVAILABLE TO OWNER PURSUANT TO LABOR CODE SECTION 1781 OR THE DAVIS BACON ACT. RELATIVE TO THE WAIVER AND RELEASE CONTAINED IN THIS SECTION 11.22, OWNER ACKNOWLEDGES THE PROTECTIONS OF CIVIL CODE SECTION 1542, WHICH READS AS FOLLOWS: A GENERAL RELEASE DOES NOT EXTEND TO CLAIMS THAT THE CREDITOR OR RELEASING PARTY DOES NOT KNOW OR SUSPECT TO EXIST IN HIS OR HER FAVOR AT THE TIME OF EXECUTING THE RELEASE, WHICH IF KNOWN BY HIM OR HER MUST HAVE MATERIALLY AFFECTED HIS OR HER SETTLEMENT WITH THE DEBTOR OR RELEASED PARTY.

INITIALS. BY INITIALING BELOW, OWNER KNOWINGLY AND VOLUNTARILY WAIVES THE PROVISIONS OF SECTION 1542 SOLELY WITH THE MATTERS WHICH ARE THE SUBJECT OF THE FOREGOING WAIVERS AND RELEASES:

DISCLOSURE NOTICE
SOUTH ARCHIBALD TRICHLOROETHYLENE PLUME

Dear Property Owner/Developer/Applicant:

The City of Ontario ("City") has approved or will be approving development in the Ontario Ranch area in the next few years, subject to the appropriate and required statutory process. This letter is intended to serve as notice to all potential property owners of the existence of a groundwater plume, known as the South Archibald Trichloroethylene (TCE) Plume which may exist in, under or near owner's property.

The groundwater plume is in an area in the central Chino Basin south of the Pomona Freeway, west of Turner Avenue, east of Grove Avenue, and north of Kimball Avenue. The plume primarily consists of TCE, a discontinued industrial solvent, and is subject to a clean-up under the oversight and direction of the Santa Ana Regional Water Quality Control Board ("Regional Board").

The Regional Board's approved clean-up procedure involves the removal and treatment of groundwater containing TCE via groundwater wells to reduce the plume concentrations and control its migration. In addition, the City is providing potable water supplies for domestic purposes to residences with private domestic wells affected by the plume. Finally, the Regional Board will continue to monitor all impacted areas and private domestic wells to ensure that residents' health and the environment are properly safeguarded. These remedial actions are documented in a Remedial Action Plan approved by the Regional Board in September 2016.

Further and current information may be found on the Regional Board's Geotracker website at https://geotracker.waterboards.ca.gov/profile_report?global_id=T10000004658.

Property owners may wish to include this letter as a part of a Real Estate Transfer Disclosure under California Civil Code Section 1102 et seq.

ORDINANCE NO. _____

AN ORDINANCE OF THE CITY COUNCIL OF THE CITY OF ONTARIO, CALIFORNIA, APPROVING FILE NO. PDA22-005, A DEVELOPMENT AGREEMENT BETWEEN THE CITY OF ONTARIO AND RB ONTARIO LLC, TO ESTABLISH THE TERMS AND CONDITIONS ASSOCIATED WITH TENTATIVE TRACT MAP NO. 20536 (FILE NO. PMTT22-021), A 23.2 ACRE PROPERTY LOCATED APPROXIMATELY 875 FEET SOUTH OF THE INTERSECTION OF RIVERSIDE DRIVE AND ARCHIBALD AVENUE, WITHIN PLANNING AREA 1 (NEIGHBORHOOD 2) LAND USE DISTRICT OF THE COUNTRYSIDE SPECIFIC PLAN (FILE NO. PSP04-001); AND MAKING FINDINGS IN SUPPORT THEREOF - APNS: 0218-111-60 AND 0218-111-61.

WHEREAS, RB Ontario LLC ("Applicant") has filed an Application for the approval of a Development Agreement, File No. PDA22-005, as described in the title of this Resolution (hereinafter referred to as "Application" or "Project"); and

WHEREAS, the Application applies to 23.2 acres of land located approximately 875 south of the intersection of Riverside Drive and Archibald Avenue, within Planning Area 1 (Neighborhood 2) land use district of the Countryside Specific Plan; and

WHEREAS, the Applicant has submitted a Tentative Tract Map 20536 (File No. PMTT22-021) to subdivide 23.2 acres of land into 141 numbered lots and 27 lettered lots, to facilitate the potential development of 265 dwelling units, parkland, private recreation area, private drives, and private alleys; and

WHEREAS, an Addendum to the Countryside Specific Plan Environmental Impact Report (State Clearinghouse No. 2004071001), which was certified by the City Council on April 18, 2006, was prepared to be consistent with The Ontario Plan 2050 and associated Supplemental Environmental Impact Report (SEIR) (State Clearinghouse No. 2021070364), which was certified by the City Council on August 16, 2022. This application introduces no new significant environmental; and

WHEREAS, Ontario Development Code Table 2.02-1 (Review Matrix) grants the Planning Commission the responsibility and authority to review and make recommendations to the City Council on the subject Application; and

WHEREAS, the Project has been reviewed for consistency with the Housing Element of the Policy Plan component of The Ontario Plan, as State Housing Element law (as prescribed in Government Code Sections 65580 through 65589.8) requires that development projects must be consistent with the Housing Element, if upon consideration of all its aspects, it is found to further the purposes, principals, goals, and policies of the Housing Element; and

WHEREAS, the Project is located within the Airport Influence Area of Ontario International Airport, which encompasses lands within parts of San Bernardino, Riverside, and Los Angeles Counties, and is subject to, and must be consistent with, the policies and criteria set forth in the Ontario International Airport Land Use Compatibility Plan (hereinafter referred to as "ALUCP"), which applies only to jurisdictions within San Bernardino County, and addresses the noise, safety, airspace protection, and overflight impacts of current and future airport activity; and

WHEREAS, City of Ontario Development Code Division 2.03 (Public Hearings) prescribes the manner in which public notification shall be provided and hearing procedures to be followed, and all such notifications and procedures have been completed; and

WHEREAS, City of Ontario Development Code Division 2.03 (Public Hearings) prescribes the manner in which public notification shall be provided and hearing procedures to be followed, and all such notifications and procedures have been completed; and

WHEREAS, on May 23, 2023, the Planning Commission of the City of Ontario conducted a hearing to consider the Project, and concluded said hearing on that date, voting to issue Resolution No. PC23-041 recommending the City Council approve the Application; and

WHEREAS, on June 20, 2023, the City Council of the City of Ontario conducted a hearing to consider the Project, and concluded said hearing on that date; and

WHEREAS, all legal prerequisites to the adoption of this Ordinance have occurred.

NOW, THEREFORE, IT IS HEREBY FOUND, DETERMINED, AND ORDAINED by the City Council of the City of Ontario, as follows:

SECTION 1. ***Environmental Determination and Findings.*** As the decision-making body for the Project, the City Council has reviewed and considered the information contained in the administrative record for the Project. Based upon the facts and information contained in the administrative record, including all written and oral evidence presented to the City Council, the City Council finds as follows:

(1) The environmental impacts of the Project were reviewed in conjunction with an Addendum to Countryside Specific Plan Environmental Impact Report (State Clearinghouse No. 200407100; certified by the Ontario City Council on April 16, 2006 in conjunction with File No. PSP04-001), was prepared to be consistent with The Ontario Plan 2050 and associated Supplemental Environmental Impact Report (SEIR) (State Clearinghouse No. 2021070364), which was certified by the City Council on August 16, 2022; and

(2) The EIR Addendum and administrative record have been completed in compliance with CEQA, the State CEQA Guidelines, and the City of Ontario Local CEQA Guidelines; and

(3) The City's "Guidelines for the Implementation of the California Environmental Quality Act (CEQA)" provide for the use of a single environmental assessment in situations where the impacts of subsequent projects are adequately analyzed. This Application introduces no new significant environmental impacts; and

(4) All previously adopted mitigation measures shall be a condition of project approval, as they are applicable to the Project, and are incorporated herein by this reference; and

(5) The EIR Addendum contains a complete and accurate reporting of the environmental impacts associated with the Project, and reflects the independent judgment of the Planning Commission; and

(6) There is no substantial evidence in the administrative record supporting a fair argument that the project may result in significant environmental impacts

SECTION 2. ***Subsequent or Supplemental Environmental Review Not Required.*** Based on the EIR Addendum, all related information presented to the City Council, and the specific findings set forth in Section 1, above, the City Council finds that the preparation of a subsequent or supplemental Certified EIR is not required for the Project, as the Project:

(1) Does not constitute substantial changes to the Certified EIR that will require major revisions to the Certified EIR due to the involvement of new significant environmental effects or a substantial increase in the severity of previously identified significant effects; and

(2) Does not constitute substantial changes with respect to the circumstances under which the Certified EIR was prepared, that will require major revisions to the Certified EIR due to the involvement of new significant environmental effects or a substantial increase in the severity of the previously identified significant effects; and

(3) Does not contain new information of substantial importance that was not known and could not have been known with the exercise of reasonable diligence at the time the Certified EIR was certified/adopted, that shows any of the following:

(a) The Project will have one or more significant effects not discussed in the Certified EIR; or

(b) Significant effects previously examined will be substantially more severe than shown in the Certified EIR; or

(c) Mitigation measures or alternatives previously found not to be feasible would in fact be feasible and would substantially reduce one or more significant effects of the Project, but the City declined to adopt such measures; or

(d) Mitigation measures or alternatives considerably different from those analyzed in the Certified EIR would substantially reduce one or more significant effects on the environment, but which the City declined to adopt.

SECTION 3. ***Housing Element Compliance.*** Pursuant to the requirements of California Government Code Chapter 3, Article 10.6, commencing with Section 65580, as the decision-making body for the Project, the City Council finds that based upon the facts and information contained in the Application and supporting documentation, at the time of Project implementation, the project is consistent with the Housing Element of the Policy Plan (General Plan) component of The Ontario Plan, as the project site is not one of the properties in the Housing Element Sites Inventory contained in Tables B-1 and B-2 of the Housing Element Technical Report.

SECTION 4. ***Airport Land Use Compatibility Plan ("ALUCP") Compliance.*** The California State Aeronautics Act (Public Utilities Code Section 21670 et seq.) requires that an Airport Land Use Compatibility Plan be prepared for all public use airports in the State; and requires that local land use plans and individual development proposals must be consistent with the policies set forth in the adopted Airport Land Use Compatibility Plan.

(1) On April 19, 2011, the City Council of the City of Ontario approved and adopted the Ontario International Airport Land use Compatibility Plan, establishing the Airport Influence Area for Ontario International Airport, which encompasses lands within parts of San Bernardino, Riverside, and Los Angeles Counties, and limits future land uses and development within the Airport Influence Area, as they relate to noise, safety, airspace protection, and overflight impacts of current and future airport activity. As the decision-making body for the Project, the City Council has reviewed and considered the facts and information contained in the Application and supporting documentation against the ONT ALUCP compatibility factors, including [1] Safety Criteria (ONT ALUCP Table 2-2) and Safety Zones (ONT ALUCP Map 2-2), [2] Noise Criteria (ONT ALUCP Table 2-3) and Noise Impact Zones (ONT ALUCP Map 2-3), [3] Airspace protection Zones (ONT ALUCP Map 2-4), and [4] Overflight Notification Zones (ONT ALUCP Map 2-5). As a result, the City Council, therefore, finds and determines that the Project, when implemented in conjunction with the conditions of approval, will be consistent with the policies and criteria set forth within the ONT ALUCP; and

SECTION 5. ***Concluding Facts and Reasons.*** Based upon the substantial evidence presented to the City Council during the above-referenced hearing, and upon the specific findings set forth in Section 1 through 4, above, the City Council hereby concludes as follows:

(1) The Development Agreement applies to approximately 23.2 acres of land located approximately 875 feet south of the intersection of Riverside Drive and Archibald Avenue, within Planning Area 1 (Neighborhood 2) land use district of the Countryside Specific Plan (File No. PSP04-001); and

(2) The Development Agreement establishes parameters for the development of land within the Countryside Specific Plan. The Development Agreement also grants the Applicant, the right to develop, the ability to quantify the fees; and establish the terms and conditions that apply to those projects. These terms and conditions are consistent with The Ontario Plan Policy Plan (General Plan), design guidelines and development standards for the Countryside Specific Plan; and

(3) The Development Agreement grants the Applicant a vested right to develop Tentative Parcel Map 20536 (File No. PMTT22-021) as long as the Applicant complies with the terms and conditions of the Countryside Specific Plan and EIR. Tentative Tract Map 20536 is located approximately 875 feet south of the intersection of Riverside Drive and Archibald Avenue, within Planning Area 1 (Neighborhood 2) land use district of the Countryside Specific Plan, and proposes to subdivide 23.2 acres of land into 141 numbered lots and 27 lettered lots, to facilitate the development of 265 dwelling units, parkland, private recreation area, private drives, and private alleys; and

(4) The Development Agreement has been prepared in conformance with the goals and policies of The Ontario Plan Policy Plan (General Plan); and

(5) The Development Agreement does not conflict with the Land Use Policies of The Ontario Plan Policy Plan (General Plan) and will provide for development, within the district, in a manner consistent with the Policy Plan and with related development; and

(6) This Development Agreement will promote the goals and objectives of the Land Use Element of the Policy Plan; and

(7) This Development Agreement will not be materially injurious or detrimental to the adjacent properties and will not have a significant impact on the environment or the surrounding properties. An Addendum to the Countryside Specific Plan Environmental Impact Report (State Clearinghouse No. 2004071001), which was certified by the City Council on April 18, 2006, was prepared to be consistent with The Ontario Plan 2050 and associated Supplemental Environmental Impact Report (SEIR) (State Clearinghouse No. 2021070364), which was certified by the City Council on August 16, 2022; and

(8) This Application introduces no new significant environmental impacts. All previously adopted mitigation measures are a condition of project approval and are incorporated herein by this reference.

SECTION 6. ***City Council Action.*** Based upon the findings and conclusions set forth in Sections 1 through 5, above, the City Council hereby APPROVES the herein described Development Agreement (File No. PDA22-005), attached hereto as "Attachment A," and incorporated herein by this reference. City Council's approval of the Development Agreement is contingent upon the approval of the following:

(a) Countryside Specific Plan Amendment (File No. PSPA22-002);
(b) EIR Addendum to the Countryside Specific Plan (File No. PSP04-001); and
(c) Applicant's acquisition of the Property.

If the City Council does not approve the Specific Plan Amendment (File No. PSPA22-002), EIR Addendum to the Countryside Specific Plan (File No. PSP04-001), and/or the Applicant does not acquire the Property, this Ordinance shall become null and void and of no further force and effect.

SECTION 7. **City Manager Administrative Authority**. The City Manager, with the approval of the City Attorney, shall be authorized to make any minor clarifying and conforming changes to the Development Agreement, including but not limited to modifying the owner's name upon its acquisition of the Property.

SECTION 8. ***Indemnification.*** The Applicant shall agree to defend, indemnify and hold harmless, the City of Ontario or its agents, officers, and employees from any claim, action or proceeding against the City of Ontario or its agents, officers or employees to attack, set aside, void, or annul this approval. The City of Ontario shall promptly notify the applicant of any such claim, action, or proceeding, and the City of Ontario shall cooperate fully in the defense.

SECTION 9. ***Custodian of Records.*** The documents and materials that constitute the record of proceedings on which these findings have been based are located at the City of Ontario City Hall, 303 East "B" Street, Ontario, California 91764. The custodian for these records is the City Clerk of the City of Ontario.

SECTION 10. ***Severability.*** If any section, sentence, clause or phrase of this Ordinance or the application thereof to any entity, person or circumstance is held for any reason to be invalid or unconstitutional, such invalidity or unconstitutionality shall not affect other provisions or applications of this Ordinance which can be given effect without the invalid provision or application, and to this end the provisions of this Ordinance are severable. The People of the City of Ontario hereby declare that they would have adopted this Ordinance and each section, sentence, clause or phrase thereof, irrespective of the fact that any one or more section, subsections, sentences, clauses or phrases be declared invalid or unconstitutional.

SECTION 11. ***Effective Date.*** This Ordinance shall become effective 30 days following its adoption.

SECTION 12. ***Publication and Posting.*** The Mayor shall sign this Ordinance and the City Clerk shall certify as to the adoption and shall cause a summary thereof to be published at least once, in a newspaper of general circulation in the City of Ontario, California within 15 days following the adoption. The City Clerk shall post a certified copy of this ordinance, including the vote for and against the same, in the Office of the City Clerk, in accordance with Government Code Section 36933.

PASSED, APPROVED, AND ADOPTED this ____ day of _____ 2023.

DEVELOPMENT AGREEMENT NO. PDA22-005

This Development Agreement (hereinafter "Agreement") is entered into effective as of the ____ day of _____, 2023 by and among the City of Ontario, a California municipal corporation (hereinafter "CITY"), and RB Ontario LLC, a Delaware limited liability company (hereinafter "OWNER"):

RECITALS

WHEREAS, CITY is authorized to enter into binding development agreements with persons having legal or equitable interests in real property for the development of such property, pursuant to Section 65864, et seq. of the Government Code; and

WHEREAS, OWNER has requested CITY to enter into a development agreement and proceedings have been taken in accordance with the rules and regulations of CITY; and

WHEREAS, by electing to enter into this Agreement, CITY shall bind future City Councils of CITY by the obligations specified herein and limit the future exercise of certain governmental and proprietary powers of CITY; and

WHEREAS, the terms and conditions of this Agreement have undergone extensive review by CITY and the City Council and have been found to be fair, just and reasonable; and

WHEREAS, the best interests of the citizens of the CITY and the public health, safety and welfare will be served by entering into this Agreement; and

WHEREAS, all of the procedures of the California Environmental Quality Act have been met with respect to the Project and the Agreement in that Countryside Specific Plan (State Clearinghouse No. 2006051081 (the "FEIR"). The City Council found and determined that the FEIR was prepared in accordance with the requirements of the California Environmental Quality Act and adequately describes the impacts of the project described in the FEIR, which included consideration of this Agreement; and

WHEREAS, this Agreement and the Project are consistent with the CITY's Comprehensive General Plan and the Countryside Specific Plan; and

WHEREAS, all actions taken and approvals given by CITY have been duly taken or approved in accordance with all applicable legal requirements for notice, public hearings, findings, votes, and other procedural matters; and

WHEREAS, development of the Property in accordance with this Agreement will provide substantial benefits to CITY and will further important policies and goals of CITY; and

WHEREAS, this Agreement will eliminate uncertainty in planning and provide for the orderly development of the Property, ensure progressive installation of necessary

improvements, provide for public services appropriate to the development of the Project, and generally serve the purposes for which development agreements under Sections 65864 et seq. of the Government Code are intended; and

WHEREAS, OWNER has incurred and will in the future incur substantial costs in excess of the generally applicable requirements in order to assure vesting of legal rights to develop the Property in accordance with this Agreement; and

WHEREAS, the Property is located in an area of the City of Ontario that has been known as the "New Model Colony" area and the New Model Colony area has now been renamed as "Ontario Ranch."; and

WHEREAS, the property developer/owners are made aware of the South Archibald Trichloroethylene (TCE) Plume Disclosure Letter (Exhibit "G"). Property owner may wish to provide the attached Letter as part of the Real Estate Transfer Disclosure requirements under California Civil Code Section 1102 et seq. This may include notifications in the Covenants, Conditions and Restrictions (CC&Rs) or other documents related to property transfer and disclosures. Additional information on the plume is available from the Santa Ana Regional Water Quality Control Board at http://geotracker.waterboards.ca.gov/profile_report.asp?global_id=T10000004658.

COVENANTS

NOW, THEREFORE, in consideration of the above recitals and of the mutual covenants hereinafter contained and for other good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged, the parties agree as follows:

1. DEFINITIONS AND EXHIBITS.

1.1 Definitions. The following terms when used in this Agreement shall be defined as follows:

1.1.1 "Agreement" means this Development Agreement.

1.1.2 "CITY" means the City of Ontario, California, a California municipal corporation.

1.1.3 "Construction Agreement" means that certain Agreement for the Financing and Construction of Phases I and II Infrastructure Improvements to Serve an Easterly Portion of the New Model Colony, entered into between the CITY and NMC Builders as of the 4th day of October, 2005, and all amendments thereto and "Construction Agreement Amendment" means that First Amended and Restated Agreement for the Financing and Construction of Limited Infrastructure Improvements to Serve and Easterly Portion of the New Model Colony entered into between the CITY and NMC Builders as of the 21st day of August 2012.

1.1.4 “Development” means the improvement of the Property for the purposes of completing the structures, improvements and facilities comprising the Project including, but not limited to: grading; the construction of public infrastructure and public facilities related to the Project whether located within or outside the Property; the construction of buildings and structures; and the installation of landscaping. “Development” does not include the maintenance, repair, reconstruction or redevelopment of any building, structure, improvement or facility after the construction and completion thereof.

1.1.5 “Development Approvals” means all permits and other entitlements for use subject to approval or issuance by CITY in connection with development of the Property including, but not limited to:

(a) specific plans and specific plan amendments;

(b) tentative and final subdivision and parcel maps;

(c) development plan review;

(d) conditional use permits (including model home use permits), public use permits and plot plans;

(e) zoning;

(f) grading and building permits.

1.1.6 “Development Exaction” means any requirement of CITY in connection with or pursuant to any Land Use Regulation or Development Approval for the dedication of land, the construction of improvements or public facilities, or the payment of fees in order to lessen, offset, mitigate or compensate for the impacts of development on the environment or other public interests.

1.1.7 “Development Impact Fee” means a monetary exaction, other than a tax or special assessment, whether characterized as a fee or a tax and whether established for a broad class of projects by legislation of general applicability or imposed on a specific project on an ad hoc basis, that is charged by a local agency to the applicant in connection with approval of a development project for the purpose of defraying all or a portion of the cost of public facilities related to the development project, and, for purposes of this Agreement only, includes fees collected under development agreements adopted pursuant to Article 2.5 of the Government Code (commencing with Section 65864) of Chapter 4, For purposes of this Agreement only, "Development Impact Fee" shall not include processing fees and charges imposed by CITY to cover the estimated actual costs to CITY of processing applications for Development Approvals or for monitoring compliance with any Development Approvals granted or issued, including, without limitation, fees for zoning variances; zoning changes; use permits; building inspections; building permits; filing and processing applications and petitions filed with the local agency formation commission or conducting preliminary proceedings or proceedings under the Cortese-Knox-Hertzberg Local Government Reorganization Act of 2000,

Division 3 (commencing with Section 56000) of Title 5 of the Government Code; the processing of maps under the provisions of the Subdivision Map Act, Division 2 (commencing with Section 66410) of Title 7 of the Government Code; or planning services under the authority of Chapter 3 (commencing with Section 65100) of Division 1 of Title 7 of the Government Code, fees and charges as described in Sections 51287, 56383, 57004, 65104, 65456, 65863.7, 65909.5, 66013, 66014, and 66451.2 of the Government Code, Sections 17951, 19132.3, and 19852 of the Health and Safety Code, Section 41901 of the Public Resources Code, and Section 21671.5 of the Public Utilities Code, as such codes may be amended or superceded, including by amendment or replacement.

1.1.8 "Development Plan" means the Existing Development Approvals and the Existing Land Use Regulations applicable to development of the Property.

1.1.9 "Effective Date" means the date that the ordinance approving this Agreement goes into effect.

1.1.10 "Existing Development Approvals" means all Development Approvals approved or issued prior to the Effective Date. Existing Development Approvals includes the Approvals incorporated herein as Exhibit "C" and all other Approvals which are a matter of public record on the Effective Date.

1.1.11 "Existing Land Use Regulations" means all Land Use Regulations in effect on the Effective Date. Existing Land Use Regulations includes the Regulations incorporated herein as Exhibit "D" and all other Land Use Regulations that are in effect and a matter of public record on the Effective Date.

1.1.12 "General Plan" means the General Plan adopted on August 16, 2022.

1.1.13 "Improvement" or "Improvements" means those public improvements required to support the development of the Project as described in the Tract Map conditions for Tract No. 20536 as further described in Exhibit "E" and depicted in Exhibit "F" (the "Infrastructure Improvements Exhibit").

1.1.14 "Land Use Regulations" means all ordinances, resolutions, codes, rules, regulations and official policies of CITY governing the development and use of land, including, without limitation, the permitted use of land, the density or intensity of use, subdivision requirements, timing and phasing of development, the maximum height and size of buildings, the provisions for reservation or dedication of land for public purposes, and the design, improvement and construction standards and specifications applicable to the development of the Property. "Land Use Regulations" does not include any CITY ordinance, resolution, code, rule, regulation or official policy, governing:

(a) the conduct of businesses, professions, and occupations;

(b) taxes and assessments;

(c) the control and abatement of nuisances;

(d) the granting of encroachment permits and the conveyance of similar rights and interests that provide for the use of or the entry upon public property;

(e) the exercise of the power of eminent domain.

1.1.15 “Mortgagee” means a mortgagee of a mortgage, a beneficiary under a deed of trust or any other security-device lender, and their successors and assigns.

1.1.16 “Net MDD” means net maximum daily water demand.

1.1.17 “NMC Builders” means the consortium of investors and developers responsible for the construction of infrastructure within the New Model Colony incorporated as NMC Builders, LLC.

1.1.18 “Model Units” means a maximum of ten (10) model units, private common recreation facilities and sales facilities constructed by OWNER prior to the construction of any Production units and not offered for sale and occupancy for a period of time after the issuance of permits for Production Units.

1.1.19 “OWNER” means the persons and entities listed as owner on page 1 of this Agreement and their permitted successors in interest to all or any part of the Property.

1.1.20 “Phase 2 Water EDUs” means the number of equivalent dwelling units or non-residential square footage assigned to OWERN upon payment to CITY of the Phase 2 Water Participation Fee for the Project and evidenced by the issuance by CITY of a Certificate of Phase 2 Net MDD Availability in the form attached as Exhibit “G”. 1.1.21 “Phase 2 Water Improvements” means the future water infrastructure Improvements required for the issuance by CITY of the “Water Availability Equivalents” (WAE) for the Project.

1.1.21 “Phase 2 Water Participation Fee” means the fee paid to City upon City approval of the first Development Entitlement for the Project, to fund the Property’s respective share of the projected costs of the design and construction of the Phase 2 Water Improvements by City. The Phase 2 Water Participation Fee shall be the calculated amount of the Regional Water DIF for the Project based upon the number of units, and land use category for residential units or the number of square feet, and land use category for non-residential square footage of the Project.

1.1.22 “Production Unit(s)” means all units constructed for sale and occupancy by OWNER and excludes the specified number of Model Units constructed by OWNER for promotion of sales.

1.1. 23 “Project” means the development of the Property contemplated by the Development Plan, as such Plan may be further defined, enhanced or modified pursuant to the provisions of this Agreement.

1.1.24 “Property” means the real property described on Exhibit “A” and shown on Exhibit “B” to this Agreement.

1.1.25 “Reservations of Authority” means the rights and authority excepted from the assurances and rights provided to OWNER under this Agreement and reserved to CITY under Section 3.6 of this Agreement.

1.1.26 “Specific Plan” means that certain specific plan adopted by the City Council, and entitled, “Countryside Specific Plan.”

1.1.27 "Storm Water Treatment Capacity Availability” means a designated portion of the total Storm Water Treatment Capacity Availability made available through the completion of construction of a Phase of regional storm water treatment facilities by the NMC Builders LLC as described in the Construction Agreement Amendment. The amount, in acres, of Storm Water Treatment Capacity Availability required for the issuance of a grading permit shall be based upon the factors and assumptions listed in the Construction Agreement Amendment.

1.1.28 “Subsequent Development Approvals” means all Development Approvals required subsequent to the Effective Date in connection with development of the Property.

1.1.29 “Subsequent Land Use Regulations” means any Land Use Regulations adopted and effective after the Effective Date of this Agreement.

1.1.30 “Water Availability Equivalent (WAE)” means a designated portion of the total Net MDD made available through the construction of each Phase described in the Water Phasing Plan of the Construction Agreement. The number of Water Availability Equivalents (of portions thereof) required for the issuance of each building permit shall be based upon water demand factors and assumptions listed in the Construction Agreement and Construction Agreement Amendment as “Water Availability Equivalents by Land Use” for each land use category.

1.1.31 “Amendment to the Construction Agreement” means the amendment to the Construction Agreement modifying the boundaries of the property in Exhibit A of such Construction Agreement to include the Property covered by this Agreement and to provide for the additional funds required for CITY’s future construction of the “Phase 2 Water Improvements” described in a modification to Exhibit C-3 of the Construction Agreement.

1.2 Exhibits. The following documents are attached to, and by this reference made a part of, this Agreement:

Exhibit “A” — Legal Description of the Property.

Exhibit “B” — Map showing Property and its location.

Exhibit “C” — Existing Development Approvals.

Exhibit “D” — Existing Land Use Regulations.

Exhibit “E” — Description of Required Infrastructure Improvements

Exhibit “F” — Depiction of Required Infrastructure Improvements Exhibit

Exhibit “G” - Form of Certificate of Net MDD to be issued by CITY

Exhibit “H” – Form of Certificate of DIF Credit to be issued by CITY

Exhibit “I-1” – Ontario Ranch Water Supply Phasing Plan

Exhibit “I-2” - Water Demand Equivalents by Land Use

Exhibit “J” - Form of Plume Disclosure Letter

2. GENERAL PROVISIONS.

2.1 Binding Effect of Agreement. The Property is hereby made subject to this Agreement. Development of the Property is hereby authorized and shall be carried out only in accordance with the terms of this Agreement.

2.2 Ownership of Property. OWNER represents and covenants that it is the owner of the fee simple title to the Property or a portion thereof, or has the right to acquire fee simple title to the Property or a portion thereof from the current owner(s) thereof. To the extent OWNER does not own fee simple title to the Property, OWNER shall obtain written consent from the current fee owner of the Property agreeing to the terms of this Agreement and the recordation thereof.

2.3 Term. The term of this Agreement shall commence on the Effective Date and shall continue for an initial term of ten (10) years thereafter unless this term is modified or extended pursuant to the provisions of this Agreement. The term of this Agreement may be extended for an additional five (5) years following expiration of the initial ten (10) year term, provided the following have occurred:

(a) OWNER provides at least 180 days written notice to CITY prior to expiration of the initial term; and

(b) In non-mixed use and residential use only projects, the OWNER shall have obtained, as applicable, building permits for at least seventy percent (70%) of the actual number of residential units permitted under this Agreement; and

(c) OWNER is not then in uncured default of this Agreement.

2.4 Assignment.

2.4.1 Right to Assign. OWNER shall have the right to sell, transfer or assign the Property in whole or in part (provided that no such partial transfer shall violate the Subdivision Map Act, Government Code Section 66410, et seq.), to any person, partnership, limited liability company, joint venture, firm or corporation at any time during the term of this Agreement; provided, however, that any such sale, transfer or assignment

shall include the assignment and assumption of the rights, duties and obligations arising under or from this Agreement and be made in strict compliance with the following:

(a) No sale, transfer or assignment of any right or interest under this Agreement shall be made unless made together with the sale, transfer or assignment of all or a part of the Property. OWNER may be required to provide disclosure that the Property is within the South Archibald Trichloroethylene (TCE) Plume. OWNER may wish to provide the attached Disclosure Letter (Exhibit G) as part of the Real Estate Transfer Disclosure requirements under California Civil Code Section 1102 et seq.

(b) Concurrent with any such sale, transfer or assignment, or within fifteen (15) business days thereafter, OWNER shall notify CITY's City Manager, in writing, of such sale, transfer or assignment and shall provide CITY with: (1) an executed agreement, in a form reasonably acceptable to CITY, by the purchaser, transferee or assignee and providing therein that the purchaser, transferee or assignee expressly and unconditionally assumes all the duties and obligations of OWNER under this Agreement with respect to the portion of the Property so sold, transferred or assigned; and (2) the payment of the applicable processing charge to cover the CITY's review and consideration of such sale, transfer or assignment.

(c) Any sale, transfer or assignment not made in strict compliance with the foregoing conditions shall constitute a default by OWNER under this Agreement. Notwithstanding the failure of any purchaser, transferee or assignee to execute the agreement required by Paragraph (b) of this Subsection 2.4.1, the burdens of this Agreement shall be binding upon such purchaser, transferee or assignee, but the benefits of this Agreement shall not inure to such purchaser, transferee or assignee until and unless such agreement is executed. The City Manager shall have the authority to review, consider and either approve, conditionally approve, or deny any proposed sale, transfer or assignment that is not made in compliance with this section 2.4.

2.4.2 Release of Transferring Owner. Notwithstanding any sale, transfer or assignment, a transferring OWNER shall continue to be obligated under this Agreement unless such transferring owner is given a release in writing by CITY, which release shall be provided by CITY upon the full satisfaction by such transferring owner of the following conditions:

(a) OWNER no longer has a legal or equitable interest in all or any part of the portion of the Property sold, transferred or assigned.

(b) OWNER is not then in default under this Agreement.

(c) OWNER has provided CITY with the notice and executed agreement required under Paragraph (b) of Subsection 2.4.1 above.

(d) The purchaser, transferee or assignee provides CITY with security equivalent to any security previously provided by OWNER to secure performance of its obligations hereunder.

2.4.3 Effect of Assignment and Release of Obligations. In the event of a sale, transfer or assignment pursuant to the provisions of Section 2.4.2 above:

(a) The assignee shall be liable for the performance of all obligations of OWNER with respect to transferred property, but shall have no obligations with respect to the portions of the Property, if any, not transferred (the "Retained Property").

(b) The owner of the Retained Property shall be liable for the performance of all obligations of OWNER with respect to Retained Property, but shall have no further obligations with respect to the transferred property.

(c) The assignee's exercise, use and enjoyment of the Property or portion thereof shall be subject to the terms of this Agreement to the same extent as if the assignee were the OWNER.

2.4.4 Subsequent Assignment. Any subsequent sale, transfer or assignment after an initial sale, transfer or assignment shall be made only in accordance with and subject to the terms and conditions of this Section 2.4.

2.4.5 Termination of Agreement with Respect to Individual Lots Upon Sale to Public and Completion of Construction. The provisions of Subsection 2.4.1 shall not apply to the sale or lease (for a period longer than one year) of any lot which has been finally subdivided and is individually (and not in "bulk" meaning more than one) sold or leased to a member of the public or other ultimate user. Notwithstanding any other provisions of this Agreement, this Agreement shall terminate with respect to any lot and such lot shall be released and no longer be subject to this Agreement without the execution or recordation of any further document upon satisfaction of both of the following conditions:

(a) The lot has been finally subdivided and individually (and not in "bulk") sold or leased (for a period longer than one year) to a member of the public or other ultimate user; and,

(b) A certificate of occupancy has been issued for a building on the lot, and the fees set forth under Section 4 of this Agreement have been paid.

2.5 Amendment or Cancellation of Agreement. This Agreement may be amended or cancelled in whole or in part only in the manner provided for in Government Code Section 65868.1. Any amendment of this Agreement, which amendment has been requested by OWNER, shall be considered by the CITY only upon the payment of the applicable processing charge. This provision shall not limit any remedy of CITY or OWNER as provided by this Agreement. Either Party or successor in interest, may propose an amendment to or cancellation, in whole or in part, of this Agreement. Any amendment or cancellation shall be by mutual consent of the parties or their successors in interest except as provided otherwise in this Agreement or in Government Code Section 65865.1. For purposes of this section, the term "successor in interest" shall mean any person having a legal or equitable interest in the whole of the Property, or any portion

thereof as to which such person wishes to amend or cancel this Agreement. The procedure for proposing and adopting an amendment to, or cancellation of, in whole or in part, this Agreement shall be the same as the procedure for adopting and entering into this Agreement in the first instance. Notwithstanding the foregoing sentence, if the CITY initiates the proposed amendment to, or cancellation of, in whole or in part, this Agreement, CITY shall first give notice to the OWNER of its intention to initiate such proceedings at least sixty (60) days in advance of the giving the public notice of intention to consider the amendment or cancellation.

2.5.1 Amendment to Reflect Consistency With Future Amendments to the Construction Agreement. To the extent any future amendment to the Construction Agreement provides for modifications to rights or obligations that differ from or alter the same or similar rights or obligations contained in this Development Agreement, OWNER reserves the right to request an amendment to the Development Agreement to reflect any or all of such modifications.

2.6 Termination. This Agreement shall be deemed terminated and of no further effect upon the occurrence of any of the following events:

(a) Expiration of the stated term of this Agreement as set forth in Section 2.3.

(b) Entry of a final judgment setting aside, voiding or annulling the adoption of the ordinance approving this Agreement.

(c) The adoption of a referendum measure overriding or repealing the ordinance approving this Agreement.

(d) Completion of the Project in accordance with the terms of this Agreement including issuance of all required occupancy permits and acceptance by CITY or applicable public agency of all required dedications.

Termination of this Agreement shall not constitute termination of any other land use entitlements approved for the Property. Upon the termination of this Agreement, no party shall have any further right or obligation hereunder except with respect to any obligation to have been performed prior to such termination or with respect to any default in the performance of the provisions of this Agreement which has occurred prior to such termination or with respect to any obligations which are specifically set forth as surviving this Agreement. Upon such termination, any public facilities and services mitigation fees paid pursuant to Section 4.2 of this Agreement by OWNER to CITY for residential units on which construction has not yet begun shall be refunded to OWNER by CITY.

2.7 Notices.

(a) As used in this Agreement, “notice” includes, but is not limited to, the communication of notice, request, demand, approval, statement, report, acceptance, consent, waiver, appointment or other communication required or permitted hereunder.

(b) All notices shall be in writing and shall be considered given either: (i) when delivered in person, including, without limitation, by courier, to the recipient named below; or (ii) on the date of delivery shown on the return receipt, after deposit in the United States mail in a sealed envelope as either registered or certified mail with return receipt requested, and postage and postal charges prepaid, and addressed to the recipient named below. All notices shall be addressed as follows:

If to CITY:
Scott Ochoa, City Manager
City of Ontario
303 East "B" Street
Ontario, CA 91764

with a copy to:
Ruben Duran, City Attorney
Best Best & Krieger, LLP
2855 E Guasti Road
Ontario, CA 91761

If to OWNER:
RB Ontario LLC
Attn: Jeff Ragland
11766 Wilshire Blvd., Suite 820
Los Angeles, CA 90025

with a copy to:
Cox Castle
Attn: Kenneth Bley
2029 Century Park East, Suite 2100
Los Angeles, CA 90067
kbley@coxcastle.com

(c) Either party may, by notice given at any time, require subsequent notices to be given to another person or entity, whether a party or an officer or representative of a party, or to a different address, or both. Notices given before actual receipt of notice of change shall not be invalidated by the change.

3. DEVELOPMENT OF THE PROPERTY.

3.1 Rights to Develop. Subject to the terms of this Agreement including the Reservations of Authority, OWNER shall have a vested right to develop the Property in accordance with, and to the extent of, the Development Plan. The Project shall remain subject to all Subsequent Development Approvals required to complete the Project as contemplated by the Development Plan. Except as otherwise provided in this Agreement, the permitted uses of the Property, the density and intensity of use, the maximum height and size of proposed buildings, and provisions for reservation and dedication of land for public purposes shall be those set forth in the Development Plan.

3.2 Effect of Agreement on Land Use Regulations. Except as otherwise provided under the terms of this Agreement including the Reservations of Authority, the rules, regulations and official policies governing permitted uses of the Property, the density and intensity of use of the Property, the maximum height and size of proposed buildings, and the design, improvement and construction standards and specifications applicable to development of the Property shall be the Existing Land Use Regulations. In connection with any Subsequent Development Approval, CITY shall exercise discretion in accordance with the same manner as it exercises its discretion under its police powers, including the Reservations of Authority set forth herein; provided however, that such

discretion shall not prevent development of the Property for the uses and to the density or intensity of development set forth in this Agreement.

3.3 Timing of Development. The parties acknowledge that OWNER cannot at this time predict when or the rate at which phases of the Property will be developed. Such decisions depend upon numerous factors which are not within the control of OWNER, such as market orientation and demand, interest rates, absorption, completion and other similar factors. Since the California Supreme Court held in Pardee Construction Co. v. City of Camarillo (1984) 37 Ca1. 3d 465, that the failure of the parties therein to provide for the timing of development resulted in a later adopted initiative restricting the timing of development to prevail over such parties' agreement, it is the parties' intent to cure that deficiency by acknowledging and providing that OWNER shall have the right to develop the Property in such order and at such rate and at such times as OWNER deems appropriate within the exercise of its subjective business judgment.

3.3.1 Infrastructure Improvement Exhibit. Attached hereto as Exhibits "E" and "F" are a description and depiction, respectively, of the improvements needed for the development of the Property. In the event of any discrepancy between Exhibit E and Exhibit F, Exhibit F shall control.

3.4 Requirement for Public Infrastructure Improvements. Development of the Property is contingent in part on the phasing of area-wide infrastructure improvements over which the OWNER has control. The issuance of building permits by CITY for Model Units and Production Units is, in general, contingent on OWNER's completion of needed infrastructure improvements and the availability of improvements and services to serve the Property.

3.4.1 Attached hereto as Exhibit "E" and Exhibit "F" are the description and depiction of the infrastructure improvements needed for the development of the Property ("the Infrastructure Improvement Exhibit").

3.4.2 Subject to the prior submittal by OWNER and approval by CITY of a plan to provide sufficient public infrastructure for the construction of a maximum number of ten (10) Model Units, private common recreation facilities and sales facilities. CITY may issue a maximum of ten (10) building permits for Model Units, private common recreation facilities and sales facilities. The plan to be submitted by OWNER for CITY approval shall describe the utilities and other infrastructure necessary to provide sufficient fire protection and other public health and safety requirements for the Model Units and other facilities.

3.5 Changes and Amendments. The parties acknowledge that refinement and further development of the Project will require Subsequent Development Approvals and may demonstrate that changes are appropriate and mutually desirable in the Existing Development Approvals. In the event OWNER finds that a change in the Existing Development Approvals is necessary or appropriate, OWNER shall apply for a Subsequent Development Approval to effectuate such change and CITY shall process and act on such application in accordance with the Existing Land Use Regulations, except

as otherwise provided by this Agreement including the Reservations of Authority. If approved, any such change in the Existing Development Approvals shall be incorporated herein as an addendum to Exhibit "C", and may be further changed from time to time as provided in this Section. Unless otherwise required by law, as determined in CITY's reasonable discretion, a change to the Existing Development Approvals shall be deemed "minor" and not require an amendment to this Agreement provided such change does not:

(a) Alter the permitted uses of the Property as a whole; or,

(b) Increase the density or intensity of use of the Property as a whole; or,

(c) Increase the maximum height and size of permitted buildings; or,

(d) Delete a requirement for the reservation or dedication of land for public purposes within the Property as a whole; or,

(e) Constitute a project requiring a subsequent or supplemental environmental impact report pursuant to Section 21166 of the Public Resources Code.

3.6 Reservations of Authority.

3.6.1 Limitations, Reservations and Exceptions. Notwithstanding any other provision of this Agreement, the CITY shall not be prevented from applying new rules, regulations and policies upon the OWNER, nor shall a development agreement prevent the CITY from denying or conditionally approving any subsequent development project application on the basis of such new rules, regulations and policies where the new rules, regulations and policies consist of the following:

(a) Processing fees by CITY to cover costs of processing applications for development approvals or for monitoring compliance with any development approvals;

(b) Procedural regulations relating to hearing bodies, petitions, applications, notices, findings, records and any other matter of procedure;

(c) Regulations, policies and rules governing engineering and construction standards and specifications applicable to public and private improvements, including all uniform codes adopted by the CITY and any local amendments to those codes adopted by the CITY; provided however that, OWNER shall have a vested right to develop the Property in accordance with, and to the extent of, the standards and specifications that are expressly identified in the Specific Plan;

(d) Regulations that may conflict with this Agreement and the Development Plan but that are reasonably necessary to protect the residents of the project and/or of the immediate community from a condition perilous to their health or safety;

(e) Regulations that do not conflict with those rules, regulations and policies set forth in this Agreement or the Development Plan;

(f) Regulations that may conflict but to which the OWNER consents.

3.6.2 Subsequent Development Approvals. This Agreement shall not prevent CITY, in acting on Subsequent Development Approvals, from applying Subsequent Land Use Regulations that do not conflict with the Development Plan, nor shall this Agreement prevent CITY from denying or conditionally approving any Subsequent Development Approval on the basis of the Existing Land Use Regulations or any Subsequent Land Use Regulation not in conflict with the Development Plan.

3.6.3 Modification or Suspension by State or Federal Law. In the event that State or Federal laws or regulations, enacted after the Effective Date of this Agreement, prevent or preclude compliance with one or more of the provisions of this Agreement, such provisions of this Agreement shall be modified or suspended as may be necessary to comply with such State or Federal laws or regulations, provided, however, that this Agreement shall remain in full force and effect to the extent it is not inconsistent with such laws or regulations and to the extent such laws or regulations do not render such remaining provisions impractical to enforce. In the event OWNER alleges that such State or Federal laws or regulations preclude or prevent compliance with one or more provisions of this Agreement, and the CITY does not agree, the OWNER may, at its sole cost and expense, seek declaratory relief (or other similar non-monetary remedies); provided however, that nothing contained in this Section 3.6.3 shall impose on CITY any monetary liability for contesting such declaratory relief (or other similar non-monetary relief) and OWNER shall comply with Section 9 of this Agreement and cover any reasonable CITY costs and expenses involved with the declaratory relief.

3.6.4 Intent. The parties acknowledge and agree that CITY is restricted in its authority to limit its police power by contract and that the foregoing limitations, reservations and exceptions are intended to reserve to CITY all of its police power which cannot be so limited. This Agreement shall be construed, contrary to its stated terms if necessary, to reserve to CITY all such power and authority which cannot be restricted by contract.

3.7 Public Works; Utilities. If OWNER is required by this Agreement to construct any public works facilities which will be dedicated to CITY or any other public agency upon completion, and if required by applicable laws to do so, OWNER shall perform such work in the same manner and subject to the same requirements as would

be applicable to CITY or such other public agency should it have undertaken such construction. As a condition of development approval, OWNER shall connect the Project to all utilities necessary to provide adequate water, recycled water, sewer, gas, electric, and other utility service to the Project. As a further condition of development approval, OWNER shall contract with the CITY for CITY-owned or operated utilities for this purpose, for such price and on such terms as may be available to similarly situated customers in the CITY.

3.7.1 OWNER agrees that development of the Project shall require the construction of storm drain improvements as described in Exhibit E and depicted in Exhibit F. OWNER agrees that no building permits shall be issued by CITY for Production Units prior to completion of the storm drain improvements, as described in Exhibit E and depicted in Exhibit F.

3.7.2 OWNER agrees that development of the Project shall require the construction of street improvements as described in Exhibit E and depicted in Exhibit F. OWNER agrees that no building permits shall be issued by CITY for Production Units prior to completion of the street improvements, as described in Exhibit E and depicted in Exhibit F.

3.7.3 OWNER agrees that development of the Property shall require the construction of water and recycled water improvements as described in Exhibit E and depicted in Exhibit F. OWNER agrees that no building permits shall be issued by CITY for Production Units prior to completion of the water and recycled water improvements as described in Exhibit E and depicted in Exhibit F. OWNER also agrees that recycled water shall be available and utilized by OWNER for all construction-related water uses including prior to, and during, any grading of the Property.

3.7.4 OWNER agrees that development of the Property shall require the construction of sewer improvements, as described in the attached Exhibit E and depicted in Exhibit F. OWNER agrees that no building permits shall be issued by CITY for Production Units prior to completion of the sewer improvements, as described in Exhibit E and depicted in Exhibit F.

3.7.5 OWNER agrees that development of the Property shall require the extension of fiber optic communications improvements as described in the attached Exhibit E and depicted in Exhibit F. OWNER agrees that no building permits shall be issued by CITY for Production Units prior to completion of the fiber optic communication improvements, as described in Exhibit E and depicted in Exhibit F.

3.8 Acquisition of Offsite Provision of Real Property Interests. In any instance where OWNER is required by any Development Approval or Land Use Regulation and the Construction Agreement to construct any public improvement on land not owned by OWNER ("Offsite Improvements"), the CITY and OWNER shall cooperate in acquiring the necessary legal interest ("Offsite Property") in accordance with the procedures set

forth in Section 2.4 of the Construction Agreement. This section 3.8 is not intended by the parties to impose upon the OWNER an enforceable duty to acquire land or construct any public improvements on land not owned by OWNER, except to the extent that the OWNER elects to proceed with the development of the Project, and then only in accordance with valid conditions imposed by the CITY upon the development of the Project under the Subdivision Map Act or other legal authority.

3.8.1 CITY Acquisition of Non-Construction Agreement Offsite Property. In the event OWNER is required to construct any public improvements on land not owned by OWNER, but such requirement is not based upon the Construction Agreement, Sections 3.8.1 and 3.8.2 shall control the acquisition of the necessary property interest(s) ("Non-Construction Agreement Offsite Property"). If the OWNER is unable to acquire such Non-Construction Agreement Offsite Property, and following the written request from the OWNER to CITY, CITY agrees to use reasonable and diligent good faith efforts to acquire the Non-Construction Agreement Offsite Property from the owner or owners of record by negotiation to the extent permitted by law and consistent with this Agreement. If CITY is unable to acquire the Non-Construction Agreement Offsite Property by negotiation within thirty (30) days after OWNER'S written request, CITY shall, initiate proceedings utilizing its power of eminent domain to acquire that Non-Construction Agreement Subject Property at a public hearing noticed and conducted in accordance with California Code of Civil Procedure Section 1245.235 for the purpose of considering the adoption of a resolution of necessity concerning the Non-Construction Agreement Offsite Property, subject to the conditions set forth in this Section 3.8. The CITY and OWNER acknowledge that the timelines set forth in this Section 3.8.1 represent the maximum time periods which CITY and OWNER reasonably believe will be necessary to complete the acquisition of any Non-Construction Agreement Offsite Property. CITY agrees to use reasonable good faith efforts to complete the actions described within lesser time periods, to the extent that it is reasonably able to do so, consistent with the legal constraints imposed upon CITY.

3.8.2 Owner's Option to Terminate Proceedings. CITY shall provide written notice to OWNER no later than fifteen (15) days prior to making an offer to the owner of the Non-Construction Agreement Offsite Property. At any time within that fifteen (15) day period, OWNER may, at its option, notify CITY that it wants CITY to cease all acquisition proceedings with respect to that Non-Construction Agreement Offsite Property, whereupon CITY shall cease such proceedings. CITY shall provide written notice to OWNER no later than fifteen (15) days prior to the date of the hearing on CITY'S intent to consider the adoption of a resolution of necessity as to any Non-Construction Agreement Offsite Property. At any time within that fifteen (15) day period, OWNER may, at its option, notify CITY that it wants CITY to cease condemnation proceedings, whereupon CITY shall cease such proceedings. If OWNER does not notify CITY to cease condemnation proceedings within said fifteen (15) day period, then the CITY may proceed to consider and act upon the Non-Construction Agreement Offsite Property resolution of necessity. If CITY adopts such resolution of necessity, then CITY shall diligently

institute condemnation proceedings and file a complaint in condemnation and seek an order of immediate possession with respect to the Non-Construction Agreement Offsite Property.

3.9 Regulation by Other Public Agencies. It is acknowledged by the parties that other public agencies not within the control of CITY possess authority to regulate aspects of the development of the Property separately from or jointly with CITY and this Agreement does not limit the authority of such other public agencies. CITY agrees to cooperate fully, at no cost to CITY, with OWNER in obtaining any required permits or compliance with the regulations of other public agencies provided such cooperation is not in conflict with any laws, regulations or policies of the CITY.

3.10 Tentative Tract Maps; Extension. With respect to applications by OWNER for tentative subdivision maps for portions of the Property, CITY agrees that OWNER may file and process tentative maps in accordance with Chapter 4.5 (commencing with Section 66498.1) of Division 2 of Title 7 of the California Government Code and the applicable provisions of CITY's subdivision ordinance, as the same may be amended from time to time. In accordance with the provisions of Section 66452.6 of the Government Code, each tentative subdivision map or tentative parcel map, heretofore or hereafter approved in connection with development of the Property, shall be deemed to have been granted an extension of time to and until the date that is five (5) years following the Effective Date of this Agreement.; The CITY's City Council may, in its discretion, extend any such map for an additional period of up to five (5) years beyond its original term, so long as the subdivider files a written request for an extension with the City prior to the expiration of the initial five (5) year term.

4. PUBLIC BENEFITS.

4.1 Intent. The parties acknowledge and agree that development of the Property will result in substantial public needs that will not be fully met by the Development Plan and further acknowledge and agree that this Agreement confers substantial private benefits on OWNER that should be balanced by commensurate public benefits. Accordingly, the parties intend to provide consideration to the public to balance the private benefits conferred on OWNER by providing more fully for the satisfaction of the public needs resulting from the Project.

4.2 Development Impact Fees.

4.2.1 Amount of Development Impact Fee. Development Impact Fees (DIF) shall be paid by OWNER. The Development Impact Fee amounts to be paid by OWNER shall be the amounts that are in effect at the time such amounts are due. Nothing contained in this Agreement shall affect the ability of the CITY to impose new Development Impact Fees or amend the amounts of existing Development Impact Fees. Additionally, nothing contained in this Agreement shall affect the ability of other public agencies that are not controlled by CITY to impose and amend, from time to time, Development Impact Fees established or imposed by such other

public agencies, even though such Development Impact Fees may be collected by CITY.

4.2.2 Time of Payment. The Development Impact Fees required pursuant to Subsection 4.2.1 shall be paid to CITY prior to the issuance of building permit for each applicable residential or other unit, except for the Open Space and Habitat Acquisition Development Impact fee, which shall be paid by OWNER to CITY prior to the issuance of a grading permit. Deferral of the payment of Development Impact Fees may be granted pursuant to a separate agreement approved by City pursuant to City policy.

4.2.3 Parkland and Quimby Act Fees. Pursuant to the General Plan (Ontario Plan) Goal PR1, Policy PR1-5 (achievement of a park standard of 5 acres of parkland per 1,000 residents) OWNER shall provide improved parks, developed in accordance with the City's park standards in an amount equal to two (2) acres per 1,000 of projected population without credit, reimbursement, offset or consideration from City. Such areas shall either be dedicated to the City or transferred to a homeowners' association. If approved by the City Manager, OWNER may satisfy this requirement through the development of non-public recreation facilities such as private recreational clubhouses or pool facilities. Credit for such private recreational facilities areas shall be limited to a maximum of 50% of the foregoing park development requirement. If OWNER's Project does not provide dedicated and developed park acreage equal to two (2) acres per 1,000 projected population, OWNER shall pay a fee in-lieu equal to the per acre estimated costs of acquisition and development of parkland in the City's Development Impact Fee for the calculated park acreage deficiency, at the time the fee becomes due and payable to the City. Such in-lieu fee shall be due and payable prior to the issuance of the first building permit for Production Units issued to OWNER. Any park dedication and/or improvements in excess of such two (2) acres per thousand standard, provided such park has been developed in accordance with the City's park standards and is open to the public generally, shall entitle OWNER to a credit toward its obligations under the Quimby Act (Gov. Code, § 64477) and the City's implementing ordinance and/or resolution (collectively "**Quimby Act Obligations**"), and to the extent OWNER's Quimby Act Obligations are satisfied, OWNER shall be entitled to have the City acquire such developed and publicly available parks as Non-Program Interests in accordance with Section 4.3.3 below.

4.3 Responsibility for Construction of Public Improvements.

4.3.1 Timely Construction of Public Infrastructure. The phasing of the areawide infrastructure construction within the New Model Colony will be as approved by the CITY. OWNER shall be responsible for the timely construction and completion of all public infrastructure required for the Project as shown on the attached Exhibit "F" and any and all tentative tract map conditions. Unless otherwise specified in the Subdivision Agreement/Tract Map conditions, all other required Improvements for each Tract Map, shall be completed and operational

prior to, and as a condition precedent to, OWNER requesting and CITY's granting of the first building permit for Production Units for each such Tract Map. All Infrastructure and Improvements shall be completed as required by the Subdivision Agreement/Tract Map conditions for Tract Map No. 20536.

4.3.2 Construction of DIF Program Infrastructure (Construction Agreement). To the extent OWNER is required to construct and completes construction of public improvements that are included in CITY's Development Impact Fee Program and the Construction Agreement between CITY and NMC Builders LLC, CITY agrees that CITY shall issue DIF Credit in accordance with the provisions of the Construction Agreement and any amendments thereto. Use of DIF Credit issued to OWNER as a member of NMC Builders LLC to offset OWNER's DIF payment obligations shall also be subject to the provisions of the Construction Agreement and any amendments thereto.

4.3.3 Construction of DIF Program Infrastructure (Non-Construction Agreement). To the extent OWNER is required to construct and completes construction of public improvements that are included in CITY's Development Impact Fee Program and such public improvements are not included the Construction Agreement between CITY and NMC Builders LLC, CITY agrees that CITY shall issue DIF Credit in accordance with the provisions of a separate Fee Credit Agreement between CITY and OWNER. Limitation on the use of DIF Credit issued to OWNER to offset OWNER's DIF payment obligations shall also be subject to the provisions of a separate Fee Credit Agreement. CITY and OWNER agree that the Fee Credit Agreement between CITY and OWNER shall comply with CITY's adopted policies applicable to such agreements.

4.3.4 Construction of Public Infrastructure by Third Parties. CITY and OWNER acknowledge the Improvements described in Exhibit E and depicted in Exhibit F are required for the development of the Property, surrounding properties within the Ontario Ranch and the other property owners are also obligated to construct the Improvements or portions thereof. As such, CITY agrees that OWNER's obligation to construct the Improvements may be satisfied by third party owners pursuant to separate written agreements between OWNER and said third party undertaking the construction of the Improvements. Nothing in this Agreement shall be construed to prohibit the coordination of the construction of the Improvements between private parties, including the allocation of costs for the construction of the Improvements. Notwithstanding anything to the contrary herein, any applicable DIF Credits may be transferred and assigned from one (1) party to another with respect to the construction of the Improvements and such transfer or assignment shall not require the conveyance of any real property.

4.4 Affordable Housing Requirement.

4.4.1 Affordable Housing- Number of Units. OWNER shall provide a minimum number of affordable housing units, equivalent to 10% of the OWNER's total approved residential units within the Project, that are affordable to very low, low

and moderate income households. Such requirement for affordable housing shall be met through one, or a combination of one or more, of the options provided in the following Sections 4.4.2.1 through 4.4.2.5. For the purposes of this Section, any term not defined in this Agreement shall be as defined by California Community Redevelopment Law (California Health and Safety Code Section 33000 et seq.).

4.4.2 Affordability Spread. Of the total number of residential dwelling units specified in Section 4.4.1, to be constructed or rehabilitated pursuant to Sections 4.4.2.1 or 4.4.2.2 respectively, thirty percent (30%) shall be available to very low income, thirty percent (30%) shall be available to low income and forty percent (40%) shall be available to moderate income households. "**Households**" shall be as defined by California Health and Safety Code Section 50053.

4.4.2.1 New Construction. If OWNER elects to fully or partially satisfy the affordable housing requirement by the construction of new residential units, it shall construct and restrict the affordability of residential dwelling units within its Project or, at OWNER's option and with the approval of the City, within another project elsewhere within the City. The affordable units constructed shall be intermingled with other units as part of the Project, and shall be built to the same construction, design and aesthetic standards, as well as number of rooms, as other units constructed as part of that OWNER's Project. In addition, the percentage ratio of affordable units offered for sale versus those offered for rent shall equal the percentage ratio of other units offered for sale versus for rent within OWNER's Project. Such construction shall be completed no later than the date that is five (5) years following the issuance of the first building permit for OWNER's Project; provided however that to the extent OWNER has not constructed the required percentage of units, based on the number of building permits for non-restricted units, OWNER shall, prior to the issuance of such building permits, provide security (in the form and substance approved by the City Manager and City Attorney) to City in order to ensure the faithful completion of such required percentage of construction of affordable units. If OWNER elects the option of constructing new affordable units, a detailed Affordable Housing Agreement specifying terms for the allowable monthly housing costs or rents (as applicable) and maintenance and occupancy standards shall be prepared, executed and recorded against such units as a condition to the issuance of a building permit. The Affordable Housing Agreement shall hold a recorded priority position senior to any other non-statutory lien or encumbrance affecting the unit.

4.4.2.2 Rehabilitation. If OWNER elects to fully or partially satisfy the affordable housing requirement by the substantial rehabilitation of existing residential units in the City, it shall substantially rehabilitate and restrict the affordability of, the number of residential units specified in Section 4.4.1, provided that such units shall be provided elsewhere within the City. The rehabilitation work shall be substantial and of high quality and shall also

address any deferred property maintenance issues on the property. "**Substantial rehabilitation**" shall mean rehabilitated multi-family rented dwelling units with three or more units and the value of the rehabilitation constitutes 25 percent of the after rehabilitation value of the dwelling, inclusive of land value pursuant to Health and Safety Code Section 33413(b)(2)(A)(iii-iv) as such section exists as of the Effective Date of this Agreement. If OWNER chooses the option of rehabilitation of existing housing units within the City, a detailed Affordable Housing Agreement specifying the terms for the allowable month housing costs or rents (as applicable) and maintenance and occupancy standards shall be prepared, executed and recorded against such units as a condition to the issuance of a building permit. Such rehabilitation shall be completed no later than the date that is five (5) years following the issuance of the first building permit for OWNER's Project; provided however that to the extent OWNER has not rehabilitated the required percentage of units, based on the number of building permits, OWNER shall, prior to the issuance of such building permits, provide security (in the form and substance approved by the City Manager and City Attorney) to the City in order to ensure the faithful completion of such required percentage of rehabilitation.

4.4.2.3 In-Lieu Fee. If OWNER has not fully complied with the requirements of Section 4.4.1 by providing the minimum number of affordable units through the construction of new affordable units or by the substantial rehabilitation of existing units, shall pay an "**Affordability In-Lieu Fee**". If OWNER has not provided any affordable residential units by construction or rehabilitation, the Affordability In-Lieu fee shall be equal to Three Dollars Twelve Cents ($3.12) per square foot of residential development within OWNER's Project or, if pre-paid as set forth below, Two Dollars Seventy Four Cents ($2.74) per square foot of residential development within OWNER's Project. If OWNER has partially complied with the requirements of Section 4.4.1 by construction or rehabilitation of less than the minimum number of units, then the Affordability In-lieu Fee shall be recalculated and reduced in consideration of the number and type of affordable units provided. The Affordability In-Lieu Fee shall be paid by OWNER to City no later than prior to the issuance of each building permit within OWNER's Project based on the square footage of the residential unit for which such building permit is sought; provided however that OWNER may, at OWNER's election, pre-pay such Affordability In-Lieu Fee by paying such Affordability In-Lieu Fee within thirty (30) days following the earliest discretionary approval by the City for OWNER's Project, including, but not limited to, any general plan amendment, specific plan adoption, development agreement, tentative map approval, variance, conditional use permit, or resolution of intention to form any public financing mechanism. The Three Dollars Twelve Cents ($3.12) and the Two Dollars Seventy Four Cents ($2.74) per square foot amounts shall automatically be increased annually, commencing on July 1, 2023, and automatically each July 1 thereafter. Such

adjustment shall be based on the percentage increase (but no decrease) in the Consumer Price Index (Riverside - San Bernardino - Ontario, CA), (December 2017=100) over the preceding year. The pre-paid Affordability In-Lieu Fee shall be calculated based on the maximum floor area ratio (FAR) permitted within the General Plan and any applicable FAR contained within the applicable specific plan, whichever is greater, and the Maximum Development Density. For purposes of this Agreement, "**Maximum Development Density**" shall be determined by multiplying the OWNER's Project's density for residential development potential as set forth in the General Plan or the applicable Specific Plan, whichever is less, by the net acreage of land within OWNER's Project. All "Affordability In-Lieu Fees" collected by the City shall be used to promote the construction of affordable housing within the City.

4.4.2.4 Affordability Covenants. Prior to the issuance of the first building permit for any affordable unit, the City and OWNER shall enter into an Affordable Housing Agreement Affordability shall be assured for a period of forty-five (45) years for for-sale units and fifty-five (55) years for rentals. For rental units, base rents shall be established by the City and rental adjustments required by the City shall be performed on an annual basis. In addition, the Affordable Housing Agreement shall impose maximum occupancy limits of 2 occupants per bedroom plus 1 additional occupant per dwelling unit, and a requirement for the owner or tenant to properly maintain each dwelling unit.

4.4.2.5 Transfer of Affordable Project. No transfer of title to any affordable housing project shall occur without the prior written consent of the City. In the event OWNER transfers title to any affordable housing project required to be constructed pursuant to this Agreement to a non-profit entity, or other entity, that receives an exemption from ad valorem real property taxes, the City shall be required to assure payment of an annual in lieu fee to the City on July 1 of each year equal to one-tenth of one percent (0.1%) of the assessed value of such project. The City may permit OWNER to satisfy this obligation by recorded covenants against the property and enforceable against said entity by the City. Any such covenants shall be approved by the Planning Director and the City Attorney.

4.5 Schools Obligations.

4.5.1 Written Evidence of Compliance with Schools Obligations.
OWNER shall, either through joint or individual agreements between OWNER and the applicable school district(s), shall satisfy its new school obligations. The new school obligations for the Mountain View School District in the Ontario Ranch area have been projected to include the acquisition or dedication of school sites for, and construction of, up to eight (8) schools. Of these eight (8) schools, six (6) are to be elementary (K-5) grade schools and two (2) are to be middle grade schools. The new school obligations for the Chaffey Joint Union High School

District in the Ontario Ranch area have been projected to include the dedication of a school site for, and construction of, an additional high school. The new school obligations for the applicable school district shall be met by a combination of the following: (1) designating and dedicating school site(s) within the Property as set forth in the General Plan, and/or (2) paying school impact fees, (3) entering into a joint mitigation agreement or individual mitigation agreements, or (4) any combination of the foregoing. Written evidence of approval by the applicable school district that OWNER has met their school obligations may be required by the City as the condition to the issuance by the City of any entitlements for OWNER's Project. In the event OWNER is unable to provide such written evidence from the applicable school district(s), the City shall have the right to decline to honor any DIF Credit, Certificates of MDD Availability, Certificates of Storm Water Treatment Capacity Availability, or any combination thereof, presented by such OWNER, without liability to the City. To the extent that a joint mitigation agreement is approved by the applicable school district(s), and OWNER is a participant in good standing in such mitigation agreement, OWNER shall be deemed to have mitigated its new school obligations under this Section 4.4.1.

4.6 Public Services Funding Fee.

4.6.1 Requirement for Payment of Public Services Funding Fee. In order to ensure that the adequate provision of public services, including without limitation, police, fire and other public safety services, are available to the residents of each Project in a timely manner, OWNER shall pay to CITY a "**Public Services Funding Fee**." The Public Services Funding Fee shall apply to residential and non-residential uses as set forth below.

4.6.2 Public Services Funding Fee Amount. OWNER shall pay a Public Services Funding fee in the total amount of Two Thousand Four Hundred Ninety dollars and Seventy Eight Cents ($2,490.78) per residential dwelling unit. The Public Services Funding Fee shall be paid in one (1) installment within one hundred eighty (180) calendar days after the effective date of the Development Agreement or in two (2) installments, at OWNER's option, as follows:

4.6.2.1 First Installment (Residential uses). The First Installment of the Public Services Funding Fee shall be One Thousand Two Hundred Forty Five dollars and Thirty Nine Cents ($1,245.39) per residential dwelling unit. The First Installment shall be based upon the "**Maximum Development Density**" of the OWNER Project, as defined in Section 3.7.2.3 of the First Amended and Restated Construction Agreement. The First Installment shall be due and payable 30 days following the effective date of the Development Agreement.

If the First installment amount is not paid for all residential dwelling units within the Project (based on the Maximum Development Density, or the number of units described on "B Maps" if approved) by January 1, 2024, the amount of the First Installment shall be increased. Such increase shall be

based on the percentage increase (but no decrease) in the Consumer Price Index (Riverside - San Bernardino - Ontario, CA) (December 2017=100) over the preceding year. Additionally, the amount shall be further increased automatically by the percentage increase in the Consumer Price Index (Riverside - San Bernardino - Ontario, CA) (December 2017=100) on each January 1 thereafter.

4.6.2.2 Second Installment (Residential Uses). The Second Installment of the Public Services Funding Fee shall be One Thousand Two Hundred Forty Five dollars and Thirty Nine Cents ($1,245.39) per residential unit. The Second Installment shall be paid at the time of the issuance of each building permit for the Project. The amount of the Second Installment shall increase automatically by percentage increase (but no decrease) in the Consumer Price Index (Riverside - San Bernardino - Ontario, CA) (December 2017=100) over the preceding year on January 1st of each year, beginning on January 1, 2024. OWNER may exercise the option to pay the Second Installment amount for all residential units, a portion of the residential units, or for the remainder of the residential units within OWNER's Project on or before each December 31st, before the Second Installment amount is automatically increased.

4.6.2.3 Single Installment (Non-residential Uses). A single installment payment of the Public Services Funding Fee shall be required in the amount of Seventy Five Cents ($.75) per square foot of non-residential buildings. The single installment for non-residential uses shall be due and payable prior to the issuance of the building permit for a non-residential building. The amount of the Single Installment for non-residential uses shall automatically increase by percentage increase (but no decrease) in the Consumer Price Index (Riverside - San Bernardino - Ontario, CA), (December 2017=100) over the preceding year on January 1st of each year, beginning on January 1, 2024. OWNER may exercise the option to pay any single installment amounts for the remainder of the non-residential square footage within the Project on or before December 31st, before the Single Installment amount is automatically increased.

4.7 Net MDD/Water Availability Equivalents.

4.7.1 Effectiveness of Agreement. Notwithstanding anything else set forth in this Agreement, CITY and OWNER each acknowledge, confirm, and agree, that (i) the City approval of this Agreement and (ii) the effectiveness of this Agreement, in each case, is conditioned upon OWNER's admission to NMC Builders as a "Member" thereof pursuant to the terms and conditions of the operating agreement of NMC Builders. OWNER and CITY agree that OWNER shall become a Member of NMC Builders within 30 days of the effective date of this Agreement.

4.7.1 Assigned Net MDD/Water Availability Equivalents. The City has agreed with NMC Builders LLC to reserve exclusively for Members of NMC Builders,

including OWNER, Net MDD made available through the construction of water system improvements funded by NMC Builders LLC. NMC Builders has assigned to OWNER its allocable share of the Net MDD issued by City. The provisions of the Construction Agreement Amendment requires that the City shall not approval a final tract map or issue building permits or certificates of occupancy for the area of development within the New Model Colony served by the water system improvements funded by NMC Builders LLC, except to the bearer of an Assignment of Net MDD Water Availability.

4.7.2 Requirement of NMC Builders, LLC Membership as a Phase 2 Water Member. OWNER and CITY agree that OWNER's' payment to CITY required by Section 4.7.3 below represents OWNER's contribution to the funding required for the future construction of the Phase 2 Water Improvements and the availability of additional Net MDD Water Availability required for the development of the Property described in Exhibit A of this Agreement.

4.7.3 CITY issuance of Water Availability Equivalents. Within 30 days after the effectiveness of this Development Agreement OWNER shall pay or have paid to City the applicable Phase 2 Water Participation Fee. The Phase 2 Water Participation Fee shall be the calculated based on the amount of the Regional Water DIF for the applicable land use category and the square footage of the applicable buildings. The calculated amount of the Phase 2 Water Participation Fee shall be paid to City within 30 days after the effective date of this Agreement or, at OWNER's option, the Phase 2 Water Participation Fee may be paid to City in two (2) installments. The first installment shall be fifty percent (50%) of the total Phase 2 Water Participation Fee and such first installment shall be due and payable to City within 30 days after the effective date of this Development Agreement. The second installment shall be the remaining amount of the Phase 2 Water Participation Fee and such second installment shall be due and payable to City within one (1) year after the payment of the first installment, or prior to, and as a condition precedent to, the recording of any final Parcel Map for the Project, whichever occurs first. Upon OWNER's complete payment to CITY of the Phase 2 Water Participation Fee CITY shall issue a Certificate of Water Availability Equivalents in the form attached hereto as Exhibit G. Such Water Availability Equivalents Certificate shall be issued by CITY within thirty (30) days of the receipt of such required payment. CITY and OWNER agree that the amount of Water Availability Equivalents issued to OWNER shall be based on the maximum projected need for Water Availability Equivalents required for the Property based upon water demand factors and assumptions listed in Exhibit C-2R of the Phase 2 Water Amendment to the Construction Agreement "Water Demand Equivalents by Land Use" for each land use category. Additionally, within five (5) business days of CITY's receipt of OWNER's payment as required under this Section 4.5.2, CITY shall issue a certificate of DIF Credit against OWNER's DIF obligations in the Regional Water DIF Category.

4.7.2 Use of Assigned Net MDD Water Availability. OWNER shall provide evidence of sufficient Net MDD Water Availability Equivalents (or portions thereof)

prior to and as a condition precedent to, the City's approval of any and all tract maps for the Property. The amount of Net MDD Water Availability Equivalents required for City's approval of a tract map shall be based upon water demand factors and assumptions listed in Exhibit C-2R of the Construction Agreement Amendment as "Water Demand Equivalents by Land Use" for each land use category.

4.7.3 Requirement for other Water System Improvements. A Certificate of Net MDD Availability is evidence only of available water capacity and does not satisfy any other conditions applicable to an OWNER's Project, including those relating to design and construction of master-planned potable water and recycled water transmission and distribution system for the respective pressure zone and other public infrastructure requirements.

4.8 Storm Water Capacity Availability.

4.8.1 Requirement for Storm Water Treatment Capacity Availability. OWNER shall provide evidence of sufficient Storm Water Treatment Capacity Availability as reserved in a Certificate of Storm Water Treatment Capacity Availability the same manner and subject to the same limitations as provided for the assignment of Certificates of Net MDD Availability in Section 4.7 of this Agreement.

4.8.2 Use of Storm Water Treatment Capacity Availability. The amount of Storm Water Treatment Capacity Availability required for the issuance of a grading permit to OWNER shall be based upon the Net Residential Acreage of the area to be graded regardless of the corresponding use.

4.8.3 Requirement for other Storm Water Improvements. The Certificate of Storm Water Treatment Capacity Availability is evidence only of available storm water treatment capacity and does not satisfy any other conditions applicable to a particular development project, including those relating to on-site water treatment, water quality, connection to the storm water collection system, or other public infrastructure requirements.

4.9 Maintenance of Open Space. OWNER shall provide for the ongoing maintenance of all park, common areas and open space areas within the Project as more particularly set forth in the Specific Plan, through a homeowners' association as approved by the CITY. Covenants, conditions and restrictions establishing any homeowners' association shall be approved by the Planning Director and City Attorney.

4.10 Compliance with Public Benefits Requirements.

4.10.1 Failure to Provide Public Benefits. In the event OWNER fails or refuses to comply with any condition referenced in Section 4.1 through 4.10, or challenges (whether administratively or through legal proceedings) the imposition of such conditions, OWNER shall be deemed in default of this Agreement pursuant to Section 8.4 hereof, thereby entitling the City to any and all remedies available to

it, including, without limitation, the right of the City to withhold OWNER's Project-related building permits, certificates of occupancy, or discretionary approvals, without liability.

5. FINANCING OF PUBLIC IMPROVEMENTS.

5.1 Financing Mechanism(s). In accordance with the Memorandum of Agreement between the CITY and NMC Builders, CITY will cooperate with OWNER in the formation of a CFD, or CFDs, to include all of the Project, to provide a financing mechanism to reimburse the OWNER for funds paid to NMC Builders LLC for OWNER's share of the costs of public infrastructure pursuant to the Construction Agreement and to acquire other public facilities constructed by OWNER subject to the provisions of the Memorandum of Agreement between CITY and NMC Builders LLC. Notwithstanding such reimbursements and acquisitions, OWNER shall remain entitled to DIF Credits as provided for in Article 3 of the Construction Agreement and/or as provided for in a separate Fee Credit Agreement between CITY and OWNER. OWNER agrees that, prior to the recordation of any Tract Map for the Property, the Property shall be included in a CFD to finance City services through annual special taxes that will initially be $1,443.71 per Single Family Detached Dwelling Unit, $1,251.15 per Multiple-Family Dwelling Unit, $1,048.96 per Gated Apartment Community Dwelling Unit, and $0.27 per square foot for Non-Residential buildings. These amounts shall be subject to an automatic increase at a rate not to exceed four (4%) percent per year, unless otherwise modified by the CITY. CITY shall be the sole and exclusive lead agency in the formation of any CFD, assessment district or other public financing mechanism within the Property; provided however, that the proceeds of any such CFD, assessment district, or financing mechanism may be used, subject to restrictions that may be imposed by applicable law, for the purposes of acquiring, constructing or maintaining public facilities to be owned or operated by other public agencies, including, without limitation those facilities owned or operated by a school district. In addition to the rights of the CITY pursuant to section 5.2 hereof, CITY shall have the right, but not the obligation, to condition the formation of any CFD, assessment district or other public financing mechanism within the Property on the OWNER mitigating all Project-related impacts to the applicable school district(s) as required by such school district(s). Written evidence by such school district(s) may be required by the CITY as the condition to the formation of any CFD, assessment district or other public financing mechanism within the Property, or any steps preliminary thereto, including, without limitation, the adoption of any resolution of intention to form such CFD, assessment district or other public financing mechanism within the Property. It is not the intent of the parties hereto, by this provision, to prohibit or otherwise limit the City's ability to take any and all necessary steps requisite to the formation of the CFD to finance City services through annual special taxes as set forth in this Section 5.1. Formation of any CFD, assessment district or other public financing mechanism within the Property, shall be subject to CITY's ability to make all findings required by applicable law and complying with all applicable legal procedures and requirements including, without limitation, CITY's public financing district policies as such policies may be amended from time to time. Notwithstanding the foregoing, it is acknowledged and agreed by the parties that nothing

contained in this Agreement shall be construed as requiring CITY or the City Council to form any such district or to issue and sell bonds.

6. REVIEW FOR COMPLIANCE.

6.1 Periodic and Special Reviews.

6.1.1 Time for and Initiation of Periodic Review. The CITY shall review this Agreement every twelve (12) months from the Effective Date in order to ascertain the good faith compliance by the OWNER with the terms of this Agreement. The OWNER shall submit an Annual Monitoring Report to CITY, in a form acceptable to the City Manager, along with any applicable processing charge within ten (10) days after each anniversary date of the Effective Date of this Agreement. Within fifteen (15) days after the receipt of the Annual Monitoring Report, CITY shall review the Annual Monitoring Report. Prior to the expiration of the fifteen (15) day review period, CITY shall either issue a notice of continuing compliance or a notice of non-compliance and a notice of CITY's intent to conduct a Special Review pursuant to Sections 6.1.2 through 6.1.6. Issuance of a notice of continuing compliance may be issued by the City Manager or his designee.

6.1.2 Initiation of Special Review. A special review may be called either by agreement between the parties or by initiation in one or more of the following ways:

(1) Recommendation of the Planning staff;

(2) Affirmative vote of at least four (4) members of the Planning Commission; or

(3) Affirmative vote of at least three (3) members of the City Council.

6.1.3 Notice of Special Review. The City Manager shall begin the special review proceeding by giving notice that the CITY intends to undertake a special review of this Agreement to the OWNER. Such notice shall be given at least ten (10) days in advance of the time at which the matter will be considered by the Planning Commission.

6.1.4 Public Hearing. The Planning Commission shall conduct a hearing at which the OWNER must demonstrate good faith compliance with the terms of this Agreement. The burden of proof on this issue is upon the OWNER.

6.1.5 Findings Upon Public Hearing. The Planning Commission shall determine upon the basis of substantial evidence whether or not the OWNER has, for the period under review, complied in good faith with the terms and conditions of this Agreement.

6.1.6 Procedure Upon Findings.

(a) If the Planning Commission finds and determines on the basis of substantial evidence that the OWNER has complied in good faith with the terms and conditions of this Agreement during the period under review, the review for that period is concluded.

(b) If the Planning Commission finds and determines on the basis of substantial evidence that the OWNER has not complied in good faith with the terms and conditions of this Agreement during the period under review, the Planning Commission may recommend to the City Council to modify or terminate this Agreement.

(c) The OWNER may appeal a determination pursuant to paragraph (b) to the City Council in accordance with the CITY's rule for consideration of appeals in zoning matters generally.

6.2 Proceedings Upon Modification or Termination. If, upon a finding under Section 6.1.6(b), the CITY determines to proceed with modification or termination of this Agreement, the CITY shall give notice to the property OWNER of its intention so to do. The notice shall contain:

(a) The time and place of the hearing;

(b) A statement as to whether or not the CITY proposes to terminate or to modify this Agreement; and

(c) Other information that the CITY considers necessary to inform the OWNER of the nature of the proceeding.

6.3 Hearing on Modification or Termination. At the time and place set for the hearing on modification or termination, the OWNER shall be given an opportunity to be heard. The OWNER shall be required to demonstrate good faith compliance with the terms and conditions of this Agreement. The burden of proof on this issue shall be on the OWNER. If the City Council finds, based upon substantial evidence in the administrative record, that the OWNER has not complied in good faith with the terms and conditions of the agreement, the City Council may terminate or modify this Agreement and impose those conditions to the action it takes as it considers necessary to protect the interests of the CITY. The decision of the City Council shall be final, subject only to judicial review pursuant to Section 1094.5 of the Code of Civil Procedure.

6.4 Certificate of Agreement Compliance. If, at the conclusion of a Periodic or Special Review, OWNER is found to be in compliance with this Agreement, CITY shall, upon written request by OWNER, issue a Certificate of Agreement Compliance ("Certificate") to OWNER stating that after the most recent Periodic or Special Review and based upon the information known or made known to the Planning Director and City Council that (1) this Agreement remains in effect and (2) OWNER is not in default. The

Certificate shall be in recordable form, shall contain information necessary to communicate constructive record notice of the finding of compliance, shall state whether the Certificate is issued after a Periodic or Special Review and shall state the anticipated date of commencement of the next Periodic Review. OWNER may record the Certificate with the County Recorder. Whether or not the Certificate is relied upon by assignees or other transferees or OWNER, CITY shall not be bound by a Certificate if a default existed at the time of the Periodic or Special Review, but was concealed from or otherwise not known to the Planning Director or City Council.

7. [RESERVED]

8. DEFAULT AND REMEDIES.

8.1 Remedies in General. It is acknowledged by the parties that CITY would not have entered into this Agreement if it were to be liable in damages under this Agreement, or with respect to this Agreement or the application thereof.

In general, each of the parties hereto may pursue any remedy at law or equity available for the breach of any provision of this Agreement, except that CITY shall not be liable in damages to OWNER, or to any successor in interest of OWNER, or to any other person, and OWNER covenants not to sue for damages or claim any damages:

(a) For any breach of this Agreement or for any cause of action which arises out of this Agreement; or

(b) For the taking, impairment or restriction of any right or interest conveyed or provided under or pursuant to this Agreement; or

(c) Arising out of or connected with any dispute, controversy or issue regarding the application or interpretation or effect of the provisions of this Agreement.

8.2 Specific Performance. The parties acknowledge that money damages and remedies at law generally are inadequate and specific performance and other non-monetary relief are particularly appropriate remedies for the enforcement of this Agreement and should be available to all parties for the following reasons:

(a) Money damages are unavailable against CITY as provided in Section 8.1 above.

(b) Due to the size, nature and scope of the project, it may not be practical or possible to restore the Property to its natural condition once implementation of this Agreement has begun. After such implementation, OWNER may be foreclosed from other choices it may have had to utilize the Property or portions thereof. OWNER has invested significant time and resources and performed extensive planning and processing of the Project in agreeing to the terms of this Agreement and will be investing even more significant time and resources in implementing the Project in reliance upon the terms of

this Agreement, and it is not possible to determine the sum of money which would adequately compensate OWNER for such efforts.

8.3 Release. Except for nondamage remedies, including the remedy of specific performance and judicial review as provided for in Section 6.5, OWNER, for itself, its successors and assignees, hereby releases the CITY, its officers, agents and employees from any and all claims, demands, actions, or suits of any kind or nature arising out of any liability, known or unknown, present or future, including, but not limited to, any claim or liability, based or asserted, pursuant to Article I, Section 19 of the California Constitution, the Fifth Amendment of the United States Constitution, or any other law or ordinance which seeks to impose any other liability or damage, whatsoever, upon the CITY because it entered into this Agreement or because of the terms of this Agreement.

8.4 Termination or Modification of Agreement for Default of OWNER. Subject to the provisions contained in Subsections 6.2 and 6.3 herein, CITY may terminate or modify this Agreement for any failure of OWNER to perform any material duty or obligation of OWNER under this Agreement, or to comply in good faith with the terms of this Agreement (hereinafter referred to as "default"); provided, however, CITY may terminate or modify this Agreement pursuant to this Section only after providing written notice to OWNER of default setting forth the nature of the default and the actions, if any, required by OWNER to cure such default and, where the default can be cured, OWNER has failed to take such actions and cure such default within 60 days after the effective date of such notice or, in the event that such default cannot be cured within such 60 day period but can be cured within a longer time, has failed to commence the actions necessary to cure such default within such 60 day period and to diligently proceed to complete such actions and cure such default.

8.5 Termination of Agreement for Default of CITY. OWNER may terminate this Agreement only in the event of a default by CITY in the performance of a material term of this Agreement and only after providing written notice to CITY of default setting forth the nature of the default and the actions, if any, required by CITY to cure such default and, where the default can be cured, CITY has failed to take such actions and cure such default within 60 days after the effective date of such notice or, in the event that such default cannot be cured within such 60 day period but can be cured within a longer time, has failed to commence the actions necessary to cure such default within such 60 day period and to diligently proceed to complete such actions and cure such default.

9. THIRD PARTY LITIGATION.

9.1 General Plan Litigation. CITY has determined that this Agreement is consistent with its Comprehensive General Plan, as such General Plan exists as of the Effective Date ("General Plan"), and that the General Plan meets all requirements of law. OWNER has reviewed the General Plan and concurs with CITY's determination. CITY shall have no liability in damages under this Agreement for any failure of CITY to perform under this Agreement or the inability of OWNER to develop the Property as contemplated by the Development Plan of this Agreement as the result of a judicial determination that

on the Effective Date, or at any time thereafter, the General Plan, or portions thereof, are invalid or inadequate or not in compliance with law.

9.2 Third Party Litigation Concerning Agreement. OWNER shall defend, at its expense, including attorneys' fees, indemnify, and hold harmless CITY, its agents, officers and employees from any claim, action or proceeding against CITY, its agents, officers, or employees to attack, set aside, void, or annul the approval of this Agreement or the approval of any permit granted pursuant to this Agreement. CITY shall promptly notify OWNER of any such claim, action or proceeding, and CITY shall cooperate in the defense. If CITY fails to promptly notify OWNER of any such claim, action or proceeding, or if CITY fails to cooperate in the defense, OWNER shall not thereafter be responsible to defend, indemnify, or hold harmless CITY. CITY may in its discretion participate in the defense of any such claim, action or proceeding.

9.3 Indemnity. In addition to the provisions of 9.2 above, OWNER shall indemnify and hold CITY, its officers, agents, employees and independent contractors free and harmless from any liability whatsoever, based or asserted upon any act or omission of OWNER, its officers, agents, employees, subcontractors and independent contractors, for property damage, bodily injury, or death (OWNER's employees included) or any other element of damage of any kind or nature, relating to or in any way connected with or arising from the activities contemplated hereunder, including, but not limited to, the study, design, engineering, construction, completion, failure and conveyance of the public improvements, save and except claims for damages arising through the sole active negligence or sole willful misconduct of CITY. OWNER shall defend, at its expense, including attorneys' fees, CITY, its officers, agents, employees and independent contractors in any legal action based upon such alleged acts or omissions. CITY may in its discretion participate in the defense of any such legal action.

9.4 Environment Assurances. OWNER shall indemnify and hold CITY, its officers, agents, and employees free and harmless from any liability, based or asserted, upon any act or omission of OWNER, its officers, agents, employees, subcontractors, predecessors in interest, successors, assigns and independent contractors for any violation of any federal, state or local law, ordinance or regulation relating to industrial hygiene or to environmental conditions on, under or about the Property, including, but not limited to, soil and groundwater conditions, and OWNER shall defend, at its expense, including attorneys' fees, CITY, its officers, agents and employees in any action based or asserted upon any such alleged act or omission. CITY may in its discretion participate in the defense of any such action.

9.5 Reservation of Rights. With respect to Sections 9.2, 9.3 and 9.4 herein, CITY reserves the right to either (1) approve the attorney(s) which OWNER selects, hires or otherwise engages to defend CITY hereunder, which approval shall not be unreasonably withheld, or (2) conduct its own defense, provided, however, that OWNER shall reimburse CITY forthwith for any and all reasonable expenses incurred for such defense, including attorneys' fees, upon billing and accounting therefor.

9.6 Survival. The provisions of this Sections 9.1 through 9.6, inclusive, shall survive the termination of this Agreement.

10. MORTGAGEE PROTECTION.

The parties hereto agree that this Agreement shall not prevent or limit OWNER, in any manner, at OWNER's sole discretion, from encumbering the Property or any portion thereof or any improvement thereon by any mortgage, deed of trust or other security device securing financing with respect to the Property. CITY acknowledges that the lenders providing such financing may require certain Agreement interpretations and modifications and agrees upon request, from time to time, to meet with OWNER and representatives of such lenders to negotiate in good faith any such request for interpretation or modification. CITY will not unreasonably withhold its consent to any such requested interpretation or modification provided such interpretation or modification is consistent with the intent and purposes of this Agreement. Any Mortgagee of the Property shall be entitled to the following rights and privileges:

(a) Neither entering into this Agreement nor a breach of this Agreement shall defeat, render invalid, diminish or impair the lien of any mortgage on the Property made in good faith and for value, unless otherwise required by law.

(b) The Mortgagee of any mortgage or deed of trust encumbering the Property, or any part thereof, which Mortgagee, has submitted a request in writing to the CITY in the manner specified herein for giving notices, shall be entitled to receive written notification from CITY of any default by OWNER in the performance of OWNER's obligations under this Agreement.

(c) If CITY timely receives a request from a Mortgagee requesting a copy of any notice of default given to OWNER under the terms of this Agreement, CITY shall provide a copy of that notice to the Mortgagee within ten (10) days of sending the notice of default to OWNER. The Mortgagee shall have the right, but not the obligation, to cure the default during the remaining cure period allowed such party under this Agreement.

(d) Any Mortgagee who comes into possession of the Property, or any part thereof, pursuant to foreclosure of the mortgage or deed of trust, or deed in lieu of such foreclosure, shall take the Property, or part thereof, subject to the terms of this Agreement. Notwithstanding any other provision of this Agreement to the contrary, no Mortgagee shall have an obligation or duty under this Agreement to perform any of OWNER's obligations or other affirmative covenants of OWNER hereunder, or to guarantee such performance; provided, however, that to the extent that any covenant to be performed by OWNER is a condition precedent to the performance of a covenant by CITY, the performance thereof shall continue to be a condition precedent to CITY's performance hereunder, and further provided that any sale, transfer or assignment by any Mortgagee in possession shall be subject to the provisions of Section 2.4 of this Agreement.

11. MISCELLANEOUS PROVISIONS.

11.1 Recordation of Agreement. This Agreement and any amendment or cancellation thereof shall be recorded with the San Bernardino County Recorder by the City Clerk within the ten (10) days after the CITY executes this Agreement, as required by Section 65868.5 of the Government Code. If the parties to this Agreement or their successors in interest amend or cancel this Agreement as provided for herein and in Government Code Section 65868, or if the CITY terminates or modifies the agreement as provided for herein and in Government Code Section 65865.1 for failure of the applicant to comply in good faith with the terms or conditions of this Agreement, the City Clerk shall have notice of such action recorded with the San Bernardino County Recorder.

11.2 Entire Agreement. This Agreement sets forth and contains the entire understanding and agreement of the parties, and there are no oral or written representations, understandings or ancillary covenants, undertakings or agreements which are not contained or expressly referred to herein. No testimony or evidence of any such representations, understandings or covenants shall be admissible in any proceeding of any kind or nature to interpret or determine the terms or conditions of this Agreement.

11.3 Severability. If any term, provision, covenant or condition of this Agreement shall be determined invalid, void or unenforceable, the remainder of this Agreement shall not be affected thereby to the extent such remaining provisions are not rendered impractical to perform taking into consideration the purposes of this Agreement. Notwithstanding the foregoing, the provision of the Public Benefits set forth in Section 4 of this Agreement, including the payment of the fees set forth therein, are essential elements of this Agreement and CITY would not have entered into this Agreement but for such provisions, and therefore in the event such provisions are determined to be invalid, void or unenforceable, this entire Agreement shall be null and void and of no force and effect whatsoever.

11.4 Interpretation and Governing Law. This Agreement and any dispute arising hereunder shall be governed and interpreted in accordance with the laws of the State of California. This Agreement shall be construed as a whole according to its fair language and common meaning to achieve the objectives and purposes of the parties hereto, and the rule of construction to the effect that ambiguities are to be resolved against the drafting party shall not be employed in interpreting this Agreement, all parties having been represented by counsel in the negotiation and preparation hereof.

11.5 Section Headings. All section headings and subheadings are inserted for convenience only and shall not affect any construction or interpretation of this Agreement.

11.6 Singular and Plural. As used herein, the singular of any word includes the plural.

11.7 Joint and Several Obligations. Subject to section 2.4, if at any time during the term of this Agreement the Property is owned, in whole or in part, by more than one owner, all obligations of such owners under this Agreement shall be joint and several, and the default of any such owner shall be the default of all such owners. Notwithstanding the foregoing, no owner of a single lot which has been finally subdivided and sold to such

owner as a member of the general public or otherwise as an ultimate user shall have any obligation under this Agreement except as provided under Section 4 hereof.

11.8 Time of Essence. Time is of the essence in the performance of the provisions of this Agreement as to which time is an element.

11.9 Waiver. Failure by a party to insist upon the strict performance of any of the provisions of this Agreement by the other party, or the failure by a party to exercise its rights upon the default of the other party, shall not constitute a waiver of such party's right to insist and demand strict compliance by the other party with the terms of this Agreement thereafter.

11.10 No Third Party Beneficiaries. This Agreement is made and entered into for the sole protection and benefit of the parties and their successors and assigns. No other person shall have any right of action based upon any provision of this Agreement.

11.11 Force Majeure. Neither party shall be deemed to be in default where failure or delay in performance of any of its obligations under this Agreement is caused by floods, earthquakes, other Acts of God, fires, wars, riots or similar hostilities, strikes and other labor difficulties beyond the party's control, (including the party's employment force), government regulations, court actions (such as restraining orders or injunctions), or other causes beyond the party's control. If any such events shall occur, the term of this Agreement and the time for performance by either party of any of its obligations hereunder may be extended by the written agreement of the parties for the period of time that such events prevented such performance, provided that the term of this Agreement shall not be extended under any circumstances for more than five (5) years.

11.12 Mutual Covenants. The covenants contained herein are mutual covenants and also constitute conditions to the concurrent or subsequent performance by the party benefited thereby of the covenants to be performed hereunder by such benefited party.

11.13 Successors in Interest. The burdens of this Agreement shall be binding upon, and the benefits of this Agreement shall inure to, all successors in interest to the parties to this Agreement. All provisions of this Agreement shall be enforceable as equitable servitudes and constitute covenants running with the land. Each covenant to do or refrain from doing some act hereunder with regard to development of the Property: (a) is for the benefit of and is a burden upon every portion of the Property; (b) runs with the Property and each portion thereof; and, (c) is binding upon each party and each successor in interest during ownership of the Property or any portion thereof.

11.14 Counterparts. This Agreement may be executed by the parties in counterparts, which counterparts shall be construed together and have the same effect as if all of the parties had executed the same instrument.

11.15 Jurisdiction and Venue. Any action at law or in equity arising under this Agreement or brought by a party hereto for the purpose of enforcing, construing or determining the validity of any provision of this Agreement shall be filed and tried in the

Superior Court of the County of San Bernardino, State of California, and the parties hereto waive all provisions of law providing for the filing, removal or change of venue to any other court.

11.16 Project as a Private Undertaking. It is specifically understood and agreed by and between the parties hereto that the development of the Project is a private development, that neither party is acting as the agent of the other in any respect hereunder, and that each party is an independent contracting entity with respect to the terms, covenants and conditions contained in this Agreement. No partnership, joint venture or other association of any kind is formed by this Agreement. The only relationship between CITY and OWNER is that of a government entity regulating the development of private property and the owner of such property.

11.17 Further Actions and Instruments. Each of the parties shall cooperate with and provide reasonable assistance to the other to the extent contemplated hereunder in the performance of all obligations under this Agreement and the satisfaction of the conditions of this Agreement. Upon the request of either party at any time, the other party shall promptly execute, with acknowledgment or affidavit if reasonably required, and file or record such required instruments and writings and take any actions as may be reasonably necessary under the terms of this Agreement to carry out the intent and to fulfill the provisions of this Agreement or to evidence or consummate the transactions contemplated by this Agreement. The City Manager may delegate his powers and duties under this Agreement to an Assistant City Manager or other management level employee of the CITY.

11.18 Eminent Domain. No provision of this Agreement shall be construed to limit or restrict the exercise by CITY of its power of eminent domain.

11.19 Agent for Service of Process. In the event OWNER is not a resident of the State of California or it is an association, partnership or joint venture without a member, partner or joint venturer resident of the State of California, or it is a foreign corporation, then in any such event, OWNER shall file with the Planning Director, upon its execution of this Agreement, a designation of a natural person residing in the State of California, giving his or her name, residence and business addresses, as its agent for the purpose of service of process in any court action arising out of or based upon this Agreement, and the delivery to such agent of a copy of any process in any such action shall constitute valid service upon OWNER. If for any reason service of such process upon such agent is not feasible, then in such event OWNER may be personally served with such process out of this County and such service shall constitute valid service upon OWNER. OWNER is amenable to the process so served, submits to the jurisdiction of the Court so obtained and waives any and all objections and protests thereto. OWNER for itself, assigns and successors hereby waives the provisions of the Hague Convention (Convention on the Service Abroad of Judicial and Extra Judicial Documents in Civil or Commercial Matters, 20 U.S.T. 361, T.I.A.S. No. 6638).

11.20 Estoppel Certificate. Within thirty (30) business days following a written request by any of the parties, the other party shall execute and deliver to the requesting

party a statement certifying that (i) either this Agreement is unmodified and in full force and effect or there have been specified (date and nature) modifications to the Agreement, but it remains in full force and effect as modified; and (ii) either there are no known current uncured defaults under this Agreement or that the responding party alleges that specified (date and nature) defaults exist. The statement shall also provide any other reasonable information requested. The failure to timely deliver this statement shall constitute a conclusive presumption that this Agreement is in full force and effect without modification except as may be represented by the requesting party and that there are no uncured defaults in the performance of the requesting party, except as may be represented by the requesting party. OWNER shall pay to CITY all costs incurred by CITY in connection with the issuance of estoppel certificates under this Section 11.20 prior to CITY's issuance of such certificates.

11.21 Authority to Execute. The person or persons executing this Agreement on behalf of OWNER warrants and represents that he or she/they have the authority to execute this Agreement on behalf of his or her/their corporation, partnership or business entity and warrants and represents that he or she/they has/have the authority to bind OWNER to the performance of its obligations hereunder.

11.22 Prevailing Wage. OWNER, for itself, its successors, and assigns, agrees, covenants, and warrants that the development of the Property, if any, shall comply with all applicable federal and state labor laws (including, without limitation, the requirement under California law to pay prevailing wages and hire apprentices), and all obligations as set forth herein.

11.22.1 CITY makes no representations concerning prevailing wages in compliance with California Labor Code Section 1770 et seq.

11.22.2. OWNER acknowledges and agrees that it shall be independently responsible for reviewing the applicable laws and regulations with respect to the payment of prevailing wages and complying therewith. OWNER shall bear all risks of payment or non-payment of prevailing wages under California law and/or the implementation of Labor Code Section 1781, as the same may be amended from time to time, and/or any other similar law.

11.22.3 The foregoing indemnity shall survive termination of this Agreement and shall continue after completion of the construction and development of the Property by OWNER, its successors or assigns. OWNER shall be solely responsible for determining and effectuating compliance with such laws.

11.22.4 OWNER, ON BEHALF OF ITSELF, ITS SUCCESSORS, AND ASSIGNS, WAIVES AND RELEASES CITY FROM ANY RIGHT OF ACTION THAT MAY BE AVAILABLE TO OWNER PURSUANT TO LABOR CODE SECTION 1781 OR THE DAVIS BACON ACT. RELATIVE TO THE WAIVER AND RELEASE CONTAINED IN THIS SECTION 11.22, OWNER ACKNOWLEDGES THE PROTECTIONS OF CIVIL CODE SECTION 1542, WHICH READS AS FOLLOWS: A GENERAL RELEASE DOES NOT EXTEND TO CLAIMS THAT THE CREDITOR OR RELEASING PARTY DOES NOT

KNOW OR SUSPECT TO EXIST IN HIS OR HER FAVOR AT THE TIME OF EXECUTING THE RELEASE, WHICH IF KNOWN BY HIM OR HER MUST HAVE MATERIALLY AFFECTED HIS OR HER SETTLEMENT WITH THE DEBTOR OR RELEASED PARTY.

INITIALS. BY INITIALING BELOW, OWNER KNOWINGLY AND VOLUNTARILY WAIVES THE PROVISIONS OF SECTION 1542 SOLELY WITH THE MATTERS WHICH ARE THE SUBJECT OF THE FOREGOING WAIVERS AND RELEASES:

Existing Development Approvals

On March 28, 2006, the Planning Commission:

a) Issued Resolution No. PC06-020 recommending City Council adopt and certify the Countryside Specific Plan Environmental Impact Report (SCH #2004071001).

b) Issued Resolution No. PC06-021 recommending City Council approval of the Countryside Specific Plan (PSP04-001).

On April 18, 2006, the City Council:

a) Issued Resolution No. 2006-013 certifying the Countryside Specific Plan Environmental Impact Report.

On April 25, 2006, the Planning Commission:

a) Issued Resolution No. PC06-031, recommending the City Council approval of an amendment (File No. PSPA06-003) to the Countryside Specific Plan.

On May 2, 2006, the City Council:

a) Issued Ordinance No. 2828 approving the Countryside Specific Plan (PSP04-001).

On June 20, 2006 the City Council:

a) Issued Ordinance No. 2830 approving an amendment to the Countryside Specific Plan (File No. PSPA06-063).

FORM OF CERTIFICATE OF NET MDD AVAILABILITY

Pursuant to Section ___ of this Agreement between the City of Ontario, a California municipal corporation, and _____, a _____ company, hereinafter called "OWNER", the terms and definitions of which are hereby incorporated herein by this reference and hereinafter called "Agreement", the City of Ontario hereby certifies based on CITY receipt of payment of OWNER's share of the funding for the Phase 2 Water Improvements, that OWNER is entitled to the following Net MDD Water Availability.

Amount of Net MDD _____ gpm

_____
Scott Ochoa, City Manager

Dated:_____

Exhibit "H"

FORM OF CERTIFICATE OF REGIONAL DIF CREDIT

Pursuant to Section 4.5.2 of this Agreement by and between the City of Ontario and _____, dated _____, 201_, the terms and definitions of which are hereby incorporated herein by this reference and hereinafter called the "Development Agreement', the City of Ontario hereby certifies that OWNER is entitled to the following amount and nature of DIF Credits in the Regional Water DIF Infrastructure Category:

Amount of Credit: $_____

_____
Scott Ochoa, City Manager

Dated: _____

Exhibit "I-1"

ONTARIO RANCH
WATER SUPPLY PHASING PLAN

Phase 2	Water Availability Equivalency	Estimated Net MDD Available[1]
Phase 2 A		
Supply & Storage		
1. 1 - Additional Ground Water Well and Collection lines - Design and Construction	8,250 gpm[2]	**7,750 gpm**[2]
Pipelines (Transmission & Distribution)[2]		
2. 925 Zone Transmission lines – Design and Construction		
3. Temporary Pressure Reducing Station[3] – Design and Construction		
Phase 2B		
Supply & Storage		
4. 1 – Additional Ground Water Well and Collection lines – Design and Construction	10,500 gpm[2]	**9,860 gpm[2]**
5. 1 – 6 million gallon Reservoir – 925 Zone – Design and Construction		

(1) Upon Completion of the construction of all of the improvements described for each Phase a Certificate of Net MDD Availability shall be issued to Developer for the corresponding amount of Net MDD. Net MDD means the maximum daily demand on the potable water supply, net of the water requirements for public schools and parks. The Water Availability Equivalency includes the estimated requirements for public schools and parks. The amount of Net MDD specified is the cumulative amount for which building permits may be issued upon funding of the corresponding and all preceding Phases of improvements.

(2) The ability of a particular development to utilize Net MDD assigned to it by the Developer will require the completion of design and construction of Master-planned potable and recycled water transmission and distribution pipelines for the respective pressure zone. Other factors may include its location, the particular land use and Water Availability Equivalents assigned to it as specified in Exhibit C-2.

(3) Pressure reducing stations are a component of the pipeline transmission and distribution system.

EXHIBIT "I-2"

Available Water Supply - See Exhibit C-1R for Net MDD Available

Table A - Water Demand Equivalents By Land Use

The Ontario Plan	Potable Water			Recycled Water	
Land Use	Water Demand Factor (ADD)		Water Demand Equivalents (WDE)[2]	Recycled Water Demand Factor[1] (ADD)	Recycled Water Demand Of Total Water Demand
	(gpd/du)	(gpd/ac)	(gpm/unit)	(gpd/ac)	(%)
Detached Dwellings (less than 5 units per acre)	544		0.57	900	28%
Detached or Attached Dwellings (between 5 and 11 units per acre)	464		0.48	1,000	21%
Attached Dwellings (between 11 and 25 units per acre)	323		0.34	1,500	18%
High Density Dwellings (25+ units per acre)	152		0.16	1,500	27%
Commercial Lodging	150		0.16	1,700	50%
Retail/Services Uses		2,200	2.29	2,300	51%
Office Uses		3,400	3.54	2,300	40%
Business Park Uses		2,200	2.29	2,200	50%
Industrial Uses		2,000	2.08	2,200	52%
Institutional Use		2,200	2.29	1,600	42%
Parks		1,000	1.04	1,400	58%
Schools		3,500	3.65	1,600	31%

[1]Recycled Water Demands include irrigation for right-of-way (medians and parkways), neighborhood edge, pocket parks, and common areas.

[2] The WDE is based on the Maximum Day Demand (MDD) with a peaking factor of 1.5 in the NMC for all land use categories.

Table B - Example Water Supply Calculation

Land Use	Acres[1] (gross)	Residential Units	WDE Factor (gpm)	Potable MDD (gpm)	Recycled Water ADD (gpm)
Development					
Detached Dwellings (less than 5 units per acre)	1,284	5,061	0.57	2,868	803
Detached or Attached Dwellings (between 5 and 11 units per acre)	369	2,530	0.48	1,223	256
Attached Dwellings (between 11 and 25 units per acre)	194	3,410	0.34	1,147	202
Retail/Services Uses (per acre)[2]	104		2.29	239	166
TOTAL	**1,950**	**11,001**		**5,477**	**1,428**

Three (3) Wells Are required to Support this example, assuming each well produces 2,000 gpm and connection to the Recycled Water System maximizing Recycled Water Use.

[1] Residential Acres are estimated based on the weighted average derived from the average number of units per land use category.

[2] Commercial acreage is calculated from a total square footage of 1,361,000 SF with an average Floor to Area Ratio (FAR) of 0.30 for commercial services in The Ontario Plan.

DISCLOSURE NOTICE
SOUTH ARCHIBALD TRICHLOROETHYLENE PLUME

Dear Property Owner/Developer/Applicant:

The City of Ontario ("City") has approved or will be approving development in the Ontario Ranch area in the next few years, subject to the appropriate and required statutory process. This letter is intended to serve as notice to all potential property owners of the existence of a groundwater plume, known as the South Archibald Trichloroethylene (TCE) Plume which may exist in, under or near owner's property.

The groundwater plume is in an area in the central Chino Basin south of the Pomona Freeway, west of Turner Avenue, east of Grove Avenue, and north of Kimball Avenue. The plume primarily consists of TCE, a discontinued industrial solvent, and is subject to a clean-up under the oversight and direction of the Santa Ana Regional Water Quality Control Board ("Regional Board").

The Regional Board's approved clean-up procedure involves the removal and treatment of groundwater containing TCE via groundwater wells to reduce the plume concentrations and control its migration. In addition, the City is providing potable water supplies for domestic purposes to residences with private domestic wells affected by the plume. Finally, the Regional Board will continue to monitor all impacted areas and private domestic wells to ensure that residents' health and the environment are properly safeguarded. These remedial actions are documented in a Remedial Action Plan approved by the Regional Board in September 2016.

Further and current information may be found on the Regional Board's Geotracker website at https://geotracker.waterboards.ca.gov/profile_report?global_id=T10000004658.

Property owners may wish to include this letter as a part of a Real Estate Transfer Disclosure under California Civil Code Section 1102 et seq.

1425 SOUTH BON VIEW · ONTARIO, CALIFORNIA 91761-4406 · (909) 395-2605 · FAX (909) 395-2601

CITY OF ONTARIO *Agenda Report* **June 20, 2023**	**SECTION:** **PUBLIC HEARINGS**
Department: Planning Prepared By: Lorena Mejia Staff Member Presenting: Scott Murphy, Executive Director Community Development Approved By:	Submitted To: Council/OHA Approved: _____ Continued To: _____ Denied: _____ Item No: 30

SUBJECT: **A PUBLIC HEARING TO CONSIDER AN AMENDMENT (FILE NO. PSPA22-001) TO THE RICH HAVEN SPECIFIC PLAN TO BRING THE SPECIFIC PLAN INTO COMPLIANCE WITH THE ONTARIO PLAN POLICY PLAN (GENERAL PLAN) LAND USE PLAN, GENERALLY BORDERED BY RIVERSIDE DRIVE, COLONY HIGH SCHOOL AND THE SCE SUBSTATION TO THE NORTH, HAMNER AVENUE/MILL CREEK AVENUE TO THE EAST, OLD EDISON AVENUE TO THE SOUTH, AND HAVEN AVENUE TO THE WEST**

RECOMMENDATION: That the City Council consider and adopt:

A. A Resolution adopting the Final Environmental Impact Report (State Clearinghouse No. 2022100425) for the Rich Haven Specific Plan Amendment, a Mitigation Monitoring and Reporting Program, and a Statement of Overriding Considerations; and
B. A Resolution approving File No. PSPA22-001, an Amendment to the Rich Haven Specific Plan to bring the Specific Plan into compliance with The Ontario Plan Policy Plan (General Plan) land use plan that include: [1] the reduction of Low-Medium Density Residential land use acreage from 102.1 acres to 24.5 acres; [2] increase the Medium Density Residential land use acreage from 96.7 acres to 113.4 acres; [3] increase the Light Industrial land use acreage from 49.4 acres to 116.5 acres; [4] a reduction to the Mixed-Use Overlay land use acreage from 29.4 acres to 20.5 acres; [5] a reduction to the Regional Commercial land use acreage from 74 acres to 58.4 acres; [6] increase the Mixed-Use Standalone Residential Overlay land use acreage from 141.9 acres to 144.1 acres; [7] increase the Open Space – Non-Recreation land use acreage from 38.2 acres to 55 acres; and [8] various changes to the Specific Plan land use map (Planning Areas), development standards, exhibits, and text modification, to reflect the proposed land uses.

THE FOLLOWING COUNCIL GOALS ARE BEING ACHIEVED:
Invest in the Growth and Evolution of the City's Economy
Operate in a Businesslike Manner
Invest in the City's Infrastructure (Water, Streets, Sewers, Parks, Storm Drains and Public Facilities)

Ensure the Development of a Well Planned, Balanced, and Self-Sustaining Community in Ontario Ranch

FISCAL IMPACT: There is not a direct fiscal impact associated with the adoption of the Rich-Haven Specific Plan Amendment. Any potential long-term fiscal impacts and anticipated expenditures to the City would be offset by development impact fees and property tax revenues from the future development. Additionally, future development projects approved on the subject properties will be conditioned to form/join a services Community Facilities District to offset increased costs associated with police, fire, and other public services.

BACKGROUND & ANALYSIS: On December 4, 2007, the City Council approved the Rich Haven Specific Plan (File No. PSP05-004) and certified the related Environmental Impact Report (SCH# 2006-051081). The Specific Plan established the land use designations, development standards, and design guidelines for approximately 512 acres of land, which included the potential development of 4,256 residential units and 889,200 square feet of commercial/office land uses.

On February 20, 2018, the City Council approved an Amendment to the Rich Haven Specific Plan (File No. PSPA16-005) and an Addendum to The Ontario Plan (TOP) for the annexation of 72.3 acres of land located at the southeast corner of Haven Avenue and Ontario Ranch Road, into the Mixed-Use District of the Rich-Haven Specific Plan. The amendment included updates to the development standards, exhibits, and text changes to reflect the proposed annexation and overall compliance with the Policy Plan component of TOP.

On May 18, 2021, the City Council approved an Addendum to The Ontario Plan Final Environmental Impact Report (SCH# 2008101140) in conjunction with a General Plan Amendment (File No. PGPA19-005) and an amendment to the Rich Haven Specific Plan (File No. PSPA19-006). The General Plan Amendment changed the land use designation on 181.77 acres of land to 23.41 acres of Low Density Residential (2.1 – 5 du/ac), 24.16 acres of Low-Medium Density Residential (5.1 – 11 du/ac), 57.83 acres of Medium Density Residential (11.1 – 25 du/ac), 20.46 acres of Mixed Use, 48.61 acres of Industrial, and 7.3 acres of Open Space – Non Recreation designated property. The Rich Haven Specific Plan Amendment included map and text revisions to be consistent with the General Plan Amendment. The approvals allowed for the reduction of mixed-use acreage within the specific plan and the transfer of residential units from the mixed-use planning areas to residential planning areas that resulted in increased densities and the establishment of an industrial land use within the specific plan. The new industrial land use was established immediately south of the SCE Mira Loma Substation to create a land use buffer between the substation and future commercial development.

On August 16, 2022, the City Council certified The Ontario Plan 2050 Update Supplemental Environmental Impact Report (SEIR) in conjunction with The Ontario Plan 2050 (TOP 2050) (File No. PGPA20-002) General Plan update. The TOP 2050 and SEIR included the following land use changes within the Rich Haven Specific Plan boundary:

- Changing 8.1 acres of land from Low-Medium Density Residential (5.1 – 11 du/ac) to Medium Density Residential (11.1 to 25.0 du/ac);
- Changing 23.4 acres of land from Low-Medium Density Residential (5.1 – 11 du/ac) to Industrial;

- Changing 21.4 acres of land from Medium Density Residential (11.1 to 25.0 du/ac) to Industrial;
- Changing 22.3 acres of land from Mixed-Use to Industrial;
- Changing 25.1 acres of land from Mixed-Use to General Commercial; and
- Changing 20.4 acres of land from Mixed-Use to Medium Density Residential (11.1 to 25.0 du/ac).

On March 31, 2022, Richland Developers and Brookcal Ontario submitted an Amendment to the Rich Haven Specific Plan to bring the Specific Plan into compliance with TOP Policy Plan (General Plan) land uses.

AMENDMENT: The proposed Rich Haven Specific Plan Amendment ("SPA") includes the following:

1) TOP Policy Plan Land Use Map Consistency. To achieve consistency with TOP 2050 Official Land Use Plan (Figure LU-01), the SPA proposes to amend the land uses within Areas 1 and 2 as shown in Exhibit A: Rich Haven Specific Plan Land Use Plan (Existing/Proposed).

- Area 1 – The existing 61.5 acres of Low Medium Density Residential (5.1 – 12 du/ac) will be changed to 16.7 acres of Medium Density Residential (11.1- 25 du/ac) and 44.8 acres of Light Industrial. The new industrial land use designation was established by TOP to create a land use buffer between the SCE Mira Loma Substation and existing/future residential development.
- Area 2 – The existing 17.3 acres of Mixed-Use Stand-Alone Residential Overlay and 5 acres of Mixed-Use Overlay will be changed to 22.3 acres of Light Industrial. The new industrial land use designation was established by TOP to create a land use buffer between the SCE Mira Loma Substation and existing residential development.

2) Restructuring the Planning Areas. The SPA includes the restructuring of planning areas that would reduce the number of subareas to align with the proposed land uses changes as shown in Exhibit A: Rich Haven Specific Plan Land Use Plan (Existing/Proposed).

3) Revisions to Light Industrial Development Standards. The proposed Planning Areas 2C, 3C and 5A are located adjacent to Residential Planning areas. To minimize impacts from future industrial development to the adjacent residential land uses, the SPA includes additional industrial design standards and setback requirements that are summarized below.

- Setbacks – The SPA includes minimum industrial building and landscape setback requirements for interior property lines common with residential land uses. A minimum 100-foot building setback is required from a residential property line that includes a 40-foot landscape setback to allow for the installation of a double row of trees. Also, a 10-foot landscape setback is required between the building and drive-aisle. The multiple landscape setbacks will allow for the planting of multiple rows of trees between the residential properties and any proposed industrial building. The objective is to create an urban forest within the required landscaped setback areas and plant large evergreen trees to provide the maximum amount of screening year-round.

- Design Standards – The SPA includes separate industrial design standards that include: 1) orienting truck courts away from residential areas to minimize noise impacts; 2) enhanced second story elevations facing residential properties; and 3) limit activity and evening hours of operation on drive aisles adjacent to residential land uses.

4) Residential Unit Transfers. The SPA proposes to reduce the existing residential acreage by 77.8 acres. To maintain the total number of existing residential dwelling units (7,194) allocated within the Rich Haven Specific Plan, the Amendment will reassign units to different Planning Areas. The highlighted Areas 1, 2, 3 and 4 within Exhibit A (Rich Haven Specific Plan Land Use Plan (Existing/Proposed) show the location of the existing and proposed land use changes affected by the proposed unit transfers.

5) Document Changes. The SPA includes updates to the light industrial development standards and land use matrix, updates to the existing residential and mixed-use development standards and land use matrix, updates to various exhibits reflecting the restructuring of planning areas, along with text/map changes to reflect the proposed land use designation changes. All changes and additions to the Specific Plan (exhibits, tables, and development standards) are contained within the revised Specific Plan document and are highlighted in red.

ENVIRONMENTAL IMPACT REPORT: Rich Haven Specific Plan (2022 Amendment) Environmental Impact Report — An EIR (State Clearinghouse No. 2022100425) was prepared for this Project in accordance with CEQA requirements. Through the analysis contained in the detailed Initial Study prepared for the project, distribution of the Notice of Preparation and scoping meeting discussion, the following areas of potential impact were identified and addressed:

- Air Quality;
- Biological Resources;
- Cultural Resources/Tribal Cultural Resources;
- Energy;
- Geology and Soils;
- Greenhouse Gas Emissions;
- Hazards and Hazardous Materials;
- Hydrology and Water Quality;
- Land Use and Planning;
- Noise;
- Transportation; and
- Utilities and Service Systems.

The Rich Haven Specific Plan (2022 Amendment) EIR evaluates each of these areas and in certain instance, identifies mitigation measures and/or revisions to the plan to lessen the level of impact. With the implementation of the various mitigation measures, many of the potential adverse impacts can be reduced to a level of less than significant. Of the 12 topical areas considered by the EIR, all but two of the impact areas were mitigated to a level of less than significant. The two remaining impact areas, even with the mitigation measures, could not be reduced to a level of less than significant, resulting in some impacts remaining potentially significant and unavoidable. These areas include:

(1) Air Quality.

Impact AQ-1. The proposed Project would not be consistent with the applicable air quality plan. The proposed Project would result in an increase in the frequency or severity of existing air quality violations or cause or contribute to new violations or delay the timely attainment of air quality standards or the interim emissions reductions specified in the Air Quality Management Plan (AQMP). Implementation of the Project construction-source emissions would exceed applicable South Coast Air Quality Management District (SCAQMD) regional thresholds for emissions of Volatile Organic Compounds (VOCs), Nitrogen Oxides (NOx) and Carbon Monoxide (CO). Implementation of the Project operational-source emissions would exceed the applicable SCAQMD regional thresholds for VOCs, NOx, CO, particulate matter less than 10 microns (PM10), and particulate matter less than 2.5 microns (PM2.5). Although, Mitigation Measures 4.3.1 through 4.3.18 would incrementally reduce Project operational source emissions, the Project operational-source emissions would remain significant.

Impact AQ-2. Even with application of mitigation, Project operational-source VOC, NOx, CO, PM10, and PM2.5 emissions would exceed applicable SCAQMD regional thresholds. The Basin encompassing the Project site is designated as non-attainment for ozone, PM10, and PM2.5 (VOC and NOx are both ozone precursors; NOx is a precursor to PM10, and PM2.5). Project operational-source VOC, NOx, PM10, and PM2.5 emissions threshold exceedances would result in a cumulatively considerable net increase in criteria pollutants (ozone and PM10, and PM2.5) for which the Project region is non-attainment. These are cumulatively significant and unavoidable air quality impacts.

(2) Greenhouse Gases.

Impact GHG-1. Implementation of the proposed Project would generate GHG emissions, either directly or indirectly, that may have a significant impact on the environment. Project construction and operations would result in direct and indirect emissions of CO2, CH4, and N2O. Direct Project-related GHG emissions include emissions from construction activities, area sources, and mobile sources, while indirect sources include emissions from electricity consumption, water demand, and solid waste generation. As shown in Table 4.4-5 (Annual Project GHG Emissions) of the Draft EIR, construction and operation of the Project would generate a total of approximately 129,314.95 MTCO2e/year, which would exceed the SCAQMD significance threshold of 3,000 MTCO2e/year.

The majority of the GHG emissions (approximately 72 percent unmitigated) are associated with non-construction related mobile sources. Responsibility and authority for regulation of vehicular-source emissions resides with the State of California (CARB, et al.). Neither the Applicant nor the Lead Agency can affect or mandate substantial reductions in vehicular-source GHG emissions, much less reductions that would achieve no net increase condition or achieve the SCAQMD 3,000 MTCO2e/year threshold. In effect, all Project traffic would need to be eliminated or be “zero GHG emissions sources” in order to achieve the SCAQMD threshold.

However, there are no feasible means to, or alternatives to eliminate, all Project traffic or to ensure that Project traffic would result in zero GHG emissions sources. In terms of its practical application,

this would constitute a “no build” condition. Based on the preceding, even with the application of mitigation, the Project would generate GHG emissions, either directly or indirectly, that would have a significant impact on the environment. Therefore, even with the implementation of mitigation measures 4.3.2 through 4.3.18, this Project impact is conservatively considered significant and unavoidable.

The City of Ontario circulated the Draft EIR on February 24, 2023, through April 10, 2023, for public review. At the end of the public review period 6 comments were received. A list of commenters is provided within section 1.3.1 of the Final Environmental Impact Report (FEIR) on page 1-1). Areas of concern included air quality and environmental impacts associated with industrial development. The comments and responses to each of the comments are presented within Section 3.0 of the Refer to the Final Environmental Impact Report, FEIR Response to Comments (see FEIR page 3-1).

While these impacts will be significant and unavoidable, Staff believes that the benefits of the Project outweigh the potential unavoidable, adverse impacts of the plan, as further described below:

- The Project will incorporate transitions and/or buffers between commercial/mixed-use and industrial areas and adjacent residential areas;
- The Project will contribute to the regional jobs to housing balance by providing employment opportunities while minimizing development impacts on surrounding neighborhoods;
- The Project will create a high-quality industrial park development that attracts an array of businesses and provides employment opportunities within proximity to area residents; and
- The Project will provide infrastructure improvements that will provide utilities and safe and efficient access/circulation routes for the distribution/transportation of goods;

As a result, Staff recommends that the City Council adopt a Statement of Overriding Considerations for those impacts that could not be fully mitigated to a level of less than significant. Furthermore, to ensure that the mitigation measures are implemented, a Mitigation Monitoring and Reporting Program has been prepared for the Project pursuant to CEQA Guidelines Section 15097, which specifies responsible agencies/departments, monitoring frequency, timing and method of verification and possible sanctions for non-compliance with mitigation measures.

PLANNING COMMISSION REVIEW: On May 23, 2023, the Planning Commission conducted a duly noticed public hearing on the subject applications and voted unanimously (4-0) to recommend that the City Council adopt the Final Environmental Impact Report (State Clearinghouse No. 2022100425) for the Rich Haven Specific Plan Amendment, a Mitigation Monitoring and Reporting Program, and a Statement of Overriding Considerations and approve the Specific Plan Amendment.

EXHIBIT A: RICH-HAVEN SPECIFIC PLAN LAND USE PLAN (EXISTING/PROPOSED)

Proposed Rich Haven Specific Plan—Land Use Plan

CITY OF ONTARIO PLANNING DEPARTMENT

PLANNING COMMISSION AGENDA REPORT

May 23, 2023

303 East B Street, Ontario, California 91764 Phone: 909.395.2036 / Fax: 909.395.2420

FILE NO: PSPA22-001

SUBJECT: A public hearing to consider an Amendment (File No. PSPA22-001) to the Rich Haven Specific Plan to bring the Specific Plan into compliance with The Ontario Plan Policy Plan (General Plan) land use plan that include: [1] The reduction of Low-Medium Density Residential land use acreage from 102.1 acres to 24.5 acres; [2] Increase the Medium Density Residential land use acreage from 96.7 acres to 113.4 acres; [3] Increase the Light Industrial land use acreage from 49.4 acres to 116.5 acres; [4] A reduction to the Mixed-Use Overlay land use acreage from 29.4 acres to 20.5 acres; [5] A reduction to the Regional Commercial land use acreage from 74 acres to 58.4 acres; [6] Increase the Mixed-Use Standalone Residential Overlay land use acreage from 141.9 acres to 144.1 acres; [7] Increase the Open Space – Non-Recreation land use acreage from 38.2 acres to 55 acres; and [8] Various changes to the Specific Plan land use map (Planning Areas), development standards, exhibits, and text modification, to reflect the proposed land uses. The Rich Haven Specific Plan is generally bounded by Riverside Drive, Colony High School and the SCE Mira Loma Substation to the north, Hamner Avenue/Mill Creek Avenue to the east, Old Edison Avenue to the south, and Haven Avenue to the west. (APNs: 218-161-14, 218-016-06, 218-016-10, 218-016-11, 218-016-19, 218-016-15, 218-016-07, 218-016-18, 218-203-08, 218-016-14, 218-016-12, 218-016-13, 218-203-07, 218-203-04, 218-203-03, 218-203-05, 218-203-06, 218-211-39, 218-211-01, 218-211-21, 218-211-36, 218-211-37 and 218-211-15) **submitted by Richland Developers, Inc and Brookcal Ontario, LLC. City Council action is required.**

PROPERTY OWNERS: Brookcal Ontario, LLC, Legacy Land Partners, LLC, Haven Ontario NMC 2, LLC and Richland Developers, Inc.

RECOMMENDED ACTION: That the Planning Commission consider the following:

(1) A Resolution recommending the City Council adopt the Final Environmental Impact Report (State Clearinghouse No. 2022100425) for the Rich Haven Specific Plan Amendment, including the adoption of a Mitigation Monitoring and Reporting Program and a Statement of Overriding Considerations; and

(2) A Resolution recommending the City Council approve File No. PSPA22-001, for the Rich Haven Specific Plan pursuant to the facts and reasons contained in the staff report and attached Resolution as "Attachment A".

CC			Final

PROJECT SETTING: The Rich-Haven Specific Plan is comprised of 584.9 gross acres of land and is generally bounded by Riverside Drive, Colony High School and the SCE Mira Loma Substation to the north, Hamner Avenue/Mill Creek Avenue to the east, Old Edison Avenue to the south, and Haven Avenue to the west as depicted in Figure 1: Project Location. The majority of the specific plan is presently vacant and was primarily used for agricultural purposes, including the raising of livestock and dairy operations that have recently ceased operations in the last 2 to 5 years. The areas to the northwest of Ontario Ranch Road are under construction with residential subdivisions, and several properties to the south along Ontario Ranch Road have been entitled for residential and commercial land uses. The area immediately south of the SCE Mira Loma Substation is currently under construction with an industrial building. Additionally, Southern California Edison (SCE) easements containing power transmission lines cross the site in an east to west direction directly south of the Chino Avenue alignment, transmission lines also run north/south along the east side of Mill Creek Avenue, and northeast to southwest diagonally across the site near the intersection of Mill Creek Avenue and Ontario Ranch Road.

Figure 1: Project Location

The land uses surrounding the Rich Haven Specific Plan boundary, are as follows:

- The properties to the north are developed with the Creekside residential community, Colony High School, and the SCE Mira Loma Substation.

- A portion of the properties to the south are located within the Esperanza Specific Plan and are vacant dairy and agriculture uses. The remaining properties to the south are developed with dairy and agriculture uses and are presently not part of any specific plan.

- The properties to the east include Colony High School, the Edenglen residential community, the SCE Mira Loma Substation, and commercial and industrial uses located within the City of Eastvale.

- The properties to the west are located within portions of the West Haven Specific Plan and the Avenue Specific Plan and are developed with new residential subdivisions and commercial uses.

The existing surrounding land uses, zoning, and Policy Plan (general plan) and specific plan land use designations are summarized in the "Surrounding Zoning & Land Uses" table located in the Technical Appendix of this report.

PROJECT ANALYSIS:

(1) Background — On December 4, 2007, the City Council approved the Rich-Haven Specific Plan (File No. PSP05-004) and certified the related Environmental Impact Report (SCH# 2006-051081). The Specific Plan established the land use designations, development standards, and design guidelines for approximately 512 acres of land, which included the potential development of 4,256 residential units and 889,200 square feet of commercial/office land uses.

On February 20, 2018, the City Council approved an Amendment to the Rich-Haven Specific Plan (File No. PSPA16-005) and an Addendum to the TOP for the annexation of 72.3 acres of land located at the southeast corner of Haven Avenue and Ontario Ranch Road, into the Mixed-Use District of the Rich-Haven Specific Plan. The amendment included updates to the development standards, exhibits, and text changes to reflect the proposed annexation and overall compliance with the Policy Plan component of The Ontario Plan ("Policy Plan").

On May 18, 2021, the City Council approved an Addendum to The Ontario Plan Final Environmental Impact Report (SCH# 2008101140) in conjunction with a General Plan Amendment (File No. PGPA19-005) and an amendment to the Rich Haven Specific Plan (File No. PSPA19-006). The General Plan Amendment changed the land use designation on 181.77 acres of land to 23.41 acres of Low Density Residential (2.1 – 5 du/ac), 24.16 acres of Low-Medium Density Residential (5.1 – 11 du/ac), 57.83 acres of Medium Density Residential (11.1 – 25 du/ac), 20.46 acres of Mixed Use, 48.61 acres of Industrial, and 7.3 acres of Open Space – Non Recreation designated property. The Rich Haven Specific Plan amendment included map and text revisions to be consistent with the General Plan Amendment. The approvals allowed for the reduction of mixed-use acreage within the specific plan and the transfer of residential units from the mixed-use planning areas to residential planning areas that resulted in increased densities and the establishment of an industrial land use within the specific plan. The new industrial land use was established immediately south of the SCE Mira Loma Substation to create a land use buffer between the substation and future commercial development.

On August 16, 2022, the City Council certified The Ontario Plan 2050 Update Supplemental Environmental Impact Report ("SEIR") in conjunction with The Ontario Plan 2050 ("TOP 2050") (File No. PGPA20-002) General Plan update. The TOP 2050 and SEIR, included the following land use changes within the Rich Haven Specific Plan boundary (see Figure 2: TOP Official Land Use Plan Comparison (TOP 2010/TOP 2050):

- Changing 8.1 acres of land from Low-Medium Density Residential (5.1 – 11 du/ac) to (MDR) Medium Density Residential (11.1 to 25.0);
- Changing 23.4 acres of land from Low-Medium Density Residential (5.1 – 11 du/ac) to Industrial;
- Changing 21.4 acres of land from (MDR) Medium Density Residential (11.1 to 25.0) to Industrial;
- Changing 22.3 acres of land from Mixed-Use to Industrial;
- Changing 25.1 acres of land from Mixed-Use to General Commercial; and
- Changing 20.4 acres of land from Mixed-Use to Medium Density Residential (11.1 to 25.0).

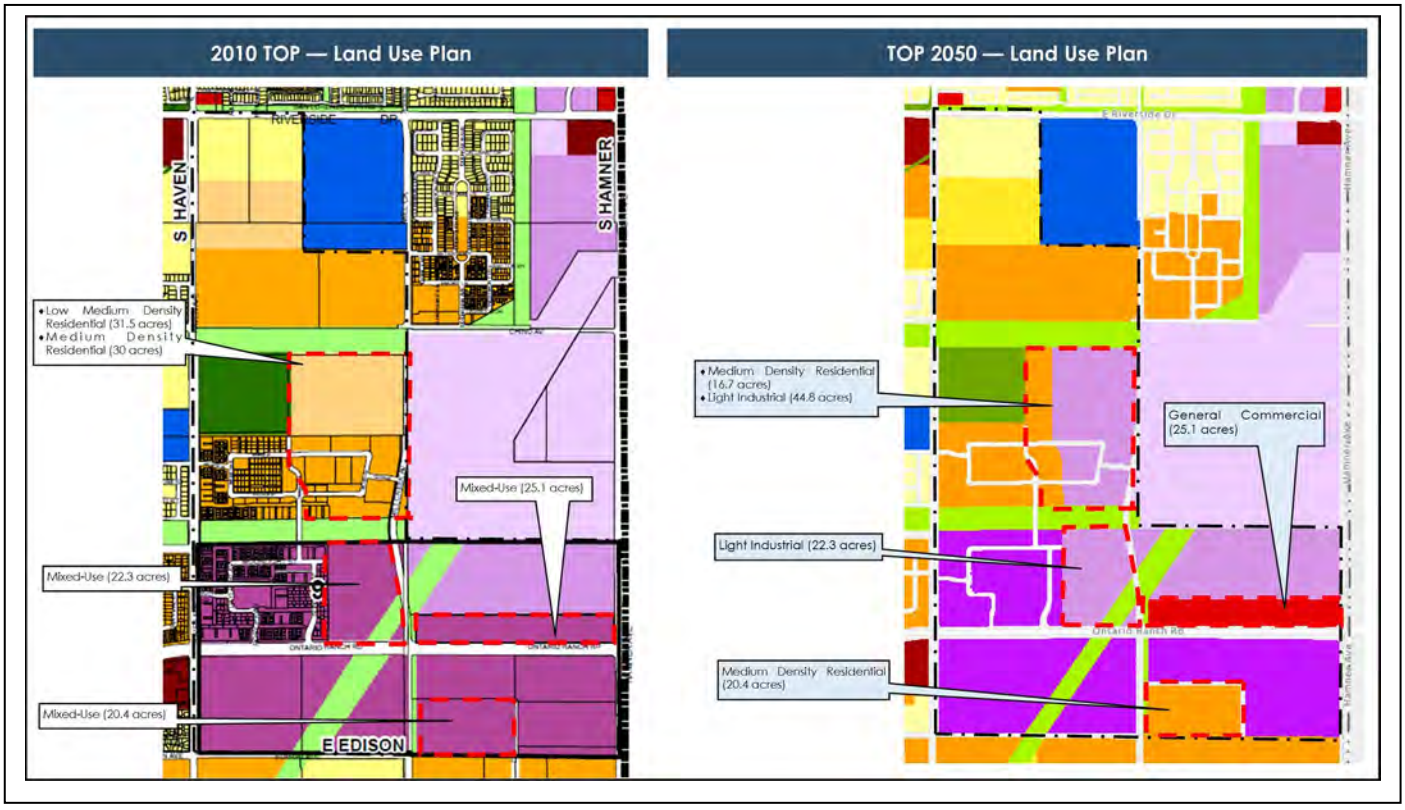

Figure 2: TOP Official Land Use Plan Comparison (TOP 2010/TOP 2050)

On March 31, 2022, Richland Developers and Brookcal Ontario submitted an Amendment to the Rich Haven Specific Plan to bring the Specific Plan into compliance with TOP Policy Plan (General Plan) land uses.

(2) Amendment to the Rich Haven Specific Plan — The proposed Rich Haven Specific Plan Amendment (SPA) includes the following:

(a) **TOP Policy Plan Land Use Map Consistency.** To achieve consistency with the TOP 2050 Official Land Use Plan (Figure LU-01), the SPA proposes to amend the land uses within Areas 1 and 2 as shown in Figure 3: Rich Haven Specific Plan Land Use Plan (Existing/Proposed).

- Area 1 – The existing 61.5 acres of Low Medium Density Residential (5.1 – 12 du/ac) will be changed to 16.7 acres of Medium Density Residential (11.1- 25 du/ac) and 44.8 acres of Light Industrial. The new industrial land use designation was established by TOP to create a land use buffer between the SCE Mira Loma Substation and existing/future residential development.

- Area 2 – The existing 17.3 acres of Mixed-Use Stand-Alone Residential Overlay and 5 acres of Mixed-Use Overlay will be changed to 22.3 acres of Light Industrial. The new industrial land use designation was established by TOP to create a land use buffer between the SCE Mira Loma Substation and existing residential development.

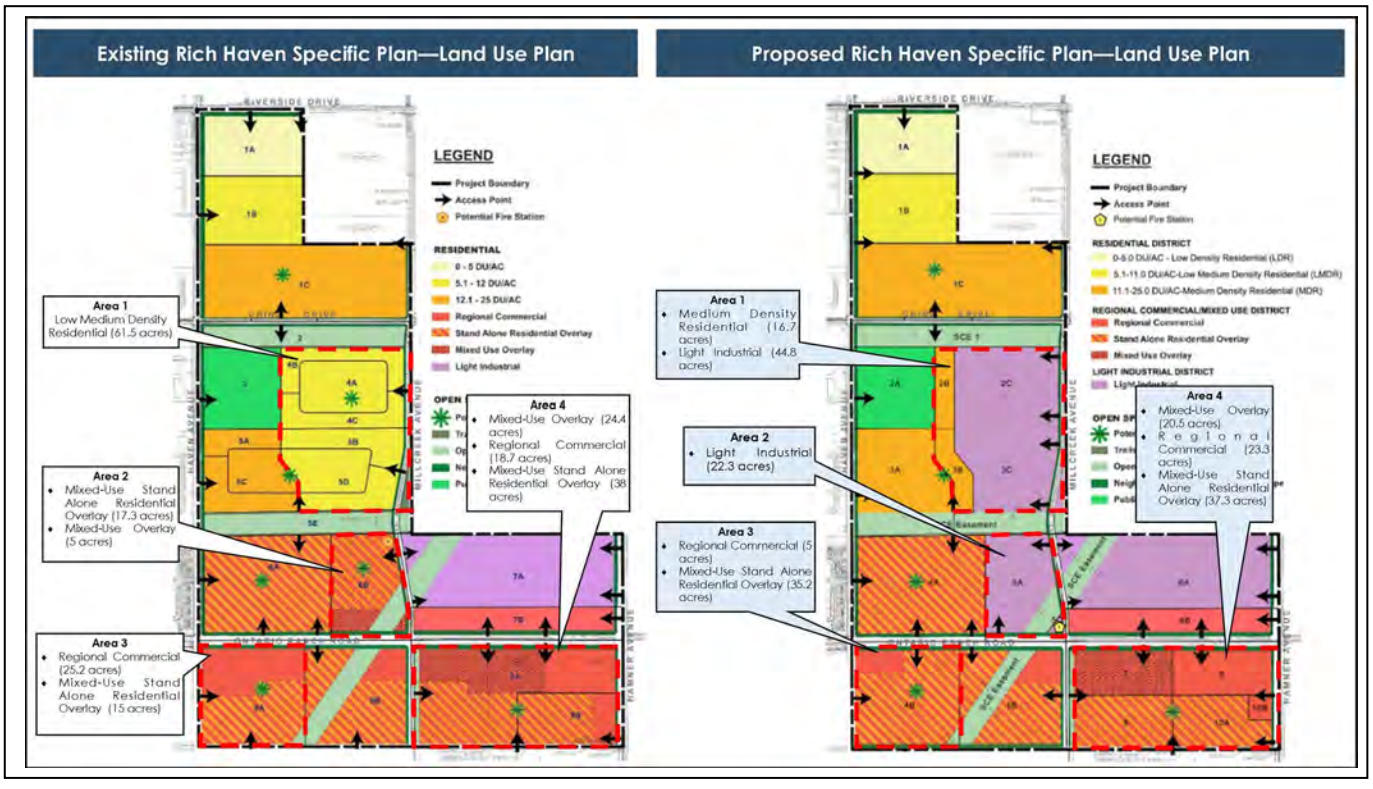

Figure 3: Rich Haven Specific Plan Land Use Plan (Existing/Proposed)

(b) **Restructuring the Planning Areas.** The SPA includes the restructuring of planning areas that would reduce the number of subareas to align with the proposed land uses changes as shown in Figure 3: Rich Haven Specific Plan Land Use Plan (Existing/Proposed), below.

(c) **Revisions to Light Industrial Development Standards.** The proposed Planning Areas 2C, 3C and 5A are located adjacent to Residential Planning areas. To minimize impacts from future industrial development to the adjacent residential land uses the SPA included additional industrial design standards and setback requirements that are summarized below.

- Setbacks – The SPA included minimum industrial building and landscape setback requirements for interior property lines common with residential land uses that are depicted in Figure 4: Industrial/Residential Edge Condition. A minimum 100-foot building setback is required from a residential property line that includes a 40-foot landscape setback to allow for the installation of a double row of trees. Also, a 10-foot landscape setback is required between the building and drive-aisle. The multiple landscape setbacks will allow for the planting of multiple rows of trees between the residential properties and any proposed industrial building. The objective is to create an urban forest within the required landscaped setback areas and plant large evergreen trees to provide the maximum amount of screening year-round.

- Design Standards – The SPA includes separate industrial design standards that include: 1)Orienting truck courts away from residential areas to minimize noise impacts; 2) Enhanced second story elevations facing residential; and 3) Limit activity and evening hours of operation on drive aisles adjacent to residential land uses.

(d) **Residential Unit Transfers.** The SPA proposes to reduce the existing residential acreage by 77.8 acres. To maintain the total number of existing 7,194 residential dwelling units allocated within the Rich Haven Specific Plan the amendment will reassign units to different Planning Areas. The highlighted Areas 1, 2, 3 and 4 within Figure 3 (Rich Haven Specific Plan Land Use Plan (Existing/Proposed)) shows the location of the existing and proposed land use changes affected by the proposed unit transfers.

(e) **Document Changes.** The SPA includes updates to the light industrial development standards and land use matrix, updates to the existing residential and mixed-use development standards and land use matrix, updates to various exhibits reflecting the restructuring of planning areas, along with text/map changes to reflect the proposed land use designation changes. All changes and additions to the Specific Plan (exhibits, tables, and development standards) are contained within the revised Specific Plan document, and are highlighted in red.

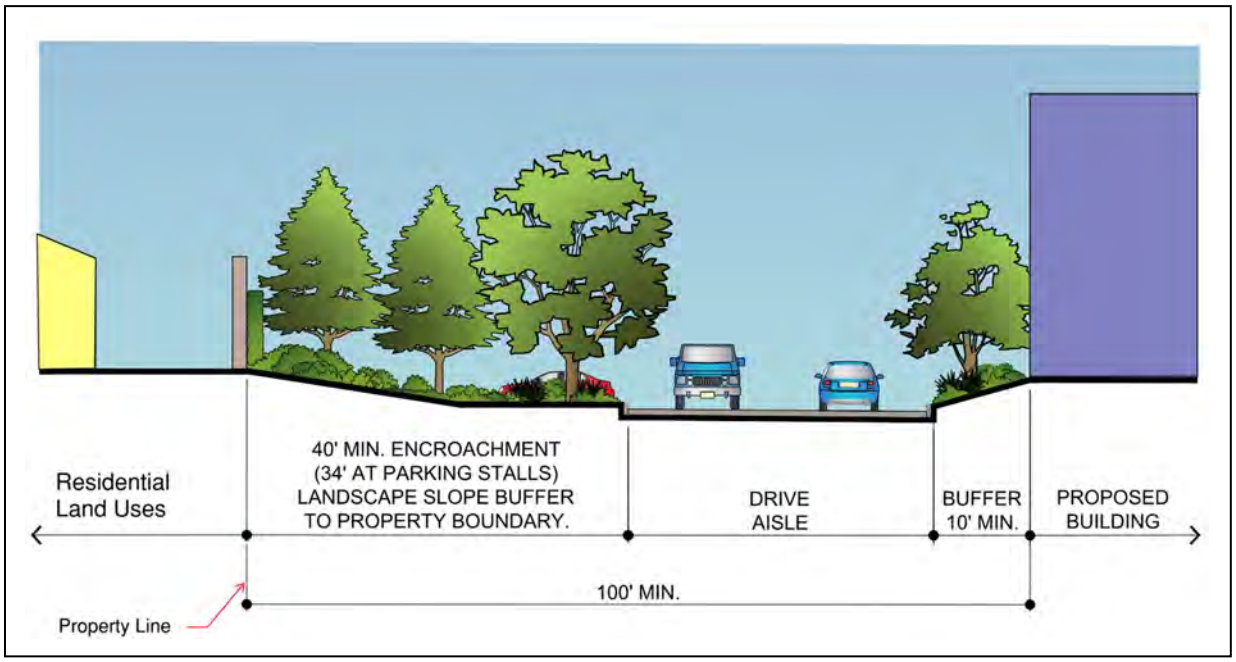

Figure 4: Industrial/Residential Edge Condition

PUBLIC NOTIFICATION: The subject application was advertised as a public hearing in at least one newspaper of general circulation in the City of Ontario (the Inland Valley Daily Bulletin newspaper). In addition, the Project site was posted with one or more large public notification signs and notices were mailed to all owners of real property located within a minimum of 600 feet of the exterior boundaries of the property that is the subject of the hearing, as shown on the records of the County Assessor.

CORRESPONDENCE: As of the preparation of this Agenda Report, Planning Department staff has not received any written or verbal communications from the owners or occupants of properties surrounding the Project site or from the public in general, regarding the subject application.

AGENCY/DEPARTMENT REVIEWS: Each City agency/department has been provided the opportunity to review and comment on the subject application and recommend conditions of approval to be imposed upon the application. At the time of the Resolution preparation, recommended conditions of approval were provided and are appended to the attached Resolutions as "Attachment A."

AIRPORT LAND USE COMPATIBILITY PLAN (ALUCP) COMPLIANCE: The California State Aeronautics Act (Public Utilities Code Section 21670 et seq.) requires that an Airport Land Use Compatibility Plan be prepared for all public use airports in the State; and requires that local land use plans and individual development proposals must be consistent with the policies set forth in the adopted Airport Land Use Compatibility Plan.

On April 19, 2011, the City Council of the City of Ontario approved and adopted the ONT ALUCP, establishing the Airport Influence Area for Ontario International Airport, which encompasses lands within parts of San Bernardino, Riverside, and Los Angeles Counties, and limits future land uses and development within the Airport Influence Area, as they relate to noise, safety, airspace protection, and overflight impacts of current and future airport activity. As the recommending authority for the Project, the Planning Commission has reviewed and considered the facts and information contained in the Application and supporting documentation against the ONT ALUCP compatibility factors, including [1] Safety Criteria (ONT ALUCP Table 2-2) and Safety Zones (ONT ALUCP Map 2-2), [2] Noise Criteria (ONT ALUCP Table 2-3) and Noise Impact Zones (ONT ALUCP Map 2-3), [3] Airspace protection Zones (ONT ALUCP Map 2-4), and [4] Overflight Notification Zones (ONT ALUCP Map 2-5). As a result, the Planning Commission, therefore, finds and determines that the Project, when implemented in conjunction with the conditions of approval, will be consistent with the policies and criteria set forth within the ONT ALUCP.

COMPLIANCE WITH THE ONTARIO PLAN: The proposed Project is consistent with the principles, goals and policies contained within the Vision, Governance, Policy Plan (general plan), and City Council Priorities components of The Ontario Plan ("TOP"). More specifically, the goals and policies of TOP that are furthered by the proposed Project are as follows:

(1) City Council Goals.

- Invest in the Growth and Evolution of the City's Economy
- Maintain the Current High Level of Public Safety
- Operate in a Businesslike Manner
- Pursue City's Goals and Objectives by Working with Other Governmental Agencies
- Focus Resources in Ontario's Commercial and Residential Neighborhoods
- Invest in the City's Infrastructure (Water, Streets, Sewers, Parks, Storm Drains and Public Facilities)
- Encourage, Provide or Support Enhanced Recreational, Educational, Cultural and Healthy City Programs, Policies and Activities
- Ensure the Development of a Well Planned, Balanced, and Self-Sustaining Community in the New Model Colony

(2) Vision.

Distinctive Development:

- Commercial and Residential Development

➢ Development quality that is broadly recognized as distinctive and not exclusively tied to the general suburban character typical of much of Southern California.

(3) Governance.

Decision Making:

- Goal G1: Sustained decision-making that consistently moves Ontario towards its Vision by using The Ontario Plan as a framework for assessing choices.

➢ G 1-2. Long-term Benefit. We require decisions to demonstrate and document how they add value to the community and support the Ontario Vision.

(4) Policy Plan (General Plan)

Land Use Element:

- Goal LU-1 Balance: A community that has a spectrum of housing types and price ranges that match the jobs in the City and that make it possible for people to live and work in Ontario and maintain a quality of life.

➢ LU-1.1 Strategic Growth. We concentrate growth in strategic locations that help create place and identity, maximize available and planned infrastructure, foster the development of transit, and support the expansion of the active and multimodal transportation networks throughout the City.

➢ LU-1.6 Complete Community. We incorporate a variety of land uses and building types in our land use planning efforts that result in a complete community where residents at all stages of life, employers, workers, and visitors have a wide spectrum of choices of where they can live, work, shop and recreate within Ontario.

- Goal LU-2 Compatibility: Compatibility between a wide range of uses and a resultant urban patterns and forms.

➢ LU-2.6 Infrastructure Compatibility. We require infrastructure to be aesthetically pleasing and in context with the community character.

Housing Element:

- Goal H-2 Housing Supply & Diversity: Diversity of types of quality housing that are affordable to a range of household income levels, accommodate changing demographics, and support and reinforce the economic sustainability of Ontario.

- H-2.4 Ontario Ranch. We support a premier lifestyle community in the Ontario Ranch, distinguished by diverse housing, highest design quality, and cohesive and highly amenitized neighborhoods.

- H-2.5 Housing Design. We require architectural excellence through adherence to City design guidelines, thoughtful site planning, environmentally sustainable practices, and other best practices.

- Goal H-5 Special Needs: A full range of housing types and community services that meet the special housing needs for all individuals and families in Ontario, regardless of income level, age, or other status.

- H-5.2 Family Housing. We support the development of larger rental apartments that are appropriate for families with children, including, as feasible, the provision of services, recreation, and other amenities.

Community Economics Element:

- Goal CE-1 Complete Community: A complete community that provides for all incomes and stages of life.

- CE-1.6 Diversity of Housing. We collaborate with residents, housing providers, and the development community to provide housing opportunities for every stage of life; we plan for a variety of housing types and price points to encourage the development of housing supportive of our efforts to attract business in growing sectors of the community while being respectful of existing viable uses.

- Goal CE-2 Placemaking: A City of distinctive neighborhoods, districts, corridors, and centers where people choose to be.

- CE-2.1 Development Projects. We require new development and redevelopment to create unique, high-quality places that add value to the community.

- CE-2.2 Development Review. We require those proposing new development and redevelopment to demonstrate how their projects will create appropriately unique, functional, and sustainable places that will compete well with their competition within the region.

- CE-2.4 Protection of Investment. We require that new development and redevelopment protect existing investment by providing architecture and urban design of equal or greater quality.

- CE-2.5 Private Maintenance. We require adequate maintenance, upkeep, and investment in private property because proper maintenance on private property protects property values.

Safety Element:

- Goal S-1 Seismic & Geologic Hazards: Minimized risk of injury, loss of life, property damage, and economic and social disruption caused by earthquake-induced and other geologic hazards.

  - S-1.1 Implementation of Regulations and Standards. We require that all new habitable structures be designed in accordance with the most recent California Building Code adopted by the City, including provisions regarding lateral forces and grading.

Community Design Element:

- Goal CD-1 Image & Identity: A dynamic, progressive city containing distinct and complete places that foster a positive sense of identity and belonging among residents, visitors, and businesses.

  - CD-1.1 City Identity. We take actions that are consistent with the City being a leading urban center in Southern California while recognizing, enhancing, and preserving the character of our existing viable neighborhoods.

  - CD-1.2 Growth Areas. We establish Place Types in urban, mixed use, and transit-oriented areas to foster the City's identity as a premier community and require new development within each Place Type to incorporate prescribed urban patterns, forms, and placemaking priorities.

  - CD-1.3 Existing Neighborhoods. We require the existing character of viable residential and non-residential neighborhoods be preserved, protected, and enhanced.

- Goal CD-2 Design Quality: A high level of design quality resulting in neighborhoods, public spaces, parks, and streetscapes that are attractive, safe, functional, human-scale, and distinct.

  - CD-2.1 Quality Building Design and Architecture. We encourage all development projects to convey visual interest and character through:

    - Building volume, massing, and height to provide context-appropriate scale and proportion;
    - A true architectural style which is carried out in plan, section, and elevation through all aspects of the building and site design and appropriate for its setting; and
    - Exterior building materials that are articulated, high quality, durable, and appropriate for the architectural style.

  - CD-2.2 Neighborhood Design. We create distinct residential neighborhoods that promote a sense of community and identity by emphasizing access, connectivity, livability, and social interaction through such elements as:

- A pattern of smaller, walkable blocks that promote activity, safety, and access to nearby amenities and services;
- Varied parcel sizes and lot configurations to accommodate a diversity of housing types;
- Traffic calming measures to slow traffic and promote walkability while maintaining acceptable traffic flows and emergency evacuation access;
- Floor plans that encourage views onto the street and de-emphasize the visual and physical dominance of garages (introducing the front porch as the "outdoor living room"), as appropriate; and
- Landscaped parkways, with sidewalks separated from the curb and designed to maximize safety, comfort, and aesthetics for all users.

➢ CD-2.7 Sustainability. We collaborate with the development community to design and build neighborhoods, streetscapes, sites, outdoor spaces, landscaping, and buildings to reduce energy demand through solar orientation, maximum use of natural daylight, passive solar and natural ventilation, building form, mechanical and structural systems, building materials, and construction techniques.

➢ CD-2.8 Safe Design. We incorporate defensible space design into new and existing developments to ensure the maximum safe travel and visibility on pathways, corridors, and open space and at building entrances and parking areas by avoiding physically and visually isolated spaces, maintaining visibility and accessibility, and using lighting.

➢ CD-2.9 Landscape Design. We encourage durable, sustainable, and drought-tolerant landscaping materials and designs that enhance the aesthetics of structures, create and define public and private spaces, and provide shade and environmental benefits.

➢ CD-2.10 Parking Areas. We require all development, including single-family residential, to minimize the visual impact of surface, structured, and garage parking areas visible from the public realm in an aesthetically pleasing, safe and environmentally sensitive manner. Examples include:

- Surface parking: Shade trees, pervious surfaces, urban run-off capture and infiltration, and pedestrian paths to guide users through the parking field;
- Structured parking: facade articulation, screening, appropriate lighting, and landscaping; and
- Garage parking: providing access to single-family residential garages through alley access, recessing garages from the frontage to emphasize front doors or active living spaces.

➢ CD-2.11 Entry Statements. We encourage the inclusion of amenities, signage, and landscaping at the entry to neighborhoods, commercial centers, mixed use areas, industrial developments, and public places that reinforce them as uniquely identifiable places.

- CD-2.12 Site and Building Signage. We encourage the use of sign programs that utilize complementary materials, colors, and themes. Project signage should be designed to effectively communicate and direct users to various aspects of the development and complement the character of the structures.

- CD-2.13 Entitlement Process. We work collaboratively with all stakeholders to ensure a high degree of certainty in the efficient review and timely processing of all development plans and permits.

- Goal CD-3 Urban, Mixed Use, and Transit-Oriented Place Types: Vibrant urban environments that are organized around intense buildings, pedestrian and transit areas, public plazas, and linkages between and within developments that are conveniently located, visually appealing and safe during all hours.

- CD-3.2 Comfortable, Human-Scale Public Realm. We require that public spaces, including streets, parks, and plazas on both public and private property be designed to maximize safety, comfort and aesthetics and connect to the citywide pedestrian, vehicular, and bicycle networks.

- CD-3.3 Complete and Connected Network. We require that pedestrian, vehicular, and bicycle circulation on both public and private property be coordinated to provide connections internally and externally to adjacent neighborhoods and properties (existing and planned) through a system of local roads and trails that promote walking and biking to nearby destinations (including existing and planned parks, commercial areas, and transit stops) and are designed to maximize safety, comfort, and aesthetics.

- CD-3.4 Context-Aware and Appropriate Design. We require appropriate building and site design that complements existing development, respects the intent and identity of the Place Type, and provides appropriate transitions and connections between adjacent uses to ensure compatibility of scale, maintain an appropriate level of privacy for each use, and minimize potential conflicts.

- CD-3.5 Active Frontages. We create lively pedestrian streetscapes by requiring primary building, business, and residential entrances, outdoor dining, and storefronts be located on ground floors adjacent to sidewalks or public spaces and designed to maximize safety, comfort, aesthetics, and the intended functionality (as defined by the Place Type).

- CD-3.6 Managed Infrastructure. We collaborate with developers and property owners to facilitate development that realizes the envisioned character and functionality of the Place Type through the use of green and shared infrastructure within each Place Type.

- Goal CD-5 Protection of Investment: A sustained level of maintenance and improvement of properties, buildings, and infrastructure that protects the property values and encourages additional public and private investments.

  - CD-5.1 Maintenance of Buildings and Property. We require all public and privately-owned buildings and property (including trails and easements) to be properly and consistently maintained.

  - CD-5.2 Maintenance of Infrastructure. We require the continual maintenance of infrastructure.

HOUSING ELEMENT COMPLIANCE: The Project is consistent with the Housing Element of the Policy Plan (general plan) component of The Ontario Plan, as the Project site is not one of the properties in the Housing Element Sites contained in Tables B-1 and B-2 (Housing Element Sites Inventory) of the Housing Element Technical Report.

ENVIRONMENTAL REVIEW: The Specific Plan is located in the City of Ontario in what was formerly the approximate 8,200-acre City of Ontario Sphere of Influence (SOI) area. On January 7, 1998, the City of Ontario adopted the New Model Colony ("NMC") General Plan Amendment, setting forth a comprehensive strategy for the future development of the SOI. The NMC is generally bordered by Riverside Drive to the north, Milliken Avenue to the east, Euclid Avenue to the west and Merrill Avenue to the south.

(1) The Ontario Plan Environmental Impact Report — On August 16, 2022, the City Council certified The Ontario Plan 2050 Update Supplemental Environmental Impact Report ("SEIR") (State Clearinghouse No. 2021070364), in conjunction with The Ontario Plan 2050 ("TOP 2050") (File No. PGPA20-002) General Plan update. The Ontario Plan (2050 Update) Supplemental EIR identified many areas that might have a potentially significant impact on the environment. These areas included: Aesthetics, Agriculture and Forestry Resources, Air Quality, Biological Resources, Cultural Resources, Energy, Geology and Soils, Greenhouse Gas Emissions, Hazards and Hazardous Materials, Hydrology and Water Quality, Land Use and Planning, Mineral Resources, Noise, Population and Housing, Public Services, Recreation, Transportation, Tribal Cultural Resources, Utilities and Service Systems, and Wildfire. Through the EIR process these potential impacts were analyzed, revisions were incorporated into the plan and/or mitigation measures were identified that reduced the potential environmental impacts to a level that was less than significant. Of the 20 areas analyzed by the SEIR, all but four of the impact areas were mitigated to a level of less than significant. The four remaining impact areas, even with the mitigation measures, could not be reduced to less than significant and the impacts would remain significant, unavoidable, and adverse after mitigation measures are applied. These areas include:

- Air Quality — Buildout of The Ontario Plan will cumulatively contribute to the nonattainment designations of the South Coast Air Basin ("SoCAB"), create short-term emissions from construction activities that exceed South Coast Air Quality Management District's (AQMD) regional significance thresholds and cumulatively

contribute to the nonattainment designations, generate long-term emissions that would exceed SCAQMD's regional significance thresholds and cumulatively contribute to the SoCAB nonattainment designations, and could expose sensitive receptors to substantial concentrations of toxic air contaminants ("TAC");

- Cultural Resources — Although protective regulations are in place and preservation policies are included in The Ontario Plan, implementation of the proposed Land Use Plan has the potential to impact Tier III historic resources. Major modification or demolition of Tier III resources may be appropriate under certain circumstances;

- Noise — Buildout of the Proposed Land Use Plan will result in impacts related to the proximity of construction activities to sensitive users, construction vibration impacts from individual development projects, and from excessive airport-related noise related impacts from traffic on local roadways and construction activities in the City. These activities will substantially increase noise levels and affect noise–sensitive uses; and

- Transportation — Total vehicle miles traveled ("VMT") would increase under the Proposed Land Use Plan due to increased residential development. Future development projects will need to consider transportation demand management ("TDM") measures consistent with the Mobility Element.

(2) Rich Haven Specific Plan (2022 Amendment) Environmental Impact Report — A EIR (State Clearinghouse No. 2022100425) was prepared for this Project, in accordance with CEQA requirements. Through the Notice of Preparation and scoping meeting discussion, the following areas of potential impact were identified and addressed:

- Air Quality;
- Biological Resources;
- Cultural Resources/Tribal Cultural Resources
- Energy;
- Geology and Soils;
- Greenhouse Gas Emissions;
- Hazards and Hazardous Materials;
- Hydrology and Water Quality;
- Land Use and Planning;
- Noise;
- Transportation;
- Utilities and Service Systems

The Rich Haven Specific Plan (2022 Amendment) EIR evaluates each of these areas and identifies mitigation measures and/or revisions to the plan to lessen the level of impact. With the implementation of the various mitigation measures, many of the potential adverse impacts can be reduced to a level of less than significant. Of the 12 areas considered by the EIR, all but two of the impact areas were mitigated to a level of less

than significant. The two remaining impact areas, even with the mitigation measures, could not be reduced to less than significant, resulting in some impacts remaining potentially significant and unavoidable. These areas include:

(a) Air Quality.

Impact AQ-1. The proposed Project would not be consistent with the applicable air quality plan. The proposed Project would result in an increase in the frequency or severity of existing air quality violations or cause or contribute to new violations or delay the timely attainment of air quality standards or the interim emissions reductions specified in the AQMP. Implementation of the Project construction-source emissions would exceed applicable SCAQMD regional thresholds for emissions of VOCs, NOx and CO. Implementation of the Project operational-source emissions would exceed the applicable SCAQMD regional thresholds for VOCs, NOx, CO, PM10, and PM2.5. Although, Mitigation Measures 4.3.1 through 4.3.18 would incrementally reduce Project operational source emissions, the Project operational-source emissions would remain significant and contribute to, new violations or delay the timely attainment of air quality standards or the interim emissions reductions specified in the AQMP. Therefore, the Project would be inconsistent with the AQMP, resulting in a significant and unavoidable impact despite the implementation of mitigation.

Impact AQ-2. Implementation of the proposed Project would result in a cumulatively considerable net increase of any criteria pollutant for which the Project region is non-attainment under an applicable federal [national] or state ambient air quality standard. The Basin encompassing the Project site is designated as non-attainment for ozone, PM10, and PM2.5. Project construction-source NOx emissions regional threshold exceedances; and operational-source VOC, NOx, PM10, and PM2.5 emissions regional threshold exceedances would result in a cumulatively considerable net increase in criteria pollutants (ozone and PM10/PM2.5) for which the Project region is non-attainment. Although Mitigation Measures 4.3.1 through 4.3.6 are applied the Project construction-source and operational-source emissions would still exceed criteria pollutant thresholds established by the SCAQMD. Therefore, the Project would result in a significant and unavoidable impact despite the implementation of mitigation.

(b) Greenhouse Gases.

Impact GHG-1. Implementation of the proposed Project would generate GHG emissions, either directly or indirectly, that may have a significant impact on the environment. Project construction and operations would result in direct and indirect emissions of CO2, CH4, and N2O. Direct Project-related GHG emissions include emissions from construction activities, area sources, and mobile sources, while indirect sources include emissions from electricity consumption, water demand, and solid waste generation. As shown in Table 4.4-5 (Annual Project GHG Emissions) of the Draft EIR, construction and operation of the Project would generate a total of approximately 129,314.95 MTCO2e/year, which would exceed the SCAQMD significance threshold of 3,000 MTCO2e/year.

The majority of the GHG emissions (approximately 72 percent unmitigated) are associated with non-construction related mobile sources. Responsibility and authority for regulation of vehicular-source emissions resides with the State of California (CARB, et al.). Neither the Applicant nor the Lead Agency can affect or mandate substantial reductions in vehicular-source GHG emissions, much less reductions that would achieve no net increase condition or achieve the SCAQMD 3,000 MTCO2e/year threshold. In effect, all Project traffic would need to be eliminated or be "zero GHG emissions sources" in order to achieve the SCAQMD threshold.

However, there are no feasible means to, or alternatives to eliminate all Project traffic, or to ensure that Project traffic would result in zero GHG emissions sources. In terms of its practical application, this would constitute a "no build" condition. Based on the preceding, even with the application of mitigation, the Project would generate GHG emissions, either directly or indirectly, that would have a significant impact on the environment. Therefore, even with the implementation of mitigation measures 4.3.2 through 4.3.18, this Project impact is conservatively considered significant and unavoidable.

The City of Ontario circulated the Draft EIR on February 24, 2023, through April 10, 2023, for public review. At the end of the public review period 6 comments were received. Areas of concern include air quality and environmental impacts associated with industrial development. Refer to the Final Environmental Impact Report, Response to Comments.

While these impacts will be significant and unavoidable, the Staff believes that the benefits of the Project outweigh the potential unavoidable, adverse impacts of the plan, as further described below:

- The Project will incorporate transitions and/or buffers between commercial/mixed-use and industrial areas and adjacent residential areas;

- The Project will contribute to the regional jobs to housing balance by providing employment opportunities while minimizing development impacts on surrounding neighborhoods;

- The Project will create a high-quality industrial park development that attracts an array of businesses and provides employment opportunities within proximity to area residents; and

- The Project will infrastructure improvements that will provide utilities, safe and efficient access/circulation routes for the distribution/transportation of goods;

As a result, Staff recommends that the Planning Commission forward a recommendation to the City Council to adopt a Statement of Overriding Considerations for those impacts that could not be fully mitigated to a level of less than significant.

Furthermore, to ensure that the mitigation measures are implemented, a Mitigation Monitoring and Reporting Program has been prepared for the Project pursuant to CEQA Guidelines Section 15097, which specifies responsible agencies/departments, monitoring frequency, timing and method of verification and possible sanctions for non-compliance with mitigation measures. The environmental documentation for this project is available for public review at the Planning Department public counter.

TECHNICAL APPENDIX:

Surrounding Zoning and Land Use:

	Existing Land Use	***Policy Plan Designation***	***Zoning Designation***	***Specific Plan Land Use***
Site	SCE Easements, agricultural and dairy farms, vacant land, and residential subdivisions	Open Space – Non-Recreation, Open Space Recreation, Low Density Residential (2.1 – 5 du/ac), Low Medium Density Residential (5.1 – 11 du/ac), Medium Density Residential (11.1 – 25 du/ac), Industrial, General Commercial and Mixed Use – Rich Haven	Rich-Haven Specific Plan	See Rich Haven Specific Plan Land Use Plan
North	Open Space (Creekside Flood Control), Colony High School and SCE Mira Loma Substation	Open Space – Non-Recreation, Public School and Business Park	Creekside Specific Plan, Civic and Specific Plan Agricultural Overlay Zoning District	Recreational Open Space
South	Previous agricultural and dairy farms	Medium Density Residential (11.1 – 25 du/ac)	Esperanza Specific Plan and Specific Plan Agricultural Overlay Zoning District	Residential (PA1 and PA3)
East	Colony High School, Edenglen Residential Subdivision, SCE Mira Loma Substation and City of Eastvale	Medium Density Residential (11.1 – 25 du/ac), Business Park and Public School	Edenglen Specific Plan, Civic and Specific Plan Agricultural Overlay Zoning District	Residential (PA3, and PA8)
West	West Haven and The Avenue residential subdivisions, agricultural and dairy farms	Low Density Residential (2.1 – 5 du/ac), Low Medium Density Residential (5.1 – 11 du/ac), Medium Density Residential (11.1 – 25 du/ac), Neighborhood Commercial and Public School	West Haven Specific Plan and The Avenue Specific Plan	West Haven Specific Plan (PA1, 2, 3, 4, 5 and 8) and The Avenue Specific Plan (Retail/Commercial, Low Density Residential and Medium Density Residential)

RESOLUTION NO. PC23-042

A RESOLUTION OF THE PLANNING COMMISSION OF THE CITY OF ONTARIO RECOMMENDING THE CITY COUNCIL CERTIFY THE PROJECT ENVIRONMENTAL IMPACT REPORT (STATE CLEARINGHOUSE NO. 2022100425) AND ADOPT FINDINGS OF OVERRIDING CONSIDERATIONS AND A MITIGATION MONITORING AND REPORTING PROGRAM FOR FILE NO. PSPA22-001, THE RICH HAVEN SPECIFIC PLAN AMENDMENT, LOCATED WITHIN ONTARIO RANCH AND GENERALLY BOUNDED BY RIVERSIDE DRIVE, COLONY HIGH SCHOOL AND THE SCE MIRA LOMA SUBSTATION TO THE NORTH, HAMNER AVENUE/MILL CREEK AVENUE TO THE EAST, OLD EDISON AVENUE TO THE SOUTH, AND HAVEN AVENUE TO THE WEST AND MAKE FINDINGS IN SUPPORT THEREOF—APNS: 218-161-14, 218-016-06, 218-016-10, 218-016-11, 218-016-19, 218-016-15, 218-016-07, 218-016-18, 218-203-08, 218-016-14, 218-016-12, 218-016-13, 218-203-07, 218-203-04, 218-203-03, 218-203-05, 218-203-06, 218-211-39, 218-211-01, 218-211-21, 218-211-36, 218-211-37 and 218-211-15.

WHEREAS, RICHLAND DEVELOPERS, INC AND BROOKCAL ONTARIO, LLC (hereinafter referred to as "Applicant") has filed an Application for the approval of a Specific Plan Amendment, File No. PSPA22-001, for which an Environmental Impact Report (“EIR”) has been prepared, as described in the title of this Resolution (hereinafter referred to as "Application" or "Project"); and

WHEREAS, the Project EIR, Statement of Overriding Considerations, and Mitigation Monitoring and Reporting Program for File No. PSPA22-001, the Rich Haven Specific Plan Amendment, have been prepared in accordance with the California Environmental Quality Act (“CEQA”), the State CEQA Guidelines, and the City of Ontario Guidelines for implementation of CEQA; and

WHEREAS, the EIR has been prepared to address the environmental effects of a Specific Plan Amendment (Rich Haven) to bring the Specific Plan into compliance with The Ontario Plan Policy Plan (General Plan) land use plan for 584.9 acres of land within Ontario Ranch, generally bounded by Riverside Drive, Colony High School and the SCE Mira Loma Substation to the north, Hamner Avenue/Mill Creek Avenue to the east, Old Edison Avenue to the south, and Haven Avenue to the west.

WHEREAS, the EIR consists of the Draft EIR and the comments and responses to comments made on the Draft EIR; and

WHEREAS, the EIR for File No. PSPA22-001 was circulated for a 45-day public review period and a notice of its availability was published in a local newspaper and posted in the Office of the Clerk of the Board of Supervisors of San Bernardino County; and

WHEREAS, a public notification was posted on the Project site for minimum of 20 days prior to the Planning Commission public hearing. The signs shall be removed within fourteen days of the Project's final approval by City Council; and

WHEREAS, copies of the EIR were distributed to the Planning Commission, City departments, and federal, state, regional, local, and other agencies, and individuals; and

WHEREAS, on May 23, 2023, the Planning Commission of the City of Ontario conducted a duly noticed public hearing on the EIR at which time all persons wishing to testify were heard and the EIR was fully studied; and

WHEREAS, all other legal prerequisites to the adoption of this Resolution have occurred.

NOW, THEREFORE, IT IS HEREBY FOUND, DETERMINED, AND RESOLVED by the Planning Commission of the City of Ontario, as follows:

SECTION 1: ***Environmental Determination and Findings.*** As the recommending authority for the Project, the Planning Commission has reviewed and considered the information contained in the Environmental Impact Report (EIR) and supporting documentation. Based upon the facts and information contained in the EIR (SCH# 2022100425) and supporting documentation, the Planning Commission recommends that the City Council make the following findings:

(1) The EIR contains a complete and accurate reporting of the environmental impacts associated with the Project; and

(2) The EIR was completed in compliance with CEQA and the Guidelines promulgated thereunder; and

(3) The EIR reflects the independent judgment of the City Council; and

SECTION 2: ***Planning Commission Action.*** Based upon the substantial evidence presented to the Planning Commission during the above-referenced hearing and upon the specific findings set forth in Section 1 above, the Planning Commission recommends that the City Council make the following findings:

(1) The Project EIR analyzed the environmental impacts-associated with the implementation of the Rich Haven Specific Plan, and finds that, if the Specific Plan is adopted and development occurs as proposed by this plan, and with implementation of proposed mitigation measures, the following impacts will still be significant and unavoidable:

(a) Air Quality – Impacts related to a net increase in criteria pollutants would remain significant and unavoidable with the implementation of recommended mitigation measures; and

(b) Greenhouse Gas Emissions – Project-specific impacts and cumulative impacts would remain significant and unavoidable.

SECTION 3: ***Recommendation.*** Based upon the findings and conclusions set forth in Sections 1 and 2 above, the Planning Commission hereby recommends that the City Council certify the Project EIR, adopt a Statement of Overriding Considerations, and that the associated Mitigation Monitoring Program also be approved by the City Council.

SECTION 4: ***Indemnification.*** The Applicant shall agree to defend, indemnify and hold harmless, the City of Ontario or its agents, officers, and employees from any claim, action or proceeding against the City of Ontario or its agents, officers or employees to attack, set aside, void, or annul this approval. The City of Ontario shall promptly notify the applicant of any such claim, action, or proceeding, and the City of Ontario shall cooperate fully in the defense.

SECTION 5: ***Custodian of Records.*** The documents and materials that constitute the record of proceedings on which these findings have been based are located at the City of Ontario City Hall, 303 East “B” Street, Ontario, California 91764. The custodian for these records is the City Clerk of the City of Ontario.

SECTION 6: ***Certification to Adoption.*** The Secretary shall certify to the adoption of the Resolution.

- - - - - - - - - - - - - -

The Secretary Pro Tempore for the Planning Commission of the City of Ontario shall certify as to the adoption of this Resolution.

I hereby certify that the foregoing Resolution was duly and regularly introduced, passed and adopted by the Planning Commission of the City of Ontario at a regular meeting thereof held on the 23rd day of May 2023, and the foregoing is a full, true and correct copy of said Resolution, and has not been amended or repealed.

Richard Gage
Planning Commission Vice-Chairperson

ATTEST:

Rudy Zeledon
Community Development Assistant Director
and Secretary to the Planning Commission

STATE OF CALIFORNIA)
COUNTY OF SAN BERNARDINO)
CITY OF ONTARIO)

I, Gwen Berendsen, Secretary Pro Tempore of the Planning Commission of the City of Ontario, DO HEREBY CERTIFY that foregoing Resolution No. PC23-042, was duly passed and adopted by the Planning Commission of the City of Ontario at their regular meeting held on May 23, 2023, by the following roll call vote, to wit:

AYES: Anderson, Dean, Gage, Ricci

NOES: None

ABSENT: DeDiemar, Lampkin

ABSTAIN: None

Gwen Berendsen
Secretary Pro Tempore

Draft Environmental Impact Report and Appendices

(Draft Environmental Impact Report and Appendices to follow this page)

The EIR and Appendices
are included in the
City Council Resolution

RESOLUTION NO. PC23-043

A RESOLUTION OF THE PLANNING COMMISSION OF THE CITY OF ONTARIO, CALIFORNIA, RECOMMENDING THE CITY COUNCIL APPROVE FILE NO. PSPA22-001, AN AMENDMENT TO THE RICH-HAVEN SPECIFIC PLAN TO BRING THE SPECIFIC PLAN INTO COMPLIANCE WITH THE ONTARIO PLAN POLICY PLAN (GENERAL PLAN) LAND USE PLAN THAT INCLUDE: [1] THE REDUCTION OF LOW-MEDIUM DENSITY RESIDENTIAL LAND USE ACREAGE FROM 102.1 ACRES TO 24.5 ACRES; [2] INCREASE THE MEDIUM DENSITY RESIDENTIAL LAND USE ACREAGE FROM 96.7 ACRES TO 113.4 ACRES; [3] INCREASE THE LIGHT INDUSTRIAL LAND USE ACREAGE FROM 49.4 ACRES TO 116.5 ACRES; [4] A REDUCTION TO THE MIXED-USE OVERLAY LAND USE ACREAGE FROM 29.4 ACRES TO 20.5 ACRES; [5] A REDUCTION TO THE REGIONAL COMMERCIAL LAND USE ACREAGE FROM 74 ACRES TO 58.4 ACRES; [6] INCREASE THE MIXED-USE STANDALONE RESIDENTIAL OVERLAY LAND USE ACREAGE FROM 141.9 ACRES TO 144.1 ACRES; [7] INCREASE THE OPEN SPACE – NON-RECREATION LAND USE ACREAGE FROM 38.2 ACRES TO 55 ACRES; AND [8] VARIOUS CHANGES TO THE SPECIFIC PLAN LAND USE MAP (PLANNING AREAS), DEVELOPMENT STANDARDS, EXHIBITS, AND TEXT MODIFICATION, TO REFLECT THE PROPOSED LAND USES, GENERALLY LOCATED BY RIVERSIDE DRIVE, COLONY HIGH SCHOOL AND THE SCE SUBSTATION TO THE NORTH, HAMNER AVENUE/MILL CREEK AVENUE TO THE EAST, OLD EDISON AVENUE TO THE SOUTH, AND HAVEN AVENUE TO THE WEST, AND MAKING FINDINGS IN SUPPORT THEREOF—APNS: 218-161-14, 218-016-06, 218-016-10, 218-016-11, 218-016-19, 218-016-15, 218-016-07, 218-016-18, 218-203-08, 218-016-14, 218-016-12, 218-016-13, 218-203-07, 218-203-04, 218-203-03, 218-203-05, 218-203-06, 218-211-39, 218-211-01, 218-211-21, 218-211-36, 218-211-37 AND 218-211-15.

WHEREAS, RICHLAND DEVELOPERS, INC AND BROOKCAL ONTARIO, LLC ("Applicant") has filed an Application for the approval of a Specific Plan Amendment (SPA), File No. PSPA22-001, as described in the title of this Resolution (hereinafter referred to as "Application" or "Project")

WHEREAS, the Application applies to nine properties totaling 584.9 gross acres of land located within the Rich-Haven Specific Plan, which is generally bounded by Riverside Drive, Colony High School and the SCE substation to the north, Hamner Avenue/Mill Creek Avenue to the east, Old Edison Road to the south, and Haven Avenue to the west. The Rich-Haven Specific Plan is presently improved with a combination of SCE Easements, vacant agricultural and dairy farms, and residential subdivisions; and

WHEREAS, the properties to the north of the Rich-Haven Specific Plan are within the Creekside Specific Plan, Civic and Specific Plan Agricultural Overlay Zoning District, and are developed with a flood control channel, Colony High School, and the SCE Mira Loma Substation. The properties to the east are within the Edenglen Specific Plan, Civic and the Specific Plan Agricultural Overlay Zoning District, and are developed with Colony High School, a Residential Subdivision, the SCE Mira Loma Substation and industrial warehouse and commercial uses within the City of Eastvale. The properties to the south are within the Esperanza Specific Plan and the Specific Plan Agricultural Overlay Zoning District and are developed with agricultural and dairy farms. The properties to the west are within the West Haven Specific Plan and the Avenue Specific Plan and are developed with residential subdivisions and commercial land uses; and

WHEREAS, to achieve consistency with the TOP 2050 Official Land Use Plan (Figure LU-01), the SPA proposes to amend the following land uses:

(1) Change 61.5 acres of Low Medium Density Residential (5.1 – 12 du/ac) to 16.7 acres of Medium Density Residential (11.1- 25 du/ac) and 44.8 acres of Light Industrial; and

(2) Change 17.3 acres of Mixed-Use Stand-Alone Residential Overlay and 5 acres of Mixed-Use Overlay to 22.3 acres of Light Industrial; and

WHEREAS, the new industrial land use designation was established by TOP to create a land use buffer between the SCE Mira Loma Substation and existing/future residential development; and

WHEREAS, the SPA includes the restructuring of planning areas that would reduce the number of subareas to align with the proposed land uses; and

WHEREAS, the proposed Planning Areas 2C, 3C and 5A are located adjacent to Residential Planning areas. To minimize impacts from future industrial development to the adjacent residential land uses the SPA included additional industrial design standards and setback requirements; and

WHEREAS, the SPA included minimum industrial building and landscape setback requirements for interior property lines common with residential land uses. A minimum 100-foot building setback is required from a residential property line that includes a 40-foot landscape setback to allow for the installation of a double row of trees. Also, a 10-foot landscape setback is required between the building and drive-aisle. The landscape setbacks will allow for the planting of multiple rows of trees between the residential properties and any proposed industrial building. The objective is to create an urban forest within the required landscaped setback areas and plant large evergreen trees to provide the maximum amount of screening year-round; and

WHEREAS, the SPA includes separate industrial design standards that include orienting truck courts away from residential areas to minimize noise impacts; enhanced second story elevations facing residential; and limiting vehicular activity and evening hours of operation on drive aisles adjacent to residential land uses; and

WHEREAS, the SPA proposes to reduce the existing residential acreage by 77.8 acres. To maintain the total number of existing 7,194 residential dwelling units allocated within the Rich Haven Specific Plan the amendment will reassign units to different Planning Areas; and

WHEREAS, the SPA includes updates to the light industrial development standards and land use matrix, updates to the existing residential and mixed-use development standards and land use matrix, updates to various exhibits reflecting the restructuring of planning areas, along with text/map changes to reflect the proposed land use designation changes. All changes and additions to the Specific Plan (exhibits, tables, and development standards) are contained within the revised Specific Plan document, and are highlighted in red; and

WHEREAS, the Rich Haven Specific Plan has been prepared in conformance with the goals and policies of the City of Ontario Policy Plan (General Plan). Section 9 of the Specific Plan, “General Plan Consistency”, describes the manner in which the Rich Haven Specific Plan complies with the Policy Plan goals and policies applicable to the Rich Haven Specific Plan; and

WHEREAS, an Environmental Impact Report (“EIR”) (State Clearinghouse No. 2022100425), including the adoption of a Mitigation Monitoring and Reporting Program and a Statement of Overriding Consideration have been prepared in accord with the California Environmental Quality (CEQA), the State CEQA Guidelines and the City of Ontario Guidelines to address the environmental effects of the Specific Plan Amendment; and

WHEREAS, Ontario Development Code Table 2.02-1 (Review Matrix) grants the Planning Commission the responsibility and authority to review and make recommendation to the City Council on the subject Application; and

WHEREAS, the Project has been reviewed for consistency with the Housing Element of the Policy Plan component of The Ontario Plan, as State Housing Element law (as prescribed in Government Code Sections 65580 through 65589.8) requires that development projects must be consistent with the Housing Element, if upon consideration of all its aspects, it is found to further the purposes, principals, goals, and policies of the Housing Element; and

WHEREAS, the Project is located within the Airport Influence Area of Ontario International Airport, which encompasses lands within parts of San Bernardino, Riverside, and Los Angeles Counties, and is subject to, and must be consistent with, the policies and criteria set forth in the Ontario International Airport Land Use Compatibility Plan (hereinafter referred to as "ALUCP"), which applies only to jurisdictions within San Bernardino County, and addresses the noise, safety, airspace protection, and overflight impacts of current and future airport activity; and

WHEREAS, City of Ontario Development Code Division 2.03 (Public Hearings) prescribes the manner in which public notification shall be provided and hearing procedures to be followed, and all such notifications and procedures have been completed; and

WHEREAS, on May 23, 2023, the Planning Commission of the City of Ontario conducted a hearing to consider the Project, and concluded said hearing on that date; and

WHEREAS, all legal prerequisites to the adoption of this Resolution have occurred.

NOW, THEREFORE, IT IS HEREBY FOUND, DETERMINED, AND RESOLVED by the Planning Commission of the City of Ontario, as follows:

SECTION 1: ***Environmental Determination and Findings.*** As the recommending authority for the Project, the Planning Commission has reviewed and considered the information contained in the Environmental Impact Report ("EIR") and supporting documentation. Based upon the facts and information contained in the EIR (SCH# 2022100425) and supporting documentation, the Planning Commission recommends that the City Council make the following findings:

(1) The EIR contains a complete and accurate reporting of the environmental impacts associated with the Project; and

(2) The EIR was completed in compliance with CEQA and the Guidelines promulgated thereunder; and

(3) The EIR reflects the independent judgment of the City Council; and

SECTION 2: ***Planning Commission Action.*** Based upon the substantial evidence presented to the Planning Commission during the above-referenced hearing and upon the specific findings set forth in Section 1 above, the Planning Commission recommends that the City Council make the following findings:

(1) The Project EIR analyzed the environmental impacts associated with the implementation of the Rich Haven Specific Plan Amendment, and finds that, if the Specific Plan Amendment is adopted and development occurs as proposed by this plan, and with implementation of proposed mitigation measures, the following impacts will still be significant and unavoidable:

(a) Air Quality – Impacts related to a net increase in criteria pollutants would remain significant and unavoidable with the implementation of recommended mitigation measures; and

(b) Greenhouse Gas Emissions – Project-specific impacts and cumulative impacts would remain significant and unavoidable.

SECTION 3: ***Housing Element Compliance.*** Pursuant to the requirements of California Government Code Chapter 3, Article 10.6, commencing with Section 65580, as the recommending authority for the Project, the Planning Commission finds that based on the facts and information contained in the Application and supporting documentation, at the time of Project implementation, the Project is consistent with the Housing Element of the Policy Plan (General Plan) component of The Ontario Plan, as the project site is not one of the properties in the Housing Element Sites Inventory contained in Tables B-1 and B-2 of the Housing Element Technical Report.

SECTION 4: ***Airport Land Use Compatibility Plan ("ALUCP") Compliance.*** The California State Aeronautics Act (Public Utilities Code Section 21670 et seq.) requires that an Airport Land Use Compatibility Plan be prepared for all public use airports in the State; and requires that local land use plans and individual development proposals must be consistent with the policies set forth in the adopted Airport Land Use Compatibility Plan.

(1) On April 19, 2011, the City Council of the City of Ontario approved and adopted the Ontario International Airport Land use Compatibility Plan, establishing the Airport Influence Area for Ontario International Airport, which encompasses lands within parts of San Bernardino, Riverside, and Los Angeles Counties, and limits future land uses and development within the Airport Influence Area, as they relate to noise, safety, airspace protection, and overflight impacts of current and future airport activity. As the recommending authority for the Project, the Planning Commission has reviewed and considered the facts and information contained in the Application and supporting documentation against the ONT ALUCP compatibility factors, including [1] Safety Criteria (ONT ALUCP Table 2-2) and Safety Zones (ONT ALUCP Map 2-2), [2] Noise Criteria (ONT ALUCP Table 2-3) and Noise Impact Zones (ONT ALUCP Map 2-3), [3] Airspace protection Zones (ONT ALUCP Map 2-4), and [4] Overflight Notification Zones (ONT ALUCP Map 2-5). As a result, the PLANNING COMMISSION, therefore,

finds and determines that the Project, is consistent with the policies and criteria set forth within the ONT ALUCP; and

SECTION 5: ***Concluding Facts and Reasons.*** Based upon the substantial evidence presented to the Planning Commission during the above-referenced hearing, and upon the specific findings set forth in Section 1 through 4, above, the Planning Commission hereby concludes as follows:

(1) ***The proposed Specific Plan, or amendment thereto, is consistent with the goals, policies, plans and exhibits of the Vision, Policy Plan (General Plan), and City Council Priorities components of The Ontario Plan.*** The proposed Rich-Haven Specific Plan amendment will provide land use consistency with The Ontario Plan Policy Plan (General Plan). The proposed amendments will accommodate the construction of future residential, industrial, and commercial developments and eliminate sensitive land uses within the southeast portion of the Rich-Haven Specific Plan which is consistent with goals, policies, plans and City Council priorities of The Ontario Plan.

(2) ***The proposed Specific Plan, or amendment thereto, would not be detrimental to the public interest, health, safety, convenience, or general welfare of the City.*** The proposed Rich-Haven Specific Plan amendment will provide land use consistency with The Ontario Plan Policy Plan (General Plan). The proposed Specific Plan Amendment will not be detrimental to the public interest, health, safety, convenience, or general welfare of the City. The land use changes will provide a combination of residential, mixed-use, commercial, and light industrial uses within the Rich-Haven Specific Plan, which is consistent with the type and intensity of development specified in The Ontario Plan.

(3) ***In the case of an application affecting specific property(ies), the proposed Specific Plan, or amendment thereto, will not adversely affect the harmonious relationship with adjacent properties and land uses.*** The proposed amendments will accommodate the construction of future residential, industrial, and commercial developments. The amendment will also eliminate residential sensitive land uses within the southeast portion of the Rich-Haven Specific Plan and establish a light industrial land use buffer between residential land uses and the existing SCE Mira Loma Substation in order to establish a harmonious relationship between the existing surrounding land uses and planned uses within the southeast quadrant of the specific plan.

(4) ***In the case of an application affecting specific property(ies), the subject site is physically suitable, including, but not limited to, parcel size, shape, access, and availability of utilities, for the request and anticipated development.*** The subject site is physically suitable to accommodate future residential, commercial, mixed use and light industrial land uses. The Rich-Haven Specific Plan amendment

includes development standards to facilitate the proposed land uses, which will be developed with adequate lot sizes, access, and utilities to serve the project site.

SECTION 6: ***Planning Commission Action.*** Based upon the findings and conclusions set forth in Sections 1 through 5, above, the Planning Commission hereby RECOMMENDS THE CITY COUNCIL APPROVE the herein described Application, subject to each and every condition set forth in the Department reports attached hereto as "Attachment A," and incorporated herein by this reference.

SECTION 7: ***Indemnification.*** The Applicant shall agree to defend, indemnify and hold harmless, the City of Ontario or its agents, officers, and employees from any claim, action or proceeding against the City of Ontario or its agents, officers or employees to attack, set aside, void, or annul this approval. The City of Ontario shall promptly notify the applicant of any such claim, action, or proceeding, and the City of Ontario shall cooperate fully in the defense.

SECTION 8: ***Custodian of Records.*** The documents and materials that constitute the record of proceedings on which these findings have been based are located at the City of Ontario City Hall, 303 East "B" Street, Ontario, California 91764. The custodian for these records is the City Clerk of the City of Ontario.

SECTION 9: ***Certification to Adoption.*** The Secretary shall certify to the adoption of the Resolution.

- - - - - - - - - - - - - -

The Secretary Pro Tempore for the Planning Commission of the City of Ontario shall certify as to the adoption of this Resolution.

I hereby certify that the foregoing Resolution was duly and regularly introduced, passed and adopted by the Planning Commission of the City of Ontario at a regular meeting thereof held on the 23rd day of May 2023, and the foregoing is a full, true and correct copy of said Resolution, and has not been amended or repealed.

Richard Gage
Planning Commission Vice-Chairperson

ATTEST:

Rudy Zeledon
Community Development Assistant Director and Secretary to the Planning Commission

STATE OF CALIFORNIA)
COUNTY OF SAN BERNARDINO)
CITY OF ONTARIO)

I, Gwen Berendsen, Secretary Pro Tempore of the Planning Commission of the City of Ontario, DO HEREBY CERTIFY that foregoing Resolution No. PC23-043, was duly passed and adopted by the Planning Commission of the City of Ontario at their regular meeting held on May 23, 2023, by the following roll call vote, to wit:

AYES: Anderson, Dean, Gage, Ricci

NOES: None

ABSENT: DeDiemar, Lampkin

ABSTAIN: None

Gwen Berendsen
Secretary Pro Tempore

Rich Haven Specific Plan Document

(Rich Haven Specific Plan follows this page)

The Rich Haven Specific Plan is attached to the City Council Resolution

RESOLUTION NO.

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF ONTARIO, ADOPTING ENVIRONMENTAL FINDINGS PURSUANT TO THE CALIFORNIA ENVIRONMENTAL QUALITY ACT AND CERTIFYING THE RICH-HAVEN SPECIFIC PLAN, 2022 AMENDMENT (FILE NO. PSPA22-001) FINAL ENVIRONMENTAL IMPACT REPORT (STATE CLEARINGHOUSE NO. 2022100425), AND ADOPTING FINDINGS OF OVERRIDING CONSIDERATIONS AND A MITIGATION MONITORING AND REPORTING PROGRAM, AND APPROVING THE PROJECT.

WHEREAS, RICHLAND DEVELOPERS, INC AND BROOKCAL ONTARIO, LLC ("Applicant") has filed an Application for the approval of a Specific Plan Amendment (SPA), File No. PSPA22-001 to develop the ("Project") with up to 7,194 dwelling units, up to 925,002 square feet of commercial space, and up to 2,767,148 square feet of light industrial uses on an 584.9 gross acres in the southern portion of the City of Ontario; and

WHEREAS, the Application applies to 584.9 gross acres of land located within the Rich-Haven Specific Plan, which is generally bounded by Riverside Drive, Colony High School and the SCE substation to the north, Hamner Avenue/Mill Creek Avenue to the east, Old Edison Road to the south, and Haven Avenue to the west. The Rich-Haven Specific Plan is presently improved with a combination of SCE Easements, vacant agricultural and dairy farms, and residential subdivisions; and

WHEREAS, the properties to the north of the Rich-Haven Specific Plan are within the Creekside Specific Plan, Civic and Specific Plan Agricultural Overlay Zoning District, and are developed with a flood control channel, Colony High School, and the SCE Mira Loma Substation. The properties to the east are within the Edenglen Specific Plan, Civic and the Specific Plan Agricultural Overlay Zoning District, and are developed with Colony High School, a Residential Subdivision, the SCE Mira Loma Substation and industrial warehouse and commercial uses within the City of Eastvale. The properties to the south are within the Esperanza Specific Plan and the Specific Plan Agricultural Overlay Zoning District and are developed with agricultural and dairy farms. The properties to the west are within the West Haven Specific Plan and the Avenue Specific Plan and are developed with residential subdivisions and commercial land uses; and

WHEREAS, the City prepared The Ontario Plan Final Environmental Impact Report ("TOP EIR") (State Clearinghouse No. 2008101140) in association with the 2009 General Plan Update ("GPA") and certified the TOP EIR on January 26, 2010; and

WHERAS, the City certified the Program Supplemental Environmental Impact Report ("Supplemental EIR", State Clearinghouse No. 2021070364) for The Ontario Plan 2050 Technical Update, in association of the General Plan Update, File No. PGPA20-002, and certified the Supplemental EIR on August 16, 2022; and

WHEREAS, the TOP EIR is a Program EIR from which later specific plan EIRs, such as the EIR for this Project, are tiered; and

WHEREAS, the City of Ontario is the lead agency on the Project, and the City Council is the approving authority for the proposed approval to construct and otherwise undertake the Project; and

WHEREAS, in accordance with State CEQA Guidelines section 15063, the City evaluated the Project by preparing an Initial Study, to evaluate whether an Environmental Impact Report ("EIR") was required; and

WHEREAS, based on the Initial Study, the City determined that an EIR should be prepared because the Project may have a significant effect on the environment in the following areas: Air Quality; Biological Resources; Cultural/Tribal Resources; Energy; Geology and Soils; Greenhouse Gas Emissions; Hazards/Hazardous Materials; Hydrology/Water Quality; Land Use and Planning; Noise; Transportation; and Utilities and Service Systems; and

WHEREAS, based on the Initial Study, the City further determined that impacts to Aesthetics; Agriculture and Forest Resources; Mineral Resources; Population and Housing; Public Services; Recreation and Wildfire would be less than significant and thus need not be analyzed further in the EIR; and

WHEREAS, in accordance with State CEQA Guidelines section 15082, the City originally issued a Notice of Preparation ("NOP") for the Rich-Haven Specific Plan, 2022 Amendment for which the public review period extended from October 17, 2022, through November 15, 2022. The NOP was published in the Inland Valley Daily Bulletin, a newspaper of general circulation in the Project area; and

WHEREAS, the City received seven comment letters from multiple agencies on the NOP; and

WHEREAS, pursuant to Public Resources Code (PRC) §21083.9 and State California Environmental Quality Act (CEQA) Guidelines §15082(c) and 15083, a public scoping meeting was held on October 27, 2022, where comments were received; and

WHEREAS, a Draft Environmental Impact Report ("Draft EIR") was prepared, incorporating comments received in response to the NOP; and

WHEREAS, the Draft EIR determined that mitigation measures were required to mitigate impacts to a less than significant level for biological resources, cultural resources, geology and soils, hazards and hazardous materials, hydrology and water quality, noise, tribal cultural resources; and

WHEREAS, the Draft EIR further concluded that despite the incorporation of all feasible mitigation measures, the proposed Project would nonetheless result in significant and unavoidable impacts relating to air quality and greenhouse gas emissions; and

WHEREAS, in accordance with State CEQA Guidelines section 15085, a Notice of Completion was prepared and filed with the Office of Planning and Research on February 23, 2023; and

WHEREAS, after completing the Draft EIR (State Clearinghouse No. 2022100425), the City released the document for public review for a 45-day public comment period, beginning February 24, 2023 and concluding April 10, 2023. A Notice of Availability ("NOA") was circulated along with the Draft EIR and was published in the Inland Valley Daily Bulletin and posted in the Office of the Clerk of the Board of Supervisors of San Bernardino County. At that time, the City also provided a Notice of Availability to all organizations and individuals who had previously requested such notice; and

WHEREAS, copies of the Draft EIR were distributed to the Planning Commission, City departments, and federal, state, regional, local, and other agencies, and individuals; and

WHEREAS, during the 45-day comment period on the Draft EIR, the City consulted with and requested comments from all responsible and trustee agencies, other regulatory agencies and others pursuant to State CEQA Guidelines §15086; and

WHEREAS, the City received six written comment letters on the Draft EIR, all of which the City responded to in the Final EIR; and

WHEREAS, pursuant to PRC §21092.5, the City provided copies of its responses to commenting public agencies at least ten days prior to the City's consideration of the Final EIR on June 20, 2023; and

WHEREAS, on May 23, 2022, the Planning Commission of the City of Ontario conducted a duly noticed special public hearing on the Draft EIR at which time all persons wishing to testify were heard and the EIR was fully studied and concluded said hearing on that date. After considering all public testimony, the Planning Commission issued Resolution No. PC23-042, recommending City Council certification of the Project EIR; and

WHEREAS, six written public comments were received prior to the Planning Commission hearing and several people spoke on the project at said hearing; and

WHEREAS, June 8, 2023, the City released the Final EIR, which consists of the Draft EIR, all technical appendices prepared in support of the Draft EIR, all written comment letters received on the Draft EIR, and written responses to all written comment letters received on the Draft EIR; and

WHEREAS, the "EIR" consists of the Final EIR and its attachments and appendices, as well as the Draft EIR and its attachments and appendices (as modified by the Final EIR); and

WHEREAS, the City provided a Notice of Public Hearing and/or Intent to Certify a Environmental Impact Report to all organizations and individuals who had previously requested such notice, and published the Notice of Public Hearing, in the Inland Valley Daily Bulletin, a newspaper of general circulation in the Project area; and

WHEREAS, all potential significant adverse environmental impacts were sufficiently analyzed in the Final EIR; and

WHEREAS, as contained herein, the City has endeavored in good faith to set forth the basis for its decision on the Project; and

WHEREAS, all the requirements of CEQA, the State CEQA Guidelines, and the City's Local Guidelines have been satisfied by the City in the EIR, which is sufficiently detailed so that all of the potentially significant environmental effects of the Project have been adequately evaluated; and

WHEREAS, the EIR prepared in connection with the Project sufficiently analyzes both the feasible mitigation measures necessary to avoid or substantially lessen the Project's potential environmental impacts and a range of feasible alternatives capable of eliminating or reducing these effects in accordance with CEQA, the State CEQA Guidelines and the City's Local Guidelines; and

WHEREAS, all of the findings and conclusions made by the City Council pursuant to this Resolution are based upon all oral and written evidence presented to it as a whole and are not based solely on the information provided in this Resolution; and

WHEREAS, environmental impacts identified in the EIR which the City finds are less than significant and do not require mitigation are described in Section IV, B hereof; and

WHEREAS, environmental impacts identified in the EIR as potentially significant but which the City finds can be mitigated to a level of less than significant, through the imposition of feasible mitigation measures identified in the EIR and set forth herein and in the Mitigation Monitoring and Reporting Plan, attached hereto as Exhibit A, are described in Section IV, C hereof; and

WHEREAS, environmental impacts identified in the EIR as potentially significant and which the City finds cannot be fully mitigated to a level of less than significant, despite the imposition of all feasible mitigation measures identified in the Final EIR and set forth herein, are described in Section IV, D hereof; and

WHEREAS, the cumulative impacts of the Project identified in the EIR and set forth herein, are described in Section IV, E hereof; and

WHEREAS, alternatives to the Project that might eliminate or reduce significant environmental impacts are described in Section IV, F hereof; and

WHEREAS, the existence of any growth-inducing impacts and significant and irreversible environmental changes resulting from the proposed Project identified in the EIR and set forth herein, are described in Section IV, G hereof; and

WHEREAS, because some environmental impacts identified in the EIR as potentially significant cannot be fully mitigated to a level of less than significant, despite

the imposition of all feasible mitigation measures identified in the EIR and set forth herein, the City Council has balanced the economic, legal, social, technological, and other benefits of the Project against its significant and unavoidable impacts, and has determined that the benefits of the Project outweigh the unavoidable adverse impacts, and therefore, render those impacts "acceptable." The City Council has documented its determination regarding significant and unavoidable impacts in the Statement of Overriding Considerations in Section V hereof; and

WHEREAS, prior to taking action, the City Council has heard, been presented with, reviewed and considered all of the information and data in the administrative record, including the EIR, and all oral and written evidence presented to it during all meetings and hearings on the Project; and

WHEREAS, the EIR reflects the independent judgment of the City Council and is deemed adequate for purposes of making decisions on the merits of the Project; and

WHEREAS, no comments made in the public hearings conducted by the City, or any additional information submitted to the City, have produced substantial new information requiring recirculation or additional environmental review under State CEQA Guidelines section 15088.5; and

WHEREAS, on June 20, 2023, the City Council of the City of Ontario conducted a hearing on the Project and concluded said hearing on that date; and

WHEREAS, all other legal prerequisites to the adoption of this Resolution have occurred.

NOW, THEREFORE, IT IS HEREBY FOUND, DETERMINED, AND RESOLVED by the City Council of the City of Ontario, as follows:

SECTION I. RECITALS

The recitals above are true and correct and are incorporated into this Resolution by reference as findings of fact.

SECTION II. SUMMARY OF FINDINGS

The City Council hereby finds that it has been presented with the EIR, which it has reviewed and considered, and further finds that the EIR is an accurate and objective statement that has been completed in full compliance with CEQA and the State CEQA Guidelines. The City Council finds that the EIR reflects the independent judgment and analysis of the City. The City Council declares that no evidence of new significant impacts or any new information of "substantial importance" as defined by State CEQA Guidelines §15088.5, has been received by the City after circulation of the Draft EIR that would require recirculation. Therefore, the City Council hereby certifies the EIR based on the entirety of the record of proceedings.

SECTION III. PROCEDURAL COMPLIANCE WITH CALIFORNIA ENVIRONMENTAL QUALITY ACT

A. RECORD OF PROCEEDINGS

For purposes of CEQA and these Findings, the Record of Proceedings for the proposed Project consists of the following documents and other evidence, at a minimum:

- The NOP, NOA, and all other public notices issued by the City in conjunction with the proposed Project.
- The Draft EIR and Final EIR for the proposed Project.
- All written comments submitted by agencies or members of the public during the public review comment period on the Draft EIR.
- All responses to written comments submitted by agencies or members of the public during the public review comment period on the Draft EIR.
- All written and verbal public testimony presented during noticed public hearings for the proposed Project.
- The Mitigation Monitoring and Reporting Program.
- The reports and technical memoranda included or referenced in the Final EIR.
- All documents, studies, EIRs, or other materials incorporated by reference in the Draft EIR and Final EIR.
- The Resolutions adopted by the City in connection with the proposed Project, and all documents incorporated by reference therein, including comments received after the close of the comment period and responses thereto.
- Matters of common knowledge to the City, including but not limited to federal, state, and local laws and regulations.
- Any documents expressly cited in these Findings.
- Any other relevant materials required to be in the record of proceedings by PRC §21167.6(e).

B. CUSTODIAN AND LOCATION OF RECORDS

The documents and other materials that constitute the administrative record for the City's actions related to the proposed Project are at the City of Ontario - Planning Department, 303 East "B" Street, Ontario, CA. The City Planning Department is the custodian of the administrative record for the Project. Copies of these documents, which constitute the record of proceedings, are and at all relevant times have been and will be available upon request at the offices of the Planning Department. This information is provided in compliance with PRC §21081.6(a)(2) and CEQA Guidelines §15091 (e).

C. PROJECT PURPOSE AND OBJECTIVES

The broad vision of the 2022 Specific Plan Amendment is to create a community with a mixture of uses, connected through a series of trails, which provides opportunities for people to live, work and play. Supporting 2022 Specific Plan Amendment objectives are listed below.

General

- Implement TOP 2050 Policy Plan Land Use Plan.
- Support TOP 2050 vision for urbanization of the Ontario Ranch area of the City.
- Implement a Specific Plan development supporting office/commercial and light industrial uses providing a broad range of long-term employment opportunities.
- Implement Specific Plan developments providing a broad range of additional construction employment opportunities.
- Establish new development that would further the City's near-term and long-range fiscal goals.
- Improve the regional jobs/housing balance.

Specific Plan Uses

Livable Neighborhood Development

- Incorporate Traditional Neighborhood Design guiding principles during the design phase to provide for opportunities to achieve the Project's vision statement, including:
  - Connections. To provide a series of sidewalks and trails connecting community parks, civic uses, employment areas, mixed-use and transit stops designed to be pedestrian friendly to avoid unnecessary automobile trips.
  - Traditional Street Network. To design a hierarchy of streets connected in a grid network with a variety of routes for pedestrians and vehicles, as well as creating a visually favorable and comfortable environment for pedestrians and bicyclists.
  - Main Street Environment. To design commercial/retail areas to a human scale with storefronts oriented to the street providing a "Main Street" atmosphere for strolling and shopping, all within walking distance from most homes.
  - Public Spaces. To create plazas, parks, and community gathering places placed within centralized areas providing synergy between adjacent land uses.
  - Identifiable Neighborhoods. To design neighborhoods around a discernable center, which may include a small park, square, school, or mixed-use center, within a five-minute walking distance.
  - Mix of Housing. To provide neighborhoods with a range of household types: a variety of single-family detached homes, attached units for young families, and live/work units for small at-home businesses.
- Design a mixed-use environment to ensure compatible uses that are cohesive and integrate a diversity of residential neighborhoods, with a range of commercial uses, and supporting open spaces.

- Utilize transportation, utility, and greenways/open space networks to establish clear edges and boundaries.
- Accommodate residential, commercial, open space, public, and other uses in accordance with the generalized distribution of uses depicted within the City's TOP Land Use Plan.
- Implement elements that will ensure walkability throughout the Project Area to discourage automobile dependency and encourage walking, biking, and other forms of transportation. This is achieved through the incorporation of subarea greenways and pedestrian connections and through sensitive site design of mixed-use development.
- Implement technological advances within residential communities, including internet access, to allow residents to shop and work from home and to decrease reliance on automobiles.
- Provide opportunity for at least one major public plaza/square as a centerpiece of community activities, including events and celebrations, outdoor performances, community meetings, picnics, farmers markets, and similar functions.
- Establish a clearly defined "edge" for the City's TOP area, where appropriate, that avoids the use of walls and creation of a "walled" enclave.
- Incorporate electrical transmission corridors and similar elements to form "edges" for residential neighborhoods and centers and/or accommodate public greenways/trails/corridors.

Residential District Objectives

- Create a livable community with neighborhoods designed at a human scale and oriented for pedestrian access to mixed-use, educational, and recreational uses.
- Provide for a range and diversity of housing products (detached single-family, detached and attached condominiums, and townhomes) that respond to a variety of homeownership needs and desires.
- Design residential projects to complement the character of adjacent neighborhoods.
- Encourage interaction among residents through the provision of an organized, simple, and "neo-traditional" system of streets, pathways, and entries to allow residents to walk or bike to parks, recreation, and public facilities (including schools).
- Promote outdoor activity and casual social contact among residents and neighbors by designing neighborhoods around a central park where they can gather.
- Provide a focal point of activity within each residential planning area that may include a park, school, common area, or public meeting facility.
- Encourage architectural styles and traditional design elements that reflect the historic and eclectic mixture of architecture, reflective of the greater Ontario area.
- Increase densities adjacent to commercial centers.
- Establish clear, defined "edges" and "entries" that contribute to neighborhood identity.

- Avoid the use of walls to separate residential areas from arterials and other high traffic volume streets by expanded landscape setbacks, frontage roads, and other appropriate techniques.
- Include clustered multi-family housing within the Residential District, in order to create a diverse range of housing products and opportunities, while still in keeping with the overall low-density residential designation.
- Locate higher-density residential uses that provide population to support adjacent regional commercial centers.
- Provide sufficient on-site recreational amenities within higher density developments.
- Include community-oriented uses such as public meeting rooms, plazas and courtyards, and similar uses.
- Establish visual and physical links among the individual multi-family developments to create a cohesive and continuous corridor.
- Design building elevations to promote visual interest.
- Provide linkages between community service facilities, multi-family corridors, and residential neighborhoods.

Regional Commercial/Mixed-Use District Objectives

- Accommodate a diversity of large-scale retail, community and neighborhood shopping, office, medical research, entertainment, hotel/motel, dining, housing, cultural, public, and similar uses that will serve the Project area and neighboring Planning Areas.
- Function with a high level of activity and/or employment.
- Accommodate development of multi-family housing, mixed-use buildings that incorporate housing and retail/office, and live/work facilities.
- Accommodate single-use buildings and mixed-use structures containing a variety of uses from residential over retail or office-to-office over retail.
- Encourage traditional, mixed-use design of commercial buildings, by requiring a lower maximum floor area ration (FAR) for single-use buildings, and a higher maximum FAR for mixed-use buildings.
- Develop plaza areas and other amenities to provide places of social interaction.
- Include one or more public “squares” to serve as gathering places.
- Incorporate modulated building volumes, mass, height, and articulated facades to create individual spaces.
- Site a portion of the buildings on peripheral streets to provide connectivity to adjacent uses.
- Orient buildings towards the local streets whenever possible to create an urban edge and sense of arrival and place.
- Include sidewalks of sufficient width to accommodate pedestrian activity and outdoor restaurants, newsstands, and other uses.
- Create visual interest through the opening of streets and sidewalks/plazas towards building elevations.
- Incorporate landscaping to enhance the environment.

- Visually integrate parking structures to continue the intended design character of the district.
- Incorporate multi-family housing to create a cohesive and continuous corridor.
- Ensure an appropriate mix of uses (residential and commercial) that are compatible.
- Encourage pedestrian access and ease of use within the mixed-use area by designing pedestrian and bike paths.
- Create a “Main Street” environment with buildings designed to a human scale where pedestrian activity is not overwhelmed by automobile traffic.
- Utilize urban design to create a “Gateway” or portal to the Ontario Ranch.

Industrial District Objectives

- Incorporate transitions and/or buffers between commercial/mixed-use and industrial areas and adjacent residential areas.
- Contribute to the regional jobs to housing balance by providing employment opportunities while minimizing development impacts on surrounding neighborhoods.
- Create a high-quality industrial park development that attracts an array of businesses and provides employment opportunities within proximity to area residents.
- Provide safe and efficient access/circulation routes for the distribution/transportation of goods.

Circulation Objectives

- Provide a circulation system designed to promote pedestrian activity through a network of off-street pedestrian walkways linking each neighborhood to parks, mixed-use commercial, and residential uses.
- Design a hierarchy of streets connected in a grid network with a variety of routes for pedestrians and vehicles, creating a visually attractive, enhanced, and comfortable environment for pedestrians and bicyclists.
- Design streets to incorporate landscaped parkways and pedestrian walkways separated from the street to enhance safety and enjoyment of residents and visitors.
- Provide opportunities for transit connections and alternative modes of transportation.

Recreation/Trails Objectives

- Provide new recreational opportunities for residents through the development of a series of public and private parks.
- Provide a series of pedestrian trails connecting community parks, civic uses, mixed-use, and transit stops designed to be pedestrian friendly to avoid unnecessary automobile trips.

- Incorporate off-street multi-use trails within the Southern California Edison easements.
- Incorporate a system of on- and off-street bicycle pathways with access from the residences to mixed-use areas.
- Use landscaping and streetscape materials that are low maintenance in recreation and trail areas.
- Provide a system of on-street bikeways integrated throughout the Project to provide access to schools, parks, and commercial uses.
- Provide new recreational opportunities for residents through the development of a series of parks ranging in size.

Community Facilities Objectives

- Incorporate existing major utilities into the overall fabric of the community.
- Provide opportunities for incorporation of community facilities (e.g., schools, fire station) as identified by affected agencies.

SECTION IV. CALIFORNIA ENVIRONMENTAL QUALITY ACT FINDINGS

CEQA (Pub. Resources Code, §21000 et seq.) requires that public agencies shall not approve or carry out a project for which an environmental impact report (EIR) has been certified that identifies one or more significant adverse environmental effects of a project unless the public agency makes one or more written Findings for each of those significant effects, accompanied by a brief explanation of the rationale for each Finding (State CEQA Guidelines [Cal. Code Regs., tit. 14, §15000 et seq.], §15091). This document presents the CEQA Findings of Fact made by the City of Ontario, in its capacity as the CEQA lead agency, regarding the Rich-Haven Specific Plan, 2022 Amendment (Project), evaluated in the Draft Environmental Impact Report ("Draft EIR") and Final Environmental Impact Report (Final EIR) for the Project.

The City Council hereby adopts the "CEQA Findings of Fact" which were prepared in accordance with State CEQA Guidelines §15091, and which are as follows:

A. INTRODUCTION

PRC §21002 states that "public agencies should not approve projects as proposed if there are feasible alternatives or feasible mitigation measures available which would substantially lessen the significant environmental effects of such projects[.]" Section 21002 further states that the procedures required by CEQA "are intended to assist public agencies in systematically identifying both the significant effects of proposed projects and the feasible alternatives or feasible mitigation measures which will avoid or substantially lessen such significant effects."

Pursuant to §21081 of the PRC, a public agency may only approve or carry out a project for which an EIR has been completed that identifies any significant environmental effects if the agency makes one or more of the following written finding(s) for each of those significant effects accompanied by a brief explanation of the rationale for each finding:

1. Changes or alterations have been required in, or incorporated into, the project which mitigate or avoid the significant effects on the environment.

2. Those changes or alterations are within the responsibility and jurisdiction of another public agency and have been, or can and should be, adopted by that other agency.

3. Specific economic, legal, social, technological, or other considerations, including considerations for the provision of employment opportunities for highly trained workers, make infeasible the mitigation measures or alternatives identified in the environmental impact report.

As indicated above, §21002 requires an agency to "avoid or substantially lessen" significant adverse environmental impacts. Thus, mitigation measures that "substantially lessen" significant environmental impacts, even if not completely avoided, satisfy §21002's mandate. (*Laurel Hills Homeowners Assn. v. City Council* (1978) 83 Cal.App.3d 515, 521 ["CEQA does not mandate the choice of the environmentally best feasible project if through the imposition of feasible mitigation measures alone the appropriate public agency has reduced environmental damage from a project to an acceptable level"]; *Las Virgenes Homeowners Fed., Inc. v. County of Los Angeles* (1986) 177 Cal. App. 3d 300, 309 ["[t]here is no requirement that adverse impacts of a project be avoided completely or reduced to a level of insignificance . . . if such would render the project unfeasible"].)

While CEQA requires that lead agencies adopt feasible mitigation measures or alternatives to substantially lessen or avoid significant environmental impacts, an agency need not adopt infeasible mitigation measures or alternatives. (Pub. Resources Code, §21002.1(c) [if "economic, social, or other conditions make it infeasible to mitigate one or more significant effects on the environment of a project, the project may nonetheless be carried out or approved at the discretion of a public agency"]; see also State CEQA Guidelines, §15126.6(a) [an "EIR is not required to consider alternatives which are infeasible"].) CEQA defines "feasible" to mean "capable of being accomplished in a successful manner within a reasonable period of time, taking into account economic, environmental, social, and technological factors." (Pub. Resources Code, §21061.1.). The State CEQA Guidelines add "legal" considerations as another indicia of feasibility. (State CEQA Guidelines, §15364.) Project objectives also inform the determination of "feasibility." (*Jones v. U.C. Regents* (2010) 183 Cal. App. 4th 818, 828-829.). "'[F]easibility' under CEQA encompasses 'desirability' to the extent that desirability is based on a reasonable balancing of the relevant economic, environmental, social, and technological factors." (*City of Del Mar v. City of San Diego* (1982) 133 Cal.App.3d 401, 417; see also *Sequoyah Hills Homeowners Assn. v. City of Oakland* (1993) 23 Cal.App.4th 704, 715.) "Broader considerations of policy thus come into play when the decision-making body is considering actual feasibility[.]" (*Cal. Native Plant Soc'y v. City of Santa Cruz* (2009) 177 Cal.App.4th 957, 1000 ("Native Plant"); see also Pub. Resources Code, §21081(a)(3) ["economic, legal, social, technological, or other considerations" may justify rejecting mitigation and alternatives as infeasible] (emphasis added).)

Environmental impacts that are less than significant do not require the imposition of mitigation measures. (*Leonoff v. Monterey County Board of Supervisors* (1990) 222 Cal.App.3d 1337, 1347)

The California Supreme Court has stated, "[t]he wisdom of approving . . . any development project, a delicate task which requires a balancing of interests, is necessarily left to the sound discretion of the local officials and their constituents who are responsible for such decisions. The law as we interpret and apply it simply requires that those decisions be informed, and therefore balanced." (*Citizens of Goleta Valley v. Board of Supervisors* (1990) 52 Cal.3d 553, 576). In addition, perfection in a project or a project's environmental alternatives is not required; rather, the requirement is that sufficient information be produced "to permit a reasonable choice of alternatives so far as environmental aspects are concerned." Outside agencies (including courts) are not to "impose unreasonable extremes or to interject [themselves] within the area of discretion as to the choice of the action to be taken." (*Residents Ad Hoc Stadium Com. v. Board of Trustees* (1979) 89 Cal.App.3d 274, 287)

B. FINDINGS REGARDING ENVIRONMENTAL IMPACTS NOT REQUIRING MITIGATION

The City Council hereby finds that the following potential environmental impacts of the Project are less than significant and therefore do not require the imposition of Mitigation Measures, as identified in the Initial Study and the Draft EIR.

1. AESTHETICS

a. *Scenic Vistas*

Threshold: Would the project have a substantial adverse effect on a scenic vista?

Finding: Less than significant (Initial Study, pp. 3-6 - 3-7)

Explanation: There are no scenic vistas within the Project site, nor would the Project otherwise adversely affect a designated scenic vista. Views of the San Gabriel Mountains, located to the north of the City, are the dominant scenic resource in the area. Therefore, the Project would not have a substantial adverse effect on a scenic vista, and impacts would be less than significant.

b. *Scenic Resources*

Threshold: Would the Project substantially damage scenic resources, including, but not limited to, trees, rock outcroppings, and historic buildings within a state scenic highway?

Finding: Less than significant (Initial Study, p. 3-8)

Explanation: The City of Ontario is served by three freeways, including Interstate 10 (I-10), Interstate 15 (I-15), and State Route 60 (SR-60). The segments of these freeways located within the City are not designated as scenic highways by the California Department of

Transportation. There are no scenic resources, including, but not limited to trees, rocks, outcroppings, and historic buildings within a state scenic highway located within the Project site. Nor does the Project propose or require facilities or operations that would otherwise substantially damage such resources.

c. *Visual Character*

Threshold: Would the Project, in non-urbanized areas, substantially degrade the existing visual character or quality of public view of the site and its surroundings? (Public views are those that are experienced from publicly accessible vantage point). If the project is in an urbanized area, would the project conflict with applicable zoning and other regulations governing scenic quality?

Finding: Less than significant. (Initial Study, pp. 3-6 - 3-7)

Explanation: The Project is located in an urbanized area and would be subject to those provisions of TOP 2050 General Plan and City of Ontario Development Code governing scenic quality. TOP 2050 General Plan Community Development Element establishes multiple policies that protect scenic resources and promote high quality, visually compatible development. For example, TOP General Plan 2050 Community Design Element Policy CD-1.5 requires that "all major north-south streets be designed and redeveloped to feature views of the San Gabriel Mountains, which are part of the City's visual identity and a key to geographic orientation. Such views should be free of visual clutter, including billboards and may be enhanced by framing with trees"; Policy CD-2.1 encourages "all development projects to convey visual interest and character . . ."; Policy CD-2.15 supports "excellence in design and construction quality through collaboration with trade and professional organizations that provide expertise, resources and programs for developers, builders and the public" (TOP 2050 Policy Plan, p. 91).

TOP 2050 General Plan policies governing scenic quality, including those noted above, ensure protection of scenic resources and promote visually compatible and appealing development. These policies are implemented through the City of Ontario Development Code (Development Code Chapter 6.0 Development and Subdivision Regulations, et al.). The City would assure that the Project as implemented would conform to applicable provisions of the Project including the Project Development Regulations and Design Guidelines. The Project Development Regulations and Design Guidelines would, at a minimum, be required to conform to provisions of TOP 2050 General Plan and Development Code.

Conformance with the Project would minimize the potential for the Project to adversely affect scenic resources or result in development that would conflict with applicable zoning and other regulations governing scenic quality.

d. ***Light and Glare***

Threshold: Would the Project create a new source of substantial light or glare which would adversely affect day or nighttime views in the area?

Finding: Less than significant. (Initial Study, pp. 3-8 - 3-9)

Explanation: The Project would create new sources of lighting, including ground, building-mounted, wall-mounted, and pole-mounted lighting fixtures. The Project would also provide illuminated exterior signs. The City would assure that the Project, as implemented, contains Development Regulations and Design Guidelines that would, at a minimum, conform to City regulations addressing lighting and light overspill (see: Development Code, Division 6.01 – District Standards and Guidelines, Lighting). All subsequent development within the Project area would be required to conform with the Project Regulations and Design Guidelines addressing light, glare and overspill. Conformance with the Project would minimize the potential for the Project to result in adverse light and glare impacts.

2. AGRICULTURE AND FORESTRY RESOURCES

a. ***Farmland Conversion***

Threshold: Would the Project convert Prime Farmland, Unique Farmland, or Farmland of Statewide Importance (Farmland), as shown on the maps prepared pursuant to the Farmland Mapping and Monitoring Program of the California Resources Agency, to non-agricultural use?

Finding: Less than significant. (Initial Study, pp. 3-10 - 3-12)

Explanation: The California Department of Conservation (CDC) Farmland Mapping and Monitoring (FMMP) System designates properties within the Project site as: “Prime Farmland,” “Grazing Land,” and “Other Land.” The City of Ontario does not prohibit the transition of agricultural land to urban uses. While existing agricultural uses are allowed to persist and are accommodated as transitional uses under the City’s Agricultural Overlay District, the City Land Use Plan does not formally designate or allocate any areas of the City as “Agricultural” land uses.

The City of Ontario has acknowledged the planned transition of existing agricultural uses to urbanized uses pursuant to TOP 2050 Land Use Plan (Land Use Plan). As discussed in TOP 2050 DSEIR,

"because former agriculture areas within Ontario are now already designated for nonagricultural uses and the current TOP is the baseline for this SEIR, the Proposed Project [TOP 2050] would not conflict with agricultural uses and would not result in conversion of farmland to nonagricultural use."

b. ***Williamson Contract***

Threshold: Would the project conflict with existing zoning for agricultural use, or a Williamson Act contract?

Finding: Less than significant. (Initial Study, pp. 3-13 - 3-14)

Explanation: The Project site is Zoned "Specific Plan." The Project does not propose or require uses or activities that would otherwise result in potentially adverse effects at agriculturally-zoned properties. Based on the preceding, Project impacts to or affecting agricultural-zoned properties would be less-than-significant. One property within the Project site (APN 0218-161-13) is currently under a Williamson Act Contract (Contract No. 71-235). Buildout of the Project site would require the cancellation or nonrenewal of Contract No. 71-235.

c. ***Forestland Zoning***

Threshold: Would the Project conflict with existing zoning for, or cause rezoning of, forest land (as defined in PRC §12220(g)), timberland (as defined by PRC §4526), or timberland zoned Timberland Production (as defined by Government Code §51104(g)?

Finding: No impact. (Initial Study, p. 3-14)

Explanation: There is currently no land in the City of Ontario that qualifies as forest land or timberland. Neither TOP 2050 General Plan nor the City's Development Code provide such designations. As such, the Project would not conflict with existing zoning for, or cause rezoning of, forest land or timberland, or result in the loss or conversion of forest land.

d. ***Loss of Forest Land***

Threshold: Would the Project result in the loss of forest land or conversion of forest land to non-forest use?

Finding: No impact. (Initial Study, p. 3-14)

Explanation: As stated above, there is currently no land in the City of Ontario that qualifies as forest land or timberland. Neither TOP 2050 General Plan nor the City's Development Code provide such designations. As such, the Project would not conflict with existing zoning for, or cause rezoning of, forest land or timberland, or result in the loss or conversion of forest land. Therefore, the Project would have no impact regarding loss of forest land.

e. ***Agricultural Zoning***

Threshold: Would the project involve other changes in the existing environment which, due to their location or nature, could result in conversion of Farmland, to non-agricultural use or conversion of forest land to non-forest use?

Finding: No impact. (Initial Study, p. 3-14)

Explanation: The Project does not involve other changes to the environment that could result in the conversion of farmland or forest land to other uses beyond those identified under the preceding discussions.

3. AIR QUALITY

a. ***Other Adverse Emissions***

Threshold: Would the proposed project expose sensitive receptors to substantial pollutant concentrations?

Finding: Less than significant. (Draft EIR, pp. 4.3-41 - 4.3-49)

Explanation: Sensitive receptors nearest the Project site would not be subject to emissions exceeding SCAQMD LSTs. Nor would the Project create or result in localized CO hot spots as the Project would not produce the volume of traffic required to generate a CO hot spot. The Project would also not generate or result in localized concentrations of TACs that would create or result in potentially significant health risks.

For the Residential Exposure Scenario, the Project HRA substantiates that DPM emissions generated by Project operations would result in less-than-significant health risks at the maximally impacted residential land use (MEIR). More specifically, at the MEIR, the maximum carcinogenic risk is estimated at 4.77 in one million, which does not exceed the SCAQMD cancer risk threshold of 10 in one million. At this same location, the non-cancer risks were estimated at 0.03, which would not exceed the applicable SCAQMD threshold of 1.0. As such, Project operations would not cause or result in potentially significant cancer risks or noncarcinogenic risks at the MEIR. All other potentially affected residential receptors are located at greater distances from the Project site than the MEIR and would be exposed to fewer emissions and therefore less risk than would occur at the evaluated MEIR. The cancer and noncarcinogenic risks at these more distant residential receptors would also be less-than-significant.

For the Worker Exposure Scenario, the Project HRA substantiates that DPM emissions generated by Project operations would have a less-than-significant health risk at the maximally impacted worker location. More specifically, for the maximally exposed individual worker (MEIW), the maximum cancer risk is estimated at 0.94 in one

million, which would not exceed the SCAQMD cancer risk threshold of 10 in one million. At this same location, the non-cancer risks were estimated at 0.06, which would not exceed the applicable SCAQMD threshold of 1.0. As such, Project operations would not cause or result in potentially significant cancer risks or noncarcinogenic risks at the MEIW. All other potentially affected worker receptors are located at greater distances from the Project site than the MEIW and would be exposed to fewer emissions and therefore less risk than would occur at the evaluated MEIW. The cancer and noncarcinogenic risks at these more distant worker receptors would also be less-than-significant.

For the School Child Exposure Scenario, the Project HRA substantiates that DPM emissions generated by Project operations would have a less-than-significant health risk at the maximally impacted worker location. More specifically, for the maximally exposed individual school child (MEISC), the maximum cancer risk is estimated at 0.37 in one million, which would not exceed the SCAQMD cancer risk threshold of 10 in one million. At this same location, the non-cancer risks were estimated at 0.01, which would not exceed the applicable SCAQMD threshold of 1.0. As such, Project operations would not cause or result in potentially significant cancer risks or noncarcinogenic risks at the MEISC. All other potentially affected school receptors are located at greater distances from the Project site than the MEISC and would be exposed to fewer emissions and therefore less risk than would occur at the evaluated MEISC. The cancer and noncarcinogenic risks at these more distant school child receptors would also be less-than-significant.

In terms of construction, at the MEIR, the Project HRA substantiates that DPM emissions generated by Project operations would result in less-than-significant health risks at the maximally impacted residential land use (MEIR). More specifically, at the MEIR, the maximum carcinogenic risk is estimated at 1.21 in one million, which does not exceed the SCAQMD cancer risk threshold of 10 in one million. At this same location, the non-cancer risks were estimated at <0.01, which would not exceed the applicable SCAQMD threshold of 1.0.

b. ***Other Adverse Emissions***

Threshold: Would the Project result in other emissions (such as those leading to odors) adversely affecting a substantial number of people?

Finding: Less than significant. (Initial Study, pp. 3-16 - 3-17)

Explanation: Temporary, short-term odor releases are potentially associated with Project construction activities. Potential sources of odors associated with construction activities would include, but not be limited to the

following: asphalt/paving materials, glues, paint, and other architectural coatings. Construction-source odor impacts are minimized through compliance with established regulations (Code of Federal Regulations [CFR], Subpart H-Materials Handling, Storage Use and Disposal, et al.) addressing construction materials storage, use, and disposal. In pertinent part the isolation/containment devices or mechanisms specified under these regulations prevent significant release of odors. The Project would be required to comply with these regulations.

Uses typically considered to be sources of odors or other emissions that could adversely affect a substantial number of people include agricultural operations, cement plants, wastewater treatment plants, and the like. The Project proposes none of these. Rather, the Project would implement contemporary residential, commercial, light industrial, parks, and open space uses.

Refuse generated by the Project uses could be a source of localized odors. Project refuse is required to be collected, contained, and disposed of as stipulated in the City of Ontario Municipal Code (see: Municipal Code, Chapter 3: Integrated Solid Waste Management). Per the Municipal Code, refuse is to be disposed of in covered receptacles and routinely removed, thereby limiting the escape of odors to the open air. Any odors generated would be temporary and transient, with little or no potential to adversely affect a substantial number of people.

Further, all Project construction activities, uses and occupancies would be required to conform to SCAQMD Rule 402. Rule 402 provides in pertinent part that there shall be no "discharge from any source whatsoever such quantities of air contaminants or other material which cause injury, detriment, nuisance, or annoyance to any considerable number of persons or to the public, or which endanger the comfort, repose, health or safety of any such persons or the public, or which cause, or have a natural tendency to cause, injury or damage to business or property."

4. BIOLOGICAL RESOURCES

a. *Riparian Habitat*

Threshold: Would the Project have a substantial adverse effect on any riparian habitat or other sensitive natural community identified in local or regional plans, policies, regulations or by the California Department of Fish and Game or U.S. Fish and Wildlife Service?

Finding: Less than significant. (Draft EIR, p. 4.10-18).

Explanation: The site does not contain any lakes, rivers, creeks, streambeds, wetlands, vernal pools, or temporary rain pools. No other wetlands,

riparian habitat or other sensitive communities exist within the Project site. Nor does the Project propose uses or activities that would substantially or adversely affect any other off-site wetlands or riparian areas.

b. ***Wetlands***

Threshold: Would the Project have a substantial adverse effect on State or federally protected wetlands (including, but not limited to, marsh, vernal pool, coastal, etc.) through direct removal, filling, hydrological interruption, or other means?

Finding: Less than significant. (Draft EIR, p. 4.10-18).

Explanation: The site does not contain any lakes, rivers, creeks, streambeds, wetlands, vernal pools, or temporary rain pools. No other wetlands, riparian habitat or other sensitive communities exist within the Project site. Nor does the Project propose uses or activities that would substantially or adversely affect any other off-site wetlands or riparian areas.

c. ***Local Policies and Ordinances***

Threshold: Would the Project interfere substantially with the movement of any native resident or migratory fish or wildlife species or with established native resident or migratory wildlife corridors, or impede the use of wildlife nursery sites?

Finding: Less than significant. (Draft EIR, p. 4.10-18)

Explanation: No regional wildlife movement corridors have been identified in the City, most of which is ill suited for the purposes of wildlife movement (TOP SEIR, p. 5.4-33). No wildlife habitat linkages or movement corridors have been identified at the Project site (Project Biological Report, p. 30). Nor does the Project propose facilities or activities that would substantively and adversely affect any off-site designated wildlife habitat linkage or movement corridor. Impacts to potential nesting birds are addressed by Mitigation Measure 4.10.1, presented previously.

d. ***Local Policies and Ordinances***

Threshold: Would the Project conflict with any local policies or ordinances protecting biological resources, such as a tree preservation policy or ordinance?

Finding: Less than significant. (Draft EIR, pp. 4.10-18 – 4.10-19)

Explanation: The Project site has been significantly impacted due to years of disking, dumping, disturbance and agriculture. As a result of these historic disturbances and on-going urbanization of the site per the 2021 Specific Plan, the Project site does not contain or support high value habitats or protected species.

There are no protected trees within the Project site. The Project does not propose or require uses or operations that would adversely affect any off-site protected trees. There are no parkway trees within the Project site. The Project does not propose or require uses or operations that would adversely affect any off-site parkway trees. As part of the City's standard development review process, the City would ensure that the final Specific Plan Landscape Plan and all development proposals within the Project conform to the Parkway Tree Regulations. There are no Natural Community Conservation Plans, or Regional, or State Habitat Conservation Plans regulating the Project or that would be adversely affected by the Project.

e. ***Habitat Conservation Plans***

Threshold: Would the Project conflict with the provisions of an adopted Habitat Conservation Plan, Natural Community Conservation Plan, or other approved local, regional, or state habitat conservation plan?

Finding: Less than significant. (Draft EIR, pp. 4.10-18 – 4.10-19)

Explanation: The Project site has been significantly impacted due to years of disking, dumping, disturbance and agriculture. As a result of these historic disturbances and on-going urbanization of the site per the 2021 Specific Plan, the Project site does not contain or support high value habitats or protected species.

There are no protected trees within the Project site. The Project does not propose or require uses or operations that would adversely affect any off-site protected trees. There are no parkway trees within the Project site. The Project does not propose or require uses or operations that would adversely affect any off-site parkway trees. As part of the City's standard development review process, the City would ensure that the final Specific Plan Landscape Plan and all development proposals within the Project conform to the Parkway Tree Regulations. There are no Natural Community Conservation Plans, or Regional, or State Habitat Conservation Plans regulating the Project or that would be adversely affected by the Project.

5. CULTURAL RESOURCES

a. ***Historical Resources***

Threshold: Would the Project cause a substantial adverse change in the significance of a historical resource pursuant to State CEQA Guidelines, §15064.5?

Finding: Less than significant. (Draft EIR, pp. 4.11-12 – 4.11-14)

Explanation: During the records search conducted for the Cultural Resources Assessment, five (5) potential historical resources were identified within the Project site. Potential resources included three (3) historical period residences and two (2) historical period transmission lines. These potential resources were evaluated for listing as "historically significant" as provided for at Section 5024.1 of the Cal. Public Res. Code. Generally, a resource is considered by the lead agency to be "historically significant" if the resource meets the criteria for listing in the California Register (Cal. Code Regs. tit. 14(3), § 15064.5(a)(3)).

Potential historical resources in the Project site were evaluated to determine if they are considered historical resources. None of the potential resources identified within the records search qualify as significant historical resources when evaluated against the criteria.

b. *Human Remains*

Threshold: Would the Project disturb any human remains, including those interred outside of formal cemeteries?

Finding: Less than significant. (Initial Study, pp. 3-20 - 3-21)

Explanation: There are no known formal cemeteries or informal burial sites within the Project site or in off-site areas that would likely be affected by Project construction activities. The likelihood of encountering human remains in the course of Project development is therefore considered minimal. Further, as required under California Health and Safety Code Section 7050.5 (b) should human remains be encountered in the course of Project development, "there shall be no further excavation or disturbance of the site or any nearby area reasonably suspected to overlie adjacent remains until the coroner of the county in which the human remains are discovered has determined . . . that the remains are not subject to the provisions of Section 27491 of the Government Code or any other related provisions of law concerning investigation of the circumstances, manner and cause of any death, and the recommendations concerning the treatment and disposition of the human remains have been made to the person responsible for the excavation, or to his or her authorized representative, in the manner provided in Section 5097.98 of the Public Resources Code."

Additionally, California Health and Safety Code Section 7050.5 (c) provides that "[i]f the coroner determines that the remains are not subject to his or her authority and if the coroner recognizes the human remains to be those of a Native American, or has reason to believe that they are those of a Native American, he or she shall contact, by telephone within 24 hours, the Native American Heritage Commission." All Project activities would be required to comply with

provisions of the California Health and Safety Code and Public Resources Code as summarized above, minimizing or avoiding the potential to disturb human remains. Therefore, the potential for the Project to disturb any human remains, including those interred outside of formal cemeteries would be less-than-significant.

6. ENERGY

a. *Wasteful Use of Energy*

Threshold: Would the Project result in potentially significant environmental impact due to wasteful, inefficient, or unnecessary consumption of energy resources, during project construction or operation?

Finding: Less than significant. (Draft EIR, pp. 4.5-9 through 4.5-15)

Explanation: Project construction and operations would not result in the inefficient, wasteful or unnecessary consumption of energy, and potential Project impacts in these regards would be less-than-significant. Further, energy demands of the Project can be accommodated within the context of available resources and energy delivery systems. The Project would therefore not cause or result in the need for additional energy-producing or energy transmission facilities and would not create or otherwise result in a potentially significant impact affecting energy resources or energy delivery systems.

Construction equipment use of fuel would not be atypical for the type of construction proposed, as there are no aspects of the Project's proposed construction process that are unusual or energy-intensive, and Project construction equipment would conform to the applicable CARB emissions standards, acting to promote equipment fuel efficiencies.

CCR Title 13, Title 13, Motor Vehicles, section 2449(d)(2) *Idling*, limits idling times of construction vehicles to no more than 5 minutes, thereby precluding unnecessary and wasteful consumption of fuel due to unproductive idling of construction equipment. Enforcement of idling limitations is realized through periodic site inspections conducted by local building officials, and/or in response to citizen complaints.

Diesel fuel would be supplied by regional commercial vendors. Indirectly, construction energy efficiencies and energy conservation would be achieved using bulk purchases, transport and use of construction materials. The 2021 IEPR released by the CEC has shown that fuel efficiencies are getting better within on and off-road vehicle engines due to more stringent government requirements.

The Project operations would not result in excessive and wasteful vehicle trips and VMT, nor excessive and wasteful vehicle energy consumption compared to other similar land uses.

Enhanced fuel economies realized pursuant to federal and state regulatory actions, and related transition of vehicles to alternative energy sources (e.g., electricity, natural gas, biofuels, hydrogen cells) would likely decrease future gasoline fuel demands per VMT.

Location of the Project proximate to regional and local roadway systems tends to reduce VMT within the region, acting to reduce regional vehicle energy demands. The Project would implement sidewalks, facilitating and encouraging pedestrian access. Facilitating pedestrian and bicycle access would reduce VMT and associated energy consumption. In compliance with the California Green Building Standards Code and County requirements, the Project would promote the use of bicycles as an alternative mean of transportation by providing short-term and/or long-term bicycle parking accommodations.

The Project proposes conventional land uses reflecting contemporary energy efficient/energy conserving designs and operational programs. The Project does not propose uses that are inherently energy intensive and the energy demands in total would be comparable to other land use projects of similar scale and configuration. The Project's compliance with applicable Title 24 standards would ensure that Project energy demands would not be inefficient, wasteful, or otherwise unnecessary.

b. ***Energy Efficiency Plans***

Threshold: Would the Project conflict with or obstruct a State of local plan for renewable energy or energy efficiency?

Finding: Less than significant. (Draft EIR, pp. 4.5-16 through 4.5-18)

Explanation: The Project would not conflict with or obstruct a state or local plan for renewable energy or energy efficiency. Additionally, regulatory measures, standards, and policies directed at reducing air pollutant emissions and GHG emissions would also act to promote energy conservation and reduce Project energy consumption.

7. GEOLOGY AND SOILS

a. ***Fault Rupture***

Threshold: Would the project directly or indirectly cause potential substantial adverse effects, including the risk of loss, injury, or death involving:

i) Rupture of a known earthquake fault, as delineated on the most recent Alquist-Priolo Earthquake Fault Zoning Map issued by the State Geologist for the area or based on other substantial evidence of a known fault? Refer to Division of Mines and Geology Special Publication 42.

Finding: Less than significant. (Initial Study, p. 3-24)

Explanation: There are no active faults known with the Project site. The Project site is outside any Fault Rapture Hazard Zone (formerly Alquist-Priolo Zone). The Project does not propose actions or facilities that would otherwise exacerbate known or probable adverse earthquake fault conditions.

b. *Seismic Ground Shaking*

Threshold: Would the Project directly or indirectly cause potential substantial adverse effects, including the risk of loss, injury, or death involving:

ii) Strong seismic ground shaking

Finding: Less than significant. (Draft EIR, p. 4.9-9)

Explanation: The Project Geotechnical Report substantiates there are no active faults known within the Project site. The Project site is outside any Fault Rapture Hazard Zone (formerly Alquist-Priolo Zone). The Geotechnical Report determined that the risk of surface fault rupture is considered low. The Project does not propose actions or facilities that would otherwise exacerbate known or probable adverse earthquake fault conditions.

c. *Landslides*

Threshold: Would the project directly or indirectly cause potential substantial adverse effects, including the risk of loss, injury, or death involving:

iv) Would the Project directly or indirectly cause potential substantial adverse effects, including the risk of loss, injury, or death involving landslides?

Finding: Less than significant. (Initial Study, p. 3-25)

Explanation: The Project site topography evidences little internal difference, with a moderate northeast to southwest downward trending slope, averaging between +2.0 % to -2.3% (Google Earth Imagery 2022). The Project site is not considered internally susceptible to land sliding. Any slopes manufactured in the course of Project development would be subject to review and approval by the City Building Department to ensure their stability. Adjacent properties also present little topographic relief. Impacts would be less than significant.

d. *Soil Erosion*

Threshold: Would the Project result in substantial soil erosion or the loss of topsoil?

Finding: Less than significant. (Initial Study, pp. 3-25 – 3-26)

Explanation: Project construction activities would temporarily expose underlying soils, thereby increasing their susceptibility to erosion. Potential

erosion impacts incurred during construction activities are mitigated below the level of significance through the Project's mandated compliance with a City-approved Storm Water Pollution Prevention Plan (SWPPP), as well as compliance with SCAQMD Rules that prohibit grading activities and site disturbance during high wind events. At Project completion, potential soil erosion impacts in the area will be resolved, as pavement, roads, buildings, and landscaping are established, overcovering previously exposed soils.

The Project does not propose altering existing topography in a manner that would result in substantial soil erosion or the loss of topsoil. All Project development plans would be subject to review and approval by the City. As part of this review, the City would ensure that permanent slopes and slope protection would conform to City requirements, thereby minimizing the potential for soil erosion over the life of the Project. City review and approval of development plans would also ensure that stormwater management systems are incorporated that would minimize potential erosion from stormwater runoff, both on-site and off-site.

e. ***Expansive Soils***

Threshold: Would the Project be located on expansive soil, as defined in Table 18-1-B of the Uniform Building Code (1994), creating substantial direct or indirect risks to life or property?

Finding: Less than significant. (Draft EIR, p. 4.9-10)

Explanation: The Project Geotechnical Report substantiates that onsite soils have a very low expansion potential. "Based on the results of previous laboratory testing by others and our recent laboratory testing, site soils are anticipated to have a 'Very Low' expansion potential [EI of 20 or less per ASTM D4829]" (Project Geotechnical Report, p. 10).

f. ***Septic Tanks***

Threshold: Would the Project have soils incapable of adequately supporting the use of septic tanks or alternative wastewater disposal systems where sewers are not available for the disposal of wastewater?

Finding: Less than significant. (Initial Study, p. 3-27)

Explanation: ***Construction and Operations***

The Project uses would be served by municipal sewer services. No septic tanks or other alternative wastewater disposal systems are proposed by the Project. No impact would occur.

g. ***Paleontological Resources***

Threshold: Would the Project directly or indirectly destroy a unique paleontological resource or site or unique geologic feature?

Finding: Less than significant. (Draft EIR, pp. 4.9-11 – 4.9-12)

Explanation: The geologic unit underlying the Project site are mapped as young Eolian sand and dune deposits from the Holocene period. Eolian units are considered to be of some preservation value, but any material found is unlikely to be fossil material due to the relatively modern associated dates of the deposits. The Western Science Center does not have any localities within the Project site or within a one-mile radius. The Cultural Resources Assessment determined that significant impacts in this regard would be unlikely.

As presented in the Project Geotechnical Report: . . . "the subject site is underlain by Holocene- to Pleistocene- age eolian (wind-blown) sedimentary deposits. The materials below the eolian deposits are young alluvial fan deposits…soils generally consisted of medium dense to dense sands with varying amounts of silt interbedded with thinner layers of stiff to very stiff fine-grained soils (i.e., silts and clays) to the maximum explored depth of approximately 50 feet below existing grade…Due to previous/current land use as farming, localized areas are underlain by near surface fill materials, topsoil, manure, etc." (Project Geotechnical Report, p. 6).

These soil types are common within the City and Southern California, and do not comprise unique geological features as described above. The Project does not propose uses or activities that would indirectly contribute to or result in potentially adverse impacts to a unique geological feature.

8. HAZARDS AND HAZARDOUS MATERIALS

a. *Hazardous Materials*

Threshold: Would the project emit hazardous emissions or handle hazardous or acutely hazardous materials, substances, or waste within one-quarter mile of an existing or proposed school?

Finding: Less than significant. (Draft EIR, pp. 4.7-26 – 4.7-27)

Explanation: Colony High School is located approximately 0.2 miles north of nearest light industrial uses proposed by the Project. The Project does not propose or require uses or facilities that would generate or use hazardous or acutely hazardous materials. The Project HRA substantiates that DPM emissions generated by the Project would not result in potentially significant impacts at vicinity schools. As a matter of course, the Lead Agency consults with potentially affected school districts throughout the EIR process for development proposals.

b. ***Hazardous Materials***

Threshold: Would the Project be located on a site which is included on a list of hazardous materials sites compiled pursuant to Government Code §65962.5 and, as a result, would it create a significant hazard to the public or the environment?

Finding: Less than significant. (Initial Study, pp. 3-30 – 3-31)

Explanation: The subject site is not included on the hazardous materials sites list compiled pursuant to Government Code Section 65962.5. Additionally, the Project would be required to comply with applicable federal, state, and local regulations, ensuring that hazards/hazardous materials impacts are maintained at levels that would be less-than-significant.

c. ***Airport Noise***

Threshold: For a project located within an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project result in a safety hazard or excessive noise for people residing or working in the project area?

Finding: Less than significant. (Initial Study, p. 3-31)

Explanation: The Project site is located within the area subject to provisions of the ONT Airport Land Use Compatibility Plan (ALUCP, July 2018). The ALUCP defines the ONT Airport Influence Area (AIA) as an area in which current and future airport-related noise, overflight, safety, and airspace protection factors may significantly affect land uses or necessitate restriction on those uses. The Project site is located outside the ONT safety zones (see: TOP 2050 DSEIR Figure 5.9-2, Airport Safety Zones). All Project development would be required to comply with ALUCP requirements, thereby precluding or minimizing potential airport/aircraft-related hazards. The Project does not propose or require uses that would contribute to potential airport/aircraft-related hazards. Therefore, the Project would not result in a safety hazard or excessive noise for people residing or working in the Project area and impacts would be less than significant.

d. ***Emergency Plans***

Threshold: Would the project impair implementation of or physically interfere with an adopted emergency response plan or emergency evacuation plan?

Finding: Less than significant. (Initial Study, p. 3-32)

Explanation: The Project does not propose or require permanent alteration of vehicle circulation routes and would not interfere with any identified emergency response or emergency evacuation plan. Consistent with

City policies, coordination with the local fire and police departments during pre-construction review of Project plans would ensure that potential interference with emergency response plans and evacuation plans are avoided.

e. *Wildland Fires*

Threshold: Would the project expose people or structures, either directly or indirectly, to a significant risk of loss, injury or death involving wildland fires?

Finding: No Impact. (Initial Study, pp. 3-32 - 33)

Explanation: The Project site is located in an urbanizing area, and no wildlands are located in the vicinity of the Project site. Fire protection services are provided to the City and the Project site by the Ontario Fire Department. Pre-construction coordination with Fire Department staff and adherence to local fire regulations during construction and operation of the Project would be required. The City and Fire Department would require that fire prevention/fire suppression measures are incorporated in the Project designs and that water delivery systems serving the Project site provide adequate fire flow. Creation and maintenance of firebreaks and fire-defensible spaces adjacent to building and roadways as required by the City and Fire Department would further reduce the potential for exposure to wildland fires and the spread of wildland fires. The City would also enforce weed abatement measures, minimizing potential fire fuel loads. Additionally, development of the Project site would act to reduce fire hazards by eliminating existing fire fuel loads such as manure, hay, and weeds; while improving area fire protection infrastructure systems.

9. HYDROLOGY AND WATER QUALITY

a. *Water Quality Standards*

Threshold: Would the Project violate any water quality standards or waste discharge requirements or otherwise substantially degrade surface or ground water quality?

Finding: Less than significant. (Draft EIR, p. 4.8-22 - 4.8-26)

Explanation: All individual development proposals within the Project site would be required to comply with all requirements of the City's MS4 Permit, as well as the Trash Mandate adopted by the SARWQCB. All storm water discharges from individual development proposals within the Project site would be required to comply with applicable provisions of the County's National Pollutant Discharge Elimination System (NPDES) permit. Consistent with SARWQCB and City requirements, waste materials will not be discharged to drainage areas,

streambeds, or streams. Nor will spoil sites be located in areas that could result in spoil materials being washed into a water body.

Additionally, all development proposals within the Project site would be required to comply with Standard City Conditions of Approval including implementation of development-specific WQMPs, thereby avoiding/minimizing potential water quality impacts.

The City, as one element of its established development review processes would ensure NPDES Permit compliance concurrent with application(s) for development permits within the Project site.

Implementation of the WQMPs and compliance with applicable NPDES and SARWQCB requirements will reduce potential operational-source water quality impacts to levels that would be less-than-significant.

b. ***Groundwater Supplies***

Threshold: Would the Project substantially deplete groundwater supplies or interfere substantially with groundwater recharge such that the Project may impede sustainable groundwater management of the basin?

Finding: Less than significant. (Initial Study, pp. 3-35)

Explanation: Direct additions or withdrawals of groundwater are not proposed by the Project. Further, construction proposed by the Project will not involve substructures or other intrusions at depths that would significantly impair or alter the direction or rate of flow of groundwater. Water is provided throughout the City by the City of Ontario Utilities Department. Groundwater which may be consumed by the Project and the City of Ontario, as a whole, would be recharged pursuant to the Department's policies and programs. The Project site is not a designated groundwater recharge area. The Project does not propose or require facilities or operations that would otherwise adversely affect designated recharge areas.

c. ***Erosion or Siltation***

Threshold: Would the Project substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river or through the addition of impervious surfaces, in a manner which would:

(i) result in substantial erosion or siltation on- or off-site

Finding: Less than significant. (Initial Study, pp. 3-36)

Explanation: Project construction activities would temporarily expose underlying soils, thereby increasing their susceptibility to erosion. Potential erosion impacts incurred during construction activities are mitigated

below the level of significance through the Project's mandated compliance with a City-approved Storm Water Pollution Prevention Plan (SWPPP), as well as compliance with SCAQMD Rules that prohibit grading activities and site disturbance during high wind events. At Project completion, potential soil erosion impacts in the area will be resolved, as pavement, roads, buildings, and landscaping are established, overcovering previously-exposed soils.

The Project does not propose altering existing topography in a manner that would result in substantial soil erosion or the loss of topsoil. All Project development plans would be subject to review and approval by the City. As part of this review, the City would ensure that permanent slopes and slope protection would conform to City requirements, thereby minimizing the potential for soil erosion over the life of the Project. City review and approval of development plans would also ensure that stormwater management systems are incorporated that would minimize potential erosion from stormwater runoff, both on-site and off-site.

d. ***Flooding and Runoff***

Threshold: Would the Project substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river or through the addition of impervious surfaces, in a manner which would:

iv) Impede or redirect flood flows?

Finding: Less than significant. (Draft EIR, p. 4.8-31)

Explanation: As shown at Policy Plan Figure S-2, *Flood Hazards*, the Project site is located within a 500-year flood plain and is within the San Antonio Creek Dam Failure Inundation Area. The Project site does not, however, lie within a designated 100-year floodplain or other areas known to be subject to moving or high-velocity floodwaters. The Project does not propose or require facilities or operations that would otherwise impede or redirect flood flows.

e. ***Flood Hazard***

Threshold: Would the project in flood hazard, tsunami, or seiche zones, risk release of pollutants due to project inundation?

Finding: Less than significant. (Draft EIR, p. 4.8-31)

Explanation: The Project site is not located within an area subject to tsunami, or seiche events. There is no potential for the Project to be adversely affected in these regards.

The Project site does, however, lie within a 500-year floodplain and is within the San Antonio Creek Dam Failure Inundation Area. There

is, therefore, the potential for the Project generally to be subject to inundation under 500-year flood conditions or in the event of the San Antonio Creek Dam failure. Either of these are relatively low probability events. Catastrophic failure of the San Antonio Dam when it is at or near capacity could spread water two to four feet deep over the western and central parts of the City. However, the City has never experienced such an event.

TOP 2050 SEIR concluded that the probability of catastrophic failure of the San Antonio Dam is very low. Furthermore, the City of Ontario Fire Department maintains a list of emergency procedures to be followed in the event of a dam failure (TOP 2050 SEIR, p. 5.10-26). Because the likelihood of catastrophic failure of the San Antonio Dam is very low and the City is prepared in the event of such failure, impacts related to potential release of pollutants under dam failure conditions are considered less-than-significant.

Potential for release of pollutants under 500-year flood conditions or in the event of dam failure is minimized through the location, orientation, and construction of Project facilities consistent with City Building Code requirements and implementation of the Project stormwater management system improvements described in this Section. Additionally, the Project commercial and light industrial uses would be required to develop and implement Hazardous Materials Release Response Plans and Inventory (Business Plans) that specifically address storage and use of hazardous materials so as to minimize their potential release, containment of hazardous materials and related pollutants that may be released under emergency conditions, and measures to reduce potential effects of hazardous materials and related pollutants if released.

f. ***Water Quality Control Plan***

Threshold: Would the Project conflict with or obstruct implementation of a water quality control plan or sustainable groundwater management plan?

Finding: Less than significant. (Draft EIR, pp. 4.8-32 – 4.8-33)

Explanation: The Project would implement water quality control measures consistent with City and SARWQCB requirements. The City of Ontario draws all of its groundwater supply from the Chino Basin. Since 1978, the basin has been managed via ongoing court adjudication in the 1978 judgment Chino Basin Municipal Water District vs. City of Chino et al. The Project does not propose or require direct withdrawal of groundwater. Neither would the Project adversely affect designated groundwater recharge areas or groundwater recharge facilities. To the extent practical, individual

development proposals within the Project site would implement LID measures facilitating infiltration of treated stormwaters to the groundwater table.

10. LAND USE AND PLANNING

a. *Established Communities*

Threshold: Would the Project physically divide an established community?

Finding: Less than significant. (Initial Study, p. 3-37)

Explanation: The developed Project would establish a pattern of cohesive and complementary land uses. The Project configuration and orientation of land uses, combined with integral development standards and design guidelines, act to preclude division or disruption of an established community, whether that community be internal or external to the Project site. Physical arrangement of surrounding areas would not be modified or otherwise affected by the Project.

b. *Conflict*

Threshold: Would the Project cause a significant environmental impact due to a conflict with any land use plan, policy, or regulation adopted for the purpose of avoiding or mitigating an environmental effect?

Finding: Less than significant. (Draft EIR, pp. 4.1-10 - 4.1-24)

Explanation: Land use plans, policies, or regulations adopted for the purpose of avoiding or mitigating environmental effects are established under the City of Ontario Policy Plan and the SCAG. Project consistency with applicable provisions of the City of Ontario Policy Plan and SCAG Connect SoCal 2020 are presented in Draft EIR Section 4.1, *Land Use and Planning*.

The Project would establish Land Uses, Development Regulations, and Design Guidelines directing the ultimate buildout of the Project site. Land uses and development reflected within the proposed 2022 Specific Plan Amendment can be feasibly implemented consistent with applicable provisions of the City General Plan and the City Development Code. Prior to issuance of development permits, the City would review the final development plans for individual projects within the 2022 Specific Plan Amendment area to ensure consistency with the 2022 Specific Plan Amendment document as approved by the City, and where applicable, City Development Code requirements. Further, the Project would be consistent with applicable land use and planning provisions of the Policy Plan.

11. MINERAL RESOURCES

a. *Regional and Statewide Mineral Resources*

Threshold: Would the Project result in the loss of availability of a known mineral resource that would be of value to the region and the residents of the State?

Finding: Less than significant. (Initial Study, pp. 3-38 – 3-39)

Explanation: Mineral resources in the City are limited to construction aggregates such as sand and gravel. There are currently no permitted mining operations located within the City (TOP 2050 DSEIR, p. 5.12-2). TOP 2050 DSEIR at Figure 5.12-1, *Areas of Mineral Resource Significance,* indicates that the Project site is classified pursuant to the California Geological Survey as Mineral Resource Zone 3 (MRZ-3). The Project does not propose or require facilities or operations that would affect the availability of locally important or regionally important mineral resources.

b. *Locally-Important Mineral Resource*

Threshold: Would the project result in the loss of availability of a locally important mineral resource recovery site delineated on a local general plan, specific plan, or other land use plans?

Finding: Less than significant. (Initial Study, pp. 3-38 – 3-39)

Explanation: Mineral resources in the City are limited to construction aggregates such as sand and gravel. There are currently no permitted mining operations located within the City (TOP 2050 DSEIR, p. 5.12-2). TOP 2050 DSEIR at Figure 5.12-1, *Areas of Mineral Resource Significance,* indicates that the Project site is classified pursuant to the California Geological Survey as Mineral Resource Zone 3 (MRZ-3). The Project does not propose or require facilities or operations that would affect the availability of locally important or regionally important mineral resources.

12. NOISE

a. *Vibration*

Threshold: Would the Project result in generation of excessive groundborne vibration or groundborne noise levels?

Finding: Less than significant. (Draft EIR, pp. 4.6-30 – 4.6-31)

Explanation: Construction activity can result in varying degrees of ground vibration, depending on the equipment and methods used, distance to the affected structures and soil type. It is expected that groundborne vibration from Project construction activities would cause only intermittent, localized intrusion.

Groundborne vibration levels resulting from construction activities occurring within the Project site were estimated by data published by the Federal Transit Administration. The highest construction vibration levels are expected to range from 0.003 to 0.068 in/sec PPV and will satisfy the maximum acceptable vibration threshold of 0.3 PPV (in/sec). Moreover, the impacts at the closest sensitive receivers are unlikely to be sustained during the entire construction period but will occur rather only during the times that heavy construction equipment is operating adjacent to the Project site perimeter.

b. ***Airport Noise***

Threshold: For a project located within the vicinity of a private airstrip or an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the Project expose people residing or working in the Project area to excessive noise levels?

Finding: Less than significant. (Draft EIR, p. 4.6-32)

Explanation: The Project site is located approximately 2.4 miles southerly of the Ontario International Airport (ONT) and is located within the ONT Airport Influence Area.

The Ontario International Airport Land Use Compatibility Plan (ONT ALUCP) was amended July 2018 to promote compatibility between airport and surrounding land uses. Since the Project site is located within the ONT Airport Influence Area, the Project is subject to the Noise Criteria established at Table 2-3 of the ONT ALUCP.

The Project site is located outside the 60-65 dBA CNEL airport noise impact zone. According to Table 2-3 of the ONT ALUCP, residential, commercial, light industrial and community facilities land uses located outside the 60-65 dBA CNEL, are considered normally compatible land use. For normally compatible land use, either the activities associated with the land use are inherently noisy or standard construction methods will sufficiently attenuate exterior noise to an acceptable indoor community noise equivalent level (CNEL).

13. POPULATION AND HOUSING

a. ***Population Growth***

Threshold: Would the Project induce substantial unplanned population growth in an area, either directly (for example, by proposing new homes and businesses) or indirectly (for example, through extension of roads or other infrastructure)?

Finding: Less than significant. (Initial Study, p. 3-41)

Explanation: The Project proposes new and reconfigured residential uses that would directly contribute to population growth. Additionally, the Project light industrial and commercial uses would create additional employment opportunities that could indirectly contribute to population growth. Development proposed by the Project responds globally to existing and anticipated market demands of the City and region, and employment generated by the Project would be a byproduct of this anticipated growth. The Project represents a component of development and growth anticipated by the City, as reflected by the site's TOP 2050 General Plan Land Use designations.

b. ***Displacement of Housing***

Threshold: Would the project displace substantial numbers of existing people or housing, necessitating the construction of replacement housing elsewhere?

Finding: Less than significant impact. (Initial Study, p. 3-42)

Explanation: The Project would maintain net residential development within the Specific Plan Area when compared to land uses and development entitled under the 2021 Specific Plan. That is, under both the 2021 Specific Plan and the proposed 2022 SPA, 7,194 dwelling units (all residential types) would be entitled. Locations and configurations of entitled residential uses would however be amended under the 2022 SPA. These amendments would not eliminate housing, diminish the potential for new housing, or displace persons from existing housing.

14. PUBLIC SERVICES

a. ***Fire Protection***

Threshold: Would the project result in substantial adverse physical impacts associated with the provision of new or physically altered governmental facilities, need for new or physically altered governmental facilities, the construction of which could cause significant environmental impacts, in order to maintain acceptable service ratios, response times or other performance objectives for any of the public services:

i) Fire Protection?

Finding: Less than significant. (Initial Study, pp. 3-43 – 3-44)

Explanation: Fire suppression and emergency response services for the Project would be provided by the Ontario Fire Department (OFD). TOP 2050 SEIR recognizes the potential for development pursuant to The Ontario Plan, including development of the area encompassing the Project site to result in increased demands for fire protection services (TOP 2050 DSEIR, p. 5.15-3). TOP 2050 SEIR also recognizes that

evaluation of potential environmental impacts resulting from the construction or expansion of new or modified fire protection facilities would be speculative until such time the location(s) of such facilities are determined. The Project provides for potential location of a new fire station at the northwest corner of Ontario Ranch Road (E – W) at Mill Creek Avenue (N – S). Ultimate need for and location of this fire station would be subject to review and approval by the City and Fire Department. Environmental review of this facility would be conducted when and as required by the City.

Additionally, the Project would pay General City (GC) Development Impact Fees, a portion of which is available to offset incremental fire protection service demands generated by the Project. The Project Applicant would pay incumbent Development Impact Fees at issuance of building permit(s).

To the satisfaction of the OFD, the Project would comply with City and OFD fire prevention and suppression requirements, including building/site design requirements, substantiated fire flow adequacy, and provisions for emergency access, thereby reducing potential increased demands for fire protection services.

b. ***Police Protection***

Threshold: Would the project result in substantial adverse physical impacts associated with the provision of new or physically altered governmental facilities, need for new or physically altered governmental facilities, the construction of which could cause significant environmental impacts, in order to maintain acceptable service ratios, response times or other performance objectives for any of the public services:

ii) Police Protection?

Finding: Less than significant. (Initial Study, pp. 3-44 – 3-45)

Explanation: The Project does not propose or require construction or modification of police protection facilities. The Project site is not designated or proposed as the location for new or modified police protection facilities. Incremental police protection service demands generated by the Project are offset through Project payment of City of Ontario General City (GC) Development Impact Fees. A portion of the City's GC Development Impact Fees are allocated for police protection services. The Project Applicant would pay incumbent Development Impact Fees at issuance of building permit(s).

Additionally, the Project site plan concept and proposed building designs would be reviewed by the Ontario Police Department (OPD) to ensure incorporation of appropriate safety and security elements. Such design features would include secure building designs,

defensible spaces, and area and facility security lighting. These design features would act to reduce Project demands for police protection services.

c. *Schools*

Threshold: Would the project result in substantial adverse physical impacts associated with the provision of new or physically altered governmental facilities, need for new or physically altered governmental facilities, the construction of which could cause significant environmental impacts, in order to maintain acceptable service ratios, response times or other performance objectives for any of the public services:

iii) Schools?

Finding: Less than significant. (Initial Study, pp. 3-45 – 3-46)

Explanation: Occupancy of the Project residential uses would directly contribute to demands on school services. Indirectly, the Project may contribute to area demands for school services if Project employees and their school age children would relocate to school districts serving the City.

The Project does not propose or require construction or modification of school facilities. The Project site is not designated or proposed as the location for new or modified school facilities.

Project incremental impacts to school services would be offset through mandated payment of school impact fees. The Project Applicant would pay incumbent school impact fees at issuance of building permit(s). Payment of school impact fees would reduce the Project's potential impacts to school services to levels that would be less-than-significant.

d. *Parks*

Threshold: Would the project result in substantial adverse physical impacts associated with the provision of new or physically altered governmental facilities, need for new or physically altered governmental facilities, the construction of which could cause significant environmental impacts, in order to maintain acceptable service ratios, response times or other performance objectives for any of the public services:

iii) Parks?

Finding: Less than significant. (Initial Study, pp. 3-46 – 3-47)

Explanation: The Project includes parks and open space non-recreation areas that would complement and support development of the Specific Plan Area generally. Potential environmental effects of construction

of these facilities are reflected in the scope on analysis of environmental impacts of the Project in total.

e. *Other Public Facilities*

Threshold: Would the project result in substantial adverse physical impacts associated with the provision of new or physically altered governmental facilities, need for new or physically altered governmental facilities, the construction of which could cause significant environmental impacts, in order to maintain acceptable service ratios, response times or other performance objectives for any of the public services:

iii) Other Public Facilities?

Finding: Less than significant. (Initial Study, p. 3-47)

Explanation: Development of the Project would require established public agency oversight including, but not limited to, various plan check and permitting actions by the City. Impacts of the Project would fall within routine tasks of these agencies/departments and are paid for via plan check and inspection fees. Impacts of the Project would not be of such magnitude that new or physically altered facilities would be required. There are no known or probable other public facilities that would be substantially affected by the Project.

15. RECREATION

a. *Increased Use*

Threshold: Would the project increase the use of existing neighborhood and regional parks or other recreational facilities such that substantial physical deterioration of the facility would occur or be accelerated?

Finding: Less than significant. (Initial Study, p. 3-48)

Explanation: The Project includes parks and open space non-recreation areas that would complement and support development of the Specific Plan Area generally. Potential environmental effects of construction of these facilities are reflected in the scope on analysis of environmental impacts of the Project in total. Of themselves, environmental impacts of parks and open space non-recreation areas that would be constructed as part of the Project are considered less-than-significant. New residential development within the City is required to pay GC Development Impact Fees, a portion of which would be allocated for parks facilities, acting to offset incremental demands on neighborhood and regional parks or other recreational facilities. The Applicant would pay all requisite GC Development Impact Fees.

b. ***Construction and Expansion***

Threshold: Does the project include recreational facilities or require the construction or expansion of recreational facilities which might have an adverse physical effect on the environment?

Finding: Less than significant. (Initial Study, p. 3-48)

Explanation: The Project includes parks and open space non-recreation areas that would complement and support development of the Specific Plan Area generally. Potential environmental effects of construction of these facilities are reflected in the scope on analysis of environmental impacts of the Project in total. Of themselves, environmental impacts of parks and open space non-recreation areas that would be constructed as part of the Project are considered less-than-significant. New residential development within the City is required to pay GC Development Impact Fees, a portion of which would be allocated for parks facilities, acting to offset incremental demands on neighborhood and regional parks or other recreational facilities. The Applicant would pay all requisite GC Development Impact Fees.

16. TRANSPORTATION AND TRAFFIC

a. ***Plans, Policies, and Ordinances***

Threshold: Would the Project conflict with a program plan, ordinance or policy addressing the circulation system, including transit, roadway, bicycle, and pedestrian facilities?

Finding: Less than significant. (Draft EIR, pp. 4.2-10 - 4.2-20)

Explanation: City of Ontario programs, plans, and policies addressing the circulation system are established under TOP 2050. The Project would be consistent with applicable provisions of TOP 2050 as summarized in Draft EIR Table 4.2-6. Additionally, the Project is consistent with the goals of the 2020-2045 SCAG Regional Transportation Plan/Sustainable Communities Strategy (Connect SoCal 2020) as summarized in Draft EIR Table 4.2-7.

Prior to the issuance of Building Permits, the City would review the final Project designs to ensure consistency with City Policy Plan circulation system programs, plans and policies. Consistency with applicable City ordinance requirements is required as a matter of law.

The Project does not propose facilities or activities that would otherwise potentially conflict with City circulation system programs, plans, policies and ordinances.

b. ***Design Hazards and Emergency Access***

Threshold: Would the Project substantially increase hazards due to a geometric design feature (e.g., sharp curves or dangerous intersections) or incompatible uses (e.g., farm equipment); Would the Project result in inadequate emergency access?

Finding: Less than significant. (Draft EIR, pp. 4.2-21 - 4.2-22)

Explanation: All Project circulation improvements, the final design of the Project site plan, to include locations and design of proposed driveways, shall be reviewed and approved by the City Traffic Engineer. In addition, representatives of the City's Police and Fire Departments will review the Project's plans in regard to emergency access. Traffic signing and striping would be implemented in conjunction with detailed Project construction plans. Sight distance at each Project access point would be reviewed with respect to Caltrans and City of Ontario sight distance standards at the time of preparation of final grading, landscape and street improvement plans.

It is also recognized that temporary and short-term traffic detours and traffic disruption could result during Project construction activities. Management and control of construction traffic would be addressed through the preparation and submittal of a construction area traffic management plan, to be reviewed and approved by City prior to or concurrent with Project building plan review(s).

The Project would generate passenger car trips and truck trips typical of the proposed uses. As part of established site and Building Permit review processes, the City would require implementation of on-site truck and passenger car travel paths, signing, and traffic controls to ensure that conflicts between trucks and passenger cars are minimized or avoided. Trucks accessing the Project site would use designated truck routes, thereby avoiding or minimizing off-site passenger car/truck traffic conflicts. Land uses proximate to the Project site are planned for or are being developed with urban uses similar to those proposed by the Project. These uses would generate urban traffic types similar to traffic generated by the Project and would generate traffic that would be incompatible with the Project traffic types.

17. UTILITIES AND SERVICE SYSTEMS

a. ***Expanded water, wastewater treatment, or stormwater drainage, electric power, natural gas, or telecommunications facilities***

Threshold: Would the Project require or result in the relocation or construction of new or expanded water, wastewater treatment, or stormwater

drainage, electric power, natural gas, or telecommunications facilities, the construction or relocation of which could cause significant environmental effects?

Finding: Less than significant. (Draft EIR, pp. 4.12-12 - 4.12-23)

Explanation: Utilities and service systems distribution and conveyance lines serving the Project would be constructed pursuant to approved City Infrastructure Master Plans and would be located within existing improved streets or otherwise disturbed properties, thereby limiting or avoiding potential impacts. Construction and operation of all Project utilities and service systems distribution and conveyance lines would conform with all City and purveyor standards and requirements, further limiting potential environmental effects.

This EIR evaluates likely maximum impacts associated with all Project actions and operations, including but not limited to construction and operation of utilities and service systems distribution and conveyance lines. Construction and operation of the Project utilities and service systems distribution and conveyance lines described in this Section would not result in conditions or environmental impacts not already considered and addressed elsewhere in this EIR.

Each individual development project within the Specific Plan area would be required to pay applicable utilities/service system connection and service fees, which act to offset the Project incremental demands on utilities and service systems. Utilities and service systems improvements would be implemented so as to provide adequate service/capacity for each increment of development. The City would verify service/capacity adequacies prior to issuance of Certificate(s) of Occupancy for the affected increment of development.

b. *Water Supplies*

Threshold: Would the Project have sufficient water supplies available to serve the Project and reasonably foreseeable future development during normal, dry, and multiple dry years?

Finding: Less than significant. (Draft EIR, pp. 4.12-23 - 4.12-24)

Explanation: Water service to the Project would be provided by OMUC. OMUC's 2020 Urban Water Management Plan (2020 UWMP) includes detailed information about City water demand, supply and reliability for the next 25 years. The 2020 UWMP substantiates that sufficient

water supplies are available to meet City water demands under normal, single dry, and multiple dry years for the period 2020 – 2045.

Consistent with SB 610 requirements, a WSA was prepared and approved for the site's current (2021 Specific Plan) entitlements. The City of Ontario, Ontario Municipal Utilities Company (OMUC) has determined that based on the types and scopes of land uses reflected in the 2022 Specific Plan Amendment, and water demands of each of the 2022 Specific Plan Amendment land uses, water demands of the 2022 Specific Plan Amendment uses would be reduced when compared to water demands evaluated in the currently approved WSA.

c. *Wastewater Capacity*

Threshold: Would the Project result in a determination by the wastewater treatment provider, which serves or may serve the Project that it has adequate capacity to serve the project's projected demand in addition to the provider's existing commitments?

Finding: Less than significant. (Draft EIR, pp. 4.12-24 - 4.12-25)

Explanation: Wastewater treatment services for the Project would be provided by IEUA. Sufficient residual treatment capacity exists at IEUA Regional Water Reclamation Plant No. 5 (IEUA Plant No. 5) to serve the Project's projected wastewater treatment demand in addition to IEUA current wastewater treatment demands. The Project would not generate wastewater that would require treatment processes or protocols not currently provided by IEUA.

d. *Solid Waste*

Threshold: Would the Project generate solid waste in excess of State or local standards, or in excess of the capacity of local infrastructure, or otherwise impair the attainment of solid waste reduction goals; Would the project comply with federal, state, and local management and reduction statutes and regulations related to solid waste?

Finding: Less than significant. (Draft EIR, pp. 4.12-25 - 4.12-30)

Explanation: The City of Ontario Integrated Waste Department provides refuse collection services to the residents and businesses in the City of Ontario. The predominance of collected City refuse is transported for disposal at the Badlands Sanitary Landfill and/or El Sobrante Landfill. Receiving landfill statistical information is provided at Draft EIR Table 4.12-1. Solid waste would be generated by Project construction/demolition activities as well as Project operations. The Project is consistent with TOP 2050. TOP 2050 SEIR concluded that buildout of the City would not result in potentially significant solid waste management impacts.

The Project would be required to comply with the above solid waste management statutes and regulations. The City and CalRecycle would oversee and monitor compliance with applicable solid waste management statutes and regulations. Impacts to solid waste services and facilities from new development are addressed through the payment of development impact fees as outlined in the City of Ontario Development Impact Fee Calculation and Nexus Fee Schedules.

Solid waste management is guided by the California Integrated Waste Management Act of 1989 (AB 939), which emphasizes resource conservation through reduction, recycling, and reuse of solid waste. To reduce waste disposal, AB 939 requires every California city and county to divert 50 percent of its waste from landfills. Residential, commercial and governmental waste recycling programs in support of the SRRE have been implemented by the City. The City is currently meeting or exceeding all AB 939 solid waste diversion targets. The Project would be required to comply with AB 939 as implemented by the City.

18. WILDFIRE

a. *Response Plans, Pollutant Concentrations, Infrastructure Risks, and Runoff Risks*

Threshold: Would the project substantially impair an adopted emergency response plan or emergency evacuation plan?

Finding: Less than significant. (Initial Study, p. 3-55)

Explanation: CAL FIRE maintains California Fire Hazard Severity Zone Maps, including maps for State responsibility areas, as well as local responsibility areas. As shown on the State responsibility map for southwestern San Bernardino County, the City of Ontario is located within a local responsibility area. According to the local responsibility map, Ontario is located in a non-very high fire hazard severity zone (Non-VHFHSZ).

As such, the Project is not located within or near a state responsibility area, or within an area classified as a very high fire hazard severity zone. All development would be required to comply with City building and Fire Codes. All building plans within the City are reviewed by the Ontario Fire Department to ensure their compliance with the City's fire code.

b. ***Response Plans, Pollutant Concentrations, Infrastructure Risks, and Runoff Risks***

Threshold: Would the project, due to slope, prevailing winds, and other factors, exacerbate wildlife risks, and thereby expose Project occupants to pollutant concentrations from a wildfire or the uncontrolled spread of a wildfire?

Finding: Less than significant. (Initial Study, p. 3-55)

Explanation: CAL FIRE maintains California Fire Hazard Severity Zone Maps, including maps for State responsibility areas, as well as local responsibility areas. As shown on the State responsibility map for southwestern San Bernardino County, the City of Ontario is located within a local responsibility area. According to the local responsibility map, Ontario is located in a non-very high fire hazard severity zone (Non-VHFHSZ).

As such, the Project is not located within or near a state responsibility area, or within an area classified as a very high fire hazard severity zone. All development would be required to comply with City building and Fire Codes. All building plans within the City are reviewed by the Ontario Fire Department to ensure their compliance with the City's fire code.

c. ***Response Plans, Pollutant Concentrations, Infrastructure Risks, and Runoff Risks***

Threshold: Would the Project require the installation or maintenance of associated infrastructure (such as roads, fuel breaks, emergency water sources, power lines or other utilities) that may exacerbate fire risk or that may result in temporary or ongoing impacts to the environment?

Finding: Less than significant. (Initial Study, p. 3-55)

Explanation: CAL FIRE maintains California Fire Hazard Severity Zone Maps, including maps for State responsibility areas, as well as local responsibility areas. As shown on the State responsibility map for southwestern San Bernardino County, the City of Ontario is located within a local responsibility area. According to the local responsibility map, Ontario is located in a non-very high fire hazard severity zone (Non-VHFHSZ).

As such, the Project is not located within or near a state responsibility area, or within an area classified as a very high fire hazard severity zone. All development would be required to comply with City building and Fire Codes. All building plans within the City are reviewed by the Ontario Fire Department to ensure their compliance with the City's fire code.

d. ***Response Plans, Pollutant Concentrations, Infrastructure Risks, and Runoff Risks***

Threshold: Would the Project expose people or structures to significant risks, including downslope or downstream flooding or landslides, as a result of runoff, post-fire slope instability, or drainage changes?

Finding: Less than significant. (Initial Study, p. 3-55)

Explanation: CAL FIRE maintains California Fire Hazard Severity Zone Maps, including maps for State responsibility areas, as well as local responsibility areas. As shown on the State responsibility map for southwestern San Bernardino County, the City of Ontario is located within a local responsibility area. According to the local responsibility map, Ontario is located in a non-very high fire hazard severity zone (Non-VHFHSZ).

As such, the Project is not located within or near a state responsibility area, or within an area classified as a very high fire hazard severity zone. All development would be required to comply with City building and Fire Codes. All building plans within the City are reviewed by the Ontario Fire Department to ensure their compliance with the City's fire code.

C. FINDINGS REGARDING SIGNIFICANT ENVIRONMENTAL IMPACTS THAT CAN BE REDUCED TO A LESS THAN SIGNIFICANT LEVEL

The City Council hereby finds that mitigation measures have been identified in the EIR that will avoid or substantially lessen the following potentially significant environmental impacts to a less than significant level. The potentially significant impacts, and the Mitigation Measures that will reduce them to a less than significant level, are as follows:

1. BIOLOGICAL RESOURCES

a. ***Sensitive Species***

Threshold: Would the Project have a substantial adverse effect, either directly or through habitat modifications, on any species identified as a candidate, sensitive, or special status species in local or regional plans, policies, or regulations, or by the California Department of Fish and Wildlife or U.S. Fish and Wildlife Service?

Finding: Less than significant with mitigation. (Draft EIR, pp. 4.10-15 - 4.10-17)

Explanation: Although no nesting birds were observed on-site, raptors (birds of prey), migratory birds, and other avian species are protected by the federal Migratory Bird Treaty Act (MBTA). Mitigation Measure 4.10.1 has been incorporated to ensure avoidance of any potential impacts, in accordance with MBTA requirements.

Additionally, although on-site activities have reduced the suitability of habitat to support special-status species known to occur in the general vicinity, the following special status-species may be affected by the Project:

- California horned lark;
- Loggerhead shrike;
- San Diego black-tailed jackrabbit; and
- Burrowing owl.

Although the California horned lark, Loggerhead shrike, and San Diego black-tailed jackrabbit are listed as state Species of Special Concern (SSC) in California, they are not federally, or state listed as threatened or endangered. These species and their habitats are considered widespread and relatively common throughout coastal southern California. Due to the presence of suitable habitat throughout southern California and the widespread and common nature of these species, impacts of the Project on these species would not be considered significant. Potential nesting California horned larks and Loggerhead shrikes would be protected by Mitigation Measure 4.10.1.

Mitigation Measures:

4.10.1 Avoidance of Nesting Migratory Birds: If possible, all vegetation removal activities shall be scheduled from August 1 to February 1, which is outside the general avian nesting season. This would ensure that no active nests would be disturbed, and that removal could proceed rapidly. If vegetation is to be cleared during the nesting season, all suitable habitat will be thoroughly surveyed within 72 hours prior to clearing for the presence of nesting birds by a qualified biologist (Project Biologist). The Project Biologist shall be approved by the City and retained by the Applicant. The survey results shall be submitted by the Project Applicant to the City Planning Department. If any active nests are detected, the area shall be flagged and mapped on the construction plans along with a minimum 300-foot buffer, with the final buffer distance to be determined by the Project Biologist. The buffer area shall be avoided until, as determined by the Project Biologist, the nesting cycle is complete, or it is concluded that the nest has failed. In addition, the Project Biologist shall be present on the site to monitor the vegetation removal to ensure that any nests, which were not detected during the initial survey, are not disturbed.

4.10.2 Avoidance of Nesting Burrowing Owls: No more than 72 hours prior to any site disturbances, focused surveys for the burrowing owl shall

be conducted. If absence of this species is confirmed, Project work can proceed. If, however, burrowing owl is located on site, the appropriate resource agencies (CDFW and USFWS) shall be contacted. The Project Applicant shall consult with the wildlife agencies regarding the most appropriate methods and timing for removal of owls. As necessary, owls will be actively evicted following agency approved protocols (i.e., placing a one-way door at the burrow entrance to ensure that owls cannot access the burrow once they leave). Any such active eviction shall occur outside of the breeding/nesting season. That is, active eviction shall be accomplished between September 1 and February 15. If more than 30 days has elapsed between owl eviction and completion of clearing and grubbing activities, a subsequent survey for the burrowing owl shall be conducted to ensure that owls have not re-populated the site. Any reoccupation by owls will require subsequent protocol active eviction.

With the implementation of Mitigation Measures 4.10.1 and 4.10.2, the Project's potential impacts to species identified as a candidate, sensitive, or special-status species are considered less-than-significant.

2. CULTURAL/TRIBAL CULTURAL RESOURCES

a. *Archaeological and Tribal Resources*

Threshold: Would the Project cause a substantial adverse change in the significance of an archaeological resource pursuant to §15064.5?

Would the Project cause a substantial adverse change in the significance of a tribal cultural resource, defined in PRC §21074 as either a site, feature, place, cultural landscape that is geographically defined in terms of the size and scope of the landscape, sacred place, or object with cultural value to a California Native American tribe, and that is:

a) Listed or eligible for listing in the CRHR, or in a local register of historical resources as defined in PRC §5020.1(k), or

b) A resource determined by the lead agency, in its discretion and supported by substantial evidence, to be significant pursuant to criteria set forth in subdivision (c) of PRC §5024.1. In applying the criteria set forth in subdivision (c) of PRC §5024.1, the lead agency shall consider the significance of the resource to a California Native American tribe?

Finding: Less than significant with mitigation. (Draft EIR, pp. 4.11-14 - 4.11-19)

Explanation: Although no archeological resources were identified as part of the Project Cultural Resources Assessment, ground-disturbing activities

have the potential to reveal buried resources not observed during the field survey.

Potential impacts to Tribal Cultural Resources (TCRs) are presumed to be potentially significant. Based on previous similar environmental analyses conducted in the City, the following measures are recommended for incorporation. These measures establish monitoring protocols, and provisions for avoidance, protection, or curation of TCRs.

Implementation of Mitigation Measures 4.11.1 through 4.11.3 ensures proper protocol is undertaken and a treatment plan is developed, should archaeological resources be discovered during ground-disturbing activities and that TCRs would be avoided, or would be appropriately collected, documented, and curated.

Mitigation Measures:

4.11.1 Retain a Native American Monitor Prior to Commencement of Ground-Disturbing Activities:

A. The project applicant/lead agency shall retain a Native American Monitor from or approved by the Gabrieleño Band of Mission Indians – Kizh Nation. The monitor shall be retained prior to the commencement of any "ground-disturbing activity" for the subject project at all project locations (i.e., both on-site and any off-site locations that are included in the project description/definition and/or required in connection with the project, such as public improvement work). "Ground-disturbing activity" shall include, but is not limited to, demolition, pavement removal, potholing, auguring, grubbing, tree removal, boring, grading, excavation, drilling, and trenching.

B. A copy of the executed monitoring agreement shall be submitted to the lead agency prior to the earlier of the commencement of any ground-disturbing activity, or the issuance of any permit necessary to commence a ground-disturbing activity.

C. The monitor will complete daily monitoring logs that will provide descriptions of the relevant ground-disturbing activities, the type of construction activities performed, locations of ground-disturbing activities, soil types, cultural-related materials, and any other facts, conditions, materials, or discoveries of significance to the Tribe. Monitor logs will identify and describe any discovered TCRs, including but not limited to, Native American cultural and historical artifacts, remains, places of significance, etc., (collectively, tribal cultural resources, or "TCR"), as well as any discovered Native American (ancestral) human remains and burial goods. Copies of monitor logs will be provided to the project applicant/lead agency upon written request to the Tribe.

D. On-site tribal monitoring shall conclude upon the latter of the following (1) written confirmation to the Kizh from a designated point of contact for the project applicant/lead agency that all ground-disturbing activities and phases that may involve ground-disturbing activities on the project site or in connection with the project are complete; or (2) a determination and written notification by the Kizh to the project applicant/lead agency that no future, planned construction activity and/or development/construction phase at the project site possesses the potential to impact Kizh TCRs.

E. Upon discovery of any TCRs, all construction activities in the immediate vicinity of the discovery shall cease (i.e., not less than the surrounding 50 feet) and shall not resume until the discovered TCR has been fully assessed by the Kizh monitor and/or Kizh archaeologist. The Kizh will recover and retain all discovered TCRs in the form and/or manner the Tribe deems appropriate, in the Tribe's sole discretion, and for any purpose the Tribe deems appropriate, including for educational, cultural and/or historic purposes.

4.11.2 Unanticipated Discovery of Human Remains and Associated Funerary Objects:

A. Native American human remains are defined in PRC 5097.98 (d)(1) as an inhumation or cremation, and in any state of decomposition or skeletal completeness. Funerary objects, called associated grave goods in Public Resources Code Section 5097.98, are also to be treated according to this statute.

B. If Native American human remains and/or grave goods discovered or recognized on the project site, then all construction activities shall immediately cease. Health and Safety Code Section 7050.5 dictates that any discoveries of human skeletal material shall be immediately reported to the County Coroner and all ground-disturbing activities shall immediately halt and shall remain halted until the coroner has determined the nature of the remains. If the coroner recognizes the human remains to be those of a Native American or has reason to believe they are Native American, he or she shall contact, by telephone within 24 hours, the Native American Heritage Commission, and Public Resources Code Section 5097.98 shall be followed.

C. Human remains and grave/burial goods shall be treated alike per California Public Resources Code section 5097.98(d)(1) and (2).

D. Construction activities may resume in other parts of the project site at a minimum of 200 feet away from discovered human remains and/or burial goods, if the Kizh determines in its sole discretion that resuming construction activities at that distance is acceptable and provides the project manager express consent of that determination

(along with any other mitigation measures the Kizh monitor and/or archaeologist deems necessary). (CEQA Guidelines Section 15064.5(f).)

E. Preservation in place (i.e., avoidance) is the preferred manner of treatment for discovered human remains and/or burial goods. Any historic archaeological material that is not Native American in origin (non-TCR) shall be curated at a public, non-profit institution with a research interest in the materials, such as the Natural History Museum of Los Angeles County or the Fowler Museum, if such an institution agrees to accept the material. If no institution accepts the archaeological material, it shall be offered to a local school or historical society in the area for educational purposes.

F. Any discovery of human remains/burial goods shall be kept confidential to prevent further disturbance.

4.11.3 Procedures for Burials and Funerary Remains:

A. As the Most Likely Descendant ("MLD"), the Koo-nas-gna Burial Policy shall be implemented. To the Tribe, the term "human remains" encompasses more than human bones. In ancient as well as historic times, Tribal Traditions included, but were not limited to, the preparation of the soil for burial, the burial of funerary objects with the deceased, and the ceremonial burning of human remains.

B. If the discovery of human remains includes four or more burials, the discovery location shall be treated as a cemetery and a separate treatment plan shall be created.

C. The prepared soil and cremation soils are to be treated in the same manner as bone fragments that remain intact. Associated funerary objects are objects that, as part of the death rite or ceremony of a culture, are reasonably believed to have been placed with individual human remains either at the time of death or later; other items made exclusively for burial purposes or to contain human remains can also be considered as associated funerary objects. Cremations will either be removed in bulk or by means as necessary to ensure complete recovery of all sacred materials.

D. In the case where discovered human remains cannot be fully documented and recovered on the same day, the remains will be covered with muslin cloth and a steel plate that can be moved by heavy equipment placed over the excavation opening to protect the remains. If this type of steel plate is not available, a 24-hour guard should be posted outside of working hours. The Tribe will make every effort to recommend diverting the project and keeping the remains in situ and protected. If the project cannot be diverted, it may be determined that burials will be removed.

E. In the event preservation in place is not possible despite good faith efforts by the project applicant/developer and/or landowner, before ground-disturbing activities may resume on the project site, the landowner shall arrange a designated site location within the footprint of the project for the respectful reburial of the human remains and/or ceremonial objects.

F. Each occurrence of human remains and associated funerary objects will be stored using opaque cloth bags. All human remains, funerary objects, sacred objects and objects of cultural patrimony will be removed to a secure container on site if possible. These items should be retained and reburied within six months of recovery. The site of reburial/repatriation shall be on the project site but at a location agreed upon between the Tribe and the landowner at a site to be protected in perpetuity. There shall be no publicity regarding any cultural materials recovered.

G. The Tribe will work closely with the project's qualified archaeologist to ensure that the excavation is treated carefully, ethically and respectfully. If data recovery is approved by the Tribe, documentation shall be prepared and shall include (at a minimum) detailed descriptive notes and sketches. All data recovery data recovery-related forms of documentation shall be approved in advance by the Tribe. If any data recovery is performed, once complete, a final report shall be submitted to the Tribe and the NAHC. The Tribe does NOT authorize any scientific study or the utilization of any invasive and/or destructive diagnostics on human remains.

With the implementation of Mitigation Measures 4.11.1 and 4.11.3, the Project's potential impacts to archeological resources are considered less-than-significant.

3. GEOLOGY AND SOILS

a. *Liquefaction and Unstable Soils*

Threshold: Would the Project directly or indirectly cause potential substantial adverse effects, including the risk of loss, injury, or death involving:

iii) Seismic-related ground failure, including liquefaction?

Would the Project be located on a geologic unit or soil that is unstable, or that would become unstable as a result of the project and potentially result in on- or off-site landslide, lateral spreading, subsidence, liquefaction, or collapse?

Finding: Less than significant with mitigation. (Draft EIR, pp. 4.9-9 - 4.9-10)

Explanation: The Project Geotechnical Report substantiates that the potential at the site for landslides, lateral spreading, and/or liquefaction is low.

However, existing near-surface soils include fill materials, topsoil, manure, etc. These loose and compressible soils are not suitable for development. As such, the Report presents recommendations for site improvements to preclude impacts in this regard. These recommendations include site preparation, earthwork, remedial grading depths, and foundation recommendations. Compliance with the recommendations presented in the Project Geotechnical Report are required by Mitigation Measure 4.9.1.

Mitigation Measure:

4.9.1 All proposed development within the Specific Plan Area shall, at a minimum, comply with recommendations and standards identified in the Preliminary Geotechnical Report at Section 4.0, Recommendations. If further recommendations are developed as part of future site- and design-specific geotechnical investigations they shall prevail.

With the implementation of Mitigation Measure 4.9.1, the Project's potential impacts would be considered less-than-significant.

4. GREENHOUSE GAS EMISSIONS

a. *Liquefaction*

Threshold: Would the Project conflict with an applicable plan, policy or regulation adopted for the purpose of reducing the emission of greenhouse gases?

Finding: Less than significant with mitigation. (Draft EIR, pp. 4.4-46 - 4.4-49)

Explanation: The primary purpose of the City's Community Climate Action Plan (CAP) is to design a feasible strategy to reduce GHG emissions generated by community activities that is consistent with statewide Scoping Plan GHG reduction efforts. The City has identified a series of reduction measures to be implemented by the City. These reduction measures include programs that improve building energy efficiency, increase use of public and active transit and decrease VMT, increase use of alternative-fueled vehicles, increase use of renewable energy, reduce water consumption, and reduce waste.

The 2022 CCAP Update builds on and updates the 2014 CAP and furthers the City efforts to reduce GHG emissions and improve community resilience to hazardous conditions associated with climate change. The 2022 CCAP Update includes updated emissions inventories; updated emissions forecasts; identifies GHG emissions reduction targets to achieve the GHG reduction goals of

the City of Ontario consistent with Senate Bill 32, Executive Order S-03-05, and substantial progress toward the State's carbon neutrality goals of Executive Order B-55-18; and measures, that when quantified, achieve the GHG reduction targets for the City. Under the 2022 CCAP Update, mixed use developments that garner at least 100 Screening Table points would be consistent with the GHG emissions reduction targets in the City's 2022 CCAP Update.

Means to achieve the required 2022 CCAP Update 100 Screening Table points are dependent on Project final site plan and building plan designs, approved by the City. These designs have not yet been finalized at this concept stage of Project development. There is therefore the potential for the Project to *not* achieve the requisite 2022 CCAP Update 100 Screening Table points, and therefore conflict with City of Ontario 2022 CCAP Update plans, policies, or regulations adopted for the purpose of reducing the emissions of greenhouse gases. This is a potentially significant impact. To assure compliance with the City of Ontario 2022 CCAP Update, and plans, policies, and regulations contained (or incorporated by extension) therein, the following mitigation measure is required. Implementation of the design features and operational measures outlined at Tables 4.4-6, 4.4-7 would ensure that the Project is consistent with and supports the 2022 CAP Update. Project development proposals shall implement Screening Table Measures identified at Tables 4.4-6, 4.4-7 or equivalent measures acceptable to the City. The City shall verify that Screening Table Measures achieving a minimum of 100 points are incorporated in development plans prior to the issuance of building permit(s) and/or site plans (as applicable). Multiple development proposals may, at the discretion of the City, be allowed to collectively demonstrate achievement of at least 100 points per the Screening Tables. The City shall verify implementation of the selected Screening Table Measures prior to the issuance of Certificate(s) of Occupancy. At the discretion of the City, measures that provide GHG reductions equivalent to GHG emissions reductions achieved via the Screening Table Measures may be implemented.

Mitigation Measure:

4.4.1 Development proposals within the Specific Plan Area shall implement Screening Table Measures to achieve a minimum of 100 points per the City's 2022 CCAP Update Screening Tables. The City shall verify minimum 100-point attainment prior to issuance of site plans and building permits.

With the implementation of Mitigation Measure 4.4.1, the Project's potential to conflict with an applicable plan, policy or regulation

adopted for the purpose of reducing the emission of greenhouse gases would be considered less-than-significant.

5. HAZARDS AND HAZARDOUS MATERIALS

a. *Hazardous Materials*

Threshold: Would the Project create a significant hazard to the public or the environment through the routine transport, use, or disposal of hazardous materials?

Would the Project create a significant hazard to the public or the environment through reasonably foreseeable upset and accident conditions involving the release of hazardous materials into the environment?

Finding: Less than significant with mitigation. (Draft EIR, pp. 4.7-21 - 4.7-26)

Explanation: ***Existing On-Site Hazards***

Hazardous or potentially hazardous conditions affecting the subject site have been previously and extensively analyzed as part of the 2007 Rich-Haven Specific Plan EIR (2007 EIR). In summary, the 2007 EIR concluded that development of the site could result in potentially significant hazards/hazards materials impacts due to structure demolition, potential presence of methane gas, presence of organic materials, and general hazards or hazardous conditions associated with current and historic agricultural and dairy farming uses. As noted previously in this Section, hazardous/hazardous conditions affecting the Project site are materially the same as those identified in the 2007 EIR. Mitigation Measures that would reduce the above-noted hazards/hazardous materials impacts to levels that would be less-than-significant were identified in the 2007 EIR. For ease of reference, the 2007 EIR Mitigation Measures (HM-1 through HM-6) are excerpted below.

Subsequent to Certification of the 2007 EIR, Methane Gas investigation and remediation of the former Scritsmier Hog Ranch (13571 Haven Avenue) per Mitigation Measure HM-3 has been successfully accomplished and accepted by the City. Mitigation Measure HM-3 has been implemented and is no longer required.

Additionally, per Mitigation Measure HM-6, the required Phase I ESA for the “Hillardis Property” (APNs 218-161-04, 218-161-05, 218-161-10, 218-161-11) has been completed. The Hillardis Property Phase I ESA recommends that a Phase II Environmental Assessment be conducted for that site to address the following items:

- Agricultural/orchard usage of the southern portion of the Property,

- Methane Gas Testing for the northern portion of the Property,
- Soils in the areas of unregulated dumping, and
- Soils in the area of the leaking air compressors in the garage [in the northern portion of the property].

The requirement to conduct a Phase II Assessment and comply with its provisions is added as mitigation to this EIR (see Mitigation Measure 4.7.4).

Based on the previous analyses conducted for the Project site, as updated by the site's current condition, the City's incumbent Methane Gas Investigation Protocol, and recommendations of the Hillardis Property Phase I ESA, the following Mitigation Measures 4.7.1 through 4.7.4 are incorporated in this EIR.

Construction and Operation

The Project would not result in or cause exposure(s) to hazards or potentially hazardous conditions. That is, uses proposed by the Project are not considered hazardous. Nor does the Project propose or require facilities or operations involving inherent substantial hazards.

During the normal course of construction and operation activities, there would be limited transport of potentially hazardous materials (e.g., gasoline, diesel fuel, paints, solvents, fertilizer, etc.) to and from the Project site. However, the Project would be required to comply with all City and County Hazardous Materials Management Plans and regulations addressing transport, use, storage and disposal of these materials. Further, any occupancies that would store or use hazardous materials would be required to comply with California Hazardous Materials Business Plan (HMBP) requirements. Therefore, this would be considered less than significant and not require mitigation.

Mitigation Measures:

HM-1 Prior to the issuance of permits by the City of Ontario for any structural demolition activities on the project site, the project developer will be required to submit documentation to the City of Ontario Building Department that asbestos and lead-based paint issues are not applicable to their property or that appropriate remediation actions will be undertaken to correct any lead-based paint or asbestos issues, in conformance with the regulations of the South Coast Air Quality Management District and the State of California, Division of Occupational Health and Safety.

HM-1 Subsequent to grading activities, testing for the presence of methane in the soil shall be performed. This testing shall conform to applicable City of Ontario standards. If methane is detected, mitigation would include the installation of under-slab methane vents, methane barrier, and sealing utilities in locations where they enter a structure and penetrate the methane barrier.

HM-3 Post-grading methane gas investigation should take place near the former Scritsmier Hog Ranch (13571 Haven Avenue) where subsurface methane levels exceed 5,000 ppm. A passive vent system and gas membrane beneath the floor slab should be installed, along with utility trench dams and conduit seals.

HM-4 Careful clearing, grubbing, segregation, and stockpiling or proper disposal of the near surface organic-rich soils at the site prior to the initiation of mass grading activities should occur.

HM-5 Identification and segregation/stockpiling or proper disposal of deeper soils which contain elevated levels of organic material should be conducted.

HM-6 Prior to approval of a discretionary permit or approval for development of proposed residential uses on the Hillardis Property, such as a parcel map or tentative tract map, a Phase I Environmental Site Assessment (ESA) shall be conducted and the results of that ESA implemented. The Phase I ESA shall be provided to the City of Ontario and shall be included in any CEQA analysis prepared in connection with the consideration of a discretionary approval for development of the eastern half of the project site.

4.7.1 Prior to the issuance of permits for any structural demolition activities on the Project site, the Project developer(s) shall submit documentation to the City of Ontario Building Department that asbestos and lead-based paint issues are not applicable to their property or that appropriate remediation actions have been undertaken to correct any lead-based paint or asbestos issues. Any required remediation shall conform with the regulations of the South Coast Air Quality Management District and the State of California, Division of Occupational Health and Safety.

4.7.2 Testing for methane gas shall be conducted subsequent to mass grading of any site within the Specific Plan Area. Methane gas testing shall conform to requirements of “City of Ontario Building Department Methane Gas Assessment for Projects in the New Model Colony.” Project designs shall conform to the Assessment’s Methane Design Guidelines or other requirements stipulated by the City of Ontario Building Department.

4.7.3 Site grubbing, clearing, and stockpiling and disposal of soils shall conform to City grading permit requirements. Such requirements may include, but would not be limited to, identification and segregation/stockpiling or proper disposal of soils that contain elevated levels of organic material.

4.7.4 Prior to approval of tract maps or approval for development of any uses on the Hillardis Property (APNs 218-161-04, 218-161-05, 218-161-10, 218-161-11), the Applicant or successor interest shall complete a Phase II Environmental Site Assessment (ESA) for that property. Prior to issuance of the first development permit for the site, the Applicant or successor interest shall comply with requirements of the Phase II ESA, and shall provide documentation to the City of Ontario to that effect.

With implementation of the above measures, the potential for the Project to create or result in a significant hazard due to existing on-site conditions would be reduced to levels that would be less-than-significant.

6. HYDROLOGY AND WATER QUALITY

a. ***Flooding and Runoff***

Threshold: Would the Project substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river or through the addition of impervious surfaces, in a manner which would:

ii) Substantially increase the rate or amount of surface run-off in a manner which would result in flooding on- or off-site?

iii) Create or contribute run-off water which would exceed the capacity of existing or planned stormwater drainage systems or provide substantial additional sources of polluted run-off?

Finding: Less than significant with mitigation incorporated. (Draft EIR, pp. 4.8-26 - 4.8-31)

Explanation: The Project Hydrology Report concludes that under post-development conditions, peak stormwater flow rates from Specific Plan Planning Areas 1A, 1B, 1C, 2C, 3C, 5A, 6A, 6B could exceed capacities of the receiving MPD Haven and Mill Creek storm drains. The Project could therefore create or contribute runoff water that would exceed the capacity of existing or planned stormwater drainage systems. This is a potentially significant impact. Stormwater flow discharges from the affected Planning Areas need to be reduced to ensure adequate storm water conveyance and flood protection along the mainlines upstream of the County Line Channel.

In combination, implementation of Mitigation Measures 4.8.1 through 4.8.3, and mandated compliance with City Conditions of Approval and regulatory requirements act to preclude potentially adverse drainage and stormwater runoff impacts.

Mitigation Measures:

4.8.1 General: In conjunction with all development proposals within the Specific Plan Area, peak flow mitigation measures for each development shall be implemented such that discharges to receiving MPD storm drain mainlines do not exceed the maximum allowable flow rates identified at Project Hydrology Report, Appendix A, Exhibit 3. Ultimate design, location, and configuration of peak flow mitigation measures are site-and use-specific. Design, location, and configuration of peak flow mitigation measures shall be approved by the City as part of site plan review and approval processes.

4.8.2 Haven Storm Drain Mitigation: Measures (e.g., detention basins or similar) to control peak flows to the Haven Storm Drain shall be implemented to address increased stormwater discharges resulting from development of Planning Areas 1A, 1B, 1C, 2C, and 3C. Please refer to Figure 4.8-5. Locations for these measures shall be reviewed and approved by the City prior to final site plan approval(s) for development within Planning Areas 1A, 1B, 1C, 2C, and 3C.

4.8.3 Mill Creek Storm Drain Mitigation: Peak flow mitigation measures shall be implemented for stormwater discharges resulting from development of Planning Areas 2C, 3C, 5A, 6A, and 6B. Please refer to Figure 4.8-5. Locations for these measures shall be reviewed and approved by the City prior to final site plan approval(s) for development within Planning Areas 2C, 3C, 5A, 6A, and 6B.

With implementation of the above measures, the potential for the Project to: substantially alter the existing drainage pattern of the site or area in a manner that would substantially increase the rate or amount of runoff that would result in flooding on- or offsite; or substantially alter the existing drainage pattern of the site or area in a manner that would create or contribute runoff water which would exceed the capacity of existing or planned stormwater drainage systems or provide substantial additional sources of polluted runoff is determined to be less-than-significant.

7. NOISE

a. *Noise Standards*

Threshold: Would the Project result in generation of a substantial temporary or permanent increase in ambient noise levels in the vicinity of the

Project in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies?

Finding: Less than significant with mitigation incorporated. (Draft EIR, pp. 4.6-18 - 4.6-30)

Explanation: ***Construction***

Noise generated by the Project construction equipment will include a combination of trucks, power tools, concrete mixers, and portable generators that, when combined, can reach high levels. As indicated at Draft EIR Table 4.6-4, peak received construction-source noise levels would range from 52.5 to 63.8 dBA Leq. These levels would not exceed the applicable threshold of 80 dBA Leq. Construction-source noise levels that comply with applicable standards do not comprise a substantial permanent increase in ambient noise levels, or a substantial temporary or periodic increase in ambient noise levels.

Vehicular

As indicated in Draft EIR Section 4.6, Noise, Project traffic would not result in increased noise levels that would exceed the thresholds. As such, off-site land uses adjacent to the study area roadway segments would experience less-than-significant noise level increases due to the Project-related traffic. However, on-site residential uses proposed along Haven Avenue, Mill Creek Avenue, Hamner Avenue, Riverside Drive, Chino Avenue and Ontario Ranch Road may be subject to noise levels above 65 dBA. Therefore, on-site residential land uses located along these roadways would require additional noise attenuation to ensure that noise levels comply with the City's exterior and interior noise standards of 65 dBA CNEL and 45 dBA CNEL.

Operational

As shown at Draft EIR Table 4.6-10, Project operational/area-source noise levels would not exceed the City of Ontario 65 dBA Leq daytime or 45 dBA Leq nighttime exterior noise standards. As such, the potential for Project operational noise to result in exposure of persons to, or generation of noise levels in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies is considered less-than-significant.

As indicated at Draft EIR Tables 4.6-11 and 4.6-12, Project contributions to the ambient noise environment would not exceed the threshold conditions. On this basis, the potential for Project

operational noise to result in a substantial permanent increase in ambient noise levels in the Project vicinity above levels existing without the Project is considered less-than-significant.

Conclusion

Implementation of Mitigation Measures 4.6.1 and 4.6.2 act to further reduce already less-than-significant construction noise levels.

Mitigation Measure 4.6.3 requires the preparation of project-specific acoustical analysis for residential uses upon submittal of final site design plans to reduce potentially significant vehicular-source impacts.

Implementation of Mitigation Measures 4.6.3 through 4.6.7 would act to further reduce already less-than-significant operational noise levels.

Mitigation Measures:

4.6.1 Prior to Grading Permit issuance, the Applicant shall demonstrate that the Project complies with the following:

- All construction equipment, fixed or mobile, shall be equipped with properly operating and maintained mufflers, to the satisfaction of the Noise Control Officer;
- During construction, stationary construction equipment shall be placed such that emitted noise is directed away from sensitive noise receivers to the satisfaction of the City Planner; and
- During construction and to the satisfaction of the City Planner, stockpiling and vehicle staging areas shall be located as far as practical from noise sensitive receptors during construction activities.

4.6.2 Operating or causing the operation of any tools or equipment used in construction, drilling, repair, alteration, or demolition work between the hours of 10 p.m. and 7 a.m. is prohibited. The City Planner may approve additional hours when it can be found that such additional hours will not generate additional disturbance, or that mitigation measures will ensure compatibility with nearby residential areas.

4.6.3 Prior to the construction of residential development along Riverside Drive, Haven Avenue, Mill Creek Avenue, Edison Avenue, and Milliken Avenue, an acoustical noise analysis shall be prepared prior to the submittal of final tentative tract maps to ensure that exterior and interior noise levels are met. The acoustical analysis shall demonstrate that the buildings have been designed to limit interior noise levels to 45 dBA CNEL and exterior noise (backyards and habitable balconies and patios) to less than 65 dBA CNEL. Individual

developments shall, to the extent feasible, implement site-planning techniques.

4.6.4 Prior to final development plan approval, on a project-by-project basis and to the discretion of the Ontario Planning Department, subsequent noise studies shall be prepared, which demonstrates the site placement of stationary noise sources would not exceed criteria established in the City of Ontario Municipal Code. The analysis shall verify that loading dock facilities, rooftop equipment, trash compactors and other stationary noise sources are adequately shielded and/or located at an adequate distance from residential areas in order to comply with the City's noise standards.

4.6.5 Prior to Building Permit issuance and to the satisfaction of the Ontario Planning Department, the Project Applicants, on a project-by-project basis, shall demonstrate compliance with the following with respect to mechanical equipment:

- Mechanical equipment shall include specifications of quiet equipment;
- Mechanical equipment shall be properly selected and installed, and shall include sound attenuation packages;
- To the extent possible, mechanical equipment shall be oriented away from the nearest noise sensitive receptors; and
- The need for sound attenuation measures, and design of, such measures shall be determined as part of the final engineering design on a project-by-project basis.

4.6.6 Where a commercial zone abuts a residential zone or residential use, the following or similar language shall be included in lease/sale agreements for all non-residential buildings: All deliveries of goods and supplies; trash pick-up, including the use of parking lot trash sweepers; and the operation of machinery or mechanical equipment which emits noise levels in excess of 65 dBA, as measured from the closest property line to the equipment, shall only be allowed between the hours of 7 a.m. and 10 p.m., unless otherwise specified in an approved conditional use permit or other discretionary approval.

4.6.7 Prior to final development plan approval, on a project-by-project basis, a subsequent noise analysis shall be prepared, to the satisfaction of the Ontario Planning Department, which demonstrates that all feasible sound attenuation has been incorporated into the parking areas (i.e., landscaping and brushed driving surfaces), such that noise from parking areas has been minimized to the greatest extent practicable.

D. FINDINGS REGARDING SIGNIFICANT AND UNAVOIDABLE IMPACTS THAT CANNOT BE MITIGATED TO A LESS THAN SIGNIFICANT LEVEL

The City Council hereby finds that, despite the incorporation of Mitigation Measures identified in the EIR and in these Findings, the following environmental impacts cannot be fully mitigated to a less than significant level and a Statement of Overriding Considerations is therefore included herein:

1. AIR QUALITY

a. *Air Quality Plans and Air Quality Standards*

Threshold: Would the Project conflict with or obstruct implementation of the applicable air quality plan?

Finding: Significant and unavoidable. (Draft EIR, pp. 4.3-24 - 4.3-27)

Explanation: Even after implementation of mitigation measures, Project construction-source emissions would exceed regional significance thresholds for NO_X and CO emissions. As such, Project construction-source emissions would be significant and unavoidable. Project operational-source emissions would exceed regional significance thresholds for VOC, NOx, CO, PM_{10} and $PM_{2.5}$ emissions. Mitigation Measures 4.3.1 through 4.3.18 would incrementally reduce Project operational-source emissions. However, such reductions cannot be meaningfully quantified in CalEEMod. As such, no emissions reduction credit that may be assigned to these measures has been taken in the analysis.

Mitigation Measures: No feasible mitigation.

b. *Cumulatively Considerable Pollutant Emissions*

Threshold: Would the Project result in a cumulatively considerable net increase of any criteria pollutant for which the Project region is non-attainment under an applicable state or federal ambient air quality standard?

Finding: Significant and unavoidable. (Draft EIR, pp. 4.3-27 - 4.3-40)

Explanation: As indicated in Draft EIR Table 4.3-5, even after implementation of Mitigation Measures 4.3.1 through 4.3.6, Project construction emissions would exceed applicable SCAQMD thresholds for NOx and CO. Additionally, the proposed Project will exceed the applicable SCAQMD thresholds for VOC, NOx, and CO for Phase 1, and VOC, NOx, CO, PM_{10}, and $PM_{2.5}$ at Project Buildout.

Mitigation Measures 4.3.7 through 4.3.18 shall be implemented as means of reducing operational-source emissions to the extent feasible. In CalEEMod, there is no way to meaningfully quantify potential emissions reductions that would result from application of the proposed mitigation. Therefore, no emissions reduction credit for mitigation has been taken.

It is noted here that Project operational-source NOX, CO, PM_{10}, and $PM_{2.5}$ emissions exceedances are largely the product of traffic (mobile sources) accessing the Project site. Neither the Project Applicant nor the City have regulatory authority to control tailpipe emissions from these mobile sources. No feasible mitigation measures beyond the measures identified herein exist that would reduce operational-source NOx and CO emissions to levels that would be less-than-significant.

With regard to VOC emissions, it is recognized that approximately 50 percent of operational-source VOC emissions would be generated by on-site sources, including natural gas usage, consumer products, landscape equipment, gasoline dispensing, and onsite equipment usage associated with the industrial portion of the Project. Approximately 60% of onsite VOC emissions are generated through the use of consumer products by future residents and building users. As such, the Project Applicant cannot meaningfully control the use of consumer products through mitigation.

Mitigation Measures:

4.3.1 Fugitive dust control measures surpassing SCAQMD Rule 403 minimum requirements shall be implemented. Such measures may include: use of nontoxic soil stabilizers, applying water every four hours to active soil disturbing activities and tarping and/or maintaining a minimum of 24 inches of freeboard on trucks hauling dirt, sand, soil, or other loose materials.

4.3.2 Construction equipment rated by the United States Environmental Protection Agency as having Tier 3 or higher exhaust emission limits shall be utilized.

4.3.3 Construction equipment shall be properly serviced and maintained to the manufacturer's standards.

4.3.4 Non-essential idling of construction equipment shall be limited to no more than five consecutive minutes.

4.3.5 Super-Compliant VOC paints for coating of architectural surfaces shall be used whenever possible.

4.3.6 Construction contractors shall use off-road diesel construction equipment that complies with EPA/CARB Tier 4 Interim or better emissions standards during all construction phases.

4.3.7 Legible, durable, weather-proof signs shall be placed at truck access gates, loading docks, and truck parking areas that identify applicable CARB anti-idling regulations. At a minimum, each sign shall include: 1) instructions for truck drivers to shut off engines when not in use; 2) instructions for drivers of diesel trucks to restrict idling to no more than five (5) minutes once the vehicle is stopped, the transmission is

set to “neutral” or “park,” and the parking brake is engaged; and 3) telephone numbers of the building facilities manager and the CARB to report violations. Prior to the issuance of an occupancy permit, the City shall conduct a site inspection to ensure that the signs are in place.

4.3.8 Industrial building occupants/tenants shall be provided documentation on funding opportunities, such as the Carl Moyer Program, that provide incentives for using cleaner-than-required engines and equipment.

4.3.9 Non-residential building plans and site designs shall include natural light, passive heating, and passive cooling measures. Typical measures would include efficient window designs, use of overhangs, and skylights.

4.3.10 Building and site plans for non-residential uses shall provide electrical service accessible to landscaped areas.

4.3.11 The following or similar language shall be included in lease/sale agreements for all non-residential buildings: “Building tenants shall utilize electric equipment for landscape maintenance to the extent feasible, through requirements in the lease agreements.”

4.3.12 The following or similar language shall be included in lease/sale agreements for all industrial buildings: “Tenants shall utilize only electric or natural gas service yard trucks (hostlers), pallet jacks and forklifts, and other onsite equipment, through requirements in the lease agreements. Electric-powered service yard trucks (hostlers), pallet jacks and forklifts, and other onsite equipment shall also be required instead of diesel-powered equipment, if technically feasible. Yard trucks may be diesel fueled in lieu of electrically or natural gas fueled provided such yard trucks are at least compliant with California Air Resources Board (CARB) 2010 standards for on-road vehicles or CARB Tier 4 compliant for off-road vehicles.”

4.3.13 The following or similar language shall be included in lease/sale agreements for all industrial buildings: “Tenants that do not already operate 2010 and newer trucks shall apply in good faith for funding to replace/retrofit their trucks. Funding mechanisms include Carl Moyer, VIP, Prop 1B, SmartWay Finance, or other similar funds. If awarded, the tenant shall be required to accept and use the funding. Tenants shall be encouraged to consider the use of alternative fueled trucks as well as new or retrofitted diesel trucks. Tenants shall also be encouraged to become SmartWay Partners, if eligible.” Note: This measure shall not apply to trucks that are not owned or otherwise controlled by the facility owner or facility tenant.

4.3.14 The following or similar language shall be included in lease/sale agreements for all industrial buildings: Tenants who employ 250 or

more employees on a full- or part-time basis shall comply with SCAQMD Rule 2202, On-Road Motor Vehicle Mitigation Options. The purpose of this rule is to provide employees with a menu of options to reduce employee commute vehicle emissions. Tenants with less than 250 employees or tenants with 250 or more employees who are exempt from SCAQMD Rule 2202 (as stated in the Rule) shall either (a) join with a tenant who is implementing a program in accordance with Rule 2202 or (b) implement an emission reduction program similar to Rule 2202 with annual reporting of actions and results to the City. The tenant-implemented program would include, but not be limited to the following:

- Appoint a Transportation Demand Management (TDM) coordinator who would promote the TDM program, activities and features to all employees.
- Create and maintain a "commuter club" to manage subsidies or incentives for employees who carpool, vanpool, bicycle, walk, or take transit to work.
- Inform employees of public transit and commuting services available to them (e.g., social media, signage).
- Provide on-site transit pass sales and discounted transit passes.
- Guarantee a ride home.
- Offer shuttle service to and from public transit and commercial areas/food establishments, if warranted.

4.3.15 Loading docks shall be designed to be compatible with SmartWay trucks.

4.3.16 Non-residential use site plans shall include signs or other directional indicators delineating required site access and on-site circulation plan.

4.3.17 The following or similar language shall be included in lease/sale agreements for all non-residential buildings: Tenants shall install (a) sign(s) on their respective property(ies) with telephone, email, and regular mail contact information for a designated tenant representative who would receive complaints about excessive noise, dust, fumes, or odors. The sign shall also identify contact data for the City for perceived Code violations. The representative shall keep records of any complaints received and actions taken to communicate with the complainant and resolve the complaint. The representative shall endeavor to resolve complaints within 24 hours.

4.3.18 Industrial building designs and site plans shall incorporate electrical supply lines and panels sized to support anticipated future requirements for heavy truck charging facilities. Such designs and

plans shall be based on reasonable predictions derived from the most recent available truck manufacturer's data.

Despite implementation of the above measures, the project's impacts would remain significant and unavoidable.

2. GREENHOUSE GAS EMISSIONS

a. *Emissions Generation*

Threshold: Would the Project generate greenhouse gas emissions, either directly or indirectly, that may have a significant impact on the environment?

Finding: Significant and unavoidable. (Draft EIR, pp. 4.4-40 - 4.4-45)

Explanation: Project construction and operations would result in direct and indirect emissions of CO_2, CH_4, and N_2O. Other GHGs that may be generated are not of sufficient quantity to affect the analysis presented here. Direct Project-related GHG emissions include emissions from construction activities, area sources, and mobile sources, while indirect sources include emissions from electricity consumption, water demand, and solid waste generation. Construction and operation of the Project would generate a total of approximately 129,314.95 MTCO2e/year, which would exceed the SCAQMD significance threshold of 3,000 MTCO2e/year.

Mitigation Measures:

No feasible mitigation. The majority of the GHG emissions (approximately 72 percent unmitigated) are associated with non-construction related mobile sources. Neither the Applicant nor the Lead Agency can affect or mandate substantial reductions in vehicular-source GHG emissions, much less reductions that would achieve no net increase condition or achieve the SCAQMD 3,000 MTCO2e/year threshold. In effect, all Project traffic would need to be eliminated or be "zero GHG emissions sources" in order to achieve the SCAQMD threshold.

Development proposals within the Specific Plan Area would be required to attain a minimum of 100 Screening Table Points, thereby complying comply with GHG emissions control and reduction strategies implemented through the City 2022 CCAP Update. Additionally, Mitigation Measures 4.3.2 through 4.3.18 identified above and at Draft EIR Section 4.3, *Air Quality* would incrementally reduce Project-source air pollutant emissions and in so-doing would also act to generally reduce GHG emissions. However, there are no feasible means to, or alternatives to eliminate all Project traffic, or to ensure that Project traffic would result in zero GHG emissions sources. In terms of its practical application, this would constitute a "no build" condition. Based on the preceding, even with the application of mitigation, the Project would generate GHG emissions, either directly or indirectly, that would have a significant impact on the environment.

Despite implementation of the above measures, the project's impacts would remain significant and unavoidable.

E. CUMULATIVE IMPACTS

Regarding the Project's potential to result in cumulative impacts, the City hereby finds as follows:

1. AIR QUALITY

The cumulative impact area for air quality considerations is generally defined by the encompassing Air Basin and boundaries of the jurisdictional air quality management agency. In this case, the South Coast Air Basin (Basin) and the South Coast Air Quality Management District (SCAQMD), respectively. Project emissions within the context of SCAQMD's regional emissions thresholds provide an indicator of potential cumulative impacts within the jurisdictional Air Basin. Due to the defining geographic and meteorological characteristics of the Air Basin, criteria pollutant emissions that could cumulatively impact air quality would be, for practical purposes, restricted to the Air Basin. Accordingly, the geographic area encompassed by the Air Basin is the appropriate limit for this cumulative air quality analysis.

Construction-Source Air Quality Impacts: Even with application of mitigation, Project construction-source NOx and CO emissions would exceed applicable SCAQMD regional thresholds and would therefore be significant and unavoidable. Per SCAQMD criteria, significant Project-level impacts are also cumulatively considerable. The Basin encompassing the Project site is designated as non-attainment for ozone, PM_{10}, and $PM_{2.5}$ (VOC and NOx are both ozone precursors; NOx is a precursor to PM_{10}/$PM_{2.5}$). Project construction-source NOx emissions threshold exceedances would result in a cumulatively considerable net increase in the criteria pollutant ozone for which the Project region is non-attainment. This is a cumulatively significant and unavoidable air quality impact. Other related projects within the cumulative impact area would be required to minimize construction-source air pollutant emissions consistent with SCAQMD programs and strategies, thereby minimizing potential cumulative impacts. Mitigation would be implemented, if applicable.

Operational-Source Air Quality Impacts: Even with application of mitigation, Project operational-source VOC, NOx, CO, PM_{10}, and $PM_{2.5}$ emissions would exceed applicable SCAQMD regional thresholds. The Basin encompassing the Project site is designated as non-attainment for ozone, PM_{10}, and $PM_{2.5}$ (VOC and NOx are both ozone precursors; NOx is a precursor to PM_{10}/$PM_{2.5}$). Project operational-source VOC, NOx, PM_{10}, and $PM_{2.5}$ emissions threshold exceedances would result in a cumulatively considerable net increase in criteria pollutants (ozone and PM_{10}/$PM_{2.5}$) for which the Project region is non-attainment. These are cumulatively significant and unavoidable air quality impacts.

Other related projects within the cumulative impact area would be required to minimize operational-source air pollutant emissions consistent with SCAQMD programs and strategies, thereby minimizing potential cumulative impacts. Mitigation would be implemented, if applicable.

AQMP Consistency Impacts: Project construction-source and operational-source regional threshold emissions exceedances noted above are inconsistent with AQMP Consistency Criterion No. 1. On this basis, the Project would conflict with the AQMP. This is a cumulatively significant air quality impact.

CO Hotspot Impacts: The potential for the Project to cause or result in potential CO hotspot impacts would be less-than-significant. Per SCAQMD criteria, less-than-significant impacts at the Project level are not cumulatively considerable. The potential for Project CO emissions to result in or cause cumulatively significant CO hotspot impacts is therefore considered less-than-significant. Other related projects within the cumulative impact area would be required to minimize potential CO hotspot impacts consistent with SCAQMD programs and strategies, thereby minimizing potential cumulative impacts. Mitigation would be implemented, if applicable.

Health Risk Impacts: Potential carcinogenic and non-carcinogenic health risk impacts resulting from Project construction and operations would be less-than-significant. Per SCAQMD criteria, less-than-significant impacts at the Project level are not cumulatively considerable. The potential for Project air pollutant emissions to result in or cause cumulatively significant health risk impacts is therefore considered less-than-significant. Other related projects within the cumulative impact area would be required to minimize potential health risk impacts consistent with SCAQMD programs and strategies, thereby minimizing potential cumulative impacts. Mitigation would be implemented, if applicable. (Draft EIR, pp. 5-16 – 5-18)

2. BIOLOGICAL RESOURCES

The cumulative impact areas for biological resources are generally defined by available habitat, species' range(s), physical constraints, and other limiting factors as discussed within the Project Biological Report.

Special-Status Plant Species: There are no historic site records for any special status plant species onsite. Based on a review of CNDDB, the CNPS Inventory of Rare and Endangered Vascular Plants of California, and field surveys, a few special-status species were identified for additional analysis, although none are expected to occur onsite. No special-status plants were observed on the Project site during the 2022 site surveys.

Special-Status Wildlife Species: The Project could result in potentially significant impacts to the burrowing owl. The EIR incorporates mitigation measures that would reduce potential impacts to the burrowing owl to levels that would be less-than-significant.

Nesting Birds: Project implementation could affect nesting birds that may be present at the time of Project construction activities. This is a potentially significant impact. The EIR incorporates mitigation measures that would reduce potential impacts to nesting birds to levels that would be less-than-significant.

Jurisdictional Areas, Riparian Habitat, Wetlands, or Other Sensitive Natural Community:

The site does not contain any lakes, rivers, creeks, streambeds, wetlands, vernal pools, or temporary rain pools. No other wetlands, riparian habitat or other sensitive communities exist within the Project site. Nor does the Project propose uses or activities that would substantially or adversely affect any other off-site wetlands or riparian areas. The potential for the Project to have a substantial adverse effect on any jurisdictional areas, riparian habitat, federally protected wetlands, or other sensitive natural community is considered less-than-significant.

Wildlife Movement Corridors: The Project site is bounded by traveled roadways and developed or developing properties. The Project site does not represent a connecting link between significant habitat for wildlife areas. Based on its location within an urban context, the potential for the site to function as a significant wildlife movement corridor is considered low. Project impacts to wildlife movement corridors would be less-than-significant.

Local Policies or Ordinances Protecting Biological Resources; Habitat Conservation Plans: The Project site is not subject to any local policies or ordinances protecting biological resources. The Project would not conflict with provisions of an adopted Habitat Conservation Plan, Natural Community Conservation Plan, or other approved local, regional, or state habitat conservation plan. No significant impacts in this regard would occur.

Based on the preceding discussion, the Project's potential contribution to cumulative impacts regarding biological resources is not considerable, and the cumulative effects of the Project are determined to be less-than-significant. (Draft EIR, pp. 5-26 – 5-28)

3. CULTURAL RESOURCES

The cumulative impact area for prehistoric, archaeological, and historic resources includes the City of Ontario and surrounding areas of San Bernardino County. As discussed at EIR Section 4.11, there are no known or probable significant historical resources within the Project site, or that would otherwise be adversely affected by the Project. On this basis, the potential for the Project to cause a substantial adverse change in the significance of historic resources as defined at CCR §15064.5 is considered less-than-significant.

The Project's other potential impacts to cultural resources/tribal cultural resources would be less-than-significant as mitigated.

Other related projects within the cumulative impact area would be required to minimize cultural resources/tribal cultural resources impacts consistent with City and State regulatory requirements, thereby minimizing potential cumulative cultural resources/tribal cultural resources impacts. Mitigation would be implemented, if applicable.

Based on the preceding, the Project's potential contributions to cumulative impacts regarding cultural resources/tribal cultural resources would not be considerable, and these cumulative effects would be less-than-significant. (Draft EIR, p. 5-28)

4. ENERGY

The geographic scope of cumulative energy impacts is limited to the energy provider service area(s). The Project would not conflict with or obstruct a state or local plan for renewable energy or energy efficiency. These plans and policies address development-level and cumulative impacts to energy resources. Project consistency with state and local plans for renewable energy and energy efficiency demonstrates that the Project energy impacts would not be cumulatively considerable, and the Project cumulative energy impacts would be less-than-significant.

As with the Project, other developments within the energy provider service areas would be required to demonstrate compliance with state and local plans for renewable energy and energy efficiency. Therefore, the Project's potential contribution to cumulative impacts regarding energy is not considerable, and the cumulative effects of the Project are determined to be less-than-significant. (Draft EIR, p. 5-20)

5. GEOLOGY AND SOILS

The Project site and all Southern California lie within a seismically active area, generally subject to earthquake hazards, and in this sense, Southern California is considered the cumulative impact area for geology and soils considerations. As discussed at EIR Section 4.9, Geology and Soils, Project impacts related to geology and soils would be less-than-significant as mitigated. The Project would not exacerbate any existing adverse geologic/soils conditions.

Other related projects within the cumulative impact area would be required to minimize geology/soils impacts consistent with City and CBC regulatory requirements, thereby minimizing potential cumulative geology/soils impacts. Mitigation would be implemented, if applicable. Based on the preceding, the Project's potential contribution to cumulative impacts regarding geology and soils is not considerable, and the cumulative effects of the Project are determined to be less-than-significant. (Draft EIR, p. 5-26)

6. GREENHOUSE GAS EMISSIONS

CEQA emphasizes that the effects of greenhouse gas emissions are cumulative and should be analyzed in the context of CEQA's requirements for cumulative impacts analysis (CEQA Guidelines Section 15130(f)). The Project Greenhouse Gas (GHG) Analysis is by nature a cumulative analysis. Because GHG emissions and climate change are global issues, any approved project regardless of its location has the potential to contribute to a cumulative global accumulation of GHG emissions. The geographic context of the cumulative contributions to GHGs and climate change is worldwide. Practically however, lead agencies and responsible agencies are only able to regulate GHG emissions within their respective jurisdictions. Accordingly, the cumulative impact area for GHG/Global Climate Change considerations is the City of Ontario and the encompassing SCAQMD jurisdictional area.

Even after application of mitigation, Project GHG emissions would exceed the SCAQMD GHG emissions screening level threshold of 3,000 MTCO2e/year. On this basis, the Project could directly or indirectly generate GHG emissions that may have a significant impact on the environment. On this basis, the Project's potential to contribute considerably (either individually or cumulatively) to global climate change impacts through GHG emissions is therefore considered significant and unavoidable.

As also discussed in the EIR, the Project is consistent with TOP 2050, and GHG emissions modeling reflected in TOP 2050 – 2022 Community Climate Action Plan Update (2022 CCAP Update). The 2022 CCAP Update provides guidance on how to analyze GHG emissions and determine significance during the CEQA review of proposed development projects within the City. The 2022 CCAP Update addresses GHG emissions reductions and is consistent with the requirements of AB 32, SB 32, and international efforts to reduce GHG emissions. The 2022 CCAP Update, requirements of AB 32, SB

32, and international efforts to reduce GHG emissions encompass and comprise the range and scope of "applicable plans, policies, or regulations adopted for the purpose of reducing the emissions of greenhouse gases." As substantiated in the EIR, with application of mitigation, the Project is determined to be consistent with the 2022 CCAP Update and by extension is also consistent with and supports other noted plans, policies, or regulations adopted for the purpose of reducing the emissions of greenhouse gases. The potential for the Project to conflict with an applicable plan, policy or regulation adopted for the purpose of reducing the emissions of greenhouse gases is therefore considered less-than-significant.

Other related projects within the cumulative impact area would be required to minimize potential GHG emissions impacts consistent applicable plans, policies, or regulations adopted for the purpose of reducing GHG emissions, thereby minimizing potential cumulative GHG emissions impacts. Mitigation would be implemented, if applicable. (Draft EIR, pp. 5-18 – 5-20)

7. HAZARDS AND HAZARDOUS MATERIALS

The cumulative impact area when considering potential hazards and hazardous materials issues includes the area to be developed within the Project site, as well as off-site locations that might be affected by or contribute to hazards or hazardous conditions resulting from the Project and its operations. The cumulative hazards and hazardous materials impact analysis evaluates the effects of Project construction and operations and reflects long-term buildout conditions within the cumulative impact area.

The Project does not propose uses or activities that would require substantial handling or use of hazardous materials, hazardous substances, or hazardous waste that could result in potential adverse effects. The EIR mitigation measures require remediation of any pre-existing hazardous conditions to levels that would be less-than-significant. The mitigation measures also ensure that subsequent development and operation of Project land uses would not create or result in potentially significant hazardous conditions. As mitigated, Project impacts related to hazards and hazardous materials would be less-than-significant.

Other related projects within the cumulative impact area would be required to comply with hazards/hazardous material regulatory requirements. Mitigation would be incorporated, if necessary. (Draft EIR, pp. 5-23 – 5-24)

8. HYDROLOGY AND WATER QUALITY

The cumulative impact area for hydrology/water quality impact considerations is generally defined as the area encompassed by the jurisdictional Regional Water Quality Control Board (RWQCB), in this case the Santa Ana Regional Water Quality Control Board (SARWQCB). Local oversight is also provided by the City of Ontario and San Bernardino County.

Development of the Project site would incrementally increase impervious surfaces within the cumulative impact area, with related potential increases in the rate and quantity of local storm water discharges. The Project's potential hydrology/water quality impacts

would be less-than-significant as mitigated. In this regard, the Project would implement storm water management components, and structural and non-structural Best Management Practices, which collectively act to ensure that post-development storm water discharge rates are adequately conveyed within available system capacities.

The Project drainage concept would maintain the site's primary drainage patterns and would implement drainage systems and detention areas to accept developed storm water discharges. The Project would implement all necessary drainage and storm water management systems and would be required to comply with all storm water system design, construction, and operational requirements mandated under the City Municipal Code. The Project drainage and storm water management systems would also be required to comply within regulations established by other jurisdictional agencies including SARWQCB, San Bernardino County, and California Department of Water Resources. Additionally, consistent with established building code regulations, approved site-specific drainage studies reflecting precise pad locations, proposed drainage structures, detention facilities, etc., would be required prior to the issuance of building permits within the Project site.

Storm water management systems implemented by the Project, mandated compliance with City, SARWQCB, County, and State storm water management requirements and policies, collectively ensure that adequate storm water conveyance and treatment facilities would be provided to support development and operations of the Project.

Other related projects within the cumulative impact area would be required to comply with stormwater management and water quality regulatory requirements. Mitigation would be incorporated, if necessary. Thus, contribution to cumulative hydrology/water quality impacts is not considerable, and the cumulative effects of the Project are determined to be less-than-significant. (Draft EIR, pp. 5-24 – 5-25)

9. LAND USE AND PLANNING

The cumulative impact area when considering potential cumulative land use and planning issues includes areas that are currently under City jurisdiction, and subject to provisions of TOP 2050 Policy Plan (General Plan), City of Ontario Zoning Ordinance, and/or other City Special Planning Documents (e.g., Specific Plans). The analysis presented here also considers the Project in the context of the land use/planning guidance included in the 2020–2045 Regional Transportation Plan/Sustainable Communities Strategy (Connect SoCal 2020).

The 2022 Specific Plan Amendment Project land uses are consistent with the site's TOP 2050 Policy Plan Land Use Plan. The Project does not propose or require amendment of TOP 2050 Policy Plan Land Use Plan. Further, as substantiated at EIR Section 4.1, Land Use and Planning, land uses and development concepts proposed by the Project would not cause a significant environmental impact due to a conflict with any land use plan, policy, or regulation adopted for the purpose of avoiding or mitigating an environmental effect.

The existing Zoning designation of the Project site is "Specific Plan" as established by the current (2021) Rich-Haven Specific Plan. The Specific Plan zoning designation is maintained under the Project, though land use designations and configuration of Specific

Plan land uses would be amended per the proposed 2022 Rich-Haven Specific Plan Amendment. The 2022 Rich-Haven Specific Plan Amendment (2022 Specific Plan Amendment) is presented in its entirety at EIR Appendix B. If adopted by the City, the 2022 Specific Plan Amendment would comprise the zoning for the subject site and would regulate all development within the site. Where the 2022 Specific Plan Amendment is silent, regulations and requirements of the City Development Code would prevail.

The proposed 2022 Specific Plan Amendment would establish land use plans, development standards, and design guidelines directing the ultimate buildout of the Project site. Land uses and development concepts reflected within the proposed 2022 Specific Plan Amendment can be feasibly implemented consistent with applicable provisions of TOP 2050 Policy Plan Land Use Element and City Development Code. Prior to issuance of building permits, the City would review the final development plans for individual developments within the Project site to ensure consistency with the 2022 Specific Plan Amendment land use plans, development standards, design guidelines; and where applicable, City Development Code requirements.

Other related projects within the cumulative impact area would be required to comply with requirements of necessary land use and planning discretionary actions and permits. Mitigation would be incorporated, if necessary.

Based on the preceding discussion, the Project's potential contribution to cumulative land use and planning impacts is not considerable, and the cumulative effects of the Project are less-than-significant. (Draft EIR, pp. 5-12 – 5-14)

10. NOISE

The cumulative impact area for noise/vibration considerations is generally defined as surrounding properties that could receive Project-generated noise/vibration (either construction or operational) and would also include roadway corridors affected by Project-related traffic and associated vehicular noise/vibration.

Construction-Source Noise/Vibration: Project construction-source noise and vibration levels received at area land uses would be less-than-significant and on this basis are not cumulatively considerable.

Other related projects within the cumulative impact area would be required to mitigate construction-source noise and vibration impacts that could affect sensitive receptors, thereby minimizing potential cumulative construction-source noise impacts.

Project construction-source vibration levels received at area land uses would be less-than-significant. There are no known or probable related projects that would interact with the Project's less-than-significant construction-source vibration impacts and thereby result in cumulatively significant impacts.

Operational Noise/Vibration - Area Sources: The Project's area-source operational noise levels would be less-than-significant. EIR mitigation measures would reduce potential vehicular-source noise impacts at the Project residential uses to levels that would be less-than-significant.

Further, Project operational-source noise in combination with ambient noise would not result in cumulatively significant noise impacts. In this latter regard, the peak mitigated Project operational-source noise levels when added to ambient conditions would not exceed the maximum acceptable day/night ambient condition.

Other related projects within the cumulative impact area would be required to mitigate operational area-source noise impacts that could affect sensitive receptors, thereby minimizing potential cumulative operational-source noise impacts.

Operational Noise - Mobile Sources: Cumulative effects of mobile-source noise are demonstrated by comparing noise levels under Existing Conditions (2022) without the Project, to noise levels with the completed Project under Horizon Year Conditions (2050). Cumulative mobile-source noise increases within the Study Area are summarized in Draft EIR Table 5.1-2.

As indicated at Table 5.1-2, along all Study Area roadway segments projected to experience cumulatively significant vehicular-source noise impacts, the Project contributions would be less than the 1.5 dBA threshold at sensitive land uses, and less than the 3.0 dBA CNEL threshold at non-sensitive land uses. On this basis, Project contributions to cumulative vehicular-source noise would not be cumulatively considerable and Project impacts would not be cumulatively significant.

As indicated at Table 5.1-1, ambient noise levels along all Study Area roadway segments already exceed 65 dBA CNEL. Along these roadway segments, cumulative noise increases of 1.5 dBA CNEL or more, if received at sensitive land uses, would exceed applicable thresholds and would be considered cumulatively significant. Along roadway segments where ambient conditions exceed 70 dBA CNEL, cumulative noise increases of 3.0 dBA CNEL or more, if received at non-sensitive land uses, would exceed applicable thresholds and would be considered cumulatively significant. (Draft EIR, p. 5-20 - 5-23)

11. TRANSPORTATION

The Project Vehicle Miles Traveled (VMT) Assessment cumulative impact area coincides with relevant Transportation Analysis Model Traffic Analysis Zones (TAZs). evaluation of the Project VMT impacts is guided by Technical Advisory on Evaluating Transportation Impacts in CEQA (Technical Advisory) (Governor's Office of Planning and Research, OPR) December 2018. The Technical Advisory notes that ". . . metrics such as VMT per capita or VMT per employee, i.e., metrics framed in terms of efficiency (as recommended below for use on residential and office projects), cannot be summed because they employ a denominator. A project that falls below an efficiency-based threshold that is aligned with long-term goals and relevant plans has no cumulative impact distinct from the project impact" (Technical Advisory, p. 6). As substantiated herein, the Project-level VMT impacts are less-than-significant per the City VMT Guidelines efficiency-based threshold. Per the Technical Advisory guidance, the Project cumulative VMT impacts would also be less-than-significant.

To ensure appropriate design and implementation of all Project circulation improvements, the final design of the Project site plan, to include locations and design of proposed driveways, shall be reviewed and approved by the City Traffic Engineer. In addition, representatives of the City's Police and Fire Departments will review the Project's plans

regarding emergency access. Efficient and safe operations of the Project would be provided by on-site and localized circulation and intersection improvements to be developed as the Project individual site and building designs are finalized. The City would ensure that all on-site and localized circulation and intersection improvements would be designed and constructed consistent with applicable provisions of the 2022 Specific Plan Amendment and pursuant to City site plan and Building Permit review processes and requirements.

Traffic signing and striping would be implemented in conjunction with detailed Project construction plans. Sight distance at each project access point would be reviewed with respect to standard Caltrans and City of Ontario sight distance standards at the time of preparation of final grading, landscape, and street improvement plans.

It is also recognized that temporary and short-term traffic detours and traffic disruption could result during Project construction activities. These interim and transient impacts are considered potentially significant for the duration of Project construction activities. Management and control of construction traffic would be addressed through the preparation and submittal of a construction area traffic management plan, to be reviewed and approved by City prior to or concurrent with Project building plan review(s). The Project Construction Area Traffic Management Plan (Plan), also summarized within the EIR Project Description, would identify traffic controls for any street closures, detours, or other potential disruptions to traffic circulation during Project construction. The Plan would also be required to identify construction vehicle access routes, and hours of construction traffic.

The Project would generate passenger car trips and truck trips typical of the proposed uses. As part of established site and Building Permit review processes, the City would require implementation of on-site truck and passenger car travel paths, signing, and traffic controls to ensure that conflicts between trucks and passenger cars are minimized or avoided. Trucks accessing the Project site would use designated truck routes, thereby avoiding or minimizing off-site passenger car/truck traffic conflicts. Land uses proximate to the Project site are planned for, or are developed with, urban uses similar to those proposed by the Project. These uses would generate urban traffic types similar to traffic generated by the Project and would not generate traffic that would be incompatible with the Project traffic types.

Other related projects within the cumulative impact area would similarly be required to demonstrate compliance with applicable circulation system programs, plans, ordinances, and policies, thereby minimizing potential cumulative impacts.

Based on the preceding, the Project's contribution to cumulative impacts related to increased circulation system hazards, incompatible uses, or inadequate emergency access are not considerable, and the cumulative effects of the Project are less-than-significant. (Draft EIR, pp. 5-14 – 5-16)

12. UTILITIES AND SERVICE SYSTEMS

The cumulative impact area when considering potential cumulative utilities and service systems impacts comprises affected purveyor service areas including service sources/supplies, and service conveyance/distribution/treatment facilities.

The Project would implement all necessary on-site infrastructure improvements and would also construct area-serving off-site master plan infrastructure improvements. Utilities and service systems distribution and conveyance lines implemented by the Project would be constructed, operated, and maintained pursuant to purveyor requirements and consistent with applicable infrastructure master plans. Infrastructure improvements would be located within existing improved streets or otherwise disturbed properties, thereby limiting or avoiding potential environmental impacts. The Draft EIR evaluates likely maximum impacts associated with all Project actions and operations, including but not limited to construction and operation of utilities and service systems distribution and conveyance lines. Construction and operation of the Project utilities and service systems distribution and conveyance lines would not result in conditions or environmental impacts not already considered and addressed elsewhere in this EIR

The EIR discussion of potential utilities and services impacts also substantiates the following:

- Water supplies would be available to serve the Project and reasonably foreseeable future development during normal, dry, and multiple dry years.
- There exists sufficient wastewater treatment capacity to serve the Project's projected demand in addition to the provider's existing commitments;
- Landfills serving the Project have sufficient permitted capacity to accommodate the Project's solid waste disposal needs; and
- The Project would comply with federal, state, and local statutes and regulations related to solid waste.

Other related projects within the cumulative impact area would be required to minimize utilities and services impacts consistent with City, State, and service purveyor requirements, thereby minimizing potential cumulative utilities and services impacts. Mitigation would be implemented, if applicable. Based on the preceding, Project contributions to cumulative impacts regarding utilities and service systems would not be considerable, and the cumulative effects of the Project would be less-than-significant. (Draft EIR, pp. 5-28 - 5-30).

13. OTHER IMPACTS DETERMINED TO BE NOT CUMULATIVELY SIGNFICANT

For certain other areas of consideration, Project impacts are substantiated to be less-than-significant (please refer to the Initial Study, EIR Appendix A). Project contributions to these impacts would not be cumulatively considerable and the Project impacts would not be cumulatively significant. These topics include:

AESTHETICS. Potential to:

- Have a substantial adverse effect on a scenic vista.
- Substantially damage scenic resources, including, but not limited to trees, rocks, outcroppings, and historic buildings within a state scenic highway.
- In a non-urbanized area, substantially degrade the existing visual character or

quality of public views of the site and its surroundings.

- Create a new source of substantial light or glare, which would adversely affect the day or nighttime views in the area.

AGRICULTURE AND FOREST RESOURCES. Potential to:

- Convert Prime Farmland, Unique Farmland, or Farmland of Statewide Importance (Farmland), as shown on the maps prepared pursuant to the Farmland Mapping and Monitoring Program of the California Resources Agency, to non-agricultural use.
- Conflict with existing zoning for agricultural use, or a Williamson Act contract.
- Conflict with existing zoning for, or cause rezoning of, forest land, timberland, or timberland zoned Timberland Production.
- Result in the loss of forest land or conversion of forest land to non-forest use.
- Involve other changes in the existing environment which, due to their location or nature, could result in conversion of Farmland, to non-agricultural use or conversion of forest land to non-forest use.

AIR QUALITY. Potential to:

- Result in other emissions (such as those leading to odors) adversely affecting a substantial number of people.

CULTURAL RESOURCES. Potential to:

- Disturb any human remains, including those interred outside of formal cemeteries.

GEOLOGY AND SOILS. Potential to:

- Directly or indirectly cause potential substantial adverse effects, including the risk of loss, injury or death involving rupture of a known earthquake fault.
- Directly or indirectly cause potential substantial adverse effects, including the risk of loss, injury or death involving landslides.
- Result in substantial soil erosion or the loss of topsoil.
- Have soils incapable of adequately supporting the use of septic tanks or alternative wastewater disposal systems where sewers are not available for the disposal of wastewater.

HAZARDS AND HAZARDOUS MATERIALS. Potential to:

- Be located on a site which is included on a list of hazardous materials sites compiled pursuant to Government Code Section 65962.5 and, as a result, would it create a significant hazard to the public or the environment.

- For a project located within an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project result in a safety hazard or excessive noise for the people residing or working in the project area.
- Impair implementation of or physically interfere with an adopted emergency response plan or emergency evacuation plan.
- Expose people or structures, either directly or indirectly, to a significant risk of loss, injury or death involving wildland fires.

HYDROLOGY AND WATER QUALITY. Potential to:

- Substantially decrease groundwater supplies or interfere substantially with groundwater recharge such that the project may impede sustainable groundwater management of the basin.
- Substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river, or through the addition of impervious surfaces, in a manner which would result in substantial erosion or siltation on- or off-site.

LAND USE AND PLANNING. Potential to:

- Physically divide an established community.

MINERAL RESOURCES. Potential to:

- Result in the loss of availability of a known mineral resource that would be of value to the region and to the residents of the state.
- Result in the loss of availability of a locally important mineral resource recovery site delineated on a local general plan, specific plan or other land use plan.

POPULATION AND HOUSING. Potential to:

- Induce substantial population growth in the area, either directly (e.g., by proposing new homes and businesses) or indirectly (e.g., through the extension of roads or other infrastructure).
- Displace substantial numbers of existing people or housing, necessitating the construction of replacement housing elsewhere.

PUBLIC SERVICES. Potential to:

Result in substantial adverse physical impacts associated with the provision of new or physically altered governmental facilities the construction of which could cause significant environmental impacts for any of the public services:

- Fire Protection
- Police Protection
- Schools
- Parks
- Other public facilities

RECREATION. Potential to:

- Increase the use of existing neighborhood and regional parks or other recreational facilities such that substantial deterioration of the facility would occur or be accelerated.
- Include recreational facilities or require the construction or expansion of recreational facilities, which might have an adverse physical effect on the environment.

WILDFIRE. Potential to:

- Substantially impair an adopted emergency response plan or emergency evacuation plan.
- Exacerbate wildfire risks, and thereby expose project occupants to, pollutant concentrations from a wildfire or the uncontrolled spread of a wildfire.
- Require the installation or maintenance of associated infrastructure (such as roads, fuel breaks, emergency water sources, power lines or other utilities) that may exacerbate fire risk or that may result in temporary or ongoing impacts to the environment.
- Expose people or structures to significant risks, including downslope or downstream flooding or landslides, as a result of runoff, post-fire slope instability, or drainage changes.

F. ALTERNATIVES TO THE PROPOSED PROJECT

The City Council hereby declares that it has considered and rejected as infeasible the alternatives identified in the EIR and described below. Section 15126.6 of the State CEQA Guidelines requires an EIR to describe a range of reasonable alternatives to the Project, or to the location of the Project, which could feasibly achieve most of its basic objectives, but would avoid or substantially lessen any of the significant effects identified in the EIR analysis. An EIR is not required to consider every conceivable alternative to a proposed project. Rather, an EIR must consider a reasonable range of alternatives that are potentially feasible; an EIR is not required to consider alternatives that are infeasible. In addition, an EIR should evaluate the comparative merits of the alternatives. Therefore, this section sets forth the potential alternatives to the Project analyzed in the EIR and evaluates them in light of the objectives of the Project, as required by CEQA.

Key provisions of the State CEQA Guidelines relating to the alternatives' analysis (§15126.6 et seq.) are summarized below:

- "The discussion of alternatives shall focus on alternatives to the Project or its location which are capable of avoiding or substantially lessening any significant effects of the Project, even if these alternatives would impede to some degree the attainment of the Project objectives or would be more costly." (§15126.6[b]).
- "The specific alternative of 'no project' shall also be evaluated along with its impact." (§15126.6[e][1])
- "The no project analysis shall discuss the existing conditions at the time the notice of preparation is published, or if no notice of preparation is published, at the time environmental analysis is commenced, as well as what would be reasonably expected to occur in the foreseeable future if the project were not approved, based on current plans and consistent with available infrastructure and community services. If the environmentally superior alternative is the 'no project' alternative, the EIR shall also identify an environmentally superior alternative among the other alternatives." (§15126.6[e][2])
- "The range of alternatives required in an EIR is governed by a 'rule of reason' that requires the EIR to set forth only those alternatives necessary to permit a reasoned choice. The alternatives shall be limited to ones that would avoid or substantially lessen any of the significant effects of the project." (§15126.6[f])
- "Among the factors that may be taken into account when addressing the feasibility of alternatives are site suitability, economic viability, availability of infrastructure, general plan consistency, other plans or regulatory limitations, jurisdictional boundaries…, and whether the proponent can reasonably acquire, control or otherwise have access to the alternative site (or the site is already owned by the proponent)" (§15126.6[f][1])
- "Only locations that would avoid or substantially lessen any of the significant effects of the project need be considered for inclusion in the EIR." (§15126.6[f][2][A])
- "An EIR need not consider an alternative whose effect cannot be reasonably ascertained and whose implementation is remote and speculative." (§15126.6[f][3])

1. RATIONALE FOR SELECTING POTENTIALLY FEASIBLE ALTERNATIVES

The alternatives must include a no-project alternative and a range of reasonable alternatives to the Project if those reasonable alternatives would attain most of the Project objectives while substantially lessening the potentially significant Project impacts. The range of alternatives discussed in an EIR is governed by a "rule of reason," which the State *CEQA Guidelines* Section 15126.6(f) defines as:

> . . . set[ting] forth only those alternatives necessary to permit a reasoned choice. The alternatives shall be limited to ones that would avoid or

> substantially lessen any of the significant effects of the project. Of those alternatives, the EIR need examine in detail only the ones that the lead agency determines could feasibly attain most of the basic objectives of the project. The range of feasible alternatives shall be selected and discussed in a manner to foster meaningful public participation and informed decision-making.

Among the factors that may be taken into account when addressing the feasibility of alternatives (as described in the State *CEQA Guidelines* Section 15126.6(f)([1]) are environmental impacts, site suitability, economic viability, availability of infrastructure, general plan consistency, other plans or regulatory limitations, jurisdictional boundaries, and whether the Project proponent could reasonably acquire, control, or otherwise have access to an alternative site. An EIR need not consider an alternative whose effects could not be reasonably identified, and whose implementation is remote or speculative.

The Project alternatives are evaluated to determine the extent to which they attain the basic Project objectives, while significantly lessening any significant effects of the Project.

2. ALTERNATIVES CONSIDERED AND REJECTED DURING THE SCOPING/PROJECT PLANNING PROCESS

Section 15126.6(c) of the State CEQA Guidelines specifies that an EIR should (1) identify alternatives that were considered by the lead agency but were eliminated from detailed consideration because they were determined to be infeasible during the scoping process; and (2) briefly explain the reasons underlying the lead agency's determination. Among the factors that may be used to eliminate alternatives from detailed consideration in an EIR are: (i) failure to meet most of the basic project objectives; (ii) infeasibility; and/or (iii) inability to avoid significant environmental impacts.

The following is a discussion of the alternatives considered during the scoping and planning process and the reasons why they were not selected for detailed analysis in the EIR.

a. *Alternative Sites*

As stated at CEQA Guidelines §15126.6 (f)(1)(2)(A), the "key question and first step in [the] analysis [of alternative locations] is whether any of the significant effects of the project would be avoided or substantially lessened by putting the project in another location. Only locations that would avoid or substantially lessen any of the significant effects of the project need be considered for inclusion in the EIR." CEQA Guidelines §15126.6 (f) (1) also provides that when considering the feasibility of potential alternative sites, the factors that may be taken into account include: "site suitability, economic viability, availability of infrastructure, general plan consistency, other plans or regulatory limitations, jurisdictional boundaries (projects with a regionally significant impact should consider the regional context), and whether the proponent can reasonably acquire, control, or otherwise have access to the alternative site (or the site is already owned by the proponent). None of these factors establishes a fixed limit on the scope of reasonable alternatives."

As discussed below, relocation of the Project would not avoid or substantially lessen the Project's significant environmental impacts. Further, there are no feasible alternative sites under control or likely control of the Applicant that would allow for relocation of the Project in a manner that could substantially reduce the Project's significant environmental impacts.

Significant Air Quality Impacts Not Substantially Reduced at Alternative Site

- Relocation to an Alternative Site would not likely achieve any measurable reduction in the Project's regional construction-source and operational-source air quality impacts and contributions to nonattainment conditions. AQMP inconsistencies tied to the Project significant air quality impacts similarly would not be reduced by relocation of the Project. Relocation of the Project anywhere within the South Coast Air Basin would not alter or diminish the significance of these impacts.

Significant GHG Emissions Impacts Not Substantially Reduced at Alternative Site

- GHG emissions impacts are, by definition, cumulative and global in their effects. Relocation of the Project would not alter or diminish the significance of its GHG emissions impacts.

Based on the preceding considerations, analysis of an Alternative Site as means of reducing the Project's significant environmental impacts was not further considered (Draft EIR, pp. 5-41 – 5-42)

b. *"No Threshold Exceedance" Alternative for Significant Air Quality Impacts*

Operational-Source Emissions

In order to reduce Project operational-source air quality emissions to levels that would preclude exceedance of all SCAQMD thresholds, the Project scope would need to be reduced by approximately 92.4 percent (this may achieve the most restrictive threshold [VOC] and all subordinate thresholds). At such a reduction in scope, the Project Objectives would not be realized in any meaningful sense. As such, potential alternatives with the specific goal of avoiding all significant operational-source air quality impacts resulting from the Project were rejected from consideration and are not further evaluated in this discussion.

Project operational-source emissions threshold exceedances would result in a cumulatively considerable net increase in criteria pollutants for which the Project region is non-attainment. For the same reasons noted above, there are no feasible means or alternatives to avoid this impact or reduce the impact to levels that would be less-than-significant. However, this impact and all operational-source air quality impacts would be diminished under the EIR Reduced Intensity Alternative.

Construction-Source Emissions

In order to reduce Project construction-source air quality emissions to levels that would preclude exceedance of all SCAQMD thresholds would require use of construction equipment or construction technologies that are not currently available or that would be available in the near-term. In this regard, use of alternative fuel construction equipment,

including electric-powered equipment, is not feasible at this time as such equipment is not commercially available, and is not expected to be in the near-term. Alternatively, the duration of Project construction activities would need to be protracted by an estimated additional 67 percent of the current Project construction schedule. This may achieve the most restrictive construction-source emissions threshold [NOx], but in so doing would only prolong the duration of air quality emissions, the duration of construction-source equipment noise, and the duration of general disturbances associated with construction activities. The Lead Agency has determined that the benefits of the Project's current construction schedule outweigh the potential benefit in a temporary decrease in air quality emissions that may be achieved through a protracted Project construction schedule. Moreover, accepted air quality modeling parameters do not provide for such an assumed extended construction period. For these reasons, there are no feasible means or alternatives to avoid this impact or reduce the impact to levels that would be less-than-significant. (Draft EIR, pp. 5-42 – 5-43)

c. *"No Threshold Exceedance" Alternative for GHG Emissions Impacts*

As discussed at EIR Section 4.4, Greenhouse Gas Emissions, quantified Project-source GHG emissions would exceed 3,000 MTCO2e/year; and the Project cannot feasibly achieve the SCAQMD screening-level threshold of 3,000 MTCO2e/year. The SCAQMD 3,000 MTCO2e/year screening-level threshold is the most conservative metric available and is employed in this analysis in of GHG emissions significance. On this basis, Project GHG emissions have the potential to either directly or indirectly result in a significant impact on the environment.

The majority (approximately 72 percent) of the Project GHG emissions would be generated by Project vehicular sources. Responsibility and authority for regulation of vehicular-source emissions resides with the State of California (CARB, et al.). Neither the Applicant nor the Lead Agency can affect or mandate substantial reductions in vehicular-source GHG emissions, much less reductions that would achieve no net increase condition or achieve the SCAQMD screening-level 3,000 MTCO2e/year threshold. In effect, all Project traffic would need to be eliminated or be "zero GHG emissions sources" in order to achieve the SCAQMD threshold. There are no feasible means to or alternatives to eliminate all Project traffic, or to ensure that Project traffic would comprise zero GHG emissions sources. In terms of its practical application, this would constitute a "no build" condition.

The Project would however implement all feasible measures to reduce GHG emissions as outlined under the City of Ontario 2022 Community Climate Action Plan Update (2022 CCAP Update). Under the 2022 CCAP Update, mixed use developments that garner at least 100 Screening Table points would be consistent with the GHG emissions reduction targets in the City's 2022 CCAP Update. As substantiated at EIR Section 4.4, Greenhouse Gas Emissions, the Project would attain more than 100 Screening Table points. The Project is therefore determined to be consistent with the 2022 CCAP Update. (Draft EIR, p. 5-44)

3. ALTERNATIVES SELECTED FOR FURTHER ANALYSIS

Based on the Project objectives listed above, the following three alternatives have been determined to represent a reasonable range of alternatives which have the potential to

feasibly attain most of the basic objectives of the Project, but which may avoid or substantially lessen any of the significant effects of the Project. These alternatives are analyzed in detail in the following sections.

- **Alternative 1: No Project Alternative: No Build**
- **Alternative 2: No Project Alternative: Development per Existing Specific Plan Land Uses**
- **Alternative 3: Reduced Intensity Alternative**

a. ***Alternative 1: No Project Alternative: No Build***

Description: The No Project Alternative: No Build scenario assumes the site remains in its current undeveloped condition. If this scenario were maintained, its comparative environmental impacts would replicate the existing conditions discussions for each of the environmental topics evaluated in this EIR; and comparative impacts of the Project would be as presented under each of the EIR environmental topics. A No Build condition would achieve none of the basic Project Objectives. (Draft EIR, p. 5-39)

Impacts: **Air Quality**

Under this Alternative existing air quality conditions would be maintained (see: EIR Section 4.3, Air Quality, 4.3.3, Setting). This Alternative would realize no new development and would generate no additional air pollutant emissions. This Alternative would result in reduced air quality impacts when compared to the Project. No air quality impact mitigation would be implemented under this Alternative.

Biological Resources

Under this Alternative, existing biological resources conditions would be maintained. This Alternative would realize no new development and would have no incremental effects on biological resources. This Alternative would result in reduced biological resources impacts when compared to the Project. Biological resources impacts under this Alternative would be less-than-significant.

Cultural Resources

Under this Alternative, existing cultural resources/tribal cultural resources conditions would be maintained. This Alternative would realize no new development and would result in no new or additional cultural resources/tribal cultural resources impacts. This Alternative would result in reduced cultural resources/tribal cultural resources impacts when compared to the Project. No cultural resources/tribal cultural resources impact mitigation would be implemented under this Alternative.

Energy

Under this Alternative, existing energy conditions would be maintained. This Alternative would realize no new development and would not result in

increased energy demands. This Alternative would result in reduced energy impacts when compared to the Project. As with the Project, energy impacts would be less-than-significant.

Geology and Soils

Under this Alternative, existing geology and soils conditions would be maintained. This Alternative would realize no new development and would result in no new or additional geology and soils impacts. This Alternative would result in reduced geology and soils impacts when compared to the Project. As with the Project, geology and soils impacts would be less-than-significant.

Greenhouse Gas Emissions

Under this Alternative, existing GHG emissions conditions would be maintained. This Alternative would realize no new development and would generate no additional GHG emissions. This Alternative would result in reduced GHG emissions impacts when compared to the Project. No GHG impact mitigation would be implemented under this Alternative.

Hazards and Hazardous Materials

Under this Alternative, existing hazards/hazardous materials conditions would be maintained. This Alternative would realize no new development and would generate no additional hazards/hazardous materials impacts. Existing adverse hazards/hazardous conditions affecting the subject site and surrounding areas would persist. This Alternative may therefore result in increased hazards/hazardous conditions impacts when compared to the Project. That is, under the Project, adverse hazards/hazardous conditions affecting the site would be comprehensively remediated as part of the Project development - such remediation would not occur under this Alternative. No hazards/hazardous materials impact mitigation would be implemented under this Alternative.

Hydrology and Water Quality

Under this Alternative, existing hydrology/water quality conditions would be maintained. This Alternative would realize no new development and would generate no additional hydrology and water quality impacts. Existing adverse hydrology/water quality conditions affecting the subject site (e.g., lack of storm sewers, lack of storm water quality treatment systems, degraded water quality due to dairy farming operations) would persist. This Alternative may therefore result in increased hydrology and water quality impacts when compared to the Project. That is, under the Project, adverse hydrology and water quality conditions affecting the site and surrounding areas would be comprehensively addressed through implementation of the Project stormwater management systems. These stormwater management system improvements would not be implemented under this Alternative. No

hydrology/water quality impact mitigation would be implemented under this Alternative.

Land Use and Planning

Under this Alternative, existing land use/planning conditions would be maintained. This Alternative would realize no new development and would require no land use or planning discretionary actions or permits. In this respect, land uses and planning impacts would be decreased when compared to the Project. However, this Alternative would not support the City's long-range vision for the subject site, under which the site would be developed with Specific Plan Residential, Office/Commercial, Light Industrial, and Community Facilities Land Uses. Comparative Land Use and Planning impacts under this Alternative would be reduced when compared to the Project. Under both the Project and this Alternative, Land Use and Planning impacts would be less-than-significant.

Noise

Under this Alternative, existing noise/vibration conditions would be maintained. This Alternative would realize no new development and would generate no additional noise or vibration. This Alternative would result in reduced noise and vibration levels when compared to the Project. No noise or vibration impact mitigation would be required or would be implemented under this Alternative.

Transportation

VMT Impacts

This Alternative would maintain existing VMT conditions. This Alternative would result in decreased total VMT when compared to the Project. Because the intensity and scope of uses is diminished under this Alternative, the Service Population would also be decreased. On this basis, this Alternative may not substantially alter the VMT/SP ratio otherwise resulting from the Project. Under the Project and this Alternative, VMT impacts would be less-than-significant.

Other Transportation Topics

No new traffic would be generated, and no new or additional impacts related to other transportation topics would result under this Alternative. As with the Project, airport land use compatibility, traffic hazards, and emergency access impacts would be less-than-significant.

Utilities and Service Systems

Under this Alternative, existing utilities and service systems conditions would be maintained. This Alternative would realize no new development and would result in no new or additional utilities and service systems impacts. This Alternative would result in reduced utilities and service

systems impacts when compared to the Project. No utilities and service systems impact mitigation would be implemented under this Alternative.

Ability to Reduce Impacts

This Alternative would potentially result in increased impacts to hazards and hazardous materials when compared to the impacts under the Project. This alternative will have similar or reduced impacts compared to the proposed Project related to air quality, biological resources, cultural/tribal resources, energy, geology and soils, GHG emissions, hydrology and water quality, land use and planning, noise, transportation, and utilities and service systems.

Ability to Achieve Project Objectives

This Alternative would realize none of the stated Project Objectives.

Finding: The City Council rejects Alternative 1: No Project/No Build Alternative, on the following grounds, each of which individually provides sufficient justification for rejection of this alternative: (1) the alternative fails to meet any of the Project objectives and would not provide any of the Project benefits that would occur with the implementation of the proposed Project; and (2) the alternative would result in increased impacts relating to hazards and hazardous materials.

b. *Alternative 2: No Project Alternative: Development per Existing Specific Plan Land Uses*

Description: The No Project Alternative: Development per Existing Specific Plan Land Uses (Existing Specific Plan Land Uses) scenario represents foreseeable development of the subject site pursuant to the site's current Policy Plan Land Use designations. Draft EIR Table 5.2-1 compares the composition and scope of uses under the Project with development that could result under the Existing Specific Plan Land Uses scenario. (Draft EIR, pp. 5-39 – 5-40)

Impacts: **Air Quality**

Under this Alternative, similar construction activities and use of construction equipment would be similar to that occurring under the Project. The maximum daily area of disturbance would be the same under both scenarios. Construction-source emissions impacts under the Project and this Alternative would be comparable and would be individually and cumulatively significant and unavoidable.

When compared to the Project, this Alternative would likely result in comparable total development within the Specific Plan Area, though the types and configuration of uses would be amended under the Project. Operational-source emissions under this Alternative would be comparable to the Project operational-source emissions and would be individually and cumulatively significant and unavoidable.

Construction-source and operational-source emissions threshold exceedances under this Alternative would impede air quality attainment strategies and goals outlined in the AQMP. On this basis, this Alternative would be inconsistent with the AQMP. This is a significant and unavoidable impact. Per SCAQMD criteria, Project-level impacts that are significant are also cumulatively considerable.

All other air quality impacts under this Alternative would be less-than-significant, or less-than-significant as mitigated.

Biological Resources

Development realized under this Alternative would result in disturbance of the subject site similar to that occurring under the Project. Potential impacts to biological resources would also likely be similar to those of the Project. As with the Project, potential biological resources impacts would be less-than-significant as mitigated.

Cultural Resources

Site disturbance and potential impacts to cultural resources would be similar to those of the Project. This Alternative would incorporate mitigation that would reduce potential impacts to cultural resources/tribal cultural resources to levels that would be less-than-significant. Cultural resources/tribal cultural resources impacts of this Alternative and the Project would be comparable and would be less-than-significant as mitigated.

Energy

As with the Project, this Alternative would be provided energy from existing sources. It is assumed that this Alternative would comply with applicable energy conservation and energy efficiency regulations and policies; and that this Alternative would not implement facilities or operations that would result in wasteful, inefficient or unnecessary consumption. When compared to the Project, energy consumption would likely be comparable under this Alternative. As with the Project, energy impacts would be less-than-significant.

Geology and Soils

It is assumed that this Alternative would not propose or require facilities or operations that would result in adverse geology/soils conditions or exacerbate any existing adverse geology/soils conditions. As with the Project, this Alternative would be subject to requirements of the CBC, City of Ontario Building Code, site- and development-specific geotechnical studies, and any necessary mitigation measures. Geology and soils impacts under this Alternative would be similar to the Project and would be less-than-significant.

Greenhouse Gas Emissions

When compared to the Project, this Alternative would likely result in comparable total development within the Specific Plan Area, though the types and configuration of uses would be amended under the Project. GHG emissions under this Alternative would be comparable to the Project GHG emissions and would exceed the SCAQMD screening level threshold of 3,000 MTCO2e/year. On this basis, GHG emissions under this Alternative would result in a significant and unavoidable environmental impact.

This Alternative would implement GHG emissions mitigation per the 2022 CCAP Update. Compliance with the 2022 CCAP Update ensures that this Alternative would not conflict with any applicable plan or strategy for controlling or reducing GHG emissions. Impacts of this Alternative in this regard would be less-than-significant.

Hazards and Hazardous Materials

As with the Project, existing hazards or potentially hazardous conditions affecting the subject site would be remediated and related impacts reduced to levels that would be less-than-significant. This Alternative use would not result in hazards and hazardous materials impacts different than those resulting from the Project. This Alternative would not implement uses or programs that would exacerbate any existing adverse hazards/hazardous materials conditions. As with the Project, potential hazards/hazardous materials impacts would be less-than-significant.

Hydrology and Water Quality

This Alternative would implement all necessary storm drain infrastructure improvements. The area subject to development with impervious surfaces under this Alternative and the Project would be comparable. This Alternative and Project would therefore result in comparable rates and quantities of post-development storm water runoff. This Alternative would be required to implement on-site storm water management systems, reducing impacts to storm drain capacities to levels that would be less-than-significant. This Alternative would be required to comply with applicable SWPPP and WQMP provisions, thereby reducing potential water quality impacts to levels that would be less-than-significant. Stormwater management systems implemented under this Alternative would act to improve existing hydrology and water quality conditions. Potential hydrology and water quality impacts of this Alternative and the Project would be comparable and would be less-than-significant as mitigated.

Land Use and Planning

This scenario assumes development of the subject site consistent with the site's Existing (2021) Rich-Haven Specific Plan Land Use designations. This Alternative would not require amendment of the existing Rich-Haven Specific Plan, as proposed by the Project. It is noted here that the proposed 2022 Rich-Haven Specific Plan Amendment is consistent with TOP 2050

Policy Plan Land Use Plan, whereas the 2021 Rich-Haven Specific Plan is not. That is, for the 2021 Specific Plan to be maintained, it would require amendment of TOP 2050 Policy Plan Land Use Plan; in this respect, implications of Policy Plan (General Plan) amendments are generally broader in scope and more fundamental when compared to an amendment of an existing Specific Plan. No Project Alternative would likely result in Land Use and Planning impacts equal to or greater than impacts of the Project.

Noise

Under this Alternative, areas affected by construction activities and the types and operations of construction equipment employed would be substantially the same as would occur under the Project. Maximum received construction-source noise/vibration levels would be unchanged and would be less-than-significant.

This Alternative would not generate or result in operational area-source noise/vibration substantially different than would result from uses proposed by the Project. Under this Alternative and the Project, operational area-source noise/vibration impacts would be comparable and would be less-than-significant.

As with the Project, certain of the residential uses under this Alternative could be exposed to potentially significant vehicular-source noise levels. Mitigation would be included to reduce this impact to levels that would be less-than-significant.

As with the Project, this Alternative would not expose people residing or working in the area to excessive aircraft or airport-source noise levels.

Transportation

VMT Impacts

When compared to the Project, this Alternative would likely result in comparable total development within the Specific Plan Area, though the types and configuration of uses would be amended under the Project. The Specific Plan Service Population would also likely be comparable. On this basis, this Alternative would not substantially alter the VMT/SP ratio otherwise resulting from the Project. Under the Project and this Alternative, VMT impacts would be less-than-significant.

Other Transportation Topics

As with the Project, required Study Area traffic improvements would be constructed or proportionally funded under this Alternative. As with the Project, airport land use compatibility impacts would be less-than-significant. It is assumed that like the Project, development of the subject site under the Reduced Intensity Alternative would incorporate those site adjacent and on-site circulation system improvements necessary to avoid

or mitigate development-specific traffic impacts. As a matter of law, this Alternative would be required to comply with City ordinances addressing the Study Area circulation system. As with the Project, transportation systems improvements would be designed and implemented consistent with City and Manual on Uniform Traffic Control Devices (MUTCD) requirements. Under this Alternative, as with the Project, "other" transportation impacts would be less-than-significant.

Utilities and Service Systems

This Alternative would result in development intensities comparable to the Project. It is assumed that this Alternative would implement all necessary on-site and off-site utilities and service infrastructure system improvements. Utilities and service system impacts of this Alternative and the Project would be comparable and would be less-than-significant.

Ability to Reduce Impacts

This Alternative would potentially result in increased impacts to air quality, GHG emissions, and land use and planning when compared to the impacts under the Project. This alternative will have similar impacts compared to the proposed Project related to biological resources, cultural/tribal resources, energy, geology and soils, hazards and hazardous materials, hydrology and water quality, noise, transportation, and utilities and service systems.

Ability to Achieve Project Objectives

This Alternative would likely realize the stated Project Objectives regarding design and implementation of Specific Plan Land Uses. To these ends, this Alternative would provide a mix of residential, commercial-office, light industrial and community facilities uses similar to the Project. However, uses would be configured and oriented in a manner differing from the Project.

This Alternative would however fail to achieve or would impede attainment the following Project Objectives:

- Implement TOP 2050 Policy Plan Land Use Plan; Support TOP 2050 vision for urbanization of the Ontario Ranch area of the City. This Alternative proposes land uses that are inconsistent with TOP 2050 Policy Plan Land Use Plan and would require amendment of TOP Policy Plan Land Use Plan. This alternative would therefore conflict with, rather than support, implementation of TOP 2050 Policy Plan.

Finding: The City Council rejects Alternative 2: No Project Alternative: Development per Existing Specific Plan Land Uses on the following grounds, each of which individually provides sufficient justification for rejection of this alternative: (1) This Alternative would provide no reduction in significant environmental impacts when compared to the Project; (2) this Alternative may increase the severity of, or create additional impacts not otherwise occurring under the Project; and (3) due to its comparative reduction in

scope, the Alternative would likely impede or substantially restrict attainment of the Project Objectives.

c. *Alternative 3: Reduced Intensity Alternative*

Description: The Reduced Intensity Alternative focuses on a development scenario that would reduce the significant operational-source air quality impacts otherwise occurring under the Project.

Of the total operational-source emissions generated by the Project, approximately 77 percent (by weight) would be generated by Project mobile sources (traffic). An effective way to reduce the Project operational-source emissions would therefore be an Alternative that would reduce the total amount of traffic generated by the Project. Based on the reduction in total traffic, the Reduced Intensity Alternative would also reduce the scope and/or intensity of significant air quality impacts, and GHG emissions impacts that would otherwise result from implementation of the Project.

For purposes of the EIR Alternatives Analysis, the Reduced Intensity Alternative would implement the Project uses at an approximately 25 percent reduction in overall development intensity. The mix of land uses proposed by the Project would be proportionally maintained under the Reduced Intensity Alternative. (Draft EIR, pp. 5-40 – 5-41)

Impacts: **Air Quality**

Construction activities and use of construction equipment would be similar to the Project. The maximum daily area of disturbance would be the same under both scenarios. Construction-source emissions impacts under the Project and this Alternative would be comparable and would be individually and cumulatively significant and unavoidable.

The 25 percent reduction in development intensity under the Reduced Intensity Alternative would translate roughly to a 25 percent reduction in operational-source air pollutant emissions when compared to the Project.

When compared to the Project, operational-source emissions would be incrementally reduced for all pollutants under the Reduced Intensity Alternative. As with the Project, operational-source VOC, NOx, CO, and PM_{10} emissions under the Reduced Intensity Alternative would exceed applicable SCAQMD regional thresholds. As with the Project, the Reduced Intensity Alternative's VOC, NOx, and PM_{10} and regional threshold exceedances would contribute to existing Basin ozone and $PM_{10}/PM_{2.5}$ nonattainment conditions.

Construction-source and operational-source emissions threshold exceedances under this Alternative would impede air quality attainment strategies and goals outlined in the AQMP. On this basis, this Alternative would be inconsistent with the AQMP. This is a significant and unavoidable impact. Per SCAQMD criteria, Project-level impacts that are significant are also cumulatively considerable.

All other air quality impacts under this Alternative would be diminished when compared to the project and would be less-than-significant, or less-than-significant as mitigated.

Biological Resources

The reduction in overall site development realized under the Reduced Intensity Alternative could result in a portion of the site remaining, for the time being, in an undeveloped condition. Realistically, however, potential impacts to biological resources would likely be similar to those of the Project, given the extent of construction activities and subsequent occupancies that would result from the site's development. Biological resources impacts under this Alternative would be similar to the Project and would be less-than-significant as mitigated.

Cultural Resources

Site disturbance and potential impacts to cultural resources would be similar to those of the Project. This Alternative would incorporate mitigation that would reduce potential impacts to cultural resources/tribal cultural resources to levels that would be less-than-significant. Cultural resources/tribal cultural resources impacts of this Alternative and the Project would be comparable and would be less-than-significant as mitigated.

Energy

The reduction in development scope under the Reduced Intensity Project Alternative would tend to reduce total energy demands and total energy consumption. As with the Project, the Reduced Intensity Alternative uses would be required to implement energy-efficient facilities, and to otherwise demonstrate effective energy use. Under the Reduced Intensity Alternative, proposed development would also be required to substantiate compliance with state or local plan for renewable energy or energy efficiency. Impacts would be similar to the Project.

Geology and Soils

The Reduced Intensity Alternative would implement the Project uses at a reduced scale within the same site developed under the Project. It is assumed that the Reduced Intensity Alternative would not propose or require facilities or operations that would result in adverse geology/soils conditions, or exacerbate any existing adverse geology/soils conditions. As with the Project, the Reduced Intensity Alternative would be subject to requirements of the CBC, City of Ontario Building Code, site- and development-specific geotechnical studies, and any necessary mitigation measures. Geology and soils impacts under this Alternative would be similar to the Project and would be less-than-significant.

Greenhouse Gas Emissions

When compared to the Project, the Reduced Intensity Alternative would result in diminished GHG emissions due to the reduced scope of facilities, reductions in building/facility energy demands, and reduced trip generation. Assuming a reduction in GHG emissions comparable to the 25 percent reduction in scope under this Alternative, GHG emissions would total approximately 0.75 x of the Project GHG emissions, or 0.75 x 129,314.95 MTCO2e/yr. = 96,986.21 MTCO2e/yr.

As with the Project, the GHG emissions generated by the Reduced Intensity Alternative would exceed the SCAQMD screening level threshold of 3,000 MTCO2e/yr. On this basis, GHG emissions generated by the Reduced Intensity Alternative would represent a significant and unavoidable environmental impact.

This Alternative would implement GHG emissions mitigation per the 2022 CCAP Update. Compliance with the 2022 CCAP Update ensures that this Alternative would not conflict with any applicable plan or strategy for controlling or reducing GHG emissions. Impacts of this Alternative in this regard would be less-than-significant.

Hazards and Hazardous Materials

As with the Project, existing hazards or potentially hazardous conditions affecting the subject site would be remediated and related impacts reduced to levels that would be less-than-significant. The Reduced Intensity Alternative land uses would be similar to the Project and would not result in hazards and hazardous materials impacts different than those resulting from the Project. The Reduced Intensity Alternative would not implement uses or programs that would exacerbate any existing adverse hazards/hazardous materials conditions. Potential hazards/hazardous materials impacts of the Reduced Intensity Alternative and the Project would be comparable and would be less-than-significant.

Hydrology and Water Quality

The Reduced Intensity Alternative would implement all necessary storm drain infrastructure improvements. When compared to the Project, the area subject to development with impervious surfaces under the Reduced Intensity Alternative may be reduced. The Reduced Intensity Alternative may therefore result in reduced rates and quantities of post-development storm water runoff. The Reduced Intensity Alternative would be required to implement on-site storm water management systems, reducing impacts to storm drain capacities to levels that would be less-than-significant. The Reduced Intensity Alternative would be required to comply with applicable SWPPP and WQMP provisions, thereby reducing potential water quality impacts to levels that would be less-than-significant. Stormwater management systems implemented under the Reduced Intensity Alternative would act to improve existing hydrology and water quality

conditions. Hydrology and water quality impacts of the Reduced Intensity Alternative and the Project would be comparable and would be less-than-significant as mitigated.

Land Use and Planning

The Reduced Intensity Alternative would require amendment of Policy Plan Land Use designations similar to the Project. Other discretionary actions, consultations, and permitting required under the Reduced Intensity Alternative and the Project would be the same. Under either the Project or the Reduced Intensity Alternative, land use and planning impacts would be less-than-significant.

Noise

Under the Reduced Intensity Alternative, the types of construction activities and equipment employed would likely be similar to those associated with construction of the Project. Maximum received construction-source noise/vibration levels would be unchanged. As with the Project, construction-source noise/vibration levels received at area land uses would be less-than-significant.

The Reduced Intensity Alternative would not generate or result in operational area-source noise/vibration substantially different than would result from the Project. Under the Reduced Intensity Alternative and the Project, operational area-source noise/vibration impacts would be less-than-significant.

As with the Project, certain of the residential uses under this Alternative could be exposed to potentially significant vehicular-source noise levels. Mitigation would be included to reduce this impact to levels that would be less-than-significant.

As with the Project, this Alternative would not expose people residing or working in the area to excessive aircraft or airport-source noise levels.

Transportation and Traffic

VMT Impacts

The Reduced Intensity Alternative would reduce Project development intensity, associated trip generation, and VMT by an estimated 25 percent. The reduction in Service Population would also likely be comparable.

The Reduced Intensity Alternative would result in reduced total VMT when compared to the Project. Because the intensity and scope of uses would be decreased under the Reduced Intensity Alternative, the Service Population would also likely be decreased. The Reduced Intensity Alternative would therefore not substantially alter the VMT/SP ratio otherwise resulting from the Project.

Other Transportation Topics

Based on the 25 percent reduction in trip generation, the extent of Study Area traffic improvements required under this Alternative would likely be reduced when compared to the Project. Because the Reduced Intensity Alternative would generate less traffic than the Project, fair share fee responsibilities, (which are based on proportional traffic contributions), would be reduced when compared to the Project. Required DIF payments (which are based on development building areas) would also be reduced. It is assumed that, like the Project, development of the subject site under the Reduced Intensity Alternative would incorporate those site adjacent and on-site circulation system improvements necessary to avoid or mitigate development-specific traffic impacts.

As a matter of law, this Alternative would be required to comply with City ordinances addressing the Study Area circulation system. As with the Project, transportation systems improvements would be designed and implemented consistent with City and Manual on MUTCD requirements. Under this Alternative, as with the Project, "other" transportation impacts would be less-than-significant.

Utilities and Service Systems

The Reduced Intensity Alternative would result in development of similar land uses but at a lower intensity than the Project. It is assumed that the Reduced Intensity Alternative would implement all necessary on-site and off-site utilities and service infrastructure system improvements. Utilities and service systems impacts of this Alternative and the Project would be comparable and would be less-than-significant.

Ability to Reduce Impacts

The Reduced Intensity Alternative would reduce, but not eliminate, the Project's significant and unavoidable impacts regarding air quality and GHG emissions. More specifically:

- The magnitude of operational-source air quality impacts (VOC, NOx, CO, PM_{10}) would be diminished but would remain significant and unavoidable. $PM_{2.5}$ emissions impacts would be reduced below significance thresholds.
- Total GHG emissions would be reduced. However, GHG emissions would still exceed the SCAQMD 3,000 $MTCO_2e$ screening threshold. Impacts in this regard would remain significant and unavoidable.

Ability to Achieve Project Objectives

The Reduced Intensity Alternative would implement the proposed 2022 Specific Plan Amendment Land Uses and development concepts at an approximately 25 percent reduction in overall development intensity. Due to its comparative reduction in scope, the Reduced Intensity Alternative would

likely impede or substantially restrict attainment of the following Project Objectives.

- *Implement a Specific Plan development supporting office/commercial and light industrial uses providing a broad range of employment opportunities.* The comparative 25 percent reduction in development intensity under the Reduced Intensity Alternative would diminish the number and diversity of potential employment opportunities otherwise provided by the Project. The noted reduction in scope would also restrict potential synergy between uses at this location and other vicinity uses.
- *Implement Specific Plan developments providing a broad range of additional construction employment opportunities.* The comparative 25 percent reduction in development intensity under the Reduced Intensity Alternative would diminish the number and diversity of potential construction employment opportunities otherwise provided by the Project. The noted reduction in scope would also restrict potential synergy between uses at this location and other vicinity uses.
- *Support TOP 2050 vision for urbanization of the Ontario Ranch area of the City.* The comparative 25 percent reduction in development intensity under the Reduced Intensity Alternative would limit development potential of prime urban properties within the City. In this respect, the subject site is designated and anticipated for development types and intensities such as are proposed by the Project; is bounded by similar compatible urban development; and is served by all necessary services and utilities. The Reduced Intensity Alternative would fail to take advantage of these site attributes. Further, this Alternative would conflict with or impede TOP Policy Plan vision for urbanization of the Ontario Ranch area of the City. Potential contrary effects would include:
    - A reduction in residential, commercial-office, light industrial, and community facilities development opportunities otherwise available under the Project.
    - A reduction in the range and variety of residential, commercial-office, light industrial developers and tenants that would be attracted to the City.
    - Diminished potential for development of the site with uses and at an intensity the City considers to be the highest and best use for the subject property.
    - Diminished fiscal benefits available to the City of Ontario.
    - Diminished job creation. Related diminished potential for improvement of the regional jobs/housing balance condition.
    - Diminished residential opportunities. This Alternative would reduce residential product types and the total quantity of available housing within the City. To these ends, this Alternative would conflict with

residential goals, strategies, and opportunities outlines in TOP 2020 Housing Element. By reducing the potential for residential development there is also the potential for this Alternative to conflict with SB 330, Skinner. Housing Crisis Act of 2019.

Finding: The City Council rejects Alternative 3: Reduced Intensity Alternative, on the following grounds, each of which individually provides sufficient justification for rejection of this alternative: (1) based on the reduction in overall development scope, the Reduced Intensity Alternative would broadly restrict attainment of all Project Objectives; (2) the Alternative would reduce, but not eliminate, the Project's significant and unavoidable impacts regarding air quality and GHG emissions; and (3) the Alternative is infeasible, as qualitatively, development of the subject site under the Reduced Intensity Alternative fails to optimize use of a significant vacant property, and is not considered by the Lead Agency to represent the highest and best use of the subject site. (DEIR p. 5-79).

This Alternative would provide no reduction in significant environmental impacts when compared to the Project; (2) this Alternative may increase the severity of, or create additional impacts not otherwise occurring under the Project; and (3) due to its comparative reduction in scope, the Alternative would likely impede or substantially restrict attainment of the Project Objectives.

4. ENVIRONMENTALLY SUPERIOR ALTERNATIVE

CEQA requires a lead agency to identify the "environmentally superior alternative" and, in cases where the "No Project" Alternative is environmentally superior to the proposed Project, the environmentally superior development alternative must be identified. The Reduced Intensity Alternative has been identified as the "environmentally superior" alternative.

Reduced Intensity Alternative

The Reduced-Intensity Alternative has been identified as the environmentally superior alternative because it would result in potential incremental reduction in certain significant environmental impacts otherwise occurring under the Project, but would not eliminate these impacts. The Reduced Intensity Alternative would allow for limited attainment of the Project Objectives.

Countering its potential environmental benefits, the Reduced Intensity Alternative would broadly and substantially diminish attainment of the Project Objectives, with related diminishment of socio-economic benefits to the City and region. CEQA indicates that socioeconomic effects (while not lone determinants) are important considerations for decision-makers in evaluating and considering EIR Alternatives. With respect to socioeconomics, the Project and the Reduced Intensity Alternative would each have beneficial effects for the area. Either of these scenarios would contribute to area employment and the City's overall tax base. However, as noted previously, because the scope and variety of land uses would be reduced by approximately 25 percent under the

Reduced Intensity Alternative, the resulting effective realization of the Project Objectives, to include economic benefits to the City and region, would likely be similarly diminished.

Additionally, at an approximate 25 percent reduction in the Project's development scope, the Reduced Intensity Alternative would not recognize the site's value as one of the remaining undeveloped properties within the City; or take advantage of the site's available acreage and consequently would not result in development of the subject site in a manner considered to be its highest and best use

CEQA does not require the lead agency (the City of Ontario) to choose the environmentally superior alternative. Instead, CEQA requires the City to consider environmentally superior alternatives, weigh those considerations against the environmental impacts of the proposed Project, and make findings that the benefits of those considerations outweigh the harm. "Among the factors that may be used to eliminate alternatives from detailed consideration in an EIR are: (i) failure to meet most of the basic project objectives, (ii) infeasibility, or (iii) inability to avoid significant environmental impacts" (State CEQA Guidelines §15126.6[c]).

G. ADDITIONAL CEQA CONSIDERATIONS

1. SIGNIFICANT IRREVERSIBLE CHANGES DUE TO THE PROPOSED PROJECT

The *CEQA Guidelines* § § 15126, subd. (c), 15126.2, subd. (c), 15127, require that for certain types or categories of projects, an EIR must address significant irreversible environmental changes that would occur should the Project be implemented. As presented at CEQA Guidelines §15127, the topic of Significant Irreversible Environmental Changes need be addressed in EIRs prepared in connection with any of the following activities:

> (a) The adoption, amendment, or enactment of a plan, policy, or ordinance of a public agency;
>
> (b) The adoption by a local agency formation commission of a resolution making determinations; or
>
> (c) A project which will be subject to the requirements for preparing of an environmental impact statement pursuant to the requirements of the National Environmental Policy Act of 1969, 42 U.S.C. 4321-4347.

The Project qualifies under Guidelines §15127 (a) in that an amendment to the current (2021) Rich-Haven Specific Plan is required in order to implement the Project. As such, this EIR analysis addresses significant irreversible environmental changes which could be involved in the proposed action should it be implemented [Guidelines, Sections 15126(e) and 15127]. An impact would fall into this category if:

A project would involve a large commitment of nonrenewable resources;

- The primary and secondary impacts of a project would generally commit future generations to similar uses;

- A project involves uses in which irreversible damage could result from any potential environmental incidents associated with the project; or
- The proposed consumption of resources is not justified (e.g., the project results in wasteful use of energy).

With regard to the above considerations, various natural resources, in the form of construction materials and energy resources, would be used in the construction of the Project, but their use is not expected to result in shortfalls in the availability of these resources. Development of the site with the Project uses will commit the property to such uses for the foreseeable future, and thereby limit the site's prospective alternative uses. Notwithstanding, given the following, commitment of the site to uses proposed by the Project is considered appropriate.

- The Project site is currently zoned for Specific Plan development. The Project proposes Specific Plan development.
- The Project and the Project development intensities are consistent with development intensities envisioned under TOP 2050 Policy Plan Land Use designations.
- Urbanization of the subject site as proposed under the Project is a compatible infill continuation of urbanizing surrounding properties.

The Project presents no significant possibility of irreversible environmental damage "from any potential environmental incidents associated with the project." That is, the Project does not propose facilities or uses that would result in potentially significant environmental incidents. Moreover, all feasible mitigation is incorporated in the Project to reduce its potential environmental effects. As discussed herein, the Project would not result in or cause unwarranted or wasteful use of resources, including energy. (Draft EIR, pp. 5-84 - 5-86)

2. GROWTH-INDUCING IMPACTS OF THE PROPOSED PROJECT

Section 15126.2(e) of the State CEQA Guidelines requires the EIR to address the growth-inducing impact of the Project. DEIR Section 5.0 evaluates the potential for the proposed Project to affect economic or population growth, or the construction of additional housing, either directly or indirectly, in the surrounding environment. In accordance with State CEQA Guidelines Section 15126.2(e), a Project would be considered to have a growth-inducing effect if it would:

- Directly or indirectly foster economic or population growth, or the construction of additional housing in the surrounding environment;
- Remove obstacles to population growth (e.g., construction of an infrastructure expansion to allow for more construction in service areas);
- Tax existing community service facilities, requiring the construction of new facilities that could cause significant environmental effects; or

- Encourage and facilitate other activities that could significantly affect the environment, either individually or cumulatively.

In addition, CEQA Guidelines state that growth inducement must not be assumed.

The Project could induce growth through the construction of housing, commercial-office uses, light industrial uses, job creation, and economic stimulus. The Project land uses, and associated development are consistent with and anticipated under TOP 2050. Growth inducement resulting from the Project would not exceed projections developed under TOP 2050. Any Project-induced growth would not result in environmental impacts not already considered and addressed in TOP 2050 SEIR.

The Project would not otherwise encourage and facilitate known or probable activities that could significantly affect the environment, either individually or cumulatively. To the satisfaction of the City, as-yet unknown activities or developments that may derive from the Project would be independently required to evaluate and address their potential environmental impacts.

SECTION V. STATEMENT OF OVERRIDING CONSIDERATIONS

CEQA requires decision makers to balance the benefits of the proposed Project against its unavoidable environmental risks when determining whether to approve the project. If the benefits of the project outweigh the unavoidable adverse effects, those effects may be considered "acceptable" (State CEQA Guidelines §15093[a]). CEQA requires the agency to support, in writing, the specific reasons for considering a project acceptable when significant impacts are infeasible to mitigate. Such reasons must be based on substantial evidence in the FEIR or elsewhere in the administrative record (State CEQA Guidelines §15093 [b]). The agency's statement is referred to as a Statement of Overriding Considerations.

The following provides a description of the project's significant and unavoidable adverse impact and the justification for adopting a statement of overriding considerations.

A. SIGNIFICANT AND UNAVOIDABLE IMPACTS

The City identifies the following significant unavoidable adverse impacts of the Project, which would continue to be applicable upon implementation of the proposed project:

Air Quality

- Would the Project conflict with or obstruct implementation of the applicable air quality plan?
- Would the proposed project, result in a cumulatively considerable net increase of any criteria pollutant for which the project region is non-attainment under an applicable federal or state ambient air quality standard?

Greenhouse Gas Emissions

- Would the Project generate GHG emissions, either directly or indirectly, that could have a significant impact on the environment?

B. PROJECT BENEFITS IN SUPPORT OF THE STATEMENT OF OVERRIDING CONSIDERATIONS

The following section describes the benefits of the proposed Project that outweigh the project's unavoidable adverse effects and provides specific reasons for considering the Project acceptable even though the FEIR has indicated that there will be three significant and unavoidable project impacts even with the mitigation measures implemented. Accordingly, this Statement of Overriding Considerations regarding potentially significant adverse environmental impacts resulting from the proposed Project, as set forth below, has been prepared. Pursuant to CEQA Guidelines §15093(c), the Statement of Overriding Considerations will be included in the record of the Project approval and will also be noted in the Notice of Determination. Each of the benefits identified below provides a separate and independent basis for overriding the significant environmental effects of the proposed Project.

Having reduced the potential effects of the proposed Project through all feasible mitigation measures as described previously herein, and balancing the benefits of the proposed Project against its potential unavoidable adverse impacts, the City finds that the following legal requirements and benefits of the proposed Project individually and collectively outweigh the potentially significant unavoidable adverse impacts for the following reasons:

1. Implements the Objectives Established for the Proposed Project

The primary goal of the Project is the development of the subject site with a productive mix of Specific Plan residential, commercial, light industrial and community facilities. Attainment of the Project Objectives collectively outweigh the Project's significant and unavoidable impacts by directly and indirectly contributing to benefits of the Project.

2. Provides Employment Opportunities

The Project high-quality commercial, retail, and industrial uses would increase business and employment opportunities for City and area residents acting to further City economic prosperity.

3. Provides Substantial Infrastructure Improvements

The Project will be responsible for the construction of area-wide infrastructure construction within the Ontario Ranch area, including roadway, water, and sewer and storm drains as set forth in the Draft EIR and Rich-Haven Specific Plan 2022 Amendment. The Project would construct improvements and infrastructure consistent with the 2050 TOP and the City's various master plans for roadways and sewers, among others.

4. Consistency with the Regional Goals in the RTP/SCS

SCAG's 2020-2045 RTP/SCS was adopted September 3, 2020. The RTP/SCS identifies that land use strategies that focus on new housing and job growth in areas served by high quality transit and other opportunity areas would be consistent with a land use development pattern that supports and complements the proposed transportation network. The overarching strategy in the 2020-2045 RTP/SCS is to provide for a plan that allows the southern California region to grow in more compact communities in existing urban areas; provide neighborhoods with efficient and plentiful public transit and

abundant and safe opportunities to walk, bike, and pursue other forms of active transportation; and preserve more of the region's remaining natural lands.

The proposed Project would create an economic engine to drive future growth in Ontario Ranch, spur infrastructure improvements in the area, and would allow for the development of urban uses on currently underutilized land. The implementation of the proposed Project would facilitate the construction of roads and other major infrastructure investments that will ensure that mobility accessibility for people and goods would be maximized. The Specific Plan would expand Ontario's industrial uses in proximity to local airports and regional networks, and the vehicular and pedestrian improvements called for in the Specific Plan would be implemented and maintained to meet the needs of employees and visitors. Additionally, all modes of public and commercial transit throughout the Project area would be required to follow safety standards set by state, regional, and local regulations. The proposed Specific Plan would preserve and ensure access to the local public transportation near the Project site. The proposed project would improve and maintain local and area-serving transportation systems to maximize efficiency and productivity. Moreover, the proposed Project would incorporate energy efficiency and sustainability strategies.

5. Consistency with the City's Community Climate Action Plan

The Project will implement GHG emissions reduction measures specified in the Draft EIR and will comply with the City's adopted CAP, which strives to achieve GHG reductions City-wide that comply with the State's reduction requirements. The primary purpose of the City's Community CAP is to design a feasible strategy to reduce GHG emissions generated by community activities that is consistent with statewide Scoping Plan GHG reduction efforts. The GHG emissions reduction target established under the CAP is 30 percent under year 2020 business-as-usual (BAU) levels. To meet this goal and to supplement statewide initiatives, the City has identified a series of reduction measures to be implemented by the City before 2020. These reduction measures include programs that improve building energy efficiency, increase use of public and active transit and decrease VMT, increase use of alternative-fueled vehicles, increase use of renewable energy, reduce water consumption, and reduce waste.

Implementation of the design features and operational measures outlined at Draft EIR Tables 4.4-6, 4.4-7 would ensure that the Project is consistent with and supports the 2022 CAP Update. Project development proposals shall implement Screening Table Measures identified at Tables 4.4-6, 4.4-7 or equivalent measures acceptable to the City. The City shall verify that Screening Table Measures achieving a minimum of 100 points are incorporated in development plans prior to the issuance of building permit(s) and/or site plans (as applicable). Multiple development proposals may, at the discretion of the City, be allowed to collectively demonstrate achievement of at least 100 points per the Screening Tables.

C. CONCLUSION

The City Council of Ontario has balanced the Project's benefits against the significant unavoidable impacts. The City Council finds that the proposed Project's benefits, which aim to meet the goals and policies of the City of Ontario General Plan (TOP) 2050,

outweigh the Project's significant unavoidable impacts, and these impacts, therefore, are considered acceptable in the light of the Project's benefits. The City Council finds that each of the benefits described above is an overriding consideration, independent of the other benefits, that warrants approval of the Project notwithstanding the Project's significant unavoidable impact.

SECTION VI. MITIGATION MONITORING AND REPORTING PLAN

Pursuant to PRC §21081.6, the City Council hereby adopts the Mitigation Monitoring and Reporting Plan attached to this Resolution as Exhibit A. Implementation of the Mitigation Measures contained in the Mitigation Monitoring and Reporting Program is hereby made a condition of approval of the Project. In the event of any inconsistencies between the mitigation measures as set forth herein and the Mitigation Monitoring and Reporting Plan, the Mitigation Monitoring and Reporting Plan shall control.

SECTION VII. PROJECT APPROVAL

Based upon the entire record before it, including the EIR, Findings of Fact, Statement of Overriding Considerations, and all written and oral evidence presented, City Council hereby approves the proposed Project.

SECTION VIII. STAFF DIRECTION

A Notice of Determination shall be filed with the County of San Bernardino within five (5) working days of final Project approval.

PASSED, APPROVED, AND ADOPTED this 20th day of June 2023.

1.0 EXECUTIVE SUMMARY

1.0 EXECUTIVE SUMMARY

1.1 BACKGROUND AND PROJECT OVERVIEW

The Rich-Haven Specific Plan (RHSP) was approved by the City of Ontario in 2015, with subsequent Specific Plan Amendments approved in 2016, 2018, and 2021. The current (2021) Rich-Haven Specific Plan ("2021 Specific Plan") comprises approximately 584 acres located west of Interstate 15 (I-15), and south of State Route 60 (SR-60). The 2021 Specific Plan Area lies within the 8,200-acre Ontario Ranch area, bounded generally by Riverside Drive to the north, "Old" East Edison Avenue [alignment] to the south, Mill Creek Avenue and Hamner Avenue to the east, and Haven Avenue to the west. Location of the 2021 Specific Plan is presented at Figure 1.1-1. The location and boundaries of the 2022 RHSP Specific Plan Amendment evaluated in this EIR coincide with the location and boundaries in the 2021 Specific Plan.

The 2021 Specific Plan entitlements allow for development of up to 7,194 dwelling units (all residential types), up to 990,902 square feet of commercial/office space, up to 1,183,525 square feet of light industrial uses, approximately 27 acres of public parkland, and approximately 20 acres of Southern California Edison (SCE) Parcel open space and SCE Easements. The 2022 RHSP Specific Plan Amendment (2022 Specific Plan Amendment, Project) evaluated in this EIR proposes a new amendment of the RHSP as described herein.

Pursuant to the requirements of the California Environmental Quality Act (CEQA), this Draft Environmental Impact Report (DEIR or EIR) evaluates and discloses the potential environmental impacts resulting from construction and operation of the proposed Rich-Haven Specific Plan, 2022 Amendment (Project).

NOT TO SCALE

Source: Google Earth; Applied Planning, Inc.

Figure 1.1-1
Specific Plan Location

Under the proposed 2022 RHSP Specific Plan Amendment, the Specific Plan Area would be developed with up to 7,194 dwelling units, up to 925,002 square feet of commercial space, and up to 2,767,148 square feet of light industrial uses. Other existing RHSP land uses, e.g., public parkland, Southern California Edison (SCE) Parcel open space and SCE Easements would not be substantively affected under the 2022 RHSP Specific Plan Amendment. This EIR evaluates potential environmental impacts of entire buildout of the Specific Plan Area that would result from the 2022 RHSP Specific Plan Amendment.[1]

In summary, the proposed 2022 Specific Plan Amendment would result in the following primary revisions to the 2021 Specific Plan:

1. Total residential development within the Specific Plan Area would be maintained at 7,194 dwelling units. Residential units and residential densities would however be reassigned within the Specific Plan Area.
2. Total commercial development would be reduced by approximately 65,900 square feet, an approximate 6.7 percent reduction in the 2021 Specific Plan commercial entitlements.
3. Total light industrial development would be increased by approximately 1,583,623 square feet, an approximate 134 percent increase from the 2021 Specific Plan Amendment.

Other aspects and attributes of the 2021 Specific Plan would be substantively maintained under the proposed 2022 Specific Plan Amendment. A summary of the land uses and development by Planning Area is provided at Table 1.1-1.

[1] Potential environmental impacts of the Rich Haven Specific Plan were initially evaluated in *Rich Haven Specific Plan Environmental Impact Report*, July 3, 2007 (SCH No. 2006051081). Subsequent Rich Haven Specific Plan Amendments: 2015, 2016, 2018, 2021 have been evaluated as Addendums to Certified EIRs. While the City could have continued tiering off previous environmental documents in evaluation of the Project's potential environmental impacts, in order to provide a contemporary and comprehensive analysis of the Project's impacts, a new Project-level EIR has been developed.

Table 1.1-1
2022 Specific Plan Amendment Land Use Summary, by Planning Area

Planning Area	Land Use	Acres (Gross)	Dwelling Units (Maximum)	Residential Density (Gross)	Comm./ Office (sf) (Maximum)	Light Industrial (sf) (Maximum)

Source: 2022 Rich Haven Specific Plan Amendment

This EIR Section provides an overview of the Project and its Objectives, and summarizes the potential environmental impacts of the proposal. Table 1.12-1, *Impacts and Mitigation Summary*, presented at the conclusion of this Section, lists these impacts and presents mitigation measures recommended to eliminate or reduce effects of those impacts determined to be potentially significant. For a full description of the Project, its impacts, recommended mitigation measures, and considered Alternatives to the Project, please refer to EIR Sections 3.0, 4.0, and 5.0, respectively.

1.2 PROJECT ELEMENTS

Primary elements comprising the Project are summarized below. Please refer also to the expanded characterization of Project facilities and operations presented at EIR Section 3.0, *Project Description*.

1.2.1 Site Preparation

Vacant/undeveloped portions of the Project area would be cleared of all surface features, grubbed, rough-graded, and fine-graded in preparation of building construction. Any debris generated during site preparation activities would be disposed of and/or recycled consistent with the City's Source Reduction and Recycling Element (SRRE). Existing grades within the Project site would be modified to establish suitable building pads and to facilitate site drainage. Based on preliminary development concepts, project grading will

balance on site – that is, grading activities would not require substantial import or export of soil.

1.2.2 Development Concept

All development within the Project site would be required to conform to provisions of the 2022 Specific Plan Amendment. In instances where the 2022 Specific Plan Amendment is silent, development proposals within the Specific Plan Area would be required to conform to applicable provisions of the City Development Code. The following discussions reflect preliminary 2022 Specific Plan Amendment information available to date.

1.2.3 Access and Circulation

Access to, and within, the Specific Plan Area is summarized below. Please also refer to 2022 Specific Plan Amendment Section 4.1, *Circulation Plan*. All final Project access plans would be subject to review and approval by the City.

1.2.3.1 Roadways

Regional access to the City and the Specific Plan Area is provided by State Route 60 (E – W) and Interstate 15 (N – S). State Route 60 (SR-60) interchanges with Interstate 15 (I-15) approximately 1.5 miles northeast of the Specific Plan Area. Local access to the Specific Plan Area is provided by existing vicinity roadways. These roadways include Riverside Drive to the north, Haven Avenue to the west, Mill Creek Avenue (partial) to the east, Hamner Avenue to the east, and Ontario Ranch Road which traverses the southern portion of the Specific Plan Area.

Ultimate designs of roadway alignments, roadway configurations, and site access would be required to conform to applicable provisions of the 2022 Specific Plan Amendment and City Conditions of Approval; and would be subject to City review and approval.

Roadways within and abutting the Project site would be constructed to their respective ultimate cross-sections pursuant to the 2022 Specific Plan Amendment design standards and City requirements.[2]

1.2.3.2 Bicycle and Pedestrian Access

The Project would construct bicycle and pedestrian access improvements consistent with the City Multipurpose Trails and Bikeway Corridor Plan.

Within the Project site, streets would be constructed with sidewalks, providing pedestrian access and inter-connectivity between various residential and mixed-use areas. Trail access would be provided to the various park facilities. As part of the City's Master Plan of Trails, the SCE Corridor Trail within the Project site would be extended within the linear park areas located within the existing SCE easements. Access to the SCE Corridor Trail would be provided at key points throughout the Project. On-street curb adjacent 5-foot bike lanes would be provided on both sides of the proposed modified/enhanced Chino Avenue section.

1.2.3.3 Bus Service

Bus service is available to the City via Omnitrans and the Riverside Transit Authority (RTA). No bus routes currently provide proximate service (within one-quarter mile) of the 2021 Specific Plan Area. Transit service providers periodically review and update schedules and routes to address ridership, budget, and community demands. The Applicant and City would coordinate Project final designs with Omnitrans and RTA to evaluate the potential for provision of bus services and bus amenities serving the 2021 Specific Plan Area. Omnitrans bus routes and schedules can be accessed at: https://omnitrans.org. RTA bus routes and schedules can be accessed at: https://www.riversidetransit.com/index.php/riding-the-bus/maps-schedules.

[2] The Specific Plan Amendment proposes modified design standards for Chino Avenue within the Project site, to include enhanced roadway sections with raised landscapes and roundabouts. These modified design standards would be subject to City review and approval as one component of the Specific Plan Amendment.

1.2.4 Parking

The Project would be required to adhere to parking requirements established under the 2022 Specific Plan Amendment and the City of Ontario Development Code. Parking assignments and design of parking areas within the site would be subject to City review and approval.

1.2.5 Landscape/Streetscape

The 2022 Specific Plan Amendment Landscape Concept is presented in detail at 2022 Specific Plan Amendment Section 7, *Landscape Plan*. All landscaping/streetscaping implemented under the Project would be required to comply with applicable provisions of the 2022 Specific Plan Amendment and the City Municipal Code. The implemented landscape/streetscape concept would act to enhance perception of the site as developed under the Project, and to screen views of the site interior from off-site vantages. Landscape and streetscape elements would provide shade and visual interest, define entry/access points, and accentuate site and architectural features.

1.2.6 Lighting

All Project lighting would be required to conform to provisions of the 2022 Specific Plan Amendment (lighting standards and guidelines for the various land uses are provided through the 2022 Specific Plan Amendment document). Lighting and lighting plans for individual developments within the Specific Plan Area would be subject to review and approval by the City.

1.2.7 Signs

All Project signs would be required to conform to provisions of the 2022 Specific Plan Amendment (sign standards and guidelines for the various land uses are provided throughout the 2022 Specific Plan Amendment document). Signs and sign plans for individual developments within the Specific Plan Area would be subject to review and approval by the City.

1.2.8 Infrastructure/Utilities

Infrastructure and utilities that would serve the Project site are summarized below.

1.2.8.1 Water Service

Potable (Domestic) Water

Potable water would be provided by the Ontario Municipal Utilities Company (OMUC).[3] The Project lies within the OMUC 925 and 1010 Pressure Zones. Serving the Project site and surrounding areas is an 18-inch (1010 Pressure Zone) water main, extending from Riverside Avenue to Chino Avenue. There is also a 16-inch (1010 PZ) water main located in Mill Creek Avenue, extending from Riverside Avenue to Chino Avenue.

Within the Project site, water service would be provided by a system of 8-inch to 12-inch water mains constructed within the backbone roadway system. Connecting 8-inch service lines would be provided to individual developments.

The on-site public water system sizing would be required to comply with provisions of a City-approved hydraulic analysis to be conducted at the project-level design stage. All water mains and wells internal to site would be constructed by the merchant builder(s). In-tract water system design will be provided at the time of subdivision. Final designs of water conveyance systems serving the Project would be required to conform to City and OMUC requirements. Please refer also to 2022 Specific Plan Amendment Section 4.2.1, *Domestic Water*.

Recycled Water

The Project site is located in the OMUC 930/1050 Pressure Zones for recycled water. Serving the Project site and surrounding areas is a 16-inch (930 PZ) recycled water main extending from the upper limits of the 930 PZ to Ontario Ranch Road.

[3] Additionally, as discussed in the Specific Plan Amendment, "the Chino Basin Water Master Water Quality Map identifies the Rich-Haven [Project] area within an optimum water quality zone and requires that the owner/developer dedicate a total of two wells within the Specific Plan area to the City of Ontario for production of potable water." Well dedications within the Project site would be provided if/as required by the City/OMUC.

The Project would construct all necessary recycled water system improvements consistent with City Condition of Approval. All Master Plan recycled water improvements implemented to serve the Project would be required to conform to the incumbent City Recycled Water Master Plan. Please refer also to 2022 Specific Plan Amendment Section 4.2.2, *Recycled Water*, *Regional Recycled Water Plan*.

The Project would be required to comply with applicable provisions of City Municipal Code Chapter 8c: *Recycled Water Use.*[4] Within the Project area, recycled water would be used for all approved applications, including but not limited to irrigation of parks, schools, street landscaping, recreational trails, HOA-maintained common areas and landscaping. An engineering report approved by the City and the California Department of Public Health is required prior to the use of recycled water.

Within the Project area, the backbone recycled water system would comprise 8-inch to 12-inch lines and would be located in the backbone street system. In-tract recycled water system design would be provided at the time of subdivision. It is noted here that ***no*** [emphasis added] recycled water can be used on single-family single lot ownership properties. Per the 2022 Specific Plan Amendment, a clear physical separation between potable and recycled water systems is required, such separations may comprise walls, fences, sidewalks, or mow strips. Please refer also to 2022 Specific Plan Amendment Section 4.2.2, *Recycled Water*, *Local Backbone Recycled Water Plan*.

1.2.8.2 Sewer Services

Sewer service would be provided by the City of Ontario. Master Plan sewer system improvements serving the Project and surrounding areas would be constructed consistent with the City's Sewer Master Plan. All Master Plan sewer improvements implemented to serve the Project would be required to conform to the incumbent City Sewer System Master Plan. Please refer also to 2022 Specific Plan Amendment Section 4.3, *Sewer Master Plan*.

[4] See also: https://codelibrary.amlegal.com/codes/ontarioca/latest/ontario_ca/0-0-0-44580#JD_6-8.714

1.2.8.3 Stormwater Management System

Storm Drains

Multiple City Master Plan of Drainage storm drain facilities would serve the Project site. All Master Plan storm water management system improvements implemented to serve the Project would be required to conform to the incumbent City Master Plan of Drainage. Under post-development conditions, existing southerly trending on-site drainage patterns would be maintained. Development within the Project site would be required to control drainage volumes and runoff rates such that capacities of receiving Master Plan of Drainage storm drains would not be exceeded.

Within the Project site, individual developments would implement required stormwater management systems. On-site storm stormwater management system designs would be provided concurrent with development plan submittals. Final designs of stormwater management systems serving the Project would be required to conform to City requirements. Please refer also to 2022 Specific Plan Amendment Section 4.4, *Drainage Master Plan*, *Regional Backbone Drainage Plan*.

Water Quality Management Plan

On a regional level, stormwater quality management would be available via the regional Mill Creek Wetlands system. Within the Project site, complementary on-site stormwater management systems would be implemented that would detain and treat stormwater discharges. Stormwater discharges from the Project would be required to comply with requirements and performance standards established under the incumbent San Bernardino County National Pollutant Discharge Elimination System (NPDES) Stormwater Program MS4 Permit and Water Quality Management Plan (WQMP). To these ends, developments within the Project site would implement Low Impact Development (LID) Site Design Best Management Practices (BMPs) to reduce pollutant transport and increase on-site stormwater infiltration. Additionally, all Priority Land Use (PLU) areas within the Project site would be required to comply with the statewide Trash Provisions adopted by the State Water Resources Control Board (SWRCB) and trash requirements in the most current San Bernardino County Area-Wide MS4 Permit.

Non-structural and structural Source Control BMPs would be documented in the Project WQMPs. Final WQMPs, as approved by the City, would ensure that the Project stormwater management systems have been designed to convey and treat stormwater discharges and limit the post-development peak flows consistent with available storm drain capacities. Please refer also to 2022 Specific Plan Amendment Section 4.4, *Drainage Master Plan*, *Stormwater Quality Measures*.

1.2.8.4 Solid Waste Management

The City of Ontario provides solid waste collection services for the City and will service the Project.

1.2.8.5 Electricity

Southern California Edison (SCE) would provide electricity to the site from existing vicinity facilities. SCE facilities located within and adjacent to the Project site consist of 115kV, 66kV, 12kV, towers/power lines and attached communication lines. Facilities less than 34.5kV will be located underground if they are located adjacent to any streets proposed to be improved in conjunction with site improvements.

1.2.8.6 Natural Gas

The Gas Company will provide natural gas to the site. All proposed connections and modifications to Gas Company facilities would conform to Gas Company and City requirements.

1.2.8.7 Fiber Optics System

A backbone fiber optics system (conduits, tracer wire, and fiber) would be constructed within the Project backbone street system. Backbone fiber optic components (conduits, hand holes, tracer wire, and fiber) would be placed underground within a duct and structure system to be installed in a joint trench. In-tract fiber and conduit would be installed per the City's in-tract fiber optic design guidelines (see: https://www.ontarioca.gov/sites/default/files/Ontario-Files/Information-Technology/2014-12-16_in-tract_designguidelines.pdf).

1.2.8.8 Communications Services

Communications services, including wired and wireless telephone and internet services, are available through numerous private providers and would be provided on an as-needed basis. To the extent practical and consistent with City Conditions of Approval, existing and proposed wires, conductors, conduits, raceways, and similar communications improvements within the Project area would be installed underground. Any necessary surface-mounted equipment, e.g., terminal boxes, transformers, meters, service cabinets, etc., would be screened and would conform to City building setback requirements.

1.2.8.9 Utilities

The Project would also be provided natural gas, electrical, telecommunications services. Service providers available to the Project are listed below:

- Natural gas (Southwest Gas Corporation);
- Electricity (SCE); and
- Telecommunications (various private services, including AT&T, Time Warner Communications, and Frontier Communications).

All modification of, and connection to, existing services would be accomplished consistent with City and purveyor requirements. It is noted that to allow for, and facilitate Project construction activities, provision of temporary utilities services improvements would be required. The scope of such temporary improvements is considered to be consistent with, and reflected within the total scope of development proposed by the Project. Similarly, impacts resulting from the provision of temporary services would not be substantively different from, or greater than, impacts resulting from development of the Project in total.

1.2.8.10 Public Services

Fire protection and emergency medical services for the Project would be provided by the Ontario Fire Department. Police protection services for the Project would be provided by the Ontario Police Department. The City also provides or facilitates provision of a range

of other services that would be generally available to the Project patrons and employees. These services include, but are not limited to: educational, library, and arts and entertainment services.

1.2.8.11 Energy Efficiency/Sustainability

Energy-saving and sustainable design features and operational programs would be incorporated in all facilities developed pursuant to the Project. The Project would be required to comply with incumbent energy efficiency and performance standards established under the incumbent CALGreen Code and City of Ontario 2022 Community Climate Action Plan Update (2022 CCAP Update).

1.2.8.12 Construction Area Traffic Management Plan

Temporary and short-term traffic detours and traffic disruptions could result during construction activities including implementation of access and circulation improvements noted above. Accordingly, the Applicant would be responsible for the preparation and submittal of a Construction Area Traffic Management Plan (Plan). Typical elements and information incorporated in the Plan would include, but not be limited to:

- **Name of on-site construction superintendent and contact phone number.**

- **Identification of Construction Contract Responsibilities** - For example, for excavation and grading activities, describe the approximate depth of excavation, and quantity of soil import/export (if any).
- **Identification and Description of Truck Routes** - to include the number of trucks and their staging location(s) (if any).

- **Identification and Description of Material Storage Locations (if any).**

- **Location and Description of Construction Trailer (if any).**

- **Identification and Description of Traffic Controls** - Traffic controls shall be provided per the Manual of Uniform Traffic Control Devices (MUTCD) if the

occupation or closure of any traffic lanes, parking lanes, parkways or any other public right-of-way is required. If the right-of-way occupation requires configurations or controls not identified in the MUTCD, a separate traffic control plan must be submitted to the City for review and approval. All right-of-way encroachments would require permitting through the City.

- **Identification and Description of Parking** - Estimate the number of workers and identify parking areas for their vehicles.

- **Identification and Description of Maintenance Measures** - Identify and describe measures taken to ensure that the work site and public right-of-way would be maintained (including dust control).

The Plan would be reviewed and approved by the City prior to the issuance of the first building permit and encroachment permit, as applicable. The Plan and its requirements would also be required to be provided to all contractors as one component of building plan/contract document packages.

1.3 PROJECT OBJECTIVES

The broad vision of the 2022 Specific Plan Amendment is to create a community with a mixture of uses, connected through a series of trails, which provides opportunities for people to live, work and play. Supporting 2022 Specific Plan Amendment objectives are listed in detail at Section 3, *Project Description*.

1.4 DISCRETIONARY APPROVALS AND PERMITS

Discretionary actions, permits, and related consultation(s) necessary to approve and implement the Project include, but are not limited to, the following.

1.4.1 Lead Agency Discretionary Actions and Permits

CEQA Guidelines Section 15124 states in pertinent part that if "a public agency must make more than one decision on a project, all its decisions subject to CEQA should be listed…" Requested decisions, or discretionary actions, necessary to realize the Project would include the following:

- EIR Certification;
- Approval of the 2022 Specific Plan Amendment;
- Approval of Tentative Parcel Maps;
- Approval of Development Agreements; and
- Approval of Development Plans.

1.4.2 Other Agency Consultation and Permits

Anticipated consultation and permits necessary to realize the Project would or may include the following:

- Permitting by/through the Regional Water Quality Control Board (RWQCB) pursuant to requirements of the City's National Pollutant Discharge Elimination System (NPDES) Permit.

- Permitting by/through the South Coast Air Quality Management District (SCAQMD) for certain equipment or land uses that may be implemented pursuant to the Project.

- Permitting (i.e., utility construction and connection permits) from affected utility purveyors, notably the City of Ontario, IEUA, and SCE.

Other ministerial permits necessary to realize all on- and off-site improvements related to the development of the Project.

1.5 INITIAL STUDY

The City of Ontario, through the Initial Study process, has determined that the Project has the potential to cause or result in significant environmental impacts, and warranted further analysis, public review, and disclosure through the preparation of an EIR. The Initial Study (IS) and associated EIR Notice of Preparation (NOP), dated October 2022, were forwarded to the California Office of Planning and Research, State Clearinghouse (SCH), and circulated for public review and comment. The State Clearinghouse established the public comment period for the NOP/IS as October 20, 2022 through November 19, 2022. The assigned State Clearinghouse reference for the Project is SCH No. 2022100425. The Initial Study, NOP, and NOP Responses are presented at DEIR Appendix A.

1.6 IMPACTS NOT FOUND TO BE POTENTIALLY SIGNIFICANT

The following discussions identify and list those environmental issues that have been determined pursuant to the IS/NOP and associated public review processes to pose no potentially significant impacts, or where compliance with standard mitigation or conditions of approval would reduce certain potentially significant impacts to levels that are less-than-significant. The specific issues listed are not substantively discussed within the body of this EIR. Please refer also to related discussions and analyses presented within the Initial Study, EIR Appendix A.

Aesthetics

There are no scenic vistas within the Project site, nor would the Project otherwise adversely affect a designated scenic vista. The Project would implement contemporary uses that would be required to conform to City design guidelines and development standards. All Project lighting would also be required to conform to City requirements. The Project would therefore have less-than-significant impacts for the following aesthetic considerations:

- Substantial adverse effects on a scenic vista;

- Substantial damage to scenic resources, including, but not limited to, trees, rocks, outcroppings, and historic buildings within a state scenic highway;

- Substantial degradation of the existing visual character or quality of the site and its surroundings; and

- Creation of a new source of substantial light or glare, which would adversely affect the day or nighttime views in the area.

Agriculture and Forest Resources

The Project is consistent with TOP 2050 and with land uses and development anticipated under TOP 2050 SEIR. Further, the Project would implement provisions of the Project and requirements of the City Development Code that support buffering of, and separation between, agricultural and urban uses. The Project site is not designated as forestland or timberland. The Project does not propose or require uses that would affect off-site agriculture or forest resources. As such, the Project will have less-than-significant or no impacts under the following considerations:

- Conversion of Prime Farmland, Unique Farmland, or Farmland of Statewide Importance (Farmland), as shown on the maps prepared pursuant to the Farmland Mapping and Monitoring Program of the California Resources Agency, to non-agricultural use;

- Conflict with existing zoning for agricultural use, or a Williamson Act contract;

- Conflict with existing zoning for, or cause rezoning of, forest land, timberland, or timberland zoned Timberland Production;

- Result in the loss of forest land or conversion of forest land to non-forest use; or

- Involve other changes in the existing environment which, due to their location or nature, could result in conversion of Farmland to non-agricultural use, or conversion of forest land to non-forest use.

Air Quality

The Project does not propose facilities or on-going operations that would create objectionable odors affecting a substantial number of people. On this basis, the Project would have a less-than-significant impact in regard to the following consideration:

- Result in other emissions (such as those leading to odors) adversely affecting a substantial number of people.

Cultural Resources

There are no known formal cemeteries or informal burial sites within the Project site. The likelihood of encountering human remains in the course of Project development is therefore considered minimal.

As required by California Health and Safety Code Section 7050.5, should human remains be found, no further disturbance shall occur until the County Coroner has made a determination of origin and disposition pursuant to Public Resources Code Section 5097.98. The County Coroner must be notified of the find immediately. If the remains are found to be prehistoric, the coroner would coordinate with the California Native American Heritage Commission as required by state law. As such, the Project will have a less-than-significant impact for the following cultural resources consideration:

- Disturbance of any human remains, including those interred outside of formal cemeteries.

Geology and Soils

No active fault zones are located within the City; nor are any active faults known with the Project site. The Project site is outside any Fault Rapture Hazard Zone (formerly

Alquist-Priolo Zone). The Project does not propose actions or facilities that would otherwise exacerbate known or probable adverse earthquake fault conditions.

The Project site topography evidences little internal difference, with a moderate northeast to southwest downward trending slope, averaging between +2.0 % to -2.3% (Google Earth Imagery 2022). The Project site is not considered internally susceptible to land sliding. Any slopes manufactured in the course of Project development would be subject to review and approval by the City Building Department to ensure their stability. Adjacent properties also present little topographic relief.

Project construction activities would temporarily expose underlying soils, thereby increasing their susceptibility to erosion. Potential erosion impacts incurred during construction activities are mitigated below the level of significance through the Project's mandated compliance with a Storm Water Pollution Prevention Plan (SWPPP), as well as compliance with SCAQMD Rules that prohibit grading activities and site disturbance during high wind events. At Project completion, potential soil erosion impacts in the area will be resolved, as pavement, roads, buildings, and landscaping are established, overcovering previously-exposed soils.

The Project does not propose altering existing topography in a manner that would result in substantial soil erosion or the loss of topsoil. All Project development plans would be subject to review and approval by the City. As part of this review, the City would ensure that permanent slopes and slope protection would conform to City requirements, thereby minimizing the potential for soil erosion over the life of the Project. City review and approval of development plans would also ensure that stormwater management systems are incorporated that would minimize potential erosion from stormwater runoff, both on-site and off-site.

The Project uses would be served by municipal sewer services. No septic tanks or other alternative wastewater disposal systems are proposed by the Project.

Based on the preceding, the Project would result in less-than-significant impacts for the following geology and soils considerations:

- Directly or indirectly cause potential substantial adverse effects, including the risk of loss, injury or death involving rupture of a known earthquake fault, as delineated on the most recent Alquist-Priolo Earthquake Fault Zoning Map issued by the State Geologist for the area or based on other substantial evidence of a known fault;

- Directly or indirectly cause potential substantial adverse effects, including the risk of loss, injury or death involving landslides;

- Result in substantial soil erosion or the loss of topsoil; or

- Have soils incapable of adequately supporting the use of septic tanks or alternative wastewater disposal systems where sewers are not available for the disposal of wastewater.

Hazards and Hazardous Materials

The subject site is not included on the hazardous materials sites list compiled pursuant to Government Code Section 65962.5. Additionally, the Project would be required to comply with applicable federal, state, and local regulations.

The Project site is located within the area subject to provisions of the ONT Airport Land Use Compatibility Plan (ALUCP, July 2018). The ALUCP defines the ONT Airport Influence Area (AIA) as an area in which current and future airport-related noise, overflight, safety, and airspace protection factors may significantly affect land uses or necessitate restriction on those uses. The Project site is located outside the ONT safety zones (see: TOP 2050 DSEIR Figure 5.9-2, Airport Safety Zones). All Project development would be required to comply with ALUCP requirements, thereby precluding or minimizing potential airport/aircraft-related hazards. The Project does not propose or require uses that would contribute to potential airport/aircraft-related hazards.

The Project does not propose or require permanent alteration of vehicle circulation routes, and would not interfere with any identified emergency response or emergency evacuation plan. Consistent with City policies, coordination with the local fire and police departments during pre-construction review of Project plans would ensure that potential interference with emergency response plans and evacuation plans are avoided.

The Project site is located in an urbanizing area, and no wildlands are located in the vicinity of the Project site. Fire protection services are provided to the City and the Project site by the Ontario Fire Department. Pre-construction coordination with Fire Department staff and adherence to local fire regulations during construction and operation of the Project would be required. The City and Fire Department would require that fire prevention/fire suppression measures are incorporated in the Project designs and that water delivery systems serving the Project site provide adequate fire flow. Creation and maintenance of firebreaks and fire-defensible spaces adjacent to building and roadways as required by the City and Fire Department would further reduce the potential for exposure to wildland fires and the spread of wildland fires. The City would also enforce weed abatement measures, minimizing potential fire fuel loads. Additionally, development of the Project site would act to reduce fire hazards by eliminating existing fire fuel loads such as manure, hay, and weeds; while improving area fire protection infrastructure systems.

Based on the preceding, the Project would have less-than-significant impacts under the following considerations:

- Be located on a site which is included on a list of hazardous materials sites compiled pursuant to Government Code Section 65962.5 and, as a result, would it create a significant hazard to the public or the environment;

- For a project located within an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project result in a safety hazard or excessive noise for the people residing or working in the project area;

- Impair implementation of or physically interfere with an adopted emergency response plan or emergency evacuation plan; or

- Expose people or structures, either directly or indirectly, to a significant risk of loss, injury or death involving wildland fires.

Hydrology and Water Quality

Direct additions or withdrawals of groundwater are not proposed by the Project. Further, construction proposed by the Project will not involve substructures or other intrusions at depths that would significantly impair or alter the direction or rate of flow of groundwater. Water is provided throughout the City by the City of Ontario Utilities Department. Groundwater which may be consumed by the Project and the City of Ontario, as a whole, would be recharged pursuant to the Department's policies and programs. The Project site is not a designated groundwater recharge area. The Project does not propose or require facilities or operations that would otherwise adversely affect designated recharge areas.

Project construction activities would temporarily expose underlying soils, thereby increasing their susceptibility to erosion. Potential erosion impacts incurred during construction activities are mitigated below the level of significance through the Project's mandated compliance with a Storm Water Pollution Prevention Plan (SWPPP), as well as compliance with SCAQMD Rules that prohibit grading activities and site disturbance during high wind events. At Project completion, potential soil erosion impacts in the area will be resolved, as pavement, roads, buildings, and landscaping are established, overcovering previously-exposed soils.

The Project does not propose altering existing topography in a manner that would result in substantial soil erosion or the loss of topsoil. All Project development plans would be subject to review and approval by the City. As part of this review, the City would ensure that permanent slopes and slope protection would conform to City requirements, thereby minimizing the potential for soil erosion over the life of the Project. City review and approval of development plans would also ensure that stormwater management

systems are incorporated that would minimize potential erosion from stormwater runoff, both on-site and off-site.

Based on the preceding discussion, the Project would result in less-than-significant impacts for the following hydrology and water quality considerations:

- Substantially decrease groundwater supplies or interfere substantially with groundwater recharge such that the project may impede sustainable groundwater management of the basin; or

- Substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river, or through the addition of impervious surfaces, in a manner which would result in substantial erosion or siltation on- or off-site.

Land Use

The developed Project would establish a pattern of cohesive and complementary land uses. The Project configuration and orientation of land uses, combined with integral development standards and design guidelines, act to preclude division or disruption of an established community, whether that community be internal or external to the Project site. Physical arrangement of surrounding areas would not be modified or otherwise affected by the Project.

Based on the preceding, the Project would have a less-than-significant impact for the following land use consideration:

- Physically divide an established community.

Mineral Resources

Mineral resources in the City are limited to construction aggregates such as sand and gravel. There are currently no permitted mining operations located within the City. The Project does not propose or require facilities or operations that would affect the availability of locally important or regionally important mineral resources. As such, the

Project would result in less-than-significant impacts for the following mineral resources considerations:

- Loss of availability of a known mineral resource that would be of value to the region and to the residents of the state; and

- Loss of availability of a locally important mineral resource recovery site delineated on a local general plan, specific plan or other land use plan.

Population and Housing

The Project proposes new and reconfigured residential uses that would directly contribute to population growth. Additionally, the Project light industrial and commercial uses would create additional employment opportunities that could indirectly contribute to population growth. Development proposed by the Project responds globally to existing and anticipated market demands of the City and region, and employment generated by the Project would be a byproduct of this anticipated growth. The Project represents a component of development and growth anticipated by the City, as reflected by the site's TOP 2050 General Plan Land Use designations.

The Project would maintain net residential development within the Specific Plan Area when compared to land uses and development entitled under the 2021 Specific Plan. Amendments proposed under the Project would not eliminate housing, diminish the potential for new housing, or displace persons from existing housing.

On the basis of the preceding discussion, the Project would have less-than-significant impacts for the following population and housing considerations:

- Induce substantial population growth in the area, either directly (e.g., by proposing new homes and businesses) or indirectly (e.g., through the extension of roads or other infrastructure);

- Displace substantial numbers of existing housing, necessitating the construction of replacement housing elsewhere.

Public Services

Fire suppression and emergency response services for the Project would be provided by the Ontario Fire Department (OFD). The Project provides for potential location of a new fire station at the northwest corner of Ontario Ranch Road (E – W) at Mill Creek Avenue (N – S). Ultimate need for and location of this fire station would be subject to review and approval by the City and Fire Department. Environmental review of this facility would be conducted when and as required by the City. Additionally, the Project would pay General City (GC) Development Impact Fees, a portion of which is available to offset incremental fire protection service demands generated by the Project. The Project Applicant would pay incumbent Development Impact Fees at issuance of building permit(s). To the satisfaction of the OFD, the Project would comply with City and OFD fire prevention and suppression requirements, including building/site design requirements, substantiated fire flow adequacy, and provisions for emergency access, thereby reducing potential increased demands for fire protection services.

The Project does not propose or require construction or modification of police protection facilities. The Project site is not designated or proposed as the location for new or modified police protection facilities. Incremental police protection service demands generated by the Project are offset through Project payment of City of Ontario General City (GC) Development Impact Fees. A portion of the City's GC Development Impact Fees are allocated for police protection services. The Project Applicant would pay incumbent Development Impact Fees at issuance of building permit(s). Additionally, the Project site plan concept and proposed building designs would be reviewed by the Ontario Police Department (OPD) to ensure incorporation of appropriate safety and security elements.

Occupancy of the Project residential uses would directly contribute to demands on school services. The Project does not propose or require construction or modification of school facilities. The Project site is not designated or proposed as the location for new or

modified school facilities. Project incremental impacts to school services would be offset through mandated payment of school impact fees. The Project Applicant would pay incumbent school impact fees at issuance of building permit(s).

The Project includes parks and open space non-recreation areas that would complement and support development of the Specific Plan Area generally. Potential environmental effects of construction of these facilities are reflected in the scope on analysis of environmental impacts of the Project in total.

Development of the Project would require established public agency oversight including, but not limited to, various plan check and permitting actions by the City. Impacts of the Project would fall within routine tasks of these agencies/departments and are paid for via plan check and inspection fees. Impacts of the Project would not be of such magnitude that new or physically altered facilities would be required. There are no known or probable other public facilities that would be substantially affected by the Project.

Based on the preceding, the Project would have less-than-significant impacts for the following public services considerations:

- Substantial adverse physical impacts associated with the provision of new or physically altered governmental facilities, need for new or physically altered governmental facilities, the construction of which could cause significant environmental impacts, in order to maintain acceptable service ratios, response times or other performance objectives for fire protection, police protection, schools, parks, or other public facilities.

Recreation

The Project includes parks and open space non-recreation areas that would complement and support development of the Specific Plan Area generally. Potential environmental effects of construction of these facilities are reflected in the scope on analysis of environmental impacts of the Project in total. Of themselves, environmental impacts of parks and open space non-recreation areas that would be constructed as part of the

Project are considered less-than-significant. New residential development within the City is required to pay GC Development Impact Fees, a portion of which would be allocated for parks facilities, acting to offset incremental demands on neighborhood and regional parks or other recreational facilities. The Applicant would pay all requisite GC Development Impact Fees.

Based on the preceding, the Project would have less-than-significant impacts for the following recreation considerations:

- Increase the use of existing neighborhood and regional parks or other recreational facilities such that substantial deterioration of the facility would occur or be accelerated; and

- Include recreational facilities or require the construction or expansion of recreational facilities, which might have an adverse physical effect on the environment.

Wildfire

CAL FIRE maintains California Fire Hazard Severity Zone Maps, including maps for State responsibility areas, as well as local responsibility areas. As shown on the State responsibility map for southwestern San Bernardino County, the City of Ontario is located within a local responsibility area. According to the local responsibility map, Ontario is located in a non-very high fire hazard severity zone (Non-VHFHSZ).

As such, the Project is not located within or near a state responsibility area, or within an area classified as a very high fire hazard severity zone. All development would be required to comply with City building and Fire Codes. All building plans within the City are reviewed by the Ontario Fire Department to ensure their compliance with the City's fire code.

Based on the preceding, the Project would have less-than-significant impacts for the following wildfire considerations:

- Substantially impair an adopted emergency response plan or emergency evacuation plan;

- Exacerbate wildfire risks, and thereby expose project occupants to pollutant concentrations from a wildfire or the uncontrolled spread of a wildfire;

- Require the installation or maintenance of associated infrastructure (such as roads, fuel breaks, emergency water sources, power lines or other utilities) that may exacerbate fire risk or that may result in temporary or ongoing impacts to the environment; and

- Expose people or structures to significant risks, including downslope or downstream flooding or landslides, as a result of runoff, post-fire slope instability, or drainage changes.

1.7 AREAS OF CONCERN OR CONTROVERSY

Section 15123 of the *CEQA Guidelines* requires that the EIR summary identify areas of potential concern or controversy known to the lead agency, including issues raised by other agencies and the public. Issues of concern were identified by the Lead Agency, through responses to the Project Initial Study/Notice of Preparation (NOP), and other communications addressing the Project and the Project EIR.

Responses received pursuant to distribution of the NOP and the Public Scoping Meeting are presented at EIR Appendix A. Table 1.7-1 presents a list of NOP respondents, and a corresponding summary of NOP comments, indicated by *italicized text.* Responses to comments, together with correlating EIR references, are indicated in subsequent statements. Unless otherwise noted, all NOP respondent comments are addressed within the body of the EIR.

Table 1.7-1
List of NOP/AB 52 Respondents and Summary of Comments

Respondent	Summary of Comments
State Agencies	
State of California Office of Planning and Research, State Clearinghouse (SCH)	*SCH provided receipt and record of distribution of the NOP/IS and established the NOP review and comment period of October 20, 2022 through November 19, 2022.* EIR Appendix A includes a copy of the Project IS/NOP and NOP Responses.
State of California Native American Heritage Commission (NAHC)	*NAHC provides procedural guidance in evaluating and determining potential impacts to cultural resources and Tribal Cultural Resources (TCRs).* The EIR evaluates potential impacts to cultural resources consistent with NAHC guidelines and requirements. Please refer to EIR Section 4.11, *Cultural Resources/Tribal Cultural Resources,* and EIR Appendix L, *Cultural Resources Investigation*.
State of California Department of Conservation (DOC)	*The Department of Conservation (DOC) provides comments regarding the potential for the Project to: result in agricultural land conversion, adversely impact agricultural operations, result in cumulative adverse impacts to agricultural lands, adversely impact agricultural preserve(s), or affect Williamson Act contract properties.* The Project's potential impacts to farmland and agricultural resources, including the DOC's above-noted topics of concern, are addressed in the Initial Study (IS) (see: EIR Appendix A, Initial Study, Section 3.7, *Initial Study Checklist and Substantiation*, II. *Agriculture and Forest Resources*). As substantiated in the IS, all potential Project impacts related to Agriculture and Forest Resources would be less-than-significant, and therefore are not further discussed in the EIR. More specifically, the Project is consistent with The Ontario Plan 2050 (TOP 2050), and would not result in impacts not previously considered and addressed in TOP 2050 Supplemental EIR (TOP 2050 SEIR, SCH No. 2021070364). As discussed in TOP 2050 SEIR, "because former agriculture areas within Ontario are now already designated for nonagricultural uses and the current TOP is the baseline for this SEIR, the Proposed Project [TOP 2050] would not conflict with agricultural uses and would not result in conversion of farmland to nonagricultural use" (TOP 2050 SEIR, p. 5.2-14). Further, the Project would implement provisions of the Project and requirements of the City Development Code that support buffering of, and separation between, agricultural and urban uses. These requirements support the City's planned orderly transition of existing agricultural uses to urban uses. These requirements include, but are not limited to:

Table 1.7-1
List of NOP/AB 52 Respondents and Summary of Comments

Respondent	Summary of Comments
	• Project setback and screening standards that act to buffer and separate potentially incompatible uses. • City of Ontario Development Code requirements including a minimum 100-foot separation between "a new residential, commercial or industrial development or structure used for public assembly and an existing animal feed trough, corral/pen or an existing dairy/feed lot including manure stockpiles and related wastewater detention basins" (Development Code Chapter 6 Development and Subdivision Regulations, p. 6.01-63).
Regional Agencies	
Southern California Association of Governments (SCAG)	*SCAG requests that the Draft EIR include an analysis of the Project's consistency with regional plans; specifically, with SCAG's 2020–2045 Regional Transportation Plan/Sustainable Communities Strategy (Connect SoCal 2020). SCAG also requests that a copy of the Project EIR be emailed to SCAG at mailto:IGR@scag.ca.gov.* Consistency with SCAG's RTP/SCS (Connect SoCal 2020) Goals is provided at EIR Section 4.1, *Land Use and Planning*, Table 4.1-2. SCAG has been provided a copy of the EIR.
South Coast Air Quality Management District (SCAQMD)	*SCAQMD provides direction and guidance in evaluation of the Project's potential air quality, health risk, and greenhouse gas impacts.* All Project air quality, health risk, and GHG impact analyses have been completed consistent with SCAQMD protocols. Project air quality and health risk impacts are addressed at EIR Section 4.3, *Air Quality*; GHG emissions impacts are addressed at EIR Section 4.4, *Greenhouse Gas Emissions*. Detailed analyses and quantified emissions modeling are provided at EIR Appendix D, *Air Quality Impact Analyses*, and EIR Appendix E, *Greenhouse Gas Analysis*. As requested by SCAQMD, all appendices and technical documents related to the air quality, health risk, and greenhouse gas analyses and electronic versions of all emission calculation spreadsheets, and air quality modeling and health risk assessment input and output files have been provided to SCAQMD.
County Agencies	
Riverside County Airport Land Use Commission (ALUC)	*ALUC notes the Project may be influenced by the Ontario Airport (ONT), and suggests the City contact ONT in this regard. ALUC notes further that the Project lies outside ALUC jurisdiction.* ALUC's determination that the Project is located outside their jurisdiction is noted. Potential impacts related to public airports and public use airports are discussed in the EIR Initial Study (IS) (see: EIR Appendix A, Initial Study, Section

Table 1.7-1
List of NOP/AB 52 Respondents and Summary of Comments

Respondent	Summary of Comments
	3.7, *Initial Study Checklist and Substantiation*, II. *Hazards and Hazardous Materials*). As substantiated in the IS, all potential Project impacts related to public airports and public use airports would be less-than-significant, and therefore are not further discussed in the EIR. ONT provided no comment on the IS.
Public Utilities	
Southern California Edison (SCE)	*SCE notes that the Project could interfere with easement rights, and/or facilities held by SCE within or adjacent to the subdivision boundaries.* The Project concept does not propose or require uses or operations that would adversely affect SCE easements or SCE facilities. As the Project is further defined, the Applicant and City will coordinate with SCE to ensure that all site and facilities designs comply with SCE requirements. As requested by SCE, the Applicant will provide scaled plans (1 inch = 50 ft. maximum, hard copies or emailed in pdf format) including: grading, drainage, landscape and street improvement plans. SCE facilities and the easements shall be plotted on the above-referenced maps/plans. The Applicant shall (as necessary) state proposed method(s) to eliminate any potential interference to/with SCE easements and facilities.

1.8 EIR TOPICAL ISSUES

Based on the Initial Study analysis, and comments received pursuant to circulation of the NOP, the EIR analyses have been focused on the following topics:

- Air Quality;
- Biological Resources;
- Cultural Resources/Tribal Cultural Resources;
- Energy;
- Geology and Soils;
- Greenhouse Gas Emissions;
- Hazards/Hazardous Materials;
- Hydrology/Water Quality;
- Land Use and Planning;
- Noise;
- Transportation; and
- Utilities and Service Systems.

Additionally, EIR Section 5.0, *Other CEQA Considerations*, presents discussions of other mandatory CEQA topics, including:

- Cumulative Impact Analysis;
- Alternatives Analysis;
- Growth-Inducing Impacts of the Proposed Action;
- Significant Environmental Effects; and
- Significant and Irreversible Environmental Changes.

1.9 SUMMARY OF SIGNIFICANT PROJECT IMPACTS

Implementation of the Project, as proposed, would result in certain impacts which are determined to be significant and unavoidable. These impacts are discussed in detail in the body of the EIR text under their associated topical headings, and are summarized at Table 1.9-1.

Table 1.9-1
Summary of Significant and Unavoidable Impacts

Environmental Topic	Comments
Air Quality	**Construction-Source Air Pollutant Emissions** Even with application of mitigation, Project construction-source NOx and CO emissions would exceed applicable SCAQMD regional thresholds and per AQMD criteria would be significant. Per SCAQMD criteria, significant Project-level impacts are also cumulatively considerable. Project operational-source NOx emissions threshold exceedances would result in a cumulatively considerable net increase in the criteria pollutant ozone, for which the Project region is non-attainment. This is a cumulatively significant and unavoidable air quality impact. **Operational-Source Air Pollutant Emissions** Even with application of mitigation, Project operational-source VOC, NOx, CO, PM_{10}, and $PM_{2.5}$ emissions would exceed applicable SCAQMD regional thresholds. The Basin encompassing the Project site is designated as non-attainment for ozone, PM_{10}, and $PM_{2.5}$ (VOC and NOx are both ozone precursors; NOx is a precursor to PM_{10}, and $PM_{2.5}$). Project operational-source VOC, NOx, PM_{10}, and $PM_{2.5}$ emissions threshold exceedances would result in a cumulatively considerable net increase in criteria pollutants (ozone and PM_{10}, and $PM_{2.5}$) for which the Project region is non-attainment. These are cumulatively significant and unavoidable air quality impacts. **AQMP Consistency** Project construction-source and operational-source regional threshold emissions exceedances noted above are inconsistent with AQMP Consistency Criterion No. 1. On this basis, the Project would conflict with the AQMP. This is a cumulatively significant air quality impact.

Table 1.9-1
Summary of Significant and Unavoidable Impacts

Environmental Topic	Comments
GHG Emissions	Even after application of mitigation, Project GHG emissions would exceed the SCAQMD GHG emissions screening level threshold of 3,000 $MTCO_2e$/year. On this basis, the Project could directly or indirectly generate GHG emissions that may have a significant impact on the environment. On this basis, the Project's potential to contribute considerably (either individually or cumulatively) to global climate change impacts through GHG emissions is therefore considered significant and unavoidable.

All other potential environmental effects of the Project are determined to be less-than-significant as substantiated within this EIR and accompanying Initial Study, or are reduced below levels of significance with application of mitigation measures identified herein. A summary of all Project impacts and proposed mitigation measures is presented at EIR Section 1.11, *Summary of Impacts and Mitigation Measures*.

1.10 ALTERNATIVES TO THE PROJECT

Consistent with provisions of the *CEQA Guidelines*, the EIR Alternatives Analysis (EIR Section 5.2) presents and evaluates alternatives to the Project that would lessen its significant environmental effects while allowing for attainment of the basic Project Objectives. The rationale underlying the selection of alternatives is presented together with a summary description of each alternative. Merits of the alternatives compared with the Project are described and evaluated. Alternatives to the Project considered in detail within this analysis include:

- No Project Alternatives (No Build, and Development per Existing Specific Plan Land Uses); and
- Reduced Intensity Alternative.

Alternatives considered and rejected include:

- Alternative Sites;
- "No Threshold Exceedance" Alternative for Significant Air Quality Impacts; and
- "No Threshold Exceedance" Alternative for Significant GHG Emissions Impacts.

The above-listed Alternatives to the Project are summarized below, and are described in greater detail at Section 5.2.2, *Description of Alternatives*. Please refer also to the detailed discussions of Alternatives to the Project presented at EIR Section 5.2, *Alternatives Analysis.*

1.10.1 No Project Alternatives

1.10.1.1 Overview

The *CEQA Guidelines* specifically require that an EIR include evaluation of a No Project Alternative. The No Project Alternative should make a reasoned assessment as to future disposition of the subject site should the Project under consideration not be developed. In this latter regard, the *CEQA Guidelines* state in pertinent part:

> "If the project is other than a land use or regulatory plan, for example a development project on identifiable property, the "no project" alternative is the circumstance under which the project does not proceed. Here the discussion would compare the environmental effects of the property remaining in its existing state against environmental effects which would occur if the project is approved. If disapproval of the project under consideration would result in predictable actions by others, such as the proposal of some other project, this "no project" consequence should be discussed. In certain instances, the no project alternative means "no build" wherein the existing environmental setting is maintained. However, where failure to proceed with the project will not result in preservation of existing environmental conditions, the analysis should identify the practical result of the project's non-approval and not create and analyze a set of artificial assumptions that would be required to preserve the existing physical environment." (*CEQA Guidelines*, Section 15126.6 (e)(3)(B)).

Within this analysis, two No Project scenarios are considered – "No Build" and "Development per Existing Specific Plan Land Uses."

No Project Alternative: No Build

The No Project Alternative: No Build scenario assumes the site remains in its current undeveloped condition. If a No Build scenario were maintained, its comparative environmental impacts would replicate the existing conditions discussions for each of the environmental topics evaluated in this EIR; and comparative impacts of the Project would be as presented under each of the EIR environmental topics.

No Project Alternative: Development per Existing Specific Plan Land Uses

The No Project Alternative: Development per Existing Specific Plan Land Uses (Existing Specific Plan Land Uses) scenario represents foreseeable development of the subject site pursuant to the site's current Policy Plan Land Use designations. Table 1.10-1 compares the composition and scope of uses under the Project with development that could result under the Existing Specific Plan Land Uses scenario.

Table 1.10-1

Sources: 2021 Rich-Haven Specific Plan; 2022 Rich-Haven Specific Plan Amendment

1.10.2 Reduced Intensity Alternative

The Reduced Intensity Alternative focuses on a development scenario that would reduce the significant operational-source air quality impacts otherwise occurring under the Project.

Of the total operational-source emissions generated by the Project, approximately 77 percent (by weight) would be generated by Project mobile sources (traffic). An effective way to reduce the Project operational-source emissions would therefore be an

Alternative that would reduce the total amount of traffic generated by the Project. Based on the reduction in total traffic, the Reduced Intensity Alternative would also reduce the scope and/or intensity of significant air quality impacts, and GHG emissions impacts that would otherwise result from implementation of the Project.

For purposes of the EIR Alternatives Analysis, the Reduced Intensity Alternative would implement the Project uses at an approximately 25 percent reduction in overall development intensity. The mix of land uses proposed by the Project would be proportionally maintained under the Reduced Intensity Alternative. Development under the Project and the Reduced Intensity Alternative is compared at Table 1.10-2.

Table 1.10-2
Site Development Comparison
Project and Reduced Intensity Alternative

1.10.3 Alternatives Considered and Rejected

Alternative Sites Considered and Rejected

As stated at *CEQA Guidelines* §15126.6 (f)(1)(2)(A), the "key question and first step in [the] analysis [of alternative locations] is whether any of the significant effects of the project would be avoided or substantially lessened by putting the project in another location. Only locations that would avoid or substantially lessen any of the significant effects of the project need be considered for inclusion in the EIR." *CEQA Guidelines* §15126.6 (f) (1) also provides that when considering the feasibility of potential alternative sites, the factors that may be taken into account include: "site suitability, economic viability, availability of infrastructure, general plan consistency, other plans or

regulatory limitations, jurisdictional boundaries (projects with a regionally significant impact should consider the regional context), and whether the proponent can reasonably acquire, control, or otherwise have access to the alternative site (or the site is already owned by the proponent). None of these factors establishes a fixed limit on the scope of reasonable alternatives."

As discussed below, relocation of the Project would not avoid or substantially lessen the Project's significant environmental impacts. Further, there are no feasible alternative sites under control or likely control of the Applicant that would allow for relocation of the Project in a manner that could substantially reduce the Project's significant environmental impacts.

Significant Air Quality Impacts Not Substantially Reduced at Alternative Site

- Relocation to an Alternative Site would not likely achieve any measurable reduction in the Project's regional construction-source and operational-source air quality impacts and contributions to nonattainment conditions. AQMP inconsistencies tied to the Project significant air quality impacts similarly would not be reduced by relocation of the Project. Relocation of the Project anywhere within the South Coast Air Basin would not alter or diminish the significance of these impacts.

Significant GHG Emissions Impacts Not Substantially Reduced at Alternative Site

- GHG emissions impacts are, by definition, cumulative and global in their effects. Relocation of the Project would not alter or diminish the significance of its GHG emissions impacts.

Based on the preceding considerations, analysis of an Alternative Site as means of reducing the Project's significant environmental impacts was not further considered.

"No Threshold Exceedance" Alternative for Significant Air Quality Impacts Considered and Rejected

Operational-Source Emissions

In order to reduce Project operational-source air quality emissions to levels that would preclude exceedance of all SCAQMD thresholds, the Project scope would need to be reduced by approximately 92.4 percent (this may achieve the most restrictive threshold [VOC] and all subordinate thresholds). At such a reduction in scope, the Project Objectives would not be realized in any meaningful sense. As such, potential alternatives with the specific goal of avoiding all significant operational-source air quality impacts resulting from the Project were rejected from consideration, and are not further evaluated in this discussion.

Project operational-source emissions threshold exceedances would result in a cumulatively considerable net increase in criteria pollutants for which the Project region is non-attainment. For the same reasons noted above, there are no feasible means or alternatives to avoid this impact or reduce the impact to levels that would be less-than-significant. However, this impact and all operational-source air quality impacts would be diminished under the EIR Reduced Intensity Alternative.

Construction-Source Emissions

In order to reduce Project construction-source air quality emissions to levels that would preclude exceedance of all SCAQMD thresholds would require use of construction equipment or construction technologies that are not currently available or that would be available in the near-term. In this regard, use of alternative fuel construction equipment, including electric-powered equipment, is not feasible at this time as such equipment is not commercially available, and is not expected to be in the near-term. Alternatively, the duration of Project construction activities would need to be protracted by an estimated additional 67 percent of the current Project construction schedule. This may achieve the most restrictive construction-source emissions threshold [NOx], but in so doing would only prolong the duration of air quality emissions, the duration of construction-source equipment noise, and the duration of general disturbances associated with construction

activities. The Lead Agency has determined that the benefits of the Project's current construction schedule outweigh the potential benefit in a temporary decrease in air quality emissions that may be achieved through a protracted Project construction schedule. Moreover, accepted air quality modeling parameters do not provide for such an assumed extended construction period. For these reasons, there are no feasible means or alternatives to avoid this impact or reduce the impact to levels that would be less-than-significant.

"No Threshold Exceedance" Alternative for GHG Emissions Impacts Considered and Rejected

As discussed at EIR Section 4.4, *Greenhouse Gas Emissions*, quantified Project-source GHG emissions would exceed 3,000 $MTCO_2e$/year; and the Project cannot feasibly achieve the SCAQMD screening-level threshold of 3,000 $MTCO_2e$/year. The SCAQMD 3,000 $MTCO_2e$/year screening-level threshold is the most conservative metric available and is employed in this analysis in of GHG emissions significance. On this basis, Project GHG emissions have the potential to either directly or indirectly result in a significant impact on the environment.

The majority (approximately 72 percent) of the Project GHG emissions would be generated by Project vehicular sources. Responsibility and authority for regulation of vehicular-source emissions resides with the State of California (CARB, et al.). Neither the Applicant nor the Lead Agency can effect or mandate substantial reductions in vehicular-source GHG emissions, much less reductions that would achieve no net increase condition or achieve the SCAQMD screening-level 3,000 MTCO2e/year threshold. In effect, all Project traffic would need to be eliminated or be "zero GHG emissions sources" in order to achieve the SCAQMD threshold. There are no feasible means to or alternatives to eliminate all Project traffic, or to ensure that Project traffic would comprise zero GHG emissions sources. In terms of its practical application, this would constitute a "no build" condition.

The Project would however implement all feasible measures to reduce GHG emissions as outlined under the City of Ontario 2022 Community Climate Action Plan Update (2022

CCAP Update). Under the 2022 CCAP Update, mixed use developments that garner at least 100 Screening Table points would be consistent with the GHG emissions reduction targets in the City's 2022 CCAP Update. As substantiated at EIR Section 4.4, *Greenhouse Gas Emissions*, the Project would attain more than 100 Screening Table points. The Project is therefore determined to be consistent with the 2022 CCAP Update.

1.10.4 Environmentally Superior Alternative

No Project Alternative: No Build Eliminated from Consideration

The No Project Alternative**:** No Build scenario would achieve none of the Project Objectives, and under certain topics, may increase the severity of, or create additional impacts not otherwise occurring under the Project. This Alternative is therefore eliminated from consideration as the "Environmentally Superior Alternative."

No Project Alternative: Existing Specific Plan Land Uses Eliminated from Consideration

The No Project Alternative: Existing Specific Plan Land Uses scenario would provide no significant reduction in environmental impacts when compared to the Project, and may increase the severity of, or create additional impacts not otherwise occurring under the Project. It is specifically noted that Land Use designations under this Alternative are inconsistent with TOP 2050, and this Alternative would require amendment of TOP 2050 Land Use Plan. This Alternative is therefore eliminated from consideration as the "Environmentally Superior Alternative."

Reduced Intensity Alternative Considerations

The Reduced Intensity Alternative scenario would incrementally reduce certain of the Project's environmental impacts. Significant and unavoidable environmental impacts under the Project would persist under the Reduced Intensity Alternative, though the degree of these impacts would be diminished. Relative merits of the Reduced Intensity Alternative are summarized below:

Reduced Intensity Alternative Would Reduce but Would not Eliminate Significant Impacts

The Reduced Intensity Alternative would reduce, but not eliminate, the Project's significant impacts regarding air quality and GHG emissions. More specifically:

- The magnitude of operational-source air quality impacts (VOC, NO_x, CO, PM_{10}) would be diminished but would remain significant and unavoidable. $PM_{2.5}$ emissions impacts would be reduced below significance thresholds.

- Total GHG emissions would be reduced. However, GHG emissions would still exceed the SCAQMD 3,000 $MTCO_2e$ screening threshold. Impacts in this regard would remain significant and unavoidable.

Reduced Intensity Alternative Would Marginalize Attainment of Project Objectives

Based on the reduction in overall development scope, the Reduced Intensity Alternative would broadly restrict attainment of all Project Objectives. Where quantifiable (e.g., additional sales tax revenues, job creation, incremental property tax revenues), this reduction in attainment of Objectives would be approximately 25 percent less than would be otherwise realized under the Project. Qualitatively, development of the subject site under the Reduced Intensity Alternative fails to optimize use of a significant vacant property, and is not considered by the Lead Agency to represent the highest and best use of the subject site.

Summary and Conclusions

Reduced Intensity Alternative Identified as the Environmentally Superior Alternative

In conclusion, the Reduced Intensity Alternative would result in potential incremental reduction in certain significant environmental impacts otherwise occurring under the Project, but would not eliminate these impacts. The Reduced Intensity Alternative would allow for limited attainment of the Project Objectives. On this basis, the Reduced Intensity Alternative is identified as the environmentally superior alternative.

Other Considerations

Countering its potential environmental benefits, the Reduced Intensity Alternative would broadly and substantially diminish attainment of the Project Objectives, with related diminishment of socio-economic benefits to the City and region. CEQA indicates that socioeconomic effects (while not lone determinants) are important considerations for decision-makers in evaluating and considering EIR Alternatives. With respect to socioeconomics, the Project and the Reduced Intensity Alternative would each have beneficial effects for the area. Either of these scenarios would contribute to area employment and the City's overall tax base. However, as noted previously, because the scope and variety of land uses would be reduced by approximately 25 percent under the Reduced Intensity Alternative, the resulting effective realization of the Project Objectives, to include economic benefits to the City and region, would likely be similarly diminished.

Additionally, at an approximate 25 percent reduction in the Project's development scope, the Reduced Intensity Alternative would not recognize the site's value as one of the remaining undeveloped properties within the City; or take advantage of the site's available acreage and consequently would not result in development of the subject site in a manner considered to be its highest and best use.

1.11 SUMMARY OF IMPACTS AND MITIGATION MEASURES

Table 1.11-1 summarizes potential impacts resulting from implementation and operations of the Project. The impacts identified at Table 1.11-1 correspond with environmental topics and impacts discussed at EIR Section 4.0, *Environmental Impact Analysis*. Table 1.11-1 also lists measures proposed to mitigate potentially significant environmental impacts of the Project, and indicates the level of significance after application of proposed mitigation.

Table 1.11-1
Summary of Impacts and Mitigation

General Note: *To facilitate coordination and effective implementation of mitigation measures, the mitigation measures provided herein shall appear on all grading plans, construction specifications, and bid documents. Incorporation of required notations shall be verified by the City prior to issuance of first development permit.*

Impact	Level of Significance Without Mitigation	Mitigation Measures	Level of Significance With Mitigation/Remarks
4.1 Land Use and Planning			
Cause a significant environmental impact due to a conflict with any land use plan, policy, or regulation adopted for the purpose of avoiding or mitigating an environmental effect.	Less-Than-Significant.	No mitigation is necessary.	Not applicable.
4.2 Transportation			
Conflict or be inconsistent with *CEQA Guidelines* Section 15064.3, subdivision (b).	Less-Than-Significant.	No mitigation is necessary.	Not applicable.
Conflict with a program, plan, ordinance or policy addressing the circulation system, including transit, roadway, bicycle and pedestrian facilities.	Less-Than-Significant.	No mitigation is necessary.	Not applicable.
Substantially increase hazards to a geometric design feature (e.g., sharp curves or dangerous intersections) or incompatible uses (e.g., farm equipment).	Less-Than-Significant.	No mitigation is necessary.	Not applicable.
Result in inadequate emergency access.	Less-Than-Significant.	No mitigation is necessary.	Not applicable.
4.3 Air Quality			
Conflict with or obstruct implementation of the applicable air quality plan.	Potentially Significant.	No feasible mitigation.	Significant and Unavoidable.

		funding. Tenants shall be encouraged to consider the use of alternative fueled trucks as well as new or retrofitted diesel trucks. Tenants shall also be encouraged to become SmartWay Partners, if eligible." Note: This measure shall not apply to trucks that are not owned or otherwise controlled by the facility owner or facility tenant. *4.3.14 The following or similar language shall be included in lease/sale agreements for all industrial buildings: "Tenants who employ 250 or more employees on a full- or part-time basis shall comply with SCAQMD Rule 2202, On-Road Motor Vehicle Mitigation Options. The purpose of this rule is to provide employees with a menu of options to reduce employee commute vehicle emissions. Tenants with less than 250 employees or tenants with 250 or more employees who are exempt from SCAQMD Rule 2202 (as stated in the Rule) shall either (a) join with a tenant who is implementing a program in accordance with Rule 2202 or (b) implement an emission reduction program similar to Rule 2202 with annual reporting of actions and results to the City. The tenant-implemented program would include, but not be limited to the following:* • *Appoint a Transportation Demand Management (TDM) coordinator who would promote the TDM program, activities and features to all employees.*	

Table 1.11-1
Summary of Impacts and Mitigation

General Note: *To facilitate coordination and effective implementation of mitigation measures, the mitigation measures provided herein shall appear on all grading plans, construction specifications, and bid documents. Incorporation of required notations shall be verified by the City prior to issuance of first development permit.*

Impact	Level of Significance Without Mitigation	Mitigation Measures	Level of Significance With Mitigation/Remarks
		• *Create and maintain a "commuter club" to manage subsidies or incentives for employees who carpool, vanpool, bicycle, walk, or take transit to work.* • *Inform employees of public transit and commuting services available to them (e.g., social media, signage).* • *Provide on-site transit pass sales and discounted transit passes.* • *Guarantee a ride home.* • *Offer shuttle service to and from public transit and commercial areas/food establishments, if warranted.* *4.3.15 Loading docks shall be designed to be compatible with SmartWay trucks.* *4.3.16 Non-residential use site plans shall include signs or other directional indicators delineating required site access and on-site circulation plan.* *4.3.17 The following or similar language shall be included in lease/sale agreements for all non-residential buildings: Tenants shall install (a) sign(s) on their respective property(ies) with telephone, email, and regular mail contact information for a designated tenant representative (representative) who would receive complaints about excessive noise, dust, fumes, or odors. The sign shall also identify contact data for the City for perceived Code violations. The representative shall keep records of any*

Impact	Level of Significance Without Mitigation	Mitigation Measures	Level of Significance With Mitigation/Remarks
		complaints received and actions taken to communicate with the complainant and resolve the complaint. The representative shall endeavor to resolve complaints within 24 hours. *4.3.18 Industrial building designs and site plans shall incorporate electrical supply lines and panels sized to support anticipated future requirements for heavy truck charging facilities. Such designs and plans shall be based on reasonable predictions derived from the most recent available truck manufacturer's data.*	
	LST Emissions Less-Than-Significant.	No mitigation is necessary.	Not applicable.
	CO Hotspot Emissions Less-Than-Significant.	No mitigation is necessary.	Not applicable.
	Cumulative Impacts Significant and Unavoidable.	Project construction-source NOx emissions regional threshold exceedances; and operational-source VOC, NOx, PM_{10}, and $PM_{2.5}$ emissions regional threshold exceedances would result in a cumulatively considerable net increase in criteria pollutants (ozone and PM_{10}/$PM_{2.5}$) for which the Project region is non-attainment. These are cumulatively significant air quality impacts.	Significant and Unavoidable.
Expose sensitive receptors to substantial pollutant concentrations.	Less-Than-Significant.	No mitigation is necessary.	Not applicable.

Table 1.11-1
Summary of Impacts and Mitigation

General Note: *To facilitate coordination and effective implementation of mitigation measures, the mitigation measures provided herein shall appear on all grading plans, construction specifications, and bid documents. Incorporation of required notations shall be verified by the City prior to issuance of first development permit.*

Impact	Level of Significance Without Mitigation	Mitigation Measures	Level of Significance With Mitigation/Remarks
4.4 Greenhouse Gas Emissions			
Generate greenhouse gas emissions, either directly or indirectly, that may have a significant impact on the environment.	Potentially Significant.	No feasible mitigation.	Significant and Unavoidable.
Conflict with an applicable plan, policy or regulation adopted for the purpose of reducing the emissions of greenhouse gases.	Potentially Significant.	*4.4.1 Development proposals within the Specific Plan Area shall implement Screening Table Measures to achieve a minimum of 100 points per the City's 2022 CCAP Update Screening Tables. The City shall verify minimum 100-point attainment prior to issuance of site plans and building permits.*	Less-Than-Significant.
4.5 Energy			
Result in potentially significant environmental impact due to wasteful, inefficient, or unnecessary consumption of energy resources, during project construction or operation.	Less-Than-Significant.	No mitigation is necessary.	Not applicable.
Conflict with or obstruct a state or local plan for renewable energy or energy efficiency.	Less-Than-Significant.	No mitigation is necessary.	Not applicable.
4.6 Noise			
Construction activities and associated noise would result in exposure of persons to, or generation of, noise levels in excess of standards established in the local general plan or	Less-Than-Significant. *The mitigation measures act to further reduce already less-than-*	*4.6.1 Prior to Grading Permit issuance, the Applicant shall demonstrate that the Project complies with the following:*	Less-Than-Significant.

Table 1.11-1
Summary of Impacts and Mitigation

General Note: *To facilitate coordination and effective implementation of mitigation measures, the mitigation measures provided herein shall appear on all grading plans, construction specifications, and bid documents. Incorporation of required notations shall be verified by the City prior to issuance of first development permit.*

Impact	Level of Significance Without Mitigation	Mitigation Measures	Level of Significance With Mitigation/Remarks
noise ordinance, or applicable standards of other agencies.	*significant construction noise levels.*	• *All construction equipment, fixed or mobile, shall be equipped with properly operating and maintained mufflers, to the satisfaction of the Noise Control Officer;* • *During construction, stationary construction equipment shall be placed such that emitted noise is directed away from sensitive noise receivers to the satisfaction of the City Planner; and* • *During construction and to the satisfaction of the City Planner, stockpiling and vehicle staging areas shall be located as far as practical from noise sensitive receptors during construction activities.* *4.6.2 Operating or causing the operation of any tools or equipment used in construction, drilling, repair, alteration, or demolition work between the hours of 10 p.m. and 7 a.m. is prohibited. The City Planner may approve additional hours when it can be found that such additional hours will not generate additional disturbance, or that mitigation measures will ensure compatibility with nearby residential areas.*	
Vehicular source noise would result in exposure of persons to or generation of noise levels in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies.	Potentially Significant. (on-site residential uses only)	*4.6.3 Prior to the construction of residential development along Riverside Drive, Haven Avenue, Mill Creek Avenue, Edison Avenue, and Milliken Avenue, an acoustical noise analysis shall be prepared prior to the submittal of final tentative tract maps to ensure that exterior and interior noise levels are met. The acoustical analysis shall demonstrate that the buildings have been designed to*	Less-Than-Significant.

Table 1.11-1
Summary of Impacts and Mitigation

General Note: *To facilitate coordination and effective implementation of mitigation measures, the mitigation measures provided herein shall appear on all grading plans, construction specifications, and bid documents. Incorporation of required notations shall be verified by the City prior to issuance of first development permit.*

Impact	Level of Significance Without Mitigation	Mitigation Measures	Level of Significance With Mitigation/Remarks
		limit interior noise levels to 45 dBA CNEL and exterior noise (backyards and habitable balconies and patios) to less than 65 dBA CNEL. Individual developments shall, to the extent feasible, implement site-planning techniques.	
Project operational noise would result in exposure of persons to, or generation of noise levels in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies.	Less-Than-Significant.	No mitigation is necessary.	Not applicable.
Project operational noise would result in a substantial permanent increase in ambient noise levels in the Project vicinity above levels existing without the Project.	Less-Than-Significant. *The mitigation measures act to further reduce already less-than-significant construction noise levels.*	*4.6.4 Prior to final development plan approval, on a project-by-project basis and to the discretion of the Ontario Planning Department, subsequent noise studies shall be prepared, which demonstrates the site placement of stationary noise sources would not exceed criteria established in the City of Ontario Municipal Code. The analysis shall verify that loading dock facilities, rooftop equipment, trash compactors and other stationary noise sources are adequately shielded and/or located at an adequate distance from residential areas in order to comply with the City's noise standards.* *4.6.5 Prior to Building Permit issuance and to the satisfaction of the Ontario Planning Department, the Project Applicants, on a project-by-project basis, shall demonstrate compliance with the following with respect to mechanical equipment:*	Less-Than-Significant.

Table 1.11-1
Summary of Impacts and Mitigation

General Note: *To facilitate coordination and effective implementation of mitigation measures, the mitigation measures provided herein shall appear on all grading plans, construction specifications, and bid documents. Incorporation of required notations shall be verified by the City prior to issuance of first development permit.*

Impact	Level of Significance Without Mitigation	Mitigation Measures	Level of Significance With Mitigation/Remarks
		• *Mechanical equipment shall include specifications of quiet equipment;* • *Mechanical equipment shall be properly selected and installed, and shall include sound attenuation packages;* • *To the extent possible, mechanical equipment shall be oriented away from the nearest noise sensitive receptors; and* • *The need for sound attenuation measures, and design of, such measures shall be determined as part of the final engineering design on a project-by-project basis.* *4.6.6 Where a commercial zone abuts a residential zone or residential use, the following or similar language shall be included in lease/sale agreements for all non-residential buildings: All deliveries of goods and supplies; trash pick-up, including the use of parking lot trash sweepers; and the operation of machinery or mechanical equipment which emits noise levels in excess of 65 dBA, as measured from the closest property line to the equipment, shall only be allowed between the hours of 7 a.m. and 10 p.m., unless otherwise specified in an approved conditional use permit or other discretionary approval.* *4.6.7 Prior to final development plan approval, on a project-by-project basis, a subsequent noise analysis shall be prepared, to the satisfaction of the Ontario Planning Department, which demonstrates that all feasible sound*

Impact	Level of Significance Without Mitigation	Mitigation Measures	Level of Significance With Mitigation/Remarks
		attenuation has been incorporated into the parking areas (i.e., landscaping and brushed driving surfaces), such that noise from parking areas has been minimized to the greatest extent practicable.	
Generation of excessive groundborne vibration or groundborne noise.	Less-Than-Significant.	No mitigation is necessary.	Not applicable.
For a project located within the vicinity of a private airstrip or an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project expose people residing or working in the project area to excessive noise levels.	Less-Than-Significant.	No mitigation is necessary.	Not applicable.
4.7 Hazards/Hazardous Materials			
Create a significant hazard to the public or the environment through the routine transport, use, or disposal of hazardous materials; create a significant hazard to the public or the environment through reasonably foreseeable upset and accident conditions involving the likely release of hazardous materials into the environment.	Potentially Significant.	*4.7.1 Prior to the issuance of permits for any structural demolition activities on the Project site, the Project developer(s) shall submit documentation to the City of Ontario Building Department that asbestos and lead-based paint issues are not applicable to their property or that appropriate remediation actions have been undertaken to correct any lead-based paint or asbestos issues. Any required remediation shall conform with the regulations of the South Coast Air Quality Management District and the State of California, Division of Occupational Health and Safety.*	Less-Than-Significant.

Table 1.11-1

Impact	Level of Significance Without Mitigation	Mitigation Measures	Level of Significance With Mitigation/Remarks
		requirements of the Phase II ESA, and shall provide documentation to the City of Ontario to that effect.	
Emit hazardous emissions or handle hazardous or acutely hazardous materials, substances, or waste within one-quarter mile of an existing or proposed school.	Less-Than-Significant.	No mitigation is necessary.	Not applicable.
4.8 Hydrology and Water Quality			
Violate any water quality standards or waste discharge requirements or otherwise substantially degrade surface or ground water quality.	Less-Than-Significant.	No mitigation is necessary.	Not applicable.
Substantially alter the existing drainage pattern of the site or area in a manner that would substantially increase the rate or amount of runoff that would result in flooding on- or offsite; Substantially alter the existing drainage pattern of the site or area in a manner that would create or contribute runoff water which would exceed the capacity of existing or planned stormwater drainage systems or provide substantial additional sources of polluted runoff.	Potentially Significant.	*4.8.1 General: In conjunction with all development proposals within the Specific Plan Area, peak flow mitigation measures for each development shall be implemented such that discharges to receiving MPD storm drain mainlines do not exceed the maximum allowable flow rates identified at Project Hydrology Report, Appendix A, Exhibit 3. Ultimate design, location, and configuration of peak flow mitigation measures are site-and use-specific. Design, location, and configuration of peak flow mitigation measures shall be approved by the City as part of site plan review and approval processes.* *4.8.2 Haven Storm Drain Mitigation: Measures (e.g., detention basins or similar) to control peak flows to the*	Less-Than-Significant.

Table 1.11-1
Summary of Impacts and Mitigation

General Note: *To facilitate coordination and effective implementation of mitigation measures, the mitigation measures provided herein shall appear on all grading plans, construction specifications, and bid documents. Incorporation of required notations shall be verified by the City prior to issuance of first development permit.*

Impact	Level of Significance Without Mitigation	Mitigation Measures	Level of Significance With Mitigation/Remarks
		Haven Storm Drain shall be implemented to address increased stormwater discharges resulting from development of Planning Areas 1A, 1B, 1C, 2C, and 3C. Please refer to Figure 4.8-5. Locations for these measures shall be reviewed and approved by the City prior to final site plan approval(s) for development within Planning Areas 1A, 1B, 1C, 2C, and 3C. *4.8.3 Mill Creek Storm Drain Mitigation: Peak flow mitigation measures shall be implemented for stormwater discharges resulting from development of Planning Areas 2C, 3C, 5A, 6A, and 6B. Please refer to Figure 4.8-5. Locations for these measures shall be reviewed and approved by the City prior to final site plan approval(s) for development within Planning Areas 2C, 3C, 5A, 6A, and 6B.*	
Impede or redirect flood flows.	Less-Than-Significant.	No mitigation is necessary.	Not applicable.
Under a flood, tsunami, or seiche event, release pollutants due to project inundation.	Less-Than-Significant.	No mitigation is necessary.	Not applicable.
Conflict with or obstruct implementation of a water quality control plan or sustainable groundwater management plan.	Less-Than-Significant.	No mitigation is necessary.	Not applicable.

Table 1.11-1
Summary of Impacts and Mitigation

General Note: *To facilitate coordination and effective implementation of mitigation measures, the mitigation measures provided herein shall appear on all grading plans, construction specifications, and bid documents. Incorporation of required notations shall be verified by the City prior to issuance of first development permit.*

Impact	Level of Significance Without Mitigation	Mitigation Measures	Level of Significance With Mitigation/Remarks
4.9 Geology and Soils			
Directly or indirectly cause potential substantial adverse effects, including the risk of loss, injury or death involving strong seismic ground shaking.	Less-Than-Significant.	No mitigation is necessary.	Not applicable.
Directly or indirectly cause potential substantial adverse effects, including the risk of loss, injury or death involving seismic-related ground failure, including liquefaction; or be located on a geologic unit or soil that is unstable, or that would become unstable as a result of the project, and potentially result in on- or off-site landslide, lateral spreading, subsidence, liquefaction or collapse.	Potentially Significant.	*4.9.1 All proposed development within the Specific Plan Area shall, at a minimum, comply with recommendations and standards identified in the Preliminary Geotechnical Report at Section 4.0, Recommendations. If further recommendations are developed as part of future site- and design-specific geotechnical investigations they shall prevail.*	Less-Than-Significant.
Be located on expansive soil, as defined in Table 18-1-B of the Uniform Building Code (1994), thereby creating substantial direct or indirect risks to life or property.	Less-Than-Significant.	No mitigation is necessary.	Not applicable.

Table 1.11-1
Summary of Impacts and Mitigation

General Note: *To facilitate coordination and effective implementation of mitigation measures, the mitigation measures provided herein shall appear on all grading plans, construction specifications, and bid documents. Incorporation of required notations shall be verified by the City prior to issuance of first development permit.*

Impact	Level of Significance Without Mitigation	Mitigation Measures	Level of Significance With Mitigation/Remarks
Directly or indirectly destroy a unique paleontological resource or site or unique geologic feature.	Less-Than-Significant. [impacts to paleontological resources]	No mitigation is necessary.	Not applicable.
4.10 Biological Resources			
Substantially affect, either directly or through habitat modifications, any species identified as a candidate, sensitive, or special status species in local or regional plans, policies or regulations, or by the California Department of Fish and Wildlife (CDFW) or United States Fish and Wildlife Service (USFWS).	Potentially Significant.	*4.10.1 Avoidance of Nesting Migratory Birds: If possible, all vegetation removal activities shall be scheduled from August 1 to February 1, which is outside the general avian nesting season. This would ensure that no active nests would be disturbed and that removal could proceed rapidly. If vegetation is to be cleared during the nesting season, all suitable habitat will be thoroughly surveyed within 72 hours prior to clearing for the presence of nesting birds by a qualified biologist (Project Biologist). The Project Biologist shall be approved by the City and retained by the Applicant. The survey results shall be submitted by the Project Applicant to the City Planning Department. If any active nests are detected, the area shall be flagged and mapped on the construction plans along with a minimum 300-foot buffer, with the final buffer distance to be determined by the Project Biologist. The buffer area shall be avoided until, as determined by the Project Biologist, the nesting cycle is complete or it is concluded that the nest has failed. In addition, the Project Biologist shall be present on the site to monitor the vegetation removal to ensure that any nests, which were not detected during the initial survey, are not disturbed.*	Less-Than-Significant.

Summary of Impacts and Mitigation

General Note: *To facilitate coordination and effective implementation of mitigation measures, the mitigation measures provided herein shall appear on all grading plans, construction specifications, and bid documents. Incorporation of required notations shall be verified by the City prior to issuance of first development permit.*

Impact	Level of Significance Without Mitigation	Mitigation Measures	Level of Significance With Mitigation/Remarks
		4.10.2 Avoidance of Nesting Burrowing Owls: No more than 72 hours prior to any site disturbances, focused surveys for the burrowing owl shall be conducted. If absence of this species is confirmed, Project work can proceed. If, however, burrowing owl is located on site, the appropriate resource agencies (CDFW and USFWS) shall be contacted. The Project Applicant shall consult with the wildlife agencies regarding the most appropriate methods and timing for removal of owls. As necessary, owls will be actively evicted following agency approved protocols (i.e., placing a one-way door at the burrow entrance to ensure that owls cannot access the burrow once they leave). Any such active eviction shall occur outside of the breeding/nesting season. That is, active eviction shall be accomplished between September 1 and February 15. If more than 30 days has elapsed between owl eviction and completion of clearing and grubbing activities, a subsequent survey for the burrowing owl shall be conducted to ensure that owls have not re-populated the site. Any reoccupation by owls will require subsequent protocol active eviction.	
Have a substantial adverse effect on riparian habitat or other sensitive natural community identified in local or California plans, policies or regulations or by the California Department of Fish and Wildlife	Less-Than-Significant.	No mitigation is necessary.	Not applicable.

Table 1.11-1
Summary of Impacts and Mitigation

Incorporation of required notations shall be verified by the City prior to issuance of first development permit.*

Impact	Level of Significance Without Mitigation	Mitigation Measures	Level of Significance With Mitigation/Remarks
(CDFW) or the United States Fish and Wildlife Service (USFWS).			
Have a substantial adverse effect on federally protected wetlands as defined by Section 404 of the Clean Water Act (including, but not limited to, marsh, vernal pool, coastal, etc.) through direct removal, filling, hydrological interruption, or other means.	Less-Than-Significant.	No mitigation is necessary.	Not applicable.
Interfere substantially with the movement of any native resident or migratory fish or wildlife species or with established native resident or migratory wildlife corridors, or impede the use of wildlife nursery sites.	Less-Than-Significant.	No mitigation is necessary.	Not applicable.
Conflict with any local policies or ordinances protecting biological resources, such as tree preservation policy or ordinance.	Less-Than-Significant.	No mitigation is necessary.	Not applicable.
Conflict with provisions of an adopted Habitat Conservation Plan, Natural Community Conservation Plan, or other approved local, regional, or state habitat conservation plan.	Less-Than-Significant.	No mitigation is necessary.	Not applicable.
4.11 Cultural/Tribal Resources			

Table 1.11-1
Summary of Impacts and Mitigation

General Note: *To facilitate coordination and effective implementation of mitigation measures, the mitigation measures provided herein shall appear on all grading plans, construction specifications, and bid documents. Incorporation of required notations shall be verified by the City prior to issuance of first development permit.*

Impact	Level of Significance Without Mitigation	Mitigation Measures	Level of Significance With Mitigation/Remarks
Cause a substantial adverse change in the significance of a historical resource pursuant to §15064.5.	Less-Than-Significant.	No mitigation is necessary.	Not applicable.
Cause a substantial adverse change in the significance of an archeological resource pursuant to §15064.5.	Potentially Significant.	*4.11.1 Prior to the issuance of (a) grading permit(s) for development proposal(s) within the Specific Plan Area, the Applicant or successor(s) in interest shall provide a letter to the City of Ontario Building Department, or designee, from a qualified professional archeologist meeting the Secretary of Interior's Professional Qualifications for Archaeology as defined at 36 CFR Part 61, Appendix A stating that the archeologist has been retained to provide on-call services in the event archeological resources are discovered. The archeologist shall be present at the pre-grading conference to establish procedures for archeological resource surveillance. In the event a previously unrecorded archaeological deposit is encountered during construction, all activity within 50 feet of the area of discovery shall cease and the City shall be immediately notified. The archeologist shall be contacted to flag the area in the field and determine if the archaeological deposits meet the CEQA definition of historical (State CEQA Guidelines 15064.5(a)), unique archaeological resource (Public Resources Code 21083.2(g)), or Tribal Cultural Resource (Public Resources Code 21074 (a)). If the find is considered a "resource" the archaeologist shall pursue either protection in place or recovery, salvage and treatment of the deposits. A qualified archaeologist and a Native American Monitor of Gabrieleño Ancestry shall*	Less-Than-Significant.

Impact	Level of Significance Without Mitigation	Mitigation Measures	Level of Significance With Mitigation/Remarks
		evaluate all archaeological resources unearthed by Project construction activities. If the resources are Native American in origin, they shall have the opportunity to consult with the City and/or Project developer on appropriate treatment and curation of these resources. If unique archaeological resources, or Tribal Cultural Resources cannot be preserved in place or left in an undisturbed state, recovery, salvage and treatment shall be required at the Applicant or successor(s) in interest's expense. Recovery, salvage and treatment protocols shall be developed in accordance with applicable provisions of Public Resource Code Section 21083.2 and State CEQA Guidelines 15064.5 and 15126.4. All recovered and salvaged resources shall be prepared to the point of identification and permanent preservation by the archaeologist. Resources shall be identified and curated into an established accredited professional repository. The archaeologist shall have a repository agreement in hand prior to initiating recovery of the resource. Excavation as a treatment option shall be restricted to those parts of the unique archaeological resource, or Tribal Cultural Resource that would be damaged or destroyed by the Project.	
Cause a substantial adverse change in the significance of a tribal cultural resource as defined in Public Resources Code section 21074.	Potentially Significant.	*4.11.2 Project developer(s) shall retain a Native American Monitor of Gabrieleño Ancestry (Native American Monitor) that was consulted on this Project pursuant to Assembly Bill A52 - SB18 to conduct a Native American Indian Sensitivity Training for construction personnel prior to commencement of any excavation activities. The*	Less-Than-Significant.

		Bernardino County Coroner determines if the remains are Native American. The discovery shall be confidential and secure to prevent further disturbance. If Native American, the San Bernardino County Coroner shall notify the Native American Heritage Commission (NAHC) as mandated by state law who will then appoint a Most Likely Descendant. In the case where discovered human remains cannot be documented and recovered on the same day, the remains shall be covered with muslin cloth and a steel plate that can be moved by heavy equipment placed over the excavation opening to protect the remains. If this type of steel plate is not available, a 24-hour guard shall be posted outside working hours. The Tribe shall make every effort to recommend diverting the Project and keep the remains in situ and protected. If the Project cannot be diverted, it may be determined that burials will be removed. If data recovery is approved by the Tribe, documentation shall be taken which includes, at a minimum, detailed descriptive notes and sketches. Additional types of documentation shall be approved by the Tribe for data recovery purposes. Cremations will either be removed in bulk or means necessary to ensure complete recovery of all material. If the discovery of human remains includes four (4) or more burials, the location is considered a cemetery and a separate treatment plan shall be created. The Project developer shall consult with the Tribe regarding avoidance of all cemetery

Comply with federal, state, and local statutes and regulations related to solid waste.	Less-Than-Significant.	No mitigation is necessary.	Not applicable.

2.0 INTRODUCTION

2.0 INTRODUCTION

2.1 OVERVIEW

The Rich-Haven Specific Plan (RHSP) was approved by the City of Ontario in 2015, with subsequent Specific Plan Amendments approved in 2016, 2018, and 2021. The current (2021) Rich-Haven Specific Plan ("2021 Specific Plan") comprises approximately 584 acres located west of Interstate 15 (I-15), and south of State Route 60 (SR-60). The 2021 Specific Plan Area lies within the 8,200-acre Ontario Ranch area, bounded generally by Riverside Drive to the north, "Old" East Edison Avenue [alignment] to the south, Mill Creek Avenue and Hamner Avenue to the east, and Haven Avenue to the west. The location and boundaries of the 2022 RHSP Specific Plan Amendment evaluated in this EIR coincide with the location and boundaries in the 2021 Specific Plan.

The 2021 Specific Plan entitlements allow for development of up to 7,194 dwelling units (all residential types), up to 990,902 square feet of commercial/office space, up to 1,183,525 square feet of light industrial uses, approximately 27 acres of public parkland, and approximately 20 acres of Southern California Edison (SCE) Parcel open space and SCE Easements. The 2022 RHSP Specific Plan Amendment (2022 Specific Plan Amendment, Project) evaluated in this EIR proposes a new amendment of the RHSP as described herein.

In summary, the proposed 2022 Specific Plan Amendment would result in the following primary revisions to the 2021 Specific Plan:

1. Total residential development within the Specific Plan Area would be maintained at 7,194 dwelling units. Residential units and residential densities would however be reassigned within the Specific Plan Area.
2. Total commercial development would be reduced by approximately 65,900 square feet, an approximate 6.7 percent reduction in the 2021 Specific Plan commercial entitlements.
3. Total light industrial development would be increased by approximately 1,583,623 square feet, an approximate 134 percent increase from the 2021 Specific Plan Amendment.

Other aspects and attributes of the 2021 Specific Plan would be substantively maintained under the proposed 2022 Specific Plan Amendment. The Project is further described at Draft EIR Section 3.0, *Project Description*.

2.2 EIR PURPOSE AND AUTHORIZATION

An EIR is an informational document intended to apprise decision-makers and the general public of potentially significant environmental impacts of a project. An EIR also proposes mitigation to preclude or minimize significant impacts, and describes reasonable alternatives to the Project that may also reduce or avoid significant impacts. Having the authority to take action on the Project, the City of Ontario will consider the information in this EIR in their evaluation of the proposal. Findings and conclusions of the EIR do not control the City's discretion to approve, deny, or modify the Project, but instead are presented as information to aid the decision-making process.

This EIR has been prepared by the City of Ontario pursuant to *Guidelines for the Implementation of the California Environmental Quality Act (Guidelines)*, (§§ 15000–15387, California Code of Regulations). The proposed Rich-Haven Specific Plan, 2022 Amendment is a "project," as defined at § 15378 of the *Guidelines*. The *Guidelines* stipulate that an EIR must be prepared for any project that may have a significant impact on the environment. The City has determined that the Project may have one or more significant impacts on the environment and, therefore, the preparation of an EIR is required.

2.3 LEAD AND RESPONSIBLE AGENCIES

CEQA defines a "lead agency" as the public agency which has the principal responsibility for carrying out or approving a Project which may have a significant effect upon the environment. Other agencies, e.g., the California Department of Transportation (Caltrans), the South Coast Air Quality Management District (SCAQMD) or the Regional Water Quality Control Board (RWQCB), which also have some authority or responsibility to issue permits for Project implementation, are designated as "responsible agencies." Both the lead agency and responsible agencies must consider the information contained in the EIR prior to acting upon or approving the Project. The City of Ontario is the Lead Agency for the Project. Contact information for the Lead Agency is presented below.

Lead Agency: City of Ontario
Planning Department
303 East "B" Street
Ontario, CA 91764
Attention: Lorena Mejia, Senior Planner

2.4 PROJECT APPLICANT

Contact information for the Project Applicant is presented below.

Applicant: BrookCal Ontario LLC/Richland Developers, Inc.
3161 Michelson Drive, Suite 425
Irvine, CA 92612

2.5 EIR PROCESS

When a public agency determines that there is substantial evidence that a Project may have a significant effect on the environment, the agency must prepare an EIR before a decision is made to approve or deny the Project. The purpose of the EIR is to disclose a project's potential environmental impacts and recommend measures to reduce or avoid significant impacts. The basic content of an EIR includes: a description of the project under consideration and its objectives; a description of the existing environmental

conditions; a discussion of the potentially significant environmental effects of the project; recommended measures for reducing these effects; and identification and evaluation of feasible alternatives to the project which may also reduce potentially significant impacts of the proposal.

Typically, EIRs comprise two documents: a Draft EIR, distributed by the lead agency for review and comment by the general public and any interested governmental agencies; and a Final EIR, which consists of responses to comments received on, together with any necessary modifications to, the Draft EIR. After the Draft EIR has been circulated for review and the Final EIR has been prepared, the EIR must be certified by the lead agency as having complied with CEQA and considered by the agency's decision-making body before any action can be taken on a project. When a public agency receives a complete project application or decides to undertake a project of its own, it first determines if the project is subject to environmental review under CEQA and, if it is, the agency then typically prepares an Initial Study (IS) to determine if the project under consideration has the potential to cause significant adverse environmental effects. The IS serves as a tool to help the agency determine if an EIR is required, and if so, the focal issues to be examined in the EIR. The lead agency may skip the Initial Study process if it is evident that a project could result in significant environmental effects and that an EIR will be required.

The EIR process is initiated by the distribution of a Notice of Preparation (NOP). Together with the Initial Study (if prepared), the NOP is sent to agencies and interested individuals as notice of commencement of the EIR process, and to solicit their suggestions for appropriate EIR issues and topical analyses. The completed Draft EIR is then circulated to responsible agencies, other affected or interested agencies, and interested members of the public for review and comment. The review period for a Draft EIR is typically 45 days. To provide for appropriate consideration and inclusion in the Final EIR, all comments and concerns regarding the Draft EIR should be received by the lead agency during this 45-day period.

Responses to comments received on the Draft EIR are prepared by the lead agency and included in the Final EIR. The Final EIR may also contain additional information about the project's potential impacts and minor corrections or modifications to the Draft EIR. The Final EIR must be certified by the lead agency's decision-making body before, or in conjunction with, any action to approve a project. Customarily, EIR certification coincides with City Planning Commission and/or City Council public hearing(s).

CEQA requires that the EIR address only significant adverse impacts. The *CEQA Guidelines* suggest thresholds or standards which define the significance of various types of impacts. The *CEQA Guidelines* also state that the significance of impacts should be considered in relation to their severity and probability of occurrence. However, ultimately, the determination of the significance of impacts is at the discretion of the lead agency. The identification of significant impacts in the EIR does not prevent an agency from approving a project. A project may be approved if the lead agency determines that impacts cannot be feasibly mitigated below a level of significance and if the agency determines that there are important overriding considerations, such as social and economic benefits, which are sufficient to justify approval of the considered project.

2.6 EIR CONTENT AND FORMAT

This Draft EIR is organized into Chapters or Sections, each addressing a separate aspect of the required content of an EIR as described in the *Guidelines*. A summary of the Project's impacts and recommended mitigation measures is provided at Section 1.0. An introduction and general overview of the environmental process and the format of this EIR are presented in this Section 2.0. Section 3.0 contains a complete description of the Project, including its location, objectives, and physical and operational characteristics. The complete and detailed environmental impact analysis is presented at Section 4.0. The topical issues mandated by CEQA dealing with cumulative impacts, alternatives, long-term implications of the Project, and energy conservation are found at Section 5.0. Section 6.0 lists and defines the acronyms and abbreviations contained in this document. Section 7.0 lists the information sources and persons consulted during the environmental analysis process, and presents a list of the persons who prepared the

Draft EIR. The Initial Study and responses to the NOP, with supporting technical studies, are appended to the body of the EIR document.

Section 4.0, *Environmental Impact Analysis*, is the focal component of the Draft EIR. The environmental impact analysis has been organized into a series of sections, each addressing an environmental topic or area of concern identified through the Initial Study process (e.g., Land Use and Planning, Transportation, Air Quality, Noise, etc.). To assist the reader in understanding the organization and basis of the analysis, the sections covering each individual environmental topic typically include the following subsections:

- **Reader's Abstract:** An introductory reader's abstract, summarizing content and findings, is provided at the beginning of each topical section.

- **Introduction:** The introduction summarizes the content of the section and references other important studies and reports, such as technical studies appended to the EIR.

- **Setting/Existing Conditions:** This subsection describes baseline environmental conditions which may be subject to change as a result of implementation of the Project. Separate descriptions of existing environmental conditions are provided for each environmental topic.

- **Existing Policies and Regulations:** Various relevant policies, regulations, and programs related to the environmental topic are briefly described. Often, these existing policies and regulations serve to reduce or avoid potential environmental impacts.

- **Standards (Thresholds) of Significance:** Before potential impacts are evaluated, the standards which will serve as the basis for judging significance are presented.

- **Potential Impacts and Mitigation Measures:** This subsection states and explains potential impacts caused by the Project. Based on the standards of significance,

impacts are categorized as either potentially significant or less-than-significant. If the impacts are considered to be potentially significant, mitigation measures are proposed to reduce the impacts. At the conclusion of each discussion for a potentially significant impact, a determination is made as to whether the impact can be reduced to a less-than-significant level with the application of proposed mitigation measures. Impacts that cannot be reduced to levels that are less-than-significant are identified as "significant and unavoidable."

The summary presented at Section 1.0 provides a comprehensive overview of the Project's impacts. For a more detailed description of Project impacts, it is recommended that the reader review the Project Description (Section 3.0), and then read the sections on the topics of interest in the environmental impact analysis (Section 4.0).

2.7 INTENDED USE OF THIS EIR

This EIR addresses the potential environmental effects of the implementation and operation of the proposed Rich-Haven Specific Plan, 2022 Amendment Project. The City of Ontario (City) is the Lead Agency for the purposes of CEQA because it has the principal responsibility and authority for deciding whether or not to approve the Project, and how it will be implemented. As the Lead Agency, the City is also responsible for preparing environmental documentation for the Project in compliance with CEQA.

The Lead Agency will employ this EIR in its evaluation of potential environmental impacts resulting from, or associated with, approval and implementation of the Project, to include potential effects of the Project's component elements. This EIR will also be used by various Responsible Agencies, e.g., Air Quality Management District(s), California Department of Transportation, Regional Water Quality Control Board(s), *et al*.; as well as utilities and service providers when such entities issue permits necessary to carry out the project. For example, if this EIR and/or its Mitigation Measures require encroachment permits from Caltrans, this EIR will serve as the environmental assessment for such improvements. (Please refer to California Code of Regulations, sections 15050 and 15162.)

This EIR in all instances evaluates likely maximum impact/maximum exposure scenarios. In this regard, this EIR evaluates likely maximum impacts that would result from buildout of the Specific Plan in total; and in instances where localized impacts could diverge from the maximum buildout impacts, those localized impacts have been evaluated and addressed. For example, the EIR at Section 4.3, *Air Quality* addresses the Project's maximum construction-source and operational-source air quality impacts that could affect regional air quality; and also addresses maximum localized air quality impacts that could affect area sensitive receptors. Similarly, the EIR at Section 4.6, *Noise* considers noise impacts that could result from the Project uses generally, and also addresses maximum localized noise impacts that could affect area sensitive receptors.

The Specific Plan document, presented at EIR Appendix B, establishes standards and requirements at sufficient detail to allow the Lead Agency to determine whether subsequent individual development proposals would conform to the Specific Plan as described and evaluated in this EIR. As part of the Lead Agency's standard development review process, individual development proposals within the Specific Plan area would be reviewed for that proposal's consistency with the approved Specific Plan. Proposals that are determined to be consistent with the approved Specific Plan presumptively would not result in impacts substantially different than or greater than the impacts considered and addressed in this EIR. At the discretion and direction of the City, proposals that differ substantially from the standards and requirements of the approved Specific Plan or that would require or result in substantive modifications to the Specific Plan as summarized and evaluated in this EIR may merit additional environmental evaluation.

2.8 DOCUMENTS INCORPORATED BY REFERENCE

CEQA *Guidelines* Section 15150 permits and encourages an environmental document to incorporate, by reference, other documents that provide relevant information. The documents summarized below are incorporated by reference, and the pertinent material is summarized throughout this EIR, where that information is relevant to the analysis of potential impacts of the Project. All documents incorporated by reference are available for review at, or can be obtained through, the City of Ontario Planning Department.

2.8.1 The Ontario Plan 2050 (TOP 2050) Policy Plan and TOP 2050 Supplemental Environmental Impact Report

TOP 2050 Policy Plan (Policy Plan) serves as the City's General Plan which is mandated by state law. The Policy Plan establishes Goals and Policies and provides guidance for future development of the City. The Policy Plan, which was updated and adopted in 2022, incorporates and relies upon its Implementation Plan to provide the guidance necessary for successful implementation of Policy Plan Goals and Policies. Ontario's Policy Plan comprises nine elements: Land Use, Housing, Mobility, Safety (including Noise), Environmental Resources (including Conservation), Parks and Recreation (including Open Space), Community Economics, Community Design, and Social Resources. The topic of Environmental Justice is integral to the Policy Plan. TOP SEIR (SCH No. 2021070364) evaluates and addresses potential environmental impacts that would result from implementation of the Policy Plan. The Policy Plan and Policy Plan SEIR documents contain background information employed in this EIR. These documents are available through the City of Ontario Planning Department, or can be accessed at: http://www.ontarioplan.org/policy-plan/.

2.8.2 Previous Rich-Haven Specific Plan Environmental Documentation

The 2007 Rich-Haven Specific Plan and its subsequent amendments through 2021 have been previously evaluated consistent with applicable CEQA analysis and documentation requirements. The City has certified the 2007 Rich-Haven Specific Plan and adopted subsequent CEQA documentation as required by law. The 2007 Rich-Haven Specific Plan EIR (SCH No. 2006051081), subsequent CEQA documents evaluating previous amendments to the 2007 Rich-Haven Specific Plan, and all related supporting technical analyses are incorporated by reference. These documents are available through the City of Ontario Planning Department.

2.8.3 City of Ontario Development Code

The City of Ontario Development Code (Development Code) codifies and complements the City General Plan. The Development Code, in effect, provides the mechanism to implement and enforce the goals, objectives, policies and programs articulated in the General Plan. The City's Development Code was adopted by the Ontario City Council

on July 7, 1998 and continues to be periodically updated to reflect current Federal/State laws. The Development Code is available through the City of Ontario Planning Department, or can be accessed at: https://www.ontarioca.gov/Planning/Applications.

2.8.4 Project Technical Studies/EIR Appendices

Following are summary descriptions of documents and supporting technical studies which are appended to the main body of the Draft EIR. Working titles of these documents generically refer to the Project and its physical attributes, and may not necessarily reflect the currently assigned "Rich-Haven Specific Plan, 2022 Amendment" development title.

2.8.4.1 Initial Study, NOP, and NOP Responses - EIR Appendix A

The EIR Initial Study (IS), Notice of Preparation (NOP) and responses received pursuant to distribution of the IS/NOP are presented at EIR Appendix A. Based on the Initial Study and responses to the NOP, this EIR addresses the following environmental topics:

- Air Quality;
- Biological Resources;
- Cultural Resources/Tribal Cultural Resources;
- Energy;
- Geology and Soils;
- Greenhouse Gas Emissions;
- Hazards/Hazardous Materials;
- Hydrology/Water Quality;
- Land Use and Planning;
- Noise;
- Transportation; and
- Utilities and Service Systems.

2.8.4.2 Rich-Haven Specific Plan, 2022 Amendment - EIR Appendix B

The *Rich-Haven Specific Plan, 2022 Amendment* (2022 Specific Plan Amendment) is presented in its entirety at EIR Appendix B. If adopted by the City, the Specific Plan would become the effective zoning for the subject site, and would regulate all development within the site.

The proposed Specific Plan would establish land use plans, development standards, and design guidelines directing the ultimate buildout of the Project site. Land uses and development concepts reflected within the proposed Specific Plan can be feasibly implemented consistent with applicable provisions of TOP 2050 Policy Plan and City Development Code.

2.8.4.3 Traffic Analysis/VMT Assessment - EIR Appendix C

Project Level of Service (LOS) and Vehicle Miles Traveled (VMT) analyses are presented in: *Rich Haven Specific Plan, Traffic Analysis* (Urban Crossroads, Inc.) December 16, 2022 and *Rich-Haven Specific Plan Amendment, Vehicle Miles Traveled (VMT) Analysis* (Urban Crossroads, Inc.) October 3, 2022.

2.8.4.4 Air Quality Impact Analyses - EIR Appendix D

Air quality impact analyses prepared for the Project include: *Rich-Haven Specific Plan, 2022 Amendment, Air Quality Impact Analysis, City of Ontario* (Urban Crossroads, Inc.) November 8, 2022; and *Rich-Haven Specific Plan, 2022 Amendment, Mobile Source Health Risk Assessment, City of Ontario* (Urban Crossroads, Inc.) November 8, 2022.

2.8.4.5 Greenhouse Gas Analysis - EIR Appendix E

Detailed analysis of the Project's potential Greenhouse Gas impacts are presented in: *Rich-Haven Specific Plan, 2022 Amendment, Greenhouse Gas Analysis, City of Ontario* (Urban Crossroads, Inc.) November 8, 2022.

2.8.4.6 Energy Assessment - EIR Appendix F

Project energy consumption is quantified in: *Rich-Haven Specific Plan, 2022 Amendment, Energy Analysis, City of Ontario* (Urban Crossroads, Inc.) November 8, 2022.

2.8.4.7 Noise Impact Analysis - EIR Appendix G

Potential noise impacts of the Project, including construction-source and operational-source noise impacts are assessed in: *Rich-Haven Specific Plan 2022 Amendment, Noise and Vibration Analysis* (Urban Crossroads, Inc.) October 27, 2022.

2.8.4.8 Environmental Site Assessment - EIR Appendix H

An assessment of potential hazards associated with a portion of the site's historic uses, and the potential for hazardous materials to currently exist within or proximate to the Project site is provided in: *Phase I Environmental Site Assessment 1601 E. Riverside Drive, Ontario, California 91761* (Hillman Consulting) July 28, 2016.

2.8.4.9 Hydrology Study - EIR Appendix I

Hydrology issues potentially affecting the Project are assessed in: *Rich-Haven Specific Plan, Hydrology Report* (X Engineering & Consulting, Inc.) September 2022.

2.8.4.10 Geotechnical Report - EIR Appendix J

Geotechnical issues potentially affecting the Project are assessed in: *Consolidated Geotechnical Report to Support the Environmental Impact Report for the Rich-Haven Specific Plan, City of Ontario, California* (LGC Geotechnical, Inc.) September 20, 2022.

2.8.4.11 Biological Resources Assessment - EIR Appendix K

Biological resources potentially affected by the Project are assessed in: *Biological Report for the Rich Haven 2022 Specific Plan Amendment Project Site (*Harmsworth Associates) July 2022.

2.8.4.12 Cultural Resources Investigation - EIR Appendix L

A cultural resources investigation was also prepared for the Project: *Cultural Resources Assessment, Rich-Haven Specific Plan Areas of Change Project, City of Ontario, San Bernardino County, California* (BCR Consulting, Inc.) August 18, 2022.

2.8.4.13 Water Supply Assessment - EIR Appendix M

Consistent with SB 610 requirements, a WSA was prepared and approved for the site's current (2021 Specific Plan) entitlements. See: *Water Supply Assessment and Written Verification of Sufficient Water Supply, Rich-Haven Specific Plan Amendment No. 3* (Albert A. Webb Associates) March 18, 2021 (2021 WSA).

The City of Ontario, Ontario Municipal Utilities Company (OMUC) has determined that water demands of the 2022 Specific Plan Amendment uses would be reduced when compared to water demands evaluated in the currently approved WSA. OMUC has made the following determination regarding necessity to prepare a new WSA for the currently proposed 2022 Specific Plan Amendment Project . . . "the Water Code allows for an existing WSA to be applied to a new proposed project if there is no substantial increase in water demand. Since there was a WSA completed for the entire Rich Haven SP last year [2021], the Mill Creek Business Center Project [the proposed 2022 Specific Plan Amendment] would be allowed to refer to it in the CEQA documentation" (email communication from OMUC, January 31, 2022). As requested, the previous 2021 WSA has been appended to this EIR. No further WSA analysis is required.

3.0 PROJECT DESCRIPTION

3.0 PROJECT DESCRIPTION

3.1 BACKGROUND AND PROJECT OVERVIEW

The Rich-Haven Specific Plan (RHSP) was approved by the City of Ontario in 2015, with subsequent Specific Plan Amendments approved in 2016, 2018, and 2021. The current (2021) Rich-Haven Specific Plan ("2021 Specific Plan") comprises approximately 584 acres located west of Interstate 15 (I-15), and south of State Route 60 (SR-60). The 2021 Specific Plan Area lies within the 8,200-acre Ontario Ranch area, bounded generally by Riverside Drive to the north, "Old" East Edison Avenue [alignment] to the south, Mill Creek Avenue and Hamner Avenue to the east, and Haven Avenue to the west. Location of the 2021 Specific Plan is presented at Figure 3.1-1. The location and boundaries of the 2022 RHSP Specific Plan Amendment evaluated in this EIR coincide with the location and boundaries in the 2021 Specific Plan.

The 2021 Specific Plan entitlements allow for development of up to 7,194 dwelling units (all residential types), up to 990,902 square feet of commercial/office space, up to 1,183,525 square feet of light industrial uses, approximately 27 acres of public parkland, and approximately 20 acres of Southern California Edison (SCE) Parcel open space and SCE Easements. The 2022 RHSP Specific Plan Amendment (2022 Specific Plan Amendment, Project) evaluated in this EIR proposes a new amendment of the RHSP as described herein.

NOT TO SCALE

Source: Google Earth; Applied Planning, Inc.

Figure 3.1-1
Specific Plan Location

Under the proposed 2022 RHSP Specific Plan Amendment, the Specific Plan Area would be developed with up to 7,194 dwelling units, up to 925,002 square feet of commercial space, and up to 2,767,148 square feet of light industrial uses. Other existing RHSP land uses, e.g., public parkland, Southern California Edison (SCE) Parcel open space and SCE Easements would not be substantively affected under the 2022 RHSP Specific Plan Amendment. This EIR evaluates potential environmental impacts of entire buildout of the Specific Plan Area that would result from the 2022 RHSP Specific Plan Amendment.[1]

In summary, the proposed 2022 Specific Plan Amendment would result in the following primary revisions to the 2021 Specific Plan:

1. Total residential development within the Specific Plan Area would be maintained at 7,194 dwelling units. Residential units and residential densities would however be reassigned within the Specific Plan Area.
2. Total commercial development would be reduced by approximately 65,900 square feet, an approximate 6.7 percent reduction in the 2021 Specific Plan commercial entitlements.
3. Total light industrial development would be increased by approximately 1,583,623 square feet, an approximate 134 percent increase from the 2021 Specific Plan Amendment.

Other aspects and attributes of the 2021 Specific Plan would be substantively maintained under the proposed 2022 Specific Plan Amendment. A summary of land uses and development by Planning Area is provided at Table 3.1-1.

[1] Potential environmental impacts of the Rich Haven Specific Plan were initially evaluated in *Rich Haven Specific Plan Environmental Impact Report*, July 3, 2007 (SCH No. 2006051081). Subsequent Rich Haven Specific Plan Amendments: 2015, 2016, 2018, 2021 have been evaluated as Addendums to Certified EIRs. While the City could have continued tiering off previous environmental documents in evaluation of the Project's potential environmental impacts, in order to provide a contemporary and comprehensive analysis of the Project's impacts, a new Project-level EIR has been developed.

The discussions presented in this EIR reflect information in the preliminary 2022 Specific Plan Amendment, and reflect the range and types of uses envisioned under this Project.

3.2 EXISTING CONDITIONS

3.2.1 THE ONTARIO PLAN (TOP) 2050

3.2.1.1 TOP Overview and Project Consistency with TOP 2050

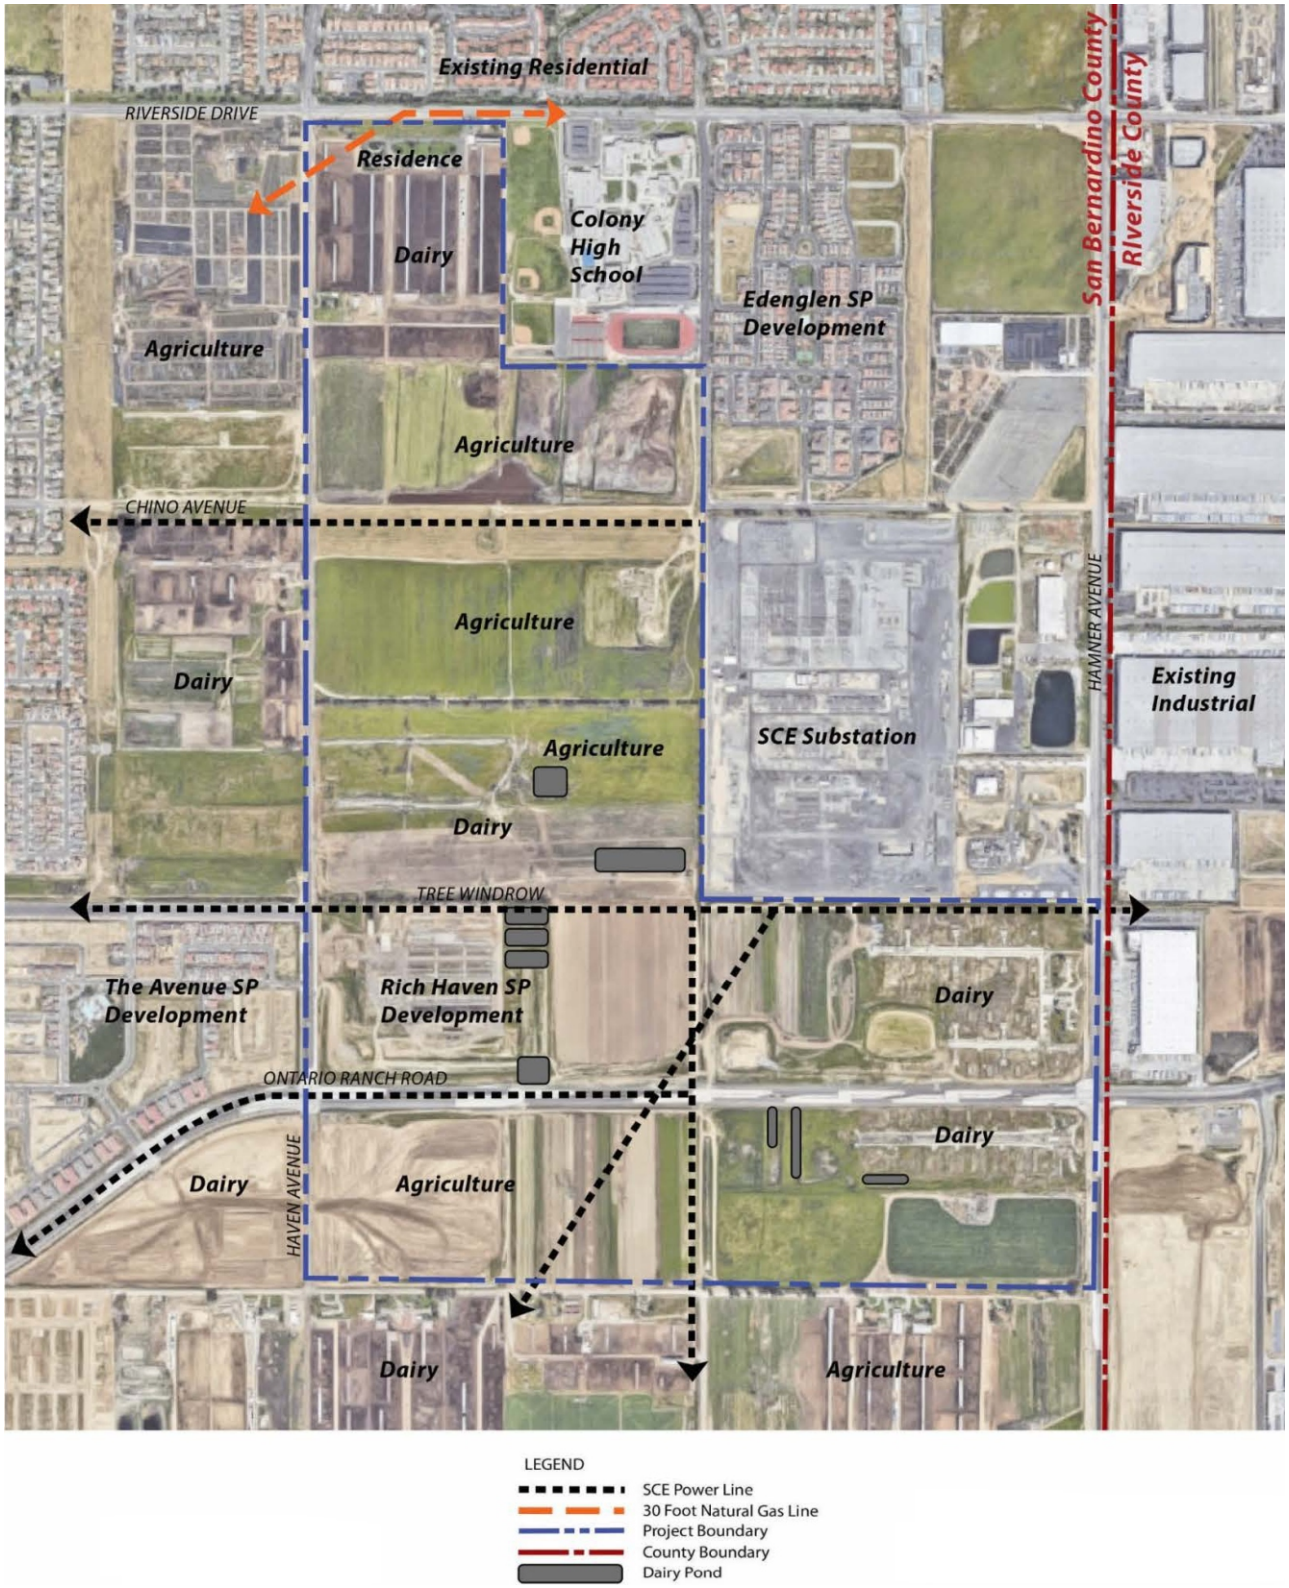
The Project would be required to conform with applicable provisions of The Ontario Plan (TOP). TOP 2050 provides long-range guidance for the City of Ontario addressing development and conservation. TOP consists of a six-part component framework: 1) Vision, 2) Governance Manual, 3) Policy Plan (General Plan), 4) City Council Priorities, 5) Implementation, and 6) Tracking and Feedback. TOP 2050[2] represents the City's vision for the next 30 years.

The Project has been planned and designed to be consistent with TOP 2050. Within this analysis, unless otherwise noted, TOP 2050 and TOP 2050 SEIR are the basis for the Project's potential environmental impacts.

[2] TOP 2050 Draft SEIR, and TOP 2050 Final SEIR can be accessed at: https://www.ontarioplan.org/top2050/.

3.2.2 EXISTING LAND USES

Existing land uses within, and adjacent to, the Project site are illustrated at Figure 3.2-1 and described below. Representative photos of existing Project site conditions are presented at Figures 3.2-2 through 3.2-5.



3.2.2.1 Project Site

Existing land uses within the Specific Plan Area include developed portions of the currently entitled 2021 Specific Plan, and entitled areas that are undeveloped. As of the date of this EIR, approximately 468 residential units of the total 7,194 dwelling units entitled under the 2021 Specific Plan have been constructed and are occupied. Existing residential development within the Specific Plan Area is located generally northeast of the intersection of Haven Avenue and Ontario Ranch Road.

The remainder of the 2021 Specific Plan entitlements have yet to be developed. Existing land uses in these areas include a dairy farm in the northern portion of the Specific Plan Area, the former hog ranch in the west portion of the Specific Plan Area, and various vacant/disturbed properties throughout the remaining portions of the site. Additionally, within the southern portion of the Specific Plan Area, Southern California Edison (SCE) transmission line easements exist along a generally east – west/northeast – southwest alignment within the Specific Plan Area.

3.2.2.2 Vicinity Land Uses

Land uses adjacent to northern portions of the Specific Plan Area include residential development, agricultural uses, and Colony High School. Adjacent to the central Specific Plan Area are an SCE Substation occupying approximately 160 acres to the east, and agricultural/dairy and residential development to the west. The southern portion of the Specific Plan Area is bounded by residential and commercial development to the west across Haven Avenue, and vacant disturbed properties, residences, and dairy farm uses to the south across "Old" Edison Avenue [alignment]. To the east, across Hamner Avenue, are City of Eastvale properties that are developed or are being developed with commercial and light industrial uses.

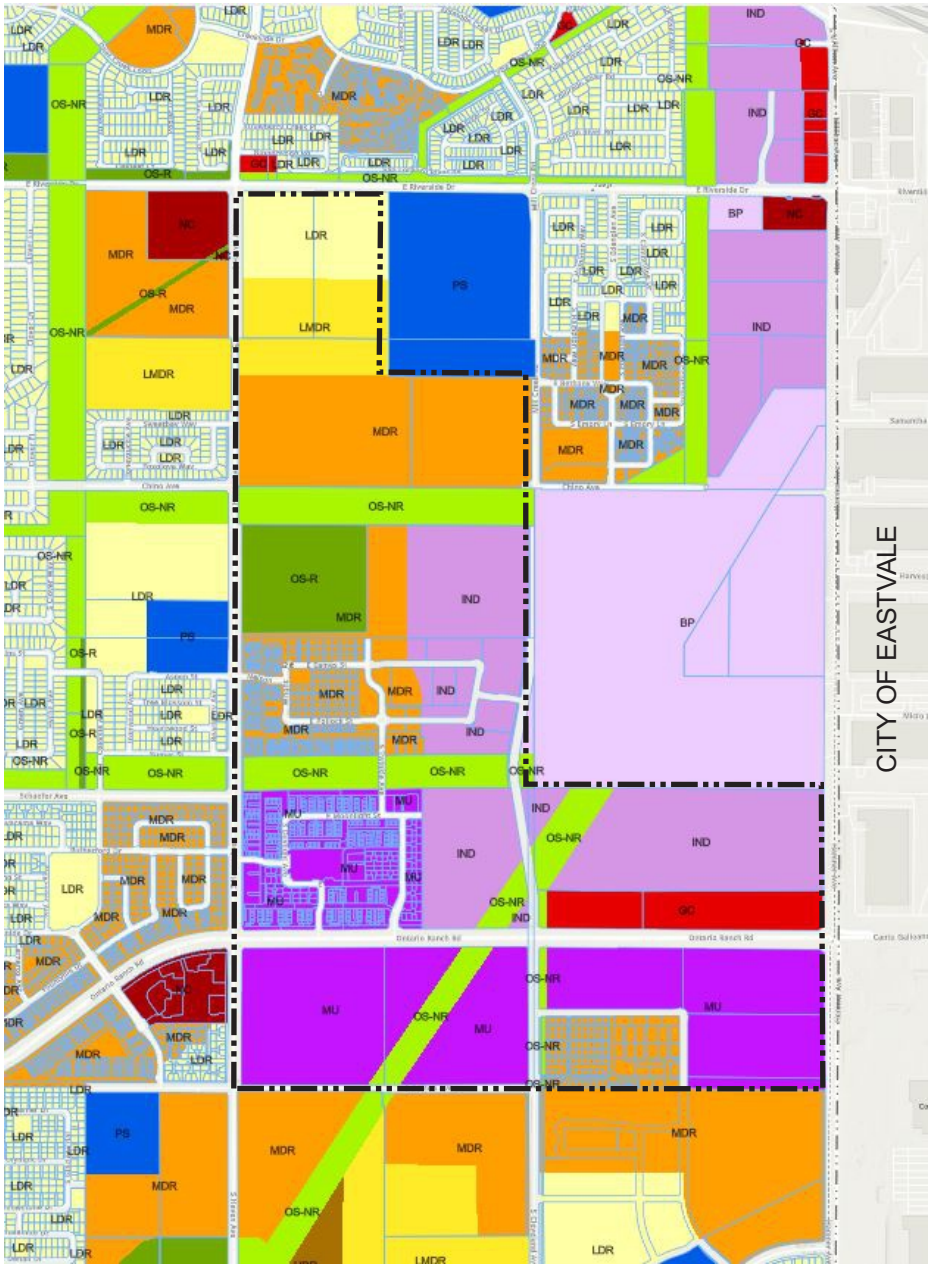
3.2.3 EXISTING and PROPOSED LAND USE DESIGNATIONS



3.2.3.1 Project Site

Policy Plan Land Uses

TOP 2050 Policy Plan Land Use designations for the Project site and surrounding areas are presented at Figure 3.3-1. Policy Plan Land Uses proposed by the Project are consistent with TOP 2050 Policy Plan Land Use designations for the Project site.

Zoning Designations

Existing Zoning of the Project site is established by the 2021 Specific Plan. Zoning of the Project site would be modified by the 2022 Specific Plan Amendment described herein. The 2021 Specific Plan and 2022 Specific Plan Amendment are compared at Figure 3.3-2.

Source: Rich-Haven Specific Plan; Rich-Haven Specific Plan Amendment

Figure 3.3-2
2021 Specific Plan vs. 2022 Specific Plan Amendment

3.2.3.2 Vicinity Properties

Policy Plan Land Use and Zoning designations of surrounding properties are summarized below. The Project would not affect Land Use and Zoning designations of surrounding properties. Unless noted otherwise, existing and proposed land use designations of vicinity properties are consistent under current and known or anticipated future conditions.

North (across Riverside Drive)

- Policy Plan Land Use Designations: Open Space – Non-Recreation (abutting Riverside Drive), General Commercial, Low Density Residential
- Zoning: Specific Plan (*Creekside Specific Plan*), CT (abutting Riverside Drive), Low Density Residential

South (across East Edison Avenue)

- Policy Plan Land Use Designations: Medium Density Residential, Open Space – Non-Recreation, Low Density Residential.
- Zoning: Specific Plan (*Esperanza Specific Plan*), Specific Plan w/Agricultural Overlay

East

- Across Hamner Avenue:
    - City of Eastvale General Plan: Light Industrial, Commercial Retail
    - City of Eastvale Zoning: Industrial Park, Specific Plan (*Goodman Commerce Center Specific Plan*)
- Across Mill Creek Avenue:
    - Policy Plan Land Use Designations: Medium Density Residential, Low Density Residential, Business Park
    - Zoning: Specific Plan (*Edenglen Specific Plan*), Specific Plan w/Agricultural Overlay (Developed as SCE Substation)
- Abutting to Northeast:
    - Policy Plan Land Use Designation: Public School
    - Zoning: Civic

West (across Haven Avenue)

- Policy Plan Land Use Designations: Office Commercial, Low Density Residential, Low Medium Density Residential, Medium Density Residential Public School, Open Space – Non-Recreation
- Zoning: Specific Plan (*West Haven Specific Plan*)

3.3 PROJECT OPERATIONS/OCCUPANCY SUMMARY

For the purposes of this analysis, it is assumed that all Project development will be complete and fully operational by 2025, the Project Opening Year. Operational attributes of the Project land uses are presented below. Please refer also to the 2022 Specific Plan Amendment for details regarding the proposed Land Use Plan, Design Guidelines, and Development Standards.

3.3.1 Light Industrial Land Use

The Project light industrial land uses would accommodate a mix of high-cube fulfillment warehouse uses, refrigerated warehouse uses, and business park uses.

- All uses are assumed to be open and operational 7 days per week, 24 hours per day.
- Unless otherwise noted herein, all operations would occur internal to main buildings.
- On-site operations would include on-site cargo handling. The most common type of cargo handling equipment is the yard truck designed for moving cargo containers. Yard trucks are also known as yard goats, utility tractors (UTRs), hustlers, yard hostlers, and yard tractors. Any yard trucks based at the Project site would be non-diesel (e.g., gasoline and/or electric-powered).

3.3.2 Commercial Land Use

The Project commercial land uses are assumed to accommodate a variety of commercial/retail development.

- All uses are assumed to be open and operational 7 days per week, 24 hours per day.
- Unless otherwise noted herein, all operations would occur internal to main buildings.

3.3.3 Residential Land Uses

- Residential land uses are assumed to be developed at quantities and densities reflected in the 2022 Specific Plan Amendment.

3.3.4 Open Space/Park Land Uses

- All open space/park land uses are assumed to be developed only with site/surface improvements supporting outdoor recreational activities.

3.4 DEVELOPMENT CONCEPT

Development implemented under the Project would be required to conform to provisions of the 2022 Specific Plan Amendment. In instances where the 2022 Specific Plan Amendment is silent, development proposals within the Specific Plan Area would be required to conform to applicable provisions of the City Development Code. The following discussions reflect preliminary 2022 Specific Plan Amendment information available to date.

3.4.1 DEVELOPMENT PHASES

The Project land uses would be constructed contingent on the availability of supporting infrastructure (e.g., water, sewer, storm drains, roadways/access) and as market conditions warrant. Generally, the anticipated sequence of development is as follows:

Phase 1: Light industrial/commercial uses; and
Phase 2: Residential products and community amenities, including parks/open space uses.

3.4.2 SITE DESIGN/ARCHITECTURAL CONCEPTS

All Project development proposals would be required to conform to requirements and implement guidance articulated at 2022 Specific Plan Amendment Section 5, *Development Regulations*; and Section 6, *Design Guidelines*. All final Project site plans and building designs would be subject to City review and approval, to include consistency analysis with applicable provisions of the 2022 Specific Plan Amendment.

3.4.3 ACCESS AND CIRCULATION

Access to and within the Specific Plan Area is summarized below. Please also refer to 2022 Specific Plan Amendment Section 4.1, *Circulation Plan*.

3.4.3.1 Roadways

Regional access to the City and the Specific Plan Area is provided by State Route 60 (E – W) and Interstate 15 (N – S). State Route 60 (SR-60) interchanges with Interstate 15 (I-15) approximately 1.5 miles northeast of the Specific Plan Area. Local access to the Specific Plan Area is provided by existing vicinity roadways. These roadways include Riverside Drive to the north, Haven Avenue to the west, Mill Creek Avenue (partial) to the east, Hamner Avenue to the east, and Ontario Ranch Road which traverses the southern portion of the Specific Plan Area.

Ultimate designs of roadway alignments, roadway configurations, and site access would be required to conform to applicable provisions of the 2022 Specific Plan Amendment and City Conditions of Approval; and would be subject to City review and approval.

Roadways within and abutting the Project site would be constructed to their respective ultimate cross-sections pursuant to the 2022 Specific Plan Amendment design standards and City requirements.[3]

[3] The Specific Plan Amendment proposes modified design standards for Chino Avenue within the Project site, to include enhanced roadway sections with raised landscapes and roundabouts. These modified design standards would be subject to City review and approval as one component of the Specific Plan Amendment.

3.4.3.2 Bicycle and Pedestrian Access

The Project would construct bicycle and pedestrian access improvements consistent with the City Multipurpose Trails and Bikeway Corridor Plan.

Within the Project site, streets would be constructed with sidewalks, providing pedestrian access and inter-connectivity between various residential and mixed-use areas. Trail access would be provided to the various park facilities. As part of the City's Master Plan of Trails, the SCE Corridor Trail within the Project site would be extended within the linear park areas located within the existing SCE easements. Access to the SCE Corridor Trail would be provided at key points throughout the Project. On-street curb adjacent 5-foot bike lanes would be provided on both sides of the proposed modified/enhanced Chino Avenue section.

3.4.3.3 Bus Service

Bus service is available to the City via Omnitrans and the Riverside Transit Authority (RTA). No bus routes currently provide proximate service (within one-quarter mile) of the 2021 Specific Plan Area. Transit service providers periodically review and update schedules and routes to address ridership, budget, and community demands. The Applicant and City would coordinate Project final designs with Omnitrans and RTA to evaluate the potential for provision of bus services and bus amenities serving the 2021 Specific Plan Area. Omnitrans bus routes and schedules can be accessed at: https://omnitrans.org. RTA bus routes and schedules can be accessed at: https://www.riversidetransit.com/index.php/riding-the-bus/maps-schedules.

3.4.4 PARKING

The Project would be required to adhere to parking requirements established under the 2022 Specific Plan Amendment and the City of Ontario Development Code. Parking assignments and design of parking areas within the site would be subject to City review and approval.

3.4.5 LANDSCAPE/STREETSCAPE

The 2022 Specific Plan Amendment Landscape Concept is presented in detail at 2022 Specific Plan Amendment Section 7, *Landscape Plan*. All landscaping/streetscaping

implemented under the Project would be required to comply with applicable provisions of the 2022 Specific Plan Amendment and the City Municipal Code. The implemented landscape/streetscape concept would act to enhance perception of the site as developed under the Project, and to screen views of the site interior from off-site vantages. Landscape and streetscape elements would provide shade and visual interest, define entry/access points, and accentuate site and architectural features.

3.4.6 INFRASTRUCTURE/UTILITIES

3.4.6.1 Water Service

Potable (Domestic) Water

Potable water would be provided by the Ontario Municipal Utilities Company (OMUC).[4] The Project lies within the OMUC 925 and 1010 Pressure Zones. Serving the Project site and surrounding areas is an 18-inch (1010 Pressure Zone) water main, extending from Riverside Avenue to Chino Avenue. There is also a 16-inch (1010 PZ) water main located in Mill Creek Avenue, extending from Riverside Avenue to Chino Avenue.

Within the Project site, water service would be provided by a system of 8-inch to 12-inch water mains constructed within the backbone roadway system. Connecting 8-inch service lines would be provided to individual developments.

The on-site public water system sizing would be required to comply with provisions of a City-approved hydraulic analysis to be conducted at the project-level design stage. All water mains and wells internal to site would be constructed by the merchant builder(s). In-tract water system design will be provided at the time of subdivision. Final designs of water conveyance systems serving the Project would be required to conform to City and OMUC requirements. Please refer also to 2022 Specific Plan Amendment Section 4.2.1, *Domestic Water*.

[4] Additionally, as discussed in the Specific Plan Amendment, "the Chino Basin Water Master Water Quality Map identifies the Rich-Haven [Project] area within an optimum water quality zone and requires that the owner/developer dedicate a total of two wells within the Specific Plan area to the City of Ontario for production of potable water." Well dedications within the Project site would be provided if/as required by the City/OMUC.

Recycled Water

The Project site is located in the OMUC 930/1050 Pressure Zones for recycled water. Serving the Project site and surrounding areas is a 16-inch (930 PZ) recycled water main extending from the upper limits of the 930 PZ to Ontario Ranch Road.

The Project would construct all necessary recycled water system improvements consistent with City Condition of Approval. All Master Plan recycled water improvements implemented to serve the Project would be required to conform to the incumbent City Recycled Water Master Plan. Please refer also to 2022 Specific Plan Amendment Section 4.2.2, *Recycled Water*, *Regional Recycled Water Plan*.

The Project would be required to comply with applicable provisions of City Municipal Code Chapter 8c: *Recycled Water Use.*[5] Within the Project area, recycled water would be used for all approved applications, including but not limited to irrigation of parks, schools, street landscaping, recreational trails, HOA-maintained common areas and landscaping. An engineering report approved by the City and the California Department of Public Health is required prior to the use of recycled water.

Within the Project area, the backbone recycled water system would comprise 8-inch to 12-inch lines and would be located in the backbone street system. In-tract recycled water system design would be provided at the time of subdivision. It is noted here that ***no*** [emphasis added] recycled water can be used on single-family single lot ownership properties. Per the 2022 Specific Plan Amendment, a clear physical separation between potable and recycled water systems is required, such separations may comprise walls, fences, sidewalks, or mow strips. Please refer also to 2022 Specific Plan Amendment Section 4.2.2, *Recycled Water*, *Local Backbone Recycled Water Plan*.

3.4.6.2 Sewer Services

Sewer service would be provided by the City of Ontario. Master Plan sewer system improvements serving the Project and surrounding areas would be constructed

[5] See also: https://codelibrary.amlegal.com/codes/ontarioca/latest/ontario_ca/0-0-0-44580#JD_6-8.714

consistent with the City's Sewer Master Plan. All Master Plan sewer improvements implemented to serve the Project would be required to conform to the incumbent City Sewer System Master Plan. Please refer also to 2022 Specific Plan Amendment Section 4.3, *Sewer Master Plan*.

3.4.6.3 Stormwater Management System

Storm Drains

Multiple City Master Plan of Drainage storm drain facilities would serve the Project site. All Master Plan storm water management system improvements implemented to serve the Project would be required to conform to the incumbent City Master Plan of Drainage. Under post-development conditions, existing southerly trending on-site drainage patterns would be maintained.

Within the Project site, individual developments would implement required stormwater management systems. On-site storm stormwater management system designs would be provided concurrent with development plan submittals. Final designs of stormwater management systems serving the Project would be required to conform to City requirements. Please refer also to 2022 Specific Plan Amendment Section 4.4, *Drainage Master Plan, Regional Backbone Drainage Plan*.

Water Quality Management Plan

On a regional level, stormwater quality management would be available via the regional Mill Creek Wetlands system. Within the Project site, complementary on-site stormwater management systems would be implemented that would detain and treat stormwater discharges. Stormwater discharges from the Project would be required to comply with requirements and performance standards established under the incumbent San Bernardino County National Pollutant Discharge Elimination System (NPDES) Stormwater Program MS4 Permit and Water Quality Management Plan (WQMP). To these ends, developments within the Project site would implement Low Impact Development (LID) Site Design Best Management Practices (BMPs) to reduce pollutant transport and increase on-site stormwater infiltration. Additionally, all Priority Land Use

(PLU) areas within the Project site would be required to comply with the statewide Trash Provisions adopted by the State Water Resources Control Board (SWRCB) and trash requirements in the most current San Bernardino County Area-Wide MS4 Permit.

Non-structural and structural Source Control BMPs would be documented in the Project WQMPs. Final WQMPs, as approved by the City, would ensure that the Project stormwater management systems have been designed to convey and treat stormwater discharges and limit the post-development peak flows consistent with available storm drain capacities. Please refer also to 2022 Specific Plan Amendment Section 4.4, *Drainage Master Plan*, *Stormwater Quality Measures*.

3.4.6.4 Solid Waste Management

The City of Ontario provides solid waste collection services for the City and will service the Project.

3.4.6.5 Electricity

Southern California Edison (SCE) would provide electricity to the site from existing vicinity facilities. SCE facilities located within and adjacent to the Project site consist of 115kV, 66kV, 12kV, towers/power lines and attached communication lines. Facilities less than 34.5kV will be located underground if they are located adjacent to any streets proposed to be improved in conjunction with site improvements.

3.4.6.6 Natural Gas

The Gas Company will provide natural gas to the site. All proposed connections and modifications to Gas Company facilities would conform to Gas Company and City requirements.

3.4.6.7 Fiber Optics System

A backbone fiber optics system (conduits, tracer wire, and fiber) would be constructed within the Project backbone street system. Backbone fiber optic components (conduits, hand holes, tracer wire, and fiber) would be placed underground within a duct and structure system to be installed in a joint trench. In-tract fiber and conduit would be

installed per the City's in-tract fiber optic design guidelines (see: https://www.ontarioca.gov/sites/default/files/Ontario-Files/Information-Technology/2014-12-16_in-tract_designguidelines.pdf).

3.4.6.8 Communications Services

Communications services, including wired and wireless telephone and internet services, are available through numerous private providers and would be provided on an as-needed basis. To the extent practical and consistent with City Conditions of Approval, existing and proposed wires, conductors, conduits, raceways, and similar communications improvements within the Project area would be installed underground. Any necessary surface-mounted equipment, e.g., terminal boxes, transformers, meters, service cabinets, etc., would be screened and would conform to City building setback requirements.

3.4.7 ENERGY EFFICIENCY/SUSTAINABILITY

Energy-saving and sustainable design features and operational programs would be incorporated in all facilities developed pursuant to the Project. The Project would be required to comply with incumbent energy efficiency and performance standards established under the incumbent CALGreen Code and City of Ontario Climate Action Plan (CAP).

3.4.8 CONSTRUCTION AREA TRAFFIC MANAGEMENT PLAN

Temporary and short-term traffic detours and traffic disruptions could result during construction activities including implementation of access and circulation improvements noted above. Accordingly, the Applicant would be responsible for the preparation and submittal of a Construction Area Traffic Management Plan (Plan). Typical elements and information incorporated in the Plan would include, but not be limited to:

- **Name of on-site construction superintendent and contact phone number.**

- **Identification of Construction Contract Responsibilities** - For example, for excavation and grading activities, describe the approximate depth of excavation, and quantity of soil import/export (if any).

- **Identification and Description of Truck Routes** - to include the number of trucks and their staging location(s) (if any).

- **Identification and Description of Material Storage Locations (if any).**

- **Location and Description of Construction Trailer (if any).**

- **Identification and Description of Traffic Controls** - Traffic controls shall be provided per the Manual of Uniform Traffic Control Devices (MUTCD) if the occupation or closure of any traffic lanes, parking lanes, parkways or any other public right-of-way is required. If the right-of-way occupation requires configurations or controls not identified in the MUTCD, a separate traffic control plan must be submitted to the City for review and approval. All right-of-way encroachments would require permitting through the City.

- **Identification and Description of Parking** - Estimate the number of workers and identify parking areas for their vehicles.

- **Identification and Description of Maintenance Measures** - Identify and describe measures taken to ensure that the work site and public right-of-way would be maintained (including dust control).

The Plan would be reviewed and approved by the City prior to the issuance of the first building permit and encroachment permit, as applicable. The Plan and its requirements would also be required to be provided to all contractors as one component of building plan/contract document packages.

3.4.9 OPENING YEAR

For the purposes of this analysis, the Project Opening Year is defined as 2025, by which time all proposed uses are assumed to be complete, occupied, and operational.

3.5 PROJECT OBJECTIVES

The broad vision of the 2022 Specific Plan Amendment is to create a community with a mixture of uses, connected through a series of trails, which provides opportunities for people to live, work and play. Supporting 2022 Specific Plan Amendment objectives are listed below.

General

- Implement TOP 2050 Policy Plan Land Use Plan.
- Support TOP 2050 vision for urbanization of the Ontario Ranch area of the City.
- Implement a Specific Plan development supporting office/commercial and light industrial uses providing a broad range of long-term employment opportunities.
- Implement Specific Plan developments providing a broad range of additional construction employment opportunities.
- Establish new development that would further the City's near-term and long-range fiscal goals.
- Improve the regional jobs/housing balance.

Specific Plan Uses

Livable Neighborhood Development

- Incorporate Traditional Neighborhood Design guiding principles during the design phase to provide for opportunities to achieve the Project's vision statement, including:
    - Connections. To provide a series of sidewalks and trails connecting community parks, civic uses, employment areas, mixed-use and transit stops designed to be pedestrian friendly to avoid unnecessary automobile trips.
    - Traditional Street Network. To design a hierarchy of streets connected in a grid network with a variety of routes for pedestrians and vehicles, as well as

creating a visually favorable and comfortable environment for pedestrians and bicyclists.

  - Main Street Environment. To design commercial/retail areas to a human scale with storefronts oriented to the street providing a "Main Street" atmosphere for strolling and shopping, all within walking distance from most homes.
  - Public Spaces. To create plazas, parks, and community gathering places placed within centralized areas providing synergy between adjacent land uses.
  - Identifiable Neighborhoods. To design neighborhoods around a discernable center, which may include a small park, square, school, or mixed-use center, within a five-minute walking distance.
  - Mix of Housing. To provide neighborhoods with a range of household types: a variety of single-family detached homes, attached units for young families, and live/work units for small at-home businesses.

- Design a mixed-use environment to ensure compatible uses that are cohesive and integrate a diversity of residential neighborhoods, with a range of commercial uses, and supporting open spaces.
- Utilize transportation, utility, and greenways/open space networks to establish clear edges and boundaries.
- Accommodate residential, commercial, open space, public, and other uses in accordance with the generalized distribution of uses depicted within the City's TOP Land Use Plan.
- Implement elements that will ensure walkability throughout the Project Area to discourage automobile dependency and encourage walking, biking, and other forms of transportation. This is achieved through the incorporation of subarea greenways and pedestrian connections and through sensitive site design of mixed-use development.
- Implement technological advances within residential communities, including internet access, to allow residents to shop and work from home and to decrease reliance on automobiles.
- Provide opportunity for at least one major public plaza/square as a centerpiece of community activities, including events and celebrations, outdoor performances, community meetings, picnics, farmers markets, and similar functions.

- Establish a clearly defined "edge" for the City's TOP area, where appropriate, that avoids the use of walls and creation of a "walled" enclave.
- Incorporate electrical transmission corridors and similar elements to form "edges" for residential neighborhoods and centers and/or accommodate public greenways/trails/corridors.

Residential District Objectives

- Create a livable community with neighborhoods designed at a human scale and oriented for pedestrian access to mixed-use, educational, and recreational uses.
- Provide for a range and diversity of housing products (detached single-family, detached and attached condominiums, and townhomes) that respond to a variety of homeownership needs and desires.
- Design residential projects to complement the character of adjacent neighborhoods.
- Encourage interaction among residents through the provision of an organized, simple, and "neo-traditional" system of streets, pathways, and entries to allow residents to walk or bike to parks, recreation, and public facilities (including schools).
- Promote outdoor activity and casual social contact among residents and neighbors by designing neighborhoods around a central park where they can gather.
- Provide a focal point of activity within each residential planning area that may include a park, school, common area, or public meeting facility.
- Encourage architectural styles and traditional design elements that reflect the historic and eclectic mixture of architecture, reflective of the greater Ontario area.
- Increase densities adjacent to commercial centers.
- Establish clear, defined "edges" and "entries" that contribute to neighborhood identity.
- Avoid the use of walls to separate residential areas from arterials and other high traffic volume streets by expanded landscape setbacks, frontage roads, and other appropriate techniques.

- Include clustered multi-family housing within the Residential District, in order to create a diverse range of housing products and opportunities, while still in keeping with the overall low-density residential designation.
- Locate higher-density residential uses that provide population to support adjacent regional commercial centers.
- Provide sufficient on-site recreational amenities within higher density developments.
- Include community-oriented uses such as public meeting rooms, plazas and courtyards, and similar uses.
- Establish visual and physical links among the individual multi-family developments to create a cohesive and continuous corridor.
- Design building elevations to promote visual interest.
- Provide linkages between community service facilities, multi-family corridors, and residential neighborhoods.

Regional Commercial/Mixed-Use District Objectives

- Accommodate a diversity of large-scale retail, community and neighborhood shopping, office, medical research, entertainment, hotel/motel, dining, housing, cultural, public, and similar uses that will serve the Project area and neighboring Planning Areas.
- Function with a high level of activity and/or employment.
- Accommodate development of multi-family housing, mixed-use buildings that incorporate housing and retail/office, and live/work facilities.
- Accommodate single-use buildings and mixed-use structures containing a variety of uses from residential over retail or office-to-office over retail.
- Encourage traditional, mixed-use design of commercial buildings, by requiring a lower maximum floor area ration (FAR) for single-use buildings, and a higher maximum FAR for mixed-use buildings.
- Develop plaza areas and other amenities to provide places of social interaction.
- Include one or more public "squares" to serve as gathering places.
- Incorporate modulated building volumes, mass, height, and articulated facades to create individual spaces.

- Site a portion of the buildings on peripheral streets to provide connectivity to adjacent uses.
- Orient buildings towards the local streets whenever possible to create an urban edge and sense of arrival and place.
- Include sidewalks of sufficient width to accommodate pedestrian activity and outdoor restaurants, newsstands, and other uses.
- Create visual interest through the opening of streets and sidewalks/plazas towards building elevations.
- Incorporate landscaping to enhance the environment.
- Visually integrate parking structures to continue the intended design character of the district.
- Incorporate multi-family housing to create a cohesive and continuous corridor.
- Ensure an appropriate mix of uses (residential and commercial) that are compatible.
- Encourage pedestrian access and ease of use within the mixed-use area by designing pedestrian and bike paths.
- Create a "Main Street" environment with buildings designed to a human scale where pedestrian activity is not overwhelmed by automobile traffic.
- Utilize urban design to create a "Gateway" or portal to the Ontario Ranch.

Industrial District Objectives

- Incorporate transitions and/or buffers between commercial/mixed-use and industrial areas and adjacent residential areas.
- Contribute to the regional jobs to housing balance by providing employment opportunities while minimizing development impacts on surrounding neighborhoods.
- Create a high-quality industrial park development that attracts an array of businesses and provides employment opportunities within proximity to area residents.
- Provide safe and efficient access/circulation routes for the distribution/transportation of goods.

Circulation Objectives

- Provide a circulation system designed to promote pedestrian activity through a network of off-street pedestrian walkways linking each neighborhood to parks, mixed-use commercial, and residential uses.
- Design a hierarchy of streets connected in a grid network with a variety of routes for pedestrians and vehicles, creating a visually attractive, enhanced, and comfortable environment for pedestrians and bicyclists.
- Design streets to incorporate landscaped parkways and pedestrian walkways separated from the street to enhance safety and enjoyment of residents and visitors.
- Provide opportunities for transit connections and alternative modes of transportation.

Recreation/Trails Objectives

- Provide new recreational opportunities for residents through the development of a series of public and private parks.
- Provide a series of pedestrian trails connecting community parks, civic uses, mixed-use, and transit stops designed to be pedestrian friendly to avoid unnecessary automobile trips.
- Incorporate off-street multi-use trails within the Southern California Edison easements.
- Incorporate a system of on- and off-street bicycle pathways with access from the residences to mixed-use areas.
- Use landscaping and streetscape materials that are low maintenance in recreation and trail areas.
- Provide a system of on-street bikeways integrated throughout the Project to provide access to schools, parks, and commercial uses.
- Provide new recreational opportunities for residents through the development of a series of parks ranging in size.

Community Facilities Objectives

- Incorporate existing major utilities into the overall fabric of the community.
- Provide opportunities for incorporation of community facilities (e.g., schools, fire station) as identified by affected agencies.

3.6 DISCRETIONARY APPROVALS AND PERMITS

Discretionary actions, permits, and related consultation(s) necessary to approve and implement the Project include, but are not limited to, the following.

3.6.1 LEAD AGENCY DISCRETIONARY ACTIONS AND PERMITS

- EIR Certification;
- Approval of the 2022 Specific Plan Amendment;
- Approval of Tentative Parcel/Tract Maps;
- Approval of Development Agreements; and
- Approval of Development Plans.

3.6.2 OTHER CONSULTATION AND PERMITS

Anticipated consultation and permits necessary to realize the Project would or may include the following:

- Permitting by/through the Regional Water Quality Control Board (RWQCB) pursuant to requirements of the City's National Pollutant Discharge Elimination System (NPDES) Permit.
- Permitting by/through the South Coast Air Quality Management District (SCAQMD) for certain equipment or land uses that may be implemented pursuant to the Project.
- Permitting (i.e., utility construction and connection permits) from affected utility purveyors, notably the City of Ontario, IEUA, and SCE.

Other ministerial permits necessary to realize all on- and off-site improvements related to the development of the Project.

4.0 ENVIRONMENTAL IMPACT ANALYSIS

4.0 ENVIRONMENTAL IMPACT ANALYSIS

This chapter of the EIR analyzes and describes the potential environmental impacts associated with the adoption and implementation of the Rich-Haven Specific Plan, 2022 Amendment (Project). The environmental impact analysis has been organized into a series of sections, each addressing a separate environmental topic. Environmental topics addressed in this EIR are presented in the following sections:

Section	Topic
4.1	Land Use and Planning
4.2	Transportation
4.3	Air Quality
4.4	Greenhouse Gas Emissions
4.5	Energy
4.6	Noise
4.7	Hazards and Hazardous Materials
4.8	Hydrology and Water Quality
4.9	Geology and Soils
4.10	Biological Resources
4.11	Cultural Resources/Tribal Cultural Resources
4.12	Utilities & Service Systems

Within each of the above topical Sections, the discussion is typically divided into subsections which: summarize the findings of the section; present the framework for the discussion by listing the sources of information used in the section; describe the "setting" or existing environmental conditions; identify regulations and policies, which through their observance typically resolve many potential environmental concerns; identify thresholds of significance applicable to potential environmental effects of the

Project; describe the significance of Project-related environmental effects in the context of applicable significance thresholds; and for impacts which are potentially significant or significant, recommend mitigation measures to eliminate or reduce these impacts. In this latter regard, it is recognized that the intent of the California Environmental Quality Act (CEQA) is to focus on significant, or potentially significant adverse effects of the Project, and therefore, mitigation is proposed only for potential impacts of this magnitude.

As noted above, before potential impacts are evaluated, the standards or thresholds which will serve as the basis for judging the relative significance of impacts are presented. Often thresholds serve as a general guide or gauge for determining an impact's potential relative significance, rather than defining its absolute effects. Subsequent to identification of relevant significance thresholds, potential Project-related effects and impacts are identified and explained. If an impact is considered to be potentially significant, mitigation measures are proposed to avoid the impact, or reduce its effects to the extent feasible. In determining the potential significance of impacts, the adequacy of existing policies and regulations in addressing each impact is taken into consideration. At the conclusion of each discussion for a potentially significant impact, a determination is made as to whether the impact can be reduced to a less-than-significant level with the application of mitigation measures.

In the environmental analysis, the following terms are used to describe the potential effects of the Project:

- **Less-Than-Significant Impacts**: Minor changes or effects on the environment caused by the Project which do not meet or exceed the criteria, standards, or thresholds established to gauge significance are considered to be less-than-significant impacts. Less-than-significant impacts do not require mitigation. In some cases, these impacts may appear to be potentially significant. However, existing public policies, regulations, and procedures adequately address these potential effects, thereby reducing them to a less-than-significant level, without the need for additional mitigation.

- **Potentially Significant Impacts**: Potentially significant impacts are defined as a substantial, or potentially substantial, adverse change in the environment. The CEQA Guidelines and various responsible agencies provide guidance for determining the significance of impacts. However, the determination of impact significance is ultimately based on the judgment of the lead agency. Similarly, the establishment of any criteria to be used in evaluating the significance of impacts is the responsibility of the lead agency. Wherever possible, mitigation is proposed in the EIR to avoid or reduce the magnitude of potentially significant impacts.

- **Significant Impacts**: Impacts identified in the EIR which cannot be mitigated below thresholds of significance through the application of feasible mitigation measures are categorized as "significant."

- **Cumulative Impacts**: A discussion of cumulative impacts is provided in Section 5.0 of this environmental analysis. Cumulative impacts refer to the impacts of the Project as they are combined or interact with anticipated impacts of other vicinity projects and physical effects of projected ambient regional growth.

4.1 LAND USE AND PLANNING

4.1 LAND USE AND PLANNING

Abstract

This Section assesses potential impacts that may result from land use and planning decisions necessary to implement the Project. Potential land use impacts that may occur due to the type of development proposed, its location or scale are discussed. Specifically, the discussion in this Section seeks to determine whether the Project would:

- *Cause a significant environmental impact due to a conflict with any land use plan, policy, or regulation adopted for the purpose of avoiding or mitigating an environmental effect.*

As supported by the analysis presented in this Section, potential land use and planning impacts of the Project would be less-than-significant.

4.1.1 INTRODUCTION

This Section focuses on the Project's consistency with applicable land use plans, policies and regulations; and also evaluates the Project's compatibility with existing and proposed development in the vicinity. Discussions and analysis within this Section are based on and supported by the following documents and source information:

- TOP 2050 Policy Plan (General Plan) – Land Use Element, and TOP 2050 Supplemental Environmental Impact Report (TOP 2050 SEIR). These documents are available through the City of Ontario, or are accessible at: http://www.ontarioplan.org/;

- *2020–2045 Regional Transportation Plan/Sustainable Communities Strategy* (Connect SoCal 2020) available through the Southern California Association of Governments (SCAG) or can be accessed at: https://scag.ca.gov/read-plan-adopted-final-connect-socal-2020;

- The City of Ontario Development Code, available through the City of Ontario, or accessible at: https://www.ontarioca.gov/planning/applications; and

- The proposed Rich-Haven Specific Plan, 2022 Amendment document included at EIR Appendix B.

4.1.2 SETTING

4.1.2.1 Project Overview

The Rich-Haven Specific Plan (RHSP) was approved by the City of Ontario in 2015, with subsequent Specific Plan Amendments approved in 2016, 2018, and 2021. The current (2021) Rich-Haven Specific Plan ("2021 Specific Plan") comprises approximately 584 acres located west of Interstate 15 (I-15), and south of State Route 60 (SR-60). The 2021 Specific Plan Area lies within the 8,200-acre Ontario Ranch area, bounded generally by Riverside Drive to the north, "Old" East Edison Avenue [alignment] to the south, Mill Creek Avenue and Hamner Avenue to the east, and Haven Avenue to the west. Please refer to EIR Section 3.0, *Project Description*, Figure 3.1-1, *Project Location*. The location and boundaries of the 2022 RHSP Specific Plan Amendment evaluated in this EIR coincide with the location and boundaries in the 2021 Specific Plan.

The 2021 Specific Plan entitlements allow for development of up to 7,194 dwelling units (all residential types), up to 990,902 square feet of commercial/office space, up to 1,183,525 square feet of light industrial uses, approximately 27 acres of public parkland, and approximately 20 acres of Southern California Edison (SCE) Parcel open space and SCE Easements. The 2022 RHSP Specific Plan Amendment (2022 Specific Plan Amendment, Project) evaluated in this EIR proposes a new amendment of the RHSP.

Under the proposed 2022 RHSP Specific Plan Amendment, the Specific Plan Area would be developed with up to 7,194 dwelling units, up to 925,002 square feet of commercial space, and up to 2,767,148 square feet of light industrial uses. Other existing RHSP land uses, e.g., public parkland, Southern California Edison (SCE) Parcel open space and SCE Easements would not be substantively affected under the 2022 RHSP Specific Plan Amendment. This EIR evaluates potential environmental impacts of entire buildout of the Specific Plan Area that would result from the 2022 RHSP Specific Plan Amendment.

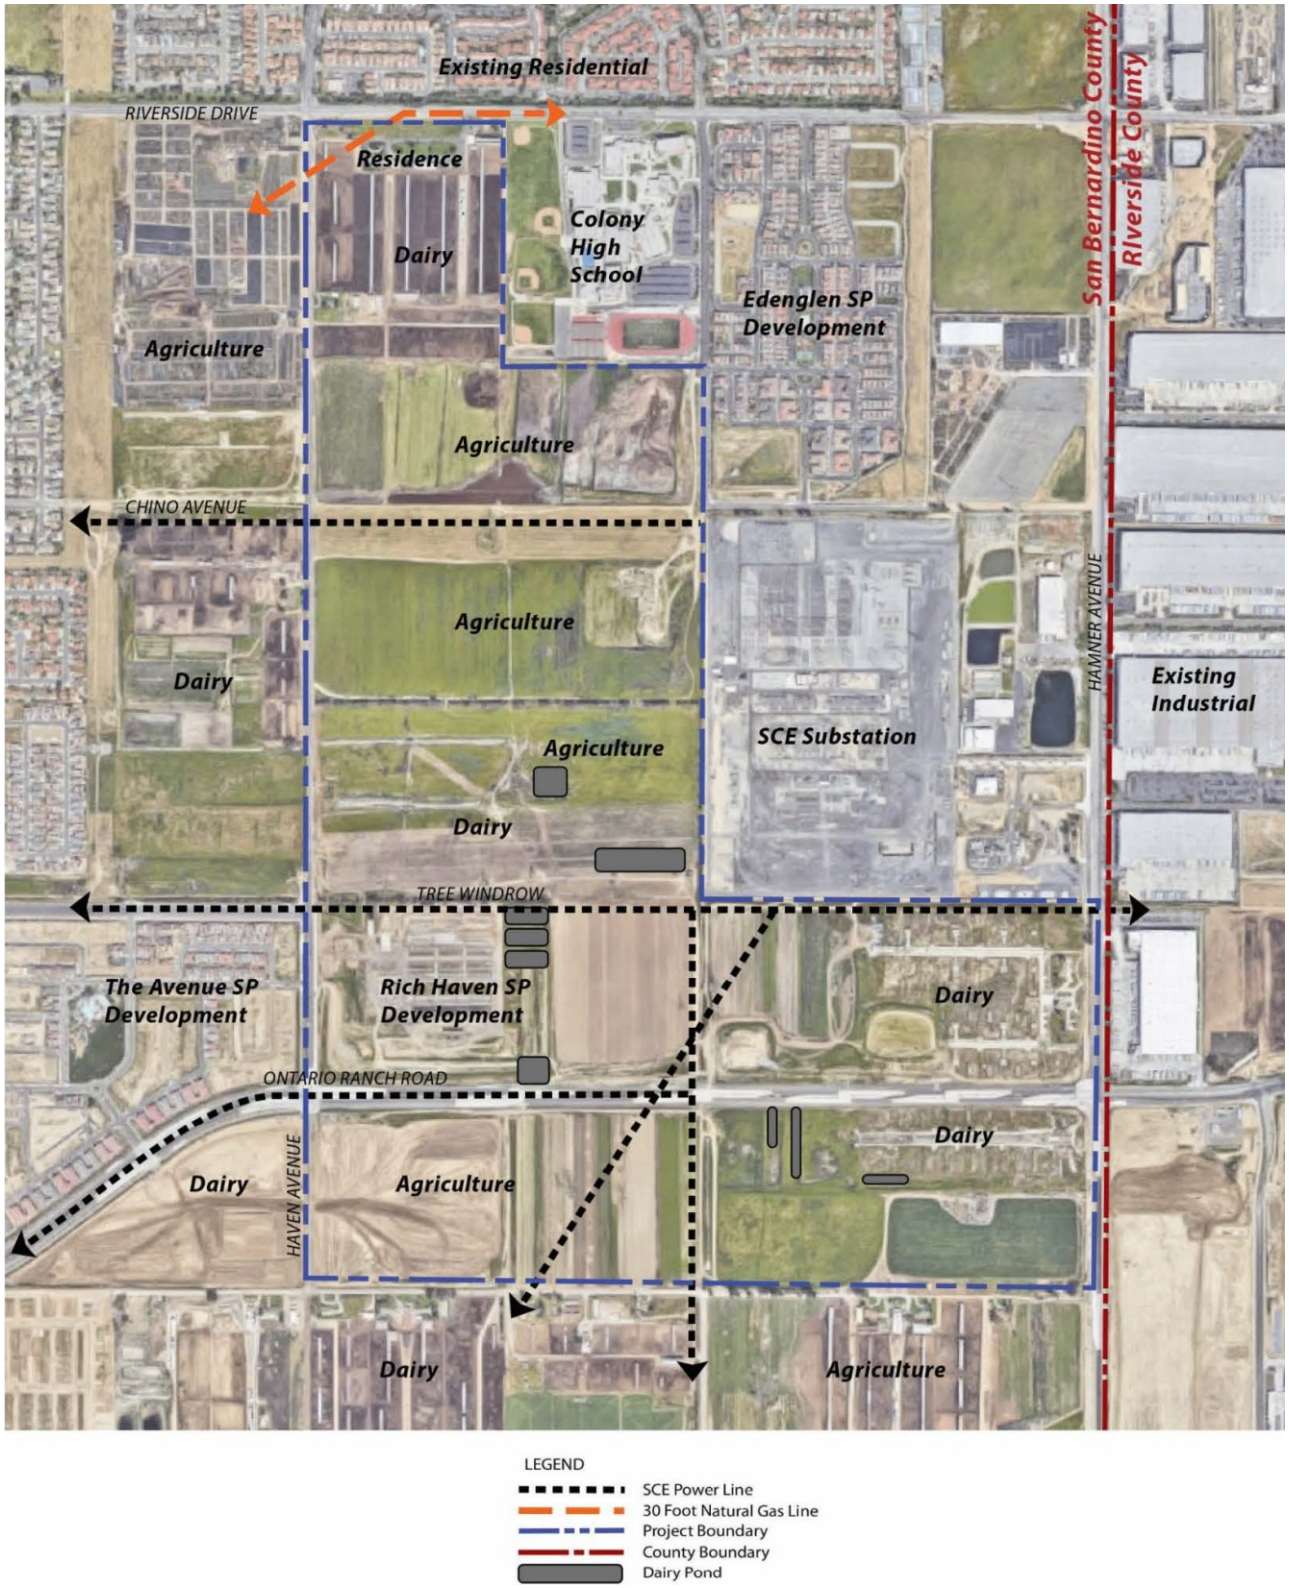
In summary, the proposed 2022 Specific Plan Amendment would result in the following primary revisions to the 2021 Specific Plan:

1. Total residential development within the Specific Plan Area would be maintained at 7,194 dwelling units. Residential units and residential densities would however be reassigned within the Specific Plan Area.
2. Total commercial development would be reduced by approximately 65,900 square feet, an approximate 6.7 percent reduction in the 2021 Specific Plan commercial entitlements.
3. Total light industrial development would be increased by approximately 1,583,623 square feet, an approximate 134 percent increase from the 2021 Specific Plan Amendment.

Other aspects and attributes of the 2021 Specific Plan would be substantively maintained under the proposed 2022 Specific Plan Amendment.

4.1.2.2 Existing Land Uses

Existing land uses are indicated at Figure 4.1-1, and are discussed below. Please refer also to EIR Section 3.0, *Project Description*, 3.2 *Existing Conditions*.



Project Site

Existing land uses within the Specific Plan Area include developed portions of the currently entitled 2021 Specific Plan, and entitled areas that are undeveloped. To date, approximately 468 residential units of the total 7,194 dwelling units entitled under the 2021 Specific Plan have been constructed and are occupied. Existing residential development within the Specific Plan Area is located generally northeast of the intersection of Haven Avenue and Ontario Ranch Road.

The remainder of the 2021 Specific Plan entitlements have yet to be developed. Existing land uses in these areas include a dairy farm in the northern portion of the Specific Plan area, and vacant/disturbed properties throughout the remaining portions of the site. Additionally, within the southern portion of the Specific Plan Area, Southern California Edison (SCE) transmission line easements exist along a generally east – west/northeast – southwest alignments within the Specific Plan Area.

Vicinity Land Uses

Land uses adjacent to northern portions of the Specific Plan Area include residential development, agricultural uses, and Colony High School. Adjacent to the central Specific Plan Area are an SCE Substation occupying approximately 160 acres to the east, and agricultural/dairy and residential development to the west. The southern portion of the Specific Plan Area is bounded by residential and commercial development to the west across Haven Avenue, and vacant disturbed properties to the south across Edison Avenue (alignment). To the east, across Hamner Avenue, are City of Eastvale properties that are developed or are being developed with commercial and light industrial uses.

Source: Rich-Haven Specific Plan Amendment; Applied Planning, Inc.

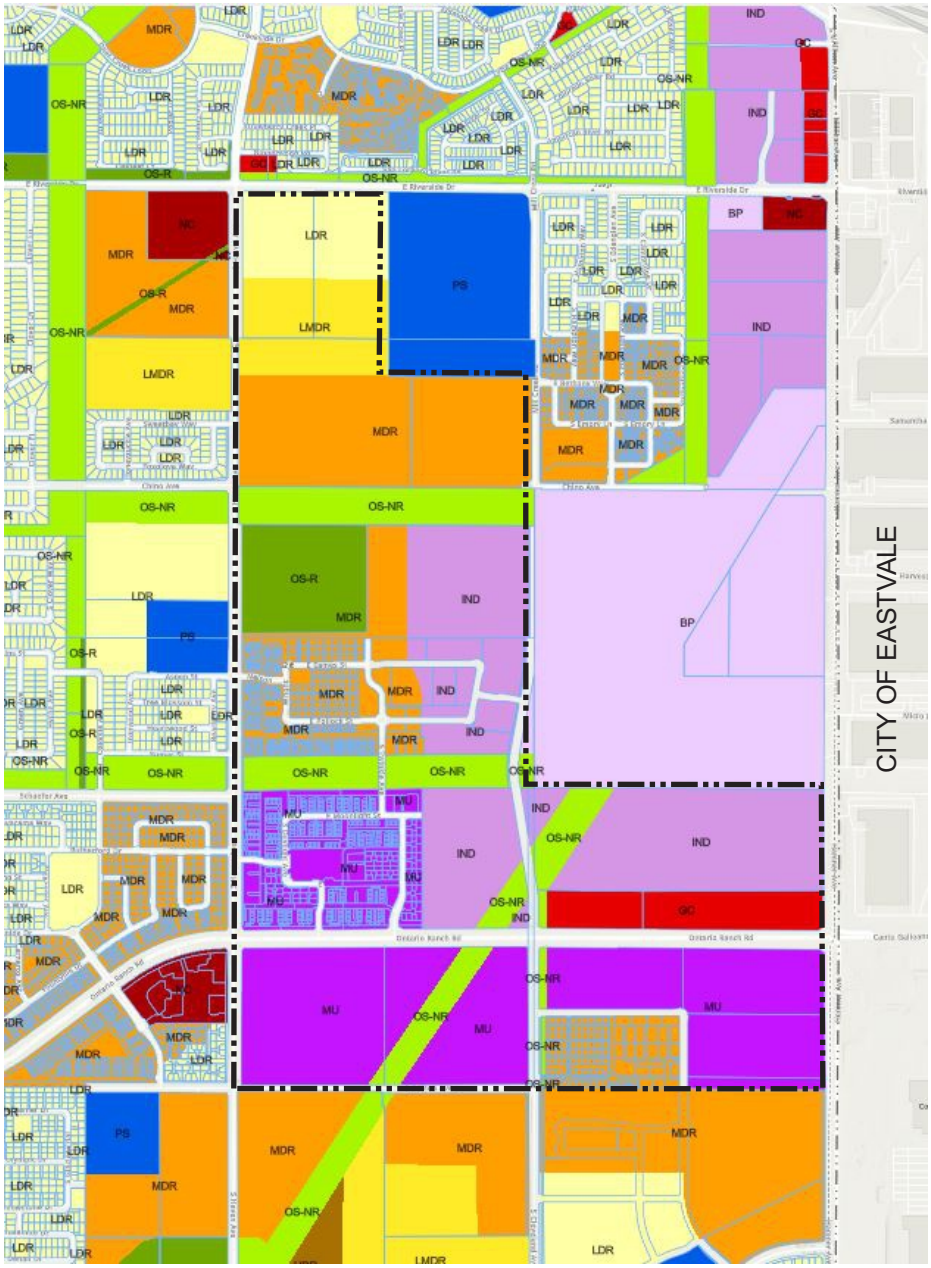
Figure 4.1-1
Existing Land Uses

4.1.2 EXISTING and PROPOSED LAND USE DESIGNATIONS

4.1.2.1 Project Site

Policy Plan Land Uses

TOP 2050 Policy Plan Land Use designations for the Project site and surrounding areas are presented at Figure 4.1-2. Policy Plan Land Uses proposed by the Project are consistent with TOP 2050 Policy Plan Land Use designations for the Project site. The Project does not propose or require amendment of TOP 2050 Policy Plan, *Land Use Element.*



Zoning Designations

Existing Zoning of the Project site is established by the 2021 Specific Plan. Zoning of the Project site would be modified by the 2022 Specific Plan Amendment described herein. The 2021 Specific Plan and 2022 Specific Plan Amendment are compared at Figure 4.1-3.

4.1.3 LAND USE PLANS, GOALS, POLICIES, AND REGULATIONS

4.1.3.1 Regional Planning

Southern California Association of Governments (SCAG) is a council of governments representing Imperial, Los Angeles, Orange, Riverside, San Bernardino, and Ventura counties. SCAG is the federally recognized metropolitan planning organization (MPO) for this region, which encompasses over 38,000 square miles. SCAG is a regional planning agency and a forum for addressing regional issues concerning transportation, the economy, community development, and the environment. SCAG is also the regional clearinghouse for projects requiring environmental documentation under federal and state law.

Source: TOP 2050

Figure 4.1-2
TOP 2050 Policy Plan Land Use Designations

2021 SPECIFIC PLAN

2022 SPECIFIC PLAN AMENDMENT

N

NOT TO SCALE

Source: Rich-Haven Specific Plan; Rich-Haven Specific Plan Amendment

Figure 4.1-3
2021 Specific Plan vs. 2022 Specific Plan Amendment

In this role, SCAG reviews proposed development and infrastructure projects to analyze their impacts on regional planning programs. As the region's MPO, SCAG cooperates with the Southern California Air Quality Management District (SCAQMD), the California Department of Transportation (Caltrans), and other agencies in preparing regional planning documents.

In September 2020, SCAG adopted the *2020–2045 Regional Transportation Plan/Sustainable Communities Strategy* (Connect SoCal 2020). Connect SoCal 2020 establishes general principles and themes that collectively work to shape the Southern California region. Connect SoCal 2020 is a long-range plan that balances future mobility and housing needs with economic, environmental, and public health goals.

4.1.3.2 Local Planning

TOP 2050 Policy Plan [General Plan] Land Use Goals, Objectives, Policies, and Implementation Plan promote a pattern of orderly and compatible land uses within the City. In support of the Policy Plan, the City Development Code regulates site and use-specific development within the City. In the case of the Project, proposed land uses and development actions are also subject to requirements of the proposed *Rich-Haven Specific Plan, 2022 Amendment* document. In many instances, Project compliance with applicable provisions of the City of Ontario Policy Plan, Development Code, and proposed *Rich-Haven Specific Plan, 2022 Amendment* (2022 Specific Plan Amendment, Project) would avoid potential land use and planning impacts, or would reduce those potential impacts to levels that would be less-than-significant.

4.1.4 STANDARDS OF SIGNIFICANCE

Appendix G of the California Environmental Quality Act Guidelines (*CEQA Guidelines*), as applied by the City of Ontario, indicates that a Project will normally have a significant effect related to land use if it would:

- Physically divide an established community;

- Cause a significant environmental impact due to a conflict with any land use plan, policy, or regulation adopted for the purpose of avoiding or mitigating an environmental effect.

4.1.5 POTENTIAL IMPACTS AND MITIGATION MEASURES

The following discussions focus on those areas where it has been determined that the Project may result in potentially significant land use and planning impacts, based on the previous discussions included within this Section and analysis presented within the EIR Initial Study (EIR Appendix A). As discussed within the Initial Study, the Project would not physically divide an established community. This potential impact is therefore not substantively discussed further within this Section. Please refer also to Initial Study Checklist Item XI. *Land Use and Planning*.

Potential Impact LU-1: *Cause a significant environmental impact due to a conflict with any land use plan, policy, or regulation adopted for the purpose of avoiding or mitigating an environmental effect.*

Impact Analysis: Land use plans, policies, or regulations adopted for the purpose of avoiding or mitigating environmental effects are established under the City of Ontario Policy Plan and the SCAG. Project consistency with applicable provisions of the City of Ontario Policy Plan and SCAG Connect SoCal 2020 are presented below.

City of Ontario Policy Plan

Consistency of the Project with applicable Policy Plan Land Use Element Goals and Policies that directly or indirectly address avoidance or mitigation of environmental effects is presented at Table 4.1-1.

Table 4.1-1
Policy Plan - Land Use Element Goals and Policies Consistency Analysis

Goals/Policies		Remarks
LU-1 Balance		
Goal LU-1 A community that has a spectrum of housing types and price ranges that match the jobs in the City and that make it possible for people to live and work in Ontario and maintain a quality of life.		
Policies		**Remarks**
LU-1.1	**Strategic Growth.** We concentrate growth in strategic locations that help create place and identity, maximize available and planned infrastructure, foster the development of transit, and support the expansion of the active and multimodal transportation networks throughout the City.	**Policy LU-1.1 acts to avoid or reduce environmental impacts by minimizing requirements to construct new infrastructure, and by promoting use of transit, thereby generally reducing vehicle miles traveled (VMT) within the region. This Policy reduces resources consumption, transportation system impacts, air pollutant emissions impacts, and GHG emissions impacts.** ***Consistent:*** The proposed Project includes a mixture of Residential, Commercial, Light Industrial, and Community Facilities Land Uses. Development intensities and land use configurations realized under the 2022 Specific Plan Amendment promote the highest and best use of the subject site. Location of the Project takes advantage of existing access provided by the City's roadway network and existing utilities infrastructure. The Project would also implement infrastructure improvements the City considers necessary to support the Project (please refer to EIR Section 3.0, *Project Description*, 3.4.3 *Access and Circulation, 3.4.6 Infrastructure/Utilities*). The City would also collect Project Development Impact Fees (DIF) and Fair Share fees that would be assigned to infrastructure improvements necessary to ensure long-term adequacy of potentially affected infrastructure systems. Further, the Project would utilize and upgrade, as needed, other utility infrastructure systems. Development Regulations and Design Guidelines implemented pursuant to the 2022 Specific Plan Amendment would establish a Project identity differentiated from, but compatible with, adjacent land uses. On this basis, the Project is consistent with Policy LU-1.1.

Table 4.1-1
Policy Plan - Land Use Element Goals and Policies Consistency Analysis

Goals/Policies		Remarks
LU-1.2	**Sustainable Community Strategy.** We integrate state, regional and local Sustainable Community/ Smart Growth principles into the development and entitlement process.	**Policy LU-1.2 promotes conservation and sustainability, with correlating reductions in: energy consumption and resources consumption generally, VMT, transportation impacts, air pollutant emissions impacts, and GHG emissions impacts.** ***Consistent:*** The Project would be implemented and operated consistent with TOP 2050, 2022 Community Climate Action Plan Update (2022 CCAP Update). Compliance with the 2022 CCAP Update ensures that the Project implements contemporary energy efficient designs and that operations reflect sustainable best management practices. The Project collocates Residential, Commercial, Light Industrial, and Community Facilities Land Uses, promoting efficient use of available urban areas within the City. As substantiated in this EIR, Project VMT impacts, and Project Energy impacts would be less-than-significant. Mitigation is incorporated acting to reduce Project-source criteria pollutant emissions and GHG emissions impacts to the extent feasible. In this latter regard, certain of the Mitigation Measures identified at EIR Section 4.3, *Air Quality* would incrementally reduce Project-source air pollutant emissions and in so-doing would also act to generally reduce GHG emissions. The Project also supports sustainability and growth attributes reflected in Goals of the *2020–2045 Regional Transportation Plan/Sustainable Communities Strategy* (Connect SoCal 2020). Please refer to Table 4.1.2. Based on the preceding, the Project is consistent with Policy LU-1.2.
LU-1.3	**Adequate Capacity.** We require adequate infrastructure and services for all development.	**Policy LU-1.3 reduces utilities/infrastructure and public services impacts.** ***Consistent:*** The Project Applicant would construct, or would otherwise ensure to the satisfaction of the Lead Agency, those infrastructure improvements and service enhancements necessary to meet the demands of the Project. As substantiated in this EIR, infrastructure and service demands of the Project can be satisfied without adverse impacts to existing or anticipated customers within affected service areas. Please refer also to EIR Section 4.12, *Utilities and Service Systems*. On this basis, the Project is consistent with Policy LU-1.3.

Table 4.1-1
Policy Plan - Land Use Element Goals and Policies Consistency Analysis

Goals/Policies		Remarks
LU-1.4	**Multimodal Mobility.** We require development and urban design, where appropriate, that reduces reliance on the automobile and capitalizes on active transportation, transit, electric vehicles, and multimodal transportation opportunities.	**Policy LU-1.4 reduces VMT, transportation system impacts; and vehicular-source air pollutant emissions impact, GHG emissions impacts, and noise impacts.** ***Consistent:*** Access is provided to the Project site by local and regional transportation facilities. Intensified development of the Project site in combination with existing and proposed proximate urban development would focus the transit ridership base, thereby supporting existing and future transit opportunities. The Project incorporates bicycle and pedestrian amenities that facilitate non-motorized transportation modes. Based on the preceding, the Project is consistent with Policy LU-1.4.
LU-1.5	**Jobs-Housing Balance.** We coordinate land use, infrastructure, and transportation planning and analysis with regional, county and other local agencies to further regional and sub-regional goals for jobs-housing balance.	**Policy LU-1.5 reduces VMT, transportation system impacts; and vehicular-source air pollutant emissions impact, GHG emissions impacts, and noise impacts.** ***Consistent:*** Via the EIR process, the City has coordinated Project land uses, infrastructure, and transportation planning and analysis with potentially affected regional, county, and local agencies. Employment opportunities created by the Project would improve the City's jobs/housing balance. Project land uses and supporting improvements would not interfere with or obstruct regional and/or sub-regional goals addressing jobs-housing balance. On this basis, the Project is consistent with Policy LU-1.5.
LU-1.6	**Complete Community.** We incorporate a variety of land uses and building types in our land use planning efforts that result in a complete community where residents at all stages of life, employers, workers and visitors have a wide spectrum of choices of where they can live, work, shop and recreate within Ontario.	**Policy LU-1.6 indirectly minimizes potentially adverse environmental impacts by promoting diverse compatible land uses, contributing to a sustainable community.** ***Consistent:*** The Project proposes Residential, Commercial, Light Industrial, and Community Facilities Land Uses that would expand and diversify available housing and employment opportunities. Please refer also to the *Rich-Haven Specific Plan, 2022 Amendment* (EIR Appendix B). On this basis, the Project is consistent with Policy LU-1.6.
LU-1.7	**Revenues and Costs.** We require future amendments to our Land Use Plan to be accompanied by analyses of fiscal impacts.	**Policy LU-1.7 Minimizes potentially adverse environmental impacts by ensuring fiscally responsible development, acting to minimize the potential for development proposals to cause or contribute to blight conditions.** ***Consistent:*** The Project does not propose or require amendment of TOP 2050 Land Uses Plan. As such, a fiscal impact analysis is not required.

Table 4.1-1
Policy Plan - Land Use Element Goals and Policies Consistency Analysis

Goals/Policies		Remarks
LU-2 Compatibility		
Goal LU-2 Compatibility between a wide range of uses and resultant urban patterns and forms.		
Policies		**Remarks**
LU-2.1	**Land Use Decisions.** We minimize adverse impacts on adjacent properties when considering land use and zoning requests.	**Policy LU-2.1 minimizes potential land use conflicts that could result in potentially adverse environmental impacts.** ***Consistent:*** The 2022 Specific Plan Amendment configuration and orientation of land uses combined with integral Development Regulations and Design Guidelines act to preclude or minimize potential adverse impacts affecting adjacent properties. The Project is therefore consistent with Policy LU-2.1.
LU-2.2	**Buffers**. We require new uses to provide mitigation or buffers between existing uses where potential adverse impacts could occur. Additional mitigation is required when new uses could negatively impact environmental justice areas.	***Consistent:*** Please refer to Remarks at Policy LU-2.1.
LU-2.3	**Hazardous Uses.** We regulate the development of industrial and similar uses that use, store, produce or transport toxic substances, air emissions, other pollutants or hazardous materials.	**Policy LU-2.3 reduces hazards/hazardous materials impacts and hazardous air pollutant emissions impacts.** ***Consistent:*** The Project does not propose or require uses whose primary function is to store, produce, or transport toxic substances or other hazardous materials. Routine use of hazardous or potentially hazardous materials within the 2022 Specific Plan Amendment area would be subject to extensive local, regional, and federal regulatory requirements, and would not result in or cause potentially significant environmental impacts. Mitigation incorporated in this EIR reduces impacts associated with pre-existing hazards/hazardous materials conditions to levels that would be-less-than-significant. Additionally, development of the Project would eliminate existing hazardous or potentially hazardous conditions affecting portions of Project site that have previously been used for agricultural or dairy uses. Please refer also to EIR Section 4.7, *Hazards/Hazardous Materials*. Based on the preceding, the Project is consistent with Policy LU-2.3.

Table 4.1-1
Policy Plan - Land Use Element Goals and Policies Consistency Analysis

Goals/Policies		Remarks
LU-2.4	**Regulation of Nuisances.** We regulate the location, concentration and operation of potential nuisances.	**Policy LU-2.4 reduces nuisance environmental impacts. While not considered significant of themselves, nuisance impacts could contribute to already adverse environmental conditions, or could cumulatively result in adverse environmental conditions.** ***Consistent:*** The Project does not propose or require uses or development that would be characterized as "nuisances." Rather, the implemented Project would establish a compatible and beneficial development within currently underutilized 2022 Specific Plan Amendment properties. The 2022 Specific Plan Amendment Development Regulations and Design Guidelines and the City Development Code articulate measures and policies that would minimize potential nuisance effects of development. The Project would be required to comply with these measures and policies. On this basis, the Project is consistent with Policy LU-2.4.
LU-2.5	**Regulation of Uses**. We regulate the location, concentration and operations of uses that have impacts on surrounding land uses.	**Policy LU-2.5 minimizes potential land use conflicts that could result in potentially adverse environmental impacts.** ***Consistent:*** As substantiated in this EIR, the Project would not adversely affect surrounding land uses. To this end, all development and operations within the Project site would be required to conform to Development Regulations and Design Guidelines established under the 2022 Specific Plan Amendment. The Project would further be required to conform to all City Development Code requirements. In combination, provisions of the 2022 Specific Plan Amendment and City Development Code act to ensure that the Project would not adversely impact surrounding land uses. On this basis, the Project is consistent with Policy LU-2.5.
LU-2.6	**Infrastructure Compatibility**. We require infrastructure to be aesthetically pleasing and in context with the community character.	**Policy LU-2.6 minimizes potential aesthetic/visual impacts.** ***Consistent:*** The 2022 Specific Plan Amendment would locate utility connections, utility cabinets, etc. in areas not visible from public vantages where feasible. In instances where utility connections or utility cabinets must be placed in areas visible to the public, the 2022 Specific Plan Amendment Design Guidelines provide for screening and/or landscaping to minimize views of utility equipment. On this basis, the Project is consistent with Policy LU-2.6.
LU-2.7	**Inter-jurisdictional Coordination.** We maintain an ongoing liaison with ONT, Caltrans, Public Utilities Commission, the railroads, and other agencies to help minimize impacts and improve the operations and aesthetics of their facilities.	**Policy LU-2.7 minimizes potential infrastructure systems impacts.** ***Consistent:*** The Project does not propose or require elements or actions that would obstruct or otherwise interfere with the City's Inter-jurisdictional Coordination efforts. On this basis, the Project is consistent with Policy LU-2.7.

Table 4.1-1
Policy Plan - Land Use Element Goals and Policies Consistency Analysis

Goals/Policies		Remarks
LU-2.8	**Transitional Areas.** We require development in transitional areas to protect the quality of life of current residents.	**Policy LU-2.8 minimizes potential land use conflicts that could result in potentially adverse environmental impacts.** ***Consistent:*** The Project site does not lie within a Policy Plan Transitional Area. As substantiated in this EIR, the Project incorporates elements and operational programs that would act to minimize or avoid the Project's potentially significant environmental impacts and thereby protect the quality of life or current residents. On this basis, the Project is consistent with Policy LU-2.8.
LU-2.9	**Methane Gas Sites.** We require sensitive land uses and new uses on former dairy farms or other methane-producing sites be designed to minimize health risks.	**Policy LU-2.9 minimizes potential methane hazards impacts.** ***Consistent:*** This EIR incorporates mitigation that would reduce potential hazards/hazardous material impacts, including methane hazards impacts, to levels that would be less-than-significant. Please refer to EIR Section 4.7, *Hazards/Hazardous Materials*. On this basis, the Project is consistent with Policy LU-2.9.
LU-2.10	**Sensitive Uses.** We monitor and share information with the community about stationary and non-stationary emission sources. We encourage siting and design of facilities to minimize health and safety risks on existing and proposed sensitive uses, especially in environmental justice areas.	**Policy LU-2.10 minimizes potential air pollutant health hazards impacts.** ***Consistent:*** As substantiated in this EIR, the Project would not result in or cause air pollutant health hazards impacts. The Project would not result in any adverse impacts at sensitive uses. Please refer also to EIR Sections 4.3, *Air Quality*; 4.4, *GHG Emissions*; 4.6, *Noise*; and 4.7, *Hazards/Hazardous Materials*. On this basis, the Project is consistent with Policy LU-2.10.
LU-2.11	**Context-Aware Transitions and Connections**. We require new development projects and land-planning efforts to provide context-aware and appropriate transitions and connections between existing and planned neighborhoods, blocks, sites, and buildings.	**Policy LU-2.11 encourages compatible and cohesive development.** ***Consistent:*** The 2022 Specific Plan Amendment Land Use Plan, Development Regulations, and Design Guidelines promote development compatibility through adjacency of similar land uses, and transitional elements between differing land uses, e.g., collocation of residential uses with defining transitional elements such as roads, trails, linear open space, screen walls, or landscaping between residential uses and more intense commercial and industrial uses. Please refer also to the 2022 Specific Plan Amendment presented at EIR Appendix B. On this basis, the Project is consistent with Policy LU-2.11.
Goal LU-3 Staff, regulations and processes that support and allow flexible response to conditions and circumstances in order to achieve the Vision.		

Table 4.1-1
Policy Plan - Land Use Element Goals and Policies Consistency Analysis

Goals/Policies		Remarks
LU-3.1	**Development Standards**. We maintain clear development standards which allow flexibility to achieve our Vision and provide objective standards that ensure predictability and deliver the intended physical outcomes.	**Policy LU-3.1 minimizes the potential for development proposals to result in unacceptable designs, or development that would otherwise result in land use incompatibilities that would impede attainment of the City's Vision.** ***Consistent:*** The 2022 Specific Plan Amendment incorporates Development Regulations and Design Guidelines allowing for flexible development of the Project site within the context of the Policy Plan Community Design Element. In this respect, development pursuant to the 2022 Specific Plan Amendment would establish contemporary, quality Residential, Commercial, Light Industrial, and Community Facilities Land Uses on a currently underutilized site. On this basis, the Project is consistent with Policy LU-3.1.
LU-3.2	**Design Incentives.** We offer design incentives to help projects achieve the Vision.	**Policy LU-3.2 encourages quality development and minimizes the potential for development proposals to result in unacceptable designs, or development that would otherwise result in land use incompatibilities that would impede attainment of the City's Vision.** ***Consistent:*** The Project does not propose elements or aspects that would obstruct or interfere with Design Incentives programs established by the City. The 2022 Specific Plan Amendment Land Use Plan, Development Regulations, and Design Guidelines support the Policy Plan Vision. Please refer also to Remarks at Policy LU-3.1.
LU-3.3	**Land Use Flexibility.** We consider uses not typically permitted within a land use category if doing so improves livability, reduces vehicular trips, creates community gathering places and activity nodes, and helps create identity.	**Policy LU-3.3 promotes sustainable and compatible development that reduces or precludes potentially adverse environmental effects.** ***Consistent:*** Land uses and development concepts proposed by the Project are consistent with the Policy Plan Land Use Plan, but would require amendment of the current (2021) Rich-Haven Specific Plan. The proposed Rich-Haven Specific Plan, 2022 Amendment would modify the 2021 Rich-Haven Specific Plan to allow for implementation of the Project uses. The proposed 2022 Specific Plan Amendment provides for flexible and compatible development of the subject site. More specifically, the 2022 Specific Plan Amendment would implement compatible Residential Commercial, and Industrial uses on currently under-utilized properties. Development intensities and land use configurations proposed under the 2022 Specific Plan Amendment promote the highest and best use of the subject site. The 2022 Specific Plan Amendment Land Use Concept collocates Residential, Commercial, Light Industrial, and Community Facilities Land Uses in an urban/urbanizing area, thereby reducing home – work and work – home commutes, acting generally to reduce vehicle VMT locally and within the region. Corollary reductions in vehicle energy consumption and vehicular-source air pollutant and GHG emissions are anticipated.

Table 4.1-1
Policy Plan - Land Use Element Goals and Policies Consistency Analysis

Goals/Policies		Remarks
		The 2022 Specific Plan Amendment Land Use Plan, Development Regulations, and Design Guidelines would establish a Project identity differentiated from, but compatible with, adjacent land uses. Please refer also to Remarks at Policies LU-1.1 and LU-1.2. Based on the preceding, the Project is consistent with Policy LU-3.3.
LU-4 Phased Growth		
Goal LU-4 Development that provides short-term value only when the opportunity to achieve our Vision can be preserved.		
Policies		**Remarks**
LU-4.1	**Commitment to Vision.** We are committed to achieving our Vision but realize that it may take time and several interim steps to get there.	**Policy LU-4.1 reduces environmental effects through continued commitment to the City's Vision, which in part includes promotion of environmentally superior and sustainable development.** ***Consistent:*** The Project would support The Ontario Plan Vision for community-wide prosperity that adds value and yields benefits. Please refer to Remarks at Policies LU-3.1, LU-3.2. Based on the preceding, the Project is consistent with Policy LU-4.1.
LU-4.2	**Interim Development.** We allow development in urban, mixed use, and transit- oriented Place Types that is not immediately reflective of our ultimate Vision for the Place Type, provided it can be modified or replaced when circumstances are right to support development aligned with the Place Type Vision. We will not allow development that impedes, precludes, or compromises our ability to achieve our Vision.	**Policy LU-4.2 indirectly reduces environmental effects through rejection of development proposals that impede, preclude, or compromise attainment of the City's Vision.** ***Consistent:*** The Project does not propose interim development. Please refer to Remarks at Policies LU-3.1, LU-3.2, LU-4.1.
LU-4.3	**Infrastructure Timing.** We require that the necessary infrastructure and services be in place prior to or concurrently with development.	**Policy LU-4.3 reduces infrastructure and services impacts.** ***Consistent:*** Pursuant to provisions of 2022 Specific Plan Amendment, mitigation measures identified in this EIR, and City Conditions of Approval, the Project would provide and/or otherwise ensure to the satisfaction of the City, that infrastructure and services are timely available to meet Project demands. On this basis, the Project is consistent with Policy LU-4-3.

Table 4.1-1
Policy Plan - Land Use Element Goals and Policies Consistency Analysis

Goals/Policies		Remarks
LU-4.4	**Shared Infrastructure.** We encourage and facilitate the use of shared infrastructure (including shared or managed parking) in urban, mixed use, and transit-oriented Place Types.	**Policy LU-4.4 reduces infrastructure and services impacts.** The 2022 Specific Plan Amendment infrastructure plans provide for efficient shared connections to existing and proposed utilities systems. All infrastructure systems implemented by the project would be required to conform to City and purveyor standards and requirements. On this basis, the Project is consistent with Policy LU-4-4.
LU-5 Airport Planning		
Goal LU-5 Integrated airport systems and facilities that minimize negative impacts to the community and maximize economic benefits.		
Policies		**Remarks**
LU-5.1	**Coordination with Airport Authorities.** We collaborate with FAA, Caltrans Division of Aeronautics, airport owners, neighboring jurisdictions, and other shareholders in the preparation, update and maintenance of airport-related plans.	**Policy LU-5.1 reduces adverse impacts associated with airfield/airport operations.** ***Consistent:*** The Project has been designed to be consistent with TOP 2050, and by extension would not result in impacts not considered and addressed in the TOP 2050 SEIR. As concluded in TOP 2050 SEIR, the potential for TOP 2050 General Plan to expose developments or populations to airport/aircraft-related hazards would be less-than-significant. The Project does not propose facilities or uses that would interfere with or obstruct City collaboration or coordination with agencies or shareholders participating in or responsible for the preparation, update and maintenance of airport-related plans. On this basis, the Project is consistent with Policy LU-5.1.
LU-5.2	**Airport Planning Consistency.** We coordinate with airport authorities to ensure The Ontario Plan is consistent with state law, federal regulations, and/or adopted master plans and land use compatibility plans for ONT and Chino Airport.	***Consistent:*** Please refer to remarks at Policy LU-5.1.
LU-5.3	**Airport Impacts.** We work with agencies to maximize resources to mitigate the impacts and hazards related to airport operations – their homes.	***Consistent:*** Please refer to remarks at Policy LU-5.1.

Table 4.1-1
Policy Plan - Land Use Element Goals and Policies Consistency Analysis

Goals/Policies		Remarks
LU-5.4	**ONT Growth Forecast.** We support and promote an ONT that accommodates 30 million annual passengers and 1.6 million tons of cargo per year, as long as the impacts associated with that level of operations are planned for and mitigated.	***Consistent:*** Please refer to remarks at Policy LU-5.1.
LU-5.5	**Airport Compatibility Planning for ONT.** We create and maintain the Airport Land Use Compatibility Plan for ONT.	***Consistent:*** Please refer to remarks at Policy LU-5.1.
LU-5.6	**Alternative Process.** We fulfill our responsibilities and comply with state law with regard to the Alternative Process for proper airport land use compatibility planning.	***Consistent:*** Please refer to remarks at Policy LU-5.1.
LU-5.7	**ALUCP Consistency with Land Use Regulations.** We comply with state law that requires general plans, specific plans and all new development be consistent with the policies and criteria set forth within an Airport Land Use Compatibility Plan for any public-use airport.	***Consistent:*** Please refer to Remarks at Policy LU-5.1.
LU-5.8	**Chino Airport.** We will support the creation and implementation of the Airport Land Use Compatibility Plan for Chino Airport.	***Consistent:*** Please refer to Remarks at Policy LU-5.1.

Sources: Goal/Policy statements from: TOP 2050 Policy Plan, Land Use Element; Remarks-Applied Planning, Inc.

City of Ontario Development Code/Zoning

Zoning for the subject site would be established by the 2022 Specific Plan Amendment. The 2022 Specific Plan Amendment is consistent with the Policy Plan Land Use Element.

All development within the Project site would be subject to plans, requirements, standards, and guidelines established under the 2022 Specific Plan Amendment. In instances where the 2022 Specific Plan Amendment is silent, development within the

Project site would be subject to requirements of the City Development Code. The Project does not propose or require amendment(s) to the City Development Code.

2020–2045 Regional Transportation Plan/Sustainable Communities Strategy (Connect SoCal 2020)

The Project is also evaluated in the context of Connect SoCal 2020. Project consistency with Connect SoCal 2020 goals is presented at Table 4.1-2.

Table 4.1-2
Project Consistency with Connect SoCal 2020

Connect SoCal 2020 Goal	Remarks
Goal #1: Encourage regional economic prosperity and global competitiveness	***Consistent:*** The Project is consistent with and supports TOP 2050 and TOP 2050 Community Economics Element. TOP 2050 Community Economics Element establishes goals and policies that promote economic growth and fiscal responsibility. In combination, TOP 2050 Community Economics Element goals and policies act to attract new and expanding businesses to Ontario thereby increasing the City's share of growing sectors of the regional and global economy. The Project commercial, retail, and industrial uses provide business and employment opportunities acting to further City economic prosperity. The Project does not propose or require improvements or operations that would conflict with or obstruct attainment of Connect SoCal 2020 Goal #1. On this basis, the Project is consistent with Connect SoCal 2020 Goal #1.
Goal #2: Improve mobility, accessibility, reliability, and travel safety for people and goods	***Consistent:*** The Project is consistent with and supports TOP 2050 and TOP 2050 Mobility Element. TOP 2050 Mobility Element identifies the system of roadways all users of streets, roads, and highways, including motorists, pedestrians, bicyclists, children, persons with disabilities, seniors, movers of commercial goods and users of public transportation. Per TOP 2050 Mobility Element, transportation system designs within the City are required to: • Comply with federal, state, and local design and safety standards; • Meet the needs of multiple transportation modes and users; • Provide capacity envisioned in the City of Ontario Master Plan of Streets and Highways; • Be compatible with the streetscape and surrounding land uses: and • Promote the efficient flow of all modes of transportation through the implementation of intelligent transportation systems and travel demand management strategies. As applicable, the Project Applicant would coordinate design and construction of Project transportation system improvements with the City, Caltrans, SBCTA, and others to identify, fund, and implement needed improvements. The Applicant would also comply with City of Ontario requirements addressing transportation corridors enhancements. Streets implemented by the Project would comply with applicable City requirements addressing walkability, bicycling opportunities, and transit integration. As applicable, the Applicant would also coordinate with potentially affected agencies and municipalities to plan and implement goods movement strategies and plans, as well as improvements that support and

Table 4.1-2
Project Consistency with Connect SoCal 2020

Connect SoCal 2020 Goal	Remarks
	the efficient movement of goods, while avoiding or minimizing potentially adverse environmental impacts. The Project does not propose or require improvements or operations that would conflict with or obstruct attainment of Connect SoCal 2020 Goal #2. On this basis, the Project is consistent with Connect SoCal 2020 Goal #2.
Goal #3: Enhance the preservation, security, and resilience of the regional transportation system	***Consistent***: The Project is consistent with and supports TOP 2050. The City takes a proactive leadership role identifying and facilitating strategies addressing regional transportation challenges. As applicable, the Project Applicant would coordinate with the City, ONT, railroads, Caltrans, SBCTA, and other transportation agencies with regard to preservation, security, and resilience of the regional transportation system. The Project Applicant would also coordinate with potentially affected agencies and municipalities to plan and implement goods movement strategies and plans, and improvements that support and the efficient movement of goods, while avoiding or minimizing potentially adverse environmental impacts. Additionally, the Project Applicant would coordinate with the City and transit agencies to implement transit service and thereby reduce vehicle miles traveled. The Project does not propose or require improvements or operations that would conflict with or obstruct attainment of Connect SoCal 2020 Goal #3. On this basis, the Project is consistent with Connect SoCal 2020 Goal #3.
Goal #4: Increase person and goods movement and travel choices within the transportation system	***Consistent:*** The Project is consistent with and supports TOP 2050. The final Project designs would be required comply with TOP 2050 Policies addressing implementation of multimodal transportation systems meeting the needs of all users of streets, roads, and highways, including motorists, pedestrians, bicyclists, children, persons with disabilities, seniors, movers of commercial goods and users of public transportation. The Project Applicant would also coordinate with the City and transit agencies to implement transit service and thereby reduce vehicle miles traveled. Additionally, the Project Applicant would coordinate with potentially affected agencies and municipalities to plan and implement goods movement strategies and plans, and improvements that support and the efficient movement of goods, while avoiding or minimizing potentially adverse environmental impacts. The Project does not propose or require improvements or operations that would conflict with or obstruct attainment of Connect SoCal 2020 Goal #4. On this basis, the Project is consistent with Connect SoCal 2020 Goal #4.
Goal #5: Reduce greenhouse gas emissions and improve air quality	***Consistent:*** The Project is consistent with and supports TOP 2050 and the 2022 Community Climate Action Plan Update (2022 CAP Update) implemented under TOP 2050. As substantiated at EIR Section 4.4, *Greenhouse Gas Emissions*, Project GHG emissions would be reduced to the extent feasible. In this regard, certain of the Mitigation Measures identified at EIR Section 4.3, *Air Quality* would incrementally reduce Project-source air pollutant emissions and in so-doing would also act to generally reduce GHG emissions. The Project collocates Residential, Commercial, Light Industrial, and Community Facilities Land Uses with proximate access to the local and regional roadway system. In this manner, the Project minimizes VMT and resulting vehicular-source air pollutant emissions. The Project would result in certain regionally significant and unavoidable air quality impacts. The Project would implement measures that would reduce these impacts to the extent feasible. The Project would not result in any locally significant air quality impacts, or air quality conditions that would result in adverse health effects. (see: EIR Section 4.3, *Air Quality*). The Project does not propose or require improvements or operations that would conflict with or

Table 4.1-2
Project Consistency with Connect SoCal 2020

Connect SoCal 2020 Goal	Remarks
	obstruct attainment of Connect SoCal 2020 Goal #5. On this basis, the Project is consistent with Connect SoCal 2020 Goal #5.
Goal #6: Support healthy and equitable communities	***Consistent:*** The Project is consistent with and supports TOP 2050 and TOP 2050 *Social Resources Element*. TOP 2050, *Social Resources Element*, identifies quality and accessible health care, education, community services, and cultural activities as critical components to achieving Ontario's Vision. The Project collocates a range of housing products and employment-generating commercial and industrial uses, thereby furthering City goals to provide a range of housing types and employment opportunities. In this regard, the Project acts to improve the balance between jobs and housing in the San Bernardino County subregion while reducing vehicle miles traveled and associated air quality impacts and air quality related health impacts. As substantiated in this EIR, the Project would not result in any adverse health impacts. All Project uses would be required to provide equitable access for all persons. The Project does not propose or require improvements or operations that would conflict with or obstruct attainment of Connect SoCal 2020 Goal #6. On this basis, the Project is consistent with Connect SoCal 2020 Goal #6.
Goal #7: Adapt to a changing climate and support an integrated regional development	***Consistent:*** The Project is consistent with and supports TOP 2050 and the 2022 CAP Update implemented under TOP 2050. As substantiated at EIR Section 4.4, *Greenhouse Gas Emissions*, Project GHG emissions would be reduced to the extent feasible. In this regard, certain of the Mitigation Measures identified at EIR Section 4.3, *Air Quality* would incrementally reduce Project-source air pollutant emissions and in so-doing would also act to generally reduce GHG emissions. Collocated housing, commercial uses, and industrial development proposed by the Project support integrated development within the City and region. The Project does not propose or require improvements or operations that would conflict with or obstruct attainment of Connect SoCal 2020 Goal #7. On this basis, the Project is consistent with Connect SoCal 2020 Goal #7.
Goal #8: Leverage new transportation technologies and data-driven solutions that result in more efficient travel	***Consistent:*** The Project is consistent with and supports TOP 2050 and TOP 2050 Mobility Element. The Mobility Element identifies the system of roadways all users of streets, roads, and highways, including motorists, pedestrians, bicyclists, children, persons with disabilities, seniors, movers of commercial goods and users of public transportation. The Project supports efficient travel through collocation of complementary uses proximate to local and regional roadway systems. The Project final designs would include pedestrian and bicycle access and associated amenities consistent with City requirements. The Project does not propose or require improvements or operations that would conflict with or obstruct attainment of Connect SoCal 2020 Goal #8. On this basis, the Project is consistent with Connect SoCal 2020 Goal #8.
Goal #9: Encourage development of diverse housing types in areas that are supported by multiple transportation options	***Consistent:*** The Project is consistent with and supports TOP 2050 and TOP 2050 housing policies. The Project provides a range of housing products available to all persons. The Project site is currently served by improved roadways, and the Project would construct new and improved roadways adequate to serve traffic within the Project site, and ensure that Project traffic does not contribute to or case adverse traffic conditions. The Project final designs would include pedestrian and bicycle access and associated amenities consistent with City requirements. The Project does not propose or require improvements or

Table 4.1-2
Project Consistency with Connect SoCal 2020

Connect SoCal 2020 Goal	Remarks
	operations that would conflict with or obstruct attainment of Connect SoCal 2020 Goal #9. On this basis, the Project is consistent with Connect SoCal 2020 Goal #9.
Goal #10: Promote conservation of natural and agricultural lands and restoration of habitats	***Consistent:*** The Project is consistent with and supports TOP 2050 to protect high value habitat and farming resource activities that are compatible with adjacent development. As substantiated at EIR Section 4.10, *Biological Resources* there are no valuable or protected natural agricultural lands or habitat within the Project site. This EIR further substantiates that the Project would not result in potentially adverse biological resources impacts. The Project does not propose or require improvements or operations that would conflict with or obstruct attainment of Connect SoCal 2020 Goal #10. On this basis, the Project is consistent with Connect SoCal 2020 Goal #10.

Sources: Connect SoCal 2020; TOP 2050 SEIR; Remarks by Applied Planning, Inc.

Summary

As outlined above, the Project would establish Land Uses, Development Regulations, and Design Guidelines directing the ultimate buildout of the Project site. Land uses and development reflected within the proposed 2022 Specific Plan Amendment can be feasibly implemented consistent with applicable provisions of the City General Plan and the City Development Code. Prior to issuance of development permits, the City would review the final development plans for individual projects within the 2022 Specific Plan Amendment area to ensure consistency with the 2022 Specific Plan Amendment document as approved by the City, and where applicable, City Development Code requirements. Further, the Project would be consistent with applicable land use and planning provisions of the Policy Plan.

The Project is also considered to be consistent with, and would support land use and planning goals articulated in Connect SoCal. Project consistency with applicable Connect SoCal Land Use and Planning Goals addressing avoidance and mitigation of environmental impacts is summarized at Table 4.1-2.

On the basis of the preceding, the potential for the Project to cause a significant environmental impact due to a conflict with any land use plan, policy, or regulation adopted for the purpose of avoiding or mitigating an environmental effect is less-than-significant.

Level of Significance: Less-Than-Significant.

4.2 TRANSPORTATION

4.2 TRANSPORTATION

Abstract

This discussion of potential transportation impacts is organized under the following headings:

- *Vehicle Miles Traveled Analysis; and*
- *Other Transportation Topics.*

A summary of the analysis and findings under these topical headings is presented below.

Vehicle Miles Traveled (VMT) Analysis

As required under CEQA Guidelines *Section 15064.3, potential vehicle miles traveled (VMT) impacts of the Project are evaluated in this Section.*[1] CEQA Guidelines *Section 15064.3 (statute effective July 1, 2020) requires analysis of the Project's potential vehicle miles traveled (VMT) impacts. Detailed analysis of the Project's potential VMT impacts is presented in* Rich-Haven Specific Plan Amendment, Vehicle Miles Traveled (VMT) Analysis *(Urban Crossroads, Inc.) October 3, 2022 (Project VMT Analysis). Findings and conclusions of the Project VMT Analysis are summarized in this Section and the Project VMT Analysis in total is presented at EIR Appendix C. The analysis presented here substantiates that Project VMT impacts would be less-than-significant. As further substantiated within this analysis, less-than-significant VMT impacts at the Project level would not be cumulatively considerable or cumulatively significant. Additionally, localized roadway improvements constructed by the Project would not cause or result in potentially significant VMT impacts.*

[1] *CEQA Guidelines* Section 15064.3, effective January 1, 2019, "describes specific considerations for evaluating a project's transportation impacts" and provides that, except for roadway capacity projects, "a project's effect on automobile delay (or LOS) shall not constitute a significant environmental impact." (*CEQA Guidelines*, § 15064.3, subd. (a).)

The City further recognizes that vehicle delay (Level of Service, LOS) deficiencies are no longer environmental impacts under CEQA. The Project's potential LOS deficiencies are therefore not further evaluated in this EIR.

For reference purposes, and in support of City circulation system planning, potential LOS deficiencies resulting from the Project have also been evaluated. Recommended improvements addressing LOS deficiencies have been developed. Potential LOS deficiencies and recommended improvements are presented in detail in: Rich Haven Specific Plan, Traffic Analysis *(Urban Crossroads, Inc.) December 16, 2022 (Project Traffic Analysis). The Project Traffic Analysis is provided at EIR Appendix C.*

Other Transportation Topics

Other transportation topics evaluated in this Section include the following:

- *Potential to conflict with a program, plan, ordinance or policy addressing the circulation system, including transit, roadway, bicycle and pedestrian facilities;*
- *Potential to substantially increase hazards to a geometric design feature; and*
- *Potential to result in inadequate emergency access.*

The analysis presented here substantiates that Project impacts under the preceding "other transportation topics" would be less-than-significant.

4.2.1 VMT ASSESSMENT

4.2.1.1 Background

Transportation impact analyses prepared by the City have historically been based on level of service (LOS) and similar vehicle delay/congestion metrics. The LOS analytic model provides a reasonable assessment of vehicle congestion and driving conditions that may result from a given development project. LOS analyses do not however evaluate the range and magnitude of other environmental effects attributable to development traffic, including fuel consumption, criteria air pollutant emissions, and greenhouse gas emissions. These latter issues have however been historically addressed, and are

currently addressed within this EIR's *Air Quality*, *Greenhouse Gas Emissions*, and *Energy* Sections. In response to these latter concerns and to comprehensively evaluate environmental impacts of development traffic, the *CEQA Guidelines* (amended December 2019) include new Section 15064.3 addressing transportation impacts. In summary, *CEQA Guidelines* Section 15064.3 establishes Vehicle Miles Traveled (VMT) as the appropriate metric for evaluation of project transportation impacts.

The Project VMT Analysis presented here evaluates the potential for the Project to conflict with or be inconsistent with *CEQA Guidelines* Section 15064.3, subdivision (b). For ease of reference, *CEQA Guidelines* Section 15064.3, subdivision (b) is presented below.

> **§ 15064.3**. Determining the Significance of Transportation Impacts.
>
> **(b)** Criteria for Analyzing Transportation Impacts.
>
> - Land Use Projects. Vehicle miles traveled exceeding an applicable threshold of significance may indicate a significant impact. Generally, projects within one-half mile of either an existing major transit stop or a stop along an existing high quality transit corridor should be presumed to cause a less than significant transportation impact. Projects that decrease vehicle miles traveled in the project area compared to existing conditions should be presumed to have a less than significant transportation impact.
> - Transportation Projects. Transportation projects that reduce, or have no impact on, vehicle miles traveled should be presumed to cause a less than significant transportation impact. For roadway capacity projects, agencies have discretion to determine the appropriate measure of transportation impact consistent with CEQA and other applicable requirements. To the extent that such impacts have already been adequately addressed at a programmatic level, such as in a regional transportation plan EIR, a lead agency may tier from that analysis as provided in Section 15152.

- Qualitative Analysis. If existing models or methods are not available to estimate the vehicle miles traveled for the particular project being considered, a lead agency may analyze the project's vehicle miles traveled qualitatively. Such a qualitative analysis would evaluate factors such as the availability of transit, proximity to other destinations, etc. For many projects, a qualitative analysis of construction traffic may be appropriate.

- Methodology. A lead agency has discretion to choose the most appropriate methodology to evaluate a project's vehicle miles traveled, including whether to express the change in absolute terms, per capita, per household or in any other measure. A lead agency may use models to estimate a project's vehicle miles traveled, and may revise those estimates to reflect professional judgment based on substantial evidence. Any assumptions used to estimate vehicle miles traveled and any revisions to model outputs should be documented and explained in the environmental document prepared for the project. The standard of adequacy in Section 15151 shall apply to the analysis described in this section.

4.2.1.2 Methodology

As provided for at *CEQA Guidelines* Section 15064.3 (b) (4) (above), "[a] lead agency has discretion to choose the most appropriate methodology to evaluate a project's vehicle miles traveled, including whether to express the change in absolute terms, per capita, per household or in any other measure."

Within this analysis, evaluation of the Project VMT impacts is guided by *Technical Advisory on Evaluating Transportation Impacts in CEQA* (Technical Advisory) (Governor's Office of Planning and Research, OPR) December 2018. The Technical Advisory fulfills the state (SB 743) mandate that "OPR [is] to establish specific 'criteria for determining the significance of transportation impacts of projects' (Technical Advisory, p. 7).

Consistent with provisions of *CEQA Guidelines* Section 15064.3 (b) (4) and the Technical Advisory, the City of Ontario (City) has adopted and implemented their own VMT methodologies and thresholds[2] – referred to herein as the City VMT Guidelines. The Project VMT analysis presented here conforms to the City VMT Guidelines. Further detail regarding the Project VMT Analysis is provided below.

VMT Modeling

The City VMT Guidelines identify the San Bernardino Traffic Analysis Model (SBTAM) as the appropriate tool for conducting VMT analysis for land use projects in the City. The City has adopted an updated version of SBTAM referred to as The Ontario Plan (TOP) Model. TOP Model reflects contemporary City roadway network and socio-economic data that is consistent with the recently adopted TOP 2050. TOP Model reflects City-wide VMT conditions under Base Year (2019) and General Plan Buildout (2050) scenarios. Beyond the City limits, TOP Model assumes datasets consistent with the 2016 Southern California Association of Governments (SCAG) Regional Transportation Plan and Sustainable Communities Strategy (RTP/SCS).

City VMT Metric and VMT Impact Significance Threshold

The City VMT Guidelines employ a VMT per Service Population (VMT/SP) metric to quantify VMT impacts. For the Project, the Service Population (SP) comprises the Specific Plan resident population and persons employed by various commercial and industrial uses. The City VMT Guidelines establish the following VMT impact significance threshold for project-level VMT analyses:

- A significant impact would occur if the project VMT/SP exceeds the City-wide average VMT/SP under General Plan Buildout conditions.

As calculated using TOP General Plan Buildout (2050) Model, Citywide average VMT/SP under General Plan Buildout (2050) conditions is 30.70 VMT/SP. Please refer to Table 4.2-1.

[2] City of Ontario Resolution No. 2020-071, adopted June 2020.

Table 4.2-1
TOP 2050 General Plan Buildout
VMT/SP

Service Population	706,494
VMT	21,689,573
VMT/SP	30.70

Source: *Rich-Haven Specific Plan Amendment, Vehicle Miles Traveled (VMT) Analysis* (Urban Crossroads, Inc.) October 3, 2022.

The Baseline (2019) City Average VMT/SP (Automobile VMT and Total VMT) was calculated by linearly interpolating SBTAM data for the years 2012 and 2040. Table 4.2-2 provides a summary of the City Average Automobile VMT/SP and Total VMT/SP for 2012, 2019, and 2040.

Table 4.2-2
City Average VMT/SP Estimates: 2012, 2019, 2040

	2012 VMT/SP	2019 VMT/SP	2040 VMT/SP
Automobiles	37.5	37.6	37.9
Total	42.1	42.3	42.8

Source: *Rich-Haven Specific Plan Amendment, Vehicle Miles Traveled (VMT) Analysis* (Urban Crossroads, Inc.) October 3, 2022.

Project VMT/SP Calculation

Project VMT has been estimated by converting the Project land use information (dwelling units and building square footages) to an SBTAM-compatible socio-economic dataset (SED) comprising households, resident population, and employment. The Project SED was then input into a separate traffic analysis zone (TAZ) to isolate the Project's VMT. Table 4.2-3 summarizes the Project SED inputs.

Table 4.2-3
Project SED Inputs

Households	7,194
Resident Population	25,179
Employment	5,005

Source: *Rich-Haven Specific Plan Amendment, Vehicle Miles Traveled (VMT) Analysis* (Urban Crossroads, Inc.) October 3, 2022.

Project VMT was then calculated employing the "Origin/Destination" (OD) method. The OD method sums all weekday VMT generated by Project-related trips with at least one trip end in the VMT Analysis Study Area (Study Area). The OD method Project VMT/SP is then the quotient of total Project VMT divided by the total Project SP.

Table 4.2-4 summarizes Project VMT/SP under Baseline (2022) conditions, and General Plan Buildout (2050) conditions. The Project Service Population has been apportioned into Resident Population and Employment components. For clarity and disclosure purposes, the portion of Project VMT generated by heavy duty trucks has been disaggregated from the total Project VMT. Project VMT/SP is then compared to the City VMT/SP significance threshold. As indicated at Table 4.2-4, Project VMT/SP as calculated employing the OD method would not exceed City VMT/SP impact significance threshold. On this basis, the potential for the Project to result in a significant VMT impact would be less-than-significant.

Table 4.2-4
Project VMT/SP Summary-OD Method

	Baseline (2022)	**General Plan Buildout (2050)**
Resident Population	25,179	25,179
Employment	5,005	5,005
Total Service Population	**30,184**	**30,184**
Total OD VMT	**679,212**	**777,191***
Total VMT Trucks	33,586	33,586
Project VMT/SP	**22.50**	**25.75**
City VMT/SP Significance Threshold	30.70	30.70
Project VMT/SP Percent Below Threshold	-26.71%	-16.12%
Threshold Exceeded?	No	No

Source: *Rich-Haven Specific Plan Amendment, Vehicle Miles Traveled (VMT) Analysis* (Urban Crossroads, Inc.) October 3, 2022.
Notes:* Although the Project's population and employment does not change from baseline to buildout, the roadway network, modal shifts, and surrounding land uses does change within the model from baseline to buildout and may cause some VMT efficiencies and inefficiencies. In this case, inefficiencies result in the VMT increasing.

Boundary VMT Method

City VMT Guidelines also acknowledge that VMT analyses should evaluate project VMT impacts employing the "boundary" method. The boundary method sums all weekday

VMT on the roadway network within a designated boundary (e.g., municipal boundary or other designated geographic area).

The boundary method estimates VMT by multiplying vehicle trips on each roadway segment within the boundary by that segment's length. The product is referred to here as "boundary VMT." This approach considers all trips, including those trips that do not begin or end in the designated boundary.

Employing the boundary method, the Project VMT analysis evaluated buildout VMT within the City boundaries, under "No Project" and "With Project" conditions. Because the Project is located near the southeastern edge of the City, the Project VMT analysis also evaluated buildout VMT within an approximate 10-mile radius of the Project. This additional assessment captures all trips likely generated by, or attracted to, the Project.

Table 4.2-5 presents boundary VMT (City boundary VMT and 10-mile radius boundary VMT) for No Project and With Project scenarios under General Plan Buildout (2050) conditions. As indicated, total boundary VMT would be increased under the With Project scenario. However, the VMT/SP ratio is maintained or is reduced under With Project conditions.

Table 4.2-5
General Plan Buildout Boundary VMT

	City Boundary VMT		**10-Mile Boundary VMT**	
Scenario	**No Project**	**With Project**	**No Project**	**With Project**
Service Population	719,661	721,445	2,276,901	2,278,685
Boundary VMT	9,670,427	9,687,140	35,863,716	35,892,228
Change in Total VMT	**+16,713 VMT (+0.1728%)**		**+28,512 VMT (+0.0795%)**	
VMT/SP	13.44	13.43	15.75	15.75
Change in VMT/SP	**-0.01**		**0.00**	

Source: *Rich-Haven Specific Plan Amendment, Vehicle Miles Traveled (VMT) Analysis* (Urban Crossroads, Inc.) October 3, 2022.

Cumulative VMT Impacts

The Technical Advisory notes that ". . . metrics such as VMT per capita or VMT per employee, i.e., metrics framed in terms of efficiency (as recommended below for use on

residential and office projects), cannot be summed because they employ a denominator. A project that falls below an efficiency-based threshold that is aligned with long-term goals and relevant plans has no cumulative impact distinct from the project impact" (Technical Advisory, p. 6). As substantiated herein, the Project-level VMT impacts are less-than-significant per the City VMT Guidelines efficiency-based threshold. (VMT/SP). Per the Technical Advisory guidance, the Project cumulative VMT impacts would also be less-than-significant.

Induced VMT Assessment

Use of VMT as an environmental impact metric for transportation projects is discretionary under Section 15064.3 (b) (2) of the *CEQA Guidelines*:

> *(2) Transportation Projects. Transportation projects that reduce, or have no impact on, vehicle miles traveled should be presumed to cause a less than significant transportation impact. For roadway capacity projects, agencies have discretion to determine the appropriate measure of transportation impact consistent with CEQA and other applicable requirements. To the extent that such impacts have already been adequately addressed at a programmatic level, such as in a regional transportation plan EIR, a lead agency may tier from that analysis as provided in Section 15152.*

The Technical Advisory states that building new roadways, adding roadway capacity in congested areas, or adding roadway capacity to areas where congestion is expected in the future, typically induces additional vehicle travel. OPR identifies addition of through lanes on existing or new highways, including general purpose lanes, HOV lanes, peak period lanes, auxiliary lanes, or lanes through grade-separated interchanges as project types that would likely lead to a measurable and substantial increase in induced vehicle travel. Further, the Technical Advisory acknowledges that addition of capacity on local or collector streets, provided the project also substantially improves conditions for pedestrians, cyclists, and, if applicable, transit would not likely lead to a substantial or measurable increase in vehicle travel, and therefore generally should not require an induced travel analysis (Technical Advisory, pp. 20, 21).

It is recognized that the 2022 SPA is not a "transportation project" as defined at *CEQA Guidelines* Section 15064.3 (b) (2). However, the 2022 SPA will provide or fund local and area transportation improvements. The Project is consistent with TOP 2050. The Project would construct site-adjacent local streets, collectors, and arterials, including sidewalk and bicycle lanes that are consistent with TOP 2050 Mobility Element. Construction of these local facilities in a manner that is consistent with TOP 2050 Mobility Element would not significantly alter regional or inter-regional travel. Growth resulting from, or facilitated by, Project infrastructure improvements is anticipated under TOP 2050, and environmental impacts attributable to such growth including, but not limited to, VMT effects is considered and addressed in TOP 2050 SEIR.

While roadway improvements associated with the Project may facilitate vehicular travel within the City and surrounding areas, total VMT and environmental impacts of such travel would not result in VMT and VMT-related impacts not already considered and addressed in TOP 2050 SEIR.

Other Considerations

Alternative transportation modes and facilities (e.g., bus service, bicycle routes, pedestrian paths) are generally available within the Study Area and could potentially reduce the Project VMT. However, the VMT-reducing potentials of alternative travel modes were not considered in the Project VMT Analysis. Project VMT estimates considered in this analysis therefore represent the likely maximum Project VMT impact conditions.

4.2.2 OTHER TRANSPORTATION TOPICS

Potential Impact TR-1: *Conflict with a program, plan, ordinance or policy addressing the circulation system, including transit, roadway, bicycle and pedestrian facilities***.**

City of Ontario programs, plans, and policies addressing the circulation system are established under TOP 2050. Project consistency with applicable provisions of TOP 2050 is summarized at Table 4.2-6. As provided for under CEQA, the analysis presented here

considers program, plan, and policy inconsistencies that could result in potentially significant environmental impacts. As a matter of law, the Project would be required to comply with City ordinances addressing the Study Area circulation system.

Table 4.2-6
TOP 2050 Consistency Analysis

MOBILITY ELEMENT		
M-1 Roadway System		
Goal M1 A system of roadways that meets the mobility needs of a dynamic and prosperous Ontario.		
Policies		**Remarks**
M-1.1	**Roadway Design and Maintenance.** We require our roadways to: • Comply with federal, state and local design and safety standards. • Meet the needs of multiple transportation modes and users. • Handle the capacity envisioned in City of Ontario Master Plan of Streets and Highways. • Be maintained in accordance with best practices. • Be compatible with the streetscape and surrounding land uses. • Promote the efficient flow of all modes of traffic through the implementation of intelligent transportation systems and travel demand strategies.	**Consistent.** Project roadway designs and all proposed improvements would conform with the City's Master Plan of Streets and Highways, City design standards and applicable federal/state design and safety standards. City design review processes would ensure compliance with all applicable standards. Streetscape design concepts implemented pursuant to the 2022 Specific Plan Amendment establish compatible continuation of existing perimeter streetscapes. All public roadways would be maintained in accordance with City requirements to include implementation of City Best Management Practices and City Right-of-Way Management Plan. On this basis, the Project is considered consistent with Policy M-1.1.
M-1.2	**Mitigation of Impacts.** We require development to mitigate its traffic impacts.	**Consistent.** The Project would not result in potentially significant VMT impacts. Recommended improvements addressing potential LOS deficiencies are identified in the Project Traffic Analysis (EIR Appendix C); these improvements would be implemented consistent with City Conditions of Approval. On this basis, the Project is considered consistent with Policy M-1.2.
M-1.3	**Agency Coordination on Roadway Improvements.** We work with Caltrans, SBCTA and others to identify, fund and implement needed improvements to roadways when necessary. We work with neighboring jurisdictions to promote regional connectivity, access, and meet operational level of service standards at the City limits.	**Consistent.** Please refer to remarks at Policies M-1.1, M-1.2.

Table 4.2-6
TOP 2050 Consistency Analysis

MOBILITY ELEMENT		
M-1.4	**Complete Streets.** We work to provide a complete, balanced, context-aware, multimodal transportation network that meets the needs of all users of streets, roads, and highways, including motorists, pedestrians, bicyclists, children, persons with disabilities, seniors, movers of commercial goods, and users of public transportation. We prioritize implementation of complete streets improvements in environmental justice areas to facilitate opportunities for residents to use active transportation systems.	**Consistent.** The Project would construct site-adjacent local streets, collectors, and arterials, including sidewalk and bicycle lanes that are consistent with TOP 2050 Mobility Element. On this basis, the Project is considered consistent with Policy M-1.4.
M-1.5	**Level of Service.** Maintain a peak hour Level of Service (LOS) E or better at all intersections. Maintain Level of Service D or better on arterial streets in the City. Develop and maintain a list of locations where LOS E or LOS F are considered acceptable and would be exempt from this level of service policy. Considerations for LOS exemption include being restricted by environmental constraints, lacking available right-of-way, deterring an increase in VMT, or degrading other modes of travel (such as bicycle or pedestrian infrastructure).	**Consistent.** The City recognizes that vehicle delay (Level of Service, LOS) deficiencies are no longer environmental impacts under CEQA. For reference purposes, and in support of City circulation system planning, potential LOS deficiencies resulting from the Project have been evaluated. Recommended improvements addressing LOS deficiencies have been developed. Potential LOS deficiencies and recommended improvements are presented in detail in the Project Traffic Analysis, provided at EIR Appendix C. On this basis, the Project is considered consistent with Policy M-1.5.
M-1.6	**Reduce Vehicle Miles Traveled.** We will strive to reduce VMT through a combination of land use, transportation projects, travel demand management strategies, and other trip reduction measures in coordination with development projects and public capital improvement projects.	**Consistent.** While roadway improvements associated with the Project may facilitate vehicular travel within the City and surrounding areas, total VMT and environmental impacts of such travel would not result in VMT and VMT-related impacts not already considered and addressed in TOP 2050 SEIR. On this basis, the Project is considered consistent with Policy M-1.6.
M2 Active Transportation		
Goal M-2 A system of trails and corridors that facilitate and encourage active modes of transportation.		
Policies		**Remarks**
M-2.1	**Active Transportation.** We maintain our Active Transportation Master Plan to create a comprehensive system of on- and off-street bikeways and pedestrian	**Consistent.** Bikeways and pedestrian facilities would be implemented consistent with the City's Active Transportation Master Plan and provisions of the 2022 Specific Plan Amendment.

Table 4.2-6
TOP 2050 Consistency Analysis

MOBILITY ELEMENT		
	facilities that are safe, comfortable, and accessible and connect residential areas, businesses, schools, parks, and other key destination points.	On this basis, the Project is considered consistent with Policy M-2.1.
M-2.2	**Bicycle System.** We provide off-street multipurpose trails and Class II bikeways as our preferred paths of travel and use the Class III for connectivity in constrained circumstances. When truck routes and bicycle facilities share a right-of-way, we prefer Class I or Class IV bicycle facilities. We require new development to include bicycle facilities, such as bicycle parking and secure storage areas.	**Consistent.** Bikeways would be implemented consistent with the City's Active Transportation Master Plan and provisions of the 2022 Specific Plan Amendment. On this basis, the Project is considered consistent with Policy M-2.2.
M-2.3	**Pedestrian Walkways.** We require streets to include sidewalks and visible crosswalks at major intersections where necessary to promote safe and comfortable mobility between residential areas, businesses, schools, parks, recreation areas, and other key destination points.	**Consistent.** Pedestrian paths would be provided within the Project site and along the Project perimeter consistent with City standards and provisions of the 2022 Specific Plan Amendment. On this basis, the Project is considered consistent with Policy M-2.3.
M.2-4	**Network Opportunities.** We use public rights-of-way and easements such as, utility easements, levees, drainage corridors, road rights-of-way, medians, and other potential options to maintain and expand our bicycle and pedestrian network. In urban, mixed-use, and transit-oriented Place Types, we encourage the use of underutilized public and private spaces to expand our public realm and improve pedestrian and bicycle connectivity.	**Consistent.** Bikeways and pedestrian facilities would be implemented consistent with the City's Active Transportation Master Plan and provisions of the 2022 Specific Plan Amendment. On this basis, the Project is considered consistent with Policy M-2.4.
M-3 Public Transit		
Goal M-3 A public transit system that is a viable alternative to automobile travel and meets basic transportation needs of the transit dependent.		
Policies		**Remarks**
M-3.1	**Transit Partners.** We maintain a proactive working partnership with transit providers to ensure that adequate public transit service is available, cost-efficient, and convenient, particularly for residents in environmental justice areas.	**Consistent.** The Project would not interfere with or otherwise obstruct the City's cooperative partnership with transit providers. On this basis, the Project is considered consistent with Policy M-3.1.

Table 4.2-6
TOP 2050 Consistency Analysis

MOBILITY ELEMENT		
M-3.2	**Alternative Transit Facilities at New Development.** We require new development adjacent to an existing or planned transit stop to contribute to the creation of transit facilities, such as bus shelters, transit bays and turnouts, and bicycle facilities, such as secure storage areas.	**Consistent.** The Project would support and would not conflict with City efforts to contribute to the creation of transit facilities. To these ends the Applicant would coordinate Project development with the City and transit agencies to implement transit service and supporting amenities. Additionally, the Specific Plan design establishes residential densities that would support Bus Rapid Transit (BRT) along Haven Avenue (see: EIR Appendix B, Rich-Haven Specific Plan Amendment, Figure 3-1, *Land Use Plan*). On this basis, the Project is considered consistent with Policy M-3.2.
M-3.3	**Transit-Oriented Development.** We may provide additional development-related incentives to those inherent in the Land Use Plan for projects that promote transit use and reduce vehicle miles traveled.	**Consistent.** The Project would not interfere with or otherwise obstruct the City's incentive programs and policies. On this basis, the Project is considered consistent with Policy M-3.3.
M-3.4	**Bus Rapid Transit (BRT) Corridors.** We work with regional transit agencies to implement BRT service and reduce vehicle miles traveled by targeting destinations and corridors with the highest number of potential riders.	**Consistent.** The Project would not interfere with or otherwise obstruct the City's cooperative efforts with regional transit agencies. On this basis, the Project is considered consistent with Policy M-3.4.
M-3.5	**Light Rail.** We support extension of the Metro Rail Gold Line to Ontario, and will work to secure station locations at the proposed multimodal transit center.	**Consistent.** The 2022 Specific Plan Amendment area is not located near the potential Metro Rail Gold Line extension to the City; nor the proposed multimodal transit center. The Project would not impact, nor be impacted by, rail operations. On this basis, the Project is considered consistent with Policy M-3.5.
M-3.6	**Metrolink Expansion.** We advocate expansion of Metrolink service to include the Downtown and the multimodal transit center.	**Consistent.** The Project site is not located near the Metrolink rail line; nor the proposed multimodal transit center. The Project would not impact, nor be impacted by, Metrolink expansion. On this basis, the Project is considered consistent with Policy M-3.6.
M-3.7	**High Speed Rail.** We encourage the development of high-speed rail systems that would enhance regional mobility in Southern California and serve the City of Ontario.	**Consistent.** No railways exist within or near the Specific Plan area. The Project would not interfere with or otherwise obstruct the development of high-speed rail systems.

Table 4.2-6
TOP 2050 Consistency Analysis

MOBILITY ELEMENT		
		On this basis, the Project is considered consistent with Policy M-3.7.
M-3.8	**Feeder Systems.** We work with regional transit agencies to secure convenient feeder service from the Metrolink station and the proposed multimodal transit center to employment centers in Ontario.	**Consistent.** The site is located in an area already served by public transit. The Project would implement feeder transit facilities as required by the City through its coordination with transit agencies serving the area. On this basis, the Project is considered consistent with Policy M-3.8.
M-3.9	**Ontario Airport Metro Center Circulator.** We will explore development of a convenient mobility system, including but not limited to shuttle service, people mover, and shared car system, for the Ontario Airport Metro Center.	**Consistent.** The Specific Plan area is not located in or near the Ontario Airport Metro Center. The Project would not interfere with or otherwise obstruct the City's development of a mobility system in this area. On this basis, the Project is considered consistent with Policy M-3.9.
M-3.10	**Multimodal Transportation Center.** We intend to ensure the development of a multimodal transportation center near ONT airport to serve as a transit hub with amenities for transit riders, pedestrians, and bicyclists transitioning to local buses, BRT, the Gold Line, high-speed rail, the proposed Ontario Airport Metro Center Circulator, and other future transit modes. We support locations for the multimodal transportation center that are north of ONT airport, between Vineyard Avenue and Interstate 15.	**Consistent.** The Specific Plan area is not located in/near the area intended for development of the Multimodal Transportation Center. The Project would not interfere with or otherwise obstruct the implementation of this transit hub. On this basis, the Project is considered consistent with Policy M-3.10.
M-3.11	**Transit and Community Facilities.** We require the future development of community-wide serving facilities to be sited in transit-ready areas that can be served and made accessible by public transit. Conversely, we plan (and coordinate with other transit agencies to plan) future transit routes to serve existing community facilities.	**Consistent.** The site is located in an area already served by public transit. The Project Applicant would also coordinate with the City and transit agencies to implement transit service and thereby reduce vehicle miles traveled. On this basis, the Project is considered consistent with Policy M-3.11.
M-4 Goods Movement		
Goal M-4 An efficient flow of goods through the City that maximizes economic benefits and minimizes negative impacts.		
Policies		**Remarks**
M-4.1	**Truck Routes.** We designate and maintain a network of City truck routes that provide	**Consistent.** Trucks accessing the Project site would utilize the City's designated truck routes. Vehicular-

Table 4.2-6
TOP 2050 Consistency Analysis

MOBILITY ELEMENT		
	for the safe and efficient transport of goods while minimizing negative impacts on local circulation and noise-sensitive land uses, as shown on Exhibit M-04, Truck Routes. We will minimize conflicts on truck routes through the design and implementation of buffers between travel lanes and pedestrian and bicycle facilities on designated truck routes.	source noise and air quality impacts are evaluated within this EIR, and mitigation is proposed for those impacts determined to be potentially significant, thereby minimizing negative impacts on local circulation and noise-sensitive land uses. On this basis, the Project is considered consistent with Policy M-4.1.
M-4.2	**Regional Participation.** We work with regional and subregional transportation agencies and adjacent cities to plan and implement goods movement strategies, including regional truck routes, plans and projects that improve mobility, support the efficient movement of goods, and minimize negative environmental impacts.	**Consistent.** The Project land uses take advantage of proximate available regional transportation systems acting to facilitate mobility, goods movement, and goods delivery on a local, sub-regional and regional basis. The Project would not interfere with or otherwise obstruct City efforts and actions to coordinate regional and sub-regional plans and strategies facilitating mobility, goods movement, and goods delivery. On this basis, the Project is considered consistent with Policy M-4.2.
M-4.3	**Railroad Grade Separations.** We eliminate at-grade rail crossings identified on Exhibit M-01, Roadway Classifications.	**Consistent.** No at-grade rail crossings are located within or adjacent to the Project site. The Project would not interfere with or otherwise obstruct the City's elimination actions in this regard. On this basis, the Project is considered consistent with Policy M-4.3.
M-4.4	**Environmental Considerations.** We support both local and regional efforts to reduce/eliminate the negative environmental impacts of goods movement through the planning and implementation of truck routing and the development of a plan to evaluate the future needs of clean fueling/recharging and electrified truck parking.	**Consistent.** The 2022 Specific Plan Amendment Design Guidelines and Development Standards globally act to minimize potential environmental impacts of goods movement associated with the Project. Please refer also to remarks at Policies M-4.1, M-4.2.
M-4.5	**Air Cargo.** We support and promote a ONT airport that accommodates 1.6 million tons of cargo per year, as long as the impacts associated with that level of operations are planned for and mitigated.	**Consistent.** The 2022 Specific Plan Amendment area is not located within an identified Safety Zone of the ONT airport. The Project would not impact, nor be impacted by, ONT airport cargo operations. On this basis, the Project is considered consistent with Policy M-4.5.

Table 4.2-6
TOP 2050 Consistency Analysis

MOBILITY ELEMENT		
M-5 Regional Transportation		
Goal M-5 A proactive leadership role in helping identify and facilitate implementation of strategies that address regional transportation challenges.		
Policies		**Remarks**
M-5.1	**Regional Leadership.** We maintain a leadership role to help identify and implement potential solutions to long-term regional transportation problems.	**Consistent.** The Project would not interfere with or otherwise obstruct the City's leadership efforts and actions. On this basis, the Project is considered consistent with Policy M-5.1.
M-5.2	**Land Use Compatibility with Regional Transportation Facilities.** We work with ONT, railroads, Caltrans, SBCTA, and other transportation agencies to minimize impacts.	**Consistent.** The Project would not interfere with or otherwise obstruct the City's cooperative efforts with regional transportation agencies. On this basis, the Project is considered consistent with Policy M-5.2.

Sources: Goal and Policy statements from TOP 2050; remarks by Applied Planning, Inc.

Prior to the issuance of Building Permits, the City would review the final Project designs to ensure consistency with City Policy Plan circulation system programs, plans and policies. Consistency with applicable City ordinance requirements is required as a matter of law.

The Project does not propose facilities or activities that would otherwise potentially conflict with City circulation system programs, plans, policies and ordinances.

2020–2045 Regional Transportation Plan/Sustainable Communities Strategy (Connect SoCal 2020) Consistency

SCAG adopted the *2020–2045 Regional Transportation Plan/Sustainable Communities Strategy* (Connect SoCal 2020) in September 2020. Connect SoCal 2020 is a long-range plan that balances future mobility and housing needs with economic, environmental, and public health goals. Table 4.2-7 summarizes Project consistency with the Connect SoCal 2020.

Table 4.2-7
Project Consistency with Connect SoCal 2020

Connect SoCal 2020 Goal	Project Consistency
Goal #1: Encourage regional economic prosperity and global competitiveness	***Consistent:*** The Project is consistent with and supports TOP 2050 and TOP 2050 Community Economics Element. TOP 2050 Community Economics Element establishes goals and policies that promote economic growth and fiscal responsibility. In combination, TOP 2050 Community Economics Element goals and policies act to attract new and expanding businesses to Ontario thereby increasing the City's share of growing sectors of the regional and global economy. The Project commercial, retail, and industrial uses provide business and employment opportunities acting to further City economic prosperity. The Project does not propose or require improvements or operations that would conflict with or obstruct attainment of Connect SoCal 2020 Goal #1. On this basis, the Project is consistent with Connect SoCal 2020 Goal #1.
Goal #2: Improve mobility, accessibility, reliability, and travel safety for people and goods	***Consistent:*** The Project is consistent with and supports TOP 2050 and TOP 2050 Mobility Element. TOP 2050 Mobility Element identifies the system of roadways all users of streets, roads, and highways, including motorists, pedestrians, bicyclists, children, persons with disabilities, seniors, movers of commercial goods and users of public transportation. Per TOP 2050 Mobility Element, transportation system designs within the City are required to: • Comply with federal, state, and local design and safety standards; • Meet the needs of multiple transportation modes and users; • Provide capacity envisioned in the City of Ontario Master Plan of Streets and Highways; • Be compatible with the streetscape and surrounding land uses: and • Promote the efficient flow of all modes of transportation through the implementation of intelligent transportation systems and travel demand management strategies. As applicable, the Project Applicant would coordinate design and construction of Project transportation system improvements with the City, Caltrans, SBCTA, and others to identify, fund, and implement needed improvements. The Applicant would also comply with City of Ontario requirements addressing transportation corridors enhancements. Streets implemented by the Project would comply with applicable City addressing walkability, bicycling opportunities, and transit integration. As applicable, the Applicant would also coordinate with potentially affected agencies and municipalities to plan and implement goods movement strategies and plans, as well as improvements that support and the efficient movement of goods, while avoiding or minimizing potentially adverse environmental impacts. The Project does not propose or require improvements or operations that would conflict with or obstruct attainment of Connect SoCal 2020 Goal #2. On this basis, the Project is consistent with Connect SoCal 2020 Goal #2.
Goal #3: Enhance the preservation, security, and resilience of the regional transportation system	***Consistent***: The Project is consistent with and supports TOP 2050 Goal M-5. Under TOP 2050 Goal M-5, the City takes a proactive leadership role identifying and facilitating strategies addressing regional transportation challenges. As applicable, the Project Applicant would coordinate with the City, ONT, railroads, Caltrans, SBCTA, and other transportation agencies with regard to preservation, security, and resilience of the regional transportation system. The Project Applicant would also coordinate with potentially affected agencies and municipalities to plan and

Table 4.2-7
Project Consistency with Connect SoCal 2020

Connect SoCal 2020 Goal	Project Consistency
	implement goods movement strategies and plans, and improvements that support and the efficient movement of goods, while avoiding or minimizing potentially adverse environmental impacts. Additionally, the Project Applicant would coordinate with the City and transit agencies to implement transit service and thereby reduce vehicle miles traveled. The Project does not propose or require improvements or operations that would conflict with or obstruct attainment of SoCal Goal #3. On this basis, the Project is consistent with Connect SoCal 2020 Goal #3.
Goal #4: Increase person and goods movement and travel choices within the transportation system	***Consistent:*** The Project is consistent with and supports TOP 2050. The final Project designs would be required to comply with TOP 2050 Policies addressing implementation of multimodal transportation systems meeting the needs of all users of streets, roads, and highways, including motorists, pedestrians, bicyclists, children, persons with disabilities, seniors, movers of commercial goods and users of public transportation. The Project Applicant would also coordinate with the City and transit agencies to implement transit service and thereby reduce vehicle miles traveled. Additionally, the Project Applicant would coordinate with potentially affected agencies and municipalities to plan and implement goods movement strategies and plans, and improvements that support and the efficient movement of goods, while avoiding or minimizing potentially adverse environmental impacts. The Project does not propose or require improvements or operations that would conflict with or obstruct attainment of Connect SoCal 2020 Goal #4. On this basis, the Project is consistent with Connect SoCal 2020 Goal #4.
Goal #5: Reduce greenhouse gas emissions and improve air quality	***Consistent:*** The Project is consistent with and supports TOP 2050 and the 2022 Community Climate Action Plan Update (2022 CCAP Update) implemented under TOP 2050. As substantiated at EIR Section 4.4, *Greenhouse Gas Emissions*, Project GHG emissions would be reduced to the extent feasible. In this regard, certain of the Mitigation Measures identified at EIR Section 4.3, *Air Quality* would incrementally reduce Project-source air pollutant emissions and in so-doing would also act to generally reduce GHG emissions. The Project collocates residential, commercial and industrial uses with proximate access to the local and regional roadway system. In this manner, the Project minimizes VMT and resulting vehicular-source air pollutant emissions. It is recognized that the Project would result in certain regionally significant and unavoidable air quality impacts. The Project would implement measures that would reduce these impacts to the extent feasible (please refer to EIR Mitigation Measures 4.3.1 through 4.3.18). The Project would not result in any locally significant air quality impacts, or air quality conditions that would result in adverse health effects. (see: EIR Section 4.3, *Air Quality*). The Project does not propose or require improvements or operations that would conflict with or obstruct attainment of Connect SoCal 2020 Goal #5. On this basis, the Project is consistent with Connect SoCal 2020 Goal #5.
Goal #6: Support healthy and equitable communities	***Consistent:*** The Project is consistent with and supports TOP 2050 and TOP 2050 *Social Resources Element*. TOP 2050, *Social Resources Element*, identifies quality and accessible health care, education, community services, and cultural activities as critical components to achieving Ontario's Vision. The Project collocates a range of

Table 4.2-7
Project Consistency with Connect SoCal 2020

Connect SoCal 2020 Goal	Project Consistency
	housing products and employment-generating commercial and industrial uses, thereby furthering City goals to provide a range of housing types and employment opportunities. In this regard, the Project acts to improve the balance between jobs and housing in the San Bernardino County subregion while reducing vehicle miles traveled and associated air quality impacts and air quality related health impacts. As substantiated in this EIR, the Project would not result in any adverse health impacts. All Project uses would be required to provide equitable access for all persons. The Project does not propose or require improvements or operations that would conflict with or obstruct attainment of Connect SoCal 2020 Goal #6. On this basis, the Project is consistent with Connect SoCal 2020 Goal #6.
Goal #7: Adapt to a changing climate and support an integrated regional development	***Consistent:*** The Project is consistent with and supports TOP 2050 and the 2022 CCAP Update implemented under TOP 2050. As substantiated at EIR Section 4.4, *Greenhouse Gas Emissions*, Project GHG emissions would be reduced to the extent feasible. In this regard, certain of the Mitigation Measures identified at EIR Section 4.3, *Air Quality* would incrementally reduce Project-source air pollutant emissions and in so-doing would also act to generally reduce GHG emissions. Collocated housing, commercial uses, and industrial development proposed by the Project support integrated development within the City and region. The Project does not propose or require improvements or operations that would conflict with or obstruct attainment of Connect SoCal 2020 Goal #7. On this basis, the Project is consistent with Connect SoCal 2020 Goal #7.
Goal #8: Leverage new transportation technologies and data-driven solutions that result in more efficient travel	***Consistent:*** The Project is consistent with and supports TOP 2050 and TOP 2050 Mobility Element. The Mobility Element identifies the system of roadways all users of streets, roads, and highways, including motorists, pedestrians, bicyclists, children, persons with disabilities, seniors, movers of commercial goods and users of public transportation. The Project supports efficient travel through collocation of complementary uses proximate to local and regional roadway systems. The Project final designs would include pedestrian and bicycle access and associated amenities consistent with City requirements. The Project does not propose or require improvements or operations that would conflict with or obstruct attainment of Connect SoCal 2020 Goal #8. On this basis, the Project is consistent with Connect SoCal 2020 Goal #8.
Goal #9: Encourage development of diverse housing types in areas that are supported by multiple transportation options	***Consistent:*** The Project is consistent with and supports TOP 2050 and TOP 2050 housing policies. The Project provides a range of housing products available to all persons. The Project site is currently served by improved roadways, and the Project would construct new and improved roadways adequate to serve traffic within the Project site, and ensure that Project traffic does not contribute to or case adverse traffic conditions. The Project final designs would include pedestrian and bicycle access and associated amenities consistent with City requirements. The Project does not propose or require improvements or operations that would conflict with or obstruct attainment of Connect SoCal 2020 Goal #9. On this basis, the Project is consistent with Connect SoCal 2020 Goal #9.
Goal #10: Promote conservation of natural	***Consistent:*** The Project is consistent with and supports TOP 2050. TOP 2050 Goal ER-5 is to protect high value habitat and farming resource activities that are

Table 4.2-7
Project Consistency with Connect SoCal 2020

Connect SoCal 2020 Goal	Project Consistency
and agricultural lands and restoration of habitats	compatible with adjacent development. As substantiated at EIR Section 4.10, *Biological Resources* there are no valuable or protected natural agricultural lands or habitat within the Project site. This EIR further substantiates that the Project would not result in potentially adverse biological resources impacts. The Project does not propose or require improvements or operations that would conflict with or obstruct attainment of Connect SoCal 2020 Goal #10. On this basis, the Project is consistent with Connect SoCal 2020 Goal #10.

Sources: Connect SoCal 2020; TOP 2050 SEIR; remarks by Applied Planning, Inc.

Level of Significance: Less-Than-Significant.

Potential Impact TR-2: *Substantially increase hazards to a geometric design feature (e.g., sharp curves or dangerous intersections) or incompatible uses (e.g., farm equipment) or result in inadequate emergency access.*

Impact Analysis: As part of the City's established design review processes, design and implementation of all Project circulation improvements, as well as final design(s) of the Project site plan(s), to include locations and design of proposed driveways, would be required to be reviewed and approved by the City Traffic Engineer. In addition, as part of the City's established design review processes, representatives of the City's Police and Fire Departments would review the Project's plans in regard to emergency access. Efficient and safe operations of the Project would be provided by on-site and localized circulation and intersection improvements to be developed as the Project individual site and building designs are finalized. The City would ensure that all on-site and localized circulation and intersection improvements would be designed and constructed consistent with applicable provisions of the 2022 Specific Plan Amendment and pursuant to City site plan and Building Permit review processes and requirements.

Traffic signing and striping would be implemented in conjunction with detailed Project construction plans. Sight distance at each project access point would be reviewed with

respect to standard Caltrans and City of Ontario sight distance standards at the time of preparation of final grading, landscape and street improvement plans.

It is also recognized that temporary and short-term traffic detours and traffic disruption could result during Project construction activities. Management and control of construction traffic would be addressed through the preparation and submittal of a construction area traffic management plan, to be reviewed and approved by City prior to or concurrent with Project building plan review(s). The Project Construction Area Traffic Management Plan (Plan), incorporated in the EIR Project Description, would be required to identify traffic controls for any street closures, detours, or other potential disruptions to traffic circulation during Project construction. The Plan would also be required to identify construction vehicle access routes, and hours of construction traffic.

The Project would generate passenger car trips and truck trips typical of the proposed uses. As part of established site and Building Permit review processes, the City would require implementation of on-site truck and passenger car travel paths, signing, and traffic controls to ensure that conflicts between trucks and passenger cars are minimized or avoided. Trucks accessing the Project site would use designated truck routes, thereby avoiding or minimizing off-site passenger car/truck traffic conflicts. Land uses proximate to the Project site are planned for, or are developed with urban uses similar to those proposed by the Project. These uses would generate urban traffic types similar to traffic generated by the Project and would not generate traffic that would be incompatible with the Project traffic types.

As supported by the preceding discussions, the potential for the Project to substantially increase hazards to a design feature (e.g., sharp curves or dangerous intersections) or incompatible uses (e.g., farm equipment); or result in inadequate emergency access is considered less-than-significant.

Level of Significance: Less-Than-Significant.

4.3 AIR QUALITY

4.3 AIR QUALITY

Abstract

This Section identifies and addresses potential air quality impacts that may result from construction and implementation of the Project. More specifically, the air quality analysis presented here evaluates the potential for the Project to result in the following impacts:

- *Conflict with or obstruct implementation of the applicable air quality plan.*
- *Result in a cumulatively considerable net increase of any criteria pollutant for which the project region is non-attainment under an applicable federal or state ambient air quality standard.*
- *Expose sensitive receptors to substantial pollutant concentrations.*

As discussed within this Section, even with the implementation of mitigation, the Project will result in certain significant and unavoidable air quality impacts. Specifically, Project construction-source emissions would exceed applicable South Coast Air Quality Management District (SCAQMD) thresholds for NOx and CO. Project operational-source emissions would exceed applicable SCAQMD thresholds for VOC, NOx, CO, PM_{10} and $PM_{2.5}$. All other Project air quality impacts would be less-than-significant or less-than-significant as mitigated.

4.3.1 INTRODUCTION

This Section presents existing air quality conditions and identifies potential air quality impacts resulting from construction and operations of the Project. Local and regional climate, meteorology and air quality are discussed, as well as existing federal, state and regional air quality regulations. The information presented in this Section is

summarized from: *Rich-Haven Specific Plan, 2022 Amendment, Air Quality Impact Analysis, City of Ontario* (Urban Crossroads, Inc.) November 8, 2022 (Project AQIA); and *Rich-Haven Specific Plan, 2022 Amendment, Mobile Source Heath Risk Assessment, City of Ontario* (Urban Crossroads, Inc.) November 8, 2022 (Project HRA). The Project AQIA and Project HRA, including all supporting modeling data, are presented at EIR Appendix D.

4.3.2 AIR QUALITY FUNDAMENTALS

Air pollution comprises many substances generated from a variety of sources, both man-made and natural. Industrialization occurring in the twentieth century, and especially activities relying on the burning of fossil fuels, creates air pollution. Most air pollutant contaminants are wasted energy in the form of unburned fuels or by-products of the combustion process. Motor vehicles are by far the most significant source of air pollutants in urban areas, emitting photochemically reactive hydrocarbons (unburned fuel), carbon monoxide, and oxides of nitrogen. These primary pollutants chemically react in the atmosphere with sunlight and the passage of time to form secondary pollutants such as ozone.

Air pollutants are generally classified as either primary or secondary pollutants. Primary pollutants are generated daily and emitted directly from the source, whereas secondary pollutants are created over time and occur within the atmosphere as chemical and photochemical reactions take place. Examples of primary pollutants include carbon monoxide (CO), oxides of nitrogen (NO_2 and NO), sulfur dioxide (SO_2), particulate matter (PM_{10} and $PM_{2.5}$), and various hydrocarbons or reactive organic gases (ROG). Examples of secondary pollutants include ozone (O_3), which is a product of the reaction between NO_X and ROG in the presence of sunlight. Other secondary pollutants include photochemical aerosols.

To aid in the review of discussions presented subsequently in this Section, recurring terms, abbreviations, and acronyms are defined as follows: PPM - Parts per Million; $\mu g/m^3$ - Micrograms Per Cubic Meter; PM_{10} - Particulate Matter Less Than 10 Microns In Diameter; $PM_{2.5}$ - Particulate Matter Less Than 2.5 Microns In Diameter.

4.3.2.1 Criteria Air Pollutants

Criteria air pollutants are those air contaminants for which air quality standards currently exist. Currently, state and federal air quality standards exist for ozone, nitrogen dioxide (NO_2), sulfur dioxide (SO_2), carbon monoxide (CO), suspended particulate matter (PM_{10} and $PM_{2.5}$), and lead. California has also set standards for visibility, sulfates, hydrogen sulfide, and vinyl chloride. Evaluated criteria air contaminants, or their precursors, typically also include reactive organic gases (ROG), oxides of nitrogen (NO_X), sulfur oxides (SO_x), and respirable particulate matter (PM_{10}, $PM_{2.5}$). Pollutant characteristics, mechanisms of pollutant origination and potential health effects of air pollutants are described below.

Carbon Monoxide

Properties and Sources

Carbon monoxide (CO) is a colorless, odorless, toxic gas formed by incomplete combustion of fossil fuels. CO levels tend to be highest during the winter mornings, when little to no wind and surface-based inversions trap the pollutant at ground levels. Because CO is emitted directly from internal combustion engines, motor vehicles operating at slow speeds are the primary source of CO in the Basin. The highest CO concentrations are generally found near congested transportation corridors and intersections. Other sources include aircraft, off-road vehicles, stationary equipment (e.g., fuel-fired furnaces, gas water heaters, fireplaces, gas stoves, gas dryers, charcoal grills), and landscape maintenance equipment such as lawnmowers and leaf blowers.

Human Health Effects

A consistent association between increased ambient CO levels and higher-than-average rates of hospital admissions for heart diseases (such as congestive heart failure) has been observed. Carbon monoxide can cause decreased exercise capacity, and adversely affects conditions with an increased demand for oxygen supply (fetal development, chronic hypoxemia, anemia, and diseases involving the heart and blood vessels). Exposure to CO can cause impairment of time interval estimation and visual function.

Ozone

Properties and Sources

Ozone (O_3) is a highly reactive and unstable gas that is formed when volatile organic compounds (VOC) and oxides of nitrogen (NO_X), which are both byproducts of internal combustion engine exhaust, undergo slow photochemical reactions in the presence of sunlight. Ozone concentrations are generally highest during the summer months when direct sunlight, light wind, and warm temperature conditions are favorable to the formation of the pollutant.

Human Health Effects

Short-term exposure to ozone can cause a decline in pulmonary function in healthy individuals including breathing pattern changes, reduction of breathing capacity, increased susceptibility to infections, inflammation of the lung tissue and immunological changes. Additionally, an increase in the frequency of asthma attacks, cough, chest discomfort and headache can result.

A correlation has been reported between elevated ambient ozone levels and increases in daily hospital admission rates and mortality because of long-term ozone exposure. A risk to public health implied by altered connective tissue metabolism and host defense in animals has also been reported.

Oxides of Nitrogen

Properties and Sources

Oxides of nitrogen (NO_X) are integral to the process of photochemical smog production. During combustion, oxygen reacts with nitrogen to produce NO_X. Two major forms of NO_X are nitric oxide (NO) and nitrogen dioxide (NO_2). Natural causal sources or originators of NO_X include lightning, soils, wildfires, stratospheric intrusion, and the oceans. Natural sources accounted for approximately seven percent of 1990 emissions of NO_X for the United States (EPA 1997). Atmospheric deposition of NO_X occurs when atmospheric or airborne nitrogen is transferred to water, vegetation, soil, or other

materials. Acid deposition involves the deposition of nitrogen and/or sulfur acidic compounds that can harm natural resources and materials. The major source of NO_X in the Basin is on-road vehicles. Stationary commercial and service source fuel combustion are other contributors.

Human Health Effects

Exposure to NO_X may alter sensory responses or impair pulmonary function and may increase incidence of acute respiratory disease including infections and respiratory symptoms in children. Difficulty breathing in healthy individuals, as well as bronchitic groups, may also occur. NO_X is also a precursor to ozone and $PM_{10}/PM_{2.5}$. As noted above, health effects of ground-level ozone include: aggravated asthma; reduced lung capacity; increased respiratory illness susceptibility; increased respiratory and cardiovascular hospitalizations; and premature deaths.

Sulfur Dioxide

Properties and Sources

Sulfur dioxide (SO_2) is a colorless, pungent gas. At levels greater than 0.5 ppm, SO_2 has a strong odor. Sulfuric acid is formed from sulfur dioxide, which is an aerosol particle component that affects acid deposition. Anthropogenic, or human-caused, sources include fossil-fuel combustion, mineral ore processing, and chemical manufacturing. Volcanic emissions are a natural source of sulfur dioxide. SO_2 is a precursor to sulfates and PM_{10}.

Human Health Effects

Health effects of SO_2 include higher frequencies of acute respiratory symptoms (including airway constriction in some asthmatics and reduction in breathing capacity leading to severe difficulties) and diminished ventilatory function in children. Extreme exposure can cause lung edema (fluid accumulation), lung tissue damage, and damage to lining of the respiratory tract.

Particulate Matter

Properties and Sources

Particulate matter is a generic term that defines a broad group of chemically and physically different particles (either liquid droplets or solids) that can exist over a wide range of sizes. Examples of atmospheric particles include those produced from combustion (diesel soot or fly ash), light (urban haze), sea spray (salt particles), and soil-like particles from re-suspended dust. Fugitive dust is defined as any solid particulate matter that becomes airborne, other than that emitted from an exhaust stack, directly or indirectly because of human activities (Rule 403, Fugitive Dust, MDAQMD).

Within air quality analyses, particulate matter is categorized by diameter: PM_{10} and $PM_{2.5}$. PM_{10} refers to particulate matter that is 10 microns or less in diameter (1 micron is one millionth of a meter, or one micrometer [μm]). $PM_{2.5}$ refers to particulate matter that is 2.5 microns or less in diameter. The size of particles can determine the residence time of the material in the atmosphere. $PM_{2.5}$ has a longer atmospheric lifetime than PM_{10} and, therefore, can be transported over longer distances.

Particulate matter originates from a variety of stationary and mobile sources. Stationary sources that generate particulate matter include: fuel combustion for electric utilities, residential space heating, and industrial processes; construction and demolition; metals, minerals, and petrochemicals; wood products processing; mills and elevators used in agriculture; erosion from tilled lands; waste disposal and recycling. Mobile or transportation-related sources that generate particulate matter include highway vehicles, non-road vehicles and fugitive dust from paved and unpaved roads.

Human Health Effects

A consistent correlation between elevated ambient PM_{10} levels and an increase in mortality rates, respiratory infections, number and severity of asthma attacks and the number of hospital admissions has been observed.[1]

Diesel Particulate Matter (DPM), a subcategory of particulate matter, is a mixture of many exhaust particles and gases that is produced when an engine burns diesel fuel. Many compounds found in diesel exhaust are carcinogenic, including sixteen compounds that are classified as possibly carcinogenic by the International Agency for Research on Cancer. DPM includes the particle-phase constituents in diesel exhaust. Some short-term (acute) effects of diesel exhaust include eye, nose, throat and lung irritation, as well as coughs, headaches, light-headedness and nausea. Diesel exhaust is a major source of ambient particulate matter pollution, and numerous studies have linked elevated particle levels in the air to increased hospital admission, emergency room visits, asthma attacks, and premature deaths among those suffering from respiratory problems. DPM in the Basin poses the greatest cancer risk of all identified toxic air pollutants.

Additionally, Valley Fever may also be transmitted through PM_{10} and $PM_{2.5}$ emissions. The Mayo Clinic provides the following overview of Valley Fever.

> Valley fever is a fungal infection caused by coccidioides (kok-sid-e-OY-deze) organisms. It can cause signs and symptoms such as a fever, cough and tiredness.
>
> Two coccidioides fungi species cause valley fever. These fungi are commonly found in soil in specific regions. The fungi's spores can be stirred into the air by anything that disrupts the soil, such as farming, construction and wind. People can then breathe the fungi into their lungs.

[1] www.aqmd.gov/docs/default-source/planning/air-quality-guidance/appendix-c.pdf

> The fungi can cause valley fever, also known as acute coccidioidomycosis (kok-sid-e-oy-doh-my-KOH-sis). Mild cases of valley fever usually resolve on their own. In more-severe cases, doctors treat the infection with antifungal medications.[2]

Reactive Organic Gases

Properties and Sources

Reactive Organic Gases (ROGs) (also termed Volatile Organic Compounds [VOCs]) are defined as any compound of carbon, excluding carbon monoxide, carbon dioxide, carbonic acid, metallic carbides or carbonates, and ammonium carbonate, which participates in atmospheric photochemical reactions. There is no state or national ambient air quality standard for ROGs because they are not classified as criteria pollutants. They are regulated, however, because a reduction in ROG emissions reduces certain chemical reactions that contribute to the formulation of ozone. ROGs are also transformed into organic aerosols in the atmosphere, which contribute to higher PM_{10} and lower visibility. The major sources of ROGs in the Basin are on-road motor vehicles and solvent evaporation. ROGs are also an ozone and PM_{10}/$PM_{2.5}$ precursor.

Human Health Effects

As described previously, health effects of ground-level ozone include: aggravated asthma; reduced lung capacity; increased respiratory illness susceptibility; increased respiratory and cardiovascular hospitalizations; and premature deaths.

Benzene is a reactive organic compound and a known carcinogen. Typical sources of benzene emissions include: gasoline service stations (fuel evaporation), motor vehicle exhaust, tobacco smoke, and oil and coal incineration. Benzene is also sometimes employed as a solvent for paints, inks, oils, waxes, plastic, and rubber. It is used in the extraction of oils from seeds and nuts. It is also used in the manufacture of detergents,

[2] "Valley Fever - Symptoms and Causes." Mayo *Clinic*, 4 Aug. 2020, www.mayoclinic.org/diseases-conditions/valley-fever/symptoms-causes/syc-20378761. Accessed 19 Apr. 2022.

explosives, dyestuffs, and pharmaceuticals. Short-term (acute) exposure to high doses from inhalation of benzene may cause dizziness, drowsiness, headaches, eye irritation, skin irritation, and respiratory tract irritation, and at higher levels, unconsciousness can occur. Long-term (chronic) occupational exposure to high doses by inhalation has caused blood disorders, including aplastic anemia and lower levels of red blood cells.

4.3.3 SETTING

4.3.3.1 Local and Regional Climate

The Project site is located in the South Coast Air Basin (Basin), a 6,745-square-mile subregion of the SCAQMD, which includes the non-desert portions of Los Angeles, Riverside, and San Bernardino Counties, and all of Orange County. The SCAQMD was created by the 1977 Lewis-Presley Air Quality Management Act, which merged four county air pollution control bodies into one regional district. Under the Act, the SCAQMD is responsible for bringing air quality in areas under its jurisdiction into conformity with federal and state air quality standards.

The Basin is bounded by the Pacific Ocean to the west and the San Gabriel, San Bernardino, and San Jacinto Mountains to the north and east, and the San Diego Air Basin to the south.

The regional climate has a substantial influence on air quality in the Basin. In addition, the temperature, wind, humidity, precipitation, and amount of sunshine influence the air quality.

The annual average temperatures throughout the Basin vary from the low to middle 60s degrees Fahrenheit (°F). Due to a decreased marine influence, the eastern portion of the Basin shows greater variability in average annual minimum and maximum temperatures. January is the coldest month throughout the Basin, with average minimum temperatures of 47°F in downtown Los Angeles and 36°F in San Bernardino. All portions of the Basin have recorded maximum temperatures above 100°F.

Although the climate of the Basin can be characterized as semi-arid, the air near the land surface is quite moist on most days because of the presence of a marine layer. This shallow layer of sea air is an important modifier of Basin climate. Humidity restricts visibility in the Basin, and the conversion of sulfur dioxide (SO_2) to sulfates (SO_4) is heightened in air with high relative humidity. The marine layer provides an environment for that conversion process, especially during the spring and summer months. The annual average relative humidity within the Basin is 71 percent (%) along the coast and 59% inland. Since the ocean effect is dominant, periods of heavy early morning fog are frequent and low stratus clouds are a characteristic feature. These effects decrease with distance from the coast.

More than 90% of the Basin's rainfall occurs from November through April. The annual average rainfall varies from approximately nine inches in Riverside to fourteen inches in downtown Los Angeles. Monthly and yearly rainfall totals are extremely variable. Summer rainfall usually consists of widely scattered thunderstorms near the coast and slightly heavier shower activity in the eastern portion of the Basin with frequency being higher near the coast.

Due to its generally clear weather, about three-quarters of available sunshine is received in the Basin. The remaining one-quarter is absorbed by clouds. The ultraviolet portion of this abundant radiation is a key factor in photochemical reactions. On the shortest day of the year, there are approximately 10 hours of possible sunshine, and on the longest day of the year, there are approximately 14½ hours of possible sunshine.

The importance of wind to air pollution is considerable. The direction and speed of the wind determines the horizontal dispersion and transport of the air pollutants. During the late autumn to early spring rainy season, the Basin is subjected to wind flows associated with the traveling storms moving through the region from the northwest. This period also brings five to ten periods of strong, dry offshore winds, locally termed "Santa Anas" each year. During the dry season, which coincides with the months of maximum photochemical smog concentrations, the wind flow is bimodal, typified by a daytime onshore sea breeze and a nighttime offshore drainage wind. Summer wind

flows are created by the pressure differences between the relatively cold ocean and the unevenly heated and cooled land surfaces that modify the general northwesterly wind circulation over southern California. Nighttime drainage begins with the radiational cooling of the mountain slopes. Heavy, cool air descends the slopes and flows through the mountain passes and canyons as it follows the lowering terrain toward the ocean. Another characteristic wind regime in the Basin is the "Catalina Eddy," a low level cyclonic (counterclockwise) flow centered over Santa Catalina Island which results in an offshore flow to the southwest. On most spring and summer days, some indication of an eddy is apparent in coastal sections.

In the Basin, there are two distinct temperature inversion structures that control vertical mixing of air pollution. During the summer, warm high-pressure descending (subsiding) air is undercut by a shallow layer of cool marine air. The boundary between these two layers of air is a persistent marine subsidence/inversion. This boundary prevents vertical mixing which effectively acts as an impervious lid to pollutants over the entire Basin. The mixing height for the inversion structure is normally situated 1,000 to 1,500 feet above mean sea level.

A second inversion-type forms in conjunction with the drainage of cool air off the surrounding mountains at night followed by the seaward drift of this pool of cool air. The top of this layer forms a sharp boundary with the warmer air aloft and creates nocturnal radiation inversions. These inversions occur primarily in the winter, when nights are longer and onshore flow is weakest. They are typically only a few hundred feet above mean sea level. These inversions effectively trap pollutants, such as nitrogen oxides (NOX) and carbon monoxide (CO) from vehicles, as the pool of cool air drifts seaward. Winter is therefore a period of high levels of primary pollutants along the coastline.

4.3.3.2 Existing Air Quality

Existing air quality is measured at established SCAQMD air quality monitoring stations. Monitored air quality is evaluated in the context of ambient air quality standards. These standards are the levels of air quality that are considered safe, with an adequate margin of safety, to protect the public health and welfare.

The determination of whether a region's air quality is healthful or unhealthful is determined by comparing contaminant levels in ambient air samples to the state and federal standards. The air quality in a region is considered to be in attainment by the state if the measured ambient air pollutant levels for O_3, CO (except 8-hour Lake Tahoe), SO_2 (1 and 24 hour), NO_2, PM_{10}, and $PM_{2.5}$ are not to be exceeded. All others are not to be equaled or exceeded. Conversely, nonattainment means that an area has monitored air quality that does not meet the NAAQS or CAAQS standards. In order to improve air quality in nonattainment areas, a State Implementation Plan (SIP) is drafted by CARB. The SIP outlines the measures that the state will take to improve air quality. Once nonattainment areas meet the standards and additional redesignation requirements, the EPA will designate the area as a maintenance area. Please refer also to the Project AQIA, Table 2-2, *Ambient Air Quality Standards*.

Regional Air Quality

Air pollution contributes to a wide variety of adverse health effects. The EPA has established NAAQS for six of the most common air pollutants: CO, Pb, O_3, particulate matter (PM_{10} and $PM_{2.5}$), NO_2, and SO_2 which are known as criteria pollutants. The SCAQMD monitors levels of various criteria pollutants at 37 permanent monitoring stations and 5 single-pollutant source Pb air monitoring sites throughout the air district. On January 5, 2021, CARB posted the 2020 amendments to the state and national area designations. See Table 4.3-1 for attainment designations for the Basin.

Table 4.3-1
Criteria Pollutant Attainment Status Designations

Criteria Pollutant	State Designation	Federal Designation
O_3 – 1-hour standard	Nonattainment	--
O_3 – 8-hour standard	Nonattainment	Nonattainment
PM_{10}	Nonattainment	Attainment
$PM_{2.5}$	Nonattainment	Nonattainment
CO	Attainment	Unclassifiable/Attainment
NO_2	Attainment	Unclassifiable/Attainment
SO_2	Attainment	Unclassifiable/Attainment
Pb	Attainment	Unclassifiable/Attainment

Local Air Quality

The Project site is located within the Southwest San Bernardino Valley area (Source Receptor Areas [SRA] 33). The CA-60 Near Road monitoring station is located 2.52 miles northwest of the Project site and is the nearest long-term air quality monitoring site for NO_2 and $PM_{2.5}$. The SCAQMD I-10 Near Road monitoring station is located 4.24 miles northeast of the Project site and is the next nearest monitoring site within SRA 33. The I-10 Near Road monitoring station provides data for CO. Relative to the Project site, the nearest long-term air quality monitoring site for O_3 and PM_{10} is the SCAQMD Northwest San Bernardino Valley (SRA 32) monitoring station located 7.17 miles northwest of the Project site. It should be noted that the Northwest San Bernardino Valley monitoring station was utilized in lieu of the CA-60 Near Road and I-10 Near Road monitoring stations only in instances where data was not available.

The most recent three (3) years of data available are shown on Table 4.3-2 and identifies the number of days ambient air quality standards were exceeded for the study area, which is considered to be representative of the local air quality at the Project site. Data for O_3, CO, NO_2, PM_{10}, and $PM_{2.5}$ for 2018 through 2020 was obtained from the SCAQMD Air Quality Data Tables. Additionally, data for SO_2 has been omitted as attainment is regularly met in the Basin and few monitoring stations measure SO_2 concentrations.

Table 4.3-2
Project Area Air Quality Monitoring Summary

Pollutant	Standard	Year		
		2018	2019	2020
O_3				
Maximum Federal 1-Hour Concentration (ppm)		0.133	0.131	0.158
Maximum Federal 8-Hour Concentration (ppm)		0.111	0.107	0.123
Number of Days Exceeding State 1-Hour Standard	> 0.09 ppm	25	31	82
Number of Days Exceeding State/Federal 8-Hour Standard	> 0.070 ppm	52	52	114
CO				
Maximum Federal 1-Hour Concentration	> 35 ppm	1.6	1.5	1.5
Maximum Federal 8-Hour Concentration	> 20 ppm	1.3	1.1	1.2
NO_2				
Maximum Federal 1-Hour Concentration	> 0.100 ppm	0.079	0.087	0.101
Annual Federal Standard Design Value		0.030	0.029	0.029
PM_{10}				
Maximum Federal 24-Hour Concentration ($\mu g/m^3$)	> 150 $\mu g/m^3$	73	125	63
Annual Federal Arithmetic Mean ($\mu g/m^3$)		32.3	28.1	30.5
Number of Days Exceeding Federal 24-Hour Standard	> 150 $\mu g/m^3$	0	0	0
Number of Days Exceeding State 24-Hour Standard	> 50 $\mu g/m^3$	14	7	12
$PM_{2.5}$				
Maximum Federal 24-Hour Concentration ($\mu g/m^3$)	> 35 $\mu g/m^3$	47.90	41.30	53.10
Annual Federal Arithmetic Mean ($\mu g/m^3$)	> 12 $\mu g/m^3$	14.31	12.70	14.36
Number of Days Exceeding Federal 24-Hour Standard	> 35 $\mu g/m^3$	5	5	4

4.3.4 REGULATORY BACKGROUND

4.3.4.1 Federal Regulations

The U.S. Environmental Protection Agency (EPA) is responsible for setting and enforcing the NAAQS for O_3, CO, NO_x, SO_2, PM_{10}, and lead. The U.S. EPA has jurisdiction over emissions sources that are under the authority of the federal government including aircraft, locomotives, and emissions sources outside state waters (Outer Continental Shelf). The U.S. EPA also establishes emission standards for vehicles sold in states other than California. Automobiles sold in California must meet the stricter emission requirements of the California Air Resource Board (CARB).

The Federal Clean Air Act (CAA) was first enacted in 1955, and has been amended numerous times in subsequent years (1963, 1965, 1967, 1970, 1977, and 1990). The CAA establishes the NAAQS, and specifies NAAQS compliance dates. The CAA also mandates that states submit and implement State Implementation Plans (SIPs) for local areas not meeting these Standards. SIPs must include pollution control measures demonstrating how Standards will be met.

The 1990 amendments to the CAA that identify specific emission reduction goals for areas not meeting the NAAQS require a demonstration of reasonable further progress toward attainment and incorporate additional sanctions for failure to attain or to meet interim milestones. The sections of the CAA most directly applicable to the development of the Project site include Title I (Non-Attainment Provisions) and Title II (Mobile Source Provisions).

Title I provisions were established with the goal of attaining the NAAQS for the criteria pollutants: O_3, NO_2, SO_2, PM_{10}, CO, $PM_{2.5}$, and lead. The NAAQS were amended in July 1997 to include an additional standard for O_3 and to adopt a NAAQS for $PM_{2.5}$.

Mobile-source emissions are regulated in accordance with Title II provisions. These provisions require the use of cleaner burning gasoline and other cleaner burning fuels such as methanol and natural gas. Automobile manufacturers are also required to reduce tailpipe emissions of hydrocarbons and NO_x. NO_x is a collective term that includes all forms of nitrogen oxides (NO, NO_2, NO_3) which are emitted as byproducts of the combustion process.

4.3.4.2 California

California Air Resources Board (CARB)

CARB, which became part of the California EPA in 1991, is responsible for ensuring implementation of the California Clean Air Act (AB 2595), responding to the federal CAA, and for regulating emissions from consumer products and motor vehicles. The California CAA mandates achievement of the maximum degree of emissions reductions

possible from vehicular and other mobile sources in order to attain the state ambient air quality standards by the earliest practical date. CARB established the CAAQS for all pollutants for which the federal government has NAAQS and, in addition, establishes standards for sulfates, visibility, hydrogen sulfide, and vinyl chloride. However, at this time, hydrogen sulfide and vinyl chloride are not measured at any monitoring stations in the SCAB because they are not considered to be a regional air quality problem. Generally, the CAAQS are more stringent than the NAAQS.

Local air quality management districts, such as the SCAQMD, regulate air emissions from commercial and light industrial facilities. All air pollution control districts have been formally designated as attainment or non-attainment for each CAAQS.

Serious non-attainment areas are required to prepare air quality management plans (AQMPs) that include specified emission reduction strategies in an effort to meet clean air goals. These plans are required to include:

- Application of Best Available Retrofit Control Technology to existing sources;
- Developing control programs for area sources (e.g., architectural coatings and solvents) and indirect sources (e.g., motor vehicle use generated by residential and commercial development);
- A District-permitting system designed to allow no net increase in emissions from any new or modified permitted sources of emissions;
- Implementing reasonably available transportation control measures and assuring a substantial reduction in growth rate of vehicle trips and miles traveled;
- Significant use of low emissions vehicles by fleet operators;
- Sufficient control strategies to achieve a five percent or more annual reduction in emissions or 15 percent or more in a period of three years for ROGs, NO_x, CO and PM_{10}. However, air basins may use alternative emission reduction strategy that achieves a reduction of less than five percent per year under certain circumstances.

Title 24 Building Energy Efficiency Standards

California Code of Regulations (CCR) Title 24 Part 6: *Building Energy Efficiency Standards for Residential and Nonresidential Buildings* was first adopted in 1978 in response to a legislative mandate to reduce California's energy consumption. The Title 24 standards are updated periodically to allow consideration and possible incorporation of new energy efficient technologies and methods. Energy efficient buildings require less electricity; therefore, increased energy efficiency reduces fossil fuel consumption and decreases greenhouse gas (GHG) emissions. The analysis presented herein reflects compliance with the current (2019) Title 24 Standards. The 2019 California Energy Code can be accessed at: https://codes.iccsafe.org/content/CACEC2019JAN20E/cover.

Title 24 California Green Building Standards Code

CCR, Title 24, Part 11: *California Green Building Standards Code* (CALGreen) is a comprehensive and uniform regulatory code for all residential, commercial, and school buildings that went in effect on January 1, 2011. CALGreen is updated on a regular basis. The most recent (2019) update to the CALGreen standards became effective January 1, 2020. Local jurisdictions are permitted to adopt more stringent requirements. The California Green Building Standards Code can be accessed at: https://codes.iccsafe.org/content/CAGBC2019JUL21S/cover. The Project would be required to comply with incumbent CALGreen standards, or more stringent requirements as may be implemented by the City. Representative 2019 CALGreen standards applicable to the Project are listed below. CALGreen Section citations are parenthesized.

- Short-term bicycle parking. If the new project or an additional alteration is anticipated to generate visitor traffic, provide permanently anchored bicycle racks within 200 feet of the visitors' entrance, readily visible to passers-by, for 5% of new visitor motorized vehicle parking spaces being added, with a minimum of one two-bike capacity rack (5.106.4.1.1).

- Long-term bicycle parking. For new buildings with tenant spaces that have 10 or more tenant-occupants, provide secure bicycle parking for 5% of the tenant-occupant vehicular parking spaces with a minimum of one bicycle parking facility (5.106.4.1.2).
- Designated parking. In new projects or additions to alterations that add 10 or more vehicular parking spaces, provide designated parking for any combination of low-emitting, fuel-efficient and carpool/van pool vehicles as shown in Table 5.106.5.2 (5.106.5.2).
- Construction waste management. Recycle and/or salvage for reuse a minimum of 65% of the nonhazardous construction and demolition waste in accordance with Section 5.408.1.1. 5.408.1.2, or 5.408.1.3; or meet a local construction and demolition waste management ordinance, whichever is more stringent (5.408.1).
- Excavated soil and land clearing debris. 100% of trees, stumps, rocks and associated vegetation and soils resulting primarily from land clearing shall be reused or recycled. For a phased project, such material may be stockpiled on site until the storage site is developed (5.408.3).
- Recycling by Occupants. Provide readily accessible areas that serve the entire building and are identified for the depositing, storage and collection of non-hazardous materials for recycling, including (at a minimum) paper, corrugated cardboard, glass, plastics, organic waste, and metals or meet a lawfully enacted local recycling ordinance, if more restrictive (5.410.1).
- Water conserving plumbing fixtures and fittings. Plumbing fixtures (water closets and urinals) and fittings (faucets and showerheads) shall comply with the following:
    - Water Closets. The effective flush volume of all water closets shall not exceed 1.28 gallons per flush (5.303.3.1)
    - Urinals. The effective flush volume of wall-mounted urinals shall not exceed 0.125 gallons per flush (5.303.3.2.1). The effective flush volume of floor-mounted or other urinals shall not exceed 0.5 gallons per flush (5.303.3.2.2).
    - Showerheads. Single showerheads shall have a minimum flow rate of not more than 1.8 gallons per minute and 80 psi (5.303.3.3.1). When a shower is served by more than one showerhead, the combined flow rate of all

showerheads and/or other shower outlets controlled by a single valve shall not exceed 1.8 gallons per minute at 80 psi (5.303.3.3.2).

- Faucets and fountains. Nonresidential lavatory faucets shall have a maximum flow rate of not more than 0.5 gallons per minute at 60 psi (5.303.3.4.1). Kitchen faucets shall have a maximum flow rate of not more than 1.8 gallons per minute of 60 psi (5.303.3.4.2). Wash fountains shall have a maximum flow rate of not more than 1.8 gallons per minute (5.303.3.4.3). Metering faucets shall not deliver more than 0.20 gallons per cycle (5.303.3.4.4). Metering faucets for wash fountains shall have a maximum flow rate not more than 0.20 gallons per cycle (5.303.3.4.5).

- Outdoor potable water use in landscaped areas. Nonresidential developments shall comply with a local water efficient landscape ordinance or the current California Department of Water Resources' Model Water Efficient (MWELO), whichever is more stringent (5.304.1).
- Water meters. Separate submeters or metering devices shall be installed for new buildings or additions in excess of 50,000 sf or for excess consumption where any tenant within a new building or within an addition that is projected to consume more than 1,000 gallons per day (5.303.1.1 and 5.303.1.2).
- Outdoor water use in rehabilitated landscape projects equal or greater than 2,500 sf. Rehabilitated landscape projects with an aggregate landscape area equal to or greater than 2,500 sf requiring a building or landscape permit (5.304.3).
- Commissioning. For new buildings 10,000 sf and over, building commissioning shall be included in the design and construction processes of the building project to verify that the building systems and components meet the owner's or owner representative's project requirements (5.410.2).

4.3.4.3 Regional

Air Quality Management Plans

The Project site is located within the Basin, which is characterized by relatively poor air quality. The SCAQMD has jurisdiction over an approximately 10,743-square-mile area consisting of the four-county Basin and the Los Angeles County and Riverside County portions of what used to be referred to as the Southeast Desert Air Basin. In these areas, the SCAQMD is principally responsible for air pollution control, and works directly with the SCAG, county transportation commissions, local governments, as well as state and federal agencies to reduce emissions from stationary, mobile, and indirect sources to meet state and federal ambient air quality standards.

Currently, these state and federal air quality standards are exceeded in most parts of the Basin. In response, the SCAQMD has adopted a series of AQMPs to meet the state and federal ambient air quality standards. AQMPs are updated regularly in order to more effectively reduce emissions, accommodate growth, and to minimize any negative fiscal impacts of air pollution control on the economy.

In March 2017, the SCAQMD released the 2016 AQMP. The 2016 AQMP continues to evaluate current integrated strategies and control measures to meet the NAAQS, and to explore new and innovative methods to reach its goals. Some of these approaches include utilizing incentive programs, recognizing existing co-benefit programs from other sectors, and developing a strategy with fair-share reductions at the federal, state, and local levels. Similar to the 2012 AQMP, the 2016 AQMP incorporates scientific and technological information and planning assumptions, including the RTP/SCS, a planning document that supports the integration of land use and transportation to help the region meet the federal Clean Air Act requirements. Project consistency with the current SCAQMD AQMP is provided subsequently within this Section.

4.3.5 STANDARDS OF SIGNIFICANCE

As identified within the *CEQA Guidelines*, air quality impacts would be considered potentially significant if the Project would:

- Conflict with or obstruct implementation of the applicable air quality plan;
- Result in a cumulatively considerable net increase of any criteria pollutant for which the Project region is non-attainment under an applicable federal or state ambient air quality standard, including releasing emissions which exceed quantitative thresholds for ozone precursors;
- Expose sensitive receptors to substantial pollutant concentrations; or
- Result in other emissions (such as those leading to odors) adversely affecting a substantial number of people.

4.3.5.1 SCAQMD Thresholds

To determine if a given project would cause a significant effect on air quality, the impact of the project must be determined by examining the types and levels of emissions generated and their impacts on factors that affect air quality. To accomplish this determination of significance, the SCAQMD has established air pollution thresholds against which a given project can be evaluated to assist lead agencies in determining if the impacts of a project are significant. If the project's air pollutant emissions exceed applicable SCAQMD thresholds, then the impact should be considered significant. While the final determination of significance thresholds is within the purview of the lead agency, the SCAQMD recommends that its regional and local air quality thresholds for regulated pollutants (summarized below) be employed by lead agencies in determining whether criteria air pollutant emissions impacts generated by construction or operations of a given project are significant.

Regional Thresholds

SCAQMD regional thresholds are summarized in Table 4.3-3. The *SCAQMD's CEQA Air Quality Significance Thresholds* (April 2019) indicate that any projects in the Basin with daily regional emissions that exceed any of the indicated thresholds should be considered as having an individually and cumulatively significant air quality impact.

Table 4.3-3
Maximum Daily Emissions Regional Thresholds

Pollutant	Construction Threshold	Operational Threshold
NO_x	100 lbs./day	55 lbs./day
VOC	75 lbs./day	55 lbs./day
PM_{10}	150 lbs./day	150 lbs./day
$PM_{2.5}$	55 lbs./day	55 lbs./day
SO_x	150 lbs./day	150 lbs./day
CO	550 lbs./day	550 lbs./day
Pb	3 lbs./day	3 lbs./day

Source: *Rich-Haven Specific Plan, 2022 Amendment, Air Quality Impact Analysis, City of Ontario* (Urban Crossroads, Inc.) November 8, 2022.

Carbon Monoxide Concentrations (CO "hot spots") Thresholds

CO "hot spots" are areas of carbon monoxide concentrations exceeding national or state air quality standards. CO hotspots typically occur because of excessive vehicular idling, often associated with traffic backups at underperforming intersections or congested roadway links. A project's localized CO emissions impacts would be significant if they exceed the following California standards for localized CO concentrations:

- 1-hour CO standard of 20.0 parts per million (ppm);
- 8-hour CO standard of 9.0 ppm.

Localized Significance Thresholds (LSTs)

LSTs represent the maximum localized emissions concentrations that would not cause or contribute to an exceedance of the most stringent applicable national or state ambient air quality standard (NAAQS or CAAQS) at the nearest residence or sensitive receptor. LSTs apply to carbon monoxide (CO), nitrogen dioxide (NO_2), particulate matter less

than 10 microns (PM_{10}), and particulate matter less than 2.5 microns ($PM_{2.5}$). The SCAQMD states that the Lead Agency may, at the Agency's discretion, employ LSTs as another indicator of significance in air quality impact analyses.

Health Risk Assessment (HRA) Thresholds

Carcinogenic Risks

Pursuant to SCAQMD thresholds, impacts of Toxic Air Contaminants (TACs) are considered potentially significant if a Health Risk Assessment (HRA) shows an increased cancer risk of greater than 10 incidents per million population.

Noncarcinogenic Risks

Noncarcinogenic risks are numerically expressed as a Hazard Index (HI), with a threshold HI of 1.0. Pursuant to SCAQMD thresholds, noncarcinogenic Hazard Indices calculated to be greater than 1.0 are considered potentially significant.

4.3.6 POTENTIAL IMPACTS AND MITIGATION MEASURES

4.3.6.1 Introduction

The following discussions focus on areas where it has been determined that the Project may result in potentially significant air quality impacts, pursuant to comments received through the NOP process, and based on the analysis presented within this Section and included within the Initial Study (EIR Appendix A). Please refer also to Initial Study Checklist Item III., *Air Quality*.

Of the CEQA threshold considerations identified above at Section 4.3.5, and as substantiated in the Initial Study, the Project's potential impacts under the following topic are determined to have a less-than-significant impact and are not further substantively discussed here:

- Result in other emissions (such as those leading to odors) adversely affecting a substantial number of people.

All other CEQA topics concerning the Project's potential impacts to air quality are discussed below.

4.3.6.2 Impact Statements

Following is an analysis of potential air quality impacts that are expected to occur as a result of the Project. Potential emissions are considered for Project construction and operation. For each topical discussion, potential impacts are evaluated under applicable criteria established above at Section 4.3.5, *Standards of Significance.*

Potential Impact AQ-1: *Conflict with or obstruct implementation of the applicable air quality plan.*

Impact Analysis: Criteria for determining consistency with the AQMP are defined in Chapter 12, Section 12.2 and Section 12.3 of the *1993 CEQA Handbook*. These indicators are discussed below:

CONSISTENCY CRITERION NO. 1

To be considered consistent with Criterion No. 1, the proposed Project would not result in an increase in the frequency or severity of existing air quality violations or cause or contribute to new violations or delay the timely attainment of air quality standards or the interim emissions reductions specified in the AQMP.

The violations that Consistency Criterion No. 1 refers to are the CAAQS and NAAQS. CAAQS and NAAQS violations would occur if regional or localized significance thresholds were exceeded.

Construction Impacts

As discussed subsequently in this Section at Impact Statement AQ-2, even after implementation of mitigation measures, Project construction-source emissions would

exceed regional significance thresholds for NO_X and CO emissions.[3] As such, Project construction-source emissions would be significant and unavoidable. Project construction-source emissions could therefore cause or contribute to new violations or delay the timely attainment of air quality standards or the interim emissions reductions specified in the AQMP. Project construction-source emissions would therefore conflict with Consistency Criterion No. 1.

Operational Impacts

As discussed subsequently in this Section at Impact Statement AQ-2, even after implementation of mitigation, Project operational-source emissions would exceed regional significance thresholds for VOC, NOx, CO, PM_{10} and $PM_{2.5}$ emissions. Mitigation Measures 4.3.1 through 4.3.18 would incrementally reduce Project operational-source emissions. However, such reductions cannot be meaningfully quantified in CalEEMod. As such, no emissions reduction credit that may be assigned to these measures has been taken in the analysis. Project operational-source emissions could therefore cause, or contribute to, new violations or delay the timely attainment of air quality standards or the interim emissions reductions specified in the AQMP. Project operational-source emissions would therefore conflict with Consistency Criterion No. 1.[4]

CONSISTENCY CRITERION NO. 2

To be considered consistent with Criterion No. 2, the Project would not exceed the assumptions in the AQMP based on the years of Project build-out phase.

The 2016 AQMP demonstrates that the applicable ambient air quality standards can be achieved within the timeframes required under federal law. Growth projections from local general plans adopted by cities in the Basin are provided to the SCAG, which develops regional growth forecasts, which are then used to develop future air quality

[3] Project construction-source emissions would not exceed applicable Localized Significance Thresholds (LSTs). Impacts in this regard would be less-than-significant.

[4] Project operational-source emissions would not exceed applicable Localized Significance Thresholds (LSTs). Impacts in this regard would be less-than-significant.

forecasts for the AQMP. Development consistent with the growth projections in the City of Ontario General Plan is considered to be consistent with the AQMP.

Construction Impacts

The Project is consistent with TOP 2050, and therefore would not result in growth exceeding SCAG projections, or emissions attributable to growth projections modeled by SCAG. Moreover, peak day emissions generated by construction activities are largely independent of land use assignments, but rather are a function of development scope and maximum area of disturbance. Irrespective of the site's land use designation, development of the site to its maximum potential would likely occur, with disturbance of the entire site occurring during construction activities. On this basis, Project construction-source emissions would not conflict with Criterion No. 2.

Operational Impacts

Uses proposed by the Project are allowed under the site's current General Plan (Policy Plan) Land Use designations. No General Plan Amendment (GPA) is required in conjunction with the Project. The Project would not result in growth or development not anticipated under the AQMP. Project operational-source emissions are reflected in the AQMP assumptions and would not result in AQMP inconsistencies.

Development of the City pursuant to TOP 2050 Policy Plan is reflected in Southern California Association of Governments (SCAG) planning efforts and policies presented in The 2016 – 2040 Regional Transportation Plan/Sustainable Communities Strategy (SCAG) April 2016 (2016 – 2040 RTP/SCS) and subsequent 2020 – 2045 Regional Transportation Plan/Sustainable Communities Strategy (Connect SoCal). The Project is consistent with TOP 2050 Policy Plan and by extension is reflected in SCAG planning efforts and policies.

The *Final 2008 Regional Comprehensive Plan* (SCAG) 2008 (2008 RCP) defines a vision for the SCAG region to be implemented under a strategic plan addressing the regions interrelated housing, traffic, water and air quality issues. The 2008 RCP does not mandate planning actions. SCAG does, however, request that local governments

consider the 2008 RCP recommendations in developing or amending local plans, codes, design guidelines, and other related actions. SCAG promotes use of the 2008 RCP as an advisory policy document for voluntary use by local agencies. The Project does not propose or require actions that would somehow conflict with 2008 RCP advisory policies.

On this basis, Project operational-source emissions would not conflict with Criterion No. 2.

AQMP CONSISTENCY CONCLUSION

As presented above, the Project is consistent with AQMP Consistency Criteria No. 2, and in this respect would not conflict with the AQMP. However, Project construction-source emissions would exceed applicable SCAQMD regional thresholds for emissions of VOCs, NOx and CO. Operational-source emissions would exceed the applicable SCAQMD regional thresholds for VOCs, NOx, CO, PM_{10}, and $PM_{2.5}$. As such, the Project would be inconsistent with AQMP Consistency Criteria No. 1.

Based on the preceding discussion, the Project would be inconsistent with AQMP Consistency Criterion No. 1 and would therefore conflict with the AQMP. On this basis, the Project's potential to conflict with or obstruct implementation of the applicable air quality plan is considered significant and unavoidable.

Level of Significance: Significant and Unavoidable.

Potential Impact AQ-2: *Result in a cumulatively considerable net increase of any criteria pollutant for which the Project region is non-attainment under an applicable federal [national] or state ambient air quality standard.*

Impact Analysis: The following discussions present air quality emissions that can be expected during the construction and operations of the Project.

CONSTRUCTION EMISSIONS

Construction activities associated with the Project will result in emissions of VOCs, NOx, SOx, CO, PM_{10}, and $PM_{2.5}$. Construction related emissions are expected from the following construction activities:

Phase 1

- Site Preparation
- Grading
- Building Construction
- Paving
- Architectural Coating

Phase 2

- Demolition
- Site Preparation
- Grading
- Building Construction
- Paving
- Architectural Coating

Construction is expected to commence in January 2023 and will end in December 2026. The assumed construction schedule represents a "worst-case" analysis scenario. Should construction occur any time after the respective dates indicated, emissions would be reduced. This is due to decreased emission factors for construction activities and construction equipment in future years, and increasing stringency of emission regulations. The duration of construction activity and associated equipment represents a reasonable approximation of the expected construction fleet as required per *CEQA Guidelines*.

Using the construction equipment and schedule assumptions contained in the Air Quality Analysis, Table 4.3-4 presents the emissions associated with construction of the Project.

Table 4.3-4
Maximum Daily Construction Emissions

Year	Emissions (lbs./day)

Source: *Rich-Haven Specific Plan, 2022 Amendment, Air Quality Impact Analysis, City of Ontario* (Urban Crossroads, Inc.) November 8, 2022.

As shown, Project construction emissions would exceed applicable thresholds for VOC, NOx, and CO.

Level of Significance: Potentially Significant.

Mitigation Measures:

4.3.1 Fugitive dust control measures surpassing SCAQMD Rule 403 minimum requirements shall be implemented. Such measures may include: use of nontoxic soil stabilizers, applying water every four hours to active soil disturbing activities and tarping and/or maintaining a minimum of 24 inches of freeboard on trucks hauling dirt, sand, soil, or other loose materials.

4.3.2 Construction equipment rated by the United States Environmental Protection Agency as having Tier 3 or higher exhaust emission limits shall be utilized.

4.3.3 Construction equipment shall be properly serviced and maintained to the manufacturer's standards.

4.3.4 Non-essential idling of construction equipment shall be limited to no more than five consecutive minutes.

4.3.5 Super-Compliant VOC paints for coating of architectural surfaces shall be used whenever possible.

4.3.6 Construction contractors shall use off-road diesel construction equipment that complies with EPA/CARB Tier 4 Interim or better emissions standards during all construction phases.

Table 4.3-5 presents the emissions associated with construction of the Project after mitigation.

As shown above, even after implementation of Mitigation Measures 4.3.1 through 4.3.6, Project construction-source emissions would exceed criteria pollutant thresholds established by the SCAQMD for emissions of NOx and CO.

Level of Significant After Mitigation: Significant and Unavoidable (NOx and CO emissions regional threshold exceedances only).

OPERATIONAL EMISSIONS

Operational activities associated with the Project will result in emissions of VOCs, NOx, SOx, CO, PM_{10}, and $PM_{2.5}$. Operational emissions would be expected from the following primary sources:

- Area Source Emissions
- Energy Source Emissions
- Mobile Source Emissions
- On-Site Equipment Source Emissions
- TRU Source Emissions
- Gasoline Dispensing Emissions

Using the operational assumptions contained in the Air Quality Analysis, Tables 4.3-6 and 4.3-7 present the emissions associated with operations of the Phase 1 (2024) and Project Buildout (2027).

Table 4.3-6

Threshold Exceeded?	**YES**	**YES**	**YES**	**NO**	**YES**	**YES**

Source: *Rich-Haven Specific Plan, 2022 Amendment, Air Quality Impact Analysis, City of Ontario* (Urban Crossroads, Inc.) November 8, 2022.

As shown above, the proposed Project will exceed the applicable SCAQMD thresholds for VOC, NOx, and CO for Phase 1, and VOC, NOx, CO, PM_{10}, and $PM_{2.5}$ at Project Buildout.

Mitigation Measures 4.3.7 through 4.3.18 shall be implemented as means of reducing operational-source emissions to the extent feasible. In California Emissions Estimator Model (CalEEMod), there is no way to meaningfully quantify potential emissions reductions that would result from application of the proposed mitigation. Therefore, no emissions reduction credit for mitigation has been taken.

It is noted here that Project operational-source NOX, CO, PM_{10}, and $PM_{2.5}$ emissions exceedances are largely the product of traffic (mobile sources) accessing the Project site. Neither the Project Applicant nor the City have regulatory authority to control tailpipe emissions from these mobile sources. No feasible mitigation measures beyond the measures identified herein exist that would reduce operational-source NOx and CO emissions to levels that would be less-than-significant.

With regard to VOC emissions, it is recognized that approximately 50 percent of operational-source VOC emissions would be generated by on-site sources, including

natural gas usage, consumer products, landscape equipment, gasoline dispensing, and onsite equipment usage associated with the industrial portion of the Project. Approximately 60% of onsite VOC emissions are generated through the use of consumer products by future residents and building users. As such, the Project Applicant cannot meaningfully control the use of consumer products through mitigation.

Mitigation Measures:

4.3.7 Legible, durable, weather-proof signs shall be placed at truck access gates, loading docks, and truck parking areas that identify applicable CARB anti-idling regulations. At a minimum, each sign shall include: 1) instructions for truck drivers to shut off engines when not in use; 2) instructions for drivers of diesel trucks to restrict idling to no more than five (5) minutes once the vehicle is stopped, the transmission is set to "neutral" or "park," and the parking brake is engaged; and 3) telephone numbers of the building facilities manager and the CARB to report violations. Prior to the issuance of an occupancy permit, the City shall conduct a site inspection to ensure that the signs are in place.

4.3.8 Industrial building occupants/tenants shall be provided documentation on funding opportunities, such as the Carl Moyer Program, that provide incentives for using cleaner-than-required engines and equipment.

4.3.9 Non-residential building plans and site designs shall include natural light, passive heating, and passive cooling measures. Typical measures would include efficient window designs, use of overhangs, and skylights.

4.3.10 Building and site plans for non-residential uses shall provide electrical service accessible to landscaped areas.

4.3.11 The following or similar language shall be included in lease/sale agreements for all non-residential buildings: "Building tenants shall utilize electric equipment for landscape maintenance to the extent feasible, through requirements in the lease agreements."

4.3.12 The following or similar language shall be included in lease/sale agreements for all industrial buildings: "Tenants shall utilize only electric or natural gas service yard trucks (hostlers), pallet jacks and forklifts, and other onsite equipment, through requirements in the lease agreements. Electric-powered service yard trucks (hostlers), pallet jacks and forklifts, and other onsite equipment shall also be required instead of diesel-powered equipment, if technically feasible. Yard trucks may be diesel fueled in lieu of electrically or natural gas fueled provided such yard trucks are at least compliant with California Air Resources Board (CARB) 2010 standards for on-road vehicles or CARB Tier 4 compliant for off-road vehicles."

4.3.13 The following or similar language shall be included in lease/sale agreements for all industrial buildings: "Tenants that do not already operate 2010 and newer trucks shall apply in good faith for funding to replace/retrofit their trucks. Funding mechanisms include Carl Moyer, VIP, Prop 1B, SmartWay Finance, or other similar funds. If awarded, the tenant shall be required to accept and use the funding. Tenants shall be encouraged to consider the use of alternative fueled trucks as well as new or retrofitted diesel trucks. Tenants shall also be encouraged to become SmartWay Partners, if eligible." Note: This measure shall not apply to trucks that are not owned or otherwise controlled by the facility owner or facility tenant.

4.3.14 The following or similar language shall be included in lease/sale agreements for all industrial buildings: Tenants who employ 250 or more employees on a full- or part-time basis shall comply with SCAQMD Rule 2202, On-Road Motor Vehicle Mitigation Options. The purpose of this rule is to provide employees with a menu of options to reduce employee commute vehicle emissions. Tenants with less than 250 employees or tenants with 250 or more employees who are exempt from SCAQMD Rule 2202 (as stated in the Rule) shall either (a) join with a tenant who is implementing a program in accordance with Rule 2202 or (b) implement an emission reduction program similar to

Rule 2202 with annual reporting of actions and results to the City. The tenant-implemented program would include, but not be limited to the following:

- *Appoint a Transportation Demand Management (TDM) coordinator who would promote the TDM program, activities and features to all employees.*
- *Create and maintain a "commuter club" to manage subsidies or incentives for employees who carpool, vanpool, bicycle, walk, or take transit to work.*
- *Inform employees of public transit and commuting services available to them (e.g., social media, signage).*
- *Provide on-site transit pass sales and discounted transit passes.*
- *Guarantee a ride home.*
- *Offer shuttle service to and from public transit and commercial areas/food establishments, if warranted.*

4.3.15 Loading docks shall be designed to be compatible with SmartWay trucks.

4.3.16 Non-residential use site plans shall include signs or other directional indicators delineating required site access and on-site circulation plan.

4.3.17 The following or similar language shall be included in lease/sale agreements for all non-residential buildings: Tenants shall install (a) sign(s) on their respective property(ies) with telephone, email, and regular mail contact information for a designated tenant representative who would receive complaints about excessive noise, dust, fumes, or odors. The sign shall also identify contact data for the City for perceived Code violations. The representative shall keep records of any complaints received and actions taken to communicate with the complainant and resolve the complaint. The representative shall endeavor to resolve complaints within 24 hours.

4.3.18 Industrial building designs and site plans shall incorporate electrical supply lines and panels sized to support anticipated future requirements for heavy truck charging facilities. Such designs and plans shall be based on reasonable predictions derived from the most recent available truck manufacturer's data.

Level of Significance After Mitigation: Significant and Unavoidable.

LST EMISSIONS

Tables 4.3-8 and 4.3-9 show the localized emissions associated with Project construction and operations, respectively.

Table 4.3-8
LST Summary – Peak Construction

Peak Construction	CO		NO_2	PM_{10}	$PM_{2.5}$
	Averaging Time				
	1-Hour	8-Hour	1-Hour	24-Hours	24-Hours
Peak Day Localized Emissions	0.03	0.01	1.23E-02	0.41	0.16
Background Concentration	1.6	1.3	0.101	-	-
Total Concentration	**1.63**	**1.31**	**0.11**	**0.41**	**0.16**
SCAQMD Localized Significance Threshold	20	9	0.18	10.4	10.4
Threshold Exceeded?	**NO**	**NO**	**NO**	**NO**	**NO**

Source: *Rich-Haven Specific Plan, 2022 Amendment, Air Quality Impact Analysis, City of Ontario* (Urban Crossroads, Inc.) November 8, 2022.
Note: PM_{10} and $PM_{2.5}$ concentrations are expressed in $\mu g/m^3$. All others are expressed in ppm

Table 4.3-9
LST Summary – Operations

Peak Construction	CO		NO_2	PM_{10}	$PM_{2.5}$
	Averaging Time				
	1-Hour	8-Hour	1-Hour	24-Hours	24-Hours
Peak Day Localized Emissions	1.19E-01	9.06E-02	1.31E-02	1.98	0.81
Background Concentration	1.6	1.3	0.101	-	-
Total Concentration	**1.72**	**1.39**	**0.11**	**1.98**	**0.81**
SCAQMD Localized Significance Threshold	20	9	0.18	2.5	2.5
Threshold Exceeded?	**NO**	**NO**	**NO**	**NO**	**NO**

Source: *Rich-Haven Specific Plan, 2022 Amendment, Air Quality Impact Analysis, City of Ontario* (Urban Crossroads, Inc.) November 8, 2022.
Note: PM_{10} and $PM_{2.5}$ concentrations are expressed in $\mu g/m^3$. All others are expressed in ppm

As shown above, localized emissions associated with construction and operations of the Project would not exceed the applicable SCAQMD LSTs for emissions of any criterial pollutant.

Level of Significance: Less-Than-Significant.

CO HOTSPOT EMISSIONS

To establish baseline CO concentrations within the Southern California region, a CO hot spot analysis was conducted in 2003 for four busy intersections in Los Angeles during the peak morning and afternoon traffic periods (2003 Hot Spot Analysis). Table 4.3-10 presents the results of the 2003 Hot Spot Analysis. As indicated, the 2003 Hot Spot Analysis did not predict any violation of CO standards.

Table 4.3-10
2003 Los Angeles Study-Hot Spot Analysis Results

Intersection Location	Carbon Monoxide Concentrations (parts /million, ppm)				
	Morning 1-Hour	Afternoon 1-Hour	CA 1-Hour Std.	8-Hour	CA 8-Hour Std.
Wilshire-Veteran	4.6	3.5	20.0	3.7	9.0
Sunset-Highland	4.0	4.5		3.5	
La Cienega-Century	3.7	3.1		5.2	
Long Beach-Imperial	3.0	3.1		8.4*	

Source: *Rich-Haven Specific Plan, 2022 Amendment, Air Quality Impact Analysis, City of Ontario* (Urban Crossroads, Inc.) November 8, 2022.

Based on the SCAQMD's 2003 AQMP and the 1992 Federal Attainment Plan for Carbon Monoxide (1992 CO Plan), peak carbon monoxide concentrations in the Basin were a result of unusual meteorological and topographical conditions and not a result of traffic volumes and congestion at a particular intersection. As evidence of this, for example, 8.4 ppm 8-hr CO concentration measured at the Long Beach Blvd. and Imperial Hwy. intersection (highest CO generating intersection within the "hot spot" analysis), only 0.7 ppm was attributable to the traffic volumes and congestion at this intersection; the remaining 7.7 ppm were due to the ambient air measurements at the time the 2003 AQMP was prepared. In contrast, an adverse CO concentration, known as a "hot spot", would occur if an exceedance of the state one-hour standard of 20 parts per million (ppm) or the eight-hour standard of 9 ppm were to occur.

The ambient 1-hr and 8-hr CO concentration within the Project study area is estimated to be 1.5 ppm and 1.2 ppm, respectively (data from I-10 Near Road station for 2020). Therefore, even if the traffic volumes for the proposed Project were double or even triple of the traffic volumes generated at the Long Beach Blvd. and Imperial Hwy.

intersection, coupled with the on-going improvements in ambient air quality, the Project would not be capable of resulting in a CO "hot spot" at any study area intersections.

The 2003 AQMP estimated that the 1-hour concentration for the Wilshire Boulevard and Veteran Avenue intersection was 4.6 ppm; this indicates that, should the daily traffic volume increase four times to 400,000 vehicles per day, CO concentrations (4.6 ppm x 4= 18.4 ppm) would still not likely exceed the most stringent 1-hour CO standard (20.0 ppm). The highest trips on a segment of road that the Project would generate is 73,850 vehicles per day on the I-15 Southbound (SB) Ramps and Galleano Ranch Road.

Traffic volumes generating the CO concentrations for the "hot spot" analysis is shown on Table 4.3-11. The busiest intersection evaluated for traffic volumes was at La Cienega Boulevard and Century Boulevard, which has a traffic volume of approximately 8,674 vph. As shown on Table 4.3-12, the highest trips on a segment of road for the proposed Project is 7,935 vph on Hamner Avenue and Ontario Ranch Road. As such, Project-related traffic volumes are less than the traffic volumes identified in the 2003 AQMP.

Table 4.3-11
2003 Los Angeles Study Hot Spot Analysis-Peak Hour Traffic Volumes

Intersection	Peak Hour Traffic Volumes (vph)				
	Eastbound (AM/PM)	Westbound (AM/PM)	Southbound (AM/PM)	Northbound (AM/PM)	Total (AM/PM)
Wilshire-Veteran	4,954/2,069	1,830/3,317	721/1,400	560/933	8,062/7,719

Haven Ave. & Ontario Ranch Rd.	730/457	1,412/1,654	1,494/2,065	1,998/2,052	5,634/6,227
Haven Ave. & SR-60 WB Ramps	2,654/1,610	1,346/2,462	0/0	909/885	4,910/4,956

Source: *Rich-Haven Specific Plan, 2022 Amendment, Air Quality Impact Analysis, City of Ontario* (Urban Crossroads, Inc.) November 8, 2022.

Based on the preceding discission, the Project considered here would not produce the volume of traffic required to generate a CO hot spot in the context of the 2003 Hot Spot Analysis. Therefore, CO hot spots are not considered to be an environmental concern for the Project. On this basis, the potential for the Project traffic to generate CO hot spots and thereby expose sensitive receptors to substantial pollutant concentrations is considered less-than-significant.

Level of Significance: Less-Than-Significant.

CUMULATIVE IMPACTS

As previously presented, the CAAQS designate the Basin as nonattainment for O_3, PM_{10}, and $PM_{2.5}$, while the NAAQS designates the Basin as nonattainment for O_3 and $PM_{2.5}$.

The SCAQMD has published a report on how to address cumulative impacts from air pollution: *White Paper on Potential Control Strategies to Address Cumulative Impacts from Air Pollution*. In this report, the SCAQMD clearly states (Page D-3):

> …the AQMD uses the same significance thresholds for project specific and cumulative impacts for all environmental topics analyzed in an Environmental Assessment or EIR. The only case where the significance thresholds for project specific and cumulative impacts differ is the Hazard Index (HI) significance threshold for TAC emissions. The project specific (project increment) significance threshold is HI > 1.0 while the cumulative

> (facility-wide) is HI > 3.0. It should be noted that the HI is only one of three TAC emission significance thresholds considered (when applicable) in a CEQA analysis. The other two are the maximum individual cancer risk (MICR) and the cancer burden, both of which use the same significance thresholds (MICR of 10 in 1 million and cancer burden of 0.5) for project specific and cumulative impacts.
>
> Projects that exceed the project-specific significance thresholds are considered by the SCAQMD to be cumulatively considerable. This is the reason project-specific and cumulative significance thresholds are the same. Conversely, projects that do not exceed the project-specific thresholds are generally not considered to be cumulatively significant.

Per the above White Paper guidance, less-than-significant air quality impacts at the Project-level are not cumulatively significant. Conversely, significant air quality impacts at the Project-level are also cumulatively significant.

The Basin encompassing the Project site is designated as non-attainment for ozone, PM_{10}, and $PM_{2.5}$ (VOC and NOx are both ozone precursors; NOx is a precursor to PM_{10}/$PM_{2.5}$). Project construction-source NOx emissions regional threshold exceedances; and operational-source VOC, NOx, PM_{10}, and $PM_{2.5}$ emissions regional threshold exceedances would result in a cumulatively considerable net increase in criteria pollutants (ozone and PM_{10}/$PM_{2.5}$) for which the Project region is non-attainment. These are cumulatively significant air quality impacts.

Level of Significance: Significant and Unavoidable.

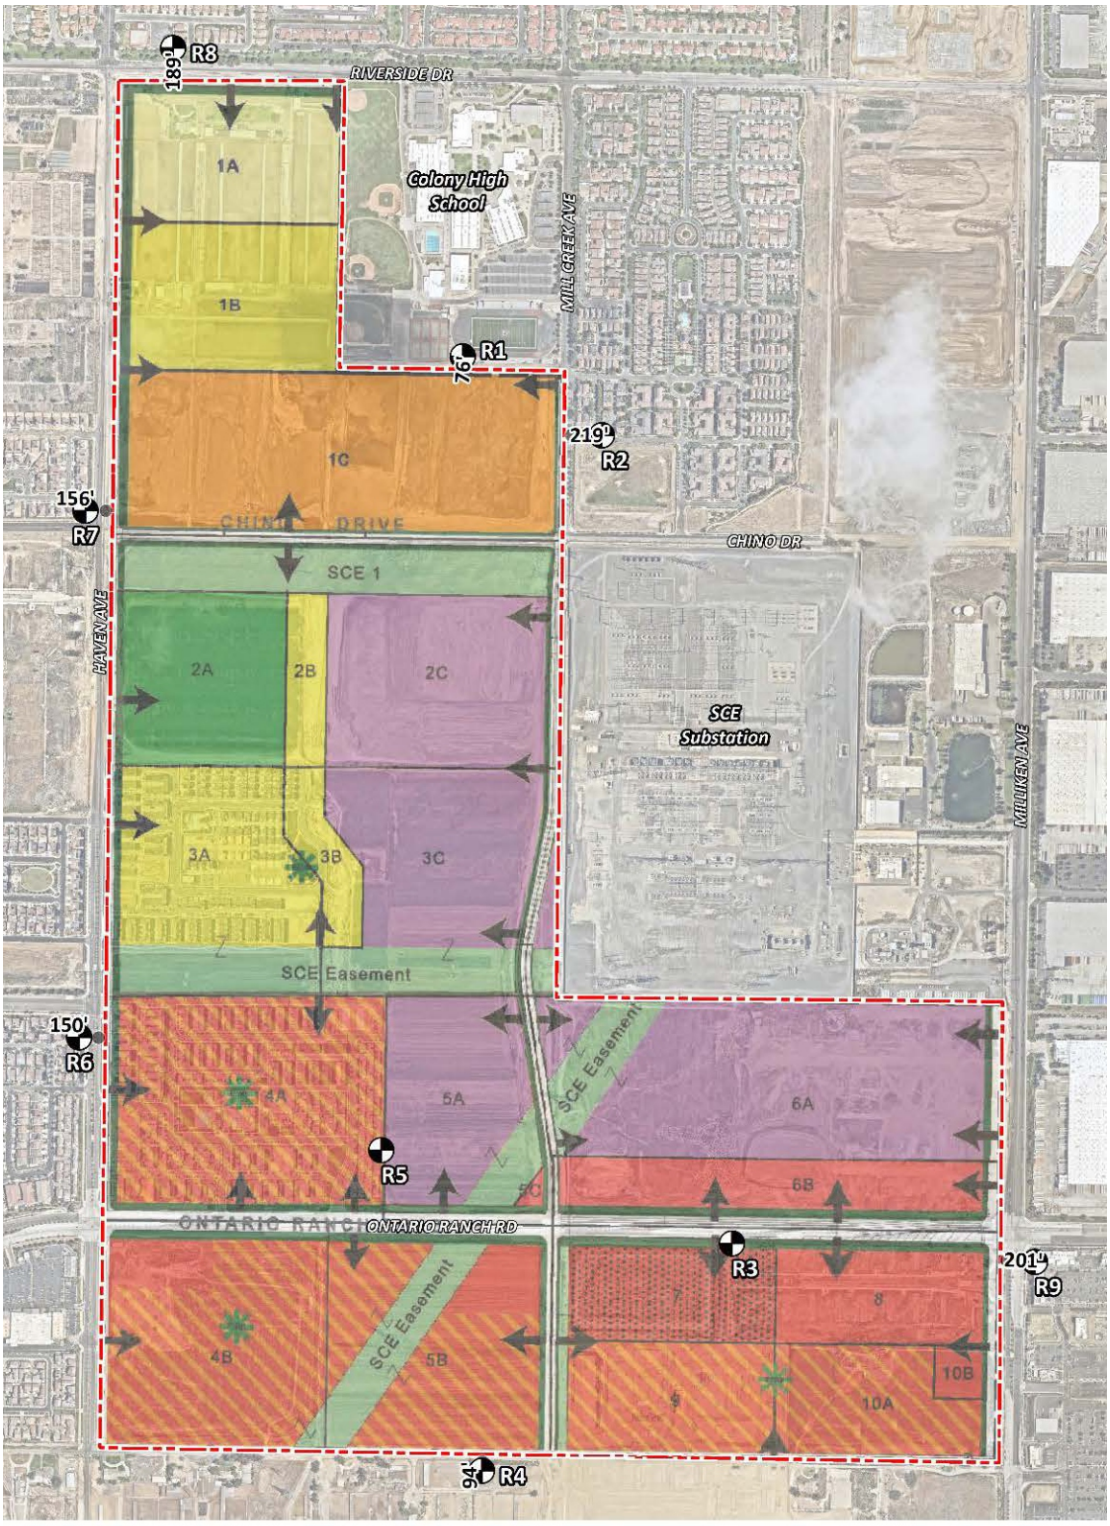
Potential Impact AQ-3: *Expose sensitive receptors to substantial pollutant concentrations.*

Impact Analysis: Sensitive receptors can include uses such as long-term health care facilities, rehabilitation centers, and retirement homes. Residences, schools,

playgrounds, childcare centers, and athletic facilities can also be considered as sensitive receptors.

Sensitive receptors in the Project study area are illustrated at Figure 4.3-1 and are described below:

R1: Location R1 represents the Colony High School Football Stadium, approximately 76 feet north of the Project site. R1 is placed in the bleachers just north of Planning Area (PA) 1.



R2: Location R2 represents the existing residence at 3271 S. Quincy Way, approximately 219 feet east of the Project site. R2 is placed in the private outdoor living areas facing the Project site.

R3: Location R3 represents an on-site receiver location within the planned PA 7 residential mixed use overlay area. R3 is placed approximately 460 feet south of the light industrial use within PA 6A.

R4: Location R4 represents the existing residence at 10823 Edison Avenue, approximately 94 feet south of the Project site. Since there are no private outdoor living areas (backyard) facing the Project site, R4 is placed at the building's façade.

R5: Location R5 represents the existing on-site residence at 3959 S. Sunrise Avenue within the standalone residential overlay (PA 4). R5 is placed in the private outdoor living areas facing the light industrial use within PA 5A.

R6: Location R6 represents the existing residence at 3455 Pine Ridge Loop, approximately 150 feet west of the Project site. R6 is placed in the private outdoor living areas facing the Project site.

Source: Urban Crossroads, Inc.

Figure 4.3-1
Sensitive Receptor Locations

R7: Location R7 represents the existing residence at 3379 S. Myrtle Drive, approximately 156 feet west of the Project site. R7 is placed in the private outdoor living areas facing the Project site.

R8: Location R8 represents the existing residence at 2943 S. Alder Creek Drive, approximately 189 feet north of the Project site. R8 is placed in the private outdoor living areas facing the Project site.

R9: Location R9 represents the existing worker receptor located approximately 201 feet east of the Project site. R9 is placed in the building façade facing the Project site, where a worker could potentially remain during a typical workday.

Results of the LST analysis indicate that the Project would not exceed the SCAQMD localized significance thresholds during construction. Therefore, the identified sensitive receptors would not be exposed to substantial pollutant concentrations during Project construction.

Results of the LST analysis indicate that the Project would not exceed the SCAQMD localized significance thresholds during operational activity. Further Project traffic would not create or result in a CO "hotspot." Therefore, vicinity sensitive receptors would not be exposed to substantial pollutant concentrations as the result of Project operations.

Based on the preceding, the potential for the Project construction and operations to expose sensitive receptors to substantial pollutant concentrations is considered less-than-significant.

Toxic Air Contaminants Health Risk Analysis

Potential Toxic Air Contaminants (TAC) health risks resulting from the Project are presented in detail in *Rich-Haven Specific Plan, 2022 Amendment, Mobile Source Heath Risk Assessment, City of Ontario* (Urban Crossroads, Inc.) November 8, 2022 (Project HRA, EIR Appendix D). The Project HRA was prepared in accordance with methodologies and

protocols presented in *Health Risk Assessment Guidance for Analyzing Cancer Risks from Mobile Source Diesel Idling Emissions for CEQA Air Quality Analysis* (South Coast Air Quality Management District) 2003. Of primary concern for the Project would be Diesel Particulate Matter (DPM) emissions generated by construction equipment and heavy trucks accessing the Project site. The Project HRA and its conclusions are summarized below.

Localized Diesel Particulate Matter (DPM) Emissions Impacts

Construction equipment employed in development of the Project, and truck traffic associated with Project operations would generate Diesel Particulate Matter (DPM) emissions. In 1998, the California Air Resources Board (ARB) identified DPM as a Toxic Air Contaminant (TAC). In California, DPM has been identified as a carcinogen. Potential effects of Project-source DPM emissions are summarized below. The Project is not a source of other TACs.

Carcinogenic Risks

SCAQMD cancer risk assessment methodologies and protocols were employed in the Project HRA. The SCAQMD *CEQA Air Quality Handbook* (1993) states that emissions of TACs are considered significant if a Health Risk Assessment shows an increased carcinogenic risk of greater than 10 incidents per million population. Per the stated SCAQMD *Handbook* cancer risk threshold, for the purposes of this analysis, an increase in cancer risk of 10 incidents per million population is considered potentially significant. Also relevant to the Project HRA, specific guidance in determining health risks from diesel emissions is provided in *Health Risk Assessment Guidance for Analyzing Cancer Risks from Mobile Source Diesel Idling Emissions for CEQA Air Quality Analysis* (SCAQMD) 2003.

Noncarcinogenic Risks

Evaluation of potential noncarcinogenic effects of chronic TAC exposures was also conducted. Noncarcinogenic adverse health effects are evaluated by comparing a compound's annual concentration with its toxicity factor or Reference Exposure Level (REL).

The REL for diesel particulates was obtained from the California Office of Environmental Health Hazard Assessment (OEHHA). The REL for DPM established by OEHHA is 5 µg/m3 (OEHHA Chemical Toxicity Database, https://oehha.ca.gov/chemicals).

The SCAQMD has established non-carcinogenic risk parameters for use in HRAs. Non-carcinogenic risks are quantified by calculating a Hazard Index, expressed as the ratio between the ambient pollutant concentration and its toxicity or Reference Exposure Level (REL). An REL is a concentration at or below which health effects are not likely to occur. A Hazard Index less of than one (1.0) means that adverse health effects are not expected. Within this analysis, non-carcinogenic exposures not exceeding the SCAQMD Hazard Index of 1.0 are considered less-than-significant.

Construction-source and operational-source DPM cancer risks are evaluated in detail at Project HRA, pp. 11 – 28. Results and conclusions of the Project HRA are summarized below.

Risk Exposure: Quantification Results

The Project HRA evaluates potential DPM exposure cancer risks at maximally exposed receptor locations. Receptor locations referenced in following discussions are illustrated at previous Figure 4.3-1.

Construction-Source DPM Emissions Impacts

As substantiated in the Project HRA, Project construction-source DPM emissions cancer risk impacts at the maximally exposed individual receptor (MEIR, Receptor R5) would be 1.21 in one million, which is less than the SCAQMD threshold of 10 in one million. At this same location, non-cancer risks were estimated to be <0.01, which would not exceed the applicable SCAQMD threshold of 1.0 (Project HRA, p. 25). As such, Project construction-source DPM emissions would not cause a significant human health or cancer risk at the MEIR.

Operational-Source DPM Emissions Impacts

Residential Exposure

As substantiated in the Project HRA, Project construction-source DPM emissions cancer risk impacts at the maximally exposed individual receptor (MEIR, Receptor R5) would be 4.77 in one million, which is less than the SCAQMD threshold of 10 in one million. At this same location, non-cancer risks were estimated to be 0.03, which would not exceed the applicable SCAQMD threshold of 1.0 (Project HRA, p. 25). As such, Project construction-source DPM emissions would not cause a significant human health or cancer risk at the MEIR.

Worker Exposure

As substantiated in the Project HRA, Project operational-source DPM emissions cancer risk impacts at the Maximum Exposed Individual Worker (MEIW, Receptor R9) would be 0.94 in one million, which is less than the SCAQMD threshold of 10 in one million. At this same location, non-cancer risks were estimated to be 0.06, which would not exceed the applicable SCAQMD threshold of 1.0 (Project HRA, p. 26). As such, the Project operational-source DPM emissions will not cause a significant human health or cancer risk at the MEIW.

School Child Exposure

The nearest school is Colony High School, which is located adjacent to the Project site to the north. At the Maximum Exposed Individual School Child location (MEISC), the maximum incremental cancer risk impact attributable to the Project would be 0.37 in one million, which is less than the significance threshold of 10 in one million. At this same location, non-cancer risks attributable to the Project would be 0.01, which would not exceed the applicable significance threshold of 1.0. As such, the Project would not cause a significant human health or cancer risk to nearby school children.

Combined Construction-Source and Operational-Source DPM Emissions Impacts

The land use with the greatest potential exposure to Project construction-source and operational-source DPM emissions is Receptor R5. At the MEIR, the maximum incremental cancer risk attributable to Project construction-source and operational-source DPM emissions is estimated at 5.98 in one million, which is less than the threshold of 10 in one million. At this same location, non-cancer risks were estimated to be 0.03, which would not exceed the applicable threshold of 1.0. As such, the Project will not cause a significant human health or cancer risk as a result of combined Project construction and operational activities (Project HRA, p. 26).

Friant Ranch Case Considerations

In December 2018, in the case of *Sierra Club v. County of Fresno* (2018) 6 Cal.5th 502, the California Supreme Court held that an Environmental Impact Report's (EIR) air quality analysis must meaningfully connect the identified air quality impacts to the human health consequences of those impacts, or meaningfully explain why that analysis cannot be provided.

Most local agencies, including the City of Ontario, lack the data to do their own assessment of potential health impacts from criteria air pollutant emissions, as would be required to establish customized, locally-specific thresholds of significance based on potential health impacts from an individual development project. The use of national or "generic" data to fill the gap of missing local data would not yield accurate results because such data does not capture local air patterns, local background conditions, or local population characteristics, all of which play a role in how a population experiences air pollution. Because it is impracticable to accurately isolate the exact cause of a human disease (for example, the role a particular air pollutant plays compared to the role of other allergens and genetics in causing asthma), existing scientific tools cannot accurately estimate health impacts of the Project's air emissions without undue speculation. Instead, readers are directed to the Project's air quality impact analysis above, which provides extensive information concerning the quantifiable and non-quantifiable health risks related to the Project's construction and long-term operation.

Notwithstanding, the Project AQIA does evaluate the Project's localized impact to air quality for emissions of CO, NO_X, PM_{10}, and $PM_{2.5}$ by comparing the proposed Project's on-site emissions to the SCAQMD's applicable LST thresholds. The LST analysis presented herein substantiates that the Project would not result in emissions exceeding SCAQMD's LSTs. Therefore, the Project would not be expected to exceed the most stringent applicable federal or state ambient air quality standards for emissions of CO, NO_X, PM_{10}, and $PM_{2.5}$.

Based on the preceding, the potential for the Project to expose sensitive receptors to substantial pollutant concentrations is considered less-than-significant.

SUMMARY

Project construction-source and operational source emissions would not exceed applicable LSTs. Project-source DPM emissions would not result in any potentially significant impacts at Study Area receptors. Project-source CO emissions would not result in CO hot spots within the Study Area. The Project would not otherwise be a source of potentially significant pollutant emissions concentrations. Based on the preceding, the potential for the Project to expose sensitive receptors to substantial pollutant concentrations is considered less-than-significant.

Level of Significance: Less-Than-Significant.

4.4 GREENHOUSE GAS EMISSIONS

4.4 GREENHOUSE GAS EMISSIONS

Abstract

This Section identifies and addresses potential global climate change (GCC) and greenhouse gas (GHG) emissions impacts that may result from construction and operation of the Project. More specifically, the analysis evaluates the potential for the Project to cause or result in the following impacts:

- *Generate greenhouse gas emissions, either directly or indirectly, that may have a significant impact on the environment; or*

- *Conflict with an applicable plan, policy or regulation adopted for the purpose of reducing the emissions of greenhouse gases.*

The Lead Agency has determined that each of the CEQA GHG emissions impacts threshold conditions noted above establish a separate and independent basis upon which to substantiate the significance of the Project's potential GHG emissions impacts.

With regard to the first threshold condition, for the purposes of evaluating environmental impacts of development-related GHG emissions, the SCAQMD GHG emissions screening threshold of 3,000 $MTCO_2e$ per year has been employed.[1]

[1] The City understands that the 3,000 $MTCO_2e$ per year threshold for residential/commercial uses was proposed by SCAQMD a decade ago and was adopted as an interim policy; however, no permanent, superseding policy or threshold has since been adopted. The 3,000 $MTCO_2e$ per year threshold was developed and recommended by SCAQMD, an expert agency, based on substantial evidence as provided in the Draft Guidance Document – Interim CEQA Greenhouse Gas Significance Threshold (2008) document and subsequent Working Group meetings (latest of which occurred in 2010). Please refer to the Project GHGA at Section 4.1, *Thresholds of Significance* for a detailed substantiation of and basis for use of the 3,000 $MTCO_2e$/yr threshold.

Even with application of mitigation, Project GHG emissions would exceed 3,000 $MTCO_2e$ per year. On this basis, the Project would generate greenhouse gas emissions, either directly or indirectly, that would have a significant impact on the environment. This is a significant and unavoidable impact.

With regard to the second threshold condition, the Project is substantiated herein to be consistent with TOP 2050, and GHG emissions modeling reflected in TOP 2050 – 2022 Community Climate Action Plan Update (2022 CCAP Update). The 2022 CCAP Update provides guidance on how to analyze GHG emissions and determine significance during the CEQA review of proposed development projects within the City. The 2022 CCAP Update addresses GHG emissions reductions and is consistent with the requirements of AB 32, SB 32, and international efforts to reduce GHG emissions. The 2022 CCAP Update, requirements of AB 32, SB 32/207 Scoping Plan, and international efforts to reduce GHG emissions encompass and comprise the range and scope of "applicable plans, policies, or regulations adopted for the purpose of reducing the emissions of greenhouse gases." As substantiated herein, with application of mitigation, the Project is determined to be consistent with the 2022 CCAP Update and by extension is also consistent with and supports other noted plans, policies, or regulations adopted for the purpose of reducing the emissions of greenhouse gases. The potential for the Project to conflict with an applicable plan, policy or regulation adopted for the purpose of reducing the emissions of greenhouse gases is therefore considered less-than-significant.

4.4.1 INTRODUCTION

This Section presents existing greenhouse gas (GHG) conditions and identifies potential GHG impacts resulting from construction and operations of the Project. The information presented in this Section is summarized from: *Rich-Haven Specific Plan, 2022 Amendment, Greenhouse Gas Analysis, City of Ontario* (Urban Crossroads, Inc.) November 8, 2022 (Project GHGA). The Project GHGA and all supporting modeling data are presented at EIR Appendix E.

4.4.2 GREENHOUSE GASES/GLOBAL CLIMATE CHANGE OVERVIEW

Global Climate Change (GCC) is defined as the change in average meteorological conditions on the earth with respect to temperature, precipitation, and storms. GCC is currently one of the most controversial environmental issues in the United States, and much debate exists within the scientific community about whether or not GCC is occurring naturally or as a result of human activity. Some data suggests that GCC has occurred in the past over the course of thousands or millions of years. These historical changes to the earth's climate have occurred naturally without human influence, as in the case of an ice age. However, many scientists believe that the climate shift taking place since the industrial revolution (1900) is occurring at a quicker rate and magnitude than in the past. Scientific evidence suggests that GCC is the result of increased concentrations of greenhouse gases in the earth's atmosphere, including carbon dioxide, methane, nitrous oxide, and fluorinated gases. Many scientists believe that this increased rate of climate change is the result of greenhouse gases resulting from human activity and industrialization over the past 200 years.

An individual development proposal, such as the Project considered herein, cannot generate enough greenhouse gas emissions to effect a discernible change in the global climate. However, the Project may contribute to GCC through its increment of greenhouse gases (GHG) in combination with the cumulative increase in GHG from all other sources, which when taken together constitute potential influences on GCC. This Section summarizes the potential for the Project to have a significant effect upon the environment as a result of its potential contribution to GCC.

4.4.2.1 Global Climate Change

GCC refers to the change in average meteorological conditions with respect to temperature, wind patterns, precipitation and storms. Global temperatures are regulated by naturally occurring atmospheric gases such as water vapor, CO_2 (Carbon Dioxide), N_2O (Nitrous Oxide), CH_4 (Methane), hydrofluorocarbons, perfluorocarbons and sulfur hexafluoride. These particular gases are important due to their residence time (duration) in the atmosphere, which ranges from 10 years to more than 100 years. These gases allow

solar radiation into the atmosphere, but prevent heat from escaping, thus warming the atmosphere. GCC can occur naturally, as it has in the past with the previous ice ages.

4.4.2.2 Greenhouse Gases

Gases that trap heat in the atmosphere are often referred to as GHGs. GHGs are released into the atmosphere by both natural and anthropogenic (human) activity. Without the natural greenhouse gas effect, the average temperature would be approximately 61° Fahrenheit (F) cooler than it is currently. The accumulation of these gases in the atmosphere is considered to be the cause for the observed increase in the Earth's temperature.

GHGs have varying global warming potential (GWP) values; GWP values represent the potential of a gas to trap heat in the atmosphere. Carbon dioxide is used as the reference gas for GWP, and thus has a GWP of 1. GWP and atmospheric lifetimes of select GHGs are summarized in Table 4.4-1.

Table 4.4-1
GWP and Atmospheric Lifetime of Select GHGs

GHG	Atmospheric Lifetime (years)	GWP (100-year time horizon)	
		2nd Assessment Report	5th Assessment Report
CO_2	*	1	1
CH_4	12.4	21	28
N_2O	121	310	265
HFC-23	222	11,700	12,400
HFC-134a	13.4	1,300	1,300
HFC-152a	1.5	140	138
SF_6	3,200	23,900	23,500

Source: *Rich-Haven Specific Plan, 2022 Amendment, Greenhouse Gas Analysis, City of Ontario* (Urban Crossroads, Inc.) November 8, 2022.
Notes: * Per IPCC's 5th Assessment Report, Appendix 8.A, no single lifetime can be given.

Table 4.4-2 lists common GHGs, their general characteristics, sources, and health effects.

Table 4.4-2
GHGs, Characteristics, Sources, and Health Effects

GHG	Description	Sources	Health Effects
Water	Water is the most abundant, important, and variable GHG in the atmosphere. Water vapor is not considered a pollutant; in the atmosphere it maintains a climate necessary for life. Changes in its concentration are primarily considered to be a result of climate feedbacks related to the warming of the atmosphere rather than a direct result of industrialization. Climate feedback is an indirect, or secondary, change, either positive or negative, that occurs within the climate system in response to a forcing mechanism. The feedback loop in which water is involved is critically important to projecting future climate change. As the temperature of the atmosphere rises, more water is evaporated from ground storage (rivers, oceans, reservoirs, soil). Because the air is warmer, the relative humidity can be higher (in essence, the air is able to 'hold' more water when it is warmer), leading to more water vapor in the atmosphere. As a GHG, the higher concentration of water vapor is then able to absorb more thermal indirect energy radiated from the Earth, thus further warming the atmosphere. The warmer atmosphere can then hold more water vapor and so on and so on. This is referred to as a "positive feedback loop." The extent to which this positive feedback loop would continue is unknown as there are also dynamics that hold the positive feedback loop in check. As an example, when water vapor increases in the atmosphere, more of it would eventually condense into clouds, which are more able to reflect incoming solar radiation (thus	The main source of water vapor is evaporation from the oceans (approximately 85%). Other sources include evaporation from other water bodies, sublimation (change from solid to gas) from sea ice and snow, and transpiration from plant leaves.	There are no known direct health effects related to water vapor at this time. It should be noted however that when some pollutants react with water vapor, the reaction forms a transport mechanism for some of these pollutants to enter the human body through water vapor.

Table 4.4-2
GHGs, Characteristics, Sources, and Health Effects

GHG	Description	Sources	Health Effects
	allowing less energy to reach the earth's surface and heat it up).		
CO_2	CO_2 is an odorless and colorless GHG. Since the industrial revolution began in the mid-1700s, the sort of human activity that increases GHG emissions has increased dramatically in scale and distribution. Data from the past 50 years suggests a corollary increase in levels and concentrations. As an example, prior to the industrial revolution, CO_2 concentrations were fairly stable at 280 parts per million (ppm). Today, they are around 370 ppm, an increase of more than 30%. Left unchecked, the concentration of CO_2 in the atmosphere is projected to increase to a minimum of 540 ppm by 2100 as a direct result of anthropogenic sources.	CO_2 is emitted from natural and manmade sources. Natural sources include: the decomposition of dead organic matter; respiration of bacteria, plants, animals, and fungus; evaporation from oceans; and volcanic outgassing. Anthropogenic sources include: the burning of coal, oil, natural gas, and wood. CO_2 is naturally removed from the air by photosynthesis, dissolution into ocean water, transfer to soils and ice caps, and chemical weathering of carbonate rocks.	Outdoor levels of CO_2 are not high enough to result in negative health effects. According to the National Institute for Occupational Safety and Health (NIOSH) high concentrations of CO_2 can result in health effects such as: headaches, dizziness, restlessness, difficulty breathing, sweating, increased heart rate, increased cardiac output, increased blood pressure, coma, asphyxia, and/or convulsions. It should be noted that current concentrations of CO_2 in the earth's atmosphere are estimated to be approximately 370 ppm, the actual reference exposure level (level at which adverse health effects typically occur) is at exposure levels of 5,000 ppm averaged over 10 hours in a 40-hour workweek and short-term reference exposure levels of 30,000 ppm averaged over a 15-minute period.
CH_4	CH_4 is an extremely effective absorber of radiation, although its atmospheric concentration is less than CO_2 and its lifetime in the atmosphere is brief (10-12 years), compared to other GHGs.	CH_4 has both natural and anthropogenic sources. It is released as part of the biological processes in low oxygen environments, such as in swamplands or in rice production (at the roots of the plants). Over the last 50 years, human activities such as growing rice, raising cattle, using natural gas, and mining coal have added to the atmospheric concentration of CH_4. Other anthropocentric sources include fossil-fuel combustion and biomass burning.	CH_4 is extremely reactive with oxidizers, halogens, and other halogen-containing compounds. Exposure to elevated levels of CH_4 can cause asphyxiation, loss of consciousness, headache and dizziness, nausea and vomiting, weakness, loss of coordination, and an increased breathing rate.

Table 4.4-2
GHGs, Characteristics, Sources, and Health Effects

GHG	Description	Sources	Health Effects
N_2O	N_2O, also known as laughing gas, is a colorless GHG. Concentrations of N_2O also began to rise at the beginning of the industrial revolution. In 1998, the global concentration was 314 parts per billion (ppb).	N_2O is produced by microbial processes in soil and water, including those reactions which occur in fertilizer containing nitrogen. In addition to agricultural sources, some industrial processes (fossil fuel-fired power plants, nylon production, nitric acid production, and vehicle emissions) also contribute to its atmospheric load. It is used as an aerosol spray propellant, i.e., in whipped cream bottles. It is also used in potato chip bags to keep chips fresh. It is used in rocket engines and in race cars. N_2O can be transported into the stratosphere, be deposited on the earth's surface, and be converted to other compounds by chemical reaction.	N_2O can cause dizziness, euphoria, and sometimes slight hallucinations. In small doses, it is considered harmless. However, in some cases, heavy and extended use can cause Olney's Lesions (brain damage).
Chlorofluorocarbons (CFCs)	CFCs are gases formed synthetically by replacing all hydrogen atoms in CH_4 or ethane (C_2H_6) with chlorine and/or fluorine atoms. CFCs are nontoxic, nonflammable, insoluble and chemically unreactive in the troposphere (the level of air at the earth's surface).	CFCs have no natural source but were first synthesized in 1928. They were used for refrigerants, aerosol propellants and cleaning solvents. Due to the discovery that they are able to destroy stratospheric ozone, a global effort to halt their production was undertaken and was extremely successful, so much so that levels of the major CFCs are now remaining steady or declining. However, their long atmospheric lifetimes mean that some of the CFCs would remain in the atmosphere for over 100 years.	In confined indoor locations, working with CFC-113 or other CFCs is thought to result in death by cardiac arrhythmia (heart frequency too high or too low) or asphyxiation.
HFCs	HFCs are synthetic, man-made chemicals that are used as a substitute for CFCs. Out of all the GHGs, they are one of three groups with the highest global warming potential (GWP). The HFCs with the largest measured	HFCs are manmade for applications such as automobile air conditioners and refrigerants.	No health effects are known to result from exposure to HFCs.

Table 4.4-2
GHGs, Characteristics, Sources, and Health Effects

GHG	Description	Sources	Health Effects
	atmospheric abundances are (in order), Fluoroform (HFC-23), 1,1,1,2-tetrafluoroethane (HFC-134a), and 1,1-difluoroethane (HFC-152a). Prior to 1990, the only significant emissions were of HFC-23. HCF-134a emissions are increasing due to its use as a refrigerant.		
PFCs	PFCs have stable molecular structures and do not break down through chemical processes in the lower atmosphere. High-energy ultraviolet rays, which occur about 60 kilometers above earth's surface, are able to destroy the compounds. Because of this, PFCs have exceptionally long lifetimes, between 10,000 and 50,000 years. Two common PFCs are tetrafluoromethane (CF_4) and hexafluoroethane (C_2F_6). The EPA estimates that concentrations of CF_4 in the atmosphere are over 70 parts per trillion (ppt).	The two main sources of PFCs are primary aluminum production and semiconductor manufacture.	No health effects are known to result from exposure to PFCs.
SF_6	SF_6 is an inorganic, odorless, colorless, nontoxic, nonflammable gas. It also has the highest GWP of any gas evaluated. The EPA indicates that concentrations in the 1990s were about 4 ppt.	SF_6 is used for insulation in electric power transmission and distribution equipment, in the magnesium industry, in semiconductor manufacturing, and as a tracer gas for leak detection.	In high concentrations in confined areas, the gas presents the hazard of suffocation because it displaces the oxygen needed for breathing.
Nitrogen Trifluoride (NF_3)	NF_3 is a colorless gas with a distinctly moldy odor. The World Resources Institute (WRI) indicates that NF_3 has a 100-year GWP of 17,200.	NF_3 is used in industrial processes and is produced in the manufacturing of semiconductors, Liquid Crystal Display (LCD) panels, types of solar panels, and chemical lasers.	Long-term or repeated exposure may affect the liver and kidneys and may cause fluorosis.

4.4.2.3 Existing Greenhouse Gases Emissions Inventories

Global

Worldwide anthropogenic GHG emissions are tracked by the Intergovernmental Panel on Climate Change for industrialized nations (referred to as Annex I) and developing

nations (referred to as Non-Annex I). This GHG emission data for Annex I nations is available through 2016. Global GHG emissions are summarized in Table 4.4-3, and are representative of currently available inventory data.

United States

As identified in Table 4.4-3, the United States, as a single country, was the number two producer of GHG emissions in 2017. The primary GHG emitted by human activities in the United States was CO_2, representing approximately 81.6 percent of total GHG emissions. Carbon dioxide from fossil fuel combustion is the largest source of GHG emissions in the United States.

Table 4.4-3
Global GHG Emissions by Major GHG Source Countries

Source Countries	GHG Emissions (Gg CO_2e)
China	11,911,710
United States	6,456,718
European Union (28-member countries)	4,323,163
India	3,079,810
Russian Federation	2,155,470
Japan	1,289,630
Total	**29,216,501**

Source: *Rich-Haven Specific Plan, 2022 Amendment, Greenhouse Gas Analysis, City of Ontario* (Urban Crossroads, Inc.) November 8, 2022.
Note: Gg = Gigagrams; 1 Gigagram = 1,000 Metric Tons.

California has significantly slowed the rate of growth of GHG emissions due to the implementation of energy efficiency programs as well as adoption of strict emission controls but is still a substantial contributor to the United States (U.S.) emissions inventory total. The California Air Resource Board (CARB) compiles GHG inventories for the State of California. Based upon the 2021 GHG inventory data (the latest year for which data are available) for the 2000-2019 GHG emissions period, California emitted an average 418.2 million metric tons of CO_2e per year ($MMTCO_2e$/year) or 418,200 Gg CO_2e (6.26% of the total United States GHG emissions).

City of Ontario

The City of Ontario GHG emissions inventory for existing land uses is summarized at Table 4.4-4.

Table 4.4-4
City of Ontario GHG Emissions
Existing Land Uses

Sector	Existing $MTCO_2e$/year	Percent of Total
Residential Energy	155,030	9%
Nonresidential Energy	395,780	23%
Transportation	934,590	55%
Solid Waste	83,400	5%
Water and Wastewater	20,250	1%
Agriculture	48,540	3%
Off-Road Equipment	65,480	4%
Land Use and Sequestration	660	<1%
Total	**1,703,730**	**100%**

Source: TOP 2050 SEIR.

Project Site

With the exception of limited areas of existing residential development, the Project site comprises vacant disturbed property, and is not a substantive source of GHG emissions.

4.4.2.4 Effects of Climate Change in California

Public Health

Higher temperatures may increase the frequency, duration, and intensity of conditions conducive to air pollution formation. For example, days with weather conducive to ozone formation could increase from 25 to 35 percent under the lower warming range to 75 to 85 percent under the medium warming range. In addition, if global background ozone levels increase as predicted in some scenarios, it may become impossible to meet local air quality standards. Air quality could be further compromised by increases in wildfires, which emit fine particulate matter that can travel long distances, depending on wind

conditions. The Climate Scenarios Report indicates that large wildfires could become more frequent if GHG emissions are not significantly reduced.

In addition, under the higher warming range scenario, there could be up to 100 more days per year with temperatures above 90°F in Los Angeles and 95°F in Sacramento by 2100. This is a large increase over historical patterns and approximately twice the increase projected if temperatures remain within or below the lower warming range. Rising temperatures could increase the risk of death from dehydration, heat stroke/exhaustion, heart attack, stroke, and respiratory distress caused by extreme heat.

Water Resources

A vast network of man-made reservoirs and aqueducts captures and transports water throughout the state from northern California rivers and the Colorado River. The current distribution system relies on Sierra Nevada snowpack to supply water during the dry spring and summer months. Rising temperatures, potentially compounded by decreases in precipitation, could severely reduce spring snowpack, increasing the risk of summer water shortages.

If temperatures continue to increase, more precipitation could fall as rain instead of snow, and the snow that does fall could melt earlier, reducing the Sierra Nevada spring snowpack by as much as 70 to 90 percent. Under the lower warming range scenario, snowpack losses could be only half as large as those possible if temperatures were to rise to the higher warming range. How much snowpack could be lost depends in part on future precipitation patterns, the projections for which remain uncertain. However, even under the wetter climate projections, the loss of snowpack could pose challenges to water managers and hamper hydropower generation. It could also adversely affect winter tourism. Under the lower warming range, the ski season at lower elevations could be reduced by as much as a month. If temperatures reach the higher warming range and precipitation declines, there may be years with insufficient snow for skiing and snowboarding.

The State's water supplies are also at risk from rising sea levels. An influx of saltwater could degrade California's estuaries, wetlands, and groundwater aquifers. Saltwater intrusion caused by rising sea levels is a major threat to the quality and reliability of water within the southern edge of the Sacramento/San Joaquin River Delta – a major fresh water supply.

Agriculture

Increased temperatures could cause widespread changes to the agriculture industry reducing the quantity and quality of agricultural products statewide. First, California farmers could possibly lose as much as 25 percent of its water supply. Although higher CO_2 levels can stimulate plant production and increase plant water-use efficiency, California's farmers could face greater water demand for crops and a less reliable water supply as temperatures rise. Crop growth and development could change, as could the intensity and frequency of pest and disease outbreaks. Rising temperatures could aggravate O_3 pollution, which makes plants more susceptible to disease and pests and interferes with plant growth.

Plant growth tends to be slow at low temperatures, increasing with rising temperatures up to a threshold. However, faster growth can result in less-than-optimal development for many crops, so rising temperatures could worsen the quantity and quality of yield for a number of California's agricultural products. Products likely to be most affected include wine grapes, fruits, and nuts.

In addition, continued GCC could shift the ranges of existing invasive plants and weeds and alter competition patterns with native plants. Range expansion could occur in many species while range contractions may be less likely in rapidly evolving species with significant populations already established. Should range contractions occur, new or different weed species could fill the emerging gaps. Continued GCC could alter the abundance and types of many pests, lengthen pests' breeding season, and increase pathogen growth rates.

Forests and Landscapes

GCC has the potential to intensify the current threat to forests and landscapes by increasing the risk of wildfire and altering the distribution and character of natural vegetation. If temperatures rise into the medium warming range, the risk of large wildfires in California could increase by as much as 55 percent, which is almost twice the increase expected if temperatures stay in the lower warming range. However, since wildfire risk is determined by a combination of factors, including: precipitation, winds, temperature, terrain, and vegetation, future risks would likely not be uniform throughout the state. For example, wildfires in northern California could increase by up to 90 percent due to decreased precipitation.

Moreover, continued GCC has the potential to alter natural ecosystems and biological diversity within the state. For example, alpine and subalpine ecosystems could decline by as much as 60 to 80 percent by the end of the century as a result of increasing temperatures. The productivity of the state's forests has the potential to decrease as a result of GCC.

Rising Sea Levels

Rising sea levels, more intense coastal storms, and warmer water temperatures could increasingly threaten the state's coastal regions. Under the higher warming range scenario, sea level is anticipated to rise 22 to 35 inches by 2100. Increased sea level elevations of this magnitude would inundate low-lying coastal areas with salt water, accelerate coastal erosion, threaten vital levees and inland water systems, and disrupt wetlands and natural habitats. Under the lower warming range scenario, sea level could rise 12 to 14 inches.

4.4.3 GCC REGULATORY SETTING

The current GHG regulatory setting is extensive and evolving. The GHG regulatory setting is discussed in detail at Project GHGA Section 3, *Regulatory Setting*. Current aspects of the GHG regulatory setting of relevance to the Project are summarized below.

4.4.3.1 State of California

Overview

The State of California legislature has enacted a series of bills and associated actions, described below, that collectively act to reduce GHG emissions. Certain state legislation, such as Assembly Bill (AB 32) *California Global Warming Solutions Act of 2006*, was specifically enacted to address GHG emissions. Other state legislation, such as Title 24 and Title 20 energy standards, originally adopted for other purposes (energy and water conservation), also facilitate GHG emissions reductions. Additionally, California's Executive Branch has taken several actions to reduce GHGs through the use of Executive Orders. Although not regulatory, Executive Orders set the tone for the state and guide the actions of state agencies.

AB 32. The California State Legislature enacted AB 32, which requires that GHGs emitted in California be reduced to 1990 levels by the year 2020. GHGs, as defined under AB 32, include carbon dioxide, methane, N_2O, hydrofluorocarbons, perfluorocarbons, and sulfur hexafluoride. Since AB 32 was enacted, a seventh chemical, nitrogen trifluoride, has also been added to the list of GHGs. The California Air Resources Board (CARB, ARB) is the state agency charged with monitoring and regulating sources of GHGs.

The ARB approved the 1990 GHG emissions level of 427 $MMTCO_2e$ on December 6, 2007 (ARB 2007). Therefore, emissions generated in California in 2020 are required to be equal to or less than 427 $MMTCO_2e$. Emissions in 2020 in a "business as usual" (BAU) scenario were estimated to be 596 $MMTCO_2e$, which do not account for reductions from AB 32 regulations (ARB 2008). At that level, a 28.4 percent reduction was required to achieve the 427 million $MMTCO_2e$ 1990 inventory. In October 2010, ARB prepared an updated 2020 forecast to account for the recession and slower forecasted growth. The forecasted inventory without the benefits of adopted regulation is now estimated at 545 million $MMTCO_2e$. Therefore, under the updated forecast, a 21.7 percent reduction from BAU is required to achieve 1990 levels (ARB 2010).

The State has made steady progress in implementing AB 32 and achieving targets included in Executive Order S-3-05. The progress is shown in updated emission inventories prepared by ARB for 2000 through 2012 (ARB 2014a). The State has achieved the Executive Order S-3-05 target for 2010 of reducing GHG emissions to 2000 levels. As shown below, the 2010 emission inventory achieved this target.

- 1990: 427 million $MMTCO_2e$ (AB 32 2020 target)
- 2000: 463 million $MMTCO_2e$ (an average 8 percent reduction needed to achieve 1990 base)
- 2010: 450 million $MMTCO_2e$ (an average 5 percent reduction needed to achieve 1990 base)

ARB has also made substantial progress in achieving its goal of achieving 1990 emissions levels by 2020. As described earlier in this section, ARB revised the 2020 BAU inventory forecast to account for new lower growth projections, which resulted in a new lower reduction from BAU to achieve the 1990 base. The previous reduction from 2020 BAU needed to achieve 1990 levels was 28.4 percent and the latest reduction from 2020 BAU is 21.7 percent.

- 2020: 545 million $MMTCO_2e$ BAU (an average 21.7 percent reduction from BAU needed to achieve 1990 base)

ARB Scoping Plan. The California Air Resources Board (ARB) Climate Change Scoping Plan (Scoping Plan) contains measures designed to reduce the State's emissions to 1990 levels by the year 2020 and thereby comply with AB 32 GHG emissions reductions targets. The Scoping Plan identifies recommended measures for multiple GHG emission sectors and the associated emission reductions needed to achieve the year 2020 emissions target—each sector has a different emission reduction target. Most of the measures target the transportation and electricity sectors. As stated in the Scoping Plan, the key elements of the strategy for achieving the 2020 GHG target include:

- Expanding and strengthening existing energy efficiency programs as well as building and appliance standards;
- Achieving a statewide renewables energy mix of 33 percent;
- Developing a California cap-and-trade program that links with other Western Climate Initiative partner programs to create a regional market system;
- Establishing targets for transportation-related GHG emissions for regions throughout California and pursuing policies and incentives to achieve those targets;
- Adopting and implementing measures pursuant to existing State laws and policies, including California's clean car standards, goods movement measures, and the Low Carbon Fuel Standard; and
- Creating targeted fees, including a public goods charge on water use, fees on high global warming potential gases, and a fee to fund the administrative costs of the State's long-term commitment to AB 32 implementation.

The ARB approved the First Update to the Scoping Plan (Update) on May 22, 2014. The Update identifies progress made to meet the near-term objectives of AB 32 and defines California's climate change priorities and strategies. The Update does not set new targets for the State, but rather describes a path that would achieve the state's 2050 goal to achieve GHG emissions levels that are 80 percent below 1990 baseline levels.

Forecasting the amount of emissions that would occur in 2020 if no actions are taken was necessary to assess the amount of reductions California must achieve to return to the 1990 emissions level by 2020 as required by AB 32. The no-action scenario is known as "business-as-usual" or BAU. The ARB originally defined the BAU scenario as emissions in the absence of any GHG emission reduction measures discussed in the Scoping Plan.

As part of CEQA compliance for the Scoping Plan, ARB prepared a Supplemental Functional Equivalent Document (FED) in 2011. The FED included an updated 2020 BAU emissions inventory projection based on current economic forecasts (i.e., as influenced by the economic downturn) and emission reduction measures already in place, replacing its prior 2020 BAU emissions inventory. ARB staff derived the updated emissions estimates

by projecting emissions growth, by sector, from the State's average emissions from 2006–2008. The new BAU estimate includes emission reductions for the million-solar-roofs program, the AB 1493 (Pavley I) motor vehicle GHG emission standards, and the Low Carbon Fuels Standard. In addition, ARB factored into the 2020 BAU inventory emissions reductions associated with 33 percent Renewable Energy Portfolio Standard (RPS) for electricity generation. The updated BAU estimate of 507 $MMTCO_2e$ by 2020 requires a reduction of 80 $MMTCO_2e$, or a 16 percent reduction below the estimated BAU levels to return to 1990 levels (i.e., 427 $MMTCO_2e$) by 2020.

To establish a BAU reduction scenario that is consistent with the original definition in the Scoping Plan and with threshold definitions used in thresholds adopted by lead agencies for CEQA purposes and many climate action plans, the updated inventory without regulations was also included in the Supplemental FED. The ARB 2020 BAU projection for GHG emissions in California was originally estimated to be 596 $MMTCO_2e$. The updated ARB 2020 BAU projection in the Supplemental FED is 545 $MMTCO_2e$. Considering the updated BAU estimate of 545 $MMTCO_2e$ by 2020, ARB estimates a 21.7 percent reduction below the estimated statewide BAU levels is necessary to return to 1990 emission levels (i.e., 427 $MMTCO_2e$) by 2020, instead of the approximate 28.4 percent BAU reduction previously reported under the original Climate Change Scoping Plan (2008).

2017 Climate Change Scoping Plan Update. In November 2017, ARB released the final 2017 Scoping Plan Update, which identifies the State's post-2020 reduction strategy. The 2017 Scoping Plan Update reflects the 2030 target of a 40 percent reduction below 1990 levels, set by Executive Order B-30-15 and codified by Senate Bill 32 (SB 32). Key programs that the proposed Second Update builds upon include the Cap-and-Trade Regulation, the Low Carbon Fuel Standard, and much cleaner cars, trucks and freight movement, utilizing cleaner, renewable energy, and strategies to reduce methane emissions from agricultural and other wastes.

The 2017 Scoping Plan establishes a new emissions limit of 260 $MMTCO_2e$ for the year 2030, which corresponds to a 40 percent decrease in 1990 levels by 2030.

California's climate strategy will require contributions from all sectors of the economy, including the land base, and will include enhanced focus on zero- and near-zero-emission (ZE/NZE) vehicle technologies; continued investment in renewables, including solar roofs, wind, and other distributed generation; greater use of low carbon fuels; integrated land conservation and development strategies; coordinated efforts to reduce emissions of short-lived climate pollutants (methane, black carbon, and fluorinated gases); and an increased focus on integrated land use planning to support livable, transit-connected communities and conservation of agricultural and other lands. Requirements for direct GHG reductions at refineries will further support air quality co-benefits in neighborhoods, including in disadvantaged communities historically located adjacent to these large stationary sources, as well as efforts with California's local air pollution control and air quality management districts (air districts) to tighten emission limits on a broad spectrum of industrial sources. Major elements of the 2017 Scoping Plan framework include:

- Implementing and/or increasing the standards of the Mobile Source Strategy, which include increasing ZEV buses and trucks.
- Low Carbon Fuel Standard (LCFS), with an increased stringency (18 percent by 2030).
- Implementing SB 350, which expands the Renewables Portfolio Standard (RPS) to 50 percent RPS and doubles energy efficiency savings by 2030.
- California Sustainable Freight Action Plan, which improves freight system efficiency, utilizes near-zero emissions technology, and deployment of ZEV trucks.
- Implementing the proposed Short-Lived Climate Pollutant Strategy (SLPS), which focuses on reducing methane and hydrofluorocarbon emissions by 40 percent and anthropogenic black carbon emissions by 50 percent by year 2030.
- Continued implementation of SB 375.
- Post-2020 Cap-and-Trade Program that includes declining caps.
- 20 percent reduction in GHG emissions from refineries by 2030.
- Development of a Natural and Working Lands Action Plan to secure California's land base as a net carbon sink.

In addition to the statewide strategies listed above, the 2017 Scoping Plan also recognizes local governments as essential partners in achieving the State's long-term GHG reduction goals and identifies local actions to reduce GHG emissions. As part of the recommended actions, CARB advocates local government attainment of a community-wide goal of 6 $MMTCO_2e$ or less per capita by 2030, and 2 $MMTCO_2e$ or less per capita by 2050. For CEQA projects, CARB states that lead agencies may develop evidenced-based bright-line numeric thresholds—consistent with the Scoping Plan and the State's long-term GHG goals—and projects with emissions over that amount may be required to incorporate on-site design features and mitigation measures that avoid or minimize project emissions to the extent feasible. Alternatively, a lead agency may employ performance-based metric using a climate action plan or other plan to reduce GHG emissions.

According to research conducted by the Lawrence Berkeley National Laboratory and supported by ARB, under its existing and proposed GHG reduction policies, California is on track to meet the 2020 reduction targets established under AB 32 and could achieve the 2030 goals promulgated under SB 32.

Senate Bill 32. On September 8, 2016, Governor Jerry Brown signed the Senate Bill (SB) 32 and its companion bill, Assembly Bill (AB) 197. SB 32 requires the State to reduce statewide greenhouse gas emissions to 40 percent below 1990 levels by 2030, a reduction target that was first introduced in Executive Order B-30-15.

Cap-and-Trade Program. The Scoping Plan identifies a Cap-and-Trade Program as one of the key strategies for California to reduce GHG emissions. According to ARB, a cap-and-trade program will help put California on the path to meet its goal of reducing GHG emissions to 1990 levels by the year 2020 and ultimately achieving an 80 percent reduction from 1990 levels by 2050. Under cap-and-trade, an overall limit on GHG emissions from capped sectors is established, and facilities subject to the cap will be able to trade permits to emit GHGs within the overall limit.

ARB adopted a California Cap-and-Trade Program consistent with authority established under AB 32. See 17 California Code of Regulations (CCR) §§ 95800 to 96023. The Cap-

and-Trade Program is designed to reduce GHG emissions from major sources (deemed "covered entities") by setting a firm cap on statewide GHG emissions and employing market mechanisms to achieve AB 32's emission-reduction mandate of returning to 1990 levels of emissions by 2020. The statewide cap for GHG emissions from the capped sectors (e.g., electricity generation, petroleum refining, and cement production) commenced in 2013 and will decline over time, achieving GHG emission reductions throughout the program's duration.

Covered entities that emit more than 25,000 $MTCO_2e$ per year must comply with the Cap-and-Trade Program. Triggering of the 25,000 $MTCO_2e$ per year "inclusion threshold" is measured against a subset of emissions reported and verified under the California Regulation for the Mandatory Reporting of GHG Emissions (Mandatory Reporting Rule or "MRR").

Under the Cap-and-Trade Program, ARB issues allowances equal to the total amount of allowable emissions over a given compliance period and distributes these to regulated entities. Covered entities are allocated free allowances in whole or part (if eligible), and may buy allowances at auction, purchase allowances from others, or purchase offset credits. Each covered entity with a compliance obligation is required to surrender "compliance instruments" for each $MTCO_2e$ of GHG they emit. There also are requirements to surrender compliance instruments covering 30 percent of the prior year's compliance obligation by November of each year. For example, in November 2014, a covered entity was required to submit compliance instruments to cover 30 percent of its 2013 GHG emissions.

The Cap-and-Trade Program provides a firm cap, ensuring that the 2020 statewide emission limit will not be exceeded. An inherent feature of the Cap-and-Trade program is that it does not guarantee GHG emissions reductions in any discrete location or by any particular source. Rather, GHG emissions reductions are only guaranteed on an accumulative basis. As summarized by ARB in the 2014 First Update to the Climate Change Scoping Plan (ARB First Update):

> The Cap-and-Trade Regulation gives companies the flexibility to trade allowances with others or take steps to cost-effectively reduce emissions at their own facilities. Companies that emit more have to turn in more allowances or other compliance instruments. Companies that can cut their GHG emissions have to turn in fewer allowances. But as the cap declines, aggregate emissions must be reduced. In other words, a covered entity theoretically could increase its GHG emissions every year and still comply with the Cap-and-Trade Program if there is a reduction in GHG emissions from other covered entities. Such a focus on aggregate GHG emissions is considered appropriate because climate change is a global phenomenon, and the effects of GHG emissions are considered cumulative (ARB First Update, p. 86).

The Cap-and-Trade Program works with other direct regulatory measures and provides an economic incentive to reduce emissions. If California's direct regulatory measures reduce GHG emissions more than expected, then the Cap-and-Trade Program will be responsible for relatively fewer emissions reductions. If California's direct regulatory measures reduce GHG emissions less than expected, then the Cap-and-Trade Program will be responsible for relatively more emissions reductions. In this manner, the Cap-and-Trade Program assures that California will meet its 2020 GHG emissions reduction mandate:

> The Cap-and-Trade Program establishes an overall limit on GHG emissions from most of the California economy—the "capped sectors." Within the capped sectors, some of the reductions are being accomplished through direct regulations, such as improved building and appliance efficiency standards, the [Low Carbon Fuel Standard] LCFS, and the 33 percent [Renewables Portfolio Standard] RPS. Whatever additional reductions are needed to bring emissions within the cap is accomplished through price incentives posed by emissions allowance prices. Together, direct regulation and price incentives assure that emissions are brought down cost-effectively to the level of the overall cap. The Cap-and-Trade Regulation

> provides assurance that California's 2020 limit will be met because the regulation sets a firm limit on 85 percent of California's GHG emissions. In sum, the Cap-and-Trade Program will achieve aggregate, rather than site specific or project-level, GHG emissions reductions. Also, due to the regulatory architecture adopted by ARB in AB 32, the reductions attributed to the Cap-and-Trade Program can change over time depending on the State's emissions forecasts and the effectiveness of direct regulatory measures (ARB First Update, p. 88).

As of January 1, 2015, the Cap-and-Trade Program covered approximately 85 percent of California's GHG emissions. The Cap-and-Trade Program covers the GHG emissions associated with electricity consumed in California, whether generated in-state or imported. Accordingly, GHG emissions associated with a CEQA projects' electricity usage are covered by the Cap-and-Trade Program.

The Cap-and-Trade Program also covers fuel suppliers (natural gas and propane fuel providers and transportation fuel providers) to address emissions from such fuels and from combustion of other fossil fuels not directly covered at large sources in the Program's first compliance period. While the Cap-and-Trade Program technically covered fuel suppliers as early as 2012, they did not have a compliance obligation (i.e., they were not fully regulated) until 2015. The Cap-and-Trade Program covers the GHG emissions associated with the combustion of transportation fuels in California, whether refined in-state or imported. The point of regulation for transportation fuels is when they are "supplied" (i.e., delivered into commerce). Accordingly, as with stationary source GHG emissions and GHG emissions attributable to electricity use, virtually all, if not all, of GHG emissions from CEQA projects associated with vehicle-miles traveled (VMT) are covered by the Cap-and-Trade Program (ARB 2015).

In addition, the Scoping Plan differentiates between "capped" and "uncapped" strategies. "Capped" strategies are subject to the proposed cap-and-trade program. The Scoping Plan states that the inclusion of these emissions within the Program will help ensure that the year 2020 emission targets are met despite some degree of uncertainty in

the emission reduction estimates for any individual measure. Implementation of the capped strategies is calculated to achieve sufficient GHG emissions reductions by 2020 to achieve the emission target contained in AB 32. "Uncapped" strategies that will not be subject to the cap-and-trade emissions caps and requirements are provided as a margin of safety by accounting for additional GHG emission reductions.

SB 375 - Sustainable Communities and Climate Protection Act of 2008. Passing the Senate on August 30, 2008, Senate Bill (SB) 375 was signed by the Governor on September 30, 2008. According to SB 375, the transportation sector is the largest contributor of GHG emissions, which emits over 40 percent of the total GHG emissions in California. SB 375 states, "Without improved land use and transportation policy, California will not be able to achieve the goals of AB 32." SB 375 does the following: (1) requires metropolitan planning organizations to include sustainable community strategies in their regional transportation plans for reducing GHG emissions, (2) aligns planning for transportation and housing, and (3) creates specified incentives for the implementation of the strategies.

Concerning CEQA, SB 375, as codified in Public Resources Code Section 21159.28, states that CEQA findings for certain projects are not required to reference, describe, or discuss (1) growth inducing impacts, or (2) any project-specific or cumulative impacts from cars and light-duty truck trips generated by the project on global warming or the regional transportation network, if the project:

1. Is in an area with an approved sustainable communities strategy or an alternative planning strategy that the ARB accepts as achieving the GHG emission reduction targets.
2. Is consistent with that strategy (in designation, density, building intensity, and applicable policies).
3. Incorporates the mitigation measures required by an applicable prior environmental document.

AB 1493 Pavley Regulations and Fuel Efficiency Standards. California AB 1493, enacted on July 22, 2002, required ARB to develop and adopt regulations that reduce GHGs

emitted by passenger vehicles and light duty trucks. Implementation of the regulation was delayed by lawsuits filed by automakers and by the EPA's denial of an implementation waiver. The EPA subsequently granted the requested waiver in 2009, which was upheld by the U.S. District Court for the District of Columbia in 2011.

The standards phased in during the 2009 through 2016 model years. When fully phased in, the near-term (2009–2012) standards will result in about a 22 percent reduction compared with the 2002 fleet, and the mid-term (2013–2016) standards will result in about a 30 percent reduction. Several technologies stand out as providing significant reductions in emissions at favorable costs. These include discrete variable valve lift or camless valve actuation to optimize valve operation rather than relying on fixed valve timing and lift as has historically been done; turbocharging to boost power and allow for engine downsizing; improved multi-speed transmissions; and improved air conditioning systems that operate optimally, leak less, and/or use an alternative refrigerant.

The second phase of the implementation for the Pavley bill was incorporated into Amendments to the Low-Emission Vehicle Program referred to as LEV III or the Advanced Clean Cars program. The Advanced Clean Cars program combines the control of smog-causing pollutants and GHG emissions into a single coordinated package of requirements for model years 2017 through 2025. The regulation will reduce GHGs from new cars by 34 percent from 2016 levels by 2025. The new rules will clean up gasoline and diesel-powered cars, and deliver increasing numbers of zero-emission technologies, such as full battery electric cars, newly emerging plug-in hybrid electric vehicles and hydrogen fuel cell cars. The package will also ensure adequate fueling infrastructure is available for the increasing numbers of hydrogen fuel cell vehicles planned for deployment in California.

SB 350 - Clean Energy and Pollution Reduction Act of 2015. In October 2015, the legislature approved and the Governor signed SB 350, which reaffirms California's commitment to reducing its GHG emissions and addressing climate change. Key provisions include an increase in the renewables portfolio standard (RPS), higher energy efficiency requirements for buildings, initial strategies towards a regional electricity grid,

and improved infrastructure for electric vehicle charging stations. Provisions for a 50 percent reduction in the use of petroleum statewide were removed from the Bill because of opposition and concern that it would prevent the Bill's passage. Specifically, SB 350 requires the following to reduce statewide GHG emissions:

- Increase the amount of electricity procured from renewable energy sources from 33 percent to 50 percent by 2030, with interim targets of 40 percent by 2024, and 25 percent by 2027.
- Double the energy efficiency in existing buildings by 2030. This target will be achieved through the California Public Utility Commission (CPUC), the California Energy Commission (CEC), and local publicly-owned utilities.
- Reorganize the Independent System Operator (ISO) to develop more regional electricity transmission markets and to improve accessibility in these markets, which will facilitate the growth of renewable energy markets in the western United States.

Executive Order S-3-05. Former California Governor Arnold Schwarzenegger announced on June 1, 2005, through Executive Order S-3-05, the following reduction targets for GHG emissions:

- By 2010, reduce GHG emissions to 2000 levels.
- By 2020, reduce GHG emissions to 1990 levels.
- By 2050, reduce GHG emissions to 80 percent below 1990 levels.

The 2050 reduction goal represents what some scientists believe is necessary to reach levels that will stabilize the climate. The 2020 goal was established to be a mid-term target. Because this is an executive order, the goals are not legally enforceable for local governments or the private sector.

Executive Order S-01-07 – Low Carbon Fuel Standard. The Governor signed Executive Order S-01-07 on January 18, 2007. The order mandates that a statewide goal shall be established to reduce the carbon intensity of California's transportation fuels by at least

10 percent by 2020. In particular, the Executive Order established a Low Carbon Fuel Standard and directed the Secretary for Environmental Protection to coordinate the actions of the California Energy Commission, the ARB, the University of California, and other agencies to develop and propose protocols for measuring the "life-cycle carbon intensity" of transportation fuels. This analysis supporting development of the protocols was included in the State Implementation Plan for alternative fuels (State Alternative Fuels Plan adopted by California Energy Commission on December 24, 2007) and was submitted to ARB for consideration as an "early action" item under AB 32. The ARB adopted the Low Carbon Fuel Standard on April 23, 2009.

The Low Carbon Fuel Standard was challenged in the U.S. District Court in Fresno in 2011. The court's ruling issued on December 29, 2011, included a preliminary injunction against ARB's implementation of the rule. The Ninth Circuit Court of Appeals stayed the injunction on April 23, 2012, pending final ruling on appeal, allowing ARB to continue to implement and enforce the regulation. The Ninth Circuit Court's decision, filed September 18, 2013, vacated the preliminary injunction. In essence, the court held that Low Carbon Fuel Standards adopted by ARB were not in conflict with federal law. On August 8, 2013, the Fifth District Court of Appeal (California) ruled ARB failed to comply with CEQA and the Administrative Procedure Act (APA) when adopting regulations for Low Carbon Fuel Standards. In a partially published opinion, the Court of Appeal reversed the trial court's judgment and directed issuance of a writ of mandate setting aside Resolution 09-31 and two executive orders of ARB approving Low Carbon Fuel Standards (LCFS) regulations promulgated to reduce GHG emissions. However, the court tailored its remedy to protect the public interest by allowing the LCFS regulations to remain operative while ARB complies with the procedural requirements it failed to satisfy.

To address the Court ruling, ARB was required to bring a new LCFS regulation to its Board for consideration in February 2015. The proposed LCFS regulation was required to contain revisions to the 2010 LCFS as well as new provisions designed to foster investments in the production of the low-carbon intensity (low-CI) fuels, offer additional flexibility to regulated parties, update critical technical information, simplify and

streamline program operations, and enhance enforcement. The second public hearing was held on September 24 and September 25, 2015, where the LCFS Regulation was adopted. The Final Rulemaking Package adopting the regulation was filed with Office of Administrative Law (OAL) on October 2, 2015. OAL had until November 16, 2015 to make a determination (ARB 2015d).

Executive Order S-13-08. Executive Order S-13-08 states that "climate change in California during the next century is expected to shift precipitation patterns, accelerate sea level rise and increase temperatures, thereby posing a serious threat to California's economy, to the health and welfare of its population and to its natural resources." As provided for under the Order, the 2009 California Climate Adaptation Strategy (California Natural Resources Agency 2009) was adopted. The Strategy is ". . . first statewide, multi-sector, region-specific, and information-based climate change adaptation strategy in the United States." Objectives include analyzing risks of climate change in California, identifying and exploring strategies to adapt to climate change, and specifying a direction for future research.

Executive Order B-30-15. On April 29, 2015, Governor Edmund G. Brown Jr. issued an executive order to establish a California GHG reduction target of 40 percent below 1990 levels by 2030. The Governor's executive order aligns California's GHG reduction targets with those of leading international governments. The Order sets a new interim statewide GHG emission reduction target to reduce GHG emissions to 40 percent below 1990 levels by 2030 in order to ensure California meets its target of reducing GHG emissions to 80 percent below 1990 levels by 2050 and directs ARB to update the Climate Change Scoping Plan to express the 2030 target in terms of million metric tons of CO_2 equivalent ($MMCO_2e$). The Order also requires the state's climate adaptation plan to be updated every three years, and for the State to continue its climate change research program, among other provisions. As with Executive Order S-3-05, this Order is not legally enforceable for local governments and the private sector. Legislation that would update AB 32 to make post 2020 targets and requirements a mandate is in process in the State Legislature.

Title 20 Appliance Efficiency Standards. California Code of Regulations, Title 20: Division 2, Chapter 4, Article 4, Sections 1601-1608: Appliance Efficiency Regulations regulates the sale of appliances in California. The Appliance Efficiency Regulations include standards for both federally regulated appliances and non-federally regulated appliances. Twenty-three categories of appliances are included in the scope of these regulations. The standards within these regulations apply to appliances that are sold or offered for sale in California, except those sold wholesale in California for final retail sale outside the state and those designed and sold exclusively for use in recreational vehicles or other mobile equipment.

Title 24 Energy Efficiency Standards and California Green Building Standards. California Code of Regulations Title 24 Part 6: *California's Energy Efficiency Standards for Residential and Nonresidential Buildings*, was first adopted in 1978 in response to a legislative mandate to reduce California's energy consumption. The standards are updated periodically to allow consideration and possible incorporation of new energy efficient technologies and methods. Energy efficient buildings require less electricity; therefore, increased energy efficiency reduces fossil fuel consumption and decreases GHG emissions. For nonresidential buildings, the 2016 Title 24 standards reduce energy consumption by 5 percent when compared to the 2013 Title 24 standards.

California Code of Regulations, Title 24, Part 11: California Green Building Standards Code (CALGreen). CALGreen is a comprehensive and uniform regulatory code for all residential, commercial, and school buildings that went in effect on January 1, 2009. CALGreen is updated on a regular basis, with the most recent approved update consisting of the 2022 California Green Building Code Standards, to be effective on January 1, 2023.

The State Building Code (including provisions of CALGreen) establishes minimum standards that buildings must meet in order to be certified for occupancy. These standards are typically enforced by the local building official. Local jurisdictions are permitted to adopt more stringent requirements, as state law provides methods for local enhancements. The Project would be required to comply with State Building Code

standards (including provisions of CALGreen) in effect at the time of building permit application(s).

Anticipated CALGreen requirements applicable to the Project include, but are not limited to, those listed below. CALGreen Section citations are presented parenthetically.

- EV Charging (new one- and two-family dwellings and townhouses with attached private garages). For each dwelling unit, install a listed raceway to accommodate a dedicated 208/240-volt branch circuit. The raceway shall not be less than trade size 1 (nominal 1-inch inside diameter). The raceway shall originate at the main service or subpanel and shall terminate into a listed cabinet, box or other enclosure in close proximity to the proposed location of an EV charger. Raceways are required to be continuous at enclosed, inaccessible or concealed areas and spaces. The service panel and/or subpanel shall provide capacity to install a 40-ampere minimum dedicated branch circuit and space(s) reserved to permit installation of a branch circuit overcurrent protective device (4.106.4.1).
- Short-term bicycle parking. If the new project or an additional alteration is anticipated to generate visitor traffic, provide permanently anchored bicycle racks within 200 feet of the visitors' entrance, readily visible to passers-by, for 5% of new visitor motorized vehicle parking spaces being added, with a minimum of one two-bike capacity rack (5.106.4.1.1).
- Long-term bicycle parking. For new buildings with tenant spaces that have 10 or more tenant-occupants, provide secure bicycle parking for 5% of the tenant-occupant vehicular parking spaces with a minimum of one bicycle parking facility (5.106.4.1.2).
- Designated parking for clean air vehicles. In new projects or additions to alterations that add 10 or more vehicular parking spaces, provide designated parking for any combination of low-emitting, fuel-efficient and carpool/van pool vehicles as shown in Table 5.106.5.2 (5.106.5.2).
- EV charging stations. New construction shall facilitate the future installation of EV supply equipment. The compliance requires empty raceways for future conduit and documentation that the electrical system has adequate capacity for the future

load. The number of spaces to be provided for is contained in Table 5.106. 5.3.3 (5.106.5.3).

- Outdoor light pollution reduction. Outdoor lighting systems shall be designed to meet the backlight, uplight and glare ratings per Table 5.106.8 (5.106.8).
- Construction waste management. Recycle and/or salvage for reuse a minimum of 65% of the nonhazardous construction and demolition waste in accordance with Section 5.408.1.1. 5.405.1.2, or 5.408.1.3; or meet a local construction and demolition waste management ordinance, whichever is more stringent (5.408.1).
- Excavated soil and land clearing debris. 100% of trees, stumps, rocks and associated vegetation and soils resulting primarily from land clearing shall be reused or recycled. For a phased project, such material may be stockpiled on site until the storage site is developed (5.408.3).
- Recycling by Occupants. Provide readily accessible areas that serve the entire building and are identified for the depositing, storage and collection of non-hazardous materials for recycling, including (at a minimum) paper, corrugated cardboard, glass, plastics, organic waste, and metals or meet a lawfully enacted local recycling ordinance, if more restrictive (5.410.1).
- Water conserving plumbing fixtures and fittings. Plumbing fixtures (water closets and urinals) and fittings (faucets and showerheads) shall comply with the following:
    - Water Closets. The effective flush volume of all water closets shall not exceed
    - 1.28 gallons per flush (5.303.3.1)
    - Urinals. The effective flush volume of wall-mounted urinals shall not exceed
    - 0.125 gallons per flush (5.303.3.2.1). The effective flush volume of floor-mounted or other urinals shall not exceed 0.5 gallons per flush (5.303.3.2.2).
    - Showerheads. Single showerheads shall have a minimum flow rate of not more than 1.8 gallons per minute and 80 psi (5.303.3.3.1). When a shower is served by more than one showerhead, the combined flow rate of all showerheads and/or other shower outlets controlled by a single valve shall not exceed 1.8 gallons per minute at 80 psi (5.303.3.3.2).
    - Faucets and fountains. Nonresidential lavatory faucets shall have a maximum flow rate of not more than 0.5 gallons per minute at 60 psi (5.303.3.4.1). Kitchen

faucets shall have a maximum flow rate of not more than 1.8 gallons per minute of 60 psi (5.303.3.4.2). Wash fountains shall have a maximum flow rate of not more than 1.8 gallons per minute (5.303.3.4.3). Metering faucets shall not deliver more than 0.20 gallons per cycle (5.303.3.4.4). Metering faucets for wash fountains shall have a maximum flow rate not more than 0.20 gallons per cycle (5.303.3.4.5).

- Outdoor potable water use in landscaped areas. Nonresidential developments shall comply with a local water efficient landscape ordinance or the current California Department of Water Resources' Model Water Efficient Landscape Ordinance (MWELO), whichever is more stringent (5.304.1).
- Water meters. Separate submeters or metering devices shall be installed for new buildings or additions in excess of 50,000 sf or for excess consumption where any tenant within a new building or within an addition that is project to consume more than 1,000 gallons per day (GPD) (5.303.1.1 and 5.303.1.2).
- Outdoor water use in rehabilitated landscape projects equal or greater than 2,500 sf. Rehabilitated landscape projects with an aggregate landscape area equal to or greater than 2,500 sf requiring a building or landscape permit (5.304.3).
- Commissioning. For new buildings 10,000 sf and over, building commissioning shall be included in the design and construction processes of the building project to verify that the building systems and components meet the owner's or owner representative's project requirements (5.410.2).

Additionally, under California's 2022 Title 24, Part 6 Building Energy Efficiency Standards, solar photovoltaic systems are required for newly constructed low-rise residential buildings and shall be sized sufficient to offset the electricity use of the proposed building as if it was a mixed-fuel building.

Model Water Efficient Landscape Ordinance. The Model Water Efficient Landscape Ordinance (Model Ordinance) established under the Water Conservation Act, requires local agencies to adopt a local landscape ordinance at least as effective in conserving water as the Model Ordinance. New development projects that include landscape areas of 500 square feet or more are subject to the Model Ordinance.

Reductions in water use of 20 percent consistent with (SBX-7-7) 2020 mandate are expected upon compliance with the ordinance. Governor Brown's Drought Executive Order of April 1, 2015 (EO B-29-15) directed Department of Water Resources (DWR) to update the Ordinance through expedited regulation. The California Water Commission approved the revised Ordinance on July 15, 2015 to be effective December 15, 2015. New development projects that include landscape areas of 500 square feet or more are subject to the Ordinance requirements, including:

- More efficient irrigation systems;
- Incentives for graywater usage;
- Improvements in on-site stormwater capture;
- Limiting landscaping that can be planted with high water use plants; and
- Reporting requirements for local agencies.

ARB Refrigerant Management Program. ARB adopted a regulation in 2009 to reduce refrigerant GHG emissions from stationary sources through refrigerant leak detection and monitoring, leak repair, system retirement and retrofitting, reporting and recordkeeping, and proper refrigerant cylinder use, sale, and disposal. The regulation is set forth in sections 95380 to 95398 of Title 17, California Code of Regulations.

The rules implementing the regulation establish a limit on statewide GHG emissions from stationary facilities with refrigeration systems with more than 50 pounds of a high GWP refrigerant. The refrigerant management program is designed to (1) reduce emissions of high-GWP GHG refrigerants from leaky stationary, non-residential refrigeration equipment; (2) reduce emissions from the installation and servicing of refrigeration and air-conditioning appliances using high-GWP refrigerants; and (3) verify GHG emission reductions.

Tractor-Trailer GHG Regulation. Tractors and trailers subject to this regulation must either use EPA SmartWay certified tractors and trailers, or retrofit their existing fleet with SmartWay verified technologies. The regulation applies primarily to owners of 53-foot or longer box-type trailers, including both dry-van and refrigerated-van trailers, and

owners of the heavy-duty tractors that pull them on California highways. These owners are responsible for replacing or retrofitting their affected vehicles with compliant aerodynamic technologies and low rolling resistance tires. Sleeper cab tractors model year 2011 and later must be SmartWay certified. All other tractors must use SmartWay verified low rolling resistance tires. There are also requirements for trailers to have low rolling resistance tires and aerodynamic devices.

Phase I and 2 Heavy-Duty Vehicle GHG Standards. ARB has adopted a new regulation for greenhouse gas (GHG) emissions from heavy-duty trucks and engines sold in California. It establishes GHG emission limits on truck and engine manufacturers and harmonizes with the U.S. EPA rule for new trucks and engines nationally. Existing heavy-duty vehicle regulations in California include engine criteria emission standards, tractor-trailer GHG requirements to implement SmartWay strategies (i.e., the Heavy Duty Tractor-Trailer Greenhouse Gas Regulation), and in-use fleet retrofit requirements such as the Truck and Bus Regulation.

ARB staff has worked jointly with the U.S. Environmental Protection Agency (U.S. EPA) and the National Highway Traffic Safety Administration (NHTSA) on the next phase of federal greenhouse gas (GHG) emission standards for medium- and heavy-duty vehicles, called federal Phase 2. The federal Phase 2 standards were built on the improvements in engine and vehicle efficiency required by the Phase 1 emission standards and represent a significant opportunity to achieve further GHG reductions for 2018 and later model year heavy-duty vehicles, including trailers.

SB 97 and the CEQA Guidelines Update. Passed in August 2007, SB 97 added Section 21083.05 to the Public Resources Code. The code states "(a) On or before July 1, 2009, the Office of Planning and Research shall prepare, develop, and transmit to the Resources Agency guidelines for the mitigation of GHG emissions or the effects of GHG emissions as required by this division, including, but not limited to, effects associated with transportation or energy consumption. (b) On or before January 1, 2010, the Resources Agency shall certify and adopt guidelines prepared and developed by the Office of Planning and Research pursuant to subdivision (a)." Section 21097 was also added to the

Public Resources Code. It provided CEQA protection until January 1, 2010 for transportation projects funded by the Highway Safety, Traffic Reduction, Air Quality, and Port Security Bond Act of 2006 or projects funded by the Disaster Preparedness and Flood Prevention Bond Act of 2006, in stating that the failure to analyze adequately the effects of GHGs would not violate CEQA.

On April 13, 2009, the Office of Planning and Research submitted to the Secretary for Natural Resources its recommended amendments to the *CEQA Guidelines* addressing GHG emissions. On July 3, 2009, the Natural Resources Agency commenced the Administrative Procedure Act rulemaking process for certifying and adopting these amendments pursuant to Public Resources Code section 21083.05. Following a 55-day public comment period and two public hearings, the Natural Resources Agency proposed revisions to the text of the proposed amendments. The Natural Resources Agency transmitted the adopted amendments and the entire rulemaking file to the Office of Administrative Law on December 31, 2009. On February 16, 2010, the Office of Administrative Law approved the Amendments, and filed them with the Secretary of State for inclusion in the California Code of Regulations. The Amendments became effective on March 18, 2010.

The CEQA Amendments provide guidance to public agencies regarding the analysis and mitigation of the effects of GHG emissions in CEQA documents. The CEQA Amendments fit within the existing CEQA framework by amending existing *CEQA Guidelines* to reference climate change.

A new section, *CEQA Guidelines* Section 15064.4, was added to assist agencies in determining the significance of GHG emissions. The new section allows agencies the discretion to determine whether a quantitative or qualitative analysis is best for a particular project. However, little guidance is offered on the crucial next step in this assessment process—how to determine whether the project's estimated GHG emissions are significant or cumulatively considerable.

Also amended were Sections 15126.4 and 15130, which address mitigation measures and cumulative impacts, respectively. GHG mitigation measures are referenced in general terms, but no specific measures are championed. The revision to the cumulative impact discussion requirement (Section 15130) simply directs agencies to analyze GHG emissions in an EIR when a project's incremental contribution of emissions may be cumulatively considerable, however it does not answer the question of when emissions are cumulatively considerable.

Section 15183.5 permits programmatic GHG analysis and later project-specific tiering, as well as the preparation of GHG Reduction Plans. Compliance with such plans can support a determination that a project's cumulative effect is not cumulatively considerable, according to Section 15183.5(b).

In addition, the amendments revised Appendix F of the *CEQA Guidelines*, which focuses on Energy Conservation. The sample environmental checklist in Appendix G was amended to include GHG questions.

4.4.3.2 Regional

The Project is within the South Coast Air Basin (Basin), which is under the jurisdiction of the SCAQMD. SCAQMD is the agency responsible for air quality planning and regulation in the Basin. Within the context of this EIR, SCAQMD acts as an expert commenting agency for impacts to air quality.

In 2008, SCAQMD formed a Working Group to identify GHG emissions thresholds for land use projects that could be used by lead agencies within the Basin. The Working Group identified several different options that are contained in the SCAQMD Draft Guidance Document – *Interim CEQA GHG Significance Threshold*. However, no thresholds for CEQA land use development projects were adopted. The Working Group has not convened since November 2009, nor has the Working Group provided subsequent additional guidance regarding appropriate GHG emissions thresholds for Basin development projects (other than projects for which SCAQMD is the Lead Agency).

4.4.3.3 City of Ontario

The City of Ontario initially adopted its Climate Action Plan on December 16, 2014 (2014 CAP). The 2014 CAP provided guidance on the City of Ontario's GHG Inventory reduction goals, policies, guidelines, and implementation programs. The CAP also established guidance and protocols addressing analysis of GHG emissions impacts and determination of GHG emissions impact significance.

As part of the 2014 CAP, the City of Ontario published a guidance document titled "Greenhouse Gas Emissions, CEQA Thresholds and Screening Tables" (December 2014). Under this guidance, "Mixed-Use Projects [such as the proposed RHSP - 2022 SPA considered herein] that garner at least 100 points will be consistent with the reduction quantities in the City's CAP and are considered less than significant for GHG emissions (*Greenhouse Gas Reduction Measures Screening Threshold Tables Directions*, p. 1).

The Ontario Plan (TOP) 2050 includes an update to the 2014 CAP, referred to herein as the 2022 Community Climate Action Plan Update (2022 CCAP Update). The 2022 CCAP Update furthers the City efforts to reduce GHG emissions and improve community resilience to hazardous conditions associated with climate change. The 2022 CCAP Update includes updated emissions inventories; updated emissions forecasts; identifies GHG emissions reduction targets to achieve the GHG reduction goals of the City of Ontario consistent with Senate Bill 32, Executive Order S-03-05, and substantial progress toward the State's carbon neutrality goals of Executive Order B-55-18; and measures, that when quantified, achieve the GHG reduction targets for the City. As noted in the TOP 2050 SEIR, the measures included in the 2022 CCAP Update are not substantially different than that of the 2014 CCAP and therefore there is no change in the environmental impacts associated with the CCAP.

4.4.4 SOURCES OF PROJECT GHG EMISSIONS

4.4.4.1 Construction-Source GHG Emissions

Project construction activities would generate emissions of CO_2 and CH_4. Project construction would result in emissions of CO_2, CH_4, and N_2O from the following primary sources:

- Demolition
- Site Preparation
- Grading
- Building Construction
- Paving
- Architectural Coating

Project construction-source emissions are quantified and amortized over the life of the Project. To amortize the emissions over the life of the Project, the SCAQMD recommends calculating the total greenhouse gas emissions for the construction activities, dividing it by a 30-year project life, then adding that number to the annual operational GHG emissions. Accordingly, Project construction-source GHG emissions were amortized over a 30-year period and added to the annual operational-source GHG emissions of the Project. Please refer also to the Project GHGA Section 5.3, *Construction Emissions* for detailed information regarding Project construction GHG emissions sources.

4.4.4.2 Operational-Source GHG Emissions

Project operations would result in emissions of CO_2, CH_4, and N_2O from the following primary sources:

- Area Source Emissions
- Energy Source Emissions
- Mobile Source Emissions
- On-Site Cargo Handling Equipment Emissions
- Transportation Refrigeration Units (TRU) Emissions

- Water Supply, Treatment, and Distribution
- Solid Waste Management

Area Source Emissions

Landscape and site maintenance equipment would generate emissions from fuel combustion and evaporation of unburned fuel. Equipment in this category would include lawnmowers, shedders/grinders, blowers, trimmers, chain saws, and hedge trimmers used to maintain the landscaping of the Project.

Energy Source Emissions

GHGs are emitted from buildings as a result of activities for which electricity and natural gas are typically used as energy sources. Combustion of any type of fuel emits CO_2 and other GHGs directly into the atmosphere; these emissions are considered direct emissions associated with a building. GHGs are also emitted during the generation of electricity from fossil fuels; these emissions are considered to be indirect emissions.

Mobile Source Emissions

GHG emissions will also result from mobile sources associated with the Project. Trip characteristics available from the Project VMT Analysis were utilized in this analysis.

On-Site Cargo Handling Equipment Emissions

It is common for warehouse buildings to require the operation of exterior cargo handling equipment in the building's truck court areas. For the Project, on-site modeled cargo handling equipment operational equipment includes up to one (1) 200 horsepower (hp), compressed natural gas or gasoline-powered tractors/loaders/backhoes operating at 4 hours per day, 365 days per year.

TRU Emissions

To account for the possibility of refrigerated uses, a portion of the trucks accessing the Project are assumed to comprise Transportation Refrigeration Units. The TRU emissions calculations are based on the 2017 Off-road Emissions model, version 1.0.1 (Orion), developed by the CARB.

Water Supply, Treatment and Distribution Emissions

Indirect GHG emissions result from the production of electricity used to convey, treat and distribute water and wastewater. The amount of electricity required depends on the volume of water as well as the sources of the water.

Solid Waste Management Emissions

The Project land uses would result in the generation and disposal of solid waste. A large percentage of solid waste generated by the Project would be diverted and recycled consistent with requirements of AB 39. The remainder of the waste not diverted would be disposed of at area landfills. GHG emissions would be generated by collection and transport of GHG emissions. GHG emissions would also result from anaerobic breakdown of landfilled materials.

Please refer also to the Project GHGA Section 5.3, *Construction Emissions* for detailed information regarding Project operations GHG emissions sources.

4.4.5 PROJECT GHG EMISSIONS IMPACTS

4.4.5.1 California Emissions Estimator Model (CalEEMod) Employed to Estimate GHG Emissions

In May 2022, the SCAQMD, in conjunction with the California Air Pollution Control Officers Association (CAPCOA) and other California air districts, released the latest version of the CalEEMod Version 2022.1. The purpose of this Model is to calculate construction-source and operational-source criteria pollutants and GHG emissions from direct and indirect sources; and quantify applicable air quality and GHG reductions achieved from mitigation measures. The latest version of CalEEMod has been employed in this analysis. Detailed Model Outputs are appended to the Project GHGA.

4.4.5.2 Standards of Significance

The criteria used to determine the significance of potential Project-related GHG impacts are taken from the Initial Study Checklist in Appendix G of the State CEQA Guidelines (14 CCR of Regulations §§15000, et seq.). Based on these thresholds, a project would result in a significant impact related to GHG if it would:

- Generate GHG emissions, either directly or indirectly, that may have a significant impact on the environment; or

- Conflict with an applicable plan, policy or regulation adopted for the purpose of reducing the emissions of GHGs.

The City has determined that each of the CEQA threshold considerations presented herein establish a separate and independent basis upon which to substantiate the significance of the Project's potential GHG emissions impact.

Potential Impact GHG-1: *Generate GHG emissions, either directly or indirectly, that may have a significant impact on the environment.*

Impact Analysis: An individual project cannot generate enough GHG emissions to influence global climate change. A project participates in this potential impact by its incremental contribution combined with the cumulative increase of all other sources of GHGs, which when taken together may have a significant impact on global climate change.

Project construction and operations would result in direct and indirect emissions of CO_2, CH_4, and N_2O. Other GHGs that may be generated are not of sufficient quantity to affect the analysis presented here. Direct Project-related GHG emissions include emissions from construction activities, area sources, and mobile sources, while indirect sources include emissions from electricity consumption, water demand, and solid waste generation. Project-related GHG emissions were quantified employing CalEEMod. With regard to the first threshold condition, for the purposes of evaluating environmental

impacts of development-related GHG emissions, the SCAQMD GHG emissions screening threshold of 3,000 $MTCO_2e$ per year has been employed.[2]

Table 4.4-5
Annual Project GHG Emissions

Emission Source	Emissions (metric tons per year)				
	CO_2	CH_4	N_2O	Refrigerants	Total CO_2E
Annual construction-related emissions amortized over 30 years	851.17	0.04	0.04	0.96	865.37
Mobile Source	90,393.00	5.73	6.30	121.40	92,535.00
Area Source	1,553.00	0.03	0.05	0	1,567.00
Energy Source	25,030.00	2.30	0.17	0	25,138.00
Water Supply, Treatment, and Distribution	1,514.00	33.47	0.81	0	2,591.00
Solid Waste Management	1,015.00	101.30	0	0	3,548.00
Refrigerants	0	0	0	117.00	117.00
TRU Source					2479.91
On-Site Equipment Source					473.67
	129,314.95				

Source: *Rich-Haven Specific Plan, 2022 Amendment, Greenhouse Gas Analysis, City of Ontario* (Urban Crossroads, Inc.) November 8, 2022.
Note: Totals obtained from CalEEMod™ and may not total 100% due to rounding.

As shown, construction and operation of the Project would generate a total of approximately 129,314.95 $MTCO_2e$/year, which would exceed the SCAQMD significance threshold of 3,000 $MTCO_2e$/year; therefore, Project-related GHG emissions are considered potentially significant.

Level of Significance: Potentially Significant.

Mitigation Measures: No feasible mitigation. The majority of the GHG emissions (approximately 72 percent unmitigated) are associated with non-construction related mobile sources. Responsibility and authority for regulation of vehicular-source emissions

[2] The City understands that the 3,000 $MTCO_2e$ per year threshold for residential/commercial uses was proposed by SCAQMD a decade ago and was adopted as an interim policy; however, no permanent, superseding policy or threshold has since been adopted. The 3,000 $MTCO_2e$ per year threshold was developed and recommended by SCAQMD, an expert agency, based on substantial evidence as provided in the Draft Guidance Document – Interim CEQA Greenhouse Gas Significance Threshold (2008) document and subsequent Working Group meetings (latest of which occurred in 2010).

resides with the State of California (CARB, et al.). Neither the Applicant nor the Lead Agency can effect or mandate substantial reductions in vehicular-source GHG emissions, much less reductions that would achieve no net increase condition or achieve the SCAQMD 3,000 $MTCO_2e$/year threshold. In effect, all Project traffic would need to be eliminated or be "zero GHG emissions sources" in order to achieve the SCAQMD threshold.

Development proposals within the Specific Plan Area would be required to attain a minimum of 100 Screening Table Points, thereby complying comply with GHG emissions control and reduction strategies implemented through the City 2022 CCAP Update. Additionally, certain of the Mitigation Measures identified at EIR Section 4.3, *Air Quality* would incrementally reduce Project-source air pollutant emissions and in so-doing would also act to generally reduce GHG emissions. These measures are repeated below.

4.3.2 Construction equipment rated by the United States Environmental Protection Agency as having Tier 3 or higher exhaust emission limits shall be utilized.

4.3.3 Construction equipment shall be properly serviced and maintained to the manufacturer's standards.

4.3.4 Non-essential idling of construction equipment shall be limited to no more than five consecutive minutes.

4.3.5 Super-Compliant VOC paints for coating of architectural surfaces shall be used whenever possible.

4.3.6 Construction contractors shall use off-road diesel construction equipment that complies with EPA/CARB Tier 4 Interim or better emissions standards during all construction phases.

4.3.7 Legible, durable, weather-proof signs shall be placed at truck access gates, loading docks, and truck parking areas that identify applicable CARB anti-idling

regulations. At a minimum, each sign shall include: 1) instructions for truck drivers to shut off engines when not in use; 2) instructions for drivers of diesel trucks to restrict idling to no more than five (5) minutes once the vehicle is stopped, the transmission is set to "neutral" or "park," and the parking brake is engaged; and 3) telephone numbers of the building facilities manager and the CARB to report violations. Prior to the issuance of an occupancy permit, the City shall conduct a site inspection to ensure that the signs are in place.

4.3.8 Industrial building occupants/tenants shall be provided documentation on funding opportunities, such as the Carl Moyer Program, that provide incentives for using cleaner-than-required engines and equipment.

4.3.9 Non-residential building plans and site designs shall include natural light, passive heating, and passive cooling measures. Typical measures would include efficient window designs, use of overhangs, and skylights.

4.3.10 Building and site plans for non-residential uses shall provide electrical service accessible to landscaped areas.

4.3.11 The following or similar language shall be included in lease/sale agreements for all non-residential buildings: "Building tenants shall utilize electric equipment for landscape maintenance to the extent feasible, through requirements in the lease agreements."

4.3.12 The following or similar language shall be included in lease/sale agreements for all industrial buildings: "Tenants shall utilize only electric or natural gas service yard trucks (hostlers), pallet jacks and forklifts, and other onsite equipment, through requirements in the lease agreements. Electric-powered service yard trucks (hostlers), pallet jacks and forklifts, and other onsite equipment shall also be required instead of diesel-powered equipment, if technically feasible. Yard trucks may be diesel fueled in lieu of electrically or natural gas fueled provided such yard

trucks are at least compliant with California Air Resources Board (CARB) 2010 standards for on-road vehicles or CARB Tier 4 compliant for off-road vehicles."

4.3.13 *The following or similar language shall be included in lease/sale agreements for all industrial buildings: "Tenants that do not already operate 2010 and newer trucks shall apply in good faith for funding to replace/retrofit their trucks. Funding mechanisms include Carl Moyer, VIP, Prop 1B, SmartWay Finance, or other similar funds. If awarded, the tenant shall be required to accept and use the funding. Tenants shall be encouraged to consider the use of alternative fueled trucks as well as new or retrofitted diesel trucks. Tenants shall also be encouraged to become SmartWay Partners, if eligible." Note: This measure shall not apply to trucks that are not owned or otherwise controlled by the facility owner or facility tenant.*

4.3.14 *The following or similar language shall be included in lease/sale agreements for all industrial buildings: Tenants who employ 250 or more employees on a full- or part-time basis shall comply with SCAQMD Rule 2202, On-Road Motor Vehicle Mitigation Options. The purpose of this rule is to provide employees with a menu of options to reduce employee commute vehicle emissions. Tenants with less than 250 employees or tenants with 250 or more employees who are exempt from SCAQMD Rule 2202 (as stated in the Rule) shall either (a) join with a tenant who is implementing a program in accordance with Rule 2202 or (b) implement an emission reduction program similar to Rule 2202 with annual reporting of actions and results to the City. The tenant-implemented program would include, but not be limited to the following:*

- *Appoint a Transportation Demand Management (TDM) coordinator who would promote the TDM program, activities and features to all employees.*
- *Create and maintain a "commuter club" to manage subsidies or incentives for employees who carpool, vanpool, bicycle, walk, or take transit to work.*
- *Inform employees of public transit and commuting services available to them (e.g., social media, signage).*
- *Provide on-site transit pass sales and discounted transit passes.*
- *Guarantee a ride home.*

- *Offer shuttle service to and from public transit and commercial areas/food establishments, if warranted.*

4.3.15 Loading docks shall be designed to be compatible with SmartWay trucks.

4.3.16 Non-residential use site plans shall include signs or other directional indicators delineating required site access and on-site circulation plan.

4.3.17 The following or similar language shall be included in lease/sale agreements for all non-residential buildings: Tenants shall install (a) sign(s) on their respective property(ies) with telephone, email, and regular mail contact information for a designated tenant representative who would receive complaints about excessive noise, dust, fumes, or odors. The sign shall also identify contact data for the City for perceived Code violations. The representative shall keep records of any complaints received and actions taken to communicate with the complainant and resolve the complaint. The representative shall endeavor to resolve complaints within 24 hours.

4.3.18 Industrial building designs and site plans shall incorporate electrical supply lines and panels sized to support anticipated future requirements for heavy truck charging facilities. Such designs and plans shall be based on reasonable predictions derived from the most recent available truck manufacturer's data.

However, there are no feasible means to, or alternatives to eliminate all Project traffic, or to ensure that Project traffic would result in zero GHG emissions sources. In terms of its practical application, this would constitute a "no build" condition. Based on the preceding, even with the application of mitigation, the Project would generate GHG emissions, either directly or indirectly, that would have a significant impact on the environment. This is a significant and unavoidable impact.

Level of Significance after Mitigation: Significant and Unavoidable.

Potential Impact GHG-2: *Conflict with an applicable plan, policy or regulation adopted for the purpose of reducing the emissions of greenhouse gases.*

Impact Analysis: For the Project, the City of Ontario 2022 CCAP Update (and by extension, requirements of AB 32, SB 32/2017 Scoping Plan, and international efforts to reduce GHG emissions) comprise "applicable plans, policies or regulations adopted for the purpose of reducing the emissions of greenhouse gases."[3]

Background and Establishment of CAP Screening Table Thresholds/Mitigation

As part of the City of Ontario 2014 CAP, the City published a guidance document titled "Greenhouse Gas Emissions, CEQA Thresholds and Screening Tables" (December 2014). Under this guidance, "Mixed-Use Projects [such as the proposed RHSP - 2022 SPA considered herein] that garner at least 100 points will be consistent with the reduction quantities in the City's CAP and are considered less than significant for GHG emissions" (*Greenhouse Gas Reduction Measures Screening Threshold Tables Directions*, p. 1).

The 2022 CCAP Update builds on and updates the 2014 CAP and furthers the City efforts to reduce GHG emissions and improve community resilience to hazardous conditions associated with climate change. The 2022 CCAP Update includes updated emissions inventories; updated emissions forecasts; identifies GHG emissions reduction targets to achieve the GHG reduction goals of the City of Ontario consistent with Senate Bill 32, Executive Order S-03-05, and substantial progress toward the State's carbon neutrality goals of Executive Order B-55-18; and measures, that when quantified, achieve the GHG reduction targets for the City. Under the 2022 CCAP Update, mixed use developments

[3] Subsequent to preparation of the EIR Initial Study, CARB approved the final proposed 2022 Scoping Plan in December 2022. The proposed 2022 Scoping Plan includes the need for an accelerated target of a 48% reduction of greenhouse gas emissions below 1990 levels by the end of this decade. By 2045, this economy-wide shift away from fossil fuels seeks to:

- Reduce fossil fuel consumption (liquid petroleum) to less than one-tenth of what we use today – a 94% reduction in demand.
- Cut greenhouse gas emissions by 85% below 1990 levels.
- Reduce smog-forming air pollution by 71%.
- Create 4 million new jobs.
- Save Californians $200 billion in health costs due to pollution in 2045.

that garner at least 100 Screening Table points would be consistent with the GHG emissions reduction targets in the City's 2022 CCAP Update.

Means to achieve the required 2022 CCAP Update 100 Screening Table points are dependent on Project final site plan and building plan designs, approved by the City. These designs have not yet been finalized at this concept stage of Project development. There is therefore the potential for the Project to *not* achieve the requisite 2022 CCAP Update 100 Screening Table points, and therefore conflict with City of Ontario 2022 CCAP Update plans, policies, or regulations adopted for the purpose of reducing the emissions of greenhouse gases. This is a potentially significant impact.

Level of Significance: Potentially Significant.

Mitigation Measure: To assure compliance with the City of Ontario 2022 CCAP Update, and plans, policies, and regulations contained (or incorporated by extension) therein, the following Mitigation Measure is required:

4.4.1 *Development proposals within the Specific Plan Area shall implement Screening Table Measures to achieve a minimum of 100 points per the City's 2022 CCAP Update Screening Tables. The City shall verify minimum 100-point attainment prior to issuance of site plans and building permits.*

For informational purposes, a representative example of how the Project could achieve a minimum of 100 Screening Table Points through implementation of 2022 CCAP Update Screening Table Measures pursuant to Mitigation Measure 4.4.1 is provided at Table 4.4-6 for the residential portions of the Project, and at Table 4.4-7 for the commercial and light industrial portions of the Project.

Table 4.4-6
Representative CAP Screening Table Measures (Residential Uses)

Feature	Description	2022 CCAP Update Assigned Point Values	Project Point Values
Reduction Measure PS E1: Residential Energy Efficiency			
Building Envelope			
Insulation	Enhanced Insulation (rigid wall insulation R-13; roof/attic: R-38)	15	15
Windows	Enhanced Window Insulation (0.32 U-Factor, 0.25 SHGC)	7	7

Source: *Rich-Haven Specific Plan, 2022 Amendment, Greenhouse Gas Analysis, City of Ontario* (Urban Crossroads, Inc.) November 8, 2022.

Implementation of the design features and operational measures outlined at Tables 4.4-6, 4.4-7 would ensure that the Project is consistent with and supports the 2022 CAP Update. Project development proposals shall implement Screening Table Measures identified at Tables 4.4-6, 4.4-7 or equivalent measures acceptable to the City. The City shall verify that Screening Table Measures achieving a minimum of 100 points are incorporated in development plans prior to the issuance of building permit(s) and/or site plans (as applicable). Multiple development proposals may, at the discretion of the City, be allowed to collectively demonstrate achievement of at least 100 points per the Screening Tables. The City shall verify implementation of the selected Screening Table Measures prior to the issuance of Certificate(s) of Occupancy. At the discretion of the City, measures that provide GHG reductions equivalent to GHG emissions reductions achieved via the Screening Table Measures may be implemented.

Level of Significance After Mitigation: Less-Than-Significant.

4.5 ENERGY

4.5 ENERGY

Abstract

This Section identifies and addresses potential energy impacts that may result from construction and operation of the Project. More specifically, the energy impact analysis evaluates the potential for the Project to cause or result in the following:

- *A potentially significant environmental impact due to wasteful, inefficient, or unnecessary consumption of energy resources, during project construction or operation; or*

- *Conflict with or obstruct a state or local plan for renewable energy or energy efficiency.*

As supported by the analysis presented in this Section, potential energy impacts of the Project would be less-than-significant. The following discussions are based on information presented in Rich-Haven Specific Plan, 2022 Amendment, Energy Analysis, City of Ontario *(Urban Crossroads, Inc.) November 8, 2022. The Energy Analysis is presented as Appendix F to this EIR.*

4.5.1 BACKGROUND AND INTRODUCTION

In 1975, largely in response to the oil crisis of the 1970s, the State Legislature adopted AB 1575, which created the California Energy Commission (CEC). The statutory mission of the CEC is to forecast future energy needs; license thermal power plants of 50 megawatts or larger; develop energy technologies and renewable energy resources; plan for and direct responses to energy emergencies; and, perhaps most importantly, to promote energy efficiency through the adoption and enforcement of appliance and building energy efficiency standards.

AB 1575 also amended Public Resources Code Section 21100(b)(3) to require EIRs to consider the potential for wasteful, inefficient, and/or unnecessary consumption of energy caused by or resulting from a project. Appendix F to the *CEQA Guidelines* (Guidelines) assists EIR preparers in this regard. *CEQA Guidelines* (Guidelines) Appendix F, *Energy Conservation* establishes parameters and context for determining whether a project would result in the inefficient, wasteful, and unnecessary consumption of energy.

Guidelines Section 15126.2 *Consideration and Discussion of Significant Environmental Impacts,* as amended December 28, 2018, recognizes the need to consider Guidelines Appendix F, *Energy Conservation* when analyzing project impacts (for EIRs). Guidelines Section 15126.2 (b), excerpted below, provides the following guidance:

> **Energy Impacts.** If analysis of the project's energy use reveals that the project may result in significant environmental effects due to wasteful, inefficient, or unnecessary consumption use of energy, or wasteful use of energy resources, the EIR shall mitigate that energy use. This analysis should include the project's energy use for all project phases and components, including transportation-related energy, during construction and operation. In addition to building code compliance, other relevant considerations may include, among others, the project's size, location, orientation, equipment use and any renewable energy features that could be incorporated into the project. (Guidance on information that may be included in such an analysis is presented in Appendix F.) This analysis is subject to the rule of reason and shall focus on energy use that is caused by the project. This analysis may be included in related analyses of air quality, greenhouse gas emissions, transportation or utilities in the discretion of the lead agency.

In summary, the Project would provide for, and promote, energy efficiencies consistent with applicable state or federal standards and regulations. The Project would also conform to City of Ontario energy efficiency and energy conservation measures.

Moreover, energy consumed by the Project would be comparable to, or less than, energy consumed by other development proposals of similar scale and intensity. On this basis, the Project would not result in the inefficient, wasteful or unnecessary consumption of energy. Further, the Project would not cause or result in the need for additional energy-producing facilities or energy delivery systems. The Project would therefore not result in significant environmental effects due to wasteful, inefficient, or unnecessary consumption use of energy, or wasteful use of energy resources. Nor would the Project result in significant environmental effects due to conflict with, or obstruction of, a state or local plan for renewable energy or energy efficiency.

4.5.2 EXISTING CONDITIONS

Existing conditions providing general context for the Project energy demands are presented below. The following discussions are summarized from**:** *Final 2020 Integrated Energy Policy Report* [IEPR] *Update* (CEC) March 2021. See also: https://www.energy.ca.gov/data-reports/reports/integrated-energy-policy-report/2020-integrated-energy-policy-report-update.

Electricity

Electricity would be provided to the Project by Southern California Edison (SCE). The Project site is vacant and undeveloped and does not contain uses or facilities that consume or produce electricity.

SCE is an investor-owned utility providing electric power to an estimated 15 million persons in 15 counties and in 180 incorporated cities, within a service area encompassing approximately 50,000 square miles.[1] SCE derives electricity from varied energy resources including: fossil fuels, hydroelectric generators, nuclear power plants, geothermal power plants, solar power generation, and wind farms. SCE also purchases from independent power producers and utilities, including out-of-state suppliers. The California Public

[1] https://www.sce.com/about-us/who-we-are

Utilities Commission (CPUC) regulates investor-owned electric utilities operating in California, including SCE.

SCE is the electrical utility provider for the City. SCE also provides information on energy efficiency, rotating outages, emergency preparedness, electrical safety tips, and tree planting guidelines to ensure non-interference with electrical utility lines.

Natural Gas

Natural gas would be provided to the Project by Southern California Gas (SoCal Gas). The Project site is vacant and undeveloped and does not contain uses or facilities that consume or produce natural gas.

SoCal Gas is the nation's largest natural gas distribution utility, serving approximately 21.8 million consumers through 5.9 million meters in more than 500 communities. The SoCal Gas service territory encompasses approximately 24,000 square miles throughout Central and Southern California, from Visalia to the Mexican border.[2] Natural gas is available from a variety of in-state and out-of-state sources and is provided throughout the state in response to market supply and demand. Complementing available natural gas resources, biogas may soon be available via existing delivery systems, thereby increasing the availability and reliability of resources in total. The California Public Utilities Commission (CPUC) regulates investor-owned natural gas utilities operating in California, including SoCal Gas.

Transportation Energy

California is home to approximately 35.8 million registered vehicles, which consume an estimated 17.4 billion gallons of fuel each year (Project Energy Analysis, p. 16). The state's history has been, in part, a history of the automobile and the associated impacts on personal mobility, land-use planning, and air quality. In recognition of these challenges, California has enacted a suite of policies and goals to shift the transportation sector toward

[2] https://www.socalgas.com/about-us/company-profile

cleaner, sustainable fuels and more efficient technology vehicles. IEPR data indicates very stable consumption rates for jet fuel and diesel through 2030. Gasoline consumption is forecasted to decline through 2030.

4.5.3 REGULATORY BACKGROUND

Federal and state agencies regulate energy use and consumption through various means and programs. On the federal level, the United States Department of Transportation, the United States Department of Energy, and the United States Environmental Protection Agency (EPA) are three federal agencies with substantial influence over energy policies and programs. On the state level, the CPUC and the CEC are two agencies with authority over different aspects of energy. Relevant federal and state energy-related laws and plans are summarized below.

4.5.3.1 Federal Regulations

Intermodal Surface Transportation Efficiency Act Of 1991 (ISTEA)

ISTEA promoted the development of inter-modal transportation systems to maximize mobility as well as address national and local interests in air quality and energy. ISTEA contained factors that Metropolitan Planning Organizations (MPOs) were to address in developing transportation plans and programs, including some energy-related factors. To meet the new ISTEA requirements, MPOs adopted explicit policies defining the social, economic, energy, and environmental values guiding transportation decisions.

The Transportation Equity Act for the 21st Century (TEA-21)

TEA-21 was signed into law in 1998 and builds upon the initiatives established in the ISTEA legislation, discussed above. TEA-21 authorizes highway, highway safety, transit, and other efficient surface transportation programs. TEA-21 continues the program structure established for highways and transit under ISTEA, such as flexibility in the use of funds, emphasis on measures to improve the environment, and focus on a strong planning process as the foundation of good transportation decisions. TEA-21 also provides for investment in research and its application to maximize the performance of the

transportation system through, for example, deployment of Intelligent Transportation Systems, to help improve operations and management of transportation systems and vehicle safety.

4.5.3.2 State Regulations

Integrated Energy Policy Report (IEPR)

Senate Bill 1389 (Bowen, Chapter 568, Statutes of 2002) requires the CEC to prepare a biennial integrated energy policy report that assesses major energy trends and issues facing the state's electricity, natural gas, and transportation fuel sectors and provides policy recommendations to conserve resources; protect the environment; ensure reliable, secure, and diverse energy supplies; enhance the state's economy; and protect public health and safety (Public Resources Code § 25301[a]). The CEC prepares these assessments and associated policy recommendations every two years, with updates in alternate years, as part of the IEPR.

The 2021 IEPR was adopted February 22, 2022, and continues to work towards improving electricity, natural gas, and transportation fuel energy use in California. The 2021 IEPR provides the results of the CEC's assessments of a variety of energy issues facing California. Many of these issues will require action if the state is to meet its climate, energy, air quality, and other environmental goals while maintaining reliability and controlling costs. Additionally, the 2021 IEPR provides the results of the CEC's assessments of a variety of energy issues facing California. Many of these issues will require action if the state is to meet its climate, energy, air quality, and other environmental goals while maintaining reliability and controlling costs.

State of California Energy Plan

The CEC is responsible for preparing the State Energy Plan, which identifies emerging trends related to energy supply, demand, conservation, public health and safety, and the maintenance of a healthy economy. The Plan calls for the state to assist in the transformation of the transportation system to improve air quality, reduce congestion, and

increase the efficient use of fuel supplies with the least environmental and energy costs. To further this policy, the plan identifies several strategies, including assistance to public agencies and fleet operators and encouragement of urban designs that reduce vehicle miles traveled (VMT) and accommodate pedestrian and bicycle access.

California Code Title 24, Part 6, Energy Efficiency Standards

California Code of Regulations (CCR) Title 24 Part 6: California's Energy Efficiency Standards for Residential and Nonresidential Buildings, was first adopted in 1978 in response to a legislative mandate to reduce California's energy consumption. The standards are updated periodically to allow consideration and possible incorporation of new energy efficient technologies and methods. Energy efficient buildings require less electricity; therefore, increased energy efficiency reduces fossil fuel consumption and decreases GHG emissions. The 2019 version of Title 24 was adopted by the CEC and became effective on January 1, 2020. The 2019 Title 24 standards are applicable to building permit applications submitted on or after January 1, 2020. The 2019 Title 24 standards require solar PV systems for new homes, establish requirements for newly constructed healthcare facilities, encourage demand responsive technologies for residential buildings, and update indoor and outdoor lighting standards for nonresidential buildings. The CEC anticipates that single-family homes built with the 2019 standards would use approximately 7% less energy compared to the residential homes built under the 2016 standards. Additionally, after implementation of solar PV systems, homes built under the 2019 standards would use about 53% less energy than homes built under the 2016 standards. Nonresidential buildings would use approximately 30% less energy due to lighting upgrades compared to the prior code.

AB 1493 Pavley Regulations and Fuel Efficiency Standards

California AB 1493, enacted on July 22, 2002, required CARB to develop and adopt regulations that reduce GHGs emitted by passenger vehicles and light duty trucks. Under this legislation, CARB adopted regulations to reduce GHG emissions from non-commercial passenger vehicles (cars and light-duty trucks). Although aimed at reducing GHG

emissions specifically, a co-benefit of the Pavley standards is an improvement in fuel efficiency and consequently a reduction in fuel consumption.

California's Renewables Portfolio Standard (RPS)

First established in 2002 under Senate Bill (SB) 1078, California's Renewables Portfolio Standards (RPS) required retail sellers of electric services to increase procurement from eligible renewable resources to 20% of total retail sales by 2017. The program was accelerated in 2015 with SB 350 which mandated a 50% RPS by 2030. SB 350 includes interim annual RPS targets with three-year compliance periods and requires 65% of RPS procurement to be derived from long-term contracts of 10 or more years. In 2018, SB 100 was signed into law, which increases the RPS to 60% by 2030 and requires all the state's electricity to come from carbon-free resources by 2045.

Clean Energy and Pollution Reduction Act of 2015 (SB 350)

In October 2015, the legislature approved, and the Governor signed SB 350, which reaffirms California's commitment to reducing its GHG emissions and addressing climate change. Key provisions include an increase in the RPS discussed above, higher energy efficiency requirements for buildings, initial strategies towards a regional electricity grid, and improved infrastructure for electric vehicle charging stations. Specifically, SB 350 requires the following to reduce statewide GHG emissions:

- Increase the amount of electricity procured from renewable energy sources from 33% to 50% by 2030, with interim targets of 40% by 2024, and 25% by 2027.
- Double the energy efficiency in existing buildings by 2030. This target will be achieved through the CPUC, the CEC, and local publicly owned utilities.
- Reorganize the California Independent System Operator (ISO) to develop more regional electricity transmission markets and to improve accessibility in these markets, which will facilitate the growth of renewable energy markets in the western United States (California Leginfo 2015).

City Of Ontario, 2022 Community Climate Action Plan (CCAP) Update

Energy efficiency performance standards are provided in the City of Ontario, 2022 CCAP Update. As presented in Table 3-1 and 3-2 of the Energy Analysis, the Project is consistent with all applicable performance standards.

4.5.4 STANDARDS OF SIGNIFICANCE

Appendix G of the California Environmental Quality Act (*CEQA*) Guidelines indicate a Project will have a potentially significant effect related to energy if it would:

- Result in potentially significant environmental impact due to wasteful, inefficient, or unnecessary consumption of energy resources, during project construction or operation; or

- Conflict with or obstruct a state or local plan for renewable energy or energy efficiency.

4.5.5 POTENTIAL IMPACTS AND MITIGATION MEASURES

4.5.5.1 Impact Statements

Potential Impact EN-1: *Result in potentially significant environmental impact due to wasteful, inefficient, or unnecessary consumption of energy resources, during project construction or operation.*

Impact Analysis:

PROJECT ENERGY DEMANDS AND ENERGY EFFICIENCY/CONSERVATION MEASURES

The Project in total would be required to comply with incumbent performance standards established under the Building Energy Efficiency Standards contained in the California Code of Regulations (CCR), Title 24, Part 6 (Title 24, Energy Efficiency Standards). Also, developers and owners/tenants have vested financial incentives to avoid imprudent energy

consumption practices. In this regard, there is growing recognition among developers and owners/tenants that efficient and sustainable construction and operational practices yield both environmental and economic benefits. On this basis, and as further supported by the following discussions, the Project would not result in or cause wasteful, inefficient, and unnecessary consumption of energy.

CONSTRUCTION ENERGY CONSUMPTION ESTIMATES AND ENERGY EFFICIENCY/ CONSERVATION MEASURES

Construction Fuel/Power Consumption Estimates

Energy consumption in support of, or related to, Project construction would include electricity consumption by various equipment and tools; diesel fuel consumed by construction equipment and construction vendor trips; and gasoline consumed by construction worker commutes. As presented in the Project Energy Analysis:

- Over the approximately 4-year construction period, Project construction activities would consume approximately 11,310,591 kWH of electricity (Project Energy Analysis, p. 28).

- Over the approximately 4-year construction period, Project construction equipment operations would consume approximately 792,643 gallons of diesel fuel (Project Energy Analysis, p. 29).

- Over the approximately 4-year construction period, Project construction worker commutes would consume and estimated 1,455,871 gallons of fuel (Project Energy Analysis, p. 32).

- Over the approximately 4-year construction period, Project construction vendor trips would consume approximately 325,768 gallons of fuel (Project Energy Analysis, p. 36).

Diesel fuel and fuel for construction activities would be provided by existing area vendors. Construction electricity demands would be provided via connection to existing SCE services.

Project construction activities would comprise temporary, single-event demands for diesel fuel and electricity and would not require on-going or permanent commitment of fuel for these purposes.

Construction Energy Efficiency/Conservation Measures

Equipment and vehicles used during Project construction would conform to CARB regulations and California emissions standards, and would demonstrate related fuel efficiencies. There are no unusual Project characteristics or construction processes that would require the use of vehicles or equipment that would be more energy intensive than is used for comparable activities; or equipment that would not conform to incumbent power/fuel efficiency standards. Project construction activities would therefore not result in inefficient, wasteful, or unnecessary consumption of power or fuel.

Additionally, certain incidental construction-source energy efficiencies would likely accrue through implementation of California regulations. More specifically, California Code of Regulations Title 13, Motor Vehicles, section 2449(d)(3) *Idling*, limits idling times of construction vehicles to no more than five minutes, thereby precluding unnecessary and wasteful consumption of fuel due to unproductive idling of construction equipment. Enforcement of idling limitations is realized through periodic site inspections conducted by City building officials, and/or in response to citizen complaints.

Indirect construction energy efficiencies and energy conservation would be achieved through the use of recycled/recyclable materials and related procedures, and energy efficiencies realized from bulk purchase, transport and use of construction materials. Use of recycled and recyclable materials and use of materials in bulk also reduces energy demands associated with preparation and transport of construction materials as transport and disposal of construction waste and solid waste in general, with corollary reduced

demands on area landfill capacities and energy consumed by waste transport and landfill operations.

Construction Waste Management Plan

A Project Construction Waste Management Plan would be required consistent with Section 5.408.1.1 of the CALGreen Code. Consistent with Section 5.408, *Construction Waste Reduction, Disposal, and Recycling* of the California Green Building Standards Code (CALGreen Code), as adopted by the City of Ontario. The Project would be required to recycle or salvage for reuse a minimum of 50 percent of the non-hazardous construction and demolition waste.

OPERATIONAL ENERGY CONSUMPTION AND ENERGY EFFICIENCY/CONSERVATION MEASURES

Operational Energy Consumption

Energy consumption in support of, or related to, Project operations would include transportation energy demands (energy consumed by vehicles accessing the Project site) and facilities energy demands (energy consumed by building operations and site maintenance activities). As presented in the Project Energy Analysis:

- Vehicles accessing the Project site activities would consume approximately 9,921,947 gallons of fuel annually (Project Energy Analysis, p. 40).

- Project building and site operations would consume approximately 233,744,273 kBtu natural gas annually (Project Energy Analysis, p. 41).

- Project building and site operations would consume approximately 80,413,660 kWh electricity annually (Project Energy Analysis, p. 41).

Operational Energy Efficiency/Conservation Measures

Facilities Energy Demand Efficiencies

The Project would be required to meet or surpass standards established under incumbent California Code Title 24, Part 6 (the California Energy Code) and California Green Building Standards Code (CALGreen; CCR, Title 24, Part 11) as implemented by the City, to include building "solar zones" accommodating on-site photovoltaic energy sources.[3]

Enhanced Vehicle Fuel Efficiencies

Under future conditions, average fuel economies of vehicles accessing the Project site can be expected to improve as older, less fuel-efficient vehicles are removed from circulation. Average fuel economies of vehicles accessing the Project site can also be expected to improve over time in response to fuel economy and emissions standards imposed on newer vehicles entering the transportation system.

Project Design and Access

The Project proposes typical urban land uses within an urbanizing context proximate to, and readily accessible from, regional and local roadways. In these regards, the Project setting proximate to transportation corridors generally facilitates access to the Project.

SUMMARY

Construction Summary

Construction equipment use of fuel would not be atypical for the type of construction proposed, as there are no aspects of the Project's proposed construction process that are

[3] Per the 2019 California Energy Code, the Project building roof designs would be required to provide "solar zones" reserved for the future installation of a solar electric or solar thermal system. Energy Code Section 110.10 B states that: "The solar zone shall be located on the roof or overhang of the building or on the roof or overhang of another structure located within 250 feet of the building or on covered parking installed with the building project, and shall have a total area no less than 15 percent of the total roof area of the building excluding any skylight area. The solar zone requirement is applicable to the entire building, including mixed occupancy."

unusual or energy-intensive, and Project construction equipment would conform to the applicable CARB emissions standards, acting to promote equipment fuel efficiencies.

CCR Title 13, Title 13, Motor Vehicles, section 2449(d)(2) *Idling*, limits idling times of construction vehicles to no more than 5 minutes, thereby precluding unnecessary and wasteful consumption of fuel due to unproductive idling of construction equipment. Enforcement of idling limitations is realized through periodic site inspections conducted by local building officials, and/or in response to citizen complaints.

Diesel fuel would be supplied by regional commercial vendors. Indirectly, construction energy efficiencies and energy conservation would be achieved using bulk purchases, transport and use of construction materials. The 2021 IEPR released by the CEC has shown that fuel efficiencies are getting better within on and off-road vehicle engines due to more stringent government requirements.

As supported by the preceding discussions, Project construction energy consumption would not be considered inefficient, wasteful, or otherwise unnecessary.

Operational Summary

The Project operations would not result in excessive and wasteful vehicle trips and VMT, nor excessive and wasteful vehicle energy consumption compared to other similar land uses.

Enhanced fuel economies realized pursuant to federal and state regulatory actions, and related transition of vehicles to alternative energy sources (e.g., electricity, natural gas, biofuels, hydrogen cells) would likely decrease future gasoline fuel demands per VMT.

Location of the Project proximate to regional and local roadway systems tends to reduce VMT within the region, acting to reduce regional vehicle energy demands. The Project would implement sidewalks, facilitating and encouraging pedestrian access. Facilitating pedestrian and bicycle access would reduce VMT and associated energy consumption. In

compliance with the California Green Building Standards Code and County requirements, the Project would promote the use of bicycles as an alternative mean of transportation by providing short-term and/or long-term bicycle parking accommodations.

As supported by the preceding discussions, Project transportation energy consumption would not be considered inefficient, wasteful, or otherwise unnecessary.

Facility Demand Summary

The Project proposes conventional land uses reflecting contemporary energy efficient/energy conserving designs and operational programs. The Project does not propose uses that are inherently energy intensive and the energy demands in total would be comparable to other land use projects of similar scale and configuration. The Project's compliance with applicable Title 24 standards would ensure that Project energy demands would not be inefficient, wasteful, or otherwise unnecessary.

Conclusion

As supported by the preceding analyses, Project construction and operations would not result in the inefficient, wasteful or unnecessary consumption of energy, and potential Project impacts in these regards would be less-than-significant. Further, energy demands of the Project can be accommodated within the context of available resources and energy delivery systems. The Project would therefore not cause or result in the need for additional energy-producing or energy transmission facilities and would not create or otherwise result in a potentially significant impact affecting energy resources or energy delivery systems. On this basis, the potential for the Project to result in a potentially significant environmental impact due to wasteful, inefficient, or unnecessary consumption of energy resources is considered less-than-significant.

Level of Significance: Less-Than-Significant.

Potential Impact EN-2: *Conflict with or obstruct a state or local plan for renewable energy or energy efficiency.*

Impact Analysis: The Project's consistency with the applicable federal, state, and local plans is discussed below.

Consistency with ISTEA

Transportation and access to the Project site is provided by the local and regional roadway systems. The Project would not interfere with, nor otherwise obstruct, intermodal transportation plans or projects that may be realized pursuant to the ISTEA, as SCAG has no plans for intermodal facilities on or through the Project site.

Consistency with TEA-21

The Project site is located along major transportation corridors with proximate access to the Interstate freeway system. The location of the Project site facilitates access, acts to reduce vehicle miles traveled, takes advantage of existing infrastructure systems, and promotes land use compatibilities through collocation of similar uses. The Project supports the strong planning processes emphasized under TEA-21. The Project is therefore consistent with, and would not otherwise interfere with, nor obstruct implementation of TEA-21.

Consistency with IEPR

Electricity would be provided to the Project by SCE. SCE's Clean Power and Electrification Pathway (CPEP) white paper builds on existing state programs and policies. As such, the Project is consistent with, and would not otherwise interfere with, nor obstruct implementation of the goals presented in the 2021 IEPR.

Additionally, the Project will comply with the applicable Title 24 standards which would ensure that the Project energy demands would not be inefficient, wasteful, or otherwise unnecessary. As such, development of the proposed Project would support the goals presented in the 2021 IEPR.

Consistency with State of California Energy Plan

The Project site is located along major transportation corridors with proximate access to the Interstate freeway system. The location of the Project site facilitates access and takes

advantage of existing infrastructure systems. The Project therefore supports urban design and planning processes identified under the State of California Energy Plan. As such, the Project is consistent with and would not otherwise interfere with, nor obstruct, implementation of the State of California Energy Plan.

Consistency with California Code Title 24, Part 6, Energy Efficiency Standards

The 2022 version of Title 24 was adopted by the California Energy Commission (CEC) and will become effective on January 1, 2023. It should be noted that the analysis herein assumes compliance with the 2022 Title 24 Standards. The Project would not interfere with implementation of Title 24.

Consistency with AB 1493

AB 1493 is not applicable to the Project as it is a statewide measure establishing vehicle emissions standards. No feature of the Project would interfere with implementation of the requirements under AB 1493.

Consistency with RPS

California's Renewable Portfolio Standard is not applicable to the Project as it is a statewide measure that establishes a renewable energy mix. No feature of the Project would interfere with implementation of the requirements under RPS.

Consistency with SB 350

The proposed Project would use energy from SCE. SCE has committed to diversify their portfolio of energy sources by increasing energy from wind and solar sources. No feature of the Project would interfere with implementation of SB 350. Additionally, the Project would be designed and constructed to implement the energy efficiency measures for new industrial developments and would include several measures designed to reduce energy consumption.

Summary

As demonstrated above, the Project would not conflict with or obstruct a state or local plan for renewable energy or energy efficiency. Additionally, regulatory measures, standards, and policies directed at reducing air pollutant emissions and GHG emissions would also act to promote energy conservation and reduce Project energy consumption. Please refer to related discussions presented at EIR Sections 4.3, *Air Quality* and 4.4, *Greenhouse Gas Emissions*. Based on the preceding, the potential for the Project to conflict with or obstruct a state or local plan for renewable energy or energy efficiency is considered less-than-significant.

Level of Significance: Less-Than-Significant.

4.6 NOISE

4.6 NOISE

Abstract

This Section assesses whether the Project would substantially increase ambient noise levels, or expose land uses to noise, groundborne noise, or groundborne vibration levels exceeding established standards. Potential impacts considered within this Section include:

- *Generation of a substantial temporary or permanent increase in ambient noise levels in the vicinity of the project exceeding standards established in the local general plan or noise ordinance, or applicable standards of other agencies; and*

- *Generation of excessive groundborne vibration or groundborne noise.*

- *For a project located within the vicinity of a private airstrip or an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project expose people residing or working in the project area to excessive noise levels.*

As substantiated herein, all potential noise impacts of the Project would be less-than-significant or can be mitigated to levels that are less-than-significant.

4.6.1 INTRODUCTION

This Section presents the noise setting, methodology, standards of significance, and potential noise impacts associated with the Project. Where impacts are determined to be potentially significant, mitigation measures are proposed to avoid or reduce the severity of impacts. The information presented herein has been summarized from the *Rich-Haven Specific Plan 2022 Amendment, Noise and Vibration Analysis* (Urban Crossroads, Inc.) October 27, 2022 (Project Noise Impact Analysis). The Project Noise Impact Analysis in its entirety is presented at EIR Appendix G.

4.6.2 SETTING

Following are discussions of noise fundamentals applicable to the Project, together with assessments of existing ambient noise levels and noise sources in the Project vicinity.

4.6.2.1 Fundamentals of Noise

Noise levels are measured on a logarithmic scale in decibels which are then weighted and added over a 24-hour period to reflect not only the magnitude of the sound, but also its duration, frequency, and time of occurrence. In this manner, various acoustical scales and units of measurement have been developed, including equivalent sound levels (Leq), day-night average sound levels (Ldn) and community noise equivalent levels (CNEL).

"A-weighted" decibels (dBA) approximate the subjective response of the human ear to a broad frequency noise source by discriminating against the very low and very high frequencies of the audible spectrum. They are adjusted to reflect only those frequencies which are audible to the human ear. The decibel scale has a value of 0.0 dBA at the threshold of hearing and 120 dBA at the threshold of pain. Each interval of 10 decibels indicates a sound energy ten times greater than before, which is perceived by the human ear as being roughly twice as loud. Thus, a 1.0 decibel increase is just audible, whereas a 10-decibel increase means the sound is perceived as being twice as loud as before. Examples of the decibel level of various noise sources are provided in the following Figure 4.6-1.

COMMON OUTDOOR ACTIVITIES	COMMON INDOOR ACTIVITIES	A - WEIGHTED SOUND LEVEL dBA	SUBJECTIVE LOUDNESS	EFFECTS OF NOISE
THRESHOLD OF PAIN		140	INTOLERABLE OR DEAFENING	HEARING LOSS
NEAR JET ENGINE		130		
		120		
JET FLY-OVER AT 300m (1000 ft)	ROCK BAND	110		
LOUD AUTO HORN		100	VERY NOISY	
GAS LAWN MOWER AT 1m (3 ft)		90		
DIESEL TRUCK AT 15m (50 ft), at 80 km/hr (50 mph)	FOOD BLENDER AT 1m (3 ft)	80		SPEECH INTERFERENCE
NOISY URBAN AREA, DAYTIME	VACUUM CLEANER AT 3m (10 ft)	70	LOUD	
HEAVY TRAFFIC AT 90m (300 ft)	NORMAL SPEECH AT 1m (3 ft)	60		
QUIET URBAN DAYTIME	LARGE BUSINESS OFFICE	50	MODERATE	SLEEP DISTURBANCE
QUIET URBAN NIGHTTIME	THEATER, LARGE CONFERENCE ROOM (BACKGROUND)	40		
QUIET SUBURBAN NIGHTTIME	LIBRARY	30	FAINT	NO EFFECT
QUIET RURAL NIGHTTIME	BEDROOM AT NIGHT, CONCERT HALL (BACKGROUND)	20		
	BROADCAST/RECORDING STUDIO	10	VERY FAINT	
LOWEST THRESHOLD OF HUMAN HEARING	LOWEST THRESHOLD OF HUMAN HEARING	0

Figure 4.6-1
Typical Noise Levels

Noise Rating Schemes

Equivalent sound levels are not measured directly, but rather are calculated from sound pressure levels typically measured in dBA. The equivalent sound level (Leq) is the constant level that, over a given period, transmits the same amount of acoustic energy as the actual time-varying sound. Equivalent sound levels are the basis for both the Ldn and CNEL scales.

Day-night average sound levels (Ldn) are a measure of the cumulative noise exposure of the community. The Ldn value results from a summation of hourly Leqs over a 24-hour period with an increased weighting factor applied to the nighttime period between 10:00 p.m. and 7:00 a.m. This noise rating scheme account for subjectively more annoying noise events that may occur during normal sleep hours.

Community noise equivalent levels (CNEL) also carry a weighting penalty for noise that occurs during nighttime hours. In addition, CNEL levels include a penalty for noise events that occur during the evening hours between 10:00 p.m. and 7:00 a.m. Because of the weighting factors applied, CNEL values at a given location will always be larger than Ldn values, which in turn will exceed Leq values. However, CNEL values are typically within one decibel of the Ldn value.

Sound Propagation

For a "line source" of noise, such as a heavily traveled roadway, the noise level drops off by a nominal value of 3.0 decibels for each doubling of distance between the noise source and the noise receptor. The nominal value of 3.0 dBA with doubling applies to sound propagation from a line source: (1) over the top of a barrier greater than 3 meters in height; or (2) where there is a clear unobstructed view of the highway, the ground is hard, no intervening structures exist and the line-of-sight between the noise source and receptor averages more than three meters above the ground.

Notwithstanding, environmental factors such as wind conditions, temperature gradients, characteristics of the ground (hard or soft) and the air (relative humidity), and the presence of vegetation combine to typically increase the attenuation achieved outside

laboratory conditions to approximately 4.5 decibels per doubling of distance. The increase in noise attenuation in exterior environments is particularly true: (1) for freeways with an elevated or depressed profile or exhibiting expanses of intervening buildings or topography; (2) where the view of a roadway is interrupted by isolated buildings, clumps of bushes, scattered trees; (3) when the intervening ground is soft or covered with vegetation; or (4) where the source or receptor is located more than three meters above the ground.

In an area which is relatively flat and free of barriers, the sound level resulting from a single "point source" of noise drops by six decibels for each doubling of distance or 20 decibels for each factor of ten in distance. This applies to fixed noise sources and mobile noise sources which are temporarily stationary, such as an idling truck or other heavy-duty equipment operating within a confined area (such as industrial processes or construction).

Noise Barrier Attenuation

Effective noise barriers can reduce noise levels by 10 to 15 dBA. Noise barriers are most effective when placed close to the noise source or receptor. Noise barriers, however, do have limitations. For a noise barrier to work, it must be high enough and long enough to block the view of the noise source.

4.6.2.2 Factors Affecting Motor Vehicle Noise

According to the Highway Traffic Noise Analysis and Abatement Policy and Guidance, provided by the Federal Highway Administration (FHWA), the level of traffic noise depends on three primary factors: (1) the volume of the traffic, (2) the speed of the traffic, and (3) the vehicle mix within the flow of traffic. Generally, the loudness of traffic noise is increased by heavier traffic volumes, higher speeds, and a greater number of trucks. Assuming speed and vehicle mix do not change, a doubling of traffic volumes can be expected to result in a 3.0 dBA increase in noise levels. The vehicle mix on a given roadway may also influence community noise levels. As the number of medium and heavy trucks increases and becomes a larger percentage of the vehicle mix, adjacent noise

levels will increase. Vehicle noise is a combination of the noise produced by the engine, exhaust, and tires on the roadway.

To account for the ground-effect attenuation (absorption), two types of site conditions are commonly used in traffic noise models, soft-site, and hard-site conditions. Soft site conditions account for the sound propagation loss over natural surfaces such as normal earth and ground vegetation. A drop-off rate of 4.5 dBA per doubling of distance is typically observed over soft ground with landscaping, as compared with a 3.0 dBA drop-off rate over hard ground such as asphalt, concrete, stone and very hard packed earth. The Project Noise Study indicates that, generally, soft site conditions better reflect predicted noise levels within the Study Area. Related, California Department of Transportation (Caltrans) research has shown that the use of soft site conditions is more appropriate for the application of the FHWA traffic noise prediction model used in this analysis.

4.6.2.3 Community Responses to Noise

Approximately ten percent of the population has a very low tolerance for noise and will object to any noise not of their making. Consequently, even in the quietest environment, some complaints will occur. Another 25 percent of the population will not complain even in very severe noise environments. Thus, a variety of reactions can be expected from people exposed to any given noise environment.

Despite this variability in behavior on an individual level, populations generally can be expected to exhibit the following responses to changes in noise levels. An increase or decrease of 1.0 dBA cannot be perceived except in carefully controlled laboratory experiments. A 3.0 dBA increase may be perceptible outside of the laboratory. An increase of 5.0 dBA is often necessary before any noticeable change in community response (i.e., complaints) would be expected.

Community responses to noise may range from registering a complaint by telephone or letter, to initiating court action, depending upon individual susceptibility to noise and

personal attitudes about noise. Several factors are related to the level of community annoyance including:

- Fear associated with noise-producing activities;
- Noise receptor's perception that they are being unfairly treated;
- Attitudes regarding the usefulness of the noise-producing activity; and
- Receptor's belief that the noise source can be controlled.

Recent studies have shown that changes in long-term noise levels are noticeable and are responded to by people. For example, about ten percent of the people exposed to traffic noise of 60 Ldn will report being highly annoyed with the noise, and each increase of one Ldn is associated with approximately two percent more people being highly annoyed. When traffic noise exceeds 60 Ldn or aircraft noise exceeds 55 Ldn, people begin complaining. Group or legal actions to stop the noise should be expected to begin at traffic noise levels near 70 Ldn and aircraft noise levels near 65 Ldn.

4.6.2.4 Land Use Compatibility with Noise

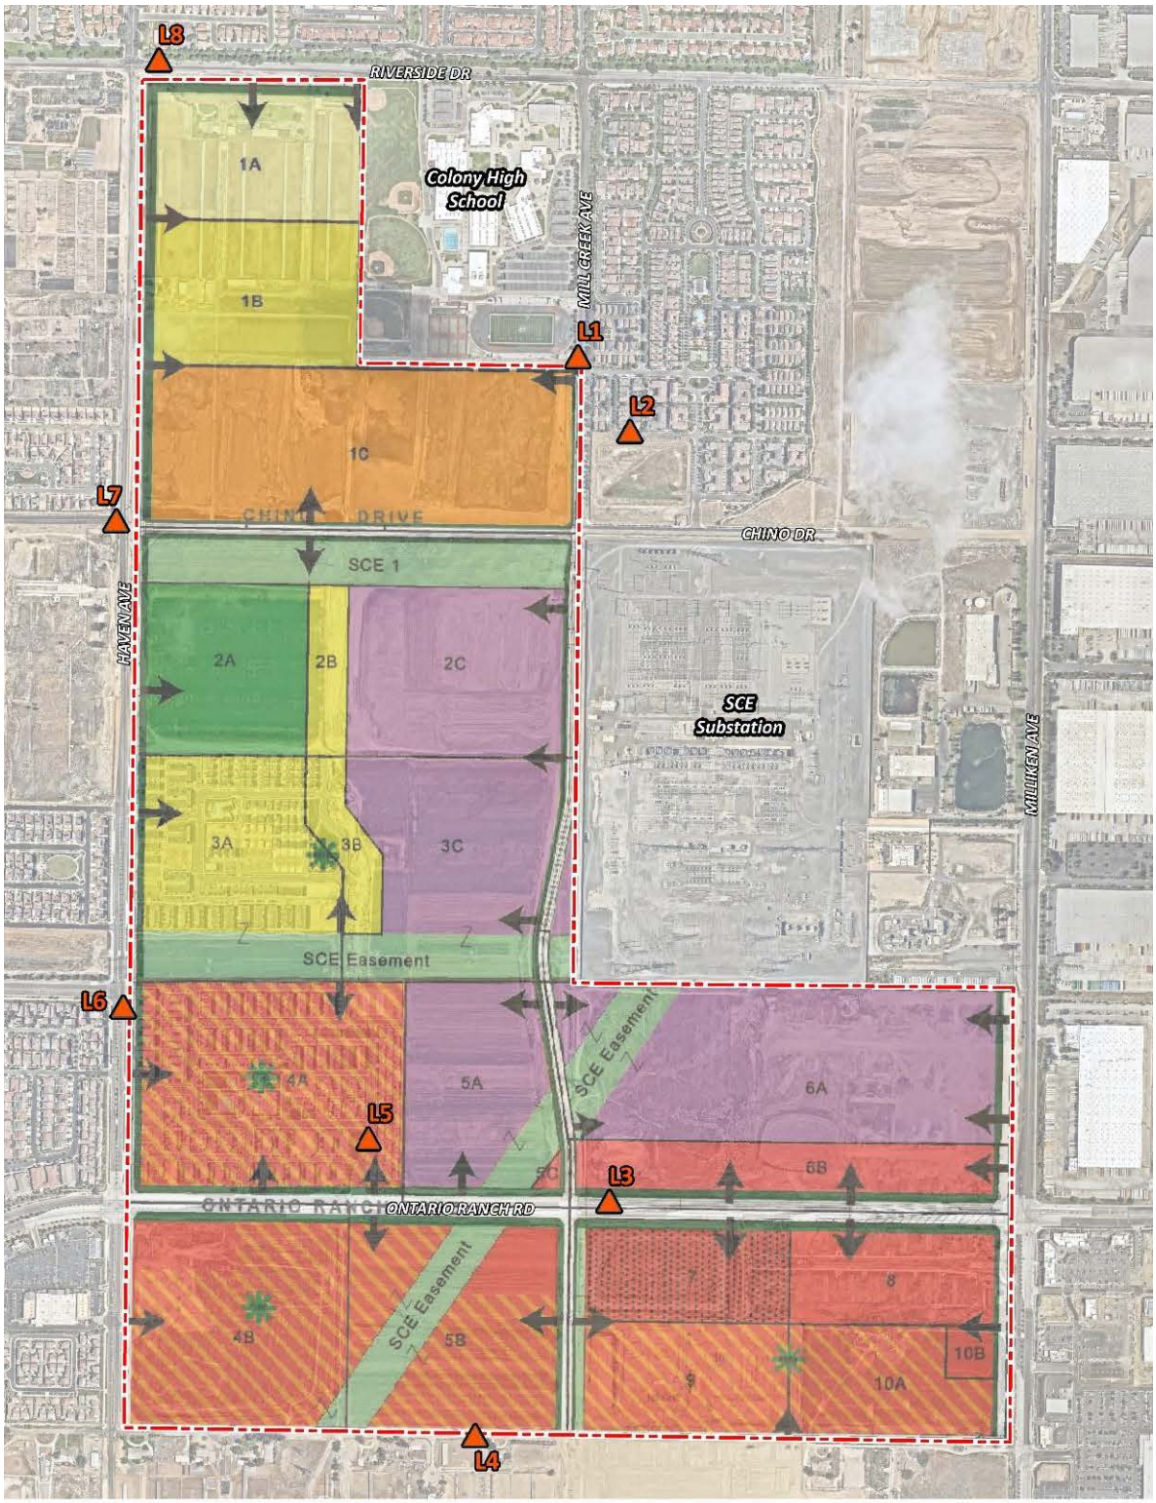
Some land uses are less tolerant of noise than others. For example, schools, hospitals, churches, and residences are more sensitive to noise intrusion than are commercial or industrial activities. As ambient noise levels affect the perceived amenity or liveability of a development, so too can the mismanagement of noise impacts impair the economic health and growth potential of a community by reducing the area's desirability as a place to live, shop and work. For this reason, land use compatibility with the noise environment is an important consideration in the planning and design process.

4.6.2.5 Sensitive Receptors

Land uses classified as noise-sensitive by the State of California include: schools, hospitals, rest homes, long-term care centers, and mental care facilities. Some jurisdictions also consider day care centers, single-family dwellings, mobile home parks, churches, libraries, and recreation areas to be noise-sensitive. Moderately noise-sensitive land uses typically include: multi-family dwellings, hotels, motels, dormitories, out-

patient clinics, cemeteries, golf courses, country clubs, athletic/tennis clubs, and equestrian clubs.

Land uses which are considered relatively insensitive to noise include business, commercial, and professional developments. Land uses that are typically not affected by noise include: industrial, manufacturing, utilities, agriculture, natural open space, undeveloped land, parking lots, warehousing, liquid and solid waste facilities, salvage yards, and transit terminals.



4.6.2.6 Ambient Noise Conditions

To assess existing noise levels in the Project vicinity, eight long-term 24-hour measurements were taken at locations throughout the Study Area. These locations are illustrated at Figure 4.6-2 and are representative of sites that may be affected by Project-generated noise. Ambient noise measurements in the Project Study Area are summarized at Table 4.6-1.

Table 4.6-1
24-Hour Ambient Noise Level Measurements

Location	Description	Energy Average Noise Level (dBA L_{eq})	
		Daytime	Nighttime
L1	Located near the northwest corner of the Project Site near the Colony High School Football Field.	56.0	55.6
L2	Located east of the Project Site just south of the existing residence at 3271 S. Quincy Way.	48.9	48.4
L3	Located within the Rich Haven Specific Plan north of Ontario Ranch Road.	69.1	64.0
L4	Located south of the Project Site near the existing residence at 10823 Edison Avenue.	56.3	52.1
L5	Located within the Rich Haven Specific Plan near the existing residence at 3965 S. Sunrise Avenue.	63.1	55.1
L6	Located west of the Project Site near the existing residence at 3860 S. Oasis Paseo.	68.8	62.4
L7	Located west of the Project Site near the existing residence at 3393 Clover Place.	65.4	60.2
L8	Located north of the Project Site near the existing residence at 2943 S. Alder Creek Drive.	68.5	64.3

Noise Monitoring Locations

4.6.3 EXISTING POLICIES AND REGULATIONS

To limit population exposure to physically and/or psychologically damaging, as well as intrusive, noise levels, the federal government, the State of California, various county governments, and most municipalities in the state have established standards and ordinances to control noise. In most areas, automobile and truck traffic is the major source of environmental noise. Traffic activity generally produces an average sound level that remains fairly constant with time. Air and rail traffic, and commercial and industrial activities are also major sources of noise in some areas. Federal, state, and local agencies regulate different aspects of environmental noise. Federal and state agencies generally set noise standards for mobile sources such as aircraft and motor vehicles, while regulation of stationary sources is left to local agencies.

4.6.3.1 State of California

The State of California regulates freeway noise, sets standards for sound transmission, provides occupational noise control criteria, identifies noise standards and provides noise/land use compatibility guidance. State law requires that each county and city adopt a General Plan that includes a Noise Element which is to be prepared according to guidelines adopted by the Governor's Office of Planning and Research. The purpose of the Noise Element is to "limit the exposure of the community to excessive noise levels." In addition, the California Environmental Quality Act (CEQA) requires that all known environmental effects of a project be analyzed, including environmental noise impacts.

4.6.3.2 City of Ontario

Noise Element

The City of Ontario General Plan (Policy Plan) identifies several policies to minimize the impacts of excessive noise levels throughout the community. Policy Plan Section S4, *Noise Hazards*, establishes a goal of maintaining an environment where noise does not adversely affect the public's health, safety, and welfare. To satisfy this goal, the Policy Plan identifies seven policies related to: noise mitigation; coordination with transportation authorities; noise mitigation; truck traffic; roadway design; airport noise compatibility and rail noise mitigation. The noise criteria identified at Table 5-13-3 of The

Ontario Plan 2050 Final Supplemental Environmental Impact Report provides guidelines to evaluate land use compatibility within various noise environments. Table 5-13-3 is provided at Exhibit 3-A of the Project Noise Impact Analysis.

Noise Standards

The potential noise impacts originating from stationary-source (operational) noise are evaluated against standards established under a City's Municipal Code. The City of Ontario requires that noise from new stationary sources in the City comply with the City's Noise Ordinance, which limits the acceptable noise at the property line of the impacted property, to reduce nuisances to sensitive land uses. Compliance with the City's Noise Ordinance would result in noise levels that are acceptable to the City and would result in less-than-significant noise impacts from stationary sources.

Municipal Code Section 5-29.04(a) identifies the allowable daytime and nighttime ambient exterior noise standards for each land use type. The maximum acceptable Project-related operational noise levels received at off-site land uses in the City of Ontario are identified at Table 4.6-2.

Table 4.6-2
Operational Noise Standards

Noise Zone	Land Use	Exterior Noise Levels (dBA Leq)	
		Daytime (7 a.m.-10 p.m.)	Nighttime (10 p.m.-7 a.m.)
I	Single-Family Residential	65	45
II	Multi-Family Residential	65	50
III	Commercial	65	60
IV	Residential Mixed-Use	70	70
V	Manufacturing and Industrial	70	70

Source: *Rich-Haven Specific Plan 2022 Amendment, Noise and Vibration Analysis* (Urban Crossroads, Inc.) October 27, 2022.

Construction Noise Standards

The City of Ontario Municipal Code has set restrictions to control noise impacts associated with construction. Section 5-29.09 of the Municipal Code states: *No person, while engaged in construction, remodeling, digging, grading, demolition or any other related building activity, shall operate any tool, equipment or machine in a manner that produces loud*

noise that disturbs a person of normal sensitivity who works or resides in the vicinity, or a Police or Code Enforcement Officer, on any weekday except between the hours of 7 a.m. and 6 p.m. or between the hours of 9 a.m. to 6 p.m. on Saturday or Sunday. While the City establishes limits to the hours during which construction activity may take place, it does not identify specific noise level limits for construction noise levels at potentially affected receiver locations.

Construction noise would be considered significant if construction activities occurring outside of the hours specified (7 a.m. and 6 p.m. weekdays and 9 a.m. to 6 p.m. weekends, excluding federal holidays) or if construction activities substantially elevate the ambient noise environment at noise-sensitive uses for a substantial period. It is assumed that Project construction activities would comply with the City's hour of activity restrictions, thereby precluding construction activities during noise-sensitive time periods. However, neither the City of Ontario General Plan Noise Element or Municipal Code establish numeric maximum acceptable construction source noise levels at potentially affected receivers, which would allow for a quantified determination of what CEQA constitutes a substantial temporary or permanent increase in ambient noise levels. Therefore, a numerical construction threshold based on Federal Transit Administration (FTA) *Transit Noise and Vibration Impact Assessment Manual* is used for analysis of daytime construction impacts. The FTA considers a daytime exterior construction noise level of 80 dBA Leq as a reasonable threshold for noise sensitive land use.

Construction Vibration Standards

To analyze vibration impacts originating from the construction and operations of a project, vibration-generating activities are appropriately evaluated against standards established under a City's Municipal Code, if such standards exist. However, the City of Ontario does not identify specific vibration level limits. Therefore, for analysis purposes, the Caltrans *Transportation and Construction Vibration Guidance Manual* standards are used to assess potential temporary construction-related impacts at adjacent building locations. For uses adjacent to the Project site, a maximum acceptable continuous vibration threshold of 0.3 PPV (in/sec) is appropriate.

Airport Land Use Compatibility

The Project site is located approximately 2.4 miles south of the Ontario International Airport (ONT). The Project site is located within the ONT Airport Influence Area, according to Policy Map 2-1 of the *Ontario International Airport Land Use Compatibility Plan* (ONT ALUCP). As such, the Project site is subject to the Noise Criteria established at Table 2-3 in the ONT ALUCP. The Project site is located within the ONT Airport Influence Area but outside the 60-65 dBA CNEL airport noise impact zone.

4.6.4 STANDARDS OF SIGNIFICANCE

Based on the noise criteria presented above, and direction provided within the *CEQA Guidelines* as implemented by the City of Ontario, Project noise impacts would be considered potentially significant if the Project is determined to result in or cause the following conditions:

- Generation of a substantial temporary or permanent increase in ambient noise levels in the vicinity of the project exceeding standards established in the local general plan or noise ordinance, or applicable standards of other agencies.

- Generation of excessive groundborne vibration or groundborne noise levels.

- For a project located within the vicinity of a private airstrip or an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project expose people residing or working in the project area to excessive noise levels.

Noise Impact Thresholds

Noise impact thresholds applicable to the Project are summarized at Table 4.6-3. Please refer also to the discussion of thresholds presented at Project Noise Impact Analysis Section 4, *Significance Criteria.*

Table 4.6-3
Noise Impact Thresholds

Analysis	Receiving Land Use	Baseline Condition(s)	Significance Threshold Criteria	
			Daytime	Nighttime
Off-Site Traffic	Noise-Sensitive	If ambient is < 60 dBA CNEL	≥ 5 dBA CNEL Project increase	
		If ambient is 60 - 65 dBA CNEL	≥ 3 dBA CNEL Project increase	
		If ambient is > 65 dBA CNEL	≥ 1.5 dBA CNEL Project increase	
	Non Noise-Sensitive	if ambient is > 75 dBA CNEL	≥ 3 dBA CNEL Project increase	
Operational	Residential	Exterior Noise Level Limit	55 dBA L_{eq}	45 dBA L_{eq}
	Noise-Sensitive	If ambient is < 60 dBA Leq	≥ 5 dBA L_{eq} Project increase	
		If ambient is 60 - 65 dBA Leq	≥ 3 dBA L_{eq} Project increase	
		If ambient is > 65 dBA Leq	≥ 1.5 dBA L_{eq} Project increase	
Construction	Noise-Sensitive	Noise Level Threshold	80 dBA L_{eq}	70 dBA L_{eq}
		Vibration Level Threshold	0.3 PPV (in/sec)	n/a

4.6.5 POTENTIAL IMPACTS AND MITIGATION MEASURES

4.6.5.1 Introduction

The following discussions focus on areas where it has been determined that the Project may result in potentially significant noise/vibration impacts, based on the analysis presented within this Section and included within the EIR Initial Study (EIR Appendix A, Initial Study Checklist Item XIII. *Noise*).

4.6.5.2 Impact Statements

Following is an analysis of potential noise impacts that are expected to occur as a result of the Project. Noise levels will change both on-site and off-site if the Project is approved and implemented. The discussion of potential noise impacts is organized to reflect categories or types of noise sources, including:

- Construction-Source Noise;
- Vehicular-Source Noise;

- Operational/Area-Source Noise; and
- Vibration.

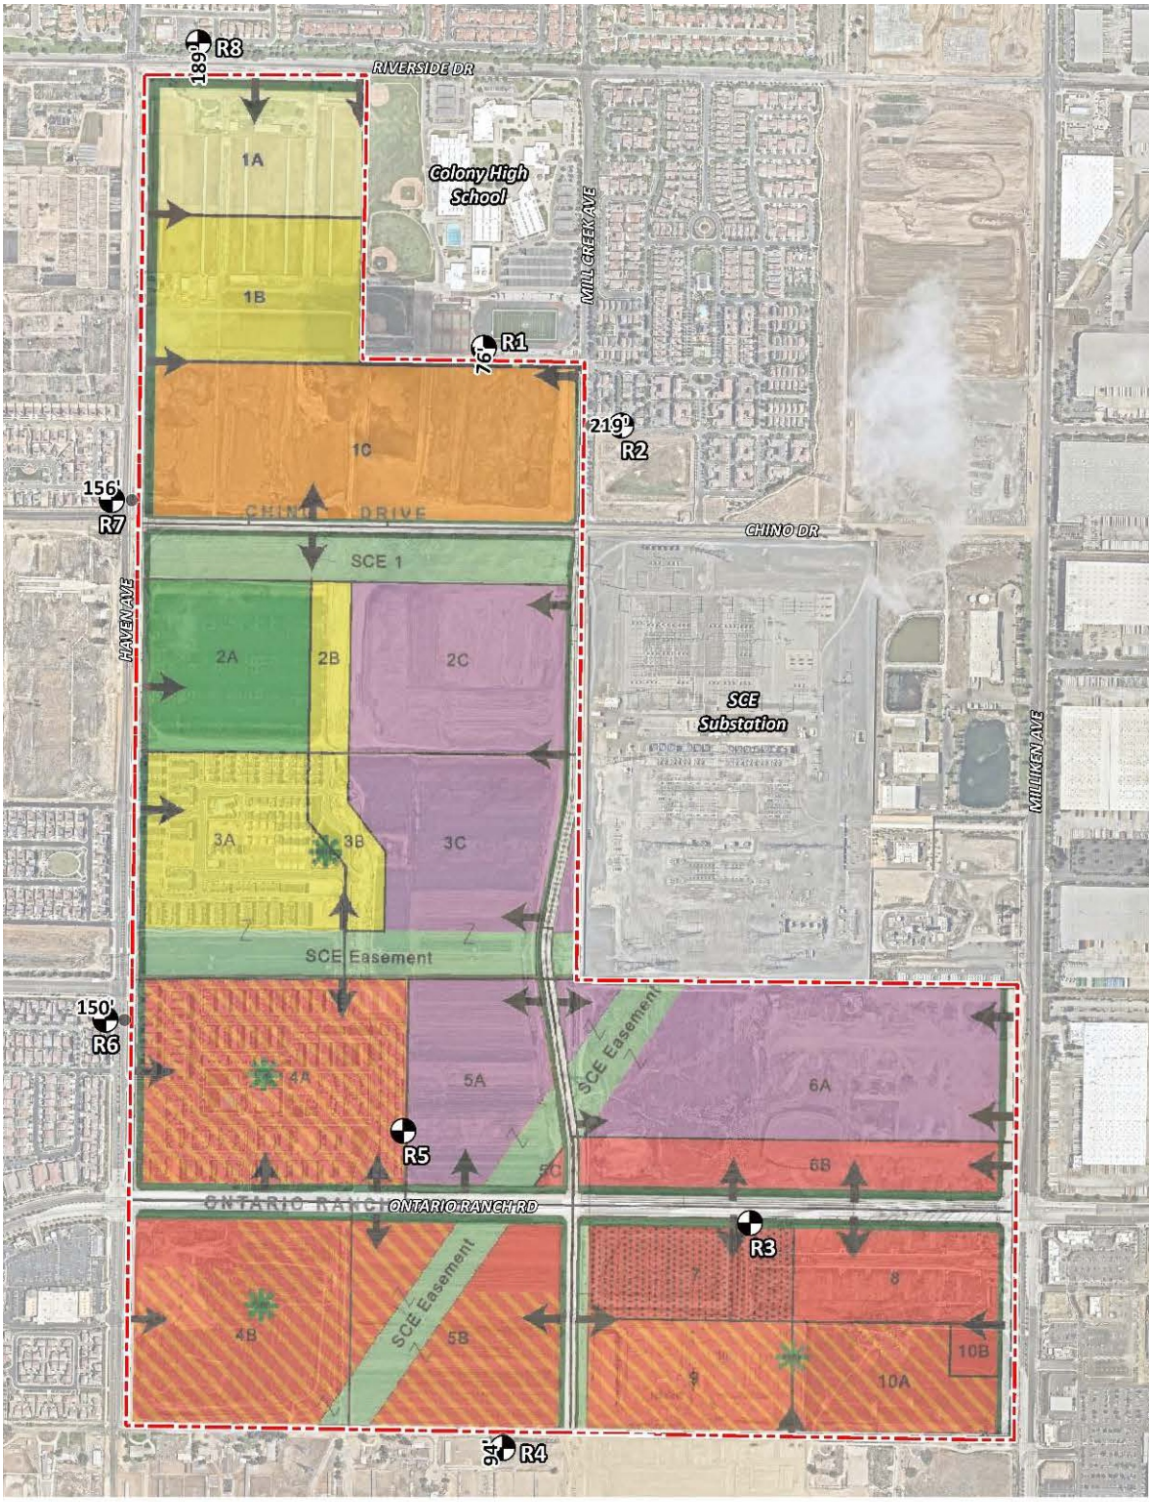
For each topical discussion, potential impacts are evaluated under applicable criteria established above at Section 4.6.4, *Standards of Significance*.

To assess the potential for long-term operational noise and short-term construction noise and vibration impacts, eight receiver locations were identified for focused analysis, as shown at Figure 4.6-3 and described below.

R1: Location R1 represents the Colony High School Football Stadium, approximately 76 feet north of the Project site. Receiver R1 is placed in the bleachers just north of Planning Area (PA) 1. A 24-hour noise measurement was taken near this location, L1, to describe the existing ambient noise environment.

R2: Location R2 represents the existing noise sensitive residence at 3271 S. Quincy Way, approximately 219 feet east of the Project site. Receiver R2 is placed in the private outdoor living areas facing the Project site. A 24-hour noise measurement was taken near this location, L2, to describe the existing ambient noise environment.

R3: Location R3 represents an on-site receiver location within the planned PA7 residential mixed use overlay area. Receiver R3 is placed approximately 460 feet south of the light industrial use within PA 6A. A 24-hour noise measurement was taken near this location, L3, to describe the existing ambient noise environment.



R4: Location R4 represents the existing noise sensitive residence at 10823 Edison Avenue, approximately 94 feet south of the Project site. Since there are no private outdoor living areas (backyard) facing the Project site, receiver R4 is placed at the building's façade. A 24-hour noise measurement was taken near this location, L4, to describe the existing ambient noise environment.

R5: Location R5 represents the existing on-site noise sensitive residence at 3959 S. Sunrise Avenue within the standalone residential overlay (PA4). Receiver R5 is placed in the private outdoor living areas facing the light industrial use within PA5A. A 24-hour noise measurement was taken near this location, L5, to describe the existing ambient noise environment.

R6: Location R6 represents the existing noise sensitive residence at 3455 Pine Ridge Loop, approximately 150 feet west of the Project site. Receiver R6 is placed in the private outdoor living areas facing the Project site. A 24-hour noise measurement was taken near this location, L6, to describe the existing ambient noise environment.

R7: Location R7 represents the existing noise sensitive residence at 3379 S. Myrtle Drive, approximately 156 feet west of the Project site. Receiver R7 is placed in the private outdoor living areas facing the Project site. A 24-hour noise measurement was taken near this location, L7, to describe the existing ambient noise environment.

R8: Location R8 represents the existing noise sensitive residence at 2943 S. Alder Creek Drive, approximately 189 feet north of the Project site. Receiver R8 is placed in the private outdoor living areas facing the Project site. A 24-hour noise measurement was taken near this location, L8, to describe the existing ambient noise environment.

Figure 4.6-3
Receiver Locations

CONSTRUCTION-SOURCE NOISE

Potential Impact NOI-1: *Construction activities and associated noise would result in exposure of persons to, or generation of, noise levels in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies.*

Impact Analysis: Noise generated by the Project construction equipment will include a combination of trucks, power tools, concrete mixers, and portable generators that, when combined, can reach high levels. Construction is expected to occur in the following stages:

- Site Preparation;
- Grading;
- Building Construction;
- Architectural Coating; and
- Paving.

The construction-source noise analysis was prepared using reference noise level measurements to describe the typical construction activity noise levels for each stage of Project construction. Please refer to Noise Impact Analysis Table 11-1, *Construction Reference Noise Levels* for a listing of reference noise levels employed in the evaluation of construction-source noise.

Noise levels generated by heavy construction equipment can range from approximately 70 dBA to more than 80 dBA when measured at 50 feet. However, these noise levels diminish with distance from the construction site at a rate of 6 dBA per doubling of distance. For example, a noise level of 80 dBA measured at 50 feet from the noise source to the receiver would be reduced to 74 dBA at 100 feet from the source to the receiver, and would be further reduced to 68 dBA at 200 feet from the source to the receiver.

Based on the construction equipment reference noise levels and distance to the Project site, peak noise levels at the receiver locations have been developed, and are summarized at Table 4.6-4.

Table 4.6-4
Construction Equipment Noise Level Summary

Receiver Location	Construction Noise Levels (dBA Leq)		
	Highest Construction Noise Levels	Threshold	Threshold Exceeded ?
R1	56.0	80	No
R2	53.3	80	No
R3	63.7	80	No
R4	55.8	80	No
R5	63.8	80	No
R6	55.1	80	No
R7	54.8	80	No
R8	52.5	80	No

Source: *Rich-Haven Specific Plan 2022 Amendment, Noise and Vibration Analysis* (Urban Crossroads, Inc.) October 27, 2022.

As indicated at Table 4.6-4, peak received construction-source noise levels would range from 52.5 to 63.8 dBA Leq. These levels would not exceed the applicable threshold of 80 dBA Leq. Construction-source noise levels that comply with applicable standards do not comprise a substantial permanent increase in ambient noise levels, or a substantial temporary or periodic increase in ambient noise levels.

Level of Significance: Less-Than-Significant. The following measures act to further reduce already less-than-significant construction noise levels.

4.6.1 Prior to Grading Permit issuance, the Applicant shall demonstrate that the Project complies with the following:

- *All construction equipment, fixed or mobile, shall be equipped with properly operating and maintained mufflers, to the satisfaction of the Noise Control Officer;*

- *During construction, stationary construction equipment shall be placed such that emitted noise is directed away from sensitive noise receivers to the satisfaction of the City Planner; and*
- *During construction and to the satisfaction of the City Planner, stockpiling and vehicle staging areas shall be located as far as practical from noise sensitive receptors during construction activities.*

4.6.2 *Operating or causing the operation of any tools or equipment used in construction, drilling, repair, alteration, or demolition work between the hours of 10 p.m. and 7 a.m. is prohibited. The City Planner may approve additional hours when it can be found that such additional hours will not generate additional disturbance, or that mitigation measures will ensure compatibility with nearby residential areas.*

VEHICULAR-SOURCE NOISE

Potential Impact NOI-2: *Vehicular source noise would result in exposure of persons to or generation of noise levels in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies.*

Impact Analysis: To assess the off-site transportation CNEL noise level impacts, noise contours were developed based on the Project traffic analyses. Noise contour boundaries represent the equal levels of noise exposure and are measured in CNEL from the center of the roadway. Noise contours were developed for the following traffic scenarios:

- Existing 2022 Traffic Conditions
- Existing Plus Project 2022 Traffic Conditions
- Opening Year Cumulative (OYC) 2027 Without Project
- Opening Year Cumulative (OYC) 2027 With Project
- Horizon Year (HY) 2050 Without Project
- Horizon Year (HY) 2050 With Project

Project Noise Impact Analysis Tables 7-1 through 7-6 present the noise contours developed for the above scenarios for all Study Area roadways. Based on these noise contours, the following Tables 4.6-5 through 4.6-7 present a comparison of noise conditions along Study Area roadways without and with development realized pursuant to the Project under the above-described scenarios.

Source: *Rich-Haven Specific Plan 2022 Amendment, Noise and Vibration Analysis* (Urban Crossroads, Inc.) October 27, 2022.

As shown above, Project traffic would not result in increased noise levels that would exceed the thresholds presented at Table 4.6-3. As such, off-site land uses adjacent to the study area roadway segments would experience less-than-significant noise level increases due to the Project-related traffic.

However, on-site residential uses proposed along Haven Avenue, Mill Creek Avenue, Hamner Avenue, Riverside Drive, Chino Avenue and Ontario Ranch Road may be subject to noise levels above 65 dBA. Therefore, on-site residential land uses located along these roadways would require additional noise attenuation to ensure that noise levels comply with the City's exterior and interior noise standards of 65 dBA CNEL and 45 dBA

CNEL. To this end, Mitigation Measure 4.6.3 requires the preparation of project-specific acoustical analysis for residential uses upon submittal of final site design plans.

Level of Significance Before Mitigation: Potentially Significant (on-site residential uses only).

Mitigation Measure:

4.6.3 Prior to the construction of residential development along Riverside Drive, Haven Avenue, Mill Creek Avenue, Edison Avenue, and Milliken Avenue, an acoustical noise analysis shall be prepared prior to the submittal of final tentative tract maps to ensure that exterior and interior noise levels are met. The acoustical analysis shall demonstrate that the buildings have been designed to limit interior noise levels to 45 dBA CNEL and exterior noise (backyards and habitable balconies and patios) to less than 65 dBA CNEL. Individual developments shall, to the extent feasible, implement site-planning techniques.

Level of Significance With Mitigation: Less-Than-Significant.

OPERATIONAL/AREA-SOURCE NOISE

Potential Impact NOI-3: *Project operational noise would result in exposure of persons to, or generation of noise levels in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies.*

Impact Analysis: To estimate the Project operational/area-source noise impacts, reference noise level measurements were collected from similar types of activities to represent the noise levels expected with the development of the proposed Project. Please refer to Noise Impact Analysis Table 10-5 for a listing of reference noise levels employed in the evaluation of operational/area-source noise.

It is important to note that the following projected noise levels assume the worst-case noise environment with the idling trucks, delivery truck activities, backup alarms, as well as loading and unloading of dry goods, roof-top air conditioning units, and parking lot

vehicle movements all operating simultaneously. These noise levels will likely vary throughout the day.

Using the reference noise levels, it is possible to estimate the operational source noise levels generated at the Project site and the Project-related noise level increases that would be experienced at each of the sensitive receiver locations. Please refer also to Noise Impact Analysis Appendix 10.1 for detailed calculations of the Project operational/area-source noise levels.

Daytime and nighttime operational/area-source noise levels that can be expected to be generated by the various Project noise sources, and received at area receptors are presented at Tables 4.6-8, 4.6-9 below.

Table 4.6-8

Park Activities	0.0	0.0	0.0	0.0	0.0	0.0	0.0	0.0
Total (All Noise Sources)	**44.8**	**44.7**	**44.5**	**42.5**	**42.4**	**39.3**	**35.5**	**32.9**

Source: *Rich-Haven Specific Plan 2022 Amendment, Noise and Vibration Analysis* (Urban Crossroads, Inc.) October 27, 2022.

To demonstrate compliance with local noise regulations, the Project operational/area-source noise levels received at area receptors were evaluated against City of Ontario exterior noise level thresholds. Please refer to Table 4.6-10.

Table 4.6-10
Operational/Area-Source Noise Level Compliance

Receiver Location	Project Operational Noise Levels (dBA Leq)		Noise Level Standards (dBA Leq)		Noise Level Standards Exceeded?	
	Daytime	Nighttime	Daytime	Nighttime	Daytime	Nighttime
R1	44.9	44.8	65.0	45.0	No	No
R2	44.8	44.7	65.0	45.0	No	No
R3	45.8	44.5	65.0	45.0	No	No
R4	42.8	42.5	65.0	45.0	No	No
R5	42.9	42.4	65.0	45.0	No	No
R6	39.6	39.3	65.0	45.0	No	No
R7	35.9	35.5	65.0	45.0	No	No
R8	33.1	32.9	65.0	45.0	No	No

Source: *Rich-Haven Specific Plan 2022 Amendment, Noise and Vibration Analysis* (Urban Crossroads, Inc.) October 27, 2022.

As shown at Table 4.6-10, Project operational/area-source noise levels would not exceed the City of Ontario 65 dBA Leq daytime or 45 dBA Leq nighttime exterior noise standards.

As such, the potential for Project operational noise to result in exposure of persons to, or generation of noise levels in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies is considered less-than-significant.

Level of Significance: Less-Than-Significant.

Potential Impact NOI-4: *Project operational noise would result in a substantial permanent increase in ambient noise levels in the Project vicinity above levels existing without the Project.*

Impact Analysis: To describe the Project operational noise level contributions, the Project operational noise levels were combined with the existing ambient noise levels measurements for the off-site receiver locations potentially impacted by Project operational noise sources. Tables 4.6-11 and 4.6-12 present the daytime and nighttime operational noise level increases associated with the Project.

Table 4.6-11
Daytime Noise Level Contributions

Location	Total Project Operational Noise Level	Measurement Location	Reference Ambient Noise Levels	Combined Project and Ambient	Project Increase	Threshold	Threshold Exceeded?
R1	44.9	L1	56.0	56.3	0.3	5.0	No
R2	44.8	L2	48.9	50.3	1.4	5.0	No
R3	45.8	L3	69.1	69.1	0.0	1.5	No
R4	42.8	L4	56.3	56.5	0.2	5.0	No
R5	42.9	L5	63.1	63.1	0.0	5.0	No
R6	39.6	L6	68.8	68.8	0.0	1.5	No
R7	35.9	L7	65.4	65.4	0.0	1.5	No
R8	33.1	L8	68.5	68.5	0.0	1.5	No

Nighttime Noise Level Contributions

Location	Total Project Operational Noise Level	Measurement Location	Reference Ambient Noise Levels	Combined Project and Ambient	Project Increase	Threshold	Threshold Exceeded?
R1	44.9	L1	55.6	56.0	0.4	5.0	No
R2	44.8	L2	48.4	50.0	1.6	5.0	No
R3	45.8	L3	64.0	64.1	0.1	5.0	No
R4	42.8	L4	52.1	52.6	0.5	5.0	No
R5	42.9	L5	55.1	55.4	0.3	5.0	No
R6	39.6	L6	62.4	62.4	0.0	5.0	No
R7	35.9	L7	60.2	60.2	0.0	5.0	No
R8	33.1	L8	64.3	64.3	0.0	5.0	No

Source: *Rich-Haven Specific Plan 2022 Amendment, Noise and Vibration Analysis* (Urban Crossroads, Inc.) October 27, 2022.

As indicated at Tables 4.6-11 and 4.6-12, Project contributions to the ambient noise environment would not exceed the threshold conditions presented at previous Table 4.6-3. On this basis, the potential for Project operational noise to result in a substantial permanent increase in ambient noise levels in the Project vicinity above levels existing without the Project is considered less-than-significant.

Level of Significance: Less-Than-Significant. The following measures act to further reduce already less-than-significant operational noise levels.

4.6.4 *Prior to final development plan approval, on a project-by-project basis and to the discretion of the Ontario Planning Department, subsequent noise studies shall be prepared, which demonstrates the site placement of stationary noise sources would not exceed criteria established in the City of Ontario Municipal Code. The analysis shall verify that loading dock facilities, rooftop equipment, trash compactors and other stationary noise sources are adequately shielded and/or located at an adequate distance from residential areas in order to comply with the City's noise standards.*

4.6.5 *Prior to Building Permit issuance and to the satisfaction of the Ontario Planning Department, the Project Applicants, on a project-by-project basis, shall demonstrate compliance with the following with respect to mechanical equipment:*

- *Mechanical equipment shall include specifications of quiet equipment;*
- *Mechanical equipment shall be properly selected and installed, and shall include sound attenuation packages;*
- *To the extent possible, mechanical equipment shall be oriented away from the nearest noise sensitive receptors; and*
- *The need for sound attenuation measures, and design of, such measures shall be determined as part of the final engineering design on a project-by-project basis.*

4.6.6 *Where a commercial zone abuts a residential zone or residential use, the following or similar language shall be included in lease/sale agreements for all non-residential buildings: All deliveries of goods and supplies; trash pick-up, including the use of parking lot trash sweepers; and the operation of machinery or mechanical equipment which emits noise levels in excess of 65 dBA, as measured from the closest property line to the equipment, shall only be allowed between the hours of 7 a.m. and 10 p.m., unless otherwise specified in an approved conditional use permit or other discretionary approval.*

4.6.7 *Prior to final development plan approval, on a project-by-project basis, a subsequent noise analysis shall be prepared, to the satisfaction of the Ontario Planning Department, which demonstrates that all feasible sound attenuation has been incorporated into the parking areas (i.e., landscaping and brushed driving surfaces), such that noise from parking areas has been minimized to the greatest extent practicable.*

VIBRATION

Potential Impact NOI-5: *The Project would result in exposure of persons to, or generation of, excessive groundborne vibration or groundborne noise.*

Impact Analysis:

Construction activity can result in varying degrees of ground vibration, depending on the equipment and methods used, distance to the affected structures and soil type. It is expected that groundborne vibration from Project construction activities would cause only intermittent, localized intrusion.

Groundborne vibration levels resulting from construction activities occurring within the Project site were estimated by data published by the Federal Transit Administration. Table 4.6-13 presents the expected Project-related vibration levels at the nearby receiver locations.

Table 4.6-13
Construction Vibration Levels

Receiver	Distance to Const. Activity	Received Peak Particle Velocity (PPV) Levels (in/sec)					Thresholds PPV (in/sec)	Threshold Exceeded?
		Small Bulldozer	Jack-hammer	Loaded Trucks	Large Bulldozer	Peak Vibration		
R1	76′	0.001	0.007	0.014	0.017	0.017	0.3	No
R2	219′	0.000	0.001	0.003	0.003	0.003	0.3	No
R3	30′	0.002	0.027	0.058	0.068	0.068	0.3	No
R4	94′	0.000	0.005	0.010	0.012	0.012	0.3	No
R5	30′	0.002	0.027	0.058	0.068	0.068	0.3	No
R6	150′	0.000	0.002	0.005	0.006	0.006	0.3	No
R7	156′	0.000	0.002	0.005	0.006	0.006	0.3	No
R8	189′	0.000	0.002	0.004	0.004	0.004	0.3	No

Source: *Rich-Haven Specific Plan 2022 Amendment, Noise and Vibration Analysis* (Urban Crossroads, Inc.) October 27, 2022.

As shown above, the highest construction vibration levels are expected to range from 0.003 to 0.068 in/sec PPV, and will satisfy the maximum acceptable vibration threshold of 0.3 PPV (in/sec). Moreover, the impacts at the closest sensitive receivers are unlikely to be sustained during the entire construction period but will occur rather only during the times that heavy construction equipment is operating adjacent to the Project site perimeter. On this basis, the potential for the Project to result in exposure persons to, or generation of, excessive groundborne vibration or groundborne noise is considered less-than-significant.

Level of Significance: Less-Than-Significant.

Potential Impact NOI-6: *For a project located within the vicinity of a private airstrip or an airport land use plan or, where such a plan has not been adopted, within two miles of a public*

airport or public use airport, would the project expose people residing or working in the project area to excessive noise levels.

Impact Analysis: The Project site is located approximately 2.4 miles southerly of the Ontario International Airport (ONT) and is located within the ONT Airport Influence Area.

The Ontario International Airport Land Use Compatibility Plan (ONT ALUCP) was amended July 2018 to promote compatibility between airport and surrounding land uses. Since the Project site is located within the ONT Airport Influence Area, the Project is subject to the Noise Criteria established at Table 2-3 of the ONT ALUCP.

The Project site is located outside the 60-65 dBA CNEL airport noise impact zone. According to Table 2-3 of the ONT ALUCP, residential, commercial, light industrial and community facilities land uses located outside the 60-65 dBA CNEL, are considered normally compatible land use. For normally compatible land use, either the activities associated with the land use are inherently noisy or standard construction methods will sufficiently attenuate exterior noise to an acceptable indoor community noise equivalent level (CNEL).

Based on the preceding, the Project would not expose people residing or working in the Project area to excessive noise levels.

Level of Significance: Less-Than-Significant.

4.7 HAZARDS/HAZARDOUS MATERIALS

4.7 HAZARDS/HAZARDOUS MATERIALS

Abstract

This Section identifies and addresses potential hazards and hazardous materials impacts that may result from the implementation and operations of the Project. More specifically, the hazards and hazardous materials analysis presented here examines whether the Project would:

- *Create a significant hazard to the public or the environment through the routine transport, use, or disposal of hazardous materials;*

- *Create a significant hazard to the public or the environment through reasonably foreseeable upset and accident conditions involving the likely release of hazardous materials into the environment; or*

- *Emit hazardous emissions or handle hazardous or acutely hazardous materials, substances, or waste within one-quarter mile of an existing or proposed school.*

As supported by the analysis presented in this Section, with the application of mitigation, and the Project's mandated compliance with existing rules and regulations, potential hazards and hazardous materials impacts of the Project are less-than-significant.

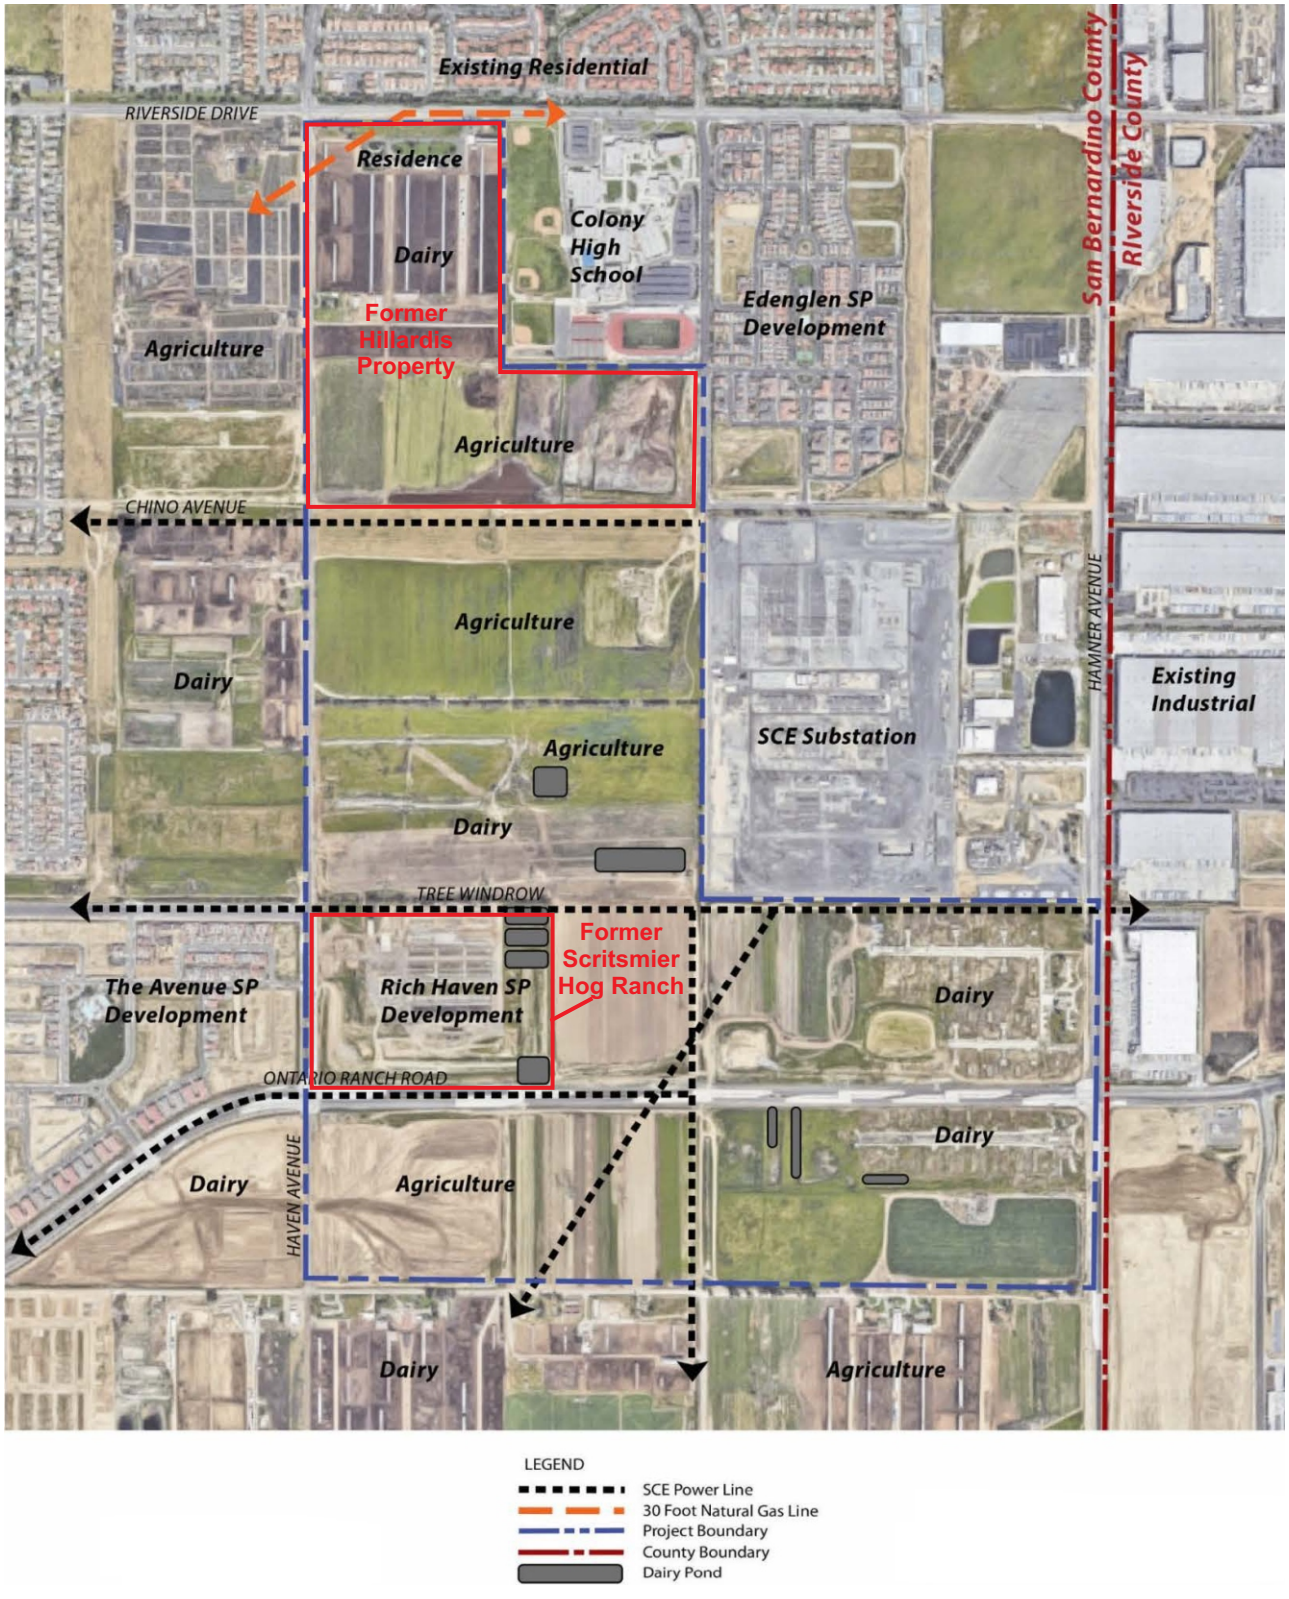
4.7.1 INTRODUCTION

The analysis presented in this Section addresses the potential impacts of hazards and/or hazardous materials associated with the construction and operation of the proposed Project. The analysis considers potential hazards/hazardous conditions affecting the Project site; and also considers potential hazards resulting from the Project, including

potential effects at off-site land uses. As discussed at 2007 EIR Section 5.5, *Hazards*, comprehensive Phase I Environmental Site Assessments (ESA) and Methane Gas Investigations were conducted for properties within the Specific Plan boundaries. The 2007 EIR Phase I Environmental Assessments and Methane Gas Investigations include:

- Phase I Environmental Site Assessment, Approximate 77-Acre Property, Rich Haven Specific Plan Mixed Use District, RBF Consulting, October 3, 2005.
- Phase I Environmental Site Assessment, Approximate 106-Acre Property, Rich Haven Specific Plan Mixed Use District, RBF Consulting, October 3, 2005.
- Phase I Environmental Site Assessment, Visser Property, GeoKinetics, February 1, 2003.
- Phase I Environmental Site Assessment, Randall Property, GeoKinetics, January 17, 2005.
- Phase I Environmental Site Assessment, Di Tommaso Property, GeoKinetics, February 18, 2004.
- Preliminary Subsurface Methane Gas Investigation, Randall Property, GeoKinetics, January 31, 2005.
- Subsurface Methane Gas Investigation, Scritsmier Property, GeoKinetics, January 26, 2004.
- Subsurface Methane Gas Investigation, Visser Property, GeoKinetics, February 1, 2003.
- Subsurface Methane Gas Investigation, Di Tommaso Property, GeoKinetics, February 18, 2004.
- Subsurface Methane Gas Investigation, Van Der Eyk Property, GeoKinetics, November 25, 2002.
- Letter from the California Department of Toxic Substances Control, June 12, 2006.

The above studies are available for review through the City of Ontario Planning Department. Information from the above studies is summarized in this Section and the 2007 EIR Section 5.5, *Hazards* is presented at EIR Appendix H, *Hazards and Hazardous Materials.*



4.7.2 SETTING

The physical setting of the Project provided here serves as context for potential hazards associated with, or resulting from, the Project.

4.7.2.1 Project Site Land Use

Existing land uses within the Specific Plan Area include developed portions of the currently entitled 2021 Specific Plan, and entitled areas that are undeveloped. As of the date of this EIR, approximately 468 residential units of the total 7,194 dwelling units entitled under the 2021 Specific Plan have been constructed and are occupied. Existing residential development within the Specific Plan Area is located generally northeast of the intersection of Haven Avenue and Ontario Ranch Road. Within developed or developing portions of the Specific Plan Area, the City has verified that all hazards/hazardous materials mitigation required under the 2007 EIR has been completed including, but not limited to, Methane Gas remediation as required by the City of Ontario Building Department Methane Assessment for Projects in the New Model Colony (City Methane Assessment Protocol). Developed areas and areas under development are illustrated at Figure 4.7-1.

The remainder of the 2021 Specific Plan Area is yet to be developed. Existing land uses in these areas include a dairy farm in the northern portion of the Specific Plan area (the "Hillardis Property" identified at Figure 4.7-1) and various vacant/disturbed properties through the remaining portions of the site. Additionally, within the southern portion of the Specific Plan Area, Southern California Edison (SCE) transmission line easements exist along a generally east – west/northeast – southwest alignment within the Specific Plan Area.

Source: Rich-Haven Specific Plan Amendment; Applied Planning, Inc.

Figure 4.7-1
Mapped Properties

4.7.2.2 Project Site History

Based on historical research conducted as part of the 2007 EIR Phase I ESAs and Methane Gas Investigations, the Project site has historically comprised vacant land, agricultural uses, dairy farms, residences, wells, unimproved roads, and power transmission lines. Contemporary site investigations conducted as part of this EIR,[1] historic and recent aerial photos, information provided by the Applicant, and review of TOP 2050 and TOP 2050 EIR confirm historical use of the site as described in the 2007 EIR Phase I ESAs and Methane Gas Investigations.

4.7.2.3 Vicinity Land Uses

Land uses adjacent to northern portions of the Specific Plan Area include residential development, agricultural uses, and Colony High School. Adjacent to the central Specific Plan Area are an SCE Substation occupying approximately 160 acres to the east, and agricultural/dairy and residential development to the west. The southern portion of the Specific Plan Area is bounded by residential and commercial development to the west across Haven Avenue, and vacant disturbed properties, residences, and dairy farm uses to the south across "Old" Edison Avenue [alignment]. To the east, across Hamner Avenue, are City of Eastvale properties that are developed or are being developed with commercial and light industrial uses.

4.7.3 EXISTING HAZARDS/HAZARDOUS CONDITIONS

Other than on-going development of the Project site per the currently approved Specific Plan entitlements, site conditions have not changed substantially since preparation of the 2007 EIR. Contemporary site investigations conducted as part of this EIR, historic and recent aerial photos, information provided by the Applicant, and review of TOP 2050 and TOP 2050 EIR confirm that hazards and hazardous conditions affecting the Project site have not changed substantially since preparation of the 2007 EIR. Conclusions regarding potential hazards/hazardous conditions affecting the Specific

[1] See: Project Biological Resources Assessment, July 2022 [EIR Appendix K] p. 1 et. al; Project Cultural Resources Assessment, August 2022 [EIR Appendix L] p. 11 et. al; Project Geotechnical Investigation, September 2022 [EIR Appendix J]. p. 3, et. al.

Plan Area site as summarized in the 2007 EIR Phase I ESAs are excerpted in pertinent part below.

- Due to past use of the project site as a dairy farm and hog farm, the potential exists for elevated soil organic levels and the associated generation of subsurface methane gas.
- The potential for asbestos-containing materials and lead-based paint on the project site exists because of some structures built before 1978.
- Based on the past and present agricultural usage of portions of the site, the potential exists for the presence of organic pesticides within the onsite soils. Soil samples should be collected and analyzed for organic pesticides in order to screen for their presence.
- Several homes present on the project site reportedly use onsite sewage disposal systems.
- The residences and other structures onsite may contain lead-based paint and asbestos-containing materials.
- Water supply wells were identified onsite, and it is necessary to verify that they have been properly abandoned.
- A 500-gallon diesel fuel aboveground storage tank (AST) is onsite, and should be deactivated and properly disposed of in conjunction with the site development activities.
- A debris pile with improperly disposed of waste oil was observed onsite.
- A concrete wastewater collection sump and associated underground water distribution piping, as well as an abandoned manufactured home are onsite.
- A Southern California Edison transmission line exists onsite with triple high-tension lines, which may impose some restrictions on development.

Based on the findings of the Phase I ESAs described previously, several methane studies were conducted for the properties that were used as dairies. Out of the 96 gas probes that were installed as a part of the methane studies, only 3 revealed elevated methane concentrations. These methane studies contained the following recommendations:

- Careful clearing, grubbing, segregation, and stockpiling or disposal of the near surface organic-rich soils at the site prior to the initiation of mass grading activities should occur.
- Identification and segregation/stockpiling or disposal of deeper soils which contain elevated levels of organic material should be conducted.
- Soils with organic contents in excess of 0.4 percent should not be placed as "deep" fill. Ideally, soils with significant levels of organic material should be placed in open areas within approximately two feet of the finished ground surface.
- Soils with organic contents in excess of 2 percent should typically not be placed as structural fill - even at shallow depths. The project geotechnical engineer should provide more specific recommendations in this regard.

No additional investigation of the project site was recommended.
[2007 EIR Section 5.5, *Hazards*, pp. 5.5-4 – 5.5-6].

4.7.4 HAZARDS/HAZARDOUS MATERIALS POLICIES AND REGULATIONS

A number of federal, state, and local laws have been enacted to regulate and manage hazardous materials. Implementation of these laws and the associated management of hazardous materials are regulated independently of the CEQA process, through programs administered by various agencies at the federal, state, and local levels. An overview of regulatory agencies and certain key hazardous materials laws and regulations applicable to the Project, and to which the Project must conform, is provided below.

4.7.4.1 Federal

Hazardous materials are extensively regulated at the federal level. Regulatory agencies include: United States Environmental Protection Agency (USEPA), United States Occupational Safety and Health Administration (USOSHA), United States Department of Transportation (USDOT). Applicable Federal Regulations are contained primarily in Titles 10, 29, 40, and 49 of the Code of Federal Regulations (CFR). In particular, Title 49 of the CFR governs the manufacture of packaging and transport containers; packing and repacking; labeling and the marking of hazardous material transport. Some of the major federal laws and issue areas include the following statutes and implementing regulations:

- Resources Conservation and Recovery Act (RCRA) - hazardous waste management;
- Hazardous and Solid Waste Amendments Act (HSWA) - hazardous waste management;
- Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) - cleanup of contamination;
- Superfund Amendments and Reauthorization Act (SARA) - cleanup of contamination; and
- Emergency Planning and Community Right-to-Know (SARA Title III) - business inventories and emergency response planning.

The USEPA is the primary federal agency responsible for the implementation and enforcement of hazardous materials regulations. In most cases, enforcement of environmental laws and regulations established at the federal level is delegated to state and local environmental regulatory agencies.

In addition, with respect to emergency planning, the Federal Emergency Management Agency (FEMA) is responsible for ensuring the establishment and development of policies and programs for emergency management at the federal, state, and local levels.

This includes the development of a national capability to mitigate against, prepare for, respond to, and recover from a full range of emergencies.

Hazardous Waste Handling

The USEPA has authorized the California Department of Toxic Substance Control (DTSC) to enforce hazardous waste laws and regulations in California. Requirements place "cradle-to-grave" responsibility for hazardous waste disposal on the shoulders of hazardous waste generators. Waste generators must ensure that their wastes are disposed of properly, and legal requirements dictate the disposal requirements for many waste streams (e.g., a ban on many types of hazardous wastes from landfills).

Hazardous Materials Transport

The USDOT Office of Hazardous Materials Safety has developed regulations pertaining to the transport of hazardous materials and hazardous wastes by all modes of transportation, as outlined in Title 49 of the CFR. The U.S. Postal Service has developed additional regulations for the transport of hazardous materials by mail. USDOT regulations specify packaging requirements for different types of materials. USEPA has also promulgated regulations for the transport of hazardous wastes. These more stringent requirements include tracking shipments with manifests to ensure that wastes are delivered to their intended destinations.

4.7.4.2 State

The primary state agencies with jurisdiction over hazardous chemical materials management are the DTSC and the State Water Quality Control Board (SWQCB). Other state agencies involved in hazardous materials management are the Department of Industrial Relations, California OSHA (Cal OSHA) implementation, Office of Emergency Services (OES - California Accidental Release Prevention Implementation), Air Resources Board (ARB), California Department of Transportation (Caltrans), State Office of Environmental Health Hazard Assessment (OEHHA - Proposition 65 implementation) and CalRecycle (formerly the California Integrated Waste Management Board, CIWMB). The enforcement agencies for hazardous materials

transportation regulations are the California Highway Patrol (CHP) and Caltrans. Hazardous materials and waste transporters are responsible for complying with all applicable packaging, labeling, and shipping regulations.

Relevant hazardous materials management laws in California include, but are not limited to, the following statutes and implementation regulations:

- Hazardous Materials Management Act - business plan reporting;
- Hazardous Waste Control Act - hazardous waste management;
- Safe Drinking Water and Toxic Enforcement Act of 1986 (Proposition 65) - release of and exposure to carcinogenic chemicals;
- Hazardous Substance Act - cleanup of contamination; and
- Hazardous Materials Storage and Emergency Response.

California Environmental Protection Agency

The California Environmental Protection Agency (CalEPA) has broad jurisdiction over hazardous materials management in the state. Within CalEPA, the DTSC has primary regulatory responsibility for hazardous waste management and cleanup. Enforcement of regulations has been delegated to local jurisdictions that enter into agreements with DTSC for the generation, transport, and disposal of hazardous materials under the authority of the Hazardous Waste Control Law.

Along with the DTSC, the SWQCB is responsible for implementing regulations pertaining to management of soil and groundwater investigation and cleanup. SWQCB regulations are contained in Title 27 of the California Code of Regulations (CCR). Additional state regulations applicable to hazardous materials are contained in Title 22 of the CCR. Title 26 of the CCR is a compilation of those sections or titles of the CCR that are applicable to hazardous materials.

Department of Toxic Substances Control

The Resource Conservation and Recovery Act (RCRA) of 1976 is the principal federal law that regulates the generation, management, and transportation of hazardous materials and other wastes. The DTSC regulates hazardous waste in California primarily under the authority of the federal RCRA, and the California Health and Safety Code. Other laws that affect hazardous waste are specific to handling, storage, transportation, disposal, treatment, reduction, cleanup, and emergency planning. In addition, DTSC reviews and monitors legislation to ensure that the position reflects the DTSC's goals. From these laws, DTSC's major program areas develop regulations and consistent program policies and procedures. The regulations spell out what hazardous waste handlers must do to comply with the laws.

California law provides the general framework for regulation of hazardous wastes by the Hazardous Waste Control Law (HWCL) passed in 1972. DTSC is the State's lead agency in implementing the HWCL. The HWCL provides for state regulation of existing hazardous waste facilities, which include "any structure, other appurtenances, and improvements on the land, used for treatment, transfer, storage, resource recovery, disposal, or recycling of hazardous wastes," and requires permits for, and inspections of, facilities involved in generation and/or treatment, storage and disposal of hazardous wastes.

California Accidental Release Prevention Program (CalARP)

The CalARP program (CCR Title 19, Division 2, Chapter 4.7) covers certain businesses that store or handle more than a certain volume of specific regulated substances at their facilities. The list of regulated substances is found in Article 8, Section 2770.5 of the CalARP program regulations. The businesses that use a regulated substance above the noted threshold quantity must implement an accidental release prevention program, and some may be required to complete a Risk Management Plan (RMP). An RMP is a detailed engineering analysis of the potential accident factors present at a business and the mitigation measures that can be implemented to reduce this accident potential. The purpose of an RMP is to decrease the risk of an off-site release of a regulated substance that might harm the surrounding environment and community. An RMP includes the

following components: safety information, hazard review, operating procedures, training, maintenance, compliance audits, and incident investigation. The RMP must consider the proximity to sensitive populations located in schools, residential areas, general acute care hospitals, long-term health care facilities, and child day-care facilities, and must also consider external events such as seismic activity.

Hazardous Materials Transportation

In California, the CHP has the primary responsibility for enforcing federal and state regulations and responding to hazardous materials transportation emergencies. Specifically, Section 31303 of the California Vehicle Code requires that when hazardous materials are transported on state or interstate highways, the highway(s) that offer the shortest overall transit time possible shall be used. Transportation of hazardous materials along any city or state roadways is subject to all hazardous materials transportation regulations established by the CHP and Caltrans. Transporters of hazardous materials and waste are responsible for complying with all applicable packaging, labeling, and shipping regulations.

Investigation and Cleanup of Contaminated Sites

The oversight of hazardous materials release sites often involves several different agencies that may have overlapping authority and jurisdiction. The DTSC and SWQCB are the two (2) primary state agencies responsible for issues pertaining to hazardous materials release sites. Air quality issues related to remediation and construction at contaminated sites are also subject to federal and state laws and regulations that are administered at the local level.

Investigation and remediation activities that would involve potential disturbance or release of hazardous materials must comply with applicable federal, state, and local hazardous materials laws and regulations. The DTSC has developed standards for the investigation of sites where hazardous materials contamination has been identified or could exist based on current or past uses. The standards identify approaches to determine if a release of hazardous wastes/substances exists at a site and delineate the

general extent of contamination; estimate the potential threat to public health and/or the environment from the release and provide an indicator of relative risk; determine if an expedited response action is required to reduce an existing or potential threat; and complete preliminary project scoping activities to determine data gaps and identify possible remedial action strategies to form the basis for development of a site strategy.

4.7.4.3 Regional

Southern California Association of Governments (SCAG)

SCAG is the regional agency for coordination between various local agencies within the six-county region covering Los Angeles, Orange, San Bernardino, Riverside, Ventura and Imperial counties. The region covers more than 38,000 square miles and is home to more than 18 million people. SCAG is the designated Regional Transportation Planning Agency, and is responsible for preparing plans and developing goals, policies, and programs to ensure regional cooperation. One such program is the Southern California Compass Blueprint Growth Vision. SCAG works with local governments and other entities in the region to implement the program's four (4) principles: Mobility, Livability, Prosperity, and Sustainability. SCAG is also responsible for preparing the Regional Comprehensive Plan and Guide (RCPG), an advisory plan to achieve a sustainable balance between environmental, economic, and social interests throughout the SCAG region.

South Coast Air Quality Management District (SCAQMD)

The SCAQMD establishes Rules that regulate or control various air pollutant emissions and emissions sources within the South Coast Air Basin (Basin). The SCAQMD coordinates its actions with local, state, and federal government agencies, the business community, and private citizens to achieve and maintain healthy air quality for San Bernardino County, including the City of Ontario.

4.7.4.4 Local

San Bernardino County Fire Department, Hazardous Materials Division

Under the California Unified Hazardous Waste and Hazardous Material Management Regulatory Program, (Chapter 6.11, Division 20, Section 25404 of the Health and Safety Code), hazards/hazardous materials management is addressed locally through the Certified Unified Program Agency (CUPA). The primary CUPA for the City of Ontario is the San Bernardino County Fire Department.

As a CUPA, San Bernardino County Fire Department manages the following six hazardous material and hazardous waste programs:

- Hazardous Materials Release Response Plans and Inventory (Business Plan);
- California Accidental Release Program (CalARP);
- Underground Storage Tanks (UST);
- Aboveground Petroleum Storage Act (APSA)/Spill Prevention, Control, and Countermeasure Plan (SPCC Plan);
- Hazardous Waste Generation and On-site Treatment; and
- Hazardous Materials Management Plans and Inventory Statements under Uniform Fire Code Article 80.

Chino Basin Watermaster

Eleven existing wells have been identified within the Project site. In compliance with the Chino Basin Water Master's Well Procedure for Developers, a well use/destruction plan and schedule for all existing private/agricultural wells shall be submitted to the City of Ontario for approval prior to the issuance of permits for any construction activity. If a private well is actively used for water supply, the Developer shall submit a plan to abandon such well and connect users to the City's water system (residential to the domestic water system and agricultural to the recycled water system) when available. Wells shall be destroyed/abandoned per the California Water Resource Guidelines and require permitting from the County Health Department. A copy of such

permit shall be provided to the Engineering and Public Works Agency prior to issuance of grading and/or building permits.

City of Ontario

The Ontario Plan includes Goals and Policies which act to reduce potential hazards within the City. Additionally, the City of Ontario has published Methane Design Guidelines for projects located within the New Model Colony. These guidelines are applicable to any building development on farm properties (including dairy farms) and is independent of the planned building use (i.e., residential or commercial/industrial).

In summary, a Methane Site Assessment is required for any parcels used as animal farms or composting/fertilizer farms, and the survey must be completed within "all lots in potential methane areas." The Methane Site Assessment must be completed within 30 days after building footprints have been put in place.

The City further presents Design Guidelines to be implemented within affected properties. Building permits will be issued when the test report is approved by the City Building Department, and any required mitigation measures are shown on building plans.

4.7.4.5 Waste Handling Procedures

As presented above, the identification, characterization, handling, transportation and disposal of wastes are primarily regulated under 40 CFR, part 261.24 (Federal) and Title 22 of the California Code of Regulations (State) and other applicable DOT, CA DTSC, and OSHA laws and regulations. The following discussions detail how these regulations are applied to the specific hazardous materials most likely to be encountered as part of the demolition and site preparation phase of the Project.

Manifesting and Transportation

Waste must be hauled under proper shipping manifests as follows:

1) Non-hazardous : A uniform non-hazardous manifest ;
2) Cal-haz/Non-RCRA (State system): A uniform hazardous manifest, identifying the waste as non-RCRA, using an appropriate EPA number;
3) RCRA-hazardous (Federal system): A uniform hazardous manifest, identifying the waste as RCRA, using an appropriate EPA number.

The transporter must have the required and appropriate hauling permits and licenses in order to be able to haul the waste.

Disposal

Landfills are classified based on the type of waste accepted; hazardous waste must be disposed of at a Class I landfill, "designated waste"[2] at a Class II, non-hazardous solid waste at a Class III, and inert waste is disposed of at an unclassified disposal site. All designated landfills must have the proper local, State and Federal operating permits. Waste, as classified, is disposed of as follows:

1) Non-hazardous: At a non-hazardous Class III landfill or at a Treatment and Recycling facility.
2) Cal-haz/Non-RCRA: At a hazardous Class I landfill or at an out of State non-hazardous landfill.
3) RCRA-hazardous: At a hazardous Class I landfill.

While non-hazardous waste from the Project site could be transported to a number of Class III landfills, non-hazardous waste generated at the site and vicinity is currently

[2] "Designated waste" is defined as hazardous waste that has been granted a variance from hazardous waste management requirements; or non-hazardous waste that could be released in concentrations exceeding applicable water quality objectives or that could reasonably be expected to affect beneficial uses of waters of the State.

sent to the West Valley Materials Recovery Facility (MRF) in Fontana for processing, recycling, or landfilling. Most refuse is transported from the MRF to the El Sobrante Landfill, located in the City of Corona. Any hazardous waste encountered as part of site preparation activities will be disposed of at a Class I landfill. There are currently three (3) Class I landfills located in California. These sites are located in Imperial, Kings, and Kern Counties. The precise location will be determined by the contractor in charge of demolition and site preparation.

Pesticides

There are State and Federal thresholds dictating the characterization of pesticide contaminated soils. Specifically, the United States Environmental Protection Agency (U.S. EPA) and California EPA monitor a number of pesticides that were once widely used, but are currently banned or heavily regulated in the United States due to concerns regarding their environmental impact and/or human health risks. Risk-based soil screening levels have been calculated and published by the U.S. EPA, as well as the California EPA Office of Environmental Health Hazard Assessment (OEHHA) for guidance purposes. Both agencies have developed screening levels for both residential and industrial/commercial settings, as seen in Table 4.7-1.

Table 4.7-1
Pesticide Screening Level Thresholds (µg/kg)

Agency	Pesticide			
	DDT	**DDE**	**DDD**	**Dieldrin**
U.S. EPA				
Residential	1700	1400	2000	30
Commercial/Industrial	7000	5100	7200	100
Cal EPA				
Residential	1600	1600	2300	35
Commercial/Industrial	6300	6300	9000	130

Source: GeoKinetics, August 1, 2013.

Based on testing results, contaminated soils may be treated on-site (by blending/diluting with clean soil) or disposed of off-site, as follows:

1) Non-hazardous: The soil must pass the State and Federal regulatory thresholds. In that case, the soil may be disposed of as non-hazardous at a Class III landfill or, as discussed above, a treatment or recycling facility.

2) Cal-haz/Non-RCRA: In this case, the soil fails the State regulatory thresholds but passes the Federal requirements. Therefore, the soil may be disposed of as non-RCRA at a Class I hazardous landfill or at an out-of-state non-hazardous landfill.

3) RCRA-hazardous: In this case, the soil fails both the State and Federal regulatory thresholds. Therefore, the soil will have to be disposed of as Federal, RCRA-hazardous at a Class I landfill.

Asbestos Containing Materials (ACMs)

Prior to demolition of structures, testing for ACMs is performed by a licensed contractor and any ACMs are disposed of based on the testing results. In California, if asbestos is friable and contains more than 1% asbestos, it is considered hazardous. ACMs are disposed of as follows:

1) Non-friable: This ACM waste may be disposed of at a Class III local landfill subject to their acceptance criteria.
2) Friable: This ACM waste may be disposed of at a Class I hazardous landfill or at an out-of-state landfill, depending on the level of contamination.

Depending on whether or not the ACMs are friable or non-friable, they will need to be handled, contained, and wrapped accordingly based on the applicable State regulations and the landfill requirements for transportation and disposal purposes.

Lead-Based Paint (LBP)

Prior to demolition, testing for LBP is performed by a licensed contractor and any LBP is disposed of based on the testing results. LBP waste is disposed of as follows:

1) Non-hazardous: If the lead content is less than 50 ppm (presumes it passes the State Soluble Threshold Limit Concentrations (STLC) and the Federal Toxicity Characteristic Leaching Procedure (TCLP) levels of 5.0 mg/l), the waste can be disposed of at a Class III non-hazardous landfill.
2) Cal-haz/Non-RCRA: If the waste contains 1,000 ppm lead and it fails the State STLC of 5 mg/l, it is considered cal-hazardous and may be disposed of at an out-of-state landfill as non-RCRA waste.
3) RCRA-hazardous: If the waste fails the Federal TCLP of 5 mg/l, it will then have to be disposed of at a hazardous Class I landfill.

4.7.5 STANDARDS OF SIGNIFICANCE

Pursuant to the *CEQA Guidelines* as adopted and implemented by the City of Ontario, and for purposes of this EIR, implementation of the Project may result in or cause potentially significant hazards/hazardous materials impacts if it would:

- Create a significant hazard to the public or the environment through the routine transport, use, or disposal of hazardous materials;

- Create a significant hazard to the public or the environment through reasonably foreseeable upset and accident conditions involving the likely release of hazardous materials into the environment;

- Emit hazardous emissions or handle hazardous or acutely hazardous materials, substances, or waste within one-quarter mile of an existing or proposed school;

- Be located on a site which is included on a list of hazardous materials sites compiled pursuant to Government Code Section 65962.5 and, as a result, would it create a significant hazard to the public or the environment;

- For a project located within an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project result in a safety hazard or excessive noise for the people residing or working in the project area;

- Impair implementation of or physically interfere with an adopted emergency response plan or emergency evacuation plan; or

- Expose people or structures, either directly or indirectly, to a significant risk of loss, injury or death involving wildland fires.

4.7.6 POTENTIAL IMPACTS AND MITIGATION MEASURES

4.7.6.1 Introduction

The following discussions focus on areas where it has been determined that the Project may result in potentially significant hazards and hazardous materials impacts, pursuant to comments received through the NOP process, and based on the analysis presented within this Section and included within the Initial Study. As substantiated in the Initial Study (EIR Appendix A) under the following topics, the Project was determined to have less-than-significant impacts. On this basis, the following topics are not further discussed here:

- Be located on a site which is included on a list of hazardous materials sites compiled pursuant to Government Code Section 65962.5 and, as a result, would it create a significant hazard to the public or the environment;

- For a project located within an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project result in a safety hazard or excessive noise for the people residing or working in the project area;

- Impair implementation of or physically interfere with an adopted emergency response plan or emergency evacuation plan; or

- Expose people or structures, either directly or indirectly, to a significant risk of loss, injury or death involving wildland fires.

All other CEQA topics concerning the Project's potential hazards and hazardous materials impacts are discussed below. Please refer also to Initial Study Checklist Item IX. *Hazards and Hazardous Materials.*

4.7.6.2 Impact Statements

Potential Impact HAZ-1: *Create a significant hazard to the public or the environment through the routine transport, use, or disposal of hazardous materials; create a significant hazard to the public or the environment through reasonably foreseeable upset and accident conditions involving the likely release of hazardous materials into the environment.*

Impact Analysis:

Existing On-site Hazards

Hazardous or potentially hazardous conditions affecting the subject site have been previously and extensively analyzed as part of the 2007 Rich-Haven Specific Plan EIR (2007 EIR). In summary, the 2007 EIR concluded that development of the site could result in potentially significant hazards/hazards materials impacts due to structure demolition, potential presence of methane gas, presence of organic materials, and general hazards or hazardous conditions associated with current and historic

agricultural and dairy farming uses. As noted previously in this Section, hazardous/hazardous conditions affecting the Project site are materially the same as those identified in the 2007 EIR.

Level of Significance: Potentially Significant.

Mitigation Measures:

Mitigation Measures that would reduce the above-noted hazards/hazardous materials impacts to levels that would be less-than-significant were identified in the 2007 EIR. For ease of reference, the 2007 EIR Mitigation Measures are excerpted below.

> **HM-1** Prior to the issuance of permits by the City of Ontario for any structural demolition activities on the project site, the project developer will be required to submit documentation to the City of Ontario Building Department that asbestos and lead-based paint issues are not applicable to their property or that appropriate remediation actions will be undertaken to correct any lead-based paint or asbestos issues, in conformance with the regulations of the South Coast Air Quality Management District and the State of California, Division of Occupational Health and Safety.
>
> **HM-2** Subsequent to grading activities, testing for the presence of methane in the soil shall be performed. This testing shall conform to applicable City of Ontario standards. If methane is detected, mitigation would include the installation of under-slab methane vents, methane barrier, and sealing utilities in locations where they enter a structure and penetrate the methane barrier.
>
> **HM-3** Post-grading methane gas investigation should take place near the former Scritsmier Hog Ranch (13571 Haven Avenue) where subsurface methane levels exceed 5,000 ppm. A passive vent system and gas

membrane beneath the floor slab should be installed, along with utility trench dams and conduit seals.

HM-4 Careful clearing, grubbing, segregation, and stockpiling or proper disposal of the near surface organic-rich soils at the site prior to the initiation of mass grading activities should occur.

HM-5 Identification and segregation/stockpiling or proper disposal of deeper soils which contain elevated levels of organic material should be conducted.

HM-6 Prior to approval of a discretionary permit or approval for development of proposed residential uses on the Hillardis Property, such as a parcel map or tentative tract map, a Phase I Environmental Site Assessment (ESA) shall be conducted and the results of that ESA implemented. The Phase I ESA shall be provided to the City of Ontario and shall be included in any CEQA analysis prepared in connection with the consideration of a discretionary approval for development of the eastern half of the project site.
[2007 EIR, pp. 5.5-12, 5.5-13]

Subsequent to Certification of the 2007 EIR, Methane Gas investigation and remediation of the former Scritsmier Hog Ranch (13571 Haven Avenue) per Mitigation Measure HM-3 has been successfully accomplished and accepted by the City. Development of this site is on-going (see Figure 4.7-1). Mitigation Measure HM-3 has been implemented and is no longer required.

Additionally, per Mitigation Measure HM-6, the required Phase I ESA for the "Hillardis Property" (APNs 218-161-04, 218-161-05, 218-161-10, 218-161-11) has been completed

and is provided at Appendix H of this EIR.[3] The Hillardis Property Phase I ESA recommends that a Phase II Environmental Assessment be conducted for that site to address the following items:

- Agricultural/orchard usage of the southern portion of the Property,
- Methane Gas Testing for the northern portion of the Property,
- Soils in the areas of unregulated dumping, and
- Soils in the area of the leaking air compressors in the garage [in the northern portion of the property].

  [Hillardis property Phase I ESA, p. 7]

The requirement to conduct a Phase II Assessment and comply with its provisions is added as mitigation to this EIR (see Mitigation Measure 4.7.4).

Based on the previous analyses conducted for the Project site, as updated by the site's current condition, the City's incumbent Methane Gas Investigation Protocol, and recommendations of the Hillardis Property Phase I ESA, the following Mitigation Measures are incorporated in this EIR:

4.7.1 *Prior to the issuance of permits for any structural demolition activities on the Project site, the Project developer(s) shall submit documentation to the City of Ontario Building Department that asbestos and lead-based paint issues are not applicable to their property or that appropriate remediation actions have been undertaken to correct any lead-based paint or asbestos issues. Any required remediation shall conform with the regulations of the South Coast Air Quality Management District and the State of California, Division of Occupational Health and Safety.*

4.7.2 *Testing for methane gas shall be conducted subsequent to mass grading of any site within the Specific Plan Area. Methane gas testing shall conform to requirements of "City of*

[3] See: *Phase I Environmental Site Assessment 1601 E. Riverside Drive, Ontario, California 91761* (Hillman Consulting) July 28, 2016.

Ontario Building Department Methane Gas Assessment for Projects in the New Model Colony."[4] *Project designs shall conform to the Assessment's Methane Design Guidelines or other requirements stipulated by the City of Ontario Building Department.*

4.7.3 Site grubbing, clearing, and stockpiling and disposal of soils shall conform to City grading permit requirements. Such requirements may include, but would not be limited to, identification and segregation/stockpiling or proper disposal of soils that contain elevated levels of organic material.

4.7.4 Prior to approval of tract maps or approval for development of any uses on the Hillardis Property (APNs 218-161-04, 218-161-05, 218-161-10, 218-161-11), the Applicant or successor interest shall complete a Phase II Environmental Site Assessment (ESA) for that property. Prior to issuance of the first development permit for the site, the Applicant or successor interest shall comply with requirements of the Phase II ESA, and shall provide documentation to the City of Ontario to that effect.

With implementation of the above measures, the potential for the Project to create or result in a significant hazard due to existing on-site conditions would be reduced to levels that would be less-than-significant.

Level of Significance After Mitigation: Less-Than-Significant.

Project Construction and Operations

The Project would not result in or cause exposure(s) to hazards or potentially hazardous conditions. That is, uses proposed by the Project are not considered hazardous. Nor does the Project propose or require facilities or operations involving inherent substantial hazards.

During the normal course of construction and operation activities, there would be limited transport of potentially hazardous materials (e.g., gasoline, diesel fuel, paints,

[4] See:https://www.ontarioca.gov/sites/default/files/Ontario-Files/Building/general/methane_assessment.pdf.

solvents, fertilizer, etc.) to and from the Project site. However, the Project would be required to comply with all City and County Hazardous Materials Management Plans and regulations addressing transport, use, storage and disposal of these materials. The Project does not propose or require uses or activities that would result in atypical transportation, use, storage, or disposal of hazardous or potentially hazardous materials not addressed under current regulations and policies.

Further, any occupancies that would store or use hazardous materials would be required to comply with California Hazardous Materials Business Plan (HMBP) requirements (California Health & Safety Code, Division 20, Chapter 6.95) The HMBP contains detailed information on the storage of hazardous materials at regulated facilities. The purpose of the HMBP is to prevent or minimize damage to public health, safety, and the environment, from a release or threatened release of a hazardous material. The HMBP also provides emergency response personnel with adequate information to help them better prepare and respond to chemical-related incidents at regulated facilities.

The Project does not propose or require uses that would handle hazardous or acutely hazardous materials, substances, or waste. Heavy duty truck traffic accessing the Project would generate diesel particulate matter (DPM). DPM is a known carcinogen. The Project Health Risk Assessment (HRA, EIR Appendix D) substantiates that the DPM emissions generated by Project construction and operations would not result in potentially significant hazardous impacts.

Level of Significance: Less-Than-Significant.

Potential Impact HAZ-2: *Emit hazardous emissions or handle hazardous or acutely hazardous materials, substances, or waste within one-quarter mile of an existing or proposed school.*

Impact Analysis: Colony High School is located approximately 0.2 miles north of nearest light industrial uses proposed by the Project. The Project does not propose or require uses or facilities that would generate or use hazardous or acutely hazardous

materials. The Project HRA substantiates that DPM emissions generated by the Project would not result in potentially significant impacts at vicinity schools. As a matter of course, the Lead Agency consults with potentially affected school districts throughout the EIR process for development proposals.

On this basis, the potential for the Project to emit hazardous emissions or handle hazardous or acutely hazardous materials, substances, or waste within one-quarter mile of an existing or proposed school.

Level of Significance: Less-Than-Significant.

4.8 HYDROLOGY/WATER QUALITY

4.8 HYDROLOGY/WATER QUALITY

Abstract

This Section addresses potential impacts of the Project related to hydrology and water quality. The analysis presented focuses on the potential for the Project to:

- *Violate any water quality standards or waste discharge requirements or otherwise substantially degrade surface or groundwater quality;*
- *Substantially alter the existing drainage pattern of the site or area in a manner that would:*
    - *substantially increase the rate or amount of runoff that would result in flooding on- or offsite;*
    - *create or contribute runoff water which would exceed the capacity of existing or planned stormwater drainage systems or provide substantial additional sources of polluted runoff; or*
    - *impede or redirect flood flows.*
- *Under a flood, tsunami, or seiche event, release pollutants due to project inundation; or*
- *Conflict with or obstruct implementation of a water quality control plan or sustainable groundwater management plan.*

As substantiated by the analysis in this Section, potential hydrology/water quality impacts would be less-than-significant.

4.8.1 INTRODUCTION

This Section evaluates potential impacts of the Project on hydrology and water quality. Information contained and referenced in this Section was obtained from: *Rich-Haven Specific Plan, Hydrology Report* (X Engineering & Consulting, Inc.) September 2022 (EIR Appendix I).

Additional background information and context are provided by *Rich-Haven Specific Plan, 2022 Amendment* (EIR Appendix B); *City of Ontario Policy Plan, A Component of the Ontario Plan 2050* (Placeworks) August 2022; The Ontario Plan 2050 Final Supplemental EIR, SCH No. 2021070364 (Placeworks) August 2022; City of Ontario Development Code; *Hydrology and Water Quality*, and *Fact Sheet Region 8* (Santa Ana Regional Water Quality Control Board)[1] and Project Application Materials.

4.8.2 EXISTING CONDITIONS

Please refer to EIR Section 3.0, *Project Description*, for a general discussion of the Project's regional and vicinity setting. The hydrologic setting described below establishes the baseline against which the Project's potential hydrology/water quality impacts were evaluated. The Ontario Plan 2050 Final SEIR (TOP 2050 SEIR) at Section 5.10, and *Hydrology and Water Quality*, and *Fact Sheet Region 8* (Santa Ana Regional Water Quality Control Board) describe area hydrologic and water quality characteristics, as summarized and paraphrased in the following discussions.

4.8.2.1 Regional

Drainage

The Santa Ana River Watershed encompasses approximately 2,800 square miles, and includes portions of San Bernardino, Orange, and Riverside Counties. The Santa Ana River is the main surface drainage course in the region, and the largest river in the Chino

[1] Santa Ana Regional Water Quality Control Board. (n.d.). Fact Sheet Region 8. https://www.waterboards.ca.gov/water_issues/programs/swamp/docs/factsheets/rb8_cw101.pdf

Basin. The River originates in the San Bernardino Mountains, travels southwest, and discharges to the Pacific Ocean near the Huntington Beach/Newport Beach city boundary. Water flow in the river is regulated by the Prado Dam, the Seven Oaks Dam, and other flood-control facilities along the river and its tributaries. The City of Ontario is nearest to Reach 3 of the Santa Ana River.

Surface Water

The City of Ontario lies within the Chino Watershed, which consists of most of the Upper Santa Ana River Valley and portions of the San Gabriel Mountains and Puente Hills and Chino Hills. The Santa Ana River forms the southern boundary of the Watershed. The primary direction of drainage flow is from the San Gabriel Mountains southward to the Santa Ana River, then continues southwest in the River.

Within the City, streams in the Watershed include the West Cucamonga, Deer Creek, Day Creek, and Etiwanda Creek Channels, and the Cucamonga Creek Flood Control Channel. West Cucamonga Channel and Deer Creek Channel discharge into the Cucamonga Creek Flood Control Channel, which discharges into the Santa Ana River. Within the City, some stormwater runoff is diverted for recharge in flood retention and spreading basins, including the Eighth Street, Ely, Turner, Chris, Cucamonga, and Wineville Basins.

The USEPA denotes four surface water bodies within the Chino Watershed on its list of Water Quality Limited Segments under Section 303(d) of the Clean Water Act (USEPA 2007). One of these water bodies passes through the City of Ontario—Valley Reach of Cucamonga Creek is included on the Section 303(d) list for coliform bacteria from an unknown nonpoint source.

Groundwater

The Chino Basin is one of the largest groundwater basins in southern California, covering approximately 235 square miles of the Upper Santa Ana River Valley. The basin is bounded by the Rialto-Colton Fault on the northeast, the Jurupa Mountains and La Sierra Hills to the southeast, the Central Avenue Fault to the southwest, and the San Jose Fault

and Red Hill Fault to the northwest. Groundwater is produced from the basin by cities, other water supply entities, and by agricultural users overlying the basin. Before 1978, the basin was in overdraft. Since 1978, the basin has been managed via ongoing court adjudication in the 1978 judgment Chino Basin Municipal Water District vs. City of Chino et al.

The City of Ontario draws all of its groundwater supply from the Chino Basin. Groundwater flows through the Chino Basin in a north/south alignment, and groundwater quality is better in the northern portion of the basin, where significant recharge occurs. Salinity, measured as total dissolved solids (TDS), and nitrate concentrations increase in the southern portion of Chino Basin. TDS and nitrate generally originate from nonpoint sources such as land application of wastes and fertilizer from previous and current agricultural activities. In addition, there are several point sources of contamination in the basin that affect groundwater quality in localized areas. The primary water quality concerns for the City's groundwater wells are nitrate and perchlorate levels. Other contaminants of concern are volatile organic compounds (VOC) and TDS.

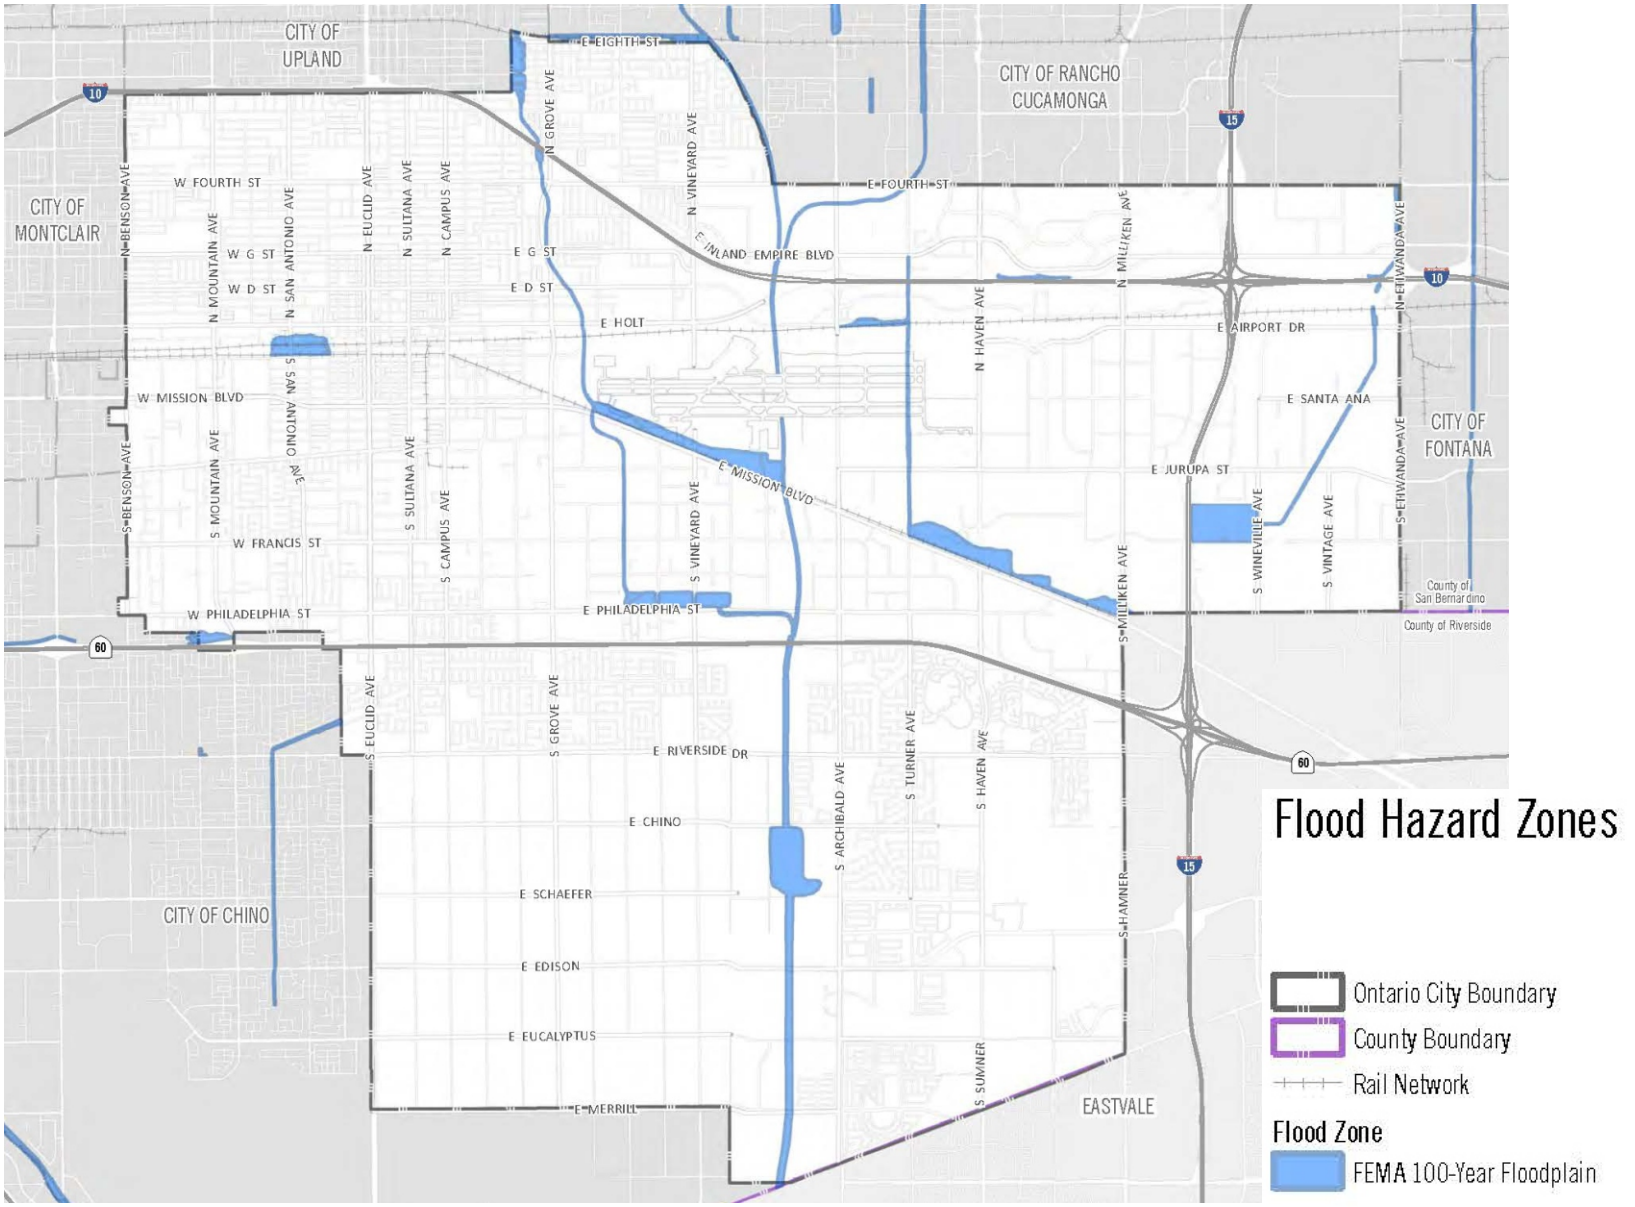
Flood Hazards

While significant hydrologic improvements have been made within the City, including channelization of many of the City's watercourses, flooding associated with peak 100-year and 500-year floods and dam inundation remains a potential hazard.

Types of Floods

Flash floods are short but have high peak volumes and velocities. The local mountains are very steep and consist of rock types fairly impervious to water. Little precipitation infiltrates the ground. Instead, rainwater flows across the surface as runoff, collecting in major drainages that pass through the City. When a major storm event moves in, water collects rapidly and runs off quickly. Because of the steep terrain and scarcity of vegetation in the mountains, flood flows often carry large amounts of mud, sand, and

rock. Sheet flow occurs when the capacity of the existing channels, either natural or man-made, are exceeded and water flows over and into the adjacent areas.



Recent Historical Floods

In the winter of 1969, flood flows were greater than the estimated 100-year flood, and exceeded the capacity of levees, storm drains, and flood-control channels. About 1,000 people were reportedly evacuated from the Cucamonga area. In Ontario, most of the floodwaters were contained in improved channels and basins; however, overbank flow from Deer and Etiwanda Creeks flooded portions of the City.

In 1998, the area received more than double its average annual rainfall, and this, combined with a lack of storm drains in south Ontario, resulted in significant flooding of the dairy preserve. The flooding caused significant property damage, the deaths of about 16,000 dairy cows, with losses to farmers in the millions of dollars. The winter storms of 2004/2005 dropped record rainfall on southern California. Ontario experienced localized flooding and sedimentation, mainly due to inadequacies in the local storm drain system, but the damage was considerably less than the 1998 losses.

Designated Flood Zones

The 100-year flood in Ontario is generally confined to the major watercourses, channels, and basins that traverse the City. Please refer to Figure 4.8-1. The majority of the City watercourses are channelized to prevent flood hazards. However, in the event of a peak 100-year or 500-year storm event, flood waters can flow over their banks and inundate adjacent areas. Large portions of the City would be affected by shallow and/or infrequent flooding, primarily by sheet flow as storm drains and channels become overwhelmed. This flooding is also exacerbated by graded embankments along the rail lines and east/west roadway embankments within the City that cause ponding. The Project site is located outside of the 100-year floodplain, but within the 500-year floodplain.

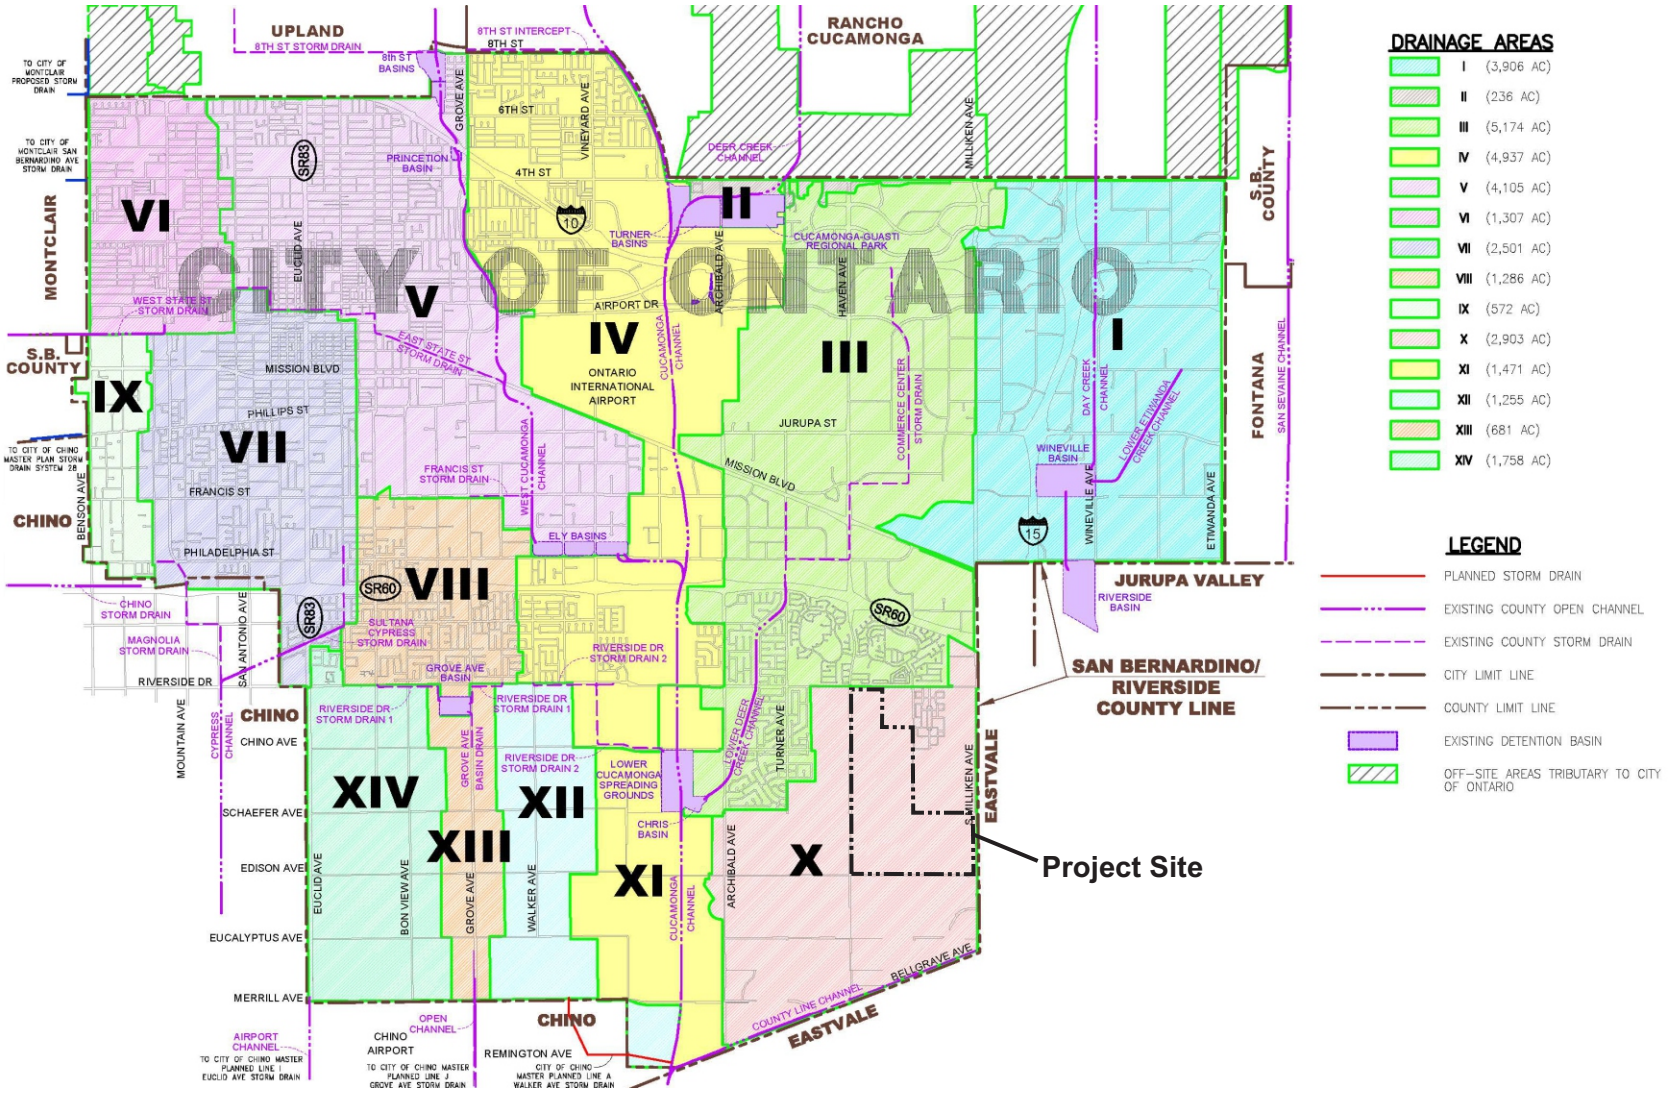
Figure 4.8-1
Flood Hazard Zones

4.8.2.2 City of Ontario



City of Ontario Master Plan of Drainage (MPD)

Under the City of Ontario Master Plan of Drainage (MPD), the City is divided into 4 Study Areas, "Original Model Colony West" (OMC-West,), OMC-East, "New Model Colony West" (NMC-West), and NMC-East. Each of the MPD Study Areas is subdivided into Drainage Areas (denoted by Roman Numerals I – XIV). For example, the OMC-East Study Area is subdivided into Drainage Areas III (part), Drainage Area X and Drainage Area XI (part). The MPD Study Area and Drainage Area boundaries generally coincide with physical attributes or political boundaries that define drainage areas within the City.

Location of the Project site within the MPD is presented at Figure 4.8-2. The Project site lies within the MPD NMC-East Study Area, Drainage Area X. Drainage Area X is tributary to the County Line Channel. The County Line Channel is owned and maintained by the San Bernardino County Flood Control District (SBCFCD) and runs along the southerly edge of the Ontario Ranch portion of the City.

4.8.2.3 Project Hydrology Report Area (Rich-Haven Watershed)

The Project Hydrology Report evaluates hydrologic changes that would result from the Project and related implications for the serving MPD stormwater management system. The Project Hydrology Report Area (the "Rich-Haven Watershed") includes the Project site and comprises approximately 4.5 square miles (2,880 acres) within the northeast portion of Drainage Area X. The Watershed captures northeast-to-southwest trending stormwater inflows to the Project site, as well as stormwater discharges from the Project site to the south/southwest.

Source: City of Ontario Master Plan of Drainage

Figure 4.8-2
Project Site Within the MPD

4.8.3 Serving MPD Stormwater Management System

Under the MPD, stormwater discharges from the Rich-Haven Watershed would be conveyed by three main planned backbone storm drain lines: 1) Haven Avenue Storm Drain, 2) Mill Creek Avenue Storm Drain, and 3) Milliken Avenue Storm Drain. These storm drains exist or are planned along north – south alignments, connect ultimately to the County Line Channel. Alignments of these planned backbone storm drain lines are illustrated at Figure 4.8-3. Description of each backbone storm drain line and its current status are summarized at Table 4.8-1. Consistent with City requirements, the Project would construct serving MDoP facilities, or would participate financially in their construction. Issuance of Certificates of Occupancy within the Project site would be contingent on City verification of the adequacy of serving infrastructure including, but not limited to, adequacy of the serving MPD facilities.
