CITY OF ONTARIO

Regular City Council/Housing Authority Meeting
NOVEMBER 21, 2023

City Hall
303 East B Street, Ontario, CA 91764

MAYOR PAUL S. LEON • MAYOR PRO TEM DEBRA DORST-PORADA
COUNCIL MEMBERS ALAN D. WAPNER, JIM W. BOWMAN AND RUBEN VALENCIA

CITY CLERK SHEILA MAUTZ • TREASURER JAMES R. MILHISER
CITY MANAGER SCOTT OCHOA • CITY ATTORNEY RUBEN DURAN

WELCOME TO A MEETING OF THE ONTARIO CITY COUNCIL

All documents for public review are on file with the Records Management/City Clerk's Department located at 303 East B Street, Ontario, CA 91764.

Anyone wishing to speak in person during public comment or on a particular item will be required to fill out a blue slip. Blue slips must be turned in prior to public comment beginning or before an agenda item is taken up. The Clerk will not accept blue slips after that time. To comment by email, submit your comments no later than 4:00 p.m. on the day of the meeting by emailing your name, agenda item you are commenting on and your comments to publiccomments@ontarioca.gov. All comments received by the deadline will be forwarded to the City Council for consideration before action is taken on the matter and will be entered into the record.

Comments will be limited to 3 minutes. Speakers will be alerted when they have 1 minute remaining and when their time is up. Speakers are then to return to their seats and no further comments will be permitted.

In accordance with State Law, remarks during public comment are to be limited to subjects within Council's jurisdiction. Remarks on other agenda items will be limited to those items.

Remarks from those seated or standing in the back of the chamber will not be permitted. All those wishing to speak including Council and Staff need to be recognized by the Chair before speaking.

ACCOMODATIONS

If you need special assistance or accommodations to participate in this meeting, please contact the City Clerk's office at 909-395-2009. Notification of 48 hours prior to the meeting will help the City make reasonable arrangements. Equipment for the hearing impaired is available in the Records Management Office.

ORDER OF BUSINESS

The regular City Council and Housing Authority meeting begins with Closed Session and Closed Session Comment at 6:00 p.m., Public Comment at 6:30 p.m. immediately followed by the Regular Meeting and Public Hearings. No agenda item will be introduced for consideration after 10:00 p.m. except by majority vote of the City Council.

CALL TO ORDER *(OPEN SESSION)*

ROLL CALL

Dorst-Porada, Wapner, Bowman, Valencia, Mayor/Chairman Leon

INFORMATION RELATIVE TO POSSIBLE CONFLICT OF INTEREST

Agenda item contractors, subcontractors and agents may require member abstentions due to conflict of interests and financial interests. Council Member abstentions shall be stated under this item for recordation on the appropriate item.

CLOSED SESSION PUBLIC COMMENT

The Closed Session Public Comment portion of the Council/Housing Authority meeting is limited to a maximum of 3 minutes for each speaker and comments will be limited to matters appearing on the Closed Session. Additional opportunities for further Public Comment will be given during and at the end of the meeting.

REPORT ON CLOSED SESSION

City Attorney

PUBLIC COMMENTS 6:30 P.M.

The Public Comment portion of the Council/Housing Authority meeting is limited to 30 minutes with each speaker given a maximum of 3 minutes. An opportunity for further Public Comment may be given at the end of the meeting. Under provisions of the Brown Act, Council is prohibited from taking action on oral requests.

To comment by email, submit your comments by email no later than 4:00 p.m. on the day of the meeting by emailing your name, agenda item you are commenting on and your comment to publiccomments@ontarioca.gov. All Comments received by the deadline will be forwarded to the City Council for consideration before action is taken on the matter and entered into the record. As previously noted -- if you wish to address the Council, fill out one of the blue slips at the rear of the chambers and give it to the City Clerk.

AGENDA REVIEW/ANNOUNCEMENTS

The City Manager will go over all updated materials and correspondence received after the Agenda was distributed to ensure Council Members have received them. He will also make any necessary recommendations regarding Agenda modifications or announcements regarding Agenda items to be considered.

CONSENT CALENDAR

All matters listed under CONSENT CALENDAR will be enacted by one motion in the form listed below – there will be no separate discussion on these items prior to the time Council votes on them, unless a member of the Council requests a specific item be removed from the Consent Calendar for a separate vote.

Each member of the public wishing to address the City Council on items listed on the Consent Calendar will be given a total of 3 minutes.

---

1. APPROVAL OF MINUTES

Minutes for the regular meetings of the City Council and Housing Authority of October 17, 2023, and approving same as on file in the Records Management Department.

ATTACHMENT: 20231017 Minutes (Not official until approved)

23. A PUBLIC HEARING TO CONSIDER AN AMENDMENT TO THE SUBAREA 29 SPECIFIC PLAN (FILE NO. PSPA21-005)

That the City Council consider and adopt:

A. A Resolution adopting the Subsequent Environmental Impact Report (SEIR) (State Clearinghouse No. 2004011009) for the Subarea 29 Specific Plan Amendment, including the adoption of a Mitigation Monitoring and Reporting Program and a Statement of Overriding Considerations; and
B. A Resolution approving File No. PSPA21-005, an Amendment to the Subarea 29 Specific Plan (File No. PSPA21-005), to include: [1] the annexation of 113.2 gross acres of land, located on the southwest corner of Haven Avenue and Eucalyptus Avenue and establish Planning Area 32 (Mixed Residential (5-25 du/ac), Planning Area 33 (Mixed Residential (5-25 du/ac), and Planning Area 34 (School); [2] change the land use designation for Planning Area 30 from Conventional Large Lot (3-6 du/ac) to Mixed Residential (5-25 du/ac) and Planning Area 31 from Conventional Medium Lot (4-6 du/ac) to Mixed Residential (5-25 du/ac); [3] establish development standards for 7 new residential product types; and [4] various changes to the Specific Plan land use map, land use table, development standards, exhibits, and text modification to reflect the proposed annexation and land use changes.

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF ONTARIO, CALIFORNIA, ADOPTING ENVIRONMENTAL FINDINGS PURSUANT TO THE CALIFORNIA ENVIRONMENTAL QUALITY ACT AND CERTIFYING THE SUBAREA 29 SPECIFIC PLAN AMENDMENT (FILE NO. PSPA21-005) FINAL SUBSEQUENT ENVIRONMENTAL IMPACT REPORT (STATE CLEARINGHOUSE NO. 2004011009), AND ADOPTING FINDINGS OF OVERRIDING CONSIDERATIONS AND A MITIGATION MONITORING AND REPORTING PROGRAM, AND APPROVING THE PROJECT. THE SUBAREA 29 SPECIFIC PLAN IS BOUNDED BY EUCALYPTUS AVENUE TO THE NORTH, THE CUCAMONGA

CREEK CHANNEL TO THE WEST, THE COUNTY LINE CHANNEL AND BELLEGRAVE AVENUE TO THE SOUTH, AND MILL CREEK AVENUE TO THE EAST, AND MAKING FINDINGS IN SUPPORT THEREOF—APNS: 0218-331-12, 0218-331-14, 0218-331-18, 0218-331-30, 0218-331-31, AND 0218-331-52.

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF ONTARIO, CALIFORNIA, APPROVING FILE NO. PSPA21-005, AN AMENDMENT TO THE SUBAREA 29 SPECIFIC PLAN TO BRING THE SPECIFIC PLAN INTO COMPLIANCE WITH THE ONTARIO PLAN POLICY PLAN (GENERAL PLAN) LAND USE PLAN THAT INCLUDE: [1] THE ANNEXATION OF 113.2 GROSS ACRES OF LAND, LOCATED ON THE SOUTHWEST CORNER OF HAVEN AVENUE AND EUCALYPTUS AVENUE AND ESTABLISH PLANNING AREA 32 (MIXED RESIDENTIAL (5-25 DU/AC), PLANNING AREA 33 (MIXED RESIDENTIAL (5-25 DU/AC), AND PLANNING AREA 34 (SCHOOL), [2] CHANGE THE LAND USE DESIGNATION FOR PLANNING AREA 30 FROM CONVENTIONAL LARGE LOT (3-6 DU/AC) TO MIXED RESIDENTIAL (5-25 DU/AC) AND PLANNING AREA 31 FROM CONVENTIONAL MEDIUM LOT (4-6 DU/AC) TO MIXED RESIDENTIAL (5-25 DU/AC) TO BRING THE SPECIFIC PLAN INTO COMPLIANCE WITH THE ONTARIO PLAN POLICY PLAN (GENERAL PLAN) LAND USE PLAN, [3] ESTABLISH DEVELOPMENT STANDARDS FOR 7 NEW PRODUCT TYPES WITHIN THE RESIDENTIAL LAND USE DESIGNATIONS, AND [4] VARIOUS CHANGES TO THE SPECIFIC PLAN LAND USE MAP, LAND USE TABLE, DEVELOPMENT STANDARDS, EXHIBITS, AND TEXT MODIFICATION TO REFLECT THE PROPOSED ANNEXATION AND LAND USE CHANGES. THE SUBAREA 29 SPECIFIC PLAN IS BOUNDED BY EUCALYPTUS AVENUE TO THE NORTH, THE CUCAMONGA CREEK CHANNEL TO THE WEST, THE COUNTY LINE CHANNEL AND BELLEGRAVE AVENUE TO THE SOUTH, AND MILL CREEK AVENUE TO THE EAST, AND MAKING FINDINGS IN SUPPORT THEREOF—APNS: 0218-331-12, 0218-331-14, 0218-331-18, 0218-331-30, 0218-331-31, AND 0218-331-52.

ONTARIO CITY COUNCIL/
ONTARIO HOUSING AUTHORITY
MINUTES
OCTOBER 17, 2023
(Not Official Until Approved)

JOINT MEETINGS

The regular meetings of the Ontario City Council and the Housing Authority were held on Tuesday, October 17, 2023 at Ontario City Hall, 303 E. B Street Ontario, California.

CALL TO ORDER

Mayor Leon called the joint meetings to order at 6:31 p.m.

ROLL CALL

PRESENT:	Mayor/Chairman:	Paul S. Leon
	Mayor pro Tem/Vice Chair:	Debra Dorst-Porada
	Council/Authority Members:	Jim W. Bowman and Ruben Valencia
ABSENT:	Council/Authority Members:	Alan D. Wapner

Also present were City Manager / Executive Director Scott Ochoa, City Attorney/Legal Counsel Ruben Duran, and City Clerk / Secretary Sheila Mautz.

PLEDGE OF ALLEGIANCE

The Pledge of Allegiance was led by Council Member Bowman.

INVOCATION

Mayor Leon led a moment of silence in lieu of an invocation.

PUBLIC COMMENTS

Assistant City Clerk Isbell announced there were four written public comments:
Jazmin Bahena, regarding a campaign for Palestinian Rights.
Jeannie Bahena, regarding a campaign for Palestinian Rights.
Maria Bahena, regarding a campaign for Palestinian Rights.
Saif Aldeen Alomari, regarding a campaign for Palestinian Rights.

Mayor Leon called upon the first speaker:

Megan Barlow, spoke in opposition of illegal massage parlors.

Sabrina Robles, announced the Ontario Police Department's annual open house.

Neha Upandriyaya, introduced herself as a representative of Senator Rubio's office, and announced upcoming events.

Maria Galvan, spoke on political signs.

Mario Huante, spoke on the Arizona State Constitution.

Karen Haughey, Representative of San Bernardino County Board Supervisor Curt Hagman announced upcoming events.

AGENDA REVIEW/ANNOUNCEMENTS

City Manager Ochoa made no announcements.

INFORMATION RELATIVE TO POSSIBLE CONFLICTS OF INTEREST

There were no conflicts of interest announced by the City Council.

CONSENT CALENDAR

Council Member Valencia pulled Item No. 14 from the Consent Calendar for a separate vote.

MOTION: Moved by Mayor pro Tem Dorst-Porada seconded by Council Member Valencia and carried by a unanimous vote 4-0, to approve the Consent Calendar as presented with the exception of Item No. 14, and with Council Member Wapner absent.

1. APPROVAL OF MINUTES

Approved minutes for the regular meetings of the City Council and Housing Authority of September 19, 2023, approving the same as on file in the Records Management Department.

2. BILLS & PAYROLL

Approved bills September 15, 2023 through September 28, 2023 in the amount of $13,454,092.06, and Payroll August 28, 2023 through September 23, 2023 in the amount of $5,313,047.34.

3. AN ORDINANCE OF THE CITY COUNCIL OF THE CITY OF ONTARIO, CALIFORNIA, AMENDING SECTION 4-6.1020 TO ARTICLE 10 OF CHAPTER 6 OF TITLE 4 OF THE ONTARIO MUNICIPAL CODE PERTAINING TO OVERSIZED VEHICLE PARKING ON PUBLIC STREETS

The City Council adopted an Ordinance to amend Section 4-6.1020 to Article 10 of Chapter 6 of Title 4 of the Ontario Municipal Code pertaining to standards for oversized vehicle parking on public streets. First reading and introduction took place at a regular meeting on October 3, 2023.

ORDINANCE NO. 3261 AN ORDINANCE OF THE CITY COUNCIL OF THE CITY OF ONTARIO, CALIFORNIA, AMENDING SECTION 4-6.1020 TO ARTICLE 10 OF CHAPTER 6 OF TITLE 4 OF THE ONTARIO MUNICIPAL CODE PERTAINING TO OVERSIZED VEHICLE PARKING ON PUBLIC STREETS

4. A RESOLUTION FOR PLACEMENT OF SPECIAL ASSESSMENTS ON THE SAN BERNARDINO COUNTY TAX ROLLS

The City Council adopted a Resolution for recovery of fees and costs incurred in abating property and dangerous building violations, as well as administrative citations and civil penalties associated with property maintenance violations and placing assessments on the San Bernardino County Tax Rolls.

RESOLUTION NO. 2023-144 A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF ONTARIO, CALIFORNIA, ADOPTING A REPORT REQUESTING THE PLACEMENT OF SPECIAL ASSESSMENTS ON PROPERTY TAX BILLS FOR CIVIL PENALTIES OR RECOVERY OF COSTS INCURRED FOR ABATEMENT OF VIOLATIONS OF CITY CODES AND ORDINANCES.

5. PURCHASE OF EXPLOSIVES STORAGE UNITS FROM KL SECURITY ENTERPRISES, INC. FOR THE ONTARIO FIRE DEPARTMENT BOMB SQUAD

The City Council authorized the City Manager or designee to execute the purchase of explosives storage units from KL Security Enterprises, Inc., of Lafayette, IN, in the amount of $170,000.

6. A LEASE AGREEMENT WITH CHAFFEY COMMUNITY ART ASSOCIATION

The City Council authorized the City Manager, or designee, to execute a Lease Agreement with the Cha□ey Community Art Association, dba Cha□ey Community Museum of Art (CCAA), of Ontario, California, for use of a City-owned building and adjacent property located at 217 South Lemon for the purpose of exhibiting and promoting local art and artists.

7. AN AMENDMENT TO THE PROFESSIONAL SERVICES AGREEMENT WITH PARSONS CORPORATION FOR ENGINEERING AND DESIGN SERVICES FOR THE I-10 FREEWAY AT GROVE AVENUE AND FOURTH STREET INTERCHANGE AND GROVE AVENUE CORRIDOR PROJECT

The City Council approved Amendment No. 9 to the Professional Services Agreement with Parsons Corporation of Illinois, for additional engineering and design services for the I-10 Freeway at Grove Avenue and Fourth Street Interchange and Grove Avenue Corridor Project in the amount of $485,507, for a total not-to-exceed amount of $5,049,698; and authorized the City Manager, or his designee, to execute said Agreement and future amendments within the authorization limits.

8. A SOLE SOURCE PURCHASE OF MOBILE SURVEILLANCE UNITS (MSUS) FROM ECAMSECURE

The City Council approved and authorized the City Manager or his designee to execute all documents necessary for the sole source purchase of 15 Mobile Surveillance Units (MSUs) from ECAMSECURE, of Long Beach, California in the amount of $512,000.

9. A CONSTRUCTION CONTRACT WITH CHAPMAN COAST ROOF CO., INC. FOR THE DOROTHY A. QUESADA COMMUNITY CENTER ROOF REPLACEMENT PROJECT

The City Council took the following actions:

A. Authorized the City Manager or his designee to complete and execute Construction Contract No. D&C23-016 with Chapman Coast Roof Co., Inc., located in Fullerton, California, for the Dorothy A. Quesada Community Center Roof Replacement Project in the amount of $284,987;
B. Authorized a 10% contingency of $28,499 to address any unforeseen issues that arise during construction for a total contract amount not-to-exceed $313,486; and
C. Authorized the City Manager or his designee to execute all documents required for the completion of the project including, but not limited to, contracts, agreements, assessments, easements, reduction of retention accounts, and filing a notice of completion at the conclusion of all construction related activities.

10. AN AMENDMENT TO THE MAINTENANCE SERVICES AGREEMENT WITH BAY ALARM COMPANY FOR THE ONTARIO POLICE DEPARTMENT FIRE NOTIFICATION SYSTEM DESIGN

The City Council took the following actions:

A. Authorized the City Manager or his designee to execute Amendment No. 7 to the Maintenance Services Agreement with Bay Alarm Company, located in Concord, California, for the Ontario Police Department Fire Notification System Design in an amount of $11,925 for a total not-to-exceed contract amount of $1,022,272; and
B. Authorized the City Manager or his designee to execute all documents required for the completion of the project including, but not limited to, contracts, agreements, assessments, easements, reduction of retention accounts, and filing a notice of completion at the conclusion of all construction related activities.

11. AMENDMENTS TO THE DESIGN SERVICES AGREEMENT WITH HOLT ARCHITECTS, INC. FOR ON-CALL ARCHITECTURAL SERVICES FOR THE ONTARIO POLICE DEPARTMENT MASTER PLAN, REAL TIME INFORMATION CENTER, AND TRAINING DIVISION

The City Council took the following actions:

A. Authorized the City Manager or his designee to execute Amendment No. 6 to the On-Call Design Services Agreement with Holt Architects, Inc., located in Palm Desert, California, for the Ontario Police Department Real Time Information Center and Training Division Design for an amount of $338,970;
B. Authorized the City Manager or his designee to execute Amendment No. 7 to the On-Call Design Services Agreement with Holt Architects, Inc., located in Palm Desert, California, for the Ontario Police Department Master Plan Design for an amount of $143,582 for a total contract not-to-exceed amount of $1,055,066; and
C. Authorized the City Manager or his designee to execute all documents required for the completion of the project including, but not limited to, contracts, agreements, assessments, easements, reduction of retention accounts, and filing a notice of completion at the conclusion of all construction related activities.

12. AN AMENDMENT TO THE MAINTENANCE SERVICES AGREEMENT WITH WESTERN AUDIO VISUAL FOR THE ONTARIO POLICE DEPARTMENT GYM EXPANSION PROJECT

The City Council took the following actions:

A. Authorized the City Manager or his designee to execute Amendment No. 3 to the Maintenance Services Agreement with Western Audio Visual, located in Orange, California, for the Ontario Police Department (OPD) Gym Expansion Project for an amount of $67,622; and
B. Authorized the City Manager or his designee to execute all documents required for the completion of the project including, but not limited to, contracts, agreements, assessments, easements, reduction of retention accounts, and filing a notice of completion at the conclusion of all construction related activities.

13. AN AMENDMENT TO THE PROFESSIONAL SERVICES AGREEMENT WITH AMERICAN THREAT ASSESSMENT CONSULTING INC. (A.T.A.C.)

The City Council authorized the City Manager or his designee to execute Amendment No. 7 to the Professional Services Agreement with American Threat Assessment Consulting Inc. (A.T.A.C.) of Rancho Cucamonga, California to add the purchase of additional equipment for the Civic Center remodel project and the Real Time Information Center in the amount of $71,521, for a total contract not-to-exceed amount of $1,604,021.

15. AUTHORIZE THE PURCHASE OF OUTDOOR FITNESS EQUIPMENT WITH GREENFIELDS OUTDOOR FITNESS FOR VINEYARD PARK

The City Council authorized the cooperative purchase of Outdoor fitness equipment with Greenfields Outdoor Fitness for Vineyard Park in the amount of $171,081 plus a 10% contingency of $17,109 to mitigate any unforeseen issues with supply chain surcharges and manufactory price increases for a total not-to-exceed contract amount of $188,190 from Greenfields Outdoor Fitness, of Anaheim, California, consistent with the terms and conditions of the Sourcewell Cooperative Contract No. 010721-GRN.

16. A PROFESSIONAL SERVICES AGREEMENT WITH ROBERT COFFEE & ASSOCIATES FOR THE ANTHONY MUNOZ COMMUNITY CENTER GYMNASIUM

The City Council took the following actions:

A. Authorized the City Manager or his designee to execute a Professional Services Agreement D&C23-015 Anthony Munoz Gymnasium to Robert Co□ee & Associates, of Newport Beach, California, for the Anthony Munoz Community Center Gymnasium Project, for a total not-to-exceed contract amount of $971,820; and
B. Authorized the City Manager or his designee to execute all documents required for the completion of the project including, but not limited to agreements, assessments, easements, reduction of retention accounts, contracts amendments within the authorization limits, and filing a notice of completion at the conclusion of all construction related activities.

ITEM PULLED FROM CONSENT CALENDAR

14. ACCEPTANCE OF PRIORITY LEGISLATIVE BUDGET PROJECT (PLBP) EARMARK FUNDS FROM THE CALIFORNIA DEPARTMENT OF TRANSPORTATION (CALTRANS) FOR THE DE ANZA PARK LIGHTING IMPROVEMENTS PROJECT, MISSION BOULEVARD MEDIAN IMPROVEMENTS PROJECT, AND RECREATION YOUTH ACTIVITIES AND YOUTH SPORTS PROGRAM

The City Council authorized the City Manager or his designee to execute all documents necessary to accept the Priority Legislative Budget Project (PLBP) earmark funds in the amount of $4,500,000 from the California Department of Transportation (Caltrans) for the De Anza Park Lighting Improvements Project, Mission Boulevard Median Improvements Project, and Recreation Youth Activities and Youth Sports Program.

Council Member Valencia expressed gratitude to Former Senator Connie Leyva and credited her with earmarking funds for these types of projects.

MOTION: Moved by Council Member Valencia seconded by Council Member Bowman and carried by a unanimous vote 4-0, with Council Member Wapner absent, to accept Priority Legislative Budget Project funds.

PUBLIC HEARINGS

17. A PUBLIC HEARING TO CONSIDER ADOPTION OF THE EUCLID WALNUT PLANNED UNIT DEVELOPMENT (FILE NO. PUD22-004) TO ESTABLISH DEVELOPMENT STANDARDS AND DESIGN GUIDELINES FOR A 10.6-ACRE PROJECT SITE LOCATED AT THE NORTHWEST CORNER OF EUCLID AVENUE AND WALNUT STREET

The City Council adopted a Resolution approving the use of an Addendum to The Ontario Plan 2050 Supplemental Environmental Impact Report, and introduced and waived further reading of an Ordinance approving the Euclid Walnut Planned Unit Development (File No. PUD22-004).

RESOLUTION NO. 2023-145 A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF ONTARIO, CALIFORNIA, APPROVING THE USE OF AN ADDENDUM TO THE ONTARIO PLAN 2050 SUPPLEMENTAL ENVIRONMENTAL IMPACT REPORT, PURSUANT TO THE REQUIREMENTS OF THE CALIFORNIA ENVIRONMENTAL QUALITY ACT, AS AMENDED, FOR FILE NOS. PUD22-004, PDEV22-027, AND PHP22-015.

ORDINANCE NO. 3262 (FIRST READING) AN ORDINANCE OF THE CITY COUNCIL OF THE CITY OF ONTARIO, CALIFORNIA, ADOPTING FILE NO. PUD22-004, THE EUCLID WALNUT PLANNED UNIT DEVELOPMENT, ESTABLISHING DEVELOPMENT STANDARDS AND DESIGN GUIDELINES FOR A 10.6-ACRE PROJECT SITE GENERALLY LOCATED AT THE NORTHWEST CORNER OF EUCLID AVENUE AND WALNUT STREET, AND MAKING FINDINGS IN SUPPORT THEREOF - APNS: 1051-271-67, 1051-271-06, AND 1051-271-66.

Notice of public hearing was duly given and affidavits of compliance are on file in the Records Management Department. There were no written communications.

Mayor Leon opened the public hearing and inquired if anyone was interested in speaking to the item.

Rafael Legido, spoke in support of the developer hiring local talent.

Ben Mount, spoke in support of the project.

Hearing no one else, Mayor Leon closed the public hearing and opened the item for Council discussion.

The Mayor and City Council discussed the matter and supported the developer hiring local talent.

Mayor Leon reopened the public hearing.

Maria Galvan, spoke in support of hiring local talent.

Chris Robles, spoke in support of hiring local talent.

Hearing no one else, Mayor Leon closed the public hearing.

MOTION: Moved by Mayor pro Tem Dorst-Porada seconded by Council Member Bowman and carried by a unanimous vote 4-0, with Council Member Wapner absent, to adopt Resolution No. 2023-145 and introduce Ordinance No. 3262.

STAFF MATTERS

City Manager Ochoa made no announcements.

COUNCIL MATTERS

Council Member Valencia made no comments.
Council Member Bowman made no comments.
Mayor Pro Tem Dorst-Porada announced the upcoming Ontario Art Walk.
Mayor Leon made no comments.

ADJOURNMENT

Mayor Leon adjourned the meetings of the Joint Agencies at 7:13 p.m. and announced the next regular meeting was scheduled for November 7, 2023.

Respectfully submitted,

CITY OF ONTARIO *Agenda Report* **November 21, 2023**	**SECTION:** **CONSENT CALENDAR**
Department: Planning Prepared By: Kimberly Ruddins Staff Member Presenting: Scott Murphy, Executive Director Community Development Approved By:	Submitted To: Council/OHA Approved: _____ Continued To: _____ Denied: _____ Item No: 3

SUBJECT: **SELECTION OF INLAND EMPIRE RESOURCE CONSERVATION DISTRICT AS THE LAND TRUST FOR ADMINISTRATION OF THE ONTARIO RANCH (NEW MODEL COLONY) GREATER PRADO BASIN HABITAT CONSERVATION PROGRAM HABITAT MITIGATION FEE**

RECOMMENDATION: That the City Council approve the selection of the Inland Empire Resource Conservation District (IERCD) as the administrator of the Greater Prado Basin Habitat Conservation Program (GPBHCP) Ontario Ranch (New Model Colony) Habitat Mitigation Fees and direct the City Manager or designee to facilitate the purpose and goals of the Memorandum of Agreement.

THE FOLLOWING COUNCIL GOALS ARE BEING ACHIEVED:
Operate in a Businesslike Manner
Pursue City's Goals and Objectives by Working with Other Governmental Agencies
Encourage, Provide or Support Enhanced Recreational, Educational, Cultural and Healthy City Programs, Policies and Activities
Pursue City's Goals and Objectives by Working with Other Governmental Agencies

FISCAL IMPACT: There is not a direct fiscal impact associated with this action.

BACKGROUND & ANALYSIS: In January 1998, the Ontario City Council approved a General Plan Amendment (GPA) and associated Final EIR for the sphere of influence (SOI), which is now known as the Ontario Ranch [previously the New Model Colony (NMC)]. The GPA designated Ontario Ranch for a range of urban and suburban uses, including residential, commercial, business park, industrial, and open space. Most of Ontario Ranch was then in agricultural use. The Final EIR for the GPA assessed the impacts on biological resources of the conversion of Ontario Ranch from agricultural uses to developed urban and suburban uses. Before mitigation, significant impacts were identified for waterfowl and waterfowl habitat, raptors and raptor habitat, and the Delhi Sands Flower-Loving Fly (DSFLF) Ontario Recovery Unit. The EIR included three mitigation measures for impacts to biological resources.

Subsequent to the 1998 adoption of the SOI GPA and EIR, a lawsuit was filed against the City of Ontario by the Endangered Habitats League and the Sierra Club, challenging the City's CEQA

compliance and approval of the SOI GPA. A Settlement Agreement was reached and agreed to by all parties that set forth revised mitigation measures for potential impacts in the Ontario Ranch (referred to as Annexation Area 163 in the Agreement) to the burrowing owl, the DSFLF, raptor foraging and wildlife habitat, loss of open space, actual and potential habitat, and agricultural land, and sensitive (listed and non-listed) species. These measures will be in effect until all the developable acres in the Ontario Ranch reach full buildout, as determined by the City.

Since the Settlement Agreement, in 2003, the City established a habitat mitigation fee to cover potential environmental impacts to the Burrowing Owl, DSFLF, raptor foraging, loss of open space, and agricultural lands. Development impact fees for new development in Ontario Ranch were adopted on June 23, 2003, by the City Council. The Ontario Ranch development impact fees include a habitat mitigation fee of $4,320 per net acre for proposed residential, commercial, hotel and restaurant, office, and industrial development. Mitigation fees have been collected by the City and have been deposited into a trust fund to be used for the acquisition, restoration, rehabilitation, and/or maintenance of lands deemed to have long-term conservation value. Up to 25 percent of the fees may be used for DSFLF. In addition, the current City procedure requires the preparation of a habitat assessment to determine if habitat and biological resources exist on sites proposed for development. If the assessment determines that there is potential habitat for sensitive species, focused protocol surveys are required. If potential DSFLF habitat is present, two-year (consecutive) protocol surveys per the USFWS Interim General Survey Guidelines for DSFLF are required.

Parties to the Settlement Agreement formed an Advisory Committee which oversaw the selection of Riverside Land Conservancy (RLC) to conduct the initial Strategic Planning and would be disbanded upon selection of the land trust, with long term oversight of the land trust provided by the City. In 2006, the Ontario City Council approved the selection of the RLC (today known as River and Land Conservancy) to create a habitat program pursuant to the requirements of the Settlement Agreement. RLC developed a two-phased Greater Prado Basin Habitat Conservation Plan (GPBHCP) Habitat Mitigation Program. Phase 1 was the preparation of a Strategic Plan, while Phase 2 was to be the Program Implementation. In 2010, the City of Ontario approved the selection of RLC as the land trust administrator for the New Model Colony (NMC) habitat mitigation fees as part of Phase 2 of the program. However, due to the economic downturn, the contract between the City and the Riverside Land Conservancy was never ratified. Due to the slower economic recovery and, more recent Covid-19 Pandemic, the City has not been able to implement the program but has continued to collect the Habitat Conservation and Open Space Mitigation development impact fees. In the interim, the City has participated in the development of other projects within the Prado Basin including the Mill Creek Wetlands, completed in 2016. This multi-jurisdictional project incorporated 66 acres of wetland basins along a 2.35-mile section of Mill Creek, transforming it into a natural water quality treatment system providing regional environmental and recreational benefits within an underutilized area of the Prado Basin.

In August 2022, Staff reinitiated the GPBHCP through solicitation of proposals from non-profit land trusts and organizations specializing in habit conservation. Two proposals were received, although one was disqualified for not meeting the minimum standards. Following internal Advisory Committee meetings, after a thorough proposal review and interview, the Advisory Committee agreed to select the Inland Empire Resource Conservation District (IERCD) as the most qualified land trust. Additionally, as stipulated in the Settlement Agreement, the contract will identify the City's

responsibility for oversight of the fund disbursement to ensure IERCD acts "in a fiscally responsible and professional manner."

A Memorandum of Agreement allows for City Staff and IERCD to refine and implement the three-phased Habitat Mitigation Program. Phase 1 will be to refine the scope of work and concurrence on mutually agree definition of project success, while Phase II will be the development of a fiscally responsible sustainable Action Plan that provides a framework for identification and selection opportunities for restoration/rehabilitation/protection of habitat. Phase III will be implementation of selected projects. The Action Plan will identify potential properties for acquisition, with a focus on habitat identification and evaluation of species of primary concern include the Burrowing Owl, the Delhi Sands Flower Loving Fly, raptors, waterfowl and other riparian species. The long-term maintenance of potential habitat will also be considered. IERCD will use biologists, wildlife experts and GIS mapping technology to evaluate potential habitat in the Chino Basin. Based on their findings, IERCD will make long-term and short-term recommendations as to which properties to acquire/control through purchases, easements or other appropriate legal mechanisms for long term protection. Phase 1 would be completed within 12 months of the full execution of the Memorandum of Agreement. Phase 2 work will involve developing the procedures for selection of acquisition/control of the land and identification of potential projects, while Phase III is implementation of projects identified in Phase II. The timing and number of acquisitions is unknown at this time but will be affected by the strategies that IERCD recommends and the availability of Habitat Mitigation funds. IERCD will be responsible for quarterly program progress/fund expenditure reporting to the City and bi-yearly Board of Directors presentation of the Habitat Mitigation Program to the City Council.

MEMORANDUM OF AGREEMENT BY AND BETWEEN THE INLAND EMPIRE RESOURCE CONSERVATION DISTRICT AND THE CITY OF ONTARIO

THIS MEMORANDUM OF AGREEMENT ("MOA") is made and effective _____ ___, 2023 ("Effective Date") by and between the INLAND EMPIRE RESOURCE CONSERVATION DISTRICT, a special district created pursuant to the California Public Resources Code Division 9, Chapter 3 ("IERCD") and the CITY OF ONTARIO, a California municipal corporation ("City"). IERCD and City sometimes will be collectively referred to herein as the "Parties" or "Districts."

RECITALS

A. IERCD is a resource conservation district formed pursuant to California Public Resources Code sections 9151 et seq.

B. City is a municipal corporation located within the jurisdictional boundaries of IERCD, and desires to partner with IERCD on the project described herein.

C. Subsequent to the City's 1998 adoption of the Sphere of Influence ("SOI") General Plan Amendment ("GPA") and Environmental Impact Report ("EIR ") involving 8,200 acres of land to the south of Ontario's then-existing city limits and within Ontario's sphere of influence, a lawsuit was filed against the City by Endangered Habitats League, Inc. ("EHL") and the Sierra Club, challenging the City's California Environmental Quality Act ("CEQA") compliance and approval of the SOI and GPA; and

D. All parties to the lawsuit reached a settlement as set forth in the Settlement and General Release Agreement (the "Settlement Agreement"), attached as Exhibit A; and

E. The Settlement Agreement established the Greater Prado Basin Habitat Conservation Program ("GPBHCP") which sets forth revised mitigation measures for potential impacts in the Ontario Ranch (referred to as "Annexation Area 163" in the Settlement Agreement) as to the Burrowing Owl, the Delhi Sands Flower-Loving Fly ("DSFLF"), raptor foraging and wildlife habitat, loss of open space, actual and potential habitat, agricultural land, and sensitive (listed and non-listed) species. According to the Settlement Agreement, these GPBHCP mitigation measures will be in effect until all developable acres in the Ontario Ranch reach full buildout, as determined by the City; and

F. On or about June 23, 2003, the City Council established a habitat mitigation fee to cover potential environmental impacts to the Burrowing Owl, DSFLF, raptor foraging, loss of open space, and agricultural lands within Ontario Ranch. Development Impact Fees ("DIF") for new development in Ontario Ranch. The DIF includes an Ontario Ranch Habitat Mitigation Fee ("ORHMF") of $4,320 per net acre for proposed residential, commercial, hotel and restaurant, office, and industrial development; and

G. ORHMF has been collected by the City since adoption of the DIF and has been accounted for in a separate fund (Species Habitat Impact – Fund 4216) to be used for the acquisition, restoration, rehabilitation, and maintenance of lands deemed to have long term conservation value; and

H. In 2006 the City Council approved selection of the Riverside Land Conservancy (today known as the Rivers and Land Conservancy, "RLC") to create a habitat program pursuant to the requirements of the Settlement Agreement. RLC developed a two-phased Habitat Mitigation Program. Phase 1 was the preparation of a Strategic Plan, while Phase 2 was the Program Implementation. In 2008, RLC completed Phase 1, the Greater Prado Basin Habitat Conservation Program; and

I. In 2010, the City approved the selection of RLC as the Land Trust administrator for the ORHMF as part of Phase 2 of the program. However, due to the economic downturn, the contract between the City and the RLC was never ratified; and

J. In August 2022, City staff solicited proposals from non-profit land trusts and organizations specializing in habitat conservation and selected IERCD to assist the City in achieving some of the terms of the Settlement Agreement; and

K. Pursuant to the California Public Resource Code, section 9408, IERCD has authority to cooperate and enter into contracts or agreements with the City in furtherance of accomplishing the goals and objectives set forth in this MOA; and

L. The Parties wish to memorialize their respective rights and obligations by entering into this MOA.

NOW THEREFORE, in consideration of the mutual covenants contained herein, the Parties hereby agree as follows:

I. INTENT OF AGREEMENT. The Parties intend to work together to implement the land conservation- and species protection-related terms of the Settlement Agreement, including any modifications of the GPBHCP agreed to by the Parties. The Parties agree that further details regarding the scope of work, planning, scheduling and other details need to be developed to ensure project success. The Parties further acknowledge and agree that the processes, procedures and other aspects of this effort will need to be flexible in order to ensure economic and other efficiencies, and to provide maximum benefit to the public, to conservation and to the species addressed in the Settlement Agreement. As a result, the Parties have determined to structure their efforts in a phased approach, as follows. The efforts undertaken in each phase, particularly following phase 1, can be modified (or "adaptively managed") by the Parties, as they jointly agree.

A. Phase I. The Parties intend to conduct the following activities as part of Phase 1. The mutual intent of the Parties is to complete this Phase I within 12 months of the full execution of this MOA.

- **Final Product**: Mutually agreed upon scope of work to be implemented mid-2024 forward between the Parties capturing achievable and relevant components of the Settlement Agreement and the 2008 GPBHCP. The final suite of scope of work goals should capture the following:

    - Mutually agreed upon definition of project success in terms of prioritization, management and utilization of collected ORHMF in the following approved categories:

        - *Site acquisition* – acquisition guidelines; fee title/easement holder roles and responsibilities; prioritization strategy for acquisition; boundary within which properties may be prioritized and acquired using funds;
        - *Uplift of habitat benefiting target species* – what constitutes properties eligible for uplift (perpetuity versus termed protected status); guidelines for establishing baseline, goals, and success of uplift work using collected fees; sample budgets associated with similar work in the current year (rather than 2008-era pricing); and connecting peripheral partners such as RLC on long-term management;
        - *Maintenance of intact lands already suitable for target species* – what constitutes functional lands; suite of tasks identified as necessary to maintain condition; sample budgets for similar task completion in 2023 versus 2008; role of adaptive management, planning, and costs in a changing climate;
        - *Program administration*: roles and responsibilities of IERCD and City in prioritizing use of funds; process of transferring funds for approved uses; annual reporting and tracking; process and procedures for dispute resolution between the Parties - in the event of a disagreement both Parties will negotiate in a good faith to achieve the spirit and purpose of this MOA; and
        - *A quantitative measure for lands to be conserved* – 305 acres per the Settlement Agreement or agreement with City, EHL, and the Sierra Club that the Parties are foregoing specific acres and pursuing another form of measure of success and identifying what that will be.

    - Understanding of stakeholder group composition and identified role/level of influence in concept of development

    - Recognizing Settlement Agreement requirement to conserve lands, identify potential conservation lands for City, at its sole and absolute discretion, to acquire or otherwise obtain a right to convey any marketed

lands for sale prior to completion of Phases I and II with details regarding the potential transfer of such lands, if any, to IERCD at a later date. Prior to the expenditure of any funds, City shall obtain written agreement by all parties to the Settlement Agreement of the lands to be acquired and the respective purchase price of all such lands.

B. Phase II (Action Plan Development). The Parties intend to conduct the following activities as part of Phase II. The mutual intent is to complete this Phase II within six months after the completion of Phase I.

- **Final Product**: The expectation of the Parties is that IERCD will lead development and completion of an Action Plan incorporating components of Phase I (capturing critical components of the Settlement Agreement and RLC developed GPBHCP) and identifying timelines for addressing priorities and completing deliverables; and mechanisms for adaptive management to address project roadblocks should there be a disconnect between the anticipated and actual performance during Phase III of this MOA. The City, EHL, and stakeholder group will play engagement roles identified in Phase I of this MOA. At this point, the Parties anticipate that the Action Plan should include:

    - Prioritization strategy for Land Acquisition. Produce or obtain actual maps of lands within agreed upon conservation land target area identified in Phase I for fee title acquisition, easement recordation, or other agreed upon long term conservation. The strategy and actions will consider factors including at least proximity/connection to existing and potential conserved lands; proximity to waterways and/or access to water sources; costs; condition of land and uplift needs; and ability to support all targets (Burrowing Owl, raptors, waterfowl, DSFLF)

        - Roles and responsibilities in land acquisitions;
        - Potential partners and major land holders;
        - Plan components and further delineated sample costs for intact lands already benefitting target species;
        - Plan components and further delineated sample costs for identifying uplift needs and priority actions for impacted lands identified as capable if benefitting target species; and
        - Identified process for acquisition and long term easement projects to occur as unique subprojects with collective impact attributed to the fund.

    - Development and role of stakeholder group in terms of solicitation of feedback, influence on use of funds, and group composition

    - Informal and formal reporting, administrative tracking, funds management plan for IERCD and the City, including City retention of portion of ORHMF funds and City ongoing roles

C. Phase III (Action Plan Implementation). The Parties intend to conduct the following activities as part of Phase III. This Phase III will begin during or after Phase II and will be ongoing until the IERCD's role pursuant to this MOA is deemed complete using the procedures set forth in Section IV, below.

- **Final product**: Action Plan implementation anticipated to consist of:
    - Recurring (at least annual) reporting of success in satisfying plan requirements
    - Check in meetings with the City and stakeholder group
    - Advancement of individual land acquisitions and site protection instruments
    - preservation and/or uplift actions on conserved lands
    - management of funds based on respective roles of the City and IERCD;
    - adaptive management of administration or biological approach and actions based on measured success of work;
    - revision of Action Plan and/or MOA as needed based on results of implementation.

- Success metrics identified in Phases I and II of this MOA will be assessed against performance. If necessary, advanced or modified land acquisition or species protection targets will be identified and any Action Plan or MOA revisions will be conducted to support achievement of those targets based on City and IERCD feedback and needs.

II. FUNDING OF ACTUAL COSTS

A. IERCD shall receive compensation, including authorized reimbursements, for all services rendered under this MOA at the rates set forth in Exhibit "B" attached hereto and incorporated herein by reference. IERCD reserves the right to update the rates each year to generally reflect the change in the cost of living for the prior calendar year, as shown by the U.S. Department of Labor in its All Urban Consumers Index set forth for the Riverside-San Bernardino-Ontario area, or as otherwise mutually agreed by the Parties in writing.

B. IERCD shall submit to City a quarterly itemized statement which indicates work completed and hours of services rendered by IERCD. The statement shall describe the amount of services and supplies provided since the initial commencement date, or since the start of the subsequent billing periods, as appropriate, through the date of the statement. The City shall, within 45 days of receiving such statement, review the statement and remit payment at the address in Section VII, below. No interest shall be charged on a payment received later than 45 days, but IERCD reserves the right to wait for the payment to be received before proceeding with any further work implementing this MOA.

III. COOPERATION.

The Parties agree to cooperate with each other in the implementation of this MOA and perform any and all acts necessary to carry out the intent of the MOA. Without limiting the

foregoing, the Parties agree to provide necessary approvals, and execute, acknowledge, and deliver any and all additional papers, documents and other assurances as may be necessary to carry out the intent of the MOA.

IV. TERM/TERMINATION.

A. This MOA shall commence on the Effective Date and shall continue unless otherwise terminated by either Party pursuant to Section IV.B, below.

B. Either Party may terminate upon ninety (90) day written notice to the other Party; provided, however, that final payment to IERCD shall be paid pursuant to Section II.B, above.

V. DISPUTE RESOLUTION PROCEDURE. In the event of a disagreement between the Parties, both Parties will negotiate in a good faith to achieve the spirit and purpose of this MOA using the following procedures:

(a) The Parties will make every effort to expeditiously resolve any disagreements. If resolution cannot be accomplished promptly during regularly scheduled meetings and conference calls, a further attempt to reach resolution will be promptly attempted in an interim meeting or conference call dedicated to the purpose of resolving the disagreement.

(b) If the Parties cannot reach agreement on an issue related to this MOA after completing an interim meeting or conference, the Parties agree to elevate the decision to successively higher levels within each organization until consensus is reached.

VI. CHANGES OR MODIFICATIONS.

No part of this MOA may be modified, altered, amended, waived, or changed without the express written consent of the Parties hereto.

VII. NOTICE.

As used in this MOA, notice includes but is not limited to, the communication of any notice, request, demand, approval, statement, report, acceptance, consent, waiver and appointment. All notices must be in writing. Notice is given either (i) when delivered in person to the person or agency intended named below, (ii) when delivered via email with confirmation from the receiving Party via return email, (iii) when sent via USPS certified mail addressed by name and addressed to the Party or persons intended and considered delivered when confirmation of receipt is received; or (iv) when sent via reputable overnight courier (such as Federal Express), addressed by name and addressed to the Party or persons intended, as follows, until such time as a Party gives notice of a change of address in accordance with the terms of this section:

To CITY:
City of Ontario
303 East B Street
Ontario, CA 91764

Redlands, CA 92374
Attn: District Manager
Telephone: (909) 799-7407

Email: Sochoa@ontarioca.gov Email: mparkes@iercd.org

VIII. CONFLICT OF INTEREST.

No member, official or employee of the City or IERCD shall have any personal interest, direct or indirect, in this MOA nor shall any such member, official or employee participate in any decision relating to this MOA which affects his or her personal interests or the interest of any corporation, partnership or association in which he or she is directly or indirectly interested.

IX. NO THIRD PARTY BENEFICIARIES.

This MOA is made and entered into for the sole protection and benefit of the Parties hereto. No other person or entity shall have any right of action based upon the provisions of this MOA.

X. ASSIGNMENT.

This MOA shall not be assigned by either Party, either in whole or in part, without the prior written consent of the non-assigning Party. Any assignment or purported assignment of this MOA without the prior written consent of the non-assigning Party will be deemed void and of no force or effect.

XI. ENTIRE MOA.

This MOA embodies the entire agreement between the Parties hereto in relation to the subject matter hereof, and no other agreement or understanding, verbal or otherwise, relative to this subject matter exists between the Parties at the time of execution of this MOA.

IN WITNESS WHEREOF, the Parties have caused this MOA to be signed as of the date first above written.

Exhibit "A"

Settlement Agreement

[See Attached]

SETTLEMENT AND GENERAL RELEASE AGREEMENT

This Settlement and General Release Agreement ("Agreement") is made on the Effective Date defined herein and is by and between petitioners and appellants Endangered Habitats League, Inc. ("EHL") and Sierra Club, Inc. ("Sierra Club") (collectively "Petitioners"), and respondent City of Ontario ("Ontario" or "City"), a municipality organized under the laws of the State of California, all three of whom are collectively referred to as the "Parties," in connection with the settlement of any and all claims, demands, causes of action, obligations, damages, and liabilities of any kind that have arisen between the Parties.

RECITALS

A. On or about February 9, 1998, EHL commenced legal action against Ontario entitled Endangered Habitats League, Inc. v. City of Ontario et al., San Bernardino County Superior Court Case No. RCV 32616 (the "Action"). On March 13, 1998, Sierra Club joined EHL in filing a first amended petition for writ of mandate in the Action.

B. In the Action, Petitioners contested Ontario's approval in January 1998 of a general plan amendment (the "General Plan Amendment"), zoning changes and certification of a final environmental impact report ("Final EIR") involving 8,200 acres of land to the south of Ontario's current city limits and within Ontario's "sphere of influence," also referred to as Annexation Area 163 ("Annexation Area 163") as shown in the solid red-bordered, yellow shaded portion of the attached Exhibit "A." The Petitioners alleged that Ontario's actions and approvals on these matters, inter alia, violated the California Environmental Quality Act ("CEQA") and planning and zoning laws, including inconsistency with Ontario's existing General Plan ("General Plan"). Petitioners also alleged that Ontario violated Water Code sections 10910-10914 by not obtaining and disclosing pertinent public water system matters in the Final EIR. Ontario disputes all of Petitioners' contentions.

C. On or about March 16, 1999, San Bernardino County Superior Court Judge Jeffrey King denied Petitioners' first amended petition for writ of mandate in the Action. On or about April 8, 1999, Judge King issued a judgment and order to that effect.

D. On or about May 11, 1999, Petitioners filed a notice of appeal from Judge King's judgment and order in the Action. That appeal, No. E024964, is currently before the California Court of Appeal, Fourth District, Division 2 (the "Appellate Action").

E. Since the Petitioners filed their notice of appeal, the Parties have engaged in extensive settlement negotiations regarding the Appellate Action.

F. The purpose of this Agreement is to settle and release fully and completely all claims that Petitioners had, have, or may have against Ontario regarding: (1) the Action, (2) the Appellate Action, and (3) any present or future litigation involving development in Annexation Area 163, which conform to the terms of this Agreement, and make certain provisions for the further mitigation of environmental impacts attributable to Ontario's approval of the 1998 General Plan Amendment or future general plan amendments contemplated by this Agreement, as discussed herein.

G. Ontario has previously committed in the Final EIR prepared for the annexation of Annexation Area 163 and elsewhere to a comprehensive effort to protect the environment and maximize the conservation value of land set aside in Annexation Area 163. To that end, through the Final EIR and elsewhere (see Exhibit "B" attached hereto), Ontario has committed to achieving the following: (1) acquiring 145 acres within Annexation Area 163 as a Waterfowl and Raptor Conservation Area; (2) acquiring 160 acres of land or easements within the Chino Basin area to provide wetland and foraging habitat for waterfowl; and (3) coordinating with other governmental entities and making their best efforts in the Habitat Area to attempt to create an inter-jurisdictional plan pursuant to Senate Bill 831.

DEFINITIONS

"Advisory Committee" as used in this Agreement shall mean an advisory committee of stakeholders formed by the Parties pursuant to paragraph 5, below.

"Developable Acres" as used in this Agreement shall mean the actual net area to be developed, excluding only Publicly Dedicated Property. There are approximately 5,259 Developable Acres in Annexation Area 163 based on the current General Plan.

"Ecologically Functional Units" as used in this Agreement shall mean habitat with high or medium biological value or potentially high or medium biological value capable of sustaining species over the long term as a result of their size, location, conductivity, and/or edge effects as determined by a qualified biologist.

"Effective Date" as used in this Agreement shall mean the date on which the request for dismissal of the Appellate Action is filed with the court as provided in paragraph 19.

"Habitat Area" as used in this Agreement shall mean the area within the red and black-dashed border shown in Exhibit A, attached hereto, or other areas which the Land Trust finds to have a biologically functional relationship to waterfowl, Burrowing Owl or other raptors, Delhi Sands flower-loving fly, or other wildlife of the Chino Basin.

"Land Trust" as used in this Agreement shall mean a land trust, conservancy or other non-profit corporation or non-profit entity which is created or selected by the Parties to carry out the responsibilities, goals and objectives pertaining to mitigation of environmental impacts, as set forth in this Agreement, and any further responsibilities to which the Parties may mutually agree at a later time, and which shall be responsible for managing the mitigation as described in paragraphs 2 and 4, with oversight by the Parties.

"Livable Communities Policies" as used in this Agreement shall mean policies: (1) promoting a balance of land uses, "walkable" communities with mixed use community centers, pedestrian amenities with parks, trails and open spaces; and (2) encouraging more employment and related opportunities in proximity to residential development and mixed use activity clusters to allow potential opportunities for public transit and effective traffic circulation between residential and employment areas. The Parties agree that the current General Plan for Annexation Area 163 contains these policies as set forth in this definition.

"Mitigation Fee" as used in this Agreement shall mean a fee of two thousand dollars ($2,000) imposed on a per-acre basis on Developable Acres to be used for mitigation for potential future environmental impacts that may occur from development in Annexation Area 163. The Mitigation Fee amount may be revised upward by Ontario on its own initiative or at the request of any of the Parties or the Land Trust, but Ontario is not obligated at any time to change the Mitigation Fee amount. Ontario may revise the Mitigation Fee downward only if, and to the extent, it replaces any Mitigation Fee shortfall with separate funds.

"Publicly Dedicated Property" shall mean property dedicated to Ontario or any other public entity for schools, fire stations, public parks, public roads and streets, libraries, water well sites, or sewer treatment plants, or other comparable property dedicated or acquired for public uses or public purposes.

"Termination Date" as used in this Agreement shall mean the date on which Ontario determines in its sole and absolute discretion that full build out of all Developable Acres within Annexation Area 163 has occurred.

AGREEMENT AND RELEASE

NOW, THEREFORE, in consideration of the mutual covenants, promises and undertakings set forth herein, Petitioners and Ontario agree as follows:

1. Each recital set forth above is incorporated herein by reference and made a part of this Agreement.

2. The Parties agree that this Agreement is intended to address and provide mitigation for certain potential future environmental effects that could result from development occurring in Annexation Area 163. This Agreement is intended to cover potential environmental impacts in Annexation Area 163 to the Burrowing Owl, the Delhi Sands Flower-Loving Fly ("DSF"), raptor foraging and wildlife habitat, loss of open space, and actual and potential habitat and agricultural lands. This Agreement also covers other sensitive species, both listed and non-listed, that inhabit or may inhabit similar habitat in Annexation Area 163. To this end, the Parties agree to the measures ("Mitigation Measures") set forth below.

a. Ontario shall impose the Mitigation Fee on development of Developable Acres in Annexation Area 163 that requires discretionary approval or permitting from Ontario until the Termination Date. The Mitigation Fee shall be paid by the real property owner or developer on or before the time Ontario issues grading permits for development within Annexation Area 163. The Mitigation Fee shall not be required for discretionary approvals or permits issued under the Agricultural Overlay Ordinance.

b. Notwithstanding subparagraph (a) above, the City of Ontario will identify through CEQA review, and in consultation with DFG, lands occupied by Burrowing Owl and suitable as long-term habitat due to proximity to watercourses, flood control channels, proposed or active trails, or other planned or protected open space. In

such cases, Ontario will require avoidance of those lands necessary to maintain a viable territory and will require their maintenance for long-term habitat value through dedication in fee or grant of easement to the Land Trust. In determining the scope of the viable territory, the City may include contiguous lands which are permanently protected and suitably managed to maintain Burrowing Owl habitat. However, if the City determines that the application of the foregoing measures would result in an unconstitutional taking of private property under then-controlling judicial interpretations and the City's determination is substantiated by a written analysis from an independent expert in land use economics or other expert as appropriate under then-controlling judicial interpretations, who shall be selected by the City based upon the City's standard policies and practices for selecting experts with consideration of any input provided by the other parties, alternative measures for mitigating impacts on Burrowing Owl will be adopted in accordance with paragraph (c) below and through consultation with DFG. Any dedication made by a developer or other entity pursuant to the terms of this subsection may be in lieu of paying all or a portion of the Mitigation Fee set forth in subsection "a" above on those acres conserved, in accordance with this Paragraph.

c. Notwithstanding subsection "a" above, if Burrowing Owl individuals are found on a proposed development site and the site is not viable long-term habitat as determined by Ontario, the developer shall pay the Mitigation Fee and make provisions for the relocation of the Burrowing Owl individuals in a manner consistent with DFG guidelines and protocols.

d. The Parties acknowledge that habitat that benefits DSF can be expected to benefit Burrowing Owl, therefore up to 25% of the Mitigation Fee may be used for the recovery of DSF at Ontario's sole discretion. This percentage may change upon agreement of the Parties.

e. All Mitigation Fees collected shall be utilized for the purposes set forth in paragraphs 2 and 4(b), and may be used to: (1) purchase real property, conservation easements or other land use encumbrances with long-term conservation value for environmental impacts referenced in paragraphs 2 and 4; (2) enhance or restore lands with such values; (3) maintain and operate such lands; and (4) pay for related administrative duties. The amount dedicated to the administrative costs of such property shall not exceed ten percent (10%) of the total Mitigation Fees, unless approved by the Advisory Committee.

f. Real property or easements dedicated, conveyed or purchased to benefit wildlife, waterfowl, raptors and/or Burrowing Owls must have long-term conservation value for those species and must be managed by the Land Trust for their benefit. Such parcels must be located within the Habitat Area. Fee title, conservation easements, and/or long-term management agreements are appropriate legal mechanisms for advancing the environmental protections contemplated by this Agreement. Such property and easements shall be managed by the Land Trust. Examples of acceptable property are those adjacent to known habitat along flood

control channels (e.g., Cucamonga Creek), occupied or suitable lands within the Habitat Area, occupied or suitable uplands contributing to the functional value of wetlands and riparian habitat along the Santa Ana River or its tributaries, and habitat which is also beneficial to the DSF. Examples of unacceptable property are those that would otherwise be purchased by another entity or group as open space mitigation for environmental impacts. At the discretion of the Land Trust, the Mitigation Fee may be used to restore or enhance such property to contribute to long-term conservation values.

3. The Mitigation Fees shall be imposed until the Termination Date. Subject to Ontario's right to retain up to 25% of any Mitigation Fees collected to promote the recovery of DSF (see paragraph 2(d) above), any Mitigation Fees paid to Ontario shall be placed in their entirety in a separate, interest-bearing account managed by Ontario until the Land Trust is created, at which time all funds in the account shall be managed by the Land Trust, less fees retained by Ontario. Ontario shall be reimbursed for its actual and reasonable costs associated with any required annual accounting activities of the fund or any other required management costs.

4. In order to enhance the biological impact mitigation imposed as part of the Final EIR, the City may amend the General Plan, subject to appropriate CEQA review and other applicable legal requirements, to modify provisions for the 145-acre onsite Waterfowl and Raptor Conservation Area ("WRCA") in the manner described herein. In lieu of establishing the on-site WRCA, in whole or part, as provided in the Final EIR, the City may make the following alternative provisions for mitigation.

a. The City shall determine the area to be removed from the WRCA and for each such acre shall provide funding at the rate of forty thousand dollars ($40,000) per acre for mitigation of wildlife impacts outside of Annexation Area 163 ("Offsite Mitigation"). For this purpose, the City shall establish an impact fee or other mechanism for generating revenue. The City may include in this mechanism the generation of funding, at the same rate, to cover preservation of the 160 acres of offsite mitigation lands specified in the Final EIR, for a total of up to 305 acres of Offsite Mitigation. Responsibility for payment shall be borne by development within Annexation Area 163 under the 1998 General Plan Amendment. The funding mechanism shall be established before issuance by the City of any grading permit for any such development. Payment of a proportionate share of the Mitigation Fee shall be a prerequisite to any disturbance of an affected development site which requires a grading permit. The city shall collect the mitigation funding and make it available for Offsite Mitigation purposes at a rate equal to the proportionate share of development of Developable Acres. Funds collected by the City shall be managed by the Land Trust, and prior to establishment of the Land Trust, shall be handled by the City as set forth in paragraph 3.

b The Land Trust shall be the entity responsible for acquiring and administering the Offsite Mitigation as well as the other properties addressed in this Agreement. In addition to the provisions of paragraph 5, below, concerning operation of the

Land Trust, the following goals and objectives shall govern implementation of the Offsite Mitigation by the Land Trust.

i. The Land Trust activities should emphasize preservation of wildlife values similar to those which will be directly impacted by development of Annexation Area 163, with particular emphasis on habitat for Burrowing Owl and other raptors, waterfowl, and riparian species.

ii Habitat values can be protected through acquisition of real property in fee, easements, or other appropriate legal mechanisms for long-term protection, as well as through restoration, enhancement, and maintenance of habitat values on land otherwise protected from development. Provision should be made for long-term maintenance of habitat values on sites protected by the Land Trust.

iii. Offsite Mitigation lands should be within the Habitat Area or in nearby areas where biological values bear a functional relationship to wildlife of the Habitat Area.

iv. To the maximum extent practicable, Offsite Mitigation areas should be areas of contiguous acreage and comply with the definition of Ecologically Functional Units set forth above.

c. Petitioners will not oppose amendments to the General Plan and/or Final EIR carried out in accordance with this paragraph 4 and will not initiate or join any litigation challenging the implementation of the Offsite Mitigation in accordance with this paragraph. In any such litigation, EHL agrees to provide an amicus brief in support of Ontario's position electing to move a portion or all of the WRCA off site and in implementing the Offsite Mitigation program. Provisions not to initiate or join in any litigation challenging the Offsite Mitigation program will be included in letters to be provided by Pomona Valley Audubon Society and TriCounty Conservation League. This provision is in addition to the requirements set forth in paragraph 12.

d. Prior to its formal actions to amend the General Plan to provide for Offsite Mitigation and to establish a funding mechanism for that purpose, Ontario shall, in addition to all required public notice and participation requirements of CEQA, notify Petitioners of these proposed actions.

5. The Parties shall form the Advisory Committee within 90 days of the Effective Date. The Advisory Committee shall be composed of two representatives appointed by Ontario, two representatives appointed by Petitioners, and one representative appointed by the already named representatives. The Advisory Committee shall oversee creation or selection of the Land Trust. The Land Trust shall be charged with carrying out the responsibilities described in this Agreement concerning mitigation of environmental impacts. The Land Trust shall be accorded flexibility in carrying out its duties; provided, however, that the Land Trust shall act in a fiscally responsible and professional manner in connection with all of its activities under this Agreement. The Advisory Committee shall attempt to select an existing land trust or conservation entity to

conduct the activities and responsibilities set forth for the Land Trust in this Agreement. Such existing land trust or conservation entity will preferably be local to the area and experienced in acquiring and managing conservation or mitigation property. If an existing land trust or conservation entity cannot be selected within a reasonable period of time, the Parties may oversee the creation of a land trust. Upon final approval of the Land Trust by the Advisory Committee, the Advisory Committee shall cease to exist and any responsibilities given to it by this Agreement shall be immediately assumed by the Board of Directors of the Land Trust. The Land Trust and its functions may be merged with or relinquished to any other program specifically designed to protect the environment at any time so as to most efficiently and comprehensively achieve the goals of this Agreement. If the Land Trust is merged with or relinquished to any other program at a time when the Advisory Committee no longer exists, such merger or relinquishment shall be subject to the Parties' approval.

6. If the Land Trust cannot, does not or can no longer carry out its responsibilities under this Agreement in conformance with the requirements, goals and objectives listed above, the Parties shall, at the request of any Party, reconvene the Advisory Committee to identify causes of the nonperformance and prescribe remedial changes. Such changes may include reformation or termination of the Land Trust, replacement of it with another similar entity, or transfer of its responsibilities to the City of Ontario. Any successor entity, whether it be another land trust or conservation entity, or Ontario itself, shall be responsible for carrying out the requirements, goals and objectives for the Land Trust set forth in this Agreement.

7. For every residential, commercial, industrial or other development project in Annexation Area 163 requiring discretionary approval or permitting, Ontario shall require the real property owner or developer to conduct a biological habitat assessment and when appropriate, biological surveys pursuant to formally adopted protocols, by qualified biologists or pursuant to any subsequently adopted Habitat Conservation Plan or a similar planning mechanism as part of a subsequent CEQA environmental review process. Where appropriate, these assessments shall determine whether species listed as threatened or endangered or of special concern after this Agreement has been fully executed are present on the real property proposed to be developed.

8 If changing pedestrian use, mixed use, or compact community design attributable to a particular project causes average daily vehicle trips in Annexation Area 163 to substantially increase beyond those identified in the General Plan and Final EIR, and significant new environmental impacts would thereby result as determined by Ontario, Ontario shall require supplemental environmental review prior to approving the project.

9. Any specific plans approved by Ontario in Annexation Area 163 shall be consistent with the General Plan and the purposes of "Livable Communities Policies" as defined in this Agreement.

10. As specific plans are submitted to Ontario regarding Annexation Area 163, Ontario agrees to allow Petitioners and others the opportunity to consult with Ontario regarding feeder routes from activity centers to transit stations in Annexation Area 163, including any funding proposals to address regional transportation needs. The actual location of such feeder routes shall be determined by Ontario in its sole discretion as afforded by law.

11. Nothing in this Agreement shall be construed to permit real property owners and developers in Annexation Area 163 to disregard the development conditions set forth in the General Plan as it may be amended from time to time, the Final EIR, and related Ontario City Council findings.

12. a. In exchange for the commitments set forth herein, Petitioner EHL and its officers and directors hereby release and forever discharge Ontario and its predecessors, successors, assigns, officers, directors, shareholders, employees, designated agents, designated representatives, attorneys, insurers, and reinsurers and any person claiming by or through any of them ("Released Parties") from any and all of Petitioner EHL's claims, demands, liabilities, obligations, causes of action, damages, judgments, payments, attorneys' fees and costs, both known and unknown, which Petitioner EHL may now have or might hereinafter have against Released Parties involving the Final EIR and/or implementation of the General Plan Amendment, zoning changes, specific plans, tract maps, subdivision maps, site plan approvals and any other development-related approvals made by Ontario, regarding Annexation Area 163 which authorize a use or uses of land which is listed in Table 3-3 of the General Plan Amendment (attached as Exhibit "C") and which is consistent with this Agreement, which arose out of, relate to or are the subject of the Action and the Appellate Action, or which were asserted or which could have been asserted in the Action or the Appellate Action. By carrying out the actions specified in this paragraph 12, Petitioner EHL will make known its support for the terms of this Agreement and the City's development of Annexation Area 163 in accordance with this Agreement.

i. With respect to any future litigation which challenges a project within Annexation Area 163 on grounds of inadequate mitigation of environmental impacts, EHL will, upon request of Ontario, and subject to the funding provisions stated hereinafter, prepare and submit for filing in Superior Court an amicus brief supporting the adequacy of the mitigation measures in the Final EIR as certified in January 1998, and as modified pursuant to this Agreement, in conjunction with the provisions of this Agreement. EHL shall bear the cost of any such amicus brief which is filed in connection with an action brought by an organization whose primary purpose is conservation. For any lawsuit filed by any other person or organization, the obligations of EHL respecting an amicus brief shall apply only if funding adequate for preparing and filing the brief is provided by or through Ontario.

ii. With respect to any proposed development project or specific plan within Annexation Area 163, EHL will, within 30 days of receiving a request from the City, send the letter attached as Exhibit "D" to any person, organization or group challenging a project on environmental grounds.

b. In exchange for the commitments set forth herein, Petitioner Sierra Club, Inc., and its officers and directors hereby release and forever discharge the Released Parties from any and all of this Petitioner's claims, demands, liabilities, obligations, causes of action,

damages, judgments, payments, attorneys' fees and costs, both known and unknown, which were asserted or could have been asserted in the Action or the Appellate Action.

c. With respect to any future litigation which challenges a project within Annexation Area 163 on grounds of inadequate mitigation of environmental impacts, the Land Trust will, at the request of Ontario, prepare and submit for filing in Superior Court an amicus brief supporting the adequacy of the mitigation measures in the Final EIR as certified in January 1999.

d. If, in the future, any one or more of the Petitioners, or any of their predecessors, successors, assigns, officers, directors, shareholders, employees, designated agents, designated representatives, insurers, or reinsurers or any person claiming by or through any of them, files in any court of law a claim, demand, liability, obligation, cause of action, claim of damage or any other form of claim: (1) (A) challenging the City's approval of a general plan amendment, zoning change, specific plan, tract map, subdivision map, site plan or any other development project within Annexation Area 163, or (B) challenging the receipt of any such development approval by an individual developer, property owner, or public agency within Annexation Area 163, or such developer's, owner's, or agency's construction or other activities which have been permitted to proceed under such approval; and (2) (A) any such claim, etc., (i) challenges compliance of the City approval with requirements of the California Environmental Quality Act, (ii) contends that the approval authorizes a use or uses of land not listed in Table 3-3 of the General Plan Amendment (attached as Exhibit "C"), or (iii) fails to require mitigation of impacts on habitat and agricultural values in accordance with this agreement, or (B) such claim contends that an individual development project within Annexation Area 163 is not in compliance with the requirements set forth in this Agreement, then the measures set forth in remainder of this paragraph shall be followed. The City shall continue to collect the Mitigation Fees and Offsite Mitigation fees for the challenged action/project. However, any such fees collected shall not be placed in the interest-bearing account discussed in Paragraphs 3 and 4 of this Agreement nor forwarded to the Land Trust. Instead, the City shall place any such Mitigation Fees and Offsite Mitigation fees collected pursuant to the terms of this subsection into a separate interest-bearing escrow account ("Escrow Account") administered by the City. Mitigation Fees and Offsite Mitigation funds so collected shall remain in the Escrow Account pending judicial or other resolution of the challenge. If judicial or other resolution of the challenge determines that mitigation measures other than those set forth in this Agreement must be implemented, funds contained in the Escrow Account may, at the discretion of the City, be redirected for use in implementing such new or different mitigation measures. If the City does not redirect the funds as described, or if any such challenge is unsuccessful, funds in the Escrow Account shall be distributed according to the provisions of Paragraphs 2, 3 and 4 of this Agreement. In any event, Ontario shall be reimbursed from the escrow proceeds for its actual and reasonable costs associated with any required annual accounting activities of the Escrow Account or any other required management costs.

e. The releases from litigation contained in this Paragraph shall not apply, and Petitioners shall retain the right to bring suit against Ontario or any of the afore-named entities, for any proposed project in Annexation Area 163 which an arbitrator determines pursuant to paragraph 17 deviates substantially from the purposes of the "Livable Communities Policies" as defined above, or which an arbitrator determines pursuant to paragraph 17 deviates

substantially from the mitigation provisions of this Agreement as set forth in paragraphs 2 through 5 above.

13. a. Petitioner EHL, on behalf of its predecessors, successors, assigns, officers, directors, shareholders, employees, designated agents, designated representatives, attorneys, insurers, and reinsurers and any person claiming by or through any of them agrees and covenants that it will not institute or join in any way, including the filing of amicus briefs, any new lawsuit which is based on any claims, demands, liabilities, obligations, causes of action, damages, judgments, payments, attorneys' fees and costs, both known and unknown, which Petitioner EHL may now have or might hereinafter have against Ontario involving: (i) the Final EIR and/or implementation of the General Plan Amendment, zoning changes, specific plans, tract maps, subdivision maps, site plan approvals and any other development-related approvals made by Ontario, consistent with this Agreement, which claims, demands, etc. arose out of, relate to or are the subject of the Action and the Appellate Action or which were or could have been asserted in the Action or Appellate Action and are released or resolved by this Agreement, or are in derogation of this Agreement, and (ii) for a period of 30 years from Ontario's approval of the General Plan Amendment (January 7, 1998), or until the Termination Date of this Agreement, whichever occurs first, specific plans, tract maps, subdivision maps, site plan approvals or any other land use decision by Ontario regarding Annexation Area 163 which authorize a use or uses of land which is listed in Table 3-3 of the General Plan Amendment (attached as Exhibit "C") and which is consistent with this Agreement, unless an arbitrator determines pursuant to paragraph 17 that such land use decision is not consistent with this Agreement. Ontario, on behalf of itself, its respective past and present City Council members, mayors, predecessors, successors, assigns, officers, directors, shareholders, employees, designated agents, designated representatives, attorneys, insurers, and reinsurers and any person claiming by or through any of them do hereby fully, finally, and forever release and discharge Petitioner EHL and its respective predecessors, successors, assigns, officers, directors, shareholders, employees, designated agents, designated representatives, attorneys, insurers, and reinsurers and any person claiming by or through any of them from any and all of Ontario's claims arising from the facts, actions, omissions or events which arose out of or relate to the Action.

b. Petitioner Sierra Club, Inc., on behalf of its predecessors, successors, assigns, officers, directors, shareholders, employees, designated agents, designated representatives, attorneys, insurers, and reinsurers and any person claiming by or through any of them agrees and covenants that it will not institute or join in any way, including the filing of amicus briefs, any new lawsuit which is based on claims, demands, liabilities, obligations, causes of action, damages, judgments, payments, attorneys' fees and costs, both known and unknown, which were or could have been asserted in the Action or Appellate Action and are released or resolved by this Agreement. Ontario, on behalf of itself, its respective past and present City Council members, mayors, predecessors, successors, assigns, officers, directors, shareholders, employees, designated agents, designated representatives, attorneys, insurers, and reinsurers and any person claiming by or through any of them do hereby fully, finally, and forever release and discharge Petitioner Sierra Club, Inc., and its respective predecessors, successors, assigns, officers, directors, shareholders, employees, designated agents, designated representatives, attorneys, insurers, and reinsurers and any person claiming by or through any of them from any and all of Ontario's claims which have been or could have been asserted on the basis of the Action or the Appellate Action.

14. The Parties acknowledge that nothing in this Agreement is intended to or shall operate as a limit upon the Ontario's City Council's legislative discretion and right to amend, adopt, supercede and modify those land use, planning, zoning and development standards to be applied within Annexation Area 163. Without limiting the generality of the foregoing, Petitioners acknowledge that, except as otherwise provided in this Agreement, Ontario has the right, without modifying or releasing Petitioners from any of their covenants or obligations hereunder, to amend the General Plan as the Ontario City Council may deem, in its legislative discretion, appropriate, desirable, and/or necessary; provided, however, that Ontario shall comply with all statutorily and judicially required prerequisites to amendment of the General Plan, and, provided further, any amendment of the General Plan and any ordinances, procedures or agreements for implementing the General Plan shall provide for full and timely implementation of paragraphs 2 through 5 of this Agreement concerning mitigation of environmental impacts as specified therein.

15. The Parties represent and warrant that they have not assigned or transferred, or purported to assign or transfer, and shall not hereafter assign or transfer, any obligations, liabilities, demands, claims, costs, expenses, debts, controversies, damages, actions, and causes of action released pursuant to this Agreement. The Parties also agree to indemnify and hold one another harmless against any obligation, liability, demand, claim, cost, expense (including but not limited to attorneys' fees incurred), debt, controversy, damage, action or cause of action based on, arising out of or in connection with any such transfer or assignment or purported transfer or assignment.

16. This Agreement shall in no way affect or limit Ontario's right and ability to approve real property development or other projects outside of Annexation Area 163 now or in the future.

17. Any dispute or controversy arising out of, under, or in connection with this Agreement and any amendments thereto, or the breach thereof, shall be submitted to binding arbitration in accordance with the following procedures: A Party desiring arbitration shall give written notice to the other Party of the controversy to be submitted to arbitration. The Parties shall agree to an arbitrator within 15 days thereafter or shall cause an arbitrator to be appointed pursuant to the California Arbitration Act, sections 1280 through 1294.2 of the Code of Civil Procedure. The matter shall be submitted to the arbitrator chosen by the Parties within 60 days, and the arbitrator shall decide the matter within 15 days of the conclusion of the arbitration. The Parties to the arbitration shall each pay an equal share of the arbitrator's fees. The Parties agree to bear their own costs of arbitration, including attorneys' fees. Any statute of limitations applicable to any cause of action submitted to the arbitrator shall be tolled from the date the demand for arbitration is made until the date the arbitrator reaches a final decision.

18. With regard to the matters being released herein, Petitioners waive the provisions of Section 1542 of the California Civil Code, and any other similar statute, rule or case law. Section 1542 provides as follows:

> A general release does not extend to claims which the creditor does not know or expect to exist in his favor at the time of executing a

release, which if known by him must have materially affected the settlement with the debtor.

19. Within ten (10) business days of receipt of a final version of the Agreement, Petitioners shall fully execute the Agreement and direct and cause their attorneys of record to fully execute a request for dismissal with prejudice of the Appellate Action in its entirety, and return these fully executed documents to Ontario. Within two (2) business days of receipt of the fully executed Agreement and request for dismissal, Ontario shall fully execute the Agreement and file the request for dismissal.

20. The Parties shall bear their own respective costs and attorneys' fees in the Action and Appellate Action, including the cost bill currently pending before the San Bernardino County Superior Court, Case No. RCV 32616.

21. Nothing in the Agreement shall be construed as an admission of any type by any Party.

22. This Agreement shall be binding upon and for the benefit of the Parties and their respective successors, devisees, affiliates, representatives, assigns, officers, directors, agents and employees wherever the context requires or admits.

23. Each of the Parties affirmatively represents that it has been represented throughout by attorneys at law of its own choosing. Each Party has read the Agreement and has had the terms used herein and the consequences thereof explained by its attorneys of choice. The Agreement is freely and voluntarily executed and given by each Party after having been apprized of all relevant information and data furnished by its attorneys of choice. Each party in executing the Agreement does not rely upon any inducements, promises or representations made by any other Party except as set forth herein.

24. This Agreement constitutes the entire agreement between the Parties for the settlement and release of all Petitioners' claims, demands, liabilities, obligations, causes of action, damages, judgments, payments, attorneys' fees and costs, both known and unknown, which Petitioners may now have or might hereinafter have against Ontario involving the Final EIR and/or implementation of the General Plan Amendment and zoning changes, or future development projects in Annexation Area 163 consistent with this Agreement which arose out of, relate to or are the subject of the Action and the Appellate Action and Ontario's claims arising from the facts, actions, omissions or events which arose out of or relate to the Action and supersedes all prior or contemporaneous agreements and understandings between them or anyone or more of them. It is expressly understood and agreed that this Agreement may not be altered, amended, modified or otherwise changed in any respect whatsoever except by writing duly executed by authorized representatives of the Parties.

25. This Agreement shall in all respects be interpreted and enforced and governed by and under the laws of the State of California.

26. Except as provided in this paragraph, if any term of this Agreement be rendered unlawful by state or federal judicial or state or federal legislative action, by action of a state or

federal wildlife agency or by action of the United States Army Corps of Engineers or the United States Bureau of Reclamation, that provision shall be severed and the remaining terms shall continue to be valid and fully enforceable. The foregoing severance provision shall not apply to the provisions of paragraphs 2 and 3 which establish the Mitigation Measures and require payment of mitigation fees, nor to the provisions of paragraph 4 which establish the Offsite Mitigation and require payment of impact fees. If the cited provisions of paragraphs 2, 3, or 4 are rendered unlawful, or if implementation of any mitigation provision of those paragraphs is rendered unlawful by state or federal judicial or state or federal legislative action, by action of a state or federal wildlife agency or by action of the United States Army Corps of Engineers or the United States Bureau of Reclamation, the Parties shall attempt jointly to identify substitute provisions for achieving the purposes of this Agreement. If the Parties are unable to agree upon a mutually acceptable reformation of the Agreement, it shall be terminated in its entirety.

27. Each Party has cooperated in the drafting and preparation of this Agreement. The Agreement shall not be construed against any Party on the basis that such Party drafted the Agreement or any provision thereof.

28. Each of the undersigned signing on the behalf of a party warrants that he or she is authorized to sign for and by such party.

29. The Parties may execute duplicate originals of this Agreement or any documents they are required to sign or furnish pursuant to this Agreement.

Mr. Dan Silver
Endangered Habitat League
8424-A Santa Monica Boulevard #592
Los Angeles, CA 90069

Subject: Biological Mitigation – SOI General Plan Amendment EIR

Dear Mr. Silver:

This is to clarify the City's commitment to acquire land as mitigation for biological resources in the New Model Colony area (formerly Sphere of Influence). Following outlines our understanding of mitigation measures adopted by the EIR for the Sphere of Influence General Plan Amendment:

1. Intent to acquire a minimum of 160 acres of land in the El Prado Basin for wetlands and foraging habitat for waterfowl to offset the discontinued use of dairy manure water retention basins (Policy 18.1, SOI General Plan, p. 6-23; EIR p. 5.8-16).

2. Intent to acquire land to establish an on-site "Wildlife Habitat" or WRCA in the areas adjacent to the Chino Basin Flood Control Ponds located to the south of Chino Avenue, west of Archibald Avenue, north of Schaefer and east of Whispering Lakes Lane consisting of approximately 145 acres adjacent to the 85 acres of existing county-owned detention basins (Policy 18.1.1 SOI General Plan p. 6-23; EIR p. 5.8-16).

Implementation of the above measures is in addition to conditions outlined in the draft settlement currently in negotiation between the City and the Sierra Club/Endangered Habitat League. Lands to be acquired will be managed by a conservancy similar to language discussed in settlement.

Re: Proposed _____Project *[or Specific Plan]* in Ontario

Dear _____:

We write concerning the *[_____ project or specific plan]* which is being proposed in the *[area of]* the City of Ontario. We understand that the__*[group name]* may oppose this project on grounds that it would create environmental impacts [*optional: designate some specific impacts at issue*] that would not be adequately mitigated. We want to make you aware of the Endangered Habitat League's historic interest and involvement in development issues affecting this area and the reasons which have led us not to oppose this *[project or specific plan].*

In 1998 the Endangered Habitats League filed a lawsuit which challenged the City of Ontario's approval of a general plan amendment and related environmental impact report for annexation and urbanization of 8,200 acres of primarily farm land south of the City. The area included the site of the proposed *[project or specific plan].* Issues raised by the litigation included impacts on wildlife, open space, and farmlands and mitigation of those impacts. The San Bernardino County Superior Court upheld the City's approvals, and the plaintiffs appealed.

Before the appeal was decided, the City and Endangered Habitats League jointly worked out a program for substantially augmenting existing City provisions for mitigation of impacts on wildlife and open space values as well as farm lands. The centerpiece of the plan was institution of a land trust program for acquiring, enhancing and protecting, and maintaining in perpetuity lands in the area which provide the wildlife or farming values that existed in the annexation area. The program is funded by mitigation fees imposed by the City as a condition of development approval in the annexation area. Build-out of this 8,200-acre area over the years is expected to generate in excess of $10,000,000. It will be used to secure long-term protection of habitat and farm lands that would otherwise be developed or to enhance habitat values of existing protected open space.

This mitigation plan was incorporated into an agreement to settle the litigation. The settlement agreement binds the City to require payment of the development

mitigation fees and carry out the mitigation program throughout the time the 8,200 acres is under development. The agreement also reflects the belief of the Endangered Habitats League then and now that the development anticipated by the amended general plan, when carried out in combination with the mitigation fee program and other provisions of the settlement agreement, provides mitigation which is both appropriate and sufficient in the context of this urban edge area.

For these reasons, we urge you to make the same determination that the Endangered Habitats League has made in support of the terms of the settlement agreement, and therefore not oppose the *[_____project or specific plan]*.

Sincerely,

[name of Endangered Habitats League official]

CITY OF ONTARIO *Agenda Report* **November 21, 2023**	**SECTION:** **CONSENT CALENDAR**
Department: Information Technology Prepared By: Samantha Robles Staff Member Presenting: Colin Fernandes, Executive Director Information Technology Approved By:	Submitted To: Council/OHA Approved: _____ Continued To: _____ Denied: _____ Item No: 4

SUBJECT: **AN AGREEMENT WITH HEXAGON SAFETY & INFRASTRUCTURE FOR THE PURCHASE OF A NEW COMPUTER AIDED DISPATCH (CAD) SYSTEM, AND AMENDMENT NO. 4 WITH NATIONAL PUBLIC SAFETY GROUP**

RECOMMENDATION: That the City Council take the following actions:

A. Authorize the City Manager or his designee to execute a five (5) year Agreement with Intergraph Corporation, a Delaware corporation, by and through its Hexagon Safety & Infrastructure division, with its principal place of business in Madison, Alabama, for public safety computer aided dispatch (I/CAD) software and recurring annual maintenance fees in the amount of $3,179,468;
B. Authorize the City Manager or his designee to execute a Professional Services Agreement with Hexagon for project implementation and training services for the public safety computer aided dispatch platform in the amount of $2,006,648, including a 10 percent implementation contingency of $182,423, for a total contract not-to-exceed amount of $5,186,116; and
C. Authorize the City Manager or his designee to execute Amendment No. 4 to the current Agreement with National Public Safety Group (NPSG), LLC, of Aberdeen, North Carolina, for system selection, procurement, and project management in the amount of $586,415, for a total contract not-to-exceed amount of $963,634; and
D. Authorize the City Manager or his designee to execute $1,000,000 for project hardware and implementation contingency expenses.

THE FOLLOWING COUNCIL GOALS ARE BEING ACHIEVED:
Operate in a Businesslike Manner

FISCAL IMPACT: Hexagon software license, recurring maintenance and professional services, travel, training, and project contingency required to transition the City's computer-aided dispatch (CAD) to Hexagon I/CAD Dispatch is for a total contract not-to-exceed of $5,186,116, which includes ongoing annual software licensing and maintenance of $1,617,506 for year one, $362,394 for year two, $380,513 for year three, $399,539 for year four, and $419,516 for year five, $1,824,225 for I/CAD Custom Interface, and I/Cad Project Services, a 10% project contingency for I/CAD Custom

Interface, and I/Cad Project Services for $182,423;

NPSG professional services required to transition the City's computer-aided dispatch (CAD) to the Hexagon I/CAD Dispatch in the amount of $586,415 for consulting services and project management, with a total contract not-to-exceed amount of $963,634;

Project hardware and implementation contingency expenses not-to-exceed $1,000,000.

Professional services compensation is based upon actual time expended and reimbursement of expenses. Appropriations for the project implementation have been included in the Approved Budget for Fiscal Year 2023-24. If approved, appropriations will be added to the future years' budgets consistent with the annual budget adoption process.

BACKGROUND & ANALYSIS: The Computer-Aided Dispatch (CAD) system, utilized by City of Ontario Public Safety dispatchers in our Police and Fire Communication centers, is used to prioritize and record incident calls, identify the status and location of responders in the field, and effectively dispatch responder personnel. Public Safety responders in the field can receive messages initiated by CAD systems via their Mobile Data Computers (MDCs), radios, and cell phones. The City's current Public Safety Computer Aided Dispatch system, Central Square Total Command CAD, was purchased and implemented over 19 years ago. The system is out dated and runs on older equipment that doesn't quickly scale as the demand for communications increases.

On November 2022, the City issued an RFP to solicit proposals for a public safety platform. After receiving six competitive bids, Hexagon's HxGN I/CAD Dispatch was selected to replace the current system. Hexagon is very configurable, which allows Ontario Fire and Ontario Police to have different settings and filters to help first responders best do their job specifically for their responsibilities – working Fire, Police, or EMS – Call taking, Dispatching, Radio Operator. This equates to faster response times to get a first responder to a call for service faster, which further equates to increased officer and public safety. Hexagon will allow for automated vehicle dispatching to ensure that the closest, most appropriate unit is dispatched on the calls for service. In addition, the City has partnered with the National Public Safety Group (NPSG), a consulting firm in the public safety software market, for several years, and NPSG has an in-depth understanding of our requirements at Ontario Fire and Ontario Police. NPSG will provide project management consulting throughout the project. Staff requests City Council award the Agreement to Hexagon AB and approve the Amendment with NPSG.

CITY OF ONTARIO
PROFESSIONAL SERVICES AGREEMENT

1. PARTIES AND DATE.

This Agreement is made and entered into this _____ day of _____, 20___ (the "Effective Date"), by and between the City of Ontario, a municipal corporation organized under the laws of the State of California with its principal place of business at 303 East "B" Street, Ontario, California 91764-4196, County of San Bernardino, State of California ("City") and INTERGRAPH CORPORATION, a Delaware corporation, by and through its Hexagon Safety & Infrastructure division, with its principal place of business at 305 Intergraph Way, Madison, Alabama 35758 ("Consultant" or "Hexagon"). City and Consultant are sometimes individually referred to herein as "Party" and collectively as "Parties."

2. RECITALS.

2.1 Consultant.

Consultant desires to provide the services and software licenses described in Exhibit A: Statement of Work on the terms and conditions set forth in this Agreement. Consultant represents that it is experienced in providing public safety software and related services to public clients and is authorized to transact business in the State of California and is familiar with the plans of City.

2.2 Project.

City desires to engage Consultant to render such software licenses and professional services for a Public Safety Computer Aided Dispatch and Mobile Data System ("System") as set forth in this Agreement.

3. TERMS.

3.1 Scope of Services and Term.

3.1.1 General Scope of Services. Consultant promises and agrees to furnish to the City the professional services to perform Consultant's obligations and provide the software described in that certain Statement of Work attached hereto as Exhibit "A" and incorporated herein by reference ("Services"). All Services shall be subject to, and performed in accordance with, this Agreement, the exhibits attached hereto that are incorporated herein by reference, and all applicable local, state and federal laws, rules and regulations. To the extent a new law, rule, or regulations are promulgated after the Effective Date that materially affects the scope set forth in Exhibit A, then the Parties will address such material change through a Change Order.

3.1.2 Term. The term of this Agreement shall be from the Effective Date until one (1) year after Cutover of I/CAD (as described in Exhibit A) unless earlier terminated as provided herein. Consultant and City agree to timely perform their obligations under this Agreement as provided in the then current project schedule approved by both Parties. The Parties may, by mutual, written consent, extend the term of this Agreement if necessary to complete the Services.

3.2 Compensation.

3.2.1 Compensation. Consultant shall receive compensation, including authorized reimbursements, for all Services rendered under this Agreement at the rates set forth in Exhibit "C" attached hereto and incorporated herein by reference. The total compensation shall not exceed the costs expressed in Exhibit "C" without written approval of the City Council or City Manager, as applicable. Extra Work may be authorized through, and only through, a change order or amendment, as described below, and if authorized, will be compensated at then current rates.

NOTE: Annual Maintenance or Subscription fees cannot be increased more than 3% annually.

3.2.2 Payment of Compensation. Consultant shall submit to City an invoice in compliance with Exhibit "D" which indicates the payment milestone completed in accordance with the Task Acceptance Process, described in the Statement of Work (Exhibit A). The prices listed in Exhibit C are exclusive of applicable sales/use tax. To the extent sales/use tax applies to this Contract, applicable tax will be added to each payment invoice, which the City shall pay within 30 days of receiving such invoice provided the City has not disputed the invoice as provided herein. By execution of this Agreement and completion of the Task Acceptance Process, the City approves the invoicing of such payments up to the amount specified in Exhibit C. If the City disputes any of Consultant's fees, the City shall give written notice to Consultant within twenty-one (21) days of receipt of an invoice of any disputed fees set forth therein, except where some work cannot be determined to be successfully operational until the System is in live operation. Payment shall not constitute acceptance of any Services

completed by Consultant. The making of final payment shall not constitute a waiver of any claims by the City for any reason whatsoever.

3.2.3 Reimbursement for Expenses. Consultant shall not be reimbursed for any expenses unless authorized in writing by City, or included in Exhibit "C" of this Agreement except for sales/use tax as provided above.

3.2.4 Extra Work. At any time during the term of this Agreement, City may request that Consultant perform Extra Work. As used herein, "Extra Work" means any work which is determined by City to be necessary for the proper completion of the Project, but which the Parties did not reasonably anticipate would be necessary at the execution of this Agreement. Consultant shall not perform, nor be compensated for, Extra Work without written authorization from the City. Moreover, Consultant is not obligated to perform Extra Work unless it consents to performing the Extra Work, which consent shall be exclusively determined by its execution of a change order or amendment that contemplates or includes the Extra Work. In no event shall Extra Work be included within the scope of this Agreement or Exhibit A or otherwise be binding on either Party unless such Extra Work has been memorialized in a mutually executed change order or amendment.

3.3 Responsibilities of Consultant.

3.3.1 Independent Contractor; Control and Payment of Subordinates. The Services shall be performed by an employee of Consultant or its subcontractors. Consultant will determine the means, methods and details of performing the Services subject to the requirements of this Agreement. City retains Consultant on an independent contractor basis and not as an employee. Any personnel performing the Services on behalf of Consultant shall not be employees of City and shall at all times be the Consultant's employee, under the Consultant's exclusive direction and control. Neither City, or any of its officials, officers, directors, employees or agents shall have control over the conduct of Consultant or any of Consultants officers, employees or agents, except as set forth in this Agreement. Consultant shall pay all wages, salaries, and other amounts due such personnel in connection with their performance of Services under this Agreement and as required by law. Consultant shall be responsible for all reports and obligations respecting personnel, including, but not limited to: social security taxes, income tax withholding, unemployment insurance, disability insurance, and workers' compensation insurance. Consultant may only use subconsultants or subcontractors with written approval by the Customer.

3.3.2 Schedule of Services (Project Schedule). Both parties shall perform their activities, tasks, and responsibilities assigned to them in the Statement of Work in a prompt and timely manner and in accordance with the Schedule of Services (Project Schedule) set forth in Exhibit "A," which shall be updated in accordance with Task 1 of the Statement of Work and may be further updated from time to time in accordance with the Statement of Work. Consultant represents that it has the professional and technical personnel required to perform the Services, and City warrants it shall provide necessary personnel with appropriate qualifications and experience to perform its assigned tasks and

activities as set forth in the Statement of Work expeditiously. Upon execution of this agreement, Consultant shall provide a more detailed schedule of anticipated performance to meet the Schedule of Services (Project Schedule) within 60 days of the effective date.

3.3.3 Conformance to Applicable Requirements. The approval of work and Tasks is provided in the Task Acceptance Process as defined and described in the Statement of Work.

3.3.4 City's Representative. The City hereby designates Colin Fernandes, Executive Director, IT, or his/her designee, to act as its representative in all matters pertaining to the administration and performance of this Agreement ("City's Representative"). City's Representative shall have the power to act on behalf of the City for review and approval of all products submitted by Consultant but not the authority to enlarge the Scope of Services or change the total compensation due to Consultant under this Agreement. The City Manager shall be authorized to act on City's behalf and to execute all necessary documents which enlarge the Scope of Services or change the Consultant's total compensation subject to the provisions contained in this Agreement. Consultant shall not accept direction or orders from any person other than the City Manager, City's Representative or his/her designee.

City may also have a Professional Consultant act on behalf of the City to perform Project Management services. If this is done, the Consultant will be acting on behalf of the City, though the City makes all final decisions in the case of any conflicts between the City and the City's Professional Consultant. Otherwise, the Vendor will be required to work with the Consultant as they represent the best interest of the City.

Consultant's Representative. Consultant hereby designates Eric Smith, VP of Operations, or his/her designee, to act as its representative for the performance of this Agreement ("Consultant's Representative"). Consultant's Representative shall have full authority to represent and act on behalf of the Consultant for all purposes under this Agreement provided however the Consultant's Representative does not have the authority to execute amendments and change orders to this Agreement. The Consultant's Representative shall supervise and direct the Services, using his/her best skill and attention, and shall be responsible for all means, methods, techniques, sequences, and procedures and for the satisfactory coordination of its assigned portions of the Services under this Agreement. The Consultant's assigned Project Manager must be approved by the City and cannot be changed without written approval from the City. Upon an employee leaving the Consultant, and a new Project Manager being assigned, this Project Manager must still be approved by the City.

3.3.5 Coordination of Services. As more particularly described in the Statement of Work Consultant agrees to work closely with City staff in the performance of Services and shall be available to City's staff, consultants and other staff at all reasonable times as provided in Exhibit A. Standard of Care; Performance of Employees. Consultant shall perform all of its assigned Services under this Agreement in a skillful and competent manner, consistent with the

standards generally recognized as being employed by professionals in the same discipline in the State of California. Consultant represents and maintains that it is skilled in the professional calling necessary to perform the Services. Consultant warrants that all employees and subconsultants shall have sufficient skill and experience to perform the Services assigned to them. Consultant represents that it, its employees and subconsultants have all licenses, permits, qualifications and approvals of whatever nature that are legally required to perform the Services, and that such licenses and approvals shall be maintained throughout the term of this Agreement. Consultant shall perform, at its own cost and expense and without reimbursement from the City, any services necessary to correct errors or omissions which are caused by the Consultant's failure to comply with the standard of care provided for herein. Any employee of the Consultant or its subconsultants who is determined by the City to be uncooperative, incompetent, a threat to the adequate or timely completion of the Project, a threat to the safety of persons or property, or any employee who fails or refuses to perform the Services in a manner acceptable to the City, shall be promptly removed from the Project by the Consultant and shall not be re-employed to perform any of the Services or to work on the Project. Notwithstanding anything to the contrary, nothing herein shall obligate or in any way require Hexagon to provide any additional Services or Software beyond what is set forth in the Statement of Work (Exhibit A).

3.3.5.1 Neither City nor Consultant shall be considered in default of this Agreement for delays in performance caused by circumstances beyond the reasonable control of the non-performing Party. For purposes of this Agreement, such circumstances include a Force Majeure Event. A Force Majeure Event shall mean an event that materially affects a Party's performance and is one or more of the following: (1) Acts of God or other natural disasters; (2) terrorism or other acts of a public enemy; (3) orders of governmental authorities (including, without limitation, unreasonable and unforeseeable delay in the issuance of permits or approvals by governmental authorities that are required for the services); (4) strikes and other organized labor action occurring at the site and the effects thereof on the services, only to the extent such strikes and other organized labor action are beyond the control of Consultant and its subcontractors, and to the extent the effects thereof cannot be avoided by use of replacement workers; and (5) pandemics, epidemics or quarantine restrictions. For purposes of this section, "orders of governmental authorities," includes ordinances, emergency proclamations and orders, rules to protect the public health, welfare and safety, and other actions of a public agency applicable to the services and Agreement. However, as this is involving the implementation of a public safety software project, if there is a combination of remote and onsite work that can successfully complete the Project, and is agreeable to the parties, a Force Majeure Event may not be reason not to perform for the Consultant. Reasonable alternatives cannot be reasonably withheld by either of the parties.

3.3.5.2 Should a Force Majeure Event occur, the non-performing Party shall, within a reasonable time of being prevented from performing, give written notice to the other Party describing the circumstances preventing continued performance and the efforts being made to resume performance of this Agreement. Force Majeure Events and/or delays, regardless of the Party responsible for the delay, shall not entitle Consultant to any additional compensation.

Notwithstanding the foregoing in this section, the City may still terminate this Agreement in accordance with the termination provisions of this Agreement.

3.3.6 Laws and Regulations; Employee/Labor Certification.

3.3.6.1 Compliance with Laws. Consultant shall keep itself fully informed of and in compliance with all local, state and federal laws, rules and regulations in any manner affecting the performance of the Project or the Services, including all Cal/OSHA requirements, and shall give all notices required by law. Consultant shall be liable for all violations of such laws and regulations in connection with the Services and this Agreement. All violations of such laws and regulations shall be grounds for the City to terminate the Agreement for cause.

3.3.6.2 Employment Eligibility; Consultant. Consultant certifies that it fully complies with all requirements and restrictions of state and federal law respecting the employment of undocumented aliens, including, but not limited to, the Immigration Reform and Control Act of 1986, as may be amended from time to time and shall require all subconsultants and sub-subconsultants to comply with the same. Consultant certifies that it has not committed a violation of any such law within the five (5) years immediately preceding the date of execution of this Agreement, and shall not violate any such law at any time during the term of the Agreement.

3.3.6.3 Equal Opportunity Employment. Consultant represents that it is an equal opportunity employer, and it shall not discriminate against any employee or applicant for employment because of race, religion, color, national origin, handicap, ancestry, sex or age. Such non-discrimination shall include, but not be limited to, all activities related to initial employment, upgrading, demotion, transfer, recruitment or recruitment advertising, layoff or termination.

3.3.6.4 Air Quality. Intentionally removed.

3.3.6.5 Water Quality Management and Compliance. Intentionally removed.

3.3.6.6 Safety. Consultant shall execute and maintain its work so as to avoid injury or damage to any person or property. In carrying out its Services, the Consultant shall at all times be in compliance with all applicable local, state and federal laws, rules and regulations, and shall exercise all necessary precautions for the safety of employees appropriate to the nature of the work and the conditions under which the work is to be performed.

3.3.7 Insurance.

3.3.7.1 Time for Compliance. Consultant shall not commence work under this Agreement until it has provided a certificate of insurance to the City that it has secured all insurance required under this section. In addition, Consultant shall not allow any subconsultant, if approved to be used by the City, to commence work on any subcontract until it has provided a certificate of insurance to the City that the subconsultant has secured all insurance required under this section. Failure to provide and maintain all required insurance shall be grounds for the City to terminate this Agreement for cause.

3.3.7.2 Types of Insurance Required. As a condition precedent to the effectiveness of this Agreement for work to be performed hereunder, and without limiting the indemnity provisions of the Agreement, the Consultant, in partial performance of its obligations

under such Agreement, shall procure and maintain in full force and effect during the term of the Agreement the following policies of insurance. If the existing policies do not meet the insurance requirements set forth herein, Consultant agrees to amend, supplement or endorse the policies to do so.

(A) Commercial General Liability: Commercial General Liability Insurance which affords coverage at least as broad as Insurance Services Office "occurrence" form CG 00 01, or the exact equivalent, with limits of not less than $2,000,000 per occurrence and no less than $4,000,000 in the general aggregate, which can be met through a combination of a CGL policy and umbrella policy. Defense costs shall be paid in addition to the limits. The policy shall contain no endorsements or provisions (1) limiting coverage for contractual liability;(3) products/completed operations liability.

(B) Automobile Liability Insurance: Automobile Liability Insurance with coverage at least as broad as Insurance Services Office Form CA 00 01 covering "Any Auto" (Symbol 1), or the exact equivalent, covering bodily injury and property damage for all activities with limits of not less than $2,000,000 combined limit for each occurrence, which can be met through a combination of a CGL policy and umbrella policy..

(C) Workers' Compensation: Workers' Compensation Insurance, as required by the State of California and Employer's Liability Insurance with a limit of not less than $1,000,000 per accident for bodily injury and disease.

(D) Professional Liability (Errors & Omissions): Professional Liability insurance or Errors & Omissions insurance appropriate to Consultant's profession with limits of not less than $2,000,000. Covered professional services shall specifically include all work to be performed under the Agreement. If coverage is written on a claims-made basis, the retroactive date shall precede the effective date of the initial Agreement and continuous coverage will be maintained or an extended reporting period will be exercised for a period of at least three (3) years from termination or expiration of this Agreement.

3.3.7.3 Insurance Endorsements. Required insurance policies shall contain the following provisions, or Consultant shall provide endorsements on forms approved by the City to add the following provisions to the insurance policies:

(A) Commercial General Liability: (1) Additional Insured: The City, its officials, officers, employees, agents, other consultants, and volunteers shall be additional insureds with regard to liability and defense of suits or claims arising out of the performance of the Agreement. Additional Insured Endorsements shall not (1) be restricted to "ongoing operations"; (2) exclude "contractual liability"; (3) restrict coverage to "sole" liability of Consultant; or (4) contain any other exclusions contrary to the terms or purposes of this Agreement. For all policies of Commercial General Liability insurance, Consultant shall provide endorsements in the form of ISO CG 20 10 and 20 37 (or endorsements providing the exact same coverage) to effectuate this requirement. (2) Cancellation: . Hexagon shall provide prompt written notice if its policy is prematurely terminated

(B) Automobile Liability: (1) Additional Insured: The City, its directors, officials, officers, employees, agents, other consultants, and volunteers shall be covered as additional insureds with respect to the ownership, operation, maintenance, use, loading or unloading of any auto owned, leased, hired or borrowed by the Vendor or for which the Vendor is

responsible. ((2) Cancellation : Hexagon shall provide prompt written notice if its policy is prematurely terminated.

(C) Professional Liability (Errors & Omissions (1) Cancellation: Hexagon shall provide prompt written notice if its policy is prematurely terminated. This insurance shall be written on a policy form coverage specifically designed to protect against acts, errors or omissions of the Consultant. "Covered Professional Services" as designated in the policy must specifically include work performed under this Agreement. The policy must "pay on behalf of" the insured and include a provision establishing the insurer's duty to defend.

(D) Workers' Compensation: (1) Cancellation: Hexagon shall provide prompt written notice if its policy is prematurely terminated. (2) Waiver of Subrogation: A waiver of subrogation stating that the insurer waives all rights of subrogation against the City, its officials, officers, employees, agents, and other consultants, volunteers.

(E) Cyber Liability: Cyber liability coverage with limits of not less than $3,000,000 per occurrence providing protection against liability for Hexagon's: (1) privacy breaches (including liability arising from the loss or disclosure of confidential information no matter how it occurs); (2) system breach; (3) denial or loss of service; (4) introduction, implantation, or spread of malicious software code; and (5) unauthorized access to or use of computer systems. Cyber liability insurance shall not include any exclusion or restriction for unencrypted portable devices or other media. Hexagon shall provide prompt written notice if its policy is prematurely terminated.

3.3.7.4 Primary and Non-Contributing Insurance. All policies of Commercial General Liability and Automobile Liability insurance shall be primary and any other insurance, deductible, or self-insurance maintained by the City, its officials, officers, employees, agents, other consultants, or volunteers shall not contribute with this primary insurance. Policies shall contain or be endorsed to contain such provisions.

3.3.7.5 Waiver of Subrogation. All required insurance coverages, except for the professional liability coverage, shall contain or be endorsed to waiver of subrogation in favor of the City, its officials, officers, employees, agents, other consultants, and volunteers or shall specifically allow Consultant or others providing insurance evidence in compliance with these specifications to waive their right of recovery prior to a loss. Consultant hereby waives its own right of recovery against City, and shall require similar written express waivers and insurance clauses from each of its subconsultants.

Deductibles and Self-Insured Retentions. Any deductible or self-insured retention will be disclosed in writing to the City and shall protect the City, its officials, officers, employees, agents, other consultants, and volunteers in the same manner and to the same extent as they would have been protected had the policy or policies not contained a deductible or self-insured retention.

3.3.7.6 Evidence of Insurance. The Consultant, concurrently with the execution of the Agreement, and as a condition precedent to the effectiveness thereof, shall deliver original certificates on forms approved by the City, together with all endorsements affecting each policy. Required insurance policies shall not be in compliance if they include any limiting provision or endorsement that has not been submitted to the City for approval. The certificates and endorsements for each insurance policy shall be signed by a person authorized by that

insurer to bind coverage on its behalf. At least fifteen (15 business days) following to the expiration of any such policy, evidence of insurance showing that such insurance coverage has been renewed or extended shall be filed with the City. If such coverage is cancelled or reduced and not replaced immediately so as to avoid a lapse in the required coverage, Consultant shall, within ten (10) days after receipt of written notice of such cancellation or reduction of coverage, file with the City evidence of insurance showing that the required insurance has been reinstated or has been provided through another insurance company or companies.

3.3.7.7 Acceptability of Insurers. Each such policy shall be from a company or companies with a current A.M. Best's rating of no less than A:VII and authorized to transact business of insurance in the State of California, or otherwise allowed to place insurance through surplus line brokers under applicable provisions of the California Insurance Code or any federal law.

3.3.7.8 Enforcement of Agreement Provisions (non estoppel). Consultant acknowledges and agrees that actual or alleged failure on the part of the City to inform Consultant of non-compliance with any requirement imposes no additional obligation on the City nor does it waive any rights hereunder.

3.3.7.9 Requirements Not Limiting. Requirement of specific coverage or minimum limits contained in this Section are not intended as a limitation on coverage, limits, or other requirement, or a waiver of any coverage normally provided by any insurance.

3.3.7.10 Additional Insurance Provisions

(A) Except as provided by Section titled “Limitation of Liability,” the foregoing requirements as to the types and limits of insurance coverage to be maintained by Consultant, and any approval of said insurance by the City, is not intended to and shall not in any manner limit or qualify the liabilities and obligations otherwise assumed by the Consultant pursuant to this Agreement, including but not limited to, the provisions concerning indemnification.

3.3.7.11 If at any time during the life of the Agreement, any policy of insurance required under this Agreement does not comply with these specifications or is canceled and not replaced, Consultant shall, within ten (10) days after receipt of written notice of such cancellation or reduction of coverage, file with the City evidence of insurance showing that the required insurance has been reinstated or has been provided through another insurance company or companies. In the alternative, City may cancel this Agreement per Section 3.5 below. The City’s officials, officers, employees, agents (excluding the Contractor’s Representative) or volunteers shall not be personally responsible for any liability arising under or by virtue of this Agreement.

(A) The limits set forth herein shall apply separately to each insured against whom claims are made or suits are brought, except with respect to the limits of liability. Except as otherwise provided in the Limitation of Liability section, further the limits set forth herein shall not be construed to relieve the Consultant from liability in excess of such coverage, nor shall it limit the Consultant’s indemnification obligations to the City and shall not preclude the City from taking such other actions available to the City under other provisions of the Agreement or law.

(B) Consultant shall report to the City, in addition to Consultant's insurer, any and all insurance claims submitted by Consultant in connection with the Services under this Agreement.

Insurance for Subconsultants. If allowed to utilize a subconsultant for any work, the Consultant shall be responsible for causing subconsultants to purchase the appropriate insurance in compliance with the terms of these Insurance Requirements, including adding the City, its officials, officers, employees, agents, other consultants, and volunteers as additional insureds to the subconsultant's policies. All policies of Commercial General Liability insurance provided by Consultant's subconsultants performing work relating to this Agreement shall be endorsed to name the City, its officials, officers, employees, other consultants, agents and volunteers as additional insureds using endorsement form ISO CG 20 38 04 13 or an endorsement providing equivalent coverage. Consultant shall not allow any subconsultant to commence work on any subcontract relating to this Agreement until it has received satisfactory evidence of subconsultant's compliance with all insurance requirements under this Agreement, to the extent applicable. The Consultant shall provide satisfactory evidence of compliance with this section upon request of the City.

3.4 Labor Code Requirements.

3.4.1 Reserved. Intentionally removed

3.4.2 Registration/DIR Compliance. Intentionally removed.

3.4.3 Compliance Monitoring. Intentionally removed.

3.4.4 Labor Certification. By its signature hereunder, Consultant certifies that it is aware of the provisions of Section 3700 of the California Labor Code which require every employer to be insured against liability for Worker's Compensation or to undertake self-insurance in accordance with the provisions of that Code and agrees to comply with such provisions before commencing the performance of the Services.

3.5 Termination of Agreement.

3.5.1.1 Grounds for Termination for Convenience. City may, by written notice to Consultant, terminate for convenience the whole or any part of this Agreement at any time and without cause by giving written notice to Consultant of such termination, and specifying the effective date thereof, at least seven (7) days before the effective date of such termination. Upon termination, Consultant shall be entitled to retain amounts previously paid and compensated only for those Services and Software licenses which have been rendered to City less amounts previously paid and not in dispute, and Consultant shall be entitled to no further compensation. Consultant may not terminate this Agreement except for cause. The rights and remedies of the City provided in this section shall not be exclusive and are in addition to any other rights and remedies provided by law, equity or under this Agreement.

3.5.1.2 Effect of Termination. If this Agreement is terminated as provided herein, City may require Consultant to provide all Customer Owned IP. Consultant shall be required to provide within fifteen (15) business days of the request. Termination for Default.

Either Party may terminate this Agreement if the other Party's materially breaches a material term of this Agreement. In the event a Party materially breaches this Agreement, the non-breaching Party may terminate the Agreement only after providing sixty (60) days notice and opportunity to cure the default. Upon termination, Consultant shall be entitled to retain amounts previously paid and compensated only for those Services and Software licenses which have been rendered to City less amounts previously paid and not in dispute, and Consultant shall be entitled to no further compensation. Consultant may not terminate this Agreement except for cause. The rights and remedies of the City provided in this section shall not be exclusive and are in addition to any other rights and remedies provided by law, equity or under this Agreement.

3.5.1.3 Additional Services. In the event this Agreement is terminated in whole or in part as provided herein, City may procure, upon such terms and in such manner as it may determine appropriate, services similar to those terminated.

3.6 Indemnification.

3.6.1 To the fullest extent permitted by law, Consultant shall defend, indemnify and hold the City, its officials, officers, employees, other consultants, volunteers, and agents free and harmless from any and all third party claims, demands, causes of action, costs, expenses, liability, loss, damage or injury of any kind, in law or equity, for property damage, bodily injury, or death arising out of, pertaining to, or incident to any negligent or willful acts, errors or omissions of Consultant, its officials, officers, employees, subcontractors, consultants or agents in connection with the performance of the Consultant's Services, the Project or this Agreement, including without limitation the payment of all damages, expert witness fees and attorney's fees and other related costs and expenses except such loss or damage caused by the sole negligence or willful misconduct of the City. Consultant's obligation to indemnify shall survive expiration or termination of this Agreement and shall not be restricted to insurance proceeds, if any, received by Consultant, the City, its officials, officers, employees, agents, other consultants, or volunteers. Consultant's defense and indemnification obligations are expressly conditioned upon the following: (i) The City shall provide prompt written notice to Hexagon of a claim for which it is exercising this clause such that Hexagon is not prejudiced in any way in defending such claim; Hexagon shall have primary control of the defense of the claim, including any litigation, negotiations, or settlement of the claim; and (ii) the City shall fully cooperate in the defense or settlement of the claim.

3.7 General Provisions.

3.7.1 Accounting Records. Consultant shall maintain complete and accurate records with respect to all costs and expenses incurred under this Agreement. All such records shall be clearly identifiable. Consultant shall allow a representative of City during normal business hours to examine, audit, and make transcripts or copies of such records and any other documents created pursuant to this Agreement provided Hexagon is under no obligation to have its personnel physically go to the City to facilitate compliance with this Section. Consultant shall allow inspection of all work, data, documents, proceedings, and

activities related to the Agreement for a period of three (3) years from the date of final payment under this Agreement.

3.7.2 Independent Contractors and Subcontracting.

3.7.2.1 Use of Consultants. Consultant is aware of statutory and case law regarding classification of workers as independent contractors, including California Labor Code Section 2750.3 and Dynamex Operations West, Inc. v. Superior Court, 4 Cal. 5th 903 (2018). To ensure that Consultant is in compliance with the California Labor Code, Consultant shall only utilize its employees to provide the Services. Consultant may not provide the services through any independent contractor, subcontractor or subconsultant ("Subcontractor(s)") unless approved by the City as set forth in Section 3.7.2.2 below. Consultant represents and warrants that all personnel who perform the Services on Consultant's behalf are Consultant's employees, and that Consultant complies with all applicable laws, rules and regulations governing its employees, including, but not limited to, the California Labor Code, Unemployment Insurance Code and all applicable Industrial Welfare Commission Wage Orders.

3.7.2.2 Prior Approval Required. Consultant shall not use any Subcontractor to provide the Services, or any portion of the work required by this Agreement, without prior written approval of City. In the event that City authorizes Consultant to use a Subcontractor, Consultant shall enter into a written agreement with the Subcontractor, which must include all provisions of the Agreement, including a restriction on the Subcontractor's use of further independent contractors, subcontractors or subconsultants without the City's prior written consent.

3.7.3 Delivery of Notices. All notices permitted or required under this Agreement shall be given to the respective parties at the following address, or at such other address as the respective parties may provide in writing for this purpose:

Consultant: Intergraph Corporation

Hexagon Safety, Infrastructure and Geospatial division

305 Intergraph Way

Madison, Alabama 35758

ATTN: Hexagon SIG Legal Department

City: City of Ontario
303 East "B" Street
Ontario, CA 91764
ATTN: Toni McNaughton, Assistant IT Director

Such notice shall be deemed made when personally delivered or when mailed, forty-eight (48) hours after deposit in the U.S. Mail, first class postage prepaid and addressed to the party at its applicable address. Actual notice shall be deemed adequate notice on the date actual notice occurred, regardless of the method of service. However, it is also required that the notice be emailed to either party at:

Consultant: Victor S. Vasile
Regional Divisional Counsel
victor.vasile@hexagon.com

City: Toni McNaughton
Assistant IT Director
tmcnaughton@ontarioca.gov

3.7.4 Ownership of Materials and Confidentiality.

3.7.4.1 Documents & Data; Licensing of Intellectual Property. . Hexagon retains ownership and title of all Hexagon developed intellectual property (including, but not limited to, software and documentation made or provided pursuant to this Agreement ("Hexagon IP"). All Hexagon IP provided hereunder are licensed to the City in accordance with Exhibit E (End User License Agreement) which is incorporated by reference herein. Customer shall own information provided by it to Hexagon or data created by the City, including event data stored within the CAD database, data created by the City through its use of I/CAD, reports (excluding the template) prepared by the City ("Customer Owned IP").

3.7.4.2 All Customer Owned IP shall be and remain the property of City, and shall not be used in whole or in substantial part by Consultant on other projects without the City's express written permission.

3.7.4.3 Subconsultants. Third party intellectual property (intellectual property provided by Hexagon but developed by a third party) is licensed in accordance with said third party's license agreement. Consultant shall ensure any subconsultant also acknowledges and/or agree the City owns all Customer Owned IP.

3.7.4.4 Right to Use. City shall not be limited in any way in its use or reuse of Customer Owned IP or any part of them at any time for purposes of this Project or another project, provided that any such use not within the purposes intended by this Agreement or on a project other than this Project without employing the services of Consultant shall be at City's sole risk. If City uses or reuses the Customer Owned IP on any project other than this Project, it shall remove the Consultant's seal from the Customer Owned IP and indemnify and hold harmless Consultant and its officers, directors, agents and employees from claims arising out of the negligent use or re-use of the Customer Owned IP on such other project. Consultant shall be responsible and liable for Hexagon IP, pursuant to the terms of this Agreement, only with respect to the condition of the Hexagon IP at the time they are provided to the City upon completion, suspension, abandonment or termination. Consultant shall not be responsible or liable for any revisions to the Hexagon IP made by any party other than Consultant, a party for whom the Consultant is legally responsible or liable, or anyone approved by the Consultant.

3.7.4.5 Indemnification. Consultant shall defend, indemnify and hold the City, its directors, officials, officers, employees, other consultants, volunteers and agents free and harmless, pursuant to the indemnification provisions of this Agreement, for any alleged infringement of any US: patent, copyright, trade secret, trade name, trademark, or any other proprietary right of any person or entity in consequence of the use on the Project by City of the

Documents & Data, including any method, process, product, or concept specified or depicted. Hexagon's defense and indemnification obligations are expressly conditioned upon the following: (i) The City shall provide prompt written notice to Hexagon of a claim for which it is exercising this clause such that Hexagon is not prejudiced in any way in defending such claim; ii) Hexagon shall have primary control of the defense of the claim, including any litigation, negotiations, or settlement of the claim; and (iii) the City shall fully cooperate in the defense or settlement of the claim. Hexagon shall have no obligation to defend, indemnify, or hold the City free and harmless if: (i) by integration with a product not supplied or authorized by Hexagon, (ii) by materially altering the Hexagon intellectual property, (iii) the City continues to use the product after notified of the potential infringement, (iv) the infringement is the result of designs, customizations, or configurations made or directed to be made by the City, or (v) the City uses the software in a manner inconsistent with the documentation for the product. At its own expense and option, Hexagon may either (i) obtain rights to allow the City to continue using the infringing product, (ii) replace the item with a non-infringing alternative or modify the product while retaining substantially similar software functionality, or (iii) refund the City a prorated portion of the perpetual license software on a five year, straight line depreciation basis beginning at the date off delivery. In such event, the City shall uninstall, crease all use, and return to Hexagon the infringing product.

3.7.4.6 Confidentiality. Except as required by law, the Parties agree not to disclose Confidential Information (as defined below) provided to it by the Disclosing Party to the maximum extent allowable under applicable law unless it first obtains the disclosing Party's written consent to such disclosure. It is further understood and agreed that money damages may not be a sufficient remedy for any breach of this provision of the Agreement by the Receiving Party and the Disclosing Party may seek equitable relief, including injunction and specific performance, as a remedy for any such breach. Such remedies shall not be deemed to be the exclusive remedies for a breach of this provision of the Agreement but will be in addition to all other remedies available at law or equity. The covenants set forth herein and the rights and obligations related thereto shall continue for a period of five (5) years from the date of disclosure. "Confidential Information" means any data or information, tangible or intangible, disclosed or made available by either Party (the "Disclosing Party") to the other Party (the "Receiving Party") that the Disclosing Party considers confidential or proprietary and is not generally known in the industry or to competitors of the Disclosing Party and which shall include: (i) tangible information marked by the Disclosing Party with the word "Confidential" or otherwise identified by an appropriate stamp or legend indicating its confidential nature; (ii) information disclosed orally or visually and identified by the Disclosing Party as confidential when disclosed, and confirmed by the Disclosing Party in a written notice within thirty (30) days following disclosure, which notice shall include markings similar to those outlined above; and (iii) all other information that, notwithstanding the absence of markings or designations, would be understood by the Parties, exercising reasonable business judgment, to be confidential. The term Confidential Information does not include information that: (i) is or becomes available in the public domain through no act of the Receiving Party; (ii) has been received on a non-confidential basis from a third party without breach of the Primary Contracting Document, where the Receiving Party has no reason to believe that such third party is bound by any confidentiality obligation to the Disclosing Party; (iii) was developed independently by the Receiving Party without reliance on the disclosed Confidential Information, provided that such independent development can be substantiated; (iv) was within the Receiving Party's possession prior to its being furnished by the Disclosing Party, where the Receiving Party has no reason to believe that such third party was bound by any confidentiality obligation to the Disclosing Party, (v) is confirmed in writing by the Disclosing Party as not being confidential, or (vi) is not an accepted exception to the California Public Records Act (e.g. a Trade

Secret) and subject to disclosure under applicable law, including, but not limited the California Public Records Act (Gov. Code, § 7920.000) or any other applicable legal process.

3.7.4.7 Confidential Information. The City shall refrain from releasing Consultant's proprietary information ("Proprietary Information") unless the City's legal counsel determines that the release of the Proprietary Information is required by the California Public Records Act or other applicable state or federal law, or order of a court of competent jurisdiction, in which case the City shall notify Consultant of its intention to release Proprietary Information. Consultant shall have seven (7) working days after receipt of the release notice to give City written notice of Consultant's objection to the City's release of Proprietary Information. Consultant shall indemnify, defend and hold harmless the City, and its officers, directors, employees, and agents from and against all liability, loss, cost or expense (including attorney's fees) arising out of a legal action brought to compel the release of Proprietary Information. City shall not release the Proprietary Information after receipt of an objection notice unless either: (1) Consultant fails to fully indemnify, defend (with City's choice of legal counsel), and hold City harmless from any legal action brought to compel such release; and/or (2) a final and non-appealable order by a court of competent jurisdiction requires that City release such information.

3.7.5 Data

3.7.5.1 Ownership of Data. The City shall own all Customer Owned IP and the Consultant shall have a nonexclusive license to use Customer Owned IP during the term of this Agreement only to perform Consultant's obligations under this Agreement and for no other purpose. Without limiting the foregoing, Consultant shall not sell any Customer Owned IP to third parties. Unless otherwise permitted under this Agreement, Consultant shall not take or do any act that would unreasonably interfere with City's access to or use of Customer Owned IP.

3.7.5.2 Data Security. Consultant shall take all reasonable precautions to prevent loss of the City's data due to acts of Consultant or any approved subconsultant. To protect the privacy and security of the City's data within Hexagon custody and control and prevent unauthorized access (including unauthorized remote access) to or use of such data, Consultant shall implement internal procedures and systems in connection with the performance of this Agreement consistent with applicable international, federal, state and local laws ("Security Procedures"). The purpose of the Security Procedures is to identify reasonably foreseeable risks to security and unauthorized access to the City's data in connection with the performance of this Agreement and to minimize security risks, including through risk assessment and regular testing. Consultant will designate one or more employees to coordinate and be accountable for the Security Procedures. Hexagon agrees it shall not knowingly introduce or place into the City's environment that includes I/CAD any viruses, Trojan horses, or other malware.

3.7.5.3 Hexagon represents and warrants it has been certified as ISO 27001 compliant.

3.7.5.4 Data/Security Breach. If Consultant becomes aware of a security breach or any other event in connection with the performance of this Agreement that compromises the security, confidentiality or integrity of City data or the Project that is within Hexagon's control (an "Incident"), Consultant will promptly notify the City in writing and take appropriate actions to resolve the Incident so long as the affected environment is within Hexagon's control. Consultant will cooperate with the City to investigate the nature and scope of any Incident. In its initial notification to City, Consultant will provide the City with: (i) a description

of the Incident; (ii) the estimated impact of the Incident on data; (iii) the name and contact information of the person at Consultant who will be primarily responsible for resolving the issues for the City; and (iv) the investigative actions taken and the suggested corrective action. Consultant shall cooperate with City in investigating, assisting with notification of the Incident, and taking corrective action as agreed to by the Parties. In the event that applicable law requires notification to individuals of an Incident that was caused by Consultant, the City will prepare appropriate notices with cooperation (if requested) of Consultant and Consultant shall reimburse the City's costs of providing such notification. In no event is Hexagon required to secure, investigate, remediate, or otherwise address security incidents or breaches within the City's network or on-premise software residing on City owned or leased hardware provided that if after City's investigation it is determined that Hexagon was primarily culpable for the security incident or breach then this limitation shall not apply.

3.7.6 Cooperation; Further Acts. The Parties shall fully cooperate with one another, and shall take any additional acts or sign any additional documents as may be necessary, appropriate or convenient to attain the purposes of this Agreement to fulfill the obligations and requirements as set forth in Exhibit A. .

3.7.7 Entire Agreement. This Agreement contains the entire agreement of the Parties with respect to the subject matter hereof, and supersedes all prior negotiations, understandings or agreements. The Parties agree and understand that, in the event of any conflict between the terms of this Agreement and the End User License Agreement, the terms of this Agreement shall control.

3.7.8 Attorneys' Fees. If either party commences an action against the other party, either legal, administrative or otherwise, arising out of or in connection with this Agreement, the prevailing party in such litigation shall be entitled to have and recover from the losing party reasonable attorneys' fees and all costs of such action. Attorneys' Fees awarded hereunder, together with any damages, shall be subject to the Limitation of Liability as provided in Section 3.8.

3.7.9 Governing Law. This Agreement shall be governed by the laws of the State of California. Venue shall be in San Bernardino County. In addition to any and all contract requirements pertaining to notices of and requests for compensation or payment for extra work, disputed work, claims and/or changed conditions, Consultant must comply with the claim procedures set forth in Government Code sections 900 et seq. prior to filing any lawsuit against the City. Such Government Code claims and any subsequent lawsuit based upon the Government Code claims shall be limited to those matters that remain unresolved after all procedures pertaining to extra work, disputed work, claims, and/or changed conditions have been followed by Consultant. If no such Government Code claim is submitted, or if any prerequisite contractual requirements are not otherwise satisfied as specified herein, Consultant shall be barred from bringing and maintaining a valid lawsuit against the City.

3.7.10 Time of Essence. Time is of the essence as it relates to, and only to, Cutover (as that term is defined in Exhibit A) as compared to the then current Project Schedule adopted by the Parties as provided in Exhibit A.

Notwithstanding anything to the contrary, the Parties acknowledge and agree a Party responsible for a delay of Cutover lasting less than 105 days as measured against the then current Project Schedule shall not be or claimed to be in default of the Agreement or its obligations arising thereunder.

3.7.11 Accounting Records. Consultant shall maintain complete and accurate records with respect to all costs and expenses incurred under this Agreement. All such records shall be clearly identifiable. Consultant shall allow a representative of City during normal business hours to examine, audit, and make transcripts or copies of such records and any other documents created pursuant to this Agreement in the manner and place where they are ordinarily kept or remotely. Consultant shall allow inspection of all work, data, documents, proceedings, and activities related to the Agreement for a period of three (3) years from the date of final payment under this Agreement.

3.7.12 City's Right to Employ Other Consultants. City reserves right to employ other consultants in connection with this Project provided the City shall abide by the terms of the End User License Agreement and no other party is permitted to or authorized to use Hexagon software.

3.7.13 Successors and Assigns. This Agreement shall be binding on the successors and assigns of the parties.

3.7.14 Assignment or Transfer. Neither party shall assign, sublet, or transfer this Agreement or any rights under or interest in this Agreement without the written consent of the other party, which may be withheld for any reason. Any attempt to so assign or so transfer without such consent shall be void and without legal effect and shall constitute grounds for termination. Consultant shall not subcontract any portion of the Services required by this Agreement, except as expressly stated herein, without prior written approval of City. Subcontracts, if any, shall contain a provision making them subject to all provisions stipulated in this Agreement.

3.7.15 Construction; References; Captions. Since the Parties or their agents have participated fully in the preparation of this Agreement, the language of this Agreement shall be construed simply, according to its fair meaning, and not strictly for or against any Party. Any term referencing time, days or period for performance shall be deemed calendar days and not work days. All references to Consultant include all personnel, employees, agents, and subconsultants of Consultant, except as otherwise specified in this Agreement. All references to City include its elected officials, officers, employees, other consultants, agents, and volunteers except as otherwise specified in this Agreement. The captions of the various articles and paragraphs are for convenience and ease of reference only, and do not define, limit, augment, or describe the scope, content, or intent of this Agreement.

3.7.16 Amendment; Modification. No supplement, change order, modification, or amendment of this Agreement shall be binding unless executed in writing and signed by both Parties.

3.7.17 Waiver. No waiver of any default shall constitute a waiver of any other default or breach, whether of the same or other covenant or condition. No waiver, benefit, privilege, or service voluntarily given or performed by a Party shall give the other Party any contractual rights by custom, estoppel, or otherwise.

3.7.18 No Third-Party Beneficiaries. There are no intended third party beneficiaries of any right or obligation assumed by the Parties.

3.7.19 Invalidity; Severability. If any portion of this Agreement is declared invalid, illegal, or otherwise unenforceable by a court of competent jurisdiction, the remaining provisions shall continue in full force and effect.

3.7.20 Prohibited Interests. Consultant maintains and warrants that it has not employed nor retained any company or person, other than a bona fide employee working solely for Consultant, to solicit or secure this Agreement. Consultant warrants that it has not paid nor has it agreed to pay any company or person, other than a bona fide employee working solely for Consultant, any fee, commission, percentage, brokerage fee, gift or other consideration contingent upon or resulting from the award or making of this Agreement. Consultant further agrees to file, or shall cause its employees or subconsultants to file, a Statement of Economic Interest with the City's Filing Officer as required under state law in the performance of the Services. For breach or violation of this warranty, City shall have the right to rescind this Agreement without liability. For the term of this Agreement, no member, officer or employee of City, during the term of his or her service with City, shall have any direct interest in this Agreement, or obtain any present or anticipated material benefit arising therefrom.

3.7.21 Authority to Enter Agreement. Each Party represents it has all requisite power and authority to conduct its business and to execute, deliver, and perform the Agreement. Each Party warrants that the individuals who have signed this Agreement have the legal power, right, and authority to make this Agreement and bind each respective Party.

3.7.22 Counterparts. This Agreement may be signed in counterparts, each of which shall constitute an original.

3.7.23 Survival. All rights and obligations hereunder that by their nature are to continue after any expiration or termination of this Agreement, including, but not limited to, the indemnification obligations, shall survive any such expiration or termination.

3.8 Limitation of Liability: IN NO EVENT WILL HEXAGON BE LIABLE FOR ANY INDIRECT, INCIDENTAL, CONSEQUENTIAL, PUNITIVE OR SPECIAL DAMAGES, INCLUDING, BUT NOT LIMITED TO, LOST PROFITS, LOSS OF USE OR PRODUCTION, LOSS OF REVENUE, LOSS OF DATA, OR CLAIMS OF THIRD PARTIES, EVEN IF HEXAGON HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES. **NOTWITHSTANDING ANYTHING ELSE TO CONTRARY WITHIN THE AGREEMENT,** UNDER NO CIRCUMSTANCE WILL HEXAGON'S LIABILITYUNDER THIS AGREEMENT, INCLUDING, BUT NOT LIMITED TO, ANY ATTORNEY'S FEES AWARDED PURSUANT TO SECTION 3.7.8 ABOVE, EXCEED 1.25 TIMES THE AMOUNT THAT HEXAGON HAS BEEN PAID BY CITY UNDER THIS AGREEMENT. NOTWITHSTANDING THE FOREGOING, THE LIMITATIONS OF LIABILITY SET FORTH IN THIS SECTION SHALL NOT APPLY TO CLAIMS OR LOSSES RESULTING FROM A BREACH

OF CONFIDENTIALITY, REFUSAL TO PROVIDE SERVICES, DEATH, BODILY INJURY, DAMAGE TO TANGIBLE PROPERTY, VIOLATION OF APPLICABLE LAW, GROSS NEGLIGENCE OR WILLFUL MISCONDUCT.

3.9 Resolution Protocol. The Parties shall exercise their best efforts to negotiate and settle promptly any dispute that may arise with respect to the Master Agreement or Order made pursuant to the Agreement ("Dispute") in accordance with the provisions set forth herein. If either Party disputes any provision of the Agreement (the "Disputing Party"), or the interpretation thereof, or any conduct by the other Party under the Master Agreement, the Disputing Party shall bring the matter to the attention of the other Party at the earliest possible time in order to resolve the Dispute, except for Disputes for non-payment. If such Dispute is not promptly resolved by the employees responsible for the subject matter of the Dispute, the Disputing Party shall be permitted to deliver to the non-disputing Party's contact person identified in the Primary Contracting Document a written notice of the Dispute, whereupon the Parties shall endeavor in good faith to escalate the Dispute to appropriate executives for each Party for resolution within fifteen (15) Business Days, or such longer period as to which the Parties may mutually agree. To the extent a Dispute is not resolved through the process outlined in the previous section and remains unresolved, the Parties agree to enter into non-binding mediation to resolve the Dispute. Within sixty (60) calendar days, of the issuance of the Dispute notice, or such longer period that is mutually agreeable to the Parties, the Parties agree to identify a mutually acceptable mediator who shall mediate the Dispute. If, after making reasonable efforts to identify a mutually acceptable mediator and no later than fifty (50) calendar days after the issuance of the Dispute Notice, the Parties are unable to identify such a mediator, the Disputing Party shall provide the non-disputing Party with a list of five (5) proposed mediators. The non-disputing Party shall have five (5) Business Days from receipt of such list from the Disputing Party to identify one proposed mediator on the list to use as a mediator. If the non-disputing Party fails to identify and communicate its choice to the Disputing Party in the time allotted, then the Disputing Party shall be permitted to unilaterally identify the mediator from the list of five (5) mediators previously given who shall mediate the Dispute. The mediator shall be an attorney licensed to practice law in the State of California. Subject to the mediator's availability, the Parties agree to mediate the Dispute within thirty (30) days after the Parties have identified a mediator who has agreed to mediate the Dispute. To the extent the mutually identified mediator is unavailable, unwilling, or unable to mediate the Dispute, the Parties shall utilize the same steps listed above to identify a new mutually agreeable mediator. To the extent the Disputing Party had to prepare a list of proposed mediators previously, it shall prepare and transmit a revised list within five (5) Business Days of receiving notice of the proposed mediator's unavailability. Subject to the mediator's requirements, the Parties agree they shall be permitted to attend the mediation via telephone or video conferencing. The Parties agree to pay in equal shares the mediator's fee and expenses unless otherwise agreed to pursuant to a settlement agreement. Except for Disputes for non-payment, only after the Parties have endeavored to resolve the Dispute through the processes outlined in the immediately preceding two sections may a Party commence litigation to resolve the dispute.

3.10 Personal Data. Where Personal Data is provided by the City to Hexagon, the City shall act as the data controller and shall be responsible for complying with all applicable data protection laws. Hexagon shall act as the data processor in respect of such Personal Data and shall process the Personal Data in accordance with applicable data protection laws. The City acknowledges and agrees that Hexagon is not capable of being a data controller due to Hexagon's inability to determine the purpose and means of the processing of Personal Data provided by City to Hexagon. To the extent that: (a) Personal Data of Users or Authorized Cloud Users provided by the City to Hexagon pursuant to the Agreement is subject to the European

Union General Data Protection Regulation 2016/679, as may be amended from time to time ("GDPR"); and (b) the City and Hexagon do not have a separate, written data processing agreement, then the City and Hexagon agree that the terms of Hexagon's Data Processing Addendum, as updated from time to time, found at: https://www.hexagonsafetyinfrastructure.com/-/media/Legal/Hexagon/SI/Policies/DPA/DPALP/DPA_LP_08-2019.pdf, shall apply. Hexagon will only process City supplied Personal Data in accordance with the City's lawful instructions and to the extent and as necessarily required to provide the applicable goods and services under the Agreement and for no other purpose. Except as may be otherwise required by law, contract, or judicial order, after expiration or earlier termination of the Agreement, Hexagon will destroy all City-supplied Personal Data in accordance with applicable data protection laws.

Introduction

This Statement of Work, including the attachments hereto, provided by Intergraph Corporation by and through its Hexagon Safety, Infrastructure & Geospatial division ("Hexagon") to the City of Ontario ("Customer") describes the Products and Services that will be provided to implement an integrated computer aided dispatch ("CAD") system for the Customer (the "Project") in exchange for payment of the amount set forth in the Quote (which is included as Attachment A). This SOW sets forth the Products and Services Hexagon will provide as well as each Party's responsibilities and obligations to implement the Products under the Agreement. Except as otherwise provided herein, capitalized terms shall have the meaning set forth in Attachment I (Glossary of Terms) hereto, including the Master Terms Glossary.

The Software provided by Hexagon for this System will be I/CAD version 9.4 Subsystem. Version 9.4 will be the major product version used for Cutover. If a major software release occurs during Project implementation, this software release will not be included in the Project. During Project implementation and prior to Cutover, if the inclusion of a point release is mutually determined by both the Customer and Hexagon to be required to meet system requirements, that point release version may be installed and implemented.

Purpose

The SOW guides the Tasks and Activities for the Project. It documents Project implementation requirements, identifies each Task within the implementation process, sets expectations for each Party, and identifies the Task Acceptance Criteria.

The SOW includes and incorporates the following Attachments:

- Attachment A – RESERVED (*See Exhibit C of the Agreement)*
- Attachment B – RESERVED (*See Exhibit D of the Agreement)*
- Attachment C – Initial Project Schedule
- Attachment D – Training Curriculum
- Attachment E – Public Safety System Specifications
- Attachment F – System Configuration Diagram
- Attachment G – CAD Functional Specifications Matrix
- Attachment H – Interface Descriptions
- Attachment I – Glossary of Terms
- Attachment J – Warranty
- Attachment K – Regional Provisions
    - Attachment K-1 – CJIS Security Addendum

The remainder of this section details Project assumptions that impact the Project cost, schedule and scope, Project team composition, and Project management responsibilities.

Each Task identified in this SOW includes the following, as necessary: Task Description, Task Deliverables, Task Prerequisites, Task Assumptions, Hexagon/Customer Team Participation and Responsibilities, and Task Acceptance Criteria. The Tasks defined in the SOW may not be listed

chronologically, and the actual Project implementation Tasks and timelines will follow the Project Schedule, unless otherwise noted.

Software Functionality and Support

As part of this Project, Hexagon shall provide licenses to Software identified in Exhibit C to the Agreement ("Project Software"). The Project Software shall have the capabilities and functionality set forth in the Specifications corresponding to the Project Software, which reflects all of the functionality Hexagon is obligated to provide. The Project Software shall only be tested to evaluate conformity to the Specifications. The COTS versions of the Project Software will be provided, and, unless otherwise provided in the Specifications, this Agreement does not include any Product Change Requests or Customizations.

Upon Cutover, the Warranty Period for the Project Software shall commence as described in Attachment J (Warranty). Hexagon shall provide support for the Project Software during the Warranty Period in accordance with Exhibit B (Maintenance Terms) of the Agreement.

Project Governance

Hexagon will assign a Project Manager at the beginning of the Project to act as the primary point of contact at Hexagon for the Customer and provide general oversight and guidance for the Hexagon Project team throughout Project.

To ensure successful delivery of the Project in accordance with the schedule, regular communications and an escalation path are necessary. Typically, all formal communications will occur between the Hexagon Project Manager and the Customer Project Manager. Generally, each Party's Project Manager will have, at minimum, a bi-weekly status conference with one another. On a monthly basis, Hexagon will provide a status report reflecting completed Activities, upcoming Activities, at-risk Activities, other pertinent matters affecting the Project, and, as necessary, an updated Project Schedule. As may be appropriate, the Parties may escalate matters to appropriate executives in between quarterly executive meetings. The Customer may propose revisions to the status report and its attachments, but it must do so within five (5) Business Days, otherwise it is final and accepted by the parties.

Finally, on a quarterly basis, or more frequently if deemed necessary by the Parties, the Department Sponsor for Customer, a Hexagon Director or Vice President responsible for operations, and the Customer's Project Managers shall hold a remote executive review meeting to discuss the status of the Project and particular challenges impacting the Project. The two senior officials for both parties shall also serve as the escalation point for disputes arising between the Project Managers.

Projects of this nature involve both Parties performing a variety of Tasks that are dependent upon one another. With that type of relationship and the number of Tasks involved, from time to time delays may occur. The Hexagon Project Manager and Customer Project Manager will address and take actions to mitigate such delays, to the extent reasonably possible.

The Hexagon Project Manager will manage the Project Schedule and provide copies of it to the Customer as updated. From time to time and outside of the status report process described above, the Project Managers may find an adjustment to the Project Schedule is necessary. If the adjustment is mutually agreeable, the Hexagon Project Manager shall update the Project Schedule and it will become the then current Project Schedule, superseding all prior Project Schedules. The Parties acknowledge that potentially material adjustments to the Project Schedule may need to be addressed through a Change Order due to its impact on other aspects of the Order. Unless otherwise noted between the Project Managers, all Tasks reflected in this SOW are regarded as having completed the Task Acceptance

Process upon Cutover or commencement of a Task for which the earlier Task was a prerequisite as noted within the SOW and/or Project Schedule.

Any provisions particular to Customer's country are specified in Attachment K – Regional Provisions, which shall supersede any conflicting provisions provided in this SOW.

Acceptance of Tasks shall occur when the applicable Task Acceptance Criteria has been satisfied in accordance with the Task Acceptance Process.

If during the performance of the Project the Parties agree to remove an Interface from the scope of the Project, then such removal shall be documented in a Change Order executed by the Parties. As part of the Change Order, the fees corresponding to the license for the Interface and associated Maintenance fees shall be addressed in the Change Order either through a reduction in the total fee of the Agreement as provided in Exhibit C or the creation of a project credit (assuming the total agreement price is paid) corresponding to the removed license and maintenance fees for the Interface(s).

Customer Core Team(s)

The Customer shall provide qualified resources to staff the Core Team (described below) to facilitate a successful implementation of I/CAD. The Core Team consists of an overall Customer project manager who is responsible for the day-to-day coordination of Customer's Project Activities and personnel divided amongst smaller discipline-oriented groups with particular roles and responsibilities appropriate to the discipline. Those subdivided groups are denoted with suggested team member resources below.

Core Team Roles and Responsibilities

CAD Core Team

Below is the defined group of Customer members responsible for decision making for the remainder of the Public Safety Access Point ("PSAP") user group(s) regarding configuration and use of the I/CAD solution. The "Dispatch Core Team" should consist of, at a minimum, the following resources with the corresponding qualifications:

- **9-1-1 Call-Taker** – This person intimately understands the process by which emergency calls for service are answered, triaged, created in the current CAD, and sent for dispatch.
- **Radio Dispatcher** – This person intimately understands the structure of the PSAP, the agencies for which it dispatches, and the methods in which dispatching occurs.
- **System Administrator (Operational)** – This person is responsible for the operational administration of the I/CAD system. Managing things like user accounts, permissions, parameter settings, user interface layouts, units, event types, etc.
- **Decision Maker (Operational)** – This person has authority, either by role or designation, to make decisions on behalf of the agency or agencies I/CAD is serving pertaining to the configuration of I/CAD.

The ideal size of the Dispatch Core Team is six (6) members. Under no circumstances shall the CAD Core Team be larger than twelve (12) members.

Mobile Core Team (Police)[1]

Below is the defined group of Customer members responsible for decision making for the remainder of the field operations user group(s) regarding configuration and use of the I/CAD mobile solutions including Mobile for Public Safety or "MPS" and Intergraph Mobile Responder. The "Mobile Core Team" should consist of, at a minimum, the following resources with the corresponding qualifications:

- **Patrol** – This person is an active member of the patrol / operational division of the agency. They are tasked with responding to calls for service, field-initiated activities like traffic stops or inspections, and other duties in patrol / operations. This person should not be technology averse. They should embrace the use of technology and seek to find ways to leverage it to their benefit in their daily duties.
- **Patrol Supervisor** – This person is an active member of the patrol / operational division of the agency and responsible for the day-to-day supervision of a group of patrol members. This person is typically a rank of Sergeant or above in law enforcement, although actual rank structure in agencies may vary.
- **Investigations / Detective** – This person is an active member of the investigations division and has primary responsibility for long-term case work.
- **Command Staff** – This person is an active member of the command staff at the agency. This person is typically a rank of Captain or higher in law enforcement, although actual rank structure in agencies may vary.
- **Decision Maker** – This person has authority, either by role or designation, to make decisions on behalf of the agency or agencies MPS or Mobile Responder is serving pertaining to the configuration of I/CAD mobile products.

The ideal size of the Mobile Core Team is six (6) members. Under no circumstances shall the Mobile Core Team be larger than twelve (12) members.

Project Assumptions

The following list of assumptions and Customer responsibilities reflect Hexagon's understanding of the Project. Changes in any of the assumptions and Customer responsibilities will affect the scope, Project Schedule, and/or cost of the Project.

Agreement and Schedule Assumptions

- The Agreement has been executed by both parties and the Customer has provided either a notice to proceed or PO.
- Hexagon and the Customer will review the SOW and determine a mutually agreeable date for the Services to be performed.
- The Customer shall perform its assigned responsibilities as identified within the Initial Project Schedule (Attachment C) and Project Schedule developed as part of Task 1 in the time allotted. If the Customer does not reasonably comply with the Project Schedule, Hexagon is permitted with written notice to suspend its performance on this Project and redeploy its resources on other active projects

[1] The Fire Department is intending to utilize an alternate mobile solution not provided by Hexagon. As such, the MPS and Mobile Responder Software licenses, workshops, and training are intended for the Police Department only.

until the Parties determine a mutually agreed upon date to re-start the Project. At that time, a new Project Schedule will be provided.

- Hexagon will have timely access to the applicable members of the Core Teams and other Customer Project staff in accordance with the Project Schedule. Customer shall make additional personnel available on a priority basis, as needed, to provide subject matter expertise to complete this Project.
- Customer shall assign appropriately qualified personnel to the Core Teams and ensure they are actively engaged in the Project.
- Customer shall have at least one (1) System Administrator, technical resource(s), and subject matter expert(s) ("SMEs") available to perform and/or support all Customer responsibilities and timely respond to Hexagon requests.
- Any work and effort ascribed to Hexagon in a given Task is confined to that specific Task and may not be used for or applied to any other Task.
- Customer shall provide Hexagon Project Manager with contact information for a Customer resource to resolve any issues that should arise from Hexagon's access of Customer's System during working and non-working hours.
- Any workshop having a duration of three (3) Business Days or less shall begin no earlier than Tuesday of the week of that workshop and will conclude that same week.
- The Customer shall provide Hexagon with access to all data, documents, plans, reports, diagrams, and analyses reasonably related to the Project or otherwise necessary to facilitate Hexagon's performance of its Activities.
- Unless expressly stated in this SOW, all Documentation, if any, provided by Hexagon under this SOW will be COTS Documentation, and the Documentation will not be customized by Hexagon. All Documentation delivered will be in Hexagon-approved format. Changes to Hexagon-format to accommodate specific Customer requests may be done at Hexagon's discretion and at an additional cost.
- Unless Hexagon and Customer mutually agree otherwise, all Documentation provided by Hexagon will only be provided in electronic format.
- Unless otherwise stated in the Task, all Tasks will be conducted remotely.
- All Hexagon personnel performing remote Activities will be identified and properly vetted prior to commencement of those remote Activities.
- As reflected herein, Hexagon may have proposed certain Activities or Tasks be performed on site. Hexagon and/or Customer may alternatively choose or circumstances necessitate to have these Activities and Tasks performed remotely. Payments due under the Quote and as specified herein shall remain the same.
- To the extent the Customer requires Hexagon personnel undergo COVID testing prior to performing work at Customer's facilities, the Customer would be responsible for any such costs, which are not included in the scope and price of this Order.
- If the title of a Task includes the name of a Subsystem (e.g. CAD), that Task shall be construed as pertaining only to that Subsystem unless expressly stated otherwise.
- For the GIS workshops, Hexagon will record those workshops. The recordings will be exclusively in the custody of Hexagon. Hexagon will make the recordings accessible to the Customer for up to sixty (60) days after the end of the workshop for its internal viewing.

Hardware and Software Assumptions

- All Software will be electronically delivered.

- All specifications provided with this SOW (Attachments E) will assume a traditional on-premises solution (*i.e.*, not a hosted solution).
- The Customer shall purchase, install, and test all physical hardware, including the client/mobile hardware.
- The Customer will ensure its hardware, operating system software, database software, and other third-party products/environments conform with Attachments E and F. Deviations from Attachments E and F will not be considered due to the critical nature of the software supported by these systems.
- Hexagon and the Customer will test the final system hardware configuration to ensure conformance with Attachment F and Attachments E.
- Customer shall purchase all applicable operating systems, database licenses, and Third-Party Software and ensure such operating systems, database licenses, and Third-Party Software meet the minimum requirements as defined in Attachments E.
- I/CAD 9.4 requires SQL Server 2022 Enterprise Edition (EE) with SA, which will be configured in an "Always On" configuration for the Production Environment CAD database servers. The test environment CAD database server requires SQL Server 2022 Developer Edition (DE), and the training environment CAD database server requires SQL Server 2022 Standard Edition (SE).
- Hexagon technology for this Project will be implemented in the Microsoft environment as specified in Attachments E.
- Customer shall purchase, install, configure, and administer its Network Infrastructure, including, but not limited to, its WAN/LAN and wireless infrastructure. Customer's wireless infrastructure shall be the same for all agencies and meet minimum bandwidth requirements as stated in Attachments E.
- Customer shall be responsible for the wired and wireless connectivity between servers/clients and clients/clients.
- For automatic failover to a secondary location, the network latency between the site servers shall be less than 10 milliseconds (ms) Customer shall be responsible for, and purchase and maintain if necessary, any hardware and/or third-party software necessary for implementing interfaces.
- Except as specified in this SOW, including Exhibit C to the Agreement, Hexagon is not required to provide any additional Software customizations, custom forms, forms modifications, third-party software, custom interfaces, or custom reports.
- To the extent the Customer desires to use the Software or other deliverables provided herein in a manner or in combination with software or hardware that is not certified or recommended by Hexagon, then the Customer shall be solely responsible for such use. Hexagon shall not be responsible for the correction of any errors, Defects, reduced performance, compromised functionality, or other unintended consequences arising from such use. The Customer also shall not withhold acceptance of any deliverable or the System due to such use.
- Customer has reviewed the SOW and acknowledges and agrees Software Requirements: (i) represents all the functionality required of the System; and (ii) is the only functionality that is required to be delivered under this SOW.

System Access Assumptions

- Depending upon the Customer's jurisdiction, additional security guidelines and assumptions are provided in Attachment K.
- Customer consents to Hexagon's inspection and use of Customer's data and systems, including, but not limited to, log files and databases, for the limited purpose of providing the Services specified herein and any future maintenance or warranty services described within the Agreement.
- Customer shall grant Hexagon personnel system administrator level access with unique log-in credentials to all servers, networks, databases, and workstations that will be involved in the Project.

- Beyond Trust is the remote access solution used by Hexagon. Customer shall provide Hexagon all necessary licenses and credentials to utilize Beyond Trust during the Project and Extend Warranty. Customer represents Beyond Trust satisfies all necessary Federal and State access requirements.
- Customer shall provide unrestricted system and VPN access via Beyond Trust to Hexagon developers and implementers who will need to have access to multiple infrastructure platforms at the same time. The Customer shall provide Hexagon personnel individualized system access credentials and allow Hexagon authorized resources VPN access twenty-four (24) hours a day, seven (7) days a week for the duration of the Project.
- Customer shall provide external VPN access while on site to access various Hexagon resource libraries.
- After completion of this Project, Hexagon will VPN using Beyond Trust into the live System only at Customer's request and will follow Customer's required VPN access procedures.

Third-Party Assumptions

- Customer shall schedule and coordinate third-party technical resources with the skills necessary to perform and/or support all Customer Responsibilities, provide necessary information, respond to Hexagon requests, and support the testing of interfaces, as required. Customer shall schedule and coordinate third-party technical resources in such a way as to ensure that a negative impact to the overall Project Schedule does not occur.
- Customer shall maintain, in good working order, all third-party systems which will integrate with Hexagon software or on which the Hexagon software depends as part of this Project.
- Customer shall be responsible for the operation and timely availability of external systems or third-party software necessary for the execution of the Project.
- If a delay in the Project is caused by a third-party vendor, Hexagon services not covered in this SOW may be required at additional costs.

Project Tasks

Project Initiation (Police and Fire)

Prior to the Kickoff Meeting and after execution of the Agreement, the Hexagon Project Manager will contact the Customer Project Manager to identify the Project Start date and coordinate scheduling the Kickoff Meeting. For the Project to be successful, the following initial Activities must be performed before any Tasks occur:

- Customer shall order hardware, database software, operating system software, or other third party software consistent with the requirements set forth in Attachments E and F.
- The Hexagon Project Manager will contact the Customer Project Manager. During this initial contact, the Hexagon Project Manager will:
    - Schedule the kickoff meeting;
    - Identify the Project Start date;
    - Create a detailed agenda describing the goals of the kickoff meeting;
    - Discuss any mitigating factors that could affect the Project (e.g., scheduling conflicts, communication factors, and other risk factors);
    - Schedule a conference call before the kickoff to go over the kickoff agenda;
    - Ensure both Hexagon and Customer have appropriate Subject Matter Experts available for kickoff; and
    - Provide document titled “Infrastructure Build Document”, if not previously provided to the Customer.
- Hexagon’s Project Manager will prepare kickoff materials.
- Hexagon’s Project Manager shall have updated the Initial Project Schedule and provide the draft Updated Initial Project Schedule and sent a copy to the Customer Project Manager for review at least two weeks prior to the Kickoff meeting.

Planning Phase

1. Project Kickoff Meeting (Police and Fire)

Task Description

The objective of this Task is to discuss and address questions regarding Project Assumptions, discuss the updated Initial Project Schedule and agree to it at the meeting or shortly thereafter, and all requirements are understood prior to beginning any significant work. A meeting for Project Kickoff will be held after the Agreement has been fully executed. The Project Kickoff meeting will be scheduled by each party's Project Manager as part of Project Initiation Activities.

Prior to the Kickoff Meeting and after written acceptance of the Agreement, the Hexagon Project Manager will contact the Customer Project Manager to identify the Project Start date and coordinate scheduling the Kickoff Meeting. The Project Kickoff Meeting shall last no more than one (1) Business Day.

During this Task, the Parties shall confirm the updated Initial Project Schedule as updated by the Hexagon Project Manager. The resulting updated Initial Project Schedule shall be substantially similar in durations as that provided within Attachment C. Prior to the Project Kickoff Meeting Task, the Customer Project Manager shall have reviewed the updated Initial Project Schedule and be in a position to succinctly identify any needed changes understanding material extensions of the Initial Project Schedule may require additional Hexagon Services to be added via a Change Order. Once the list of changes has been made to the updated Initial Project Schedule by the Hexagon Project Manager, the Hexagon Project Manager will thereafter provide the Project Schedule to the Customer Project Manager. From time to time, the Parties' Project Managers may modify the Project Schedule upon mutual written consent or upon transmission of an updated Project Schedule to the Customer Project Manager as part of a status report and the Customer Project Manager offers no objection to the updated Project Schedule within five (5) Business Days thereafter.

At the Project Kickoff Meeting, the Customer shall provide: (i) contact information for all members of its Core Team and Executive/Departmental Sponsor, (ii) proposed alterations to the updated Initial Project Schedule, (iii) contact information for any third-party vendors which I/CAD will integrate as contemplated in Attachment H, and (iv) identify to Hexagon any perceived concerns or risks with the Project. During the Project Kickoff Meeting, Hexagon shall provide template COTS Interface Questionnaires for Customer completion prior to required Tasks.

Task Deliverables

- Kickoff meeting agenda
- Project Schedule
- Communication Plan
- Kickoff meeting minutes, to include identified risks and action items
- COTS Interface Questionnaire

Task Prerequisites

- Agreement executed by both Customer and Hexagon and PO issued (if applicable).
- Hexagon Project Manager has verbally communicated with the Customer to (i) identify the Project Start date and (ii) coordinate a date for the Project Kickoff Meeting.
- Customer has assigned a Customer Project Manager.
- The Core Team has reviewed this SOW.

Task Assumptions

- The Hexagon Project Manager will conduct the kickoff.
- This Task will be conducted on site.
- Some members of the Hexagon Project Team may participate remotely.

Hexagon Team Participation and Responsibilities

Hexagon shall:

- Review the Project organization, roles, and responsibilities with the Customer;
- Conduct an overview of the Project including a review of the SOW to verify all aspects of the Project approach;
- Review the draft Updated Initial Project Schedule and adjust the Updated Initial Project Schedule as needed and mutually agree upon it with Customer;
- Work with Customer to identify and document any potential Project risks;
- Provide meeting minutes that document risks and action items that affect the Project Schedule, resources, and/or the SOW;
- Inform the Customer of VPN requirements for Project implementation and continued System maintenance;
- Review of delivery methodology;
- Establish status reporting requirements; and
- Provide overview of Standard Interfaces being delivered as part of the Project as identified in Attachment H.

Customer Team Participation and Responsibilities

Customer shall:

- Review the SOW;
- Ensure its Core Teams attend the applicable portions of the Kickoff Meeting;
- Provide SMEs and any other resources as recommended by the Customer and Hexagon Project Managers;
- Provide Hexagon with VPN access and individualized user accounts to Customer's System as appropriate for this Project and continued software maintenance;
- Have previously reviewed the Updated Initial Project Schedule and work with Hexagon to finalize the Updated Initial Project Schedule;
- Provide location and logistical support for Kickoff Meeting; and
- Designate and prepare workspace for Hexagon personnel.

Task Acceptance Criteria

This Task is complete at the conclusion of the Project Kickoff Meeting and delivery of the Project Kickoff meeting minutes to Customer.

2. COTS Interface Questionnaire Completion (Police and Fire)

Task Description

Hexagon will provide an interface questionnaire ("COTS Interface Questionnaire") to the Customer to complete. The Customer shall complete the COTS Interface Questionnaire within five (5) Business Days of receipt ("COTS Interface Review Period") whereupon Hexagon will be able to install the COTS Interface and configure it based upon the information provided in the COTS Interface Questionnaire subject to the functionality and features within the COTS version of the Interface.

The following Interfaces are regarded as the COTS Interfaces (collectively, "COTS Interfaces"):

- I/Page
    - For San Bernardino County ISD Paging (Fire)
    - For Nixle (Police and Fire)
- I/CADLink
    - For ImageTrend FRMS/EMS RMS (Fire)
    - For unknown law RMS vendor (Police)
    - For SPIDR Tech
    - For First Watch
    - For Rip N Run
- I/FRMS – CADLink (Fire)
    - For FirstDue
- I/PTT (Police and Fire)
    - For Motorola MCC7500
- I/Telephone Device for the Deaf (I/TDD) (Fire and Police)
    - For Vesta
- RapidSOS for I/CAD Essentials (Police and Fire)
- I/Informer to I/CAD Message Ste for CA State Switch (CLETS) (Police)
- ProQA (Fire)
- I/Sight Interface to Genetec Video Management System (Police and Fire)
- ANI/ALI Interface (included with I/Executive – High Availability) (Police and Fire)

For more information on, parameters of, and assumptions underlying the COTS Interfaces, see Attachment H, Interface Descriptions.

Task Deliverables

- Completed COTS Interface Questionnaires

Task Prerequisites

- Project Kickoff Meeting Task is complete.
- Hexagon has submitted COTS Interface Questionnaires to Customer.

Task Assumptions

- The Customer will direct its third-party vendors to provide any API or specification documentation required to configure the COTS Interfaces.
- If required, all NDAs between Hexagon and third parties will be executed and current. The Customer will exercise all reasonable efforts to facilitate its third-party vendors reasonable cooperation with this requirement.
- The Customer will exercise all reasonable efforts to facilitate cooperation and information from its third-party vendors and/or state agency as reasonably necessary for the configuration, testing, and Cutover of the COTS Interfaces.
- Unless otherwise provided in the Specifications, only COTS versions of the COTS Interfaces will be provided and configured.

- The ANI/ALI interface component of the CAD System will provide the interface to an ANI/ALI controller. It will accept ANI/ALI packets containing ASCII data via an Ethernet Network (TCP/IP) or a Serial COM Port connection. If the Customer's ANI/ALI feed is via Serial COM Port the Customer will need to obtain an Serial to IP device.

Hexagon Team Participation and Responsibilities

Hexagon shall:

- Review completed COTS Interface Questionnaires.

Customer Team Participation and Responsibilities

Customer shall:

- Promptly review, complete, and submit COTS Interface Questionnaires and provide comments, questions, or approval within the COTS Interface Review Period.

Task Acceptance Criteria

This Task is complete upon Hexagon providing the COTS Interface Questionnaires and reviewing Customer's responses it provided within the COTS Interface Review Period.

3. CAD Map Overview (Police and Fire)

Task Description

This Task introduces the Customer GIS core team to the requirements and concepts involved in the development of the CAD map dataset and visual representation. Topics include, but are not limited to:

- Introduction to the CAD GIS data model
- Descriptions of the GIS data required for CAD functionality
- Descriptions of the GIS data relational model (how the data works together)
- Optional GIS data elements that can be used by CAD
- If time permits, a demonstration of the CAD map build process and utilization of layers and review of our pre-build analytics. If not, it will be completed in a subsequent Map Build workshop

This session, lasting no more than two Business Days, will use Hexagon-provided GIS data for the purposes of discussion. Hexagon will use its equipment to conduct any demonstrations that may occur. Customer attendance should be limited to GIS professionals with responsibility for the creation and maintenance of Customer GIS data. Up to six (6) Customer personnel may attend. After this session, the Customer will be provided a document titled “Map Data Specifications,” which details the required data elements for both disparate data sets provided by Customer and City of Corona.

Task Deliverables

- Map data specifications document

Task Prerequisites

- Project Kickoff Meeting Task is complete.

Task Assumptions

- This workshop shall last no more than two (2) Business Days.

Hexagon Team Participation and Responsibilities

Hexagon shall:

- Conduct the remote Map Overview Workshop.

Customer Team Participation and Responsibilities

Customer shall:

- The GIS/Map Administrator will be involved throughout this task;
- Designate and assign no more than five (5) Customer mapping/GIS personnel to attend the entire workshop. Four (4) additional people may attend training as observers/auditors; and
- Ensure that all appropriate Customer GIS professionals are sufficiently trained and experienced in GIS fundamentals.

Task Acceptance Criteria

The Task is complete after the Map Overview is conducted.

4. Custom Interface Requirements Gathering (Police and Fire)

Task Description

During this Task, Hexagon and Customer will meet via conference call to validate the assumptions and design of each CAD Custom Interface identified in this SOW and Attachment H (Interface Descriptions). This Custom Interfaces Requirements Gathering workshop is intended to contain a series of discussions to validate the requirements and assumptions underlying the Custom Interfaces. These sessions should include third-party vendors where appropriate. During the sessions, the specific workflow and data requirements for each of the interfaces listed below will be discussed in detail.

The information obtained in combination with the information in Attachment H will be used to develop an Interface Control Document for each Custom Interface. If the assumptions reflected in Attachment H materially change, a Change Order may be appropriate. The ICDs will become the foundation for the Custom Interface development by Hexagon. Once an ICD is mutually approved, it should only be modified through a Change Order. The Customer shall not make any changes to and shall take appropriate actions to prevent its third-party vendor from making substantive changes to the third-party software that is the subject of a Custom Interface once that Custom Interface's respective ICD has been finalized.

The following are regarded as "Custom Interfaces" as the term is defined in Attachment I of this SOW:

- I/Informer Query to FirstDue (Fire)
- I/Informer to JIMS (Police)
- I/CAD Rave Mobile Safety Interface (Smart911) (Fire)
- I/CAD Import from Telestaff Fire)
- I/Informer Query to Legacy Tiburon RMS
- I/CAD OnGuard/ACAMS interface

For descriptions and assumptions regarding each Custom Interface listed above, please see Attachment H: Interface Descriptions.

As it pertains to the development of the ICD, the parties shall follow the following process. After the Customer provides the necessary information regarding the Custom Interface, Hexagon will prepare a draft ICD for each Custom Interface. Hexagon will then provide the initial draft ICD to the Customer for its review. The Customer shall review the draft ICD and provide any feedback or comments within ten (10) Business Days. As appropriate, Hexagon will incorporate the feedback into the ICD or advise the Customer why certain requests could not be included (e.g. the request conflicted with Attachment H) and finalize the ICD. Hexagon will provide the finalized ICD to the Customer for its written acknowledgement. The Customer will provide a response within three (3) Business Days from Hexagon providing the finalized ICD.

Task Deliverables

- Workshop meeting minutes, to include notes on the specific workflow and data requirements for each custom interface proposed
- ICD documents

Task Prerequisites

- Project Kickoff Meeting Task is complete.

Task Assumptions

- This Task will be conducted remotely
- The Customer will coordinate interactions with the third-party vendors, including obtaining and providing any API or specification documentation required to develop the proposed interfaces.
- If required, all NDAs between Hexagon and third parties will be executed and current. Customer is responsible for facilitating its third-party vendors reasonable cooperation with this requirement.
- The Customer is responsible for obtaining cooperation and information from its third-party vendors and/or state agency as reasonably necessary for the development, testing, and cutover of the interfaces.

Hexagon Team Participation and Responsibilities

Hexagon shall:

- Lead the interface requirements gathering process and track outstanding items requiring resolution;
- Confer with Customer and third-party points of contact to gather information required to develop ICDs;
- Validate the third-party points of contact are appropriate sources of information necessary to develop ICD;
- Mutually agree with the third-party vendors on the operational and technical interface requirements;
- Gather all available interface data detailed schema, protocols, and specifications, as needed;
- Prepare draft ICDs and submit to Customer for feedback;
- Incorporate Customer feedback into draft ICDs;
- Finalize ICDs for Customer review and approval; and
- Manage the approved ICDs consistent with the change control process.

Customer Team Participation and Responsibilities

Customer shall:

- Identify and set up appropriate facilities;
- Provide points of contacts who are knowledgeable of the workflow and data requirements for Customer hardware and software components with which the Custom Interfaces will interact;
- Provide or have available all necessary information during the workshop to facilitate the creation of the ICD;
- Promptly review all draft ICD submissions and provide comments, questions, or approval within ten (10) Business Days of receipt; and
- Agree to and sign the ICDs before any development work can begin. Failure to approve in a timely manner may impact Project Schedule and incur additional cost.

Task Acceptance Criteria

This Task is complete upon completion of all ICDs and execution of the ICDs by both Hexagon and the Customer.

5. Custom Interface Development (Police and Fire)

Task Description

During this Task, Hexagon will develop the Custom Interfaces based upon the ICDs that were created from the Custom Interface Requirements Gathering Task.

Task Deliverables

- Custom Interface documentation

Task Prerequisites

- Custom Interface ICDs have been executed by each Party.

Task Assumptions

- Any changes to a third-party interface developed by Hexagon that will alter the agreed-upon ICD will have to be reflected in a mutually executed document, which may include a Change Order.
- Development of the Custom Interface shall not commence until the signed/approved ICD is returned to Hexagon. Failure to approve in a timely manner may impact project schedule and incur additional cost.

Hexagon Team Participation and Responsibilities

Hexagon shall:

- Develop the Custom Interfaces based upon the ICD.

Customer Team Participation and Responsibilities

Customer shall:

- Ensure SMEs are available as needed; and
- Obtain third-party cooperation as reasonably requested by Hexagon.

Task Acceptance Criteria

This Task is complete when all Custom Interfaces are developed.

Staging Phase

6. Physical Infrastructure Installation (Police and Fire)

Task Description

This Task involves Customer physically installing the servers and storage into the datacenter and the configuration of the physical servers and storage that will host the virtual environment.

Task Deliverables

- Customer staging of the physical infrastructure

Task Prerequisites

- Project equipment is ordered and received.
- Customer must have the license keys for VMware, SQL and Windows software. If such license keys were purchased by Hexagon for Customer, then Customer will have received an email and shall have downloaded these license keys (See Attachment F).
- The Customer has completed the Infrastructure Build Document provided by Hexagon which includes a list of server names and Ips and service account requirements and other various information.

Task Assumptions

- Servers will be created\provided for staging the Hexagon software and are for the sole purpose of Hexagon Software and will not serve other roles.

Hexagon Team Responsibilities

Hexagon shall:

- Provide the VM templates to the customer via electronic download (FTP, File copy, etc.) There will be two (2) files totaling approximately 50GB; and
- Assist the Customer with importing the Hexagon-provided templates to the templates datastore. All VMs will be created from these templates.

Customer Team Responsibilities

Customer shall:

- At each site:
    - Provide Rack Space for the server equipment;
    - Provide Power in the rack;
    - Provide Network connections for the provided equipment on the appropriate VLANs;
    - Provide adequate cooling for the servers;
- Provide required server names and Ips for all of the equipment;
- Provide domain level credentials for the vCenter server and to join servers to the domain;
- Provide assistance with resolving issues related to network connectivity and\or remote access;
- Add ESX Host names as static DNS Entries for name resolution;
- Perform the physical installation of the Project equipment in Customer datacenter or location specified in advance by Customer;

- Connect the HP ILO or Dell iDRAC, assigning an IP Address and\or license to those to allow remote access;
- Make connections between the servers and storage, as required;
- Assign an IP Address to the storage array to allow connectivity for full configuration;
- Connect to the servers install\license the ESX host OS if required;
- Configure storage to be presented to the hosts;
- Configure the networking on each host to provide two (2) virtual switches each configured with two (2) NICs. The first vSwitch will support Vmware management connectivity and vMotion (10 gig). The second vSwitch will support the Production VM traffic (1 gig); and
- Configure the vSwitch that will be utilized by the virtual Kemp load balancers to change the following settings:
    - MAC address changes from reject to accept.
    - Forged Transmits from reject to accept.
- Answer other configuration questions as they arise.

Task Acceptance Criteria

This Task is complete when: (i) (a) Customer has all designated Project server hardware staged and (b) the physical servers and storage that will host the virtual environments configured and, (ii) Hexagon has provided the VM templates to the Customer.

7. Virtual Server Installation and Configuration (Police and Fire)

Task Description

This Task is for creation and configuration of the Project virtual machines (VMs). It includes the creation of the VMs, setting server names and Ips, joining them to the domain and adding the Hexagon CAD Admin groups to the local admins groups of the servers to provide the implementers the required access for the rest of the Project. Hexagon will provide Server Configuration Documentation as part of this Task.

Task Deliverables

- Server Configuration Documentation

Task Prerequisites

- Physical Infrastructure Installation Task is complete.
- Customer must have available virtual environment resources for staging of project VMs
- VPN credentials and client (if needed) must be provided to the Hexagon Project Manager
- Complete the Server name, IP Address and Service account template provided by Hexagon

Task Assumptions

- All work being performed by Hexagon for this task will be performed remotely
- servers will be created/provided for the sole purpose of the Project defined by this SOW and will not serve other roles
- Access to the vCenter server via Power CLI is required by the Hexagon staff to script the creation of the VMs

Hexagon Team Participation and Responsibilities

Hexagon shall:

- Import VM Templates to vCenter, create the VMs, assign them the required CPU, memory, and disk space to comply with the Attachment E
- Join the VMs to the domain
- Apply current Windows updates if Internet connectivity or access to another repository for updates is available
- Create and deliver the Server Configuration Documentation
- Configure Hexagon Licensing Servers
- Provide spreadsheet with server names, Ips, and passwords utilized
- Provide updated Visio document showing servers, applications installed, names, and Ips

Customer Team Participation and Responsibilities

Customer shall:

- Assist with the import of the VM Templates
- Provide domain level credentials for the vCenter server and join servers to the domain
- Provide assistance with resolving issues related to network connectivity and/or remote access
- Answer other configuration questions as needed

Task Acceptance Criteria

This Task is complete when the Server Configuration Documentation has been delivered to Customer.

8. SQL AlwaysOn Configuration (Police and Fire)

Task Description

This Task is for creation and configuration of the SQL AlwaysOn Availability group and the underlying Windows Failover Cluster. The creation of the Windows Failover Cluster includes all nodes, even those at other sites. Once the Availability Group is created, Hexagon will perform failover between all nodes to verify functionality.

Task Deliverables

- Functional SQL AlwaysOn Availability Group

Task Prerequisites

- Database servers for the project are created and joined to the domain.
- SQL Service account created, and credentials provided to Hexagon.
- SQL Cluster AD Objects must be pre-staged.
- VPN credentials and client (if needed) must be provided to the Hexagon Project Manager.

Task Assumptions

- Customer is using SQL Enterprise

Hexagon Team Participation and Responsibilities

Hexagon shall:

- Create the Failover Cluster and SQL AlwaysOn Configuration; and
- Test failover of the cluster and SQL AlwaysOn Availability Group to all nodes.

Customer Team Participation and Responsibilities

Customer shall:

- Create the SQL Service account meeting the following requirements.
    - It must be a domain level account
    - It should have a complex password
    - The password should be set to never expire (this does not mean it cannot be changed but that it needs to be done in a controlled fashion)
    - The account needs full control of the AD Computer objects that will participate in the cluster
    - The account should be a local admin on the DB Servers in the cluster
- Pre-stage the Active Directory SQL cluster objects
    - Reference article https://technet.microsoft.com/en-us/library/dn466519.aspx
    - Create the cluster object
    - Grant the service account full control
    - Disable the account
- Pre-stage the AlwaysOn Listener

- Reference Article http://stackoverflow.com/questions/13717574/sql-availability-group-listener-creation-fails
- Create the object
- Grant the cluster computer object full control of the listener object
- You can disable it, but it is not required.

- Provide the cluster name and IP Address(es) to Hexagon. Multiple Ips are required if the cluster spans subnets.
- Provide the AlwaysOn Listener Name and IP to Hexagon. Multiple Ips are required if the cluster spans subnets.
- Provide assistance with resolving issues related to network connectivity and/or remote access
- Answer other configuration questions as needed

Task Acceptance Criteria

This Task is complete when the SQL AlwaysOn configuration is complete and staged on the server(s) that will become the production system upon Cutover.

9. CAD Server Software Staging (Police and Fire)

Task Description

Hexagon will install and perform initial configuration of the CAD Software on the server hardware designated by the Customer that will act as the production environment at Cutover. This Task involves creating the directory, setting up folder permissions, and installing and setting up Hexagon software. Unless otherwise described herein, Hexagon will install the Software in its customary fashion. Software installed during this Task does not constitute a fully functional configured system. Additional configuration tasks are defined later in this SOW. This Task will be performed in tandem with System Build 1 Task below.

Hexagon will provide the following Services as part of this Task ("Software Staging Services"):

- Server Setup Verification
  - Hexagon resources will remotely connect to the servers and verify they have been set up according to the Hexagon setup standards. If no discrepancies are found, server Software installation will proceed
  - Any deviation from the server setup standards will be documented and provided to the Hexagon and Customer Project Managers. The Hexagon resource assigned to this Task will determine if the deviation affects Task completion and notify the Hexagon Project Manager who will further assess impacts
  - Any deviation that affects Task completion will cause this task to be aborted and re-scheduled. All tasks dependent upon completion of this task are subject to schedule change
- Software Installation
  - Hexagon resources will remotely stage and install Hexagon software components on the Customer-designated server hardware. Software installation details will be provided in the site-specific configuration document after Cutover

Task Deliverables

- Documentation of any deviation from the server setup standards (as applicable)
- Software installation details will be provided in the Site Configuration Document (as defined in the CAD System Configuration Workshop Task below) after Cutover
- Hexagon-approved checklist documenting Software staging completion
- Installation of COTS Hexagon server Software
  - Includes installation of I/NetViewer and I/NetDispatcher

Task Prerequisites

- Production system hardware fully installed, racked, cabled, powered, and on the network
- Operating system fully installed, updated, configured, and joined to the Customer domain
- Hard disk configuration completed per Hexagon requirements
- Customer specific/enterprise applications installed and configured (remote management, anti-virus, etc.)
- Hexagon domain user account(s) created and provided with local administrative privileges on all server hardware to be staged under this task
- Remote access enabled on all servers for the Hexagon users' account(s)
- VPN credentials and client (if needed) provided to the Hexagon Project Manager

Task Assumptions

- SQL Server ordered and ISO or media available in order to license the SQL Server instances being installed during this step
- All Activities will be performed remotely by Hexagon resources
- Hardware designated by the Customer for staging CAD is for the sole purpose of CAD staging and will not serve other roles
- Server(s) not defined as production servers upon Cutover are not included in this task

Hexagon Team Participation and Responsibilities

Hexagon shall:

- Install the current release of I/CAD Software as listed and any additional software included as part of this SOW on the staging production servers

Customer Team Participation and Responsibilities

Customer shall:

- Answer Hexagon's questions as needed to complete the Activities within this Task
- Deploy items as indicated above in the Task Prerequisites and Assumptions

Task Acceptance Criteria

This Task is complete when all designated COTS CAD software and associated server software has been staged on the servers(s) that will become the production environment upon Cutover.

10. CAD Map Build 1 (Police and Fire)

Task Description

During CAD Map Build 1, Hexagon will analyze the Customer-supplied (including City of Corona) map data over the course of five (5) Business Days. Hexagon will assess the supplied data's suitability for processing into the Hexagon CAD map, focusing on street centerlines and point addresses. Hexagon will also analyze topologic validity, attribution values, address parsing, aliasing and other critical map features. Hexagon will summarize its analysis in a report titled "Map Data Analysis Report" that identifies potential data issues and provides recommendations for schema changes and data pre-processing. Customer will be responsible for correcting issues detailed in the Map Data Analysis Report.

If the Customer-supplied data allows, Hexagon will also generate CAD-ready map data from the Customer-supplied source data, using standard feature types, level structures, and color assignments. Hexagon will create ESZ polygons if available; otherwise, it will generate a single polygon for the entire area.

As part of the Project, the Map Build workshops will include discussions regarding the combination of GIS data from Customer and Corona with the understanding a single map will be utilized by I/CAD.

Task Deliverables

- Map Data Analysis Report (addressing both Customer and Corona GIS data)

Task Prerequisites

- Customer has provided required data as defined in the map data specification guide.
- CAD Map Overview Task is complete.

Task Assumptions

- This Task will occur during five (5) Business Days.

Hexagon Team Participation and Responsibilities

Hexagon shall:

- Review Customer-supplied source data; and
- Provide the Map Data Analysis Report

Customer Team Participation and Responsibilities

Customer shall:

- Ensure Customer's GIS professionals are available as needed to assist Hexagon with this task;
- Supply Hexagon with source data in a format compatible with the ArcGIS environment (e.g., shape-files) at least one full week prior to scheduled analysis;
- Provide information on the source data schema to aid in mapping attribution to the CAD Map schema;
- Review the Map Data Analysis Report; and
- Correct data issues reported by the data analysis process prior to the CAD Map Build 2.

Task Acceptance Criteria

This Task is complete upon delivery of the Map Data Analysis Report.

11. CAD System Build 1 (Police and Fire)

Task Description

The objective of this Task is to provide the Customer with a basic CAD System that Hexagon can use for subsequent configuration and training tasks. To prepare for this Task, the Customer shall collect the data required to configure the CAD System to reflect its data and workflows, which should be consistent with the Project Requirements. This Task and other System Build Tasks will not include the Interfaces.

Hexagon will provide a review of those topics and the CAD application to re-familiarize the Core CAD Project Team with CAD features, including event processing, dispatching, map utilization and inquiries. Hexagon will also begin to build the production CAD system, entering some Customer-specific CAD configuration data as it walks the Core CAD Project Team through the system features during CAD System Build 1 workshop, which will consist of one (1) onsite workshop that shall last no longer than four (4) Business Days.

Hexagon will review with the Customer how the CAD database software is installed and set up, CAD Database Management (CADDBM) functionality, and the CAD database table structure. Hexagon will also begin entering CAD configuration data provided by the Customer. During this week, the Customer should provide Hexagon with the following types of data:

- Agency
- Number
- Event type
- Unit
- Vehicle
- Stations

Task Deliverables

- CAD System Build 1

Task Prerequisites

- CAD Server Software Staging Task is complete.
- Customer completion of necessary Data Gathering Worksheets for applicable data

Task Assumptions

- This Task will be conducted on site at a Facility.
- This Task will last no more than four (4) Business Days.

Hexagon Team Participation and Responsibilities

Hexagon shall:

- Provide services for the initial Hexagon CAD System database build of the production CAD and interface servers;
- Install Hexagon CAD Software in accordance with the CAD Server Software Staging Task;
- Work in collaboration with the Customer's Core CAD Project Team to load and/or import site specific data into the Hexagon I/CAD System;
- Install preliminary Hexagon CAD Subsystem map;

- Install Hexagon CAD System client workstations to support system configuration and training tasks; and
- Conduct System Build 1 on-site lasting no longer than four (4) business days.

Customer Team Participation and Responsibilities

Customer shall:

- Ensure appropriate Customer personnel are available for the System Build sessions;
- Provide remote access;
- Observe installation and begin to develop an in-depth understanding of the CAD System;
- Participate fully during joint system build-out sessions; and
- Gather data required to populate system tables as required by the CAD System

Task Acceptance Criteria

This Task is complete at the conclusion of CAD System Build 1 workshop.

12. CAD System Build 2 (Police and Fire)

Task Description

In this Task, Hexagon will continue System build with the Customer during the second workshop of the system build sessions. This task will consist of one (1) onsite workshop over four (4) days conducted on-site. As part of CAD System Build 2 workshop, the Customer shall provide Hexagon with the following types of data:

- Deployment and recommendation planning
- ESZs
- Beats
- Dispatch groups
- Deployment plans
- Response requirements
- Response plans
- Continue data build, including but not limited to:
  - Personnel
  - Out of service
  - Dispositions
  - Lineups

Task Deliverables

- CAD System Build 2 workshop.

Task Prerequisites

- CAD System Build 1 Task is complete.
- Customer completion of necessary Data Gathering Worksheets for applicable data

Hexagon Team Participation and Responsibilities

Hexagon shall:

- Provide services for the initial Hexagon CAD System database build of the production CAD and interface servers;
- Install Hexagon CAD Software to support a multi-agency configuration (Law, Fire, and EMS);
- Work in collaboration with the Customer's Core CAD/MPS Project Team to load and/or import site specific data into the Hexagon CAD System;
- Install preliminary Hexagon CAD System map;
- Install Hexagon CAD System client workstations to support system configuration and training tasks; and
- Conduct CAD System Build 2 workshop on-site lasting no longer than four (4) business days.

Customer Team Participation and Responsibilities

Customer shall:

- Ensure appropriate Customer personnel are available for the System Build sessions;
- Provide the data described above by the commencement of CAD System Build 2 workshop;
- Provide remote access;
- Observe installation and begin to develop an in-depth understanding of the CAD System;
- Participate fully during joint system build-out sessions; and
- Gather data required to populate system tables as required by the CAD System

Task Acceptance Criteria

This Task is considered complete at the conclusion of the CAD System Build 2 workshop.

13. CAD System Build 3 (Police and Fire)

Task Description

During this Task, Hexagon and Customer will finish the CAD System data build workshops and begin the department specific configuration discussion. This configuration will address more advanced CAD functionality, including Department-specific and advanced functions. By the end of this week, the Core CAD/MPS Project Team will have an in-depth understanding of CAD and be able to test configuration data and establish scenarios for upcoming configuration work. This task will consist of one (1) onsite workshop over four (4) days conducted on-site.

Task Deliverables

- Conduct the CAD System Build 3 workshop.

Task Prerequisites

- CAD System Build 2 Task is complete.
- Customer completion of necessary Data Gathering Worksheets for applicable data

Hexagon Team Participation and Responsibilities

Hexagon shall:

- Provide services for the initial Hexagon I/CAD System database build of the production CAD and interface servers;
- Install Hexagon I/CAD base software to support a multi-agency configuration (Law, Fire, and EMS);
- Work in collaboration with the Customer's Core CAD/MPS Project Team to load and/or import site specific data into the Hexagon I/CAD System;
- Install preliminary Hexagon I/CAD System map;
- Install Hexagon I/CAD System client workstations to support system configuration and training tasks; and
- Conduct CAD System Build 3 workshop on-site lasting no longer than (4) business days.

Customer Team Participation and Responsibilities

Customer shall:

- Ensure appropriate Customer personnel are available for the System Build sessions;
- Provide remote access;
- Observe installation and begin to develop an in-depth understanding of the CAD system;
- Participate fully during joint system build-out sessions; and
- Gather data required to populate system tables as required by the CAD System

Task Acceptance Criteria

This Task is considered complete at the conclusion of CAD System Build 3 workshop.

Configuration Phase

14. I/CAD Essentials Workshop for Core Team (Police and Fire)

Task Description

During this task, Hexagon will present the I/CAD Essentials Workshop for Core Team workshop directly to Customer Core Team personnel to provide a complete overview of the I/CAD applications. This five (5) Business Day on-site workshop familiarizes the Core Team with the basic features of I/CAD including event processing and dispatching, as well as map utilization and inquiries so that the analysis of workflows and testing of data can begin in earnest. This course combines Calltaking Essentials, Dispatching Essentials, Advanced I/CAD Functions (where appropriate) course work.

Major topics include:

- Call Creation and Update
- Map View Control
- Event and Personnel Inquiries
- Sending Messages
- Recommending and Dispatching Units
- Updating Unit Statuses
- Modifying Unit Properties
- Updating Unit Related Event Information
- Querying Unit and Event Data
- Performing Fire Specific Operations – Update Alarm, Relocate (Move Up) Units
- Performing EMS Specific Operations – Divert Hospital
- Supervisor Specific Commands
- Advanced I/CAD Commands
- Interfaces for Users (I/PTT, I/FSA, and I/MDT for example)

Task Deliverables

- Workshop agenda, handouts, notes, and other applicable documents as needed

Task Prerequisites

- CAD System Build 3 Task is complete.
- Customer has identified and secured an appropriate workshop room and set up with the workstations, at least one LCD projector, display screen or other appropriate surface to display a projected image, and white-board space or other ability to take notes and record questions
- The Customer has installed and configured at least 1 workstation for use by the Hexagon instructor during the sessions
- The Customer has installed and configured at least 1 workstation per student attending the session

Task Assumptions

- The workshop shall take place in a Facility provided by Customer.
- The maximum workshop day is eight (8) hours in length, including breaks; and

- See the training course descriptions in Attachment D for class size limitations

Hexagon Team Participation and Responsibilities

Hexagon shall:

- Conduct the workshop to provide a complete overview of the I/CAD applications on-site over five (5) days.

Customer Team Participation and Responsibilities

Customer shall:

- Participate in the workshop.

Task Acceptance Criteria

This Task will be complete when Hexagon has delivered the I/CAD Essentials workshop to the Customer.

15. CAD System Configuration 1 (Police and Fire)

Task Description

During this Task, Hexagon will conduct the "I/CAD System Configuration 1," which will last no longer than four (4) Business Days. Hexagon shall assist the Customer's Core Team in defining its workflows using the I/CAD suite of applications and building upon Hexagon's initial configurations to I/CAD. Before and during this process, specific configuration needs will become apparent including graphical user interface adjustments, parameter settings, and other special configuration tasks that may be required to accomplish the Customer's operational requirements. These configuration tasks will be identified and possibly designed and completed during this week.

Major topics will include:

- Customer I/CAD Workflow Definition
- Identification of Necessary Graphic User Interface (GUI) Modifications, Parameter Setting Changes, Command Line Definitions and Other Configuration Specifics
- Make recommendations for workflow modifications or configuration changes to enhance efficiency
- Execution of configuration changes, if time allows

Following CAD System Configuration 1, workshop, Hexagon will perform three (3) days of independent work on outstanding configuration requests identified during the workshop ("Configuration 1 Period"). Any configurations not completed during the Configuration 1 Period shall be the Customer's responsibility to complete. The Customer shall complete its configurations to the CAD System related to the topics listed above within two (2) weeks

Task Deliverables

- I/CAD Configuration Workshop 1
- Identification and documentation of all workflows requiring special attention
- Execution of configuration changes, if time allows

Task Prerequisites

- I/CAD Essentials Workshop for Core Team Task is complete.

Task Assumptions

- The workshop will be conducted on site and last four (4) Business Days.
- The Configuration 1 Period will be conducted remotely.

Hexagon Team Participation and Responsibilities

Hexagon shall:

- Make recommendations for workflow modifications or configuration changes to enhance efficiency.

Customer Team Participation and Responsibilities

Customer shall:

- Identify appropriate personnel to attend training and ensure schedules align;
- Provide necessary information or documents pertaining to its workflows and operating procedures to be utilized with the CAD System; and
- Work on configurations in the week between the completion of I/CAD Configuration Workshop 1 and /CAD Configuration Workshop 2.

Task Acceptance Criteria

This Task will be complete when Hexagon has delivered the I/CAD Configuration Workshop 1 to Customer and the Configuration 1 Period is complete.

16. CAD System Configuration 2 (Police and Fire)

Task Description

The objective of this Task is to continue to familiarize the Customer with the configurability of the I/CAD Software to facilitate configuration for its call-taking and dispatching operations as well as its administrative and supervisory operations.

During this Task, Hexagon will conduct the on-site "I/CAD System Configuration 2," which will last no longer than four (4) Business Days. Hexagon shall assist the Customer's Core Team in defining its workflows using the I/CAD suite of applications. Before and during this process, specific configuration needs will become apparent including graphical user interface adjustments, parameter settings, and other special configuration tasks that may be required to accomplish the Customer's operational requirements. These configuration tasks will be identified and possibly designed and completed during this week.

Major topics will include:

- Customer I/CAD Workflow Definition
- Identification of Necessary Graphic User Interface (GUI) Modifications, Parameter Setting Changes, Command Line Definitions and Other Configuration Specifics
- Make recommendations for workflow modifications or configuration changes to enhance efficiency
- Execution of Configuration Changes, if time allows

Following CAD System Configuration 2, workshop, Hexagon will perform three (3) days of independent work on outstanding configuration requests identified during the workshop ("Configuration 2 Period"). Any configurations not completed during the Configuration 2 Period shall be the Customer's responsibility to complete. The Customer shall complete its configurations to the CAD System related to the topics listed above within two (2) weeks..

Task Deliverables

- I/CAD Configuration Workshop 2
- Identification and documentation of all workflows requiring special attention
- Execution of configuration changes, if time allows

Task Prerequisites

- I/CAD System Configuration 1 Task is complete.

Task Assumptions

- The workshop will be conducted on site and last four (4) Business Days.
- The Configuration 2 Period will be conducted remotely.

Hexagon Team Participation and Responsibilities

Hexagon shall:

- Make recommendations for workflow modifications or configuration changes to enhance efficiency.

- Work on configurations in the week between the completion of I/CAD Configuration Workshop 2 and /CAD Configuration Workshop 3

Customer Team Participation and Responsibilities

Customer shall:

- Identify appropriate personnel to attend training and ensure schedules align; and
- Complete configurations related to the topics listed above in the week following the CAD System Configuration 2 workshop.

Task Acceptance Criteria

This Task is complete when Hexagon has delivered the I/CAD Configuration 2 Workshop to Customer and the Configuration 2 Period is complete.

17. CAD System Configuration 3 (Police and Fire)

Task Description

The objective of this Task is to continue to familiarize the Customer with the configurability of the I/CAD Software to facilitate configuration for its call-taking and dispatching operations as well as its administrative and supervisory operations with respect to Fire.

During this Task, Hexagon will conduct the on-site "I/CAD System Configuration 3," which will last no longer than four (4) Business Days. Hexagon shall assist in defining its workflows using the I/CAD suite of applications. Before and during this process, specific configuration needs will become apparent including graphical user interface adjustments, parameter settings, and other special configuration tasks that may be required to accomplish the Customer's operational requirements. These configuration tasks will be identified and possibly designed and completed during this week.

Major topics will include:

- Customer I/CAD Workflow Definition
- Identification of Necessary Graphic User Interface (GUI) Modifications, Parameter Setting Changes, Command Line Definitions and Other Configuration Specifics
- Make recommendations for workflow modifications or configuration changes to enhance efficiency
- Execution of configuration changes, if time allows

Following CAD System Configuration 3 workshop, Hexagon will perform up to three (3) days of independent work on outstanding configuration requests identified during the workshop ("Configuration 3 Period"). Any configurations not completed during the Configuration 3 Period shall be the Customer's responsibility to complete. The Customer shall complete its configurations to the CAD System related to the topics listed above no later than the commencement of Customer Functional Testing.

Task Deliverables

- I/CAD Configuration Workshop 3
- Identification and documentation of all workflows requiring special attention
- Execution of configuration changes, if time allows

Task Prerequisites

- I/CAD System Configuration 2 Task is complete.

Task Assumptions

- This workshop will be conducted on site and last four (4) Business Days.
- The Configuration 3 Period will be conducted remotely.

Hexagon Team Participation and Responsibilities

Hexagon shall:

- Make recommendations for workflow modifications or configuration changes to enhance efficiency.

Customer Team Participation and Responsibilities

Customer shall:

- Identify appropriate personnel to attend training and ensure schedules align.
- Complete configurations prior to Customer Functional Testing

Task Acceptance Criteria

This Task will be complete when Hexagon has delivered the I/CAD Configuration Workshop 3 to Customer and Configuration Period 3 is complete.

18. CAD Map Build 2 (Police and Fire)

Task Description

Hexagon will create an updated map build based on feedback from CAD Map Build 1 and the CAD Map Overview. This first map build will incorporate any updated or corrected data (based on the initial Map Data Analysis Report) provided by Customer, as well as design criteria provided by the Customer following the Map Overview. There is also the possibility that additional data sources, attributes, and features may be added to the map. This Task will include a remote four (4) Business Day Activity.

At least two (2) weeks prior to this Task, the Customer will provide Hexagon with a copy of the edited and updated source data, information regarding the desired CAD map display, and any changes the Customer has made to polygon PLY files, feature symbology, or level structure (including modified map files). Hexagon will run a copy of the updated source data through ArcGIS to validate the data. It will apply any additional attributes required and then use the I/Map Editor application to create a CAD-ready dataset. The CAD-ready dataset will consist of map data tables and files, such as the map display file and updated ply file, as applicable. The result of this map build is the creation of a new map dataset ready for installation on the production CAD Subsystem.

Once Hexagon has created a new map dataset ready for installation on the Customer's production CAD Subsystem, the Hexagon CAD Implementation team will remotely connect to the Customer's systems (using VPN, Beyond Trust, Enexity or a similar system) and roll the map dataset to the CAD server. The Map Admin Tool (or other scripts) will be used to copy the map database information into the current CAD Subsystem and copy the map files to the appropriate workstations for testing the new map dataset.

Task Deliverables

- Interim CAD Map build (populated database tables, map display file, routing files, and deployment polygon files)
- Updated Map Analysis Report

Task Prerequisites

- CAD Map Build 1 Task is complete.
- CAD System Configuration 3 Task is complete.

Task Assumptions

- This Task will be occurring remotely over four (4) business days.

Hexagon Team Participation and Responsibilities

Hexagon shall:

- Generate CAD-ready map data from Customer-supplied source, incorporating feature types, level structures, and color assignments, as defined by the Customer;
- Generate the CAD Map;
- Install map from Map Build 2;
- Update the Map Analysis Report; and
- Install/roll interim map build on the production CAD system

Customer Team Participation and Responsibilities

Customer shall:

- Provide Subject Matter Expertise to Hexagon as needed;
- Correct Customer GIS Data issues;
- Ensure that critical data issues reported by the Data Analysis document are corrected prior to submitting dataset for Interim Map Build;
- Supply Hexagon with source data, in a format compatible with the ArcGIS environment (e.g., shape-files) at least two (2) full weeks prior to scheduled map processing; and
- Provide information on the desired CAD map display and any changes the Customer has made to polygon PLY files, feature symbology, and level structure (including modified .map files)

Task Acceptance Criteria

The Task is complete when the interim CAD Map dataset #1 is rolled to the Production CAD environment.

19. CAD Map Build 3 (Police and Fire)

Task Description

During this Task, Hexagon will conduct I/Map Editor for ArcGIS training, and guide the Customer through the installation of the final map build. The Map Editor training will cover how the source street centerline and address point data are used in the creation of the CAD database information. The ArcGIS training is specific to the data used in the CAD map and will cover text generation within CAD. This Task includes a remote four (4) day Activity.

Prior to this Task, the Customer should complete the correction of all source data issues noted as critical in the Map Data Analysis Report. The final map build will incorporate updated and corrected data and feature symbology definitions supplied by the Customer. The Customer should arrange to bring in call takers and/or dispatchers for short sessions during this Task to provide a forum for allowing their input into the process. During the installation of this map build in the Customer's production CAD application, the Customer will take the lead and Hexagon will assist.

Task Deliverables

- Final map build

Task Prerequisites and

- CAD Map Build 2 Task is complete.
- Customer correction of all source data issues noted as critical in the Map Data Analysis Report

Task Assumptions

- This Task will occur during four (4) Business Days

Hexagon Team Participation and Responsibilities

Hexagon shall:

- Provide four (4) days remote training of Map Editor for ArcGIS; and
- Guide the Customer through the installation of the final map build on the production system

Customer Team Participation and Responsibilities

Customer shall:

- Correct all source data issues noted as critical in the Data Analysis report prior to submitting dataset for final map build;
- Ensure availability of appropriate Customer personnel;
- Ensure workstations to be used for the Map Editor and ArcGIS training are functional in the production CAD environment prior to class;
- Provide source data a format compatible with the ArcGIS environment (e.g. shape-files);
- Provide information on the desired CAD map display and any changes the Customer has made to polygon (PLY) files, feature symbology and level structure (including modified .map files);
- Install and test the final map build on the production CAD environment; and
- Schedule short sessions to have call takers and/or dispatchers provide input regarding the final map build

Task Acceptance Criteria

This Task is complete at the conclusion of the Map Build 3 workshop.

20. Mobile for Public Safety (MPS) Configuration Workshop 1 (Police)

Task Description

During this task, Hexagon will configure MPS for the Customer: providing one (1) combined MPS client build for Law. This task will consist of one (1) on-site workshop.

Note: It is possible not all configuration requests will be fulfilled in the workshop time allotted. Therefore, it is recommended that requests be prioritized in order of importance. If a request includes core product code changes a Service Request (SR) will be filed requesting a Change Request-Enhancement (CR-E). All CR-Enhancement requests to core products are not guaranteed and are at Hexagon's discretion.

Hexagon will conduct one (1) workshop with the Customer Police department over three (3) days to configure the MPS application in preparation for testing. During the workshop, Hexagon will walk the Customer through the MPS configuration and workflows as they pertain to the mobile environment. The workshop will include:

- The Authorize screen (Sign on/Sign off)
- Brief Overview of MPS
- Screen Layout
- Navigation Buttons
- Command Button Form and Direct Mode
- Alerts
- Toolbars
  - Smart Button
- Status Bar
- Indicator Bar
- Menus and Submenus
- Map
  - Situation View
- Organizer
- Messaging
- Unit Monitor
- Event Monitor
- The included Dispatch Report
- Discuss network requirements and ports to ensure the MPS client can communicate appropriately

The Customer will need to make available one Dispatcher familiar with I/CAD to perform dispatching and other I/CAD tasks as necessary during each workshop.

Upon completion of this task, the Customer will have one (1) mobile configuration of the MPS product for testing. Ongoing Customer review of documents after the initial MPS client build has been delivered to the Customer will not preclude completion or acceptance of this task.

Task Deliverables

- One (1) initial combined MPS client build for Law

Task Prerequisites and Assumptions

- Completion of MPS Overview
- Completion of CAD Configuration Task

Hexagon Team Participation and Responsibilities

Hexagon shall:

- Conduct one (1) instance of Mobile for Public Safety Configuration Workshop 1 for Law on-site
- Begin the MPS Configuration Document

Customer Team Participation and Responsibilities

Customer shall:

- Provide mobile SME to Hexagon as needed
- Provide an I/Dispatcher SME to provide feedback on how MPS will affect disptachers and assist with various dispatching tasks
- Participate fully and collaboratively in the configuration sessions with the understanding that Mobile Public Safety client configuration decisions must be documented and agreed upon at the conclusion of these sessions

Task Acceptance Criteria

The task is considered complete when the Mobile Public Safety Configuration Workshop 1 has been provided and one (1) initial combined MPS client build for Law has been delivered.

21. Mobile for Public Safety (MPS) Configuration Workshop 2 (Police)

Task Description

During this task, Hexagon will conduct one (1) instance of MPS Configuration Workshop 2 with the Customer's Police department. The purpose of this workshop is to make minor adjustments based upon the MPS Pilot feedback. This task will consist of one (1) onsite workshop over three (3) days that will include:

- Review of MPS Pilot feedback
- Minor configuration adjustments to MPS

The Customer will need to make available a point of contact responsible for the administration of the MPS product along with network and firewall contacts as necessary (in case of connectivity issues).

Upon completion of this task, the Customer will have one (1) combined Law configuration of the MPS product for testing and MPS end-user training.

Task Deliverables

- One (1) revised MPS client configuration build for Law

Task Prerequisites and Assumptions

- Completion of MPS Configuration Workshop 1 for Law
- Completion of MPS Configuration Workshop 1 Follow-up
- Completion of the MPS Pilot

Hexagon Team Participation and Responsibilities

Hexagon shall:

- One (1) instance on-site of MPS Configuration Workshop 2 for Law
- Update the MPS Configuration Document

Customer Team Participation and Responsibilities

Customer shall:

- Provide mobile SME(s) to Hexagon as needed
- Provide an I/Dispatcher SME to provide feedback on how MPS will affect dispatchers and assist with various dispatching tasks
- Provide a network/firewall contact to Hexagon as needed
- Participate fully and collaboratively in the configuration sessions with the understanding that Mobile for Public Safety client configuration decisions must be documented and agreed upon at the conclusion of these sessions

Task Acceptance Criteria

The task is considered completed at the conclusion of the Mobile Public Safety Workshop 2.

22. Mobile Responder Installation (Police)

Task Description

During this task, Hexagon will remotely install and configure the Mobile Responder application providing one URL for Law.

Mobile Responder Installation will include:

- Remote installation of Mobile Responder Web Service software on the mobile/communications server.
- Remote installation of I/MDT for Mobile Responder software on the mobile/communications server.
- Remote installation of I/Tracker for Mobile Responder software on the mobile/communications server.
- Set up of the server SSL certificate.
- Extraction of pick lists and integration with HTML templates.
- Performing HTML template configuration.
- Providing the Customer with written instructions on how to setup the client application for Apple and Android operating system tablets/smartphones.
- Providing the following I/Informer transactions:
  - Vehicle/VIN
  - Name/Wanted
  - Article
  - Gun
  - Boat
  - Person
    - Driver's License (CLETS)
    - Wanted (CLETS/NLETS/NCIC)
    - JIMS
  - Vehicle
    - Wants/Stolen (CLETS/NLETS/NCIC)
    - Registration (CLETS)
- Verification that the Hexagon software has been configured in accordance with the agreed upon Law configuration for Mobile Responder.
- Performing high level testing on up to the first five (5) client application installations to:
  - Ensure Mobile Responder can communicate with the I/CAD system
  - Demonstrate the client installation and validate the installation instructions

Upon completion of this task, the Customer will have one (1) Law configuration of the Mobile Responder product for testing.

Task Deliverables

- One (1) Mobile Responder client build for Law

Task Prerequisites and Assumptions

- Completion of Mobile for Public Safety workshops
- Completion of CAD Configuration Task
- Customer acquiring and setting up (joining to its domain and initial configuration of OS) requisite Android or Apple based tablets/smartphones and making the test devices available to the Hexagon Core CAD/MPS Project Team for remote access/testing/troubleshooting.

Hexagon Team Participation and Responsibilities

Hexagon shall:

- Install Mobile Responder software for one (1) Law application
- Configure Mobile Responder software for one (1) Law build
- Discuss the limited configuration options available in Mobile Responder

Customer Team Participation and Responsibilities

Customer shall:

- Provide mobile Subject Matter Expertise to assist Hexagon as needed
- Provide an I/Dispatcher SME to provide feedback on how MPS will affect dispatchers and assist with various dispatching tasks
- Participate fully and collaboratively in the configuration with the understanding that Mobile Responder client configuration decisions must be documented and agreed upon at the conclusion of the discussion
- Review and approve the Mobile Responder client configurations
- Provide Mobile Responder end-user training

Task Acceptance Criteria

The task is considered completed at the conclusion of the Mobile Responder Law installation and preliminary connection and access testing of up to five (5) clients.

23. COTS Interface Installation and Configuration (Police and Fire)

Task Description

During this Task, Hexagon will install and unit test the COTS Interfaces in the Customer's Production Environment. Hexagon will be able to install the COTS Interface and configure it based upon the information provided in the COTS Interface Questionnaire subject to the functionality and features existing within the COTS version of the COTS Interface1. To facilitate Hexagon's implementation and configuration of the COTS Interfaces, the Customer shall make available or provide access to all third party software components which are intended to integrate with the Dispatch Subsystem through the COTS Interface(s).

Although the Customer is expected to participate in Hexagon's internal testing of the COTS Interfaces, the Customer will formally test interface functionality during Functional Testing Task.

Task Deliverables

- Installation and configuration of the COTS Interfaces

For more information on the COTS Interfaces, see Attachment H, Interface Descriptions.

Task Prerequisites

- Operation or availability of all external systems or Third-Party Software.
- Completed COTS Interface Questionnaires provided to Hexagon during the COTS Interface Review Period.
- CAD Server Software Staging Task is complete.

Hexagon Team Participation and Responsibilities

Hexagon shall:

- Install COTS Interfaces in the Customer's Production Environment; and
- Unit test interfaces in accordance with the COTS Interface Questionnaires.

Customer Team Participation and Responsibilities

Customer shall:

- Ensure SMEs are available to support Hexagon Activities as needed;
- Verify that physical connectivity and communication has been achieved from Customer's Communication/Interface server to remote system servers and all other third-party systems;
- Provide availability and confirm operation of external systems or third-party software;
- Provide the following information to Hexagon:
    - IP address for remote databases/systems
    - Socket value for remote databases/systems
    - Enter operator IDs (ORIs), terminal mnemonics, etc., as needed by remote databases/systems

- Ensure the system and network administrators are available to work closely with the Hexagon team for the duration of the Task; and
- Ensure third-party cooperation with Hexagon's reasonable requests.

Task Acceptance Criteria

This Task is complete when each COTS Interface is installed and configured in accordance with the COTS Interface Questionnaire.

24. Custom Interface Product Installation and Configuration (Police and Fire)

Task Description

During this Task, Hexagon will install, configure, and test the Custom Interfaces. Although the Customer is expected to participate in Hexagon's internal testing of the Custom Interfaces, the Customer will formally test the Custom Interfaces' functionality during Functional Testing.

Task Deliverables

- Documentation of Custom Interfaces installation/testing

Task Prerequisites

- Operation or availability of the external system or third-party software
- Custom Interface Development Task is complete

Hexagon Team Participation and Responsibilities

Hexagon shall:

- Install Custom Interfaces; and
- Test Custom Interfaces in accordance with the approved ICDs.

Customer Team Participation and Responsibilities

Customer shall:

- Ensure SMEs are available to support Hexagon Activities as needed;
- Verify that physical connectivity has been achieved from Customer's communication server to CAD System
- Provide availability and confirm operation of external systems or third-party software;
- Provide the following information to Hexagon:
    - IP address for remote databases
    - Socket value for remote systems
    - Operator IDs (ORIs), terminal mnemonics, etc., as needed by remote systems
- Ensure the system and network administrators are available to work closely with the Hexagon team for the duration of the Task; and
- Ensure third-party cooperation with Hexagon's reasonable requests.

Task Acceptance Criteria

This Task is complete when each Custom Interface is installed and configured in accordance with the applicable ICD.

25. Standard Interface Product Installation and Configuration (Police and Fire)

Task Description

During this Task, Hexagon will install and configure the Standard Interfaces. The Customer will formally test the interface functionality and reliability during Functional Testing.

The following are regarded as "Standard Interfaces" as the term is defined in Attachment H of this SOW:

- InterCAD CAD Xalt Interface (Fire)
    - To Tablet Command
    - To Corona Police Motorola Flex
- CADFusion CAD Xalt Interface (Police and Fire)
    - To Central Square Hub
- Phoenix G2 CADXalt Interface (Fire)
- Axon CAD Xalt Interface (Police)
- PulsePoint CAD Xalt Interface
- I/CAD Message Ste for CA State Switch (Police)

As part of this Task, Hexagon will provide consulting services to advise Verint and Eventide Logging Recorder (for Police and Fire), Coplink, Vigilant/Flock ALPR, ONTCOM, and FUSUS on how to use the I/CAD API to pull the data they require.

Task Deliverables

- Documentation of Standard Interfaces installation

Task Prerequisites

- CAD System Configuration 3
- CAD Map Builds 1, 2, and 3
- Operation or availability of the external system or third-party software

Hexagon Team Participation and Responsibilities

Hexagon shall:

- Install Standard Interfaces

Customer Team Participation and Responsibilities

- Ensure SMEs are available to support Hexagon Activities as needed;
- Verify that physical connectivity has been achieved from Customer's communication server to CAD System
- Provide availability and confirm operation of external systems or third-party software;
- Provide the following information to Hexagon:
    - IP address for remote databases
    - Socket value for remote systems
    - Operator IDs (ORIs), terminal mnemonics, etc., as needed by remote systems

- Ensure the system and network administrators are available to work closely with the Hexagon team for the duration of the Task; and
- Ensure third-party cooperation with Hexagon's reasonable requests.

Task Acceptance Criteria

This Task is complete when each Standard Interface is installed and configured.

26. OnCall Analytics | Dispatch Configuration (Police and Fire)

Task Description

This Task is Hexagon-led and involves configuring OnCall Analytics | Dispatch with Customer's site-specific parameters.

OnCall Analytics is business intelligence software for reporting, analysis, and evidence-based decision making. It provides reporting and analysis capabilities, which are fully described within a document titled: "HxGN OnCall Analytics | Dispatch: Delivered Models and Reports," which is available upon request. That document describes the types of reports and models available within OnCall Analytics, which may require additional configuration and work by the Customer. Only those reports corresponding to the type of reporting model and Software product included within the Project are available to the Customer.

Required OnCall Analytics | Dispatch Advantage Software:

HARDWARE	DESCRIPTION/USE	ONCALL ANALYTICS DISPATCH SOFTWARE COMPONENTS TO INSTALL
Report Server	The Report Server is a platform that business users will utilize to create, access, view, schedule and manage their reporting content.	Microsoft Power BI Report Server OnCall Analytics | Dispatch (paginated reports and dashboards)
Data Warehouse Server	The Data Warehouse Server is used for the storage of the DW schemas, ETL related jobs and tables. In addition, this server may be used for the report server schemas.	SQL Server Data Tools (SSDT) SQL Server Analysis Services (SSAS) SQL Server Integration Services (SSIS)
Client Workstation	The Client Workstation is used to access, manage and create content.	Power BI Desktop Report Server (RS) Report Builder

Task Deliverables

- Configuration of OnCall Analytics | Dispatch software and components for Customer testing and verification
- Data Dictionary delivered to Customer
- Model and Lineage Report delivered to Customer

Task Prerequisites

- CAD Software Staging Task is complete.
- CAD System Configuration 3 Task is complete.

Task Assumptions

- Hexagon will install the OnCall Analytics | Dispatch solution into the Production Environment.

- Other environments will be the responsibility of the Customer.
- Microsoft Power BI Report Server Note: If on-premise hosting of Power BI content is required, Customer must purchase SQL Server 2022 Enterprise Edition with Software Assurance (which includes the Power BI Report Server necessary for on-premise hosting of Power BI content) or may purchase Microsoft Power BI Report Server separately.

Hexagon Team Participation and Responsibilities

Hexagon shall:

- Configure the OnCall Analytics | Dispatch software components as outlined in the above table;
- Install the Microsoft Power BI desktop software (free download) and components as outlined in table above; and
- Confirm that the software installation and delivery has been completed, the data connections have been tested, and data is accessible in reports.

Customer Team Participation and Responsibilities

Customer shall:

- Provide remote access to Customer environment. If remote access is not possible, additional travel and administration time is required to complete the installation and a change order will be required;
- Provide system administrator to work with the Hexagon team during installation activities;
- Provide network administrator to work with the Hexagon team during installation activities;
- Provide database administrator to work with the Hexagon team during the installation activities, if needed;
- Install additional products not purchased under this Agreement, such as hardware and third-party backup software; and
- Provide SQL Server software and license keys to Hexagon for the database installation.

Task Acceptance Criteria

This Task is complete when Hexagon has configured and tested the OnCall Analytics | Dispatch software and data is accessible for reports and analytics in the Production Environment.

Testing Phase

27. Test Plan and Test Case Workshop (Police and Fire)

Task Description:

The CAD Test Plan/Test Case Workshop is an onsite workshop style session lasting up to three (3) Business Days that is intended to educate Dispatch Core Team members on best practices when creating the CAD Test Plan and Test Cases. Hexagon will make recommendations to the Customer on how to create a Test Plan corresponding to the Benchmark Criteria. Additionally, as part of the workshop, Hexagon and Core Team members will create Test Cases until the end of workshop.

Task Prerequisites:

- I/CAD Essentials Workshop for Core Team Task is complete.

Task Assumptions:

- Hexagon responsibilities will be executed on site at a Facility.
- The CAD Test Plan/Test Case Workshop shall last no more than three (3) Business Days.
- Customer has provided a Facility.

Hexagon Team Participation and Responsibilities:

Hexagon shall:

- Conduct the CAD Test Plan/Test Case Workshop
- Work with the Customer on creating Test Cases during the workshop; and
- Provide consulting services on best practices when creating a Test Plan and Test Cases.

Customer Team Participation and Responsibilities:

Customer shall:

- Provide a Facility;
- Provide a Project Workstation for each attendee;
- Ensure the attendance and active participation of the Dispatch Core Team members and other SMEs for the duration of the Test Case/Test Plan Workshop;
- Participate in discussions and engage with the Hexagon team member;

Task Acceptance Criteria:

This Task is complete at the conclusion of the Test Case/Test Plan Workshop.

27. Test Plan and Test Cases Development (Police and Fire)

Task Description

Following the Test Plan and Test Case Workshop, the Customer will create a test plan ("CAD Test Plan") with Test Cases for CAD based upon the Benchmark Criteria. The CAD Test Plan may incorporate the Test Cases created during the Test Plan and Test Case Workshop. The CAD Test Plan and Test Cases are essential for the Customer to be able to validate and prove the functionality of the Dispatch Subsystem. Every Benchmark Criteria corresponding to I/CAD should have at least one Test Case; some Benchmark Criteria may have multiple associated Test Cases. The Customer will identify the Benchmark Criteria that correspond to the applicable Test Cases. A clear pass/fail criterion must be defined for each Test Case. The Test Plan and Test Cases will be agency-specific, and work-process driven with clearly documented Pass/Fail criteria. Only the elements of the Test Plan and Test Cases conforming with the Benchmark Criteria shall be used in evaluating and testing the Subsystem. The Test Plan is the set of Test Cases that will serve as the basis of testing the fully configured Subsystem, including interfaces.

The Customer will not need a fully configured Subsystem to create the Test Plan and Test Cases. The Test Case creation should be accomplished using a workflow-based Test Case.

Task Deliverables

- Customer's CAD Test Plan and Test Cases

Task Prerequisites

- I/CAD Essentials Workshop for Core Team Task is complete.
- Test Plan and Test Case Workshop is complete

Task Assumptions

- N/A

Hexagon Team Participation and Responsibilities

Hexagon shall:

- Consult with the Customer during the Test Plan and Test Cases creation Task to validate the Test Cases correspond to the Benchmark Criteria (applicable to CAD).

Customer Team Participation and Responsibilities

Customer shall:

- Create the CAD Test Plan and Test Cases consistent with the Benchmark Criteria; and
- Provide CAD Test Plan and Test Cases to Hexagon.

Task Acceptance Criteria

This Task is complete when the Customer has created the CAD Test Plan and Test Cases and Hexagon has validated the same in accordance with the Benchmark Criteria.

28. Customer Functional Testing (Police and Fire)

Task Description

The Customer, with support from Hexagon, will test CAD's conformance with the Benchmark Criteria. The Customer will conduct Functional Testing over the course of ten (10) Business Days ("Dispatch Testing Period") with Hexagon on-site support during the entire Dispatch Testing Period. During the CAD Testing Period, the Customer shall execute the CAD Test Plan and corresponding Test Cases. Except as expressly provided, no other testing or evaluation pertaining to I/CAD is contemplated in this Project. Customer will document and track the results of each Test Case as either pass or fail and may request Hexagon consultation as necessary during its testing Activity up to twenty-four (24) Business Hours.

Within fifteen (15) Business Days of the end of the CAD Testing Period ("CAD Reporting Period"), the Customer shall file any Blocker Defects (Hexagon can also enter Blocker Defects as appropriate) and Permissive Defects encountered during Functional Testing – Dispatch through Hexagon's Customer Resource Management (CRM) system. For any Blocker Defect identified, the Customer shall provide, at minimum, the following information: a description of the Defect and the steps used to reproduce it, the functionality tested when the Blocker Defect was encountered, the manner in which the functionality was tested, and the outcome when the functionality was tested. If the Blocker Defects are not filed within the CAD Reporting Period, it is presumed Functional Testing was completed without any Blocker Defect, and this Task is complete. Only Blocker Defects reported by the conclusion of the Reporting Period will be resolved as part of this Task. The existence of Permissive Defect(s) shall not preclude or be a condition of completion of any subsequent Tasks or implementation of a new Release.

To the extent requested, Customer agrees to promptly respond to requests for additional information regarding the Blocker Defect requested by Hexagon. Upon diagnosing the Blocker Defect and validating the Defect encountered meets the attributes of a Blocker Defect, Hexagon resources shall proceed to resolve the Blocker Defect accordingly. If the investigation determines the reported Blocker Defect did not meet the attributes of a Blocker Defect then the reported Defect will be reclassified in accordance with the levels provided in the Master Terms Glossary. Alternatively, if the investigation shows the reported Blocker Defect was caused by Customer hardware, Network Infrastructure, or Third-Party Software not provided by Hexagon, or non-conformance with E and F, then Hexagon will provide such information to the Customer for the Customer to resolve and the Blocker Defect will be closed and regarded as complete.

As part of its resolution efforts, Hexagon may at its discretion provide a procedural or programmatic work around, a configuration change, or provide an Update. Once the Blocker Defect(s) is addressed, Hexagon will report to Customer the Blocker Defect has been addressed and the Customer will have fifteen (15) Business Days to execute its Test Plan ("CAD Resolution Testing Period").

After the Functional Testing, Hexagon will enforce a Code Freeze. Appreciating the desire to promote stability within the System and minimize changes to the System after Functional Testing, the Parties will not make configuration changes or modifications to the System except as the Project Managers may agree or is necessary to resolve a Blocker Defect,

Task Deliverables

- CAD Functional Testing

Task Prerequisites

- Customer and Hexagon mutually confirm that CAD is ready for testing.
- Test Plan and Test Cases Development Task is complete.

Hexagon Team Participation and Responsibilities

Hexagon shall:

- Verify all applicable software, systems and ancillary systems, including the redundancy of Production system (if applicable), are ready for Functional Testing;
- Provide on-site support during Functional Testing Period;
- Complete interface testing
- Both Hexagon and the client will track and document results from executed Test Cases and file any Blocker Defects in the CRM system by the end of the CAD Reporting Period.
- Review Defects filed by the Customer; and
- Resolve Blocker Defects filed by the Customer

Customer Team Participation and Responsibilities

Customer shall:

- Verify all applicable software, systems and ancillary systems, including the redundancy of Production system (if applicable), are ready for Functional Testing;
- Execute the CAD Test Plan with on-site support from Hexagon
- Both Hexagon and the client will track and document results from executed Test Cases and file any Blocker Defects in the CRM system by the end of the CAD Reporting Period.

Task Acceptance Criteria

This Task is complete upon expiration of the CAD Testing Period and resolution of all Blocker Defects reported by the end of the CAD Reporting Period.

Training Phase

29. Hexagon-Led Training (Police and Fire)

Task Description

During the Training phase, Hexagon resources will conduct on-site training sessions for Customer-designated personnel.

The following formal training classes are included in the Project ("Hexagon Training Classes):

- I/CAD System Administration & Maintenance Essentials:
  - Introduction (Police and Fire)
  - Core 1 and 2 (Police and Fire)
  - Advanced (Police and Fire)
- I/CAD Essentials for Trainers (Qty: 2) – (Fire and Police)
- I/CAD Essentials for Users (Qty: 3) – Fire
- I/CAD Essentials for Users (Qty: 5) – Police
- I/NetViewer for Trainers (Police and Fire)
- MPS for Trainers (Qty: 3) – Police
- Mobile Responder for Trainers (Qty: 3) – Police
- Xalt Integration Developer Training (Police and Fire)c
- OnCall Analytics Dispatch Advantage System Administrator Training (Police and Fire)
- OnCall Analytics Dispatch Advantage User Training (Police and Fire)

It is recommended that Customer develop its own training program, including, but not limited to: creating a training plan suitable for its needs, identifying a training cadre for each Subsystem, and leveraging the Hexagon training materials and Documentation to ensure its Users have acquired the necessary knowledge and are in a position to use I/CAD upon Cutover. The Customer is solely responsible for training its Users on I/NetViewer, MPS, and Mobile Responder. The Customer shall complete its User Training no later than thirty (30) calendar days after Hexagon has completed I/CAD System Administration, I/CAD Essentials for Users, MPS for Trainers, Mobile Responder for Trainers, and I/NetViewer for Trainers ("End User Training Period").

Task Deliverables

- Training course agendas
- Applicable COTS Documentation, in electronic format; for the Hexagon Training Classes

Task Prerequisites

- Customer has identified and secured an appropriate training room and set up with the workstations, at least one (1) LCD projector, display screen or other appropriate surface to display a projected image, and white-board space or other ability to take notes and record questions.
- The Customer has installed and configured at least one (1) workstation per student attending the session.
- Customer Functional Testing Tasks for each Subsystem are complete.

Task Assumptions

- The Customer will complete end user training within the End User Training Period.
- Both end-user training and train-the trainer training will be provided as specifically identified herein. Training will take place during normal Business Hours, which is typically from 8:00 am - 5:00 pm unless separately agreed to by the Project Managers.
- Training documentation provided by Hexagon with this SOW will be standard COTS Documentation and help files and will not be customized to the Customer's site-specific configuration. All Documentation will be provided in electronic format. Should printed copies be required, the Customer is responsible for providing them.

Hexagon Team Participation and Responsibilities

Hexagon shall:

- Conduct Hexagon Training Classes.

Customer Team Participation and Responsibilities

Customer shall:

- Provide appropriate facilities and install/configure workstations as indicated in the Task Assumptions;
- Provide a Project Workstation for each attendee of the Hexagon Training Classes;
- Ensure appropriate personnel participate in the Hexagon Training Courses;
- Ensure a trainer attends at least one (1) I/CAD for Essentials User classes; and
- Complete end user training within the End User Training Period.

Task Acceptance Criteria

This Task is complete once Hexagon has delivered the Hexagon Training Classes to the Customer.

30. Test Environment Creation (Police and Fire)

Task Description

Following completion of all testing Tasks, Hexagon will create the Test Environment using a snapshot of the Production Ready System. As part of this Task, Hexagon will test the Test Environment to verify the Production Ready System has been properly loaded. For clarification, this testing is not intended to repeat or overlap with Customer Functional Testing Tasks.

Task Deliverables

- Test Environment installed

Task Prerequisites

- Test virtualized environment is available.
- The System is a Production Ready System.

Hexagon Team Participation and Responsibilities

Hexagon shall:

- Install and test the Hexagon System in the Test Environment.
- Train Customer on how to perform refreshes (if not done as part of other training course)

Customer Team Participation and Responsibilities

Customer shall:

- Provide IT support, as required; and
- Provide hardware, database software, operating system software, network, and physical site necessary for creation of Test Environment.

Task Acceptance Criteria

This Task is complete when the System has been installed and tested in the Test Environment.

Cutover Phase

31. Cutover Plan (Police and Fire)

Task Description

Hexagon and the Customer will jointly develop a Cutover Plan. The Cutover Plan will detail the steps necessary to cutover I/CAD. The Cutover Plan will assign tasks and responsibilities to both Hexagon and Customer personnel in the month prior to Cutover. The Cutover Plan covers topics including Customer staffing, movement of equipment into final locations, final database cleanout of test events, procedures to report issues, and planned sequence of events for the Cutover day.

Hexagon will provide the initial draft of the Cutover Plan to the Customer for review. The Customer will review the draft and provide feedback to Hexagon within ten (10) Business Days, which will incorporate appropriate feedback into a final Cutover Plan.

As part of the execution of the Cutover Plan, the Parties will work together to address Blocker Defects that arise following testing provided that requests for new or different configuration not addressing a Blocker Defect may require a Change Order.

Task Deliverables

- Cutover Plan

Hexagon Team Participation and Responsibilities

Hexagon shall:

- Create a draft Cutover Plan (i.e., prepare a checklist of responsibilities and tasks to be completed during the Cutover Task prior to Cutover);
- Schedule a support handoff meeting
- Work with Customer personnel to refine the Cutover Plan; and
- Review and approve the final Cutover Plan.

Customer Team Participation and Responsibilities

Customer shall:

- Review and comment on the draft Cutover Plan within ten (10) Business Days of receipt;
- Work with Hexagon personnel to refine the Cutover Plan; and
- Review and approve the final Cutover Plan.

Task Acceptance Criteria

This Task is complete when the Customer has reviewed and approved the final Cutover Plan.

32. System Readiness Review (Police and Fire)

Task Description

During this Task Hexagon technical resources, the Hexagon Project Manager, and the Customer team will meet and determine if the System is ready for Cutover. During the meeting, results from Hexagon's final review of the system will be discussed.

In addition, the System Readiness Review verifies that the following has occurred:

- A document titled, “Cutover Plan” has been developed and approved by both Hexagon and the Customer;
- Establishment and approval of a schedule for Cutover Activities; and
- Identification and scheduling of Hexagon and Customer resources required for Cutover Activities.

Task Deliverables

- Readiness Review meeting minutes
- Discussion notes on the results from Hexagon’s final review of the system

Task Prerequisites

- Cutover Plan Task is complete.

Task Assumptions

- The Customer certifies it has trained all personnel who will be utilizing the system.

Hexagon Team Participation and Responsibilities

Hexagon shall:

- Conduct a conference call to discuss if the system is ready to perform Cutover;
- Provide system Cutover notification to appropriate internal and external interface stakeholders supplying systems integral to Cutover operations;
- Review and provide timely feedback/approval of Cutover Plan; and
- Work with Customer to determine suitable Cutover schedule.

Customer Team Participation and Responsibilities

Customer shall:

- Participate in the conference call;
- Notify internal and external interface stakeholders about pending Cutover;
- Review and provide timely feedback/approval of Cutover Plan; and
- Work with Hexagon to determine suitable Cutover schedule.

Task Acceptance Criteria

This Task is complete when the Readiness Review has been conducted.

33. Cutover to Production Use (Police and Fire)

Task Description

Cutover reflects the culmination of all the Tasks in this SOW. It reflects the point at which the Customer first uses the System in a live environment for its intended purpose.

The Parties shall execute the Cutover Plan, as practical, as part of Cutover. Beginning on Monday of the week of Cutover, Hexagon resources and the Project Manager will support the Customer's Activities leading to Cutover, during Cutover, and post-Cutover. Except for the day of Cutover where the resources may be on site at alternate hours, the Hexagon resources will be available Monday to Friday of the week of Cutover. On the day of Cutover and the three (3) days immediately following Cutover, Hexagon shall have a CAD resource at the Fire Facility and a different CAD resource at the Police Facility on a twenty-four (24) hour cycle. Assuming Cutover occurs on Monday, a CAD implementer will be onsite during business hours on Friday. Hexagon shall also have onsite a Mobile implementer during business hours only at the Police Facility during the week (five days) of Cutover. The Project Manager will be onsite during the week of Cutover during business hours (except on the actual day of Cutover where an alternate schedule will be in place). Upon Cutover, the Customer's System Administrator will assume primary responsibility of the management and administration of the System, and the Hexagon resources will provide support as needed by the Customer System Administrator. At times where the Hexagon resources are not otherwise available after the Project is complete, the Customer shall contact Hexagon's HelpDesk in accordance with the Maintenance Terms within the Agreement.

Cutover also marks the commencement of the Warranty Period for the Project Software as described in Attachment J.[1]

Task Deliverables

- Cutover of CAD System

Task Prerequisites

- All prior Tasks are complete.
- The End User Training Period is complete.

Task Assumptions

- The Parties have agreed Cutover can proceed.
- Cutover will take place on the day and time specified in the Cutover Plan.
- Hexagon will provide resources on site.

Hexagon Team Participation and Responsibilities

Hexagon shall:

- Hexagon shall provide technical resource(s) to support Cutover during the week of Cutover.

Customer Team Participation and Responsibilities

[1] Cutover assumes the Customer has used I/CAD for five (5) hours.

Customer shall:

- Ensure availability of trained Users;
- Ensure availability of Core Team during Cutover Activities;
- Assume System Administration and management for the System upon Cutover;
- Ensure availability of all third-party vendors impacted by the Cutover;
- Ensure availability of all IT disciplines necessary to immediately address issues as necessary; and
- Ensure availability of member(s) of the training cadre during all shifts.

Task Acceptance Criteria

This Task is complete upon Cutover of I/CAD.

34. Post-Cutover Support (Police and Fire)

Task Description

During this Task, Hexagon resources will provide Post-Cutover support to Customer. The "Post-Cutover Support Period" is the ten (10) Business Days beginning the Monday following Cutover. It is designed to provide the Customer with dedicated, quickly accessible support for questions and Defects encountered in the ten (10) Business Days following the Cutover to Production use of the new System.

During this Task, Hexagon resources will be assigned Defects that are filed by the Customer against the new System. Hexagon resources will work to identify and address the Defects reported, understanding the Defects will be triaged based upon their severity during the Post Cutover Support Period. Defects remaining after the Post Cutover Support Period will be addressed by the Help Desk. Defects reported outside of Business Hours will be addressed in accordance with the maintenance provisions of the Agreement.

The Post-Cutover Support Period is not a configuration period. Requests for new configurations that are not related to addressing a Defect will not be supported during this time frame. This is done to ensure the stability of the System delivered and that focus remains on Defects and to minimize the introduction of new opportunities for errors or problems.

Task Deliverables

- Task Completion Form confirming that Post-Cutover Support has been provided in accordance with SOW Post-Cutover Support task description

Task Prerequisites

- CAD Cutover to Production Use Task is complete.

Task Assumptions

- Post-Cutover Support is provided Monday-Friday during normal Business Hours. Standard after-hours emergency support procedures, defined in the Cutover Plan, remain the same for the duration of this Task.
- Defects will be reported via Hexagon's designated CRM tool.
- The Customer System Administrator remains the primary point of contact and initial troubleshooting point of contact for all issues during this Task.
- The Customer System Administrator maintains responsibility for core system administration tasks.

Hexagon Team Participation and Responsibilities

Hexagon shall:

- Provide ten (10) Business Days of Post-Cutover support in accordance with this SOW beginning the Monday after Cutover
- Address Defects within the Post Cutover Support Period; and
- Schedule bi-weekly ticket review meetings

Customer Team Participation and Responsibilities

Customer shall:

- Ensure Defects are recorded in Hexagon's CRM tool in a timely manner and in accordance to the mutually agreed upon Project Schedule.

Task Acceptance Criteria

This Task is complete when the Post-Cutover Support Period has expired.

35. I/CAD System 30-Calendar Day Reliability Test (Police and Fire)

Task Description

The Reliability Period Task is designed to demonstrate the stability of the I/CAD System immediately following Cutover ("CAD Reliability Period"). During the Reliability Period, the I/CAD System shall operate without a Blocker Defect (P1 or P2) for a total of thirty (30) calendar days. Once the Blocker Defect is resolved (either through configuration, reasonable work around, or a programmatic code change), the Customer shall have ttwo (2) two business days to test the resolution. Once a Blocker Defect is logged and validated the CAD Reliability Period shall and resume at a prescribed point in time. The first fifteen (15) days of the Reliability Period is regarded as Phase 1 and the second fifteen days (days 16-30) are regarded as Phase 2 of the Reliability Period. Once the System has operated for fifteen (15) consecutive days without a valid Blocker Defect, then Phase 1 of the Reliability Period is complete and Phase 2 of the Reliability Period shall commence and conclude once it has operated from Day 16 to Day 30 without a valid Blocker Defect. If a valid Blocker Defect is logged during Phase 1, then once the Blocker Defect is resolved, the Reliability Period will resume at the first day of Phase 1 of the Reliability Period (i.e. day 1). If a valid Blocker Defect is logged during Phase 2, then once the Blocker Defect is resolved, the Reliability Period will resume at the first day of Phase 2 of the Reliability Period (i.e. day 16).

Requests for new configurations not related to addressing a Blocker Defect cannot be supported during this time frame. Similarly, the Customer shall refrain from making any configuration changes until the CAD Reliability Period is complete.

Task Deliverables

- Customer support for problems, questions, or errors

Task Prerequisites

- Cutover to Production Use Task is complete.

Task Assumptions

- Support is provided Monday through Friday during normal business hours. Standard after-hours emergency support procedures remain the same for the duration of this Task.
- Blocker Defects will be reported via the Help Desk Portal.

Hexagon Team Participation and Responsibilities

Hexagon shall:

- Coordinate addressing post-live Blocker Defects with the Customer; and
- Resolve valid Blocker Defects.

Customer Team Participation and Responsibilities

Customer shall:

- Use and monitor the I/CAD System in a production environment;
- Maintain a log of problems found;
- Contact Hexagon personnel in a timely manner in the event of system problems or failures; and
- Begin system monitoring in support of the Extended Warranty period.

Task Acceptance Criteria

This Task is complete after the I/CAD System completes the CAD Reliability Period.

Attachment D – Training Curriculum

I/CAD Essentials for Trainers (Qty: 2) – 1 for Fire, 1 for Police

The I/CAD Dispatcher Essentials for Train-The-Trainer course is presented directly to personnel responsible for training Public Safety Dispatchers. It familiarizes telecommunications personnel with the basic features of workstations, terminology, forms, navigation, and event processing, as well as map utilization and inquiries. Laboratory exercises are included with each module to provide additional experience in workstation operation. Upon completion of this course, attendees will be prepared to train Dispatchers in I/CAD Essentials.

MAJOR TOPICS

- Call Creation and Update
- Map View Control
- Event and Personnel Inquiries
- Sending Messages
- Recommending and Dispatching Units
- Updating Unit Statuses
- Modifying Unit Properties
- Updating Unit Related Event Information
- Querying Unit and Event Data
- Performing Fire Specific Operations – Update Alarm, Relocate (Move Up) Units
- Performing Law Enforcement Specific Operations – Traffic Stop, Subject Stop
- Performing EMS Specific Operations – Divert Hospital
- Supervisor Specific Commands
- Interfaces for Users (I/Informer, I/Page, I/FSA, and I/MDT for example)
- Advanced I/CAD Functions as needed
- Trainer Guidelines and Techniques for I/CAD

PREREQUISITES

- Knowledge of basic Public Safety terminology
- Responsibility for Dispatching
- An introduction to Windows course or equivalent knowledge and familiarity with the Windows user interface
- Completion of I/CAD Build and Configure phases

TRAINING DETAILS

Method	Conducted on site by Hexagon Personnel
Target Audience	I/CAD Training Personnel
Duration	9 Days
Student Capacity	12 Students, with a maximum of 1 student per workstation

I/CAD Essentials for Users (Qty: 8) – 3 for Fire, 5 for Police

The I/CAD Dispatcher Essentials for Users course is presented directly to personnel responsible for Public Safety dispatching processing. It familiarizes telecommunications personnel with the basic features of workstations, terminology, forms, navigation, and event processing, as well as map utilization and inquiries. Laboratory exercises are included with each module to provide additional experience in workstation operation.

MAJOR TOPICS

- Call Creation and Update
- Map View Control
- Event and Personnel Inquiries
- Sending Messages
- Recommending and Dispatching Units
- Updating Unit Statuses
- Modifying Unit Properties
- Updating Unit Related Event Information
- Querying Unit and Event Data
- Performing Fire Specific Operations – Update Alarm, Relocate (Move Up) Units
- Performing Law Enforcement Specific Operations – Traffic Stop, Subject Stop
- Performing EMS Specific Operations – Divert Hospital
- Supervisor Specific Commands
- Interfaces for Users (I/Informer, I/Page, I/FSA, and I/MDT for example)
- Advanced I/CAD Functions as needed

PREREQUISITES

- Knowledge of basic Public Safety terminology
- Responsibility for Dispatching
- An Introduction to Windows course or equivalent knowledge and familiarity with the Windows user interface
- Completion of I/CAD Build and Configure phases

TRAINING DETAILS

Method	Conducted on site by Hexagon Personnel
Target Audience	I/CAD Dispatcher Personnel
Duration	5 Days
Student Capacity	12, with a maximum of 1 student per workstation

I/NetViewer for Train-the-Trainer (Police and Fire)

I/NetViewer training is presented directly to personnel responsible for training those personnel who will be accessing CAD information remotely. It familiarizes training personnel with the commands used in the I/NetViewer application during event entry and inquiry operations. Laboratory exercises are included with each module to provide additional experience in workstation operation. Upon completion of this course, attendees will be prepared to train I/CAD Users on the functions and use of the I/NetViewer products.

MAJOR TOPICS

- Event Entry Operations
- Inquiry Commands
- Unit or Crew Operations
- Setting User Preferences
- Other Utilities
- Trainer Guidelines and Techniques

PREREQUISITES

- Knowledge of appropriate Public Safety terminology
- Knowledge and familiarity with Windows user interface
- Knowledge and familiarity with modern web browsers like Internet Explorer, Chrome, Firefox, or Safari

TRAINING DETAILS

Method	Conducted on site by Hexagon Personnel
Target Audience	I/CAD Training Personnel
Duration	3 days
Student Capacity	12 Students, with a maximum of 1 student per workstation

I/CAD System Administration & Maintenance Essentials (Qty: 4 – Intro, Core 1, Core 2, & Advanced) (Police and Fire)

The I/CAD System Administration and Maintenance Essentials course provides an overview of essential administration and maintenance tasks to individuals responsible for the technical administration, management, and/or support of the I/CAD System. Students receive both classroom training and hands-on experience, enabling them to perform the basic functions associated with the day-to-day operation and support of an I/CAD System. Please note the stated prerequisites and student capacity, as strict adherence is essential to the successful completion of this course.

MAJOR TOPICS

- I/CAD System Overview
- Configuration Maintenance and the Registry
- Basic Configuration of Parameters and Command Line
- Database Client and Application Components
- Listener Overview
- Redundancy and Recovery
- Clock Synchronization
- Regular Maintenance Tasks
- Troubleshooting
- Logging/Support Process
- Customer Care Center Procedures
- Documentation/Change Log and Other Maintenance Log Generation

PREREQUISITES

- Responsibility for the Administration, Support, and Maintenance of the I/CAD System.
- Sound knowledge of the Communications Center Calltaker/Dispatcher process and the I/Dispatcher application.
- Working knowledge of Windows. This includes major networking components, including clients, servers, local area networks, network adapter cards, drivers, protocols, and network operating systems.

TRAINING DETAILS

Method	Conducted on site by Hexagon Personnel
Target Audience	System Administrator and Other Support Personnel
Duration	3 Days for Intro, 4 Days for Core 1, 4 Days for Core 2, 4 Days for Advanced
Student Capacity	6 Students, with a maximum of 1 student per workstation

MPS for Trainers (Qty: 3) – Police

MPS for Trainers training is designed to train agency trainers in the use of the MPS product.

MAJOR TOPICS

- Using MPS on Mobile Data Computers (MDCs) or laptops
- Changing unit status
- Submitting inquiries
- Sending and receiving messages
- Updating unit properties
- Updating events
- Using training guidelines and techniques for MPS
- I/Informer queries from MPS (if applicable)

PREREQUISITES

- Responsibility for mobile computing training
- Assignment of at least one person who has been through I/CAD Essentials training to perform necessary dispatching and other I/CAD functions
- Availability of customer-specific MPS configuration
- Availability of test or training MPS PCs for use in class

TRAINING DETAILS

Method	Conducted on site by Hexagon Personnel
Target Audience	Designated MPS Trainers
Duration	3 days, on-site
Student Capacity	12, with a maximum of 1 student per workstation

Mobile Responder for Trainers (Qty: 3) – Police

Mobile Responder training is a Train-the-Trainer course designed to train Agency trainers in the use of the Mobile Responder product.

MAJOR TOPICS

- Using Mobile Responder on Smartphone or tablet
- Changing unit status
- Submitting inquiries
- Sending and receiving messages
- Updating unit properties
- Updating events
- I/Informer queries (if applicable)

PREREQUISITES

- Responsibility for mobile computing operations
- Assignment of at least one person who has been through I/CAD Essentials training to perform necessary dispatching and other I/CAD functions
- Availability of customer specific Mobile Responder configuration
- Availability of test or training Mobile Responder smartphone or tablet for use in class

TRAINING DETAILS

Method	Conducted on site by Hexagon Personnel
Target Audience	Designed for Mobile Responder Trainers
Duration	1 day on-site
Student Capacity	12, with a maximum of 1 student per workstation

HxGN OnCall Analytics | Dispatch User Training (Qty: 2) (Police and Fire)

COURSE OVERVIEW

HxGN OnCall Analytics | Dispatch offers the ability to perform reporting and analysis from a data warehouse containing data from databases, as well as provide capabilities for the user to view and modify reports and conduct ad-hoc queries from the data warehouse.

This course is designed to familiarize the end user with HxGN OnCall Analytics | Dispatch Advantage. It will provide instruction on accessing, viewing, and creating reports from the OnCall Analytics Report portal.

Additionally, training will be provided for the creation and modification of Power BI Reports using the Power BI Desktop tool.

TARGET AUDIENCE

Personnel responsible for reporting and analysis (Report Builders, Report Consumers, and System Admins)

MAJOR TOPICS

Power BI Report Server Portal

- Introduction
- Overview and Navigation
- Managing Report Server Content
- Subscriptions
  - Delivered Analytical/Operational Report Overview

Power BI Desktop

- Introduction
- Power BI Desktop Navigation Get Data
- Create Visualizations
- Filtering Visualizations
- Formatting Visualizations
- Pages – Size and Alignment
- Interacting and Sharing

PREREQUISITES

- Familiarity with Windows-based applications
- Familiarity with agency workflows

COURSE DETAILS

Course Duration	Two (2) days
Course Type	Conducted on site by Hexagon Personnel
Student Capacity	Ten (10)

HxGN OnCall Analytics | Dispatch System Administrator Training (Qty: 1) (Police and Fire)

COURSE OVERVIEW

This System Administrator Training course is designed for System Administrators, to provide instructions on the setup, site-specific configurations, and administrative tasks needed to maintain the HxGN OnCall Analytics | Dispatch Advantage.

TARGET AUDIENCE

System Administrators

MAJOR TOPICS

- Introduction
- Installation and Deployment
- Review of the installation document
- Security
- Overview of SSIS (ETL)
- Site Customization
- Updates and Patch Delivery

PREREQUISITES

- Familiarity with Microsoft Windows-based applications, administrative tasks, and agency workflows
- Familiarity with CAD configuration

COURSE DETAILS

Course Duration	One (1) Day
Course Type	Conducted on site by Hexagon Personnel
Student Capacity	Four (4)

Xalt Developer Training (Qty: 1) (Police and Fire)

This Xalt training course is designed for customers who have purchased an Xalt Developer license who have an interest in configuring their own Xalt Systems (interfaces). The Training class will be comprised of general Xalt training and API specific training. Students will receive both classroom training and hands-on experience enabling them to build and manage interfaces using Xalt and the CAD API.

Upon successful completion, trainees will be able to take the core concepts/fundamentals and be able to configure simple-to-moderate interfaces in Xalt. With the foundational knowledge provided, trainees will be able to continue to use Xalt and build more complex interfaces over time, as that is the primary way to become a truly proficient user.

Please note the stated prerequisites and student capacity, as strict adherence is essential to the successful completion of this course.

MAJOR TOPICS

General Xalt Knowledge

- Developing and deploying Xalt Systems
- Understanding the Data Structures
- Business Rules Implementation
- Linking Systems together via Publish/Subscribe and Receive/Inject
- Generating / Consuming XML
- Advanced Knowledge Topics (topics will be customized to address customer interface needs)

API Knowledge

- Understanding the specific API functionality available
- Using Xalt to communicate to the API
- Subscribing to Topics
- Subscribing to logs

PREREQUISITES

Trainees will need a laptop or computer with the .NET 4.0 Framework installed. In addition, strong adherence to the following prerequisites is mandatory:

- Responsibility for the administration, support, and maintenance of Xalt and the systems/interfaces built within the application.
- Technical understanding of databases, XML, XSLT, XSD, and network communications.
- Working knowledge of Windows. This includes major networking components, including clients, servers, local area networks, network ports, and protocols.

TRAINING DETAILS

Method	Conducted on site by Hexagon Personnel
Target Audience	Xalt User/Implementer
Duration	Four (4) days
Student Capacity	4-8, with a maximum of 1 student per workstation

Attachment E – Public Safety System Specifications

[following this page]

Attachment F – System Configuration Diagram

[following this page]

Attachment G – CAD Functional Specifications Matrix

[following this page]

Attachment H – Interface Descriptions

COTS Interfaces

ANI/ALI Interface (included with I/Exec HA) – Police and Fire

Description:

The ALI interface is a COTS interface that transfers data from an incoming ALI packet to the I/CAD Event Information form. By default, when the interface initially receives telephone company information, the Event Information ANI/ALI button is highlighted, indicating that an E9-1-1 call has been received. By selecting the ANI/ALI button, the operator signals the I/CAD System to populate relevant Event Information dialog fields with ALI data. Alternately, the I/CAD System may be configured to automatically populate the Event Information dialog with the ALI data without requiring the operator to select the ANI/ALI button.

For cases where the event location differs from the caller's address, the operator may override the ALI location data. However, both the original ALI address and the manually entered address are retained in the Event History.

Hexagon supports FCC Phase II requirements for cellular 911 calls. The I/CAD system supports the creation of events based on a geographic coordinate location. The ANI/ALI packets for Phase II Wireless 911 calls include the coordinates (in lat/long or other standard coordinate system, as dictated by the NENA standard or FCC requirements), and uses this information to create an event at the caller's geographic coordinate location and show the location on the map. The nearest civic address can also be estimated and displayed. The exact format of this data in the ANI/ALI packet must be supplied by the Customer (in conjunction with their phone system supplier).

Assumptions:

- Hexagon assumes that the Customer's ANI/ALI controller supports NENA Format Versions 1 and 2 (Fixed Length ASCII), NENA version 3 (Tagged Delimited), and NENA version 4 (XML). These formats are documented in NENA documents NENA 02—010 v9 now "Legacy Data formats for ALI, MSAG &GIS" and NENA 04-001 v2 now "E9-1-1 PSAP Equipment".
- The ANI/ALI interface component of the I/CAD System will provide the interface to an ANI/ALI controller, and will accept ANI/ALI packets containing ASCII, tagged delimited, or XML data via an Ethernet Network (TCP/IP) or an RS-232 connection
- Hexagon assumes that the ANI/ALI protocol packet provides the number, address and answering position of the call when answered.
- The FCC order released June 3, 2005 requires that all VoIP vendors, serving U.S. customers, must offer service to route 911 VoIP calls through the current E-911 infrastructure. This means that all VoIP 911 calls from registered subscribers will be received through the PSAP's 911 trunks and handled by their ANI/ALI Controller. The PSAP is responsible for ensuring that their ANI/ALI Controller is capable of handling the ALI Database lookup for these calls. ANI/ALI packets for VoIP calls will be received by the CAD system, over the same CAD link, from the ANI/ALI Controller, as the landline and cellular calls. VoIP calls with a caller's address will be handled like landline calls and VoIP calls with a location specified by coordinates will be handled like Phase II cellular calls.
- If the center requires an interface to a method of receiving ANI/ALI or other Data for VoIP calls other than the traditional ANI/ALI Controller, this interface will have to be rescoped as a custom interface. The Customer must provide complete specifications of the device or service providing the data.

Constraints:

- The Customer is also responsible for the maintenance and support of any hardware, software, or cabling required to provide the physical interface between the ANI/ALI Communications Server and the ANI/ALI Controller. Hexagon's demarcation point, for responsibility for the ANI/ALI stream, is at the port or socket on the communications server.
- The Customer must supply a complete and accurate description of the ANI/ALI controller interface and data it provides for CAD field mapping.

ProQA Paramount I/CAD Interface –Fire

Description:

The ProQA Paramount application is a protocol based product that provides a standard certified set of determination questions and answers that Police, Fire, and EMS can use to identify the necessary resources required when responding to an event.

Key features:

The ProQA Paramount interface supports:

- Multi-Discipline Launching
- Pre-Alerts
- Transfer of Location Information to I/Calltaker and I/Dispatcher
- Configured to spill key questions into the Event Information remarks field

I/CADLink – Police and Fire

- To ImageTrend EMS/FRMS RMS, unknown Law RMS Vendor, SPIDR Tech, FirstWatch, and Rip n Run

Description:

I/CADLink interfaces to the I/CAD System to facilitate the automatic periodic transfer of event and unit information from I/CAD to external systems such as Police Records Management, Electronic Patient Care, and Fire Records Management systems using XML files.

I/CAD-Link includes support for configurable event profiles; these are sets of event criteria for matching data field values within the I/CAD events to be exported and a configurable target directory for exported output files. These profiles act as event filters, determining which I/CAD events are to be exported to which file system directories (Inboxes).

Assumptions:

- Hexagon assumes this is for the export of closed CAD event and unit data to the specified systems only.
- Additional services are required from the third-party vendor to consume and distribute the event information provided by the I/CADLink application.

Constraints:

- Note that I/CADLink exports ASCII comma-delimited text or XML files containing I/CAD incident-related data, but it does not import the data into other customer's or other vendor's databases. Such import is the responsibility of the Customer or of the "other vendor" as applicable.

- I/CAD events must be closed before they are candidates for export by I/CADLink.
- I/CADLink does not provide features for obtaining "next available case numbers," "location verification," or any other I/CAD-related functionality or interface; it only provides export of specified event data from closed I/CAD events.
- Hexagon cannot be held accountable for incompatibilities in its interface that are due to changes in input/output formats or data requirements of the third-party vendor's product.

I/Page – Police and Fire

- To San Bernardino County ISD Paging, Nixle

Description:

I/Page provides connectivity between the dispatching environment and a third-party paging controller or Outlook for one-way SMS messaging. Dependent on the protocol supported by the system, I/Page uses either TAP (Telocator Alphanumeric Paging Protocol), SNPP level 1 (Simple Network Paging Protocol), SMPP (Short Message Peer to Peer), SMTP (Simple Mail Transfer Protocol), and WCTP (Wireless Communication Transfer Protocol). I/Page also supports an interface with the MCC7500 console to page units and personnel.

This product functions as an extension to the dispatcher functionality. Alphanumeric messages and/or tone pages can be transmitted from the dispatch environment over the third-party paging terminal to the destination paging unit. I/Page must be customized to adapt to the third-party paging terminal available. I/Page uses either a serial RS-232 connection (direct or dialup) or Network-based (TCP/IP) connection to communicate with the Paging Controller.

In addition, I/Page interfaces with the Zetron Model 25 and Orbacom paging controllers to send out tone alerts.

Messages may be sent through the I/CAD "Send Message" command, which supports group messaging and logs messages sent, or may be sent automatically when a unit is dispatched to an event. Message length is limited to the message length of the pager (each request sends only one page). Since most pages are one-way, I/Page cannot confirm that the pager actually received the message; however, I/Page can confirm that the paging controller acknowledged the message. If a message cannot be sent, a message is sent to the supervisor indicating the nature of the problem.

Assumptions:

- Hexagon assumes that the paging system uses one of the supported protocols. Each license of I/Page allows any number of potential pagers. The connection of the Paging Controller is assumed to be RS-232 or Network based (TCP/IP). Connection may be made through a dedicated or dial up line.
- Hexagon assumes use of a single paging controller type.
- I/Page does not support voice paging; it only supports alphanumeric text.
- The Customer is responsible for providing any phone lines, modems, internet connections, etc. required to establish the connection with the paging terminal(s).

Constraints:

- Each distinct paging controller type requires a separate license of I/Page. However, the Customer may implement multiple paging providers using the same protocol, and these would be considered a single paging controller for licensing purposes.

- SMTP provides the ability to send email messages and is the link between the Microsoft® Windows® Exchange server and the I/Page system.
- I/Page does not support bidirectional communications.
- The Customer is responsible for providing complete and accurate documentation for the paging system interface
- Hexagon cannot be held accountable for incompatibilities that occur in this interface as the result of changes to input/output formats or data requirements associated with the third-party vendor's product

I/FRMS-CADLink – Fire

- To FirstDue

Description:

I/FRMS CADLink interfaces I/CAD to third party Fire Records Management Systems (FRMS) and facilitates the periodic transfer of event and unit information to the external FRMS as follows:

- Event information is generated when the first unit's status changes to that specified by the user. Valid status changes include unit Dispatch, Enroute, On Scene, Transport, Transport Arrive, and Clear.
- Unit information is generated for each unit whose status changes to that specified by the user. More than one status can be specified for sending unit information.
- Event information that includes event closing data is generated when the event is closed.

The I/FRMS CADLink interface is available in three flavors.

1) Vendor defined ASCII interface to Xerox FireHouse

2) Vendor defined ASCII interface to ZOLL RescueNet

3) Standard XML output for all other FRMS vendors

Assumptions:

- I/FRMS CADLink delivers incident and unit information in XML documents format. External FRMS vendors are responsible for building imports to bring the data into the particular FRMS database
- The transmission protocol between I/FRMS CADLink and the remote Fire RMS is assumed to be TCP/IP.
- If the Customer has multiple instances of data output, additional copies of the I/FRMS CADLink license are required per output instance.

Constraints:

- The Customer is responsible for providing complete and accurate documentation on the systems to be interfaced.
- The Customer is responsible for acquiring and installing a data import capability into their current Fire RMS(s).
- Hexagon cannot be held accountable for incompatibilities in its interface which are due to changes in input/output formats or data requirements of the vendor's product.

RapidSOS for I/CAD Essentials – Police and Fire

Description:

The RapidSOS for I/CAD Essentials application integrates with the RapidSOS Web Service to pinpoint the location of a cell phone call. RapidSOS for I/CAD runs within the I/Calltaker and/or I/Dispatcher application as an add-in. The RapidSOS for I/CAD application provides operators with the ability to query the RapidSOS™ clearinghouse for a more accurate location of cell phones and retrieve the longitude and latitude associated with an active call. The query then populates the Location field of the CAD Event form with this information.

I/Telephone Device for the Deaf (I/TDD) – Police and Fire

- To Vesta

Description:

The I/TDD software interfaces to TDD hardware provided by the customer to automatically recognize TTY calls passed to the interface in type “T” packets. Upon detection of a type “T” packet, the interface automatically opens a TDD form, allowing the operator to communicate with the caller via the workstation keyboard.

Executing a TDD Text button option appends the entire written conversation to the Event Information dialog box Remarks field, ensuring inclusion of the conversation in the incident history. By appending the data to the Event Information Remarks field, the TDD event is automatically referenced to the unique I/CAD System Event number and, as such, does not require cross-referencing to the TDD Text File.

Upon detection of Baudot tones, the I/CAD interface automatically opens the TDD conversation window, allowing the use of the CAD workstation keyboard for communications with the TDD sender.

The I/TDD interface provides a conversational window to display both sides of a TDD conversation. The interface allows the call taker to quickly toggle between TDD operation and incident data entry through the use of <ALT><TAB> or by selecting the window/field in which to enter data.

I/TDD allows for the entire conversation to be appended to the incident record and may be quickly retrieved as needed. TDD conversations that are not associated with an incident are also logged for later recall.

Incoming TDD calls are routed through the TDD controller, which acts as a modem for ASCII encoded signaling.

Each workstation having TDD capability requires:

- Model 3030
- Handset interface
- Desktop adapter
- 2 blank faceplates
- Model 3030 CAD (PN 950-00068/709-7490) – this converts the proprietary 9-pin serial port on the 3030 into a standard 9 pin RS-232 connection for the CAD workstation/server.

Assumptions:

- Hexagon assumes this is one of the currently supported interfaces and that the customer has an ANI/ALI controller and a CAD link that sends the type "T" packet.
- Hexagon assumes the customer will purchase the third party interface (TPI) from Airbus (Plant/Vesta).

- If the customer has Plant/CML, they need to contact their Plant Vesta representative to determine if they have the right version of Plant/CML, to determine if their system passes the TDD text in the type "T" packet in the CAD link.
- If the customer interfaces to the new Plant/CML system, the customer will need to check with their telephone vendor to determine if it supports the interface. If it does, the customer will need to purchase the Plant/CML Third Party Interface (TPI) interface.

I/PTT – Police and Fire

- To Motorola MCC7500

Description:

I/Push to Talk (I/PTT) interfaces to a radio system controller over a network connection (TCP/IP) or a serial (RS-232) connection to provide PTT information to a dispatcher workstation. Each time a radio unit in the field transmits to the dispatch environment, the identification of the transmitting unit is displayed in a special area (banner) on the dispatcher's workstation monitor. I/PTT also supports a Unit Emergency signal from a PTT radio.

Constraints:

- Intergraph Public Safety cannot be held accountable for incompatibilities in its interface which are due to changes in input/output formats or data requirements of the vendor's product.
- The customer is also responsible for providing complete and accurate documentation on the radio system interface, and the customer is responsible for providing any hardware/software on the radio system as required to implement this interface to their radio system

I/Sight to Genetec VMS – Police and Fire

I/Sight Server, along with the Video Responder client, extends the I/CAD platform with a two-way interface to third-party digital video recorder/video management system and camera systems. I/Sight Server with Video Responder offers monitoring and control of cameras directly from within I/Dispatcher and presents video feeds associated with an event location to the dispatcher as part of the response workflow.

I/Sight Server, when combined with the Video Responder client, acts as a stand-alone product that interfaces cameras directly with CAD.

General Assumptions:

- Genetec's approval will be required for Hexagon to provide the proper interface for this software. Upon Genetec's approval, Hexagon can price additional interface software upon request.
- Hexagon assumes I/CAD and I/Sight suite version 9.4
- Hexagon assumes the I/CAD Database will be used for storage of video bookmarks and clips only.
- Hexagon assumes access to VPN at customer location will be available.
- Hexagon assumes customer will secure and provide APIs, SDKs, and related documentation as required for all third party interfaces.
- Integration build and initial test will be performed in a lab environment prior to installation on the production system.
- Message formats not compatible with existing formats may require additional custom integration not included.

- Hexagon assumes all third party system interfaces will provide XML data.
- Hexagon assumes all third party system interfaces are installed, configured, and operating in accordance with specifications prior to integration.
- Hexagon assumes an automatic device discovery process can be utilized for import of video and device data. Manual cleansing, loading and configuration of devices is considered additional scope. Maintenance and troubleshooting commands and other related functions of the external alarm system will remain with that system.
- Hexagon has not bid the capability to monitor or control PSIM incidents, fire alarms or other third-party security data within CAD.

Infrastructure and Design Assumptions:

- Hexagon assumes hardware, cables and network infrastructure, connectivity and security required to make the Customer solution operational is currently in place.
- The minimum bandwidth required for Video Responder depends on the number of streaming videos, compression rates and frame rate. However, a minimum of 10MB to each workstation is required.
- Hexagon recommends that the WAN/LAN support 1GB.
- The Video Responder workstation video cards and video card/computer memory must be able to support enough bandwidth to be able to stream and monitor the required number of video feeds.

Video Integration Assumptions:

- The video system integration will be provided via the I/Sight SDK video vendor plug-in for the specific VMS vendor.
- Hexagon will provide access to real-time video feeds as available through the VMS system interface.
- Hexagon will provide access to archived video for post-incident analysis if data is stored and available through the VMS system.
- Hexagon will store video clips associated with a CAD event in the CAD database.
- Hexagon will store snapshots associated with a CAD event in the CAD database.
- The Customer will provide all device data not available through the auto-discovery process in an Excel spreadsheet for bulk loading into I/Sight. Data includes latitude, longitude, and structure/building level, etc.
- The Customer will provide required data for all cameras one month prior to commencement of interface build.
- Additional data provided past the cutoff point will be assumed to be integrated into the Hexagon system by the Customer.
- Additional camera device data provided past the cutoff point is considered outside scope and must be integrated into the Hexagon system by the Customer.
- Hexagon provides camera arbitration between the I/Security suite video software components and a manual joystick, if attached to I/Sight - Video Responder.
- Arbitration for a manual joystick attached to an external VMS system or third-party VMS software control is not included.

Standard Interfaces

CADFusion Xalt CAD Interface to FATPOT (Central Square Hub) – Police and Fire

Description:

The CADFusion CAD Xalt Interface is an Xalt based application that communicates between I/CAD and FATPOT Fusion NG using XML over TCP/IP for the purposes of sharing Unit and Event information with third party CAD systems.

Assumptions:

- The interface will communicate with XML documents over TCP/IP.

Phoenix G2 CAD Xalt Interface – Fire

Description

The Phoenix G2 CAD Xalt interface is an interface between I/CAD and the U.S. Digital Design (USDD) Phoenix G2 Fire Station Alerting Solution. The interface sends unit and event information to the Phoenix G2 system to trigger station alarms, unit dispatch, and update unit coverage within fire stations.

Assumptions:

- The XML format required by the external systems must be provided to Hexagon.
- For bidirectional interfaces created using Xalt, data will be provided via either a shared directory on the Customer's network or via a web service where the data can be pulled.

Constraints:

- The Customer is responsible for providing complete and accurate description of the API needed to interface, and for any software/hardware/data required to implement communications with the external systems.

InterCAD CAD Xalt Interface – Fire

- To Tablet Command, Corona Police Motorola Flex

The InterCAD CAD Xalt Interface is a generic CAD to CAD Interface between Intergraph CAD and 3rd party CAD vendors using Xalt Integration as the interface development platform. This is based on a rules-driven real-time transfer of unit and event information to and from Intergraph CAD system and 3rd party CAD systems. Hexagon uses the InterCAD interface as our standard application to support TabletCommand functions.

Assumptions:

- Licensing for Motorola Enhanced CAD to CAD API has been obtained by customer or 3rd party CAD Vendor and approved for use in this project.
- The XML format required by the external systems must be provided to Hexagon.
- For bidirectional interfaces created using Xalt, data will be provided via either a shared directory on the Customer's network or via a web service where the data can be pulled.

Constraints:

- The Customer is responsible for providing complete and accurate description of the API needed to interface, and for any software/hardware/data required to implement communications with the external systems.

Axon CAD Xalt Interface – Police Description:

The Axon CAD Xalt interface is an application that provides real-time unit and event data transfer from I/CAD to Axon for the purposes of linking CAD event and unit records with body worn camera video records in evidence.com.

Assumptions:

- Interface exports a CSV file to folder monitored by AXON for them to consume and tag body camera footage to event records.
- For this interface, data fields exported are part of a mutually agreed upon design between Axon and Hexagon.

Constraints:

- The Customer is responsible for providing complete and accurate description of the API needed to interface, and for any software/hardware/data required to implement communications with the external systems.

PulsePoint CAD Xalt Interface

Description:

The PulsePoint CAD Interface is an Xalt based interface between I/CAD and the PulsePoint application. The interface sends CAD event information matching Customer-defined event types to PulsePoint for alerting PulsePoint subscribers of a medical emergency. The Xalt rules engine component runs on an interface server.

Assumptions:

- The XML format required by the external systems must be provided to Hexagon.
- For bidirectional interfaces created using Xalt, data will be provided via either a shared directory on the Customer's network or via a web service where the data can be pulled.

Constraints:

- The Customer is responsible for providing complete and accurate description of the API needed to interface, and for any software/hardware/data required to implement communications with the external systems.

I/CAD Message Ste for CA State Switch (Police) (CLETS)

Description:

The message switch allows inquiries and updates to CLETS, NCIC, and NLETS via the California Department of Justice.

These transactions defined are for I/Informer Client and supports automatic queries upon entry into I/CAD supplemental info for Person, Vehicle, Gun and Article.

Assumptions:

- Assumes a direct connection to CLETS and NOT a connection to the San Bernardino Level II switch.
- The agency should provide a test connection to CLETS before the scheduled interface delivery date.

Constraints:

- MPS supports inquiries only from this product.

- Nested inquiries are excluded from this bid.
- Includes all transactions defined in the document "I/CAD Message Ste for CA State Switch" Attachment H-1, as is, without additional transactions or customizations.

Custom Interfaces

Telestaff –Fire

Description:

Import from Telestaff to support updating employee information with the following:

- Name
- Personnel Number
- Badge Number
- Vehicle
- Radio
- Department
- Position
- Title
- Skills

Additionally - the ability to import staffing/line up from Telestaff to create/update lineups in CAD to include:

- Unit ID
- Personnel (Employee IDs)
- Radio Assignment (Radio IDs)
- Vehicle ID

FirstDue I/Informer Query – Fire

Description:

I/Informer will query the Fire RMS system based on location data to return and attach responses to the CAD event.

Assumptions:

- Fire RMS provides access using a web service or ODBC.
- A single inquiry using SQL or GET method is used to obtain preplan and hazardous material response information
- Nested / cascading inquiries are not included
- The agency obtains a test connection to Fire RMS at least 30 days before the scheduled software staging date.
- Inquiries and response examples contain production-equivalent data for accurate testing
- The Customer provides a subject matter expert with unlimited support. This includes communicating with the database vendor and users.

- Image responses are not included.
- The database provider supports a configurable maximum number of records to control the response size.

Export to Rave Mobile Safety/Smart 911 – Fire

Description:

Hexagon will create an export of location of event to Rave911. Rave will compile a report and send Hexagon's interface a URL to the Rave report. that URL will be inserted into the event comments for access by system users (calltakers, dispatchers, field users, etc.)

JIMS – Police

Description:

Hexagon will create a Person query against JIMS.

Assumptions:

- Leveraging the same person form delivered with I/Informer with no customizations
- ODBC connection to JIMS
- Query by Name/DOB or OLN or SSNDescription:

The message switch allows inquiries and updates to CLETS, NCIC, and NLETS via the California Department of Justice. These transactions defined are for I/Informer Client and supports automatic queries upon entry into I/CAD supplemental info for Person, Vehicle, Gun and Article.

Assumptions:

- Direct connection to CLETS and NOT a connection to the San Bernardino Level II switch. If this is not accurate, then this interface must be reevaluated and rescoped.
- MPS supports inquiries only from this product.
- The agency should provide a test connection to CLETS before the scheduled interface delivery date.
- Nested inquiries are excluded.

OnGuard/ACAMS

Description:

Detailed Mapping/location information is necessary for this interface. All doors, entryways, etc. in the airport that may trigger an applicable alarm should be contained as an address point in the I/CAD Map.

Location Verification should be validated by Catalogued Alarms (Alarm Permit ID), common place name or street address. For entry/exit, access control panel - the address points should be defined in the I/CAD Map and corresponding Common Place name with Latitude/Longitude and/or X,Y Coordinate. All Locations should validate without any ambiguity (i.e. each alarm validates to a single address point, Alarm ID or Common Place Name). Will accept Latitude Longitude as a last resort with estimated address included in location comments.

Alarm types to be mapped to customer I/CAD Event Type/Sub Type combinations (unauthorized entry, panic alarm, medical alert, fire Alarm, etc.)

Assumptions:

- Connection to the Alarm provider is a single endpoint over TCP or HTTP. Message payload should be XML or JSON.
- Alarm provider will provide alarms in real time and not relying on the interface to poll for alarms.

Legacy Tiburon RMS I/Informer Query

Description:

The following inquiries are included in this bid:

- Person Inquiry by (NAM, DOB, SEX) or (OLN), State
- Vehicle Inquiry by (LIC), State
- Gun Inquiry by SER, MAKE, Caliber, Model
- Article/Property Inquiry by SER, MAKE, MODEL

Assumptions:

- The system supports an ODBC or HTTP.
- If ODBC, the customer will provide the exact SQL for the inquiries listed. If HTTP, the customer will provide the appropriate API Calls. This is required during the ICD review phase.
- Nested inquiries / follow up inquiries are excluded from this bid.
- Images are excluded from this bid.
- Test records will be provided by the customer technical point of contact. This is required during the ICD review phase.
- Test records will return production-equivalent response data for each inquiry.
- The data requested in the select statements for the listed inquiries will not exceed the maximum number of fields listed below:
    - Person Inquiry - 20 fields
    - Vehicle Inquiry -20 fields
    - Firearms: 8 fields
    - Property: 8 fields
- The inquiries will be supported from the Person, Vehicle, article and Gun forms that are included in the I/Informer Client and MPS applications. No additional forms are included in this bid to support the inquiries.
- SQL and response examples will be provided during the I/Informer ICD review phase. This is required before software development beings.
- A test connection, including a compatible ODBC driver, if applicable, will be obtained by the customer before the scheduled interface delivery milestone.
- The customer will provide an SME during the development and implementation phases.

Constraints:

- This bid must be revisited if the transaction list is changed. A change order will be required if the agency requests changes to the transaction list after the SOW is approved.

Consulting Services

Eventide Logging Recorder Vendor Views (Consulting Services) – Fire

Description:

Hexagon will work with the Customer to determine the information needed by Verint Logging Recorder and will create vendor views in a replication database so that Verint Logging Recorder can extract the data directly in order to link data to events.

Assumptions:

- Information to be transferred to/from the other system will be determined based on third party requirements.
- Description of how the interface is to function from the user's point of view: no user input required. The third party will query directly into the report/archive database for information.
- Communication protocol required: ODBC

Verint Logging Recorder – Police

Description:

Hexagon will work with the Customer to determine the information needed by Verint Logging Recorder and will create vendor views in a replication database so that Verint Logging Recorder can extract the data directly in order to link data to events.

Assumptions:

- Information to be transferred to/from the other system will be determined based on third party requirements.
- Description of how the interface is to function from the user's point of view: no user input required. The third party will query directly into the report/archive database for information.
- Communication protocol required: ODBC

Coplink – Police

Description:

Hexagon will work with the Customer to determine the information needed by CopLink and will create vendor views in a replication database so that CopLink can extract the data directly in order to link data to events.

Assumptions:

- Information to be transferred to/from the other system will be determined based on third party requirements.
- Description of how the interface is to function from the user's point of view: no user input required. The third party will query directly into the report/archive database for information.
- Communication protocol required: ODBC

Vigilant/Flock ALPR – Police

Description:

Hexagon will work with the vendor to access Hexagon's vehicle query form within MPS, and where the response is stored in the message archive for them to access and parse.

Assumptions:

- Information to be transferred to/from the other system will be determined based on third party requirements.
- Description of how the interface is to function from the user's point of view: ALPR will access the MPS Vehicle Query Form to submit an I/Informer query. The Response will be delivered and displayed in MPS in the same manner as if the user initiated the query directly.

Assume ALPR will leverage their own offline database of stolen vehicles and MPS/Informer will be used to confirm a stolen vehicle through direct CLETS QueryFUSUS – Police

Description:

Hexagon will work with the Customer to determine the information needed by FUSUS and will create vendor views in a replication database so that FUSUS can extract the data directly in order to link data to events.

Assumptions:

- Information to be transferred to/from the other system will be determined based on third party requirements.
- Description of how the interface is to function from the user's point of view: no user input required. The third party will query directly into the report/archive database for information.
- Communication protocol required: ODBC

ONTCOM

Description:

Hexagon will work with the Customer to discuss the use of the I/CAD Database Views that come with the default Database Schema. These services will aid the Customer to ensure the required fields are present in the database views or ensure that Customer is familiar enough with the database schema to query this information directly.

Assumptions:

- Customer will not interact with the production database for these queries
- Will require a real time replica of the I/CAD 9.4 database. (appropriate Microsoft SQL Server licensing required)

Attachment H-1 – I/CAD Message Suite for California State Switch

[See following this page]

Attachment I – Glossary of Terms

Capitalized terms that are not defined below or within the body of the SOW, shall have the same meaning as set forth in the Master Terms Glossary.

"Acceptance" to mean acceptance of a Task in accordance with Task Acceptance Process.

"Agreement" shall mean that certain agreement by and between the Customer and Hexagon executed simultaneously with this Order.

"Benchmark Criteria" or "**Specifications**" means the objective criteria which identifies an intended outcome as reflected in, as applicable, an ICD, a Design Document, or Software Requirements (whichever document having last addressed the functionality in question being dispositive)

"Blocker Defect" means a Test Case has failed to satisfy the Benchmark Criteria that would correspond to a Level One Defect or Level Two Defect, or a Level One or Level Two Defect.

"Code Freeze" means a point in the Project where Customer may not make any change, configuration change, or other modification to the Software implemented as part of the Project.

"Core Team(s)" means all of the respective Subsystem Core Teams pertaining to the Project, which depending on the Project will collectively include: the Dispatch Core Team.

"COTS Interfaces" means those Interfaces specifically identified in COTS Interface Questionnaire Completion Task in the SOW

"Customer Responsibilities" means (1) those specific tasks and obligations identified in the SOW as being the responsibility of the Customer and (2) those obligations, not stated in the SOW, but which would otherwise be reasonably considered as being Customer obligations and responsibilities.

"Custom Interfaces" means those Interfaces specifically identified in the applicable Task

"Customization" means a modification of the source code of Software.

"Cutover Plan" means a document reflecting the Activities and actions necessary to Cutover the System.

"Design Document" means a document articulating the design and intended output of a Customization.

"Documentation" means, whether in printed or electronic format, all documents (digital or hardcopy) delivered by Hexagon as part of the Project. Unless otherwise specified, it shall mean COTS Documentation.

"Facility" means a Customer provided facility/building/room that: (i) Can accommodate up to twelve (12) Customer participants; (ii) Has a projector and screen for displaying the content being presented, (iii) has Project Workstations for each participant; and a Customer workstation available for Hexagon's use while in the Facility.

"Functional Testing" means that testing process described in the Customer Functional Testing Task(s).

"GIS" means geographic information system

"Initial Schedule" means the initial iteration of the Project Schedule, which is contained in Attachment C of the SOW.

"Interface Control Document" or **"ICD"** means a document reflecting the design and requirements of a Custom Interface or certain I/Informer Interfaces, if any.

"Help Desk Portal" the electronic portal through which Customer may access the Help Desk to among other actions, log Services Requests, review the Knowledge Base,

"Hexagon Project Manager" means the person authorized by Hexagon to coordinate and manage the providing of Hexagon Services and Deliverables for the Project on behalf of Hexagon, in addition to being responsible for other duties specified in the Agreement and SOW.

"Master Terms Glossary" means that certain Common Terms Glossary set forth at Exhibit E-1 of the Agreement..

"Network Infrastructure" means the provision of adequate network and internet connectivity to provide sufficient operational bandwidth for the operation of the System in a manner consistent with the Product System Specifications together with all industry-standard network security, monitoring, and protection.

"Permissive Defect" means a substantially failed Test Case that would correspond to a Level Three or Level Four Defect

"Project Assumptions" means assumptions regarding the Project, which are listed in the SOW. Changes in any of the assumptions will affect the scope, schedule, and/or cost of the Project.

"Project Team" means the applicable Core Team and other resources assigned to provide information or services in connection with the Project, or applicable part thereof.

"Project Workstation" means a computer workstation (expressly excludes tablets or other smart devices) that has: (i) Google Chrome installed and ready for use; (ii) Internet access; (iii) at least one (1) external monitor with a resolution no smaller than 1920x1080 (understanding two (2) external monitors are recommended); (iv) the ability to connect to the web conference audio; and (v) a headset.

"Server Setup Worksheet" means a document reflecting, among other details, the identification of servers, IP addresses, and node names for the System.

"Site Configuration Document" means a document reflecting the configurations made to the I/CAD System.

"Software Requirements" means the functionality and capabilities affirmatively included in the I/CAD Software as expressly specified in CAD Functional Matrix (Attachment G).

"SR" or **"Service Request"** a request logged into Hexagon's Help Desk Portal identifying a request for Hexagon to address a Defect, question, provide an Update, or provide an enhancement request, among other requests.

"Subject Matter Expert" or **"SME"** means a person(s) who has particular knowledge about a specific topic(s).

"System Administrator(s)" means a person or persons having the appropriate education, training, and/or experience in information technology to provide first tier support of the System.

"Task Prerequisites" means those events, deliverables, or accomplishments that are required to occur prior to the commencement of the applicable Task, except as may otherwise be agreed to through Conditional Acceptance.

"Test Case" means a set of conditions and parameters agreed to by the Parties which the Parties shall use to test whether the intended functionality identified in the Benchmark Criteria is reflected in the System.

"Test Case Failure" means a situation in which an executed Test Case has substantially failed in meeting the passage criteria set forth in the applicable portion of the Benchmark Criteria.

"Updated Initial Project Schedule" means the Initial Project Schedule updated by the Parties' Project Managers during Project Kickoff Meeting Task and reflecting the actual Notice to Proceed date.

"VPN" means virtual private network.

"Warranty Period" means that one (1) year period beginning at Cutover for a Subsystem during which the applicable Project Software is subject to the warranty described in Attachment J.

Attachment J – Warranty

Subject to the following, Hexagon warrants the Hexagon Software provided in this Agreement shall materially conform to its Specifications for one (1) year from Cutover of the applicable Subsystem, provided that in the event of a nonconformity during the Warranty Period, Hexagon shall address the reported Defect in accordance with the support provisions identified below

EXCEPT AS SPECIFICALLY SET FORTH IN THIS ATTACHMENT, HEXAGON DISCLAIMS (TO THE FULLEST EXTENT PERMITTED BY LAW) ALL WARRANTIES ON PRODUCTS FURNISHED PURSUANT TO THE AGREEMENT, INCLUDING ALL WARRANTIES OF MERCHANTABILITY, DURABILITY, FITNESS FOR A PARTICULAR PURPOSE, HIGH RISK USE, AND NON-INFRINGEMENT. ALL WARRANTIES PROVIDED PURSUANT TO THIS MASTER AGREEMENT ARE VOID IF FAILURE OF A WARRANTED ITEM RESULTS DIRECTLY OR INDIRECTLY FROM AN UNAUTHORIZED USE OR MISUSE OF A WARRANTED ITEM, INCLUDING, WITHOUT LIMITATION, USE OF A WARRANTED ITEM UNDER ABNORMAL OPERATING CONDITIONS OR UNAUTHORIZED MODIFICATION OR REPAIR OF A WARRANTED ITEM OR FAILURE TO ROUTINELY MAINTAIN A WARRANTED ITEM. THE WARRANTIES SET FORTH IN THIS ATTACHMENT ARE IN LIEU OF ALL OTHER WARRANTIES, EXPRESSED OR IMPLIED AND REPRESENT THE FULL AND TOTAL WARRANTY OBLIGATION AND/OR LIABILITY OF HEXAGON. HEXAGON DOES NOT WARRANT THAT ANY COVERED PRODUCTS AND UPDATES PROVIDED UNDER THIS WARRANTY WILL MEET CUSTOMER'S REQUIREMENTS OUTSIDE OF THE BENCHMARK CRITERIA, AND UNDER NO CIRCUMSTANCES DOES HEXAGON WARRANT THAT ANY COVERED PRODUCTS AND UPDATES WILL OPERATE UNINTERRUPTED OR ERROR OR DEFECT FREE.

Support Provisions

Should a Defect arise, Hexagon shall provide support as follows, which represents the exclusive remedy of any Defect occurring during the Warranty Period.

During the Warranty Period, Hexagon shall provide Maintenance Services consisting of the following. Reasonable commercial efforts to aid in the diagnosis of Defects are included within Maintenance Services. Hexagon shall provide reasonable commercial efforts to aid in correction of Defects. Defect corrections provided by Hexagon shall, unless otherwise agreed by Hexagon, be delivered within Hexagon's product releases, and in accordance with Hexagon's standardized release cycles. Additionally, the following are available during the Warranty Period:

- Out-of-the-box functionality support via the support help desk (telephone or eService via the Designated Portal; and, access to any available Hexagon problem knowledge base online self-help tool.
- Phone support is available Monday through Friday from 0700-1700 Central Time, excluding Hexagon-observed holidays provided that for Level One Defects, telephone support is available at all times of the day, including holidays and weekends.
- Access to available Updates of Covered Software Products. Hexagon will notify through the Help Desk when Updates are made available for any Covered Software Products. Updates are shipped to Customer upon Customer's request logged in the Designated Portal site. Hexagon is not obligated to produce any Updates. For avoidance of doubt, a Customer's entitlement to Updates shall not include entitlement to any therein embedded or otherwise related module or function which is licensed and priced separately from Covered Products for which Customer has purchased an entitlement to Updates.

Provision of support during the Warranty Period is conditioned upon the following:

System Requirements. Customer is responsible for ensuring: the System Equipment and Network Infrastructure meet minimum system requirements specified by Hexagon and provided as Attachment E; its systems, software, and data are adequately backed up.

Customer will permit Hexagon to electronically access Customer's system via Secure Access Tool. Customer will ensure availability of its own system technical support personnel so that Hexagon can fulfill its Maintenance Services obligations. When reporting problems to Hexagon's support help desk, Customer will provide a complete problem description, along with all necessary documents and information that is available to Customer and required by Hexagon to diagnose and resolve the problem. Customer will grant all necessary access to all required systems as well as to the Covered Products, and any other reasonable assistance needed. Customer will carry out any reasonable instructions and will install any necessary patches, Defect corrections, or Updates. Customer will appoint a minimum of two and a maximum of five contact people who are each authorized to make use of the Maintenance Services ("Authorized Contacts"). Customer is obligated to select only those personnel for this task who are suitable for it by means of training and function, and who have knowledge of Customer's operating system, network, and hardware and software. Customer agrees to promptly notify Hexagon of any replacement of an Authorized Contact. Customer must ensure Authorized Contacts have adequate expertise, training, and experience to provide professionally accurate descriptions of malfunctions and facilitate Hexagon's efficient response. Authorized Contacts must have successfully completed Hexagon product training as provided in the Project. Customer will enter and/or log requests for assistance in such systems, and utilizing such forms, as Hexagon may designate from time to time.

Response Times The following reflect the Response commitments corresponding to the Defect classification. Moreover, for Level One Defects, Hexagon's goal is to resolve the Level One Defect within one (1) Day.

Priority	Definition	Response Time
Level One	*No workaround available and either:* ▸ *Productive use prohibited, or Aborts.*	Immediate or within 30 minutes of notification
Level Two	*No workaround available and either:* ▸ Primary purpose compromised, or Productive use significantly impacted	Within one hour of notification
Level Three	▸ Productive, but incomplete operation Level Three Defects generally have a workaround or do not otherwise substantially impair productive use.	M-F, 7:00AM-7:00PM Central Time – Immediate* or within eight hours of notification during normal business hours
Level Four	Defects not qualifying as Level One, Two, or Three, including defects of a cosmetic nature and defects not materially limiting complete productive use	M-F, 7:00AM-7:00PM Central Time – Immediate* or within eight hours of notification during normal business hours

Exclusions

The following are outside the scope of the Maintenance Services provided during the Warranty Period:

- Installation of any Covered Product, Update, or interface software;
- Network configuration;

- Configuration or customization of Covered Products to Customer or other third party requirements (except as necessary to remedy a Defect);
- System-level tuning and optimization and system administration support;
- Training;
- Services required because the Authorized Contact is not available or is not trained;
- On-site services (unless waived by Hexagon, in its sole discretion);
- Services required due to modifications of Covered Products by Customer;
- Services required due to use other than in the ordinary manner intended for the Covered Products, or use in a manner that contravenes terms hereunder, or Customer's disregard of the installation and operating instructions according to the Documentation provided with the Covered Products;
- Services required due to failure of software or hardware that is not a Covered Product;
- Services required due to Customer's use of hardware or software that does not meet Hexagon specifications or failure of Customer to maintain or perform industry standard maintenance on Customer's hardware or software;
- Services required due to software or portions thereof that were (i) incorrectly installed or configured (other than by Hexagon), (ii) used in an environment inconsistent with the support environment specified by Hexagon, and/or (iii) used with peripherals, operational equipment or accessories not conforming to Hexagon's specifications;
- Services required due to cases of force majeure, especially lightning strikes, fire or flood, third-party criminal acts, or other events not caused through Hexagon's fault;
- Services required due to Customer's failure to fulfill the Customer Obligations; and/or
- Services required due to faulty or incomplete Customer data.

Attachment K – Regional Provisions

The following terms, including any sub-attachments to this Attachment K, modify provisions set forth above to accommodate regional requirements. To the extent there is any conflict between the terms specified below and the terms set forth in the remainder of the SOW, the following shall control.

1. A Business Day includes up to eight (8) Business Hours, including breaks, during a twenty-four (24) hour period.

2. Upon Customer request, Hexagon personnel may undergo a criminal background check consisting of biographical information necessary to initiate an NCIC query and fingerprinting. To the extent the Customer requires Hexagon personnel to undergo such criminal background check, the Customer shall arrange for such criminal background check and fingerprinting and be responsible for all costs associated with the criminal background check and fingerprinting. Any remote personnel shall only be required to provide biographical information necessary to initiate a NCIC query and a fingerprint card completed by any law enforcement agency.

3. Per CJIS security policy, customers who wish to access U.S. national databases using mobile devices must use data encryption that is FIPS 140-2 certified and meets other CJIS requirements. The Customer is responsible for ensuring that their data communications infrastructure and devices comply with CJIS and applicable State requirements.

4. Any product information Hexagon has shared with Customer during the proposal and/or contract activities to date was to provide an understanding of Hexagon's current expected direction, roadmap, or vision and is subject to change at any time at Hexagon's sole discretion. Hexagon specifically disclaims all representations and warranties regarding future features or functionality to be provided in any Software or Deliverable(s). Hexagon does not commit to developing the future features, functions, and/or products discussed in this material beyond that which is specifically committed to being provided within the Software Requirements. Customer should not factor any future features, functions, or products into its current decisions since there is no assurance that such future features, functions, or products will be developed. When and if future features, functions, or products are developed, they may be made generally available for licensing by Hexagon.

5. Where Personal Data is provided by the Customer to Hexagon, the Customer shall act as the data controller and shall be responsible for complying with all applicable data protection laws. Hexagon shall act as the data processor with respect to the Personal Data and shall process the Personal Data in accordance with applicable data protection laws.

6. Hexagon will only process Customer supplied Personal Data in accordance with the Customer's lawful instructions and to the extent and as necessarily required to provide the applicable goods and services under the Agreement and for no other purpose. Except as may be otherwise required by law, contract, or judicial order, after expiration or earlier termination of the Agreement, Hexagon will destroy all Customer-supplied Personal Data in accordance with applicable data protection laws. Customer consents to and authorizes Hexagon to process and receive Personal Data provided by Customer to facilitate Hexagon's performance and execution of its obligations within the Project.

Attachment K-1 – CJIS Security Addendum

FEDERAL BUREAU OF INVESTIGATION

CRIMINAL JUSTICE INFORMATION SERVICES

SECURITY ADDENDUM

The goal of this document is to augment the CJIS Security Policy to ensure adequate security is provided for criminal justice systems while (1) under the control or management of a private entity or (2) connectivity to FBI CJIS Systems has been provided to a private entity (contractor). Adequate security is defined in Office of Management and Budget Circular A-130 as “security commensurate with the risk and magnitude of harm resulting from the loss, misuse, or unauthorized access to or modification of information.”

The intent of this Security Addendum is to require that the Contractor maintain a security program consistent with federal and state laws, regulations, and standards (including the CJIS Security Policy in effect when the contract is executed), as well as with policies and standards established by the Criminal Justice Information Services (CJIS) Advisory Policy Board (APB).

This Security Addendum identifies the duties and responsibilities with respect to the installation and maintenance of adequate internal controls within the contractual relationship so that the security and integrity of the FBI's information resources are not compromised. The security program shall include consideration of personnel security, site security, system security, and data security, and technical security.

The provisions of this Security Addendum apply to all personnel, systems, networks and support facilities supporting and/or acting on behalf of the government agency.

1.00 Definitions

1.01 Contracting Government Agency (CGA) - the government agency, whether a Criminal Justice Agency or a Noncriminal Justice Agency, which enters into an agreement with a private contractor subject to this Security Addendum.

1.02 Contractor - a private business, organization or individual which has entered into an agreement for the administration of criminal justice with a Criminal Justice Agency or a Noncriminal Justice Agency.

2.00 Responsibilities of the Contracting Government Agency.

2.01 The CGA will ensure that each Contractor employee receives a copy of the Security Addendum and the CJIS Security Policy and executes an acknowledgment of such receipt and the contents of the Security Addendum. The signed acknowledgments shall remain in the possession of the CGA and available for audit purposes. The acknowledgement may be signed by hand or via digital signature (see glossary for definition of digital signature).

3.00 Responsibilities of the Contractor.

3.01 The Contractor will maintain a security program consistent with federal and state laws, regulations, and standards (including the CJIS Security Policy in effect when the contract is executed and all subsequent versions), as well as with policies and standards established by the Criminal Justice Information Services (CJIS) Advisory Policy Board (APB).

4.00 Security Violations.

4.01 The CGA must report security violations to the CJIS Systems Officer (CSO) and the Director, FBI, along with indications of actions taken by the CGA and Contractor.

4.02 Security violations can justify termination of the appended agreement.

4.03 Upon notification, the FBI reserves the right to:

a. Investigate or decline to investigate any report of unauthorized use;

b. Suspend or terminate access and services, including telecommunications links. The FBI will provide the CSO with timely written notice of the suspension. Access and services will be reinstated only after satisfactory assurances have been provided to the FBI by the CGA and Contractor. Upon termination, the Contractor's records containing CHRI must be deleted or returned to the CGA.

5.00 Audit

5.01 The FBI is authorized to perform a final audit of the Contractor's systems after termination of the Security Addendum.

6.00 Scope and Authority

6.01 This Security Addendum does not confer, grant, or authorize any rights, privileges, or obligations on any persons other than the Contractor, CGA, CJA (where applicable), CSA, and FBI.

6.02 The following documents are incorporated by reference and made part of this agreement: (1) the Security Addendum; (2) the NCIC 2000 Operating Manual; (3) the CJIS Security Policy; and (4) Title 28, Code of Federal Regulations, Part 20. The parties are also subject to applicable federal and state laws and regulations.

6.03 The terms set forth in this document do not constitute the sole understanding by and between the parties hereto; rather they augment the provisions of the CJIS Security Policy to provide a minimum basis for the security of the system and contained information and it is understood that there may be terms and conditions of the appended Agreement which impose more stringent requirements upon the Contractor.

6.04 This Security Addendum may only be modified by the FBI, and may not be modified by the parties to the appended Agreement without the consent of the FBI.

6.05 All notices and correspondence shall be forwarded by First Class mail to:

Information Security Officer

Criminal Justice Information Services Division, FBI

1000 Custer Hollow Road

Clarksburg, West Virginia 26306

COMPENSATION (Cost Summary)

I/CAD PRICING – FIRE AND POLICE COMBINED	TOTAL
I/CAD Software*	
Fire Agency I/CAD Software	$924,507
Police Agency I/CAD Software	$692,999
I/CAD Custom Interfaces (Fire)*	
CAD Interface to Telestaff	$14,335
CAD Interface to Rave Mobile Safety/Smart 911	$13,764
CAD Interface to First Due (I/Informer Query)	$21,888
Consulting Services for CAD Interface for Eventide NG911/ATOS	$2,867
CAD Interface to Legacy Tiburon RMS	$46,919
CAD Interface to OnGuard/ACAMS	$37,734
CAD interface for Additional Mobile Responder Queries	$16,629
Consulting Services for CAD Interface to ONTCOM	$2,867
I/CAD Custom Interfaces (Police)*	
Consulting Services for CAD CopLink	$1,933
Consulting Services CAD Interface to Vigilant/Flock ALPR	$1,933
Consulting Services CAD Interface to FUSUS	$1,933
Consulting Services CAD Interface to Verint Logging Recorder	$1,933
CAD Query Interface to JIMS	$11,940
I/CAD Project Services	
Fire Agency I/CAD Project Services	$1,244,547
Police Agency Add-on I/CAD Project Services	$285,363
Test Plan Workshop (Police and Fire)	$16,850
Police 24/7 Cutover Support	$60,474
Fire 24/7 Cutover Support	$40,316
Grand Total including 12 Months of Extended Warranty:	**$3,441,731**
Recurring Fee:	
Total System Recurring Fee Year 2	$362,394
Total System Recurring Fee Year 3	$380,513
Total System Recurring Fee Year 4	$399,539
Total System Recurring Fee Year 5	$419,516

**Price includes 12 months of extended warranty which begins at sub-system cutover*

OPTIONS	TOTAL
Third Party Hardware, System Software, and Installation Services	$794,153
BPR Year 1	$20,077
BPR Year 2	$21,081
BPR Year 3	$22,135
BPR Year 4	$23,242
BPR Year 5	$24,404
HxGN Live Registration Passes 2027 (Qty 2)	$990

Pricing Assumptions

- The price is assuming a combined project implementation with Ontario Fire and Police Agencies. If Customer chooses to complete the projects separately, Hexagon reserves the right to reprice system integration services costs.
- The price for the I/CAD project assumes the implementation, configuration, training, testing and cutover will happen as a part of one combined project.
- Project Services included in this response are inclusive of the Services and travel as expressly described in this SOW.
- Software licenses for Backup and Test Environments are included at no additional cost.
- Extended warranty is included in the base system software and interface purchase price. Extended warranty is for a period of 12 months commencing at System Cutover.
- Hexagon has included 4 optional years of annual recurring system maintenance at 5% increase year-over-year, Annual Recurring Costs provided in the proposed pricing are based on the types and quantities of proposed software and system configuration as described specified above. Any changes to the quantities and/or types of Software comprising the Customer's System proposed software and system configuration as a result of change orders executed during the project implementation or additions/removals of products after Cutover will result in a corresponding change to the Total Annual Recurring Costs (e.g., price for Maintenance Services). Such adjustment will be based on then-current pricing at the time of the Order or Change Order. Please refer to the included Bill of Materials for a specific list of software and license counts included in the proposed price.
- Unless otherwise noted, project management services, implementation services, and Maintenance Services (Extended Warranty) ARE NOT included in optional pricing. Options for Hexagon Services are valid for 6 months (with the exception of CAD BPR) and Hexagon Product pricing is valid for one year after contract signing. Hexagon can provide a fixed quote when optional items are selected. The Recurring Fees and CAD BPR and HxGN Live Options would be subject to a separate agreement between the parties.
- Base price includes Bi-Annual HxGN Live attendance fee for two (2) attendees for 2025. HxGN Live 2027 attendance fees are included as an option. HxGN Live attendance fees do not include travel and lodging costs.
- Per the RFP requirement, Hexagon has included options for up to five (5) annual Business Process Review (BPR) workshops. The initial BPR would be available for use following completion of the Reliability Period. An SOW, with the pricing corresponding to the year in which the request is made, will be provided when the Customer desires to exercise this option. As part of the workshop, Hexagon will visit the Customer site for up to four consecutive days and focus its attention on configuration and

workflow reviews, configuration updates for new functionality, best practices for system administration and system maintenance. Topics of the reassessment will be identified through communications and direct meetings with customer representatives from all aspects of the system, including end users and system administrators. Hexagon will also observe operations as needed. From these observations, recommendations will be made for modifications or additions to configurations, workflow adjustments that could be made to operations, or training that might benefit the users or system administrators. Each annual BPR will require 90 days' notice to proceed and will be billed once the workshop has been executed. Any unused BPR will not carryover to the following year.

- Please note the first BPR workshop must be exercised within 12 months following cutover to production.
- Sales tax is not included in this quote. Final sales tax billed will reflect the applicable tax rates at time of sale as required by law.
- If available, any included third-party hardware and associated software procured by Hexagon is provided with a pre-paid 5-year pass-thru-warranty from the original manufacturer. The warranty for third party hardware and associated software commences on the date the hardware is shipped to the customer. Hexagon commits to not shipping hardware until absolutely needed to not degrade the warranty timeframe for the City. Third party hardware warranties begin earlier than the commencement of Hexagon's first year of maintenance or Extended Warranty, which begins at Subsystem cutover.
- This offer is valid through 11/30/23.

EXHIBIT "D"
Payment Terms

Upon completion of the Task (as defined in the SOW) set forth in the SOW and identified below, Hexagon is permitted to invoice the corresponding amount, which the City shall pay in accordance with the Agreement.

Milestone Deliverable	MS ($)
Upon Completion of Task 1: Project Kickoff Meeting	$344,173
Upon Completion of Task 9: CAD Server Software Staging	$516,260
Upon Completion of Task 11: CAD System Build 1	$344,173
Upon Completion of Task 18: Map Build 2	$344,173
Upon Completion of Task 15 CAD System Configuration 1	$344,173
Upon Completion of Task 28: Customer Functional Testing - CAD	$344,173
Upon Completion of Task 32: System Readiness Review	$344,173
Upon Completion of Task 33: Cutover to Production Use	$516,260
Upon Completion of Task 35: I/CAD System 30 Calendar Day Reliability Period	$344,173
Total	**$3,441,731**

EXHIBIT "E"
End User License Agreement

END-USER LICENSE AGREEMENT

IMPORTANT — READ CAREFULLY: This EULA is a legal agreement by and between User and Hexagon. All copies of Software are licensed to User by Hexagon pursuant to the terms of this EULA. Software is also subject to Use Terms. By installing, copying, downloading, accessing, or otherwise using Software, User agrees to be bound by the terms of this EULA, which shall govern User's use of the Software. Any software, including without limitation, any third party components and/or Updates, associated with a separate end-user license agreement are licensed to User under the terms of that license agreement. Use Terms applicable to an Update shall apply to the Update. All use of the Software is subject to applicable the agreement.

1.0 DEFINITIONS. Capitalized terms not otherwise defined herein shall have the meanings set forth in the Common Terms Glossary set forth at Exhibit E-1.

2.0 LICENSE GRANT. Provided User is not in breach of any term or condition of this EULA, Hexagon hereby grants User a limited, non-exclusive license up to the quantity of Software licenses purchased by User to: (i) install and use the Software in object code form only; (ii) use, read, and modify Documentation prepared by Hexagon and delivered to User pursuant to the Order Documents; and/or (iii) view and/or use Hexagon audio-visual training materials provided to User pursuant to the Order Documents; provided all of the foregoing shall be strictly for User's internal use and strictly in accordance with this EULA and the applicable Order Documents. The license is non-transferable, except as specifically set forth in this EULA. User assumes full responsibility for the selection of the Software to achieve User's intended results, and for the installation, use, and results obtained from the Software.

3.0 UPDATES. If the Software is an Update to a previous version of the Software, User must possess a valid license to such previous version to use the Update. Neither the Software nor any previous version may be used by or transferred to a third party. All Updates are provided to User on a license exchange basis and are subject to all of the terms and conditions of a mutually agreed upon EULA. By using an Update, User (i) agrees to voluntarily terminate User's right to use any previous version of the Software, except to the extent that the previous version is required to transition to the Update; and (ii) acknowledges and agrees that any obligation that Hexagon may have to support the previous version(s) of the Software will end upon availability of the Update. If an Update is provided, User will take prompt action to install such Update as directed by Hexagon. If Updates are not implemented by the City, it acknowledges it may not receive the full benefit of newer versions of software, including bug fixes and inclusion of updated compatibility with third party platform software. For Third Party Software, please read carefully the applicable Third Party Terms regarding concurrent use of an Update and the prior version of Software during transition to the Update as the Third Party Terms may differ from terms applicable to Hexagon Software Products.

4.0 RIGHTS AND LIMITATIONS

4.1 **The Following are Permitted for User's License:**

User may make one copy of Software media in machine readable or printed form and solely for backup purposes. Hexagon retains ownership of all User created copies. User may not transfer the rights to a backup copy unless User transfers all rights in the Software and license as provided for in Section 4.2.1 below. Any other copying of the Software, any use

of copies exceeding the number of copies User has been authorized to use and has paid for, and any distribution of the Software not expressly permitted by this EULA, is a violation of this EULA and of federal and/or applicable governing law.

4.2 **The Following are Prohibited for User's License:**

4.2.1 Subject to applicable law and any specific contractual provisions to the contrary, User shall not sell, rent, license, lease, lend or otherwise transfer the Software, or any copy, modification, or merged portion thereof without Hexagon's express written consent for such transfer, which consent may not be unreasonably withheld. Any such unauthorized transfer will result in automatic and immediate termination of the license.

4.2.2 The Software is licensed as a single product. User shall not, and User shall not authorize anyone else to: (i) decompile, disassemble, or otherwise reverse engineer the Software; (ii) work around any technical limitations in the Software; (iii) publish the Software for others to copy or use; (iv) use, copy, modify, distribute, disclose, license or transfer the Software, or any copy, modification, or merged portion, in whole or in part, except as expressly provided for in this EULA; (v) re-use the component parts of the Software with a different software product from the one User is licensed to use or on different computers; (vi) circumvent any license mechanism or in the Software or the licensing policy; (vii) publish to a third party any results of benchmark tests run on the Software; (viii) use or view the Software for any purposes competitive with those of Hexagon; (ix) use the Software except as expressly set forth in this EULA; and (x) unless otherwise specifically permitted in writing by Hexagon, use the Software outside the country in which it is licensed.

4.3 **Fault Tolerance**

The Software is not one hundred percent (100%) fault tolerant. Unless the Software's Documentation expressly provides the contrary, the Software is not designed or intended for use in any situation where failure or fault of any kind of the Software could lead to death or serious bodily injury of any person, or to severe physical, property or environmental damage ("High-Risk Use"); and, User is not licensed to use the Software in, or in conjunction with, any High-Risk Use. High-Risk Use is STRICTLY PROHIBITED. High Risk Use includes, for example, the following: operation of aircraft or other modes of human mass transportation, nuclear or chemical facilities, and Class III medical devices. User hereby agrees not to use the Software in, or in connection with, any High-Risk Use. High Risk Use shall not mean use of the Software for purposes for which it is regularly marketed and sold (e.g., CAD use for a 911 center, mobile computers integrated with a CAD solution, public safety and utility dispatch software may be used to dispatch police, fire, emergency medical services, and emergency utility services).

4.4 Licensing Mechanism Disclaimer.

Without waiver of any of its rights herein, Hexagon may at its sole discretion provide User who is operating public safety Software a licensing mechanism to allow such Software to be available for use even when User has accessed all of its purchased licenses. Regardless of whether it receives the licensing mechanism, User acknowledges it is permitted to use the Software only up to the number of licenses it has purchased. Any usage of Software beyond the amount purchased by User will be subject to the payment of additional fees by User to Hexagon at then current prices for the Software in like manner as provided in Section 7.2 below (Audit).

5.0 USER OBLIGATIONS

5.1 The Software may require User's System to comply with specific minimum software, hardware, and/or Internet connection requirements.

5.2 User is responsible, and bears the sole risk, for backing up all systems, software, applications, and data, as well as properly using the Software.

5.3 At all times, User must keep, reproduce and include all copyright, patent, trademark and attribution notices on any copy, modification or portion of the Software, including, without limitation, when installed, used, checked out, checked in, and/or merged into another program.

5.4 User shall comply with the Use Terms, including (i) limitations that apply to specific types of licenses, and (ii) applicable Third Party Terms identified therein.

6.0 TERM.

6.1 For a Perpetual License, this EULA is effective until terminated (i) by User, by returning to Hexagon the original Software or by permanently destroying the Software, together with all copies, modifications and merged portions in any form; (ii) by Hexagon, upon User's breach of any of the terms hereof or User's failure to pay the appropriate license fee(s); or (iii) upon User's installation of an Update that is accompanied by a new license agreement covering the Software Update; . User agrees upon the termination of this EULA to cease using and to permanently destroy the Software (and any copies, modifications, and merged portions of the Software in any form, and all of the component parts of the Software), and to certify such destruction in writing to Hexagon.

7.0 AUDIT.

7.1 Hexagon shall have the right to:

7.1.1 Audit User's use of the Software and User's compliance with the provisions of this EULA during User's normal Business Hours. Hexagon will provide User with thirty (30) days prior written notice of an audit under this Section. Hexagon's right to conduct this type audit shall be limited to twice per calendar year. Prior to the start of an audit, Hexagon's personnel will sign a reasonable non-disclosure agreement provided by User.. Hexagon shall not be provided with or request access to event data, including personally identifiable information; however, User names will be available to Hexagon if needed.

7.1.2 Obtain certain documentation from User, as follows. If the Software includes logging mechanisms intended to track usage volume or quantity, User shall transmit log files associated therewith to Hexagon upon Hexagon's demand and in accordance with Hexagon's reasonable transmission instructions. Hexagon will not demand the transmission of usage tracking log files more frequently than four (4) times in any calendar year.

7.2 In the event the results of the audit in Section 7.1.1 or the documentation provided by User in Section 7.1.2 indicate User has used unlicensed Software or quantities thereof, User agrees to promptly pay Hexagon: (i) the current list price for each unlicensed Software used by User; (ii) interest of five percent (5%) per year or the highest rate allowed by applicable law for each month, commencing with the initial month of unlicensed usage of the Software; and (iii) the costs for the audit in Section 7.1.1.

8.0 INTELLECTUAL PROPERTY.

8.1 **Ownership.**

8.1.1 **Software.** ALL SOFTWARE AND OTHER INTELLECTUAL PROPERTY ARE PROPRIETARY PRODUCTS OF HEXAGON AND ADDITIONAL THIRD

PARTIES AND ARE PROTECTED BY COPYRIGHT LAWS AND INTERNATIONAL TREATIES. TITLE TO SOFTWARE AND ALL COPIES, MODIFICATIONS AND MERGED PORTIONS OF SOFTWARE SHALL AT ALL TIMES REMAIN WITH HEXAGON AND SUCH THIRD PARTIES. Software is licensed pursuant to this EULA, not sold. Hexagon and additional third parties retain all right, title and interest in and to all Software, including, but not limited to, all IPR in and to each Software. All rights not expressly granted to User by this EULA or other applicable Third Party Terms are reserved by Hexagon and such third parties. No source code is deliverable hereunder unless otherwise agreed to in writing by Hexagon.

8.1.2 **Intellectual Property.** User acknowledges and agrees that Hexagon and third-party manufacturers, as applicable, own all rights in and to Hexagon's and the applicable third-party manufacturers' trade names, and no right or license is granted to User pursuant to this EULA to use such trade names.

8.1.3 **Third Party Software.** Third party components may be associated with the operation of the Software, or they may be delivered separately on the Software's media, but not otherwise associated with the operation of the Software. To comply with this EULA, User must also comply with applicable Third Party Terms associated with the operation of the Software identified by Hexagon in notices thereof.

8.2 **Intellectual Property Infringement.**

8.2.1 **Remedy by Hexagon.** In the event the Software, in Hexagon's sole opinion, is likely to or does become the subject of a claim of infringement of any duly issued U.S. Intellectual Property, Hexagon may, at its sole option and expense, (i) procure for User the right to continue using the Software; (ii) modify the Software to make it non-infringing, but functionally the same; (iii) replace the Software with Software which is non-infringing, but functionally the same; or, (iv) provide a prorated refund to User of the actual amount User paid Hexagon for the Software.

8.2.2 **Indemnification by User.** In the event any proceeding (suit, claim, or action) is based (in whole or in part) on modifications, enhancements or additions made by User or any person or entity acting on User's behalf, or User's use of the Software in combination with other products not furnished by Hexagon, then subject to applicable law, User agrees to hold harmless and defend, at User's sole cost and expense, all of Hexagon's right, title and interest in and to the Software, as well as Hexagon's goodwill and reputation, both in good faith and at a standard as if the claim is made against User. User shall reimburse Hexagon any defense expenses inclusive of reasonable attorneys' fees expended by Hexagon in defense of said claim, and pay any judgment rendered against Hexagon. User shall make such defense by counsel of User's choosing, and Hexagon shall reasonably cooperate with said counsel at User's sole cost and expense. User shall have sole control of said defense, but User shall allow Hexagon to reasonably participate in its own defense and User shall reasonably cooperate with Hexagon with respect to the settlement of any claim. Notwithstanding the foregoing, Hexagon may at any time decide to take over any defense of Hexagon at Hexagon's cost and expense, and User shall render full cooperation and assistance to transfer such defense to Hexagon and with respect to such defense.

9.0 LIMITED WARRANTIES.

9.1 See Exhibit A (SOW).

9.2 Hexagon warrants that it has the right to grant User this license.

9.3 Warranty Disclaimer. EXCEPT AS SPECIFICALLY SET FORTH IN THIS EULA, TO THE MAXIMUM EXTENT PERMITTED BY APPLICABLE LAW, HEXAGON AND ITS SUPPLIERS DISCLAIM ALL WARRANTIES, EITHER EXPRESS OR IMPLIED, RELATING TO THE SOFTWARE, INCLUDING, BUT NOT LIMITED TO, IMPLIED WARRANTIES OF MERCHANTABILITY, DURABILITY, FITNESS FOR A PARTICULAR PURPOSE, HIGH RISK USE, AND NON-INFRINGEMENT. ALL WARRANTIES PROVIDED PURSUANT TO THIS EULA ARE VOID IF FAILURE OF A WARRANTED ITEM RESULTS DIRECTLY OR INDIRECTLY FROM AN UNAUTHORIZED USE OR MISUSE OF A WARRANTED ITEM, INCLUDING, WITHOUT LIMITATION, USE OF A WARRANTED ITEM UNDER ABNORMAL OPERATING CONDITIONS OR UNAUTHORIZED MODIFICATION OR REPAIR OF A WARRANTED ITEM OR FAILURE TO ROUTINELY MAINTAIN A WARRANTED ITEM. HEXAGON DOES NOT WARRANT THAT ANY SOFTWARE WILL MEET USER'S REQUIREMENTS, AND UNDER NO CIRCUMSTANCES DOES HEXAGON WARRANT THAT ANY SOFTWARE WILL OPERATE UNINTERRUPTED OR ERROR FREE. THE SOFTWARE IS PROVIDED "AS IS" AND USER BEARS THE SOLE RISK OF USING THE SOFTWARE. IF ANY PART OF THIS DISCLAIMER OF EXPRESS OR IMPLIED WARRANTIES IS RULED INVALID, THEN HEXAGON DISCLAIMS EXPRESS OR IMPLIED WARRANTIES TO THE MAXIMUM EXTENT ALLOWED BY APPLICABLE LAW. IF A GREATER WARRANTY OR LIABILITY IS MANDATED PURSUANT TO THE LAW HELD APPLICABLE TO THIS AGREEMENT, THEN HEXAGON WARRANTS THE SOFTWARE AND PROVIDES LIABILITY TO THE MINIMUM EXTENT REQUIRED BY SAID LAW.

9.4 In the event the Software does not substantially comply with the limited warranties set forth in this EULA, Hexagon's entire liability and User's exclusive remedy shall be, in Hexagon's sole and absolute discretion, either (i) the modification, repair or replacement of the Software; or (ii) termination of this EULA and a prorated refund to User of the actual amount User paid Hexagon for the Software for the period of time that the Software did not substantially conform to the limited warranties set forth in this EULA. All replacements and/or Updates made during the original warranty period will be warranted only for the remainder of the original warranty period. So long as Hexagon performs any one of the remedies set forth above, this limited remedy shall not be deemed to have failed of its essential purpose.

9.5 Hexagon is acting on behalf of its suppliers for the sole purpose of disclaiming, excluding and/or limiting obligations, warranties and liability as provided in this EULA, but in no other respects and for no other purpose.

10.0 EXPORT RESTRICTIONS. The Software, including any technical data related to the Software, is subject to the export control laws and regulations of the United States, Diversion contrary to United States law is prohibited. This Software, including any technical data related to this Software and any derivatives of this Software, shall not be exported or re-exported, directly or indirectly (including via remote access), under the following circumstances:

10.1 To Cuba, Iran, North Korea, Syria, any area of Ukraine identified by the United States, European Union, or other applicable governments as subject to restriction. or any national of these countries or territories;

10.2 To any person or entity listed on any United States government denial list, including, but not limited to, the United States Department of Commerce Denied Persons, Entities, and Unverified Lists, the United States Department of Treasury Specially Designated Nationals List, and the United States Department of State Debarred List (https://www.trade.gov/consolidated-screening-list);

10.3 To any entity if User knows, or has reason to know, the end use is related to the design, development, production, or use of missiles, chemical, biological, or nuclear weapons, or other unsafeguarded or sensitive nuclear uses; and/or

10.4 To any entity if User knows, or has reason to know, that an illegal reshipment will take place.

User agrees to comply with all applicable export control laws and regulations.

User shall not request information or documentation where the purpose of such request is to support, give effect to or comply with a boycott of any country that is not sanctioned by the United States, including but not limited to the Arab League boycott of Israel.

If the Software User received is identified on the media as being ITAR-controlled, the Software has been determined to be a defense article subject to the U.S. International Traffic in Arms Regulations (ITAR). Export of this Software from the United States must be covered by a license issued by the Directorate of Defense Trade Controls (DDTC) of the U.S. Department of State or by an ITAR license exemption. The Software may not be resold, diverted, or transferred to any country or any end user, or used in any country or by any end user other than as authorized by the existing license or ITAR exemption. Subject to the terms of this EULA, such Software may be used in other countries or by other end users if prior written approval of DDTC is obtained.

If User is located outside the United States, User is responsible for complying with any local laws in User's jurisdiction which might impact User's right to import, export, or use the Software, and User represents that User has complied with any and all regulations and/or registration procedures required by applicable law related to the use and importation of the Software.

11.0 HEXAGON CONFIDENTIAL INFORMATION. User understands that Hexagon possesses information and data, tangible or intangible, including, without limitation, Hexagon IP, that was developed, created, and/or discovered by Hexagon, and/or which has become known to or has been conveyed to Hexagon, which has commercial value in Hexagon's day-to-day business and is not generally known in the industry or to competitors of Hexagon, regardless of whether such information and data is marked as proprietary or confidential ("Hexagon Confidential Information"). Hexagon considers such Hexagon Confidential Information to be proprietary and confidential. Except to the extent required by law, including, but not limited to, the California Public Records Act (Gov. Code, §§ 7920.000 et seq.), User agrees to treat and maintain as proprietary and confidential Hexagon Confidential Information and any information or data provided by Hexagon, in whatever form, as User would treat User's own proprietary and confidential information and data, but in any event, no less than with reasonable care, and to comply with all license requirements, copyright, patent, trademark, and trade secret laws as they may pertain to any Hexagon Confidential Information or other information or data provided by Hexagon.

12.0 GENERAL.

12.1 **Entire Agreement**. User acknowledges that User has read this EULA, understands it, and agrees to be bound by its terms and conditions. User further agrees that this EULA, together with Order Documents, is the complete and exclusive statement of the agreement between User and Hexagon relating to the subject matter of this EULA and that this EULA supersedes any proposal or prior agreement, oral or written, and any other communications between User and Hexagon relating to the subject matter of this EULA. This EULA may be amended only by a written instrument signed by both User and Hexagon; *provided however*, certain Hexagon Software and Updates may be subject to additional or different terms and conditions, as applicable, contained in a separate EULA that is delivered with the applicable Software or Update. Any reproduction of this EULA

made by reliable means (for example, printed, photocopy, or facsimile) will be deemed an original. Notwithstanding the foregoing, the User and Hexagon agree and understand that the EULA is subordinate to the Professional Services Agreement between the User and Hexagon. In the event of any conflict between the terms of the Professional Services Agreement and the EULA, the terms of the Professional Services Agreement shall control.

12.2 **Severability**. Whenever possible, each provision of this EULA shall be interpreted in such a manner as to be effective and valid under applicable law. However, if any provision of this EULA shall be prohibited by or invalid under applicable law, such provision shall be ineffective only to the extent of such prohibition or invalidity without invalidating the remainder of such provision or the remaining provisions of this EULA.

12.3 **Headings**. Numbered topical headings, articles, paragraphs, subparagraphs, or titles in this EULA are inserted for the convenience of organization and reference and are not intended to affect the interpretation or construction of the terms thereof.

12.4 **No Waiver**. The waiver by Hexagon of any of its rights or remedies in enforcing any action or breach under the EULA in a particular instance shall not be considered as a waiver of the same or different rights, remedies, or actions for breach in subsequent instances.

12.5 **Notices**. All notices given between User and Hexagon shall be in writing and shall be considered properly sent by postage prepaid United States Mail or overnight carrier to the User and/or Hexagon representative, as applicable, or such substitutes to receive such notices as may hereafter be disclosed by proper notification. User's address for notices shall be that last notified to Hexagon pursuant to this paragraph, or in the absence of such notice, the last known address in Hexagon's records. Hexagon's address for notices is Hexagon Safety, Infrastructure & Government, 305 Intergraph Way, Madison, Alabama 35758, Attn: Legal Department, 256-730-2333.

12.6 **Assignment**. Neither party shall have the right to assign any of its rights nor delegate any of its obligations under this EULA without the prior written consent of the other party.Any attempt by User to sublicense, assign. or transfer the license or the Software, except as expressly provided in this EULA, is void and immediately terminates the license.

12.7 **Other Hexagon Software Products**. If User has or uses other Hexagon software products and/or software products provided by other divisions or Affiliates of Hexagon, please read this EULA and all other terms and conditions carefully as there may be differences in the terms and conditions.

12.8 **Limited Relationship**. The relationship between User and Hexagon is that of independent contractors, and neither User nor User's agents shall have any authority to bind Hexagon.

12.9 **Governing Law; Venue and Jurisdiction**. This EULA shall for all purposes be construed and enforced under and in accordance with the Laws of the State of California and shall have been deemed to have been accepted in San Bernardino County, California, United States. User and Hexagon agree that any legal action or proceeding arising, directly or indirectly, out of or relating to this EULA shall be instituted in the state or federal courts located in San Bernardino County, California. User and Hexagon agree to submit to the jurisdiction of and agree that venue is proper in these courts for any such legal action or proceedings. This EULA shall not be governed by the conflict of law rules of any jurisdiction or the United Nations Convention on Contracts for the International Sale of Goods, the application of which is expressly excluded.

12.10 **Reserved.**

12.11 **Injunctive Relief; Cumulative Remedies**. User acknowledges and agrees that a breach of this EULA by User could cause irreparable harm to Hexagon for which monetary damages may be difficult to ascertain or may be an inadequate remedy. User agrees that Hexagon will have the right, in addition to its other rights and remedies, to seek and obtain

injunctive relief for any breach of this EULA by User, and User expressly waives any objection that Hexagon has or may have an adequate remedy at law with respect to any such breach. The rights and remedies set forth in this EULA are cumulative and concurrent and may be pursued separately, successively, or together.

12.12 **Governing Language**. The controlling language of this EULA is English. If User received a translation of this EULA into another language, it has been provided for User's convenience only. Most foreign language translations predate recent modifications to the official English language version. Be sure to refer to the official version.

Les parties en présence confirment leur volonté que cette convention de même que tous les documents y compris tout avis qui s'y rattachent, soient redigés en langue anglaise (Translation: "The parties confirm that this agreement and all related documentation is and will be in the English language.")

12.13 **Survival**. The provisions of this EULA which require or contemplate performance after the expiration or termination of this EULA shall be enforceable notwithstanding said expiration or termination.

12.14 **Use Outside the United States**. If User is located outside the United States, then the provisions of this section shall also apply: User is responsible for complying with any local laws in User's jurisdiction which might impact User's right to import, export and/or use the Software, and User represents that User has complied with any and all regulations and/or registration procedures required by applicable law to make this EULA fully enforceable.

SIG062023

EXHIBIT E-1

COMMON TERMS GLOSSARY

"Acceptable Use Policy (AUP)" means the Acceptable Use Policy identified as such within Exhibit D (Cloud Program Conditions).
"Activity" or **"Activities"** means a single work activity/event or collection of work activities/events by a Party or by both Parties under a specified Task.
"Affiliate" means, for business entities, the parent business entity of a Party and any business entities in which a Party or its parent company directly or indirectly hold a controlling ownership interest. "Affiliates" means, for government entities which are Customers, an entity which has entered into an intergovernmental agreement with Customer which: (i) relates to or addresses the subject matter of the Primary Contracting Document; and (ii) was disclosed to, and acknowledged by, Hexagon (A) prior to the Effective Date for any existing intergovernmental agreements, and (B) prior to any renewal date of such Primary Contracting Document for any intergovernmental agreements entered into after the Effective Date. "Control" for the purposes of this definition means that Customer owns in excess of fifty percent (50%) of the ownership interest of the Affiliate or owns a majority of the voting shares of the Affiliate. For purposes of Section 9 in the General Terms and Conditions, an Affiliate is not a third party.
"Authorized Cloud User" means an individual user authorized by the Customer to use an entire Cloud Program on behalf of the Customer and for whom an account is set up by which the Authorized Cloud User can utilize Cloud Services Support and log Cloud Service Requests and Product Change Requests.
"Auxiliary System License" means the license(s) of Software Product made available by Hexagon for select Software Products to augment Production System Licenses. Each Auxiliary System License requires a corresponding Production System License and the term of the Auxiliary System License shall not exceed the term of the applicable Production System License.
"Beta Software" means any version of Software Product prior to a generally available commercial release of such Software Product.
"Business Day" means any day other than a weekend or public holiday in the country listed on the Quote.
"Business Hour" means an hour occurring during a Business Day and during the generally recognized eight (8) working hours comprising the Business Day at the Customer's location.
"Catastrophic Event" means a rare circumstance in which mass casualties and/or significant property damage has occurred or is imminent (e.g., September 11th, hurricanes greater than Category 2 on the Saffir-Simpson scale, earthquakes greater than 6.1 on the Richter scale).
"Change Order" means a document executed or accepted in writing by both Parties that modifies the scope, price, milestones, and/or project schedule of an Order.
"Client" means a computing device connected to a Server.
"Cloud Anniversary" means the anniversary of the date on which Hexagon provided the License Key(s) to Customer.
"Cloud Application(s)" means the Hexagon software applications, including without limitation application programming interfaces made available by Hexagon through the Cloud Portal as part of the Cloud Program. Cloud Application(s) are subject to Cloud Services Schedules.
"Cloud Consulting Services" means Services that relate to the Cloud Program including, but not limited to, implementation, configuration, customization, data conversion, Onboarding, design, training, and or enhancement of the Cloud Program.
"Cloud Cutover" means the point in time when Customer first uses the Cloud Program for its generally marketed purpose.
"Cloud Development Environment" means a logical group of virtual or physical computers comprised within the Cloud Environment to which the Customer will be provided with access and use for the limited purpose of making modifications, as specifically permitted herein, to the Cloud Application. For purposes of clarity, the Cloud Development Environment cannot be used in Production or for training purposes.
"Cloud Environment" means the collection of remote environments provided to Customer on which the

Cloud Application(s) operates and that is supported by Hexagon.

"Cloud Optional Services" means those certain Hexagon Software Products that provide ancillary functionality or capability to the Cloud Applications, including, but not limited to, interfaces and custom forms and functionality. Unless specific Cloud Optional Services are identified in the Quote with a corresponding purchase commitment from Customer, Cloud Program does not include Cloud Optional Services.

"Cloud Portal" means the website through which Customer accesses and uses the Cloud Program. The Cloud Portal provides access to the Cloud Program according to Customer's rights, and further provides access to additional Cloud Services, as made available by Hexagon.

"Cloud Program" means the combination of Cloud Services, Cloud Application(s), Local Software, Third Party Software , and Cloud Optional Services provided pursuant to the Order Documents. The components of the Cloud Program are specifically identified in the Quote and for purposes of this definition shall mean only those components and not any other components not specifically listed in the Quote.

"Cloud Program Fees" means, collectively, any of the fees payable by Customer to Hexagon for the Cloud Program (or any part thereof). Cloud Program Fees shall be in the amount described in the Quote and/or Cloud Services Schedule, and shall be invoiced on an annual basis, except to the extent otherwise expressly provided in the Primary Contracting Document or the Cloud Services Schedule.

"Cloud Program Start Date" means the date on which the first License Key(s) are provided to the Customer. For Cloud Program Fees purposes, Cloud Program use by Customer will be assumed to be for the entire Month in which the Cloud Program Start Date falls regardless of the actual date in such Month that access to the applicable Cloud Application began.

"Cloud Service Request" means a request made to the first level support service to diagnose and address an Error in a Cloud Application or to report the purchased Cloud Application(s) is not Available.

"Cloud Services" means the services, service levels, Cloud Services Support, Customer Cloud Environment, and Third Party Service Provider's hosting services (which are more particularly described in the Cloud Services Schedule(s)), for Cloud Application(s), Cloud Optional Services, and Third Party Software and ordered by the Customer.

"Cloud Services Schedule" means a document(s) titled "Cloud Services Schedule related to one or more Cloud Application(s) that contains additional details regarding the Cloud Services being provided to Customer with respect to the applicable Cloud Program components purchased by Customer.

"Cloud Services Support" means the service specified as such in the Cloud Conditions through which Customer can report Cloud Service Requests and Product Change Requests.

"Cloud Staging Environment" or **"Cloud Testing Environment"** means a logical group of virtual or physical computers comprised within the Cloud Environment to which the Customer will be provided with access and use for the limited purposes of testing modifications and training, as specifically permitted herein, to the purchased Cloud Application(s). For purposes of clarity, the Cloud Staging Environment cannot be used in Production.

"Cloud Term" means the duration of a Cloud Program Order.

"Confidential Information" means any data or information, tangible or intangible, disclosed or made available by either Party (the "Disclosing Party") to the other Party (the "Receiving Party") that the Disclosing Party considers confidential or proprietary and is not generally known in the industry or to competitors of the Disclosing Party and which shall include: (i) tangible information marked by the Disclosing Party with the word "Confidential" or otherwise identified by an appropriate stamp or legend indicating its confidential nature; (ii) information disclosed orally or visually and identified by the Disclosing Party as confidential when disclosed, and confirmed by the Disclosing Party in a written notice within thirty (30) days following disclosure, which notice shall include markings similar to those outlined above; and (iii) all other information that, notwithstanding the absence of markings or designations, would be understood by the Parties, exercising reasonable business judgment, to be confidential. The term Confidential Information does not include information that: (i) is or becomes available in the public domain through no act of the Receiving Party; (ii) has been received on a non-confidential basis from a third party without breach of the Primary Contracting Document, where the Receiving Party has no reason to believe that such third party is bound by any confidentiality obligation to the Disclosing Party; (iii) was developed independently by the Receiving Party without reliance on the disclosed Confidential Information, provided that such independent

development can be substantiated; (iv) was within the Receiving Party's possession prior to its being furnished by the Disclosing Party, where the Receiving Party has no reason to believe that such third party was bound by any confidentiality obligation to the Disclosing Party, or (v) is confirmed in writing by the Disclosing Party as not being confidential.

"Core" means a physical processor on a computer Server that can respond to and execute the basic instructions that drive the computer. A Central Processing Unit ("CPU") may have one or more Cores, and a given Server may have multiple CPU sockets that may each contain multiple Cores.

"COTS" means commercial off the shelf Intellectual Property in the form generally released and distributed to Hexagon's customers and not including any functionality or features requiring source code changes.

"COTS Documentation" means commercial off the shelf Documentation in the form generally released and distributed to Hexagon's customers and not including or requiring changes thereto.

"Coverage Period" means the period of performance of Maintenance Services with respect to a Covered Product, as stated in the Order Documents. Coverage Periods may differ for discrete Covered Products.

"Coverage Period Anniversary" means the anniversary of the date on which the Coverage Period commenced.

"Covered Products" means collectively, Covered Software Product(s) and Covered Third Party Products.

"Covered Software Product(s)" means Software Product(s) and Developer Tools identified in the Order Documents as software for which Maintenance Services are to be provided by Hexagon. Covered Software Products shall not include Third Party Software or any Cloud Program.

"Covered Third Party Products" means Software Product(s) identified in the Order Documents as Third Party Software for which Maintenance Services are to be provided by Hexagon. Covered Third Party Products shall not include Software Products or any Cloud Program.

"Credentials" means the unique log-in identifier by which a person could access a service or benefit, such as, without limitation, a Cloud Program or Training Curricula.

"Customer" means the non-Hexagon party to the Primary Contracting Document.

"Customer Cloud Administration" means providing User's access to the Cloud Application(s) purchased by Customer, managing User accounts, providing Credentials to Users, and any system administration beyond User interface.

"Customer Cloud Environment" means a logical group of virtual or physical computers comprised within the Cloud Environment and Local Environment to which the Customer will be provided with access and use of as part of the Cloud Program. A Customer Cloud Environment consists of a Cloud Development Environment and Production Environment.

"Customer Data" means all electronic data or information: (i) provided by Customer to Hexagon in connection with the Deliverables provided pursuant to an Order; and/or (ii) created by Customer and/or submitted to the Cloud Environment by Customers, Users, and/or Authorized Cloud Users. "Customer Data" shall not mean data which (i) is not particular to Customer, and/or (ii) is of value to the general implementation, development, operation, or use of Hexagon products or services for the benefit of other customers. For the avoidance of doubt, Customer Data shall not include the Cloud Application(s), Software Products, Cloud Optional Services, Documentation written by Hexagon, DevTools, Content, Equipment and Software intentionally designed and embedded with Equipment or Special Purpose Items, and any other data and information provided as part of the Cloud Program or constituting a Hexagon Deliverable.

"Customer Data Rights" means: (i) the right to use Customer Data that contains Customer's Confidential Information to perform Hexagon's obligations within the Order; (ii) the right to use, alter, modify, and disclose Customer Data that does not include Customer's Confidential Information to perform Hexagon's obligations and other business purposes for which the information may be disclosed to third parties; and (iii) except as otherwise provided in the EULA or Developer Tools Schedule, a worldwide, royalty-free, irrevocable license to use, replicate, sell, modify, enhance, and distribute any works created by the Customer through its use of Developer Tools.

"Customer Specified Data Center" means a data center used in the provision of a Cloud Environment, whose location has been specified by the Customer and agreed to by Hexagon and identified in the Quote. Additional Cloud Program Fees may be payable for a Customer Specified Data Center.

"Customized Software" means those Services Deliverables that are software or computer code, whether

in source code or object code.
"Cutover" means the point in time in which a Software Product(s) is first used by User for its generally marketed purpose.
"Data Center(s)" means the data center(s) from which the Cloud Program (or part thereof) will be stored as determined by Hexagon or its Third Party Service Provider.
"Defect" means a reproducible instance of an adverse and incorrect functioning of a Software Product or Cloud Application that impacts the ability to use functionality intentionally integrated in the design of the Software Product or Cloud Application, assuming proper usage of the Software Product or Cloud Application in its required operating environment. Defects are further classified into four levels as follows:

Level	Impact of Defect
▸ Level One	*No workaround available and either:* ▸ *Productive use prohibited, or* ▸ *Aborts.*
▸ Level Two	*No workaround available and either:* ▸ Primary purpose compromised, or ▸ Productive use significantly impacted
▸ Level Three	▸ Productive, but incomplete operation Level Three Defects generally have a workaround or do not otherwise substantially impair productive use.
▸ Level Four	▸ Defects not qualifying as Level One, Two, or Three, including defects of a cosmetic nature and defects not materially limiting complete productive use

Customer shall classify a Defect in accordance with the foregoing; provided that, Hexagon shall reclassify the Defect as appropriate following its review thereof.
"Deliverable(s)" means all Services Deliverables, software, hardware, Cloud Programs, and other items delivered or to be delivered by Hexagon to Customer and identified in the Order.
"Developer Tools" or "DevTools" means any software intended for use by developers to create (i) software for (a) redistribution, or (b) interfacing two or more of the following: Software, Cloud Applications, E/C; or (ii) specific customizations for which the Developer Tool is intended and designed. Developer Tools are subject to Developer Tools Schedules.
"Developer Tools Schedule" or "DevTools Schedule" means a document relating to certain DevTools provided by Hexagon listed in the Order Documents that identifies particular details, limitations, licensing, and other parameters relating to the DevTools.
"Documentation" means, whether in electronic or printed form, any user's guides, reference guides, administrator's guides, configuration guides, release guides, installation guides, and help guides made available at the support website for Software Products or Cloud Applications provided by Hexagon to the Customer. Not all of the types of Software Products or Cloud Applications are provided with Documentation or with similar Documentation.
"Effective Date" means the date and time the last Party is on notice that all Parties have accepted the Primary Contracting Document.
"Emergency Maintenance" means all maintenance performed when a Cloud Service Request demands immediate, unplanned attention, as reasonably determined by Hexagon.
"Equipment" means tangible, personal property to be provided by Hexagon identified in Order Documents, including, but not limited to computing hardware, computer-related equipment, computer devices, furniture, sensors, equipment, unmanned aerial vehicles, and instruments.
"**E/C" or "Equipment/Content"** means digital content identified in an E/C Schedule and/or any Equipment

supplied by or through Hexagon. For purposes of clarity, the term "E/C" excludes Maintenance Services, Cloud Program, Software (except Software intentionally designed and embedded with Equipment), and Services. E/C is subject to E/C Schedules.
"E/C Schedule" means a document relating to certain E/C provided by Hexagon listed in the Order Documents that address some or all of the following depending upon the offering being addressed: licensing requirements for any embedded Software, maintenance parameters and limitations, warranty, and support provisions.
"Error" means a Defect with a purchased Cloud Application, Cloud Optional Service, or Third Party Software causing a purchased Cloud Application to fail to materially conform to its designed functionality or Documentation. Errors are further classified into the same four levels as corresponding to the definition for "Defect."
"EULA" means the certain Hexagon End-User License Agreement set forth in these Master Terms as Exhibit A and/or that is delivered with Software and which must be accepted prior to Software installation.

"Exchanged Product" means a later released Software Product which the Customer will receive pursuant to its Maintenance Contract and supplants the Replaced Product.

"Fixed Price Project Assignment" means a type of Order where Hexagon will provide Services with or without accompanying Product(s) for a fixed price.
"Hexagon" means the entity that is a member of the Hexagon Group of companies that is identified in the Order Documents; provided however, as used in the EULA, "Hexagon" means Intergraph Corporation.
"Hexagon IP" means Hexagon or Hexagon Affiliate developed, created, or prepared Intellectual Property. Additional information regarding Hexagon patents, including a list of registered patents associated with the Software Products, is available at www.intergraph.com/patents and/or www.uspto.gov.
"Intellectual Property" or **"IPR"** means all forms of intellectual property including, but not limited to, patents, trademarks, copyrights, trade secrets, methodologies, logos, techniques, processes, know-how, formulae, algorithms, logic designs, screen displays, schematics, source and object code computer programs or software, declaring code, implementing code, Documentation, mask work rights, digital data content, design, ideas, product information, inventions and improvements thereto, and all works of authorship fixed in any medium of expression (including any form of online, digital, or electronic medium), whether or not copyrightable and whether registered or not.
"Lapse" means an occurrence of any period of time, regardless of duration, during which (i) a Covered Product is not the subject of an active Order for Maintenance Services or other Maintenance Contract and an active Coverage Period, and/or (ii) payment is past due to Hexagon under a Maintenance Contract. Extension of a Coverage Period and/or payment to Hexagon after the occurrence of a Lapse shall not negate a Lapse, absent Hexagon's express written waiver.
"License Key(s)" means certain unique data string(s) verifying authorized access to the Cloud Application(s), which are purchased by the Customer and provided by Hexagon, as set forth on the Quote.
"Local Environment" means the collection of environments provided and supported by Customer (e.g. providing System Equipment, etc.) in which the Local Software operates.
"Local Software" means software applications incidental to the Cloud Program which are designed to operate natively on devices outside the Cloud Portal and in the Local Environment.
"Maintenance Contract" means a contract under which Hexagon provides Maintenance Services to Customer in relation to Covered Products and under which Customer is to compensate Hexagon therefor.
"Maintenance Services" means only those services described in the document titled "Maintenance Terms and Conditions for Software" provided by Hexagon with respect to Software and other Deliverables licensed to Customer and identified in the Order Documents as the subject of Maintenance Services.
"Material Adverse Effect" means a change that individually or collectively in aggregate with other changes has the impact of (i) negatively and materially reducing the Customer's and/or its Affiliates and/or its/their Authorized Cloud Users' or Users' access and/or usage rights in respect of the Cloud Program and which render the Cloud Program unusable for its primary intended purpose; or (ii) making the Cloud Program materially less secure which results in increased risk to Customer Data or to data belonging to other

Hexagon customers. For clarity, a Material Adverse Effect is a condition which would render the Cloud Program un-usable or materially less secure for intended users generally, and not merely as a result of individual characteristics associated with Customer or its specific implementation or operation.

"Metered License" means a specific type of Subscription License that allows the Customer to use the Subscription License up to the number of hours set forth in the Quote during the Subscription Term. For reference, a Subscription License that is a Metered License shall have the word "Metered" in the Software Product name and/or have the letters "MTR" at the end of the product number for the Software Product instead of the other identifiers corresponding to an unmetered Subscription License referenced in its definition.

"Minimal Operations Levels" means operation of a Software Product without a Level One Defect.

"Modern Release" means a version of a Software Product published by Hexagon no more than eighteen (18) months prior to Customer's first use thereof in Production.

"MONTH" means, unless otherwise stated in the applicable provision, a calendar month.

"Network Requirements" means (i) the minimum requirements, including but not limited to software and/or hardware, internet connection, latency or other requirements, which must be met by Customer in order to access the Cloud Portal and use the Cloud Program; and (ii) network recommendations to the Customer which describe general and specific recommendations for the network connection requirements of the Cloud Program in order to enable the Cloud Program to function as designed. The Network Requirements may be updated from time to time and Customer will be notified of such update via posting in the Cloud Portal or as otherwise determined by Hexagon.

"Offboarding" or **"Offboarded"** means the process for offboarding the Customer Data (or part thereof) from the Customer Cloud Environment and relocating or facilitating relocation of Customer Data to another Customer-designated location.

"Onboarding" or **"Onboarded"** means the process of loading Customer Data into the Customer Cloud Environment.

"Onsite Fee" means a fixed fee encompassing Hexagon's travel expenses for an individual trip (an individual trip means to travel from the Hexagon resource's primary duty station in furtherance with an Order and lasting no more than five (5) consecutive days).

"Order" means each individual purchase transaction in which the Parties engage, as evidenced by Order Documents.

"Order Documents" shall mean written documents, the terms of which include Hexagon's commitment to provide specific products, licenses, and/or services at a specified price, subject to the terms and conditions of the Primary Contracting Document. Order Documents may consist of a single document executed by the parties or a combination of documents that together form an Order. Any Schedule applicable to the Order is incorporated into the Order Documents as if fully set forth therein.

"Perpetual License" means a type of license for Software Product which allows the User to use the Software Product in perpetuity so long as the User does not otherwise violate the terms of the EULA. For reference, a Perpetual License on a Quote is denoted by its absence of either the terms "Subscription," "SaaS," or "Metered" and/or the absence of the letters "SU"," "UB," "CLD or "MTR" at the end of the Software Product number or the letters "HCL" at the beginning of the Software Product number.

"Personal Data" means data, including but not limited to criminal justice information, and other information which corresponds to a living individual person defined to be Personal Data under the applicable Personal Data protection laws of the Customer's jurisdiction.

"Planned Maintenance" means maintenance planned and communicated in advance by Hexagon to Customer for the maintenance of the Cloud Program.

"Primary Contracting Document" means the contract document accepted by the Parties which references and incorporates this Common Terms Glossary and/or references and incorporates a document to which this Common Terms Glossary is an exhibit or attachment.

"Product Change Request" means a request for additional functionality or modification to the purchased Cloud Application(s) or Covered Products.

"Product Order" means a type of an Order that involves only the sale of Products from Hexagon. A Product Order may include the sale of Maintenance Services or maintenance for Equipment so long as the subject of the services is also included in the Product Order. This type of Order does not include Services or Cloud Programs.
"Product(s)" means either or the combination of Software (including Subscription Licenses), E/C, or other goods, and excluding Services, Maintenance Services, or a Cloud Program.
"Production" means, as applicable, where a Subsystem or Cloud Program is used in production/operation with an aim to accomplish one or more of its ultimate intended purposes. Operation solely for testing or training is not Production.
"Production Environment" means a logical group of virtual or physical computers comprised within the Cloud Environment to which the Customer will be provided with access and use the purchased Cloud Application(s) in production and for its generally marketed purpose.
"Production System License" means the license(s) of Software Product provided to User for general production use.
"Product-Specific Terms" modify the EULA, and (ii) in the event of a conflict between the EULA and Product-Specific Terms, Product-Specific Terms shall govern for the applicable Software. In the event of a conflict of terms between the EULA, any prior Product-Specific Terms (including any product-specific terms delivered in the form of an addendum to the EULA), and later Product-Specific Terms, the later Product-Specific Terms shall take precedence over the EULA and any prior Product-Specific Terms regarding the subject Software.
"Purchase Order" or **"PO"** means a document issued by Customer to Hexagon to authorize the delivery of certain Product(s), Services, Deliverables, or Cloud Programs.
"Quote" means a document issued by Hexagon reflecting Product(s), Services, Maintenance Services, Deliverables, and/or Cloud Programs, which Hexagon offers to provide Customer, as well as the prices and fees therefor, the Customer's name and location, and any applicable Schedule(s). To the extent any document or information is identified in the Quote with the intention of it being incorporated into the Quote, it will form part of the Quote.
"Replaced Product" means an earlier Software Product which will be replaced pursuant to a Maintenance Contract for an Exchanged Product.

"**Schedule"** means one or more of: E/C Schedule(s), Cloud Services Schedule(s), DevTools Schedule(s), Training Program Statement(s), and/or Special Purpose Schedule(s).
"**Secure Access Tool**" is a tool designated by Hexagon for providing secure, auditable remote access to Customer utilized environments in order for Hexagon support personnel to effectively perform services.

"Security Incident" means an event or set of circumstances resulting in a compromise of the security, confidentiality, or integrity of Customer Data under Hexagon's control. Examples of Security Incidents include: (i) security breaches to Hexagon's network perimeter or to internal applications resulting in compromise of Customer Data; (ii) severe degradation of, Hexagon's security controls, methods, processes or procedures that result in compromise of the security, confidentiality or integrity of Customer Data; and (iii) the unauthorized disclosure of Customer Data.
"Server" means a computer or computer program which manages access by Clients to a centralized resource or service in a network.
"Server-based Software Product" means Server-based software that is accessed by one or more Clients.
"Services" means the work, services, projects, assignments, or tasks Hexagon shall perform pursuant to an Order. Services do not include Maintenance Services, Cloud Programs, or XaaS (anything as a service).
"Services Deliverable" means any data, document, information, Customized Software, Third Party Software, or material provided to Customer as a product of Hexagon's performance of Services pursuant to an Order. Cloud Programs are not Services Deliverables.
"Software" means the software and DevTools owned by Hexagon or an Affiliate and Third Party Software that is licensed to Customer. For the avoidance of doubt, Cloud Programs and their contents are not "Software" as that term is used herein.

"Software Product" means the Hexagon or Hexagon Affiliate software product(s) identified in the Order Documents, which includes (i) any associated Hexagon files, sample data, demo data, or media with which the software is provided, (ii) any associated templates, data, printed materials, and "online" or electronic Documentation, and (iii) any Updates of such Software Products not made the subject of a separate license agreement. The term Software Products shall not include, and no rights of use are granted to User for, third party components, Hexagon products, or dependencies unnecessary to operate products made the subject of the Order Documents, but incidentally delivered within the same files or media. Software Product shall not mean any Third Party Software. For the avoidance of doubt, Cloud Programs and their contents are not "Software Products" as that term is used herein. For avoidance if doubt, Software Product does not include Developer Tools. Software Products are subject to all of the terms and conditions of the EULA which the Parties agree will apply to the same; and in the absence of such agreement, then the terms of the EULA provided with the Software Product.

"SOW" means a statement of work setting forth the scope of Services being provided pursuant to an Order.

"Special Purpose Item" means an item identified in Order Documents as due to be delivered by Hexagon, which item is subject to certain unique terms, conditions, restrictions, or requirements identified in a Special Purpose Schedule.

"Special Purpose Schedule" means a document identifying terms, conditions, and restrictions applicable to a Special Purpose Item.

"Subscription" means the collection of Subscription License(s) identified on the Quote and or purchased by the Customer.

"Subscription License" means a particular type of license to a Software Product that allows a Customer to use the Software Product for a specified period of time identified in the Quote. For reference, a Software Product that is a Subscription License shall have the word "Subscription" in the Software Product name and/or have the letters "SU" at the end of the product number for the Software Product.

"Subscription Term" means the period of time during which Users are authorized to use the Subscription License as set forth on the applicable Quote beginning on the date the Subscription Licenses are provided to the User or the User is provided license keys or access to the Subscription License, unless otherwise noted in the Order Documents.

"Subsystem" means a Hexagon solution that is designed to provide a specific capability independent of the procurement of any other Subsystem. Hexagon's computer aided dispatch system ("I/CAD" or "OnCall Dispatch"), records management system ("RMS" or "OnCall Records"), and G/Technology (G/Tech) are each an example of a Subsystem.

"System" means a physical or operational location where the Software resides and operates on an individual Server or where a single operational identification number ("Site ID") has been assigned by Hexagon.

"System Equipment" means all computer-related hardware, including but not limited to, servers, workstations, cables, mice, keyboards, cameras, and SAN's; operating system software; database software; and other third party software.

"Task" means an Activity or combination of Activities of any nature whether tangible or intangible, whether onsite or remote, or an event, as further identified in an SOW.

"Task Acceptance" means the event when the Task Acceptance Criteria has been satisfied in accordance with the Task Acceptance Process.

"Task Acceptance Criteria" means the criteria by which a Task will be evaluated for completion as described in an SOW.

"Task Acceptance Process" means the process by the Customer and Hexagon verify completion of the Task Acceptance Criteria as further described below. Once Hexagon believes the Task Acceptance Criteria has been successfully completed, Hexagon shall submit for execution by Customer's project manager a sign-off form in substantial conformity with Exhibit C, "Project Deliverable Sign-off Form." Within ten (10) Business Days of receipt of the applicable Project Deliverable Sign-off Form for the completed milestone or Task, Customer's project manager will either: (i) execute the Project Deliverable Sign-off Form provided by Hexagon, or (ii) provide a written description of all deficiencies to Hexagon. If Customer fails to perform either action identified in the preceding sentence within ten (10) Business Days, or if the Deliverable,

including the Software contained in the Fixed Price Project Assignment Order, is placed into Production or utilized in a live environment, then the Task or milestone shall be deemed accepted.

"Term" means the duration of performance under the contract into which this Common Terms Glossary is incorporated by reference.

"Third Party Service Provider" means the third party service provider with whom Hexagon enters into a subcontract with respect to the hosting of a cloud platform, Training Curricula, and/or other services to provide an element of the Cloud Program, Training Curricula, or other service to Customer (if applicable) on behalf of Hexagon.

"Third Party Software" means computer software or other technology in which any person or entity, other than Hexagon or Hexagon's Affiliate, has any right, title or interest, including any restrictions or obligations (such as obligations to obtain consents or approvals and restrictions that may be eliminated only by obtaining such consents or approvals) applicable to the computer software or technology, but does not include software embedded in the Software Products by license from third parties. The use of Third Party Software is subject to all of the terms and conditions of the Third Party Terms. "Third Party Software Products" also means, where applicable, pre-requisite third party software products used by Hexagon in order for Customer to receive other components of the Cloud Program or licensed by Hexagon and used by the Customer to use Cloud Application or Cloud Optional Services.

"Third Party Terms" means for certain Third Party Software additional terms and conditions provided with the Order Documents and/or cited in the Use Terms, or otherwise made available to the Customer or any User.

"Time and Materials Project Assignment" means Hexagon will perform the Services set forth in an Order on an hourly basis until the project is either completed or the authorized hours are exhausted, whichever comes first. Unless otherwise specified in the Order Documents, a Time and Materials Project Assignment shall end six (6) months after formation of the Order.

"Training Curricula" means one or more training classes or resources provided by Hexagon to Customer as a service over a limited time period. Training Curricula are subject to Training Program Statements.

"Training Program Statement" means document(s) titled "Training Program Statement" containing additional details regarding the Training Curricula parts being provided to Customer, including, but not limited to: whether the training is provided live on-site, live but remotely, or by way of recorded or static online content; and, certain other pertinent details; provided that "Training Program Statement" may alternatively refer to only those specific terms of an SOW containing additional details regarding Training Curricula being provided to Customer.

"Update" means any upgrade, modified version, new release, fix, patch and/or update of the Software. Updates can require full installation and a new License Key. Updates are subject to all of the terms and conditions of the EULA provided with User's then current version of the Software; provided that if a new EULA is delivered with an Update, acceptance thereof is a requirement for its use.

"User" means Customer and/or an individual employed by Customer and authorized by Hexagon to use a particular Software, Cloud Application, Third Party Software, or Cloud Optional Services on behalf of the Customer. A User may also include Customer's contractor who requires temporary use in order to provide services on Customer's behalf. A person can only be authorized and a User if the person is an employee or designee of Customer and Customer has purchased the requisite number of licenses, or in the case of Cloud Programs, the requisite number of License Key(s) to provide Credentials for that User.

"Use Terms" means the Hexagon Product Usage Policy and Product Specific Terms set forth at Exhibit E-2.

which are incorporated herein. For purposes of clarity, the Use Terms corresponding to the date of the Order shall apply to that specific Order and the Software provided thereunder.

"Version Limitation I" is a status reached by a Software Product on the earlier of the (i) the third anniversary of the Customer's first operation of that Software Product in a live Production environment or (ii) the fifth anniversary of Hexagon's first actual delivery of the Software Product to the Customer for implementation; provided that each time Customer upgrades the version of the Software Product used in Production to a Modern Release, a reset shall occur, such that Version Limitation I shall thereafter be reached upon the third anniversary of the Customer's first operation of such Modern Release in a live

Production environment.
"Version Limitation II" is a status reached by a Software Product on the earlier of (i) the fourth anniversary of the Customer's first operation of that Software Product in a live Production environment or (ii) the sixth anniversary of Hexagon's first actual delivery of the Software Product to the Customer for implementation; provided that each time Customer upgrades the version of the Software Product used in Production to a Modern Release, a reset shall occur, such that Version Limitation II shall thereafter be reached upon the fourth anniversary of the Customer's first operation of such Modern Release in a live Production environment.
"Version Limitations" means, separately and collectively, limitations on Services to be provided hereunder based upon a Covered Product reaching Version Limitation I and/or Version Limitation II.
"Virus" means any thing or device (including any software, code, file or program) which may: (i) prevent, impair or otherwise adversely affect the operation of any computer software, hardware or network, any telecommunications service, equipment or network or any other service or device; (ii) prevent, impair or otherwise adversely affect access to or the operation of any program or data, including the reliability of any program or data (whether by rearranging, altering or erasing the program or data in whole or part or otherwise); or (iii) adversely affect the user experience or security, including worms, Trojan horses, viruses and other similar things or devices.
"Work" means, as applicable, the performance or providing of Services, Maintenance Services, or Cloud Services.
"XML Files" means the XML (Extensible Markup Language) files generated by the Software Product, where applicable.
"XSL Stylesheets" means the XSL (Extensible Stylesheet Language) presentation of a class of XML Files which, when included with the Software Product, describe how an instance of the class is transformed into an XML (Extensible Markup Language) document that uses the formatting vocabulary.

EXHIBIT E-2

USE TERMS

PRODUCT USAGE POLICY AND PRODUCT-SPECIFIC TERMS

These Use Terms, including Product-Specific Terms included in this document, apply to Software licensed to User by Hexagon pursuant to the EULA, including any version of EULA that is part of any other agreement between User and Hexagon that references the Use Terms and/or subject to Third Party Terms identified herein.

1.0 DEFINITIONS. Capitalized terms not otherwise defined herein shall have the meanings set forth in the Common Terms Glossary.

2.0 AUTHORIZED LICENSE AND ACTIVATION. Unless expressed otherwise, Software Products will contact license servers to conduct a license activation and/or validity check to determine whether the license is authorized and authentic and associate it with a certain device. Depending upon the application, license servers may be within or outside the Customer site. During this contact the transmission of certain data will occur. During activation and validity check, the Software Product may determine that the license is invalid or has expired. In the case of an invalid or expired license, User may receive a prompt informing User of such. Although no personal information is transmitted between User and Hexagon during the license activation and check, User's use of the Software Product provides User's continued consent to the transmission of the necessary data for license activation and validity check. Unless otherwise provided by Hexagon, User may not bypass the license activation process, as doing so will invalidate User's license and is considered a violation of these Use Terms.

3.0 LICENSING METRICS. Software Products are licensed as either Production System Licenses or Auxiliary System Licenses. In some Hexagon documents Production System Licenses may be referred to as "Primary Licenses," and Auxiliary System Licenses may be referred to as "Supplementary Licenses." In those instances, please interpret references to "Primary Licenses" as "Production System Licenses," and references to "Supplementary Licenses" as "Auxiliary System Licenses." There are two (2) types of Production System Licenses and seven (7) types of Auxiliary System Licenses as described below. Depending upon User's license, a license may be used in either Concurrent-Use mode or Node-Locked mode. If an electronic license manager tool is incorporated in the Software Product, the license type will be verified by the Hexagon license system. If not otherwise indicated, User's Client license type and mode will be a Concurrent-Use Production System License. Each license of the Software Product is subject to the EULA, Use Terms, and Order Documents.

3.1 Production System Licenses are identified, and applicable terms described, below:

3.1.1 Concurrent-Use mode (CC) is a type of Client license that allows for the checking in and checking out of the total available licenses of the Software Product for Users. At any point, User may run as many copies of the Software Product as User has Client licenses. If the Software Product is enabled to be run in a disconnected mode, as set forth in the Documentation, a User may check out a license from the System for disconnected use, thus reducing the total number of licenses available in the license pool until the license is checked back into the System. User is responsible for assuring the number of Users using the Software Product concurrently does not exceed the number of licenses User has purchased, even if the Software Product contains no license manager mechanism. User consents to the use of a license mechanism, license files, hardware keys, and other security devices in connection with the Software Product.

3.1.2 Node-Locked mode (NL) is a type of license that allows a single copy of either a Client or Server-based Software Product to be stored on a hard disk and loaded for execution on a single designated workstation, device, or Server.

3.2 Auxiliary System Licenses are identified, and applicable terms described, below:

3.2.1 Passive Disaster Recovery License (BCK) is licensed solely for temporary use when manual switchover of the Software Product to the Auxiliary System License is required in the event of failure of the Production System License. This license may be used in the Production system only during the period of failure of the Production System License. In some Hexagon documents, this type of license may be referred to as a "Backup License." In those instances, please interpret references to "Backup License" as "Passive Disaster Recovery License."

3.2.2 Development System License (DEV) is a license of a Server-based Software Product that is delivered solely in connection with the Production System License of such Software Product for the purposes of developing and testing User's website built only with the Software Product. Development System Licenses shall not be used for Production purposes (i.e., a fully deployed website). In some Hexagon documents, this type of license may be referred to as a "Developer's License." In those instances, please interpret references to "Developer's License" as "Development System License."

3.2.3 Active Disaster Recovery License (RDT) is licensed solely for temporary use when automatic switchover of the Software Product to the Auxiliary System License is required in the event of failure of the Production System License. This license may be used in the Production system only during the period of failure of the Production System License. In some Hexagon documents, this type of license may be referred to as a "Redundant License." In those instances, please interpret references to "Redundant License" as "Active Disaster Recovery License."

3.2.4 Test System License (TST) is licensed solely for testing and development purposes. A Test System License may not be used for training purposes.

3.2.5 Training System License (TRN) is licensed solely for training purposes.

3.2.6 Load Balancing License (LOB) is licensed solely to distribute the traffic evenly among multiple Servers.

3.2.7 Secondary License (SEC or TFB) is licensed for non-productive use for training, development, testing, failover, backup, etc. The total quantity of Secondary Licenses cannot exceed the quantity of purchased Production System Licenses.

4.0 RIGHTS AND LIMITATIONS.

4.1 Unless otherwise stated in the Documentation, for a Software Product that is delivered with an Application Programming Interface ("API") and/or configuration set-up, User may use the API(s) to write User's own extensions to the Software Product, and User may use the configuration setup to configure the Software Product, but only to the extent permitted by the API(s) and/or configuration setup. Insofar as Hexagon does not transfer to User any rights in Hexagon's Intellectual Property (as that term is defined in the EULA and/or any other agreement between User and Hexagon that references the Use Terms) by allowing User to write User's own extensions using the API(s) or to configure the Software Product via the configuration set-up, User hereby agrees and acknowledges that Hexagon retains all rights in its Software Product, API(s), and configuration setup. Hexagon does not make any representations or warranties with respect to such extensions and/or configurations, and to the maximum extent permitted by applicable law, Hexagon and its suppliers disclaim all warranties, either express or implied, relating to such extensions and/or configurations, including, but not limited to, implied warranties of merchantability, fitness for a particular purpose, high risk use, and non-infringement. User's use of such extensions and/or configurations is solely at User's own risk, and subject to applicable law. User hereby agrees to indemnify and hold harmless Hexagon and its suppliers with respect to such extensions and/or configurations.

4.2 For a Software Product that is Node-Locked:

In general, User may not allow the Software Product to be used by multiple Users on a single workstation at the same time. However, if the license is Node-Locked license with remote access, it is intended to allow uncounted Clients to connect to the application Server and does not count the number of connections.

4.3 For Server-based Software Product(s):

4.3.1 With a single license, User may run multiple websites and provide multiple webservices to User's client users, provided all websites and webservices reside on the licensed Server.

4.3.2 License fees and installation restrictions for Software Products may be based on the number of Cores present in the Server on which the Software Products are installed. If User's Software Products are Core based, this section will apply. User is responsible for determining the number of Cores on User's host Server and ordering the appropriate number of Core licenses. Each license of a Software Product must be installed only on a single Server. For example, a 4 Core license does not permit User to install two copies of a component, each on a 2-Core Server. In a virtualized data processing environment, where hyper-threading, "virtual machine" technology, or other similar techniques create "virtual processors" which do not necessarily correspond to the physical Cores present on the Server, User's usage rights depend upon the relationship between the number of Cores for which User is licensed, the number of physical Cores present on the host Server, and the number of processors available to the Software Product in the virtualized environment. Such rights are determined as follows: if the number of Cores for which User is licensed equals or exceeds the number of physical Cores present on the host Server, then additional virtual processors created by hyper-threading or other methods of multi-tasking a physical Core do not violate User's licensing restriction; however, if User wishes to install the Software Product on a host Server having a greater number of physical Cores present than the number of Cores for which User is licensed, User must operate the Software Product only within a virtual machine that accesses a maximum number of processors (whether virtual, physical, or both) that is less than or equal to the number of Cores for which User is licensed. User may load a Server-based Software Product on multiple machines within a cluster that is acting as a single web Server, provided User has obtained from Hexagon the appropriate quantity of licenses for the number of Cores, and the total number of Cores deployed do not exceed the quantity licensed.

4.3.3 User may not use a Software Product's java script code for any purpose other than the application for which it was written.

4.3.4 Unless otherwise stated in the Documentation, for Software Products which contain XSL Stylesheets for presenting XML Files, User may only use the XSL Stylesheets and derivative works thereof for the purpose of presenting XML Files and derivative works thereof (collectively, "XML Products") for User's enterprise. User may not distribute the XSL Stylesheets or XML Products on a stand-alone basis. XSL Stylesheets may not be used in the production of libelous, defamatory, fraudulent, lewd, obscene, or pornographic material, nor in any material that infringes upon any third party Intellectual Property rights, or otherwise in any illegal manner. All XSL Stylesheets supplied with the Software Product are and will remain the Intellectual Property of Hexagon.

4.3.5 User may not use the Server-based Software Product to operate software-as-a-service or hosting services without the prior written consent of Hexagon.

4.3.6 User may not, and User may not authorize or allow anyone else to, use the Development System License for Production purposes (i.e., a fully deployed website).

5.0 SPECIAL LICENSE SCENARIOS.

5.1 United States Government Restricted Rights. If the Software (including any Updates, Documentation, or technical data related to such Software) is licensed, purchased, subscribed to, or obtained, directly or indirectly, by or on behalf of a unit or agency of the United States Government, then this Section 5.1 also applies.

5.1.1 For civilian agencies: The Software was developed at private expense and is "restricted computer software" submitted with restricted rights in accordance with the Federal Acquisition Regulations ("FAR") 52.227-19 (a) through (d) (Commercial Computer Software – Restricted Rights).

5.1.2 For units of the Department of Defense: The Software was developed at private expense and is "commercial computer software" submitted with restricted rights in accordance with the Defense Federal Acquisition Regulations ("DFARS") DFARS 227.7202-3 (Rights in commercial computer software or commercial computer software documentation).

5.1.3 Notice: This Software is "Commercial Computer Software" as defined in DFARS 252.227-7014 (Rights in Noncommercial Computer Software) and FAR 12.212 (Computer Software), which includes "technical data" as defined in DFARS 252.227-7015 (Technical Data) and FAR 12.211 (Technical Data). All use, modification, reproduction, release, performance, display or disclosure of this "Commercial Computer Software" shall be in strict accordance with the manufacturer's standard commercial license, which is attached to and incorporated into the governing Government contract. Hexagon and any applicable third-party software manufacturer(s) are the manufacturer. This Software is unpublished and all rights are reserved under the Copyright Laws of the United States.

5.2 Beta Software.

If the Software Product is Beta Software, then the following additional terms apply. To the extent that any provision in this section is in conflict with any other terms or conditions in the Order Documents, this section shall supersede such other terms and conditions with respect to the Beta Software, but only to the extent necessary to resolve the conflict. User shall hold all information concerning Beta Software and User's use and evaluation of such information and the Beta Software (collectively, "Beta Software Information") in confidence and with the same degree of care User uses to keep User's own similar information confidential, but in no event shall User use less than a reasonable degree of care; and User shall not, without the prior written consent of Hexagon, disclose such Beta Software Information to any person or entity for any reason at any time; provided, however, it is understood that User may disclose any Beta Software Information to those of User's representatives who actually need such information for the purpose of participating in the proposed evaluation and testing ("Beta Testing") of the Beta Software, on the condition that, prior to such disclosure, such representative has been made aware of these terms. User shall not use any Beta Software Information for any reason or purpose other than as necessary for Beta Testing. User agrees to make no other use of the Beta Software Information or to incorporate any Beta Software Information into any work or product. User acknowledges that the Beta Software is a pre-release, beta version, does not represent final product from Hexagon, and may contain bugs, errors and other problems that could cause system or other failures and data loss. THE BETA SOFTWARE IS PROVIDED TO USER "AS-IS", AND HEXAGON DISCLAIMS ALL WARRANTY AND LIABILITY OBLIGATIONS TO USER OF ANY KIND. User may use the Beta Software only for evaluation and testing and not for general Production use, unless otherwise expressly agreed in writing by Hexagon. User acknowledges that Hexagon has not promised or guaranteed to User that Beta Software or any portion thereof will be announced or made available to anyone in the future, Hexagon has no express or implied obligation to User to announce or introduce the Beta Software and that Hexagon may not introduce a product similar to or compatible with the Beta Software. Accordingly, User acknowledges that any research or development that User performs regarding the Beta Software or any product associated with the Beta Software is done entirely at User's own risk. If requested by Hexagon, User will provide feedback to Hexagon regarding Beta Testing, including error or bug reports. Hexagon shall own any and all Beta Software feedback from Customer and/or User and all Beta Software Information and shall retain full rights to leverage the same for improvement or development of Products; provided further that User and/or Customer shall deliver any assignments or documentation necessary to effect such rights. Upon receipt of a later unreleased version of Beta Software or release by Hexagon of a publicly released commercial version of the Software Product, User agrees to return or permanently destroy all earlier Beta Software received from Hexagon. User agrees to return or destroy all unreleased versions of the Beta Software no later than the date earlier of (i) thirty (30) days of the completion of Beta Testing, or (ii) Hexagon's first commercial shipment of the publicly released commercial software.

6.0 PRODUCT-SPECIFIC TERMS. The following are applicable to User if User has obtained from Hexagon Software identified in this section 6.0.

6.1 One or more of the following Product-Specific Terms specified below, shall be applicable to User if User has obtained such Software Products.

6.1.1 I/Map Editor for ArcGIS With regard only to I/Map Editor for ArcGIS, (i) this provision modifies the EULA between User and Hexagon related to I/Map Editor for ArcGIS, and (ii) in the event of a conflict between the EULA and this provision, this provision shall govern specifically with regard to I/Map Editor for ArcGIS. The EULA and this provision together constitute the "License" applicable to I/Map Editor for ArcGIS. Hexagon grants to User a license and permission to use, copy, and reproduce the Esri Character Marker Symbol font files taken from a licensed copy of Esri's ArcGIS Desktop software to use in Hexagon's Intergraph I/CAD product suite for User's own internal use. For clarification, User may distribute the Character Marker Symbol font files to User's workstations, servers, tablets, and/or mobile devices that contain a copy of the I/Map Editor for ArcGIS-created .MAP file solely for the purpose of properly rendering the map. No other use of the Esri Character Marker Symbol font file is permitted.

AMENDMENT NO. 4 TO THE PROFESSIONAL SERVICES AGREEMENT BETWEEN THE CITY OF ONTARIO AND NATIONAL PUBLIC SAFETY GROUP, LLC.

1. Parties and Date.

This Amendment No. 4 to the Agreement (as defined herein) is made and entered as of _____, by and between the City of Ontario ("City") and National Public Safety Group (NPSG), a Limited Liability Corporation ("Consultant"). City and Consultant are sometimes individually referred to as "Party" and collectively as "Parties."

2. Recitals.

2.1 Agreement. The City and Consultant have entered into an agreement entitled "Professional Services Agreement" dated December 15, 2020. ("Agreement").

2.2 Amendment Purpose. The City and Consultant desire to amend the Agreement to extend the terms, provide additional compensation, and add to the scope of work. The parties heretofore entered into Amendment No. 1, dated June 3, 2021, Amendment No. 2, dated November 21, 2022, and Amendment No. 3, dated February 21, 2023.

2.3 Amendment Authority. This Amendment No. 4 is authorized pursuant to Section 3.1.2 Term, and 3.2.1 Compensation of the Agreement.

3. Terms.

3.1 Amendment. Section 3.1.2 Term of the Agreement is hereby amended in its entirety to read as follows:

"The term of this Agreement shall be from December 15, 2020, to December 14, 2025, unless earlier terminated as provided herein. Consultant shall complete the Services within the term of this Agreement and shall meet any other established schedules and deadlines. The Parties may, by mutual, written consent, extend the term of this Agreement if necessary to complete the Services."

Section 3.2.1 Compensation of the Agreement is herby amended in its entirety to read as follows:

"Consultant shall receive compensation, including authorized reimbursement, for all Services rendered under this Agreement at the rates set forth in Exhibit "D" attached hereto and incorporated herein by reference. The total compensation amount shall be increased by **five-hundred eighty-six thousand, four hundred fifteen dollars ($586,415)** with a contingency of **fourteen-thousand two hundred and ninety dollars ($14,290),** and a total not to exceed the contract amount of **nine-hundred sixty-three thousand, six hundred and thirty-four dollars ($963,634)** without the written approval of Council od City Manager, as applicable. Extra work may be authorized, as described below, and if authorized, will be compensated at the rates and manner set forth in the Agreement."

3.2 Continuing Effect of Agreement. Except as amended by this Amendment No.4, all other provisions of the Agreement remain in full force and effect and shall govern the actions of the parties under this Amendment No. 4. From and after the date of this Amendment No.4, whenever the term "Agreement" appears in the Agreement, it shall mean the Agreement as amended by this Amendment No. 4.

3.3 Adequate Consideration. The Parties hereto irrevocably stipulate and agree that they have each received adequate and independent consideration for the performance of the obligations they have undertaken pursuant to this Amendment No. 4.

3.4 Severability. If any portion of this Amendment No. 4 is declared invalid, illegal, or otherwise unenforceable by a court of competent jurisdiction, the remaining provisions shall continue in full force and effect.

3.5 Integration. This Amendment represents the entirety of the Parties' understanding relating to the subject of this Amendment, including written or verbal communications between the Parties, which shall have no relevance unless expressly incorporated herein. This is an integrated amendment.

				Total Payments:	**$586,414.50**	

*Projected project length is listed above and below. However, as we do not quote projects based on hours, but on other criteria, such as number of agencies, users, products, etc., we will continue to provide project services should the software provider or agency(ies) have delays for up to *3 months past this projected time estimate at no added cost.* Our goal is to provide your agency with a successful project on time and within budget.

Projected project length: 22

This is a fixed-fee agreement broken up over monthly payments.

If project is completed before the projected time, the balance of unpaid payments will be due and invoiced for payment.

CITY OF ONTARIO *Agenda Report* **November 21, 2023**	**SECTION:** **CONSENT CALENDAR**
Department: Utilities Prepared By: Omar Gonzalez Staff Member Presenting: Scott Burton, Utilities General Manager Reviewed By: Dennice Raygoza, Albert G Gastelum, Michael Sigsbee Approved By:	Submitted To: Council/OHA Approved: _____ Continued To: _____ Denied: _____ Item No: 5

SUBJECT: **A PROFESSIONAL DESIGN SERVICES AGREEMENT WITH RICHARD BRADY AND ASSOCIATES INC. FOR RESERVOIR 925-1A AND WATER TRANSMISSION MAIN IMPROVEMENT PROJECT**

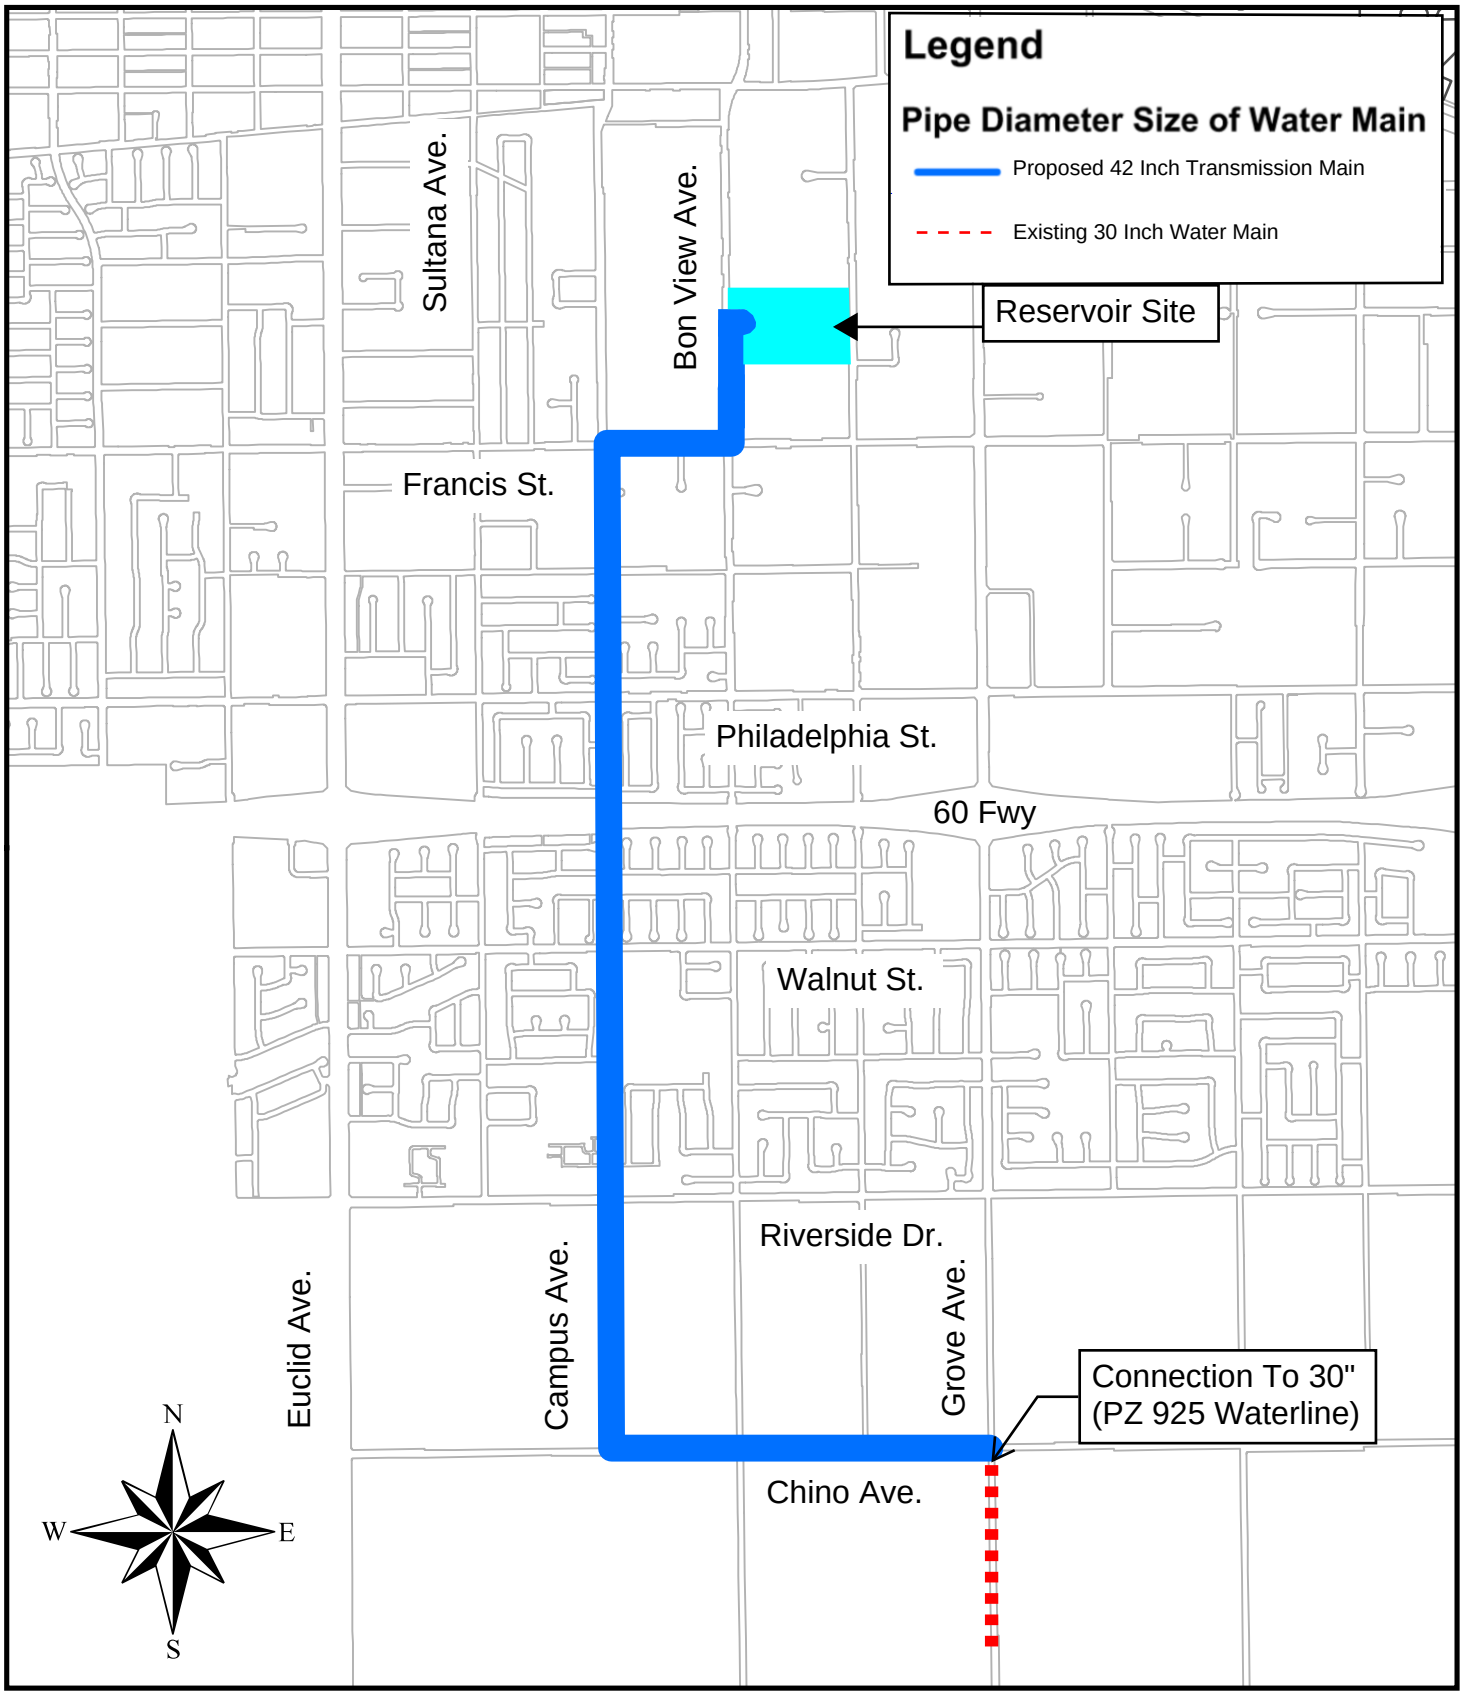
RECOMMENDATION: That the City Council approve and authorize the City Manager, or designee, to execute a Professional Design Services Agreement with Richard Brady and Associates Inc., of San Diego, California, for design and bid support services for Reservoir 925-1A (Reservoir) and Water Transmission Main Project for an amount of $2,489,355 plus a 15% contingency of $373,403 for a total not-to-exceed amount of $2,862,758, and a term from November 21, 2023 to November 21, 2026.

THE FOLLOWING COUNCIL GOALS ARE BEING ACHIEVED:
Operate in a Businesslike Manner
Ensure the Development of a Well Planned, Balanced, and Self-Sustaining Community in Ontario Ranch
Invest in the City's Infrastructure (Water, Streets, Sewers, Parks, Storm Drains and Public Facilities)

FISCAL IMPACT: The proposed Agreement is for a total amount of $2,489,355 plus a 15% contingency of $373,403 for a total not-to-exceed amount of $2,862,758. The term of the Agreement will be from November 21, 2023 to November 21, 2026. The Fiscal Year 2023-24 Adopted Capital Improvement Program includes appropriations for this project from the Ontario Ranch Development Impact Fee (DIF) Fund (DIF Project No.'s WT-010 and WT-014 and Capital Improvement Program No.'s WA 2301 and WA2302). Sufficient DIF funds have been collected through development agreements subject to the NMC Builders, LLC's First Amended and Restated Agreement for the Construction of Limited Infrastructure Improvements to serve an Easterly Portion of Ontario Ranch. Non-NMC Builder developments including Euclid Land Ventures, LLC (PDA19-001), and Merrill Commerce Center East, LLC (PDA 18-004) will also provide funds according to their respective development agreements. There is no impact to the General fund.

BACKGROUND & ANALYSIS: The City's Water Master Plan identifies water infrastructure improvements that are needed to meet the growing water demands of Ontario Ranch. This project creates a new backbone water infrastructure known as Phase 2B Water Improvements for the west side of Ontario Ranch, and includes the Reservoir, water transmission main from the Reservoir site to the 925-ft. pressure zone in Ontario Ranch, and two new groundwater production wells in the vicinity of the Reservoir site.

Phase 2B Water Improvements in this project includes the design of the 9-million-gallon Reservoir located on Bon View Avenue, north of Francis Street, and approximately 17,200 linear feet of 42-inch transmission main to convey potable water from the Reservoir to the 925-ft. pressure zone connection point at the intersection of Grove Avenue and Eucalyptus Avenue (see Attachment 1).



Professional design services include a preliminary layout of the Reservoir site which will ultimately include groundwater production wells, a groundwater treatment facility, and various other water production equipment and appurtenances. The Agreement will also include a preliminary design report with CEQA document updates, completed construction documents and estimates, and construction bidding support services for the new 925-1A Reservoir and site improvements, and transmission main.

On July 13, 2023, the City received the following three qualified proposals in response to the Request for Proposals (RFP) for the Reservoir 925-1A and Water Transmission Main Project:

Proposer	**Location**
Richard Brady and Associates Inc.	San Diego, CA
Ardurra Group Inc.	Newport Beach, CA
Hazen and Sawyer	New York, NY

Staff reviewed the proposals based upon qualifications, understanding of the City's needs, history of completing similar projects, and criteria specified in the RFP. After careful evaluation, Richard Brady and Associates Inc. of San Diego, California, was selected as the best overall qualified respondent.

CITY OF ONTARIO
DESIGN SERVICES AGREEMENT

1. PARTIES AND DATE.

This Agreement is made and entered into as _____, 20____ by and between the City of Ontario, a municipal corporation organized and operating under the laws of the State of California with its principal place of business at 303 East "B" Street, Ontario, California 91764-4196, County of San Bernardino, State of California ("City"), and Richard Brady and Associates, Inc. a CORPORATION, with its principal place of business at 10089 Willow Creek Road, Suite 375, San Diego, CA (hereinafter referred to as "Consultant"). City and Consultant are sometimes individually referred to herein as "Party" and collectively as "Parties."

2. RECITALS.

2.1 City. City is a municipal corporation organized under the laws of the State of California, with power to contract for services necessary to achieve its purpose.

2.2 Consultant. Consultant desires to perform and assume responsibility for the provision of certain professional engineering design services required by the City on the terms and conditions set forth in this Agreement. Consultant warrants that it is fully licensed, qualified, and willing to perform the services required by this Agreement; provided, however, that if Consultant is a corporation or other organization, the Project Consultant designated pursuant to Section 3.2, and not the Consultant itself, shall be fully licensed to practice as an engineer in the State of California.

2.3 Project. City desires to engage Consultant to render such services for the Reservoir 925-1A and Water Transmission Main Project ("Project") as set forth in this Agreement.

3. TERMS

3.1 Employment of Consultant.

3.1.1 Scope of Services. Consultant promises and agrees to furnish to City all labor, materials, tools, equipment, services, and incidental and customary work necessary to fully

and adequately supply the professional engineering and related services necessary for the full and adequate completion of the Project consistent with the provisions of this Agreement (hereinafter referred to as "Services"). The Services are more particularly described throughout this Agreement, including Exhibit "A" attached hereto and incorporated herein by reference. All Services shall be subject to, and performed in accordance with, this Agreement, any exhibits attached hereto and incorporated herein by reference, and all applicable local, state and federal laws, rules and regulations. All Services performed by Consultant shall be subject to the sole and discretionary approval of the City, which approval shall not be unreasonably withheld.

3.1.2 Term. The term of this Agreement shall be from November 21, 2023 to November 21, 2026 unless earlier terminated as provided herein. Consultant shall complete the Services within the term of this Agreement, and shall meet any other established schedules and deadlines.

3.2 Project Consultant; Key Personnel.

3.2.1 Engineer of Record. Consultant shall name a specific individual to act as Project Consultant, subject to the approval of City. Consultant hereby designates Karl Kuebitz, P.E. (License No. 67975) to act as the Engineer of for the Project. The Engineer of Record shall: (1) maintain oversight of the Services; (2) have full authority to represent and act on behalf of the Consultant for all purposes under this Agreement; (3) supervise and direct the Services using his or her best skill and attention; (4) be responsible for the means, methods, techniques, sequences and procedures used for the Services; (5) adequately coordinate all portions of the Services; and (6) act as principal contact with City and all contractors, consultants, engineers and inspectors on the Project. Any change in the Engineer of Record shall be subject to the City's prior written approval, which approval shall not be unreasonably withheld. The new Engineer of Record shall be of at least equal competence as the prior Engineer of Record.In the event that City and Consultant cannot agree as to the substitution of a new [Engineer of Record, City shall be entitled to terminate this Agreement for cause.

3.2.2 Key Personnel. In addition to the Engineer of Record, Consultant has represented to the City that certain additional key personnel, engineers and consultants will perform the Services under this Agreement. Should one or more of such personnel, engineers or consultants become unavailable, Consultant may substitute others of at least equal competence upon written approval of the City. In the event that City and Consultant cannot agree as to the substitution of key personnel, engineers or consultants, City shall be entitled to terminate this Agreement for cause. The key additional personnel, engineers and consultants for performance of this Agreement are as follows: Amanda Del Bello, P.E., Design Manager LICENSE NUMBER 78825.

3.3 Hiring of Consultants and Personnel.

3.3.1 Right to Hire or Employ. Consultant shall have the option, unless City objects in writing after notice, to employ at its expense architects, engineers, experts or other consultants qualified and licensed to render services in connection with the planning and/or administration of the Project, and to delegate to them such duties as Consultant may delegate without relieving Consultant from administrative or other responsibility under this Agreement. Consultant shall be responsible for the coordination and cooperation of Consultant's architects, engineers, experts or other consultants. All consultants, including changes in consultants, shall be subject to approval by City in its sole and reasonable discretion. Consultant shall notify City of the identity of all consultants at least fourteen (14) days prior to their commencement of work

to allow City to review their qualifications and approve to their participation on the Project in its sole and reasonable discretion.

3.3.2 Qualification and License. All architects, engineers, experts and other consultants retained by Consultant in performance of this Agreement shall be qualified to perform the Services assigned to them, and shall be licensed to practice in their respective professions, where required by law.

3.3.3 Standards and Insurance. All architects, engineers, experts and other consultants hired by Consultant shall be required to meet all of the same standards and insurance requirements set forth in this Agreement, unless other standards or requirements are approved by the City in writing. Unless changes are approved in writing by the City, Consultant's agreements with its consultants shall contain a provision making them subject to all provisions stipulated in this Agreement.

3.3.4 Assignments or Staff Changes. Consultant shall promptly obtain written City approval of any assignment, reassignment or replacement of such architects, engineers, experts and consultants, or of other staff changes of key personnel working on the Project. As provided in the Agreement, any changes in Consultant's consultants and key personnel shall be subject to approval by City.

3.3.5 Draftsman and Clerical Support. Draftsmen and clerical personnel shall be retained by Consultant at Consultant's sole expense.

3.4 Standard of Care.

3.4.1 Standard of Care. Consultant shall perform all Services under this Agreement in a skillful and competent manner, consistent with the standards generally recognized as being employed by professionals qualified to perform the Services in the same discipline in the State of California, and shall be responsible to City for damages sustained by the City and delays to the Project as specified in the indemnification provision of this Agreement. Without limiting the foregoing, Consultant shall be fully responsible to the City for any increased costs incurred by the City as a result of any such delays in the design or construction of the Project. Consultant represents and maintains that it is skilled in the professional calling necessary to perform the Services. Consultant warrants and represents that all of its employees, architects, engineers, experts and other consultants shall have sufficient skill and experience to perform the Services assigned to them. Finally, Consultant represents that it, its employees, architects, engineers, experts and other consultants have all licenses, permits, qualifications and approvals of whatever nature that are legally required to perform the Services assigned to or rendered by them and that such licenses and approvals shall be maintained throughout the term of this Agreement. As provided for in the indemnification provisions of this Agreement, Consultant shall perform, at its own cost and expense and without reimbursement from the City, any services necessary to correct errors or omissions which are caused by the Consultant's failure to comply with the standard of care provided for herein.

3.4.2 Performance of Employees. Any employee or consultant who is determined by the City to be uncooperative, incompetent, a threat to the adequate or timely completion of the Project, a threat to the safety of persons or property, or any employee or consultant who fails or refuses to perform the Services in a manner acceptable to the City, shall be promptly removed from the Project by the Consultant and shall not be re-employed to perform any of the Services or to work on the Project.

3.5 Laws and Regulations.

3.5.1 Knowledge and Compliance. Consultant shall keep itself fully informed of and in compliance with all applicable local, state and federal laws, rules and regulations in any manner affecting the performance of the Services or the Project, and shall give all notices required of the Consultant by law. Consultant shall be liable, pursuant to the standard of care and indemnification provisions of this Agreement, for all violations of such laws and regulations in connection with its Services. Consultant shall defend, indemnify and hold City, its officials, officers, employees and agents free and harmless, pursuant to the indemnification provisions of this Agreement, from any claim or liability arising out of any failure or alleged failure to comply with such laws, rules or regulations.

3.5.2 Drawings and Specifications. Consultant shall cause all drawings and specifications to conform to any applicable requirements of federal, state and local laws, rules and regulations, including the Uniform Building Code, in effect as of the time the drawings and specifications are prepared or revised during the latest phase of the Services described in Exhibit "A" attached hereto. Any significant revisions made necessary by changes in such laws, rules and regulations after this time may be compensated as Additional Services which were not known or reasonably should not have been known by Consultant. Consultant shall cause the necessary copies of such drawings and specifications to be filed with any governmental bodies with approval jurisdiction over the Project, in accordance with the Services described in Exhibit "A" attached hereto. For the preparation of all such drawings and specifications, the Consultant shall use Computer Aided Design Drafting ("CADD") (e.g., AutoCAD) or other technology acceptable to the Consultant and City.

3.5.3 Americans with Disabilities Act. Consultant will use its best professional efforts to interpret all applicable federal, state and local laws, rules and regulations with respect to access, including those of the Americans with Disabilities Act ("ADA"). Consultant shall inform City of the existence of inconsistencies of which it is aware or reasonably should be aware between federal and state accessibility laws, rules and regulations, as well as any other issues which are subject to conflicting interpretations of the law, and shall provide the City with its interpretation of such inconsistencies and conflicting interpretations. Unless Consultant brings such inconsistencies and conflicting interpretations to the attention of the City and requests City's direction on how to proceed, the Consultant's interpretation of such inconsistencies and conflicting interpretations shall be the sole responsibility and liability of Consultant, and the Consultant shall correct all plans, specifications and other documents prepared for the Project at no additional cost if its interpretations are shown to be incorrect. In the event that the Consultant request's City's direction on how to proceed with respect to any inconsistent and/or conflicting interpretation, the Consultant shall be responsible to the City only pursuant to the indemnification provisions of this Agreement.

3.5.4 Permits, Approvals and Authorizations. Consultant shall provide City with a list of all permits, approvals or other authorizations required for the Project from all federal, state or local governmental bodies with approval jurisdiction over the Project. Consultant shall then assist the City in obtaining all such permits, approvals and other authorizations. The costs of such permits, approvals and other authorizations shall be paid by the City.

3.5.5 Water Quality Management and Compliance. Consultant shall keep itself and all subcontractors, staff, and employees fully informed of and in compliance with all local, state and federal laws, rules and regulations that may impact, or be implicated by the performance of the Services including, without limitation, all applicable provisions of the City's ordinances

regulating water quality and storm water; the Federal Water Pollution Control Act (33 U.S.C. § 1251 *et seq.*); the California Porter-Cologne Water Quality Control Act (Cal Water Code §§ 13000-14950); and any and all regulations, policies, or permits issued pursuant to any such authority. Consultant shall additionally comply with the lawful requirements of the City, and any other municipality, drainage district, or other local agency with jurisdiction over the location where the Services are to be conducted, regulating water quality and storm water discharges. Failure to comply with laws, regulations, and ordinances listed in this Section is a violation of federal and state law.

3.6 Independent Contractor.

3.6.1 Control and Payment of Subordinates. City retains Consultant on an independent contractor basis and Consultant is not an employee of City. Consultant is not an employee for state tax, federal tax or any other purpose, and is not entitled to the rights or benefits afforded to City's employees. Any additional personnel performing the Services under this Agreement on behalf of Consultant shall also not be employees of City, and shall at all times be under Consultant's exclusive direction and control. Consultant shall pay all wages, salaries, and other amounts due such personnel in connection with their performance of Services under this Agreement and as required by law. Consultant shall be responsible for all reports and obligations respecting such additional personnel, including, but not limited to: social security taxes, income tax withholding, unemployment insurance, disability insurance, and workers' compensation insurance.

3.7 Schedule of Services.

3.7.1 Consultant Services. Consultant shall fully and adequately complete the Services described in this Agreement and in Exhibit "A" attached hereto and incorporated herein by reference.

3.7.2 Timely Performance Standard. Consultant shall perform all Services hereunder as expeditiously as is consistent with professional skill and care, as well as the orderly progress of the Project work so as not to be the cause, in whole or in part, of delays in the completion of the Project or in the achievement of any Project milestones, as provided herein. Specifically, Consultant shall perform its Services so as to allow for the full and adequate completion of the Project within the time required by the City and within any completion schedules adopted for the Project. Consultant agrees to coordinate with City's staff, contractors and consultants in the performance of the Services, and shall be available to City's staff, contractors and consultants at all reasonable times.

3.7.3 Performance Schedule. Consultant shall prepare an estimated time schedule for the performance of Consultant's Services, to be adjusted as the Project proceeds. Such schedule shall be subject to the City's review and approval, which approval shall not be unreasonably withheld, and shall include allowances for periods of time required for City's review and approval of submissions, and for approvals of authorities having jurisdiction over Project approval and funding. If City and Consultant cannot mutually agree on a performance schedule, City shall have the authority to immediately terminate this Agreement. The schedule shall not be exceeded by Consultant without the prior written approval of City. If the Consultant's Services are not completed within the time provided by the agreed upon performance schedule, or any milestones established therein, it is understood, acknowledged and agreed that the City will suffer damage for which the Consultant will be responsible.

3.7.4 Excusable Delays. Any delays in Consultant's work caused by the following may be added to the time for completion of any obligations of Consultant: (1) the actions of City or its employees; (2) the actions of those in direct contractual relationship with City; (3) the actions of any governmental agency having jurisdiction over the Project; (4) the actions of any parties not within the reasonable control of the Consultant; and (5) any Force Majeure Event (as defined herein) or other unforeseen occurrence not due to any fault or negligence on the part of Consultant. Neither the City nor the Consultant shall be liable for damages, liquidated or otherwise, to the other on account of such delays.

3.7.5 Force Majeure Events. Neither City nor Consultant shall be considered in default of this Agreement for delays in performance caused by circumstances beyond the reasonable control of the non-performing Party. For purposes of this Agreement, such circumstances include a Force Majeure Event. A Force Majeure Event shall mean an event that materially affects a Party's performance and is one or more of the following: (1) Acts of God or other natural disasters; (2) terrorism or other acts of a public enemy; (3) orders of governmental authorities (including, without limitation, unreasonable and unforeseeable delay in the issuance of permits or approvals by governmental authorities that are required for the services); (4) strikes and other organized labor action occurring at the site and the effects thereof on the services, only to the extent such strikes and other organized labor action are beyond the control of Consultant and its subcontractors, and to the extent the effects thereof cannot be avoided by use of replacement workers; and (5) pandemics, epidemics or quarantine restrictions. For purposes of this section, "orders of governmental authorities," includes ordinances, emergency proclamations and orders, rules to protect the public health, welfare and safety, and other actions of a public agency applicable to the Services and Agreement. Should a Force Majeure Event occur, the non-performing Party shall, within fifteen (15) calendar days of the beginning of an Force Majeure Event, give written notice to the other Party describing the circumstances preventing continued performance and the efforts being made to resume performance of this Agreement. Force Majeure Events shall not entitle Consultant to any additional compensation. Notwithstanding the foregoing in this section, the City may still terminate this Agreement in accordance with the termination provisions of this Agreement.

3.7.6 Request for Excusable Delay Credit. The Consultant shall, within fifteen (15) calendar days of the beginning of any excusable delay, notify the City in writing of the causes of delay (unless City grants in writing a further period of time to file such notice prior to the date of final payment under the Agreement). City will then ascertain the facts and the extent of the delay, and grant an extension of time for completing the Services when, in its sole judgment, the findings of fact justify such an extension. The City's findings of fact thereon shall be final and conclusive on the Parties. Extensions of time shall apply only to that portion of the Services affected by the delay and shall not apply to other portions of the Services not so affected. The sole remedy of Consultant for extensions of time shall be an extension of the performance time at no cost to the City. If Additional Services are required as a result of an excusable delay, the Parties shall mutually agree thereto pursuant to the Additional Services provision of this Agreement. Should Consultant make an application for an extension of time, Consultant shall submit evidence that the insurance policies required by this Agreement remain in effect during the requested additional period of time.

3.8 Additional Services.

3.8.1 Request for Services. At City's request, Consultant may be asked to perform services not otherwise included in this Agreement, not included within the basic services

listed in Exhibit "A" attached hereto, and/or not customarily furnished in accordance with generally accepted architectural practice.

3.8.2 Definition. As used herein, "Additional Services" mean: (1) any work which is determined by City to be necessary for the proper completion of the Project, but which the Parties did not reasonably anticipate would be necessary for the Consultant to perform at the execution of this Agreement; or (2) any work listed as Additional Services in Exhibit "A" attached hereto. Consultant shall not perform, nor be compensated for, Additional Services without prior written authorization from City and without an agreement between the City and Consultant as to the compensation to be paid for such services. City shall pay Consultant for any approved Additional Services, pursuant to the compensation provisions herein, so long as such services are not made necessary through the fault of Consultant pursuant to the indemnification provision of this Agreement.

3.8.3 Examples of Additional Services. Such Additional Services shall not include any redesign or revisions to drawings, specifications or other documents when such revisions are necessary in order to bring such documents into compliance with applicable laws, rules, regulations or codes of which Consultant was aware or should have been aware pursuant to the laws and regulations provision of this Agreement above. Such Additional Services may include, but shall not be limited to:

(a) Separately Bid Portions of Project. Plan preparation and/or administration of work on portions of the Project separately bid.

(b) Furniture and Interior Design. Assistance to City, if requested, for the selection of moveable furniture, equipment or articles which are not included in the Construction Documents.

(c) Fault of Contractor. Services caused by delinquency, default or insolvency of contractor, or by major defects in the work of the contractor, provided that any such services made necessary by the failure of Consultant to detect and report such matters when it reasonably should have done so shall not be compensated.

(d) Inconsistent Approvals or Instructions. Revisions in drawings, specifications or other documents when such revisions are inconsistent with written approvals or instructions previously given and are due to causes beyond the control of Consultant.

(e) Legal Proceedings. Serving as an expert witness on City's behalf or attending legal proceedings to which the Consultant is not a party.

(f) Damage Repair. Supervision of repair of damages to any structure.

(g) Extra Environmental Services. Additional work required for environmental conditions (e.g. asbestos or site conditions) not already contemplated within the Consultant's services for the Project.

3.9 City Responsibilities. City's responsibilities shall include the following:

3.9.1 Data and Information. City shall make available to Consultant all necessary data and information concerning the purpose and requirements of the Project, including scheduling and budget limitations, objectives, constraints and criteria. As part of the budget

limitation information, the City shall provide the Consultant with a preliminary construction budget ("City's Preliminary Construction Budget").

3.9.2 Project Survey. If required pursuant to the scope of the Project and if requested by Consultant, City shall furnish Consultant with, or direct Consultant to procure at City's expense, a survey of the Project site prepared by a registered surveyor or civil engineer, any other record documents which shall indicate existing structures, land features, improvements, sewer, water, gas, electrical and utility lines, topographical information and boundary dimensions of the site, and any other such pertinent information.

3.9.3 Bid Phase. Distribute Construction Documents to bidders and conduct the opening and review of bids for the Project.

3.9.4 Testing. Retain consultant(s) to conduct chemical, mechanical, soils, geological or other tests required for proper design of the Project, and furnish such surveys, borings, test pits, and other tests as may be necessary to reveal conditions of the site which must be known to determine soil condition or to ensure the proper development of the required drawings and specifications.

3.9.5 Required Inspections and Tests. Retain consultant(s) to conduct materials testing and inspection or environmental/hazardous materials testing and inspection pursuant to any applicable laws, rules or regulations.

3.9.6 Fees of Reviewing or Licensing Agencies. Directly pay or reimburse the payment of all fees required by any reviewing or licensing agency, or other agency having approval jurisdiction over the Project.

3.9.7 City's Representative. The City hereby designates the City Manager, or his or her designee, to act as its representative for the performance of this Agreement ("City's Representative"). City's Representative shall have the power to act on behalf of the City for all purposes under this Contract. The City Manager hereby designates Dennis Mejia, PE, Utilities Engineering Division Manager, or his or her designee, as the City's contact for the implementation of the Services hereunder. Contractor shall not accept direction or orders from any person other than the City's Representative or his or her designee.

3.9.8 Review and Approved Documents. Review all documents submitted by Consultant, including change orders and other matters requiring approval by the City Council or other officials. City shall advise Consultant of decisions pertaining to such documents within a reasonable time after submission, so as not to cause unreasonable delay as provided in the excusable delay provisions of this Agreement above.

3.10 Compensation.

3.10.1 Consultant's Compensation for Basic Services. City shall pay to Consultant, for the performance of all Services rendered under this Agreement, the total not to exceed amount of **two million four hundred eighty-nine thousand three hundred fifty-five** Dollars (**$2,489,355**) ("Total Compensation"). This Total Compensation amount shall be based upon, and may be adjusted according to, the fee schedule and related terms and conditions attached hereto as Exhibit "B" and incorporated herein by reference. The Total Compensation, as may be adjusted upon mutual agreement, shall constitute complete and adequate payment for Services under this Agreement.

3.10.2 Payment for Additional Services. At any time during the term of this Agreement, City may request that Consultant perform Additional Services. As used herein, Additional Services means any work which is determined by City to be necessary for the proper completion of the Project, but which the Parties did not reasonably anticipate would be necessary at the execution of this Agreement. Any additional work in excess of this amount must be approved by the City. If authorized, such Additional Services will be compensated at the hourly rates set forth in Exhibit "B" attached hereto and incorporated herein by reference, unless a flat rate or some other form of compensation is mutually agreed upon by the Parties. If City requires Consultant to hire consultants to perform any Additional Services, Consultant shall be compensated therefore at the hourly rates set forth in Exhibit "B" attached hereto and incorporated herein by reference, unless a flat rate or some other form of compensation is mutually agreed upon by the Parties. City shall have the authority to review and approve the rates of any such consultants. In addition, Consultant shall be reimbursed for any expenses incurred by such consultants pursuant to the terms and conditions of Section 3.10.3.

3.10.3 Reimbursable Expenses. Reimbursable expenses are in addition to compensation for the Services and Additional Services. Consultant shall not be reimbursed for any expenses unless authorized in writing by City, which approval may be evidenced by inclusion in Exhibit "B" attached hereto. Such reimbursable expenses shall include only those expenses which are reasonably and necessarily incurred by Consultant in the interest of the Project. Consultant shall be required to acquire prior written consent in order to obtain reimbursement for the following: (1) extraordinary transportation expenses incurred in connection with the Project; (2) out-of-town travel expenses incurred in connection with the Project; (3) fees paid for securing approval of authorities having jurisdiction over the Project; (4) bid document duplication costs in excess of $1,000; and (5) other costs, fees and expenses in excess of $1,000.

3.10.4 Payment to Consultant. Consultant's compensation and reimbursable expenses shall be paid by City to Consultant no more often than monthly. Such periodic payments shall be made based upon the percentage of work completed, and in accordance with the phasing and funding schedule provided in Exhibit "B" and the compensation rates indicated in Exhibit "B" attached hereto and incorporated herein by reference. In order to receive payment, Consultant shall present to City an itemized statement which indicates Services performed, percentage of Services completed, method for computing the amount payable, and the amount to be paid. The statement shall describe the amount of Services provided since the initial commencement date, or since the start of the subsequent billing periods, as appropriate, through the date of the statement, as well as those expenses for which reimbursement is requested for that statement period. The amount paid to Consultant shall never exceed the percentage amounts authorized by the phasing and funding schedule located in Exhibit "B" attached hereto. City shall, within thirty (30) days of receiving such statement, review the statement and pay all approved charges thereon pursuant to the provisions of Civil Code Section 3320. Disputed amounts shall be resolved by the Parties in a mutually agreeable manner.

Payments made for Additional Services shall be made in installments, not more often than monthly, proportionate to the degree of completion of such services or in such other manner as the Parties shall specify when such services are agreed upon, and in accordance with any authorized fee or rate schedule. In order to receive payment, Consultant shall present to City an itemized statement which indicates the Additional Services performed, percentage of Additional Services completed, method for computing the amount payable, and the amount to be paid. The statement shall describe the amount of Additional Services provided since the initial commencement date, or since the start of the subsequent billing periods, as appropriate, through the date of the statement. City shall, within thirty (30) days of receiving such statement, review

the statement and pay all approved charges thereon pursuant to the provisions of Civil Code Section 3320. Disputed amounts shall be resolved by the Parties in a mutually agreeable manner.

Upon cancellation or termination of this Agreement, Consultant shall be compensated as set forth in the termination provision herein.

3.10.5 Withholding Payment to Consultant. The City may withhold payment, in whole or in part, to the extent reasonably necessary to protect the City from claims, demands, causes of action, costs, expenses, liabilities, losses, damages, or injuries of any kind to the extent arising out of or caused by the negligence, recklessness, or willful misconduct protected under the indemnification provisions of this Agreement. Failure by City to deduct any sums from a progress payment shall not constitute a waiver of the City's right to such sums. The City may keep any moneys which would otherwise be payable at any time hereunder and apply the same, or so much as may be necessary therefor, to the payment of any expenses, losses, or damages as determined by the City, incurred by the City for which Consultant is liable under the Agreement or state law. Payments to the Consultant for compensation and reimbursable expenses due shall not be contingent on the construction, completion or ultimate success of the Project. Payment to the Consultant shall not be withheld, postponed, or made contingent upon receipt by the City of offsetting reimbursement or credit from Parties not within the Consultant's reasonable control.

3.10.6 Prevailing Wages. Consultant is aware of the requirements of California Labor Code Sections 1720, et seq., and 1770, et seq., as well as California Code of Regulations, Title 8, Section 16000, et seq., ("Prevailing Wage Laws"), which require the payment of prevailing wage rates and the performance of other requirements on certain "public works" and "maintenance" projects. If the Services are being performed as part of an applicable "public works" or "maintenance" project, as defined by the Prevailing Wage Laws, If the total compensation is $1,000 or more, Consultant agrees to fully comply with and to require its consultants to fully comply with such Prevailing Wage Laws. City shall provide Consultant with a copy of the prevailing rates of per diem wages in effect at the commencement of this Agreement. Consultant shall make copies of the prevailing rates of per diem wages for each craft, classification or type of worker needed to execute the Services available to interested parties upon request, and shall post copies at the Consultant's principal place of business and at the Project site. It shall be mandatory upon the Consultant and all subconsultants to comply with all California Labor Code provisions, which include but are not limited to prevailing wages (Labor Code Sections 1771, 1774 and 1775), employment of apprentices (Labor Code Section 1777.5), certified payroll records (Labor Code Sections 1771.4 and 1776), hours of labor (Labor Code Sections 1813 and 1815) and debarment of contractors and subcontractors (Labor Code Section 1777.1). The requirement to submit certified payroll records directly to the Labor Commissioner under Labor Code section 1771.4 shall not apply to work performed on a public works project that is exempt pursuant to the small project exemption specified in Labor Code Section 1771.4. Consultant shall defend, indemnify and hold the City, its elected officials, officers, employees and agents free and harmless from any claims, liabilities, costs, penalties or interest arising out of any failure or alleged failure of the Consultant or its consultants to comply with the Prevailing Wage Laws.

(a) Registration/DIR Compliance. If the Services are being performed as part of an applicable "public works project" of over $25,000 when the project is for construction, alteration, demolition, installation, or repair work, or a public works project of over $15,000 when the project is for maintenance work, in addition to the foregoing, then pursuant to Labor Code sections 1725.5 and 1771.1, the Consultant and all subconsultants performing such Services must be registered with the Department of Industrial Relations ("DIR"). Consultant shall maintain

registration for the duration of the Project and require the same of any subconsultants. This project may also be subject to compliance monitoring and enforcement by the DIR. It shall be Consultant's sole responsibility to comply with all applicable registration and labor compliance requirements, including the submission of payroll records directly to the DIR. Any stop orders issued by the Department of Industrial Relations against Consultant or any subconsultant that affect Consultant's performance of services, including any delay, shall be Consultant's sole responsibility. Any delay arising out of or resulting from such stop orders shall be considered Consultant caused delay and shall not be compensable by the City. Consultant shall defend, indemnify and hold the City, its officials, officers, employees and agents free and harmless from any claim or liability arising out of stop orders issued by the Department of Industrial Relations against Consultant or any subconsultant.

3.11 Notice to Proceed.

Consultant shall not proceed with performance of any Services under this Agreement unless and until the City provides a written notice to proceed.

3.12 Termination, Suspension and Abandonment.

3.12.1 Grounds for Termination; Consultant's Termination for Cause. City hereby reserves the right to suspend or abandon, at any time and for any reason, all or any portion of the Project and the construction work thereon, or to terminate this Agreement at any time with or without cause. Consultant shall be provided with at least seven (7) days advanced written notice of such suspension, abandonment or termination. In the event of such suspension, abandonment or termination, Consultant shall be paid for Services and reimbursable expenses rendered up to the date of such suspension, abandonment or termination, pursuant to the schedule of payments provided for in this Agreement, less any claims against or damages suffered by City as a result of the default, if any, by Consultant. Consultant hereby expressly waives any and all claims for damages or compensation arising under this Agreement, except as set forth herein, in the event of such suspension, abandonment or termination. Consultant may terminate this Agreement for substantial breach of performance by the City such as failure to make payment to Consultant as provided in this Agreement.

3.12.2 City's Suspension of Work. If Consultant's Services are suspended by City, City may require Consultant to resume such Services within ninety (90) days after written notice from City. When the Project is resumed, the Total Compensation and schedule of Services shall be equitably adjusted upon mutual agreement of the City and Consultant.

3.12.3 Documents and Other Data. Upon suspension, abandonment or termination, Consultant shall provide to City all preliminary studies, sketches, working drawings, specifications, computations, and all other Project Documents, as defined below, to which City would have been entitled at the completion of Consultant's Services under this Agreement. Upon payment of the amount required to be paid to Consultant pursuant to the termination provisions of this Agreement, City shall have the rights, as provided in this Agreement hereinafter, to use such Project Documents prepared by or on behalf of Consultant under this Agreement. Consultant shall make such documents available to City upon request and without additional compensation other than as may be approved as a reimbursable expense.

3.12.4 Employment of other Consultants. In the event this Agreement is terminated in whole or in part as provided herein, City may procure, upon such terms and in such manner as it may determine appropriate, services similar to those terminated.

3.13 Ownership and Use of Documents; Confidentiality.

3.13.1 Ownership. All plans, specifications, original or reproducible transparencies of working drawings and master plans, preliminary sketches, architectural presentation drawings, structural computations, estimates and any other documents prepared pursuant to this Agreement, including, but not limited to, any other works of authorship fixed in any tangible medium of expression such as writings, physical drawings and data magnetically or otherwise recorded on computer diskettes (hereinafter referred to as the "Project Documents") shall be and remain the property of City. Although the official copyright in all Project Documents shall remain with the Consultant or other applicable subcontractors or consultants, the Project Documents shall be the property of City whether or not the work for which they were made is executed or completed. Within thirty (30) calendar days following completion of the Project, Consultant shall provide to City copies of all Project Documents required by City. In addition, Consultant shall retain copies of all Project Documents on file for a minimum of fifteen (15) years following completion of the Project, and shall make copies available to City upon the payment of reasonable duplication costs. Before destroying the Project Documents following this retention period, Consultant shall make a reasonable effort to notify City and provide City with the opportunity to obtain the documents.

3.13.2 Right to Use. Consultant grants to City the right to use and reuse all or part of the Project Documents, at City's sole discretion and with no additional compensation to Consultant, for the following purposes:

(a) The construction of all or part of this Project.

(b) The repair, renovation, modernization, replacement, reconstruction or expansion of this Project at any time;

(c) The construction of another project by or on behalf of the City for its ownership and use;

City is not bound by this Agreement to employ the services of Consultant in the event such documents are used or reused for these purposes. City shall be able to use or reuse the Project Documents for these purposes without risk of liability to the Consultant or third parties with respect to the condition of the Project Documents, and the use or reuse of the Project Documents for these purposes shall not be construed or interpreted to waive or limit City's right to recover for latent defects or for errors or omissions of the Consultant.

Any use or reuse by City of the Project Documents on any project other than this Project without employing the services of Consultant shall be at City's own risk with respect to third parties. If City uses or reuses the Project Documents on any project other than this Project, it shall remove the Consultant's seal from the Project Documents and hold harmless Consultant and its officers, directors, agents and employees from claims arising out of the negligent use or re-use of the Project Documents on such other project.

3.13.3 License. This Agreement creates a non-exclusive and perpetual license for City to copy, use, modify or reuse any and all Project Documents and any intellectual property rights therein. Consultant shall require any and all subcontractors and consultants to agree in writing that City is granted a non-exclusive and perpetual license for the work of such subcontractors or consultants performed pursuant to this Agreement.

3.13.4 Right to License. Consultant represents and warrants that Consultant has the legal right to license any and all copyrights, designs and other intellectual property embodied in the Project Documents that Consultant prepares or causes to be prepared pursuant to this Agreement. Consultant shall indemnify and hold City harmless pursuant to the indemnification provisions of this Agreement for any breach of this Section. Consultant makes no such representation and warranty in regard to previously prepared designs, plans, specifications, studies, drawings, estimates or other documents that were prepared by design professionals other than Consultant and provided to Consultant by City.

3.13.5 Confidentiality. All Project Documents, either created by or provided to Consultant in connection with the performance of this Agreement, shall be held confidential by Consultant to the extent they are not subject to disclosure pursuant to the Public Records Act. All Project Documents shall not, without the written consent of City, be used or reproduced by Consultant for any purposes other than the performance of the Services. Consultant shall not disclose, cause or facilitate the disclosure of the Project Documents to any person or entity not connected with the performance of the Services or the Project. Nothing furnished to Consultant which is otherwise known to Consultant or is generally known, or has become known, to the related industry shall be deemed confidential. Consultant shall not use City's name or insignia, photographs of the Project, or any publicity pertaining to the Services or the Project in any magazine, trade paper, newspaper, television or radio production or other similar medium without the written consent of City.

3.14 Indemnification.

3.14.1 To the fullest extent permitted by law, Consultant shall defend (with counsel of City's choosing), indemnify and hold the City, its officials, officers, employees, volunteers, and agents free and harmless from any and all claims, demands, causes of action, costs, expenses, liability, loss, damage or injury of any kind, in law or equity, to property or persons, including wrongful death, in any manner arising out of, pertaining to, or incident to any acts, errors or omissions, or willful misconduct of Consultant, its officials, officers, employees, subcontractors, consultants or agents in connection with the performance of the Consultant's Services, the Project or this Agreement, including without limitation the payment of all damages, expert witness fees and attorney's fees and other related costs and expenses except such loss or damage caused by the sole negligence or willful misconduct of the City. Consultant's obligation to indemnify shall survive expiration or termination of this Agreement and shall not be restricted to insurance proceeds, if any, received by Consultant, the City, its officials, officers, employees, agents, or volunteers.

3.14.2 If Consultant's obligation to defend, indemnify, and/or hold harmless arises out of Consultant's performance as a "design professional" (as that term is defined under Civil Code section 2782.8), then, and only to the extent required by Civil Code section 2782.8, which is fully incorporated herein, Consultant's indemnification obligation shall be limited to claims that arise out of, pertain to, or relate to the negligence, recklessness, or willful misconduct of the Consultant, and, upon Consultant obtaining a final adjudication by a court of competent jurisdiction, Consultant's liability for such claim, including the cost to defend, shall not exceed the Consultant's proportionate percentage of fault.

3.15 Insurance. Consultant shall not commence work under this Agreement until it has provided evidence satisfactory to the City that it has secured all insurance required under this Section. In addition, Consultant shall not allow any subconsultant to commence work on any

subcontract until it has provided evidence satisfactory to the City that the subconsultant has secured all insurance required under this section.

3.15.1 Types of Insurance Required. As a condition precedent to the effectiveness of this Agreement for work to be performed hereunder, and without limiting the indemnity provisions of the Agreement, Consultant shall, at its expense, procure and maintain in full force and effect for the duration of the Agreement the following policies of insurance. If the existing policies do not meet the insurance requirements set forth herein, Consultant agrees to amend, supplement or endorse the policies to do so.

3.15.2 Additional Insured. The City of Ontario, its officials, officers, employees, agents, and volunteers shall be named as additional insureds on Consultant's and its subconsultants' policies of commercial general liability and automobile liability insurance using the endorsements and forms specified herein or exact equivalents.

3.15.3 Commercial General Liability

(a) The Consultant shall take out and maintain, during the performance of all work under this Agreement, in amounts not less than specified herein, Commercial General Liability Insurance, in a form and with insurance companies acceptable to the City.

(b) Coverage for Commercial General Liability insurance shall be at least as broad as the following: Insurance Services Office Commercial General Liability coverage (Occurrence Form CG 00 01) or exact equivalent. Commercial General Liability Insurance must include coverage for the following:

(i) Bodily Injury and Property Damage

(ii) Personal Injury/Advertising Injury

(iii) Premises/Operations Liability

(iv) Products/Completed Operations Liability

(v) Aggregate Limits that Apply per Project

(vi) Explosion, Collapse and Underground (UCX) exclusion deleted

(vii) Contractual Liability with respect to this Contract

(viii) Broad Form Property Damage

(ix) Independent Consultants Coverage

(c) The policy shall contain no endorsements or provisions limiting coverage for (1) contractual liability; (2) cross liability exclusion for claims or suits by one insured against another; (3) products/completed operations liability; or (4) contain any other exclusion contrary to the Agreement.

(d) The policy shall give City, the City Council and each member of the City Council, its officers, employees, agents and City designated volunteers additional insured status using ISO endorsement forms CG 20 10 10 01 and 20 37 10 01, or endorsements providing the exact same coverage.

(e) The general liability program may utilize either deductibles or provide coverage excess of a self-insured retention, subject to written approval by the City, and provided that such deductibles shall not apply to the City as an additional insured.

3.15.4 Automobile Liability

(a) At all times during the performance of the work under this Agreement, the Consultant shall maintain Automobile Liability Insurance for bodily injury and property damage including coverage for owned, non-owned and hired vehicles, in a form and with insurance companies acceptable to the City.

(b) Coverage for automobile liability insurance shall be at least as broad as Insurance Services Office Form Number CA 00 01 covering automobile liability (Coverage Symbol 1, any auto).

(c) The policy shall give City, the City Council and each member of the City Council, its officers, employees, agents and City designated volunteers additional insured status.

(d) Subject to written approval by the City, the automobile liability program may utilize deductibles, provided that such deductibles shall not apply to the City as an additional insured, but not a self-insured retention.

3.15.5 Workers' Compensation/Employer's Liability

(a) Consultant certifies that he/she is aware of the provisions of Section 3700 of the California Labor Code which requires every employer to be insured against liability for workers' compensation or to undertake self-insurance in accordance with the provisions of that code, and he/she will comply with such provisions before commencing work under this Agreement.

(b) To the extent Consultant has employees at any time during the term of this Agreement, at all times during the performance of the work under this Agreement, the Consultant shall maintain full compensation insurance for all persons employed directly by him/her to carry out the work contemplated under this Agreement, all in accordance with the "Workers' Compensation and Insurance Act," Division IV of the Labor Code of the State of California and any acts amendatory thereof, and Employer's Liability Coverage in amounts indicated herein. Consultant shall require all subconsultants to obtain and maintain, for the period required by this Agreement, workers' compensation coverage of the same type and limits as specified in this Section.

3.15.6 Professional Liability (Errors and Omissions)

(a) At all times during the performance of the work under this Agreement the Consultant shall maintain professional liability or Errors and Omissions insurance appropriate to its profession, in a form and with insurance companies acceptable to the City and

in an amount indicated herein. This insurance shall be written on a policy form coverage specifically designed to protect against acts, errors or omissions of the Consultant. "Covered Professional Services" as designated in the policy must specifically include work performed under this Agreement. The policy must "pay on behalf of" the insured and must include a provision establishing the insurer's duty to defend.

3.15.7 Minimum Policy Limits Required

(a) The following insurance limits are required for the Agreement:

Coverage	Combined Single Limit
Commercial General Liability	$2,000,000 per occurrence/ $4,000,000 aggregate for bodily injury, personal injury, and property damage
Automobile Liability	$2,000,000 per occurrence for bodily injury and property damage
Employer's Liability	$1,000,000 per occurrence
Professional Liability	$2,000,000 per claim and aggregate (errors and omissions)

(b) Defense costs shall be payable in addition to the limits.

(c) Requirements of specific coverage or limits contained in this Section are not intended as a limitation on coverage, limits, or other requirement, or a waiver of any coverage normally provided by any insurance. Any available coverage shall be provided to the parties required to be named as Additional Insured pursuant to this Agreement.

3.15.8 Evidence Required

(a) Prior to execution of the Agreement, the Consultant shall file with the City evidence of insurance from an insurer or insurers certifying to the coverage of all insurance required herein. Such evidence shall include original copies of the ISO CG 00 01 (or insurer's equivalent) signed by the insurer's representative and Certificate of Insurance (Acord Form 25-S or equivalent), together with required endorsements. All evidence of insurance shall be signed by a properly authorized officer, agent, or qualified representative of the insurer and shall certify the names of the insured, any additional insureds, where appropriate, the type and amount of the insurance, the location and operations to which the insurance applies, and the expiration date of such insurance.

3.15.9 Policy Provisions Required

(a) Consultant shall provide the City at least thirty (30) days prior written notice of cancellation of any policy required by this Agreement, except that the Consultant shall provide at least ten (10) days prior written notice of cancellation of any such policy due to non-payment of premium. If any of the required coverage is cancelled or expires during the term of this Agreement, the Consultant shall deliver renewal certificate(s) including the General Liability Additional Insured Endorsement to the City at least ten (10) days prior to the effective date of cancellation or expiration.

(b) The Commercial General Liability Policy and Automobile Policy shall each contain a provision stating that Consultant's policy is primary insurance and that any insurance, deductible, or self-insurance maintained by the City, its officials, officers, employees, agents, or volunteers shall not contribute with this primary insurance. Policies shall contain or be endorsed to contain such provisions.

(c) The retroactive date (if any) of each policy is to be no later than the effective date of this Agreement. Consultant shall maintain such coverage continuously for a period of at least three years after the completion of the work under this Agreement. Consultant shall purchase a one (1) year extended reporting period A) if the retroactive date is advanced past the effective date of this Agreement; B) if the policy is cancelled or not renewed; or C) if the policy is replaced by another claims-made policy with a retroactive date subsequent to the effective date of this Agreement.

(d) All required insurance coverages, except for the professional liability coverage, shall contain or be endorsed to waiver of subrogation in favor of the City, its officials, officers, employees, agents, and volunteers or shall specifically allow Consultant or others providing insurance evidence in compliance with these specifications to waive their right of recovery prior to a loss. Consultant hereby waives its own right of recovery against City, and shall require similar written express waivers and insurance clauses from each of its subconsultants.

(e) The limits set forth herein shall apply separately to each insured against whom claims are made or suits are brought, except with respect to the limits of liability. Further the limits set forth herein shall not be construed to relieve the Consultant from liability in excess of such coverage, nor shall it limit the Consultant's indemnification obligations to the City and shall not preclude the City from taking such other actions available to the City under other provisions of the Agreement or law.

3.15.10 Qualifying Insurers

(a) All policies required shall be issued by acceptable insurance companies, as determined by the City, which satisfy the following minimum requirements: Each such policy shall be from a company or companies with a current A.M. Best's rating of no less than A:VII and admitted to transact in the business of insurance in the State of California, or otherwise allowed to place insurance through surplus line brokers under applicable provisions of the California Insurance Code or any federal law.

3.15.11 Additional Insurance Provisions

(a) The foregoing requirements as to the types and limits of insurance coverage to be maintained by Consultant, and any approval of said insurance by the City, is not intended to and shall not in any manner limit or qualify the liabilities and obligations otherwise assumed by the Consultant pursuant to this Agreement, including but not limited to, the provisions concerning indemnification.

(b) If at any time during the life of the Agreement, any policy of insurance required under this Agreement does not comply with these specifications or is canceled and not replaced, City has the right but not the duty to obtain the insurance it deems necessary and any premium paid by City will be promptly reimbursed by Consultant or City will withhold

amounts sufficient to pay premium from Consultant payments. In the alternative, City may cancel this Agreement.

(c) The City may require the Consultant to provide complete copies of all insurance policies in effect for the duration of the Project.

(d) Neither the City nor the City Council, nor any member of the City Council, nor any of the officials, officers, employees, agents or volunteers shall be personally responsible for any liability arising under or by virtue of this Agreement.

3.15.12 Subconsultant Insurance Requirements

(a) Consultant shall not allow any subcontractors or subconsultants to commence work on any subcontract until they have provided evidence satisfactory to the City that they have secured all insurance required under this Section. Policies of commercial general liability insurance provided by such subcontractors or subconsultants shall be endorsed to name the City as an additional insured using ISO form CG 20 38 04 13 or an endorsement providing the exact same coverage. If requested by Consultant, City may approve different scopes or minimum limits of insurance for particular subcontractors or subconsultants.

3.16 Records.

Consultant shall maintain complete and accurate records with respect to all costs and expenses incurred under this Agreement. All such records shall be clearly identifiable. Consultant shall allow a representative of City during normal business hours to examine, audit, and make transcripts or copies of such records and any other documents created pursuant to this Agreement. Consultant shall allow inspection of all work, data, documents, proceedings, and activities related to the Agreement for a period of five (5) years from the date of final payment under this Agreement.

3.17 Standardized Manufactured Items.

Consultant shall cooperate and consult with City in the use and selection of manufactured items on the Project, including but not limited to, paint, hardware, plumbing, mechanical and electrical equipment, fixtures, roofing materials and floor coverings. All such manufactured items shall be standardized to City's criteria to the extent such criteria do not interfere with building design.

3.18 Limitation of Agreement.

This Agreement is limited to and includes only the work included in the Project described herein. Any additional or subsequent construction at the site of the Project, or at any other City site, will be covered by, and be the subject of, a separate Agreement for engineering services between City and the Consultant chosen therefor by City.

3.19 Mediation.

Disputes arising from this Agreement may be submitted to mediation if mutually agreeable to the Parties hereto. The type and process of mediation to be utilized shall be subject to the mutual agreement of the Parties.

3.20 Successors and Assigns.

This Agreement shall be binding upon and shall inure to the benefit of the successors in interest, executors, administrators and assigns of each Party to this Agreement. However, Consultant shall not assign or transfer by operation of law or otherwise any or all of its rights, burdens, duties or obligations without the prior written consent of City. Any attempted assignment without such consent shall be invalid and void.

3.21 Asbestos Certification.

Consultant shall certify to City, in writing and under penalty of perjury, that to the best of its knowledge, information and belief no asbestos-containing material or other material deemed to be hazardous by the state or federal government was specified as a building material in any construction document that the Consultant prepares for the Project. Consultant shall require all consultants who prepare any other documents for the Project to submit the same written certification. Consultant shall also assist the City in ensuring that contractors provide City with certification, in writing and under penalty of perjury, that to the best of their knowledge, information and belief no material furnished, installed or incorporated into the Project contains asbestos or any other material deemed to be hazardous by the state or federal government. These certifications shall be part of the final Project submittal. Consultant shall include statements in its specifications that materials containing asbestos or any other material deemed to be hazardous by the state or federal government are not to be included.

3.22 No Third Party Rights.

This Agreement shall not create any rights in, or inure to the benefits of, any third party except as expressly provided herein.

3.23 Governing Law.

This Agreement shall be construed in accordance with, and governed by, the laws of the State of California. Venue shall be in San Bernardino County.

3.24 Exhibits and Recitals.

All exhibits and recitals contained herein and attached hereto are material parts of this Agreement and are incorporated as if fully set forth.

3.25 Severability.

Should any provision in the Agreement be held by a court of competent jurisdiction to be invalid, void, or unenforceable, the remaining provisions shall continue in full force and effect.

3.26 Non-Waiver.

None of the provisions of this Agreement shall be considered waived by either Party, unless such waiver is specifically specified in writing.

3.27 Safety.

Consultant shall execute and maintain its work so as to avoid injury or damage to any person or property. In carrying out its Services, the Consultant shall at all times be in compliance with all applicable local, state and federal laws, rules and regulations, and shall exercise all necessary precautions for the safety of its employees, consultant and subcontractors appropriate to the nature of the work and the conditions under which the work is to be performed.

3.28 Harassment Policy.

Consultant shall provide a copy of the City's Harassment Policy to each of its employees assigned to perform the tasks under this Agreement. Consultant shall submit to the City's Personnel Manager a statement signed by each of its employees who are assigned to perform the Services under this Agreement certifying receipt of City's Harassment Policy and certifying that they have read the Harassment Policy. A finding by the City that any of Consultant's employees has harassed a City employee shall be grounds for appropriate discipline, up to and including such employee's removal from performance of this Agreement at City's request.

3.29 Delivery of Notices.

All notices permitted or required under this Agreement shall be given to the respective Parties at the following address, or at such other address as the respective Parties may provide in writing for this purpose:

CITY:
City of Ontario
303 East "B" Street
Ontario, CA 91764
Attn: City Clerk

CONSULTANT:
Richard Brady and Associates
10089 Will Creek Road, Suite 375
San Diego, CA 92131
Attn: Karl Kuebitz

With Copy to:
City of Ontario
1425 S. Bon View Ave.
Ontario, CA 91761
Attn: Omar Gonzalez, PE, Utilities Engineering

Such notice shall be deemed made when personally delivered or when mailed, forty-eight (48) hours after deposit in the U.S. Mail, first class postage prepaid and addressed to the Party at its applicable address. Actual notice shall be deemed adequate notice on the date actual notice occurred, regardless of the method of service.

3.30 Time of Essence.

Time is of the essence for each and every provision of this Agreement.

3.31 City's Right to Employ Other Consultants.

City reserves right to employ other consultants, including designers, in connection with this Project or other projects.

3.32 Prohibited Interests.

3.32.1 Solicitation. Consultant maintains and warrants that it has not employed nor retained any company or person, other than a bona fide employee working solely for Consultant, to solicit or secure this Agreement. Further, Consultant warrants that it has not paid nor has it agreed to pay any company or person, other than a bona fide employee working solely for Consultant, any fee, commission, percentage, brokerage fee, gift or other consideration contingent upon or resulting from the award or making of this Agreement. For breach or violation of this warranty, City shall have the right to rescind this Agreement without liability.

3.32.2 Conflict of Interest. For the term of this Agreement, no director, official, officer or employee of City, during the term of his or her service with City, shall have any direct interest in this Agreement, or obtain any present or anticipated material benefit arising therefrom.

3.33 Equal Opportunity Employment.

Consultant represents that it is an equal opportunity employer and that it shall not discriminate against any employee or applicant for employment because of race, religion, color, national origin, ancestry, sex, age or any other classification protected by federal or state law. Such non-discrimination shall include, but not be limited to, all activities related to initial employment, upgrading, demotion, transfer, recruitment or recruitment advertising, layoff or termination. Consultant shall also comply with all relevant provisions of City's minority business enterprise program, affirmative action plan or other related programs or guidelines currently in effect or hereinafter enacted.

3.34 Labor Certification.

By its signature hereunder, Consultant certifies that it is aware of the provisions of Section 3700 of the California Labor Code which require every employer to be insured against liability for Worker's Compensation or to undertake self-insurance in accordance with the provisions of that Code, and agrees to comply with such provisions before commencing the performance of the Services.

3.35 Subcontracting.

As specified in this Agreement, Consultant shall not subcontract any portion of the Services required by this Agreement, except as expressly stated herein, without prior written approval of City. Subcontracts, if any, shall contain a provision making them subject to each and every provision of this Agreement.

3.36 Supplemental Conditions.

Any supplemental conditions shall be attached as an exhibit to this Agreement, and that exhibit shall be incorporated herein by reference.

3.37 Entire Agreement.

This Agreement, with its exhibits, contains the entire agreement of the Parties hereto, and supersedes any and all other prior or contemporaneous negotiations, understandings and oral or written agreements between the Parties hereto. Each Party acknowledges that no representations, inducements, promises or agreements have been made by any person which are not incorporated herein, and that any other agreements shall be void. Furthermore, any modification of this Agreement shall only be effective if in writing signed by all Parties hereto.

EXHIBIT "A"
SCOPE OF SERVICES

1. GENERAL REQUIREMENTS.

1.1 Basic Services. Consultant agrees to perform all the necessary professional architectural, engineering (e.g. mechanical, electrical, plumbing, structural, site engineering, and any other necessary engineering services mutually agreeable to the Parties) and construction administration services for the Project in a timely and professional manner, consistent with the standards of the profession, including those provided for herein.

1.2 Exclusions from Basic Services. The following services shall be excluded from the basic services listed above: [INSERT IF APPLICABLE] [COMMON EXCLUSIONS: civil engineering, landscape architectural, soils engineering, geotechnical services, hazardous waste or toxic substances engineering or other SERVICES.]

1.3 Additional Services. Consultant shall perform the following Additional Services for the Project: [INSERT SERVICES OR "N/A" IF NOT APPLICABLE]

1.4 Communication with City. Consultant shall participate in consultations and conferences with authorized representatives of City and/or other local, regional, or state agencies concerned with the Project, which may be necessary for the completion of the Project or the development of the drawings, specifications and documents in accordance with the applicable standards and requirements of law and the City. Such consultations and conferences shall continue throughout the planning and construction of the Project and the contractor's warranty period. Consultant shall take direction only from the City's Representative, or any other representative specifically designated by the City for this Project, including any construction manager hired by the City.

1.5 Coordination and Cooperation with Construction Manager. The City may hire a construction manager to administer and coordinate all or any part of the Project on its behalf. If the City does so, it shall provide a copy of its agreement with the construction manager so that the Consultant will be fully aware of the duties and responsibilities of the construction manager. The Consultant shall cooperate with the construction manager and respond to any requests or directives authorized by the City to be made or given by the construction manager. The Consultant shall request clarification from the City in writing if the Consultant should have any questions regarding the authority of the construction manager.

2. INITIAL PLANNING PHASE.

During the initial planning phase of the Project, Consultant shall do all of the following, as well as any incidental services thereto:

2.1 Project Feasibility. Provide advice and assistance to City in determining the feasibility of the Project, analysis of the type and quality of materials and construction to be selected, the site location, and other initial planning matters.

2.2 Meeting Budget and Project Goals. Consultant shall notify City in writing of potential complications, cost overruns, unusual conditions, and general needs that potentially impact the Project budget and time line, including the City's Preliminary Construction Budget. Consultant shall use its best judgment in determining the balance between the size, type and

quality of construction to achieve a satisfactory solution within the Project's budget and construction allowance. It shall be the duty of the Consultant to design the Project within budget. As discussed herein, including in Section 7.3, if the lowest responsive and responsible bid for the Project exceeds the budget by the stated amount, Consultant may be required to make the necessary changes in the drawing and specifications, at its sole cost and expense, to bring the bids within the required budget.

2.3 Permits, Approvals and Authorizations. As indicated in Section 3.5.4 of the Agreement, Consultant shall assist City in securing easements, encroachment permits, rights of way, dedications, infrastructures and road improvements, as well as coordinating with utilities and adjacent property owners.

3. SCHEMATIC PLAN PHASE.

During the schematic plan phase of the Project, Consultant shall do all of the following, as well as any incidental services thereto:

3.1 Funding Documents. Consultant shall provide a site plan and all other Project-related information necessary and required for an application by City to any federal, state, regional, or local agencies for funds to finance the construction Project.

3.2 Schematic Plans. In cooperation with City, Consultant shall prepare preliminary plans and studies, schematic drawings, site utilization plans, and phasing plans showing the scale and relationship of the components of the Project, the plot plan development at the site, and the proposed architectural concept of the buildings ("Schematic Plans"). Consultant shall incorporate the functional requirements of City into the Schematic Plans. The Schematic Plans shall meet all laws, rules and regulations of the State of California. The Schematic Plans shall show all rooms incorporated in each building of the Project in single-line drawings, and shall include all revisions required by City or by any federal, state, regional or local agency having jurisdiction over the Project. All architectural drawings for the Project shall be in a form suitable for reproduction.

3.3 Preliminary Project Budget. Consultant shall use the City's Preliminary Construction Budget and its own expertise and experience with the Project to establish a preliminary project budget or allowance in a format required by City ("Consultant's Preliminary Project Budget"). The purpose of the Consultant's Preliminary Project Budget is to show the probable Project cost in relation to City's Preliminary Construction Budget and the construction standards of any applicable funding agency. If Consultant perceives site considerations which render the Project expensive or cost prohibitive, Consultant shall disclose such conditions in writing to City immediately. As discussed herein, including in Section 7.3, if the lowest responsive and responsible bid for the Project exceeds the budget by more than the stated amount, Consultant may be required to make the necessary changes in the drawings and specifications, at its sole cost and expense, to bring the bids within the required budget Consultant shall provide a preliminary written time schedule for the performance of all construction work on the Project.

3.4 Copies of Schematic Plans and Other Documents. Consultant, at its own expense, shall provide a complete set of the Schematic Plans described herein for City's review and approval. Additionally, at City's expense, Consultant shall provide such documents as may be required by any federal, state, regional or local agencies concerned with the Project. Any additional copies required by City shall be provided at actual cost to City.

4. DESIGN DEVELOPMENT PHASE.

During the design development phase of the Project, Consultant shall do all of the following, as well as any incidental services thereto:

4.1 Design Development Documents. Once City provides Consultant with specific written approval of the Schematic Plans described herein, Consultant shall prepare design development documents consisting of: (1) site and floor plans; (2) elevations; and (3) any other drawings and documents sufficient to fix and describe the types and makeup of materials, as well as the size and character of the Project's structural, mechanical and electrical systems, and to outline the Project specifications ("Design Development Documents"). The Design Development Documents shall be prepared in sufficient form to present to the City Council for approval.

4.2 Copies of Design Development and Other Documents. Consultant, at its own expense, shall provide a complete set of the Design Development Documents described herein for City's review and approval. Additionally, at City's expense, Consultant shall provide such documents as may be required by any federal, state, regional or local agencies concerned with the Project. Any additional copies required by City shall be provided at actual cost to City.

4.3 Updated Project Budget. Consultant shall use its Preliminary Project Budget and expertise and experience with the Project to establish an updated estimate of probable construction costs, containing detail consistent with the Design Development Documents as set forth herein and containing a breakdown based on types of materials and specifications identified herein ("Consultant's Updated Project Budget").

4.4 Timetable. Consultant shall provide a written timetable for full and adequate completion of the Project to City.

4.5 Application for Approvals. Consultant shall assist City in applying for and obtaining required approvals from all federal, state, regional or local agencies concerned with the Project. Consultant shall furnish and process all architectural and engineering information required to prepare and process applications to applicable utilities in order to secure priorities and materials, to aid in the construction of the Project and to obtain final Project approval and acceptance by any of the above agencies as may be required.

4.6 Color and Other Aesthetic Issues. Consultant shall provide, for City's review and approval, a preliminary schedule of all color materials and selections of textures, finishes and other matters involving an aesthetic decision about the Project.

5. FINAL WORKING DRAWINGS AND SPECIFICATIONS.

During the final working drawings and specifications phase of the Project, Consultant shall do all of the following, as well as any incidental services thereto:

5.1 Final Working Drawings and Specifications. Once City provides Consultant with specific written approval of the Design Development Documents described herein, Consultant shall prepare such complete working drawings and specifications as are necessary for developing complete bids and for properly executing the Project work in an efficient and thorough manner ("Final Working Drawings and Specifications"). Such Final Working Drawings and Specifications shall be developed from the Schematic Plans and Design Development Documents approved by City. The Final Working Drawings and Specifications shall set forth in

detail all of the following: (1) the Project construction work to be done; (2) the materials, workmanship, finishes, and equipment required for the architectural, structural, mechanical, and electrical systems; and (3) the utility service connection equipment and site work. As indicated in Section 3.9.2 of the Agreement, City may be requested to supply Consultant with the necessary information to determine the proper location of all improvements on and off site, including record drawings ("as-built drawings") in City's possession. Consultant will make a good-faith effort to verify the accuracy of such information by means of a thorough interior and exterior visual survey of site conditions. City shall also make a good-faith effort to verify the accuracy of the as-built drawings and provide any supplemental information to Consultant which may not be shown on the as-built drawings.

5.2 Form. The Final Working Drawings and Specifications must be in such form as will enable Consultant and City to secure the required permits and approvals from all federal, state, regional or local agencies concerned with the Project. In addition, the Final Working Drawings and Specifications must be in such form as will enable City to obtain, by competitive bidding, a responsible and responsive bid within the applicable budgetary limitations and cost standards. The Final Working Drawings and Specifications shall be clear and legible so that uniform copies may be on standard architectural size paper, properly indexed and numbered, and shall be capable of being clearly copied and assembled in a professional manner by Consultant.

5.3 Approval and Revisions. City shall review, study, and check the Final Working Drawings and Specifications presented to it by Consultant, and request any necessary revisions or obtain any necessary approvals by the City Council, subject to the approval of all federal, state, regional or local agencies concerned with the Project. Consultant shall make all City-requested changes, additions, deletions, and corrections in the Final Working Drawings and Specifications at no additional cost, so long as they are not in conflict with the requirements of public agencies having jurisdiction or prior approval, or inconsistent with earlier City direction or Consultant's professional judgment. Consultant shall bring any such conflicts and/or inconsistencies to the attention of City. The Parties agree that Consultant, and not the City, possesses the requisite expertise to determine the constructability of the Final Working Drawings and Specifications. However, the City reserves the right to conduct one or more constructability review processes with the Final Working Drawings and Specifications, and to hire an independent architect or other consultant to perform such reviews. Any such independent constructability review shall be at City's expense. Consultant shall make all City-requested changes, additions, deletions, and corrections in the Final Working Drawings and Specifications which may result from any constructability review, at no additional cost to the City, so long as they are not in conflict with the requirements of public agencies having jurisdiction or prior approval, or inconsistent with earlier City direction or Consultant's professional judgment. If such changes, additions, deletions or corrections are inconsistent with prior City direction, Consultant shall make such alterations and be compensated therefore pursuant to the Additional Services provision of this Agreement.

5.4 Costs of Construction. It is understood by Consultant that should the Final Working Drawings and Specifications be ordered by City, City shall specify the sum of money set aside to cover the total cost of construction of the work, exclusive of Consultant's fees. Should it become evident that the total construction cost will exceed the specified sum, Consultant shall at once present a statement in writing to the City's Representative setting forth this fact and giving a full statement of the cost estimates on which the conclusion is based.

5.5 Copies of Final Working Drawings and Specifications and Other Documents. Consultant, at its own expense, shall provide a complete set of the Final Working Drawings and Specifications described herein for City's review and approval. Additionally, at City's expense,

Consultant shall provide such documents as may be required by any federal, state, regional or local agencies concerned with the Project. Any additional copies required by City shall be provided at actual cost to City.

6. CONSTRUCTION CONTRACT DOCUMENTS.

During the construction contract documents phase of the Project, Consultant shall do all of the following, as well as any incidental services thereto:

6.1 Bid and Contract Documents. If so required by City, Consultant shall assist City in the completion of all bid and construction documents, including but not limited to, the Notice Inviting Bids, Instructions to Bidders, Contract Bid Forms (including Alternate Bids as requested by City), `Contract, General Conditions, Supplementary General Conditions, Special Conditions, DVBE and other applicable affirmative action documents, Performance Bond, Payment Bond, Escrow Agreement for Security Deposits, and any other certifications and documents required by federal, state and local laws, rules and regulations which may be reasonably required in order to obtain bids responsive to the specifications and drawings. All such documents shall be subject to the approval of City and City's legal counsel.

6.2 Final Estimate. At the time of delivery of these bid and construction documents, which shall include the Final Working Drawings and Specifications (collectively referred to herein as the "Construction Documents"), Consultant shall provide City with its final estimate of probable construction cost ("Consultant's Final Estimate"). As discussed herein, including in Section 7.3, it shall be the Consultant's duty to design the Project within budget.

7. BID PHASE.

During the bid phase of the Project, Consultant shall do all of the following, as well as any incidental services thereto:

7.1 Reproducible Construction Documents. Once City provides Consultant with specific written approval of the Construction Documents and Consultant's Final Estimate, Consultant shall provide to City one set of reproducible Construction Documents.

7.2 Distribution of Contract Documents and Review of Bids. Consultant shall assist City in distributing the Construction Documents to bidders and conducting the opening and review of bids for the Project.

7.3 Over Budget. If the apparent lowest responsive and responsible bid on the Project exceeds the Consultant's Final Estimate by more than five percent (5%), City may request Consultant to amend, at Consultant's sole cost and expense, the Final Drawings and Specifications in order to rebid the Project and receive a lowest responsive and responsible bid equal to or less than the Consultant's Final Estimate. All revisions necessary to bring the lowest responsible and responsive bid within the Consultant's Final Estimate, including any omissions, deferrals or alternates, shall be made in consultation with, and subject to the approval of, the City.

8. CONSTRUCTION PHASE.

During the construction phase of the Project, Consultant shall do all of the following, as well as any incidental services thereto:

8.1 Observation. The Project Consultant shall observe work executed from the Final Working Drawings and Specifications in person, provided that City may, in its discretion, consent to such observation by another competent representative of Consultant.

8.2 General Administration. Consultant shall provide general administration of the Construction Documents and the work performed by the contractors.

8.3 Pre-Construction Meeting. Consultant shall conduct one or more pre-construction meetings, as the City determines is needed for the Project, with all interested Parties.

8.4 Site Visits of Contractor's Work. Consultant shall conduct site visits to observe each contractors' work for general conformance with the Construction Documents and with any approved construction schedules or milestones. Such site visits shall be conducted as often as are necessary and appropriate to the stage of construction, according to the City's sole discretion, but in no event less than weekly.

8.5 Site Visits of Inspector's Work. Consultant shall conduct site visits to communicate and observe the activities of the City inspectors. Such site visits shall be conducted as often as is mutually acceptable to Consultant and City. Consultant shall direct the City inspectors and the Project contractors to coordinate the preparation of record drawings indicating dimensions and location of all "as-built" conditions, including but not limited to, underground utility lines.

8.6 Coordination of Subconsultants. Consultant shall cause all architects, engineers and other consultants, as may be hired by Consultant or City, to observe the work completed under their disciplines as required, and approve and review all test results for general conformance with the Construction Documents.

8.7 Reports. Consultant shall make regular reports as may be required by applicable federal, state or local laws, rules or regulations, as well as the federal, state, regional or local agencies concerned with the Project.

8.8 Construction Meetings; Minutes. Consultant shall attend all construction meetings and provide written reports/minutes to the City after each construction meeting in order to keep City informed of the progress of the work. Such meetings shall occur at a frequency necessary for the progress of the Project work, according to the City's sole discretion, but no less than weekly.

8.9 Written Reports. Consultant shall make written reports to City as necessary to inform City of problems arising during construction, changes contemplated as a result of each such problems, and progress of the Project work.

8.10 Written Records. Consultant shall keep accurate written records of the progress and quality of the Project work and the time schedules, and shall advise the contractors and City of any deviations from the time schedule which could delay timely completion of the Project.

8.11 Material and Test Reports. Consultant shall check and process, in a timely manner, all required material and test reports for the Project work. In addition, Consultant shall provide notice of any deficiencies in material or work reflected in such reports, as well as its recommendation for correction of such deficiencies, to the contractors and City.

8.12 Review and Response to Submissions. Consultant shall review and respond, in a timely manner, to all schedules, submittals, shop drawings, samples, information requests, change requests, and other submissions of the contractor and subcontractors for compliance with, or alterations and additions to, the Construction Documents. Consultant's review and response shall be done in such a manner so as to ensure the timely and uninterrupted progress of the Project work.

8.13 Rejection of Work. Consultant shall promptly reject, as discussed with City, work or materials which do not conform to the Construction Documents. Consultant shall immediately notify the City and contractor(s) of such rejections. Consultant shall also have the authority to recommend to the City that additional inspection or testing of the work be performed, whether or not such work is fabricated, installed or completed.

8.14 Substitutions. Consultant shall consult with City, in a timely manner, with regard to substitution of materials, equipment and laboratory reports thereof, prior to the City's final written approval of such substitutions. Consultant's consultation shall be done in such a manner so as to ensure the timely and uninterrupted progress of the Project work.

8.15 Revised Documents and Drawings. Consultant shall prepare, at no additional expense to City, all documents and/or drawings made necessary by errors and omissions in the originally approved Construction Documents.

8.16 Change Requests and Material Changes. Consultant shall evaluate and advise City, in a timely manner and in writing, of any change requests and material change(s) which may be requested or necessary in the Project plans and specifications. Consultant shall provide the City with its opinion as to whether such change requests should be approved, denied or revised. If the City has not hired a construction manager or other person to do so, the Consultant shall prepare and execute all change orders and submit them to the City for authorization. If the City has designated a construction manager or other person to prepare all change orders, the Consultant shall review all change orders prepared by such person, execute them and deliver them to the City for authorization if they meet with the Consultant's approval, or submit them to the City with recommendations for revision or denial if necessary. Consultant shall not order contractors to make any changes affecting the contract price without approval by City of such a written change order, pursuant to the terms of the Construction Documents. Consultant may order, on its own responsibility and pending City Council approval, changes necessary to meet construction emergencies, if written approval of City's Representative is first secured.

8.17 Applications for Payment. Consultant shall examine, verify and approve contractor's applications for payment, and shall issue certificates for payment in amounts approved by the City's inspector.

8.18 Final Color and Product Selection. Consultant shall coordinate final color and product selection with City's original design concept.

8.19 Substantial Completion. Consultant shall determine the date of substantial completion, in consultation with the City.

8.20 Punch List. After determining that the Project is substantially complete, Consultant shall participate in the inspection of the Project and shall review all remaining deficiencies and minor items needed to be corrected or completed on the Project, including those identified on the punch list prepared by the contractor ("Punch List Items"). Consultant shall notify

contractor in writing that all Punch List Items must be corrected prior to final acceptance of the Project and final payment. Consultant shall also notify City of all Punch List Items.

8.21 Warranties. Consultant shall review materials assembled by the contractor and subcontractors with regard to all written warranties, guarantees, owners' manuals, instruction books, diagrams, record "as built" drawings, and any other materials required from the contractors and subcontractors pursuant to the Construction Documents. Consultant shall coordinate and provide these materials to the City.

8.22 Certificate of Completion. Consultant shall participate in any further inspections of the Project necessary to issue Consultant's Certificate of Completion and final certificate for payment.

8.23 Documents for Project Close-Out. Consultant shall cause all other architects, engineers and other consultants, as may be hired by Consultant, to file any and all required documentation with the City or other governmental authorities necessary to close out the Project. Consultant shall assist the City in obtaining such documentation from all other architects, engineers, or other consultants.

9. AS-BUILT DRAWINGS.

During the as-built drawings phase of the Project, Consultant shall do all of the following, as well as any incidental services thereto:

9.1 As-Built Drawings and Specifications. Not later than thirty (30) days after substantial completion of the Project, before receipt of final payment, Consultant shall review and forward the Final Working Drawings and Specifications, indicating on them all changes made by change orders or otherwise pursuant to the Construction Documents, as well as all information called for on the specifications, thus producing an "as-built" set of Final Working Drawings and Specifications ("As-Built Drawings and Specifications"). The As-Built Drawings and Specifications shall show, among other things, the location of all concealed pipe, buried conduit runs and other similar elements within the completed Project. Consultant shall personally review and certify that the As-Built Drawings and Specifications are a correct representation of the information supplied to Consultant by any inspectors and the contractor, and shall obtain certifications from any inspectors and the contractor that the drawings are correct.

9.2 Approval. Once City provides Consultant with specific written approval of the As-Built Drawings and Specifications, Consultant shall forward to City the complete set of original As-Built Drawings and Specifications or a complete set of reproducible duplicate As-Built Drawings and Specifications. The tracing shall be of such quality that clear and legible prints may be made without appreciable and objectionable loss of detail.

9.3 Documents for Final Payment. Prior to the receipt of Consultant's final payment, Consultant shall forward to City all of the following: (1) one clear and legible set of reproductions of the computations; (2) the original copy of the specifications; (3) the As-Built Drawings and Specifications as required herein; and (4) Consultant's Certificate of Completion.

10. WARRANTY PERIOD.

During the warranty period phase of the Project, Consultant shall do all of the following, as well as any incidental services thereto:

10.1 Advice. Consultant shall provide advice to City on apparent deficiencies in the Project during any applicable warranty periods for the Project.

Proposal for UT 1074 - Reservoir 925-1A and Transmission Main Improvements

City of Ontario
303 East "B" Street
Ontario, CA 91764-4196

BRADY
Water • Power • Transportation

1. EXECUTIVE SUMMARY

July 13, 2023

City of Ontario, Purchasing Division
Attention: Omar Gonzales
Ref: UT 1074 – Reservoir 925-1A and Transmission Main Improvements
303 East "B" Street
Ontario, CA 91764-4196

SUBJECT: Proposal for Reservoir 925-1A and Transmission Main Improvements

Richard Brady & Associates, Inc. (BRADY) appreciates the opportunity to submit this proposal for Engineering Design Services for Reservoir 925-1A and Transmission Main Improvements. We have carefully studied the RFP and all its supporting documents. To meet and exceed your expectations for every scope item, we have developed a clear plan and assembled an elite team. This proposal will demonstrate that BRADY and our assembled team are particularly qualified and uniquely experienced to perform the design of a new Reservoir 925-1A and Transmission Main Improvements.

Specifically:

- Presently, the City of Upland is completing a BRADY-designed 7.5 million gallon (MG) reservoir replacement project, ***6 miles from the proposed 925-1A Reservoir site***. This is a very similar project and is being executed professionally and within budget. We hope you reach out to Bob Critchfield at the City of Upland for a reference from your neighbor.
- Personally, I am the engineer of record of over 80 prestressed concrete reservoirs, including the world's largest reservoir at 44 million gallons. I personally specified the prestressing schedule for the City's Milliken 1010-2B reservoir in 2007 as I was an associate engineer at DYK (now DN Tanks).
- Our pipeline manager, Jud Warren has 40 years of experience with complicated large-diameter pipeline alignments. He will personally oversee the pipeline design. Our pipeline design partner TKE has ***tens of thousands*** of feet of large diameter pipeline design ***minutes*** from the proposed alignment.
- Our environmental partner, RINCON, has specific experience with CEQA compliance and filing a Notice of Exemption based on the City's existing IS-MND. RINCON also has experience with burrowing owl and Delhi Sands flower loving fly.
- BRADY's mission is to implement the reliable integration of the new 925-1A Reservoir to 925, 1010, and 1074 pressure zones with connections for a future reservoir and ion exchange facility, while meeting all regulatory requirements and stakeholder satisfaction.
- The Design Team has worked with and knows ***every*** agency this Project will encounter.

On a personal note, in 2015 I was living in the Middle East. I had been there continuously for the past six years working on design-build projects involving concrete tanks. During those six years I led teams of designers and contractors in building 41 tanks in multiple contracts worth over $200 million. At that time, I was presented an opportunity to design and construct the largest prestressed tanks in the world for a new, fast-track desalination plant. I led a team to ***design and build*** four, 44 million gallon reservoirs, in 18 months. The yard piping for the plant was all 1.6-meter and 2.1-meter diameter pipe. This project could only be accomplished by having a clear vision and sharing that vision with the team. We, as a team, executed this project on time; all four reservoirs were commissioned with the plant, and all were bottle-tight. I was proud that I signed the contract for the reservoirs, stayed the full duration of the project, and signed the as-built drawings. The evidence of this success was seen when 3.4 million spectators came to the FIFA World Cup 2022 and nearly every drop of that water went through those reservoirs.

We know that a truly successful project doesn't just happen by chance; it is a direct result of the people involved in managing and performing the work, the skills they bring to the table, and their abilities to forge trusting relationships with everyone involved. We are confident the City will appreciate our approach to getting things done. If we may be of any further service or answer any questions, please do not hesitate to contact me.

Sincerely,

Karl C. Kuebitz

3. IDENTIFICATION OF PROPOSER

BRADY is a Southern California based multi-disciplinary engineering, construction management, and construction firm. BRADY serves public agencies, the federal government, utilities, and the private sector with a locally-based team of engineers, CADD designers, environmental scientists, construction managers and support staff. Our team consists of 40 people who focus on water, sewer, and recycled water engineering; structural engineering; water quality and treatment services; electrical, instrumentation, and control services; and construction management and inspection services. BRADY is fully committed to successfully serving our clients, as demonstrated through our many award-winning projects in Southern California. While our business has expanded over the years, our mission has remained the same: provide our clients with the highest level of customer service in the industry by performing beyond; beyond the norm, beyond client expectations, and beyond industry standards. Our projects have included every feature of large scale, municipal water treatment, pumping and storage. They have been completed in partnership with a diverse range of public interest organizations, regulatory agencies, corporate stakeholders, and active local community interest groups. Our project areas have included a variety of environments, from coastal communities to rural north county and the remote desert. Through our vast experience in engineering and building water infrastructure, we take pride in producing high quality water facilities that provide a safe and reliable source of water to our clients.

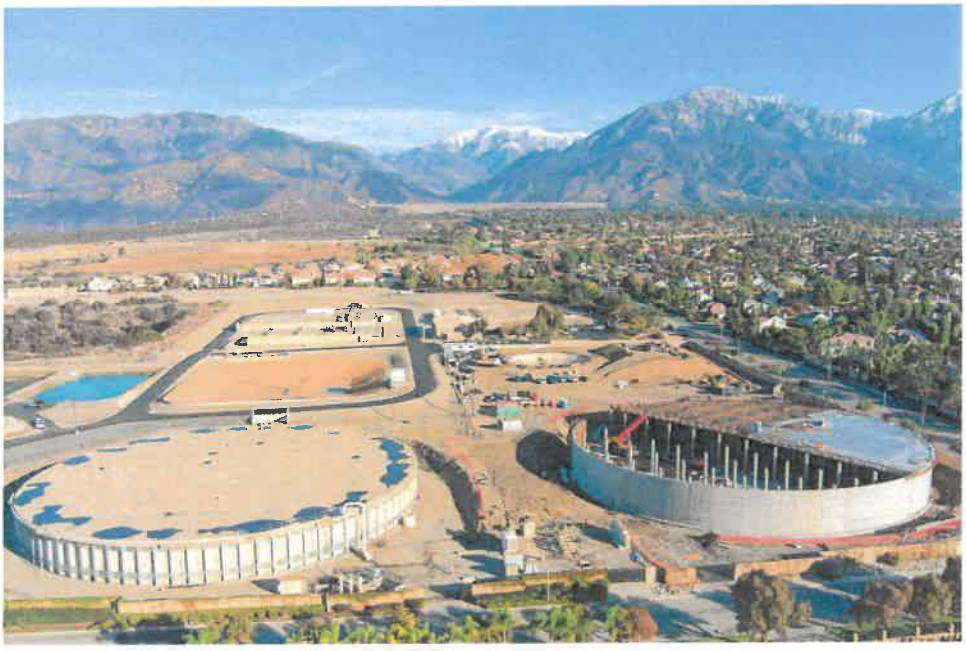

Figure 1: City of Upland, 17th Street and North Benson Ave, looking north. The reservoir on the left remains in service while the new reservoir is constructed (right). Assessed, designed, and construction management by BRADY.

LEGAL NAME & ADDRESS OF COMPANY

Richard Brady & Associates, Inc.

10089 Willow Creek Rd. Suite 375
San Diego, CA 92131

LEGAL FORM OF COMPANY

C Corporation

IDENTIFICATION OF PARENT COMPANY

Richard Brady and Associates, Inc., a California corporation, is 100% owned by JMH Water Intermediate, Inc., a Delaware corporation ("JMHWI"). JMHWI is 100% owned by JMH Water Partners, Inc., a Delaware limited liability company ("JMHWP").

NUMBER OF EMPLOYEES

75 Employees

NUMBER OF YEARS IN BUSINESS

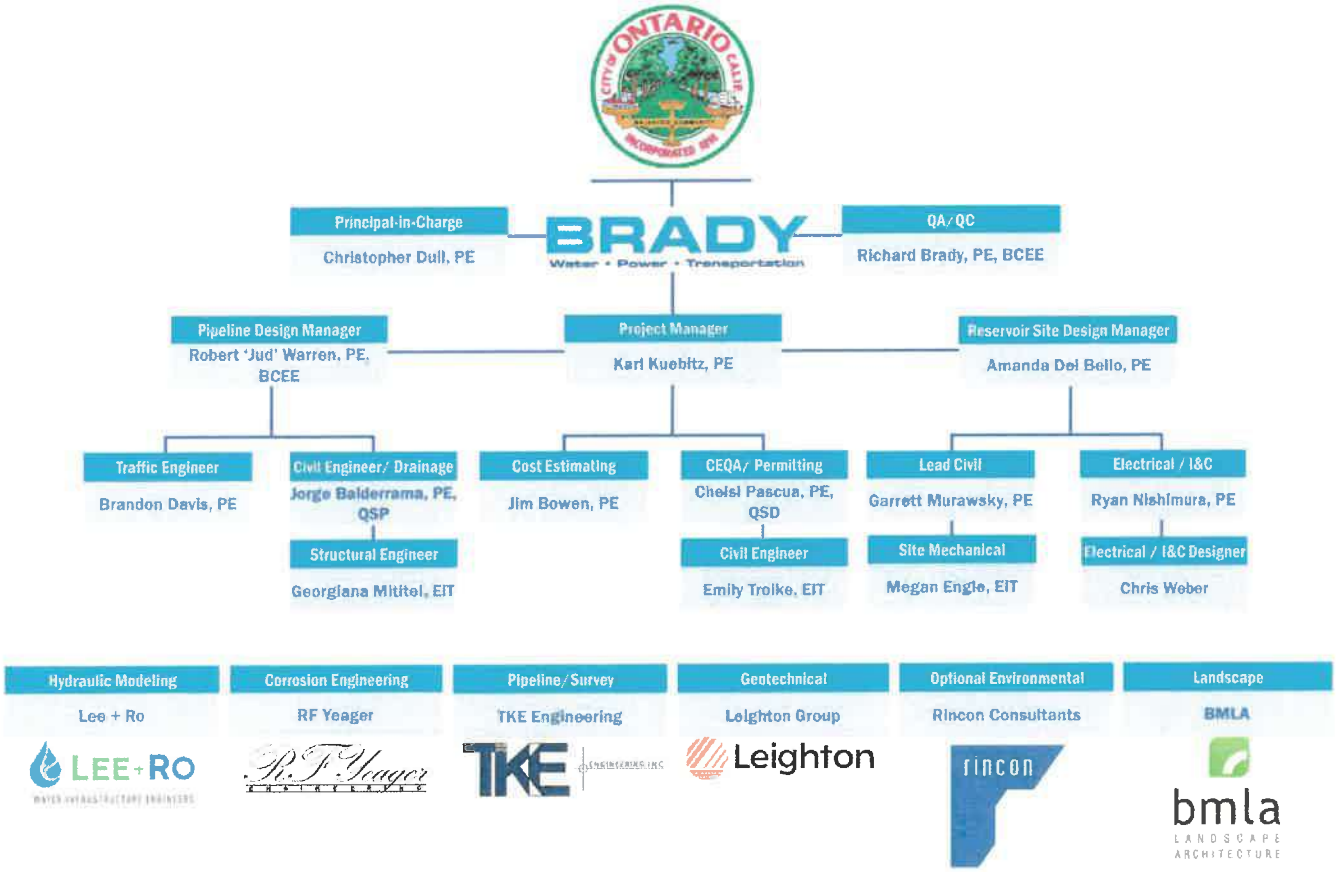
24 Years. Richard Brady & Associates, Inc was established in 1999.

CONTACT

Karl Kuebitz, Vice President, Engineering Manager
P: 619.733.1811
E: kkuebitz@rbrady.net

CONTRACT AUTHORIZATION

If selected, Karl Kuebitz will sign the Contract and will be the point of contact for this Project.



CITY OF ONTARIO BUSINESS LICENSE NUMBER

12439623

4. STAFFING RESOURCES

Meet the team! Below please note the fifteen staff, their names, discipline and titles that will be assigned to perform the services outlined in this RFP. BRADY has additional civil, structural, and electrical engineers, should additional or replacement staff be needed.

Project Organization Chart

As seen in the org chart, the three key persons responsible for working with the City on this project will be Karl, Jud, and Amanda. Karl will be the main point of contact and project manager for this project. Karl spent 18 years as a contractor running design-build reservoir projects including the largest prestressed reservoir project in the world. Karl has a passion for leadership within the water infrastructure sector having presented papers at ACI and AWWA. Jud brings 40 years of pipeline experience to this project, as well as experience as a program manager. Jud has worked on hundreds of pipeline design projects up to 120-inches in diameter. Amanda manages key projects for BRADY including several new tank, assessment, and retrofit projects. Amanda is a licensed commercial diver who has assessed tanks from the inside underwater as well as the outside. She has managed several reservoir and utility projects.

Karl Kuebitz, PE – Project Manager

Professional Summary

Karl is a civil and structural engineer with over 23 years of professional experience. He specializes in infrastructure improvements in the municipal and utility markets, including water and pipeline structures, large water storage structures, and utility and control integration for water treatment and handling projects. He is the engineer of record of over 80 water-retaining structures. Karl is actively involved with ACI and is a voting member of the ACI 350 committee for environmental structures. Karl spent 9 years designing and constructing 45 prestressed concrete tanks and associated structures in the Middle East, including the largest externally prestressed concrete tanks in the world at 44 million gallons. Karl brings a wealth of knowledge and experience to structures for water-related projects.

YEARS EXPERIENCE
23 Years

EDUCATION
MS in Structural Engineering. University of California San Diego, La Jolla, CA

LICENSES / CERTIFICATIONS
Professional Civil Engineer in CA (67975, June 2025), NV, HI, and UT.

PROFESSIONAL AFFILIATIONS
American Society of Civil Engineers (ASCE)

Voting Member of ACI 350, Environmental Engineering Concrete Structures and Commentary

Voting Member of ACI 372, Guide to Design and Construction of Circular Wire- and Strand-Wrapped Prestressed Concrete Structures.

Associate Member of ACI 376, Code Requirements for Design and Construction of Concrete Structures for the Containment of Refrigerated Liquefied Gases and Commentary

Project Experience

INDEPENDENT WATER POWER PLANT, UMM AL HOUL, QATAR

Designed 168 million gallons of water storage with associated appurtenances. Four 44MG tanks were designed and constructed to the AWWA D110 Standard and other international specifications. This was part of a 2400 MW power and desalination plant. The tanks were commissioned 15 months after the start of construction. These tanks are designed for extreme environmental and functional requirements and optimized for cost and construction efficiency.

8.0 MG ARGO DRAIN TANK, LOS ANGELES, CA

The Argo Drain Sub-Basin Facility is located on the Los Angeles World Airports property and accommodates a watershed area of approximately 2,200 acres. The Argo Drainage Channel transports storm water via gravity to a diversion structure and the flow is treated and pumped into underground infiltration galleries to recharge the groundwater basin. The Facility improves water quality in Santa Monica Bay and nearby beaches. The 8MG tank employed a gravel bottom to permit the infiltration. Columns with individual spread footings supported a slab capable of HS-20 loading and native landscaping.

10 MG SKY MOUNTAIN RESERVOIR, COACHELLA VALLEY WATER DISTRICT, THOUSAND PALMS, CA

Karl managed the design and construction of this reservoir which is less than one mile from the San Andreas Fault. This tank features uplift cables to resist seismic sloshing and employs a robust anchored-flexible connection at the wall base to resist a base shear of 24,700 kips. The final shotcrete material on the exterior surface used and integral mineral-based color for maintenance-free service.

2.5 MG AND 3.5 MG FLOW EQUALIZATION TANKS, OCWD, HUNTINGTON BEACH, CA

Designed two flow equalization tanks 2.5MG and 3.5MG per AWWA D110. These tanks are designed on the Santa Ana flood plain in an area susceptible to liquefaction and lateral spreading. The structure was carefully designed for multiple catastrophic loading conditions to ensure that it was available during an emergency situation. The base slab spanned multiple deep soil cement mixing elements. The structure was designed for lateral tilting distortion while maintaining an anchored-flexible base connection similar to base-isolation.

WEST BASIN MUNICIPAL WATER DISTRICT, EL SEGUNDO, CA

Designed an elevated concrete roof slab which supports five vertical turbine pumps each weighing 6000 lbs. Slab design included vehicle and mechanical loading and an eccentric vibration analysis. The column-supported slab spanned 150 feet over an irregular water storage facility. Multiple utility and control lines were integrated into the structure to control the pumps. Solar panels and associated connections were incorporated into the structure.

Robert 'Jud' Warren, PE, BCEE – Pipeline Design Manager

Professional Summary

Mr. Warren has over 40 years of experience in planning, engineering, and construction of water and wastewater facilities, including new facilities and projects that require the use of trenchless technologies such as sliplining, microtunneling, and jack and bore. He has extensive wastewater systems experience, including headworks, liquid stream, activated sludge, solids processing and handling, odor control, and effluent reclamation and reuse, as well as design for sewer pipelines, pump stations, and septic conversion. Mr. Warren has designed new facilities and expansions of plants for water treatment including conventional treatment, membrane, reverse osmosis, desalination, UV disinfection, and groundwater treatment. He has also planned and designed water conveyance projects involving operations, energy, and condition assessments for plants, pipelines, and relining. Additionally, he has served in many roles in projects as Principal-In-Charge and Quality Assurance/Quality Control. As Principal-In-Charge, Mr. Warren has been responsible for overseeing all factors for delivery of a project. Mr. Warren has received national recognition from the American Academy of Environmental Engineers for an innovative repair of a 102-inch diameter sanitary sewer in San Diego, California and from ASCE for the Alvarado Water Treatment Plant Expansion.

YEARS EXPERIENCE
42 Years

EDUCATION
BS Civil Engineering, University of Houston, TX
1978

LICENSES / CERTIFICATIONS
Professional Civil Engineer in CA (43272, June 2025).

PROFESSIONAL AFFILIATIONS
Professional Engineer, California, No. C43272, Arizona, No. 20032

Certified Construction Documents Technician, Construction Specifications Institute (CSI)

Board Certified Environmental Engineer, American Academy of Environmental Engineers (AAEE)

Project Experience

PROJECT MANAGER, RESERVOIR DESIGN AND CONSTRUCTION, SAN DIEGO, CA., CITY OF SAN DIEGO

Mr. Warren provided construction phase services for two 21 MG reservoirs for the Alvarado water treatment plant. The pre-stressed concrete reservoirs were an integral part of the city's water delivery system. Internal baffling was constructed to help achieve regulatory disinfections requirements (CT). Approximately 1,000 feet of 72- and 96-inch cement mortar-lined and coated welded-steel water pipeline were also constructed as part of this project. He evaluated, recommended, and oversaw final disposition of all claims during construction by the contractor.

PROJECT PRINCIPAL, EARL THOMAS RESERVOIR REPLACEMENT CONSTRUCTION, SAN DIEGO, CA, CITY OF SAN DIEGO

As project principal, Mr. Warren managed the construction phase services for the replacement of the 50 MG Earl Thomas reservoir for the Alvarado Water Treatment Plant. The pre-stressed concrete reservoir features a roof designed for vehicle traffic.

PROJECT MANAGER, UNIVERSITY AVENUE PIPELINE REPLACEMENT, SAN DIEGO, CA, CITY OF SAN DIEGO

Project manager and engineer of record responsible for the final design services for this pipeline replacement project. The project includes removal of approximately three miles of pipe and replacement with 24-inch diameter pipe in a very congested neighborhood and streets in San Diego. CalTrans permitting was required for the tunneling crossings of HWY 163.

PROJECT MANAGER, LETTERMAN PUMP STATION & PIPELINE, PERRIS, CA, EASTERN MUNICIPAL WATER DISTRICT

Mr. Warren served as project manager during the construction phase for the Letterman booster station in Perris. The new pump station was constructed in a neighborhood requiring reduction of noise. The station included back-up power generation and included 1,000 linear feet of 36-inch diameter CMLC steel pipe connection to the existing distribution system.

ASSISTANT PROJECT MANAGER, ALVARADO WATER TREATMENT PLANT, SAN DIEGO, CA, CITY OF SAN DIEGO

Mr. Warren served as assistant project manager and was responsible for the design and served as project manager for construction administration services for the early operation improvements. He evaluated, recommended, and administered final disposition of all claims during construction by the contractor. The project included construction of new polymer and caustic chemical feed and storage facilities, replacement of sludge pumping facilities, and improvements to the filter backwash system.

Amanda Del Bello, PE – Reservoir Site Design Manager

YEARS EXPERIENCE
15 Years

EDUCATION
MS Civil Engineering, San Diego State University, CA

LICENSES / CERTIFICATIONS
Professional Civil Engineer, California, No. C78825

Association of Diving Contractors International SSA Supervisor

NHI Safety Inspection of In-Service Bridges Certification (FHWA-NHI 130055)

NHI Underwater Bridge Inspection Certification (FHWA-NHI 130091)

USCG Merchant Mariner 100 Gross Ton Master

OSHA 30-hour

EM385 1-1 40-hour

Professional Summary

Ms. Del Bello has over 15 years of experience in the engineering field with an emphasis in structural and civil engineering. As Project Manager she plays a key role in the inspection, design, project deliverables, and construction services for marine structures, bridges, utility vaults, reservoirs and other infrastructure. As a team leader and commercial diving supervisor, she has successfully conducted and managed underwater and above water inspections, follow-on design services, and construction support for a variety of clients. She has participated in design for new structures and design of repairs for numerous facilities including piers, wharves, seawalls, bridges, marinas, retaining walls, reservoirs, and utility vaults. Ms. Del Bello is a commercially trained ADCI Surface-Supplied Air Diving Supervisor and is PADI SCUBA certified. Experience includes inspection and rehabilitation design of engineering structures for the U.S. Naval Facilities Engineering Command (NAVFAC –Southeast, Southwest, Marianas, and Pacific), and Engineering Service Centers; San Diego Unified Port District; Port of Los Angeles; Port of Long Beach; various Water Districts, other government agencies; and private institutions..

Project Experience

PROJECT MANAGER, HB 5 MG RESERVOIR REHABILITATION, VISTA IRRIGATION DISTRICT, CA

Project Manager responsible for inspection, condition assessment, design of repairs, and construction support for this prestressed concrete above ground reservoir and yard piping. This effort led to design for replacing the concrete dome with an aluminum dome, seismic upgrades and yard piping replacement including new 18-in. inlet/outlet piping, electrical controls and conduits, and new underground vault with associated piping. Amanda led the BRADY design team for this $285,000 design effort and was responsible for coordinating all the civil and structural project deliverables including contract documents, basis of design report, plans, specifications, and bid documents. During construction, BRADY acted as the General Contractor and Construction Manager for the $6.3 Million construction effort.

PROJECT MANAGER, RESERVOIR STRUCTURAL CONDITION ASSESSMENT AND RECOMMENDATIONS, CITY OF UPLAND, UPLAND, CA.

Conducted above and below water inspection of a 10MG concrete reservoir. The reservoir was constructed in 1975 and exhibited structural defects. Responsible for inspection, condition assessment report, and structural recommendations for repair and or replacement. A concrete coring and testing study supported plans to repair instead of replace defective portions of the reservoir. Design of repairs is planned for the next phase.

PROJECT MANAGER, PECHSTEIN 20 MG RESERVOIR INSPECTION, VISTA IRRIGATION DISTRICT, CA

Responsible for structural inspection of the partially buried prestressed concrete reservoir with emphasis on the 1960s era glulam beam and light framed roof structure. Inspection, structural analysis and report focused on whether the roof structure was eligible for repair or replacement. Structural defects and deficiencies in the design were found and a new aluminum dome roof was recommended to be installed to increase the reservoir's useful life. While design for the roof replacement is implemented, design of temporary repairs were made.

PROJECT MANAGER, PROJECT MANAGER – TWO STEEL 8 MG RESERVOIRS, CITY OF WESTMINSTER, CA

Responsible for inspection, seismic analysis, condition assessment report, recommendations and cost estimate which resulted in plans for recoating the exterior and interior of the steel reservoirs.

Subcontractors

Joining our team are expert specialist subcontractors with relevant experience and qualified staff in specific areas.

TKE Engineering

- 1720 Zone West Pipeline, 14,500-ft of 36-inch CMLC pipeline, City of San Bernadino, CA
- Devil Canyon / Azusa Pipeline Emergency Connection, Tie-in to San Gabriel Valley MWD 54-inch pipeline tie-in and 3020-ft of 36-inch pipeline, Upland, CA
- College Pipeline, 2500-ft of 24-inch and 36-inch ductile iron pipeline, City of San Bernadino, CA.
- Ogden Reservoir Pipeline, 7385-ft of 36-inch ductile iron pipeline, San Bernadino, CA

Leighton Group

- Chino Ranch Dam / Arnold Reservoir, Geotechnical engineering and materials testing, City of Industry, CA.
- Tanks 16.6, 17.1.1 and 17.1.2 Replacement, Geotechnical engineering, Yucaipa, CA.
- Keith Tank, 2.5 MG prestressed concrete tank, geotechnical engineering, Corona, CA.

Lee+Ro

- Electrical System Assessment of Water and Sewer Facilities & Well Facility Backup, City of Ontario.
- Santiago Canyon, Pump Station Improvements, Irvine Ranch Water District.
- 1W Water System Modeling, Central Contra Costa Sanitation District
- Rancho Los Lagos Water Study, City of Brawley

Rincon Consultants, Inc.

- Euclid Avenue Recycled Water Improvement Project, Tree Inventory and Preservation Plan, Ontario, CA.
- Perris North Groundwater Contamination Monitoring Program, Delhi Sands Flower-loving Fly monitoring, Eastern Municipal Water District, Perris, CA.
- Cactus Avenue Corridor Project, CEQA Review, Burrowing Owl Surveys, Moreno Valley, CA

RF Yeager Engineering

- Cathodic protection Design – Ontario Ranch Phase 2 Water Main Design
- EMWD Cathodic protection on water main pipelines
- Rancho California Water District – corrosion engineering.

BMLA Landscape Architecture

- Eastern Municipal Water District Headquarters landscape design.
- City of Corona Keith 1220 Zone Potable Water Tank landscape design.

5. FISCAL STABILITY

Refer to the Appendix for a current commercial credit report from Experian and audited financial statements for the years ended December 31, 2022 and 2021.

6. EXPERIENCE AND TECHNICAL COMPETENCE

A. Experience and Technical Competence

(i) The Design Team has worked on and is the Engineer of Record of over 100 reservoirs and hundreds of thousands of linear feet of large pipeline. ***The entire Design Team: BRADY, TKE, Leighton, Lee+Ro, Rincon, RF Yeager, and BMLA were all founded in Southern California, and all maintain head offices in Southern California.*** We not only have the experience, we have the local expertise to provide the results and value the City expects. The scope identified in the RFP: Southern California concrete reservoirs, large diameter Inland Empire pipeline, multiple California pressure zones and water sources are the strengths of the Design Team.

(ii) Note the project experience in this section, as well as the staff experience in the resumes included in the appendix.

(iii) Richard Brady & Associates has conducted business since 1999 and has been designing reservoirs and pipelines similar to what is requested in the RFP since that time.

(iv) References. *Project size, description, and scope of services are contained later in this section.*

1. Bob Critchfield, PE, Engineering Manager, City of Upland, 909.291.2946, bcritchfield@ci.upland.ca.us
2. Sam Valdez, PE, Senior Civil Engineer, Eastern Municipal Water District, 951.928.3777, valdezsa@emwd.org
3. Miguel Guerrero, General Manager, City of San Bernardino, 909.522.3409, miguel.guerrero@sbmwd.org
4. Temo Galvez, PE, Deputy Public Works Director, 714-593-4517, Temo.Galvez@fountainvalley.org
5. Kevin Cameron, P.E., Senior Civil Engineer, Otay Water District, 619-670-2248, KCameron@otaywater.gov

(v) City of Ontario Experience

- As an associate engineer for DYK, Karl specified the prestressing schedule for the Milliken 1010-2B Reservoir in 2007 for the City of Ontario.
- LEE+RO provided site-specific electrical assessment, Arc Flash Analysis and training for 32 City of Ontario Municipal Utilities Company facilities that included 24 groundwater production wells, 5 booster pump stations/storage facilities, and 3 sewer lift stations.
- Rincon prepared a tree inventory and preservation plan for the City of Ontario.
- RF Yeager performed the cathodic protection for the Ontario Ranch Phase 2 pipeline

B. Project References.

BRADY has significant and relevant experience in California potable water storage facilities. Below please note five such examples. Other references are available upon request.

City of Upland – 7.5 MG Prestressed Concrete Reservoir and Pump Station and Booster Pump Station

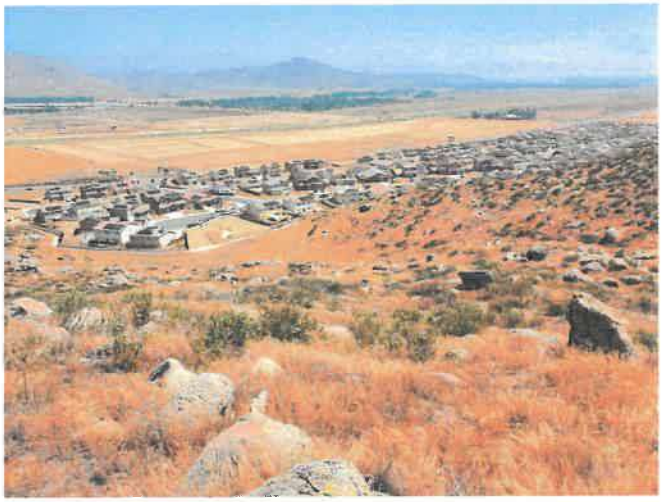
a. Role of Firm: Design and Construction Management
b. Dollar Value of Services: $16,000,000
c. Dollar Value of Fee: $1,600,000 (Design)
d. Description of Services: Reservoir 15 served the City of Upland for approximately 50 years. It is approximately 235 feet in diameter, 23.5 feet tall. Reservoir 15 is a precast concrete Pritzker tank; an assemblage of vertical precast, prestressed concrete shell wall panels having an arched cross section. The vertical wall panels are restrained at the top and bottom by post-tensioned concrete ring beams. BRADY designed the steel strands to contain a catastrophic failure.

RELEVANCE TO ONTARIO

- *Similar size and type of reservoir as Ontario's reservoirs*
- *Similar pipeline configuration and diameter*
- *Six miles from proposed project site in neighboring water district*

Challenges

This system made headlines in 1998, when a Pritzker tank in Westminster, CA failed catastrophically after the bottom ring beam securing the vertical concrete panels failed. Due to concern that Reservoir 15 could experience a similar failure, the City of Upland elected to temporarily strengthen the tank by installing steel strands along the exterior upper and lower areas of the tank. Following the installation of the temporary structural strand containment belts, BRADY's team prepared plans, specifications and estimates for the design of a new 7.5 MG circular, prestressed concrete tank (AWWA D110, Type I) and pump station improvements.



Benefit to Client

The new tank is designed in accordance with California Building Code, ASCE 7, AWWA D110 - Wire- and Strand-Wound, Circular, Prestressed Concrete Water Tanks, and ACI 350. The tank includes a baffling system for chlorine contact time. Site improvements included yard piping with complicated 36-inch connections to multiple agencies. In addition to the structural design, BRADY's team completed design work associated with EI&C, mechanical and water quality.

e. Staffing: Rick Brady, PE, BCEE, Garrett Murawsky, PE, Karl Kuebitz, PE, Christopher Dull, PE
f. Duration of Providing Services: 2018 to 2023 (Assessment, Design & construction support)
g. Relationship to Client: Prime Consultant
h. Contact Name: Bob Critchfield, PE, Engineering Manager, City of Upland, 909.291.2946, bcritchfield@ci.upland.ca.us

Eastern Municipal Water District – Preliminary and Final Design for Ridgecrest Road Tank and Transmission Main

a. **Role of Firm:** Design Services
b. **Dollar Value of Services:** $922,000
c. **Dollar Value of Fee:** TBD
d. **Description of Services:** To support the growth in Winchester Hills are of Riverside County, BRADY was selected by EMWD for a siting study through final design of a 4.5 million gallon reservoir for the 1720 Pressure Zone and 4,500 linear feet of 24-inch diameter transmission main.

RELEVANCE TO ONTARIO

- *Site selection and design for 4.5 MG Concrete Reservoir*
- *4000 linear feet of 24" Transmission Main*
- *CEQA coordination*

Challenges

The siting study considered seven potential locations at the appropriate elevation for the pressure zone. This siting study considered hydraulics, pipeline, and access road from a technical perspective. Many CEQA-related issues were identified at many of the proposed locations. A thorough decision matrix was developed and weighted to consider various biological and cultural resources, as well as property acquisition challenges, constructability, economic and community considerations, and other technical issues. Within BRADY's scope was the parcel evaluation and real property support for land acquisition. From an economic perspective BRADY performed a detailed study of material quantities required and tank type (steel vs. concrete) at each of 7 sites. To satisfy CEQA, waterways, sensitive habitats and cultural resources were identified and managed.

Benefit to Client

Eventually, a prestressed concrete reservoir within a development zone was selected and designed. The final design included electrical, control, and solar backup. The final design includes a 4500-ft pipeline through a planned neighborhood and undeveloped hillside. The access road was designed on a very steep hillside with a vertical slope of 12%. The site and road drainage is all designed to be directed to onsite infiltration. The partially-buried prestressed concrete reservoir is concealed from the community by earthwork and professional landscaping. The tank will have onsite chloramine disinfections and tank mixing. Disinfectant will be injected at the mixer for superior dispersion. The final project will serve Winchester Hills through the build-out scenario.

e. **Staffing:** Karl Kuebitz, PE, Garrrett Murawsky, PE, Chris Dull, PE, Jud Warren, PE
f. **Duration of Providing Services:** 2023-2024
g. **Relationship to Client:** Prime
h. **Contact Name:** Sam Valdez, PE, Senior Civil Engineer, Eastern Municipal Water District, 951.928.3777, valdezsa@emwd.org

City of San Bernardino – 1720 Zone West Pipeline (TKE Project)

a. **Role of Firm:** Transmission Main Design and Survey
b. **Dollar Value of Services:** $4,000,000
c. **Dollar Value of Fee:** $300,000
d. **Description of Services:** The 1720 Zone West Transmission Main Pipeline is located in the City of San Bernardino west of the Interstate 215 Freeway along Cajon Boulevard between University Parkway and Palm Avenue. Services included design, surveying, restrained joint and appurtenance calculations, utility coordination/relocation, agency coordination (BNSF, San Bernardino County Flood Control District, US Army Corps, and City of San Bernardino), bidding, and construction assistance.

RELEVANCE TO ONTARIO

- *Reservoir and Transmission Main Project*
- *Coordination with Multiple Agencies*
- *Survey and Utility Relocation*

Challenges

This project consisted of the design and construction of 14,500' of 36" cement mortar lined and coated steel pipe, including restrained length calculations, joint specifications, system appurtenances, connections to the existing system, Metropolitan Water District and San Gabriel Valley Water district encroachment permits, San Bernardino County Flood Control District, US Army Corp of Engineers, and Department of Fish and Game permitting for pipeline bore and jack crossing of Devil's Creek Diversion Channel/Cable Creek, BNSF permitting for bore and jack crossing of railroad at Palm Avenue, and coordination with other agencies for tie-ins to the proposed reservoir site.

Benefit to Client

Proposed water system improvements provide a transmission main from the Palm Avenue Reservoir to the newly constructed Ogden Reservoir for adequate water system conveyance. Well designed and specified pipeline was allowed for accurate estimating, bidding, and installation.

e. **Staffing:** Michael Thornton, PE, LS, Terry Renner, PE, LS, QSD, Steven Ledbetter, PE, Ron Musser, LS
f. **Duration of Providing Services:** 9 Months
g. **Relationship to Client:** Prime Consultant
h. **Contact Name:** Miguel Guerrero, General Manager, City of San Bernardino, 909.522.3409, Email miguel.guerrero@sbmwd.org

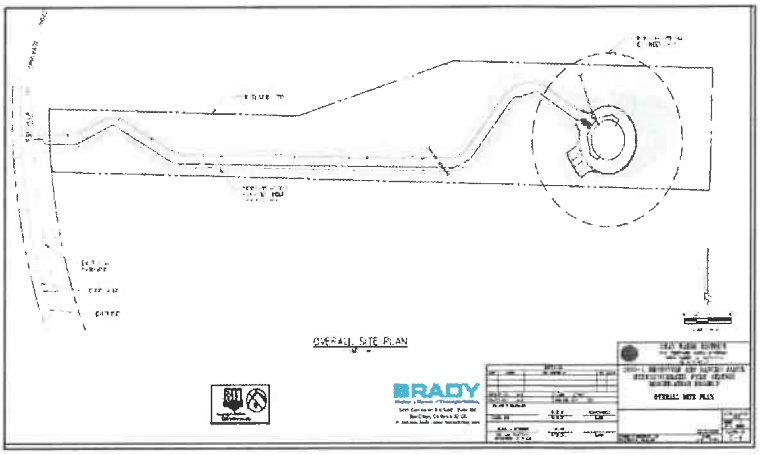
Technical Competence

BRADY maintains a full complement of professional talent and tools for design work. This includes current computers and software. There is no deficiency in technical competence with respect to this project. BRADY and our team members have every tool and the experience necessary to execute this project. Section 1.3.9 of the RFP Scope requires the Consultant to submit all original documents in one or more of the followings formats as directed to by the City: MS Word, MS Excel, MS Project, MS Power Point, PDF, AutoCAD, Arc GIS. We confirm that we are very comfortable and confident in working with all of these formats.

Additional Experience

City of Fountain Valley – Reservoir No. 2 and Pump Station Rehabilitation

a. **Role of Firm:** Design and Construction Management
b. **Dollar Value of Services:** $580,000
c. **Dollar Value of Fee:** $580,000 (Design)
d. **Description of Services:** Located adjacent in Cordata Park in Fountain Valley, California the Reservoir No.2 and Pump Station Rehabilitation project provides for the demolition of the existing 7,500 gallon per minute (gpm) pump station and design of the new Reservoir No. 2 pump station complete with 3 – 2,500 gpm vertical turbine pumps, variable frequency drives, dewatering pump, piping and valves, SCE electrical room, SCE transformer, installation of a standby generator and HVAC facilities. Site improvements include, new concrete driveway and paver maintenance road; site grading, landscaping and irrigation improvements, park improvements, new sidewalks and miscellaneous utility lines and connections. In addition, the design work includes new appurtenances for the existing Reservoir No. 2. BRADY provided design services and preparation of contract drawings and specifications for demolition of the existing pump station, design of the new pump station and replacement of the Reservoir No. 2 appurtenances. Design disciplines for this project included civil, mechanical, architecture, structural, electrical, instrumentation and control and landscaping. BRADY's engineering services also included topographic surveying, geotechnical investigation, and structural assessment of the existing Reservoir No. 2. With the new pump station located across the street from residential homes, special attention was given to architectural features, materials, and color schemes. The project will also include construction of a new basketball court in the park, new lighting around the park playground areas and 19 new trees planted in the park. BRADY's construction management staff was assigned the task of preparing estimates of probable construction at the 30 and 100 percent complete designs.



Challenges

The BRADY team met the challenge of designing a new municipal facility in a city park and residential development while maintaining the City's need for a secure potable water pump station and reservoir that is aesthetically pleasing for the neighborhood. In addition, improvements included operational improvements for the City of Fountain Valley operation and landscaping department.

e. **Staffing:** Rick Brady, PE, BCEE, Garrett Murawsky, PE, Joel Reyes, Ryan Nishimura, PE
f. **Duration of Providing Services:** 2016 (Design), 2018 - 2020 Construction Management
g. **Relationship to Client:** Prime Consultant
h. **Contact Name:** Mark Sprague, PE, Engineering Manager, City of Fountain Valley, 714.593.4609, mark.sprague@fountainvalley.org

Otay Water District – 3.4 MG and 0.5 MG Reservoirs, Jamul, CA

a. **Role of Firm:** Design and Construction Support
b. **Dollar Value of Services:** $580,000
c. **Dollar Value of Fee:** $622,000
d. **Description of Services:** The 870-2 and 1655-1 Reservoir Project consists of a pump station assessment and upgrade, a pipeline replacement, and two new AWWA D110, Type I prestressed concrete reservoirs. The pump station will house new instrumentation and controls to monitor and operate the new facility. The tank itself it the last stop in a long network, delivering water to the sparsely-populated backcountry of East San Diego County. Due to its location and low demand, the tank will require mixing, disinfectant monitoring and chemical injection. The access road to the new tank has an average slope of 16% and must be able to accommodate chemical delivery trucks. The tank will have roof access stairs. The roof will be designed to accommodate solar panels.

e. **Staffing:** Karl Kuebitz, PE, Garrett Murawsky, PE, Ryan Nishimura, PE, Christopher Dull, PE
f. **Duration of Providing Services:** 2021 - 2022
g. **Relationship to Client:** Prime Consultant
h. **Contact Name:** Kevin Cameron, P.E., Senior Civil Engineer, Otay Water District, 619-670-2248, KCameron@otaywater.gov

City of Upland – Devil Canyon/Azusa Pipeline Emergency Interconnection (TKE Project)

a. **Role of Firm:** preliminary design report, surveying, preliminary design, utility coordination and agency coordination
b. **Dollar Value of Services:** $3,000,000
c. **Dollar Value of Fee:** $30,000
d. **Description of Services:** The Devil Canyon/Azusa Pipeline Emergency Interconnection Pipeline is located in the City of Upland, north of the Interstate 10 Freeway on Benson Avenue between Baseline Road and 18th Street. Proposed water system improvements provide an interconnection with the San Gabriel Valley Municipal Water Department's 54" Azusa Pipeline to provide WFA with an emergency interconnection transmission main to deliver flows when MWD's Inland Feeder Pipeline is out of service or unable to deliver the amount of water needed. Conventional ground design survey, preliminary engineering/hydraulic analysis and design services, including preparation of plans, specifications and estimates were provided by TKE for pump station and approximately 3,020 linear feet of 36" cement mortar lined and coated steel water improvements.
e. **Staffing:** Michael Thornton, P.E., L.S., Terry Renner, P.E., L.S., Q.S.D., Steven Ledbetter, P.E., Ron Musser, L.S.

f. **Duration of Providing Services:** 3 Months
g. **Contact Name:** Mr. Terry Catlin, 909.981.9454

City of San Bernardino – College Pipeline (TKE Project)

a. **Role of Firm:** Design, surveying, restrained joint and appurtenance calculations, utility coordination/relocation, agency coordination (BNSF, San Bernardino County Flood Control District, US Army Corps, and City of San Bernardino), bidding, construction assistance and construction staking
b. **Dollar Value of Services:** $478,000
c. **Dollar Value of Fee:** $40,000
d. **Description of Services:** The College Pipeline is located in the City of San Bernardino west of the Interstate 215 Freeway along Cajon Boulevard between Ogden Street and 1st Avenue and across north end of the San Bernardino County Flood Control District flood control basin to University Parkway. This project consisted of the construction of 2,500' of 24" and 36" ductile iron pipe, including restrained length calculations, joint specifications, system appurtenances, connections to the existing system, coordination with San Bernardino County Flood Control and BNSF Railroad for a railroad crossing encroachment permit, and coordination with other agencies for tie-ins to the proposed booster station.
e. **Staffing:** Michael Thornton, P.E., L.S., Terry Renner, P.E., L.S., Q.S.D., Steven Ledbetter P.E., Ron Musser, L.S.
f. **Duration of Providing Services:** 5 Months
g. **Contact Name:** Mr. Miguel Guerrero, 909.522.3409

City of Industry – On-Call Geotechnical and Materials Testing Services, Chino Ranch Dam / Arnold Reservoir (Leighton Project)

The upstream portion of the existing Chino Ranch earthen dam experienced erosional distress near the crest. The City of Industry's challenge was to perform repairs to restore the upstream slope and determine the appropriate reinforcement strategies to reduce future erosion and scour. The earthen dam is under the jurisdiction of the California Department of Water Resources, Division of Safety of Dams (DSOD, 2018).

Leighton performed a geotechnical exploration to evaluate the subsurface conditions of the dam embankment and provide geotechnical recommendations for use during development of design and repair to the upstream (north) side of the earthen dam embankment. We performed several stability analyses to evaluate this earth embankment during static, seismic and rapid drawdown conditions. The analyses indicate that, under various anticipated water level and loading conditions, this dam is expected to have a factor of safety that exceeds what is generally accepted. Recommendations were provided to restore the dam upstream slope to a 2:1 (horizontal: vertical) gradient as originally designed and to reduce future erosion.

Yucaipa, CA – Reservoirs R-17.1.1 and R-17.1.2 Replacement (Leighton Project)

This project consisted of demolishing two existing potable water "reservoirs" (steel tanks), R-17.1.1 and R-17.1.2, and constructing two new replacement potable water reservoirs (tanks) on the same footprint. Geotechnical investigation and report for design of two—418,000 and 210,000 gallon—new replacement potable water tanks. We provided subsurface exploration of three hollow-stem auger Borings, geotechnical laboratory testing of

collected soil samples, developed and provided develop preliminary geotechnical conclusions and recommendations regarding proposed earthwork, tank foundations, and associated new piping. Drilling in the area of the pads for these two tanks indicated existing artificial fill of varying thicknesses. Our report included earthwork and subgrade stabilization recommendations to address this issue.

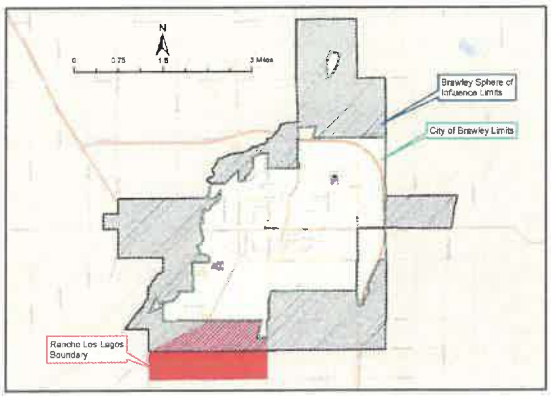
City of Ontario – Euclid Avenue Recycled Water Improvement Project (Rincon Project)

Rincon prepared a Tree Inventory and Preservation Plan as well as a Tree Health Reevaluation Report for the City's Euclid Avenue Recycled Water Improvement project, which included conversion of the parkway irrigation system along historic Euclid Avenue to a recycled water system and installation of a new irrigation pump station in response to the Governor's Executive Order regarding drought conditions. This scope of work was conducted in compliance with the City's Development Code Section 6.05.020 and included a comprehensive assessment of 77 trees.

The Metropolitan Water District of Southern California – Garvey Reservoir Rehabilitation Project (Rincon Project)

Rincon is currently preparing an Environmental Impact Report (EIR) for the Garvey Reservoir Rehabilitation Project in Monterey Park that will entail relining the reservoir and completing several upgrades and site improvements to various appurtenant structures. In support of the EIR, Rincon has prepared a cultural resources assessment with historic resources evaluation and jurisdictional delineation and will be preparing technical studies related to air quality/greenhouse gas (GHG) emissions, noise, and health risk. Rincon is also coordinating preparation of a traffic and vehicle miles traveled analysis through a sub-consultant.

City of Ontario – Electrical System Assessment of Water and Sewer Facilities & Well Facility Backup (LEE + RO Project)



LEE + RO provided site specific electrical assessment, Arc Flash Analysis and training for 32 City of Ontario Municipal Utilities Company facilities that included 24 groundwater production wells, 5 booster pump stations/storage facilities, and 3 sewer lift stations. We evaluated compliance of each site with the code requirements. The code compliance evaluation included review of the facilities against the OSHA 29 Code of Federal Regulations (CFR) Part 1910, subpart S, safety related work practices; NFPA 70-2011, National Electrical Code, New labeling requirements; NFPA 70E-2012, Standard for electrical safety requirements for employee workplaces; and IEEE Standard 1584-2011, Guide for performing Arc Flash hazard calculations. The electrical assessment included single line diagrams, equipment data sheets and maintenance records, site inspection of installed equipment, documentation of equipment physical condition, ratings, and maintainability/serviceability for future use. Single lines diagrams were developed for each site in AutoCAD based on the as-built information collected and confirmed. Arc Flash Analysis provides information for personal protective equipment (PPE), and code compliant safety labeling. System evaluation used ETAP modeling software for Fault Analysis, Coordination Studies and Arc Flash Analysis for each

site. The studies verified that the protective device coordination is optimized, minimizing arc energy during a fault condition, maximizing system reliability and continuity of operation. The recommended improvements documented anticipated service life of each facility, capital and O&M costs anticipated cost for implementing recommendations.

City of Brawley – Rancho Los Lagos Water Study (LEE + RO Project)

Rancho Los Lagos (RLL) is a private development located adjacent to the City of Brawley (City) that consisted of a variety of land uses and desired to tie into the City's existing water facilities. The RLL area consisted of 1,076 acres of a variety of land use types including single, multi-family, and active adult residential; schools; parks; golf course; commercial; and business park areas. Twelve phases of development were planned to start with active adult residential houses in the southwest corner of the proposed development. RLL desired to be a wholesale customer to the City of Brawley with meters off the two points of connection near the development's northern boundary.

The City wished to evaluate the impacts of RLL on the existing water distribution system and on the 15 MGD domestic water treatment plant for existing and future build-out scenarios. The City's Water Master Plan dated September 2012 laid out the future build out demands up to year 2030.

To assist the City in this endeavor, LEE + RO reviewed the water feasibility study and evaluated the water system for meeting the minimum service requirements per the City's Water Master Plan and provided improvement recommendations and alternatives for the distribution mains, storage tanks, pump stations and the water treatment plant, as needed. LEE + RO also reviewed and evaluated the City's hydraulic model for existing and future conditions for average day, max day plus fire flow and peak hour scenarios. The City's general plan land uses were used to estimate the future build-out demands. Hydraulic analysis was performed for steady state conditions on the computer model to verify the system pressures and capacities. The results of the analysis were summarized, and recommendations were made in coordination with the City. The impacts on water treatment plant were separately analyzed and recommendations were made for any required plant upgrades. LEE + RO prepared and submitted the water study report along with construction cost estimates for any required water system improvements.

7. PROPOSED METHOD TO ACCOMPLISH THE WORK

Technical and Management Approach

The BRADY team will follow a "Waterfall" project management methodology and will follow a linear, sequential progression. A Gantt chart schedule for the design project which outlines each step of the project refinement is contained in an appendix to this proposal. Throughout this process, effective communication and leadership will guide each phase of the waterfall until we reach a final bid-ready package all stakeholders are proud of.

An effective project begins with a clear vision. In this case it is a well-specified 925-1A Reservoir and Transmission Main bid package. The refinement process begins by understanding the hydraulic system in which this reservoir fits in to. This will be a detailed look into the 1010 and 1074 pressure zones, and the future demand on the 925 pressure zone.

Developing a new reservoir facility will involve City and community involvement. The new facility will meet the present and future hydraulic needs, and will be easy to maintain by Operations and Maintenance. Like many other City of Ontario water reservoirs, the 925 Reservoir will meet the aesthetics of a modern infrastructure.

The Gantt Chart schedule included in the Appendix is preliminary. A similar mutually-agreed schedule will define the expectations for each milestone. Stakeholders can mark their calendars with these steps.

The PDR/30% Design will become the roadmap for the Project. It will distill the input of the stakeholders to a guidebook.

BRADY has assembled a solid team for this project. Every aspect of this project will be authored, designed, and reviewed by an industry expert. Designers in each discipline will roll up into the pipeline and reservoir site managers.

BRADY prides itself on razor-sharp drawings, calculations that are easy to follow, and specifications that are efficient and constructable. We will respond to City comments and integrate them into the developing package after each submittal.

The end-goal, as stated above, is to have a set of bid documents which will deliver the expected project and are contractor-friendly. Karl spent 18 years as a contractor specializing in the construction of concrete tanks before joining BRADY. He will study the bid-ready package and ensure that it is realistic and constructable.

1. Task 1: Preliminary Design Report

A. Task 1.1: Kick-off Meeting and Project Management

The Kick-off meeting will bring stakeholders and design discipline leaders together to chart a path from concept to bid-ready package. BRADY considers stakeholder collaboration a top priority. As a consultant specializing in reservoirs and pipelines, we agree with the City's approach of specifying durable prestressed concrete reservoirs and proactively installing the pipeline for future growth.

- As indicated in the RFP, we look forward to the opportunity to synergize with City staff and interview Engineering, Water Production, and Operations personnel. The final product will be one that is operated by the City and serves the community. The BRADY design team will enable this by listening to City staff and community representatives. Milestones will be incorporated in the design schedule to meet your objectives.

Karl will be the point of communication with the City. During complex design periods, Jud will manage communication related to the pipeline, and Amanda will manage communication related to the reservoir and hydraulics. BRADY uses a professional format for weekly status reports, meeting minutes, and a communication log. Action items will be tracked with accountability.

Deliverables: Professional Kickoff Meeting with minutes, Meeting Agendas & Minutes, Monthly Billings and Status Reports, Updated Project Schedules and Budget, and Decision Logs

B. Task 1.2: Outside Agency Coordination

The critical path for this project will be filing the Notice of Exemption (NOE) with San Bernadino County, County Clerk, and California Department of Fish and Wildlife. Immediately after Kick-off, the 2012 Mitigated Negative Declaration (MND) for CEQA will be reviewed by the design team and with the City's CEQA representative and Planning Department. The necessary site reconnaissance and field studies will be conducted as soon as reasonably possible to expedite the filing of the NOE. To keep this moving, we will prioritize the NOE filing effort beginning the day after Kick-off. Chelsi Pascua, PE will manage the design team coordination. Before joining BRADY, Chelsi worked at the Division of Drinking Water (DDW). She knows how to move things through the California Water Boards and understands the CEQA flowchart.

The eventual project site will have utility and data connections. BRADY is a prime consultant for San Diego Gas and Electric and Cox Communications. We have worked with other major utility companies and have successfully pursued permits.

Deliverable: Open lines of communication with outside agencies

C. Task 1.3: Surveying

We propose to use aerial photogrammetry to prepare the base construction drawings. Our field survey crew will locate existing street centerline and property monuments utilizing survey control data provided by the City and we will set aerial targets using NAD83 coordinates. The crew will measure the horizontal angle, horizontal distance, and vertical elevation difference between each survey target. We will complete a traverse for each survey to ensure closure. Elevations will be tied to existing City benchmarks. In addition, we will measure

channel, sewer, storm drain, and irrigation inverts. We will collect appropriate detail as required including trees, walkways, sidewalks, driveways, curbs, gutters, cross gutters, fire hydrants, water valves, manholes, water meters, signs, street lights, power poles, and all other visible features.

Using the survey information collected, we will prepare the base construction drawings on 24-inch by 36-inch sheets with the City's standard title block using AutoCAD 2021 software at a drawing scale of 1"=40'. The base construction drawings will include a plan view based on aerial data. We will add the sheet north arrow, graphic scale, existing improvements and utilities (based on both assembled records and field data), property lines, public and private right-of-way, street centerline, street names, and survey data to the plan view portion of the drawings. Once the base drawings are complete, we will perform a careful field review to ensure all underground facilities are shown correctly. We will request that experienced City staff assist us with the field review to ensure all underground facilities have been identified and accurately shown.

Deliverable: Reliable basemap survey for reservoir site and pipeline alignment.

D. Task 1.4: Potholing Services

The design team will request that Underground Service Alert (USA) notify USA members to attend a field meeting to review locations to be excavated. We will mark critical utility locations as defined by TKE and approved by the City staff in the field. We propose to only excavate those facilities that would have a significant impact on pipeline profile design.

We will conduct a field meeting to request that utility representatives mark their facilities within specified locations. We will document meeting attendees for future reference. We will coordinate with our subconsultant to arrange for excavation of the interferences. For proposal purposes, we have assumed 45 pothole locations to a depth of 8 feet. We will measure all utilities that are excavated to record their horizontal and vertical alignments. We would then identify all facilities that require relocation, if any. In addition to the utility data, we will note the condition of existing pavement for design of replacement pavement sections. Potholes will be repaired using hot asphalt mix pavement in accordance with Attachment 3 of the RFP.

Deliverable: Utility location as needed to develop dependable design drawings.

E. Task 1.5: Geotechnical Investigation

The Design Team has carefully reviewed the geotechnical scope outlined in the RFP and has selected Leighton to perform this scope. Leighton is well-acquainted with pipeline and reservoir projects. A very comprehensive approach to performing the work is contained in the Appendix.

Deliverable: Geotechnical report including borings and lab tests as needed for the Project.

F. Task 1.6: Site Layout, SCADA and Instrumentation Workshop and Technical Memorandum

The site layout will follow the general arrangement noted in the RFP, the description supplied in the RFP, and its addenda. We expanded on the site layout as described in the RFP and it is presented in the Appendix. Our lead electrical and controls engineer, Ryan Nishimura, PE has designed many reservoir and pump station controls systems. For example, Ryan recently completed the design for the UPPER VALLE DE LOS CABALLOS REGIONAL PUMP STATION, RANCHO CALIFORNIA WATER DISTRICT. This project consisted of the design of a new pump station for the Upper Valle De Los Cabllos (UVDC) region, including a chlorine contact tank, a sodium

hypochlorite generation facility, and the pipelines to interconnect from the source wells and to the 1305 and 1380 pressure zones. The UVDC region is currently fed from a single 33kV:4.16kV transformer that distributes 4.16kV power to all existing sites. The new utility service feed and distribution system was designed for the capacity to feed all existing, new, and future loads (four additional well sites). BRADY designed the electrical and control systems design, including the 4.16kV power distribution, site power, controls, lighting, grounding, coordination with SCE. This project required significant coordination to identify all of the operational and functional control needs.

Another good example is the Reservoir No.2 and Pump Station Rehabilitation for the City of Fountain Valley. The new Reservoir No. 2 pump station utilized three (3) – 2,500 gpm vertical turbine pumps, variable frequency drives, dewatering pump, piping and valves, SCE electrical room, SCE transformer, installation of a standby generator and HVAC facilities.

Deliverable: Engagement with City staff to develop a consensus single-line diagram for the reservoir site operation.

G. Task 1.7: Diesel-powered Emergency Backup Generator and Technical Memo

BRADY was recently selected to design four emergency backup generators for the City of Redlands. All four of these are at reservoir / pump station facilities. Each generator was selected only after personal meetings and a careful study of the electrical demand. AMQD generators with spill prevention containment and control (SPCC) are specified for the Redlands, and we expect the same for this project. The following specs will be considered in the generator selection:

- Electrical load requirements
- Fuel type, storage, and containment
- Automatic transfer switches
- Noise requirements/ordinances, and mitigation
- Installation offsets and foundation requirements
- Arc flash requirements
- Site security

The generator information will be included in the Notice of Exemption (NOE) with an explanation of why it is exempt from the CEQA.

Deliverable: Technical Memo describing the backup generator requirements which satisfy electrical requirements and environmental standards.

H. Task 1.8: Planning and Development Advisory Board (DAB) Workshop and Technical Memorandum

BRADY is well acquainted with City planning and community needs. To support this effort, we reached out to Landscape Architect, BMLA, to support in providing professional support in the meeting. We know that the City is interested in providing the community with an aesthetically-pleasing structure. Having worked on Ontario's previous prestressed tanks, I understand the expectations. BMLA will join the meetings, and together we will give

the DAB ideas that will result in landmark infrastructure without high maintenance costs. Below note two options which BMLA rendered for the City of Corona.

As requested, the findings of the DAP will be incorporated into the PDR report. As we do not understand the extent of the landscaping and architectural work, we have included only DAB workshop support and renderings for the PDR for our landscape / architectural designer BMLA.

Deliverable: Attend DAB Workshop with a landscape architect experienced in water infrastructure. Memo outlining landscape and architectural expectations.

I. Task 1.9: Opinion of Probable Construction Cost

BRADY recently completed a project for the California American Water Company to provide estimation support for a rate case study. This included upgrades and new tanks and reservoirs at ***45*** sites throughout Los Angeles and Ventura Counties. We accurately provided this cost data that met with the scrutiny of non-public accountants and auditors. This effort was led by Jim Bowen, PE. Jim also estimated the City of Upland reservoir replacement project within a few percent of the submitted bids. Jim will carefully study this complex project and will ensure that the reservoir site and pipeline will be professionally estimated. We understand that a project like this should stand up to public scrutiny. We have the team to meet this high standard.

Deliverable: Accurate cost estimate for 30%-level design

J. Task 1.10: Project Schedule

A preliminary project design schedule has been developed as a starting point for the City's consideration and is located in the Appendix. At this time, we anticipate a 456-day design period. Please refer to the included schedule for details.

Deliverable: Mutually agreed schedule in MS Project, to be updated monthly.

K. Task 1.11: Preliminary Design Report (PDR) & Workshop

The RFP contains a comprehensive list of items to consider for the Preliminary Design Report (PDR). BRADY commits to addressing each requested item with a clear recommendation and plan to accomplish that goal. Our proposed services related to the PDR can bring the City a fresh look at the existing alignment study that was previously prepared. Design team member TKE has extensive experience in design and construction of all types of water main installation projects, including public outreach campaigns. TKE has locally designed more the

100,000 linear feet of pipeline 24-inches and larger. One guiding principle for establishing the baseline report for a project comes from a Chinese proverb which was adopted into the business world in the 1990s:

From our review of the alignment study, there are factors which may have been disproportionally ranked or should have further analysis to determine if the cost associated with the factor would potentially be too burdensome. With the City required to ensure fiscal responsibility for the projects they construct, a second opinion in review of the proposed alignments would be well warranted prior to causing the selection of the longest and most expensive alignment alternative. TKE's expertise and thorough procedures will ensure that all aspects are considered and will provide recommendations for an alignment that will expedite construction, minimize impacts on the public and ultimately save the City money during construction.

Seek first to understand, then to be understood.

By keeping the City's interest first, then applying state of the art design practice, the Design Team will ensure the PDR is a true representation of the design plan. We look forward to the three revision cycles in this document. This will ensure that the feedback loop between the design team and the stakeholders is closed, and all needs are met.

Deliverable: Productive Workshop and 3 submissions of the PDR / 30%-level design

L. Task 1.12: Final Preliminary Design Report (PDR)

The final PDR will be a clear Report and 30%-level drawings for each major component of the project. This will outline the reservoir site, civil, mechanical, structural, electrical, architectural, and landscape. It will further confirm the pipeline alignment and contain all the survey and preliminary alignment information needed to advance the design.

Deliverable: Consensus PDR document to be used as a roadmap for the Project

2. Task 2: CEQA Compliance

A. Task 2.1 CEQA Compliance

Following completion of the Preliminary Design Report, the design team CEQA specialist, Rincon will review the 2012 IS-MND and compare the design of the proposed project in the Preliminary Design Report to the description of the project in the 2012 IS-MND. This task includes the identification of any additional studies or documentation required for the proposed project, if needed, relative to CEQA compliance. Rincon will prepare a brief memorandum summarizing the results of this analysis. If the proposed project is adequately analyzed in the 2012 IS-MND, no further CEQA documentation or filing of CEQA notices would be required for the proposed project. The design team including Rincon will coordinate with the City's Planning Department and CEQA representative to provide technical input and review associated with the City's filing of the NOE.

Deliverable: Draft and Final CEQA Recommendations Memo

B. Task 2.2 Project Description

The design team including Rincon will prepare a current CEQA Project Description in coordination with the City for consistency with the engineering design for the project. The Project Description (PD) will include identification of all project components and key activities, as well as any best management practices (BMPs) included as part

of the project design. The PD will include a physical description of the proposed reservoir facilities, a description of proposed reservoir operations, and a description of any residual waste products that would require management. The PD will also include up to three figures showing the project location and surrounding land uses, up to four site photographs, and tables summarizing project characteristics, where appropriate, that can be used to forecast impacts in the Initial Study to be prepared by the City. As part of PD preparation, Rincon will also conduct a site visit to collect information on existing conditions and surrounding land uses. To streamline costs, the site visit to inform the PD will be conducted under Task 2.3 as part of the biological resources reconnaissance survey.

Deliverable: Draft and Final Project Description Memo

C. Task 2.3 Project Description

A qualified Rincon biologist will conduct a Phase 1 Habitat Suitability Assessment of the 7.1-acre reservoir site and approximately 2.75-mile pipeline alignment for burrowing owl (Athene cunicularia), a California Species Of Special Concern, and the Delhi sands flower loving fly (Rhaphiomidas terminatus abdominalis; Delhi fly), a federally endangered species. Methodology from the California Fish and Game Staff Report on Burrowing Owl Mitigation (2012) will be utilized for the burrowing owl habitat assessment. The Delhi fly habitat assessment will be based on an evaluation of suitable sandy soils, specifically the Delhi soil series. The survey area will include the project site and a 500-foot buffer around the site perimeter, where accessible. Transects will be walked on foot at no more than 60-foot transect intervals to achieve full coverage of the site. (No private property will be accessed as part of the survey. Inaccessible areas adjacent to the project site will be surveyed using binoculars and/or spotting scopes to determine if burrowing owls are present.) The distance between transect center lines will be reduced as necessary to account for differences in terrain, vegetation density, and ground surface visibility. The survey will be conducted when winds are less than 12 miles per hour and when there is adequate visibility.

Any burrows and man-made structures suitable for burrowing owl use within the survey area will be examined for sign of burrowing owl (i.e., whitewash, pellets, feathers, tracks, and burrow adornments). All potential burrowing owls and burrows with sign will be recorded utilizing a submeter GPS unit. A delineation of potentially suitable sandy soils and dunes will also be mapped with the GPS unit. Representative photos of the habitat, potential burrows, vegetation, and soil types will be taken and included as an appendix to the habitat assessment report. All vertebrate fauna and flora detected on-site and within the survey area during the course of this survey will be recorded in field notes.

A Habitat Suitability Assessment Report (Report) will be prepared to characterize existing site conditions and assess the presence/absence and quality of the habitat for burrowing owl and Delhi fly within the boundaries of

the project site. The Report will include a discussion of the natural history of each species, survey methodology, summary of the findings, and conclusions with any recommendations for mitigation measures, such as additional focused surveys and/or avoidance measures, in the event burrowing owls or Delhi fly are discovered. Maps showing burrow locations, a delineation of suitable habitat areas, and any sensitive species observed (or their sign) will also be included in the Report.

Deliverable: Draft and Final Phase 1 Habitat Suitability Assessment Report

3. Task 3: Engineering Design Services and Project Management

A. Task 3.1 Preliminary Design (60%) Submittal

Using the PDR as a guide and the information gathered from reconnaissance and from workshops, the 60% package will be developed. Having just worked through a complicated tie-in for the City of Upland and their new 7.5 MG reservoir, we will ensure the tie in to the 925 and 1010 pressure zones are staged correctly. The inlet from the 1010 pressure zone can benefit the reservoir by using the additional inlet pressure to mix the water in the reservoir. To accomplish this, the inlet pipe would be near the inside face of the wall with a fitting to direct the water in the tangent direction to "swirl" the water in the tank. Other more elaborate inlet mixing systems such as TideFlex can be installed to mix the tank using the inlet pressure. As noted in the RFP, we are considering an "enclosure" for the pump and backup generator. This enclosure will be a CMU rectangle sufficient for the pumps and generator with steel roofing and does not include architecture. We expect there to be onsite infiltration with an overflow to the storm drain with appropriate dichlorination and air gaps. This is preferred by the DDW and other regulatory entities. We expect valves and mechanical controls to operate the site as described in the RFP. This will include concrete vaults as required.

The pipeline will include appropriate requirements for notifications, existing utility protection and relocation, pipeline materials, excavation, shoring, bedding, backfilling, compaction, improvement restoration, testing, disinfection, construction sequencing and existing waterline abandonment requirements, if any. The plan view will show digital topographic data, existing improvements and utilities, centerline control, proposed pipeline, and pipeline appurtenances (connections, air valves, main line valves, and blow offs). The profile (at a drawing scale of 1"=40' horizontal and 1"=4' vertical) will show existing ground surface over the proposed pipeline, pipeline flow line, top of pipe, utility crossings, slopes, length of pipe, pipeline appurtenances, joint restraint requirements, and special bedding requirements.

We expect to use the City's standards for most design items; however, some specialized specifications may be needed. Note a list of additional specifications that may be needed.

Deliverable: 60% Design Drawings, Specifications, and Cost-estimate

B. Task 3.2 Development Advisory Board

Following up on Task 1.8, we will present the 60% design before the DAB. This will include two renderings. Our landscape architect, BMLA, will attend this meeting and provide feedback from a landscape and aesthetic point of view. As the outcome of the DAB meetings is unknown, we have not included the full landscape architecture design. This will be negotiated once there is a plan from the DAB.

Deliverable: Presentation before the DAB regarding the 60% design

C. Task 3.3 Detailed Design (90%) Submittal

We approach the 90% design as a "permit-ready" package. We understand the need to expedite the permits and will prepare this package in a way that can be delivered to agencies for permitting purposes. We expect at this stage all City comments are in, and only editorial and minor QA/QC changes would still need to be made. Below, note a list of the anticipated sheets needed for this Project.

Deliverable: 90% Design Drawings, Specifications, Cost-estimate, and Supporting Calculations.

D. Task 3.4 100% Design Revisions

The Design Team will incorporate all of the City-requested changes, additions, deletions, and corrections requested. Additionally, the Design Team commits to a review from our internal QA/QC Board. Our QA/QC is led by Richard Brady and other industry professionals. QA/QC comments and responses will be documented and available to the City upon request.

Deliverable: 100% Design Drawings, Specifications, Cost-estimate, and Supporting Calculations

E. Task 3.5 Final Working Drawings and Specifications (100% Submittal)

The Design Team commits to set forth in detail:

- The Project Construction work to be done.
- The materials, workmanship, finishes, and equipment required for the architectural, structural, mechanical, and electrical systems.
- The utility service connection equipment and site work

Deliverable: Final Working Drawings and Specifications

F. Task 3.6 Southern California Edison Coordination

The Design Team is familiar with Southern California Edison's requirements and will obtain approval for the proposed construction plans. We have included in our fee proposal an optional task to work with SCE regarding powerline and pole relocation along the frontage of the reservoir site.

Deliverable: SCE approved construction plans

G. Task 3.7 Permits

The Design Team has vast experience coordinating with and obtaining permits from regional agencies such as State Water Resource Control Board, California Department of Public Health, Department of Drinking Water, Southern California Edison, Inland Empire Utilities Agency, Caltrans, Union Pacific Railroad, Burlington Northern Santa Fe Railroad, San Bernardino County Flood Control District, Southern California Gas Company and many others which can be challenging and time intensive. The Design Team has developed a working partnership and extensive knowledge of each agency's requirements. In fact, the Design Team is currently working with a number of these agencies on other projects and has developed an effective working partnership that will result in expedited permit issuance.

Deliverable: Approved permits from each agency identified in the PDR

H. Task 3.8 Opinion of Construction Cost (60%, 90%, 100% Submittal)

The Design Team will prepare an Opinion of Construction Cost (OCC) for each portion of the Project. This shall be a spreadsheet with each construction activity and deliverable item. This table will be refined and updated with each submittal.

Deliverable: OCC Table accurately refined with each subsequent submittal

I. Task 3.9 Division of Drinking Water (DDW) Coordination

As previously indicated, the design team consists of staff familiar with the DDW, and even one former employee of the DDW. The Design Team will prepare the necessary waivers for water mains at each instance of noncompliance with the separation requirements.

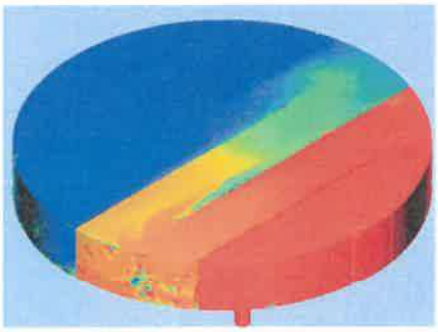
Deliverable: DDW Coordination and necessary approved waivers

4. Task 4: Bid Phase Support Services

BRADY will provide bid phase support services as defined in the RFP. This includes attending all meetings, responding to questions, issuing addenda, etc. outlined in the RFP. We further commit to providing a comprehensive package of conformed documents.

5. Task 5: Additional Optional Services (Optional)

A. Task 5.1 Division of Drinking Water (DDW) Coordination



As indicated in Task 3.6.1, this optional task will be to engage and coordinate with SCE regarding the relocation of the utility poles along the frontage of the reservoir site. As noted previously, BRADY is prime consultant to utility companies and is experienced with utility structures. We would be happy to open communication with SCE on this subject and determine how involved this task would be.

B. Task 5.2 Reservoir Mixing

A reservoir of this size would benefit from mixing. A circular reservoir, similar to what the City has in their system benefits from it's geometry when compared with rectangular There are many mixing products available. It could be that if the reservoir is filled from the 1010 PZ, there would be sufficient energy to direct the flow tangent to the tank wall and "swirl" the water. The inlet pressure could also be used with a TideFlex system by installing a manifold inside the tank and distribute the water using duck-bill fittings. There are also active mixers such as PAX, GridBee, TankShark, and others that actively mix the water. If this option is invoked, the Design Team will assist in specifying an appropriate system.

C. Task 5.3 CFD for Reservoir Water Quality

BRADY has in-house the ability to simulate the water inside the reservoir to determine it's ability to mix. This simulation is used on many reservoirs, clearwells, chlorine contact tanks, thermal energy storage, and others. This option will perform two simulations and a cover report commenting on the mixing of those scenarios.

D. Task 5.4 Solar Power System Specification

In recent years municipalities have been capitalizing on the open space on top of reservoirs. As the estimated diameter of the new 925-1A reservoir is 196-ft, nearly 30,000 sq ft could be available for solar power generation. As there are many different types of systems and installations, this option will specify a performance-type spec for a contractor to bid on. This will help that the latest technology and economical system is available.

E. Task 5.5 Landscape Design

After decisions are determined from the DAB. The Design Team would welcome the opportunity to combine the landscape concept into the Project Working Drawings and Specifications. This would involve taking on a landscape designer as a subconsultant for this task. As BMLA is already on the team, they would be our first choice for this task.

F. Task 5.6 Architecture

Addendum 2 of the RFP mentions that the eventual project will include a building with control room, break room, OSCG room, backup generator room, etc. Should the City wish to incorporate this into the Project, we are happy to solicit architects to perform this work.

8. FEE PROPOSAL

The fee proposal is provided in the Appendix and is broken down by tasks.

9. INSURANCE

BRADY can meet the requirements per Exhibit B and will maintain this insurance throughout the Project if selected. Proof of insurance is provided in the Appendix.

10. LITIGATION

BRADY has no history of litigation.

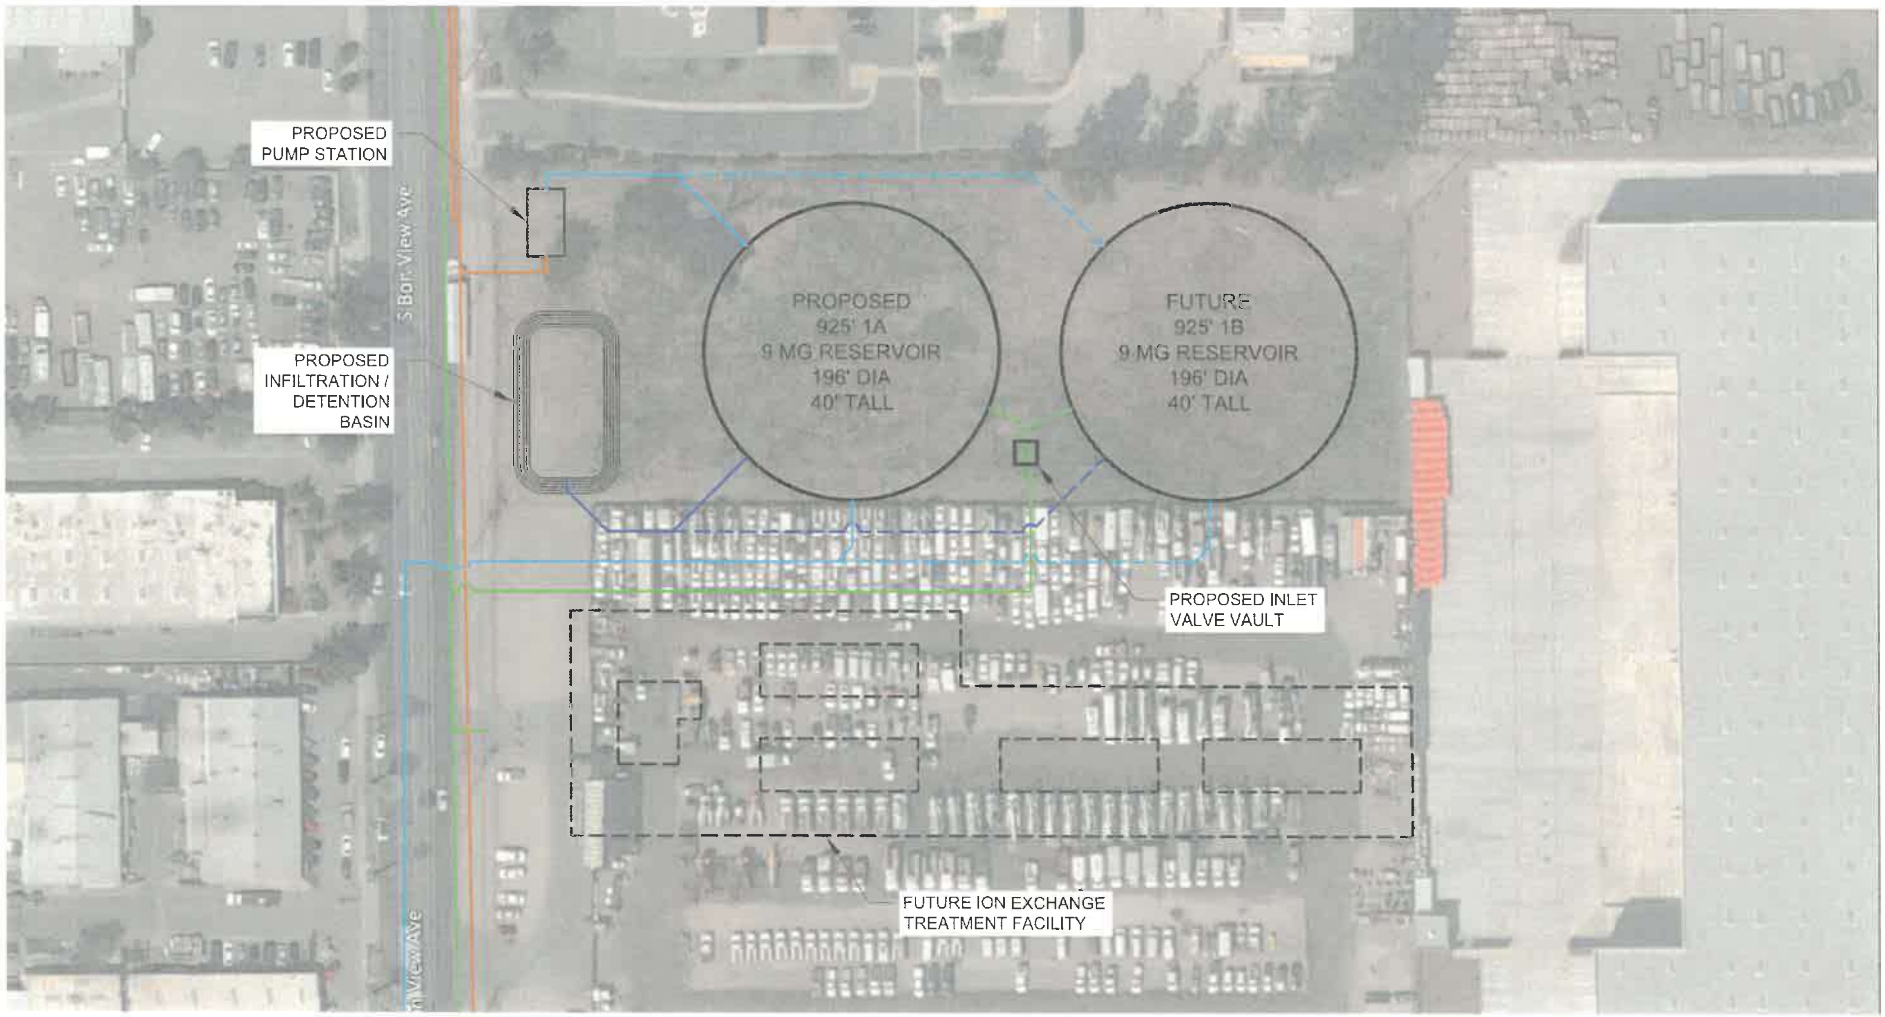
11. OTHER INFORMATION

Please refer to the biographical information in the resumes, and project experience for this information.

12. CERTIFICATION OF PROPOSAL

The undersigned hereby submits its proposal and, by doing so, agrees to furnish services to the City in accordance with the Request for Proposal (RFP), and to be bound by the terms and conditions of the RFP.

I do not, neither does BRADY have any conflicts of interest with any of the activities outlined in or that may arise out of the performance of the services requested in this RFP.



Karl C. Kuebitz

4. GEOTECH SCOPE

Research: The design team's geotechnical engineer, Leighton will first review available geotechnical reports, literature, maps and historical aerial photographs relevant to this site. This task has been initiated while preparing this proposal.

Site Utility Clearance: At the start of our involvement, proposed boring locations will be discussed with the City, prior to utility clearance and drilling; and adjusted based on the agreed-upon probable pipeline locations and existing site access conditions. Existing overhead and buried utilities, as well as traffic patterns may limit feasible boring locations and may require borings to be offset from the actual proposed alignment or reservoir footprint. We will notify DigAlert (811) at least 48 hours prior to drilling to locate buried utilities; but they will have limited data on the proposed reservoir site that is currently gated. We would ask you to provide us with information (utility plans) available regarding locations of underground utilities and easements onsite.

In preparation for the field exploration, Leighton will apply and obtain an encroachment permit and traffic control permit from City of Ontario to drill exploratory borings within existing street rights-of-way. Leighton will also mark out locations of proposed borings and notify Dig Alert (811) as mentioned above.

Field Exploration Program: We propose to drill, log, and sample a total of twenty-two (22) borings as part of this project. Three (3) hollow-stem auger borings will be advanced for the proposed reservoir, conceptually with borings at opposite sides forming a triangular grid within the proposed tank footprint. One boring will be advanced to a depth of 50 feet (or practical refusal) and the others will be advanced to depths of 25 feet (or practical refusal). For the proposed pipeline alignment, nineteen (19) hollow-stem auger borings, per the requirements of the RFP at a maximum spacing of 1,000 linear feet, will be advanced within existing streets at locations accessible to a conventional truck-mounted drill rig to depths of 10 to 15 feet below existing grade. The actual depth of boring will be dependent on the proposed pipeline invert elevation. These borings will be logged by a member of our technical staff. Representative bulk and relatively undisturbed soil samples will be collected at specified intervals and transported to our geotechnical laboratory for testing. Standard Penetration Tests (SPT) will be conducted at selected depth intervals and where there is too much gravel for ring-lined (California) sampling. Penetrated pavement sections will be measured to the nearest ¼ inch.

Immediately following logging and sampling, our borings will be backfilled with soil cuttings within the proposed reservoir site and borings conducted within the City Right of Way will be backfilled with a slurry backfill and patched at the surface with hot asphalt mix pavement repair as requested in the RFP. For the purposes of this proposal, we assume minor amounts of soil cuttings that cannot be replaced in boreholes can be placed on common or shoulder areas where soil is already exposed within the proposed reservoir site. Our Scope of Work does not include costs to dispose of soil cuttings. Handling of discolored or odorous soil thought to possibly contain hazardous materials is not included in our scope of work.

Traffic control is anticipated to be needed for all boring locations along the proposed transmission main line alignment locations utilizing a single flagger for most of the alignment. The proposed pipeline alignment south or Riverside Drive will need the use of two traffic control technicians due to the width of the existing roadway. Traffic control is also anticipated to be needed during hot asphalt mix pavement repair as required by City of Ontario permit requirements. Some offset from the existing or proposed pipeline alignment should be anticipated to avoid conflicts with existing underground or above ground utilities and impact on on-going traffic.

Geotechnical Laboratory: Geotechnical laboratory tests will be performed on selected, representative soil samples at our in-house multi-certified laboratory for modified Proctor (ASTM D 1557) laboratory maximum dry density and optimum moisture content, in situ dry density and moisture content, grain size distribution, sand

equivalent, expansion index, Atterberg Limits, collapse characteristics, consolidation, sulfate and chloride content, resistivity and pH.

Geotechnical Analyses and Report: We will perform geotechnical analyses and prepare a geotechnical report signed and stamped by a California licensed Geotechnical Engineer (GE). In this report we will present our geotechnical findings, conclusions, and recommendations for seismic design of these tanks and tank foundations, and develop geotechnical recommendations for pipeline design, backfill and reconstructing pavements. As a minimum, preliminary geotechnical recommendations will meet the requirements discussed in the RFP, but will also include recommendations for earthwork and remedial grading, fill placement, foundation design parameters, seismic design parameters, retaining wall design parameters, cement type, and utility trench backfill. Our report will include a geotechnical map showing locations of our borings. Hard copies and electronic copies of the reports and exhibits will be provided as discussed in the RFP.

Preliminary Design Report and Post Report Consultation: We will provide input from a geotechnical engineering perspective during the preparation of the Preliminary Design Report (PDR) this may include attendance to team meetings and review of preliminary documents. We will also review draft plans and specifications pertaining to the geotechnical aspects of this project during design. We will provide services during bidding to respond to contractor's questions pertaining to geotechnical aspects of this project and prepare a clarification letter(s).

5. ADDITIONAL SPECIFICATION SECTIONS

Spec Section	Title	Comment
00220	Soils Investigation	Add requirements for differential settlement and site-specific long-period seismic response per ASCE 7-22 and ACI 350.3-20 which are not yet adopted, but eventually will be.
02205	Tank Site Preparation and Base Ring Construction	Add option for prestressed concrete tank
03150	Formwork	Add option for circular tank formwork
03200	Reinforcing	Add option for prestressed reinforcement
03300	Cast-in-Place Concrete	Add requirements for ACI 350 concrete, fly ash, and specific aggregate gradations for concrete and shotcrete
05100	Structural Metals	Include passivation for stainless steel
07920	Sealants and Caulking	Include NSF requirements for sealants inside a tank
0987X	Coating for Concrete Tank Exterior	Add specs for breathable elastomeric coatings for concrete tanks
133XX	Prestressed Concrete Tanks	Add specific information for AWWA D110, Type I tanks

7. SECTION 6 TABLE

As requested in Section 6 of the RFP, please note the table below.

Has any of the following occurred?		
Failure to enter into a contract or professional services agreement once selected.	**NEVER**	
Withdrawal of a proposal as a result of an error.	**NEVER**	
Termination or failure to complete a contract.	**NEVER**	
Debarment by any municipal, county, state, federal or local agency.	**NEVER**	
Involvement in litigation, arbitration or mediation. Conviction of the firm or its principals for violating a state or federal antitrust law by bid or proposal rigging, collusion, or restrictive competition between bidders or proposers, or conviction of violating any other federal or state law related to bidding or professional services performance. Knowing concealment of any deficiency in the performance of a prior contract.	**NEVER**	
Falsification of information or submission of deceptive or fraudulent statements in connection with a contract.	**NEVER**	
Willful disregard for applicable rules, laws or regulations.	**NEVER**

Karl Kuebitz, PE
Project Manager

YEARS EXPERIENCE
23 Years

EDUCATION
MS in Structural Engineering. University of California San Diego, La Jolla, CA.

LICENSES / CERTIFICATIONS
Professional Civil Engineer in CA (67975, June 2025), NV, HI, and UT.

PROFESSIONAL AFFILIATIONS
American Society of Civil Engineers (ASCE)

Voting Member of ACI 350, Environmental Engineering Concrete Structures and Commentary

Voting Member of ACI 372, Guide to Design and Construction of Circular Wire- and Strand-Wrapped Prestressed Concrete Structures.

Associate Member of ACI 376, Code Requirements for Design and Construction of Concrete Structures for the Containment of Refrigerated Liquefied Gases and Commentary

Professional Summary
Karl is a civil and structural engineer with over 22 years of professional experience. He specializes in infrastructure improvements in the municipal and utility markets, including water and pipeline structures, large water storage structures, and utility and control integration for water treatment and handling projects. He is the engineer of record of over 80 water-retaining structures. Karl has actively involved with ACI and is a voting member of the ACI 350 committee for environmental structures. Karl spent 9 years designing and constructing 45 prestressed concrete tanks and associated structures in the Middle East, including the largest externally prestressed concrete tanks in the world at 42 million gallons. Karl brings a wealth of knowledge and experience to structures for water-related projects.

Project Experience

INDEPENDENT WATER POWER PLANT, UMM AL HOUL, QATAR
Designed 168 million gallons of water storage with associated appurtenances. Four 42MG tanks were designed and constructed to the AWWA D110 Standard and other international specification. This was part of a 2400 MW power and desalination plant. The tanks were commissioned 15 months after the start of construction. These tanks are designed for extreme environmental and functional requirements and optimized for cost and construction efficiency. Karl was onsite for the entire duration as the design and QA/QC manager.

8.0 MG ARGO DRAIN TANK, LOS ANGELES, CA
The Argo Drain Sub-Basin Facility is located on the Los Angeles World Airports property and accommodates a watershed area of approximately 2,200 acres. The Argo Drainage Channel will transport storm water via gravity to a diversion structure and the flow will be treated and pumped into underground infiltration galleries to recharge the groundwater basin. The Facility will improve water quality in the Santa Monica Bay and nearby beaches. The 8MG tank employed a gravel bottom to permit the infiltration. Columns with individual spread footings supported a slab capable of HS-20 loading and native landscaping.

10 MG SKY MOUNTAIN RESERVOIR, COACHELLA VALLEY WATER DISTRICT, THOUSAND PALMS, CA
The project location of this reservoir is less than 1 mile from the San Andreas Fault. This tank features uplift cables to resist seismic sloshing and employs a robust anchored-flexible connection at the wall base to resist a base shear of 24,700 kips. The final shotcrete material on the exterior surface used and integral mineral-based color for maintenance-free service.

2.5 MG AND 3.5 MG FLOW EQUALIZATION TANKS, OCWD, HUNTINGTON BEACH, CA
Designed two flow equalization tanks 2.5MG and 3.5MG per AWWA D110. These tanks are designed on the Santa Ana flood plain in an area susceptible to liquefaction and lateral spreading. The structure was carefully designed for multiple catastrophic loading conditions to ensure that it was available during an emergency situation. The base slab spanned multiple deep soil cement mixing elements. The structure was designed for lateral tilting distortion while maintaining an anchored-flexible base connection similar to base-isolation.

WEST BASIN MUNICIPAL WATER DISTRICT, EL SEGUNDO, CA
Designed an elevated concrete roof slab which supports 5 vertical turbine pumps each weighing 6000 lbs. Slab design included vehicle and mechanical loading and an eccentric vibration analysis. The column-supported slab spanned 150 feet over an irregular water storage facility. Multiple utility and control lines were integrated into the structure to control the pumps. Solar panels and associated connections were incorporated into the structure.

Christopher Dull, PE
Principal-in-Charge

YEARS EXPERIENCE
34 Years

EDUCATION
B.S., Civil Engineering, University of California, Irvine CA, 1989

LICENSES / CERTIFICATIONS
Registered Civil Engineer, California 48996; Nevada 25328

PROFESSIONAL AFFILIATIONS
American Society of Civil Engineers

Construction Management Association of America

American Water Works Association

Professional Summary
Mr. Dull is a licensed civil engineer in CA and NV with more than 30 years of experience. His work includes all phases of water and wastewater project development; acting as a project manager, project engineer, and/or construction manager. Mr. Dull has coordinated feasibility studies, condition assessments, hydraulic analyses, licensing and permitting, design services, construction management, on-site construction inspection, value engineering workshops, and as-needed contracts.

Mr. Dull has provided construction and program management services for a range of water projects. His responsibilities have included overall construction manager roles, shop drawing review, responses to contractor-initiated requests for clarification and requests for information, coordination of multi-discipline reviews and inspections, review and approval of progress payments, review and negotiation of contractor change order requests, schedule, and cost review, claims mitigation, mediation support, and presentation of project reports to interested parties.

Professional Experience

ZONE 900 RESERVOIR AND PUMP STATION, DESERT HOT SPRINGS, CALIFORNIA (2003): PROJECT MANAGER
Mr. Dull provided construction management support for this project. Project work included managing construction of a new 2,000 GPM groundwater production well, a 2 MG partially buried concrete reservoir, a booster pump station, and two large diameter transmission pipelines. The facilities provide water service to residents in the southern part of Desert Hot Springs. Construction management tasks included submittal review, RFI review, change order review and recommendations, progress payment review, maintenance of an electronic photo log, preparation of a monthly report, attendance at weekly progress meetings and preparation of meeting minutes, and part-time construction activity observation.

ASR PHASE II PROGRAM, WICHITA, KANSAS: PROGRAM MANAGER
Mr. Dull served as the Program Manager for this $300 Million program which completed the final commissioning and start-up phase in 2015. The firm was selected by the City to work as an extension of City staff across all dimensions of the program overseeing multiple design and construction management firms, implementing best practices for program controls, and managing an array of challenging logistics. Our services included Owner's Advisory services for the procurement and oversight of a design-build contractor for the 30 MGD surface water treatment plant. The program provided an aquifer storage and recovery system which includes a 90 MGD river intake on the Little Arkansas River, a 30 MGD water treatment plant, and a 100 MGD well field. Client: City of Wichita Public Works Department. Project Value/Cost: $300M.

CONSTRUCTION MANAGEMENT AS-NEEDED SUPPORT SERVICES, SAN DIEGO COUNTY, CALIFORNIA: PROJECT MANAGER
The San Diego County Water Authority needed to complete multiple projects for their Capital Improvement Program (CIP). Over a ten year period and multiple as-needed contracts and as an extension of the Water Authority's staff, Mr. Dull provided overall project management, which included: 1) On-site inspection of contractor's performance, document control, and field administration; 2) Augmentation of Water Authority staff by performing project management duties including coordinating the day-to-day activities of the project, conducting budget variance cost control analysis, preparing associated reports, and resolving intradepartmental and external issues affecting project progress; 3) Oversight of daily performance of staff assigned to projects (construction managers, resident engineers, contract administrators, field inspectors, etc.); and 4) Claim response/mitigation assistance. Client: San Diego County Water Authority. Representative projects included:

San Diego County Water Works Group

Professional Summary
Richard Brady is the founder and Chief Executive Officer of Richard Brady & Associates (BRADY). He has over 43 years of experience in water resources planning and in the design, management, and construction administration of drinking water supply projects. His fields of specialization include: predesign, design, value engineering, construction management, and start-up services for many large drinking water treatment plants, pump stations, and reservoir projects. Mr. Brady is a graduate of Harvard Business School's "Leading Professional Service Firms" and the "Owner-President Management" program. He is also an internationally-recognized water engineer, and a contributing author to the AWWA's "Water Treatment Plant Design". He has served as the Program Manager for the City of San Diego Water Infrastructure Master Plan, and his design experience includes nationally-acclaimed water treatment facilities.

Project Experience

PROJECT MANAGER, ALVARADO WATER TREATMENT PLANT EXPANSION AND REHABILITATION, PHASES I & II, SAN DIEGO, CA (CITY OF SAN DIEGO)
Mr. Brady served as Project Manager on this multi-phase Water Treatment Plant Expansion and Rehabilitation from 1989-2005. The project involved the design of new sedimentation basins, ozone contactors, and filter backwash facilities, as well as upgrades and rehabilitation to the existing sedimentation basins, filters, and operations building. Responsible for the preparation of a preliminary design study for the existing filter backwash water storage and conveyance facilities, and evaluation of flocculation and sludge removal equipment for new and existing basins. Provided technical support and project background information to the VE team, and an evaluation of the impact due to implementing VE ideas. Participated in all technical review meetings, assisted in preparation of project design schedules, and reviewed construction cost estimates. Prepared periodic design progress reports, design calculations, and technical documents concerning treatment capacity for review by the California Department of Health Services. Prepared permit review packages for the City's Development Services-Department.

PRINCIPAL-IN-CHARGE, 17 MG CONVENTIONALLY REINFORCED AND BURIED LOS COCHES RESERVOIR, PADRE DAM MUNICIPAL WATER DISTRICT
Mr. Brady was responsible for predesign, design, and construction management. The 17 MG Los Coches Reservoir is a 216-foot x 456-foot x 25-foot deep conventionally reinforced concrete reservoir constructed by the Padre Dam Municipal Water District between 1983 and 1985. The reservoir is completely buried and covered with 18-inches of soil. Two hundred and twenty 20-inch diameter columns support the reservoir roof. The reservoir is separated into two cells by a center-dividing wall. The inlet and outlet piping are 36-inches in diameter. The reservoir construction involved the placement of over 8,000 cubic yards of concrete and more than 20,000 linear feet of waterstop and joint sealant. There were no change orders on this project.

PROJECT MANAGER, SEISMIC EVALUATION STUDY OF THREE PRESTRESSED CONCRETE RESERVOIRS, CITY OF CERRITOS Performed a seismic evaluation study of three prestressed concrete reservoirs. The first reservoir is a 12 MG partially buried concrete reservoir. The second and third are both 6 MG above ground reservoirs. Investigated current condition and structural integrity of each reservoir through an examination of all project related documents. Participated in a site investigation, and performed detailed analytical structural calculations, and developed a preliminary structural design and cost estimate to retrofit the reservoirs.

PRINCIPAL-IN-CHARGE, INTEGRATED FACILITIES PLAN, SAN DIEGO, CA (PADRE DAM MUNICIPAL WATER DISTRICT)
Mr. Brady served as Principal-in-Charge and assisted in managing the development of the Padre Dam Municipal Water District's Integrated Facilities Plan (IFP). The IFP analyzed potable water, recycled water, and wastewater handling needs and developed strategies to meet peak demands. The IFP document updated the previous PDMWD water and wastewater master plans and recycled water master plans.

BRADY

Robert "Jud" Warren, PE, BCEE

Pipeline Design Manager

YEARS EXPERIENCE
42 Years

EDUCATION
BS Civil Engineering, University of Houston, TX 1978

LICENSES / CERTIFICATIONS
Professional Engineer, California, No. C43272, Arizona, No. 20032

Certified Construction Documents Technician, Construction Specifications Institute (CSI)

Board Certified Environmental Engineer, American Academy of Environmental Engineers (AAEE)

Professional Summary

Mr. Warren has over 40 years of experience in planning, engineering, and construction of water and wastewater facilities, including new facilities and projects that require the use of trenchless technologies such as sliplining, microtunneling, and jack and bore. He has extensive wastewater systems experience, including headworks, liquid stream, activated sludge, solids processing and handling, odor control, and effluent reclamation and reuse, as well as design for sewer pipelines, pump stations, and septic conversion. Mr. Warren has designed new facilities and expansions of plants for water treatment including conventional treatment, membrane, reverse osmosis, desalination, UV disinfection, and groundwater treatment. He has also planned and designed water conveyance projects involving operations, energy, and condition assessments for plants, pipelines, and relining. Additionally, he has served in many roles in projects as Principal-In-Charge and Quality Assurance/Quality Control. As Principal-In-Charge, Mr. Warren has been responsible for overseeing all factors for delivery of a project. Mr. Warren has received national recognition from the American Academy of Environmental Engineers for an innovative repair of a 102-inch diameter sanitary sewer in San Diego, California and from ASCE for the Alvarado Water Treatment Plant Expansion.

Project Experience

PROJECT MANAGER, RESERVOIR DESIGN AND CONSTRUCTION, CITY OF SAN DIEGO

Mr. Warren provided construction phase services for two 21-million-gallon reservoirs for the Alvarado water treatment plant. The pre-stressed concrete reservoirs were an integral part of the city's water delivery system. Internal baffling was constructed to help achieve regulatory disinfections requirements (CT). Approximately 1,000 feet of 72- and 96-inch cement mortar-lined and coated welded-steel water pipeline were also constructed as part of this project. He evaluated, recommended, and oversaw final disposition of all claims during construction by the contractor.

PROJECT PRINCIPAL, EARL THOMAS RESERVOIR REPLACEMENT CONSTRUCTION, CITY OF SAN DIEGO

As project principal, Mr. Warren managed the construction phase services for the replacement of the 50 MG Earl Thomas reservoir for the Alvarado Water Treatment Plant. The pre-stressed concrete reservoir features a roof designed for vehicle traffic.

PROJECT MANAGER, UNIVERSITY AVENUE PIPELINE REPLACEMENT, CITY OF SAN DIEGO

Project manager and engineer of record responsible for the final design services for this pipeline replacement project. The project includes removal of approximately 3 miles of pipe and replacement with 24-inch diameter pipe in a very congested neighborhood and streets in San Diego. CalTrans permitting was required for the tunneling crossings of HY 163.

PROJECT MANAGER, LETTERMAN PUMP STATION & PIPELINE, EASTERN MUNICIPAL WATER DISTRICT

Mr. Warren served as project manager during the construction phase for the Letterman booster station in Perris. The new pump station was constructed in a neighborhood requiring reduction of noise. The station included back-up power generation and included 1000 linear feet of 36-inch diameter CMLC steel pipe connection to the existing distribution system.

ASSISTANT PROJECT MANAGER, ALVARADO WATER TREATMENT PLANT, CITY OF SAN DIEGO

Mr. Warren served as assistant project manager and was responsible for the design and served as project manager for construction administration services for the early operation improvements. He evaluated, recommended, and administered final disposition of all claims during construction by the contractor. The project included construction of new polymer and caustic chemical feed and storage facilities, replacement of sludge pumping facilities, and improvements to the filter backwash system.

Amanda Del Bello, PE

Reservoir Site Design Manager

YEARS EXPERIENCE
15 Years

EDUCATION
MS Civil Engineering, San Diego State University, CA, 2015

BS Civil Engineering, Manhattan College, Riverdale, NY, 2007

LICENSES / CERTIFICATIONS
Professional Civil Engineer, California, No. C78825

Association of Diving Contractors International SSA Supervisor

NHI Safety Inspection of In-Service Bridges Certification (FHWA-NHI 130055)

NHI Underwater Bridge Inspection Certification (FHWA-NHI 130091)

USCG Merchant Mariner 100 Gross Ton Master

OSHA 30-hour

EM385 1-1 40-hour

Confined Space Entry Certificate

Competent Person for Fall Protection

Emergency Responder CPR/AED/First Aid, PADI Emergency Oxygen

Professional Summary

Ms. Del Bello has over 15 years of experience in the engineering field with an emphasis in structural and civil engineering. As Project Manager she plays a key role in the inspection, design, project deliverables, and construction services for marine structures, bridges, utility vaults, reservoirs and other infrastructure. As a team leader and commercial diving supervisor, she has successfully conducted and managed underwater and above water inspections, follow-on design services, and construction support for a variety of clients.

She has participated in design for new structures and design of repairs for numerous facilities including piers, wharves, seawalls, bridges, marinas, retaining walls, reservoirs, and utility vaults. Ms. Del Bello is a commercially trained ADCI Surface- Supplied Air Diving Supervisor and is PADI SCUBA certified.

Experience includes inspection and rehabilitation design of engineering structures for the U.S. Naval Facilities Engineering Command (NAVFAC –Southeast, Southwest, Marianas, and Pacific), and Engineering Service Centers; San Diego Unified Port District; Port of Los Angeles; Port of Long Beach; other government agencies; and private institutions.

Ms. Del Bello is proficient in AutoCAD, Lpile, Mathcad, RetainPro, SAP2000, SupportIT and Xtract.

Project Experience

PROJECT MANAGER, HB 5 MG RESERVOIR REHABILITATION, VISTA IRRIGATION DISTRICT, CA

Project Manager responsible for inspection, condition assessment, design of repairs, and construction support for this prestressed concrete above ground reservoir and yard piping. This effort led to design for replacing the concrete dome with an aluminum dome, seismic upgrades and yard piping replacement including new 18-in. inlet/outlet piping, electrical controls and conduits, and new underground vault with associated piping. Amanda led the BRADY design team for this $285,000 design effort and was responsible for coordinating all the civil and structural project deliverables including contract documents, basis of design report, plans, specifications, and bid documents. During construction, BRADY acted as the General Contractor and Construction Manager for the $6.3 Million construction effort.

PROJECT MANAGER, RESERVOIR STRUCTURAL CONDITION ASSESSMENT AND RECOMMENDATIONS, CITY OF UPLAND, UPLAND, CA.

Conducted above and below water inspection of a 10MG concrete reservoir. The reservoir was constructed in 1975 and exhibited structural defects. Responsible for inspection, condition assessment report, and structural recommendations for repair and or replacement. A concrete coring and testing study supported plans to repair instead of replace defective portions of the reservoir. Design of repairs is planned for the next phase.

PROJECT MANAGER, PECHSTEIN 20 MG RESERVOIR INSPECTION, VISTA IRRIGATION DISTRICT, CA

Responsible for structural inspection of the partially buried prestressed concrete reservoir with emphasis on the 1960s era glulam beam and light framed roof structure. Inspection, structural analysis and report focused on whether the roof structure was eligible for repair or replacement. Structural defects and deficiencies in the design were found and a new aluminum dome roof was recommended to be installed to increase the reservoirs useful life. While design for the roof replacement is implemented, design of temporary repairs were made.

PROJECT MANAGER, PROJECT MANAGER – TWO STEEL 8 MG RESERVOIRS, CITY OF WESTMINSTER, CA

Responsible for inspection, seismic analysis, condition assessment report, recommendations and cost estimate which resulted in plans for recoating the exterior and interior of the steel reservoirs.

National Storm Water Summit

ABAG NPDES Erosion Control Seminar

Stormwater Pollution Prevention and Stormwater Quality Control Training

Professional Summary

Brandon Davis has extensive management and design experience on projects involving street and highway design, green infrastructure, sewer, water, and storm drain design, hydrologic and hydraulic analyses, pavement rehabilitation design, retaining wall design, site planning and land development. Nearly every project includes Construction Phase Engineering Support. Brandon has provided value engineering, bid support, construction submittals, contract administration, construction claims and disputes and project closeout services during construction on the following project types:

- Public roadways & street improvements
- Green Infrastructure
- Bikeways
- Drainage detention/retention projects
- Utility distribution and collection systems
- Parking lots
- Residential subdivisions
- Schools and other institutional facilities

This broad range of experience gives him the ability to identify the potential impacts of design and construction issues on a project as a whole and to identify possible solutions on projects with complicated constraints.

His management responsibilities include supervision of engineering design and preparation of plans, specifications and estimates, and coordinating with clients, agencies and contractors regarding project design. He has assisted clients obtain project approvals and permits from agencies such as Caltrans, the Regional Water Quality Control Board, the Department of Fish and Wildlife, the Coastal Commission, the Army Corps of Engineers and the Division of the State Architect among others.

Areas of Expertise

- Streets & Highways
- Green Infrastructure
- Bikeways
- Sanitary Sewer Collection
- Storm Drainage Systems
- Underground Utility Design
- Site Development
- Special Districts Management

Project Experience

- 2020/2021/2020 Pavement Rehabilitation Projects, Orinda, CA
- Smooth Streets Program Phases 1 & 2, San Mateo, CA
- John Daly Boulevard Complete Streets Project, City of Daly City, CA
- SR1 San Pedro Creek Bridge Replacement/Creek Widening, Pacifica, CA
- Oyster Point Blvd Streets & Utilities, City of South San Francisco, CA
- Lyon Hoag Neighborhood Traffic Calming, Burlingame, CA
- Santa Cruz & Middle Ave. Pavement Rehabilitation, Menlo Park, CA
- 2014-2015 Street Pavement Rehabilitation, City of Menlo Park, CA
- Ralston Corridor Pedestrian Improvements & Traffic Analysis, Belmont, CA
- San Pablo Avenue Green Stormwater Spine, Various, CA
- Avenues 2-1/2-2 Sewer Rehabilitation, San Bruno,
- S. El Camino Area Water Main Replacement, Burlingame, CA

Jorge Balderrama, PE

Civil Engineer/ Drainage

YEARS EXPERIENCE
6 Years

EDUCATION
BS Structural Engineering, University of California, San Diego, CA, 2015

LICENSES / CERTIFICATIONS

Professional Engineer, CA No. 93702

Authorized to perform SDG&E Overhead Electric, Underground Electric, and Gas design (AD & CD).

City of San Diego Recycled Water Site Supervisor, ID#4480

Certified Erosion, Sediment, and Stormwater Inspector

Qualified SWPPP Practitioner, Certificate #26118

Professional Summary

Prior to joining BRADY, Mr. Balderrama worked as a Qualified SWPPP Practitioner (QSP) performing stormwater inspections on various SDG&E sites. In his role as a QSP, Mr. Balderrama gained invaluable field experience and was responsible for ensuring compliance with local, state, and federal stormwater regulations. Since joining BRADY, Mr. Balderrama has diversified himself as an engineer by taking on new duties, such as engineering design, project management and construction administration. In these roles he has proven instrumental in the permitting and design of transmission towers, reservoirs, and underground structures.

Project Experience

RESERVOIR 15 ENHANCEMENTS, CITY OF UPLAND, UPLAND, CA SITE SUPERINTENDENT

Onsite superintendent for the temporary strengthening of City of Upland 7.5MG reservoir. Strengthening was achieved by installing prestressed strands at multiple locations across reservoir height. Work included structural inspection of reservoir, review of the contractor's schedule and submittals, submittal tracking, daily photo' logs as well daily/monthly progress reports. In this position Mr. Balderrama was onsite full-time in a construction administrative position where he was able to showcase his strong communication skills serving as the primary link between the City of Upland and multiple contractors.

R2A PROJECTS, SDG&E, SAN DIEGO, CA

Project management and coordination of professional consultants performing structural analysis to determine if existing SDG&E structure can adequately support new attachments such as SCADA equipment, conductors, etc. In his role, Mr. Balderrama serves as the intermediary between SDG&E and professional consultants. Tasks include procuring required information and documents, management of project budget/schedule, as well review of final deliverables to ensure that all SDG&E requirements (Field Drilling Verification, Climbing Space Check, etc.) are satisfactorily addressed. Some R2A projects that Mr. Balderrama has recently supported are as follows: R2A 368 TL682 Z118079, R2A C212 TL682 Z118232, and R2A 143 TL23013.

SDG&E SWPPP SERVICES, SAN DIEGO, CA. QUALIFIED SWPPP PRACTITIONER

In his previous employment, Mr. Balderrama served as a Qualified SWPPP practitioner on various SDG&E projects such as Miguel Substation Drainage Improvements and the Mid-Coast Corridor Gas Relocation project. As a site QSP, his duties consisted of performing site inspections to ensure proper BMP implementation, monitoring site runon/runoff water, and sampling offsite discharge to ensure proper stormwater regulation compliance. In this position, Mr. Balderrama had the responsibility of coordinating with contractors to ensure proper BMP installation, maintenance, and scheduling.

LIFT STATION 9 REHABILITATION, DANA POINT, CA LEAD DRAFTER

Lead drafter of design plans for the rehabilitation of South Coast Water District's Lift Station 9. Mr. Balderrama undertook the AutoCAD drafting duties for this project from start to finish. Through this responsibility, Mr. Balderrama collaborated with other Brady engineers to successfully address the District's needs and deliver a set of plans satisfied the District's unique

BRINE LINE PROJECT – HARMONY GROVE TO BROADWAY, CITY OF ESCONDIDO, ESCONDIDO, CA.

As a member of construction management team, Mr. Balderrama collaborated with colleagues, City of Escondido staff, and contractors daily to progress project. Project included construction of approximately 13,000 LF gravity pipeline to convey brine water within the city's recycled water program. In his role, Mr. Balderrama performed site inspections to track construction progress as well as ensure construction was completed in adherence with construction specification and drawings. In addition, Mr. Balderrama also managed project SFTP server with all pertinent construction documents including but not limited to daily field reports, photograph logs, RFIs, submittals, etc.

BRADY

Jim Bowen, PE
Cost Estimating

YEARS EXPERIENCE
35 Years

EDUCATION
B.S. Mechanical Engineering, The Pennsylvania State University, 1988

LICENSES / CERTIFICATIONS
California Professional Engineer, #33082 (Mechanical)

PROFESSIONAL AFFILIATIONS
American Society of Mechanical Engineers

Professional Summary

Mr. Bowen specializes in engineering, design, management and quality control of environmental and construction contracts. He has worked extensively in proposal and scope of work generation, cost estimating, construction management, project management, budget and cost analysis, project scheduling, supplier and subcontract management, drawing and specification development, regulatory compliance, and project closeout. Mr. Bowen has a thorough understanding of Design-Build and Design-Bid-Build project delivery methods and has direct experience with construction means and methods; manufacturing processes; fiberglass reinforced plastic and metal fabrication; electrical/mechanical system design and installation; start-up, training, operation and/maintenance activities.

Numerous private and public contract mechanisms under which Mr. Bowen has successfully completed projects include job order contracts, indefinite delivery/indefinite quantity contracts, multi-award contracts, basic ordering agreements, federal supply schedules, firm fixed-price, on-call, and cost plus contracts.

Mr. Bowen served as the Quality Control Program Manager on the Nation's first Environmental Multi-Award Contract (EMAC I) and performed as Project Manager and Deputy Program Manager on projects completed under the Navy's Environmental Job Order Contract (EJOC II).

Project Experience

PROJECT MANAGER – NEW 7.5 MG RESERVOIR, CITY OF UPLAND, CA

Project manager for the construction of a new 7.5 MG prestressed concrete reservoir, chlorine injection system, site amendments, and an onsite infiltration basin per the San Bernardino County Stormwater Program Water Quality Management Plans (WQMP). Responsible for the preparation of contract documents, including plans, specifications, calculations, and cost estimates. Managed project budget, construction support, Contractor RFI's and Submittals.

PROJECT MANAGER – 5 MG HB RESERVOIR REHABILITATION, VISTA IRRIGATION DISTRICT, CA

Project Manager during construction of new inlet/outlet, yard piping and metering vault to improve reservoir mixing, water quality, and operations. Oversaw civil site work including grading, paving, and general site work. Oversaw structural upgrades including installation of a new aluminum dome, new concrete footing, and addition of prestressing strands.

PROGRAM MANAGER: N62473-11-D-0813 NAVAL BASE POINT LOMA, JOB ORDER CONTRACT (JOC) FOR DESIGN-BUILD OF HEAVY AND CIVIL ENGINEERING CONSTRUCTION

As Program Manager for the NBPL FEAD JOC, Mr. Bowen oversees and manages all incidental engineering and construction activity for this multi-year IDIQ contract. All task orders to date have been completed on time and on budget, with no contractor-initiated change orders, and no liquidated damages. All task orders to date have been negotiated on a firm fixed price basis, and are issued as a design-build performance-based task order. This contract involves the management of multiple sites and multiple task orders, which at most times are running concurrently. The work associated with this contract to date has included natural gas distribution, petroleum-based fuels, oils, or lubricants (POL) and facilities type projects.

PROJECT MANAGER: N62473-12-C-1605 NAF EL CENTRO, DESIGN-BUILD REPAIR WATER TANKS 334 & 365.

Design-Build repairs and modifications to two existing water reservoir tanks. Tank #334 is a 1,000,000 gallon tank that required the demolition of the existing wood roof structure, rehabilitation of the interior, erection and placement of a new aluminum geodesic dome roof and modification to the overflow piping system. Tank #365 is a 1,500,000 gallon tank that required repair of the existing surfaces. Both modifications included refurbishing of inlet & outlet piping along with providing new ladders and ancillary equipment.

- HEC-RAS
- MATLAB

Professional Summary

Mr. Murawsky is a civil engineer specializing in water distribution and storage systems with a background in water/wastewater treatment for both centralized and decentralized systems. He has experience assisting with numerous reservoir, pump station, and utility vault inspections and the design and drafting of several extensive projects. His design experience includes potable water reservoirs, pump stations, pressure reducing stations, disinfection facilities, flow control and metering installations, distribution pipelines, and stormwater conveyance systems. His attention to detail and proficient use of AutoCAD Civil 3D aid in creating site plans, grading plans, pipe alignments and profiles, and detailed design drawings.

Professional Experience

PROJECT ENGINEER/DESIGNER – 1655-1 0.5-MG RESERVOIR, 1655 HYDROPNUEMATIC PUMP STATION MODIFICATION, & PRESILLA DR PIPELINE REPLACEMENT, OTAY WATER DISTRICT, CA

The project consisted of the design of a new partially buried 0.5-MG prestressed concrete reservoir to augment the existing hydropnuematic pump station. Designed the inlet, outlet, drain, and overflow piping for the reservoir, which included a below grade valve vault. Prepared a grading, drainage, and paving plan for the undeveloped site. Computed hydrology calculations to properly size drainage features and energy dissipator structure. Coordinated with suppliers to design a chloramine injection/mixing system for the new reservoir. The project also consisted of modifications to the existing pump station and replacement of asbestos cement pipe that no longer met the pressure requirements of the distribution system.

PROJECT ENGINEER/DESIGNER – PIER UTILITY REPLACEMENT, CITY OF OCEANSIDE, CA

Prepared demolition and design bid documents for the replacement of an existing 6" ductile iron waterline, 4" reinforced thermosetting resin sewer force main, and three sewer sump systems, which were suspended under the Oceanside Municipal waterfront pier. Designed a dedicated 6" stainless steel firewater line and 3" stainless steel domestic water line, 4" PVC sewer force main, and three new sewage ejector systems. Provided modifications to the existing valve vault and new backflow assemblies for the fire and domestic pipelines. Prepared hydraulic calculations to comply with the National Fire Protection Association (NFPA) and local fire department requirements. The project also consisted of replacing the electrical lighting conduit and pull boxes, general structural repairs, and the design of an OSHA compliant handrail.

PROJECT ENGINEER/DESIGNER – SUNSET TEMPORARY RESERVOIR REPLACEMENT, CITY OF REDLANDS, CA

During a condition assessment in 2022, BRADY determined that the existing 3-MG welded steel reservoir did not meet seismic code and could suffer significant damage and/or complete failure in a major local seismic event. Therefore, it was recommended to be replaced with a smaller temporary tank, which could provide maximum daily demands plus fire flow. Engineer of Record for the design of a 750,000-gallon bolted steel potable water reservoir as a temporary replacement for the existing 3-MG welded steel reservoir. Prepared plan and profiles for the inlet/outlet, drain, and overflow piping for the new reservoir. Designed site grading plan, gravel road sections to facilitate access to the new site, and chain-link perimeter fence for site security.

PROJECT ENGINEER/DESIGNER/SUPERINTENDENT/SITE SAFETY AND HEALTH OFFICER (SSHO)/INSPECTOR – HB 5-MG RESERVOIR REHABILITATION, VISTA IRRIGATION DISTRICT, CA

Designed new inlet/outlet yard piping and metering vault for the HB reservoir to improve reservoir mixing and water quality. Designed civil site work surrounding reservoir to include grading plan, paving plan, and general site layout. Sized site drainage features for design rain event. Compiled contract documents, including basis of design report, plans, and specifications. On-site, full-time, as the Prime Contractor Superintendent/SSHO/Inspector during construction to manage daily production, site safety, and quality control.

Professional Summary

Mr. Nishimura is a Professional Engineer with 17 years of professional experience in engineering. Mr. Nishimura is also proficient in AutoCad, AutoCad P&ID, AutoCAD Plant 3D, ETAP (Load Flow, Short Circuit, Protective Device Coordination & Arc Flash Analysis), Microstation, Plantspace P&ID, Sketchup, Allen Bradley RSLogix 500/5000, Schneider Electric Modicon Concept/Unity, Control Microsystems Telepace, Allen Bradley FactoryTalk, GE Fanuc Proficy, Wonderware InTouch Schneider Electric ClearSCADA and Emerson Ovation as well as programming experience in Matlab, Visual Basic, C, Java, KML (for use with Google Earth), and relay ladder logic programming. In addition to engineering design work, Mr. Nishimura also has extensive field experience during installation and startup/commissioning of electrical and industrial control systems in the built environment.

Project Experience

ELECTRICAL & CONTROL SYSTEMS ENGINEER, 7.5MGD RESERVOIR AND PUMP STATION, CITY OF UPLAND

The project consisted of a new 7.5 MG prestressed concrete reservoir, chlorine injection system, and site amendments. The project included rehabilitation to the existing pump station consisting of five (5) 1250 gpm 100 hp vertical turbine pumps. The project included new 24" steel inlet, 20" steel outlet, flowmeter, overflow structure, bioswale/stormwater retention basin, sodium hypochlorite storage and injection system, site lighting, security, grading, and demolition. Provided electrical and controls system design, which included SCE coordination, power, grounding, lighting, controls, and integration to the City's SCADA system.

ELECTRICAL & CONTROL SYSTEMS ENGINEER, RESERVOIR 2 AND PUMP STATION, CITY OF FOUNTAIN VALLEY

The project consisted of a new booster pump station, SCADA system, and upgrades to the existing 5 MG reservoir and existing site. Sewer lift station 106 was completely replaced and upgraded. Provided electrical and controls system design, which included SCE coordination, power, grounding, lighting, controls, and integration to the City's SCADA system via the existing fiber optic network.

ELECTRICAL AND CONTROLS SYSTEM ENGINEER, SAN NICOLAS ISLAND PHASE I TANK, NAVAL FACILITIES ENGINEERING COMMAND (NAVFAC)

BRADY was selected by Naval Base Ventura to design and construct a 630,000 gallon pre-stressed concrete water storage tank at Naval Auxiliary Landing Field San Nicolas Island. BRADY teamed with DYK, a long-time teaming partner in BRADY's Water, Wastewater, and Water Resources business line, to design and construct the tank. San Nicolas Island is the most northwesterly of the four southern Channel Islands. The construction of the 630,000 gallon water storage tank will mark the start of a multi-phase improvement project planned for the potable water system on the island. The project design includes a pre-stressed concrete tank with aluminum roof, site grading and drainage, and inlet and outlet pipelines and valves. Assisted in producing the Proposed System Schematics and maps of the zones and alignments.

ELECTRICAL & CONTROL SYSTEMS ENGINEER, MEANLEY RECLAIMED WATER PUMP STATION CHLORINATOR, CITY OF SAN DIEGO/COMNET/CGI INC.

The Meanley Reclaimed Water Pump Station consists of 7 pump that provide reclaimed water to the 790 and 890 zones. The City installed a new chlorinator system that required integration into the City's DCS and SCADA systems. Provided support to update the existing TI/Siemens SIMATIC 545 PLC, integration into the City's Emerson Ovation DCS system, and the Westinghouse WDPF SCADA System.

LICENSES / CERTIFICATIONS
SDG&E Qualified Designer Program Applicant (OH, UG, GAS)

Professional Summary
Mr. Weber is an Electrical & Control Systems Designer with over 25 years of engineering design and field experience. He is experienced in low/medium voltage electrical design, power/arc flash studies, SCADA design, project management, and field technician duties with experience in residential, commercial, micro-electronics, power distribution, mining and water/wastewater industries. Proficient in the use of tools such as AutoCad, Microstation, Rockwell Automation Software, SKM, and ETAP. He has performed on site construction observations and contractor coordination on personally designed projects. Proficient in document and quality control and technical specifications.

Project Experience

Electrical & Control Systems Inspector/Start-Up Engineer, Metropolitan Biosolids Center Centrifuges Replacement, City of San Diego
The Metropolitan Biosolids Center (MBC) is the City of San Diego's state-of-the-art regional biosolids treatment facility. MBC provides two treatment operations including: thickening and digestion of raw solids as well as the dewatering of wet biosolids. This project consisted of providing inspection services and assisting the city in oversite on a design-build project that involved the replacement of six (6) dewater centrifuges. Provided assistance in start-up, electrical testing, functional tests, preparing punch item punch lists, and discussing the progress of the work with the contractor. Electrical construction was inspected for conformance to the contract drawings, industry standards, and applicable codes.

ELECTRICAL DESIGNER, NORTH COUNTY PURE WATER FACILITY, SAN DIEGO, CA
Project consisted of electrical design for the new 34 MGD Pure Water Plant in San Diego. The plant utilizes Ozone, BAC filtration, Ultra filtration, Reverse Osmosis, UV and CO2 systems. The power requirements were 12kV 15MVA Main Electrical Building, medium voltage 1000HP pumps at the pump station, and multiple process systems. The DCS system is networked to the North City plant that also feeds the raw water to the new plant. Smart MCCs and ARC resistant switchgear were incorporated into the design. Multiple valve networks and analyzer networks were part of the design along with a fully integrated security system.

ELECTRICAL & CONTROL SYSTEMS ENGINEER, MISSION TRAILS FLOW REGULATORY STRUCTURE II AND FLOW CONTROL FACILITY, SAN DIEGO COUNTY WATER AUTHORITY
This project consisted of designing a new Flow Regulatory Structure (FRS) and Flow Control Facility (FCF). The FRS included a new Reservoir (FRS II) for storage and flow regulation and an electrical vault. The FCF included two flow control valves that provides controls flows from the FRS to the Water Authority's pipeline. Provided electrical and control systems design, including power, controls, lighting, grounding, coordination with SDG&E, and maintaining strict SDWCA Electrical and SCADA standards in place to maintain consistency across all facilities.

ELECTRICAL & CONTROL SYSTEMS ENGINEER, UPPER VALLE DE LOS CABALLOS REGIONAL PUMP STATION, RANCHO CALIFORNIA WATER DISTRICT
This project consisted of the design of a new pump station for the Upper Valle De Los Caballos (UVDC) region, including a chlorine contact tank, a sodium hypochlorite generation facility, and the pipelines to interconnect from the source wells and to the 1305 and 1380 pressure zones. The UVDC region is currently fed from a single 33kV:4.16kV transformer that distributes 4.16kV power to all existing sites. The new utility service feed and distribution system was designed for the capacity to feed all existing, new, and future loads (4 additional well sites). Provided electrical and control systems design, including the 4.16kV power distribution, site power, controls, lighting, grounding, coordination with SCE.

CHI EPSILON ENGINEERING HONOR SOCIETY - Member

SOCIETY OF WOMEN ENGINEERS - Member

Professional Summary

As a project civil engineer, Ms. Pascua has managed several civil drainage improvement projects, with one including the design of a Vactor truck dewatering facility. Ms. Pascua has performed soil testing percolation testing, written standard operating procedures for soil percolation testing, and written groundwater protection monitoring plans for California General Waste Discharge Requirements Orders. Her experience also includes the implementation of water quality management plans and stormwater pollution prevention plans to maintain compliance with the project's respective City and California Construction General Order by performing and coordinating numerous inspections, training teams on best management practices, and systematically tracking documents for linear underground/overhead and Risk Level 1 projects.

Ms. Pascua provides compliance for regulations, processes, and procedures related to water quality management. She has monitored water quality and infrastructure of distinct water systems in San Diego County and Imperial County by reviewing and evaluating technical and engineering reports, conducting compliance inspections, and taking appropriate follow-up actions.

Project Experience

STUDENT WATER RESOURCE CONTROL ENGINEER - CALIFORNIA STATE WATER RESOURCES CONTROL BOARD, DIVISION OF DRINKING WATER

A skilled engineering judgement was utilized to beneficially monitor water quality and infrastructure of distinct water systems in San Diego County and Imperial County by reviewing and evaluating technical and engineering reports, conducting compliance inspections, and taking appropriate follow-up actions. Relevant compliance information was also proficiently entered and extracted from various databases and spreadsheets and ensured that it was accurate, complete, and up to date.

Effectual technical reports were composed that contained routine scientific correspondence, memos, and formal and informal enforcement documents. The collaboration with Division of Drinking Water staff assisted in the gain of experience and knowledge of relevant laws, rules, regulations, processes, and procedures related to water quality management.

RINCON DEL DIABLO MUNICIPAL WATER DISTRICT, R-1 RESERVOIR DRAIN LINE IMPROVEMENT. CONSTRUCTION MANAGER/RESIDENT ENGINEER/ INSPECTOR.

The project entailed the replacement of an existing storm drain line with a 12" DIP. Ms. Pascua's role was to provide daily oversight of construction while preparing detailed daily reports of contractor performance. Ms. Pascua also monitored the implementation of the erosion control plan prior to construction and oversaw the maintenance of the required BMPs during construction and through qualified rain events. As the construction manager, Ms. Pascua also performed day-to-day project coordination, document control, and resolved all efficiency issues affecting project progress.

LBUSD THURSTON MIDDLE SCHOOL, SWPPP IMPLEMENTATION. PROJECT MANAGER/COMPLIANCE INSPECTOR.

Laguna Beach Unified School District required improvements to Thurston Middle School's athletic field area and severely eroded hillside. Permit coverage under a stormwater pollution prevention plan was required due to the disturbed area of the project. Ms. Pascua managed all requirements under SWPPP coverage and conducted weekly routine maintenance inspections and quarterly non-stormwater discharge inspections. These inspections required monitoring the proper and effective functionality of the implemented BMPs and recognizing any pollutant discharges not associated with storm water to prevent exceedances of water quality objectives.

BRADY

Emily Troike, EIT

Civil Engineer

YEARS EXPERIENCE
2 Years

EDUCATION
BS Nanoengineering, with a focus in Mechanical Engineering,
University of California, San Diego, CA

SOFTWARE SKILLS
- AutoCAD Civil 3D
- SolidWorks
- ArcGIS
- MATLAB
- FACS

Professional Summary

Ms. Troike is an engineering graduate specializing in design improvements to natural gas generators with a background in mechanical structures and drafting. She has assisted with numerous locations to provide local utility gas connection to backup power supply coverage in the greater Southern California areas. She conducts design and drafting in several extensive projects, and has relevant construction experience with permitting in different jurisdictions. Her design experience includes natural gas, and water lines, electrical conduits, pressure reducing meter regulators, demolition and installations of equipment, inspection, document control, and creating traffic control plans for safe construction. Her attention to detail, design experience, field experience and proficient use of AutoCAD Civil 3D help to create cohesive detailed site-specific plans and drawings. She understands and focuses on the synchronization and sequencing needed to create a smooth construction process.

Professional Experience

RESIDENT ENGINEER, CONSTRUCTION MANAGEMENT AS-NEEDED SUPPORT SERVICES, SAN DIEGO COUNTY WATER AUTHORITY: MISSION TRAILS FLOW REGULATORY STRUCTURE II REPAIR PROJECT

Ms. Troike served as a resident engineer for construction of approximately 4.88-million-gallon Mission Trails Flow Regulatory Structure II (MTFRS II). This buried concrete untreated water reservoir also consisted of construction of a flow control facility downstream of the MTFRS II. In support of the construction management team, Ms. Troike prepared letters and reports, interpreted drawings and specifications, resolved discrepancies and constructability issues from day-to-day construction matters. Ms. Troike also sought resolution of technical issues, processed change order requests, and design changes to suit actual conditions encountered in the field.

ASSISTANT ENGINEER, DESIGN PROFESSIONAL SERVICES, SAN DIEGO COUNTY WATER AUTHORITY: EMERGENCY GENERATORS OLIVENHAIN RESERVIOR (EGOR)

Ms. Troike conducted a field assessment to determine accuracy of the existing record drawings and supplemental San Diego Gas and Electric (SDG&E) Demand Reduction Program Drawings to incorporate into the record drawings. Ms. Troike assisted to prepare as-built electrical plan record drawings in AutoCAD Civil 3D.

ASSISTANT ENGINEER / DOCUMENT CONTROL, ONSITE TECHNICAL SERVICES AS-NEEDED IN-PLANT AND FIELD INSPECTION, SAN DIEGO COUNTY WATER AUTHORITY

In support of On-Site Technical Services, Inc. Ms. Troike reviewed welded steel liner inspection reports associated with the Twin Oaks Valley Road to Crossover Pipeline Turnout Project and quality control reports associated with Rancho Hydroelectric Facility Generator and Turbine Replacement/Rehabilitation Project. Ms. Troike also created and monitored both the monthly budget, and prevailing wage deduction status for each authorization.

DOCUMENT CONTROL, CONSTRUCTION MANAGEMENT AS-NEEDED SUPPORT SERVICES, SAN DIEGO COUNTY WATER AUTHORITY: DULIN HILL EROSION REPAIR PROJECT

Ms. Troike served as document control for the Water Authority's Dulin Hill Erosion Repair Project. This project included clearing and grubbing, grading, water bar repair and extensions as well as installation of temporary and permanent erosion control measures. Ms. Troike preformed clerical, filing and administrative assignments for staff support in accordance with Water Authority practices. Ms. Troike took meeting minutes, prepared spreadsheets, and checked invoices, as well as managed receipt, logging, control, tracking and timely processed of all project documents.

Georgiana Mititel, EIT
Structural Engineer

YEARS EXPERIENCE
6 Years

EDUCATION
MS Sustainable Concrete Construction Technical University of Cluj Napoca, 2012

B.S., Civil Engineering Technical University of Cluj Napoca, 2010

LICENSES / CERTIFICATIONS
Engineer in Training
September 2019

Professional Summary
Georgiana is an enthusiastic engineer with several years of experience working as a civil/structural engineer. Over her years of experience, she has assisted professional engineers with design and drafting of several extensive projects. Ms. Mititel has experience in structural engineering, design and civil site development.

Project Experience

GENENTECH'S BUILDING B59 - SAN FRANCISCO BAY AREA – PROJECT ENGINEER/DESIGNER
Project Engineer/Designer performing structural calculations and drawings to support Genentech's Building B59 Parking Lot B development. The scope of work included the design of multiple below-grade foundations.

SDG&E BENT AVENUE BRIDGE CROSSING - SAN MARCOS, CA - ASSOCIATE ENGINEER/INSPECTOR
The project scope of work was designing SDG&E conduit support for a new bridge crossing Bent Avenue in San Marcos, California.
Georgiana was the associate Engineer for Construction Support Services including field inspections and documentation, and preparation of field reports and As-built drawings.

LIFT STATION 10 REHABILITATION, DANA POINT, CA - Associate Engineer/Lead Drafter
Assisting Lead Engineer in executing structural investigation and condition assessments in confined space concrete dry well structures. The effort included evaluation of several rehabilitation options, from which a fiber reinforced polymer (FRP) solution was selected.
Lead drafter of design plans for the rehabilitation of South Coast Water District's Lift Station 10. MS. Mititel undertook the AutoCAD drafting duties for this project from start to finish.

12.5 MG GATY II RESERVOIR, OLIVENHAIN MWD, ENCINITAS, CA
Georgiana served as the Project Engineer for the structural analysis and supported the composition of the technical report of the findings for Olivenhain's 12.5 Million Gallon Gaty II Reservoir. Georgiana developed a MathCAD program for the analysis, based on current codes and site specific seismic accelerations, with the ability to identify structural deficiencies.

SDG&E GLENCLIFF SUBSTATION IMPROVEMENTS, SAN DIEGO, CA – CIVIL STRUCTURAL ENGINEER
Associate Engineer performing structural calculations for below grade foundations and analysis of the 12kV intermediary H- steel structure.
Through this responsibility, Georgiana collaborated with other Brady engineers to successfully address the client's needs and deliver professional services.

SDG&E DESERT STAR GENERATION FACILITY, BOULDER, NV. – CIVIL STRUCTURAL ENGINEER
Associate Engineer performing review of existing record drawings, specifications, fabrication drawings, and geotechnical investigation reports. MS. Mititel performed structural calculations for below grade foundations for two atmospheric blowoff tanks, one step over platform and pipe support system. Lead drafter of design plans MS. Mititel undertook the AutoCAD drafting duties for this project from start to finish.

SDG&E VAULT CONDITION ASSESSMENT, SAN DIEGO, CA – CIVIL STRUCTURAL ENGINEER
Associate Engineer for preliminary and design-level field inspections and preparation of field reports. Efforts included assessment and inventory of customer-owned electric vault structures, above and below ground in confined spaces. Follow-on work included coordination with owners, contractors, and permitting to support repairs. Program involvement began in 2011 and is currently part of an ongoing maintenance and upkeep program.

Megan Engle, EIT
Site Mechanical Engineer

YEARS EXPERIENCE
4 Years

EDUCATION
BS Civil Engineering
University of Central Florida

LICENSES / CERTIFICATIONS
Engineering Intern Certificate (FBPE)

PROFESSIONAL AFFILIATIONS
ASCE (UCF Chapter)
ASCE (National Chapter)

Professional Summary
Megan is a Structural Engineer with a Bachelors degree in Civil Engineering and a minor in mathematics. Megan's focus during her undergraduate degree was Structural and Mechanical Engineering. Through UCF, she has taken Steel Structures, Concrete Structures and Structural Mechanics. Megan has drafted many civil and structural plans for waterfront buildings and docks while working at Flynn Engineering and Envirocare. She has created over 500 structural analysis reports on steel poles, self-supported towers and guyed towers during her time with American Tower.

Professional Experience

PROJECT ENGINEER, SEAWALL INSPECTION BERTHS 78 AND 79, PORT OF LOS ANGELES, LOS ANGELES, CA
Ms. Engle assisted Amanda Del Bello with the seawall above water seawall inspection. She also assisted in the note taking of the below water seawall inspection, as well as creating the elevation and defect tables for the final report.

PROJECT ENGINEER, TANK ASSESSMENT, CALIFORNIA AMERICAN WATER, CALIFORNIA
Ms. Engle assisted in reviewing structural for over 20 existing steel tanks. She also assisted in the repair recommendations for all tanks failing seismic code.

STRUCTURAL ENGINEER, AMERICAN TOWER – RALEIGH, NC
Ms. Engle prepared formal, written reports detailing designs of tower modifications. She ensured all work adhered to quality control procedures and performed conduct analysis on tower structures, mounts, and foundations. She provided quality, timely, and accurate support for any inquiries and problems within project limits. She worked with different functional groups and levels of employees as well accomplish multiple tasks within the agreed upon timeframes to effectively achieve results.

PROJECT ENGINEER, ENVIROCARE SOLUTIONS INTERNATIONAL – FORT LAUDERDALE, FL
Ms. Engle designed and corrected project plan sets to adhere to the client's needs and the cities requirements. She coordinated with the subcontractors and clients during the construction process, as well as worked with the Structural Engineers to ensure quality designs and repairs. Additionally, she assisted in permitting and as-builts through the span of the projects.

ENGINEERING INTERN, FLYNN ENGINEERING – FORT LAUDERDALE, FL
Ms. Engle's role was to communicate with the City, architects and subcontractors to create DRC sets. She designed and improved project plans in AutoCAD as well as creating reports and adequacy narratives based on project details and changes. She created multiple landscapes and drainage calculations for projects, based on the client's requirements and city standards.

PORT 32 FORT LAUDERDALE, MARINA DESIGN & CONSTRUCTION
Ms. Engle attended multiple site visits during city inspections and constructions of the marina docks and seawall. She provided corrections to the construction plans based on client's recommendations and city standards. She worked with the city and subs to ensure all dredging and demolition followed City and State Codes.

RESIDENT ENGINEER, CONSTRUCTION MANAGEMENT FOR PIER UTILITY UPGRADES – CITY OF OCEANSIDE
Resident engineer employed to work from site for the client. RE insures compliance of all materials, equipment, and construction to contract plans and specifications. RE also prepares construction progress reports for submission to the client. RE supervises the planning, coordination and implementation of construction. The RE also inspects all structural reconditioning of steel components. BRADY uses the Procore app to submit and coordinate all construction documents. All project deadlines and assignments are submitted to the contractor and engineer through the Procore app to reduce possible delays and mistakes.

RON MUSSER, P.L.S

Director of Survey

TKE Engineering, Inc.

EDUCATION

Degree, School, Year Graduated

REGISTRATIONS

Professional Land Surveyor, LS 4230 (CA)

AFFILIATIONS

American Council of Engineering Companies of California

Mr. Musser has nearly 53 years of experience in performing field and office surveying and plan checking services for public and private projects including water projects. He has performed design topographic surveying and construction staking on all of TKE's respective design and construction management projects and map checking over the past 10 years. In addition, he has prepared records of survey, parcel maps and tract maps in San Bernardino County, Riverside County, San Diego County, Orange County and Los Angeles County. He has performed boundary, topographic, ALTA, and precise level surveys as well as Global Positioning Surveys. Mr. Musser currently provides map checking services to the cities of Calimesa, Upland, Azusa, Pico Rivera and El Monte.

DETAILED PROJECT EXPERIENCE

- **Upland Basin,** *City of Upland, CA* – Mr. Musser provided topographic design survey, aerial target placement, ALTA survey, Parcel Map preparation and construction staking for the 1300-acre-foot flood control and aquifer recharge basin project that included DSOD jurisdictional facilities, inlet and outlet facilities, and related work. The project included preparation of basin, street improvements, storm drain, spillway, and structural detail construction documents (drawings, specifications, and estimates), hydrology and hydraulic analyses, environmental compliance, storm water pollution prevention plan preparation, right-of-way acquisition, aerial mapping, and related civil engineering services.
- **On-Call Survey and Map Checking Services,** *City of Calimesa, CA* - Mr. Musser provides on-call map checking services to the City of Calimesa. Mr. Musser is providing map checking services for several small and large tract developments, single family residential units and commercial retail centers within the city. Services include closure calculations, development project screen checks, response to development community inquiries, perform map checking for tract maps, parcel maps, lot line adjustments, lot mergers, records of survey, corner records, easement and right-of-way acquisitions.
- **On-Call Survey and Map Checking Services,** *City of Hesperia, CA* - Mr. Musser provides on-call map checking services to the City of Hesperia. Mr. Musser is providing map checking services for several small and large tract developments, single family residential units and commercial retail centers within the city. Services include closure calculations, development project screen checks, response to development community inquiries, perform map checking for tract maps, parcel maps, lot line adjustments, lot mergers, records of survey, corner records, easement and right-of-way acquisitions.

SHELBY KELLEY, E.I.T.

Associate Engineer

TKE Engineering, Inc.

EDUCATION

B.S., Civil Engineering, San Diego State University

AFFILIATIONS

Mr. Kelley is an Associate Engineer of TKE Engineering, Inc. and has 6 years of experience in civil engineering design and construction of infrastructure projects, including sewer and water improvements, drainage improvements, transportation improvements, facilities improvements, and construction methods. Mr. Kelley has been responsible for assistance with design of water and sewer plan/profile, lift stations, treatment plant facilities, preliminary design exhibits, and cost estimates. He has delivered projects for Mission Springs Water District and the Cities of Adelanto, Chino, Fontana, Hesperia, Highland, Needles, and Rialto.

DETAILED PROJECT EXPERIENCE

- **Regional Water Reclamation Facility, Mission Springs Water District,** *City of Desert Hot Springs* – Mr. Kelley is currently assisting in performing construction management and office engineering services for the construction of the new Regional Water Reclamation Facility located near 20th Avenue and Little Morongo Road in the City of Desert Hot Springs. The $43,000,000 project includes the construction of a 1.5 MGD Sequence Batch Reactor (SBR) wastewater treatment plant that will dispose treated secondary effluent in on-site disposal ponds. The project also includes an operations and administration building that will house a solids processing area, chemical storage area, maintenance area, administrative area, electrical room, and blower room. Mr. Kelley provides support in submittal and RFI review, change order review, progress payment review/approval, labor compliance, coordination with utilities, permitting, grant reimbursement and coordination with District representatives.

- **Regional Sewer Conveyance Line, Mission Springs Water District,** *City of Desert Hot Springs* – Mr. Kelley assisted with the design of a new sewer diversion structure located near the Horton Wastewater Treatment Plant in the City of Desert Hot Springs. Mr. Kelley is also currently assisting in performing construction management and office engineering services for the construction of the new Regional Sewer Conveyance Line located along Dillon Road and Little Morongo Road in the City of Desert Hot Springs. The project will convey wastewater to the Regional Water Reclamation Facility and includes the construction of 10,000 linear feet of 12" PVC force main, 950 linear feet of 12" VCP, 5,200 linear feet of 33" VCP, 1,000 linear feet of 36" VCP and all related appurtenances. Mr. Kelley provides support in submittal and RFI review, change order review, progress payment review/approval, labor compliance, coordination with utilities, permitting, grant reimbursement and coordination with District representatives.

Mr. Ledbetter has over 22 years of professional experience in the civil engineering industry. He has handled various critical and challenging projects from planning through design and implementation; all while ensuring that projects are executed as per specification in the stipulated time with quality. He has a well-rounded background with experience in: preparation and analysis of street and utility improvement plans and specifications including potable and non-potable water, wastewater, and drainage; utility master planning including computer modeling, analysis, and report preparation; water resource planning and management including feasibility studies, urban water management planning, water supply assessments and verifications, integrated regional water management planning, and groundwater management planning; storm water compliance reporting including water quality management plans and storm water pollution prevention plans and; and grant writing and administration for various State and Federal agency programs.

DETAILED PROJECT EXPERIENCE

Street Project Experience

- **Terrace Reservoirs Rehabilitation,** *Desert Hot Springs*- Mr. Ledbetter provided project management services for the Terrace Reservoirs Rehabilitation Project. The terrace reservoirs, three 2.0 MG reservoirs, serve as MSWD's backbone storage facility, supplying much of downtown Desert Hot Springs and boosting to several higher pressure zones. The project required a seismic evaluation, reservoir conditional assessment, and site visit to develop a suite of recommended improvements and alternative for MSWD consideration. MSWD elected to add seismic improvements (i.e. raising the existing shell and adding new tub rings, and wind girders), operational improvements (i.e. new manways, inlet/outlet facilities, staircase, perimeter gutter and rail system, mixing system, etc.), and site improvements (i.e. regrading slopes, PCC v-ditches, retaining walls, planting and jute netting of slopes, etc.). TKE prepared a comprehensive contract document package for bidding.
- **Ohio Avenue Pressure Reducing Station,** *City of San Bernardino Municipal Water Department*– Mr. Ledbetter provided design engineering services this project, which TKE prepared plans, specifications, and estimates for the construction of a grant funded 70-foot tall welded steel reservoir replacement project and a fully redundant manganese filtration plant capable of flowrates up to 1500 gpm in the City of Huntington Park. The project included the removal of a structurally deficient steel reservoir and construction of the proposed welded steel reservoir including a ring footing with 45-foot deep 3-foot diameter caissons to combat liquefaction issues. The reservoir removal and replacement is located within fifteen feet of an existing 70-foot tall 2 million gallon steel reservoir to be protected during construction.

Mr. Renner is the Senior Vice President of TKE and has over 23 years of experience in civil engineering design, plan checking, project management and construction management of both development and public works infrastructure projects, including water improvements, sewer improvements, facilities improvements, grading improvements, street and transportation improvements, traffic engineering, drainage improvements, and recreation improvements. He currently provides traffic and transportation engineering services to the cities of Fontana, Calimesa, Upland, Wildomar, Highland, and Adelanto. His experience includes services during pre-project planning, design, plan review, construction management and inspection, along with operations and maintenance. He also has experience conducting traffic studies, specialized access analysis, parking studies, signal operations, signal timing, and traffic control. He has successfully delivered a wide variety of complex and challenging projects and is dedicated to ensuring that the plans produced by TKE continue to exceed industry standards.

DETAILED PROJECT EXPERIENCE

- **Manganese Treatment Facility and 0.5 MG Reservoir Project**, *City of Huntington Park* – Mr. Renner was the Project Manager, Design Engineer and Construction Manger for this project, which TKE prepared plans, specifications, and estimates for the construction of a grant funded 70-foot tall welded steel reservoir replacement project and a fully redundant manganese filtration plant capable of flowrates up to 1500 gpm in the City of Huntington Park. The project included the removal of a structurally deficient steel reservoir and construction of the proposed welded steel reservoir including a ring footing with 45-foot deep 3-foot diameter caissons to combat liquefaction issues. The reservoir removal and replacement is located within fifteen feet of an existing 70-foot tall 2 million gallon steel reservoir to be protected during construction.
- **Ogden Reservoir Pipeline,** *City of San Bernardino* - Mr. Renner was Project Manager for this project. This project consisted of the construction of 7,385' of 36" ductile iron pipe, including restrained length calculations, joint specifications, system appurtenances, connections to the existing system, transit analysis, coordination with Caltrans to tie into a proposed waterline and Department of Water Resources for encroachment permits, and coordination with other agencies for tie-ins to the proposed booster station and reservoir site.

Annaliese Torres

Senior Environmental Planner/Project Manager

Annaliese has over six years of experience and specializes in overseeing preparation of California Environmental Quality Act (CEQA), CEQA-Plus, and National Environmental Policy Act (NEPA) documentation for water and wastewater infrastructure projects. She has worked with several water and wastewater agencies, including The Metropolitan Water District of Southern California, Inland Empire Utilities Agency, East Valley Water District, and Coachella Valley Water District, to prepare CEQA documentation for infrastructure projects such as potable and non-potable water pipelines, reservoirs, groundwater wells, pump stations, and treatment facilities.

DETAILED PROJECT EXPERIENCE

Project Manager, The Metropolitan Water District of Southern California - Garvey Reservoir Rehabilitation Project EIR, Los Angeles County
Annaliese is currently managing the preparation of an Environmental impact Report (EIR) for the Garvey Reservoir project in Monterey Park, which will entail relining the reservoir and implementing various seismic upgrades and site improvements. In support of the EIR, Rincon is also preparing technical studies related to air quality/greenhouse gas emissions, noise, health risk, and cultural resources and is coordinating preparation of a traffic and vehicle miles traveled analysis through a subconsultant.

Project Manager, South Coast Water District – Reservoir 2B Replacement Project IS-MND and Coastal Development Permitting Assistance, Orange County
Annaliese served as Project Manager for the preparation of technical studies and an Initial Study-Mitigated Negative Declaration (IS-MND) as well as provision of coastal development permitting support for the proposed Reservoir 2B Replacement project. The project involves replacing the existing Reservoir 2B with two new reservoirs to double the current storage capacity on site in an effort to improve fire flow. Key issues consisted of special status plant and wildlife species, archaeological and paleontological resources, noise due to the proximity of nearby residences, and wildfire hazards due to the project site's location within a Very High Fire Hazard Severity Zone. The District's Board of Directors adopted the Final IS-MND in July 2022, and Rincon supported the District in obtaining a coastal development permit from the City of Laguna Beach for the project.

Project Manager and Technical Analyst, Montecito Water District - Reservoir Retrofits Project IS-MND, Santa Barbara County
Annaliese served as the project manager and technical air quality, energy, and greenhouse gas analyst for the preparation of an IS-MND for the Montecito Water District's Reservoir Retrofits Project. This project involved seismic retrofits, repairs, and replacements at eight of the District's existing water storage reservoirs. The District sought project funding from the Additional Supplemental Appropriation for Disaster Relief Act program, in which funds are granted by the United States Environmental Protection Agency and administered by the State Water Resources Control Board State Revolving Fund. The project will bring all eight reservoirs into compliance with seismic design codes and regulations.

Julie Love

Senior Biologist and Restoration Ecologist/Project Manager

Julie's combined work experience and education provide a wide range of biological and ecological training with over 15 years of work experience. Julie's work experience involves managing projects and tasks associated with special-status wildlife surveys (including burrowing owl and Delhi Sands flower-loving fly); botanical surveys and vegetation community mapping; biological resource evaluations; habitat restoration planning, implementation, and monitoring; and wetland delineations and jurisdictional determinations.

SELECT PROJECT EXPERIENCE

Project Manager, Exelon (previously First Solar and NextLight) – Antelope Valley Solar Ranch One, Antelope Valley
The project involved development of an approximately 2,100-acre solar site in the western portion of the Mojave Desert. Julie served as the manager and co-author of the Habitat Enhancement and Vegetation Management Plan for 100 acres of on-site restoration, landscaping along State Route 138, and vegetative growth under the solar arrays. The plan detailed a habitat restoration implementation approach, restoration and vegetation monitoring, vegetation maintenance, and performance criteria. Restored habitats included rubber rabbitbrush scrub, California annual grassland, wildflower field, and Joshua tree woodland. Julie also served as the lead author for annual reports detailing restoration success during the five-year maintenance and monitoring period. In addition, Julie performed pre-construction clearance surveys for Blainville's horned lizard (176 hours), and burrowing owl and nesting birds (216 hours) as well as pre-project biological resource assessments, including protocol botanical surveys, vegetation community mapping, Joshua tree mapping, jurisdictional delineation, and Phase I and Phase II Burrowing Owl Consortium protocol surveys (68 hours). Furthermore, Julie served as lead author in sections of the resulting Biota Report.

Field Crew Leader/Lead Author, Burlington Northern Santa Fe – Box Car Project, San Bernardino County
Julie served as the field crew leader and lead author for a biological resource assessment for the Burlington Northern Santa Fe railyard in San Bernardino, California, including determining the applicable laws, ordinances, regulations, and standards governing biological resources at the facility and evaluating the potential impacts and mitigation measures to be implemented during construction and management activities. Julie conducted vegetation community and jurisdictional waters mapping and assessment and performed a close assessment of habitat and potential to occur for Delhi Sands flower-loving fly due to the presence of Delhi Sands on-site.

Field Crew Leader/Lead Author, WDG Partners – Marathon and Agincourt Solar Projects, Antelope Valley
Julie prepared a biological resource assessment for the 150-acre Marathon and 80-acre Agincourt solar sites in the Mojave Desert near Victorville. She performed United States Fish and Wildlife protocol 100 percent coverage Mojave Desert tortoise surveys (10 and 20 hours respectively), searched for burrowing owl sign during Mojave Desert tortoise surveys, and led Phase III Burrowing Owl Consortium protocol surveys (38 hours per site), then aided with associated reports. She also served as the field crew leader and lead author for the jurisdictional delineation and performed Joshua tree and California Desert Native Plants Act mapping.

Years of Industry Exp

25 Years with Leighton

MS, Civil Engineering, California State University, Long Beach - 2004

BS, Civil Engineering, California State Polytechnic University, Pomona - 1997

CA - Geotechnical Engineer - 2711

CA - Civil Engineer - 61778

Jason Hertzberg, PE, GE

Principal Engineer

Mr. Hertzberg has a comprehensive understanding of the design and construction process, and the civil and geotechnical aspects of projects related to public infrastructure and facilities. He has provided public agencies throughout San Bernardino and Riverside counties with expert geotechnical engineering and consulting services for local streets and highways, storm drain lines, potable and recycled water pipelines, open spaces such as parks and nature reserves, schools, civic buildings, and essential facilities. His expertise includes geotechnical site investigations, shallow and deep foundation design, buttress and structural landslide mitigation, seismic hazard evaluations and mitigation design, grading control, ground improvement, pavement design, and forensic evaluations.

San Jose Creek Reservoir and Pump Station, City of Industry, CA. Project Engineer for subsurface geotechnical investigation for a 30,000-foot-long, 24-inch-diameter reclaimed water pipeline along San Jose Creek Channel, from Workman Mill Road to a new 2-million-gallon reservoir for the City of Industry's reclaimed water system. The pipeline spans the San Jose Creek channel along Anaheim-Puente Road. Significant geotechnical issues for the water reservoir included the potential for liquefaction and lateral spreading. Also provided geotechnical and materials observation and testing during construction. This project included logging of 156 borings for caissons that support the foundation of the reservoir. Geotechnical services through construction for a 2.1-MG reservoir and booster pump station located north of San Jose Creek. Project challenges included drilling which was difficult due to caving soil conditions and shallow ground water. Existing shallow utilities including a high-pressure gasoline delivery line made excavation work a challenge as well.

Barstow Reservoir and Water Pipeline, Barstow, CA. Project Engineer for geotechnical investigation of new water reservoir in an undeveloped area. The potential presence of desert tortoises was an issue during our field work, for which we coordinated with the project biologist for safe exploration.

Chino Eastside Water Facility Project, Ontario, CA. Project Manager for geotechnical investigation and for geotechnical services during construction. This project consisted of the construction of an above-ground, 3.5-milliongallon reservoir (170 feet in diameter), a future reservoir of comparable size, a 90-foot-diameter reservoir, two wells for domestic water, a pump station structure, retaining walls, underground utilities, and a detention basin for storm water runoff.

Wildwood Creek Basin, Yucaipa, CA. Project Manager for materials and soils inspection and testing that included concrete and bituminous plant inspections/testing, soils density testing, concrete cylinder compressive strength testing, bituminous pavement density testing, concrete cylinder preparation, bituminous pavement coring and testing. Wildwood Creek Basin is a 25-acre multipurpose stormwater detention and groundwater recharge basins project including passive recreational trails for walking, jogging, bicycling and horseback riding.

M.S. Civil Engineering, California State University, Los Angeles - 2016

B.S., Civil Engineering, California State University, Los Angeles - 2014

CA Civil Engineer - 91630

Jose Tapia, PE

Project Engineer

Mr. Tapia has experience in geotechnical engineering, construction observation, testing, and data analyses. His experiences include geotechnical investigations for transportation and water infrastructure, as well as new multi-family residential developments, essential facilities and education developments. His expertise includes analyzing computer models to predict slope stability, perform earthquake-induced liquefaction and settlement analysis and identify potential site hazards. Study expansion potential of soils, develop remediation alternatives, overseeing full displacement cast in-situ (DeWaal) pile installation and testing. He has an in depth understanding of advanced soil mechanics, seismic hazard analyses, shallow and deep foundations, liquefaction evaluation, subsurface interpretation, slope stability and seepage, site-specific ground motion, time history analysis, site response analysis, finite element modeling, in situ testing, geotechnical instrumentation, and pavement design. Jose's responsibilities include coordinating with engineering staff on all facets of geotechnical projects, including project planning and execution, engineering analysis, report and proposal writing, field and laboratory program development, project budgeting and invoicing, and client interaction.

Tunnel to Ontario International Airport, Rancho Cucamonga & Ontario, CA. Project Engineer during the preliminary geotechnical investigation and report preparation for the proposed underground tunnel connecting the Rancho Cucamonga Metrolink Station to the Ontario International Airport. The project consisted of coordinating field work and proposed explorations along proposed alignments spanning through four different agencies ensuring that permit requirements are followed during fieldwork, laboratory testing of recovered samples, and coordinating with design team through several post report consultations.

Subaqueous Sediment Removal Branford Spreading Basin, Los Angeles, CA. Project Engineer for feasibility study to provide three alternatives with cost estimates for removal of lead-impacted sediment from 4.9-acre detention basin. Report will also include a discussion of potentially feasible alternatives for dewatering the basin and diverting inflow to the basin, along with estimated costs.

Gould Ave and Vineta Ave Water Main Relocation, La Canada Flintridge, CA. Project Engineer. Asphalt testing during replacement of 12-inch diameter water main along a 3,358-foot-long alignment in residential streets.

City of Norco, Replacement of Sewage Lift Stations #3 & #6, Norco, CA. Project Engineer for the geotechnical exploration and laboratory testing at project sites for both lift stations, identification of significant geotechnical constraints, and preliminary geotechnical recommendations for design and construction of replacement lift stations.

Orcutt Creek Overflow Channel, Santa Paula, CA. Project Engineer for the Orcutt Creek overflow channel improvements which consists of an approximately 4,100-linear-foot overflow and bypass channel alignment, emergency spillway, the Basin 4 outlet structure, retaining walls, and access roads and ramps. The overflow channel improvements are located on the eastern limits of the overall Harvest at Limoneira development, west of Orcutt Creek, and north of California State Route 126.

10

Years of Industry Exp.

5 Years with Leighton

BS, Civil Engineering, University of Texas, San Antonio

CA - Civil Engineer - 89389

Luis Perez-Milicua, PE

Senior Project Engineer

Luis Perez-Milicua has 10 years of geotechnical engineering experience in California and Texas which includes forensic analysis of disturbed foundations and expansive soils, geotechnical investigations for transportation and water infrastructure, and power generation. His expertise includes highway bridge foundation design, mechanically stabilized earth walls, slope stability analyses, embankment settlement analyses and highway pavement design. Luis' responsibilities include coordinating with engineering staff on all facets of geotechnical projects, including project planning and execution, engineering analysis, report and proposal writing, field and laboratory program development, project budgeting and invoicing, and client interaction.

Baker Avenue Water Main Replacement, City of Chino, CA. Project Engineer for geotechnical observation and testing during construction. The project included removal of an existing 6-inch-diameter steel water main in a residential roadway and replacement with an 8-inch-diameter polyvinyl-chloride (PVC). The replacement pipeline length was approximately 700 linear feet on Baker Avenue from Terry Avenue to Walnut Avenue.

Golden State Water Company Well 3 and 5 Improvements, Wrightwood, CA. Project Engineer for geotechnical observation and testing during construction. Site improvements for the existing well sites included addition of generator pads, chemical building, utility lines, drainage improvements, and aggregate base placement.

SCE Rush Creek Dam, Big Creek, CA. Project Engineer for construction material testing and special inspections requested by Southern California Edison (SCE) Company during construction of the Rush Meadow Dam Spillway Modification Project located near June Lake. The project location is located in remote mountains of the Sierra Nevada, which had to be accessed by helicopter. The project included improvements of the existing spillway including installation of buttress walls. Project duties included coordinating and overseeing field inspections generally consisting of concrete, reinforcement and epoxy anchors.

San Antonio Water Company Campus Avenue Pipeline, Upland, CA. Project Engineer for geotechnical observation and testing during construction. The project included 8-inch-diameter polyvinyl-chloride (PVC) pressurized water pipelines installed within existing asphalt streets and unpaved locations. The replacement pipeline length was approximately 3,700 linear feet in 20th Street, 21st Street, and Campus Avenue.

San Gabriel Water Company Plant F44 1.5-MG Potable Water Tank, Fontana, CA. Project Engineer for geotechnical exploration for a 1.5-million-gallon (MG) above-grade welded-steel potable-water tank. The tank will be 30-feet-high with a diameter of 110-feet. The proposed tank is located on a detention basin that will be backfilled for construction. Additional site improvements include an infiltration basin, secondary tank, equipment pads, and new site piping. Pipelines within paved areas were installed by cut and cover methods.

Eucalyptus Avenue Storm Drain, Ontario, CA. Project Engineer for geotechnical observation and testing, construction material testing and special inspections during construction. The storm drain extends from the outfall structure on Cucamonga Creek along Eucalyptus Avenue and the project scope included the installation of two storm drain laterals (approximately 750 linear feet total) to depth of approximately 20 feet below existing ground surface. Installed by conventional cut and cover methods, Leighton provided observation and testing during over-excavation and backfill compaction activities.

Years of Industry Exp.

8 Years with Leighton

M.S. Geology, University of California, Los Angeles

B.S., Geology, California State University, Fullerton

CA Professional Geologist - 9366

Steve Okubo, PG, CEG

Associate Geologist

Steven Okubo has 20 years of experience in a variety of geological and applied geological settings. His experience extends across a variety of geological and geotechnical issues for public works infrastructure, commercial and residential development, civic buildings, and schools. He has extensive experience conducting geotechnical investigations, which include geologic field mapping; logging (both at the surface as well as down-hole) and sampling of boreholes, test pits, and trenches; aerial photograph analysis; investigating site histories; developing laboratory testing programs; interpreting tectonic geomorphology and surface processes; and providing conclusions and recommendations for geotechnical issues. These geotechnical issues include seismic hazards, slope stability, subdrain system design, fill settlement, pavement section design, retaining wall construction parameters, and foundation recommendations. He also has experience in forensic investigations as it relates to geological and geotechnical issues including residential and commercial building distress, landsliding, flood hazards, and earthquake damage.

"Keith" Reservoir Tank Construction, Corona, CA. Project Manager and Geologist for the construction of an approximately 30-foot-high and 125-foot diameter concrete water tank with the capacity to hold approximately 2½ million gallons of potable water. Site improvements also included underground utilities, CMU walls, concrete hardscape, and driveway areas. Our services included observation and testing during remedial removals, overexcavation, and fill placement of the proposed tank pad; utility trenching and backfilling; subgrade preparation and aggregate base placement along new hardscape and driveways; concrete sampling and testing during tank construction; and project management and quality assurance.

Potable Water Perchlorate Treatment Tank and Pipeline, Rialto, CA. Project Geologist for geotechnical exploration and report for design. Observed and logged borings located under the proposed tank and within alignment of 24" pipeline. Provided visual classification and documentation of site soils. Recommendations were provided for excavation and foundations, including over excavating footprint of tank due to undocumented fill.

On-Call Geotechnical Services, City of Corona Department of Public Works, Corona, CA. Project Manager providing geotechnical services for the City of Corona Department of Public Works. Geotechnical services included those during construction of the City's waterline replacement along Hayden Avenue from Howe Street to Nelson Street and the construction of a new water reservoir tank and associated buried utilities and paved roadways at the intersection of Keith and Nelson Streets.

Rancho Cucamonga Fire Station 178, City of Rancho Cucamonga, CA. Project Geologist for geotechnical investigation for a proposed 9,300-square-foot fire station building. The proposed fire station building will feature an apparatus building in the center and offices/living quarters in adjacent buildings. Infiltration basins at various locations of the 2-acre site are planned. The geotechnical investigation addressed the geologic setting, earth materials, groundwater, seismicity, liquefaction susceptibility, foundation selection, and infiltration recommendations.

WHO WE ARE

SAMANTHA FERGUSON // ASLA, PLA
Senior Project Manager / Landscape Architect

Samantha Ferguson is responsible for the production of a variety of projects ranging from large-scale residential to large-scale public works. Sam has been the Project Manager on many large-scale public projects, managing multiple sub-consultants as well as coordinating communication with the public agency.

She has gained experience working on park projects with clients ranging from developers to county agencies. Samantha's curiosity for the built environment has given her a wide range of skills allowing her to be involved with many of these projects from the concept phase through construction administration.

LICENSURE

Professional Landscape Architect
CA 5601

EDUCATION

BS in Landscape Architecture
Cal Poly Pomona
2006

A.A. in Math/Science
Mt. San Jacinto College
2002

A.A. in Humanities
Mt. San Jacinto College
2002

RELEVANT PROJECT EXPERIENCE

MILLER PARK AMPHITHEATRE

Fontana, CA

Sam managed this 2.5 acre project, which included natural turf seating and a custom bandshell building, from the design phase down through 8 months of construction through to grand opening.

EL CERRITO SPORTS PARK

Corona, CA

Samantha was first involved with this $11.6 million City of Corona and County of Riverside joint community sports park project during the feasibility study and progressed through to the subsequent phases of the project.

LAKE ELSINORE HISTORIC DOWNTOWN RIVERWALK

Lake Elsinore, CA

The Riverwalk is intended to provide a link throughout the community via a paved bike route complete with spots to stop and rest while educating the community about their water resources. Samantha was involved in the conceptual development of the project as well as the custom design of select site amenities.

MURTHY KADIYALA, PE/PLS

HYDRAULICS ENGINEER

With 19 years of experience in a variety of projects in Municipal Water and Wastewater System Planning, Design and Construction Management, Murthy has helped find solutions to many design challenges in his career. Murthy has provided engineering and construction support services for many Water and Wastewater pipeline installations and rehabilitation projects and helped close them out successfully. He is an expert Water System hydraulic modeler and has also served in the responsible role of a Water and Wastewater Plan Checker for many years. His added knowledge of the service connections to private developments including land title and encumbrances has enabled him to identify all required facilities and potential issues early in the design process. His Land Surveying experience helps add a different perspective to projects.

LICENSE/CERTIFICATION

Civil Engineer, CA #C73472
Professional Land Surveyor, L9180

EDUCATION

MS, Civil Engineering,
Michigan State University

BS. Civil Engineering,
Osmania University,
Hyderabad, India

EXPERIENCE

Santiago Canyon Pump Station Improvements, Irvine Ranch Water District. Provided hydraulic modeling for the project to increase pumping capacity at Manning, Read, Shaw, and Williams pump stations to meet the Tier 1 fire flows in their respective zones to provide improved reliability and upgrade the facilities to current District standards. LEE + RO updated the existing hydraulic model for the Santiago Canyon area consisting of several pressure zones and ran the model for existing, interim and buildout conditions for average day, max day plus fire flow and peak hour scenarios. Global fire flow analyses were performed with and without proposed pump station and future pipeline improvements. The model results were used not only to confirm and select the proposed pumps and pressure reducing valves at the four pump stations, but also to confirm the master planned pipeline improvements.

Rancho Los Lagos Water Study, City of Brawley. Provided hydraulic modeling for the project that updated the City's hydraulic model for existing, interim and buildout conditions for average day max day plus fire flow and peak hour scenarios, including the subject Rancho Los Lagos development consisting of approximately one-third of the existing City's service area. The City's existing production and consumption records for Years 2018 and 2019 were analyzed and used to update the existing demands. The City's Master Plan land uses, specific plans and latest aerial imagery were used to estimate the developable areas and the future buildout demands. Hydraulic analysis was performed for steady state condition on the computer model to verify the system pressures and capacities. The results of the analysis were summarized, and recommendations for system improvements were made in a draft water study report. The impacts on water treatment plant were also separately analyzed.

Utilities and Infrastructure Master Plan, NAVFAC Southwest, Naval Base San Diego (NBSD). Prepared Utilities and Infrastructure Master Plan for NBSD water and wastewater systems. A steady state hydraulic analysis was performed on the water model using WaterGEMS software for various conditions such as the maximum day demand plus fire flow and the areas not meeting the minimum pressure and maximum velocity criteria were noted as being hydraulically deficient. A steady state hydraulic analysis was performed on the sewer model using SewerGEMS software upon checking for topology and loading the sewer loads. The computed depth to diameter ratios were used to identify the hydraulically deficient reaches. Structurally deficient reaches were identified based on CCTV review. LEE+RO developed a list of short term and long term projects and prioritized them for repair, rehabilitation or replacement.

EXHIBIT "B"
FEE AND PHASING/FUNDING SCHEDULES

1. FEE SCHEDULE.

Consultant will invoice City on a monthly cycle based on the following fee schedule. Consultant will include with each invoice a detailed progress report that indicates the amount of budget spent on each phase and the total amount spent against the Total Compensation. Consultant will inform City regarding any out-of-scope work being performed by Consultant for which Consultant intends to seek compensation from City.

Fee Estimate for the City of Ontario

CITY OF ONTARIO *Agenda Report* **November 21, 2023**	**SECTION:** **CONSENT CALENDAR**
Department: Police Department Prepared By: Matthew Hernandez Staff Member Presenting: Mike Lorenz, Chief of Police Approved By:	Submitted To: Council/OHA Approved: _____ Continued To: _____ Denied: _____ Item No: 6

SUBJECT: ACCEPT AND APPROVE LAW ENFORCEMENT GRANT PROGRAM FOR FISCAL YEAR 2023-24

RECOMMENDATION: That the City Council authorize the City Manager or his designee to execute all documents necessary to accept and approve the Citizen' s Option for Public Safety (COPS) / Enhancing Law Enforcement Activities Subaccount (ELEAS) Grant in the amount of $280,981 for Fiscal Year 2023-24.

THE FOLLOWING COUNCIL GOALS ARE BEING ACHIEVED:
Maintain the Current High Level of Public Safety
Pursue City's Goals and Objectives by Working with Other Governmental Agencies

FISCAL IMPACT: As part of the Citizen's Option for Public Safety (COPS) / Enhancing Law Enforcement Activities Subaccount (ELEAS) grant program, the City of Ontario is eligible to receive a maximum grant award of $280,981. This amount is based on an estimation of the State' s Vehicle License Fee (VLF) revenues for Fiscal Year 2023-24. The allocation may only be re-calculated and adjusted by the State Controller's Office. Additionally, the grant funds will be distributed to the City in monthly installments and no matching funds by the City is required. If approved, the associated revenue and expenditure adjustments in the Grants Fund will be presented to Council in the next quarterly budget adjustment.

BACKGROUND & ANALYSIS: Beginning in Fiscal Year 2002-03, the State of California allocated grant monies Citizen's Option for Public Safety (COPS) / Enhancing Law Enforcement Activities Subaccount (ELEAS), formerly known as Supplemental Law Enforcement Services Fund to counties. The County granted those monies to cities for the purpose of supporting front-line law enforcement needs including but not limited to equipment and training.

On September 13, 2023, the California State Department of Finance announced the estimated funding allocation amounts to be awarded to each participating agency under the COPS/ ELEAS grant program. The City of Ontario is eligible to receive a maximum grant award of $280,981. If approved, the associated revenue and expenditure adjustments will be presented to Council in the next quarterly budget adjustment.

DEPARTMENT OF FINANCE

Gavin Newsom ▪ Governor

915 L Street ▪ Sacramento CA ▪ 95814-3706 ▪ www.dof.ca.gov

September 13, 2023

Honorable Malia M. Cohen
State Controller
3301 C Street
Sacramento, CA 95816

Attention: Evelyn Calderon-Yee, Chief
Bureau of Payments, Local Government Programs and Services Division,
State Controller's Office

Dear Controller Cohen:

Pursuant to Government Code section 30029.05, subdivision (e), paragraph (2), the Department of Finance respectfully submits the attached (Attachments I and II) percentages for the 2023-24 allocation of $214,200,000 in Citizens' Option for Public Safety (COPS) and Juvenile Justice Crime Prevention Act (JJCPA) funds deposited in the Enhancing Law Enforcement Activities Subaccount (ELEAS) in the Law Enforcement Services Account within the Local Revenue Fund 2011.

Pursuant to Government Code section 30061, subdivisions (b) and (g), subsequent to the allocation described in Section 29552, subdivision (d), 47.08727192 percent of the remaining funds deposited in the ELEAS for the COPS (23.54363596 percent) and JJCPA (23.54363596 percent) programs are to be allocated, according to the relative population for each county and city, as follows:

(1) 5.15 percent to county sheriffs for county jail construction and operation ($11,031,300).

(2) 5.15 percent to district attorneys for criminal prosecution ($11,031,300).

(3) 50 percent to counties to implement a comprehensive multi-agency juvenile justice plan ($107,100,000).

(4) 39.7 percent to counties and cities for front-line law enforcement ($85,037,400).

Please note that the by-county percentages for the first three allocations above: (1) county jail construction and operation, (2) district attorney criminal prosecution, and (3) multi-agency juvenile justice plans, are specified on Attachment I and the by-county/city percentages for the fourth allocation, front-line law enforcement, are identified on Attachment II.

Pursuant to Government Code section 30061, subdivision (b), paragraph (3), each law enforcement jurisdiction receiving front-line law enforcement funding is to receive a minimum grant of $100,000. The percentages included in Attachment II are calculated in a manner that provides for a minimum grant allocation of $100,000 to each law enforcement jurisdiction listed in Attachment II.

Also note that the allocations shown on Attachments I and II may be slightly different from the final allocations made by the State Controller's Office due to rounding.

If you have any questions, or need additional information, please call Patrick Plant, Staff Finance Budget Analyst, at (916) 445-8913.

Sincerely,

Amy Jarvis

AMY JARVIS
Program Budget Manager

CITY OF ONTARIO *Agenda Report* **November 21, 2023**	**SECTION:** **CONSENT CALENDAR**
Department: Information Technology Prepared By: Samantha Robles Staff Member Presenting: Colin Fernandes, Executive Director Information Technology Approved By:	Submitted To: Council/OHA Approved: _____ Continued To: _____ Denied: _____ Item No: 7

SUBJECT: A PROFESSIONAL SERVICES AGREEMENT WITH COLLABORATIVE SOLUTIONS, LLC, FOR WORKDAY CONSULTING AND SERVICE SUPPORT

RECOMMENDATION: That the City Council authorize the City Manager or his designee to execute a Professional Services Agreement with Collaborative Solutions, LLC, of Teaneck, New Jersey, for ongoing full-suite Workday support and configuration services, in a contract amount not-to-exceed $298,804.

THE FOLLOWING COUNCIL GOALS ARE BEING ACHIEVED:
Operate in a Businesslike Manner

FISCAL IMPACT: The Fiscal Year 2023-24 Adopted Budget includes appropriations from the Information Technology Fund for consulting services. The proposed Professional Services Agreement term will be for three (3) years, with an optional renewal period for two (2) years, with a contract amount not-to-exceed 298,804, which includes $55,879 for year one, $60,879 for year two, $60,682 for year three, $60,682 for year four, and $60,682 for year five. The fixed billing rates specified in the current Agreement will determine the amount charged for service and reflect the actual service provided. If approved, appropriations will be added to the future years' budget consistent with the annual adoption process.

BACKGROUND & ANALYSIS: The consulting firm Collaborative Solutions, LLC has provided the City with on-demand support services for Workday Human Capital Management (HCM) for over five years, on-demand support services for Workday Finance Enterprise Resource Planning (ERP) for over a year, and was also the City's implementation partner for Workday Finance Enterprise Resource Planning (ERP) system.

On June 1, 2018, the City entered an Agreement with Collaborative Solutions, LLC. The original contract amount was $92,160 and included on-demand support services for Workday HCM. On March 10, 2020, the City Council approved Amendment No. 1 to this Agreement to increase the amount from $92,160 to $100,000 for additional on-demand support services for Workday HCM. On May 1, 2020, the City Council approved Amendment No. 2 to this Agreement to increase the amount from $100,000 to $400,000 and extend the terms for three years to support our Workday

HCM. On July 7, 2020, based on the bid awarded to Workday and Collaborative Solutions, LLC for the implementation of a new ERP system, the City Council approved Amendment No. 3 to this Agreement to increase the amount from $400,000 to $2,650,298 to expand the scope of work to include consulting services related to the implementation of the new Workday Finance ERP system. On August 17, 2021, the City Council approved Amendment No. 4 to this Agreement to increase the amount from $2,650,298 to $3,847,907 to expand the scope to include additional consulting services related to the implementation of the new Workday Finance (ERP) system. On October 18, 2022, the City approved Amendment No. 5 to this Agreement to increase the amount to $3,978,587 to include on-demand support for Workday ERP. On September 30, 2023, our existing Agreement expired.

With a new Agreement, Collaborative Solutions, LLC will provide the City of Ontario with ongoing full-suite Workday support and configuration services by leveraging their deep understanding of the City's Human Resources and Finance configuration and business rules, government experience, and Workday's technology, ensuring proper execution of short-term requirements and long-term growth and flexibility. Staff requests City Council approval for a new three-year Agreement with an optional renewal period of two years with an amount not-to-exceed $298,804.

CITY OF ONTARIO
PROFESSIONAL SERVICES AGREEMENT

1. PARTIES AND DATE.

This Agreement is made and entered as of _____ by and between the City of Ontario, a municipal corporation organized under the laws of the State of California with its principal place of business at 303 East "B" Street, Ontario, California 91764-4196, County of San Bernardino, State of California ("City") and Collaborative Solutions, LLC, a Virginia limited liability company with its principal place of business at 300 Frank W. Burr Boulevard, Suite 36 6th Floor, Teaneck, New Jersey 07666 ("Consultant"). City and Consultant are sometimes individually referred to herein as "Party" and collectively as "Parties."

2. RECITALS.

2.1 Consultant.

Consultant desires to perform and assume responsibility for the provision of certain professional services required by the City on the terms and conditions set forth in this Agreement. Consultant represents that it is experienced in providing Workday Service Support services to public clients, is licensed in the State of California, and is familiar with the plans of City.

2.2 Project.

City desires to engage Consultant to render such professional services for the Workday Service Support project ("Project") as set forth in this Agreement.

3. TERMS.

3.1 Scope of Services and Term.

3.1.1 General Scope of Services. Consultant promises and agrees to furnish to the City all labor, materials, tools, equipment, services, and incidental and customary work necessary to fully and adequately supply the professional consulting services necessary for the Project ("Services"). The Services are more particularly described in mutually-agreed upon Statements of Work document(s) ("SOW") ,which shall be executed by the Parties. In addition, Consultant will provide to the City certain results or proceeds of the Services that are defined as deliverables in each Statement of Work (collectively, the "Deliverables"). All Services shall be subject to, and performed in accordance with, this Agreement, and all applicable local, state and federal laws, rules and regulations related to the performance of Consultant's Services. Each Statement of Work shall specifically identify this Agreement and indicate that it is subject to the terms hereof. Unless otherwise set forth herein or expressly identified in the SOW as a modification to a specified provision of this Agreement, to the extent there are any conflicts or inconsistencies between this Agreement and any Statement of Work, the provisions of this Agreement shall govern and control. Any Affiliate of Cognizant may itself provide Services directly to Client and any Affiliates of Client under this Agreement by executing SOWs in its own name, exclusive of Consultant, and only for the purposes of any such SOW(s), shall be considered "Consultant" as that term is used in this Agreement.

3.1.2 Term. The term of this Agreement shall be from October 2, 2023 to September 30, 2026, unless earlier terminated as provided herein. The City shall have the unilateral option, at its sole discretion, to renew this Agreement automatically for no more than two additional one-year terms. Consultant shall complete the Services within the term of this Agreement, and shall meet any other established and documented schedules and deadlines. The Parties may, by mutual, written consent, extend the term of this Agreement if necessary to complete the Services.

3.1.3 **Deliverables and Acceptance.** Deliverables, if any, under this Agreement will be as set forth under any SOW. Each SOW will describe, if applicable, the Deliverables that Consultant is obligated to furnish to City hereunder, the acceptance criteria for each of the Deliverables (the "Acceptance Criteria") and the completion criteria, if any, to signify completion of each phase of a project. City shall review, evaluate and/or test, as the case may be, each of the Deliverables within the applicable time period set forth in a SOW (with respect to each Deliverable, the "Acceptance Period") to determine whether or not such Deliverable satisfies the applicable Acceptance Criteria in all material respects. If City does not furnish a written notice to Consultant specifying that a Deliverable has failed to satisfy its Acceptance Criteria in all material respects prior to the end of the Acceptance Period therefor and/or if City commences using the Deliverables commercially or in a production environment, then City will be deemed to have accepted such Deliverable. If any Deliverable fails to satisfy its Acceptance Criteria in any material respect, then City will notify Consultant in writing specifying the respects in which such Deliverable does not conform to the applicable Acceptance Criteria and what modifications are necessary to make it conform thereto. Thereafter, Consultant shall use its diligent commercially reasonable efforts to modify such Deliverable to so conform and the Deliverable will be resubmitted for acceptance by City . If, after repeated attempts, Consultant is unable to remedy any non-conforming portion of any Deliverable, City may terminate pursuant to Section 12.2 herein.

3.2 Compensation.

3.2.1 Compensation. Consultant shall receive compensation, including authorized reimbursements, for all Services rendered under this Agreement at the rates set forth in the mutually-agreed upon Statements of Work document(s) ("SOW"). For the initial Statement of Work, the total compensation shall not exceed fifty-five thousand, eight hundred and seventy-nine dollars ($55,879) for year one, sixty thousand, eight hundred seventy-nine dollars ($60,879) for year two and sixty thousand, six hundred eight two dollars ($60,682) for year three, sixty thousand, six hundred eight two dollars ($60,682) for year four, and sixty thousand, six hundred eight two dollars ($60,682) for year five for a total contract amount not to exceed one hundred seventy-five thousand, eight hundred forty ($298,804) without written approval of the City Council or City Manager, as applicable. Extra Work may be authorized, as described below, and if authorized, will be compensated at the rates and manner set forth in this Agreement.

3.2.2 Payment of Compensation. Consultant shall submit to City a monthly invoice which indicates work completed and hours of Services rendered by Consultant. The invoice shall describe the amount of Services provided since the initial commencement date, or since the start of the subsequent billing periods, as appropriate, through the date of the invoice. City shall, within 30 days of receiving such invoice, review the invoice and pay all non-disputed and approved charges. If the City disputes any of Consultant's fees, the City shall give written notice to Consultant within thirty (30) days of receipt of an invoice of any disputed fees set forth therein. Payment shall not constitute acceptance of any Services completed by Consultant. The making of final payment shall not constitute a waiver of any claims by the City for any reason whatsoever. City will pay interest, at a rate equal to the lesser of 1.5% per month (or part thereof) or the maximum legal rate permitted, on the amount shown on any invoice that is paid later than thirty (30) days after the date of the invoice, other than such amounts that are disputed in such good faith during the pendency of the relevant dispute. All amounts hereunder will be invoiced and paid in United States Dollars unless otherwise set forth in an applicable SOW. Consultant will have no obligation to perform any Services when any amount required to be paid by City remains due and unpaid beyond the date such amount is due and such amount is not in dispute. Any suspension of Services by Consultant as a result of City's failure to make payment as required will extend the due dates of Deliverables and other Services to the extent impacted by such suspension or delay

3.2.3 Reimbursement for Expenses. Consultant shall not be reimbursed for any expenses unless authorized in writing by City, or included in the relevant SOW. .

3.2.4 Extra Work. At any time during the term of this Agreement, City may request that Consultant perform Extra Work. As used herein, "Extra Work" means any work which is determined by City to be necessary for the proper completion of the Project, but which the Parties did not reasonably anticipate would be necessary at the execution of this Agreement. Consultant shall not perform, nor be compensated for, Extra Work without written authorization from the City.

3.2.5 Taxes. All Charges are exclusive of taxes. City shall pay amounts equal to any federal, state or local sales, use, excise, privilege, value added, goods and services or other taxes, duties, imposts, levies or similar assessment relating to the Services and Deliverables

provided by Consultant hereunder, exclusive of taxes based on Consultant ’s net income or net worth. City and Consultant agree to cooperate on any tax matters arising from the provision of the Services and Deliverables under this Agreement. Both Parties agree to provide reasonable assistance to the other to mitigate any taxes applicable to the Services and Deliverables provided to City or to payments made pursuant to this Agreement with respect to the Services and Deliverables.

3.3 Responsibilities of Consultant.

3.3.1 Independent Contractor; Control and Payment of Subordinates. The Services shall be performed by Consultant or under its supervision. Consultant will determine the means, methods and details of performing the Services subject to the requirements of this Agreement. City retains Consultant on an independent contractor basis and not as an employee. Any personnel performing the Services on behalf of Consultant shall not be employees of City and shall at all times be under Consultant's exclusive direction and control. Neither City, or any of its officials, officers, directors, employees or agents shall have control over the conduct of Consultant or any of Consultants officers, employees or agents, except as set forth in this Agreement. Consultant shall pay all wages, salaries, and other amounts due such personnel in connection with their performance of Services under this Agreement and as required by law. Consultant shall be responsible for all reports and obligations respecting such additional personnel, including, but not limited to: social security taxes, income tax withholding, unemployment insurance, disability insurance, and workers' compensation insurance.

3.3.2 Schedule of Services. Consultant shall perform the Services in a prompt and timely manner and in accordance with the SOW. Consultant represents that it has the professional and technical personnel required to perform the Services expeditiously. Upon request of City, Consultant shall provide a more detailed schedule of anticipated performance to meet the Schedule of Services. Each Statement of Work will set forth the projected work effort and schedule applicable to the Services. All statements and agreements concerning time are based upon information available and circumstances existing at the time made, and each Statement of Work is subject to equitable adjustment upon any material change in such information or circumstances, the occurrence of an Force Majeure Event (as provided for in Section 3.3.9.2 hereof) or upon modification of the scope, timing or level of work to be performed by Consultant . Either Party will be entitled to propose changes. It is mutually acknowledged that any such change may affect the fees or charges (“Charges”) payable to Consultant and/or the project schedule. Neither Party shall have any obligation respecting any change until an appropriate change order or amendment to the applicable Statement of Work is executed and delivered by both Parties.

3.3.3 Conformance to Applicable Requirements. All work prepared by Consultant shall be subject to the approval of City.

3.3.4 Substitution of Key Personnel.

[RESERVED]

3.3.5 City's Representative. The City hereby designates Colin Fernandes, Executive Director, IT, or his/her designee, to act as its representative in all matters pertaining to the administration and performance of this Agreement ("City's Representative"). City's Representative shall have the power to act on behalf of the City for review and approval of all products submitted by Consultant but not the authority to enlarge the Scope of Services or change the total compensation due to Consultant under this Agreement. The City Manager shall be authorized to act on City's behalf and to execute all necessary documents which enlarge the Scope of Services or change the Consultant's total compensation subject to the provisions contained in this Agreement. Consultant shall not accept direction or orders from any person other than the City Manager, City's Representative or his/her designee.

3.3.6 Consultant's Representative. Consultant hereby designates **Shannon Hansen; Director CVS Portfolio** or his/her designee, to act as its representative for the performance of this Agreement ("Consultant's Representative"). Consultant's Representative shall have full authority to represent and act on behalf of the Consultant for all purposes under this Agreement. The Consultant's Representative shall supervise and direct the Services, using his/her best skill and attention, and shall be responsible for all means, methods, techniques, sequences, and procedures and for the satisfactory coordination of all portions of the Services under this Agreement.

3.3.7 Coordination of Services. Consultant agrees to work closely with City staff in the performance of Services and shall be available to City's staff, consultants and other staff at all reasonable times as further described in the applicable SOW.

3.3.8 Standard of Care; Performance of Employees. Consultant shall perform all Services under this Agreement in a skillful and competent manner, consistent with the standards generally recognized as being employed by professionals in the same discipline in the State of California. Consultant represents and maintains that it is skilled in the professional calling necessary to perform the Services. Consultant warrants that all employees and subconsultants shall have sufficient skill and experience to perform the Services assigned to them. Consultant represents that it, its employees and subconsultants have all licenses, permits, qualifications and approvals of whatever nature that are legally required to perform the Services, and that such licenses and approvals shall be maintained throughout the term of this Agreement. Consultant shall perform, at its own cost and expense and without reimbursement from the City, any services necessary to correct errors or omissions which are caused by the Consultant's failure to comply with the standard of care provided for herein. Any employee of the Consultant or its subconsultants who is determined by the City to be uncooperative, incompetent, a threat to the adequate or timely completion of the Project, a threat to the safety of persons or property, or any employee who fails or refuses to perform the Services in a manner acceptable to the City, shall be promptly removed from the Project by the Consultant and shall not be re-employed to perform any of the Services or to work on the Project.

3.3.9 Limited Warranty. Consultant warrants the following:

a. the applicable Services rendered hereunder will be performed by qualified personnel;

b. the Professional Services performed will substantially conform to any applicable requirements set forth in the Statement of Work for a period of thirty

(30) days (the "Warranty Period") following performance of such Professional Services; and

c. during the Warranty Period, the Deliverable(s) will materially conform to the corresponding product specifications set forth in the applicable Statement of Work for such Deliverable.

3.3.10 Remedies. Consultant does not warrant that any Deliverable will operate uninterrupted or error-free, provided that Consultant shall remain obligated pursuant to this Section 9. In the event that any Deliverable or Service fails to conform to the foregoing warranty in any material respect, the sole and exclusive remedy of City will be for Consultant, at its expense, to promptly use commercially reasonable efforts to cure or correct such failure. The foregoing warranty is expressly conditioned upon (i) City providing Consultant with prompt written notice of any claim thereunder prior to the expiration of the applicable Warranty Period, which notice must identify with particularity the non-conformity; (ii) City 's full cooperation with Consultant in all reasonable respects relating thereto, including, in the case of modified software, assisting Consultant to locate and reproduce the non-conformity; and (iii) with respect to any Deliverable, the absence of any alteration or other modification of such Deliverable by any person or entity other than Consultant.

3.3.11 Disclaimer. EXCEPT AS EXPRESSLY PROVIDED IN SECTION 3, CONSULTANT DOES NOT MAKE OR GIVE ANY REPRESENTATION OR WARRANTY OR CONDITION OF ANY KIND, WHETHER SUCH REPRESENTATION, WARRANTY, OR CONDITION BE EXPRESS OR IMPLIED, INCLUDING ANY WARRANTY OF MERCHANTABILITY, QUALITY, OR FITNESS FOR A PARTICULAR PURPOSE OR ANY REPRESENTATION, WARRANTY OR CONDITION FROM COURSE OF DEALING OR USAGE OF TRADE.

3.3.11 Responsibility of City. In the event that City asserts any claim for warranty services hereunder and such claim relates to any matter that is determined not to be Consultant's responsibility hereunder (including any problem with City 's third party vendors, City 's computer hardware or software that was not caused by any Services performed by Consultant), City will be responsible to pay Consultant for all costs incurred for all evaluation, correction or other services performed by Consultant relating to such claim on a time and materials basis at Consultant's then standard billing rates.

3.4 Period of Performance.

3.4.1 Consultant shall perform and complete all Services under this Agreement within the term set forth in Section 3.1.2 above, as may be extended by the Parties pursuant to an applicable SOW or change order document ("Performance Time"). Consultant shall also perform the Services in strict accordance with any completion schedule or Project milestones described in the applicable SOW ("Performance Milestones").

3.4.2 Neither City nor Consultant shall be considered in default of this Agreement for delays in performance caused by circumstances beyond the reasonable control of the non-performing Party. For purposes of this Agreement, such circumstances include a Force Majeure Event. A Force Majeure Event shall mean an event that materially affects a Party's performance and is one or more of the following: (1) Acts of God or other natural disasters; (2) terrorism or other acts of a public enemy; (3) orders of governmental authorities (including, without limitation, unreasonable and unforeseeable delay in the issuance of permits or approvals by governmental authorities that are required for the services); (4) strikes and other organized labor action

occurring at the site and the effects thereof on the services, only to the extent such strikes and other organized labor action are beyond the control of Consultant and its subcontractors, and to the extent the effects thereof cannot be avoided by use of replacement workers; and (5) pandemics, epidemics or quarantine restrictions. For purposes of this section, "orders of governmental authorities," includes ordinances, emergency proclamations and orders, rules to protect the public health, welfare and safety, and other actions of a public agency applicable to the services and Agreement.

3.4.3 Should a Force Majeure Event occur, the non-performing Party shall, within a reasonable time of being prevented from performing, give written notice to the other Party describing the circumstances preventing continued performance and the efforts being made to resume performance of this Agreement. Force Majeure Events and/or delays, regardless of the Party responsible for the delay, shall not entitle Consultant to any additional compensation. Notwithstanding the foregoing in this section, the City may still terminate this Agreement in accordance with the termination provisions of this Agreement.

3.4.4 **Laws and Regulations; Employee/Labor Certification.**

3.4.4.1 Compliance with Laws. Consultant shall keep itself fully informed of and in compliance with all local, state and federal laws, rules and regulations in any manner affecting the performance of the Project or the Services, including all applicable Cal/OSHA requirements, and shall give all notices required by law. Consultant shall be liable for its violations of such laws and regulations during the performance of the Services and this Agreement. All such violations of such laws and regulations shall be grounds for the City to terminate the Agreement for cause.

3.4.4.2 Employment Eligibility; Consultant. Consultant certifies that it fully complies with all requirements and restrictions of state and federal law respecting the employment of undocumented aliens, including, but not limited to, the Immigration Reform and Control Act of 1986, as may be amended from time to time and shall require all subconsultants and sub-subconsultants to comply with the same. Consultant certifies that it has not committed a violation of any such law within the five (5) years immediately preceding the date of execution of this Agreement, and shall not violate any such law at any time during the term of the Agreement.

3.4.4.3 Equal Opportunity Employment. Consultant represents that it is an equal opportunity employer and it shall not discriminate against any subconsultant, employee or applicant for employment because of race, religion, color, national origin, handicap, ancestry, sex or age. Such non-discrimination shall include, but not be limited to, all activities related to initial employment, upgrading, demotion, transfer, recruitment or recruitment advertising, layoff or termination. Consultant shall also comply with all relevant provisions of City's Minority Business Enterprise program, Affirmative Action Plan or other related programs or guidelines currently in effect or hereinafter enacted, as communicated to the Consultant in writing.

3.4.4.4 Air Quality. [RESERVED]

3.4.4.5 Water Quality Management and Compliance. [RESERVED]

3.4.4.6 Safety. Consultant shall execute and maintain its work so as to avoid injury or damage to any person or property. In carrying out its Services, the Consultant shall at all times be in compliance with all applicable local, state and federal laws, rules and regulations relevant to the performance of its Services, and shall exercise all necessary precautions for the safety of employees appropriate to the nature of the work and the conditions under which the work is to be performed.

3.4.4.7 Working Environment. For any Services to be provided by Consultant at any of City's sites, City shall provide Consultant 's personnel with (i) a suitable and adequate work environment, including space for work and equipment for performance of the Services; (ii) reasonable access to and use of City's facilities and relevant information, including software, hardware and documentation; (iii) reasonable assistance to such personnel in a timely manner by promptly correcting any hardware or software problems that would affect the performance of Services; and (iv) any other items set forth in each Statement of Work.

3.4.4.8 City's Personnel Commitment. City will ensure that all City personnel who may be necessary or appropriate for the successful implementation of the Services will, on reasonable notice, (i) be reasonably available to assist Consultant 's personnel by answering business, technical and operational questions and providing requested documents, guidelines and procedures in a timely manner; (ii) participate in the Services as outlined in the Statement of Work; (iii) participate in progress and other Service related meetings; (iv) contribute to software and system testing; and (v) be reasonably available to assist Consultant with any other activities or tasks required to complete the Services in accordance with the Statement of Work.

3.4.4.9 Export Control. City agrees to notify Consultant of any requirements for Deliverables or any other technology, technical data or information to which Consultant will have access as a result of the Services that, in any case, will subject the Deliverables or the other technology, technical data or information to control under applicable export regulations under any classification other than EAR99 (or its non-U.S. equivalent) and, in such event, City will (i) identify to Consultant the applicable regulations (e.g. the United States Export Administration Regulations ("EAR") or the International Traffic in Arms Regulations ("ITAR")) and classifications (e.g. ECCN) and (ii) follow such guidelines as Consultant may communicate to City that reasonably are required to avoid violations. Each Party acknowledges and agrees that to the extent that any tangible or intangible technical data provided under this Agreement is subject to US export laws and regulations, such Party will not use, distribute, transfer, or transmit technical data provided by the other Party under this Agreement except in compliance with US export laws and regulations. Notwithstanding the foregoing, City agrees that it will not provide Consultant with any technology, technical data or information that is subject to control under the ITAR. In the event that City wishes to provide Consultant with ITAR-controlled technology, technical data or information, City will notify Consultant in writing of such intent, and the Parties agree to cooperate to determine the appropriate agreements and controls, if any, required before City makes such disclosure.

3.4.4.10 FCPA. Neither Party shall take any action in connection with the performance of its obligations under this Agreement that violates the Foreign Corrupt Practices Act, as amended, and the rules and regulations thereunder in any manner that has a material adverse impact on the other Party. To the extent that any of the Services or Deliverables cannot be performed or provided without violation of any law, regulation, or other

control, then Consultant shall not be obligated to provide the same and the applicable Statement of Work shall be amended accordingly.

3.4.4.11 Work Authorization/HR Compliance/Relationship Matters. In the event that it is necessary for Consultant to obtain visas or work permits for Consultant personnel, City will cooperate with Consultant by taking all reasonably necessary actions to facilitate Consultant's efforts, including, but not limited to, providing, and hereby consents to Consultant providing to immigration authorities, documentation indicating the nature and location of the work to be performed, the necessity of the work to be performed, and other documentation as may be reasonably required and related to this Agreement (including the existence and terms of this Agreement and the identity of the Parties hereto), and posting such notices as may be legally required (including any legally required notice posting at City sites from which the parties contemplate services being provided by Consultant personnel who are foreign skilled workers). Notwithstanding anything herein to the contrary, City hereby authorizes Consultant to use City's name and/or logo to internally (within Consultant) or externally reference the City as a Consultant customer and to describe the services provided to the City.

3.4.5 **Insurance**.

3.4.5.1 Time for Compliance. Consultant shall not commence work under this Agreement until it has provided evidence that it has secured all insurance required under this section. Subcontractors and independent contractors used in the performance of this contract, if any, shall maintain coverages of the type and in the amounts satisfactory to the City. Failure to provide and maintain all required insurance shall be grounds for the City to terminate this Agreement for cause.

3.4.5.2 Types of Insurance Required. As a condition precedent to the effectiveness of this Agreement for work to be performed hereunder, and without limiting or expanding the indemnity provisions of the Agreement, the Consultant, in partial performance of its obligations under such Agreement, shall procure and maintain in full force and effect during the term of the Agreement the following policies of insurance. If the existing policies do not meet the insurance requirements set forth herein, Consultant agrees to amend, supplement or endorse the policies to do so.

(A) Commercial General Liability: Commercial General Liability Insurance which affords coverage at least as broad as Insurance Services Office "occurrence" form CG 00 01, or the exact equivalent, with limits of not less than $2,000,000 per occurrence and no less than $4,000,000 in the general aggregate. Defense costs shall be paid in addition to the limits. The policy shall contain no endorsements or provisions (1) limiting coverage for contractual liability; (2) excluding coverage for claims or suits by one insured against another (cross-liability); (3) products/completed operations liability; or (4) containing any other exclusion(s) contrary to the terms or purposes of this Agreement.

(B) Automobile Liability Insurance: Automobile Liability Insurance with coverage at least as broad as Insurance Services Office Form CA 00 01 covering "Any Auto" (Symbol 1), or the exact equivalent, covering bodily injury and property

damage for all activities with limits of not less than $2,000,000 combined limit for each occurrence.

(C) Workers' Compensation: Workers' Compensation Insurance, as required by the State of California and Employer's Liability Insurance with a limit of not less than $1,000,000 per accident for bodily injury and disease.

(D) Professional Liability (Errors & Omissions): Professional Liability insurance or Errors & Omissions insurance appropriate to Consultant's profession with limits of not less than $2,000,000 per occurrence and in the aggregate. Covered professional services shall specifically include all work to be performed under the Agreement and delete any exclusions that may potentially affect the work to be performed (for example, any exclusions relating to lead, asbestos, pollution, testing, underground storage tanks, laboratory analysis, soil work, etc.). If coverage is written on a claims-made basis, the retroactive date shall precede the effective date of the initial Agreement and continuous coverage will be maintained or an extended reporting period will be exercised for a period of at least three (3) years from termination or expiration of this Agreement.

(E) **Cyber Liability** Insurance, with limits not less than **$2,000,000** per occurrence or claim, **$2,000,000** aggregate. Coverage shall be sufficiently broad to respond to the duties and obligations as is undertaken by Consultant in this agreement and shall include, but not be limited to, claims involving security breach, system failure, data recovery, business interruption, cyber extortion, social engineering, infringement of intellectual property, including but not limited to infringement of copyright, trademark, trade dress (excluding patent infringement), invasion of privacy violations, information theft, damage to or destruction of electronic information, release of private information, and alteration of electronic information. The policy shall provide coverage for breach response costs, regulatory fines and penalties as well as credit monitoring expenses.

3.4.5.3 Insurance Endorsements. Required insurance policies shall contain the following provisions, or Consultant shall provide endorsements on forms to add the following provisions to the insurance policies:

(A) Commercial General Liability: (1) Additional Insured: The City, its officials, officers, employees, agents, and volunteers shall be additional insureds with regard to liability and defense of suits or claims arising out of the performance of the Agreement. Additional Insured Endorsements shall not (1) be restricted to "ongoing operations"; (2) exclude "contractual liability"; (3) restrict coverage to "sole" liability of Consultant; or (4) contain any other exclusions contrary to the terms or purposes of this Agreement. For all policies of Commercial General Liability insurance, Consultant shall provide endorsements in the form of ISO CG 20 10 and 20 37 (or endorsements providing the exact same coverage) to effectuate this requirement. (2) Cancellation: Required insurance policies shall not be canceled or the coverage reduced until a thirty (30) day written notice of cancellation has been served upon the City except ten (10) days shall be allowed for non-payment of premium.

(B) Automobile Liability: (1) Additional Insured: The City, its directors, officials, officers, employees, agents, and volunteers shall be covered as additional insureds with respect to the ownership, operation, maintenance, use, loading or unloading of

any auto owned, leased, hired or borrowed by the Vendor or for which the Vendor is responsible. (2) Cancellation: Required insurance policies shall not be canceled or the coverage reduced until a thirty (30) day written notice of cancellation has been served upon the City except ten (10) days shall be allowed for non-payment of premium.

(C) Professional Liability (Errors & Omissions):(1) Cancellation: Required insurance policies shall not be canceled or the coverage reduced until a thirty (30) day written notice of cancellation has been served upon the City except ten (10) days shall be allowed for non-payment of premium. (2) This insurance shall be written on a policy form coverage specifically designed to protect against acts, errors or omissions of the Consultant. "Covered Professional Services" as designated in the policy must specifically include work performed under this Agreement. The policy must "pay on behalf of" the insured and include a provision establishing the insurer's duty to defend.

(D) Workers' Compensation: (1) Cancellation: Required insurance policies shall not be canceled or the coverage reduced until a thirty (30) day written notice of cancellation has been served upon the City except ten (10) days shall be allowed for non-payment of premium. (2) Waiver of Subrogation: A waiver of subrogation stating that the insurer waives all rights of subrogation against the City, its officials, officers, employees, agents, and volunteers.

3.4.5.4 Primary and Non-Contributing Insurance. All policies of Commercial General Liability and Automobile Liability insurance shall be primary and any other insurance, deductible, or self-insurance maintained by the City, its officials, officers, employees, agents, or volunteers shall not contribute with this primary insurance. Policies shall contain or be endorsed to contain such provisions.

3.4.5.5 Waiver of Subrogation. All required insurance coverages, except for the professional liability coverage, shall contain or be endorsed to waiver of subrogation in favor of the City, its officials, officers, employees, agents, and volunteers or shall specifically allow Consultant or others providing insurance evidence in compliance with these specifications to waive their right of recovery prior to a loss. Consultant hereby waives its own right of recovery against City.

3.4.5.6 Evidence of Insurance. The Consultant, concurrently with the execution of the Agreement, and as a condition precedent to the effectiveness thereof, shall deliver original certificates together with all endorsements required herein. The certificates and endorsements for each insurance policy shall be signed by a person authorized by that insurer to bind coverage on its behalf. At least fifteen (15 days) prior to the expiration of any such policy, evidence of insurance showing that such insurance coverage has been renewed or extended shall be filed with the City. If such coverage is cancelled or reduced and not replaced immediately so as to avoid a lapse in the required coverage, Consultant shall, within ten (10) days after receipt of written notice of such cancellation or reduction of coverage, file with the City evidence of insurance showing that the required insurance has been reinstated or has been provided through another insurance company or companies.

3.4.5.7 Acceptability of Insurers. Each such policy shall be from a company or companies with a current A.M. Best's rating of no less than A-:VII and authorized to transact business of insurance in the State of California, or otherwise allowed to place insurance

through surplus line brokers under applicable provisions of the California Insurance Code or any federal law.

3.4.5.8 Enforcement of Agreement Provisions (non estoppel). Consultant acknowledges and agrees that actual or alleged failure on the part of the City to inform Consultant of non-compliance with any requirement imposes no additional obligation on the City nor does it waive any rights hereunder.

3.4.5.9 Requirements Not Limiting. Requirement of specific coverage or minimum limits contained in this Section are not intended as a limitation or expansion on coverage, limits, or other requirement, or a waiver of any coverage normally provided by any insurance.

3.4.5.10 Additional Insurance Provisions

(A) The foregoing requirements as to the types and limits of insurance coverage to be maintained by Consultant, and any approval of said insurance by the City, is not intended to and shall not in any manner limit, expand or qualify the liabilities and obligations otherwise assumed by the Consultant pursuant to this Agreement, including but not limited to, the provisions concerning indemnification.

(B) If at any time during the life of the Agreement, any policy of insurance required under this Agreement is canceled and not replaced, City has the right, following fifteen (15) days' notice of its intent to do so, but not the duty to obtain the insurance it deems necessary and any premium paid by City will be promptly reimbursed by Consultant or City will withhold amounts sufficient to pay premium from Consultant payments. In the alternative, City may cancel this Agreement.

(C) In the event that a claim is presented to The City under which it seeks coverage as an additional insured the Consultant can provide copies of insurance policies in effect at the time of the Project.

(D) Neither the City nor any of its officials, officers, employees, agents or volunteers shall be personally responsible for any liability arising under or by virtue of this Agreement.

(E) The limits set forth herein shall apply separately to each insured against whom claims are made or suits are brought, except with respect to the limits of liability. Further the limits set forth herein shall not be construed to relieve or expand the limitation of liability set forth in this Agreement, nor shall it limit or expand the Consultant's indemnification obligations to the City and shall not preclude the City from taking such other actions available to the City under other provisions of the Agreement or law. Notwithstanding the preceding sentence, if Consultant maintains insurance limits for any line of insurance in an amount greater than any limitation of liability in this Agreement ("excess limits"), the presence of any "excess limits" shall not be construed to expand any limitation of liability in this Agreement.

(F) Consultant shall report to the City, in addition to Consultant's insurer, any and all insurance claims submitted by Consultant in connection with the Services under this Agreement.

3.4.5.11 Insurance for Subconsultants. Consultant shall be responsible for causing subconsultants to purchase the appropriate insurance incompliance with the terms of these Insurance Requirements, including adding the City, its officials, officers, employees, agents, and volunteers as additional insureds to the subconsultant's policies. All policies of Commercial General Liability insurance provided by Consultant's subconsultants performing work relating to this Agreement shall be endorsed to name the City, its officials, officers, employees, agents and volunteers as additional insureds using endorsement form ISO CG 20 38 or an endorsement providing equivalent coverage. Consultant shall not allow any subconsultant to commence work on any subcontract relating to this Agreement until it has received satisfactory evidence of subconsultant's compliance with all insurance requirements under this Agreement, to the extent applicable. The Consultant shall provide satisfactory evidence of compliance with this section upon request of the City.

3.5 Labor Code Requirements.

3.5.1 Prevailing Wages. Consultant is aware of the requirements of California Labor Code Section 1720, et seq., and 1770, et seq., as well as California Code of Regulations, Title 8, Section 16000, et seq., ("Prevailing Wage Laws"), which require the payment of prevailing wage rates and the performance of other requirements on "public works" and "maintenance" projects. If the Services are being performed as part of an applicable "public works" or "maintenance" project, as defined by the Prevailing Wage Laws, and if the total compensation is $1,000 or more, Consultant agrees to fully comply with such Prevailing Wage Laws, as applicable to the Services. or alleged failure to comply with the Prevailing Wage Laws.

3.5.2 Registration/DIR Compliance. [RESERVED]

3.5.3 Compliance Monitoring. This Project may also be subject to compliance monitoring and enforcement by the DIR. It shall be Consultant's sole responsibility to comply with all applicable registration and labor compliance requirements, including the submission of payroll records directly to the DIR. Any stop orders issued by the DIR against Consultant or any subconsultant that affect Consultant's performance of services, including any delay, shall be Consultant's sole responsibility. Any delay arising out of or resulting from such stop orders shall be considered Consultant caused delay and shall not be compensable by the City. Consultant shall defend, indemnify and hold the City, its officials, officers, employees and agents free and harmless from any claim or liability arising out of stop orders issued by the DIR in accordance with this provision against Consultant or any subconsultant.

3.5.4 Labor Certification. By its signature hereunder, Consultant certifies that it is aware of the provisions of Section 3700 of the California Labor Code which require every employer to be insured against liability for Worker's Compensation or to undertake self-insurance in accordance with the provisions of that Code, and agrees to comply with such provisions before commencing the performance of the Services.

3.6 Termination of Agreement.

3.6.1.1 Grounds for Termination and Suspension. City may, by written notice to Consultant, terminate the whole or any part of this Agreement at any time without cause by giving written notice to Consultant of such termination, and specifying the effective

date thereof, at least thirty (30) days before the effective date of such termination without early termination penalty or liability, except as otherwise agreed in a SOW. Upon termination, Consultant shall be compensated only for those Services which have been adequately rendered to City and for and reasonable, pre-approved expenses, and Consultant shall be entitled to no further compensation. Consultant may not terminate this Agreement except for cause. The rights and remedies of the City provided in this section shall not be exclusive and are in addition to any other rights and remedies provided by law, equity or under this Agreement. Further, this Agreement may be terminated in whole or in part by either Party (the "non-breaching party") upon written notice to the other Party if any of the following events occur by or with respect to such other Party (the "breaching party"): (i) the breaching party commits a material breach of any of its obligations hereunder and fails to cure such breach within fourteen (14) days after receipt of notice of such breach or fails to reach an agreement with the non-breaching party regarding the cure thereof; or (ii) any insolvency of the breaching party, any filing of a petition in bankruptcy by or against the breaching party, any appointment of a receiver for the breaching party, or any assignment for the benefit of the breaching party's creditors. In addition to any right to terminate as provided in this Agreement, the Parties agree that in connection with any dispute for which City withholds the payment of charges pursuant to this Agreement, if the total amount being disputed (other than amounts in dispute resulting from clear billing errors of Consultant), plus any amount that is undisputed but past due and any interest that has accrued thereon, exceeds the amount of fees billed by Consultant in the then-prior three-month period (the "Disputed Amount"), Consultant may, without liability to City or its Affiliates, with at least 30 days' prior written notice to City, suspend the further delivery of Services that are not paid for in advance until all payment disputes are resolved using the dispute resolution process set forth in this Agreement. If City pays the Disputed Amount, Consultant shall promptly recommence performance of the Services and all Consultant timing obligations and delivery commitments under this Agreement and/or each applicable SOW shall be extended by the number of days between the date of suspension and the date Consultant recommences performance of the relevant Services.

3.6.1.2 Effect of Termination. If this Agreement is terminated as provided herein, City may require Consultant to provide all finished or unfinished Documents and Data and other information of any kind prepared by Consultant in connection with the performance of Services under this Agreement. Consultant shall be required to provide such document and other information within fifteen (15) days of the request.

3.6.1.3 Additional Services. In the event this Agreement is terminated in whole or in part as provided herein, City may procure, upon such terms and in such manner as it may determine appropriate, services similar to those terminated. Consultant is under no obligation to provides its Proprietary Information to any successor supplier.

3.7 Indemnification and Limitation on Liability.

3.7.1 To the fullest extent permitted by law, Consultant agrees indemnify, defend and hold harmless City and against any and all claims, actions, damages, liabilities, costs and expenses, including reasonable attorneys' fees and expenses, arising out of third party claims for bodily injury or damage to real or tangible personal property, not including software, data, and documentation, to the extent caused directly and proximately by the negligence or willful misconduct of the Consultant, its employees or agents or arising out of the Consultant's performance of its obligations under this Agreement. The City must (i) promptly

notify Consultant of any matters in respect of which the indemnity may apply and of which the indemnified party has knowledge; and (ii) cooperate with Consultant, at the Consultant's cost and expense in the defense or settlement thereof. The City may participate, at its own expense, in such defense and in any settlement discussions directly or through counsel of its choice on a monitoring, non-controlling basis.

3.7.2 . Consultant's obligation to indemnify shall survive expiration or termination of this Agreement and shall not be restricted to insurance proceeds, if any, received by Consultant, the City, its officials, officers, employees, agents, or volunteers.

3.7.3 If Consultant's obligation to defend, indemnify, and/or hold harmless arises out of Consultant's performance as a "design professional" (as that term is defined under Civil Code section 2782.8), then, and only to the extent required by Civil Code section 2782.8, which is fully incorporated herein, Consultant's indemnification obligation shall be limited to claims that arise out of, pertain to, or relate to the negligence, recklessness, or willful misconduct of the Consultant, and, upon Consultant obtaining a final adjudication by a court of competent jurisdiction, Consultant's liability for such claim, including the cost to defend, shall not exceed the Consultant's proportionate percentage of fault.

3.7.4 **Exclusion of Damages**. In no event shall either Party be liable to the other Party or any other person or entity for any lost profits, special, exemplary, indirect, incidental, consequential or punitive damages or liabilities, or for any costs (including transition costs) associated with procuring substitute or replacement services, of any kind or nature whatsoever (collectively, "Indirect Damages"), whether in an action based on contract, warranty, strict liability, tort or otherwise, even if such Party has been informed in advance of the possibility of such Indirect Damages or such Indirect Damages could have been reasonably foreseen by such Party.

3.7.5 **Total Liability**. In no event shall either Party's liability to the other Party or any other person or entity arising out of or in connection with this Agreement or the Services exceed, in the aggregate, the total fees paid by City to Consultant for the particular Service or Deliverable with respect to which such liability relates (or in the case of any liability not related to a particular portion of the Services, the total fees paid by City to Consultant under the applicable Statement of Work) in the twelve (12) month period preceding the last act or omission giving rise to any such liability, whether such liability is based on an action in contract, warranty, strict liability or tort (including, without limitation, negligence) or otherwise. The limitations specified in this Section will survive and apply even if any limited remedy specified in this Agreement is found to have failed of its essential purpose. Notwithstanding the foregoing, this section shall not apply to losses resulting from a breach of confidentiality, refusal to provide services, death, bodily injury, damage to tangible property, violation of applicable law, gross negligence or willful misconduct.

3.8 General Provisions.

3.8.1 Accounting Records. Consultant shall maintain complete and accurate records with respect to all costs and expenses incurred under this Agreement. All such records shall be clearly identifiable. Consultant shall allow a representative of City during normal business hours to examine, audit, and make transcripts or copies of such records and any other documents created pursuant to this Agreement. Any audits shall be subject to the following

limitations: (i) City audits shall not occur more than annually (unless required by applicable laws); (ii) City shall give Consultant at least thirty (30) days' prior notice of its intention to audit; (iii) City 's third party auditors (if applicable) shall be mutually agreed by the parties and, in any case, shall not be competitors of Consultant; (iv) City 's third party auditors shall execute appropriate non-disclosure agreements; (v) City audits shall be conducted during normal business hours; (vi) in no event shall City 's audit rights hereunder entitle City or its auditors to access any information related to Consultant costs, or Consultant workforce management-related tools or activities (or any data generated in connection therewith) and (vii) City or its third party auditors shall comply with any and all reasonable security and confidentiality guidelines and other policies of Consultant with respect to the audit and shall take reasonable measures to prevent unnecessary disruption to Consultant's operations. Consultant shall allow inspection of all work, data, documents, proceedings, and activities related to the Agreement for a period of three (3) years from the date of final payment under this Agreement.

3.8.2 Independent Contractors and Subcontracting.

3.8.2.1 Use of Consultants. Consultant is aware of statutory and case law regarding classification of workers as independent contractors, including California Labor Code Section 2750.3 and Dynamex Operations West, Inc. v. Superior Court, 4 Cal. 5th 903 (2018). To ensure that Consultant is in compliance with the California Labor Code, Consultant shall only utilize its employees to provide the Services. Consultant may not provide the services through any independent contractor, subcontractor or subconsultant ("Subcontractor(s)") unless approved by the City as set forth in Section 3.7.2.2 below. Consultant represents and warrants that all personnel who perform the Services on Consultant's behalf are Consultant's employees unless otherwise approved in writing by the City, and that Consultant complies with all applicable laws, rules and regulations governing its employees, including, but not limited to, the California Labor Code, Unemployment Insurance Code and all applicable Industrial Welfare Commission Wage Orders.

3.8.2.2 Prior Approval Required. Consultant shall not use any Subcontractor to provide the Services, or any portion of the work required by this Agreement, without prior written approval of City. In the event that City authorizes Consultant to use a Subcontractor, Consultant shall enter into a written agreement with the Subcontractor, which must include all provisions of the Agreement, including a restriction on the Subcontractor's use of further independent contractors, subcontractors or subconsultants without the City's prior written consent.

3.8.3 Delivery of Notices. All notices permitted or required under this Agreement shall be given to the respective parties at the following address, or at such other address as the respective parties may provide in writing for this purpose:

Consultant: Collaborative Solutions, LLC
300 Frank W Burr Boulevard, Suite 36 6th Floor

Teaneck, New Jersey 07666

ATTN: Legal Department

City: City of Ontario

303 East “B” Street
Ontario, CA 91764
ATTN: Colin Fernandes, Executive Director, IT

Such notice shall be deemed made when personally delivered or when mailed, forty-eight (48) hours after deposit in the U.S. Mail, first class postage prepaid and addressed to the party at its applicable address. Actual notice shall be deemed adequate notice on the date actual notice occurred, regardless of the method of service.

3.8.4 Ownership of Materials and Confidentiality.

3.8.4.1 Documents & Data; Licensing of Intellectual Property. Unless otherwise agreed in an SOW, Consultant agrees that the software or other works of authorship developed by Consultant or its Affiliates specifically for City as a Deliverable or a part of a Deliverable, as set forth in a Statement of Work ("Documents & Data") shall be the property of, and ownership shall vest in, City. Documents & Data does not include Consultant Proprietary Information, Consultant Proprietary Intellectual Property (as defined below), any Third Party Items, or any derivative of the foregoing, that may be incorporated into a Deliverable. Consultant agrees to take, at City’s cost and expense, all actions requested by City which are reasonably necessary to assure the conveyance to City of the foregoing rights to the Documents & Data. All Documents & Data shall be and remain the property of City, and shall not be used in whole or in substantial part by Consultant on other projects without the City’s express written permission. Within thirty (30) days following the completion, suspension, abandonment or termination of this Agreement, Consultant shall provide to City reproducible copies of all Documents & Data, in a form and amount required by City. City reserves the right to select the method of document reproduction and to establish where the reproduction will be accomplished. The reproduction expense shall be borne by City at the actual cost of duplication. In the event of a dispute regarding the amount of compensation to which the Consultant is entitled under the termination provisions of this Agreement, Consultant shall provide all Documents & Data to City upon payment of the undisputed amount. Consultant shall have no right to retain or fail to provide to City any such documents pending resolution of the dispute. . In addition, Consultant shall retain copies of all Documents & Data on file for a minimum of seven (7) years following completion of the Project, and shall make copies available to City upon the payment of actual reasonable duplication costs. Before destroying the Documents & Data following this retention period, Consultant shall make a reasonable effort to notify City and provide City with the opportunity to obtain the documents.

3.8.4.2 Subconsultants. Consultant shall require all subconsultants to agree in writing that City is granted a non-exclusive and perpetual license for any Documents & Data the subconsultant prepares under this Agreement. Consultant represents and warrants that Consultant has the legal right to license any and all Documents & Data. Consultant makes no such representation and warranty in regard to Documents & Data which were prepared by design professionals other than Consultant or its subconsultants, or those provided to Consultant by the City.

3.8.4.3 Right to Use. City shall not be limited in any way in its use or reuse of the Documents and Data or any part of them at any time for purposes of this Project or another project, provided that any such use not within the purposes intended by this Agreement or on a project other than this Project without employing the services of Consultant shall be at

City's sole risk. If City uses or reuses the Documents & Data on any project other than this Project, it shall remove the Consultant's seal from the Documents & Data and indemnify and hold harmless Consultant and its officers, directors, agents and employees from claims arising out of the negligent use or re-use of the Documents & Data on such other project. Consultant shall be responsible and liable for its Documents & Data, pursuant to the terms of this Agreement, only with respect to the condition of the Documents & Data at the time they are provided to the City upon completion, suspension, abandonment or termination. Consultant shall not be responsible or liable for any revisions to the Documents & Data made by any party other than Consultant, a party for whom the Consultant is legally responsible or liable, or anyone approved by the Consultant.

3.8.4.4 **Residual Rights**. Notwithstanding anything to the contrary herein, Consultant, Consultant Affiliates, and their respective employees and agents shall be free to use and employ any Residual Information. "Residual Information" means the general knowledge, ideas, know-how, experience, and techniques that would be retained in the unaided memory of an ordinary person skilled in the art, not intent on appropriating the proprietary information of the disclosing party. Nothing in this paragraph, however, shall be deemed to grant a license under City 's registered intellectual property rights.

3.8.4.5 **Consultant Proprietary Intellectual Property**. City acknowledges that Consultant personnel may utilize proprietary software, methodologies, tools, specifications, drawings, sketches, models, samples, records, documentation, works of authorship, creative works, ideas, know-how, research results, data or other materials which have been or are originated, developed, licensed, purchased, or acquired by Consultant or its Affiliates or subcontractors (collectively, "Consultant Proprietary Intellectual Property"); which constitutes Consultant Proprietary Information. City agrees that Consultant Proprietary Intellectual Property and Residual Information, any derivatives of Consultant Proprietary Intellectual Property or Residual Information, is the sole property of Consultant (or its licensors) and that Consultant (or its licensors) will retain sole and exclusive title to and ownership thereof. If any Consultant Proprietary Intellectual Property owned by Consultant is embedded in a Deliverable, Consultant grants to City a worldwide, royalty free, non-exclusive, transferable, perpetual license to use, execute and perform such Consultant Proprietary Intellectual Property as a functional element of the applicable Deliverable, subject to any additional terms or limitations set forth in the applicable Statement of Work, and provided that no portion of the Consultant Proprietary Intellectual Property is separated or unbundled from the applicable Deliverables or used as a stand-alone product or development tool. Except as expressly provided in the foregoing sentence, nothing contained in this Agreement or otherwise shall be construed to grant to City any right, title, license or other interest in, to or under any Consultant Proprietary Intellectual Property (whether by estoppel, implication or otherwise). Any license to Consultant Proprietary Intellectual Property that is not embedded in Deliverables or that is commercially available will be pursuant to a separate license agreement between City and Consultant (or its licensor).

3.8.4.6 **City Provided IP and Third Party Items**. City grants Consultant and its Subcontractors a non-exclusive, paid-up license to use, execute, reproduce, distribute, and prepare derivative works of City software and third party software licensed to City as reasonably required to perform Services. Consultant shall obtain City 's prior written consent before embedding in Deliverables or installing in City 's environment any proprietary third party tools or applications. If any third party tools, applications, utilities and cloud infrastructure are

distributed, resold, or provided to City in connection with this Agreement (collectively, "Third Party Items"), such Third Party Items shall be provided AS-IS and may be made available to City under a separate agreement between City and the licensor of the Third Party Item or made available to City by Consultant under a separate agreement or pass-through terms set forth in an SOW, which shall apply to the relevant Third Party Item(s) in lieu of any of the terms of this Agreement. Notwithstanding anything to the contrary herein, City 's use of each open-source component incorporated by Consultant into a Deliverable will be governed by, and is subject to the terms and conditions of the applicable open-source license.

3.8.4.7 **Installation of Tools**. Consultant may use certain Consultant owned or licensed Tools (the "Tools"), including those set forth in the applicable SOW in connection with its performance of the Services. The Tools are Consultant Proprietary Intellectual Property and are not part of any Deliverable. As between Consultant and City , Consultant is the sole owner of the Tools, together with all modifications, enhancements and changes to the Tools and the information generated by any of the foregoing. City consents to Consultant's installation of the Tools onto City 's systems. Only Consultant may install, configure, control, or grant access to the Tools. City agrees that Consultant may uninstall and remove the Tools at any time, and that the consent set forth in this paragraph is not a software license or subscription agreement. Consultant will use the Tools as installed on City 's systems solely to perform the Services for City .

3.8.4.8 Indemnification. Consultant and City (in such case, the "indemnifying party") each agree to indemnify and hold harmless the other (in such case, the "indemnified party") from and against any costs and damages awarded against the indemnified party by a court pursuant to a final judgment as a result of, and defend the indemnified party against, claims of infringement of a U.S. patent or registered copyright or misappropriation of any trade secret related to a Deliverable (in the case of indemnification by Consultant) or any claim relating to Consultant's possession, use or modification of any software, documentation, data or other property provided by City (in the case of indemnification by City).

3.8.4.9 **Intellectual Property Rights Exclusions**. Consultant shall have no obligation under Section 8.1 or other liability for any infringement or misappropriation claim resulting or alleged to result from: (i) modifications made other than by Consultant, (ii) use of the Deliverables other than for City 's internal purposes or in combination with any equipment, software or material not approved or provided by Consultant, (iii) City 's use or incorporation of materials not provided by Consultant, (iv) the instructions, designs or specifications provided or approved by City ; (v) any software or other materials furnished by any third party; or (vi) City 's continuing the allegedly infringing activity after being notified thereof or after being informed and provided with modifications that would have avoided the alleged infringement.

3.8.4.10 **Infringement Remedies**. In the event of an infringement or misappropriation claim as described in Section 8.1 above arises, or if Consultant reasonably believes that a claim is likely to be made, Consultant, at its option and in lieu of indemnification, may: (i) modify the applicable Deliverables so that they become non-infringing but functionally equivalent; or (ii) replace the applicable Deliverables with material that is non-infringing but functionally equivalent; or (iii) obtain for City the right to use such Deliverables upon commercially reasonable terms; or (iv) remove the infringing or violative Deliverables and refund to City the fees received for such Deliverables that are the subject of such a claim based on a five (5) year straight line depreciation. This Section sets forth the exclusive remedy and entire

liability and obligation of each Party with respect to intellectual property infringement or misappropriation claims, including patent or copyright infringement claims and trade secret misappropriation.

3.8.4.11 The City must (i) promptly notify Consultant of any matters in respect of which the indemnity may apply and of which the indemnified party has knowledge; and (ii) cooperate with Consultant, at the Consultant's cost and expense in the defense or settlement thereof. The City may participate, at its own expense, in such defense and in any settlement discussions directly or through counsel of its choice on a monitoring, non-controlling basis.

3.8.4.12 Confidentiality. All ideas, memoranda, specifications, plans, procedures, drawings, descriptions, computer program data, input record data, written information, and other Documents & Data either created by or provided to Consultant in connection with the performance of this Agreement shall be held confidential by Consultant. Such materials shall not, without the prior written consent of City, be used by Consultant for any purposes other than the performance of the Services. Nor shall such materials be disclosed to any person or entity not connected with the performance of the Services or the Project. Nothing furnished to Consultant which is otherwise known to Consultant or is generally known, or has become known, to the related industry shall be deemed confidential. Consultant shall not use City's name or insignia, photographs of the Project, or any publicity pertaining to the Services or the Project in any magazine, trade paper, newspaper, television or radio production or other similar medium without the prior written consent of City. Consultant shall abide by the obligations in Exhibit A (Data Protection Agreement).

3.8.4.13 Confidential Information. The City shall refrain from releasing Consultant's proprietary information ("Proprietary Information") unless the City's legal counsel determines that the release of the Proprietary Information is required by the California Public Records Act or other applicable state or federal law, or order of a court of competent jurisdiction, in which case the City shall notify Consultant of its intention to release Proprietary Information. Consultant shall have five (5) working days after receipt of the release notice to give City written notice of Consultant's objection to the City's release of Proprietary Information. Consultant shall indemnify, defend and hold harmless the City, and its officers, directors, employees, and agents from and against all liability, loss, cost or expense (including attorney's fees) arising out of a legal action brought to compel the release of Proprietary Information. City shall not release the Proprietary Information after receipt of an objection notice unless either: (1) Consultant fails to fully indemnify, defend (with City's choice of legal counsel), and hold City harmless from any legal action brought to compel such release; and/or (2) a final and non-appealable order by a court of competent jurisdiction requires that City release such information.

3.8.5 Cooperation; Further Acts. The Parties shall fully cooperate with one another, and shall take any additional acts or sign any additional documents as may be necessary, appropriate or convenient to attain the purposes of this Agreement.

3.8.6 Entire Agreement. This Agreement contains the entire agreement of the Parties with respect to the subject matter hereof, and supersedes all prior negotiations, understandings or agreements.

3.8.7 Attorneys' Fees. If either party commences an action against the other party, either legal, administrative or otherwise, arising out of or in connection with this Agreement, the prevailing party in such litigation shall be entitled to have and recover from the losing party reasonable attorneys' fees and all costs of such action.

3.8.8 Governing Law. This Agreement shall be governed by the laws of the State of California. Venue shall be in San Bernardino County. To the fullest extent permitted by Law, each Party irrevocably waives all rights to a trial by jury. In addition to any and all contract requirements pertaining to notices of and requests for compensation or payment for extra work, disputed work, claims and/or changed conditions, Consultant must comply with the claim procedures set forth in Government Code sections 900 et seq. prior to filing any lawsuit against the City. Such Government Code claims and any subsequent lawsuit based upon the Government Code claims shall be limited to those matters that remain unresolved after all procedures pertaining to extra work, disputed work, claims, and/or changed conditions have been followed by Consultant. If no such Government Code claim is submitted, or if any prerequisite contractual requirements are not otherwise satisfied as specified herein, Consultant shall be barred from bringing and maintaining a valid lawsuit against the City.

3.8.9 Timely Performance: Consultant will use diligent efforts to meet the time periods as may be specified in the SOW.

3.8.10 City's Right to Employ Other Consultants. City reserves right to employ other consultants in connection with this Project.

3.8.11 Successors and Assigns. This Agreement shall be binding on the successors and assigns of the parties.

3.8.12 Assignment or Transfer. . Neither Party may assign or otherwise transfer any of its rights, duties or obligations under this Agreement without the prior written consent of the other Party, except either Party may, upon prior written notice to the other Party (but without any obligation to obtain the consent of such other Party), assign this Agreement or any of its rights hereunder to any Affiliate of such Party, or to any entity who succeeds (by purchase, merger, operation of law or otherwise) to all or substantially all of the capital stock, assets or business of such Party, if such entity agrees in writing to assume and be bound by all of the obligations of such Party under this Agreement. Any attempt to so assign or so transfer without such consent (except as permitted above) shall be void and without legal effect and shall constitute grounds for termination. Consultant shall not subcontract any portion of the Services required by this Agreement, except as expressly stated herein, without prior written approval of City. Subcontracts, if any, shall contain a provision making them subject to all provisions stipulated in this Agreement.

3.8.13 Construction; References; Captions. Since the Parties or their agents have participated fully in the preparation of this Agreement, the language of this Agreement shall be construed simply, according to its fair meaning, and not strictly for or against any Party. Any term referencing time, days or period for performance shall be deemed calendar days and not work days. All references to Consultant include all personnel, employees, agents, and subconsultants of Consultant, except as otherwise specified in this Agreement. All references to City include its elected officials, officers, employees, agents, and volunteers except as otherwise specified in this Agreement. The captions of the various articles and paragraphs are

for convenience and ease of reference only, and do not define, limit, augment, or describe the scope, content, or intent of this Agreement.

3.8.14 Amendment; Modification. No supplement, modification, or amendment of this Agreement shall be binding unless executed in writing and signed by both Parties.

3.8.15 Waiver. No waiver of any default shall constitute a waiver of any other default or breach, whether of the same or other covenant or condition. No waiver, benefit, privilege, or service voluntarily given or performed by a Party shall give the other Party any contractual rights by custom, estoppel, or otherwise.

3.8.16 No Third-Party Beneficiaries. There are no intended third party beneficiaries of any right or obligation assumed by the Parties.

3.8.17 Invalidity; Severability. If any portion of this Agreement is declared invalid, illegal, or otherwise unenforceable by a court of competent jurisdiction, the remaining provisions shall continue in full force and effect.

3.8.18 Prohibited Interests. Consultant maintains and warrants that it has not employed nor retained any company or person, other than a bona fide employee working solely for Consultant, to solicit or secure this Agreement. Consultant warrants that it has not paid nor has it agreed to pay any company or person, other than a bona fide employee working solely for Consultant, any fee, commission, percentage, brokerage fee, gift or other consideration contingent upon or resulting from the award or making of this Agreement. Consultant further agrees to file, or shall cause its employees or subconsultants to file, a Statement of Economic Interest with the City's Filing Officer as required under state law in the performance of the Services. For breach or violation of this warranty, City shall have the right to rescind this Agreement without liability. For the term of this Agreement, no member, officer or employee of City, during the term of his or her service with City, shall have any direct interest in this Agreement, or obtain any present or anticipated material benefit arising therefrom.

3.8.19 Authority to Enter Agreement. Consultant has all requisite power and authority to conduct its business and to execute, deliver, and perform the Agreement. Each Party warrants that the individuals who have signed this Agreement have the legal power, right, and authority to make this Agreement and bind each respective Party.

3.8.20 Counterparts. This Agreement may be signed in counterparts, each of which shall constitute an original.

3.8.21 Survival. All rights and obligations hereunder that by their nature are to continue after any expiration or termination of this Agreement, including, but not limited to, the indemnification obligations, shall survive any such expiration or termination.

3.9 Federal Provisions. NA

EXHIBIT A

DATA PROTECTION AGREEMENT

This Data Protection Agreement (this "**DPA**"), is entered into by and Collaborative Solutions, LLC (collectively with its Affiliates, "**Consultant**") and **City of Ontario** ("**Client**") (each a "**Party**" and collectively, "**Parties**"), pursuant to the terms and conditions of the Master Services Agreement (the "**Agreement**") effective _____ between the Parties.

General Data Protection Terms

1. Introduction.

1.1. Order of Precedence. This DPA is part of the Agreement, and the terms of this DPA are in addition to, and not in lieu of, the terms in the Agreement. Other than with respect to the limitations of liability set forth in the Agreement, which shall govern and control in all cases, the terms of this DPA shall prevail over any conflicting terms in the Agreement's other sections.

2. Definitions.

2.1. In this DPA:

a. "**Access**" or "**Accessing**" means to access, view, alter, use, process, transfer, store, host, disclose, erase, destroy, or dispose of Protected Data, and includes any operation or set of operations performed upon Protected Data, whether or not by automated means.

b. "**Applicable Laws**" means the privacy, data security, and data protection laws, directives, regulations, orders, and rules in the jurisdiction(s) applicable to the Consultant and/or the Services provided under the Agreement.

c. "**Applicable Standards**" means government standards, industry standards, and commercially reasonable practices related to privacy, data security or data protection that are applicable to Consultant and the Services provided under the Agreement, or such other standards as otherwise agreed to by the Parties and specifically set forth in an applicable Statement of Work or other written agreement.

d. "**Authorized Person(s)**" means the individual(s) to whom Client or Consultant has granted Access to Protected Data.

e. "**Employee Personal Data**" means the Personal Information of the personnel of Consultant, Consultant's Affiliates, or Consultant subcontractors or other representatives.

f. "**European Data Protection Legislation**" means: Regulation 2016/679 of the European Parliament and of the Council on the protection of natural persons with regard to the processing of Personal Data and on the free movement of such data, and repealing Directive 95/46/EC ("**General Data Protection Regulation**"), including any applicable delegated acts adopted by the European Commission and any applicable national legislation made under or otherwise adopted by member states of the EEA (defined below), Switzerland, or the UK pursuant to specific rights or powers contained within the General Data Protection Regulation and all other applicable legislation in the EEA, Switzerland, and the UK relating to the protection of Personal Information.

g. "**include**" or "**including**" means including but not limited to.

h. "**Personal Data**" means: any information relating to an identified or identifiable natural person; an identifiable person is one who can be identified, directly or indirectly, in particular by reference to an identifier such as a name, an identification number, location data, online identifier or to one or more factors specific to the physical, physiological, genetic, mental, economic, cultural or social identity of that person.

i. "**Personal Information**" means: (i) information relating to an identified or identifiable individual in any form or medium; (ii) information related to an identified or identifiable individual that is protected under Applicable Law (including Personal Data); or (iii) information that is not specifically about an identified or identifiable individual but, when combined with other information, may identify an individual. In the event that the definition of Personal Information in this DPA is inconsistent with a definition of Personal Data, Personal Information, or similar concept under an Applicable Law, then the definition of such concept under the Applicable Law shall prevail solely to the extent of the inconsistency.

j. "**Protected Data**" means the Personal Information to which Client has granted Consultant access for the performance of Consultant's obligations under the Agreement.

k. "**Security Incident**" means the unauthorized or unlawful destruction, loss, alteration, or disclosure of Protected Data caused by Consultant's breach of this DPA. Security Incidents will not include unsuccessful attempts to Access Protected Information or to interfere with system operations in an information system, such as "scans" or "pings" on a firewall.

l. "**Security Standards**" has the meaning set forth in Section 5 of this DPA.

2.2. All capitalized terms that are not expressly defined in this DPA will have the meaning given to them in the Agreement. All examples are illustrative and not the sole or exclusive examples of a particular concept.

3. General Obligations.

3.1. Compliance. Consultant agrees that, during the period in which Consultant has been given Access to Protected Data, it will comply with its obligations under Applicable

Laws. Consultant will provide commercially reasonable information, assistance, and cooperation regarding the processing of Personal Information as Client may reasonably require to enable Client to comply with Applicable Laws, including (when required by Applicable Laws) assisting Client (at Client's expense) with its security, notification, communication, recordkeeping, and reporting obligations under Applicable Laws.

3.2. Purpose Limitation. Consultant agrees that it will Access Protected Data: (i) in accordance with the lawful, written instructions of Client (provided such instructions are reasonable and provided that Client shall be responsible for any material costs incurred by Consultant in order to comply with such documented instructions); (ii) for the proper management and administration of Consultant or to carry out Consultant's legal responsibilities under Applicable Laws; and (iii) to fulfill its obligations under the Agreement and the relevant Statement(s) of Work.

3.3. International Transfers of Personal Information. When applicable, and where required by Applicable Laws, the Parties agree to execute appropriate data transfer agreements to ensure the lawfulness of cross-border transfers of Personal Information.

3.4. Duty of Confidentiality. Consultant agrees that Authorized Persons to whom Consultant has granted Access to Protected Information will be subject to a duty of confidentiality (whether such duty is contractual, statutory, or otherwise).

3.5. Individual Rights. Consultant will reasonably assist the Client to fulfill or resolve an individual's request for access to his or her Personal Information, including with respect to a request from a data subject to exercise any of his or her rights under Applicable Laws (including the rights of access, correction, blocking, objection, erasure and data portability, as applicable). If Consultant receives such a request directly from the individual(s), Consultant will promptly inform Client of the request.

3.6. Prohibited Personal Information. Client will not provide Consultant with Access to Personal Information that contains any special categories of Personal Data or information related to criminal convictions and offenses that are not expressly disclosed in the relevant SOW(s).

4. Obligations for Special Categories of Personal Information.

4.1. European Data Protection Requirements. If Consultant or a Consultant Affiliate: (i) is established within the European Economic Area ("**EEA**"), Switzerland, or the UK and processes Personal Data of EEA or UK data subjects on behalf of Client or a Client Affiliate as part of the Services; (ii) processes Personal Data on behalf of a Client Affiliate established in the EEA, Switzerland, or the UK as part of the Services; or (iii) processes the Personal Data of data subjects located in the EEA, Switzerland, or the UK on behalf of the Client or a Client Affiliate as part of the Services, then the Parties will enter into additional EU-specific data privacy terms with respect to the Services that involve processing of such Personal Data.

4.2. HIPAA. If and to the extent Consultant has Access to Protected Health Information as defined at 45 C.F.R. §160.103 ("**PHI**") subject to the Health Insurance Portability and

Accountability Act of 1996 ("**HIPAA**"), then the Parties shall enter into a mutually agreeable Business Associate Agreement subject to the provisions of the Agreement.

5. Security Standards.

5.1. Minimum Security Standards. Consultant agrees to implement and maintain commercially reasonable and appropriate administrative, technical, organizational, and physical controls designed to provide a level of security appropriate to the risk and to protect the confidentiality, integrity, and availability of Protected Data ("**Security Standards**"), including: (i) controls designed to secure facilities, infrastructure, data centers, servers, hard copy files, systems, equipment, applications, and devices used to Access Protected Data, including controls to monitor, prevent, detect, and respond to Security Incidents; (ii) policies and practices limiting Access to Protected Data only to Authorized Persons; and (iii) procedures to regularly assess and evaluate the effectiveness of the Security Standards.

5.2. Training. Consultant will provide privacy and security training for all Authorized Persons who Access Protected Data.

5.3. Client Responsibility for Employee Personal Data. To the extent that Client has Access to Employee Personal Data, Client shall implement and maintain, in compliance with Applicable laws, a data privacy and security program to protect Employee Personal Data to a standard materially the same as those required of Consultant hereunder. Client shall collect only the minimum necessary amount of Employee Personal Data to comply with Client's obligations under Applicable Laws.

6. Return and Disposal of Protected Data. Upon the earlier of Client's written request or termination or expiration of the Agreement, Consultant will securely destroy or, at Client's expense, return the Protected Data in accordance with Client's reasonable written instructions. Consultant agrees to return or destroy Protected Data within ninety (90) days of receipt of Client's written request or expiration or termination of the Agreement, as applicable; provided, however, that Consultant may retain copies of Protected Information that Consultant is legally required to retain, subject to a continued obligation to hold the same in confidence in accordance with this Agreement.

7. Security Incident Response.

7.1. Security Incident Response Program. Consultant will maintain an incident response program in compliance with Applicable Laws to respond to Security Incidents.

7.2. Notice, Investigation, and Remediation. In the event of a Security Incident, Consultant will notify Client without undue delay (and in no event more than seventy-two (72) hours after confirmation of the Security Incident). This notification will include, to the extent know at the time notice is sent: (i) a description of the Security Incident; (ii) the categories and types of Protected Data affected; and (iii) if applicable, the categories and number of data subjects and individual records affected. Additionally, Consultant will promptly investigate and remedy the Security Incident, take commercially reasonable

steps to mitigate the effects of the Security Incident and to prevent further Security Incidents, and take other actions required of it by Applicable Laws.

7.3. No Unauthorized Statements. Except as required by Applicable Laws, neither Party will make public statements concerning a Security Incident that references or identifies either Party, unless both Parties have provided express written consent for any such statement prior to its release.

8. **Change in Law.** If an Applicable Law becomes effective after the execution of this DPA and is inconsistent with the terms of this DPA or otherwise requires the Parties to amend this DPA or change the Services, the Parties agree to enter into good faith negotiations to make required changes to the Security Standards, the Services, and/or to amend this DPA or the Agreement.

9. **Survival.** Consultant's obligations under this DPA will survive termination or expiration of the Agreement and/or completion of the Services solely to the extent Consultant is required to Access Protected Data.

CITY OF ONTARIO *Agenda Report* **November 21, 2023**	**SECTION:** **CONSENT CALENDAR**
Department: Fire Department Prepared By: Joseph Ramos Staff Member Presenting: Ray Gayk, Fire Chief Approved By:	Submitted To: Council/OHA Approved: _____ Continued To: _____ Denied: _____ Item No: 8

SUBJECT: A RESOLUTION ADOPTING THE CITY OF ONTARIO'S 2023 HAZARD MITIGATION PLAN

RECOMMENDATION: That the City Council adopt a Resolution approving the City of Ontario's 2023 Hazard Mitigation Plan in accordance with California Office of Emergency Services (Cal OES) and Federal Emergency Management Agency (FEMA) requirements.

THE FOLLOWING COUNCIL GOALS ARE BEING ACHIEVED:
Maintain the Current High Level of Public Safety
Pursue City's Goals and Objectives by Working with Other Governmental Agencies

FISCAL IMPACT: There is no direct fiscal impact associated with this option. The City's Hazard Mitigation Plan must be adopted by the City Council in order for the City to be eligible to receive Federal (FEMA) grant funding.

BACKGROUND & ANALYSIS: City Staff from multiple departments along with community partners, working through the Ontario Emergency Management Working Committee and coordinated by the Office of Emergency Management, reviewed the previous 2018 adopted Plan, gathered updated statistical and reference data, and confirmed that state and federal requirements were met in order to complete this updated version of the Plan. The Plan represents the City's commitment to reduce risks from natural, technological and human-caused emergencies and disasters, and serves as a guide for decision-makers as they commit resources to reducing the effects of these emergencies and disasters.

The draft Hazard Mitigation Plan 2023 was submitted to the CalOES and FEMA for evaluation and was found to be in compliance. The Plan is now ready for approval by City Council. The Plan will be approved by FEMA once the City has fully adopted the Plan.

Upon approval by FEMA the plan will be valid for five years and make the City eligible to apply for federal mitigation grant funding, when available. The City will be need to consider the next update to the plan in 2028.

RESOLUTION NO. _____

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF ONTARIO, CALIFORNIA, ADOPTING THE HAZARD MITIGATION PLAN 2023 IN ACCORDANCE WITH CALIFORNIA OFFICE OF EMERGENCY SERVICES (CALOES) AND FEDERAL EMERGENCY MANAGEMENT AGENCY (FEMA) REQUIREMENTS.

WHEREAS, the Disaster Mitigation Act of 2000 requires local governments to develop and submit hazard mitigation plans; and

WHEREAS, the City of Ontario Hazard Mitigation Plan 2023 (HMP) is considered the representation of the jurisdiction's commitment to reduce risks from natural, technological and human-caused emergencies and disasters, and serves as a guide for decision-makers as they commit resources to reducing the effects of natural, technological and man-made emergencies and disasters; and

WHEREAS, the mitigation planning encourages agencies and departments at all levels, employees, officials, residents, businesses, non-profits, public and private organizations and other stakeholders, individually, and collectively, to do their share in furthering hazard mitigation and participation in the mitigation planning and implementation process; and

WHEREAS, the Ontario Emergency Management Working Committee, serving as the HMP Planning Team, with representatives from City agencies and departments, such as Community Life & Culture, Community Development, Economic Development, Financial Services, Fire, Human Resources, Information Technology, Management Services, Municipal Utilities Company, Plan, Police, and Public Works, together with many outside planning partners and input from the public, developed the HMP; and

WHEREAS, the HMP includes an evaluation of the hazards and risks for earthquakes, flooding, high winds, wildfires, water shortage and other hazards; and

WHEREAS, the HMP also includes mitigation measures to lessen the severity of the hazards noted above and an approval by the elected officials signifies that the mitigation measures are accepted and will be incorporated into future grant funding requests and future budget year programming as funding becomes available; and

WHEREAS, this Local Hazard Mitigation Plan, (LHMP), Attachment "A", has been prepared in compliance with California Government Code Sections 8685.9 and 65302.6, which integrates this plan with the Ontario General Plan Safety Element; and

WHEREAS, the City of Ontario promotes and supports the goal of a prepared, disaster-resilient community; and

WHERAS, the City has received a letter from FEMA identifying the LHMP as eligible for approval pending final adoption; and

WHEREAS, the City Council adoption of a current LHMP will make the City of Ontario eligible to receive earmarked mitigation grant funding, as well as eligible to apply for additional federal mitigation grants; and

WHEREAS, the City Council has carefully considered the matter at their regularly scheduled meeting on November 21, 2023.

NOW THEREFORE, BE IT RESOLVED that the City Council of the City of Ontario does find and determine as follows:

SECTION 1. The City Council approves the City of Ontario Hazard Mitigation Plan 2023.

SECTION 2. The City Council hereby authorizes that a copy of the City Council approved City of Ontario Hazard Mitigation Plan 2023 be forwarded to the San Bernardino County Operational Area (OA), California Office of Emergency Services (CalOES) and Federal Emergency Management Agency (FEMA).

SECTION 3. The City Clerk of the City of Ontario shall certify as to the adoption of this Resolution.

PASSED, APPROVED, AND ADOPTED this 21st day of November 2023.

Chapter 1 – Introduction

Plan Purpose and Authority

Hazard events can lead to injuries or death, affect a community's overall health and safety, damage or destroy public and private property, harm ecosystems, and disrupt key services. Although the hazard event itself often gets the most attention, it is only one part of a larger emergency management cycle.

Emergency planners and responders can take steps during the response, recovery, mitigation, and preparedness phases of the cycle to minimize the harm caused by a disaster. This Local Hazard Mitigation Plan (LHMP) focuses on optimizing the mitigation phase of the cycle. Mitigation involves making a community more resilient to disasters so that when hazard events do ultimately occur, the community suffers less damage and can recover more effectively. It differs from preparedness, which involves advanced planning for how best to respond when a disaster occurs or is imminent. For example, a policy to make homes structurally stronger so they suffer less damage during an earthquake is a mitigation action, while fully equipping shelters to accommodate people who lose their homes in an earthquake is a preparedness action. Some activities may qualify as both.

HAZARD EVENT: an emergency due to a natural or human-caused event that has the potential to cause harm.

HAZARD MITIGATION: any sustained action taken to reduce or eliminate long-term risk to people and property from natural or human-caused hazards and their effects.

RESILIENCE: the capacity of any entity (an individual, a community, an organization, or a natural system) to prepare for disruptions, to recover from shocks and stresses, and to adapt and grow from a disruptive experience.

Like other communities, the City of Ontario (City) could potentially suffer severe harm from hazard events. Although large disasters may cause widespread devastation, even smaller disasters can have substantial effects. The City cannot make itself completely immune to hazard events, but this LHMP can help make the community a safer place to live, work, and visit. This LHMP provides a comprehensive assessment of the threats that the City faces from natural and human-caused hazard events and a coordinated strategy to reduce these threats. It identifies resources and information that can help community members, City staff, and local officials understand local threats and make informed decisions. The LHMP can also support increased coordination and collaboration

between the City, other public agencies, local employers, service providers, community members, and other key stakeholders.

Federal Authority

The City is not required to prepare an LHMP, but state and federal regulations encourage it. The federal Robert T. Stafford Disaster Relief and Emergency Act, amended by the Disaster Management Act of 2000, creates a federal framework for local hazard mitigation planning. It states that jurisdictions that wish to be eligible for federal hazard mitigation grant funding must prepare a hazard mitigation plan that meets a certain set of guidelines and submit this plan to the Federal Emergency Management Agency (FEMA) for review and approval. The following regulations and guidelines apply to this plan:

FEMA Local Mitigation Planning Policy Guide provides the official policy and interpretation of the applicable statutes and mitigation planning regulations in 44 Code of Federal Regulations

Federal Laws

- Robert T. Stafford Disaster Relief and Emergency Assistance Act (Stafford Act), as amended.

Federal Regulations

- 44 CFR Part 201 Mitigation Planning.
- 44 CFR, Part 60, Subpart A, including § 60.3 Flood plain management criteria for flood-prone areas.
- 44 CFR Part 77 Flood Mitigation Grants.
- 44 CFR Part 206 Subpart N. Hazard Mitigation Grant Program.

Federal Guidance

- FEMA Local Mitigation Planning Policy Guide (FP 206-21-0002), effective April 19, 2023

State Authority

California Government Code Sections 8685.9 and 65302.6

California Government Code Section 8685.9 (also known as Assembly Bill 2140) limits the State of California's share of disaster relief funds paid out to local governments to 75 percent of the funds not paid for by federal disaster relief efforts unless the jurisdiction has adopted a valid hazard mitigation plan consistent with the Disaster Management Act of 2000 and has incorporated the hazard mitigation plan into the jurisdiction's general plan. In these cases, the State may cover more than 75 percent of the remaining disaster relief costs.

All cities and counties in California must prepare a general plan, including a safety element that addresses various hazard conditions and other public safety issues. The safety element may be a stand-alone chapter or incorporated into another section, as the community wishes. California Government Code Section 65302.6 indicates that a community may adopt an LHMP into its safety element if the LHMP meets applicable

state requirements. This allows communities to use the LHMP to satisfy state requirements for safety elements. As the General Plan is an overarching long-term plan for community growth and development, incorporating the LHMP into it creates a stronger mechanism for implementing the LHMP.

California Government Code Section 65302 (g)(4)

California Government Code Section 65302 (g)(4), also known as Senate Bill (SB) 379, requires that the safety element of a community's general plan address the hazards created or exacerbated by climate change. The safety element must identify how climate change is expected to affect hazard conditions in the community and include measures to adapt and be more resilient to these anticipated changes.

Because the LHMP can be incorporated into the safety element, including these items in the LHMP can satisfy the state requirement. SB 379 requires that climate change be addressed in the safety element when the LHMP is updated after January 1, 2017, for communities that already have an LHMP, or by January 1, 2022, for communities without an LHMP.

This LHMP is consistent with current standards and regulations, as outlined by the California Office of Emergency Services (Cal OES) and FEMA. It uses the best available science, and its mitigation actions/strategies reflect best practices and community values. It meets the requirements of current state and federal guidelines and makes the City eligible for all appropriate benefits under state and federal law and practices. Note that while FEMA is responsible for reviewing and certifying this LHMP, and Cal OES is responsible for conducting a preliminary review, it does not grant FEMA or Cal OES any increased role in the governance of the City or authorize either agency to take any specific action in the community.

Plan Organization and Use

The Ontario LHMP is both a reference document and an action plan. It has information and resources to educate readers and decision-makers about hazard events and related issues and a comprehensive strategy that the City and community members can follow to improve its resilience. It is divided into the following chapters:

- **Chapter 1: Introduction**. This chapter describes the background of the Plan, its goals and objectives, and the process used in its development.
- **Chapter 2: Community Profile**. This chapter discusses the history of Ontario, its physical setting and land uses, its demographics, and other important community characteristics.
- **Chapter 3: Hazard Assessment**. This chapter identifies and describes the hazards that pose a threat to Ontario and discusses past and future events and the effects of climate change.
- **Chapter 4: Vulnerability Assessment**. This chapter describes the threat of each hazard on Ontario's key facilities and community members, including socially vulnerable individuals.

- **Chapter 5: Mitigation Strategy**. This chapter lists the mitigation actions to reduce Ontario's vulnerability to hazard events and provides an overview of the community's existing capabilities to improve hazard resilience.
- **Chapter 6: Plan Maintenance**. This chapter summarizes the process for implementing, monitoring, and updating the LHMP and opportunities for continued public involvement.

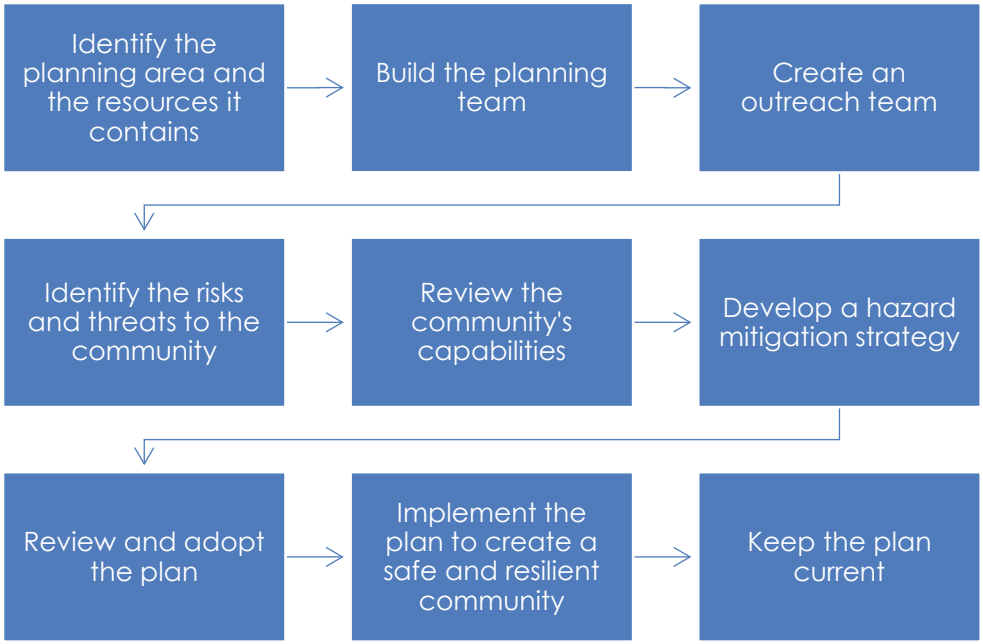
Previous Ontario LHMP

The 2018 Ontario LHMP was adopted by the Ontario City Council on December 4, 2018. This plan is currently active and is set to expire on December 28, 2023. An active plan allows the City to maintain its eligibility for FEMA hazard mitigation grant funding sources, which occur annually through FEMA Hazard Mitigation Grant Programs budgeted by Congress or periodically as a part of a federally declared disaster. As part of the TOP 2050 (Ontario's General Plan) adoption that occurred on August 16, 2022, the 2018 LHMP was integrated into the Safety Element.

Key updated elements from the previous Ontario LHMP include the following:

- Updated Plan Goals below, which were modified to better suit the changing priorities of the City, especially after the recent adoption of their General Plan.
- Updated hazard profiles and vulnerability assessment that integrates the recently adopted General Plan, Housing Element, and Climate Adaptation Vulnerability Assessment.
- Incorporation of updated demographics and development trends into the Community Profile.
- Updated hazard profiles with additional historic events information.
- Updated Capabilities Assessment to meet new FEMA requirements and guidance.
- Updated Mitigation Actions and Strategies (Table 5-3), which includes progress on previous actions (Table 5-4).

Plan Goals



This Plan was developed to broadly increase resilience in Ontario. The following key goals were developed for the City's LHMP:

- Increase readiness for all hazards.
- Continue to reduce fire hazards.
- Minimize exposure to structural and content damage from geologic and seismic conditions.
- Provide adequate protection to minimize damage from flooding and dam inundation.
- Use anti-terrorism strategies to discourage terrorism and protect the people, infrastructure, and assets from these effects.
- Reduce the impacts of climate change on the city and limit human activities that change the atmosphere's makeup.
- Reduce the risk of injury, property damage, and economic loss resulting from wind-related hazards.

These goals are very similar to the 2018 goals; however, some modifications were made to streamline the language, ensure greater consistency with the City's General Plan Safety Element, and align with the community's priorities identified during the TOP 2050[1] process.

Planning Process

State and federal guidance for LHMPs do not require that jurisdictions follow a standardized planning process. FEMA encourages communities to create their own planning process that reflects local values, goals, and characteristics. FEMA does suggest a general planning process that follows these general milestones:

For the City of Ontario, the planning process used to create this plan is described below.

Hazard Mitigation Planning Committee

The City established a Hazard Mitigation Planning Committee (hereafter referred to as the HMPC). The HMPC comprises representatives from key City departments and stakeholder members, including representatives from local and regional agencies and companies that are key to hazard mitigation activities. **Table 1-1** identifies the members that were invited and/or attended HMPC meetings.

[1] The Ontario Plan 5050 (TOP 5050) is the comprehensive update to the City's General Plan.

Table 1-1: Ontario HMPC Members		
Name	**Title**	**Department**
Sagar Patel (Project Manager, POC)	Emergency Manager	Office of Emergency Management

The HMPC held three meetings throughout the plan development process to lay out the methods and approach for the Plan, draft and review content, make revisions, and engage members of the public.

HMPC Meeting #1 (September 7, 2022): The HMPC members confirmed the project goals and the responsibilities. They revised the community engagement and outreach strategy, confirmed and prioritized the hazards to be included in the Plan, and identified critical facilities for the threat assessment.

HMPC Meeting #2 (October 5, 2022): Members held a detailed discussion about the results of the hazards assessment and mapping that showed the areas facing an elevated risk. The HMPC also reviewed the hazard prioritization results.

HMPC Meeting #3 (October 27, 2022): The HMPC reviewed the results of the risk assessment to identify the populations and assets that may face greater harm in a hazard event. The HMPC also discussed potential hazard mitigation actions to address vulnerabilities.

Invitations to HMPC meetings, as well as agendas/materials, were provided via email. **Appendix A** contains copies of HMPC meeting materials including meeting agendas, sign-in sheets, and other relevant materials distributed to attendees for these meetings.

Public Engagement

Under FEMA guidelines, local hazard mitigation planning processes should create opportunities for members of the public to be involved in plan development—at a minimum, during the initial drafting stage and during plan approval. The HMPC chose to go beyond minimum standards and conduct more extensive community outreach to help ensure that the LHMP reflects community values, concerns, and priorities. The HMPC developed a community engagement and outreach strategy to guide all public engagement activities. To ensure all residents were aware of the project, Ontario staff promoted and included a description of the project and ways to get involved on the City's website; this is discussed in more detail in the online engagement section.

Stakeholder Engagement

The City conducted a virtual stakeholder meeting with representatives from surrounding cities (City of Chino Hills and City of Rancho Cucamonga), the Ontario Convention Center, and the Ontario International Airport. Information regarding this opportunity to include key members from surrounding communities is located in **Appendix B**. Although not all attended, the following is a list of stakeholders invited to the meeting.

- Ontario International Airport
- San Bernardino County Office of Emergency Services
- Ontario Convention Center
- City of Montclair
- Chino Police Department
- Southern California Edison
- City of Chino Hills
- City of Rancho Cucamonga
- Chaffey Joint Union High School District
- Mountain View School District
- Allied Universal (Security Company)
- Ontario-Montclair School District
- Cucamonga School District
- Kaiser Permanente Hospital
- Chino Valley Unified School District

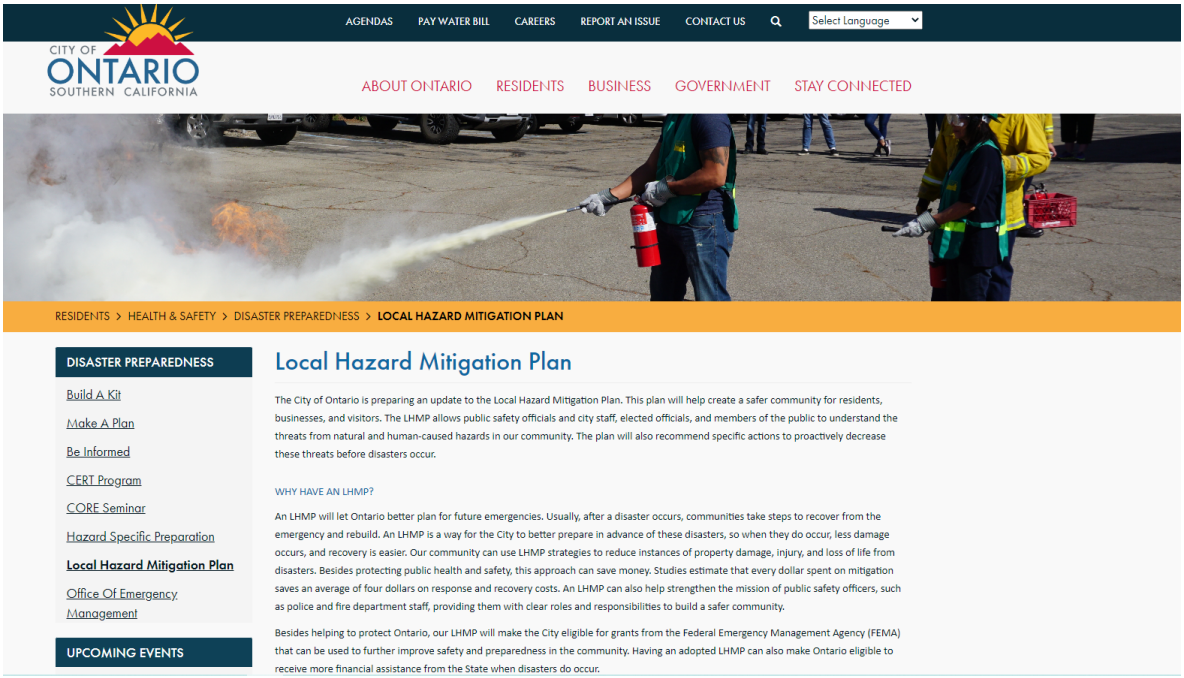
Vulnerable Populations Outreach

In addition to the stakeholders, the City also conducted outreach to the following organizations that represent/ support vulnerable populations. The following were invited to participate in the LHMP planning and review process:

- Mercy House - a non-profit organization serving the homeless population
- Anjuman-e-Qutbi - Mosque
- Cub Scout Pack #621 - Children
- Esperanza Active Adult Community - Older Adults/ Senior Population
- Palm Terrace Senior Living - Apartment Complex for senior population, mostly Spanish-speaking
- Ontario Health Care Center
- Preschool Services Department
- Salem Christian Homes
- All CERT Graduates - consists of a variety of vulnerable populations, including seniors, low-income populations, Spanish-speaking populations, persons with access and functional needs
- All Continuity & Organizational Resilience in Emergencies (CORE) graduates - consists of a variety of vulnerable populations, including seniors, faith-based organizations, and small business owners.
- All LISTOS graduates - limited English proficiency
- American Red Cross
- Hispanic Chamber of Commerce
- City of Ontario Community, Life, and Culture Agency, which oversees numerous programs targeted towards and representing vulnerable populations, including seniors, low-income, homeless, and limited English proficiency

Public Engagement Opportunities

In-person engagement opportunities were a central component of the City's engagement efforts. These meetings provided an opportunity for members of the public to learn about the hazards of concern identified by the HMPC during this update. City staff presented the LHMP information and survey at the CERT Monthly Volunteer Meeting. Additionally, City staff advertised the survey at two other public events. Notices of each meeting were widely distributed in advance in accordance with City notification requirements, the engagement strategy, legal requirements, and best practices.



Public Engagement Opportunity #1 October 2022: This engagement opportunity was conducted at a Health and Safety Fair, reaching approximately 120 people. Of the 120, 5 people had access and functional needs. Other demographics intentionally targeted for engagement included families with children living in the home, people with chronic conditions, people with mental/social/emotional health conditions, and low-income individuals or families. City staff distributed preparedness materials at the event, including the City of Ontario Emergency Preparedness Guide. They also garnered interest and public participation in our Local Hazard Mitigation Planning process. Attendees scanned QR codes leading to a survey created to gain public buy-in for hazard identification and

mitigation efforts. The data collected from the responses to the survey were used to update the LHMP.

Public Engagement Opportunity #2 December 2022: This engagement opportunity was conducted at the Reindeer 5k Run, reaching approximately 200 people. Of the 200 people, 20 were seniors or older adults, and 70 were from households with limited English proficiency. Other demographics intentionally targeted for engagement included families with children living in the home, people with chronic conditions, people with mental/social/emotional health conditions, and low-income individuals or families.

Appendix B includes a copy of the materials used to promote these engagement opportunities.

Online Engagement

City of Ontario LHMP Webpage

The City recognized that not all community members are able to attend public meetings and conducted public engagement through social media and online platforms. To assist with engagement, the City set up a project website as a simple, one-stop location for community members to learn about the LHMP. The website included information about what an LHMP is and why the City prepared one. It had links to materials and Plan documents as they became available and allowed members of the public to receive notifications about upcoming events.

The City also promoted the planning process through the following online methods:

- Ontario's City Website
- Social Media (Facebook, NextDoor, Twitter)

- Community E-newsletter (LHMP information was sent to 10,865 subscribers in the November 2022 and January 2023 newsletters)
- Distribution of information to their extensive CERT Member List

Based on analytics tracked by the City, the combined Facebook, Twitter, and Instagram impression rate was 18,756.

ONLINE SURVEY

A central part of the engagement strategy was an online survey. This survey asked community members about their experience and familiarity with emergency conditions, their level of preparedness for future emergencies, and preferred actions for the City to take to increase resiliency. The survey was distributed to over 12,000 individuals from the City's notification lists and had responses from 133 individuals. A summary of these responses is provided here:

- Nearly 40% of respondents live in Ontario, with an additional 18% that live and work in Ontario.
- Approximately 64% of respondents have not been impacted by a disaster in their current residence. Understanding this drove the City to expand outreach to residents as part of their emergency management preparedness.
- The top three hazards of concern for respondents were Extreme Weather (High winds, Extreme Heat Days, Severe Rainstorms), Earthquake/Geologic Hazards, and Human-caused Hazards (Transportation Incidents, Communications Failure, Terrorism). These responses confirmed that the concerns identified by City staff during the planning process were similar to residents that responded.
- Approximately 90% of respondents showed concern regarding climate change affecting future hazards. This response reinforced the value of the General Plan Climate Adaptation Vulnerability Assessment and how it was integrated into this update.

As part of the outreach strategy, a QR code was created that could be used on promotional materials and handouts at fairs and booths used by City staff at community events. This QR Code provided quick access to the City's Online Survey.

Appendix B contains copies of all materials used for public outreach, including the full results of the community survey.

Public Review Draft

On May 15, 2023, the City released a draft copy of the LHMP for public review and comment. The document was posted electronically on the City's website and included a Google form to accept comments from reviewers. Notifications about the public review draft were provided through social media accounts and other online sources as well as during a public review meeting that included over 250 invitees from the City's prior CERT classes. Four people completed the survey indicating they had reviewed the

document. As part of the survey, 3 of 4 respondents indicated the plan was easy to access, read, and understand. Respondents also indicated that they found out about the public review plan via the City's website, social media posts, and through the public review meeting that included prior CERT members. Public comments on the Draft Plan did not require any revisions. The following is a summary of the comments received:

- Please drop the climate change baloney.
- Please make it available in multiple languages
- Accessibility should be at the forefront of your planning to be as inclusive as you can

As a result of these comments, City staff plans on taking steps to assist residents with accessibility issues and translation into different languages after adoption.

Plan Revision and Adoption

The public review period for the City's LHMP ended on June 9, 2023. Since none of the comments required edits or modification to the plan content, the City submitted the plan to Cal OES and FEMA, initiating the agency review process on June 14, 2023.

Upon completion of the formal agency review process, City staff submitted the LHMP for final adoption. The Ontario City Council adopted the final LHMP on [DAY MONTH, YYYY]. **Appendix C** contains a copy of the adoption resolution.

Plan Resources

The City used several different plans, studies, technical reports, datasets, and other resources to prepare the hazard assessment, mapping, threat assessment, and other components of this Plan. **Table 1-2** provides some of the primary resources the HMPC used to prepare this Plan.

Table 1-2: Key Resources for Plan Development

Section	Key Resources Reviewed	Data Incorporated from Resource
Multiple	• Cal-Adapt • California Department of Conservation • California Geological Survey • California Office of Emergency Services • California State Hazard Mitigation Plan • 2018 City of Ontario Hazard Mitigation Plan. • 2050 Ontario Plan (General Plan)	• Science and background information on different hazard conditions • Records of past disaster events in and around Ontario • Current and anticipated climate conditions in and around Ontario • Projections of future seismic conditions and events

	• FEMA Local Hazard Mitigation Plan Guidance • National Oceanic and Atmospheric Administration • National Weather Service • US Geological Survey • 2022 City of Ontario Vulnerability Assessment	
Community Profile	• 2020 US Census Bureau Decennial Census • US Census Bureau 2016-2020 American Community Survey • 2050 Ontario Plan (General Plan) • 2050 Ontario Plan Background Reports • California Energy Commission	• Demographic information for Ontario and San Bernardino County • History of the region • Economic trends in Ontario • Commute patterns in Ontario • Local land-use patterns • Background information on utilities serving Ontario
Hazard Assessment (Dam Failure)	• California Department of Water Resources • San Bernardino County Flood Control District • US Army Corps of Engineers	• Mapping of dam failure inundation areas • Profiles and conditions of dams in and around Ontario
Hazard Assessment (Flood Hazards)	• FEMA Map Service Center • San Bernardino County Flood Control District • California Levee Database	• Records of past flood events in and around Ontario • Locations of flood-prone areas in Ontario
Hazard Assessment (Human-Caused Hazards)	• Global Terrorism Database	• Historical records of terrorism
Hazard Assessment (Hazardous Materials Release)	• Department of Toxic Substances and Control • Environmental Protection Agency	• Location and dates of past hazardous materials release • Effects of hazardous materials release
Hazard Assessment (Seismic Hazards)	• California Geological Survey	• Science and background information on seismic hazards

	• United State Geological Survey	• Historical record of seismic hazard events in and around Ontario
Hazard Assessment (Severe Weather Hazards)	• NOAA • National Weather Service	• Records of past weather events
Note: Sections not individually identified in this table relied primarily on sources identified in multiple sections.		

PAGE INTENTIONALLY LEFT BLANK

Chapter 2 – Community Profile

The Community Profile section of the LHMP is a summary of Ontario, including information about the community's physical setting, history, economy and demographics, current and future land uses, and key infrastructure. The Community Profile helps to establish the baseline conditions in Ontario, which inform the development of the hazard mitigation actions in Chapter 5.

Setting and Location

The City of Ontario is located in the Inland Empire in Western San Bernardino County, approximately 35 miles east of Los Angeles and 20 miles west of San Bernardino on a flat alluvial plain at the base of the San Gabriel Mountains. The City is bordered by the neighboring cities of Upland, Montclair, Chino, Rancho Cucamonga, and Fontana.

Ontario Quick Facts
Elevation: 925 ft above sea level
Area: 49.8 square miles
Incorporated: 1891
Government Type: City Council/City Manager
Population (2022 Census estimate)[2]: 178,194

Nearest city with population 200,000+*: Riverside, CA (17.5 miles, pop. 317,847)
Nearest city with population 1,000,000+*: Los Angeles, CA (51.5 miles, pop. 3.820 million)
*** California Department of Finance**

Figure 2-1: City of Ontario Location

[2] The 2022 Census population estimate is 178,194. Due to available datasets, the demographics used for the demographics and risk assessment sections of this plan rely on 2020 Decennial Census data.

History

In the first week of August 1881, George Chaffey, a Canadian engineer, viewed the wastes known as the Cucamonga Desert and decided that this patch of land, if properly watered, could become productive and profitable. George and his brother William bought the "San Antonio lands," 6,218 acres with water rights, for $60,000. This was the nucleus of their new model colony. They subsequently expanded to the Southern Pacific Railroad tracks on the south. On the north, they took in the Kincaid Ranch at San Antonio Canyon, an all-important source of water.

The Ontario Colony lands were quickly surveyed and went on sale in November 1882. The centerpiece was Euclid Avenue, eight miles long and two hundred feet wide, the twin "driveways" separated by a parkway that was seeded in grass and lined with pepper trees. George named Euclid Avenue after the great Greek mathematician whose book Elements of Geometry had been a favorite subject for George in school. The primary requirement, which had to be met before the land could be utilized, was that water had to be found and brought to the town. Chaffey laid miles of cement pipe for this purpose, and later the San Antonio Water Co. drove a tunnel into the head of the canyon to tap the underground flow—then an innovation in the field. The need for electric power to lift water from deep wells led to the establishment of the Ontario Power Co.

Another innovation in the settlement of Ontario was the provision whereby purchasers of land automatically received shares in the water company. This would ensure purchasers that a share of water proportional to their acreage would be piped to their land. This eliminated many problems that faced settlers elsewhere, where land and water rights were kept separate.

Charles Frankish became the guiding force during Ontario's early years. No matter what activity he undertook, Frankish always threw himself into his work and was determined to do the best possible job.

In 1887, Ontario's unique "gravity mule car" made its first run on Euclid Avenue. Charles Frankish and Godfrey Stamm established the Ontario and San Antonio Heights R.R. Co. Engineer John Tays of Upland added the pull-out trailer that allowed the mules to coast downhill after each laborious pull from Holt to Twenty–Fourth Street. The mule car served until 1895 when it was replaced by an electric streetcar and returned temporarily when a flood damaged the electrical generator in the powerhouse.

On December 10, 1891, Ontario was incorporated as a city of the sixth class under the California Constitution. It adopted a City Council-City Manager form of government. The mayor was at first called the "President of the chosen by the Council, or the Board of Trustees as it was then called, from among their number. Subsequently, the law was changed to allow the people to elect the mayor directly.

Ontario first developed as an agricultural community, largely but not exclusively devoted to citrus. A few of the lovely Victorian "grove houses" still survive, relics of the days when

growers could pretend that they were living the graceful lives of the old Spanish dons—until it came time for harvest.

Chaffey College, located where the Chaffey brothers established it until 1960, originally emphasized agricultural subjects to give the growers a hand. It was there that Prof. George Weldon developed the Babcock peach, an adaptation to California's mild winters. The college has moved to Rancho Cucamonga now, but Chaffey High School is still on what was originally a joint campus.

A reminder of the heyday of the San Bernardino groves, the Sunkist plant remains to this day. Even though the groves have gone from the West End, Ontario is still close to the "ton-mile center" of the industry. In addition to oranges, the production of peaches, walnuts, lemons, and grapes were also important to the growth of Ontario and the adjoining City of Upland.

In 1923, Judge Archie Mitchell, Waldo Waterman, and other airplane enthusiasts established Latimer Field. From that time on, the town became increasingly aviation conscious. Urban growth pushed the fliers progressively east until they took up their present location, the Ontario International Airport. During World War II, this was a busy training center for pilots of the hot Lockheed P-38 "Lightning" twin-boom fighter.

Since World War II, Ontario has become a much more diversified community with an approximate population of 175,518 (2020 Decennial Census). The city has expanded from the 0.38 square mile area incorporated back in 1891 to almost 50 square miles. The economy now reflects an industrial and manufacturing base. Ten thousand acres are zoned for industrial use. With three major railroads, the San Bernardino, Pomona, and Devore Freeways (I-10, SR 60, and I-15), and the Ontario International Airport, Ontario is well provided with major transportation resources. Its proximity to Los Angeles ensures that Ontario will continue to grow in the years ahead. [3]

Demographics

The data used in this section comes from the most comprehensive American Community Survey (ACS 5-Year Estimates 2016-2020), administered by the United States Census Bureau (US Census) completed in 2020, the 2020 Decennial Census, and 2022 Census estimates. Based on these datasets, Ontario's 2020 population was estimated to be 175,518, with a median age of 32.3, which is 1.3 years younger than the rest of San Bernardino County (33.6 years old). Comparatively, the number of senior residents aged 65 and older is less than the rest of San Bernardino County, while Ontario residents have a slightly higher median income that the rest of the County. In addition, a higher proportion of Ontario residents rent compared to San Bernardino County. **Table 2-1** shows the basic demographics for Ontario and San Bernardino County. It should be noted that more recent population estimates place the city's population at 178,194 residents, which is an increase of about 7.9% from the last census in 2010, showing us the city has

[3] City of Ontario Website, https://www.ontarioca.gov/FactsAndHistory

experienced population growth over the last decade. According to the 2022 San Bernardino County Continuum of Care Homeless Count and Survey, the city has a homeless population of 193 people (105 unsheltered and 88 sheltered). The 2022 count shows an 89% increase in homeless population from 2020. It can be assessed that the number of homeless people in the city are likely to be higher than reported, as it is extremely difficult to count people living in cars, abandoned buildings, and other deserted places. Additionally, some of the homeless population may not wish to be found.

Table 2-1: Basic Demographics, Ontario, and San Bernardino County

Demographics	Ontario	San Bernardino County
Total Population	175,518	2,181,654
Percent of children who are less than 10 years old	14.2%	14.3%
Percent of residents who are senior citizens (65+)	9.5%	12.1%
Median Age	32.3	33.6
Total households	50,599	640,090
Median household income	$67,357	$65,761
Percent of rental households	45.4%	39.9%

Note: Percentage values are rounded to the nearest tenth decimal.
Source: 2020 US Decennial Census, US Census ACS Survey 2016-2020

In terms of its racial and ethnic composition, Ontario is a racially diverse city, with 38% percent of all Ontario residents identifying as some other race alone. The second-largest population is white, with 24.2% percent of all residents identifying as such. This population makeup mirrors greater San Bernardino County due to a high proportion of white and some other race alone populations. **Table 2-2** shows the racial and ethnic composition for all groups in Ontario and San Bernardino County.

Ontario residents have attained slightly lower higher education levels in comparison to San Bernardino County. Comparatively, a smaller proportion of the population has attained bachelor's and professional degrees, 18% of the city's residents versus roughly 21.3% of the County's residents. Other categories also differ, such as a larger percentage of people not having education past 9th grade and a slightly larger percentage of people not having graduated high school. **Table 2-3** shows all levels of educational attainment of residents 25 years of age or older in both Ontario and San Bernardino County.

Table 2-2: Racial and Ethnic Composition, Ontario and San Bernardino County				
Race or Ethnicity	**Ontario**		**San Bernardino County**	
	Population	**Percentage**	**Population**	**Percentage**
White	42,332	24.2%	782,691	35.9%
Black	11,045	6.3%	184,558	8.6%
American Indian and Alaskan Native	4,184	2.4%	41,663	1.9%
Asian	16,243	9.3%	182,287	8.4%
Native Hawaiian and Other Pacific Islander	549	0.3%	7,461	0.3%
Some Other Race Alone	66,663	38.0%	621,140	28.5%
Two or more races	34,249	19.5%	361,854	16.6%
Lantinx (of any race) *	124,808	71.2%	1,224,685	56.1%
Total	**175,265**	**100%**	**2,181,654**	**100%**

*** The US Census Bureau does not currently count persons who identify as Latinx as a separate racial or ethnic category. Persons who identify as Hispanic or Latinx are already included in the other racial or ethnic categories**
Note: Percentage values are rounded to the nearest tenth decimal.

Source: 2020 US Decennial Census, US Census ACS Survey 2016-2020

Ontario has a wide range of non-English languages spoken at home among its residents, with varying levels of proficiency. Generally, Spanish is the second most-spoken language at home other than English in Ontario, with approximately 37.4% who are not fluent in English and speak it less than "very well." This is approximately 3.7% higher than the countywide population of Spanish language speakers. Asian and Pacific Islander languages are the third most-spoken languages in Ontario, with almost half, 48.4% of these speakers unable to speak English fluently. This is like the rest of San Bernardino

County, where approximately 46.8% of Asian and Pacific Islander language speakers are unable to speak English fluently. **Table 2-4** shows the most spoken languages in Ontario and the levels of fluency among speakers aged five and older in Ontario and San Bernardino County.

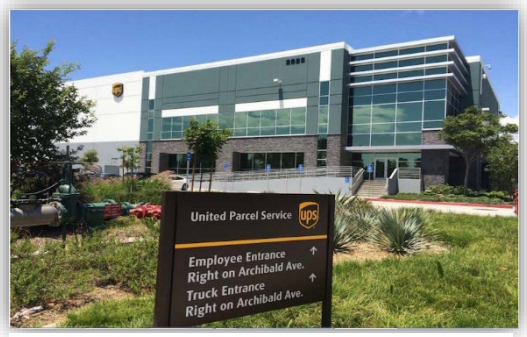

Table 2-4: English Proficiency and Languages Spoken at Home (2020)

Languages	Ontario		San Bernardino County	
	Number of Speakers	Speak English Less Than "Very Well"	Number of Speakers	Speak English Less Than "Very Well"
English only	73,709	-	1,171,425	-
Spanish	82,176	30,713 (37.4%)	689,338	232,270 (33.7%)
Indo-European*	1,660	335 (20.2%)	27,134	7,379 (27.2%)
Asian and Pacific Islander*	7,428	3,595 (48.4%)	104,417	48,824 (46.8%)
All other languages	921	314 (34.1%)	17,498	6,487 (37.1%)
Total	165,894	34,957**	2,009,812	294,960**

***Census data does not break down the specific languages for languages spoken in these regions**
****Due to these figures only being a percentage of the overall number of speakers, they will not add up to 100%.**
Note: Percentage values are rounded to the nearest tenth decimal.

Economy and Commute Patterns

Ontario has a diverse economy of employers from various sectors, including distribution, retail/wholesale trade, manufacturing, administrative support, construction, hotels and entertainment, health services, and education. With a total employment base of 119,230 employees. The top employer in the city is United Parcel Service. The second-largest employer is Workforce Personnel, Inc., with more than 5,000 employees. The next top three employers are Ontario Montclair Elementary School, Chaffey Union High School, and FedEx. **Table 2-5** shows the top five employers in Ontario in 2021.

UPS air and ground sorting facility at Ontario International Airport. Image from Connectcre.com

As of 2019, 75,283 Ontario residents are employed, with approximately 11,107 (14.8%) working within the city. This local workforce accounts for 8.8% of the entire workforce, approximately 126,883 employees (2019), with the remaining workforce coming from surrounding cities throughout the region. **Table 2-6** shows the top five cities that

contribute to Ontario's workforce, which accounts for over 28% of those employed within the city.

Table 2-5: Top Employers in Ontario	
Employer	**Number of Employees**
United Parcel Service	5,000 - 9,999
Workforce Personnel, Inc.	5,000 – 9,999
Ontario Montclair Elementary School	1,000 – 4,999
Chaffey Union High School	1,000 – 4,999
FedEx	500 - 999

***Per EDD, employment numbers are confidential; therefore, only the data for the range of numbers of employees are available.**

Cities-of-Origin for Ontario's Workforce	**Number of Employees**	**Percentage**
Ontario	11,107	8.8%
Fontana	7,546	5.9%
Rancho Cucamonga	7,052	5.6%
Riverside	5,043	4.0%
Los Angeles	5,011	3.9%
Total	**35,759**	**28.2%**

Source: https://onthemap.ces.census.gov/

While the majority of Ontario's residents commute outside the city for work, most of those residents (41.1%) travel less than 10 miles to reach their place of employment. Approximately 9.4% of commuters traveled 50 miles or more, with most of those trips heading into the Los Angeles area. The city boasts convenient freeway, rail, and international air access to Los Angeles, Orange, San Diego, and Riverside Counties. **Table 2-7** shows the outflow of workers from Ontario to other regional worksites.

Table 2-7: Work Commute Distances for Ontario's Residents (2019)		
Work Destinations for Ontario's Residents	**Number**	**Percentage**
Less than 10 miles	30,921	41.1%
10 to 24 miles	20,091	26.7%
25 to 50 miles	17,171	22.8%
Greater than 50 miles	7,100	9.4%
Total	**75,283**	**100%**

Development Trends

Ontario is located within a dense part of San Bernardino County that has experienced significant growth and development over the past 30 years. The population of the City has grown by approximately 15,600 residents since 2010. With land still available and

numerous active developments ongoing within the City, population growth is expected to continue throughout the City.

The Regional Housing Needs Assessment (RHNA) is mandated by State Housing Law as part of the periodic update of General Plan housing elements. Through the RHNA process a community decides how to address existing and future housing needs resulting from population, employment, and household growth. [4]

The City recently completed a comprehensive update to the city's General Plan called The Ontario Plan 2050 (TOP 2050). This collection of documents will help guide the development and conservation of the City over the next 30 years. According to TOP 2050, the city is anticipating major growth in both the number of residential units and corresponding population. **Table 2-8** depicts this anticipated growth and development that will meet the City's RHNA allocation requirements.

Table 2-8: Comparison of Approved TOP and TOP 2050

Scenario	Units	Population	Nonresidential Square Feet	Employment
Existing 2021 Conditions	52,466	179,597	156,065,382	131,999
Approved TOP	104,163	357,957	260,399,271	313,067
Adopted TOP 2050	129,562	410,492	261,491,779	296,002
Net Difference (Proposed TOP 2050 – Approved TOP)	**25,399**	**52,535**	**1,092,508**	**-17,065**

Source: The Ontario Plan 2050 Draft Supplemental Environmental Impact Report, City of Ontario

Based on this the TOP 2050 update projects an increase in residential dwelling units, growth in both population, and non residential development, however this anticipated development is expected to result in a reduction in employment.

These proposed changes would see strictly commercial and office use areas converted to mixed-use or residential areas, as well as intensification of residential density in certain key sites to higher density uses. The proposed changes in TOP 2050 will also have long term effects which reflect anticipated market trends including an increase in residential development, reduced office growth, and a small increase in commercial development. Changes to housing and population characteristics include a reduction trend in household sizes, and a residential occupancy rate which includes a 4-5% vacancy of all housing units (turnover, sales, etc.). Changes to the employment generation rates assumed in TOP 2050 were designed to reflect the national employment trends, such as the reduction in office space required for employees as work from home options increase, changes in industrial jobs as robotic automation increases in both the large

[4] What is RHNA? https://scag.ca.gov/rhna

warehousing and logistic centers decreasing the number of jobs per square foot, and an increase in the demand for commercial and hospitality jobs. [5]

Figure 2-2 displays the areas of proposed land use changes that will accommodate the adopted land use changes within TOP 2050. A majority of the new development anticipated in the City will occur in Ontario Ranch area as well as four key growth areas (Downtown Growth Area, the West Holt Growth Area, the East Holt Growth Area, and the Ontario Airport Metro Center [OAMC]).

Vulnerability and Risk Reduction

All new development occurring in the areas of change identified in Figure 2-2 will provide hazard vulnerability and risk reduction for the city. This reduction will occur due to the anticipated improvements and investments implemented in the older parts of the City as a result of TOP 2050. In addition, the new developments that will be built will comply with the most up-to-date building codes and use the latest techniques, further reducing vulnerabilities throughout the City.

Major Community Elements

Institutional Uses

Education is a major component of the city's identity. The city boasts multiple universities, vocational and trade schools, and community colleges, such as the University of La Verne College of Law, University of Phoenix, American Career College, UEI College, DeVry University, and San Joaquin Valley College to name some of these institutions. With thousands of students enrolled and attending classes, the daytime population of Ontario can increase significantly. The vast majority of these schools are located along the I-10 freeway corridor, which bisects the city.

Ontario International Airport

Ontario International Airport is a public airport approximately two miles from downtown Ontario in San Bernardino County, CA. It has been owned and operated under a joint-powers agreement between the city of Ontario and the County of San Bernardino since 2016, when control was transferred from Los Angeles World Airports. The airport covers approximately 1,741 acres and has 2 parallel runways. The airport boasts 2 terminals with 27 gates and a separate adjacent international arrival-only facility with 2 more gates for a total of 29 gates. It is the West Coast air and truck hub for UPS Airlines and a major distribution point for FedEx Express. The airport serviced over 4.4 million passengers in 2021 and shipped or received over 890,000 tons of freight. [6]

Ontario Convention Center

A 225,000 square foot venue of flexible column-free exhibit, meeting, and function space, the Ontario Convention Center accommodates conventions, trade shows, exhibits, and

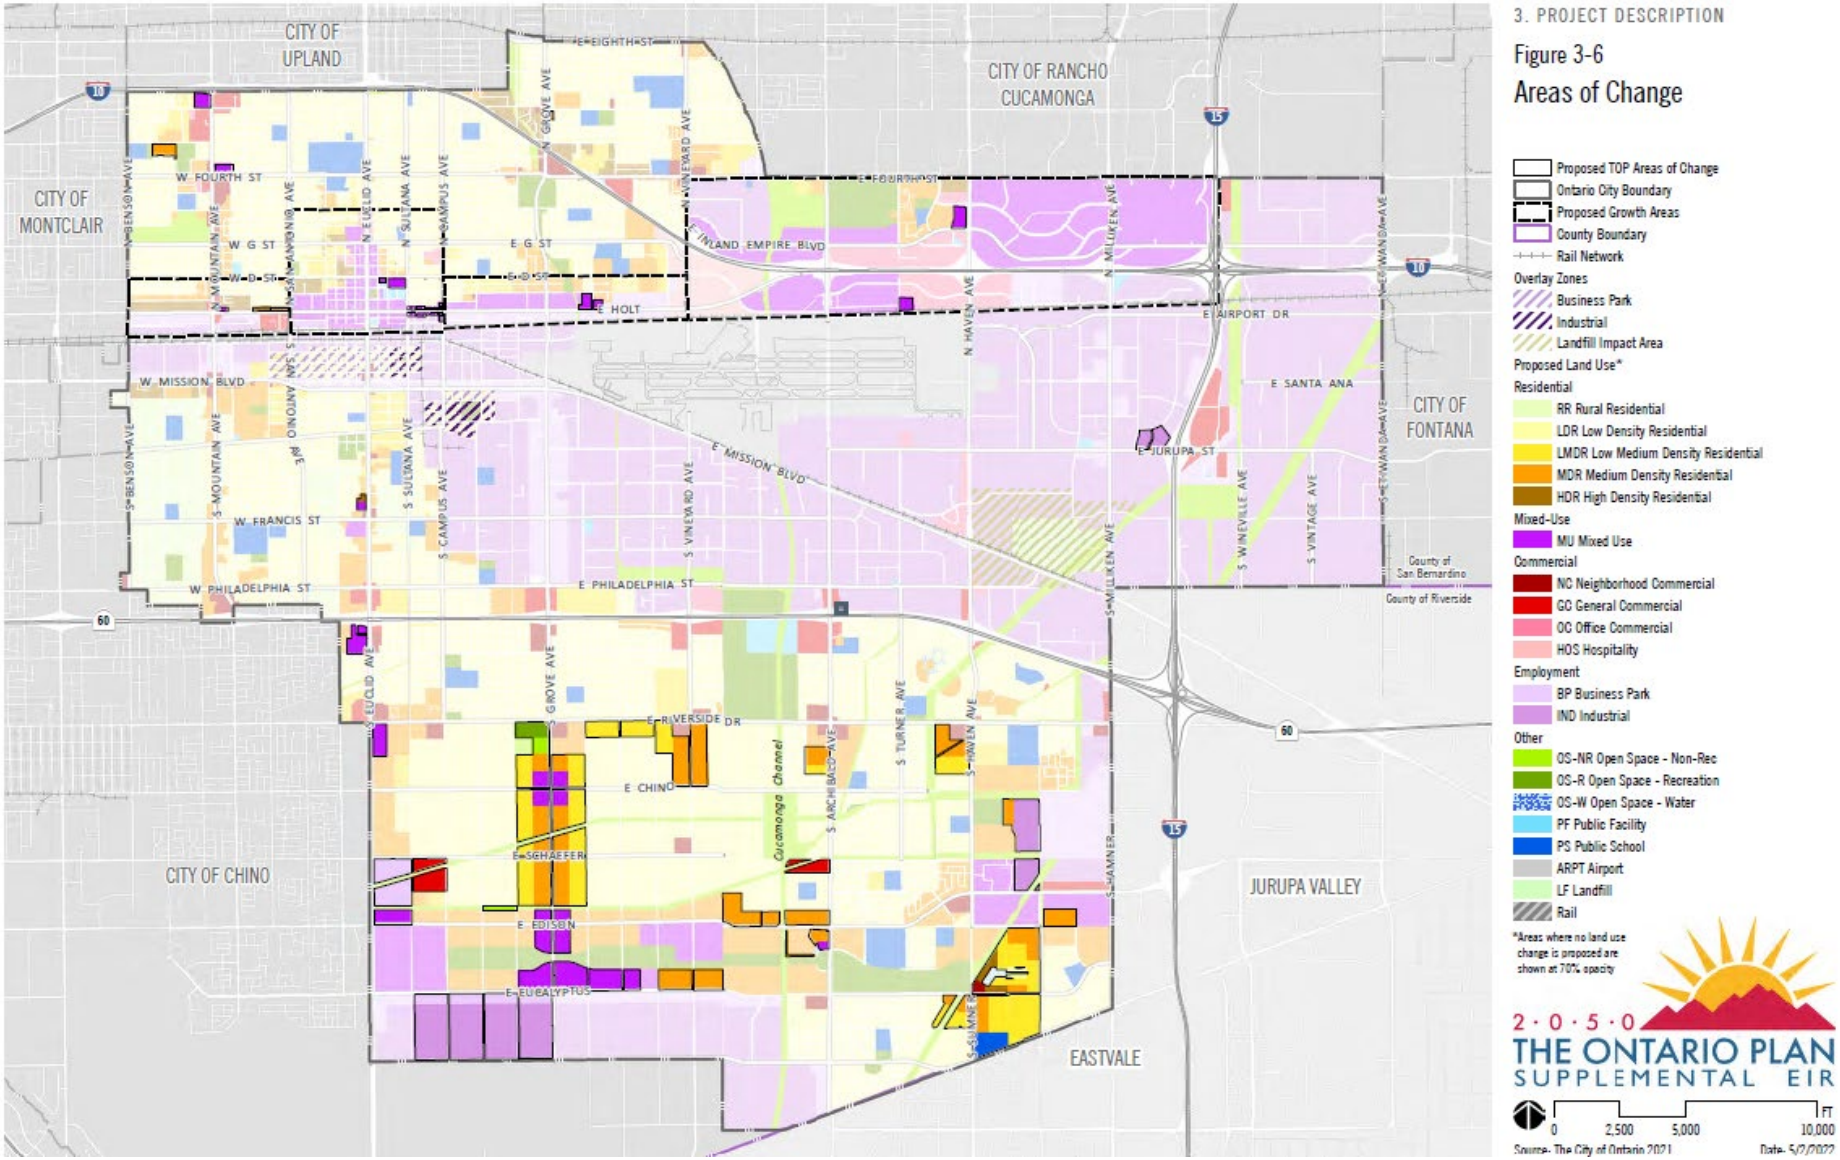
[5] The Ontario Plan 2050 Draft Supplemental Environmental Impact Report, City of Ontario
[6] https://www.flyontario.com/

meetings. Located approximately two miles from Ontario International Airport with access to a variety of hotel and dining options within walking distance.

Toyota Arena

Toyota Arena, built and owned by the City of Ontario, and operated by ASM Global, can accommodate over 11,000 guests. Located on a 37-acre parcel in the northeastern portion of the City. The 225,000-square-foot venue features 36 luxury suites on two levels and a continuous concourse hosting a variety of concession and refreshment stands, merchandise kiosks, the VIP Club, and other fan amenities. Toyota Arena hosts over 125 events annually, including concerts, family shows, and sporting competitions. The Arena is home to several sports teams, including Ontario Reign (American Hockey League), Ontario Fury (Major Arena Soccer League), Aqua Caliente Clippers of Ontario (G League Basketball), and LA Temptation (Legends Football League). Since opening in 2008, Toyota Arena is the biggest and most modern arena within the Inland Empire, an area with over 4.3 million people.[7]

Ontario Mills



Ontario Mills, California's largest outlet and value retail shopping destination, is an indoor climate-controlled shopping center that provides the ultimate shopping experience with more than 200 stores. In addition to shopping, Ontario Mills offers dining and entertainment venues. Located at the intersection of I-10 and I-15, the Ontario Mills is located in close proximity to the Ontario International Airport, the Toyota Arena - and less than an hour from downtown Los Angeles and the Orange County coast.[8]

Ontario Ranch

Ontario Ranch is a Master-Planned Community (MPC) currently in development with a buildout horizon over the next 20 years. Currently ranked as the #7 ranked MPC in the nation and #1 in the Inland Empire. It will span over 8,000 acres and cover 13 square miles, offering beautiful neighborhoods with abundant resort-style recreation, parks, and family-oriented living. Described as a visionary model for California growth, it is the first gigabit community in Southern California featuring ultra-high bandwidth home-data services. It will also boast an expansive system of both trails and parks (Ontario Great Park), a proposed 8 new schools and independent sources of water. Once complete, Ontario Ranch will have some 47,000 homes and 162,000 residents, with a projected 16 million square feet of retail, office, medical, and residential space.[9]

Figure 2-2: Areas of Proposed Land Use Changes within Ontario

PAGE INTENTIONALLY LEFT BLANK

Open Space / Ontario 'Great' Park

Ontario is currently home to 30 recreational parks of various sizes, the West Cucamonga Creek Trail System, and a public golf course. Ontario has recently undertaken a massive project to begin constructing The Ontario 'Great' Park, which is located in the in the Ontario Ranch planning area, generally bounded by Ontario Ranch Road on the north, Eucalyptus Avenue on the south, Haven Avenue on the east, and Campus Avenue on the west. The Ontario 'Great' Park is approximately 3.7 miles long (east to west) and 340 acres in size. The Ontario 'Great' Park is envisioned as a focal point for the region, serving the City of Ontario's recreational and open space needs. [10]

Infrastructure Assessment

Infrastructure plays a vital role in mitigating the effects of hazard events. When infrastructure fails, it can exacerbate the extent of certain hazards or create complications for rescue workers trying to reach victims. For example, fallen utility poles, because of strong winds or seismic activity, can obstruct roadways and prevent emergency vehicles from reaching affected areas. The following are electrical, fossil fuel, hydrologic, and transportation infrastructure networks in Ontario.

Electricity

Ontario receives its electrical supply from Southern California Edison (SCE). Eleven substations are located within the City, connecting 220kV and 66 kV powerlines that run east to west and north to south, circumventing Ontario Airport. These lines bring power to Ontario and the surrounding cities and connect to other regional power sources. These connections help Ontario access auxiliary electricity sources should any of its immediate infrastructure fail. However, a larger and more regional failure of the power grid would likely disrupt power transmission to Ontario for an extended time until power can be restored.

Natural Gas

Ontario receives its natural gas from Southern California Gas Company (SoCalGas). To ensure sufficient natural gas transmission throughout the region, SoCalGas owns and operates transmission lines that transect the City. The pipeline splits as it enters the city and traverses the northern section of the city before it enters Montclair and turns south, while the other pipeline branch runs along the eastern section of Ontario before exiting the southwest portion of the city. If these lines are damaged, there is a potential to interrupt the flow and delivery of natural gas throughout the City. Additionally, natural gas ignites very easily, and any rupture in a transmission line could cause additional damage to properties in the vicinity of the leak due to fire from the escaped natural gas. The presence of this infrastructure creates unique challenges for the city from an emergency management perspective. Including hazards associated with damage to

[10] City of Ontario Website, Ontario Great Park

this infrastructure is an important element of an effective response to future incidents involving natural gas use and transmission.

Public Safety Power Shutoff

The State's investor-owned utilities have general authority to shut off electric power to protect public safety under California law. Utilities exercise this authority during severe wildfire threat conditions as a preventative measure of last resort through Public Safety Power Shut offs (PSPS).[1]

The City began preparation for PSPS events by understanding the potential circuits that could be impacted (**Figure 2-3**) and the city needs and special populations that may be affected by these events. These incidents typically occur during high fire threat conditions (i.e., dry conditions and strong winds) and may affect communities located far away from any fires that are actively occurring. Although the few SCE circuits located within the city have not been de-energized during past PSPS events, the city must be prepared in the event that a future PSPS event does affect one of those circuits. Residents and businesses in these areas are sure to feel the impacts of these events if they do not have alternative options for electricity at their homes and places of business.

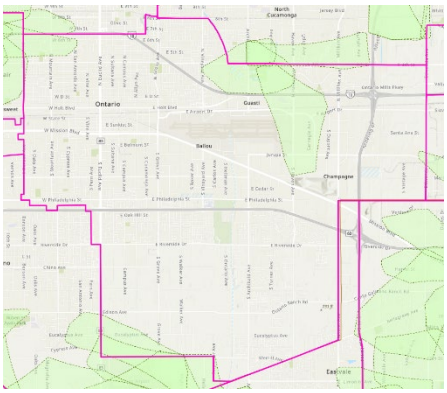

Figure 2-3: SCE Public Safety Power Shutoff Circuits surrounding the City

These events are anticipated to affect City resources as well since some City facilities rely on electricity to function. As a result, the City has prioritized back up power generation at City facilities in these affected areas to ensure residents have a safe place to seek refuge if needed, during these events.

Ontario Municipal Utilities Company

Ontario Municipal Utilities Company (OMUC) provides water, sewer, and assists in trash collection services for the city.

The city's water service area encompasses an area of approximately 49 square miles. According to the 2020 OMUC Urban Water Management Plan, they provide water service to a population of approximately 178,409 people, with a projected population of over 362,000 people by the fiscal year of 2044-45. OMUC serves a large group of families with special housing needs, including severely low-income earners, single-parent families, large families, seniors, people with disabilities, and homeless persons. The city historically has relied on groundwater pumped from the Chino Basin; treated groundwater from the Chino Basin produced by the Chino Basin Desalter Authority; treated, imported water purchased from Metropolitan Water District (MWD) through Water Facilities Authority;

groundwater and/or surface water purchased from San Antonio Water Company; and recycled water purchased from Inland Empire Utilities Agency. [11]

OMUC is also responsible for the operation and maintenance of an extensive wastewater collection system and is tasked with ensuring proper and efficient operation of the system. Ontario's service area is located within the city limits, with a small portion of the city in the northeast that is serviced by Cucamonga Valley Water District (CVWD). The City's wastewater collection system consists of approximately 425 miles of gravity lines, 9,400 associated maintenance holes and cleanouts, three city-owned lift stations, one privately owned/city-maintained lift station, over 24,200 feet of associated force mains, and 11 siphons. The system is divided into seven service areas, also referred to as sewer sheds, primarily based on the outlet points where the City's system ties into a downstream facility operated by the Inland Empire Utilities Agency (IEUA). The development and implementation of a wastewater collection system operations and maintenance program ensure that the system is routinely and properly maintained to minimize failures and extend the system's longevity. [12]

Trash services are provided by the Integrated Waste Department within the Public Works agency, which is committed to providing reliable, timely, safe, and affordable refuse collection services to the residents and businesses in the City of Ontario. Billing services and information on programs promoting waste minimization and locations for recycling efforts are provided by OMUC on the City's website. [13]

Transportation

Much of the transportation infrastructure in Ontario consists of roadways for automobiles, but there are many modes of travel into and out of the city. In total, there are freeways, buses/shuttles, local commuter trains, longer-distance trains, and air travel supporting mobility in and out of the City. For non-motorized travel, the city has an extensive network of pedestrian trails and bicycle paths.

There are 4 freeways/highways, I-10, I-15, and State Route (SR) SR-60 and SR-83 (primarily referred to as Euclid Ave) that connect Ontario to the greater Southern California region. The interchanges from these freeways and highways connect to major thoroughfares within the City. **Table 2-9** identifies these major routes that connect to the City's local transportation network.

Source: **iExitapp.com**		

Public transportation options within Ontario are provided by two public transit agencies that operate local bus and train services, Omnitrans and Metrolink, which are all regulated by the San Bernardino County Transportation Authority (SBCTA). Serving more than 2.1 million residents of San Bernardino County, the SBCTA is responsible for cooperative regional planning and furthering an efficient multi-modal transportation system countywide. The SBCTA administers Measure I, the half-cent transportation sales tax approved by county voters in 1989, and supports freeway construction projects, regional and local road improvements, train and bus transportation, railroad crossings, call boxes, ridesharing, congestion management efforts, and long-term planning studies. [14]

Omnitrans provides six routes servicing local Ontario neighborhoods, neighboring cities in San Bernardino County, and one express service route that connects Ontario with the cities of Montclair, Colton, and San Bernardino.

The Metrolink provides local and regional train service in Ontario, out of the East Ontario Station located south of the Ontario International Airport at 3330 E. Francis Street. East Ontario Station provides the Metrolink Riverside Line with a connector in the City of Ontario. This line connects Riverside to Downton

Metrolink's East Ontario Station, located in the City of Ontario. Photo Courtesy of Metrolink

[14] San Bernardino County Transportation Authority

Los Angeles and runs along the Union Pacific Railroad, featuring seven daily trains on weekdays only. The East Ontario station also provides a shuttle service to Ontario International Airport, served by Omnitrans. Ontario International Airport is discussed above in an earlier section.

PAGE INTENTIONALLY LEFT BLANK

Chapter 3 – Risk Assessment

This chapter discusses the types of hazards that might reasonably occur in Ontario. It describes these hazards and how they are measured, where in Ontario they may occur, a history of these hazards in and around Ontario, and the future risk they pose. The discussion of future risks includes any changes to the frequency, intensity, and/or location of these hazards due to climate change. This chapter also discusses how the HMPC selected and prioritized the hazards in this Plan.

Hazard Identification

FEMA guidance identifies several hazards that communities should evaluate for inclusion in a hazard mitigation plan. Communities may also consider additional hazards for their plans. The HMPC reviewed the previous hazards in the 2018 plan and discussed other potential hazards, excluding ones that do not pose a threat or are not a significant concern to Ontario. **Table 3-1** lists the hazards considered and explains the reasoning for inclusion/exclusion. For context, this table also shows if a hazard is recommended for consideration by FEMA, if it is included in the 2018 California State Hazard Mitigation Plan (SHMP), and if it is included in the San Bernardino County Hazard Mitigation Plan (SBC HMP).

Table 3-1: Hazard Evaluation for Ontario LHMP

Hazard	Recommended for Consideration	Included in LHMP?	Reason for Inclusion or Exclusion
Agricultural Pests	SHMP	No	While historically agricultural activities have occurred within the southern portion of the City, these areas are moving out of the community and being replaced by new residential, commercial, and industrial developments. Without the presence of these large agricultural areas in the community, the HMPC did not identify this as a hazard of concern for the City.
Air Pollution	SHMP	No	Air pollution is a state and regional issue that is addressed through plans and regulations administered by the South Coast Air Quality Management District and/or California Air Resources Board. Since the City does not regulate these resources, the HMPC did not identify this as a hazard of concern that could be addressed in this plan.
Aircraft Incident	SHMP	No	Ontario International Airport is located within the City. This facility is operated under a Joint Powers Agreement that the City is party to, however the JPA conducts all planning activities for the

			facility. Given the lack of control over this asset and few past incidents associated with aircraft incidents have occurred, the HMPC determined that this hazard should not be included in the plan.
Aquatic Invasive Species	SHMP	No	There are no major riparian environments in Ontario where aquatic invasive species could endanger the community.
Avalanche	FEMA guidance SHMP	No	Ontario is not located within potential avalanche zones.
Civil Disturbance or Riot	SHMP	No	The HMPC determined that the City includes a number of areas where large populations visit/congregate (Ontario International Airport, Toyota Arena, Ontario Mills, Ontario Convention Center, etc.), however these locations have not experience significant issues associated with civil disturbance. For this reason, the HMPC did not identify this as a hazard of concern.
Climate Change	SHMP SBC HMP	Yes	Climate change is discussed as a function of each relevant hazard and is mentioned throughout the Plan.
Coastal Flooding and Storm	FEMA guidance SHMP	No	Ontario is not located along the coast of California. Coastal flooding and storms are not anticipated to impact the community.
Cyber Threats	SHMP	Yes	With the increase in cyber threats occurring throughout California and the nation, the HMPC is concerned about their effects on communications. This hazard is addressed as a function of communications failure.
Dam Failure	FEMA guidance SHMP SBC HMP	Yes	Ontario is located downstream of dams that could inundate the community. Due to City's location downstream of these facilities, the HMPC identified dam failure as a hazard of concern.
Drought	SHMP SBC HMP	No	The HMPC is confident in the current hydrologic infrastructure and supply for the City. The HMPC does not consider drought to be a local issue alone, but rather a regional one. It is addressed in both the State and San Bernardino County HMP's.
Energy Shortage	SHMP	No	While energy shortage has the potential to occur in Ontario, the risk associated with this is similar to surrounding communities. While loss of power could occur, the bigger concern for the City is the effects this could have on communications infrastructure.

Epidemic, Pandemic, Vector-Borne Disease	SHMP	No	Ontario is in San Bernardino County, which has experienced several health-related incidents in the past. The City, along with the rest of the country, has recently responded to the COVID-19 pandemic, which has impacted staff and resources. However, the HMPC felt it was best to address this issue in the City's Emergency Operations Plan (EOP).
Erosion	FEMA guidance SHMP	No	Due to its relatively flat nature and lack of hills, the HMPC did not identify erosion as a hazard of concern for the City.
Expansive Soil	FEMA guidance	No	Expansive soils were not identified by the HMPC as a hazard of concern. While they could exist, the City requires compliance with the California Building Code, which is intended to mitigate hazards associated with this condition.
Extreme Cold	FEMA guidance SHMP	No	Temperatures in Ontario do not fall to a level that would be considered a danger to public safety. Due to this the HMPC did not identify this as a hazard of concern.
Extreme Heat	FEMA guidance SHMP	Yes	Extreme heat has occurred in Ontario and is expected to be a future recurring issue. This issue was identified by the HMPC as a hazard of concern and included in the Extreme Weather profile.
Fault Rupture	FEMA guidance SHMP SBC HMP	No	There are no known Alquist-Priolo fault zones located within Ontario. As a result, the HMPC did not identify this as a hazard of concern to the City.
Flooding	FEMA guidance SHMP	Yes	Several watercourses transect the City and are identified within FEMA flood hazard zones. While significant flooding events have not significantly affected properties within the City recently, the presence of these flood zones indicates the potential for future hazards. The HMPC identified flooding as a hazard of concern included in the Flooding profile.
Fracking	SHMP	No	Fracking does not occur in Ontario.
Hail	FEMA guidance	No	Hail that is severe enough to pose a threat to people and property is too rare in Ontario to be included.
Hazardous Materials release	SHMP	Yes	The presence of uses for storing, manufacturing, disposing, and transporting hazardous materials was identified as a concern for the HMPC. In addition, several major roadways, freeways, and rail lines transecting the City allow for the transport of these materials that could endanger the

			community if a release into the environment were to occur.
Hurricane	FEMA guidance SHMP	No	Hurricanes do not occur in Ontario.
Infrastructure Failure	SHMP	No	Infrastructure failure can pose a threat to people and property in Ontario. A discussion of infrastructure failure is discussed as a function of other hazards.
Landslide	FEMA guidance SHMP	No	No areas within the City of Ontario have existing landslides or the potential for landslides to occur. As a result, the HMPC did not identify this as a hazard of concern to the city.
Levee Failure	SHMP	No	While levees are located within the City, they were not deemed a significant concern. These levees are owned and managed by San Bernardino County and the City does not have the authority to address these facilities but coordinates with the County on issues and upgrades. Based on this, the HMPC did not include Levee failure as a hazard of concern.
Lightning	FEMA guidance	No	Although lightning does occasionally occur in Ontario, it does not pose a significant threat to people or property.
Liquefaction	FEMA guidance SHMP SBC HMP	No	According to mapping prepared by the California Geological Survey, the City is not located within liquefaction prone areas. The HMPC did not identify this as a hazard of concern.
Methane-containing Soils	SBC HMP	No	The City does not have methane-containing soils that pose a threat to the public health and safety of residents and businesses. The HMPC did not identify this as a hazard of concern to the City.
Natural Gas Pipeline Hazards	SHMP	No	Natural gas pipelines traverse Ontario, posing a danger to people and property if they were to breach and release their contents. This condition is discussed in the Community Profile in Chapter 2 and is discussed in the vulnerability assessment where applicable.
Oil Spills	SHMP	No	There is no history of oil drilling and extraction within the City. Based on this, the HMPC did not identify this as a hazard of concern to the City.
Power Failure	SHMP	No	While power loss events can occur in the City, the HMPC determined that this hazard shouldn't be addressed within the LHMP and is better suited as a hazard addressed in the City's EOP.

Radiological Accidents	SHMP	No	There are no known major sources of radiation in Ontario or the immediate surrounding area that could pose a serious threat to the community.
Sea-level Rise	FEMA guidance SHMP	No	The City is not located along the coast or near any large bodies of seawater. The HMPC did not identify this as a hazard of concern for the City
Seiche	FEMA guidance SHMP	No	There are no major bodies of water in Ontario that could be subjected to seiche.
Seismic Shaking	FEMA guidance SHMP SBC HMP	Yes	Ontario is in a seismically active area where shaking can be severe enough to damage property or cause loss of life. For this reason, the HMPC determined it should be addressed in this plan.
Severe Wind	FEMA guidance	Yes	Severe Weather includes discussions regarding extreme heat, severe wind, and rain, which are weather-related hazards that are most common in Ontario.
Severe Weather and Storms	FEMA guidance SHMP SBC HMP	Yes	Severe Weather includes discussions regarding extreme heat, severe wind, and rain, which are weather-related hazards that are most common in Ontario.
Storm Surge	FEMA guidance	No	Ontario is not a coastal community. The HMPC did not identify this as a hazard of concern to the City.
Subsidence	FEMA guidance	Yes	The HMPC believed that subsidence could occur with significant groundwater pumping. Subsidence is not discussed as a stand-alone hazard but rather is a function of the geologic hazards profile.
Terrorism	SHMP	Yes	The HMPC was concerned about terrorism incidents posing a threat to public safety given the number of significant locations that could be considered targets within the City. A discussion of this is in the Human-Caused Hazards profile.
Thunderstorm	SHMP	No	Thunderstorms that cause damage and endanger public safety are rare in the Southern California region. The HMPC did not identify this as a hazard of concern.
Tornadoes	FEMA guidance SHMP	No	No tornadoes are known to have occurred in Ontario. The HMPC did not identify this as a hazard of concern.
Transportation Accidents	SHMP	Yes	Due to the presence of major freeways, roadways, railroad lines, and the Ontario International Airport located in and

			around the City, transportation accidents could endanger public safety. A discussion of this is in the Human-Caused Hazards profile.
Tree Mortality	SHMP	No	The HMPC noted that the City's has a significant number of trees, however the City currently manages these resources effectively and did not feel it was necessary to profile as a hazard of concern.
Tsunami	FEMA guidance SHMP	No	Ontario is not a coastal community. The HMPC did not identify this as a hazard of concern to the City
Urban Fire	SHMP SBC HMP	Yes	The HMPC identified urban fires as a risk to property and life in Ontario.
Volcano	SHMP	No	There are no volcanoes near Ontario to reasonably pose a threat. The HMPC did not identify this as a hazard of concern to the City
Wildfire	FEMA guidance SHMP	No	The city does not have any high fire hazard severity zones, nor is it located next to a wildland-urban interface area. Because of this, the HMPC did not identify this as a hazard of concern to the City; Urban Fire is the main risk to Ontario.

After hazard evaluation and the organizational changes made by the HMPC, this Plan discusses seven broad hazard types with their respective sub-categories:

Hazard Type	Sub-Categories
Earthquake/Geologic Hazards	Seismic Shaking Subsidence
Flooding	
Extreme Weather	Severe Winds Extreme Heat Severe Rainstorm
Dam Failure/Inundation	
Urban Fire	
Hazardous Materials Release	
Human-Caused Hazards	Terrorism Transportation Incidents Communications Failure
Climate Change	*Discussed in all Hazard Categories*

Hazard Scoring and Prioritization

Once the hazards for Ontario have been identified, the hazards are then given a priority ranking. In the Hazard Assessment Matrix below, the "Red" zone represents the highest priority hazards, the "Yellow" zone represents middle priority, and the "Green" zone represents the lowest priority hazards. As shown in Hazard Assessment Matrix, the two hazards considered the greatest threat to the City of Ontario are earthquake and flood, followed closely by extreme weather (EW) events. The hazard profiles and risk assessment that follow describe these hazards in-depth, reviews the exposure of assets to these hazards, and estimate losses or assess risk for significant events associated with these hazards.

Ontario Hazards Assessment Matrix

2023 LHMP		IMPACT		
		High	Medium	Low
PROBABILITY	High	Earthquake / Geologic Hazards Flooding	EW-High Winds EW-Extreme Heat	
	Medium		EW-Severe Rain Storm Hazardous Materials Release Urban Fire HCH - Transportation Incidents	
	Low	Dam Inundation HCH-Terrorism	HCH- Communications Failure	
Climate Changes addressed under each hazard				

In addition to the simple prioritization exercise, the HMPC followed FEMA guidance (see **Table 3-2**) for hazard mitigation plans and prioritized each of the hazards identified. In the initial step, it assigned a score of 1 to 4 for each of the hazards for the following criteria:

- **Probability:** The likelihood that the hazard will occur in Ontario in the future.
- **Location:** The size of the area that the hazard would affect.
- **Maximum probable extent:** The severity of the direct damage of the hazard to Ontario.
- **Secondary impacts:** The severity of indirect damage of the hazard to Ontario.

The HMPC assigned a weighting value to each criterion, giving a higher weight to the criteria deemed more important, and multiplied the score for each criterion by weighing the factor to determine the overall score for each criterion. These weighting values were recommended by FEMA:

- Probability: 2.0
- Location: 0.8
- Maximum probable extent: 0.7
- Secondary impacts: 0.5

Table 3-2 shows the Criterion Scoring used to assign a score for each criterion.

After calculating the total impact score for each hazard (sum of the location, maximum probable extent, and the secondary impact). FEMA guidance recommends multiplying the total impact score by the overall probability to determine the final score for each hazard. A final score between 0 and 12 is considered a low-threat hazard, 12.1 to 42 is a medium-threat hazard, and a score above 42 is considered a high-threat hazard. This final score determines the prioritization of the hazards.

In compliance with the Disaster Mitigation Act (and as further specified by Interim Final Rule 44 CFR Section 206.401(c)(2)(i)), this LHMP addresses, in substantial detail, the primary hazards facing the City. Lower priority hazards are addressed at a lesser level of detail due to their relatively reduced impacts, as identified in the hazard assessment discussion.

Disaster Declaration Connections

Since the previous update the following major disasters, emergency declarations, and fire management events have been issued by the FEMA. Past events identified in this plan have been identified in connection with these event in the "Past Events" sections within each Hazard Profile.

Disaster Declaration - San Bernardino County (2019-2023)					
Year	**Declaration Number**	**Declaration Title**	**Incident Type**	**Affected Ontario**	**Activated EOC / Requested PA**
2023	DR-4699-CA	SEVERE WINTER STORMS, STRAIGHT-LINE WINDS, FLOODING, LANDSLIDES, AND MUDSLIDES	Severe Storm	Yes	No
2023	EM-3591-CA	SEVERE WINTER STORMS, FLOODING, AND MUDSLIDES	Flood	Yes	No
2023	EM-3592-CA	SEVERE WINTER STORMS, FLOODING, LANDSLIDES, AND MUDSLIDES	Flood	Yes	No
2021	DR-4569-CA	WILDFIRES	Fire	No	No
2021	FM-5381-CA	BLUE RIDGE FIRE	Fire	No	No
2020	DR-4482-CA	COVID-19 PANDEMIC	Biological	Yes	Yes
2020	EM-3428-CA	COVID-19	Biological	Yes	Yes
2020	FM-5350-CA	EL DORADO FIRE	Fire	No	No
2020	FM-5325-CA	APPLE FIRE	Fire	No	No
2020	FM-5301-CA	HILLSIDE FIRE	Fire	No	No
2019	EM-3415-CA	EARTHQUAKES	Earthquake	No	No

Table 3-2: Ontario Hazard Prioritization Worksheet

Hazard Type	Probability	Impact			Total Score	Hazard Planning Consideration
		Location	Primary Impact	Secondary Impacts		
Earthquake / Geologic Hazards	4	4	4	4	64.00	High
Flood	4	3	2	3	42.40	High
High Winds	3	4	2	2	33.60	Medium
Extreme Heat	2	4	2	2	22.40	Medium
Severe Rainstorm	2	3	2	2	19.20	Medium
Hazardous Materials Release	2	3	2	2	19.20	Medium
Urban Fire	2	3	2	2	19.20	Medium
Transportation Incidents	2	3	1	2	16.40	Medium
Dam Inundation	1	4	4	4	16.00	Medium
Terrorism	1	3	3	4	13.00	Medium
Communications Failure	1	4	2	2	11.20	Low

* Climate Change considerations discussed as appropriate within this hazard.

Probability	Importance
Based on estimated likelihood of occurrence from historical data	**2.0**
Probability	Score
Unlikely - less than 1% chance each year	1
Occasional - a 1 to 10% chance each year	2
Likely - a 10 to 90% chance each year	3
Highly Likely - more than 90% chance each year	4

Secondary Impacts	Importance
Based on estimated secondary impacts to community at large	**0.5**
Impact	Score
Negligible - no loss of function, downtime, and/or evacuations	1
Limited - minimal loss of function, downtime, and/or evacuations	2
Moderate - some loss of function, downtime, and/or evacuations	3
High - major loss of function, downtime, and/or evacuations	4

Location	Importance
area of community affected by hazard	**0.8**
Affected Area	Score
Negligible	1
Limited	2
Significant	3
Extensive	4

Maximum Probable Extent (Primary Impact)	Importance
Based on percentage of damage to typical facility in community	**0.7**
Impact	Score
Weak - little to no damage	1
Moderate - some damage, loss of service for days	2
months	3
conditions	4

Total Score = Probability x Impact, where:
Probability = (Probability Score x Importance)
Impact = (Affected Area + Primary Impact + Secondary Impacts), where:
Affected Area = Affected Area Score x Importance
Primary Impact = Primary Impact Score x Importance
Secondary Impacts = Secondary Impacts Score x Importance

Hazard Planning Consideration			
Total Score	Range	Distribution	Hazard Level
0.0	12.0	7	Low
12.1	42.0	11	Medium
42.1	64.0	4	High

The probability of each hazard is determined by assigning a level, from unlikely to highly likely, based on the likelihood of occurrence from historical data. The total impact value includes the affected area, primary impact and secondary impact levels of each hazard. Each level's score is reflected in the matrix. The total score for each hazard is the probability score multiplied by it's importance factor times the sum of the impact level scores multiplied by their importance factors. Based on this total score, the hazards are separated into three categories based on the hazard level they pose to the communities: High, Medium, Low.

Hazard Profiles

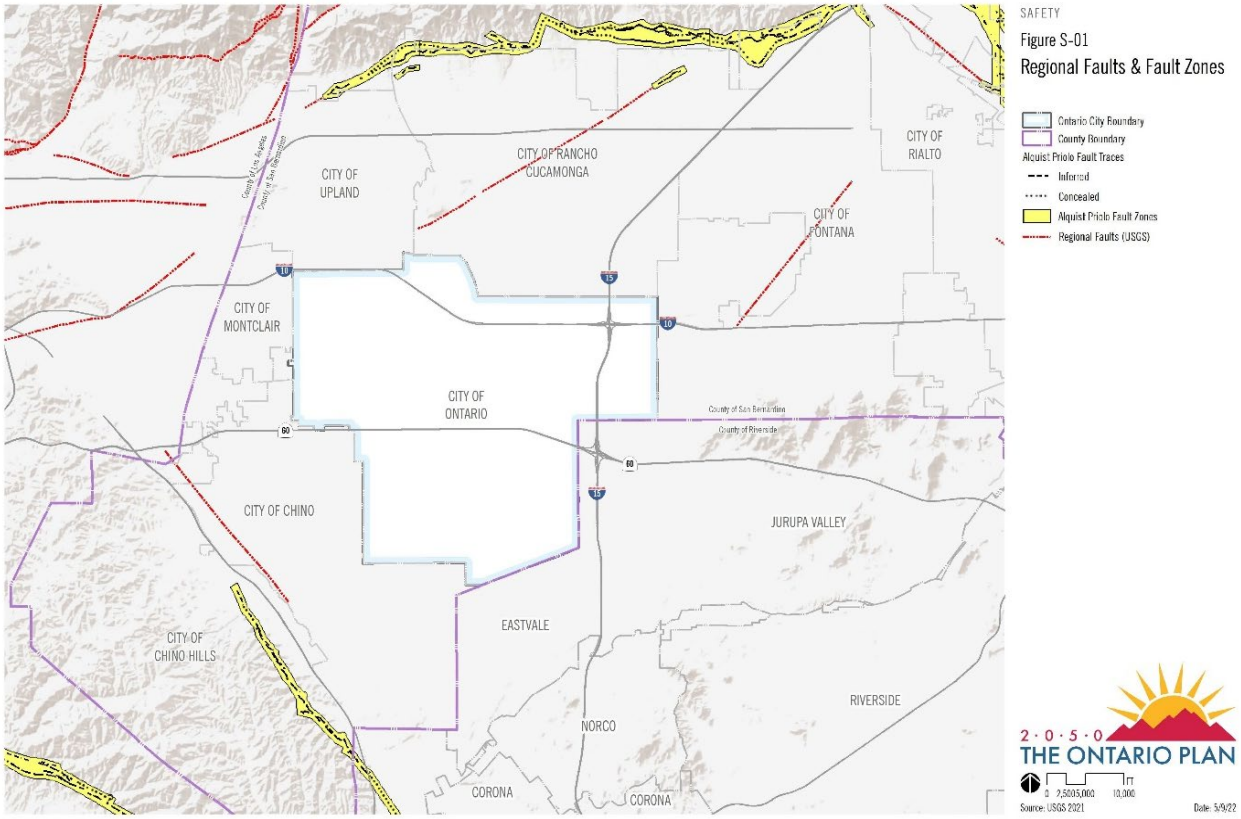
Earthquake / Geologic Hazards

Earthquake and geologic hazards of concern in Ontario include seismic shaking and subsidence.

Description

An earthquake is a sudden slip on an active fault, and the resulting shaking and radiated seismic energy caused by the slip (USGS, 2009). The majority of major active faults in the Ontario area are strike-slip faults. For this type of fault, during an earthquake event, one side of a fault line slides past the other. The rupture from this type of fault extends almost vertically into the ground.

Earthquakes are a significant concern to the City of Ontario. The area around Ontario is seismically active since it is situated on the boundary between two tectonic plates. Earthquakes can cause serious structural damage to buildings, overlying aqueducts, transportation facilities, and utilities and can lead to loss of life. In addition, earthquakes can cause collateral emergencies, including dam and levee failures, fires, and landslides.



Seismic Shaking

Seismic shaking is the shaking felt on the surface caused by an earthquake. In most cases, earthquakes are not powerful enough to feel the shaking. However, powerful earthquakes can generate significant shaking, causing widespread destruction and property damage. As previously discussed, earthquakes are considered a major threat to the City of Ontario due to the proximity of several regional fault zones. Major fault zones in the region include the San Andreas Fault, located approximately 14 miles northeast of the city, the San Jacinto Fault, located approximately 7 miles northeast of the city, the Elsinore Fault, located approximately 3 miles southeast of the city, and the Cucamonga Fault, located approximately 5 miles north of the city. All of these faults are capable of producing earthquakes of magnitude 6.7 or greater. A significant earthquake along one of the major faults could cause substantial casualties, extensive damage, and other threats to life and property. The shaking of the ground can also damage or destroy underground utilities or pipelines, potentially leading to a loss of power, conceivable fires should any natural gas pipelines be damaged, and possible release of hazardous materials and flooding if water lines are breached. These regional fault zones are displayed in **Figure 3-1** from the City's recently updated General Plan.

Subsidence

Subsidence occurs when the ground level decreases as if the surface is sinking. Subsidence can either be sudden (as in a sinkhole) or happen gradually over time. It can be caused by mining, groundwater pumping, or fossil fuel extraction, creating empty underground spaces that can collapse and cause the soil above to drop in elevation. Erosion, natural cave collapses, and seismic activity can also cause subsidence.

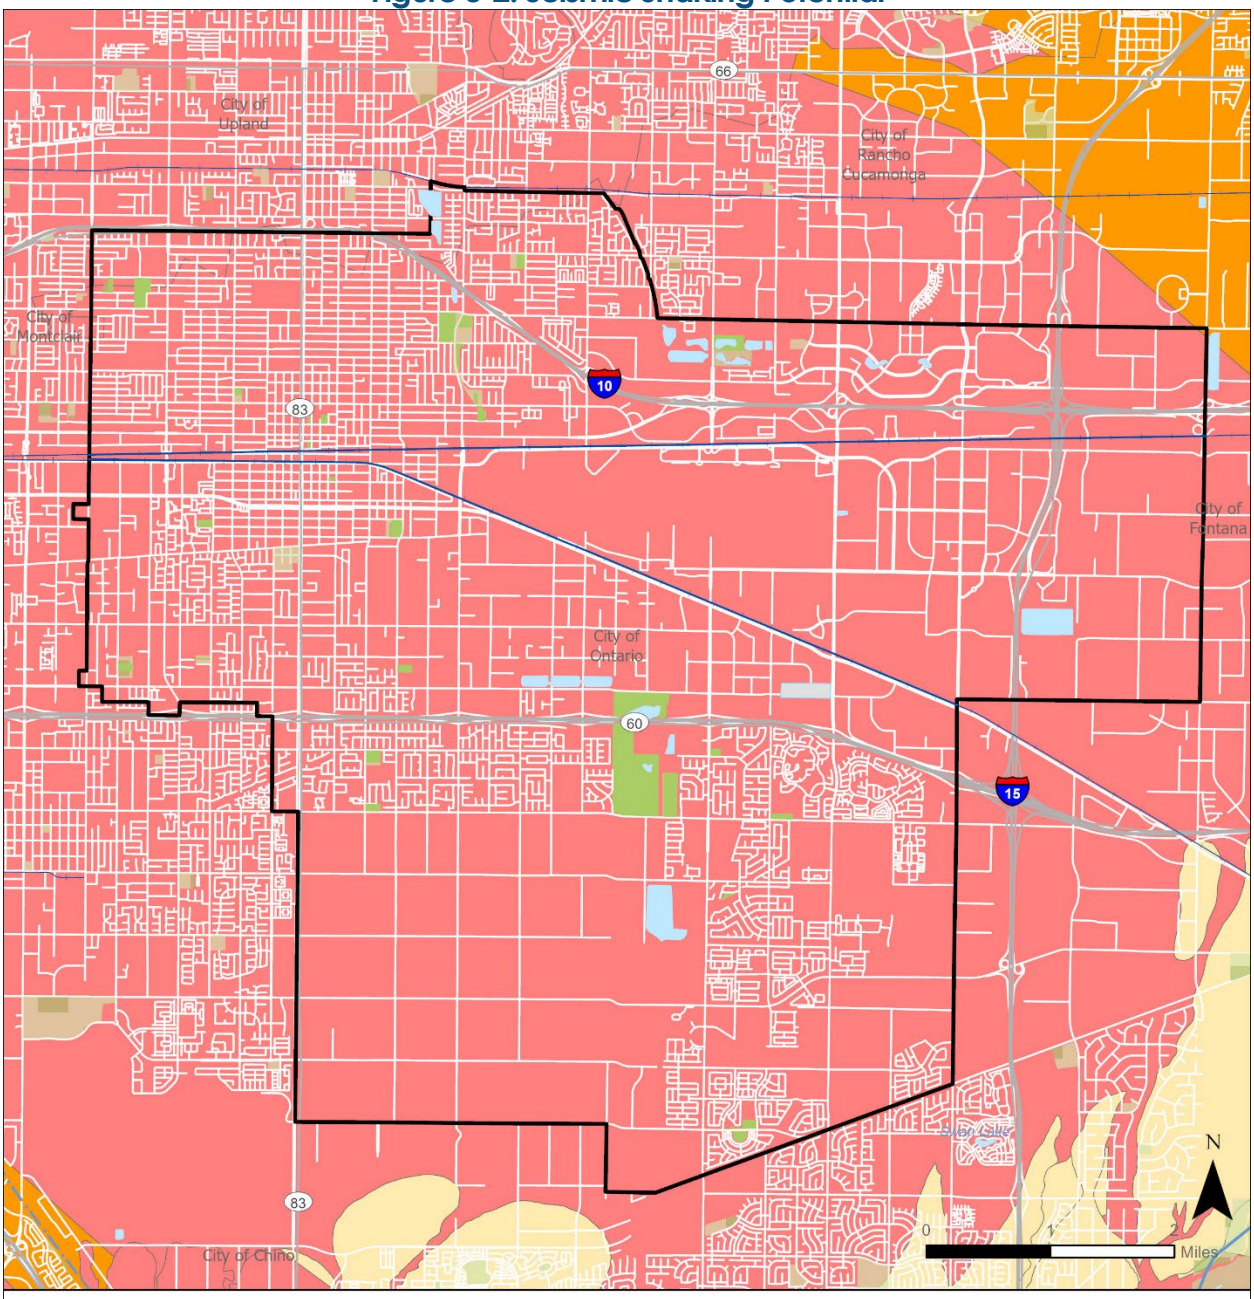
Figure 3-1: Regional Faults and Fault Zones

Location and Extent

Seismic Shaking

The intensity of seismic shaking occurs in relation to the amount of energy discharged by the seismic event, which is dictated by the length and depth of the fault. The longer and nearer the surface the fault rupture is, the greater the seismic shaking. In most cases, areas nearest to the fault rupture experience the greatest seismic shaking, while areas more distant experience less shaking. Seismic shaking can damage or destroy structures leading to partial or even total collapse. The shaking of the ground can also damage or destroy underground utilities or pipelines, potentially leading to releases of hazardous materials and flooding if water lines are breached.

Southern California is a highly seismic area because of the major faults that run through the region and the frequency of seismic events in the region. The intensity of seismic shaking is usually measured with the Modified Mercalli Intensity (MMI) scale based on the amount of observed damage. Seismic shaking may also be measured using the more widely known moment magnitude scale (MMS, denoted as M_w or sometimes M), which measures the amount of energy the earthquake releases. The MMS begins at 1.0 and increases as more energy is released. This scale is based on a logarithmic scale, meaning that the difference in energy between two measurements is substantially greater than the difference between the measurements themselves. For example, a M_w 6.5



earthquake releases approximately 1.4 times as much energy as a M_w 6.4 earthquake and 1,000 times as much energy as a M_w 4.5 earthquake. The MMS replaces the Richter scale, which is similar but less reliable when measuring large earthquakes. Since the degree of shaking and consequential damage generally decreases as the seismic energy travels farther away from the event's point of origin, different sections of a city or region can report different MMI measurements in different locations. Given Ontario's size, it is likely that different sections of the city would report different MMI measurements. The MMI scale depicted in **Table 3-2** uses Roman numerals on a 12-point scale to measure and describe the effects of the shaking event. **Figure 3-3** shows seismic shaking potential within the city.

Table 3-3: Modified Mercalli Intensity Scale [15]

Intensity	Description	Description
I	Instrumental	Felt only by very few people under especially favorable conditions.
II	Feeble	Felt only by a few people at rest, especially on the upper floors of buildings.
III	Slight	Noticeable by people indoors, especially on upper floors, but not always recognized as an earthquake.
IV	Moderate	Felt by many indoors and by some outdoors. Sleeping people may be awakened. Dishes, windows, and doors are disturbed
V	Slightly Strong	Felt by nearly everyone, and many sleeping people are awakened. Some dishes and windows broken, and unstable objects overturned.
VI	Strong	Felt by everyone. Some heavy furniture is moved, and there is slight damage.
VII	Very Strong	Negligible damage in well-built buildings, slight to moderate damage in ordinary buildings, and considerable damage in poorly built buildings.
VIII	Destructive	Slight damage in well-built buildings, considerable damage and partial collapse in ordinary buildings, and great damage in poorly built buildings.
IX	Ruinous	Considerable damage in specially designed structures. Great damage and partial collapse in substantial buildings, and buildings are shifted off foundations.
X	Disastrous	Most foundations and buildings with masonry or frames are destroyed, along with some well-built wood structures. Rail lines are bent
XI	Very Disastrous	Most or all masonry structures are destroyed, along with bridges. Rail lines are greatly bent.
XII	Catastrophic	Damage is total. The lines of sight are distorted, and objects are thrown into the air.

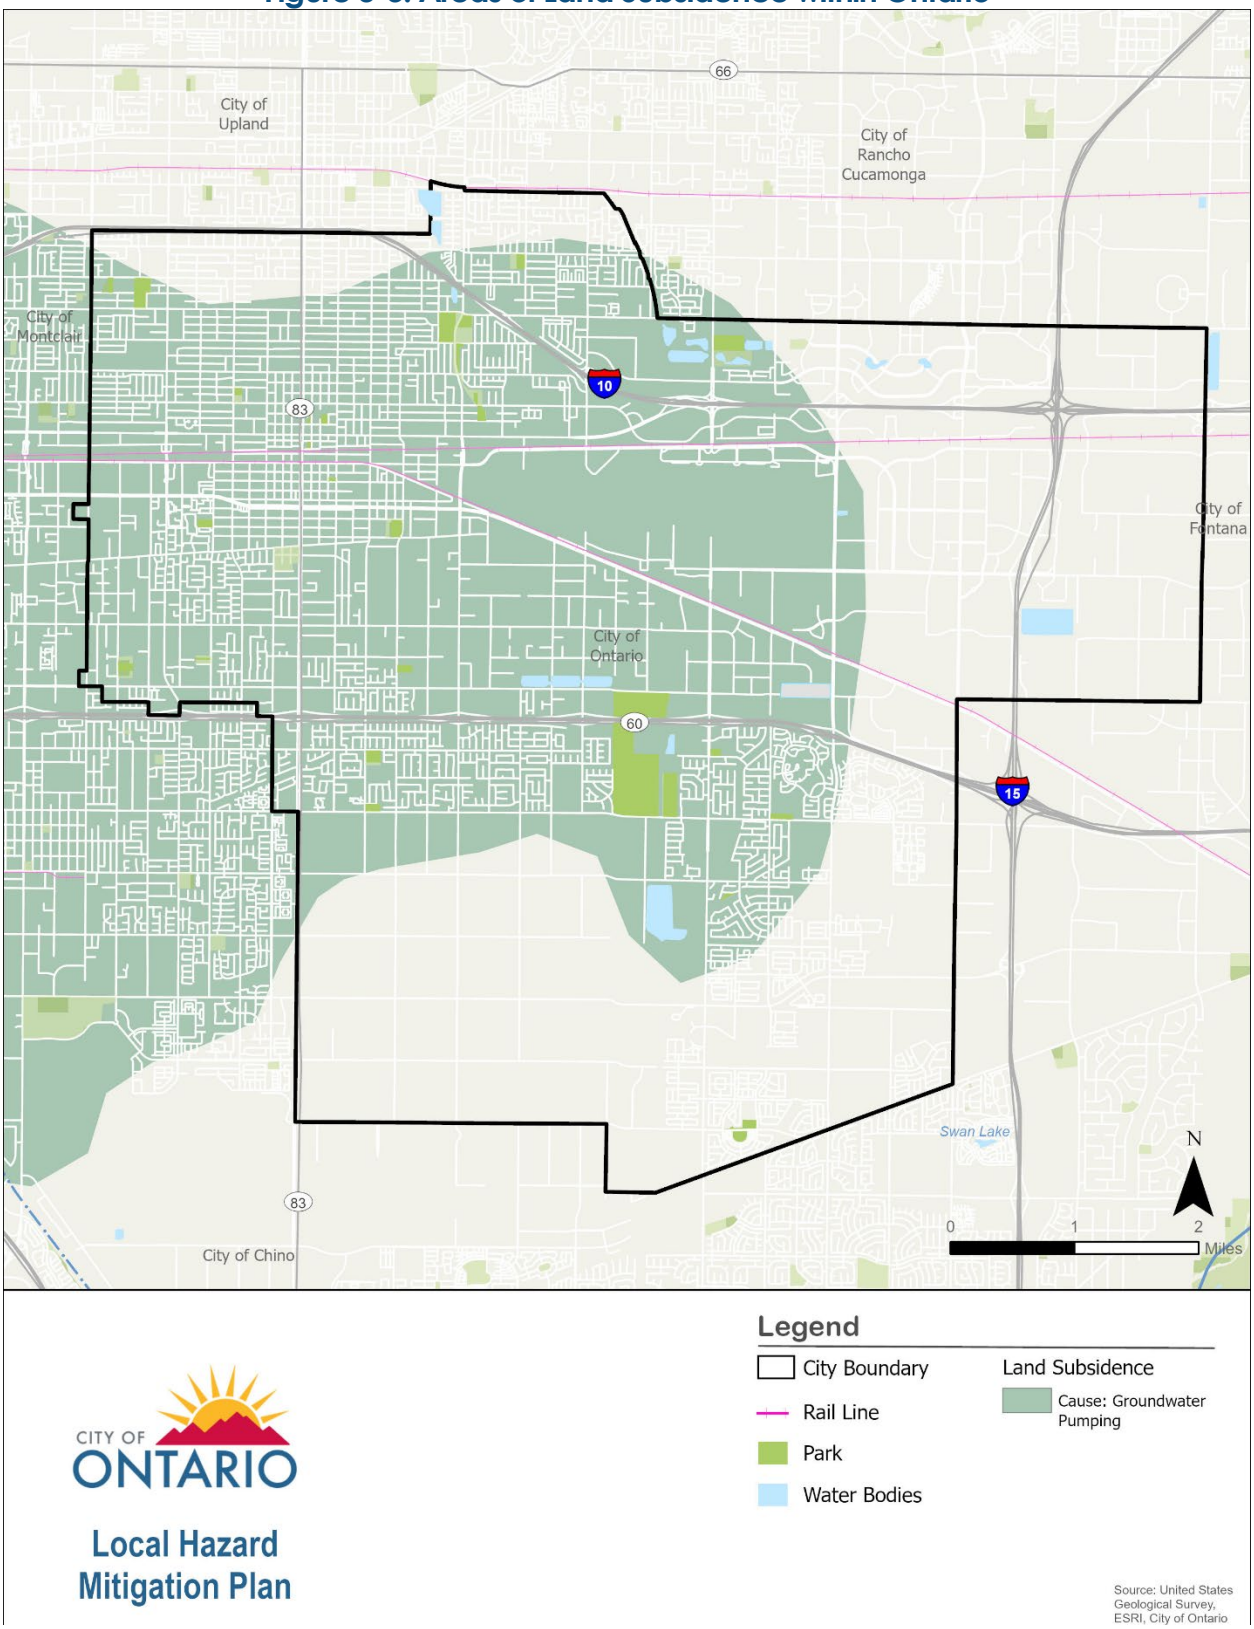
Subsidence

The City identified that due to the significant amount of groundwater pumping that occurs within the City, subsidence in parts of the community are a concern. The portions of the City where active groundwater pumping is occurring are the most likely locations for subsidence. Other sections of the city could also be potentially subject to subsidence in the event of a major earthquake (M_w 5.0 or greater). In terms of extent, subsidence is typically measured by the distance that the ground has sunk from its original elevation (i.e., in feet or inches) or by using the rate of subsidence (i.e., inches or centimeters per year). According to the California Geological Survey (and United States Geological Survey), in California, large areas of land subsidence were first documented in the first half of the 20th century. Most of this was the result of excessive groundwater pumping, some of which has decreased by water conveyance projects from around the state that have allowed some groundwater aquifers to recover. However, subsidence continues at varying rates (some rates as high as <1 foot/year).[16] **Figure 3-3** shows areas of subsidence within the city.

Past Events



Seismic Shaking

While no significant earthquake has originated within Ontario within the last 100 years, the city has felt the shaking of regional earthquakes. The most recent major seismic shaking event near Ontario was the Ridgecrest Sequence of Earthquakes on July 4, 2019. The event was a sequence of multiple earthquakes registered as an M_w 6.4 followed by an M_w 7.1.[17] The event caused over 25 injuries, resulted in one death, and caused over $5 billion in damage.[18] The next most recent event occurred on January 17, 1994, in Northridge, registering as an M_w 6.7[19] causing 57 deaths, more than 8,700 injuries, and approximately $20 billion in damage costs, plus an additional economic loss of $40+ billion.

On June 6, 1992, there were multiple large events in Big Bear and Landers, California, with a rating of M_w 6.5 and M_w 7.3, respectively. These events resulted in 3 deaths, nearly 500 injuries, and approximately $1.52 billion in damages.[20]

Figure 3-3: Areas of Land Subsidence within Ontario

Many major faults are located throughout Southern California, including some well-known ones like the San Andreas and San Jacinto Fault Zones. Proximity to a variety of active faults ensures that seismic hazards will continue to be a major concern for the city. **Table 3-4** identifies the major earthquakes that have occurred within 100 miles of the City. While populations may have felt the 2019 Ridgecrest earthquakes (EM-3415) within the city, these events were located over 100 miles away and thus were not added to **Table 3-4**. **Table 3-5** identifies earthquakes, M_w 4.0+, which have occurred in San Bernardino County. The LHMP Planning Team noted the following regional and local events for seismic activity in the City of Ontario.

Table 3-4: Significant Earthquakes (6.0+M_w) Within 100 Miles of Ontario

Event Name	Magnitude
9/12/1970	M_w 5.2 - Lytle Creek
2/28/1990	M_w 5.4 - Upland
6/28/1992	M_w 7.3 - Big Bear/Landers
10/16/1999	M_w 7.1 - Hector Mine
7/29/2008	M_w 5.4 - Chino Hills
***Distance between the epicenter and Ontario.**	

Table 3-5: Earthquakes (Greater then 4.0+M_w) In San Bernardino County (Up to 2022)

Date	Name	Magnitude
9/14/2011	Calimesa	M_w 4.1
1/15/2014	Fontana	M_w 4.4
7/5/2014	Running Springs	M_w 4.6
3/29/2014	Brea	M_w 5.1
7/25/2015	Fontana	M_w 4.2
9/16/2015	Big Bear Lake	M_w 4.0
12/30/2015	Muscoy	M_w 4.4
1/6/2016	Banning	M_w 4.4

It should be noted that hundreds of smaller (<M_w 4.0) earthquakes within San Bernardino County were not listed.

Subsidence

Monitoring for subsidence by the City occurs on a regular basis. Based on City measurements, historic groundwater extraction in the region has contributed to subsidence rates of 0.8 to 2.5 feet.

Risk of Future Events

Seismic Shaking

Ontario is in a seismically active area with many faults in the surrounding area and region-at-large. There will be an ever-present danger, of course, posed by any seismic shaking, which could potentially cause damage to buildings and/or infrastructure. It is almost inevitable that an earthquake will occur along one of the adjacent or regional fault lines and cause a major seismic event. The Third Uniform California Earthquake Rupture Forecast (UCERF3) was released in 2015 and is the most recent assessment of the probability of a major earthquake on various faults between 2015 to 2044. **Table 3-6** shows the results for nearby and regional fault lines for Ontario.

In addition to UCERF3 forecasts, which project the odds of a major earthquake on local and regional faults, the U.S. Geological Survey forecasts the severity of seismic shaking in different locations for various plausible earthquake scenarios. **Table 3-7** shows the anticipated shaking in Ontario from some of these scenarios.

The U.S. Geological Survey scenarios show that the Newport-Inglewood and San Joaquin Hills faults could cause the strongest seismic shaking in Ontario. However, the largest magnitude events are anticipated to come from the more distant San Jacinto and San Andreas faults, which could cause earthquakes that have an overall higher magnitude than the San Jose, Cucamonga, or Fontana faults. Due to the former faults' distance from Ontario, the shaking intensity felt in Ontario would be reduced compared to the shaking that would be felt nearer the earthquakes' epicenters. The overall magnitude of potential earthquake scenarios occurring along the San Jose, Cucamonga, or Fontana faults is lower than some of the more regional faults, but their proximity to Ontario means that the city would be subjected to high intensity shaking from these earthquakes. In other words, these lower-magnitude earthquake scenarios may be more destructive in Ontario than higher-magnitude earthquake scenarios that are more distant. As noted in **Table 3-6**, however, the likelihood of a powerful earthquake occurring along these faults within the next 25 years is exceptionally low.

Table 3-6: Earthquake Probabilities for Key Faults near Ontario (2015-2044)

Fault	Distance (Miles)*	Probability			
		6.7+ M*	7.0+ M*	7.5+ M*	8.0 M*
San Jose	4.42	0.30	0.20	0.03	Negligible
Cucamonga	5.83	1.09	0.97	0.61	0.03
Fontana	6.79	0.23	Negligible	Negligible	Negligible
Chino Alt 1	8.43	1.42	0.15	0.08	Negligible
San Gabriel	11.61	0.46	0.42	0.18	<0.01
Sierra Madre	11.94	1.10	1.06	0.72	0.03
Whittier Alt 1	13.82	1.45	1.26	0.66	<0.01
San Jacinto (Lytle Creek)	14.43	1.13	1.13	1.12	0.49
Elsinore (Glen Ivy)	18.00	3.19	1.68	0.89	<0.01
San Jacinto (San Bernardino)	18.91	5.15	5.14	5.09	2.77
San Andreas	22.32	19.02	15.55	11.78	4.06
Elsinore (Temecula)	23.20	2.16	1.75	0.94	<0.01
Palos Verdes	41.62	3.09	2.79	0.10	Negligible

Table 3-7: Selected Shaking Scenarios for Ontario

Fault	Magnitude	Distance to Epicenter (Miles)*	MMI Range in Ontario
San Jose	6.66	8.70	7.0 - 8.0
Cucamonga	6.88	11.91	7.0 - 8.0
San Jacinto (Lytle Creek)	6.72	14.62	6.0 – 7.0
San Jacinto (San Bernardino)	6.96	17.41	6.5 – 7.0
San Andreas	9.09	24.08	7.0 – 7.5

Note: UCERF3 results consist of two individual models (3.1 and 3.2), each of which provides rupture probabilities for each segment of the fault. This table shows the maximum probability for a section of the fault in either model.

Subsidence

Since Ontario has not experienced acute subsidence events, and the City is monitoring groundwater elevations and overproduction of their groundwater aquifer, it seems unlikely that subsidence will become a significant issue in the future. The most likely cause of a future event would be linked to an extreme drought in the future that leads to intensified groundwater withdrawals from the groundwater aquifer. In addition, the city's proximity to seismically active faults suggest the potential for a significant earthquake exists, which could lead to seismically induced subsidence in the future.

Climate Change Considerations

Seismic Shaking

There is no direct link between climate change and seismic activity that could impact Ontario, so climate change is not expected to cause any changes to the frequency or intensity of seismic shaking. Some research indicates that climate change could result in "isostatic rebounds," or a sudden upward movement of the crust because of reduced downward weight caused by glaciers[21]. As glaciers are known to melt when overall global temperatures increase, climate change could indirectly lead to an increase in seismicity in Ontario and the Southern California region.

Subsidence

The relationship between climate change and subsidence is not well established. Nevertheless, it is possible that climate change could indirectly influence subsidence in Ontario. While more intense rainstorms could potentially recharge underground aquifers, adequate infrastructure would need to be available to accommodate this water, allowing for greater recharge. If this recharge could occur, it could reduce the risk of subsidence. On the other hand, more severe and prolonged periods of drought may encourage more groundwater withdrawals and increase the risk of subsidence.

Flood

Description

Floods are a common hazard in many parts of California, including Ontario. Ultimately, a flood occurs when there is too much water on the ground to be held within local water bodies, causing water to accumulate in naturally dry areas. They are often caused by heavy rainfall, though floods can also occur after a long period of moderate rainfall or if unusually warm weather causes mountain snow to melt faster than expected. Floods that develop quickly, known as flash floods, are especially dangerous because there may be little warning that one is occurring, but floods can also build over a more extended period.

A flood, as defined by FEMA's National Flood Insurance Program (NFIP), is: "A general and temporary condition of partial or complete inundation of two or more acres of normally

[21] Ibid., 47.

dry land area or of two or more properties (at least one of which is the policyholder's property) from:

- Overflow of inland or tidal waters, or
- Unusual and rapid accumulation or runoff of surface waters from any source, or
- Mudflow, or
- Collapse or subsidence of land along the shore of a lake or similar body of water as a result of erosion or undermining caused by waves or currents of water exceeding anticipated cyclical levels."

Floods can be slow or fast rising but generally develop over a period of hours or days. Mitigation includes any activities that prevent an emergency, reduce the chance of an emergency happening, or lessen the damaging effects of unavoidable emergencies. Investing in mitigation measures now, such as: engaging in floodplain management activities, constructing barriers such as levees, and purchasing flood insurance will help reduce the amount of structural damage and financial loss from other types of property damage should a flood or flash flood occur.

Floods are dangerous for several reasons. The floodwaters can be deep enough for people to drown and moving fast enough to sweep people away. The moving water can damage buildings with its force (in extreme cases, it may move entire structures) or carry large debris that damages objects with which it collides. When water gets into buildings, it can cause extensive damage to personal property, ruining building materials, furniture, electronics, and numerous other items. Both standing and moving water can be barriers to movement, isolating people and hindering evacuation, rescue, or relief efforts.

Location and Extent

Flood events are measured by their likelihood of occurrence. For instance, a 100-year flood is a flood that has a 1 in 100 (1.0 percent) chance of occurring in any given year. A 500-year flood is a flood that has a 1 in 500 (0.2 percent) chance of occurring in any given year. The 100-year flood has been designated as the benchmark for major flood events. Thus 100-year floods are referred to as "base floods."

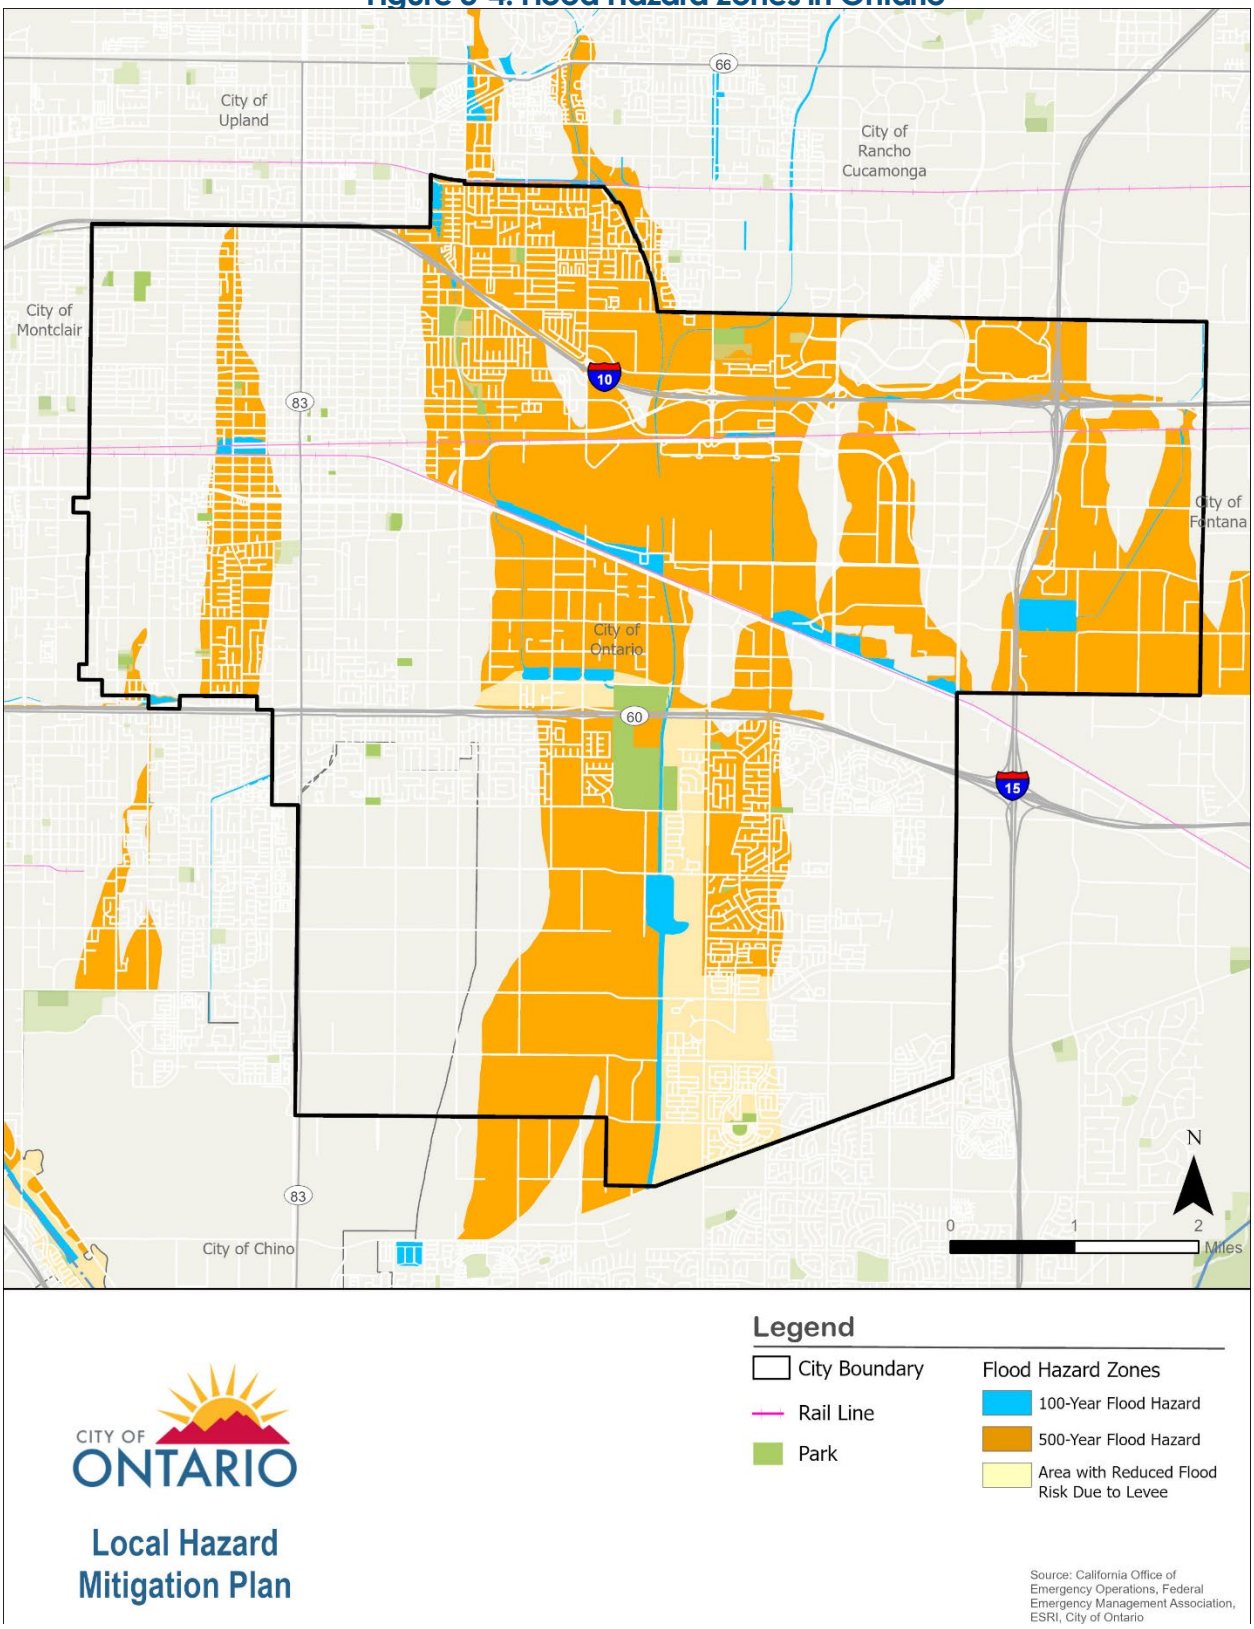
Floodplains are areas that are prone to flooding and often experience frequent flooding. While it is possible for areas outside of these designated floodplains to experience flooding, the most likely locations to experience future flooding are low-lying areas near bodies of water. FEMA is the governmental body responsible for designating which areas of the United States can be classified as floodplains.

The three most common designations are:

- Special Flood Hazard Area: The area within a 100-year floodplain.
- Moderate Flood Hazard Area: The area outside the 100-year floodplain but within the 500-year floodplain.

- Minimum Flood Hazard Area: The area outside of the 500-year floodplain.

FEMA has multiple floodplain categories for each unique environment within these three designations. **Table 3-8** shows these detailed floodplain categories. FEMA classifies Ontario under four floodplain categories: A, AO, X, and AH; the location of these floodplains can be seen on the FEMA Flood Hazard Zone Map depicted in **Figure 3-4**.



Flooding hazards can potentially impact a significant amount of the community; however, less than 10% of this area is subject to a 100-year event. Development within flood hazard areas is expected to comply with flood protection standards that reduce vulnerability to flood impacts and ensure safe use and occupation of structures.

Table 3-8: FEMA Floodplain Categories

Category	Description
A	Within a 100-year floodplain, but the water height of the 100-year flood is not known.
A1-30 or AE	Within a 100-year floodplain and the water height of the 100-year flood is known.
AO	Within a 100-year floodplain, and the water height of the 100-year flood is between one and three feet but not specifically known.
A99	Within a 100-year floodplain, it is protected by flood protection infrastructures such as dams or levees.
AH	Within a 100-year floodplain, and the water height of the 100-year flood is between one and three feet and is specifically known.
AR	Within a 100-year floodplain, it is protected by flood protection infrastructure that is not currently effective but is being rebuilt to provide protection.
V	Within a 100-year floodplain for coastal floods, but the water height of the flood is not known.
V1-30 or VE	Within a 100-year floodplain for coastal floods and the water height of the flood is known.
VO	Within a 100-year floodplain for shallow coastal floods with a height between one and three feet.
B	Within a 500-year floodplain, or within a 100-year floodplain with a water height less than one foot (found on older maps).
C	Outside of the 500-year floodplain (found on older maps).
X	Outside of the 500-year floodplain (found on newer maps).
X500	Within a 500-year floodplain or within a 100-year floodplain with a water height less than one foot (found on newer maps).
D	Within an area with a potential and undetermined flood hazard.
M	Within an area at risk of mudslides from a 100-year flood event.
N	Within an area at risk of mudslides from a 500-year flood event.
P	Within an area at risk of mudslides from a potential and undetermined flood event.
E	Within an area at risk of erosion from a 100-year flood event.

Past Events

Table 3-10 identifies past events of flooding in the city.

Table 3-10: History of Flooding in Ontario

Date	Description and Effect
1/14/1916 **1/21/1916**	Severe rainstorms in Southern California, over 8.5" in San Bernardino County, led to regional flooding, including massive flooding along Euclid Ave in Ontario. The city was one of several that were cut off and isolated by floodwaters, as roads, railroads, and bridges were washed out.
10/13/1942	A midnight thunderstorm hit Upland with 2.25" of rain in just over one hour. Mud and debris washed down Euclid Avenue and flooded at least one home. Four calves at an Ontario dairy were washed away.
2/6/1950	Heavy rainfall leads to the inundation of Chino Creek and the subsequent flooding of Hwy 71 from Ontario all the way to Corona.
1/13/1952 **1/18/1952**	Heavy rain hits Southern California in a few waves of storms. 5.52" fell in San Bernardino County over six days. Flooding is reported in Ontario and neighboring Upland.
11/30/1952	Heavy rain dropped almost one inch in neighboring Upland, which led to the flooding of homes in Ontario.
7/23/1956 **7/28/1956**	Strong monsoon flow hit the region with thunderstorms each day, even west of the mountains. On 7/25, flash flooding struck the City of Ontario and San Bernardino County.
1/21/1962 **1/22/1962**	The heaviest winter storm in 13 years struck the San Bernardino area with 2.93 inches in Ontario resulting in the flooding of streets and neighborhoods in the City.
3/6/1968 **3/8/1968**	Heavy rains led to local flooding, damaging homes, buildings, and schools in Ontario and surrounding cities. Debris flows closed several highways in the region.
2/8/1978 **2/10/1978**	Heavy rains in the region, including 5" of water in Ontario led to widespread flooding, flash floods, and mudslides; numerous homes were washed away as a result.
5/7/2016	Heavy rains over Southern California led to flooding in Ontario. Cars were partially submerged near the Ontario International Airport; intersections were closed at Grove Ave/Francis St and Walnut St/Cucamonga Ave, and a roof collapsed at a container business due to the severity of the weather.
12/14/2021	Pounding rain and winds led to the collapse of a tree that toppled and crushed two apartment building units, trapping a woman inside. Over 3" of rain also led to flooding in some parts of the city.
11/8/2022	Heavy rains over Southern California led to flooding in Ontario. Ten people were washed away in the 1200 block of E. 4th Street, near North Grove Avenue.

Source: A History of Significant Weather Events in Southern California

Risk of Future Events

There is no indication that the severe rainfall that leads to flooding will abate in the future, either in Ontario or the greater region of Southern California. While Ontario may experience prolonged periods of dry or wet years, flood events will likely continue to

impact the city. For areas within the 100-year and 500-year flood hazard zones, the likelihood of flooding to occur annually is 1% and 0.2%, respectively.

Because the City is vulnerable to flooding during the winter storm season, it is an active participant in the FEMA National Flood Insurance Program (NFIP). Through this program, "Special Flood Hazard Areas" within the city are identified and mapped on Flood Insurance Rate Maps (FIRMs), identifying the areas that require flood insurance. FIRMs generally describe flooding in terms of a 100- or 500-year flood event, which translates into the probability (1.0% or 0.2%, respectively) that flooding could occur within the designated zone in any given year. In addition to the federal requirements within the NFIP, the City has adopted flood protection standards requiring minimum building elevation, flood-proofing, and anchoring of buildings in areas prone to flooding. **Figure 3-4** identifies the FEMA Flood Hazard Zones mapped within the City.

Since its incorporation, Ontario has worked with San Bernardino County on flood management and mitigation projects. The City also takes steps on an annual basis to maintain and prepare for flood events, ensuring the existing infrastructure can effectively convey floodwaters. Flood events within the City can occur either due to large storms and flash flooding that overwhelms infrastructure or the failure of flood control facilities that inundate downstream communities.

The city has a levee system composed of six levees. **Table 3-11** identifies these levees and their features.

Table 3-11: Levee System in Ontario

Description			What is Behind the Levee

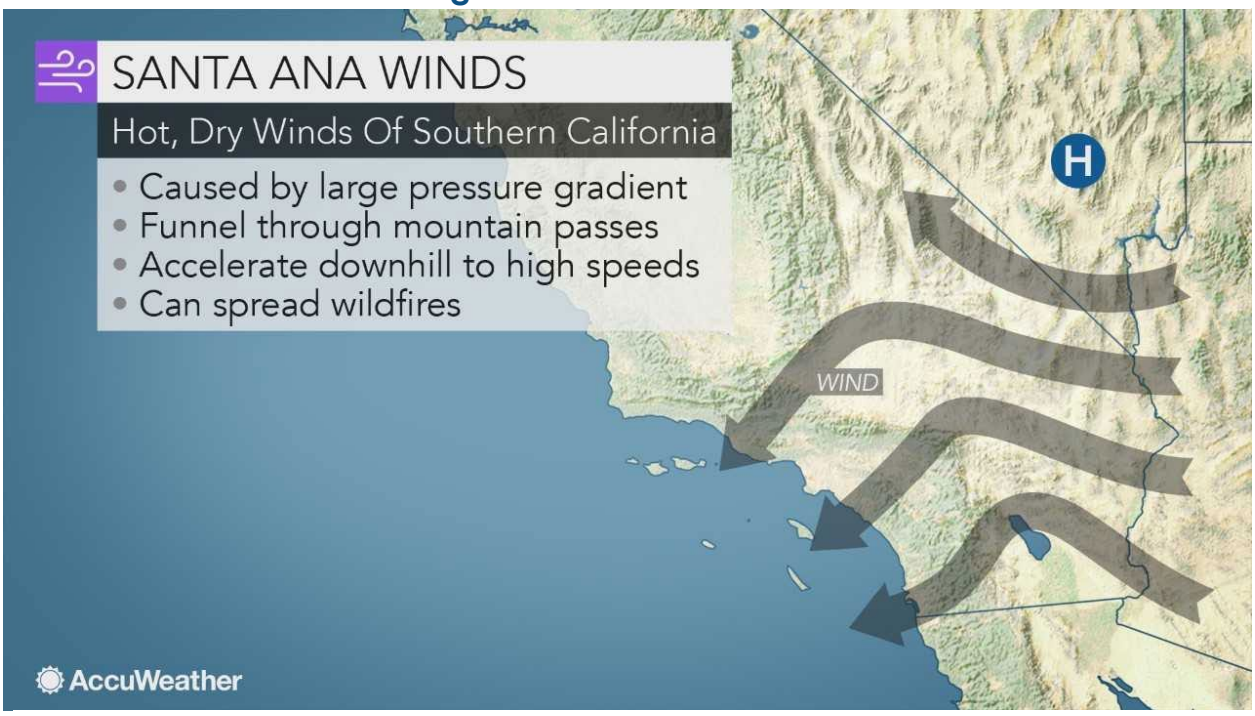
CLIMATE CHANGE CONSIDERATIONS

Climate change is expected to affect California's precipitation patterns, which are likely to influence future flood events. A 2017 study found that the number of very intense precipitation days in California is projected to more than double by the end of the century, increasing 117 percent, making it likely that flood events will become more frequent [22]. More flood events could increase the frequency of maintenance and repair activities and require operational changes to City function. Much of the City's infrastructure may require modification and retrofit to better accommodate changes anticipated from climate change. As a result, significant investment in future infrastructure may be necessary.

Extreme Weather (Severe Winds, Extreme Heat, Severe Rainstorms)



DESCRIPTION

SEVERE WINDS

Wind is simply the movement of air caused by differences in atmospheric pressure and temperature. High-pressure air will naturally move to areas of low pressure. Usually, the distance between these high- and low-pressure zones is far; however, these low- and high-pressure zones occasionally may be near one another. When this happens, air will flow dramatically, creating high-speed winds. The most common wind events in southern California are the "Santa Ana" winds. **Figure 3-5** depicts the typical conditions that occur in the fall and winter to create these events. When winds are fast enough, they can damage homes, public facilities, utilities, and other infrastructure. They can also uproot or topple mature trees, pick up debris, and send it careening through the air. This debris can injure or even kill bystanders who may find themselves stranded outside. High-speed winds can deposit this debris in the middle of rights-of-way, such as roads, freeways, and railways, blocking exit routes for would-be evacuees or impeding access to first responders trying to reach wounded people.

Figure 3-5: Santa Ana Winds

- Source: https://www.accuweather.com/en/weather-news/what-are-santa-ana-winds-2/343027

Extreme Heat

Extreme heat is a period when temperatures are abnormally high relative to the normal temperature range. There are generally three types of extreme heat events:

- Extreme Heat Days: a day during which the maximum temperature surpasses 98 percent of all historic high temperatures for the area, using the time between April and October from 1950 to 2005 as the baseline.
- Warm Nights: a day between April and October when the minimum temperature exceeds 98 percent of all historic minimum daytime temperatures observed between 1950 and 2005.
- Extreme Heat Waves: a successive series of extreme heat days and warm nights where extreme temperatures do not abate; while no universally accepted minimum length of time for a heatwave event exists, Cal-Adapt considers four successive extreme heat days and warm nights to be the minimum threshold for an extreme heatwave.

Severe Rainstorms

During severe weather events such as strong storms, rain can fall at such a high rate that it cannot drain away fast enough. The resulting heavy rain can cause flooding, leading to inundation and potential damage to buildings, road networks, public areas, utilities,

and other critical pieces of infrastructure. In California, heavy rainfall events are often short, intense bursts of rain, but in some cases, heavy rain can persist for multiple days

Location and Extent

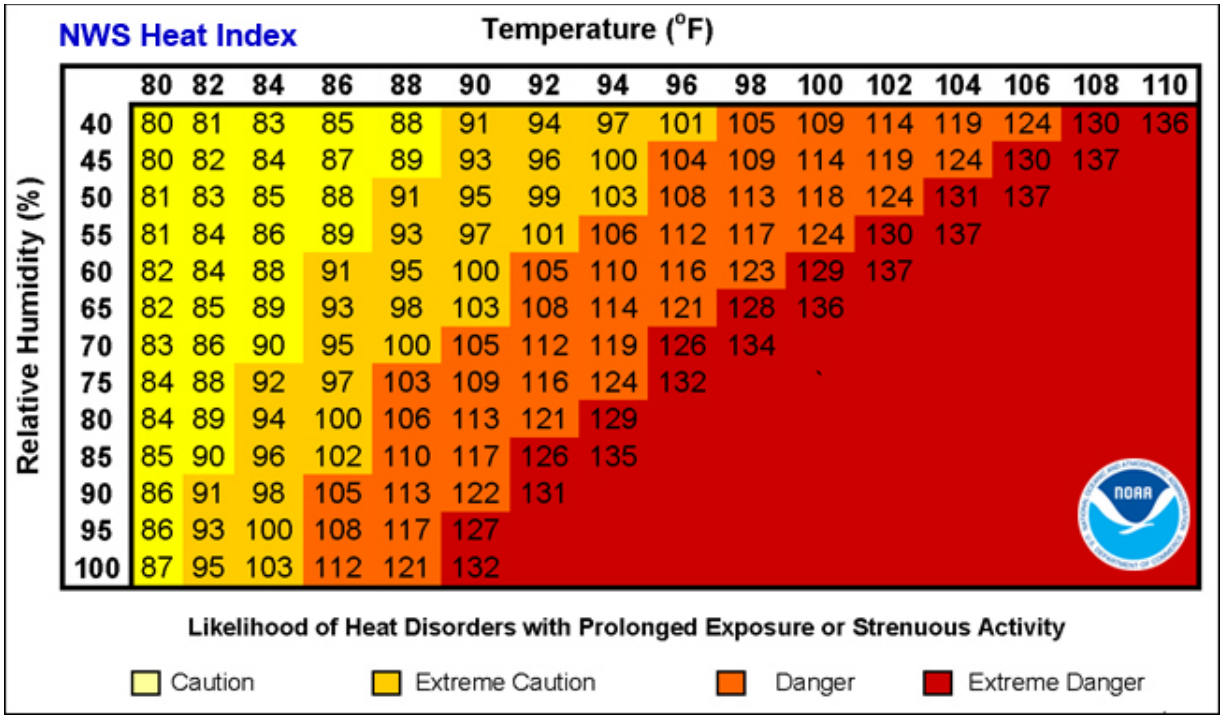
Severe Wind

In Southern California, the most common type of severe wind event is called the Santa Ana winds. High pressure over Nevada and Utah, often during the fall and winter months, forces air down from the high desert toward the ocean. As the winds descend, they heat up and increase in speed, sometimes carrying particulate matter and aggravating the respiratory health of those who have allergies. Ontario is often affected by Santa Ana winds blowing through the San Gabriel and San Bernardino Mountain ranges via the Cajon Pass. Santa Ana winds are a contributing factor to the threat and spread of wildfires in California. Santa Ana winds can damage the electrical distribution infrastructure, creating wildfire ignitions due to arcing or downed power lines. Santa Ana winds can also result in rapid fire spread from ordinarily contained or small fires such as vehicle fires or fires caused by discarded smoking materials. Depending on the severity of the wind event, any part of the city can be affected by severe winds.

Generally, winds are measured using the Beaufort scale, developed in 1805, which categorizes wind events on a force scale from 0 to 12 using their speed and impacts. Any wind classified as force nine or above is generally considered a severe wind event. **Table 3-12** identifies the Beaufort scale, which classifies wind events in detail.

Table 3-12: Beaufort Scale

Force	Speed (mph)	Description
0	0 to 1	Calm: Smoke rises vertically
1	1 to 3	Light air: The direction of the wind is shown by smoke drift but not wind vanes.
2	4 to 7	Light breeze: Wind is felt on the face, leaves rustle, and wind vanes are moved.
3	8 to 12	Gentle breeze: Leaves and small twigs are in motion, and light flags are extended.
4	13 to 18	Moderate breeze: Dust and loose paper become airborne, and small branches are moved.
5	19 to 24	Fresh breeze: Small trees begin to sway
6	25 to 31	Strong breeze: Large branches are in motion, and using an umbrella becomes difficult.
7	32 to 38	High wind: Whole trees are in motion and walking against the wind can be hard.
8	39 to 46	Strong wind: Walking is difficult, and twigs break off trees.
9	47 to 54	Severe wind: Slight structural damage.
10	55 to 63	Storm: Trees are uprooted and considerable damage to structures.
11	63 to 72	Violent storm: Widespread damage.
12	73 and above	Hurricane: Devastating damage.



Source: https://www.weather.gov/mfl/beaufort

Extreme Heat

Extreme heat events will feel different from region to region since different areas have different historic high temperatures. For example, an extreme heat day on the coast will feel different than an extreme heat day in the High Desert. The reason for this is how humidity affects the perceived heat that people feel. Humid conditions will make a day feel hotter than non-humid conditions, even though the temperature may be the same. The difference between the perceived and actual temperatures is known as the "heat index." To illustrate the effect of the heat index, a 90-degree day with 50 percent humidity feels like 95°F, whereas a 90°F Day with 90 percent humidity feels like 122°F. **Figure 3-6** illustrates the National Oceanic and Atmospheric Administration's (NOAA) National Weather Service Heat Index.

Extreme heat events are not limited to any part of the city. They occur with the same intensity and duration at the same time across all locations in Ontario. For Ontario, an extreme heat day involves a temperature that exceeds ***103.2°F***, and a warm night involves a temperature that exceeds ***68.6°F***.[23] These thresholds are based on a 2% probability event.

Figure 3-6: NOAA's National Weather Service Heat Index

[23] https://cal-adapt.org/tools/extreme-heat

Severe Rainstorm

The location and size of a rain event vary depending on regional geography and regional and global weather events. For example, small precipitation events may occur in only one section of Ontario. In contrast, a large rain event could inundate a majority of San Bernardino County and other parts of southern California.

California's precipitation varies from year to year, depending on how much moisture the state receives from atmospheric rivers. Atmospheric rivers are corridors along which wet air travels from the tropics to continents. When the moisture arrives in California, it may precipitate as rain or snow. One of California's most known atmospheric rivers is the "Pineapple Express," which brings moist air from the ocean surrounding Hawaii to California. An immense amount of moisture may be transported along the atmospheric rivers that cross over California during certain years, leading to severe rains.[24]

Another weather phenomenon influencing rainfall in southern California is "El Niño," officially referred to as the "Southern Oscillation" or "El Niño-Southern Oscillation (ENSO)." ENSO can cause increased rainfall, particularly during the winter months, caused by warming of the surface of the eastern tropical Pacific Ocean, leading to the evaporation of warm, moist air into the atmosphere. Winds bring this moisture to the eastern Pacific and the American continents, where it falls as rain. ENSO does not always lead to increased rainfall by default, but in general, it can increase the chances of winter with higher-than-usual precipitation.[25, 26]

Rain events are usually measured by the amount of precipitation that falls.[27] **Table 3-13** categorizes rain events by the amount of precipitation per hour.

Table 3-13: Measuring Heavy Rain Events

Rain Type	Description
Heavy Rain	More than 4 mm per hour but less than 8 mm per hour
Very Heavy Rain	Greater than 8 mm per hour
Moderate Shower	Greater than 2 mm, but less than 10 mm per hour
Heavy Shower	Greater than 10 mm per hour, but less than 50 mm per hour
Violent Shower	Greater than 50 mm per hour

Past Events

Severe Wind

Severe wind incidents are a common occurrence in the city. Annually the city is subjected to Santa Ana Wind conditions that can cause significant damage to trees, buildings, and vehicles. While the effects of Santa Ana Winds are often overlooked, it should be noted that in 2003, two deaths in Southern California were directly related to the fierce condition. A falling tree struck one woman in San Diego. The second death occurred when a passenger in a vehicle was hit by a pickup truck cover launched by the Santa Ana Winds.

The following are significant events that have affected the city and region in the past:

- **January 11, 1989 -** Gusts between 80-100 mph hammered the inland empire, and winds shredded a blimp that was moored at Ontario International Airport.
- **December 24, 1994 -** Santa Ana wind gusts reached speeds of 74 mph in Ontario.
- **October 26, 1993 -** Gusts of over 62 mph were reported in the city and exacerbated fires in the Southern California region.
- **December 9, 1998 -** Strong 83 mph Santa Ana winds tipped over big rigs, snapped power lines, and shut down the Ontario International Airport because the dust was so bad.
- **December 25-26, 2000 -** Santa Ana winds caused damage and injuries in Ontario, where gusts of over 60 mph were reported.
- **December 28, 2006 -** A strong Santa Ana wind event knocked down trees and power lines throughout the region.
- **October 14 and 15, 2008 -** A prolonged Santa Ana Wind event knocked down trees and blew a truck over in Ontario.
- **January 06 07, 2003 -** Widespread regional Santa Ana winds in the region resulted in 2 dead, 11 injured, and widespread property damage, road closures, downed trees, crop damage, wildfires, and power outages. Gusts reached 90 mph in the city.
- **November 29, 2006 -** Winds were sustained at almost 60 mph in the city, resulting in property damage and power outages due to downed power lines and trees.
- **November 01, 2011 -** A Santa Ana Wind event caused downed trees; trucks were blown off the freeway in Ontario.
- **December 01, 2011 -** A Santa Ana Wind event caused wind speeds of more than 65 mph, knocking down hundreds of trees, downing power lines, and overturning trucks throughout the San Bernardino Valley and Ontario.
- **January 07- 08, 2012 -** A storm that hit the region caused wind gusts over 60 mph in the city, knocking down power lines and blowing containers off semi-trucks.
- **November 2014 -** A Santa Ana wind event caused winds of approximately 50 mph, with damage reported throughout the region.
- **January 2017 -** A series of three storms caused strong winds that knocked down hundreds of trees throughout the region, causing millions of dollars in damage.
- **October 9, 2017 -** A strong Santa Ana wind event caused wind gusts of 70 mph.
- **October 26, 2020 -** Santa Ana winds reached speeds of 80 mph, causing trees to topple and rip out of the ground along Euclid Ave in the city. The winds blew down powerlines and were severe enough to cause the shutdown of all runways and

taxiways at Ontario International Airport, forcing arrival flights to be diverted or delayed while departing flights were delayed or canceled.
- **November 25, 2021 -** Santa Ana winds caused trees in the city to topple and uproot.
- **January 21, 2022 -** A Santa Ana wind event causes a massive tree to topple and crush a 100-year-old duplex apartment building, causing minor injuries.

Extreme Heat

Based on Cal Adapt's historical information (1950 through 2005), the city experiences four extreme heat days per year. During this same period, the city experienced a 4-day heatwave, approximately every four years. Over the past 16 years (2005-2021), the city has experienced an extreme heat event (103° F or higher) every year except 2005. During this period, the temperature reached an average of 108.4° F. The four highest temperatures occurred in 2006 (114°F), 2017 (114°F), 2018 (117°F), and 2020 (118F).[28] In 2022, California experienced one of the worst heatwaves it has ever experienced. From September 1st through September 9th, 2022, temperature records for September were shattered across the western portion of the United States, including Ontario, where temperatures reached 108° F.

Severe Rainstorms

Ontario and San Bernardino County have experienced heavy rain events that have inundated many communities. Some significant historical events include (it should be noted that past events of major flooding in the region are generally directly tied to severe rainstorms):

- **January 14 – 21, 1916 -** Severe rainstorms in Southern California, over 8.5" in San Bernardino County, which led to regional flooding, including massive flooding along Euclid Avenue in Ontario. The city was one of several that were cut off and isolated by floodwaters, as roads, railroads, and bridges were washed out.
- **February 6, 1950 -** Heavy rainfall led to the inundation of Chino Creek and the subsequent flooding of Hwy 71 from Ontario to Corona.
- **January 13-18, 1952 -** Heavy rain hits Southern California in a few waves of storms. Approximately 5.52" fell in San Bernardino over the six days. Flooding was reported in Ontario as a result.
- **July 23 -28, 1956 -** Strong monsoon flow hit the region with thunderstorms each day, even west of the mountains. On 7/25, flash flooding struck the City of Ontario and San Bernardino County.
- **January 21-22, 1962 -** The heaviest winter storm in 13 years struck San Bernardino County, with 2.93 inches in Ontario, resulting in the flooding of streets and neighborhoods in the City.
- **February 7 -26, 1962 -** A very wet period for Southern California resulted in 20" + in the wettest mountain locations. Twenty were killed, and fifteen were injured in

[28] NOAA National Centers for Environmental Information, https://www.ncdc.noaa.gov/cdo-web/datasets/GSOY/stations/GHCND:USW00003102/detail

flooding and mudslides. Property damage, trees down, boats damaged. On 2/19, severe flooding was reported in Ontario and San Bernardino County.

- **March 6 -8, 1968 -** Heavy rains led to local flooding, damaging homes, buildings, and schools in Ontario and surrounding cities. There was one drowning death, and debris flows closed several regional highways.
- **February 8 -10, 1978 -** Heavy rains in the region, including almost 5" of water in Ontario, led to widespread flooding, flash floods, and mudslides, and numerous homes were washed away.
- **April 26, 1994 -** A strong thunderstorm produced large hail up to 0.75 inches in diameter in Ontario. One to two inches of accumulating hail forced the closure of a section of I-215.
- **May 7, 2016 -** Heavy rains over Southern California led to flooding in Ontario. Cars were partially submerged near the Ontario International Airport; intersections were closed at Grove Ave/Francis St and Walnut St/Cucamonga Ave, and a roof collapsed at a container business due to the severity of the weather.
- **December 14, 2021 -** Pounding rain and winds led to the collapse of a tree, which toppled and crushed two apartment building units, trapping a woman inside. Over 3" of rain also led to flooding in some parts of the city.
- **December 27, 2022 through January 14, 2023** – Numerous back-to-back storms impacted various parts of California over the course of several weeks. While Ontario wasn't impacted significantly, parts of Ventura and Santa Barbara Counties received significant amounts of rain, causing flooding and evacuations. This event was part of DR 4699.

Risk of Future Events

Severe Wind

Given Ontario's history of severe wind events, it is very likely that wind events will continue to impact the city. The most probable source of these events in the future will likely originate from the Santa Ana winds or extreme storms. All expectations are that the probability they will occur again in the future is highly likely.

Extreme Heat

As temperatures rise throughout California, the number of extreme heat days will also increase. According to Cal-Adapt data, which relies on NOAA data sources, Ontario experiences extreme heat days. The city historically (1950-2005) experienced, on average, four extreme heat days annually based on this historic period. That number of days increased to 9 days annually from 2006-2021. According to the 2022 Vulnerability Assessment, the city is projected to experience an annual average of 41 extreme heat days by 2100. [29]

Severe Rainstorms

There is no indication that rainfall or severe rain hazards will abate either in Ontario or the greater region of Southern California in the future. While Ontario may experience

[29] 2022 Vulnerability Assessment Report for the Ontario Plan 2050 Update

prolonged periods of dry or wet years, all expectations are that the probability they will occur again in the future is highly likely and anticipated to increase in the future.

Climate Change Considerations

Severe Wind/ Severe Rainstorms

It is anticipated that the atmospheric rivers that deliver storms to Southern California may intensify because of climate change. While the average number of storms in Southern California will remain the same, storms are expected to increase in intensity by 10 to 20 percent.[30] This increase in storm intensity may also bring more intense winds to the Southern California region, including Ontario.

Regarding Santa Ana winds, however, studies indicate that these events may be affected in varying ways. According to one study that examined two global climate models, there is a projected increase in future Santa Ana events. However, other studies have found that the number of Santa Ana events may decrease by about 20% in the future.[31] Given the anticipated increases in temperatures throughout the region, future events are anticipated to become more severe in some cases, even if the total number of events decreases.

Regarding severe storms, climate change is expected to alter rainfall patterns in Southern California, including Ontario. As the climate warms, rain events are predicted to become more intense. Ontario will likely experience more rain inundation events that lead to flooding and increase the potential threat of dam failure, tree mortality, and other potential hazards.

Extreme Heat

The primary effect of climate change is warmer average temperatures. The hottest years on record have occurred since 2000, with 2016 and 2020 being tied.[32] As climate change accelerates in the 21st century, it is anticipated that extreme heat events will become more frequent and intense in the city. With the projection that extreme heat days could increase between 22 and 35 days annually by 2100, the city can expect a shift in residential and business needs for cooling and addressing heat-related issues.

Hazardous Materials Release

Description

Hazardous materials release refers to a hazard event whereby harmful concentrations of hazardous or toxic substances are released into the environment. This occurs when storage containers of hazardous materials leak or fail. It can happen due to industrial

[30] Atmospheric Rivers to Soak California as Climate Warms. https://www.livescience.com/49225-atmospheric-rivers-double-climate-change.html

[31] Hall, Alex, Neil Berg, Katharine Reich. (University of California, Los Angeles). 2018. Los Angeles Summary Report. California's Fourth Climate Change Assessment. https://www.energy.ca.gov/sites/default/files/2019-11/Reg%20Report-%20SUM-CCCA4-2018-007%20LosAngeles_ADA.pdf

[32] Rebecca Hersher and Lauren Sommer. 2020. "2020 May be the Hottest Year on Record. Here's the Damage it did." NPR. https://www.npr.org/2020/12/18/943219856/2020-may-be-the-hottest-year-on-record-heres-the-damage-it-did

accidents, vehicle crashes, as a direct result of other disasters (e.g., a flood or earthquake), or as a deliberate act.

The threat that hazardous materials pose to human health depends on the type of material, frequency, and duration of exposure, and whether chemicals are inhaled, penetrate the skin, or are ingested, among other factors. Exposure to hazardous materials can result in short- or long-term effects, including major damage to organs and systems in the body or death. Hazardous waste is any material with properties that make it dangerous or potentially harmful to human health or the environment. Hazardous materials can also cause health risks if they contaminate soil, groundwater, and air, potentially posing a threat long after the initial release.

As part of this analysis, the City also identified the potential environmental justice issues associated with hazardous materials. The mapping prepared in this analysis uses the CalEnviroScreen data set from the California Environmental Protection Agency (Cal EPA).[33] This dataset helps identify California communities most affected by many pollution sources and where people are often especially vulnerable to pollution's effects. The dataset uses environmental, health, and socioeconomic information to produce scores for every census tract in the state that is mapped using a scale based on the location's pollution burden. The higher the percentage, the greater the burden and the higher likelihood of environmental justice concerns.

Location and Extent

Hazardous materials and chemicals are used daily in households and businesses throughout Ontario. In addition to the locations of large industrial uses, sources of hazardous materials can originate from seemingly harmless places such as service stations, dry cleaners, medical centers, and almost any industrial business. Hazardous waste can take the form of liquids, solids, contained gases, or sludge, and can be the by-products of manufacturing processes or simply discarded commercial products, like cleaning fluids and pesticides. Figure 3-7 identifies the locations of the hazardous material facilities within the City registered in the Environmental Protection Agency's Facility Registry Service (FRS). The FRS is a centrally managed database that identifies facilities, sites, or places subject to environmental regulations or of environmental interest. These facilities include anything from grocery stores to gas stations. These locations have been overlayed on the CalEnviroScreen dataset that identifies California communities by census tracts disproportionately burdened by and vulnerable to multiple pollution sources. Figure 3-8, taken from the 2050 Ontario Plan Safety Element, displays the current hazardous material cleanup sites with open cases in Ontario, including sites with an active or unresolved status.

[33] California Office of Environmental Health Hazard Assessment. 2018. CalEnviroScreen 3.0 (updated June 2018). https://oehha.ca.gov/calenviroscreen/report/calenviroscreen-30

In severe situations, Ontario may also be at risk of hazardous materials release events regionally. With the right prevailing wind conditions, airborne toxic material could spread to and impact various parts of the air basin, including Ontario areas.

Past Events

Ontario has experienced an average of 66.82 hazardous materials spills annually (2010-2021), reported to the Cal OES Spill Release Reporting database. Most of these incidents involve sewage and petroleum products. **Table 3-14** identifies the yearly releases reported to Cal OES during this period.

Table 3-14: Ontario Spill Release Reporting

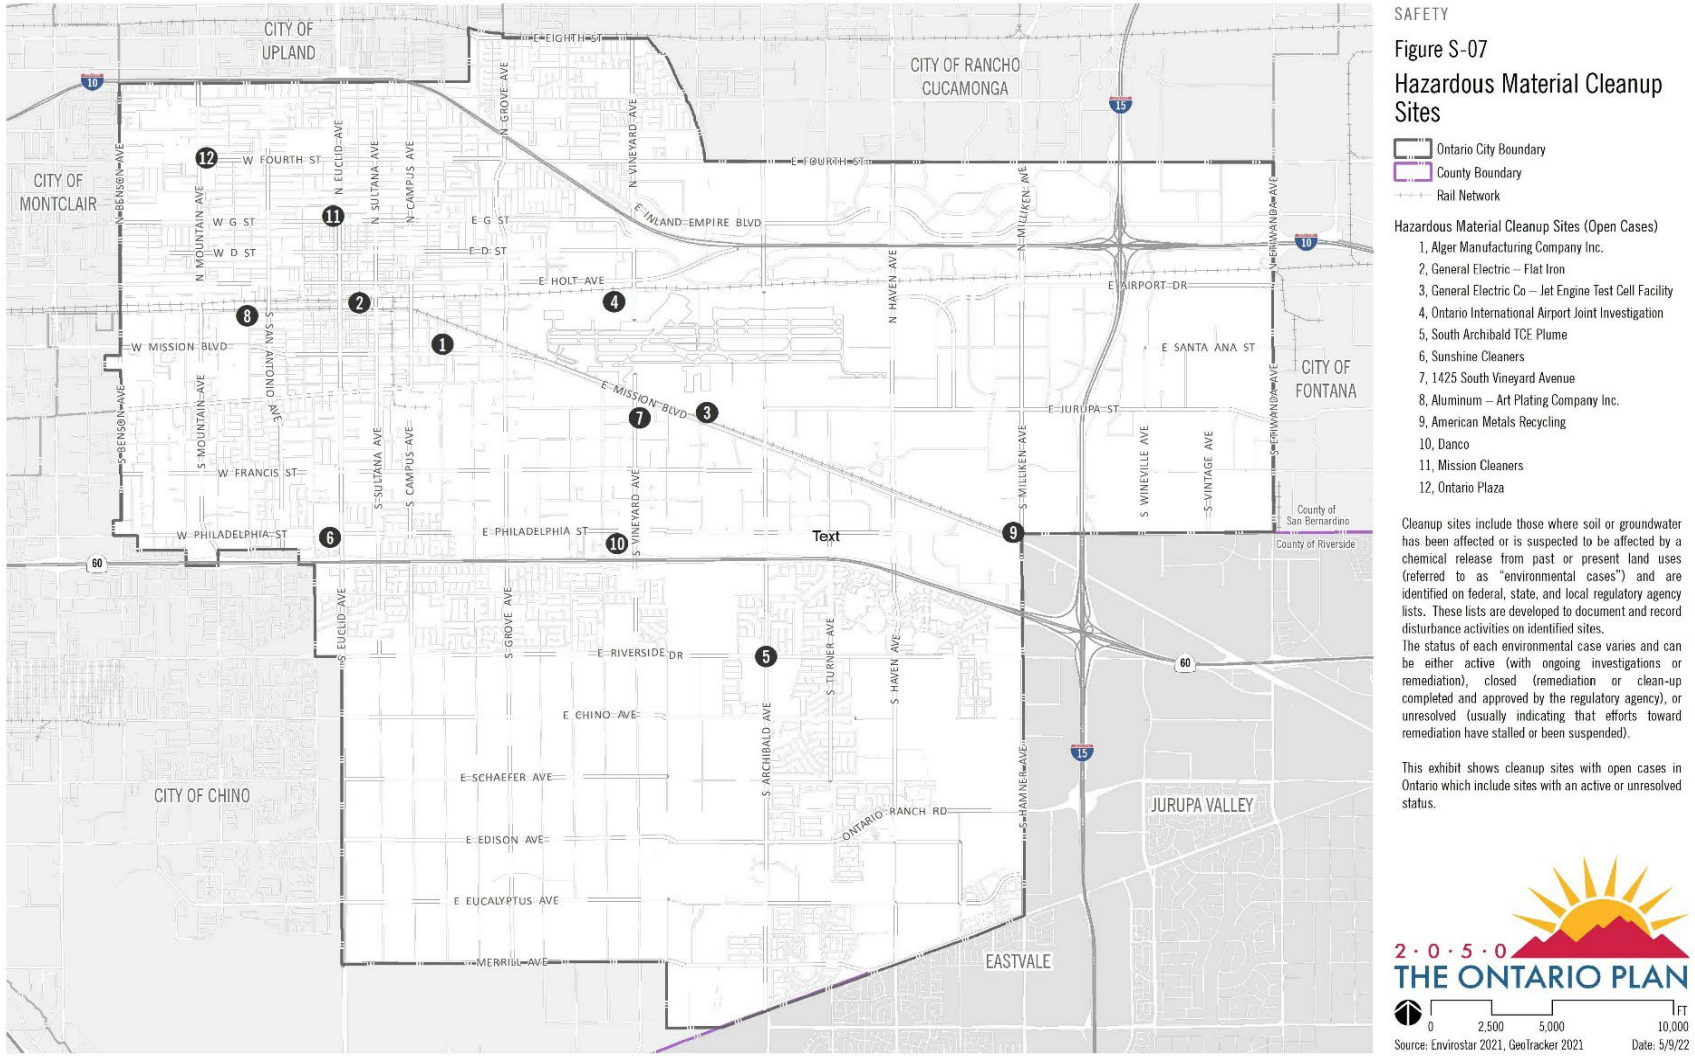
2010	29
2011	35
2012	34
2013	28
2014	42
2015	75
2016	132
2017	106
2018	99
2019	87
2020	68
2021	28
Annual Avg	**66.82**

Source: https://www.caloes.ca.gov/cal-oes-divisions/fire-rescue/hazardous-materials/spill-release-reporting

Risk of Future Events



Most of the release events within Ontario have occurred due to human error, malfunctioning equipment, or deliberate acts. Given this, it is anticipated that future events within the City will include minor incidents like the past occurrences identified. Based on the historical average data provided by Cal OES in **Table 3-14**, the City can expect approximately 5.6 reported spills per month.

Cleanup sites include those where soil or groundwater has been affected or is suspected to be affected by a chemical release from past or present land uses (referred to as "environmental cases") and are identified on federal, state, and local regulatory agency lists. These lists are developed to document and record disturbance activities on identified sites.
The status of each environmental case varies and can be either active (with ongoing investigations or remediation), closed (remediation or clean-up completed and approved by the regulatory agency), or unresolved (usually indicating that efforts toward remediation have stalled or been suspended).

This exhibit shows cleanup sites with open cases in Ontario which include sites with an active or unresolved status.

CLIMATE CHANGE CONSIDERATIONS

Climate-related natural hazard events, such as an intense flood, could cause hazardous materials releases. These releases could occur due to traffic accidents associated with inclement weather, flooded roadway conditions, or leakage from storage containers due to intense weather events. Climate-related hazards could also exacerbate the effects and impacts of such events. For example, heavier rains could lead to more runoff from contaminated sites. Extreme heat could affect the storage of hazardous materials and is also a concern for the combustibility of these materials. These issues should be monitored during the 5-year implementation period of this plan.

Urban Fire

DESCRIPTION

An urban fire is a fire that causes damage to buildings or infrastructure in an urbanized area. In some minor situations, the fire prompts the evacuation of the building's occupants, and the fire is contained within a short amount of time by firefighting teams or the building's fire suppression systems. In severe cases, the fire destroys the building and can spread to other surrounding properties. Common causes of urban fires include stoves that are accidentally left on, short-circuited electrical equipment, improper storage of combustible materials, or mishandling household tools. Breaches in gas pipelines, large transportation accidents, or downed electrical transmission wires may cause larger urban fires. Fires can also be intentionally started by arsonists.

LOCATION AND EXTENT

Most of Ontario's buildings consist of wooden-frame construction, which is susceptible to catching fire. Even structures that do not have wooden frames, such as large medical facilities or office towers, are at risk of urban fires. These locations contain furniture, papers, plant material, textiles, and other objects that can be ignited. Given that significant portions of the City are developed, urban fires can occur almost anywhere where structures and vegetation can burn.

Fires are also likely to occur where there are major pieces of infrastructure, such as gas pipelines, power lines, or highways. SoCalGas operates large high-pressure gas pipelines within the city. The northernmost pipeline roughly parallels 4th Street, while the other pipeline enters the northeast corner of the city boundary and crosses under the I-10, I-15, and SR-60 as it exits the city to the southwest, finally crossing under Euclid Ave. If this pipeline were to breach and the released gas ignites, any structures located along the extent of the breach would likely catch fire.

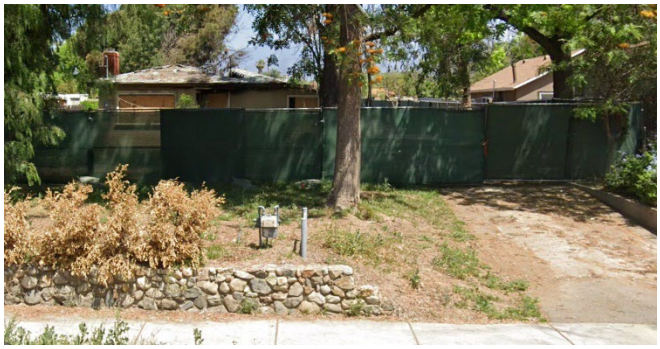
SoCal Edison also owns and operates above-ground, high-voltage transmission lines strung from poles within rights-of-way through the city. While there are no structures directly beneath these utility poles in most cases, there are still adjacent structures, trees/ vegetation, vehicles, and areas that contain items that could ignite if a downed power line encountered them. If any of these locations sparked a fire, it could spread to surrounding homes and buildings or produce cinders that could be transported to other locations igniting new fires. Fires could also occur along major transportation routes like

many of the large roadways within the City or the I-10, I-15, and SR-60 that run through the city carrying thousands of vehicles daily. While most fires occurring on these transportation routes could be destructive, it is not likely that these types of incidents would impact neighboring properties or spread great distances away from the point of origin. However, in areas of the City where vegetation is located along the edge of transportation routes, the possibility for fire spread increases.

For a fire to occur, the following three elements are required: heat, fuel, and oxygen. If any one of these elements is removed, the fire will extinguish itself. In Ontario, there is abundant fuel given the thousands of structures and flammable objects contained in each of them, and oxygen is nearly always present in most situations. Activity that creates intense heat that is unmonitored or unregulated may lead to the ignition of a fire. The National Institute of Fire and Technology has developed a scale that measures the temperature increase and the kind of fire response that develops. **Table 3-15** shows the progression of temperature relative to fire response.

Once a fire has been ignited, it could conceivably grow to an indefinite size if abundant fuel and oxygen are available. For example, a fire that ignites in one house could hypothetically continue to expand and even spread to other adjacent houses if there was enough fuel to link the structures together. Fires in confined spaces may occasionally burn so intensely that they consume all the oxygen available to them and burn out before expanding.

Table 3-15: Fire Susceptibility Based on Temperature Increase



Temperature (°F)	Response
98.6 °F	Average normal human oral/body temperature.
101 °F	Typical body core temperature for a working firefighter.
109 °F	Human body core temperature that may cause death.
111 °F	Human skin temperature when pain is felt.
118 °F	Human skin temperature causing a first-degree burn injury.
130 °F	Hot water causes a scald burn injury with a 30-second exposure.
131 °F	Human skin temperature with blistering and second-degree burn injury.
140 °F	Temperature when burned human tissue becomes numb.
162 °F	Human skin temperature at which tissue is instantly destroyed.
212 °F	Temperature when water boils and produces steam.
482 °F	Temperature when charring of natural cotton begins.
>572 °F	Modern synthetic protective clothing fabrics begin to char.
≥752 °F	Temperature of gases at the beginning of room flashover.
≈1832 °F	Temperature inside a room undergoing flashover.

Source: National Institute of Fire Technology. July 2018. *Fire Dynamics*

Past Events

The following are some of the major urban fires that have occurred in the past in Ontario:

- **2007 Walker Fire –** 166 acres of mainly dairy pasture is burned in the city.
- **October 2016, JC Horizon Recycling Center Fire –** Major blaze burned for three days at the JC Horizon recycling facility when the large store of paper and cardboard caught fire, billowing black smoke into the sky.
- **April 2019, JC Horizon Recycling Center Fire #**2 **–** Another major blaze burned for two days at the JC Horizon facility, the cause of this second fire was undetermined. This facility sits near train tracks, and rail traffic was diverted around.
- **August 2019, Commercial Fire –** a large fire ripped through a commercial building in Ontario, prompting firefighters to respond and contain the blaze.
- **March 16, 2021, Fireworks Explosion** – a cache of illegal fireworks stored at a house in Ontario exploded, resulting in two deaths, $3.2 million in damages to 40 homes, and causing fires in the affected and surrounding structures.

- **January 2022, Warehouse Fire –** Large tire warehouse catches a blaze in Ontario; most of the building was considered a total loss, as well as the majority of contents inside.
- **August 2022, Commercial Fire –** a fire began outside of a large commercial building, quickly spreading to the interior of the building, where workers managed to escape without injury after they heard explosions. Wooden pallets and raw plastic materials fueled the fire.

Risk of Future Events

If the conditions for an urban fire exist in Ontario, the city will forever be at risk of experiencing an urban fire event. Given how each fire event has unique origins, it is impossible to predict the precise location or likelihood of an urban fire emerging in the city. Some areas, however, are at an increased risk of an urban fire igniting, such as areas where structures are poorly maintained, locations where vegetation is overgrown, properties storing materials improperly, and/or structures located in close proximity to infrastructure and assets that may be at risk of ignition.

Climate Change Considerations

While climate change has been linked to a potential increase in wildfire events, it is unclear exactly how climate change could influence the ignition or behavior of urban fires in Ontario. Extreme heat events could be linked to increase ignition either due to hotter conditions within the City that lead to drier vegetation or use of infrastructure that could become overloaded and fail (causing sparks). If these conditions occur, urban fire risk could increase over time.

Dam Failure/Inundation

Description

Dam and levee failure can result from several causes, such as earthquakes, rapidly rising floodwaters, and structural design flaws. These hazards can occur instantaneously or very gradually, depending on the source of the failure. Inundation associated with these events can potentially cause loss of life, damage property, and other ensuing hazards, as well as the displacement of persons residing in the inundation path.

According to the California Division of Safety of Dams (DSOD), a dam falls under their jurisdiction if its height is greater than 6 feet and impounds more than 50 acre-feet of water or its height is greater than 25 feet and impounds 15 acre-feet of water. Based on these criteria, 1,537 dams fall under DSOD jurisdiction, 39 of which are located within San Bernardino County.

Location and Extent

There are dams that provide flood protection and water storage north of the City. Failure of these dams would potentially inundate parts of the City as depicted **Figure 3-9. Exhibit A** depicts the location of these dams in relation to the city. These dams include:

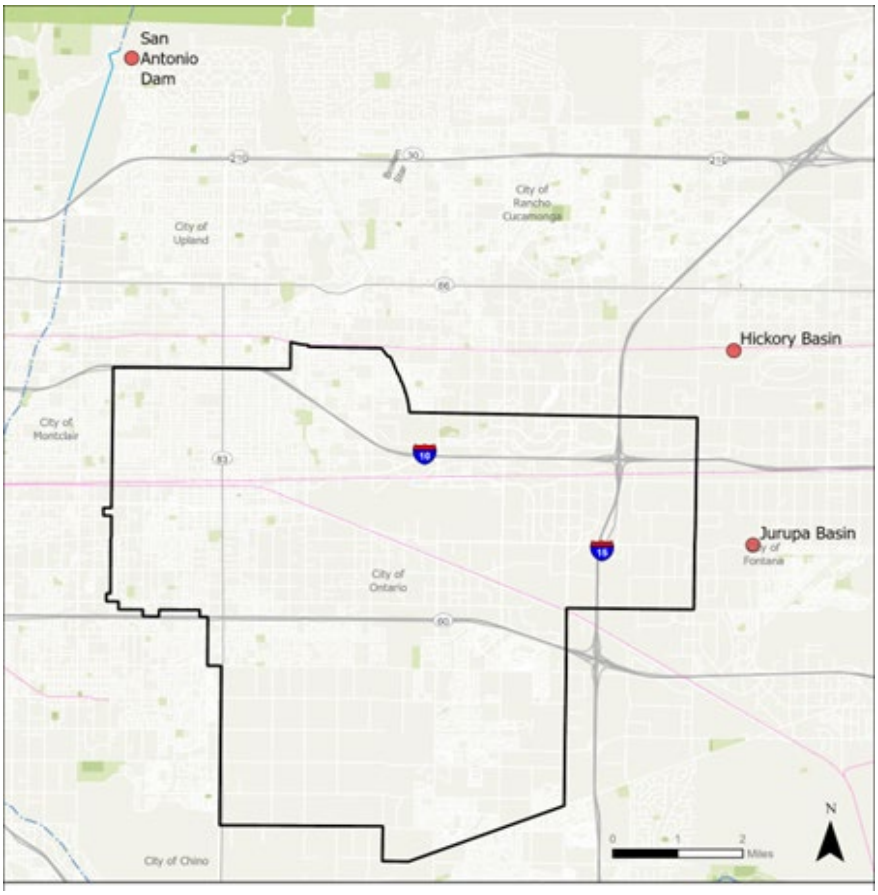


Exhibit A: Location of Dams in Relation to Ontario

Jurupa Basin, which is a 29-foot-high earthen dam built in 2001 by the County of San Bernardino Department of Public Works. With a 7,000-foot crest length, this dam impounds up to 1,680-acre feet of water and is considered to have an extremely high downstream hazard classification.

Hickory Basin, which is a 19-foot-high earthen dam built in 2001 by the County of San Bernardino Department of Public Works. With a 4,600-foot crest length, this dam impounds up to 220-acre feet of water, a significant downstream hazard, built in 2001.

San Antonio Dam - is an embankment flood control and debris dam located along San Antonio Creek in San Bernardino County, approximately 6.5 miles northwest of Ontario. Dam construction was completed in 1956 and is owned and maintained by the U.S. Army Corps of Engineers (USACE), which continues to monitor and improve the structure. The dam is 3,850 feet long, 160 feet above the foundation, and 130 feet above the riverbed. The main embankment contains 6,050,000 cubic yards of material. The reservoir behind the dam is usually dry but can fill with up to 11,880 acre-feet of water after large flooding events. Dams owned and maintained by the USACE use the Dam Safety Action Classification (DSAC) rating system, displayed in **Table 3-17**. San Antonio Dam is classified as a High Urgency of Action dam by the USACE.

Table 3-16 identifies the significance of these downstream classifications.

Table 3-16: California Department of Water Resources Division of Safety of Dams – Downstream Hazard Classifications

Downstream Hazard Potential Classifications	Potential Downstream Impacts to Life and Property
Low	No probable loss of human life and low economic and environmental losses. Losses are expected to be principally limited to the owner's property.
Significant	No probable loss of human life but can cause economic loss, environmental damage, impacts to critical facilities, or other significant impacts.
High	Expected to cause loss of at least one human life.
Extremely High	Expected to cause considerable loss of human life or would result in an inundation area with a population of 1,000 or more.

Table 3-17: Dam Safety Action Classification (DSAC) Rating System

URGENCY OF ACTION (DSAC)	ACTIONS FOR DAMS IN THIS CLASS***	CHARACTERISTICS OF THIS CLASS
VERY HIGH (1)	Take immediate action to avoid failure. Communicate findings to sponsor, local, state, Federal, Tribal officials, and the public. Implement interim risk reduction measures, including operational restrictions. Ensure the emergency action plan is current and functionally tested for initiating event. Conduct heightened monitoring and evaluation. Expedite investigations to support remediation using all resources and funding necessary. Initiate intensive management and situation reports.	CRITICALLY NEAR FAILURE: Progression toward failure is confirmed to be taking place under normal operations. Dam is almost certain to fail under normal operations to within a few years without intervention. OR EXTREMELY HIGH INCREMENTAL RISK**: Combination of life or economic consequences with likelihood of failure is very high. USACE considers this level of life-risk to be unacceptable except in extraordinary circumstances.
HIGH (2)	Communicate findings to sponsor, local, state, Federal, Tribal officials, and the public. Implement interim risk reduction measures, including operational restrictions as warranted. Ensure the emergency action plan is current and functionally tested for initiating event. Conduct heightened monitoring and evaluation. Expedite confirmation of classification. Give very high priority for investigations to support the need for remediation.	FAILURE INITIATION FORESEEN: For confirmed and unconfirmed dam safety issues, failure could begin during normal operations or be initiated as the consequence of an event. The likelihood of failure from one of these occurrences, prior to remediation, is too high to assure public-safety. OR VERY HIGH INCREMENTAL RISK**: The combination of life or economic consequences with likelihood of failure is high. USACE considers this level of life-risk to be unacceptable except in extraordinary circumstances.
MODERATE (3)	Communicate findings to sponsor, local, state, Federal, Tribal officials, and the public. Implement interim risk reduction measures, including operational restrictions as warranted. Ensure the emergency action plan is current and functionally tested for initiating event. Conduct heightened monitoring and evaluation. Prioritize investigations to support the need for remediation informed by consequences and other factors.	MODERATE TO HIGH INCREMENTAL RISK**: For confirmed and unconfirmed dam safety issues, the combination of life, economic, or environmental consequences with likelihood of failure is moderate. USACE considers this level of life-risk to be unacceptable except in unusual circumstances.
LOW (4)	Communicate findings to sponsor, local, state, Federal, Tribal officials, and the public. Conduct elevated monitoring and evaluation. Give normal priority to investigations to validate classification, but do not plan for risk reduction measures at this time.	LOW INCREMENTAL RISK**: For confirmed and unconfirmed dam safety issues, the combination of life, economic, or environmental consequences with likelihood of failure is low to very low and the dam may not meet all essential USACE guidelines. USACE considers this level of life-risk to be in the range of tolerability but the dam does not meet all essential USACE guidelines.
NORMAL (5)	Continue routine dam safety activities and normal operations, maintenance, monitoring, and evaluation.	VERY LOW INCREMENTAL RISK**: The combination of life, economic, or environmental consequences with likelihood of failure is low to very low and the dam meets all essential USACE guidelines. USACE considers this level of life-safety risk to be tolerable.

*At any time for specific events a dam, from any action class, can become an emergency requiring activation of the emergency plan.
** INCREMENTAL RISK is used to inform the decision on the DSAC assignment; NON-BREACH RISK is not reflected in this table.
***DSAC 1 and 2 dams with no life loss will be referred to the appropriate business line program and are given lower priority in the dam safety program.

Past Events

Despite some significant flooding events in the late 1800s and early 1900s, including one in 1862 that wiped out the tiny Santa Ana River hamlet of Agua Mansa near present-day Colton, regional flood management and mitigation wasn't given a great deal of consideration in San Bernardino County until the Great Flood of March 1938. That deluge claimed 14 lives, left hundreds homeless, and caused an estimated $12 million ($220 million in 2020 dollars) in property damage.

In 1939, the State Legislature passed the San Bernardino County Flood District Act, which empowered the County to begin developing regional flood protection facilities to protect life and property. Today, San Bernardino County Flood Control operates and maintains 14 dams, 119 basins, 82 levees, and more than 250 miles of flood control channels. The dams, levees, and channels are designed to convey runoff around homes and businesses in the valley safely.[34]

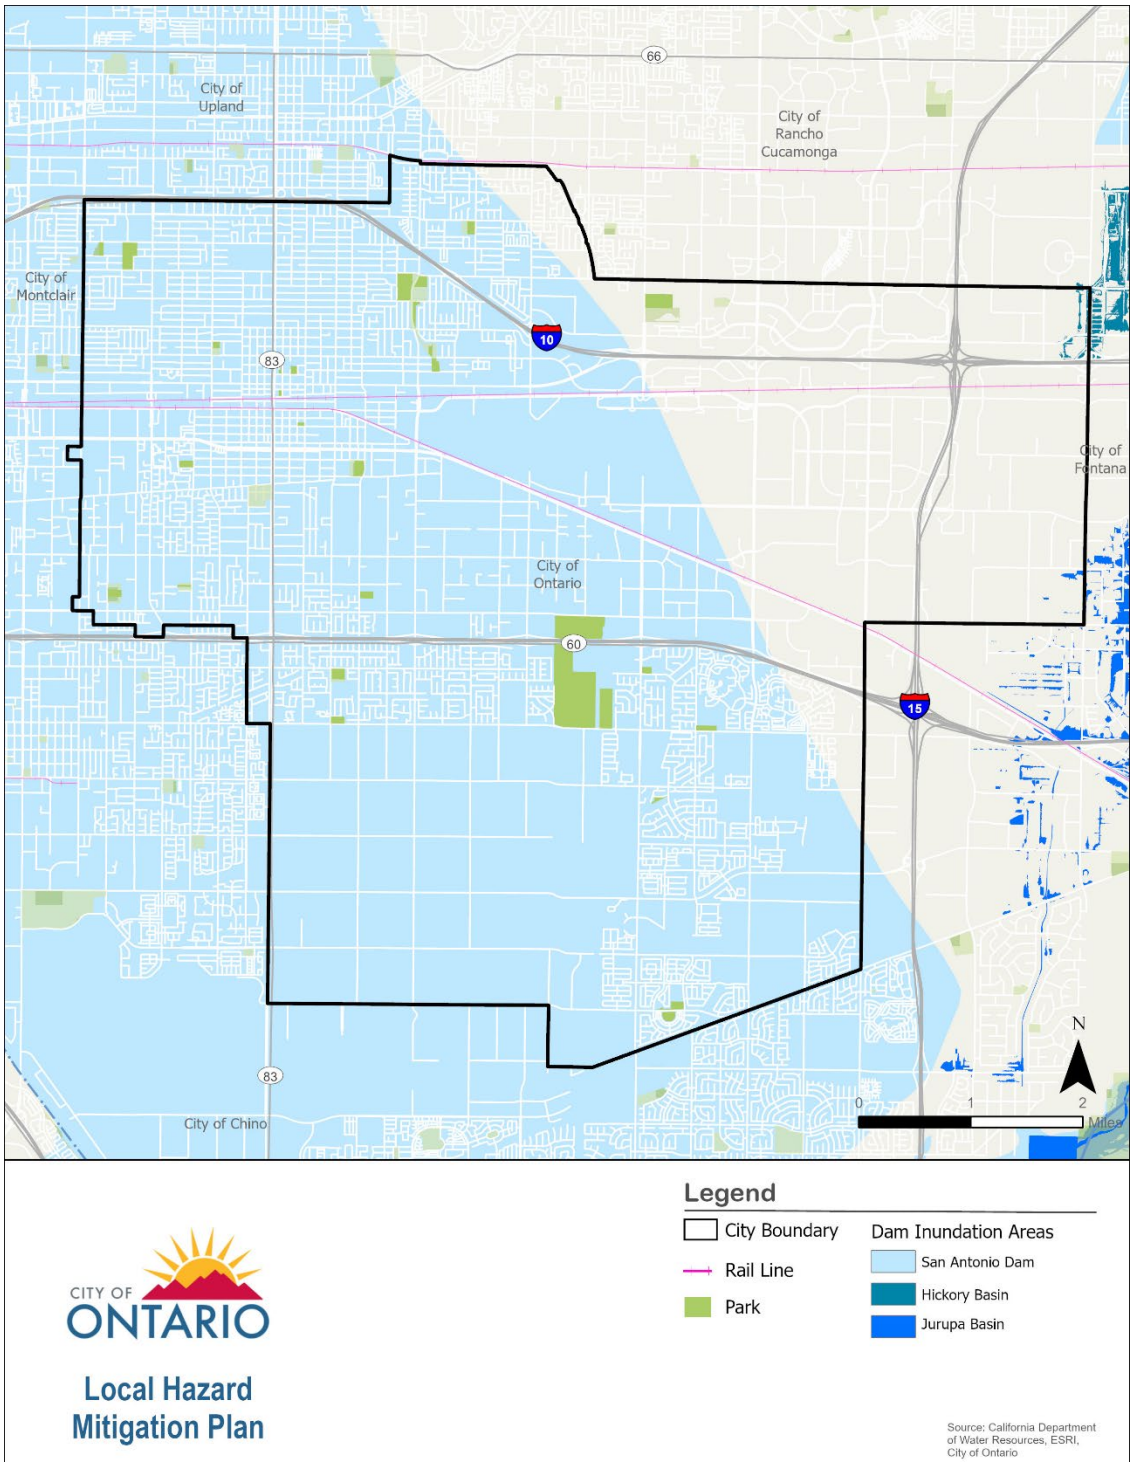
[34] Ibid.

Risk of Future Events

With the adoption of SB 92 in 2017, new dam safety requirements mandate that dam owners map the downstream inundation areas for dams governed by the California Department of Water Resources (DWR). In addition to the mapping, owners must prepare Dam Emergency Action Plans that identify the emergency management plans and procedures in place for these facilities. **Figure 3-9** identifies the inundation areas mapped for dams upstream from the City. For inundation to occur, as depicted in this map, it is assumed the reservoirs behind these dams are full, and failure occurs suddenly, releasing water in a relatively short amount of time. Failures typically occur from an earthquake, erosion, design flaw, or water overflow condition during intense storms.

Climate Change Considerations

Overall, engineers say that most dams that were built decades ago in the United States are unsuited to a warmer world and stronger storms.[35] Some recent dam episodes have been shown to have a climate change link. In February 2017, at Oroville Dam in California, the tallest in the nation, heavy mountain runoff into the reservoir led to an emergency spillway near failure and severe damage to the main spillway. Nearly 200,000 people were evacuated as a precaution, and repairs cost more than $1 billion. A later study found that an increase in early-season Sierra Nevada runoff contributed to the dam's high-water levels. This early season runoff can be attributed to human-caused warming. [36]



In addition to short-duration extreme precipitation, rainfall of longer duration but less intensity—an overall wetter climate, which climate models forecast for parts of the United States in the coming decades—can contribute to the risk.[37] Overall, the main consideration will be the weather patterns and how rainfall will affect the city and the county, as many of the catch basins and dams in the region connect multiple cities and counties.

Figure 3-9: San Antonio Dam Inundation Zones

Human-Caused Hazards

(Terrorism, Transportation Incident, Communications Failure)

Description

Terrorism

Terrorism is the use or threat of force to achieve a particular social or political outcome. The goals of terrorism may sometimes be overturning a government, the reversal of a public policy, political prisoners' release, and other such motives. Acts of terror may overlap with acts of war or hate crimes. Generally, terrorism involves an attempt to kill or seriously harm people or disrupt civil society by destroying property or infrastructure, attacking government operations at all levels, interrupting essential public services, creating chaos, or a combination of some or all these goals. Firearms and explosives are the most common weapons used among terrorists. In extreme situations, terrorists may gain access to mass destruction weapons, including bioweapons, chemical agents, radioactive materials, or high-yield explosives. It should be noted that these events are infrequent. While incidents of terror caused by foreign individuals or groups receive significant media and public attention, most acts of terror in the United States have been caused by domestic terrorists.

A mass casualty incident describes an incident within the United States where emergency medical service resources, such as personnel and equipment, are overwhelmed by the number and severity of casualties. The more commonly recognized events of this type include building collapses, train and bus collisions, plane crashes, earthquakes, and other large-scale emergencies. The most common types are generally caused by terrorism, mass transportation accidents, or natural disasters. Events such as the Oklahoma City bombing in 1995, the September 11 attacks in 2001, and the 2017 Las Vegas Shooting are well-publicized examples of mass casualty incidents.

Transportation Incident

A transportation incident is a crash or other failure involving a vehicle, including a car, truck, or train. This can result from the vehicle operator making an error or environmental conditions preventing the vehicle from being safely maneuvered. Examples of transportation accidents include automobile crashes, freight truck collisions, and train crashes or derailments. It should be noted that small-scale incidents, such as minor collisions between automobiles, would not count as a hazard. Large-scale collisions involving multiple vehicles that shut down a freeway interchange or key underpass could present a hazard to Ontario as it could hinder first responders from reaching victims or prevent residents from evacuating quickly.

Communications Failure

The complete or partial failure of a component or components in a communications network because of malfunction (system, equipment, or infrastructure failure/degradation), natural hazards, or human-caused hazards.

Modern communications systems, such as fiber optic broadband, keep communities connected. In times of crisis, it is even more important for communities to have efficient

and effective abilities to communicate information and resilient communications systems in the wake of natural and human-caused hazards or disasters.

- Before a disaster (such as forecastable extreme weather events), these systems can broadcast warning information about what is happening and allow residents and businesses to act and potentially mitigate the effects of the hazard.
- During an emergency or disaster, these systems allow essential communications services to keep critical local and government services such as first responder dispatch, evacuation instructions, and situational update reports, and allow health care services to keep running effectively.
- After a disaster, communications systems can provide a way for people to connect to important resources or declare their safety through emergency calls, text messages, or even social media updates.

Location and Extent

Terrorism

Mass Casualty Incidents can occur anywhere, although public spaces and locations where many people congregate (parks, schools, places of worship, government facilities, shopping centers, and public gathering areas) are most common. Critical locations in Ontario may be the Ontario International Airport, large shopping centers (i.e., Ontario Mills), governmental facilities (i.e., City Hall), Toyota Arena, universities and colleges, schools, medical facilities (i.e., Kindred Hospital), parks (i.e., Cucamonga-Guasti Regional Park), and large employers within the city.

Acts of terrorism may be located at the locations listed above; however, the perpetrators may also choose high-value targets such as electric-generating facilities, water treatment plants, dams or reservoirs, railroads, highways, and other facilities that could impact governmental operations and services. Mass Casualty Incidents and acts of terrorism are typically measured by the fatalities, injuries, and destruction they cause, but there is no universally used scale for measuring these events.

Transportation Incident

Major arterial streets like Euclid Ave (US-83), Mission Blvd, Milliken Ave, Haven Ave, Grove Ave, Archibald Ave, and 4th St accommodate a large amount of traffic circulation through the city. These roadways, in addition to the major interstates/ state routes (SR-60, I-10, I-15), accommodate the local and regional transportation needs throughout Ontario and San Bernardino County. The system of railroad infrastructure, which includes both passenger and commercial transportation, are also potential sites for accidents and hazardous materials release. The presence of the Ontario International Airport, which serves as a passenger destination and doubles as the West Coast air hub for delivery services (i.e., UPS, FedEx, and Amazon Air), only increases the potential for transportation incidents. Any one of these major transportation corridors and locations could be the site of transportation accidents that could affect the community and the surrounding areas. Generally, the scale used to measure transportation accidents is the amount of damage to the vehicle, buildings, or infrastructure and the level of injury and/or death caused to people.

Communications Failure

Communication systems connect the entire city, and because of this, no portion of the city is more or less vulnerable to a communications system failure. The exception is any portion of the city where communications system infrastructure isn't as prevalent or established. Any failure of communications systems could affect the entire city, however depending on the type of failure impacts could be isolated to certain systems or locations. Natural hazards such as earthquakes, flooding, and wildfires can jeopardize communications systems by compromising their infrastructure and power supplies. Human-caused hazards such as terrorism, hazardous material releases, or cyber-attack could have the same effect on systems infrastructure. Considering such impacts in hazard mitigation planning and projects can bolster a community's communications systems before the next disaster hits.

Past Events

Terrorism

The city has been fortunate not to have experienced any acts of terrorism directly. However, the following acts of terrorism/mass casualty incident events have occurred within San Bernardino County, California, and the Country:

- **1970** - Bombing of the Stanford Research Institute facility, which caused approximately $500,000 in property damage. No injuries or deaths occurred during this incident. [38]
- **1970** - Bombing of a Bank of America Branch, which caused approximately $500,000 in property damage. No injuries or deaths occurred during this incident. [39]
- **April 1995** - Timothy McVeigh detonated a bomb outside the Alfred P. Murrah Federal Building in Oklahoma City, OK. The blast was so powerful that the Federal Building was destroyed, and more than 300 nearby buildings were damaged or destroyed. The bombing killed 168 people, including 19 children. Timothy McVeigh's motive for bombing the Federal Building was to inspire a revolution against the federal government. [40]
- **September 11, 2001** -Terrorists hijacked four commercial airliners. The hijackers flew two planes into the twin towers at the World Trade Center in New York City and one into the Pentagon in Arlington, VA. The fourth plane crashed in a field in rural Pennsylvania. The attacks on 9/11 killed 2,976 people and injured thousands more. [41]
- **April 15, 2013** - Two bombs detonated near the finish line of the Boston Marathon. The explosion killed 3 spectators and wounded more than 264 other people. Police captured 19-year-old Dzhokhar Tsarnaev in connection with the bombing; the second suspect, Tamerlan Tsarnaev, died following a shootout with law

[39] Global Terrorism Database. 2020. "1970-10-26". https://www.start.umd.edu/gtd/search/IncidentSummary.aspx?gtdid=197010260001
[40] Federal Bureau of Investigation. Famous Cases and Criminals. https://www.fbi.gov/history/famous-cases/oklahoma-city-bombing
[41] Federal Bureau of Investigation. Famous Cases and Criminals. https://www.fbi.gov/history/famous-cases/911-investigation

enforcement. Investigators concluded that the Tsarnaev brothers planned and carried out the attack independently and were not connected to any specific terrorist group. [42]

- **2014** - A teenager who had reportedly threatened terrorist action against the U.S. Open of Surfing event attendees was arrested. [43]
- **May 2015** - Two Anaheim-based men were arrested at a Transportation Security Administration checkpoint at the Los Angeles International Airport who had reportedly sworn allegiance to the Islamic State of Iraq and Syria (ISIS). One of these men, Muhanad Badawi, was a student at Fullerton College. [44]
- **December 2015** - A mass shooting and terrorist attack committed by a married couple who had reportedly sworn allegiance to ISIS killed 14 people at a medical facility in the city of San Bernardino. [45]
- **October 2017** - Stephen Paddock opened fire on the Route 91 Harvest Festival concert from an elevated position at the Mandalay Bay Hotel in Las Vegas. The attack resulted in 58 people killed and 851 injured. Paddock shot and killed himself before responding officers reached him. The FBI Behavioral Analysis Unit determined no clear motivation for the attack. Although this attack did not occur in California, many California residents were affected by the event as more than half the 58 people killed were from California. Off-duty Ontario Police Officer Michael Gracia, who was critically injured after being shot in the head; thankfully he survived and has since returned to duty. [46]
- **May 2022** – Payton S. Gendron opened fire with an illegally modified semi-automatic rifle at the Tops grocery store in Buffalo, New York. Ten people were killed and three were wounded in the attack. Gendron plead guilty to terrorism and murder charges in the attack and was sentenced to life without the chance of parole. According to a document written by Gendron, the shooting was racially motivated, and he chose the location because it was in a particular area of the city that had the highest percentage of African Americans. [47]

TRANSPORTATION INCIDENT

The city experiences vehicle transportation incidents daily; however, the severity and resulting injuries and fatalities vary. According to statistics gathered by City-Data.com, there is an average of 14 fatal motor vehicle accidents per year in the city. The following are examples of some transportation incidents in the city:

- **December 1993** – A man was struck and killed by a Metrolink train while walking on the tracks near the Ontario International Airport.

- **June 2011** – a female pedestrian was struck and killed by a Union Pacific train.
- **May 2017** – a man was struck and killed by a train while sitting on a cement curb next to the Union Pacific tracks under the Euclid Ave overpass.
- **July 2021** – A man was killed when he collided with a tractor-trailer and another vehicle on the I-15 in Ontario.
- **June 2020** – A semi-truck collided with a vehicle forcing it into the rear end of another semi-truck, fatally injuring a man, woman, and minor passenger.
- **September 2021** - One person was killed when a semi-truck collided with the rear of another semi-truck on the SR-60 freeway.
- **October 2022** – A woman was killed after a collision between her vehicle and a semi-truck on SR-60.
- **August 2021** – A pilot was taken to the hospital with minor injuries after making an emergency landing in an empty field near Ontario Ranch.

Transportation incidents can also include the release of hazardous materials depending upon the materials being transported through and within the City.

Communications Failure

No incidents of past communications failure have occurred within the City. While this may be the case today, there is always a risk that future failures may occur, which could significantly impact City functions and operations.

Risk of Future Events

Terrorism

Given that mass casualty incidents and acts of terrorism stem from a variety of factors: economics, societal pressures, mental health, global geopolitics, warfare, religion, etc.—it is impossible to predict when and where an incident could occur. Ontario International Airport is a significant facility with state and national importance. While important, it is anticipated that any future incidents would likely originate domestically and are less likely to attract the attention of international terrorist groups. Incidents of these types are more likely to be conducted by smaller organizations or individuals aligned with greater-known organizations, although the effects may be no less significant. Given the presence of this facility as well as a convention center, sports arena, large shopping center, numerous schools, and large employers within the city, the potential does exist for mass-casualty incidents/acts of terrorism.

Transportation Incidents

It is a certainty that transportation accidents will continue. While it is possible to guard against such events and implement safety measures, it is impossible to prevent all future events. Due to the presence of Ontario International Airport, as well as the large volume of traffic on streets, highways, and railroad tracks in and around the City, the likelihood of future incidents is high. All of these incidents can occur with the potential to cause delays or detours to traffic in and around the city, cause damage to critical roadways/infrastructure, and, more importantly, injure or kill people.

Communications Failure

The potential for a communications failure will exist as long as the City relies on systems for these communication purposes. The risk of failure is anticipated to increase during emergency events. Infrastructure failure due to either natural or human-caused hazards will not diminish as infrastructure ages and the City's population increases. As technology advances, so too have the dependence upon modern communications systems, making this hazard a more prevalent concern for the City.

Climate Change Considerations

Terrorism

The link between mass casualty incidents/terrorism and climate change is not well understood. It has been suggested, however, that the impacts of a changing climate may exacerbate existing social, political, religious, and ethnic tensions. For example, longer, more intense droughts may restrict food supply or place limits on economic growth for cities, regions, or even whole countries. Nevertheless, the likelihood of climate change impacting mass casualty incidents/acts of terrorism in Ontario is negligible since these changes are more likely to impact developments on the national or international level.

Transportation Incidents

Climate change is not likely to impact transportation accidents in the future within Ontario.

Communications Failure

Climate change is not anticipated to directly impact communications failure. However, as previously mentioned, as technology advances and our dependence upon it grows, climate change could degrade unhardened infrastructure, potentially causing system failures to occur.

Chapter 4 – Threat and Vulnerability

The threat assessment process looks at the potential harm of each hazard event discussed in Chapter 3.

Threat Assessment Process

The threat assessment process analyzes the harm Ontario may experience from a hazard event but does not consider its likelihood, thus giving equal consideration to hazards that are more likely (e.g., earthquakes, flood) and less probable hazards (e.g., dam failure).

The threat assessment examines three aspects of each hazard: the physical threat to facilities, the social threat to vulnerable populations, and the threat to any other assets that may be affected.

Critical Facilities and Facilities of Concern

Critical facilities (CF) consist of properties and structures that play important roles in government operations and the services they provide to the community. Examples of CFs include local government offices and yards, community centers, public safety buildings like police and fire stations, schools, and other properties a city has deemed essential for its operations. Critical Facilities may also serve dual roles if a city designates them as public assembly points during an emergency. Critical Facilities are often owned by the City, but some may also be owned and operated privately, such as some utilities and telecommunication infrastructure. Facilities of concern (FOC) are similar to critical facilities, however they may not be owned by the City or their purpose and function is not as important to the function of the City after a disaster. These facilities are identified to ensure the City understands their potential vulnerability to the hazards of concern.

The HMPC identified a total of 195 facilities [118 CFs and 77 FOC] in Ontario that fall into 7 categories based on their function or characteristics. **Table 4-1** shows the number of CFs and FOC in each category, the total estimated replacement value for these facilities, and examples of the type of facility in each category. **Appendix D** has a complete list of the CFs and FOC used in this analysis. **Figure 4-1** shows the locations of CFs and FOC in Ontario that were mapped, however due to security concerns, some facilities were not mapped as part of this process.

The potential loss values identified in subsequent tables are based on the City's total insured value using the City's Insured Asset Inventory. It is intended to provide an estimate of the replacement cost if the property/ structure is completely or severely damaged. The actual costs of repair could be smaller or larger than the provided estimate. Since the data comes from the City's Insured Asset Inventory, any facilities not owned by the City will not have a replacement value listed. Where this occurs, "N/A" has been used within the table.

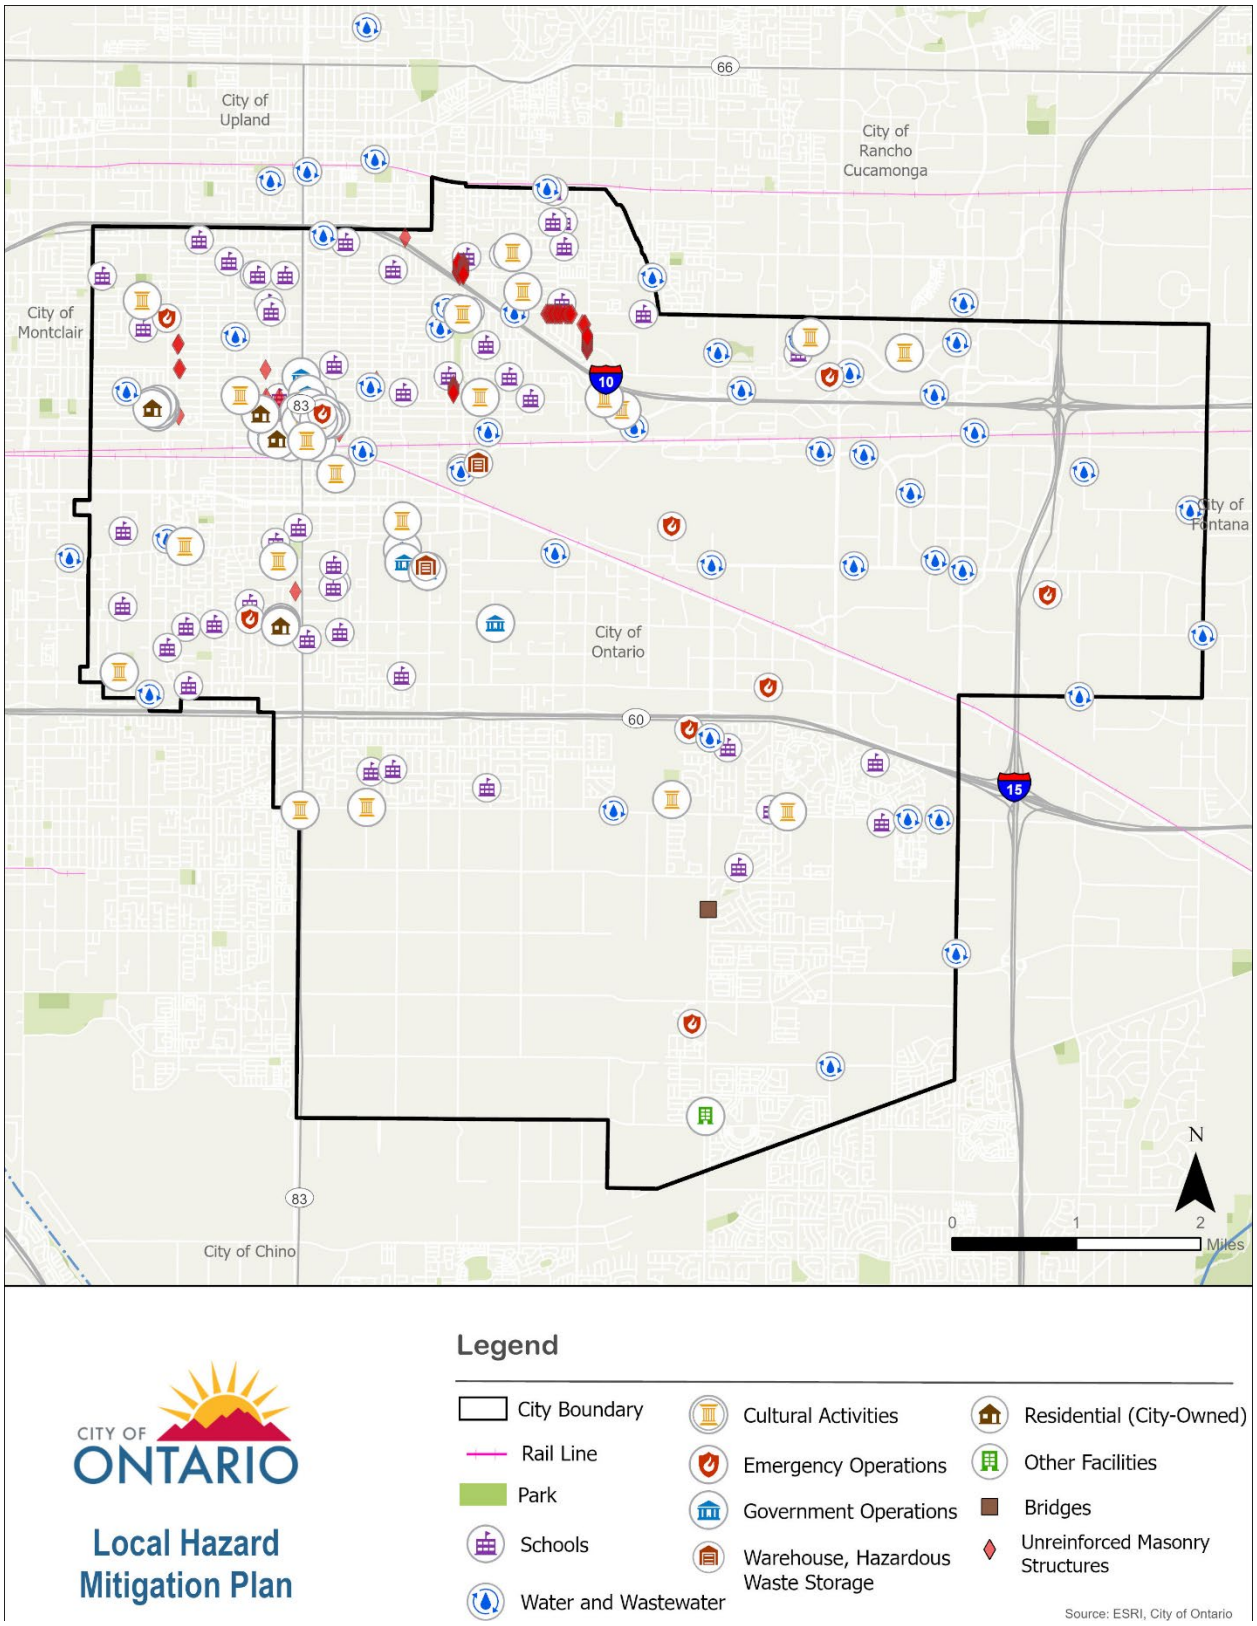
Based on the available data provided by the City, there is a minimum of $723,662,462 worth of City-owned assets that were analyzed. The total potential loss value of all City-owned and non-City-owned assets is much higher but is unknown due to data limitations.

The greatest potential for loss among City-owned assets comes from the Water and Wastewater Infrastructure inventory, which includes but is not limited to, reservoirs, pump stations, pump houses, and holding tanks located throughout the city. The next critical facility category with the greatest potential for loss would be Emergency Operations, which includes Police and Fire Department facilities and equipment, while Government Operations is the third highest potential loss among critical facilities.

The city owns and operates both Toyota Arena and the Ontario Convention Center; while not considered critical facilities to city function, they are major facilities of concern for the city, and combined, they represent a significant portion of insured assets. Both facilities could be used in emergency situations, such as evacuation centers, relief/aid stations, first responder staging points, or other facilities to assist with City operations. Another major facility of concern would be the Ontario International Airport which the City owns partially with San Bernardino County as part of the Ontario International Airport Authority.

To better understand the magnitude of impacts, this plan identifies representative percentages of potential impact based on the total valuation of City assets. For planning purposes, we identified different tiers of impact that could occur. It is reasonable to assume that impacts would not exceed 50% of the total asset value city-wide during a single event. The following are parameters to help understand how much a proposed investment/improvement compares to the existing assets within the City:

- 1% Impact - $7,236,624
- 5% Impact – $36,183,123
- 10% Impact – $72,366,246
- 20% Impact - $144,732,492
- 50% Impact - $361,831,231



The possibility that all facilities will be completely damaged simultaneously is extremely rare. Based on the hazard, most impacts are anticipated to be isolated to certain locations. This estimate does not include the value of underground infrastructure and surface drainage facilities owned and operated by the City.

Table 4-1: Critical Facilities and Facilities of Concern in Ontario

Category	Number of Facilities		Examples	Potential Loss
	Critical	Concern		
Government Operations, Modular	16	6	City Hall, City Hall East, City Hall Annex, Support Buildings, Corporate Yard, Hazardous Waste Facility, Modular Buildings	$32,427,589
Emergency Operations	19	0	Police Station, Fire Stations, Fire Equipment (Engines)	$101,685,766
Water and Wastewater Infrastructure, Pressure Reducing Systems	78	0	Reservoirs, Holding Tanks, Pump Houses/Stations, Booster Stations, Pressure Reducing Systems, etc.	$144,246,194
Recreational, Cultural, and Community Centers	4	43	Toyota Arena, Ontario Convention Center, Museums, Parks, Community Centers, etc.	$350,837,881
Warehouse, Household Hazardous Waste Storage	0	2	Fiber Optic Equipment, Warehouses, Various Buildings and Equipment.	$30,000,000
Residential	0	20	Residential Properties	$10,134,845
Other (Ontario International Airport, Fiber Optics, Various Equipment)	1	6	Partial Ownership with County of San Bernardino as part of Ontario International Airport Authority (No Value Provided), Fiber Optics, Various Equipment.	$54,330,187
Total	**118**	**77**	**---**	**$723,662,462**

*** Potential loss data are estimates only, as replacement values for some facilities were not available. Actual losses may be greater than the estimate presented in this table.**

Figure 4-1: Critical Facilities and Facilities of Concern

Vulnerable Populations

Factors such as age, physical and/or mental condition, socioeconomic status, access to key services, and many other factors affect the ability of people to prepare for and protect themselves and their property from a hazard event. Even though some hazard events may impact all parts of Ontario with equal severity, different people may experience the impacts differently. Higher-income households, for instance, are likely more able to afford the cost of retrofitting their homes to resist flooding or, alternatively, move to a location that is less prone to flooding than a lower-income household. As a result, the higher-income household is less likely to experience significant damage during a flood event than the lower-income household, even if the same amount of rain falls on both.

A social threat analysis examines how hazard events are likely to impact different demographic populations in Ontario and where these different demographic populations live in the city. This includes assessing whether the people in an area of an elevated hazard risk are more likely than the average person to be considered a threatened population. The social threat analysis uses the following criteria to assess the threat to vulnerable populations:

- **Disability status**: Persons with disabilities may often have reduced mobility and experience difficulties living independently. As a result, they may have little or no ability to prepare for and mitigate hazard conditions without assistance from others.

- **Income levels**: Lower-income households are less likely to have the financial resources to implement mitigation activities on their residences. They may also struggle with having the necessary time to find and access educational resources discussing hazard mitigation strategies. Furthermore, lower-income households are less likely to be able to move to safer areas that are less at risk of being impacted by a hazard. The national poverty limit standard for the U.S. for a four-person family is approximately an income of $26,500 or less. For San Bernardino County, the FY 2021 Low-Income Limit for a four-person family, according to the 2050 Ontario Plan Housing Element (HUD), is $63,200.

- **Seniors (individuals at least 65 years of age):** Seniors are more likely to have reduced mobility, physical and/or mental disabilities, and lower-income levels, all of which may decrease their ability to prepare for and mitigate a hazard event.

Table 4-2 shows the amounts of people in Ontario who meet at least one of the criteria for threatened, vulnerable populations. For more detailed demographic information, please refer to **Chapter 2**.

The social threat analysis also shows the threat other populations may encounter. For example, people experiencing homelessness or people without access to lifelines (vehicles or communication networks) may experience greater hardship in evacuating or recovering from a disaster. Since data for these groups are not readily available, there is no definitive way to determine the amount of these persons in areas of elevated risk, so this assessment will discuss how these other threatened groups may be affected on a general level.

Table 4-2: Ontario Threatened-Population Metrics

Threatened Population Metric	Community-Wide Data
Population	178,194
Households	50,599
Median household income	$77,788
Renter Households	42.2%
Percentage of households with at least one person living with a disability	24.6%
Percentage of households living under the poverty limit	12.4%
Percentage of households with one member aged 65+	24.9%
Source: US Census Bureau, 2016-2020 American Community Survey and 2022 Estimates	

Data Limitations and Notes on Vulnerability Tables

Due to data limitations, the data comparing the hazard zone population with the citywide population comes from two separate sources. The citywide data comes from the US Census Bureau's American Community Survey, and the hazard zone population data comes from ESRI's Business Analyst reports. As a result, there may be minor discrepancies in comparing the two data sets. The data that should be considered correct for this plan is the ACS data reported in Chapter 2.

Other Assets

In addition to the City's designated inventory of CFs/FOC and vulnerable populations, hazard events could threaten other important assets to Ontario. These assets may include services, artistic or cultural landmarks, or local economic activities. The threat assessment describes the potential harm to these other assets based on available information.

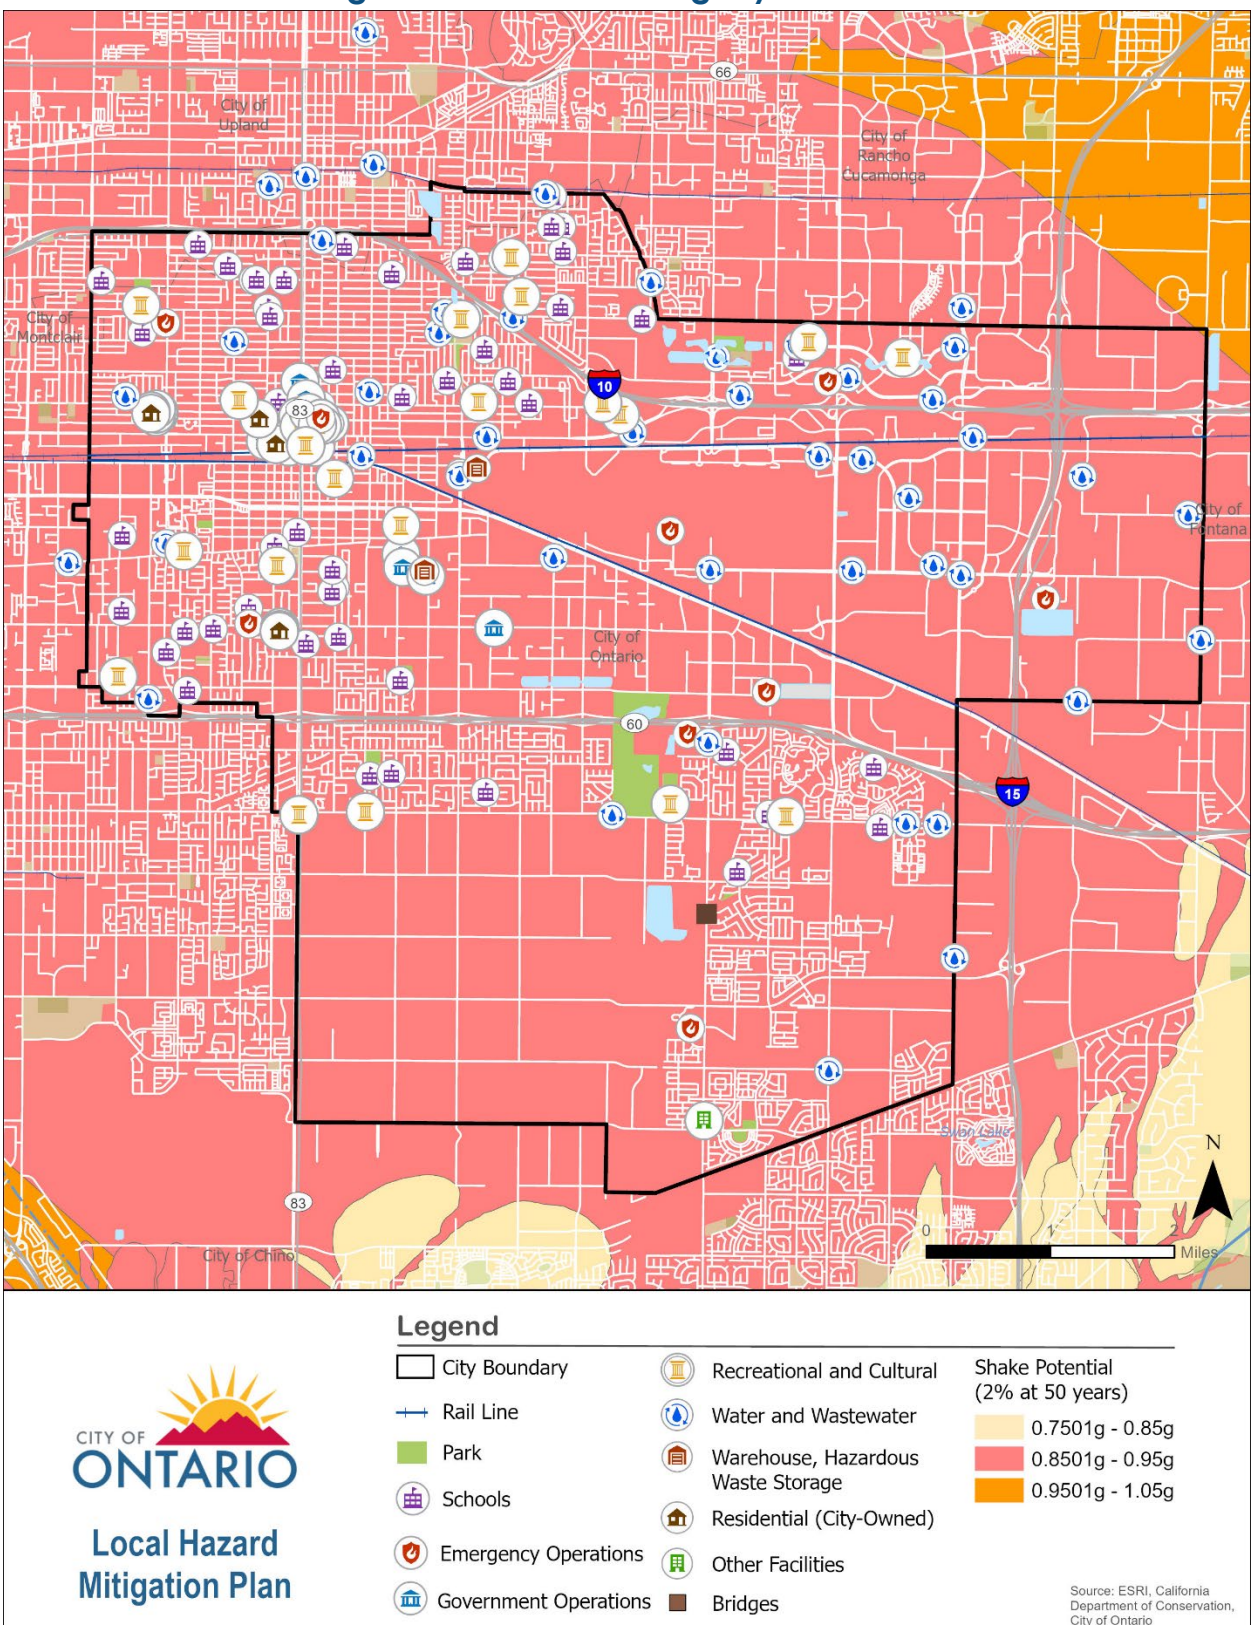
Threat Profiles

Seismic Hazards/Geologic Hazards

PHYSICAL THREAT

SEISMIC SHAKING

Many physical assets in the city are estimated to experience the same seismic shaking intensity, ranging from 85 to 95% g (shaking intensity in relation to the earth's gravity). Therefore, all facilities could be damaged during a significant seismic event, which would



be extremely costly for the City. If all facilities were damaged at the same time during a seismic shaking event, it can be assumed that the City would incur a percentage of the maximum potential loss of its physical assets. Assuming 20% of the City's assets are impacted, this potential loss could amount to over $144 million. Underground physical assets, like pipelines or utilities, could be damaged if seismic shaking were strong enough to cause a rupture. In such a scenario, natural gas and water delivery service to Ontario homes and businesses would be incapacitated until repairs are completed. **Table 4-3** displays these potential scenarios and losses that could incur should shaking reach the described threshold. **Figure 4-2** displays the CFs and FOCs within the city's seismic shaking potential hazard zones.

Table 4-3: Critical Facilities and Facilities of Concern (Seismic Shake 0.85 to 0.95G)

Category	Number of Facilities		Potential Loss**
	Critical	Concern	
Government Operations, Modular	16	6	$32,427,589
Emergency Operations (Police, Fire)	19	0	$101,685,766
Water and Wastewater Infrastructure, Pressure Reducing Systems	78	0	$144,246,194
Recreational, Cultural, Community Centers	4	43	$350,837,881
Warehouse, Household Hazardous Waste Storage	0	2	$30,000,000
Residential	0	20	$10,134,845
Other (Ontario International Airport, Fiber Optics, Various Equipment)	1	6	$54,330,187
Total	118	77	$723,662,462

***Potential loss data are estimates only, as replacement values for some facilities were not available. Actual losses may be greater than the estimate presented in this table.**
**** Based on the City of Ontario insured replacement values**

Figure 4-2: Seismic Shaking Physical Threat

Subsidence

Subsidence can influence both the built and natural environment. Because water lines are gravity-driven, a change in elevation due to subsidence could make the system more inefficient. Structures built in areas experience subsidence may require retrofitting or relocation. Subsidence could also irreversibly decrease an aquifer's capacity to store water. **Table 4-4** shows 76 CF, and 70 FOC could be affected by land subsidence in the city, resulting in a loss of almost $394 million. **Figure 4-3** displays the CFs and FOC within the city's land subsidence hazard zones.

Table 4-4: Critical Facilities and Facilities of Concern (Land Subsidence)

Category	Number of Facilities		Potential Loss**
	Critical	Concern	
Government Operations, Modular	16	6	$32,427,589
Emergency Operations (Police, Fire)	16	0	$88,309,578
Water and Wastewater Infrastructure, Pressure Reducing Systems	40	0	$56,043,956
Recreational, Cultural, Community Centers	4	41	$172,484,509
Warehouse, Household Hazardous Waste Storage	0	2	$30,000,000
Residential	0	18	$9,371,914
Other (Ontario International Airport, Fiber Optics, Various Equipment)	0	3	$5,062,608
Total	**76**	**70**	**$393,700,154**

***Potential loss data are estimates only, as replacement values for some facilities were not available. Actual losses may be greater than the estimate presented in this table.**
**** Based on the City of Ontario insured replacement values**

Social Threat

The risk of a seismic event is a danger to all groups in Ontario though some are more threatened than others.

Seismic Shaking

Seniors, pregnant women, and persons with disabilities are more threatened by seismic shaking since they may have limited mobility and may be unable to reach shelter in time. Even if these groups reach shelter in time, they may find themselves trapped if furniture or building components have fallen around them. Renters and low-income people are also more threatened by seismic shaking since these groups may live in homes that are not properly retrofitted to survive the stresses of a seismic event. These groups may not be able to absorb the costs associated with repairing their homes or looking for new housing should their existing one be too damaged for occupancy. **Table 4-5** displays the threatened populations in Ontario associated the seismic shaking scenarios.

Figure 4-3: Land Subsidence Physical Threat

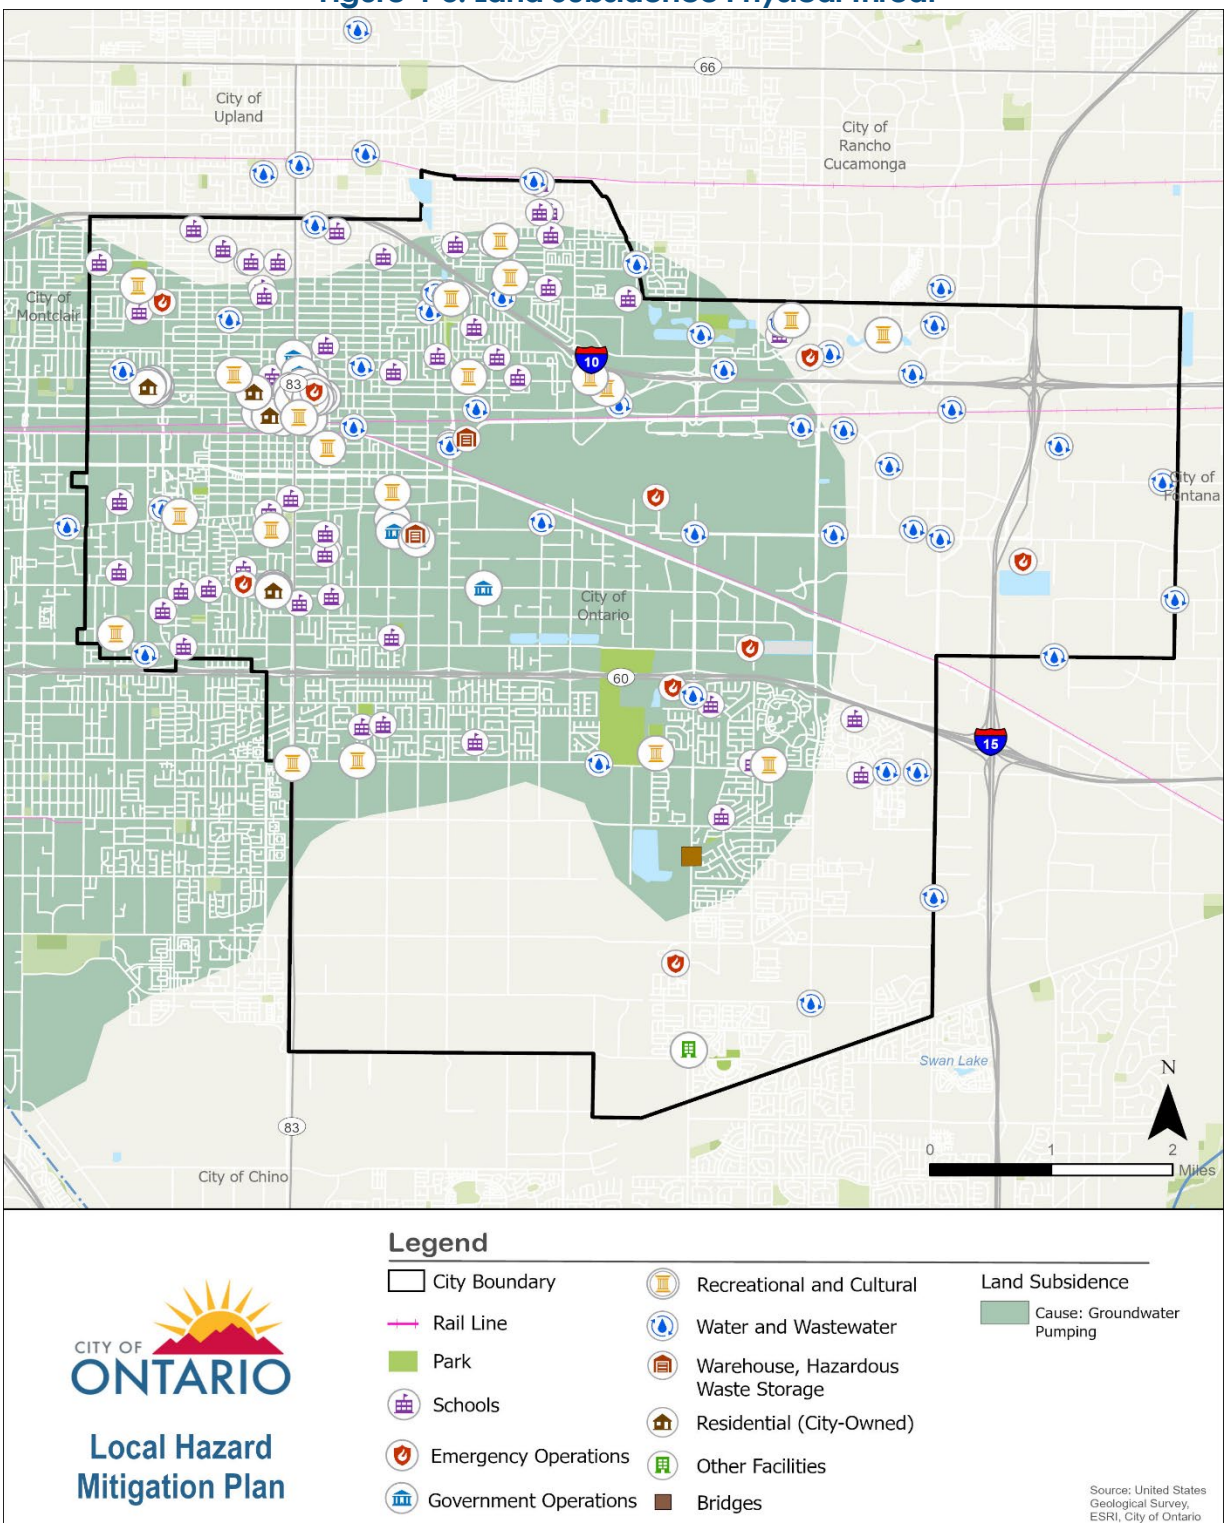


Table 4-5: Seismic Shaking Threatened Populations		
Threatened Population Metric	**Seismic Shake Threshold 0.85 to 0.95g**	**City of Ontario**
Population	178,194	178,194
Households	50,599	50,599
Median household income	$77,788	$77,788
Renter Occupied Households	42.2%	42.2%
Percentage of households with at least one person living with a disability	24.6%	24.6%
Percentage of households living under the poverty limit	12.4%	12.4%
Percentage of households with one member aged 65+	24.9%	24.9%

Subsidence

While subsidence can cause significant issues with physical infrastructure, many of the social impacts can be related to where people live and work. Subsidence can impact the safety of homes and businesses. Buildings could gradually sink due to subsidence, causing minor issues such as cracks or misalignments of doors and windows or more costly problems such as sinkholes. These issues could impact residents living in older homes, which may not have been built with foundations reinforced with steel. Because insurance companies may not cover damages caused by subsidence or other geologic hazards, lower-income households may find it financially difficult to cope with subsidence. **Table 4-6** displays the populations characteristics of those in Ontario threatened by land subsidence. Approximately 80% of the city's residents live in an area with land subsidence and share similarities with the demographics of the entire City.

Table 4-6: Land Subsidence Threatened Populations		
Threatened Population Metric	**Land Subsidence**	**City of Ontario**
Population	144,159	178,194
Households	41,652	50,599
Median household income	$74,452	$77,788
Renter Occupied Households	42.2%	42.2%
Percentage of households with at least one person living with a disability	25.5%	24.6%
Percentage of households living under the poverty limit	13.0%	12.4%
Percentage of households with one member aged 65+	25.8%	24.9%

Other Threats

Seismic Shaking

As early earthquake warning systems become operational soon, it can be expected that utilities will take advantage of these advance warnings to shut off gas, water, and power

transmission to control any potential leaks following the seismic shaking. Authorities may have enough time to halt the use of infrastructure or move workers to safe locations away from hazardous conditions. Workers could cease their activity and take shelter until they can be safely evacuated. Therefore, all services could be non-operational during the shaking event and remain inactive until authorities are confident that it is safe to reactivate utilities and return employees to their workplaces. The length of this time would vary depending on the magnitude of the event. A significant earthquake would likely put utilities out of commission and halt any employment activity in the city for a few hours or several days. The city and the region would experience reduced economic activity during the outage period, which would not be felt for weeks, months, or years later. Structures such as telephone poles or power transmission towers felled by the shaking could block roadways and prevent emergency response teams from reaching victims or evacuees who need assistance.

Subsidence

If subsidence occurred in Ontario, causing impacts to homes and businesses, the City would need to identify the locations of impact and potential triggering event. While groundwater extraction is currently being managed to prevent further subsidence, other events like earthquakes could exacerbate these conditions. Damage to roads, rail lines, and underground pipes (water, wastewater, and natural gas) is likely to be impacted during a subsidence event. As a result, the areas impacted by these effects could experience a loss of city services and potential congestion if roadways are impacted.

Changes in Population Patterns and Land Use and Development

Seismic Shaking

Based on the recent update to TOP 2050 (General Plan), it is not anticipated that population patterns will change over the next 20 years. While this may also be true concerning land use and development, if a strong earthquake impacts the city, there is the potential that older structures in the northern part of the city may be impacted more severely than newer structures in the southern part of the city.

Subsidence

Although subsidence is being monitored throughout the city, its effects happen very slowly, and the impacts cause minor damage to structures that can be repaired. Because of this, subsidence is unlikely to cause changes in population patterns as well as land use and development. The City's development review process will identify steps to mitigate or prevent future subsidence.

Flood

Physical Threat

Portions of the city are located within the 100-year flood zone (1.0% Annual Chance of Flooding) and the 500-year flood zone (0.2% Annual Chance of Flooding). Any physical assets within these mapped boundaries can potentially be inundated if enough precipitation falls, exceeding the storm drain infrastructure design capacity in these areas. Electronic or mechanical equipment on the ground could be impacted causing

it to fail. **Table 4-7** identifies that no physical assets within the City are located in the 100-year flood zone. **Table 4-8** identifies the physical assets within the City located in the 500-year flood zone, which includes 39 CF and 26 FOC. In total, these facilities are valued at over $187 million. **Figure 4-4** depicts the locations of CFs and FOCs located in FEMA-designated flood zones, which include the 100-Year Flood Hazard (blue), 500-Year Flood Hazard (orange), and Areas with Reduced Flood Risk Due to Levee (yellow).

Table 4-7: Critical Facilities and Facilities of Concern (100-Year Flood)

Category	Number of Facilities		Potential Loss*
	Critical	Concern	
Government Operations, Modular	0	0	-

Total	39	26	$187,388,666

* Based on the City of Ontario insured replacement values

Figure 4-4: Critical Facilities and Facilities of Concern in FEMA Flood Zones

SOCIAL THREAT

Floodwaters in both the 100-year zone and the 500-year zone are anticipated to rise to a depth of no more than one foot above the base flood elevation. Flooding of this type would likely inundate curb cuts and sidewalks to some extent. People who walk or bike as their primary form of transportation may encounter difficulties if they do not have access to an alternative means of transportation. Seniors, persons with disabilities, and low-income persons are also likely to be impacted during these events. **Table 4-9** shows the proportion of Ontario's vulnerable populations that face a greater threat from a flood event. Based on the information in **Table 4-9**, the median household income in both the 100-year and 500-year flood zones is lower than the citywide average. The threat of flood hazards is especially a concern for those living in the 500-year flood zone, as this affects approximately 39% of the city's population.

Persons experiencing homelessness who are outside during flood conditions may experience property damage or be unable to access shelter. Though floodwaters in Ontario are not expected to exceed a depth of one foot in many areas, six inches of floodwater may render any makeshift structures uninhabitable during a flood event. Possessions such as sleeping bags or electronic devices may be damaged or swept away by these floodwaters.

Additionally, the 2022 Vulnerability Assessment has identified the following populations as flood-threatened populations [48]:

- Households with financial instability.
- Persons that spend an extended amount of time outdoors.
- Persons with existing health conditions or limited mobility.
- Persons with language barriers and citizenship uncertainty.
- Persons living in mobile homes.
- Overcrowded households.

OTHER THREATS

Flooding may temporarily stop any type of transportation in the City. Debris from floodwaters can block roadways, hinder vehicle access, and potentially affect emergency response services. One foot of rushing water is enough to carry small vehicles, depending on the velocity. A severe flood situation may prevent people who own smaller vehicles from driving to work, leading to reduced economic activity. Severe flooding that causes serious damage to homes and businesses may also reduce economic activity until repair work is completed.

[48] Placeworks. 2022. Vulnerability Assessment Report for the Ontario Plan 2050 Update. https://www.ontarioca.gov/sites/default/files/Ontario-Files/Planning/The%20Ontario%20Plann/Safety/TOP_27_Ontario_VAReport_Final.pdf

CHANGES IN POPULATION PATTERNS AND LAND USE AND DEVELOPMENT

Flooding could affect population patterns within the city as the median household income in both the 100-year and 500-year flood zones is lower than the citywide average, and 64% of the households in the 100-year flood zone are renter occupied. If, after a flood, homeowners in these flood zones cannot afford to fix their homes, or landlords no longer wish to own a rental home in these areas, they will move out of the area. If homes in the low flood-risk areas within the city are more expensive, a person looking to move out of the flood zone may consider leaving the city altogether.

It is unlikely that flooding will affect land use and development patterns because the development review process ensures flood related impacts are mitigated or minimized.

Table 4-9: Flood-Threatened Populations

Threatened Population Metric	Flood Hazards (100 Years)	Flood Hazards (500 Years)	City of Ontario
Population	841	70,193	178,194
Households	248	19,061	50,599
Median household income	$50,681	$75,200	$77,788
Renter Occupied Households	64.1%	49.6%	42.2%
Percentage of households with at least one person living with a disability	27.8%	23.3%	24.6%
Percentage of households living under the poverty limit	31.4%	12.2%	12.4%
Percentage of households with one member aged 65+	12.4%	22.5%	24.9%

Extreme Weather (Severe Winds, Extreme Heat, Severe Rainstorms)

PHYSICAL THREAT

SEVERE WINDS

Intense winds likely present the greatest threat to physical structures, particularly from trees or branches that fall on buildings/vehicles, causing substantial damage. Older structures that have deferred maintenance or have not been retrofitted for high wind conditions may suffer greater damage than newer/updated structures. Utility lines and wooden utility poles face an elevated threat from wind, as do buildings without reinforced roofs. Often utility poles and trees suffer impacts during high wind events if they occur after a significant rain event. During these events, saturated soils around the base of the tree/pole may be unable to hold up to the strains placed on it by strong winds causing it to fall over.

Trees, tree branches, and other objects have the potential to fall on powerlines and other electrical infrastructure during a severe windstorm, causing power outages throughout the city. Another physical threat of severe wind is wildfire impacts and electric utilities' current practice of conducting Public Safety Power Shutoff activities. During high wind

events, these shutoffs may impact structures that rely on electricity for normal operations. See social threats for population impacts that may also occur because of these events.

Extreme Heat

Extremely high temperatures can cause roads to deform and buckle as the pavement expands in the heat, especially in areas that have not been maintained well. Power lines and other electrical grid components become less effective in higher temperatures and may be damaged due to stress during extreme heat events. Urban heat islands occur when natural land cover is replaced with concentrations of pavement, buildings, or other surfaces that absorb and retain heat. Buildings with dark pavement will absorb more heat than surfaces with vegetation or lighter materials that are better at reflecting the sun's energy. This urban heat island effect is strongest during the summer when solar radiation is strongest.

Severe Rainstorms

Physical threats associated with severe rainstorms are similar in nature to those identified in the Flood discussion above.

Social Threat

Severe Wind

Severe wind events can harm people throughout Ontario but have a greater effect on the safety of people experiencing homelessness and those working outdoors. Populations that work outside or have respiratory illnesses may be impacted by severe wind events as they can generate dust and other contaminants that can affect the health of residents and workers. Lower-income residents, who may not have the financial resources to purchase homes (or are renting homes) that are not built or retrofitted to withstand powerful winds, could also have difficulty recovering from wind events.

Extreme Heat

Whereas a heat event can be relatively harmless for those with a reliable means of staying hydrated and cool, the event can be deadly for others. Young children, the elderly, or people suffering from serious medical conditions are physiologically more vulnerable to heatstroke. Some senior citizens also take medicines that can make it harder for their bodies to maintain a safe internal temperature, creating an additional threat from extreme heat events. Young children may not be aware of the signs of dehydration or ways of protecting themselves from heatstroke.

People living in homelessness are at a high risk of health complications during heat waves, especially if they are unsheltered. According to San Bernardino County homeless counts, in 2022, there were approximately 3,333 individuals experiencing homelessness in the county, with 71.7% percent unsheltered.[49] Of the 3,333 individuals experiencing homelessness within the county, approximately 193 individuals are experiencing

[49] San Bernardino County. 2022. Homeless Count and Subpopulation Survey. https://www.sbcounty.gov/uploads/sbchp/SBC-2022-Homeless-Count-Report.pdf

homelessness within the city. This population is very vulnerable to heatstroke during a heatwave, especially if they cannot reach a cooling center.

Sudden spikes in heat can catch people by surprise. Stores can rapidly sell out of fans, air-conditioning units, or drinking water during a heatwave. Many lower-income households live in older, poorly insulated, and energy-inefficient housing and cannot afford to run their air conditioning, which can be further compounded by the threat of power outages due to heat/rolling blackouts. During these events, extreme heat impacts may affect larger portions of the city and populations that would not be viewed as vulnerable under normal circumstances.

Severe Rainstorms

Social threats associated with sever rainstorms is similar in nature to those identified in the Flood discussion above.

Additionally, the 2022 Vulnerability Assessment has identified the following populations as populations most vulnerable to severe weather [50]:

- Households with financial instability.
- Persons that spend an extended amount of time outdoors.
- Persons with existing health conditions or limited mobility.
- Persons with language barriers and citizenship uncertainty.
- Persons living in mobile homes.
- Overcrowded households.

Other Threats

Severe Wind

Southern California and the City of Ontario all suffer from seasonal Santa Ana Winds and will for the foreseeable future. Extreme wind events can worsen other risks, such as wildfires. It could affect the take-off and landing of small aircraft at nearby airports, leading to an increased risk of possible aircraft incidents.

Extreme Heat

Extreme Heat for any length of time can also affect other hazards and risks within the city. For example, it can create a spike in electricity demand leading to power loss/failure, food insecurities, and a rise in vector-borne disease transmission. Coupled with extreme wind, it can cause or spread urban fires and jeopardize additional neighborhoods/communities.

Severe Rainstorms

Other threats associated with severe rainstorms are similar in nature to those identified in the Flood discussion above.

[50] Placeworks. 2022. Vulnerability Assessment Report for the Ontario Plan 2050 Update. https://www.ontarioca.gov/sites/default/files/Ontario-Files/Planning/The%20Ontario%20Plann/Safety/TOP_27_Ontario_VAReport_Final.pdf

Changes in Population Patterns and Land Use and Development

Severe Wind

Severe winds occur periodically (primarily during the Fall months) and generally do not affect populations to the degree that they would need to migrate in and out of the city.

It is unlikely that severe wind will affect land use and development because the development review process will take steps to mitigate or minimize the impacts of severe wind. There is the potential that older structures in the northern part of the city may be impacted more severely than newer structures in the southern part of the city. The northern part of the city has overhead powerlines and mature trees, and older structures may not comply with current building codes.

Extreme Heat

Based on the recent update to TOP 2050 (General Plan), it is not anticipated that population patterns will change over the next 20 years. There could be minor changes in population patterns due to extreme heat if people cannot continue to live in older structures with limited insulation and older cooling units.

It is unlikely that extreme heat will affect land use and development because the development review process will take steps to mitigate or minimize impacts from extreme heat. While it is unlikely that extreme heat will affect land use and development, it is possible that additional investment in older parts of the city will occur to modify structures to handle these conditions.

Severe Rainstorms

Based on the recent update to TOP 2050 (General Plan), it is not anticipated that population patterns will change over the next 20 years.

It is unlikely that severe rainstorms will affect land use and development because the development review process will take steps to mitigate or minimize impacts from severe rainstorms. The City has invested significantly in its stormwater management infrastructure, which should protect much of the city from the effects of severe rainstorms.

Dam Failure

Physical Threat

Various factors, such as the amount of water released, the distance between the dam failure site, and the topography of the surrounding land, will influence the extent to which physical assets in Ontario are threatened. The San Antonio Dam has large storage capacities that could cause widespread inundation in Ontario if the reservoir waters are released due to a dam breach. **Table 4-10** identifies the physical assets in Ontario that are threatened by the potential failure of the San Antonio Dam. The Hickory and Jurupa Basins, while close in proximity to the City, do not impact residential populations. As a result, these two dams are not identified in Table 4-10. Based on this analysis, dam

inundation would affect 94 CFs and 54 FOCs within the city, with the potential to cause approximately $437 million in damages, based on available information.

Figure 4-5 shows the location of the identified CFs and FOCs within these dam inundation zones.

Table 4-10: Critical Facilities and Facilities of Concern (Dam Failure)

Category	Number of Facilities		Potential Loss**
	Critical	Concern	
Government Operations, Modular	16	6	$32,427,589
Emergency Operations	17	0	$97,309,578
Water and Wastewater Infrastructure, Pressure Reducing Systems	47	0	$89,522,798
Recreational, Cultural, Community Centers	4	41	$172,484,509
Warehouse, Household Hazardous Waste Storage	0	2	$30,000,000
Residential	10	0	$10,134,845
Other (Ontario International Airport, Fiber Optics, Various Equipment)	0	5	$5,062,608
Total	94	54	$436,941,927

*** Replacement Values Unavailable**
**** Based on the City of Ontario insured replacement values**

SOCIAL THREAT

Dam failure hazards in the city would impact various downstream properties and the residents that live there. **Table 4-11** identifies these potential dam failure impacts caused by the San Antonio Dam. Failure of the San Antonio Dam would affect almost 93% of the population and inundate 38% of the acreage in the City of Ontario. Failure of the other two dam facilities upstream from the City would impact limited areas of the City that do not contain residential uses. No population metrics for these two dam inundation zones were available based on the uses located in this part of the City.

Figure 4-5: Critical Facilities and Facilities of Concern in Dam Inundation Zones

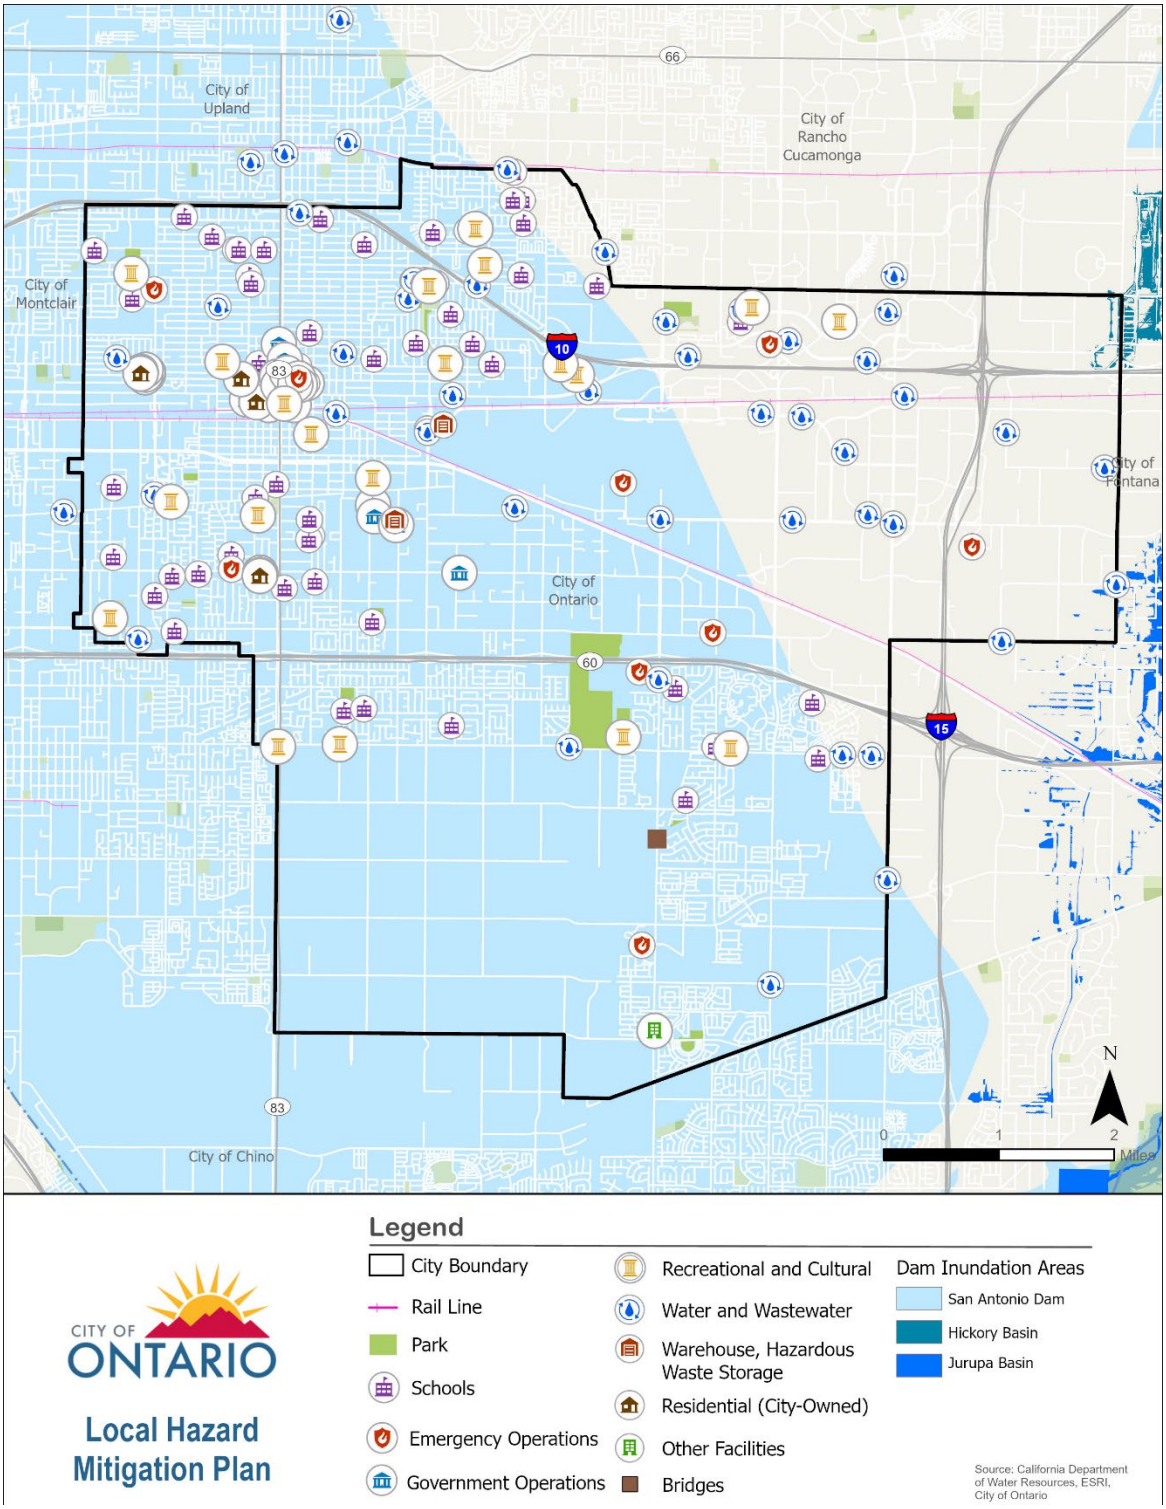

Table 4-11: Dam Failure Threatened Populations		
Threatened Population Metric	**San Antonio Dam**	**City of Ontario**
Population	165,339	178,194
Households	46,220	50,599
Median household income	$77,919	$77,788
Renter Occupied Households	40.2%	42.2%
Percentage of households with at least one person living with a disability	25.0%	24.6%
Percentage of households living under the poverty limit	12.8%	12.4%
Percentage of households with one member aged 65+	30.8%	24.9%
Percentage of Ontario potentially inundated (acres)	37.7%	38.0%

Other Threats

Dam failures are often triggered by other events (e.g., seismic shaking, intense rainstorms, etc.). There would most likely be service disruptions in Ontario if this type of event occurred. Floodwaters could quickly inundate the city, disrupting utilities such as water, power, heating, and other services (communications or transportation infrastructure). Residents may find street lighting and traffic signals are temporarily disabled. Debris may be carried in the rapid inundation of water, blocking roads and impeding traffic flow. Water would most likely inundate roadways and other low-lying, flat areas, such as parking lots, open spaces, and schoolyards. In severe scenarios, people's mobility in these areas would likely be restricted or even impossible. Any unprotected or unhoused mechanical or electronic equipment that is not properly elevated could be damaged or inoperable until crews can conduct repairs or replacements.

Changes in Population Patterns and Land Use and Development

Those in the inundation zone may choose to move out of the city or out of the inundation area if the impacts of dam failure are great enough. Those renting homes within the city (40% of households within the city) have little control over the rebuilding process of a home that has been affected by inundation and, therefore, may be forced to move out of the inundation area or out of the city.

Dam failure is unlikely to affect land use and development because the development review process will take steps to mitigate or minimize flood-related impacts. Areas inundated within the city would not be significantly altered, requiring changes in land use and development patterns.

Hazardous Materials Release

PHYSICAL THREAT

Hazardous materials can cause damage to physical assets in Ontario if they are released into the environment. Corrosive hazardous materials can damage the exteriors of buildings or structures. Flammable hazardous materials can be ignited and cause damage to nearby structures. Generally, sites closer to the origin of the release of the hazardous materials are more at risk than those further away.

Table 4-12 identifies the number of physical assets in Ontario threatened by a hazardous materials release within 500 feet of a site storing or using hazardous materials. A total of 30 assets are located near hazardous materials sites within the city. The total potential losses associated with these assets are over $59 million based on replacement costs.

Table 4-13 identifies the number of facilities located within areas of increased pollution (Census Tracts in the 50th percentile or greater), as indicated by Cal EPA's Cal Enviro Screen dataset. These census tracts indicate a higher concentration of sites that use, store, or dispose of hazardous materials. Facilities and populations located near these areas with higher concentrations are at a greater risk of exposure. The entire city falls in the 50th percentile or greater for the Cal Enviro Screen dataset; therefore, all of the City's CF and FOC inventory could potentially be impacted. This analysis shows potential losses of approximately $723 million could occur based on facilities that are located in these higher percentile census tracts.

Table 4-12: Critical Facilities and Facilities of Concern (HazMat Buffer 500 ft)

Category	Number of Facilities		Potential Loss*
	Critical	Concern	
Government Operations, Modular	12	4	$18,198,542
Emergency Operations	2	0	$1,495,309
Water and Wastewater Infrastructure, Pressure Reducing Systems	6	0	$7,278,468
Recreational, Cultural, Community Centers	0	3	$1,234,158
Warehouse, Household Hazardous Waste Storage	0	1	$30,000,000
Residential	0	1	$888,925
Other (Ontario International Airport, Fiber Optics, Various Equipment)	0	1	$62,608
Total	**20**	**10**	**59,158,010**

***Based on the City of Ontario insured replacement values**

Table 4-13: Critical Facilities and Facilities of Concern (Cal Enviro Screen – 50% or Above)			
Category	**Number of Facilities**		**Potential Loss***
	Critical	**Concern**	
Government Operations, Modular	16	6	$32,427,589
Emergency Operations	19	0	$101,685,766
Water and Wastewater Infrastructure, Pressure Reducing Systems	78	0	$144,246,194
Recreational, Cultural, Community Centers	4	43	$350,837,881
Warehouse, Household Hazardous Waste Storage	0	2	$30,000,000
Residential	0	20	$10,134,845
Other (Ontario International Airport, Fiber Optics, Various Equipment)	1	6	$54,330,187
Total	118	77	$723,662,462
*** Based on the City of Ontario insured replacement values**			

Figure 4-6 displays the location of CFs and FOCs in relation to the hazardous materials storage/usage sites and the Cal Enviro Screen dataset associated with the City.

Social Threat

The threat of a hazardous materials release event affects those closest to a source of hazardous materials, including industrial sites, gas stations, gas transmission lines, or sewer mains. **Table 4-14** shows the city's vulnerable populations living within 500 feet of a hazardous materials storage/waste site. The median household income in these locations is almost $25,000 less than the rest of the city. This suggests that lower-income populations may be living near locations that store or use hazardous materials. Ontario residents living next to major transportation infrastructure such as highways or major roadways also face a greater risk of being affected by a hazardous materials release if vehicles transporting these materials accidentally release their contents into the environment. Groups such as the elderly, low-income, and renters face a greater risk of exposure since they may not have the financial resources necessary to retrofit their homes against infiltration by hazardous materials or relocate to a home farther from the potential sources of hazardous materials.

Other Threats

Hazardous materials release could threaten the city and regional transportation networks. Portions of the local road or rail networks may be closed to prevent people from entering areas contaminated with hazardous materials to allow remediation and cleanup activities to occur. If a highly corrosive hazardous material is released, it could potentially cause significant damage to the exterior of homes or businesses in the area or require evacuation. A similar issue occurred recently in Perris, CA, where hundreds of residents were required to evacuate their homes and businesses due to a release event.

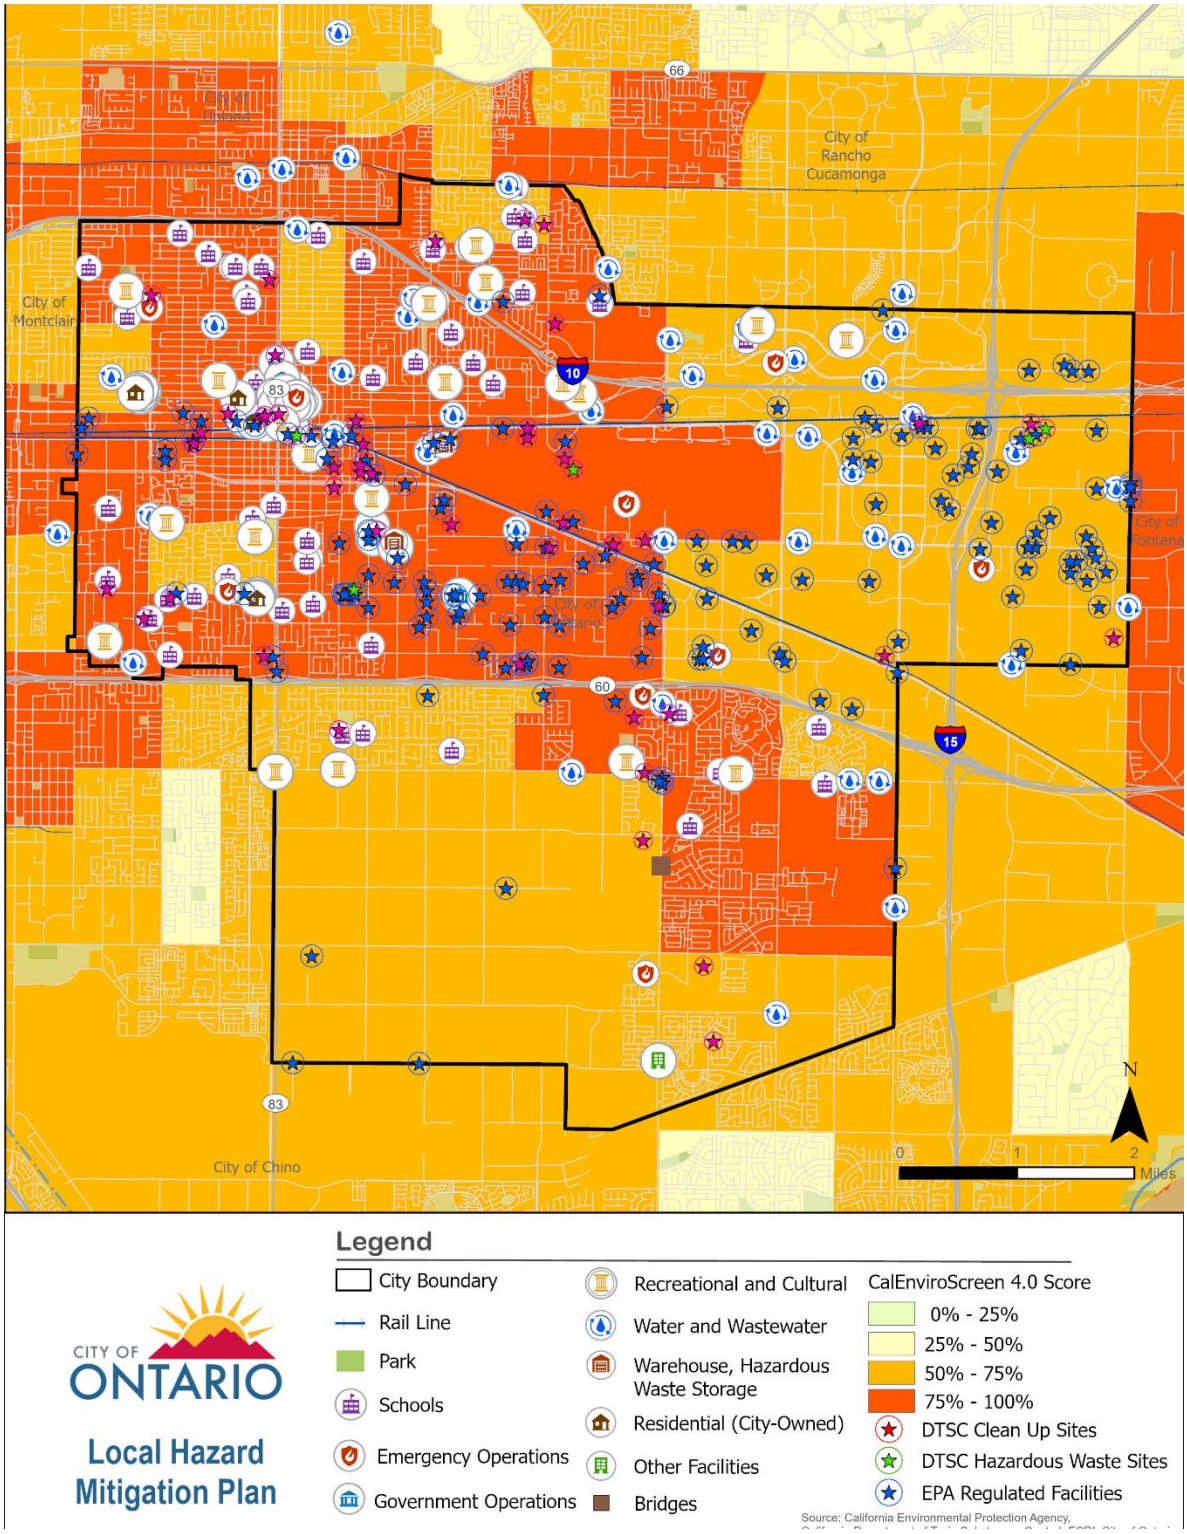
The City may experience additional personnel-related costs to coordinate the evacuation of a large area.

Table 4-14: Hazardous Materials Release Threatened Populations (Haz Mat Buffer 500 Feet)

Threatened Population Metric	500 Feet from Hazardous Materials Site	City of Ontario
Population	452	178,194
Households	109	50,599
Median household income	$53,895	$77,788
Renter Occupied Households	26.7%	42.2%
Percentage of households with at least one person living with a disability	34.9%	24.6%
Percentage of households living under the poverty limit	17.4%	12.4%
Percentage of households with one member aged 65+	22.0%	24.9%

Changes in Population Patterns and Land Use and Development

Based on the recent update to TOP 2050 (General Plan), it is not anticipated that population patterns will change over the next 20 years. A change in population pattern would only occur if a hazardous materials release was severe enough to require people to move.



It is unlikely that hazardous materials release will affect land use and development because the development review process will take steps to mitigate or minimize impacts from a hazardous materials release event. Locations that store, produce, and dispose of hazardous materials are highly regulated within the city and monitored regularly. Through this process, as well as the development review process, it is not anticipated that land use and development patterns will change.

Urban Fire

Physical Threat

Structures and physical assets in Ontario that are not equipped with fire suppression technology or design features that mitigate fire vulnerability are at risk of fire. Generally, these buildings are older, may not be well maintained, or may not meet current code requirements and regulations. While all structures can be impacted by urban fire, older structures may have increased vulnerability to this hazard. Power lines located around overgrown trees, where the tree crown envelops part or all the power lines, are also at risk of catching fire. When the wires overheat, they may ignite a fire in the tree, spread back to the power lines themselves, and burn the power line infrastructure. Underground utilities, like water delivery systems, residential electrical systems, or natural gas pipelines, are not threatened by the occurrence of fire since any urban fires that emerge in Ontario are likely to occur on the surface. According to Cal Fire, the city is not within a fire hazard

Figure 4-6 Critical Facilities and Facilities of Concern

severity zone and, therefore, not prone to wildfire events. Although no CFs or FOC are located within these fire hazard severity zones, the potential for an urban fire will always be present.

Social Threat

A fire hazard most immediately threatens seniors and persons with disabilities. These groups may have limited mobility and reduced environmental awareness. For example, a senior who lives alone may not be aware that a fire has been ignited in their house until the room begins to fill with smoke or even flashover, at which point escape may be more difficult or impossible. Therefore, a fire that starts in or spreads to any senior residences in Ontario could be highly threatening to those populations. Persons with disabilities may require special mobility devices or caregiver assistance to go outside, which may not be readily available if a fire occurs. Other groups with increased threat levels include lower-income persons and renters. These persons may live in substandard housing with outdated materials known to be flammable. Renters and lower-income persons may also live in housing units with improperly designed or maintained electrical or heating systems that could lead to a fire. Additionally, these groups may not possess enough financial resources to rebuild their homes or search for new homes after a fire event occurs.

Other Threats

Urban fires can consume power lines and force utility operators to shut off electrical and gas transmission activity, leading to utility outages in Ontario homes and businesses. Any streets surrounded by blazes or blocked by burning debris would hinder transportation, prevent people from evacuating, and block emergency response crews from reaching the source of the fire. Anyone living at the end of a cul-de-sac faces an elevated threat of being trapped if the fire occurs or spreads in a way that blocks evacuation. Fires that destroy trees or vegetation (especially within parks and open space areas) could limit or prevent the use of these areas, affecting future recreational opportunities for residents.

Public Safety Power Shutoffs (PSPS) will become a significant issue for many communities throughout California. Although there are only a few PSPS circuits within Ontario, the potential for large-scale events affecting residents and businesses should be an ongoing concern. In the event of a PSPS outage in neighboring cities within the region, the City's resources could be strained as residents of affected areas seek refuge in communities with power. Outreach to residents and businesses to help them understand and prepare for these future events will become an important aspect of the City's overall hazard mitigation strategy.

Changes in Population Patterns and Land Use and Development

If a large urban fire were to occur, it is feasible that changes in population patterns could occur.

Land use and development patterns could change if a large urban fire were to occur that impacted older parts of the city. Subsequent to that type of event, the City would rely on a redevelopment process to determine how best to rebuild.

Human-Caused Hazards

Physical Threat

Terrorism

There is no way to predict which of Ontario's facilities or assets may be impacted by an act of terrorism since the motivation behind the incident is often complex and not easily understood. Generally, these incidents occur at places of political, economic, or cultural importance. If the perpetrator's motives are to shut down city or regional government activity for a period, they may instead target pieces of infrastructure, like water systems, utility delivery systems, or transportation networks. The financial losses that may result from this type of incident would depend on the degree of destruction associated with the activity. If the incident involves the destruction of physical assets, the cost to the City or property owners in Ontario could be significant.

Transportation Incidents

Transportation incidents typically threaten infrastructure like roadways, bridges, and utilities that may be adjacent or co-located with these facilities. Depending on the nature of the event surrounding structures and uses may also be impacted; however, to what degree is difficult to identify at this time. While many incidents within the City may be considered minor, if one were to occur at a key intersection or interchange, traffic, and commerce within the affected area could be impacted significantly for hours or days, depending on the severity of the incident.

Communications Failure

Physical threats to communications failure may involve the damage/destruction of city infrastructure (towers, transponders, other equipment) or could be impacted by non-physical methods (power loss, cyber-attack). Failure would most likely impact City operations and functions, leaving some City services inoperable or severely diminished.

Social Threat

Terrorism

Since mass casualty incidents/acts of terrorism could occur anywhere in Ontario, all groups are potentially threatened by the impacts of these incidents; however, the extent of the threat would depend upon the type and magnitude of the event. For example, an active shooter situation may be isolated to a single location, whereas a larger-scale incident may affect multiple locations. Some locations are more likely to be targeted than others, including but not limited to medical facilities, government buildings, financial institutions, Ontario International Airport, and Toyota Arena. Populations that frequently visit these areas may face a greater threat than the average person. Seniors, pregnant women, and persons with disabilities, for instance, are more likely to frequently visit the local hospitals than other subpopulations in the city. If an incident occurs at the hospital or within the community (overwhelming hospital resources), these groups are expected to face an increased impact from the incident.

An incident that occurs at a government building or financial institution may be more likely to threaten seniors or lower-income individuals that rely on in-person transactions in

place of online options. As such, their use of these in-person services may place them in harm's way. An incident at Ontario City Hall or bank locations in the city can be expected to be more of a threat to these groups. Seniors and persons with limited income may be challenged if there is a need to shelter in place or evacuate during an incident requiring additional services, assistance, and/or medical treatment.

Transportation Incidents

Residents and businesses located in close proximity to major transportation infrastructure may be at greater risk of impact from these types of incidents. For residents that rely on the transportation network to get to work, any closures or impacts to that network could have a negative impact on their daily lives and well-being. At the same time, businesses could be impacted if employees and customers are unable to reach their place of business due to an incident. While many incidents would be short-term, reducing impacts to the community, if a significant issue were to occur, the impacts could be longer, which could have economic impacts for both residents and businesses.

Communications Failure

Communications infrastructure is essential to the health and safety of residents. Medical services, first responder operations, and basic city services (trash collection, sewer/water operations) can be impacted by a communications failure, hindering these activities. Although the loss of communication infrastructure can occur anywhere in the city, the most vulnerable populations that would be affected are those that do not have the means to relocate temporarily during the outage to a location with adequate communications capabilities.

Changes in Population Patterns and Land Use and Development

The hazards identified under human-caused hazards will not affect population patterns or land use and development, as no connection can be drawn between these hazards and changes in population patterns or land use and development.

PAGE INTENTIONALLY LEFT BLANK

Chapter 5 – Hazard Mitigation Strategy

Strategy Development Process

Ontario's hazard mitigation strategy is a comprehensive set of actions intended to reduce hazard events' impacts. These hazard mitigation actions will help to protect the safety and well-being of residents and visitors, CFs and FOC, other buildings and structures, key services, the local economy, and other important community assets. Some actions will also help with emergency preparedness, allowing for a more effective community response to hazard events. Preparedness actions are not a required component of an LHMP, but they support and complement mitigation activities. The HMPC chose to include them as part of the overall hazard mitigation strategy.

Use of Hazard and Threat Assessment

The HMPC relied in part on the hazard profiles and threat assessments in this Plan to develop the actions in the mitigation strategy. A comprehensive set of mitigation actions that respond to the relevant hazard situations and protect Ontario residents, businesses, and community assets were prepared. The HMPC ensured that the mitigation actions would help reduce damage from the most frequent types of hazard events, the most significant that may reasonably occur, and those with the greatest potential to harm the community. The HMPC also drafted mitigation actions that will help protect the most vulnerable members of the community and the most vulnerable local assets.

Capabilities Assessment

As part of the effort to draft mitigation actions, the City completed a capabilities assessment, which included a review of existing policies, personnel, and technical resources that can support hazard mitigation activities in Ontario. The hazard mitigation actions build off the existing success of these resources and leverage their capabilities to support improved resiliency in the community. The capabilities assessment looked at the following types of resources:

- **Personnel resources:** City employees and volunteers, and employees and volunteers at other agencies.
- **Plan resource:** Advisory or enforceable plans adopted by the City or other agencies.
- **Policy resource:** Policies adopted and implemented by the City or other agencies
- **Technical resource:** Data and tools available to the City.
- **Financial resource:** Funding mechanisms available to the City that support mitigation activities.

Capabilities Improvement/Expansion

The ability to expand current mitigation capabilities will generally be reliant upon the budgeting allocated for each department/program for that fiscal year. The level at

which these programs may or may not be expanded upon, will be dependent upon the amount of funding received. FEMA has released a series of guides over the past few years which highlight some of the ways in which jurisdictions can expand mitigation. Some strategies for increasing current mitigation capabilities may include:

1. City should actively identify, adopt, and enforce the most current set of development codes and standards available. Strongly encouraging new development to be constructed to higher standards than currently required, increasing resilience within the community.
2. Engaging parts of the community that may not be actively involved in mitigation efforts.
3. Expanding the number and types of organizations involved in mitigation planning and implementation, increasing both efficiency and bandwidth.
4. Fostering new relationships to bring underrepresented populations and partners to the hazard mitigation planning process.
5. During the annual LHMP review, the HMPC should look for opportunities to fund and expand/enhance the effectiveness of current mitigation actions.
6. During annual budgeting processes, the City should identify new funding sources (bonds, grants, assessment districts, etc.) that can be used to support existing capabilities enhancements.

Tables 5-1a-d shows the capabilities assessment for Ontario. Within each resource described a section titled "Expansion and Improvement" is provided, which helps the City recognize specific areas where each capability may be modified to align with mitigation priorities and actions to be taken in the future.

Table 5-1a: City of Ontario Capabilities Assessment			
Local Legal and Regulatory Capabilities			
Resource Name	Version/ Date	Hazards Addressed	Description (Effect on Hazard Mitigation)
2050 The Ontario Plan (TOP) Safety Element	2050 / Adopted 2020	All	The 2050 Plan identifies the following: • Provides background on the history of hazards and the likelihood of future changes to these hazards. • Provides policies that increase the resilience of residents, businesses, workers, and visitors. • Provides policies to reduce the level of property loss due to a potential disaster. • Provides a framework for emergency management. Details of the Safety Element, including a discussion of the process to reduce the loss of life, injury, private property damage, infrastructure damage, economic losses, and social dislocation, can be found at: https://www.ontarioca.gov/about-ontario-ontario-plan-policy-plan/safety Expansion and Improvement: The HMP will be informed by referencing the Safety Element of the General Plan. The City will adopt the approved HMP as part of the General Plan Safety Element to meet the requirements of AB 2140.
2050 The Plan Ontario Land Use Element	2050 / Adopted 2020	Seismic, Fire, Flood, Wind	The Land Use Element functions as a guide to the ultimate pattern of development for the city, both within its incorporated boundaries and sphere of influence. The Land Use Element: • Designates the distribution, location, and balance of land uses. • Describes the desired build-out of Ontario • Describes building intensity standards for each land use. • Communicates population density. • Ensures compatibility between land uses. The entire Land Use Element may be found at the following link: https://www.ontarioca.gov/about-ontario-ontario-plan-policy-plan/land-use Expansion and Improvement: Focus on balancing community needs and ensuring compatibility of uses and development patterns.
Land Use Specific Plans	Various		The City maintains over 40 area-specific land use and project plans.

Table 5-1a: City of Ontario Capabilities Assessment			
Local Legal and Regulatory Capabilities			
Resource Name	Version/ Date	Hazards Addressed	Description (Effect on Hazard Mitigation)
			Expansion and Improvement: These specific plans and the HMP will be aligned to describe developmental trends, hazards, and potential development in hazard areas.
California Standards Building Code	2022	Seismic, Fire, Flood, Wind	The California Building Standards Code is a compilation of three types of building standards from three different origins: • Building standards that state agencies have adopted without change from building standards contained in national model codes; • Building standards that have been adopted and adapted from national model codes to address California's ever-changing conditions; and • Building standards, authorized by the California legislature, that constitute amendments not covered by national model codes that have been created and adopted to address California concerns. Expansion and Improvement: Adherence to building codes, including local codes, regulates growth and controls land use patterns. As codes are updated, addressing known hazards results in lowered risk and potentially fewer losses.
City of Ontario Building Code	2019	Seismic, Fire, Flood, Wind	The Ontario Building Code, Volume II Title 8 of the Municipal Code, incorporates and amends the 2018 Edition of the International Building Code, as published by the International Code Council. The full code can be found at: https://codelibrary.amlegal.com/codes/ontarioca/latest/ontario_ca/0-0-0-46100 Expansion and Improvement: Adherence to building codes, including local codes, regulates growth and controls land use patterns. Addressing known hazards, as codes are updated, results in lowered risk and potentially fewer losses.
City Emergency Operations Plan		All	Explains how the City will respond to a major emergency or disaster and coordinate between the Emergency Operations Center (EOC) and field-level Incident Commanders; includes the hazards with a description of each; the concept of operations during a major emergency or disaster; the role of the EOC, and the coordination that occurs between the EOC and City's departments and other local, state, and federal governments in times of disaster. Expansion and Improvement: The hazards section of the Emergency Operations Plan (EOP) is informed by the HMP as the two are closely correlated.

Table 5-1a: City of Ontario Capabilities Assessment			
Local Legal and Regulatory Capabilities			
Resource Name	Version/ Date	Hazards Addressed	Description (Effect on Hazard Mitigation)
City of Ontario 2020 Urban Water Management Plan (UWMP)	2021	Climate Change, Drought	The UWMP provides urban water suppliers (including the City) with a planning document for long-term resource planning to ensure adequate water supplies are available to meet existing and future water supply needs. In addition, the 2020 UMWP incorporates water supply reliability determinations resulting from potentially prolonged drought, regulatory revisions, and/or changing climatic conditions. Expansion and Improvement: The UWMP and HMP will be aligned in describing and developing mitigation actions to address climate change and drought. Water demand reduction strategies contained in the UWMP should be considered for inclusion as mitigation activities in the HMP.
Community Climate Action Plan	2022	Climate change, Drought, Extreme Heat, Wildland fire, Flood, High winds/Tornado/ Severe storm	This is a Greenhouse Gas Reduction document for the City to help achieve its goals of reducing greenhouse gases that contribute to climate change impacts. The plan may be found at the following link: https://www.ontarioca.gov/sites/default/files/Ontario-Files/Planning/The%20Ontario%20Plann/CCAP/Ontario-CCAP_Adopted_20220816.pdf Expansion and Improvement: The HMP and Climate Action Plan should be closely correlated. As the Climate Action Plan is updated, mitigation measures from the new HMP can be incorporated.
Climate Change Vulnerability Assessment	2022	Climate Change, Extreme Heat, Flooding, Severe Weather	The vulnerability assessment acts as a foundation for integrating adaptation and resilience policies into the Safety Element and The Ontario Plan by identifying a set of priority vulnerabilities in the City of Ontario. Expansion and Improvement: The HMP and Climate Change Vulnerability Assessment should be closely correlated. Ensure the Vulnerability Assessment is updated in conjunction with HMP updates.
Historic Preservation Program	City Code / 2015 update	Seismic, Fire, Flood, Wind	In 1991, the City Council adopted the City's first Ordinance intended to preserve historic resources. Pursuant to the National Preservation Act of 1966 and as amended in 1980, the Certified Local Government (CLG) program encourages the preservation of cultural resources by promoting a partnership among local governments, the State of California Office of Historic Preservation (OHP), and the National Park Service. Expansion and Improvement: The Historic Preservation Program designates facilities that must be considered when developing hazard mitigation activities. Planners must be aware of which facilities are in this program.

Table 5-1b: City of Ontario Capabilities Assessment		
Administrative and Technical Capabilities		
Resource Name	**Lead Department**	**Description (Effect on Hazard Mitigation)**
City Clerk's Office and Records Management	Management Services	The City Clerk / Records Management Department Supervises and coordinates City elections; serves as Filing Officer for City appeals as designated by various sections of the Ontario Municipal Code; prepares and updates the City's Conflict of Interest Code, and serves as Filing Officer for the Fair Political Practices Commission; receives and opens all sealed bids and formally releases bid bonds; receives, processes and maintains claims, public record requests, special event applications, summonses and complaints; assists the public and City staff by providing information and research assistance; and directs the retention and destruction of official records in accordance with applicable laws and regulations. Expansion and Improvement: Prioritize new initiatives that support mitigation activities within the city.
Communications	Management Services	The City of Ontario's Communications Department provides outreach and information to the public, creative services to all internal departments, and videography for the city. The Communications Department also handles all website administration. Expansion and Improvement: Strengthen ties with community organizations and businesses to ensure key content and information is timely and relevant. Create additional communications platforms to ensure information and content reaches community members.
Community Life and Culture	Community Life and Culture	The City's Community Life and Culture Division is comprised of four departments: Continuum of Care, Recreation and Community Services Department, and Library Services. The Ontario Continuum of Care encompasses a network of providers, programs and services to help residents facing housing, food, employment, and wellness challenges. For some of these programs, the City contracts with nonprofit providers and partners with the County of San Bernardino. The City of Ontario's Recreation & Community Services Department provides opportunities for wholesome, year-round public recreational services for every age group. Through a comprehensive array of programs and events, the Department continually strives to meet the City Council's goal to provide enhanced recreational, educational, cultural and healthy activities to the community. The Department operates six community centers, a senior center, and provides programming in over thirty parks, three dog parks, and a municipal golf course. Expansion and Improvement: Ensure the outreach and education of the City's most vulnerable populations are

Table 5-1b: City of Ontario Capabilities Assessment Administrative and Technical Capabilities		
Resource Name	**Lead Department**	**Description (Effect on Hazard Mitigation)**
		prioritized through the Continuum of Care Division. Integrate the mitigation actions and strategies into overall programming for capital improvements of recreation and community services.
Community Improvement	Community Development	The City of Ontario Community Improvement Department is responsible for enforcing Municipal Code regulations on private property throughout the city. The Ontario Municipal Code regulates parking on private property, zoning, property maintenance, weed abatement on undeveloped lots and other substandard conditions on residential, commercial, and industrial properties. Expansion and Improvement: Utilize code compliance as a means of incorporating mitigation into structures and improvements conducted by residents and businesses.
Engineering	Community Development	The department is charged with overseeing, planning, designing, and implementation of infrastructure projects. Some of the department's functions include: • Act as the lead agency for construction and public works contracts within the Right-of-Way. • Program, plan, design and administer the construction of the annual Capital Improvement Program. • Issue encroachment and traffic control permits for any work within the Right-of-Way. • Inspect construction within the Right-of-Way to verify conformance with the permit conditions and compliance with the latest City codes. • Review all proposed residential, commercial and industrial development projects and provide engineering input as well as conditions of approval for proposed projects. • Plan check all development plans including those that impact other department functions. • Manage the NPDES program activities, such as business inspection, construction site inspection, public education, and outreach, etc. • Manage traffic engineering and transportation planning activities. • Provide support for other departments working within the Right-of-Way.

Table 5-1b: City of Ontario Capabilities Assessment		
Administrative and Technical Capabilities		
Resource Name	**Lead Department**	**Description (Effect on Hazard Mitigation)**
		Expansion and Improvement: Integrate mitigation actions and strategies into the Capital Improvements Program and annual budgeting.
Housing	Community Development	The Housing Department administers funds the City receives from the United States Department of Housing and Urban Development (HUD). These funds are authorized under HUD's Community Development Block Grant (CDBG) program and used to benefit low- and moderate-income families and aid in the rehabilitation and development of blighted areas within the City. Expansion and Improvement: Integrate mitigation actions and strategies into low- and moderate-income areas to reduce blight and potentially spur further investment.
Planning	Community Development	The Planning Department plays a critical role in achieving the City Council's goals and objectives relative to land use, urban design, and the quality and sustainability of the built environment. The department conducts site plan reviews for residential, commercial, and manufacturing developments. They also process Conditional Use Permits, variances, zoning changes, and General Plan amendments. Expansion and Improvement: Provide opportunities for continued education to Community Development staff to maintain state-of-the-art knowledge of new code and regulatory requirements.
Building	Community Development	The Building Department provides professional plan review and inspection services to ensure buildings and projects are built and developed in compliance with all applicable municipal and state code requirements. Expansion and Improvement: Provide opportunities for continued education to Community Development staff to maintain state-of-the-art knowledge of new code and regulatory requirements.
Economic Development	Economic Development	The Economic Development Department supports and recruits business to the city. Expansion and Improvement: Identify economic development opportunities that incorporate mitigation actions and strategies.
Financial Services	Financial Services	The Finance Department is tasked with maintaining reliable accounting records, payment of approved demands against the City treasury, financial statement reporting, preparation of the annual budget, prudent fiscal planning, payroll processing and debt administration. Expansion and Improvement: Assist with key mitigation activities associated with cost tracking hazard events and disasters, identifying grant funding opportunities, grant reporting and administration, and establishing financial risk calculations that

Table 5-1b: City of Ontario Capabilities Assessment Administrative and Technical Capabilities		
Resource Name	**Lead Department**	**Description (Effect on Hazard Mitigation)**
		can help assist with budgeting of operations, maintenance, and capital improvements.
Human Resources	Human Resources	The Human Resources Department plans, coordinates and administers a comprehensive human resources management program for the City of Ontario and its employees. This includes the recruitment and retention of highly qualified employees, maintenance of a competitive employee compensation program, implementation and use of current technology for the City's human resources information systems (HRIS), organizational and employee development, and employee/labor relations. The Risk Management Department identifies, evaluates and manages the City's risk and liability programs. This includes claims administration, cost recovery, the maintenance of liability/insurance coverage as well as the compliance with governmental regulation. In addition, the department administers the City's workers' compensation and employee safety programs. Expansion and Improvement: Increase knowledge and information through better data collection and tracking.
Information Technology	Information Technology	The role of the IT Department is to support the operational departments with reliable systems and information on a daily basis. The most critical support required of IT being network, communications and applications support. The IT department provides short- and long-term direction in planning, researching, selecting and deploying future technologies. IT strives to accommodate improved business process automation, self-service and quality customer service through a variety of hardware and software solutions. Expansion and Improvement: Increase system redundancy and resiliency through improvements to technologies and connectivity.
Municipal Utilities Company	Municipal Utilities Company	The Utilities Department provides production, transmission, and distribution of the City's domestic water supply; wastewater collection services; and recycling services to Ontario residents. Expansion and Improvement: Increase system redundancy and resiliency through enhanced systems operations and additional connections within and outside of the city.
Public Safety	Police Department	Ontario Police Department is tasked with protecting life and property while preserving the peace. This department is responsible for conducting emergency preparedness activities, investigating criminal activity, and directing traffic. The Department has four bureaus – Airport Operations Bureau, Investigations, Special Operations, and Administrative Services Bureau.

Table 5-1b: City of Ontario Capabilities Assessment Administrative and Technical Capabilities		
Resource Name	**Lead Department**	**Description (Effect on Hazard Mitigation)**
		Expansion and Improvement: Provide training to Officers to better enable them to see potential hazards and take action to report them.
Emergency Management	Fire	Develops, coordinates, and manages programs that prevent, prepare for, respond to, recover from, and mitigate natural and human-caused disasters and emergencies. Expansion and Improvement: Increase coordination and collaboration with other City departments, especially during annual budgeting.
Fire Department	Fire	Ontario Fire Department has 227 personnel comprised of 186 sworn firefighters and 41 professional staff members serving the community across six bureaus – Operations/Airport Services, Fire Prevention, Support Services, EMS, Training and Professional Services, and Administrative Services. Expansion and Improvement: Proactively identify opportunities to coordinate and collaborate with neighboring jurisdictions to increase City and region-wide capabilities.
Public Works	Public Works	The City of Ontario Public Works Department is responsible for maintaining and improving the City's vital infrastructure, including streets, sidewalks, parks, landscaping, sewers, storm drains, and public facilities. Services are divided into three subdivisions: Integrated Waste (provides refuse collection services to resident and businesses), Municipal Services (maintains City and community facilities and provides City fleet services), and Parks and Street Maintenance. These services include maintenance of public buildings and facilities, landscaping and park upkeep, street and sidewalk maintenance and repair, storm drain and sewer servicing, and graffiti abatement. Expansion and Improvement: Improve the understanding of the role that daily activities play in hazard mitigation.
Floodplain Manager	Community Development Department	The duties and responsibilities of the Floodplain Administrator shall include, but not be limited to: • Permit review • Flood hazard reduction • NFIP program administration • Construction inspections Expansion and Improvement: The Floodplain Administrator supports compliance with NFIP requirements, advocates for appropriate development in flood hazard areas, and provides technical expertise on effective flood mitigation activities. This can support mitigation activities.
Planning Commission	Community Development Department	The Planning Commission is responsible for reviewing proposed residential and commercial development projects, subdivisions, and land use requests on private property, to determine their compliance with applicable City regulations. The Commission has the authority to approve various development projects that comply with City requirements. In

Table 5-1b: City of Ontario Capabilities Assessment Administrative and Technical Capabilities		
Resource Name	**Lead Department**	**Description (Effect on Hazard Mitigation)**
		addition, the Commission makes recommendations to the City Council with respect to the City's General Plan, Zoning Code, Specific Plans and other matters related to development within the City. The Commission may be responsible for implementing mitigation items pertaining to the Commission's scope. Expansion and Improvement**:** Provide opportunities for continued education to members of the Planning Commission to maintain state-of-the-art knowledge of new code and regulatory requirements.
City Attorney	City Manager's Office	Reviews and approves resolutions and ordinances. Expansion and Improvement: Provide opportunities for the City Attorney to review updates to regulatory information to provide expert review of City resolutions and ordinances that may address hazard mitigation
Southern California Association of Governments (SCAG)	SCAG	Functions as the Metropolitan Planning Organization for six counties: Los Angeles, Orange, San Bernardino, Riverside, Ventura, and Imperial. As the designated Metropolitan Planning Organization, the Association of Governments is mandated by the federal government to research and draw up transportation, growth management, hazardous waste management, and air quality plans. Expansion and Improvement: Attend SCAG meetings. Continue to participate in SCAG-sponsored programs. Routinely coordinate with SCAG staff to stay informed of current planning initiatives.
GIS	Community Development Department	Provides complex mapping and data management of City facilities, land use, and potential hazards. Supports visualization of complex data sets using geo-location and data correlation. Expansion and Improvement: Acquire and conduct training for GIS technicians on the latest versions of ArcGIS.
Emergency Radio Services	Ontario ECS	Ontario Emergency Communications Service (ECS) is a specialized detail within CERT tasked with providing auxiliary communications during special events and disasters. The primary mission and purpose of the Ontario ECS is to support emergency communications during periods of local, regional, or national emergencies. By providing the Ontario Fire Department and Police Department communication back-up with an amateur radio system, the integrity of public safety services can be ensured. To fulfill this mission, Emergency Communications Service members must be flexible. They must be able to adapt to a wide range of potential situations, which ECS may be called upon, for support.

Table 5-1b: City of Ontario Capabilities Assessment		
Administrative and Technical Capabilities		
Resource Name	**Lead Department**	**Description (Effect on Hazard Mitigation)**
		Expansion and Improvement: Continue to recruit amateur radio operators. Conduct preparedness exercises to provide proficiency in supporting emergency response.

Table 5-1c: City of Ontario Capabilities Assessment		
Financial Resources		
Financial Resource	**Administrator**	**Description (Effect on Hazard Mitigation)**
General Fund	Department Specific	Program operations and specific projects. Consists of property tax, sales tax, transient occupancy tax, and franchise tax that can be used for general purposes. Expansion and Improvement: Hazard mitigation projects may be considered during the annual budgeting process for funding from the general fund.
Enterprise Funds	Fund specific	The City operates a variety of Special Revenue Funds. Special Revenue Funds are used to account for revenue derived from specific taxes or other revenue sources that are restricted by law or administrative action to be expended for specified purposes. Expansion and Improvement: Where permissible, Special Revenue Funds may be considered during the annual budgeting process for funding mitigation projects.
Community Development Block Grants (CDBG)	Fund Specific	The CDBG program provides funding for eligible senior activities such as in-home care, art classes, counseling, and home-delivered meals. HUD also provides Disaster Recovery Assistance in the form of flexible grants to help cities, counties, and States recover from Presidentially declared disasters, especially in low-income areas, subject to the availability of supplemental appropriations. Expansion and Improvement: Where applicable, CDBG grants should be used to fund mitigation projects that enhance the resiliency of low-income and underserved communities.
Hazard Mitigation Grant Program (HMPG)	Emergency Management	Provides support for pre-and post-disaster mitigation plans and projects. Expansion and Improvement: Train staff on notice of intent (NOI) procedures and track opportunities on the Cal OES mitigation website to initiate applications for grant funding.
Building Resilient Infrastructure and Communities (BRIC)	Grant Funding	Provides support for pre-disaster mitigation plans and projects. Expansion and Improvement: Train staff on notice of intent (NOI) procedures and track opportunities on the Cal OES mitigation website to initiate applications for grant funding.
Flood Mitigation Assistance grant program (FMA)	Grant Funding	Mitigates structures and infrastructure that have been repetitively flooded. Expansion and Improvement: Train staff on notice of intent (NOI) procedures and track opportunities on the Cal OES mitigation website to initiate applications for grant funding.
Special Use Funds		Program operations and specific projects. Consists of property tax, sales tax, transient occupancy tax, and franchise tax that can be used for general purposes. Expansion and Improvement: Hazard mitigation projects may be considered during the annual budgeting process for funding from the general fund.

Table 5-1d: City of Ontario Capabilities Assessment		
Education and Outreach Resources		
Name	**Lead Organization**	**Description (Effect on Mitigation)**
San Bernardino County Emergency/Disaster Readiness web site https://sbcfire.org/oes/	San Bernardino County OES	The San Bernardino County Fire website has educational material on making an emergency plan, stocking supplies staying informed, and getting involved. Expansion and Improvement: Provide links to the County website on the City's website. Post material on social media accounts that provide a link to the appropriate County website page
Ontario Community Emergency Response Team (CERT) https://www.ontarioca.gov/CERT	Ready Ontario	The CERT Program is a 20-hour all-risk, all-hazard training offered by the City. This valuable course is designed to help citizens protect themselves, their family, their neighbors, and their neighborhood in an emergency. Expansion and Improvement: Share pertinent information with the CERT volunteers through CERT Monthly meetings. CERT volunteers can then share the information with the public during community engagement booths/events.
Ontario Continuity & Organizational Resilience in Emergencies (CORE) Academy https://www.ontarioca.gov/CORE	Ready Ontario	The CORE Academy prepares businesses, nonprofits, or faith-based organizations for emergencies through a structured series of training sessions. This new Seminar was piloted on May 25, 2022, and is designed to teach fundamental skills and provide tools to ensure organizations can build disaster resiliency. Expansion and Improvement: Distribute materials to past cohorts via email as "partners in preparedness." Utilize CORE to build a network of resilience amongst organizations across the City to better facilitate information sharing like this.
City Website Ready Ontario https://www.ontarioca.gov/news/readyontario-emergency-preparedness	Ready Ontario	This is a one-stop shop for emergency preparedness information. The public can learn what to do in an emergency, processes to get connected, and helpful guides to prepare them.

Table 5-1d: City of Ontario Capabilities Assessment		
Education and Outreach Resources		
Name	**Lead Organization**	**Description (Effect on Mitigation)**
		Expansion and Improvement: Devote a page on the website to post the HMP and provide updates on the progress of the mitigation action plan.
Ontario National Night Out	Ontario Police Department	National Night Out is a community-oriented program themed as a block party to increase crime prevention awareness. Expansion and Improvement: Include booths and National Night Out events focusing on family and individual preparedness and advertise mitigation activity success stories.

Hazard Mitigation Strategies and Actions

Hazard Mitigation Goals

The goals identified in Chapter 1 help develop policies to protect community members, ecosystems, and other important assets from hazard events. These goals were developed to ensure consistency with the Ontario Plan 2050 Safety Element, which plays an important role in risk reduction within Ontario. These goals informed the development of mitigation actions and act as checkpoints to help City staff determine implementation progress.

Evaluation of Potential Hazard Mitigation Actions

Based on the hazard profiles, threat assessment, capabilities assessment, community survey results, discussions among HMPC members, and existing best practices, a set of potential mitigation actions was developed and then evaluated based on the following criteria:

- FEMA requires local governments to evaluate the monetary and non-monetary costs and benefits of potential mitigation actions. Although local governments are not required to assign specific dollar values to each action, they should identify the general size of costs and benefits.
- The HMPC may elect to include measures with a high cost or low benefits, but such measures should be clearly beneficial to the community and an appropriate use of local resources.

In addition, FEMA directs local governments to consider the following questions as part of the financial analysis:

- What is the frequency and severity of the hazard type to be addressed by the action, and how vulnerable is the community to this hazard?
- What impacts of the hazard will the action reduce or avoid?

- What benefits will the action provide to the community?

The HMPC also chose to review and revise the potential hazard mitigation actions using a third set of criteria (**Table 5-2**), known as STAPLE/E (Social, Technical, Administrative, Political, Legal, Economic, and Environmental). The HMPC did not formally assess every potential mitigation action under all STAPLE/E criteria but used the criteria to guide and inform the discussion. A discussion also occurred regarding how the criteria might be used to evaluate grant applications the City may submit in the future as part of plan implementation.

Prioritization

As part of the mitigation actions development and review, the HMPC also prioritized the actions. The prioritization efforts looked at the risks and threats from each hazard, financial costs and benefits, technical feasibility, and community values, among others. HMPC members were asked to identify their priority actions through a voting exercise. Items prioritized by at least three HMPC members are considered high priority, and those prioritized by one or two members are considered medium priority. Actions not prioritized by any HMPC member are considered low priority.

Table 5-2: STAPLE/E Criteria

Issues	Criteria
Social	• **Is the action socially acceptable to community members?** • **Would the action mistreat some individuals?** • **Is there a reasonable chance of the action causing a social disruption?**
Technical	• **Is the action likely to reduce the risk of the hazard occurring, or will it reduce the hazard's effects?** • **Will the action create new hazards or make existing hazards worse?** • **Is the action the most useful approach for the City to take, given the City and community members' goals?**
Administrative	• **Does the City have the administrative capabilities to implement the action?** • **Are there existing City staff who can lead and coordinate the measure's implementation, or can the City reasonably hire new staff for this role?** • **Does the City have enough staff, funding, technical support, and other resources to implement the action?** • **Are there administrative barriers to implementing the action?**
Political	• **Is the action politically acceptable to City officials and other relevant jurisdictions and political entities?** • **Do community members support the action?**
Legal	• **Does the City have the legal authority to implement and enforce the action?** • **Are there potential legal barriers or consequences that could hinder or prevent the implementation of the action?**

	• **Is there a reasonable chance that the implementation of the action would expose the City to legal liabilities?** • **Could the action reasonably face other legal challenges?**
Economic	• **What are the monetary costs of the action, and do the costs exceed the monetary benefits?** • **What are the start-up and maintenance costs of the action, including administrative costs?** • **Has the funding for action implementation been secured, or is a potential funding source available?** • **How will funding the action affect the City's financial capabilities?** • **Could the implementation of the action reasonably burden the City's economy or tax base?** • **Could there reasonably be other budgetary and revenue impacts to the City?**
Environmental	• **What are the potential environmental impacts of the action?** • **Will the action require environmental regulatory approvals?** • **Will the action comply with all applicable federal, state, regional, and local environmental regulations?** • **Will the action reasonably affect any endangered, threatened, or otherwise sensitive species of concern?**

Cost Estimates

To meet the cost estimation requirements of the hazard mitigation planning process, the HMPC identified relative cost estimates based on their understanding of the mitigation action intent and their experience developing identical or similar programs/implementing projects. Three cost categories based on the City's typical cost criteria were used for budgeting purposes:

- Low cost ($): $100,000 or less
- Medium cost ($$): $100,001 to $999,999
- High cost ($$$): Greater than $1,000,000

Based on the criteria and evaluation processes used during Plan development, the HMPC prepared a prioritized list of mitigation actions to improve Ontario's resilience to hazard events. **Table 5-3** lists the mitigation actions, the prioritization of each action, and other details related to implementation. In addition to mitigation action and strategies, several preparedness activities were identified and denoted with the letter "P."

Timeframes

Table 5-3 includes timeframes that provide general timing durations due to the nature of the mitigation actions identified by the City. The following timeframes are used based on the following conditions:

- **Ongoing (Annually):** Actions that identify this timeframe are the types of actions that City staff would conduct on an annual basis.

- **Ongoing (As Needed):** Actions that identify this timeframe include activities that City staff would conduct in response to a request by internal (City Departments) or external (Property Owners) forces.
- **Future Planning Process:** Actions identified within this timeframe are considered low-priority actions that the City would like to continue to track but does not feel they would be able to implement in the current planning implementation timeframe.

National Flood Insurance Program

Ontario participates in the National Flood Insurance Program (NFIP), which was created by Congress in 1968 to provide flood insurance at subsidized rates to homeowners who live in flood-prone areas. Individual communities have the option to participate in the NFIP, although property owners who live in nonparticipating communities with flood-prone areas will not be able to buy flood insurance through the program. Additionally, nonparticipating communities with mapped floodplains cannot receive federal grants or loans for development activities in flood-prone areas and cannot receive federal disaster assistance to repair flood-damaged buildings in mapped floodplains.

Initial Flood Hazard Boundary Map	**08/09/1974**
Initial Flood Insurance Rate Map	**12/02/1980**
NFIP Participation Date	**12/02/1980**
Current Effective Map Date	**09/02/2016**

Although participation is not a dedicated hazard mitigation action, Ontario will continue to participate in NFIP and comply with the program's requirements through continued enforcement of the City's Floodplain Management Regulations (Municipal Code Chapter 13: Flood Damage Prevention Program).

Adoption of Minimum Floodplain Management Criteria, and Implementation and Enforcement of Floodplain Management Regulations	**Chapter 13: Flood Damage Prevention Program (codified from Ord. 2109, eff. November 19, 1980, was amended by Ord. 2409, eff. February 4, 1988)**
Designee to Implement NFIP	**Article 4. Administration, Sec. 8-13.402. Designation of the Floodplain Administrator. The Ontario Development Director fulfills this role.**
Implementation of Substantial Improvement/ Substantial Damages Provisions	**Article 5. Provisions for Flood Hazard Reduction**
***Ordinances are hyperlinked**	

These regulations apply to all areas of special flood hazards, areas of flood-related erosion hazards and areas of mudslide (i.e., mudflow) hazards within the City. The purpose of these regulations is to promote public health, safety, and general welfare and to minimize public and private losses due to flood conditions. This chapter also includes

methods of reducing flood losses, the basis for establishing flood hazard areas, development permit requirements, duties and responsibilities of the City's Floodplain Administrator, the development standards that apply in flood-prone areas and required documentation and analysis for construction within these areas. As part of the City's efforts to comply with NFIP, Ontario will make updates and revisions to these regulations periodically to ensure they are most effective at minimizing the threat of harm from flood events. These updates and revisions may be promoted by changes in local demographics, shifts in land use, changes to flood regimes such as frequency and intensity of flood events, and other factors that may warrant municipal action. The City will also continue to incorporate any changes to the locations and designations of mapped floodplains into future planning documents, including future updates to this Plan.

The City of Ontario contains Special Flood Hazard Areas that include 46 policies in force, with approximately $48,122 in premiums. Total insurance coverage for these policies amounts to $17,216,000. According to FEMA a total of 16 closed paid losses have occurred totaling $74,312; however, only one repetitive loss property and no severe repetitive loss properties were identified by FEMA. The City does not know what type of property is currently identified as a repetitive loss property by FEMA.

Table 5-3: Mitigation Action Implementation Plan						
Mitigation Action		**Potential Funding Sources**	**Responsible Department**	**Relative Cost***	**Time frame**	**Priority**
Preparedness Activities						
P1	Conduct regular emergency preparedness drills and training exercises for City staff.	General Fund, Grants	OEM	$	Ongoing	N/A
P2	Continue agreements with local school districts to ensure that school facilities can act as evacuation sites during major emergencies.	General Fund, Grants	OEM	$	Ongoing	N/A
P3	Promote and expand participation of local businesses, non-profits, and faith-based organizations in the Ontario Continuity & Organizational Resilience in Emergencies Academy (CORE) trainings and preparedness activities.	General Fund, Grants	OEM	$	Ongoing	N/A
P4	Expand participation in the Ontario Community Emergency Response Team (CERT) program.	General Fund, Grants	OEM	$	Initiate by 2023/2024	N/A
P5	Ensure that community evacuation plans include provisions for community members who do not have access to private vehicles or are otherwise unable to drive.	General Fund, Grants	OEM	$$	Initiate by 2024/2025	N/A
P6	Continue to ensure effective emergency notifications through multiple media formats, in at least English and Spanish, about pending, imminent, or ongoing emergency events. Ensure that information is accessible to persons with access and functional needs.	General Fund, Grants	OEM	$	Ongoing	N/A
P7	Maintain at least one emergency power-generating station in all critical facilities that the City could use as emergency public assembly areas, such as City Hall, Community Centers, and any other locations designated in the future.	General Fund, Grants	OEM	$$$	Ongoing	N/A
P8	Update the Ontario Emergency Operations Plan to identify backup power and communications locations for critical facilities and prepare a hazardous materials annex.	General Fund, Grants	OEM	$	Ongoing	N/A
P9	Continuously update response procedures for first responder departments to properly address new hazard events as they emerge.	General Fund, Grants	OEM	$	Ongoing	N/A
P10	Ensure that the City has an adequate supply of sandbags for residents and businesses, including prefilled sandbags for individuals who may be unable to fill them on their own.	General Fund, Grants	OEM	$	Ongoing	N/A

P11	Conduct active shooter drills for City staff, residents, and businesses.	General Fund, Grants	OEM	$	Ongoing	N/A
P12	Increase the number of City staff who have Cal OES Safety Assessment Program (SAP) credentials.	General Fund, Grants	OEM, Building Department	$	Initiate by 2023/2024	N/A
Multiple Hazards						
1.01	Promote and expand the use of 'Ready Ontario' as the primary location for emergency preparedness and hazard mitigation information that includes: 1. An outreach team that promotes emergency preparedness and hazard mitigation activities 2. A cadre of volunteers from the City's CERT Program, Continuity & Organizational Resilience in Emergencies Academy (CORE), Ontario Emergency Communications Service (ECS) HAM Radio Operators, and other organizations to support hazard mitigation and disaster preparedness activities. (Hazards addressed: All)	General Fund, BRIC/ HMGP Grants, Other Grants	OEM, Fire	$	Ongoing (Annually)	High
1.02	Install energy-efficient equipment upgrades in City facilities to increase the longevity of the fuel supply for backup generators. (Hazards addressed: All)	General Fund, BRIC/ HMGP Grants, Other Grants	Public Works Facilities	$$$	Initiate by 2026	High
1.03	Conduct routine updates to Facility Conditions Assessments for City-owned infrastructure and other utilities and coordinate with other agencies to ensure inspections of other important infrastructure. (Hazards addressed: All)	General Fund, BRIC/ HMGP Grants, Other Grants	OMUC, Public Works Facilities, Engineering	$	Ongoing (Annually)	Medium
1.04	Repair, as feasible, all major deficiencies discovered by inspections to prevent collapse, failure, or damage in the event of a natural disaster. (Hazards addressed: All)	General Fund, BRIC/ HMGP Grants, Other Grants	OMUC, Public Works Facilities, Engineering, Building	$$$	Initiate by 2023/2024	High
1.05	Incentivize public and private utility operators to harden their lines passing through the City from potential breaches. Encourage the adoption of supervisory control and data acquisition (SCADA) to allow instantaneous shutdown of line breaches. Use mitigation grants to incentivize entities to partner with the City to complete these projects. (Hazards addressed: All)	General Fund, BRIC/ HMGP Grants, Other Grants	Community Development	$	Initiate by 2026	Low

1.06	Install and harden emergency backup power at critical facilities deemed necessary. Prioritize installations for facilities that serve as key cooling/warming centers and evacuation centers. (Hazards addressed: All)	General Fund, BRIC/ HMGP Grants, Other Grants	OMUC, Public Works Facilities, Engineering	$$$	Initiate by 2023/2024	High
1.07	Conduct a feasibility assessment of installing solar and battery backup systems at key critical facilities within the City. (Hazards addressed: All)	General Fund, BRIC/ HMGP Grants, Other Grants	OMUC, Public Works Facilities	$$$	Future Planning Process	Low
1.08	Work closely with community groups to increase awareness of hazard events and resiliency opportunities among socially vulnerable community members, including those experiencing homelessness. (Hazards addressed: All)	General Fund, BRIC/ HMGP Grants, Other Grants	OEM, Community Life & Culture	$	Ongoing (As Needed)	Medium
1.09	Avoid building new City-owned key facilities in mapped hazard areas. If no feasible sites outside mapped areas exist, ensure that such facilities are hardened against hazards beyond any minimum building requirements/ mitigation standards. (Hazards addressed: All)	General Fund, BRIC/ HMGP Grants, Other Grants	Public Works, Engineering, Building	$	Ongoing (As Needed)	Low
1.10	Closely monitor changes in the boundaries of mapped hazard areas resulting from land use changes or climate change and adopt new mitigation actions or revise existing ones to ensure continued resiliency. (Hazards addressed: All)	General Fund, BRIC/ HMGP Grants, Other Grants	Community Development	$	Ongoing (As Needed)	Low
1.11	Integrate policy direction and other information from this Plan into other City documents, including the General Plan, Emergency Operations Plan, and Capital Improvements Program. (Hazards addressed: All)	General Fund, BRIC/ HMGP Grants, Other Grants	All Departments	$	Ongoing (Annually)	Medium
1.12	Monitor funding sources for hazard mitigation activities. (Hazards addressed: All)	General Fund, BRIC/ HMGP Grants, Other Grants	OEM	$	Ongoing (Annually)	Low
1.13	Integrate climate change mitigation and adaptation information and analysis into future LHMP updates and other City Plans, where practicable. (Hazards addressed: All)	General Fund, BRIC/ HMGP Grants, Other Grants	OEM, Planning	$	Initiate by 2027	Low

1.14	Update the City's Master Plans (General Plan, Utilities Master Plan, etc.) periodically (in conjunction with the LHMP and CIP) to incorporate new data (FEMA flood maps and information) and/or address emerging issues. (Hazards addressed: All)	General Fund, BRIC/ HMGP Grants, Other Grants	All Departments	$$	Initiate by 2025	Medium
Earthquake/Geologic Hazards						
2.01	Develop a Public Information Program (PIP) for earthquake awareness and mitigation. The program should focus on reducing injury and property damage and encourage partnerships, activities, and products to educate the public about earthquake science and motivate homeowners to prepare for earthquakes.	General Fund, BRIC/ HMGP Grants, Other Grants	OEM, Building, Communications	$	Initiate by 2026	Medium
2.02	Develop a small project-based retrofit program to assist homeowners with simple earthquake mitigation activities (i.e., water heater straps, furniture anchoring, gas shut-off tools, and other emergency supplies) to reduce strain on City resources during an event.	General Fund, BRIC/ HMGP Grants, Other Grants	OEM, Building, Community Improvement	$$	Future Planning Process	Low
2.03	Conduct an educational campaign, incentivize and promote medium-scale seismic retrofits, such as window films to minimize shattering, anchors for rooftop-mounted equipment, bracing for masonry chimneys, and other preventative measures to reduce damage to private buildings.	General Fund, BRIC/ HMGP Grants, Other Grants	OEM, Building, Community Improvement	$	Initiate by 2026	Medium
2.04	Periodically update the seismically vulnerable buildings and structures inventory and pursue funding to incentivize retrofits of these structures to be more resilient to earthquakes in accordance with State and Local building standards and Historic Preservation Program requirements. Assess soft story conditions for apartment buildings constructed prior to 1980.	General Fund, BRIC/ HMGP Grants, Other Grants	Building	$	Ongoing	Low
2.05	Conduct a seismic analysis of all City-owned key facilities and retrofit vulnerable facilities.	General Fund, BRIC/ HMGP Grants, Other Grants	OMUC, Building, Public Works Facilities	$$$	Initiate by 2026	Medium
2.06	Encourage the installation of resilient (seismically appropriate) piping for new or replacement pipelines in close coordination with utility providers.	General Fund, BRIC/ HMGP Grants, Other Grants	OMUC, Public Works Facilities	$	Ongoing (As Needed)	Medium

2.07	To the extent feasible, construct all new and significantly retrofitted City-owned facilities to remain operational in the event of a major earthquake.	General Fund, BRIC/ HMGP Grants, Other Grants	OMUC, Public Works Facilities, Engineering	$$$	Ongoing (As Needed)	Low
2.08	Retrofit key critical facilities with seismically rated window film treatments that ensure glass windows do not shatter during a strong seismic event.	General Fund, BRIC/ HMGP Grants, Other Grants	Public Works Facilities	$$	Future Planning Process	Low
2.09	Improve local understanding of the threat of a major earthquake by conducting a citywide scenario modeling potential loss of life and injuries, destroyed and damaged structures, and interruptions to key services.	General Fund, BRIC/ HMGP Grants, Other Grants	OEM, Public Works Facilities	$	Initiate by 2026	Medium
2.10	Coordinate with Ontario Municipal Utilities Company (OMUC) on monitoring groundwater elevations in areas where liquefaction and subsidence may be a concern.	General Fund, BRIC/ HMGP Grants, Other Grants	OMUC	$	Ongoing (Annually)	Low
Flood						
3.01	Investigate the use of permeable paved and landscaped swales for new construction and replacement of City-owned hardscaped areas.	General Fund, BRIC/ HMGP Grants, Other Grants	Public Works Parks and Maintenance	$$	Future Planning Process	Low
3.02	Analyze if new critical facilities can be built a minimum of 1 foot higher than the anticipated 500-year flood elevation height to determine where it is feasible.	General Fund, BRIC/ HMGP Grants, Other Grants	Public Works Facilities, Engineering, Building, Development	$	Initiate by 2026	Medium
3.03	Identify potential flood improvements that reduce inundation from both storm flows and potential dam inundation effects.	General Fund, BRIC/ HMGP Grants, Other Grants	Public Works	$	Initiate by 2026	Medium
3.04	Retrofit roadway medians to capture stormwater during rain events. Prioritize improvements along major arterials/ roadways throughout the City.	General Fund, BRIC/ HMGP Grants, Other Grants	Planning, Engineering	$$$	Initiate by 2023/2024	High
3.05	Conduct frequent cleanings of storm drain intakes, especially before and during the rainy season.	General Fund, BRIC/ HMGP Grants, Other Grants	Public Works	$	Ongoing (Annually)	Low

3.06	Track areas where ponding frequently occurs during heavy rainfall and install new drains or upgrade existing ones to reduce water ponding.	General Fund, BRIC/ HMGP Grants, Other Grants	Public Works, Engineering	$$$	Initiate by 2023/2024	High
3.07	Monitor intersections that frequently flood during rain events and identify improvements to alleviate these conditions.	General Fund, BRIC/ HMGP Grants, Other Grants	Public Works, Engineering	$$$	Ongoing (As Needed)	Medium
3.08	Explore the feasibility of a mass notification siren and public address network to alert residents and visitors of potential flash floods and other flooding hazards, especially along the City's flood channel infrastructure.	General Fund, BRIC/ HMGP Grants, Other Grants	OEM, Public Works, Engineering	$$	Initiate by 2023/2024	Medium
Extreme Weather (High Winds, Extreme Heat, Severe Rainstorms)						
4.01	Conduct outreach to residents and businesses before the severe winds/ weather (Santa Ana Wind events) on proper tree maintenance and identification of potentially hazardous trees. (Hazards addressed: High Winds, Severe Weather/Storm)	General Fund, BRIC/ HMGP Grants, Other Grants	Communications	$	Ongoing (Annually)	Low
4.02	Remove or trim trees determined to be susceptible to blowing over during a severe wind event and underground power lines, where feasible. (Hazards addressed: High Winds, Severe Weather/Storm)	General Fund, BRIC/ HMGP Grants, Other Grants	Public Works	$$	Ongoing (Annually)	Medium
4.03	Increase the use and construction of shade structures within new developments, City facilities, parks, and trails to reduce urban heat island impacts. (Hazards Addressed: Extreme Heat)	General Fund, BRIC/ HMGP Grants, Other Grants	Public Works, Planning, Engineering, Recreation	$$	Ongoing (As Needed)	Medium
4.04	Evaluate the long-term capacity of designated cooling centers and shelters in the City to provide sufficient relief from extreme heat. Assess the need to expand services as the frequency, length, and severity of future heatwaves potentially change as a result of climate change. (Hazards addressed: Extreme Heat)	General Fund, BRIC/ HMGP Grants, Other Grants	OEM, Recreation	$	Future Planning Process	Low
4.05	Upgrade HVAC within City facilities to more efficient systems that may include split systems or decentralized systems that allow for heating and cooling the spaces needed, not entire buildings. (Hazards addressed: Extreme Heat)	General Fund, BRIC/ HMGP Grants, Other Grants	Public Works	$$$	Future Planning Process	Low

4.06	Implement a tree-planting program to diversify tree age and increase shaded areas in the City to reduce the effects of the urban heat island effect. (Hazards addressed: Extreme Heat)	General Fund, BRIC/ HMGP Grants, Other Grants	Public Works, Planning	$$	Future Planning Process	Low
4.07	Promote passive cooling design (brise soleil, long roof overhangs, locating windows away from southern facades, etc.) in new developments during the design review process. (Hazards addressed: Extreme Heat)	General Fund, BRIC/ HMGP Grants, Other Grants	Planning	$	Ongoing (As Needed)	Low
4.08	Promote early notifications to residents in advance of a severe weather event, focusing on effective communication methods with vulnerable populations to better ensure they have adequate time to prepare. (Hazards addressed: Severe Weather)	General Fund, BRIC/ HMGP Grants, Other Grants	OEM, Communications, Police, Fire	$	Ongoing (As Needed)	Medium
Hazardous Materials Release						
5.01	Discourage new sensitive land uses, including schools, parks, childcare centers, adult and senior assisted living facilities, and community centers, from locating near identified hazardous material facilities. Discourage or prohibit new hazardous material facilities from locating near sensitive land uses.	General Fund, BRIC/ HMGP Grants, Other Grants	Planning	$	Ongoing (As Needed)	High
5.02	Continuously inspect businesses and other properties storing hazardous materials and create an inventory of storage locations that require updates, maintenance, or renovation.	General Fund, BRIC/ HMGP Grants, Other Grants	Fire	$	Ongoing (Annually)	Low
5.03	Coordinate with hazardous materials generators/operators regularly to understand changes to their operations within the City.	General Fund, BRIC/ HMGP Grants, Other Grants	Fire	$	Ongoing (Annually)	Low
5.04	Continue to work with solid waste service contractors to educate residents and businesses on their safe disposal of small quantities of hazardous materials.	General Fund, BRIC/ HMGP Grants, Other Grants	Public Works	$	Ongoing (Annually)	Low
Urban Fire						
6.01	Educate and promote the proper maintenance and separation of power lines from trees and other hazards.	General Fund, BRIC/ HMGP Grants, Other Grants	Public Works	$	Ongoing (As Needed)	Medium

6.02	Conduct regular fuel modification projects to reduce fire hazard risks, such as clearing out dead vegetation in parks, open spaces, right-of-way embankments, and other areas that could become fuel for fires, such as within Cucamonga-Guasti Regional Park and surrounding neighborhoods.	General Fund, BRIC/ HMGP Grants, Other Grants	Public Works, Community Improvement	$$	Ongoing (Annually)	Low
6.03	Provide information and resources to residents citywide on ways to improve resilience to home fires, including procedures for fallen powerlines.	General Fund, BRIC/ HMGP Grants, Other Grants	Fire	$	Ongoing (Annually)	Low
6.04	Promote the removal of fire-prone tree species in the City, such as eucalyptus and pepper trees, especially in areas with heightened fire susceptibility (e.g., trees adjacent to powerlines).	General Fund, BRIC/ HMGP Grants, Other Grants	Public Works	$$	Ongoing (Annually)	Medium
Dam Inundation						
7.01	Coordinate with dam owners/operators, state, and federal agencies to collectively identify threats to the City and the region and identify ways to retrofit/strengthen the dams under their control.	General Fund, BRIC/ HMGP Grants, Other Grants	OEM	$	Ongoing (Annually)	Medium
7.02	Implement an early warning system/protocol that notifies downstream communities in the event of a potential dam failure incident.	General Fund, BRIC/ HMGP Grants, Other Grants	OEM	$$	Future Planning Process	Low
Human-Caused Hazards (Transportation Incidents, Terrorism, Communications Failure)						
8.01	Coordinate and enhance datasets with the School District, Hospitals, and other key entities within the City to better respond to mass-casualty and terrorism incidents. (Hazards addressed: Terrorism**)**	General Fund, BRIC/ HMGP Grants, Other Grants	Police	$	Ongoing (Annually)	Medium
8.02	Evaluate all critical facilities, facilities of concern, and business licenses, for potential human-caused hazard vulnerabilities and integrate counterterrorism design elements and building materials, where feasible. (Hazards addressed: Terrorism)	General Fund, BRIC/ HMGP Grants, Other Grants	Police	$	Initiate by 2026	Medium
8.03	Coordinate with the San Bernardino County Sheriff to monitor potential incidents resulting in terrorism and mass casualty incidents. (Hazards addressed: Terrorism/Mass Casualty Incidents)	General Fund, BRIC/ HMGP Grants, Other Grants	Police	$	Ongoing (Annually)	Low

8.04	Conduct proactive community policing during special events. Ensure that all staff involved in community policing are trained to engage with and respect community members while maintaining security. (Hazards addressed: Terrorism)	General Fund, BRIC/ HMGP Grants, Other Grants	Police	$	Ongoing (As Needed)	Medium
8.05	Prioritize any remaining grade separations to reduce or eliminate conflicts between different modes of travel. (Hazards addressed: Transportation Incidents)	General Fund, BRIC/ HMGP Grants, Other Grants	Public Works, Engineering	$$$	Initiate by 2025/26	Medium
8.06	Maintain relationships with Metrolink, Amtrak, and Railroad owners to improve rail safety. (Hazard addressed: Transportation Incident)	General Fund, BRIC/ HMGP Grants, Other Grants	Police, Engineering	$	Ongoing (Annually)	Low
8.07	Analyze communications systems to identify critical components and ensure these components are readily available to ensure communications resiliency. (Hazards addressed: Communications Failure)	General Fund, BRIC/ HMGP Grants, Other Grants	OEM, Police, IT & Broadband, Communications	$	Ongoing (Annually)	Medium
8.08	Expand the installation of fiber optics infrastructure and conduit (for future services) to enhance the city's communications systems and economic opportunities. (Hazards addressed: Communications Failure)	General Fund, BRIC/ HMGP Grants, Other Grants	OEM, Police, IT & Broadband, Communications	$$$	Initiate by 2023/2024	High
8.09	Enhance existing communication backup systems to minimize communications interruptions, as an annex to the City of Ontario Emergency Operations Plan. (Hazards addressed: Communications Failure)	General Fund, BRIC/ HMGP Grants, Other Grants	OEM, Police, IT & Broadband, Communications	$$$	Initiate by 2023/2024	High

2018 Mitigation Action Progress

The HMPC reviewed the mitigation actions from the 2018 plan. Since the preparation of the previous plan, City staff has recognized that many of the actions needed to be refined and integrated into the proposed mitigation actions matrix in **Table 5-3**. **Table 5-4** includes a summary of how these existing actions were incorporated into the proposed mitigation actions within the plan.

Table 5-4: 2018 Mitigation Actions Progress

Hazard	Mitigation Action	Description / Background	Integration into Table 5-3
ALL Hazard	Increase readiness for all hazards in the City of Ontario.	Develop a robust community outreach team to promote emergency preparedness and hazard mitigation activities. Develop a volunteer cadre to include CERT (Community Emergency Response Teams), Ham Radio Operators and faith-based organizations	This action was incorporated into Mitigation Action 1.01.
Wildfire	Continue to reduce fire hazards in the City of Ontario.	Through Code Enforcement enforce the weed abatement program to reduce fuels available to burn	This action was incorporated into Mitigation Action 6.02.
Earthquake	Improve public education programs and practices to residents for earthquake risk.	Public education and outreach programs are an efficient and cost-effective way to promote meaningful changes within a community. A Program for Public Information (PPI) for earthquake awareness and mitigation could significantly reduce injury and property damage to earthquake. Use a suite of partnerships, activities, and products to educate the public about earthquake	This action was modified and turned into Mitigation Action 2.01.

		science and motivating homeowners to become prepared for earthquakes.	
Flood	Provide adequate flood protection to minimize hazards and structural damage.	Utilize the National Flood Insurance Program. Participate in the National Flood Insurance Program (NFIP), which provides flood insurance within designated floodplains. Update NFIP data and maps with newly identified flood hazard areas in the County, as new information becomes available.	These mitigation actions were removed and replaced with actions 3.01 through 3.08.
Dam Inundation	Reduce damage from a breach in the San Antonio Dam.	Have Army Corps of Engineers review the inundation zones to reflect the retention basins, quarries, 2 subterranean freeways that now exist between the city and the dam	This action was incorporated into Mitigation Action 7.01.
		Promote the National Flood Insurance Program	This action was removed as it was deemed unnecessary, since the City already performs this action.
Anti-Terrorism	Use anti-terrorism strategies to discourage terrorism and protect the people, infrastructure and assets in Ontario from the effects of terrorism.	Use anti-terrorism design strategies to discourage / prevent acts of terrorism.	This action was incorporated into Mitigation Action 8.02.
		Identify and prioritize mitigation activities (anti-terrorism force protection) at critical facilities and gathering places that are vulnerable to terrorist attacks.	This action was incorporated into Mitigation Action 8.01.

Climate Change	Reduce the impacts of climate change on the City and limit human activities that change the atmosphere's makeup.	Meet greenhouse gas (GHG) reductions targets set forth by the Clean Air Act and The City's Community Climate Change Plan and the General Plan Environmental Element Section ER Continue working with the South Coast Air Quality Management District to meet GHG reductions targets. Continue implementing the energy conservation and efficiency measures identified in the County of San Bernardino Greenhouse Gas Emissions Reduction Plan, and the City Community Climate Change Plan	These actions were removed as the City recently completed an update Climate Action/Adaptation Plan that implements these actions.

PAGE INTENTIONALLY LEFT BLANK

Chapter 6 – Plan Maintenance

For this LHMP to remain effective and useful to the community of Ontario, it must remain up to date. An updated version of the LHMP will continue to guide Ontario hazard mitigation activities and help keep the City eligible for state and federal hazard mitigation funding. The HMPC has structured this LHMP so individual sections can easily be updated as new information becomes available and as new needs arise, helping to keep this Plan current.

This chapter discusses how to update this Plan to keep it in compliance with applicable state and federal requirements. This chapter also describes how the City can incorporate the mitigation actions described in Chapter 5 into existing programs and planning mechanisms and how public participation will remain an important part of Plan monitoring and future update activities.

Coordinating Body

The HMPC will remain responsible for maintaining and updating the Plan, including evaluating the Plan effectiveness as needed. Members of the HMPC will also coordinate the implementation of the Plan through their respective positions. **Table 1-1** contains a list of current members. In future years, staff and representatives (either current HMPC members or other individuals) from the following City Departments should be included in maintenance and update activities:

- Office of Emergency Management
- Community Life & Culture (Recreation)
- Community Life & Culture (Library)
- Community Life & Culture (Museum)
- Community Development (Building)
- Community Development (Community Improvement)
- Community Development (Engineering)
- Community Development (Housing)
- Community Development (Planning)
- Economic Development
- Finance
- Fire Department
- Human Resources/Risk Management
- Information Technology
- Management Services (City Communications)
- Management Services (Records Management)
- Management Services (Broadband)
- Management Services (Innovation, Performance, and Audit)
- Ontario Municipal Utilities Company (OMUC)
- Police Department
- Public Works (Municipal Services)
- Public Works

The staff member currently serving as the HMPC leader (responsible for coordinating future updates) is in the Office of Emergency Management (within the Fire Department). He/ she will serve as the project manager during the update process or designate this role to another staff member. The HMPC leader or their designee will coordinate the maintenance of this Plan, lead the formal Plan review and evaluation activities, direct the Plan update, and assign tasks to other members of the HMPC to complete these activities. Such tasks may include collecting data, developing new mitigation actions, updating mitigation actions, making presentations to City staff and community groups, and revising sections of the Plan.

Plan Implementation

The effectiveness of the Plan depends on the successful implementation of the mitigation actions. This includes integrating mitigation actions into existing City plans, policies, programs, and other implementation mechanisms. The mitigation actions in this Plan are intended to reduce the damage from hazard events, help the City secure funding, and provide a framework for hazard mitigation activities.

HMPC members prioritized the hazard mitigation actions in **Table 5-3** in Chapter 5. These priorities will guide the implementation of these actions through new or existing City mechanisms as resources are available. The LHMP project manager is responsible for overseeing this Plan's implementation, promotion, and maintenance, as well as facilitating meetings and other coordinating activities related to Plan implementation and maintenance.

The key City Plans that should incorporate content from this LHMP include the following:

- **The Ontario Plan 2050 - Safety Element** – Content from the LHMP incorporated into the Safety Element will ensure the goals and policies of this plan are reinforced throughout future developments and projects proposed within the city.
- **Ontario Emergency Operations Plan** – This plan focuses on the effective preparedness and response to hazard events that occur within the city. Incorporating relevant content from this plan into the EOP ensures consistency regarding the hazards addressed in both plans.
- **Ontario Capital Improvements Program** – This program identifies key infrastructure investments throughout the City that may include hazard mitigation elements. Incorporating this plan into the CIP may enhance infrastructure investment through additional funding and/or modification of improvements to include hazard mitigation elements.

This integration of the LHMP into The Ontario Plan 2050 Safety Element also allows the City to comply with AB 2140 requirements, as identified in Chapter 1 of this plan.

Plan Maintenance Process

The City's plan maintenance process will rely on the Ontario Mitigation Implementation Handbook, located in **Appendix E**. The handbook is intended to function as a stand-alone document that gives a concise and accessible guide to jurisdiction staff for

implementing and maintaining the Plan. A key component of the handbook is the specific mechanisms the jurisdiction can use to integrate this plan into other City planning mechanisms.

Plan Monitoring and Evaluation

When members of the HMPC are not updating the Plan, they should meet at least once a year to go over mitigation action implementation and evaluate the Plan's effectiveness. These meetings should include the following:

- Discussion of the timing of mitigation action implementation
- Mitigation action implementation evaluation and determination of success
- Mitigation action prioritization revisions, if deemed necessary
- Mitigation action integration into other mechanisms, as needed

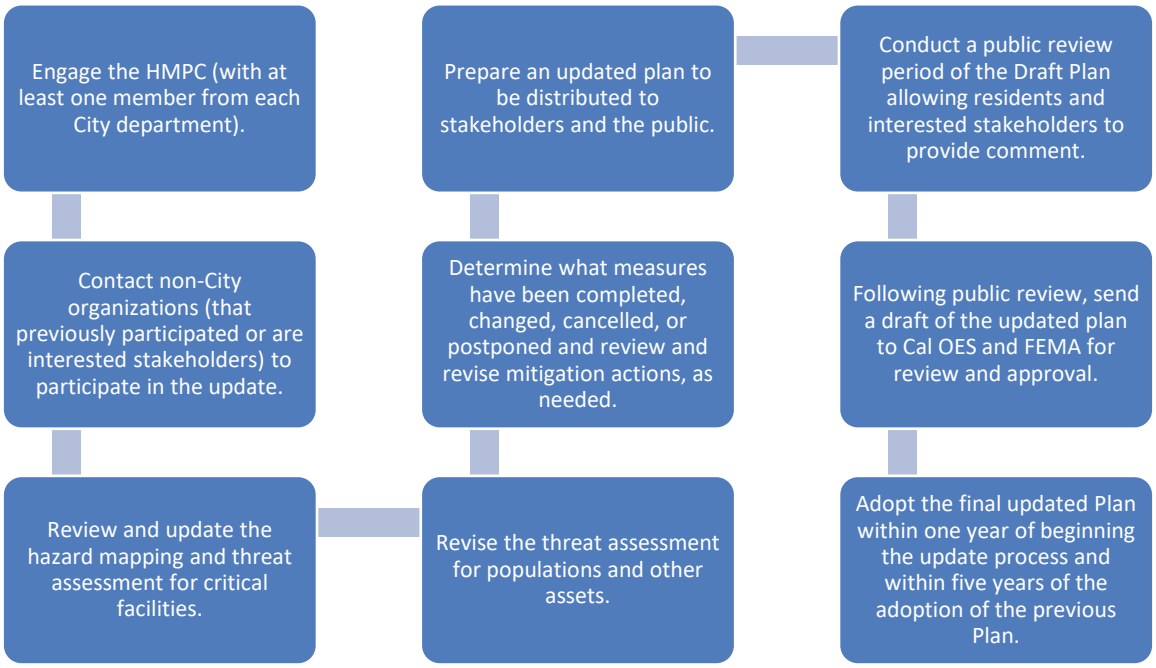
The first of these meetings will be held in the 2023-2024 fiscal calendar year. To the extent possible, HMPC meetings should be scheduled at an appropriate time in the City's annual budgeting process, which will help ensure that funding and staffing needs for mitigation actions are considered.

When the HMPC meets to evaluate the Plan, members should consider these questions:

- What hazard events, if any, have occurred in Ontario in the past year? What were the impacts of these events on the community? Were the impacts mitigated, and if so, how?
- What mitigation actions have been successfully implemented? Have any mitigation actions been implemented but not successfully, and if so, why?
- What mitigation actions, if any, have been scheduled for implementation but have not yet been implemented?
- What is the schedule for implementing future mitigation actions? Is this schedule reasonable? Does the schedule need to be adjusted for future implementation, and are such adjustments appropriate and feasible?
- Have any new issues of concern arisen, including hazard events in other communities or regions that are not covered by existing mitigation actions?
- Are new data available that could inform updates to the Plan, including data relevant to the hazard profiles and threat assessments?
- Are there any new planning programs, funding sources, or other mechanisms that can support hazard mitigation activities in Ontario?

Plan Updates

The information in this Plan, including the hazard profiles, threat assessments, and mitigation actions, is based on the best available information, practices, technology, and methods available to the City and HMPC at the time this Plan was prepared. As factors change, including technologies, community demographics and characteristics, best practices, and hazard conditions, it is necessary to update the plan to remain relevant. Additionally, Title 44, Section 201.6(d)(3) of the Code of Federal Regulations requires that



LHMPs be reviewed, revised, and resubmitted for approval every five years to remain eligible for federal benefits.

Update Method and Schedule

The update process should begin no later than four years after this Plan is adopted, allowing a year for the update process before the Plan expires. Depending on the circumstances, the LHMP project manager or their designee may also choose to begin the update process sooner. Some reasons for accelerating the update process may include the following:

- A presidential disaster declaration for Ontario or an area that includes part or the entire city
- A hazard event that results in one or more fatalities in Ontario

The update process will add new and updated methods, demographic data, community information, hazard data and events, considerations for threat assessments, mitigation actions, and other information, as necessary. This helps keep the Plan relevant and current. The HMPC will determine the best process for updating the Plan, which should include the following steps:

Update Adoption

The Ontario City Council is responsible for adopting this Plan and all future updates. As previously mentioned, adoption should occur every five years. To ensure the plan remains active, the City should begin the update process at least one year prior to expiration. If the City has a grant application that relies on the LHMP, an update to the plan should occur no later than 18 months before expiration. Adoption should take place after FEMA notifies the City that the Plan is Approved Pending Adoption. Once the City Council

adopts the Plan following its approval by FEMA, the adopted plan should be transmitted to FEMA.

Continued Public Involvement

The City will continue to keep members of the public informed about the HMPC's actions to review and update the LHMP. The HMPC will develop a revised community engagement strategy that reflects the City's updated needs and capabilities. The updated strategy should include a tentative schedule and plan for public meetings, recommendations for using the City website and social media accounts, and content for public outreach documentation. The HMPC will also distribute annual progress reports through City social media platforms and mailing lists used to engage community members. These outreach opportunities will describe the actions taken by the City and ways that residents and businesses can help further the City's goals. These updates are anticipated to occur after the annual HMPC meeting is conducted by the City.

Point of Contact

The HMPC leader for Ontario is the primary point of contact for this Plan and future updates. At the time of writing, the HMPC leader is Sagar Patel (Emergency Manager), available at spatel@ontarioca.gov | (909) 395-2557.

Appendix A – HMTF Meeting Materials

Table 1-1: Ontario HMPC Members		
Name	**Title**	**Department**
Sagar Patel (Project Manager, POC)	Emergency Manager	Office of Emergency Management
Nick Gonzalez	Recreation & Community Services Director	Community Life & Culture (Recreation)
Kelly Zackman	Library Services Manager	Community Life & Culture (Library)
Michelle Sifuentes	Museum Curator	Community Life & Culture (Museum)
Matt Montieth	Supervising Building Inspector	Community Development (Building)
Angela Magana	Community Improvement Director	Community Development (Community Improvement)
Khoi Do	City Engineer	Community Development (Engineering)
Peter Pallesen	Senior Project Coordinator	Community Development (Housing)
Kim Ruddins	Sustainability Program Manager	Community Development (Planning)
Charity Hernandez	Principal Project Manager	Economic Development
Angelica Mora	Purchasing Manager	Financial Services
Paul Ehrman	Senior Deputy Chief, Fire Marshal	Fire Department
Reed Sigler	Departmental Administrator	Human Resources/Risk Management
Colin Fernandes	Executive Director	Information Technology
Claudia Isbell	Assistant City Clerk	Management Services (Records Management)
Jimmy Chang	Broadband General Manager	Management Services (Broadband)
Albert Gastelum	Utilities Assistant General Manager	Ontario Municipal Utilities Company (OMUC)
Eric Quinones	Detective	Police Department
Joshua Blessingham	Fleet Services Coordinator	Public Works (Municipal Services)
David Coote	Park & Maintenance Supervisor	Public Works
Scott Ochoa	City Manager	Management Services
Darlene Sanchez	Assistant City Manager	Management Services
Dan Bell	Communications & Community Relations Director	Management Services

ONTARIO LHMP UPDATE KICKOFF

DATE: August 14, 2022

TO: Sagar Patel
Emergency Manager, City of Ontario

FROM: Aaron Pfannenstiel, Principal
Atlas Planning Solutions

City of Ontario

Local Hazard Mitigation Plan Update: Kick-Off Meeting Agenda

1. *Introductions (5 Minutes)*
2. *LHMP 101 (10 Minutes)*
    a. What is an LHMP?
    b. How does an LHMP benefit Ontario?
    c. What does the creation process look like?
    d. What are your expectations? HMPC expectations.
3. *Current Safety Element Goals (10 Minutes)*
    a. GOAL S1 - Minimized risk of injury, loss of life, property damage and economic and social disruption caused by earthquake-induced and other geologic hazards.
    b. GOAL S2 - Minimized risk of injury, loss of life, property damage and economic and social disruption caused by flooding and inundation hazards.
    c. GOAL S3 - Reduced risk of death, injury, property damage and economic loss due to fires, accidents and normal everyday occurrences through prompt and capable emergency response.

d. GOAL S4 - An environment where noise does not adversely affect the public's health, safety, and welfare.

e. GOAL S5 - Minimize the risk of injury, property damage, and economic loss resulting from windstorms and wind-related hazards

f. GOAL S6 - Reduced potential for hazardous materials exposure and contamination.

g. GOAL S7 - Residential neighborhoods, commercial areas, and industrial districts that are kept safe through a multi-faceted approach of prevention, suppression, and community involvement in public safety.

h. GOAL S8 - Disaster resilient, prepared community through effective emergency/disaster preparedness, response, mitigation and recovery.

i. GOAL S9 - Incorporate energy efficient practices and renewable energy systems to improve air quality, comfort, and energy reliability during temporary power outages.

4. *Are these still Ontario's goals within these areas?* (10 Minutes)

a. Has anything changed within the City not included in the Safety Element that needs to be addressed within the LHMP?

b. How we integrate the LHMP and the Safety Element to maintain cohesion

5. *HMPC Meeting #1 Members: (10 Minutes)*

a. Potential Planning Committee Members: City Administrative Staff, City Attorney, Community Development, financial Services, Fire, Planning, Building, Engineering, Housing, Human Resources, Information Technology, Municipal Utilities, Police, Public Works, stakeholders, etc.…

b. Do we have a list of names and email addresses for the invitees?

c. Are there any City scheduling constraints that could hinder project progress, or that we need to schedule around?

d. Communication Preferences/Protocol: Who is the City's primary point of contact for the project? Preferred method of communication.

e. Schedule Meeting #1

6. *Project schedule and milestone expectations (5 Minutes)*
7. *Invoicing Requirements (5 Minutes)*
8. *Schedule Meeting #1 (5 Minutes)*

City of Ontario

LOCAL HAZARD MITIGATION PLAN UPDATE
HMPC MEETING #3 AGENDA

VIII. Introductions (5 minutes)

IX. Review of Project Goals (5 minutes)

1. Increase readiness for all hazards ~~in the City of Ontario~~.
2. Continue to reduce fire hazards ~~in the City of Ontario~~.
3. Minimize exposure to structural and contents damage from geologic and seismic conditions.
4. Provide adequate ~~flood~~ protection to minimize ~~hazards and structural~~ damage from flooding and dam inundation.
5. ~~Reduce damage from a breach in the San Antonio Dam.~~
6. Use anti-terrorism strategies to discourage terrorism and protect the people, infrastructure and assets ~~in Ontario~~ from these effects ~~of terrorism~~.
7. Reduce the impacts of climate change on the City and limit human activities that change the atmosphere's makeup.
8. Reduce the risk of injury, property damage and economic loss resulting from ~~Santa Ana Winds and~~ wind related hazards.

X. Overview of Mitigation Strategies

Plans and Regulations	• Ordinances, Regulations
Structural Projects	• Utility Undergrounding, Structural Retrofits
Natural Systems Protection	• Stream restoration, erosion control
Education Programs	• Outreach materials, websites, presentations
Preparedness and Response Actions	• Mutual aid agreements, equipment purchases, notification protocols

XI. Discussion of STAPLE/E Criteria

Issue	Criteria
Social	• Is the action socially acceptable to community members? • Would the action treat some individuals unfairly? • Is there a reasonable chance of the action causing a social disruption?
Technical	• Is the action likely to reduce the risk of the hazard occurring, or will it reduce the effects of the hazard? • Will the action create new hazards or make existing hazards worse? • Is the action the most useful approach for the City to take, given the City's goals and community members?
Administrative	• Does the City have the administrative capabilities to implement the action? • Are there existing City staff who can lead and coordinate the measure's implementation, or can the City reasonably hire new staff for this role? • Does the City have enough staff, funding, technical support, and other resources to carry out implementation? • Are there administrative barriers to implementing the action?
Political	• Is the action politically acceptable to City officials and other relevant jurisdictions and political entities? • Do community members support the action?
Legal	• Does the City have the legal authority to implement and enforce the action? • Are there potential legal barriers or consequences that could hinder or prevent the implementation of the action? • Is there a reasonable chance that implementation of the action would expose the City to legal liabilities? • Could the action reasonably face other legal challenges?
Economic	• What are the monetary costs of the action, and do the costs exceed the economic benefits? • What are the start-up and maintenance costs of the action, including administrative costs? • Has the funding for action implementation been secured, or is a potential funding source available? • How will funding the action affect the City's financial capabilities? • Could the implementation of the action reasonably burden the City's economy or tax base? • Could there reasonably be other budgetary and revenue impacts to the City?
Environmental	• What are the potential environmental impacts of the action? • Will the action require environmental regulatory approvals? • Will the action comply with all applicable federal, state, regional, and local environmental regulations? • Will the action reasonably affect any endangered, threatened, or otherwise sensitive species of concern?

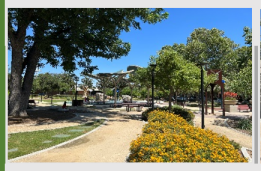
Appendix B – Outreach Engagement Materials

THE CITY OF ONTARIO IS PREPARING ITS LOCAL HAZARD MITIGATION PLAN!



WHAT IS AN LHMP?

- Improves local resilience to hazards.
- Funded through grant money from the Federal Emergency Management Agency (FEMA)
- Prepared by city staff.
  - Support from key city stakeholders
  - Support from technical consultants
- Incorporates community member feedback.

FOLLOW OUR PROGRESS/TAKE THE SURVEY

WHAT DOES AN LHMP DO?

- Summarizes our community's threats, such as –
  - Flooding, earthquakes, fires, and extreme weather
- Identifies how climate change affects future hazards in the city.
- Identifies how community members and assets are vulnerable to the threats of these hazards.
- Outlines a strategy to aid in specific policy and action recommendations to City staff and community partners to improve resiliency to hazard events.
- Includes steps on how to maintain and keep the plan updated and current.

WHY HAVE AN LHMP?

- Protect our community from current and future hazards
- Make Ontario eligible for more FEMA funding for additional hazard mitigation efforts (Robert T. Stafford Act and the Disaster Mitigation Act of 2000)
- Make Ontario eligible to receive disaster relief funding (California Government Code § 8685.9)

2023 Ontario Hazard Mitigation Plan Survey

I. Local Hazard Mitigation Plan Survey

Dear Community Member,

The City of Ontario is preparing an update to the Local Hazard Mitigation Plan or LHMP. Like all other communities, Ontario could potentially face widespread devastation in the event of a natural disaster. While no community can completely protect itself against all potential hazardous situations, this plan will help identify those situations, assess our current provisions, and outline a strategy to lessen the vulnerability and severity of future disasters.

Your responses to this survey will inform the preparation of the plan. Thank you for your time and cooperation.

II. Hazard Awareness

1. **Please indicate whether you live or work in the City of Ontario.**
   a. I live in the City of Ontario.
   b. I work in the City of Ontario.
   c. I live and work in the City of Ontario.
   d. Neither applies to me, but I am interested in the City's resiliency.

2. **What is the ZIP code of your home?**

3. **Have you been impacted by a hazard event in your current residence?**
   a. Yes
   b. No

4. **If you answered yes to the previous question, please select the type of hazard event that you have been impacted by (select all that apply).**

Earthquake/Geologic Hazards	Flooding
Extreme Weather (High Winds, Extreme Heat Days, Severe Rainstorms)	Hazardous Materials Release
Urban Fire	Human Caused Hazards (Transportation Incidents, Communications Failure, Terrorism)
Dam Inundation	Other

Please list any additional hazards that have previously impacted your neighborhood or home.

5. **The following hazards could potentially impact the city. Please mark the THREE (3) hazards that are of most concern to your neighborhood or home.**

Earthquake/Geologic Hazards	Flooding
Extreme Weather (High Winds, Extreme Heat Days, Severe Rainstorms)	Hazardous Materials Release
Urban Fire	Human Caused Hazards (Transportation Incidents, Communications Failure, Terrorism)
Dam Inundation	Other

Please list any additional hazards that present a threat to your neighborhood or home.

6. **The planning team is using various data sources to identify hazards in your community; however, some of these data sources do not provide data at a general citywide level. Are there any small-scale issues, such as ponding at a specific intersection during rain, that you would like the planning team to consider?**
   a. I am not aware of local hazards
   b. I am aware of local hazards

Please provide as much detail as possible, including location and type of hazard.

7. **How concerned are you that climate change may create new hazardous situations in Ontario or make existing natural hazards worse?**

    a. Very concerned.
    b. Somewhat concerned.
    c. Somewhat unconcerned.
    d. Not at all concerned.
    e. Unsure.

8. **When do you think climate change will pose a threat to your health, property, livelihood, or overall wellbeing?**

    a. It already is.
    b. Within the next five years.
    c. In five to twenty years.
    d. Not for at least another twenty years.
    e. Never, or not in my lifetime.

9. **If you have taken any action to protect yourself against natural hazards, how confident are you that these actions will be sufficient to protect against more severe hazards that are expected because of climate change?**

    a. Very confident.
    b. Somewhat confident.
    c. Somewhat unconfident.
    d. Not at all confident.
    e. Unsure.

10. **If you are a homeowner, do you have adequate homeowners' insurance to cover the hazards that could impact your home?**

    a. Yes, my insurance coverage should be adequate.
    b. No, I don't believe my insurance coverage would be adequate for a major disaster.
    c. Unsure.
    d. I do not have an insurance policy.
    e. Not applicable; I rent my current residence.

11. **If you rent your residence, do you have renters' insurance?**

    a. Yes
    b. No
    c. Not applicable; I own my residence.

12. **Do you have flood insurance for your home?**

    a. Yes, I own my home and have flood insurance.
    b. Yes, I rent my home and have flood insurance.
    c. No, but I am interested in reviewing flood insurance options (http://www.floodsmart.gov/floodsmart/).

13. **Have you done anything to your home to make it less vulnerable to hazards such as earthquakes, floods, and fires?**

    a. Yes
    b. No
    c. Not applicable; I rent my residence.

    If not, do you plan to?

14. **If a severe hazard event occurred today such that all services were cut off from your home (power, gas, water, sewer) and you were unable to leave or access a store for 72 hours, which of these items do you have readily available?**

    a. Potable water (3 gallons per person)
    b. Cooking and eating utensils
    c. Can opener
    d. Canned / nonperishable foods (ready to eat)
    e. Gas grill / camping stove
    f. Extra medications and contact lenses (if applicable)
    g. First aid kit / supplies
    h. Portable AM/FM radio (solar powered, hand crank, or batteries)
    i. Handheld "walkie-talkie" radios (with batteries)
    j. Important family photos / documentation in a water- and fireproof container
    k. Extra clothes and shoes
    l. Blanket(s) / sleeping bag(s)
    m. Cash
    n. Flashlight (with batteries)
    o. Gasoline
    p. Telephone (with batteries)
    q. Pet supplies
    r. Secondary source of heat

    For more information on emergency kits, visit: https://www.ready.gov/kit

    What else do you have in your emergency kit?

15. **Are you familiar with the special needs of your neighbors in the event of a disaster situation (special needs may include limited mobility, severe medical conditions, memory impairments)?**

    a. Yes
    b. No

16. **Are you a trained member of your Community Emergency Response Team (CERT)?**

    a. Yes
    b. No, but I would like to learn more about CERT.
    c. No, I am not interested in being a trained CERT member.

    For more information about CERT, please visit:

    https://www.ontarioca.gov/CERT

17. **How can the city help you become better prepared for a disaster? (Choose all that apply)**

    a. Provide effective emergency notifications and communication.
    b. Provide training and education to residents and business owners on how to reduce future damage.
    c. Provide community outreach regarding emergency preparedness.
    d. Create awareness of special needs and vulnerable populations.
    e. Other (please specify)

If you do NOT work in the City of Ontario, please skip to question 21.

18. **What is the ZIP code of your workplace?**

19. **Does your employer have a plan for disaster recovery in place?**
    a. Yes
    b. No
    c. I don't know

20. **Does your employer have a workforce communications plan to implement following a disaster, so they can contact you?**
    a. Yes
    b. No

III. Recommendations and Future Participation

21. **Would you like to be contacted when the Draft 2023 Ontario Hazard Mitigation Plan is available for review?**
    a. Yes, please notify me using my contact information in the next question.
    b. No

22. **If you would like to be notified of future opportunities to participate in hazard mitigation and resiliency planning, please provide your name and e-mail address. If you do not have an e-mail address, please provide your mailing address.**

Full Name:	
Email Address:	
Street Address:	
City, State, Zip:	

23. **Please provide us with any additional comments/suggestions/questions regarding your risk of future hazard events.**

Thank you for taking the time to complete this survey. If you have any questions, or if you know of other people/organizations that should be involved, please contact Sagar Patel, at spatel@ontarioca.gov

136 responses

Please provide as much detail as possible, including location and type of hazard.

42 responses

Earthquake, Fire. Flooding

Flooding along 8th Street during rain events.

Flooding at Grove and 60, dairy streets during rain, freeway condition and lack of repair. High wind area. Increasing crime and homelessness. Mentally unstable people around kaiser on vineyard

San Antonio under the 60fwy

Flooding along Euclid during heavy rains. Specifically, northbound lanes north of the 60.

Flooding of streets during rain events. Specific example, down Sultana Ave between 4th street and Holt.

Intersection of grove and walnut floods pretty bad during rains. Same happens at the 10 fwy underpass on grove, however, it's mid construction.

Traveling and living on South Euclid Ave is becoming more and more hazardous. Due to speeding, inadequate traffic and pedestrian signage mitigation

Pot holes - damages to vehicles!!

Columbia from 6th down to J, Euclid at 6 th down to holt, sultana from 6th down to holt, mountain at 6th down to holt. 6th street pools up from Kenmore all the way to Moutain where they put the sidewalk that extends into the street for traffic calming. Those should get taken out, leave the median trees

Mostly "ponding" at some intersections. G and vine sometimes ponds in heavy rains., and some of the streets between F and 5th where they cross San Antonio. (Not frequent, just in really heavy storms). Also sometimes along Euclid by the curbs during storms.

impact of congestion on local streets due to construction
on the 10 freeway.

East J street, between Columbia and Sultana. When it rain it is horrible for the houses in the south side of the street.

ponding at intersections

Street flooding all along Sultana and Euclid as well as the intersection of Fourth and Columbia.

There are a lot of roots raising the sidewalk where I go for walks.

Ponding on Riverside Dr. and Haven

Mountain and Sixth intersection. Flooding in the easterly and southerly portion of the intersection.

Heading west on Mission from Haven, there is an area to the immediate left (south) that easily floods, when there are rains.

Flooding on Chino Ave and Edison between Archibald and Euclid

Euclid floods so badly during intense rains leaving the center lanes flooded and a hazard.

N/A

During heavy rainstorms, the major streets that drive into the City that I live are typically flooded due to lack of storm drain maintenance. Also, lack of tree maintenance also causes large tree branches to fall during heavy winds and heavy rainstorms.

Oaks & Campus- flooding during rain

street flooding occurs in south Ontario due to natural slope. San Antonio x Philadelphia Cypress x Philadelphia

Mostly flooding over by the 10 freeway and mountain.

Ponding at Mission Blvd west of Haven Ave

The south crosswalk of W 6th Street and N Elderberry Ave gets flooded during strong rain events. There are a lot of transients that block the sidewalk and leave waste under the 10 freeway off of Mountain Ave.

During moderate to severe rainstorms, many of the City's streets are dangerously flooded - this is a Citywide issue, but I have encountered safety issues specifically along Euclid (nearly the full stretch from the northern City boundary to B Street where I turn to go to the office), as well as some of our other major north-south streets. I am unsure of the precise location at this time, but I had bottomed out my SUV on a portion of a residential street that had washed away a few winters ago - it was near the northerly intersection of one of our smaller north-west streets. I have also experienced flooding issues down in Ontario Ranch. In addition to Ontario flooding issues, there are also dangerous flooding issues on my route to/from work, which includes the cities of Upland, Montclair, and Claremont, as well as the 10 Freeway.

There are huge ponding areas in the dairies. On the intersections of Ontario Ranch Road and Walker Avenue as well as Ontario Ranch Road and Grove Avenue. There was a car stuck between those streets over this past weekend. There is also ponding on Riverside Drive, in front of Westwind Community Center and Whispering Lakes Golf Course.

Flooding in area of Sultana/Philadelphia (Ontario) area in heavy rain

The underpass on Euclid that goes underneath the train when you go south on Euclid passing holt floods often and greatly when it rains.

Uprooting of native trees leading to erosion all across the city and they are not replanted; lack of permeability in our paved roadways causes our water tables to dry up and the water is simply flushed down in our sewers all across the city, it is not collected; our region has had the worst air pollution quality in the region year after year due to the smog and pollution from all the transportation only continually being exacerbated by the increase of warehouses built, disproportionately affecting our Latino community at a higher level.

corner of san anthonio and phillips is flooded during, intersection of vine and phillips floods because the street t's.

philadelphia at cypress floods every time it rains. same with san antonio from philadelphia to 60 fwy

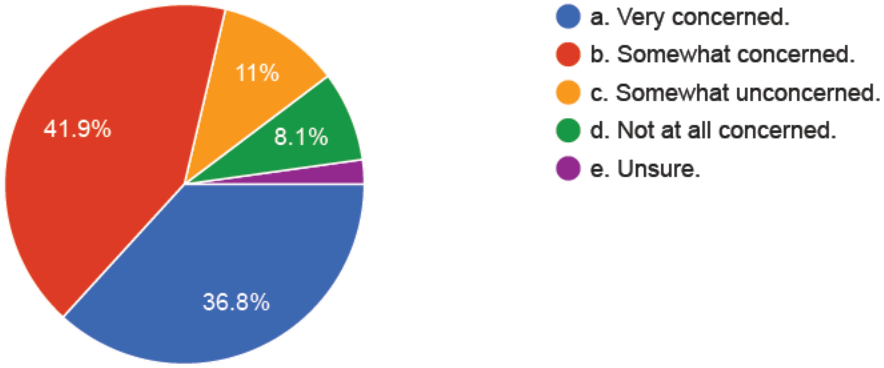
James Bryant Park along San Antonio Ave needs pedestrian crosswalk with lights at Flora Street intersection as cars travel quite fast along San Antonio Ave. There is no stop sign such as on the south end of the park on D Street.

Northwest corner of Euclid & 4th has flooding during heavy rains that causes the wooden ramp students use to transverse the curb when they're leaving Chaffey High School to float out onto the right-most southbound lane of Euclid.

Flooding Chino Ave & Grove

There is a lot of ponding at Hellman and 4th, and at Star Privado and 4th

The city has been working on drainage so certain streets don't flood as often. They also now put up signs.



Potholes

The trees at Hawthorne Elementary. Specifically the tree in the kindergarten area. There is a cement ring around the tree that has shifted & cracked creating an hazard. I'm not sure if it is caused solely from the soil being saturated or if the trees root system has been compromised as well.

Identify potentially hazard facilities i.e., trains transporting hazardous materials, large Propane distributors, Airport facilities, Commercial vehicles traveling with hazardous materials via residential areas and traffic mitigation on Euclid Ave

N/A

Everyone needs to take CERT

Our biggest concern for emergency preparedness is the availability of clean water. It is difficult to store enough water for a large family. It would be helpful for the city to consider water availability.

Provide Emergency kits at low cost for Ontario Residents.

Does the City still provide for emergency shelter for City Staff and their families?

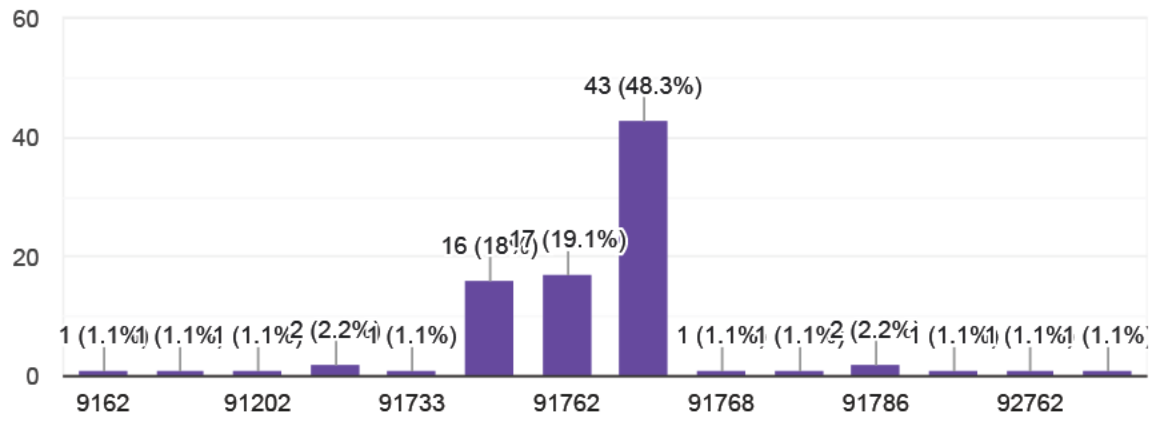
Have mandatory training courses during work hours, and have them often -- once a year or two for refreshers. We are disaster personnel, we should be prepared with CERT-level knowledge on how to serve ourselves and our communities in the face of disaster.

The City of Chino has a great notification system. I get notified of road closures and potential hazards in a timely fashion. If Ontario could get on board with an easy notification system like that, it would be really helpful for the community.

Create a plan and execute a plan that directly addresses climate change within the city for with stages of application within 5, 10 and 20 years.

know your citizens

I work for the City of Ontario for the past 15 years, during which 10 I also taught evenings at San Bernardino Valley College (SBVC).
Since the time I started working at SBVC (and continuing even now that I have not taught in a couple of years), I received real time emergency alerts regarding the campus and the area surrounding the campus sent to my campus/faculty email and to my personal email and personal cell phone (texts messages) that I gave them to put in my personnel file.
These alerts we about emergencies, potential threats, or areas around the campus (within 1-3 miles) to avoid; and they always included instructions what to do and then there would be follow up notices as needed and always a final one giving the "all clear"/situation resolved.
The alerts would include things like: notice of the Great Shake Out; suspicious person in a certain area of campus and instruction what to do (lock classroom doors, tell everyone to avoid a certain area); alerts that the police have closed off certain streets off campus (for what ever response reason) and to avoid that area; severe high wind threats or severe air



pollution (like from fires) and precautions to take.
I work at the Municipal Services Center campus on Bon View Ave and there are several times a year when I think this type of alert system would be useful for employees (if not the general public as well), such as: when the police block off an entire area of streets along my morning commute and then the are still blocked off when I go to lunch and I have to turn around; and, the fireworks explosion at a house about a mile way from my office and I had to learn about it through the rumor mill and then a news report video on the computer; and, when Main Street Fibers catches fire less that a mile up the street (and on the way to City Hall) and many direct collector streets in the area are closed and the railroad (and commuter trains effected (this has happened twice in recent years). Some sort of alert to avoid the area and which street segments closed would be helpful to everybody, including staff members that drive City service vehicles.
It is sad and disappointing that the "premier" Community of the Inland Empire could not succeed in even having the internal intercom system send an alert to everyone's desk phone for The Great Shake Out this past October, but a community college has had a better, further reaching, and successful alert system for over a decade.
Also, many of the buildings at the Ontario Municipal Services Center do not have proper working Fire or Emergency Alarms, nor adequate security of the facilities for the staff that work there.

If you do NOT work in the City of Ontario, please skip to question 22.

N/A

I answered a pair of questions as both a homeowner and renter. My home is a parsonage, owned by the church for which I am the Pastor. As I am responsible for the home while living in it and also represent the church I answered as the owner (as the church). But since the home is also part of my compensation - I am to some extent a "renter", so I do have renters insurance.

My main concern is for the impact of drought.

Working as a team in tandem with other local cities/getting the region all on the same level

city employees need to get out of their offices and see the city they work in - not just around city hall - everywhere! needs to be more proactive not reactive

Implement and automated alert system like the one i mentioned in a previous response.

None at this juncture

Please help us address climate change issues like extreme heat and/or flooding

Thank you for taking the time to complete this survey. If you have any questions, or if you know of other people/organizations that should be involved, please contact Sagar Patel, at spatel@ontarioca.gov

Appendix E – Hazard Mitigation Implementation Handbook

PAGE INTENTIONALLY LEFT BLANK

Local Hazard Mitigation Plan Implementation Handbook

June 2023

What Is This Handbook?

The Local Hazard Mitigation Plan (LHMP) for the City of Ontario features an evaluation of the City's hazards as well as a variety of corresponding mitigation actions. These actions are intended to preserve public safety, maintain critical municipal government operations and services when hazard events emerge, and empower community members to take on hazard mitigation at an individual level. This Implementation Handbook (Handbook) is intended for use by City staff and decision-makers after the LHMP is adopted. It will:

- Give clear instructions following the adoption of the LHMP.
- Simplify future updates to the LHMP.
- Assist the City in preparing grant funding applications related to hazard mitigation.
- Guide annual plan review actions.

How do I Use This Handbook?

This Handbook can help City staff and decision-makers in several different situations. If and when the events listed below occur, consult the respective sections of this Handbook for advice on how best to proceed:

- A disaster proclamation has been issued by the Ontario City Council
- A disaster proclamation has been issued by the State of California
- A disaster declaration has been signed by the Federal Government
- I want to apply for mitigation grant funding
- Ontario is undergoing its budgeting process
- Ontario is holding its annual meeting of the Hazard Mitigation Planning Committee
- Ontario is updating the following policy and regulatory documents:
    - The Local Hazard Mitigation Plan
    - The Safety Element of the General Plan
    - The Housing Element of the General Plan
    - The Zoning Code

Who Maintains This Handbook?

The Hazard Mitigation Planning Committee (HMPC) leader is responsible for maintaining this Handbook. At the time of writing, the current HMPC leader is Sagar Patel from the Ontario Office of Emergency Management. The HMPC may delegate this responsibility to someone else should they choose.

What to do when a disaster has been proclaimed or declared

Disasters may be proclaimed or declared by the Ontario City Council, the State of California, or the federal government. Responsibilities may differ depending on who proclaims or declares the disaster. If multiple organizations proclaim or declare a disaster, consult all applicable lists.

The Ontario City Council

If the Ontario City Council (or the Director of Emergency Services, if the City Council is not in session) proclaims a Local Emergency, take the following steps:

- ☐ Update **Attachment** 1 with information about the disaster. Include information about cumulative damage, including any damage outside of Ontario.
- ☐ Discuss opportunities for local assistance with the representatives from the California Office of Emergency Services (Cal OES).
- ☐ If the disaster damages local infrastructure or City-owned facilities, repair or rebuild the structure to be more resilient, following applicable hazard mitigation actions. A list of actions, organized by hazards, is included in **Attachment 4**.
- ☐ **Chapter 6** of the Ontario LHMP states that the City should consider updating the LHMP if a disaster causes a loss of life in the community, even if there is no state disaster proclamation or federal disaster declaration that includes part or all of the city. If there is a loss of life in Ontario, consider updating the LHMP. Consult the section on updating the LHMP in this Handbook for details.

The State of California

If the State of California proclaims a disaster for Ontario, or an area that includes part or all of Ontario, take the following steps:

- ☐ Update **Attachment 1** with information about the disaster. Include information about cumulative damage, including any damage outside of Ontario.
- ☐ Collaborate with representatives from Cal OES to assess the damage from the event.
- ☐ Discuss opportunities for local assistance with representatives from Cal OES.
- ☐ If the disaster damages local infrastructure or City-owned facilities, repair or rebuild the structure to be more resilient, following applicable hazard mitigation actions. A list of actions, organized by hazards, is included in **Attachment 4.**
- ☐ If the disaster may escalate into a federal disaster declaration, begin any necessary coordination with representatives from the Federal Emergency Management Agency (FEMA).
- ☐ **Chapter 6** of the Ontario LHMP states that the City should consider updating the LHMP if a disaster leads to a state disaster proclamation or federal disaster declaration that includes part or all of Ontario, even if there is no loss of life. Consider updating the LHMP. Consult the section on updating the LHMP in this Handbook for details.

The Federal Government

If the federal government declares a disaster for Ontario, or any area that includes part or all of Ontario, take the following steps:

- ☐ Update **Attachment 1** with information about the disaster. Include information about cumulative damage, including any damage outside of Ontario.
- ☐ Collaborate with Cal OES and FEMA representatives to assess the damage.
- ☐ Determine if Ontario will be eligible for public assistance funds related to the federal disaster declaration. These funds can be used to reimburse the City for response and recovery activities. If the City is eligible, work with FEMA and Cal OES representatives to enact the necessary requirements and receive funding.
- ☐ If the disaster damages local infrastructure or City-owned facilities, repair or rebuild the structure to be more resilient, following applicable hazard mitigation actions. A list of actions, organized by hazards, is included in **Attachment 4**.
- ☐ The Hazard Mitigation Grant Program (HMGP) is a FEMA program that helps fund hazard mitigation activities after a disaster event. Ontario may be eligible for funding because of the federal disaster declaration, although not all activities may meet the program's requirements. If Ontario is eligible, work with FEMA to apply for this funding.
- ☐ **Chapter 6** of the Ontario LHMP states that the City should consider updating the LHMP if a disaster leads to a state disaster proclamation or federal disaster declaration that includes part or all of Ontario, even if there is no loss of life. Consider updating the LHMP. Consult the section on updating the LHMP in this Handbook for details.

I Want to Apply for Mitigation Grant Funding

There are three potential grant funding programs that FEMA administers for hazard mitigation activities. Two of these programs, the Building Resilient Infrastructure and Communities (BRIC) and Flood Mitigation Assistance (FMA) funding sources, are available to communities with an LHMP that complies with FEMA guidelines and has been adopted within the past five years.
The third funding program is the Hazard Mitigation Grant Program (HMGP), which is available for communities that are part of a federal disaster declaration. This section discusses the BRIC and FMA programs and how to apply for them. The HMGP is discussed under the "Federal Government" subsection of the above "What to Do When a Disaster Has Been Proclaimed or Declared" section.

Building Resilient Infrastructure and Communities (BRIC)

Building Resilient Infrastructure and Communities (BRIC) will support states, local communities, tribes, and territories as they undertake hazard mitigation projects, reducing the risks they face from disasters and natural hazards. BRIC is a FEMA pre-disaster hazard mitigation program that replaced the Pre-Disaster Mitigation (PDM) program.

The BRIC program's guiding principles are supporting communities through capability- and capacity-building; encouraging and enabling innovation; promoting partnerships; enabling large projects; maintaining flexibility; and providing consistency.

Development projects must be identified in a hazard mitigation plan that meets FEMA guidelines and has been adopted within the past five years. When applying to this program, review the list of hazard mitigation actions in **Attachment 4** to see which projects may be eligible. Planning efforts for communities that lack a valid hazard mitigation plan may be eligible for funding if the

effort would create a valid hazard mitigation plan. All BRIC grant applications are processed through the State. To learn more, consult with Cal OES representatives or visit the FEMA webpage for the program. At the time of writing, this webpage is available at https://www.fema.gov/grants/mitigation/building-resilient-infrastructure-communities.

TAKE THE FOLLOWING STEPS TO APPLY FOR BRIC FUNDING:

- ☐ Confirm that the program is currently accepting funding applications. Check with representatives from Cal OES or consult the Cal OES webpage on the BRIC program. At the time of writing, this webpage is available at https://www.fema.gov/grants/mitigation/building-resilient-infrastructure-communities.
- ☐ Identify the actions from the hazard mitigation strategy (see Attachment 4) that call on the City to pursue funding or list grants as a potential funding source. Confirm that the actions are consistent with the requirements of the BRIC grant.
- ☐ Coordinate with Cal OES representatives to compile and submit materials for the grant application.

Flood Mitigation Assistance

The FMA grant program is a competitive, national program that awards funding for physical development projects and planning efforts that mitigate against long-term damage from flooding. The funding is only available to communities participating in the National Flood Insurance Program (NFIP), which Ontario currently does. Communities must also have a valid hazard mitigation plan that meets FEMA guidelines to be eligible, and all projects must be consistent with the list of actions in the hazard mitigation strategy. When applying to this program, review the list of hazard mitigation actions in **Attachment 4** to see which projects may be eligible. As with the BRIC program, applications for the FMA program must be processed through the State. To view more information, consult with Cal OES representatives or visit the FEMA webpage on the program. At the time of writing, this webpage is available at https://www.fema.gov/grants/mitigation/floods.

TAKE THE FOLLOWING STEPS TO APPLY FOR FMA FUNDING:

- ☐ Confirm that the program is currently accepting funding applications. Check with representatives from Cal OES or consult the Cal OES webpage on the FMA program. At the time of writing, this webpage is available at https://www.fema.gov/grants/mitigation/floods.
- ☐ Identify the actions from the hazard mitigation strategy (**see Attachment 4**) that call on the City to pursue funding or list grants as a potential funding source. Confirm that the actions are consistent with the requirements of the FMA grant.
- ☐ Coordinate with Cal OES representatives to compile and submit materials for the grant application.

Ontario is going through the budgeting process

Ontario's budget process is an ideal opportunity to secure funding for hazard mitigation actions and to ensure that hazard mitigation efforts are incorporated into the City's fiscal priorities. Ontario currently operates on an annual budget cycle that runs from July 1st to June 30th.

During this process, City staff should take the following steps to incorporate hazard mitigation into Ontario's annual budget:

- ☐ Include hazard mitigation activities into Ontario's list of Capital Improvement Projects (CIP). Review the list of hazard mitigation actions in Attachment 4 and identify the projects that can be included in the CIP or can support efforts within the CIP.
- ☐ Review the risk and threat assessments in the LHMP (Chapter 3 and Chapter 4) to ensure that all items in the CIP list are planned, designed, and constructed to minimize the threat from hazard events.
- ☐ Identify opportunities to identify stand-alone hazard mitigation actions through the annual budget process. Include appropriate items from Attachment 4 in the budget as stand-alone line items, particularly items that the Hazard Mitigation Planning Committee (Planning Committee) considered a high priority.
- ☐ Set aside staff to conduct hazard mitigation activities, including time to participate in Planning Committee meetings and research, prepare, and submit BRIC and FMA grant opportunities (consult the "I Want to Apply for Mitigation Grant Funding" section above).
- ☐ Ensure hazard mitigation activities are reflected in each department's priorities and earmarked time for specific goals.

Ontario is Conducting its Annual meeting of the Hazard Mitigation Planning Committee

The hazard mitigation planning process brings together representatives from multiple City departments as well as other relevant stakeholders. It provides a forum to discuss the hazards in Ontario and how to mitigate them effectively. As mentioned in **Chapter 6** of the LHMP, the Planning Committee should meet at least once each year, beginning a year after the LHMP is adopted. During these meetings, the Planning Committee should discuss implementation progress and integration of hazard mitigation actions in other City documents. At these meetings, the Planning Committee can review the status of the hazard mitigation actions and discuss whether completed or in-progress actions are working as expected. These meetings also allow the Planning Committee to strategically plan for the upcoming year.

It may help for the Planning Committee to meet early in the year, in advance of annual budget activities. **Attachment 3** contains an example of a Planning Committee Meeting Agenda.

The annual meeting should include representatives from City departments and other organizations that originally prepared the LHMP. Representatives from other relevant organizations should also be invited. During the preparation of the current LHMP, the following individuals were part of the Planning Committee:

Table 1-1: Ontario HMPC Members		
Name	**Title**	**Department**
Sagar Patel (Project Manager, POC)	Emergency Manager	Office of Emergency Management
Nick Gonzalez	Recreation & Community Services Director	Community Life & Culture (Recreation)
Kelly Zackman	Library Services Manager	Community Life & Culture (Library)
Michelle Sifuentes	Museum Curator	Community Life & Culture (Museum)
Matt Montieth	Supervising Building Inspector	Community Development (Building)
Angela Magana	Community Improvement Director	Community Development (Community Improvement)
Khoi Do	City Engineer	Community Development (Engineering)
Peter Pallesen	Senior Project Coordinator	Community Development (Housing)
Kim Ruddins	Sustainability Program Manager	Community Development (Planning)
Charity Hernandez	Principal Project Manager	Economic Development
Angelica Mora	Purchasing Manager	Financial Services
Paul Ehrman	Senior Deputy Chief, Fire Marshal	Fire Department
Reed Sigler	Departmental Administrator	Human Resources/Risk Management
Colin Fernandes	Executive Director	Information Technology
Claudia Isbell	Assistant City Clerk	Management Services (Records Management)
Jimmy Chang	Broadband General Manager	Management Services (Broadband)
Albert Gastelum	Utilities Assistant General Manager	Ontario Municipal Utilities Company (OMUC)
Eric Quinones	Detective	Police Department
Joshua Blessingham	Fleet Services Coordinator	Public Works (Municipal Services)
David Coote	Park & Maintenance Supervisor	Public Works
Scott Ochoa	City Manager	Management Services
Darlene Sanchez	Assistant City Manager	Management Services
Dan Bell	Communications & Community Relations Director	Management Services

In advance of Planning Committee meetings, consider using **Attachment 1** to maintain an accurate list of recent disaster events that have occurred in and around Ontario since the LHMP was adopted. At the Planning Committee meeting, review the Plan Maintenance Table **(Attachment 2**) to identify any gaps in the LHMP or any other component of the plan that needs updating. This also allows Planning Committee members the opportunity to review the actions in the hazard mitigation strategy **(Attachment 4)** and ensure that they are implemented as intended.

Ontario is updating its policy and regulatory documents

If Ontario is updating the LHMP, the Safety Element or Housing Element of the General Plan, or the Zoning Code, consult the following applicable section.

Local Hazard Mitigation Plan

All LHMPs should be updated every five years. This helps keep the plan up to date and ensures that it reflects the most recent guidance, requirements, science, and best practices. An updated LHMP also helps keep Ontario eligible for hazard mitigation grants that require a valid, recent LHMP (see "I Want to Apply for Mitigation Grant Funding"), along with an increased amount of post-disaster recovery funds.

The update process for the LHMP takes approximately one year. To ensure that a new LHMP comes into effect before the previous one expires, the update process should begin no later than four years after the plan is adopted. Updates may occur sooner at the City's discretion. Potential reasons for updating the LHMP sooner may include a state disaster proclamation or federal disaster declaration that covers part or all of Ontario, or if a disaster leads to a loss of life in Ontario (see the "What to Do When a Disaster Has Been Proclaimed or Declared" section), as discussed in **Chapter 6** of the LHMP.

Take the following steps to update the LHMP:

Assemble the Hazard Mitigation planning committee

- ☐ Convene a Planning Committee meeting no later than four years after the LHMP is adopted. Invite the regular Planning Committee members, along with representatives from other organizations that may have a role to play in the update process.
- ☐ Review the current status of mitigation actions, including if there are any that are not being implemented as planned or are not working as expected. Determine if there have been any changes in hazard events, regulations, best practices, or other items that should be incorporated into an updated LHMP.
- ☐ Decide if there is a need for a technical consultant to assist with the LHMP update and conduct consultant selection activities if needed. If a consultant is desired, the selection process should begin a few months before the update begins.
- ☐ Create and implement a community engagement strategy based on the strategy prepared for the existing LHMP. Describe in-person and online engagement strategies and materials, including ideas for meetings and workshops, draft community surveys, content for websites and press releases, and other materials that may be useful.

Update the Risk and Threat Assessments

- ☐ Review and update the risk assessment to reflect the most recent conditions in Ontario. Consider recent hazard events, new science associated with hazards and climate change, new development and land use patterns, and other recent changes in local conditions.

- ☐ Evaluate the status of all key facilities. Update this list if new facilities have been constructed or if existing facilities have been decommissioned. Re-assess the threat to key facilities.
- ☐ Review the demographics of community residents and update the threat assessment for vulnerable populations and other community members.
- ☐ Assess any changes to the threat to all other community assets, including key services, other facilities, and economic drivers.

Update the Mitigation Actions

- ☐ Update the existing hazard mitigation actions to reflect actions in progress. Remove actions that have been completed or revise them to increase their effectiveness. Revise actions that have been abandoned or delayed to make them more feasible or remove them from the list of mitigation actions if they are no longer appropriate for Ontario.
- ☐ Develop mitigation actions to improve the status of hazard mitigation activities in Ontario by addressing any issues not covered by the existing LHMP.
- ☐ The ability to expand current mitigation capabilities will generally be reliant upon the budgeting allocated for each department/program for that fiscal year. The level at which these programs may or may not be expanded upon, will be dependent upon the amount of funding received. FEMA has released a series of guides over the past few years which highlight some of the ways in which jurisdictions can expand mitigation. Some strategies for increasing current mitigation capabilities may include:
  - City should actively identify, adopt, and enforce the most current set of development codes and standards available. Strongly encouraging new development to be constructed to higher standards than currently required, increasing resilience within the community.
  - Engaging parts of the community that may not be actively involved in mitigation efforts.
  - Expanding the number and types of organizations involved in mitigation planning and implementation, increasing both efficiency and bandwidth.
  - Fostering new relationships to bring underrepresented populations and partners to the hazard mitigation planning process.
  - During the annual LHMP review, the HMPC should look for opportunities to fund and expand/enhance the effectiveness of current mitigation actions.
  - During annual budgeting processes, the City should identify new funding sources (bonds, grants, assessment districts, etc.) that can be used to support existing capabilities enhancements.
- ☐ Ensure that the feedback from the community engagement activities is reflected in the new and updated mitigation actions.

Review and Adopt the Updated Plan

- ☐ Review the other chapters and appendices of the LHMP to reflect any changes made through the update process.
- ☐ Release the updated plan to the Planning Committee members and revise the plan to reflect any comments by Planning Committee members.

- ☐ Distribute the updated Plan to any appropriate external agencies not included in the Planning Committee and revise the plan as appropriate in response to any comments.
- ☐ Release the updated plan publicly for review and make revisions to the plan to reflect public comments.
- ☐ Submit the plan to Cal OES and FEMA for approval and make any necessary revisions.
- ☐ Submit the plan to the Ontario City Council for adoption.

The Safety Element of the General Plan

The Safety Element is a required component of Ontario's General Plan. It can be updated as a stand-alone activity or as part of a more comprehensive process to update multiple sections or all of the General Plan. The Safety Element does not need to be updated on any set schedule, but updates should be frequent enough for the element to remain current and applicable to the community.

Local communities can incorporate their LHMP into their Safety Element as allowed under Section 65302.6 of the California Government Code, as long as the LHMP meets minimum federal guidelines. This allows communities to be eligible for an increased share of post-disaster relief funding from the State if a hazard situation occurs, as per Section 8685.9 of the California Government Code.

Take the following steps to incorporate the LHMP into the Safety Element:

INCORPORATE NEW REQUIREMENTS INTO THE SAFETY ELEMENT, AND ENSURE THAT THE LHMP IS CONSISTENT WITH THE SAFETY ELEMENT

- ☐ Review the requirements for Safety Elements in Section 65302(g) of the California Government Code and for LHMPs in Section 65302.6. Ensure that both documents meet all state requirements.
- ☐ Ensure that the information in both plans does not contradict each other and that any inconsistencies are corrected to use the most accurate and appropriate information. This information should include a community description, a risk assessment, and a threat assessment.
- ☐ Ensure that the policies in the Safety Element support the LHMP and provide a planning framework for specific hazard mitigation actions.

The Housing Element of the General Plan

The Housing Element is a required component of Ontario's General Plan. Section 65583 of the California Government Code requires a Housing Element to analyze and plan for new residential growth in a community, including residential growth for households with an annual income below the area median. Like an LHMP, state regulations require the Housing Elements to be updated regularly to remain current and valid.

The Housing Element is not required to contain any information or policies related to hazards, although it may include policies that address retrofitting homes to improve resiliency. However, state law links the regular schedule of Housing Element updates to mandatory revisions to other General Plan elements. For example, Section 65302(g)(2) of the California Government

Code requires that communities that update their Housing Element on or after January 1, 2009, also update their Safety Element to include specific information and policies related to flood protection. As the LHMP is incorporated into the Safety Element, updates to the Housing Element may indirectly trigger updates to the LHMP.

To update the LHMP concurrent with updates to the Housing Element, take the following steps:

ENSURE THAT THE LHMP MEETS ANY NEW REQUIREMENTS FOR THE SAFETY ELEMENT THAT MAY BE TRIGGERED BY A HOUSING ELEMENT UPDATE

- ☐ Section 65302(g) of the California Government Code lists several requirements for the Safety Element of the General Plan. Some of these requirements are triggered by updates to the Housing Element. Check to see if there are any new requirements of this nature. Note that the requirement is linked to the new Housing Element's adoption date, not the date the update process begins.
- ☐ Because the LHMP is incorporated into the Safety Element, any amendments or revisions to the Safety Element triggered by the Housing Element update may be made directly in the LHMP. Requirements triggered by the Housing Element are unlikely to require a full rewrite of the LHMP, but the process should fully involve the Planning Committee and include appropriate community engagement.
- ☐ Adopt the updated LHMP and incorporate it into the Safety Element. If necessary, amend the Safety Element to ensure the two documents are consistent (review the "Incorporate New Requirements Into the Safety Element, and Ensure that the LHMP is Consistent with the Safety Element" subsection above).

The Ontario Municipal Code

Ontario's Municipal Code contains a set of standards that guide land uses and development in the community. These standards include where different types of buildings and land use activities may be located, how these structures must be built, and how they must be operated or maintained. The Municipal Code may include requirements that structures (particularly new structures or those undergoing substantial renovations) incorporate hazard-resistant features, be located outside the most hazard-prone areas, or take other steps to reduce hazard vulnerability.

All communities in California are required to adopt the minimum state Building Standard Code (BSC), which includes some hazard mitigation requirements for new or significantly renovated structures. The BSC is generally updated every three years, with supplemental code updates halfway into each update cycle. Title 8, "Building Regulations," of Ontario's Municipal Code contains building regulations and incorporates the BSC. Other sections of the Code adopt additional standards as desired by the City that adapts the BSC to Ontario's local context.

As a participant in the National Flood Insurance Program (NFIP), Ontario is required to incorporate Floodplain Management Requirements in its Zoning Code, which is located in Title 8, Chapter 13 – Flood Damage Prevention Program. These regulations establish standards for developing and operating facilities within mapped flood-prone areas. Other sections of the Ontario Municipal Code may include additional standards related to hazard mitigation activities.

With the exception of the Floodplain Management Regulations and the minimum standards in the BSC, Ontario is not required to incorporate hazard-related requirements in the Municipal

Code. However, the Municipal Code is an effective tool for implementing hazard mitigation measures related to the siting, construction, and operation of new buildings and other structures. Substantial updates to the Municipal Code, including the Buildings and Construction and Zoning Code sections, should be done in a way that is consistent with the LHMP.

Include Hazard-Related Requirements in Applicable Sections of the Ontario Code of Ordinances

- ☐ If the BSC is being updated, evaluate the hazard-related requirements of all sections in the new BSC. Identify any areas where it may be feasible to add or revise standards to help reduce the threat from hazard events. Ensure that these standards are consistent with the LHMP. Consider whether standards should be applied to all structures, to specific types of structures, or to structures in a limited area (such as a flood plain).
- ☐ If the Zoning Code is being updated, ensure that all requirements do not expose community members or community assets to an excessive risk of harm. Where feasible, use the requirements to strengthen community resiliency to hazard events. Ensure that these standards are consistent with the LHMP. Consider possible standards such as overlay zones that strengthen zoning requirements in hazard-prone areas, landscaping and grading requirements that buffer development from hazards, siting, and design standards that make structures more resilient, and other strategies as appropriate.

Attachment 1: Disaster Information Table

Use this table to fill out the information about any disaster events that have occurred in Ontario or nearby and have affected the community. Include the date and location of the disaster event, the damages associated with the event, and any information about disaster proclamations or declarations resulting from the event.

Date	Location	Damages *	Declaration Details †

* Includes number and type of injuries, number of deaths, and cost of physical damage
† If the disaster was proclaimed or declared by the local, state, and/or federal government

Attachment 2: Plan Maintenance Table

Use this table when reviewing the LHMP as part of the Planning Committee's annual activities. For each section of the LHMP, note if any changes should be made to make the plan more effective for the community. This includes noting if anything in the LHMP is incorrect or if any important information is missing. Make revisions consistent with these notes as part of the next update to the LHMP.

Section	Is Anything Incorrect?	Is Anything Missing?	Should Any Other Changes Be Made?
Multiple sections or throughout			
Chapter 1: Introduction			
Chapter 2: Community Profile			
Chapter 3: Risk Assessment			
Chapter 4: Threat Assessment			
Chapter 5: Mitigation Strategy			
Chapter 6: Plan Maintenance			
Appendices			

Attachment 3: Sample Agenda and Topics for the Hazard Mitigation Planning Committee

This attachment includes a sample agenda and discussion topics for the annual meeting of the Planning Committee. Meetings do not have to follow this order or structure, but the items included in this attachment should be addressed as part of the annual meeting. During the update process for the LHMP, it is likely that the Planning Committee will meet more frequently. The meetings of the Planning Committee during the update process will involve different discussion topics.

ITEM 1: RECENT HAZARD EVENTS

1.1. What hazard events have occurred this past year in Ontario or nearby in a way that affected the community?
- Identify events that caused loss of life or significant injury to Ontario community members, significant property damage in Ontario, or widespread disruption to Ontario.
- More minor events should also be identified if there is a need for a community response to mitigate against future such events.

1.2. What are the basic facts and details behind any such hazard events?
- Consider the size and location of the affected area, any measurements of severity, any injuries and deaths, the cost of any damage, the number of people displaced or otherwise impacted, and other relevant summary information.
- Ensure that these facts and details are clearly recorded for future plan updates, including using the Disaster Information Table (**Attachment 1**).

ITEMS 2: MITIGATION ACTION ACTIVITIES

2.1. What mitigation actions have been fully implemented? Are they working as expected, or do they need to be revised?

2.2. What mitigation actions have started to be implemented since the Planning Committee last met? Is the implementation of these actions proceeding as expected, or are there any barriers or delays? If there are barriers or delays, how can they be removed?

2.3. What mitigation actions are scheduled to begin implementation in the next year? Are there any factors that could delay implementation or weaken the effectiveness of the actions? How can these factors be addressed?

2.4. What resources are needed to support planned, in-process, or ongoing mitigation actions? Does the City have access to these resources? If not, how can the City obtain access to these resources?

ITEM 3: INFORMATION SHARING

3.1. Is the City communicating with all appropriate local jurisdictions, including neighboring communities, San Bernardino County, and special districts? This should include information on district-specific hazard situations, mitigation actions, and other relevant information.

3.2. Is the City communicating with the appropriate state and federal agencies? Is the City receiving information about new regulations, best practices, and data related to hazard mitigation activities?

3.3. Are there opportunities for the City to improve coordination with local, state, and federal jurisdictions and agencies?

ITEM 4: BUDGETARY PLANNING

4.1. What are the financial needs for Ontario to support the implementation of planned and in-process mitigation actions, including ongoing items? Is there sufficient funding for all measures in the LHMP that are planned for the next year, including in-process and ongoing items? If sufficient funding is unavailable, how can the City obtain these funds?

4.2. If it is not feasible for the City to support all planned, in-process, or ongoing mitigation actions, which ones should be prioritized?

4.3. Are there hazard-related activities not included in the LHMP that should be budgeted for? Can the City obtain the necessary funding for these activities?

ITEM 5: STRATEGIC PLANNING

5.1. Which grants are available for hazard mitigation activities, and which activities are best positioned to secure funding?

5.2. How should the agencies and other organizations represented on the Planning Committee coordinate to maximize the chances of receiving funding?

5.3. Are there any scheduled or anticipated updates to other City documents that could relate to hazard mitigation activities? How can the Planning Committee share information with staff and any technical consultants responsible for these updates and ensure that the updates will enhance community resiliency?

5.4. What capital projects are scheduled or anticipated? Are these capital projects being designed and built to be resistant to hazard events? Are there opportunities for these projects to support hazard mitigation activities?

5.5. How can Planning Committee members coordinate efforts with those responsible for capital projects to take advantage of economies of scale that will make implementing hazard mitigation activities easier?

5.6. Has it been four years since the adoption of the LHMP? If so, lay out a timeline for plan update activities, including additional meetings of the Planning Committee. Identify if a technical consultant is needed and begin the contracting process.

5.7. Are there any other opportunities for Planning Committee members and the organizations they represent to coordinate efforts?

ITEMS 6: NEW BUSINESS

6.1. Are there any other items related to the Planning Committee's mission?

Attachment 4: Hazard Mitigation Strategy

Table 5-3: Mitigation Action Implementation Plan						
Mitigation Action		**Potential Funding Sources**	**Responsible Department**	**Relative Cost***	**Time frame**	**Priority**
Preparedness Activities						
P1	Conduct regular emergency preparedness drills and training exercises for City staff.	General Fund, Grants	OEM	$	Ongoing	N/A
P2	Continue agreements with local school districts to ensure that school facilities can act as evacuation sites during major emergencies.	General Fund, Grants	OEM	$	Ongoing	N/A
P3	Promote and expand participation of local businesses, non-profits, and faith-based organizations in the Ontario Continuity & Organizational Resilience in Emergencies Academy (CORE) trainings and preparedness activities.	General Fund, Grants	OEM	$	Ongoing	N/A
P4	Expand participation in the Ontario Community Emergency Response Team (CERT) program.	General Fund, Grants	OEM	$	Ongoing	N/A
P5	Ensure that community evacuation plans include provisions for community members who do not have access to private vehicles or are otherwise unable to drive.	General Fund, Grants	OEM	$$	Ongoing	N/A
P6	Continue to ensure effective emergency notifications through multiple media formats, in at least English and Spanish, about pending, imminent, or ongoing emergency events. Ensure that information is accessible to persons with access and functional needs.	General Fund, Grants	OEM	$	Ongoing	N/A
P7	Maintain at least one emergency power-generating station in all critical facilities that the City could use as emergency public assembly areas, such as City Hall, Community Centers, and any other locations designated in the future.	General Fund, Grants	OEM	$$$	Ongoing	N/A
P8	Update the Ontario Emergency Operations Plan to identify backup power and communications locations for critical facilities and prepare a hazardous materials annex.	General Fund, Grants	OEM	$	Ongoing	N/A
P9	Continuously update response procedures for first responder departments to properly address new hazard events as they emerge.	General Fund, Grants	OEM	$	Ongoing	N/A
P10	Ensure that the City has an adequate supply of sandbags for residents and businesses, including prefilled sandbags for	General Fund, Grants	OEM	$	Ongoing	N/A

	individuals who may be unable to fill them on their own.					
P11	Conduct active shooter drills for City staff, residents, and businesses.	General Fund, Grants	OEM	$	Ongoing	N/A
P12	Increase the number of City staff who have Cal OES Safety Assessment Program (SAP) credentials.	General Fund, Grants	OEM, Building Department	$	Ongoing	N/A
Multiple Hazards						
1.01	Promote and expand the use of 'Ready Ontario' as the primary location for emergency preparedness and hazard mitigation information that includes: 1. An outreach team that promotes emergency preparedness and hazard mitigation activities 2. A cadre of volunteers from the City's CERT Program, Continuity & Organizational Resilience in Emergencies Academy (CORE), Ontario Emergency Communications Service (ECS) HAM Radio Operators, and other organizations to support hazard mitigation and disaster preparedness activities. (Hazards addressed: All)	General Fund, BRIC/ HMGP Grants, Other Grants	OEM, Fire	$	Ongoing	High
1.02	Install energy-efficient equipment upgrades in City facilities to increase the longevity of the fuel supply for backup generators. (Hazards addressed: All)	General Fund, BRIC/ HMGP Grants, Other Grants	Public Works Facilities	$$$	Ongoing	High
1.03	Conduct routine updates to Facility Conditions Assessments for City-owned infrastructure and other utilities and coordinate with other agencies to ensure inspections of other important infrastructure. (Hazards addressed: All)	General Fund, BRIC/ HMGP Grants, Other Grants	OMUC, Public Works Facilities, Engineering	$	Ongoing	Medium
1.04	Repair, as feasible, all major deficiencies discovered by inspections to prevent collapse, failure, or damage in the event of a natural disaster. (Hazards addressed: All)	General Fund, BRIC/ HMGP Grants, Other Grants	OMUC, Public Works Facilities, Engineering, Building	$$$	Initiate by 2023/2024	High
1.05	Incentivize public and private utility operators to harden their lines passing through the City from potential breaches. Encourage the adoption of supervisory control and data acquisition (SCADA) to allow instantaneous shutdown of line breaches. Use mitigation grants to incentivize entities to partner with the City to complete these projects. (Hazards addressed: All)	General Fund, BRIC/ HMGP Grants, Other Grants	Community Development	$	Ongoing	Low

1.06	Install and harden emergency backup power at critical facilities deemed necessary. Prioritize installations for facilities that serve as key cooling/warming centers and evacuation centers. (Hazards addressed: All)	General Fund, BRIC/ HMGP Grants, Other Grants	OMUC, Public Works Facilities, Engineering	$$$	Initiate by 2023/2024	High
1.07	Conduct a feasibility assessment of installing solar and battery backup systems at key critical facilities within the City. (Hazards addressed: All)	General Fund, BRIC/ HMGP Grants, Other Grants	OMUC, Public Works Facilities	$$$	TBD	Low
1.08	Work closely with community groups to increase awareness of hazard events and resiliency opportunities among socially vulnerable community members, including those experiencing homelessness. (Hazards addressed: All)	General Fund, BRIC/ HMGP Grants, Other Grants	OEM, Community Life & Culture	$	Ongoing	Medium
1.09	Avoid building new City-owned key facilities in mapped hazard areas. If no feasible sites outside mapped areas exist, ensure that such facilities are hardened against hazards beyond any minimum building requirements/ mitigation standards. (Hazards addressed: All)	General Fund, BRIC/ HMGP Grants, Other Grants	Public Works, Engineering, Building	$	Ongoing	Low
1.10	Closely monitor changes in the boundaries of mapped hazard areas resulting from land use changes or climate change and adopt new mitigation actions or revise existing ones to ensure continued resiliency. (Hazards addressed: All)	General Fund, BRIC/ HMGP Grants, Other Grants	Community Development	$	Ongoing	Low
1.11	Integrate policy direction and other information from this plan into other City documents, including the General Plan, Emergency Operations Plan, and Capital Improvements Program. (Hazards addressed: All)	General Fund, BRIC/ HMGP Grants, Other Grants	All Departments	$	Ongoing	Medium
1.12	Monitor funding sources for hazard mitigation activities. (Hazards addressed: All)	General Fund, BRIC/ HMGP Grants, Other Grants	OEM	$	Ongoing	Low
1.13	Integrate climate change mitigation and adaptation information and analysis into future LHMP updates and other City Plans, where practicable. (Hazards addressed: All)	General Fund, BRIC/ HMGP Grants, Other Grants	OEM, Planning	$	Ongoing	Low
1.14	Update the City's Master Plans (General Plan, Utilities Master Plan, etc.) periodically (in conjunction with the LHMP and CIP) to incorporate new data (FEMA flood maps and information) and/or address emerging issues. (Hazards addressed: All)	General Fund, BRIC/ HMGP Grants, Other Grants	All Departments	$$	Ongoing	Medium

Earthquake/Geologic Hazards						
2.01	Develop a Public Information Program (PIP) for earthquake awareness and mitigation. The program should focus on reducing injury and property damage and encourage partnerships, activities, and products to educate the public about earthquake science and motivate homeowners to prepare for earthquakes.	General Fund, BRIC/ HMGP Grants, Other Grants	OEM, Building, Communications	$	Initiate by 2026	Medium
2.02	Develop a small project-based retrofit program to assist homeowners with simple earthquake mitigation activities (i.e., water heater straps, furniture anchoring, gas shut-off tools, and other emergency supplies) to reduce strain on City resources during an event.	General Fund, BRIC/ HMGP Grants, Other Grants	OEM, Building, Community Improvement	$$	TBD	Low
2.03	Conduct an educational campaign, incentivize and promote medium-scale seismic retrofits, such as window films to minimize shattering, anchors for rooftop-mounted equipment, bracing for masonry chimneys, and other preventative measures to reduce damage to private buildings.	General Fund, BRIC/ HMGP Grants, Other Grants	OEM, Building, Community Improvement	$	Initiate by 2026	Medium
2.04	Periodically update the seismically vulnerable buildings and structures inventory and pursue funding to incentivize retrofits of these structures to be more resilient to earthquakes in accordance with State and Local building standards and Historic Preservation Program requirements. Assess soft story conditions for apartment buildings constructed prior to 1980.	General Fund, BRIC/ HMGP Grants, Other Grants	Building	$	Ongoing	Low
2.05	Conduct a seismic analysis of all City-owned key facilities and retrofit vulnerable facilities.	General Fund, BRIC/ HMGP Grants, Other Grants	OMUC, Building, Public Works Facilities	$$$	Initiate by 2026	Medium
2.06	Encourage the installation of resilient (seismically appropriate) piping for new or replacement pipelines in close coordination with utility providers.	General Fund, BRIC/ HMGP Grants, Other Grants	OMUC, Public Works Facilities	$	Ongoing	Medium
2.07	To the extent feasible, construct all new and significantly retrofitted City-owned facilities to remain operational in the event of a major earthquake.	General Fund, BRIC/ HMGP Grants, Other Grants	OMUC, Public Works Facilities, Engineering	$$$	Ongoing	Low
2.08	Retrofit key critical facilities with seismically rated window film treatments that ensure glass windows do not shatter during a strong seismic event.	General Fund, BRIC/ HMGP Grants, Other Grants	Public Works Facilities	$$	TBD	Low

2.09	Improve local understanding of the threat of a major earthquake by conducting a citywide scenario modeling potential loss of life and injuries, destroyed and damaged structures, and interruptions to key services.	General Fund, BRIC/ HMGP Grants, Other Grants	OEM, Public Works Facilities	$	Initiate by 2026	Medium
2.10	Coordinate with Ontario Municipal Utilities Company (OMUC) on monitoring groundwater elevations in areas where liquefaction and subsidence may be a concern.	General Fund, BRIC/ HMGP Grants, Other Grants	OMUC	$	Ongoing	Low
Flood						
3.01	Investigate the use of permeable paved and landscaped swales for new construction and replacement of City-owned hardscaped areas.	General Fund, BRIC/ HMGP Grants, Other Grants	Public Works Parks and Maintenance	$$	TBD	Low
3.02	Analyze if new critical facilities can be built a minimum of 1 foot higher than the anticipated 500-year flood elevation height to determine where it is feasible.	General Fund, BRIC/ HMGP Grants, Other Grants	Public Works Facilities, Engineering, Building, Development	$	Initiate by 2026	Medium
3.03	Identify potential flood improvements that reduce inundation from both storm flows and potential dam inundation effects.	General Fund, BRIC/ HMGP Grants, Other Grants	Public Works	$	Initiate by 2026	Medium
3.04	Retrofit roadway medians to capture stormwater during rain events. Prioritize improvements along major arterials/ roadways throughout the City.	General Fund, BRIC/ HMGP Grants, Other Grants	Planning, Engineering	$$$	Initiate by 2023/2024	High
3.05	Conduct frequent cleanings of storm drain intakes, especially before and during the rainy season.	General Fund, BRIC/ HMGP Grants, Other Grants	Public Works	$	Ongoing	Low
3.06	Track areas where ponding frequently occurs during heavy rainfall and install new drains or upgrade existing ones to reduce water ponding.	General Fund, BRIC/ HMGP Grants, Other Grants	Public Works, Engineering	$$$	Initiate by 2023/2024	High
3.07	Monitor intersections that frequently flood during rain events and identify improvements to alleviate these conditions.	General Fund, BRIC/ HMGP Grants, Other Grants	Public Works, Engineering	$$$	Ongoing	Medium

3.08	Explore the feasibility of a mass notification siren and public address network to alert residents and visitors of potential flash floods and other flooding hazards, especially along the City's flood channel infrastructure.	General Fund, BRIC/ HMGP Grants, Other Grants	OEM, Public Works, Engineering	$$	Initiate by 2023/2024	Medium
Extreme Weather (High Winds, Extreme Heat, Severe Rainstorms)						
4.01	Conduct outreach to residents and businesses before the severe winds (Santa Ana Wind events) on proper tree maintenance and identification of potentially hazardous trees. (Hazards addressed: High Winds)	General Fund, BRIC/ HMGP Grants, Other Grants	Communications	$	Ongoing	Low
4.02	Remove or trim trees determined to be susceptible to blowing over during a severe wind event and underground power lines, where feasible. (Hazards addressed: High Winds)	General Fund, BRIC/ HMGP Grants, Other Grants	Public Works	$$	Ongoing	Medium
4.03	Increase the use and construction of shade structures within new developments, City facilities, parks, and trails to reduce urban heat island impacts. (Hazards Addressed: Extreme Heat)	General Fund, BRIC/ HMGP Grants, Other Grants	Public Works, Planning, Engineering, Recreation	$$	Ongoing	Medium
4.04	Evaluate the long-term capacity of designated cooling centers and shelters in the City to provide sufficient relief from extreme heat. Assess the need to expand services as the frequency, length, and severity of future heatwaves potentially change as a result of climate change. (Hazards addressed: Extreme Heat)	General Fund, BRIC/ HMGP Grants, Other Grants	OEM, Recreation	$	TBD	Low
4.05	Upgrade HVAC within City facilities to more efficient systems that may include split systems or decentralized systems that allow for heating and cooling the spaces needed, not entire buildings. (Hazards addressed: Extreme Heat)	General Fund, BRIC/ HMGP Grants, Other Grants	Public Works	$$$	TBD	Low
4.06	Implement a tree-planting program to diversify tree age and increase shaded areas in the City to reduce the effects of the urban heat island effect. (Hazards addressed: Extreme Heat)	General Fund, BRIC/ HMGP Grants, Other Grants	Public Works, Planning	$$	TBD	Low
4.07	Promote passive cooling design (brise soleil, long roof overhangs, locating windows away from southern facades, etc.) in new developments during the design review process. (Hazards addressed: Extreme Heat)	General Fund, BRIC/ HMGP Grants, Other Grants	Planning	$	Ongoing	Low

4.08	Promote early notifications to residents in advance of a severe weather event, focusing on effective communication methods with vulnerable populations to better ensure they have adequate time to prepare. (Hazards addressed: Severe Weather)	General Fund, BRIC/ HMGP Grants, Other Grants	OEM, Communications, Police, Fire	$	Ongoing	Medium
Hazardous Materials Release						
5.01	Discourage new sensitive land uses, including schools, parks, childcare centers, adult and senior assisted living facilities, and community centers, from locating near identified hazardous material facilities. Discourage or prohibit new hazardous material facilities from locating near sensitive land uses.	General Fund, BRIC/ HMGP Grants, Other Grants	Planning	$	Ongoing	High
5.02	Continuously inspect businesses and other properties storing hazardous materials and create an inventory of storage locations that require updates, maintenance, or renovation.	General Fund, BRIC/ HMGP Grants, Other Grants	Fire	$	Ongoing	Low
5.03	Coordinate with hazardous materials generators/operators regularly to understand changes to their operations within the City.	General Fund, BRIC/ HMGP Grants, Other Grants	Fire	$	Ongoing	Low
5.04	Continue to work with solid waste service contractors to educate residents and businesses on their safe disposal of small quantities of hazardous materials.	General Fund, BRIC/ HMGP Grants, Other Grants	Public Works	$	Ongoing	Low
Urban Fire						
6.01	Educate and promote the proper maintenance and separation of power lines from trees and other hazards.	General Fund, BRIC/ HMGP Grants, Other Grants	Public Works	$	Ongoing	Medium
6.02	Conduct regular fuel modification projects to reduce fire hazard risks, such as clearing out dead vegetation in parks, open spaces, right-of-way embankments, and other areas that could become fuel for fires, such as within Cucamonga-Guasti Regional Park and surrounding neighborhoods.	General Fund, BRIC/ HMGP Grants, Other Grants	Public Works, Community Improvement	$$	Ongoing	Low
6.03	Provide information and resources to residents citywide on ways to improve resilience to home fires, including procedures for fallen powerlines.	General Fund, BRIC/ HMGP Grants, Other Grants	Fire	$	Ongoing	Low
6.04	Promote the removal of fire-prone tree species in the City, such as eucalyptus and pepper trees, especially in areas with heightened fire susceptibility (e.g., trees adjacent to powerlines).	General Fund, BRIC/ HMGP Grants, Other Grants	Public Works	$$	Ongoing	Medium

Dam Inundation						
7.01	Coordinate with dam owners/operators, state, and federal agencies to collectively identify threats to the City and the region and identify ways to retrofit/strengthen the dams under their control.	General Fund, BRIC/ HMGP Grants, Other Grants	OEM	$	Ongoing	Medium
7.02	Implement an early warning system/protocol that notifies downstream communities in the event of a potential dam failure incident.	General Fund, BRIC/ HMGP Grants, Other Grants	OEM	$$	TBD/Ongoing	Low
Human-Caused Hazards (Transportation Incidents, Terrorism, Communications Failure)						
8.01	Coordinate and enhance datasets with the School District, Hospitals, and other key entities within the City to better respond to mass-casualty and terrorism incidents. (Hazards addressed: Terrorism**)**	General Fund, BRIC/ HMGP Grants, Other Grants	Police	$	Ongoing	Medium
8.02	Evaluate all critical facilities, facilities of concern, and business licenses, for potential human-caused hazard vulnerabilities and integrate counterterrorism design elements and building materials, where feasible. (Hazards addressed: Terrorism)	General Fund, BRIC/ HMGP Grants, Other Grants	Police	$	Initiate by 2026	Medium
8.03	Coordinate with the San Bernardino County Sheriff to monitor potential incidents resulting in terrorism and mass casualty incidents. (Hazards addressed: Terrorism/Mass Casualty Incidents)	General Fund, BRIC/ HMGP Grants, Other Grants	Police	$	Ongoing	Low
8.04	Conduct proactive community policing during special events. Ensure that all staff involved in community policing are trained to engage with and respect community members while maintaining security. (Hazards addressed: Terrorism)	General Fund, BRIC/ HMGP Grants, Other Grants	Police	$	Ongoing	Medium
8.05	Prioritize any remaining grade separations to reduce or eliminate conflicts between different modes of travel. (Hazards addressed: Transportation Incidents)	General Fund, BRIC/ HMGP Grants, Other Grants	Public Works, Engineering	$$$	Ongoing	Medium
8.06	Maintain relationships with Metrolink, Amtrak, and Railroad owners to improve rail safety. (Hazard addressed: Transportation Incident)	General Fund, BRIC/ HMGP Grants, Other Grants	Police, Engineering	$	Ongoing	Low
8.07	Analyze communications systems to identify critical components and ensure these components are readily available to ensure communications resiliency. (Hazards addressed: Communications Failure)	General Fund, BRIC/ HMGP Grants, Other Grants	OEM, Police, IT & Broadband, Communications	$	Ongoing	Medium

8.08	Expand the installation of fiber optics infrastructure and conduit (for future services) to enhance the city's communications systems and economic opportunities. (Hazards addressed: Communications Failure)	General Fund, BRIC/ HMGP Grants, Other Grants	OEM, Police, IT & Broadband, Communications	$$$	Initiate by 2023/2024	High
8.09	Enhance existing communication backup systems to minimize communications interruptions, as an annex to the City of Ontario Emergency Operations Plan. (Hazards addressed: Communications Failure)	General Fund, BRIC/ HMGP Grants, Other Grants	OEM, Police, IT & Broadband, Communications	$$$	Initiate by 2023/2024	High

Sagar Patel
Fire Administrative Director
City of Ontario Office of Emergency Management
415 E. B Street
Ontario, CA 91764

Dear Sagar Patel:

The Federal Emergency Management Agency (FEMA) has completed its review of the *City of Ontario Local Hazard Mitigation Plan 2023* and has determined that this plan is eligible for final approval pending its adoption by the City of Ontario.

Formal adoption documentation must be submitted to FEMA Region 9 within one calendar year of the date of this letter, or the entire plan must be updated and resubmitted for review. FEMA will approve the plan upon receipt of the documentation of formal adoption.

If you have any questions regarding the planning or review processes, please contact the FEMA Region 9 Hazard Mitigation Planning Team at fema-r9-mitigation-planning@fema.dhs.gov.

Sincerely,

CITY OF ONTARIO *Agenda Report* **November 21, 2023**	**SECTION:** **CONSENT CALENDAR**
Department: Public Works Prepared By: Bonnie Tam Staff Member Presenting: Tito Haes, Executive Director Public Works Approved By:	Submitted To: Council/OHA Approved: _____ Continued To: _____ Denied: _____ Item No: 9

SUBJECT: AN AMENDMENT TO THE DESIGN SERVICES AGREEMENT WITH COMMUNITY WORKS DESIGN GROUP FOR LANDSCAPE ARCHITECTURAL SERVICES FOR THE DE ANZA PARK IMPROVEMENTS

RECOMMENDATION: That the City Council Authorize the City Manager or his designee to execute Amendment No. 4 to the Design Services Agreement for Contract No. PM 1819-1 with Community Works Design Group, of Riverside, California, to provide Landscape Architectural Services for the De Anza Park Improvements in the amount of $64,770 and a total not-to-exceed amount of $424,705.

THE FOLLOWING COUNCIL GOALS ARE BEING ACHIEVED:
Invest in the City's Infrastructure (Water, Streets, Sewers, Parks, Storm Drains and Public Facilities)

FISCAL IMPACT: The Fiscal Year 2023-24 Adopted Budget includes appropriations in the Capital Projects Fund for landscape architectural services for the De Anza Park Improvements. The recommended Amendment in the amount of $64,770 will increase the current total not-to-exceed amount to $424,705.

BACKGROUND & ANALYSIS: The proposal for landscape architectural services from Community Works Design Group for the De Anza Park Improvements is in the amount of $64,770. The design services will include schematic planning, construction plans, specifications, cost estimates, bidding support, and construction administration for the design of new areas at De Anza Park that will require additional survey and civil work to integrate all De Anza Park improvements, including the skate park, walkway modernization, playground, shade shelters, lightings, and splash pad into comprehensive construction plans.

On June 6, 2023, the City Council approved Community Works Design Group for the design services for the De Anza Park Improvements and Walkway Modernization Project. The De Anza Park is a major park asset to the community and is home to the De Anza Community and Teen Center. Improving De Anza Park with additional amenities including a new play area and shade structure will benefit the community.

AMENDMENT NO. 4
TO THE DESIGN SERVICES AGREEMENT FOR
ON-CALL LANDSCAPE ARCHITECT SERVICES PW1819-1
BETWEEN THE CITY OF ONTARIO AND
COMMUNITY WORKS DESIGN GROUP

1. Parties and Date.

This Amendment No. 4 to the Agreement (as defined herein) is made and entered as of _____, by and between the City of Ontario ("City") and **Community Works Design Group**, a CORPORATION ("Consultant"). City and Consultant are sometimes individually referred to as "Party" and collectively as "Parties."

2. Recitals.

2.1 Agreement. The City and Consultant have entered into an agreement entitled "Design Services Agreement for On-Call Landscape Architectural Services PW 1819-1" dated July 2, 2019 ("Agreement").

2.2 Amendment Purpose. The City and Consultant desire to amend the Agreement to a total compensation of **$64,770** for **De Anza Park Comprehensive Improvements Integration** for a new not-to-exceed contract amount of **Four Hundred Twenty-Four Thousand and Seven Hundred Five Dollars ($424,705)**. The Parties have heretofore entered into that Amendment No. 3 dated June 22, 2023, Amendment No. 2 dated July 15, 2022, and Amendment No. 1 dated November 4, 2022.

2.3 Amendment Authority. This Amendment No. 4 is authorized pursuant to Section 3.10.1 of the Agreement.

3. Terms.

3.1 Amendment. Section 3.10.1 of the Agreement is hereby amended in its entirety to read as follows:

> 3.10.1 Consultant's Compensation for Basic Services. "City shall pay to Consultant, for the performance of all Services rendered under this Agreement, the total not to

exceed amount in accordance with City Council approved work plans and budgets. ("Total Compensation"). This Total Compensation amount shall be based upon, and may be adjusted according to, the fee schedule and related terms and conditions attached hereto as Exhibit "B" and incorporated herein by reference. The Total Compensation, as may be adjusted upon mutual agreement, shall constitute complete and adequate payment for Services under this Agreement."

Exhibit "B" and Attachment A are hereto and incorporated herein by reference.

3.2 Continuing Effect of Agreement. Except as amended by this Amendment No. 4, all other provisions of the Agreement remain in full force and effect and shall govern the actions of the parties under this Amendment No. 4. From and after the date of this Amendment No. 4, whenever the term "Agreement" appears in the Agreement, it shall mean the Agreement as amended by this Amendment No. 4.

3.3 Adequate Consideration. The Parties hereto irrevocably stipulate and agree that they have each received adequate and independent consideration for the performance of the obligations they have undertaken pursuant to this Amendment No. 4.

3.4 Severability. If any portion of this Amendment No. 4 is declared invalid, illegal, or otherwise unenforceable by a court of competent jurisdiction, the remaining provisions shall continue in full force and effect.

3.5 Integration. This Amendment represents the entirety of the Parties' understanding relating to the subject of this Amendment, including written or verbal communications between the Parties, which shall have no relevance unless expressly incorporated herein. This is an integrated amendment.

[SIGNATURES ON FOLLOWING PAGE]

Subject: Work Authorization for Professional Design Services for:
De Anza Park Comprehensive Improvements Integration

Dear Tito:

Community Works Design Group has been working in coordination with City of Ontario staff on the De Anza Park Skatepark, Walkway Modernization, and Splash Pad Improvements in conjunction with RJM's Soccer Field Improvement Project. As part of this process to best situate and locate these important amenities, our team has presented the City with several conceptual site plans and layouts. Based on the current anticipated layout for De Anza Park we identified new areas that will require additional survey and civil work to integrate all De Anza Improvements, including the Skatepark, Walkway Modernization, Playground, Shade Shelters and Splash Pad into comprehensive construction plans.

This work authorization covers all fees required to complete a comprehensive exhibit of De Anza Park improvements as well as full cost estimates and construction plans for the project as a comprehensive improvement plan and as multiple bid sets by prioritized amenities. The members of the Design Team and I appreciate your consideration of our firm to continue our professional consulting services for this project.

Respectfully submitted,

COMMUNITY WORKS DESIGN GROUP

Scott Rice ASLA, LEED AP, CASp
President

ADDITIONAL SCOPE OF SERVICES

In addition to the current Scope of Services included in Amendment No. 3 to the Design Services Agreement for On-Call Landscape Architect Services PW1819-1, our team will prepare the following.

TASK 1. SITE ANALYSIS/ PROJECT ASSESSMENT

1. We will meet with City staff to finalize the comprehensive site layout for all De Anza Park Improvements

2. Additional survey work for new De Anza Park area based on the current conceptual site layout which will include the addition of the playground and shade shelter areas. This survey work will be performed by our subconsultant, Valued Engineers Inc.

3. We will prepare a critical path schedule, identifying key submittal dates and progress milestones for City review and approval.

TASK 1. SITE ANALYSIS/ PROJECT ASSESSMENT- DELIVERABLES

- Topographic survey of project scope areas and tie-in zones
- PDF copies of all documents
- Regular e-mail progress updates and ongoing coordination documentation
- Preliminary Schedule

TASK 2. SCHEMATIC DESIGN

1. We will develop a Colored Comprehensive De Anza Park Conceptual plan exhibit which integrates all site improvements throughout the park.

2. Upon review of City input, we will adjust and finalize the Comprehensive exhibit and provide preliminary cost estimates.

TASK 2. PRELIMINARY DESIGN - DELIVERABLES

- Cost Estimate with update
- Color Plan and Exhibits with supporting photos
- PDF copies of all documents
- Regular e-mail progress updates and ongoing coordination documentation

TASK 3. DESIGN DEVELOPMENT/ CONSTRUCTION DOCUMENTS (TO BE DETERMINED)

There will be two phases of Construction Documents. The first phase will include the Design Development, noted above, in which we will bring the drawings to approximately 50% completion. Plans at this stage will outline all demolition/protection items as well as items to be constructed. These plans will be turned over to the City for staff review in order to determine any final adjustments prior to working out details and beginning specifications. Once approved, our office will continue on the Construction Documents until 100% complete, where they will be turned over to City staff and Departments as required for final review.

1. DEMOLITION PLANS: We will prepare demolition plans, highlighting which existing site features will be protected in place and what walkways will need to be taken out as part of the modernization plan, and identify items and quantities of areas to be removed to make way for the proposed improvements.

2. GRADING PLANS: Under the guidance of CWDG for the sake of visual appearance and accessibility, Valued Engineers will prepare full grading and drainage plans to provide contractors with enough information to ensure that new improvements and rehabilitated areas comply with current requirements.

3. CONSTRUCTION PLANS/ DETAILS: Construction Drawings will include site plans and details associated with construction of the above-and-below grade skatepark, walkway modernization, playground and shade shelter areas, electrical components and any other hardscape elements defined through the conceptual design.

4. PLANTING/ IRRIGATION PLANS: We will prepare irrigation and planting plans showing the adjustment where existing planting areas are affected by new construction. We will utilize drought tolerant shrubs and trees if and where turf is no longer appropriate for the sake of maintenance or usability.

5. ELECTRICAL PLANS: Design West Engineering will provide electrical plans for providing necessary power to support the new skatepark, splash pad and any supplementary security and walkway lighting.

6. COST ESTIMATES: Final estimates of probable costs will be prepared for review.

7. CLIENT MEETINGS: We will meet with the City as needed to review and refine plans, specifications and estimates to best align with the City's available funding. (No limit on meetings).

TASK 3. DESIGN DEVELOPMENT/ CONSTRUCTION DRAWINGS - DELIVERABLES

- Construction Documents prepared in AutoCAD, printed to 24"x36" at 20 scale maximum
- PDF copies of all documents
- Regular e-mail progress updates and ongoing coordination documentation
- Final Cost Estimates

TASK 4. BIDDING PHASE

1. Community Works Design Group will assist the City in conducting a Pre-Bid meeting and provide written documentation of the meeting, noting direction given to contractors, questions asked and follow-up clarifications or addendum items.

2. We will assist the City in evaluating bids.

3. We will assist the City in conducting a pre-award meeting and in preparing the contract for construction.

TASK 4. BIDDING - DELIVERABLES

- Spreadsheet of Bid Line Items
- PDF copies of all documents
- Regular e-mail progress updates and ongoing coordination documentation
- Design, coordination, and preparation of meeting agendas

TASK 5. CONSTRUCTION PHASE

1. CONTRACT ADMINISTRATION: CWDG and the design team will review shop drawings and material samples, respond to Contractor Requests for Information (RFI's), and review project submittals. CWDG will attend periodic construction progress meetings.

2. FIELD OBSERVATION & SUPERVISION: CWDG will provide field observations with our staff as requested. Visits shall be performed at the current hourly rates listed in Attachment 1. CWDG shall advise and consult with the City during the construction phase.
   CWDG shall assist the City in determining the amount owed to the Contractor by reviewing his application for payment.

TASK 5. CONSTRUCTION - DELIVERABLES

- PDF copies of all documents
- Regular e-mail progress updates and ongoing coordination documentation

FEE PROPOSAL

The following is our proposed fee to provide all work mentioned in the Scope of Work outline for the De Anza Park Comprehensive Improvements Integration project:

	Consultant Services		**Fee**
Task 1.	Site Analysis/ Project Assessment *Additional topo survey*	LUMP SUM	$ 9,180.00
Task 2.	Comprehensive Conceptual Design	LUMP SUM	$ 13,500.00
Task 3.	Additional Civil/Electrical Design Development/ Const. Dwgs & Cost Estimate	LUMP SUM	$ 29,590.00
Task 4.	Additional Bidding Support	Hourly/ NTE	$ 3,200.00
Task 5.	Additional Construction Administration	Hourly/ NTE	$ 9,300.00
		TOTAL	**$64,770.00**

The scope and fees listed above reflect our understanding of the project and all of the work we are recommending for the successful completion of this project.

1. Provisions of On-Call Landscape Architect Services PW 1819-1 shall take precedence for this proposal.

CITY OF ONTARIO *Agenda Report* **November 21, 2023**	**SECTION:** **CONSENT CALENDAR**
Department: Financial Services Prepared By: Michelle Nguyen Staff Member Presenting: Armen Harkalyan, Executive Director of Finance Reviewed By: Doreen Nunes Approved By:	Submitted To: Council/OHA Approved: _____ Continued To: _____ Denied: _____ Item No: 10

SUBJECT: AN AMENDMENT TO THE PROFESSIONAL SERVICES AGREEMENT WITH EIDE BAILLY LLP FOR ACCOUNTING ADVISORY/CONSULTING SERVICES

RECOMMENDATION: That the City Council authorize the City Manager or designee to execute Amendment No. 1 adding $200,000 to the Professional Services Agreement with Eide Bailly LLP, of Rancho Cucamonga, California, for the provision of accounting advisory/consulting services, for a revised contract authority of a not-to-exceed amount of $350,000.

THE FOLLOWING COUNCIL GOALS ARE BEING ACHIEVED:
Operate in a Businesslike Manner

FISCAL IMPACT: The proposed Amendment increases the total authorized contract amount from $150,000 to $350,000. Appropriations for the increased contractual amount of $200,000 will be absorbed in the Fiscal Year 2023-24 Budget as part of salary savings from Financial Services Agency's vacant positions.

BACKGROUND & ANALYSIS: Over the last few years, the City of Ontario's Financial Services Agency has experienced staffing challenges in the Accounting Division, including high turnover of key personnel positions and employees out on leave of absences. These events have placed further stress on limited staff resources in the Agency. While many industries are experiencing the shortage of workers, the City faces the same challenge in the tight labor market dealing with unsuccessful recruitment attempts due to more job opportunities available than there are candidates looking for work.

The Financial Services Agency has recently implemented a new financial system along with a new centralized cashiering system, that went live on July 1, 2022, and this is the first year-end close process in the new financial system for the Accountants. Due to short staffing in the Accounting Division, the assistance from professional accounting consulting services is needed to ensure the City's financial activities continue to operate effectively and efficiently. Since July 2023, the City has contracted with Eide Bailly LLP to provide accounting advisory/consulting services to assist the division with accounting operations, year-end closing and annual financial reporting; however, the contract will soon exceed the original compensation limit. In order to maintain continuity in

effective and efficient accounting services to the City, an increase to the original contract authority amount is recommended.

AMENDMENT NO. 1 TO THE PROFESSIONAL SERVICES AGREEMENT BETWEEN THE CITY OF ONTARIO AND EIDE BAILLY LLP

1. Parties and Date.

This Amendment No. 1 to the Agreement (as defined herein) is made and entered as of _____, by and between the City of Ontario ("City") and **Eide Bailly LLP**, a Limited Liability Partnership, with its principal place of business at **10681 Foothill Blvd #300, Rancho Cucamonga, CA 91730** ("Consultant"). City and Consultant are sometimes individually referred to as "Party" and collectively as "Parties."

2. Recitals.

2.1 Agreement. The City and Consultant have entered into an agreement entitled "Professional Service Agreement to provide accounting advisory/consulting services" dated July 12, 2023 ("Agreement").

2.2 Amendment Purpose. The City and Consultant desire to amend the Agreement to include additional compensation to provide continued professional accounting consulting services.

2.3 Amendment Authority. This Amendment No. 1 is authorized pursuant to Section 3.2 of the Agreement.

3. Terms.

3.1 Amendment. Section 3.2.1 of the Agreement is hereby amended in its entirety to read as follows:

"3.2.1 Compensation. Consultant shall receive compensation, including authorized reimbursements, for all Services rendered under this Agreement at the rates set forth in Exhibit "C" attached hereto and incorporated herein by reference. The total compensation shall not exceed **Three Hundred and Fifty Thousand Dollars and Zero Cents ($350,000.00)** without written approval of the City Council or City Manager, as applicable. Extra Work may be authorized, as described below, and if authorized, will be compensated at the rates and manner set forth in this Agreement.

Exhibit C is hereby deleted in its entirety and replaced with Attachment A attached hereto and incorporated herein by reference."

3.2 Continuing Effect of Agreement. Except as amended by Amendment No. 1, all other provisions of the Agreement remain in full force and effect and shall govern the actions of the parties under this Amendment No. 1. From and after the date of this Amendment No. 1, whenever the term "Agreement" appears in the Agreement, it shall mean the Agreement as amended by this Amendment No. 1.

3.3 Adequate Consideration. The Parties hereto irrevocably stipulate and agree that they have each received adequate and independent consideration for the performance of the obligations they have undertaken pursuant to this Amendment No. 1.

3.4 Severability. If any portion of this Amendment No. 1 is declared invalid, illegal, or otherwise unenforceable by a court of competent jurisdiction, the remaining provisions shall continue in full force and effect.

3.5 Integration. This Amendment represents the entirety of the Parties' understanding relating to the subject of this Amendment, including written or verbal communications between the Parties, which shall have no relevance unless expressly incorporated herein. This is an integrated amendment.

EXHIBIT "C"
COMPENSATION

As detailed in the attached proposal, Consultant fees will consist of hourly rates associated with the staff level necessary to complete the various tasks requested by the City. Although consulting services can be provided remotely, Eide Bailly team member will be needed on site for a minimum of 2 days per week to facilitate the work.

Standard Rate Schedule

All services performed will be billed at the rates shown in the tables below within the not to exceed amount of Three Hundred and Fifty Thousand Dollars and Zero Cents ($350,000.00) for the duration of the contract as agreed upon with the City.

Adjustments to Not To Exceed Amount and Standard Rate Schedule

Eide Bailly adjusts its rates on August 1st of each year. On August 1, 2023, the standard rate schedule shown will be adjusted upward by 6%. The rate schedule will thereafter be adjusted upward each August 1st through the conclusion of any multi-year contract by the annual change in the Consumer Price Index for All Urban Consumers (CPI-U) for Riverside-San Bernardino-Ontario, CA area as of the preceding May 1st. Any not-to-exceed amounts in the subsequent years would necessarily need to be adjusted accordingly.

Prior to 8/1/2023

Staff Level	Hourly Rates
Partner	$350
Senior Manager	$300
Manager	$250
Senior Associate	$190
Associate	$150

Effective 8/1/2023

Staff Level	Hourly Rates
Partner	$371
Director	$350
Senior Manager	$318
Manager	$265
Supervisor	$235
Senior Associate	$201
Associate	$159

Scope of Services

We understand the following services will be needed by the City. As the City's needs change over time, we can tailor our services to meet your ongoing needs.

1. General monthly accounting assistance to close the books/reconcile accounts
2. Assistance with audit preparation for the FY 2022-23 financial audit
3. Review and assist with (or review of) implementation of recent GASB pronouncements (GASB 87, GASB 96, etc.) and assist with drafting the related note disclosures
4. Work with City staff to support the development of the ACFR and its related note disclosure and RSI schedules
5. Organizational Assessments
6. Financial Policy Development
7. Complex Financial Analysis & Long-Term Financial Planning
8. Assist City staff with any other tasks identified in the project scoping process

Our fees will be based on the various levels of responsibility and specific skill sets required to perform the work. Based on our preliminary analysis of the seven items included in the scope of services above and the work performed to date, we believe that the cost of the work outlined in the table below will be $200,000. This amount is in addition to the original $150,000 amount in the contract, bringing the total contract amount to $350,000. The total cost will ultimately be dependent on the degree of assistance required and any unforeseen difficulties encountered while performing procedures. Eide Bailly is conscious of our clients' desire to achieve results at a minimum cost, and we are mindful of that when choosing which level of staff to assign to an engagement. We will also utilize the City's personnel to assist in the preparation of schedules and analyses to minimize costs to the extent possible.

The table below details the number of hours and estimated cost by line item in the scope above based on our current understanding of the work.

Task	Projected Hours	Projected Cost
General Accounting Assistance	200	$50,000
Audit Preparation	180	$45,000
GASB Implementation	100	$25,000
ACFR Development	60	$15,000
Organizational Assessments	80	$20,000
Financial Policy Development	80	$20,000
Financial Analysis and Planning	40	$10,000
Other tasks	60	$15,000

Standard Rate Schedule

Our work for the tasks outlined above will be billed at the rates shown in the table below.

Staff Level	Hourly Rates
Partner	$371
Director	$350
Senior Manager	$318
Manager	$265
Supervisor	$235
Senior Associate	$201
Associate	$159

CITY OF ONTARIO *Agenda Report* **November 21, 2023**	**SECTION:** **CONSENT CALENDAR**
Department: Public Works Prepared By: Blaine M Ishii Staff Member Presenting: Tito Haes, Executive Director Public Works Reviewed By: Bonnie Tam Approved By:	Submitted To: Council/OHA Approved: _____ Continued To: _____ Denied: _____ Item No: 11

SUBJECT: AN AMENDMENT TO THE GOODS AND SERVICES AGREEMENT WITH WASTEBUILT ENVIRONMENTAL SOLUTIONS, LLC. FOR COMMERCIAL BIN MATERIALS AND SUPPLIES

RECOMMENDATION: That the City Council approve and authorize the City Manager or his designee to execute Amendment No. 4 to the existing Goods and Services Agreement with Wastebuilt Environmental Solutions, LLC., of Ontario, California, exercising the third option year and extending the term of the Agreement to November 30, 2024 in the amount of $250,000 for a total not-to-exceed contract amount of $805,000.

THE FOLLOWING COUNCIL GOALS ARE BEING ACHIEVED:
Operate in a Businesslike Manner

FISCAL IMPACT: The recommended Amendment increases the total authorized contract to $805,000 over a four-year term. The Integrated Waste Department is requesting $200,000 for commercial bin materials and supplies and the Fleet Services Department is requesting $50,000 for hydraulics parts for vehicles. The Fiscal Year 2023-24 Adopted Budget includes appropriations from the Integrated Waste Fund for these goods and services. Actual expenditure will be based on the fixed-unit pricing and the actual quantity of commercial bin materials, supplies, and parts purchased in order to meet operational needs. There is no fiscal impact on the General Fund. Pricing for future optional years shall not exceed the most recent year's change in the Consumer Price Index for All Urban Consumers (CPI-U). Future contracting actions will be contingent upon City Council approval and budget adoption.

BACKGROUND & ANALYSIS: On November 14, 2019, the City Council awarded bid #1212 to Wastebuilt Environmental Solutions, LLC. for the purchase of commercial bin materials and supplies. The Integrated Waste Department currently has commercial bin containers of various sizes for refuse, recycling, wood/green waste recycling, and food waste service. The Integrated Waste Department routinely repairs bin containers to maintain an adequate inventory to meet customer needs. With the additional recycling and organics compliance with State regulations, the Integrated Waste Department has realized additional bin repairs. Staff is requesting to amend the Agreement with a third one-year extension and an increase to the contract amount by $250,000 for a new not-to-exceed amount of $805,000.

AMENDMENT NO. 4 TO THE GOODS & SERVICES AGREEMENT BETWEEN THE CITY OF ONTARIO AND WASTEBUILT ENVIRONMENTAL SOLUTIONS, LLC

1. Parties and Date.

This Amendment No. 4 to the Agreement (as defined herein) is made and entered as of _____, by and between the City of Ontario ("City") and Wastebuilt Environmental Solutions, LLC a Corporation "Contractor" City and Contractor are sometimes individually referred to as "Party" and collectively as "Parties."

2. Recitals.

2.1 Agreement. The City and Contractor have entered into an agreement entitled "Goods & Services Agreement" dated November 14, 2019 ("Agreement").

2.2 Amendment Purpose. The City and Contractor desire to amend the Agreement to extend the term date from November 30, 2023, through November 30, 2024 (fourth year extension) and to increase the total compensation by $250,000 for Fiscal Year 2023-24 for a total compensation of $805,000.

2.3 Amendment Authority. This Amendment No. 4 is authorized pursuant to Section 2 of the Agreement.

3. Terms.

3.1 Amendment. Section 2.1 of the Agreement is hereby amended in its entirety to read as follows:

> Section 2 Term. Section 2.1 of the Agreement is hereby amended to read as follows:
>
> 2.1 The term of this Agreement shall be from November 30, 2023, to November 30, 2024. Vendor shall provide all Goods and complete the Services within the term of this Agreement and shall meet any other established schedules and deadlines. The parties may, by mutual, written consent, extend the term of this Agreement, if necessary, to complete the work.

Section 3 Fees and Payments. Section 3.1 of the Agreement is hereby amended to read as follows:

3.1 Compensation. Vendor shall receive compensation, including authorized reimbursements, for all Services rendered under this Agreement at the rates set forth in Exhibit "C" attached hereto and incorporated herein by reference. The total compensation shall not exceed $805,000 without written approval of City Manager. Extra Work may be authorized, as described below, and if authorized, will be compensated at the rates and manner set forth in this Agreement.

3.2 Continuing Effect of Agreement. Except as amended by this Amendment No. 4 all other provisions of the Agreement remain in full force and effect and shall govern the actions of the parties under this Amendment No. 4. From and after the date of this Amendment No. 4 whenever the term "Agreement" appears in the Agreement, it shall mean the Agreement as amended by this Amendment No. 4.

3.3 Adequate Consideration. The Parties hereto irrevocably stipulate and agree that they have each received adequate and independent consideration for the performance of the obligations they have undertaken pursuant to this Amendment No. 4.

3.4 Severability. If any portion of this Amendment No. 4 is declared invalid, illegal, or otherwise unenforceable by a court of competent jurisdiction, the remaining provisions shall continue in full force and effect.

3.5 Integration. This Amendment represents the entirety of the Parties' understanding relating to the subject of this Amendment, including written or verbal communications between the Parties, which shall have no relevance unless expressly incorporated herein. This is an integrated amendment.

Department: Public Works Prepared By: Daniel P Beers Staff Member Presenting: Tito Haes, Executive Director Public Works Reviewed By: Bonnie Tam, Andrea Ampig Approved By:	Submitted To: Council/OHA Approved: _____ Continued To: _____ Denied: _____ Item No: 12

SUBJECT: **AN AMENDMENT TO THE DESIGN SERVICES AGREEMENT WITH POPULOUS, INC., AND AMENDMENTS TO THE ON-CALL DESIGN SERVICES AGREEMENT WITH ARDURRA GROUP**

RECOMMENDATION: That the City Council take the following actions:

A. Authorize the City Manager or his designee to execute Amendment No. 1 to the Design Services Agreement with Populous, Inc., of Los Angeles, California, for additional Architectural and Engineering Services for the Ontario Minor League Baseball Stadium and Parking Structure Project in the amount of $4,614,100 for a total not-to-exceed contract amount of $11,401,735;
B. Authorize the City Manager or his designee to execute Amendment No. 17 to the On-Call Design Services Agreement with Ardurra Group, of Newport Beach, California, for the Sports Complex Offsite Design in the amount of $4,017,439;
C. Authorize the City Manager or his designee to execute Amendment No. 18 to the On-Call Design Services Agreement with Ardurra Group, of Newport Beach, California, for the 935 E. Holt Ave. Demolition Project in the amount of $39,609 for a total not-to-exceed contract amount of $7,097,288; and
D. Authorize the City Manager or his designee to execute all documents required for the completion of the project including, but not limited to, contracts, agreements, assessments, easements, reduction of retention accounts, and filing a notice of completion at the conclusion of all construction related activities.

THE FOLLOWING COUNCIL GOALS ARE BEING ACHIEVED:
Invest in the City's Infrastructure (Water, Streets, Sewers, Parks, Storm Drains and Public Facilities)
Ensure the Development of a Well Planned, Balanced, and Self-Sustaining Community in Ontario Ranch

FISCAL IMPACT:
Ontario Sports Complex

Amendment No. 1 to the Design Services Agreement with Populous, Inc. for additional Architectural and Engineering Services for the Ontario Minor League Baseball Stadium and Parking Structure Project includes the addition of food and beverage retail buildings at the Sports Complex facility. This will increase the total contract amount by $4,614,100 for a total not-to-exceed contract amount of $11,401,735.

Amendment No. 17 to the on-call Design Services Agreement with Ardurra Group for the Sports Complex Offsite Design includes utility and infrastructure improvements in the surrounding area. This will increase the total contract amount by $4,017,439 for a total not-to-exceed contract amount of $7,057,679. If approved, appropriations of $8,631,539 in the Capital Projects-Measure Q Fund will be requested in a future quarterly budget update.

935 E. Holt Ave. Demolition

Amendment No. 18 to the on-call Design Services Agreement with Ardurra Group for the 935 E. Holt Ave. Demolition Project includes the creation of the bid package for the future demolition of the site, which will increase the total contract amount by $39,609 for a total not-to-exceed contract amount of $7,097,288. The Fiscal Year 2023-24 Adopted Budget includes appropriations in the Ontario Housing Authority Fund for this project.

BACKGROUND & ANALYSIS:

Ontario Sports Complex

The additional scope of work with Populous, Inc. is for additional services for planning, architecture and engineering for the Minor League Baseball Stadium. The scope of the Minor League Baseball Stadium has increased to include full services for approximately 75,000 gross square feet of 1-story food and beverage-focused retail buildings to both enhance the game-day experience and to create a year-round destination serving visitors from the adjoining Sports Complex. The combined site for the Minor League Baseball Stadium, parking structure, food and beverage retail, associated open space, surface parking, pedestrian and vehicular access will be expanded to approximately 22.8 acres.

The proposed Sports Complex project will include a minor league baseball stadium, a variety of sporting fields, an aquatics complex, community center, and retail facilities. The City's infrastructure needs to be enhanced in order to accommodate the new Sports Complex since it is being built in an underdeveloped area in Ontario Ranch. This includes widening of streets, new sewer, water, recycled water and storm drain lines. If approved, Ardurra Group will design all the offsite improvements that will be necessary for Sports Complex.

935 E. Holt Ave. Demolition

As part of The Ontario Center Specific Plan, Economic Development and Ontario Housing Authority are revitalizing the Holt Avenue Corridor. 935 E. Holt Ave. is an underutilized property the City of Ontario has acquired to resell to a developer for redevelopment. The intent is to effectively redesign this existing space based on existing and future proposed development. If approved, Ardurra Group will be creating the geotechnical survey, demolition plan and bidding documents for the demolition of the site.

AMENDMENT NO. 1 TO THE DESIGN SERVICES AGREEMENT BETWEEN THE CITY OF ONTARIO AND POPULOUS, INC

1. Parties and Date.

This Amendment No. 1 to the Agreement (as defined herein) is made and entered as of _____, by and between the City of Ontario ("City") and POPULOUS, INC, a CORPORATION, ("CONSULTANT"). City and Consultant are sometimes individually referred to as "Party" and collectively as "Parties."

2. Recitals.

2.1 Agreement. The City and Consultant have entered into an agreement entitled "DEIGN SERVICES AGREEMENT" dated August 15, 2023. ("Agreement").

2.2 Amendment Purpose. The City and Consultant desire to amend the Agreement to revise the scope of services for D&C23-011 Minor League Stadium & Parking Structure Project set forth in Amendment No. 1 – Attachment "A" and increase the not to exceed compensation amount by FOUR MILLION SIX HUNDRED FOURTEEN THOUSAND ONE HUNDRED DOLLARS ($4,614,100.00).

2.3 Amendment Authority. This Amendment No. 1 is authorized pursuant to Section 3.10.1 of the Agreement.

3. Terms.

3.1 Amendment. Section 3.10.1 of the Agreement is hereby amended in its entirety to read as follows:

"Section 3.10.1 Consultant's Compensation for Basic Services. City shall pay to Consultant for the performance of all Services

rendered under this Agreement, with the total not to exceed amount of Eleven Million Four Hundred One Thousand Seven Hundred Thirty-Five Dollars ($11,401,735) ("Total Compensation"). The total compensation, as may be adjusted upon mutual agreement, shall constitute complete and adequate payment for Services under this Agreement."

Exhibit A is hereby deleted in its entirety and replaced with Attachment A attached hereto and incorporated herein by reference.

3.2 Continuing Effect of Agreement. Except as amended by this Amendment No. 1, all other provisions of the Agreement remain in full force and effect and shall govern the actions of the parties under this Amendment No. 1. From and after the date of this Amendment No. 1, whenever the term "Agreement" appears in the Agreement, it shall mean the Agreement as amended by this Amendment No 1.

3.3 Adequate Consideration. The Parties hereto irrevocably stipulate and agree that they have each received adequate and independent consideration for the performance of the obligations they have undertaken pursuant to this Amendment No. 1.

3.4 Severability. If any portion of this Amendment No. 1 is declared invalid, illegal, or otherwise unenforceable by a court of competent jurisdiction, the remaining provisions shall continue in full force and effect.

3.5 Integration. This Amendment represents the entirety of the Parties' understanding relating to the subject of this Amendment, including written or verbal communications between the Parties, which shall have no relevance unless expressly incorporated herein. This is an integrated amendment.

AMENDMENT NO. 17 TO THE DESIGN SERVICES AGREEMENT BETWEEN THE CITY OF ONTARIO AND ARDURRA GROUP, INC.

1. Parties and Date.

This Amendment No. 17 to the Agreement (as defined herein) is made and entered as of _____, by and between the City of Ontario ("City") and Ardurra Group, Inc., a Corporation ("Consultant"). City and Consultant are sometimes individually referred to as "Party" and collectively as "Parties."

2. Recitals.

2.1 Agreement. The City and Consultant have entered into an agreement entitled "UT1032 On-Call Professional Engineering Services" dated May 7, 2019 ("Agreement").

2.2 Amendment Purpose. The City and Consultant desire to amend the Agreement to revise the scope of services and the not-to-exceed compensation amount for The Sports Complex Offsite Improvements. The Parties have heretofore entered into that Amendment No. 1 dated December 3, 2019, Amendment No. 2 dated December 16, 2019, Amendment No. 3 dated February 19, 2020, Amendment No. 4 dated January 27, 2021, Amendment No. 5 dated January 27, 2021, Amendment No. 6 dated January 27, 2021, Amendment No. 7 dated January 27, 2021, Amendment No. 8 dated July 6, 2021, Amendment No. 9 dated May 7, 2022, Amendment No. 10 dated September 6, 2022, Amendment No. 11 dated September 20, 2022, Amendment No. 12 dated November 1, 2022, Amendment No. 13 dated December 9, 2022, Amendment No. 14, dated December 9, 2022, Amendment No. 15 dated February 7, 2023, and Amendment No. 16 dated August 15, 2023.

2.3 Amendment Authority. This Amendment No. 17 is authorized pursuant to Section 3.1.1 of the Agreement.

3. Terms.

3.1 Amendment. Section 3.1.1 of the Agreement is hereby amended in its entirety to read as follows:

"Consultant promises and agrees to furnish to City all labor, materials, tools, equipment, services, and incidental and customary work necessary to fully and adequately supply the professional architectural and related services necessary for the full and adequate completion of the Project consistent with the provisions of this Agreement (hereinafter referred to as "Services"). The Services are more particularly described throughout this Agreement, including Exhibit "A" attached hereto and incorporated herein by reference. All Services shall be subject to, and performed in accordance with, this Agreement, any exhibits attached hereto and incorporated herein by reference, and all applicable local, state, and federal laws, rules and regulations. All Services performed by Consultant shall be subject to the sole and discretionary approval of the City, which approval shall not be unreasonably withheld. Additionally, Consultant shall comply with all Federal requirements applicable to the Services as set forth in Exhibit "A.""

Section 3.1.2 of the Agreement is hereby amended in its entirety to read as follows:

3.1.2 Term. The term of this Agreement shall be from **May 7, 2019** to **October 27, 2026**, unless earlier terminated as provided herein. Consultant shall complete the Services within the term of this Agreement, and shall meet any other established schedules and deadlines.

3.2 Continuing Effect of Agreement. Except as amended by this Amendment No. 17, all other provisions of the Agreement remain in full force and effect and shall govern the actions of the parties under this Amendment No. 17. From and after the date of this Amendment No. 17, whenever the term "Agreement" appears in the Agreement, it shall mean the Agreement as amended by this Amendment No. 17.

3.3 Adequate Consideration. The Parties hereto irrevocably stipulate and agree that they have each received adequate and independent consideration for the performance of the obligations they have undertaken pursuant to this Amendment No. 17.

3.4 Severability. If any portion of this Amendment No. 17 is declared invalid, illegal, or otherwise unenforceable by a court of competent jurisdiction, the remaining provisions shall continue in full force and effect.

3.5 Integration. This Amendment represents the entirety of the Parties' understanding relating to the subject of this Amendment, including written or verbal communications between the Parties, which shall have no relevance unless expressly incorporated herein. This is an integrated amendment.

ARDURRA
COLLABORATE. INNOVATE. CREATE.

August 30, 2023

Mr. Gil Mars
Design & Construction – Project Manager
City of Ontario
1333 S. Bon View
Ontario, CA 91761

Subject: Proposal to Provide Civil Engineering Services for the Demolition of the existing improvements at 935 Holt Boulevard (Blvd)

Dear Mr. Mars,

Ardurra Group, Inc. (Ardurra) appreciates this opportunity to present our proposal to the City of Ontario to provide civil engineering services associated with the demolition of the existing improvements within the site located at 935 E. Holt Blvd, Ontario California (Exhibit A). Ardurra's project understanding, the proposed scope of services and the estimated fee are presented herein for your consideration.

Ardurra's civil engineering design team for this project will be led by Jose Hernandez, PE. He has worked on multiple demolition projects over the years and understands the characteristics and challenges of this type of work, including assessing and determining the disposition of the existing soil conditions, the site drainage requirements, and the existing utilities.

Ardurra proposes to accomplish the work described herein for a time and material not-to-exceed fee of $39,609. Ardurra will prepare monthly invoices and will only exceed this amount with prior written authorization. A fee breakdown using our hourly billing rates is attached for your information (Exhibit B). The billing rates shown in the fee breakdown are valid through December 2023.

We look forward to the opportunity to perform this work for you. We are available to meet to discuss this proposal and the necessary tasks identified in this scope. Please contact Jose at (714) 458-7929 or jhernandez@ardurra.com should you have any questions or require any additional information.

Sincerely,
Ardurra Group, Inc.

Anissa Voyiatzes, PE, QSD, ENV SP
Group Leader, Engineering and Municipal Services

Exhibit C – Geotechnical Proposal

Project Understanding

Ardurra understands that the City of Ontario proposes to acquire the property located at 935 E. Holt Blvd, demolish the existing improvements on the site, and prepare the site to sell it for future development. The project boundary is just over 1 acre located east of the intersection of E. Holt Blvd and N. Allyn Ave. The project site currently consists of a parking lot, an existing commercial building, that is currently conducting business, and existing utilities. It is understood that the overall project will involve demolishing the existing structures, removing of the existing pavement, cutting, and capping the existing utilities, and leaving a rough-graded site. Ardurra's scope is limited to the civil engineering portion of work described in the scope of services. The existing structures may require hazardous material abatement that others will assess, design, and perform.

Scope of Services

Ardurra proposes to provide civil engineering design services including the preparation of demolition plans for the project-specific civil elements, including the sewer, water, and storm drain, the preparation of a preliminary rough grading plan, an erosion control plan, the preparation of a project Storm Water Pollution Prevention Plan (SWPPP) report, coordination/collaboration with dry utilities (gas, electrical, and communication) for the cutting and capping of these utilities, and quantity take-off for the civil elements. Ardurra will also perform internal Qa/Qc for our project tasks.

Ardurra intends to perform the proposed civil engineering design services as follows:

Project Documents:

The following is a breakdown of our understanding of the civil engineering task services required for the civil-related portion of the work:

Task 1: Project Coordination and Meetings – This task will involve project coordination and meetings for the project. It will include three (3) design team meetings and two (2) site visits. This task will also involve coordination with utility providers to identify the contact personnel of the individuals that the contractor will need to coordinate with for the removal of the on-site utilities.

Task 2: Demolition Plan – This task will involve reviewing existing documents including existing plans and as-builts, if available, to develop the demolition plan for the project area. The demolition plan will reflect the existing conditions, to the extent possible and will provide the contractor with guidance in removing the civil improvements. The demolition plan will identify the existing surface features and utilities to be cut, capped, removed, or abandoned in place. The plan will only provide general information relative to building demolition. Detailed building demolition including hazardous material abatement and removal will be done by others; however, Ardurra will coordinate with the team that will design the building assessment and abatement design to provide for proper site preparation. Since there will not be a project topographic map, Ardurra will use available aerial imagery to prepare the demolition plan.

Task 3: Preliminary Rough Grading Plan – This task will involve preparing a preliminary rough grading plan that will provide rough grading guidance to the demolition contractor so that trenches and excavations are not left on the site after the existing infrastructure is removed. The preliminary rough grading plan will be developed using available USGS contours as existing contours and the proposed elevations will be based on the depths of removals from the existing improvements (pavement depth, foundations, etc.)

Task 5: Erosion Control Plan – This task will involve generating an erosion control plan that will serve as the basis for the sediment project for the site during demolition activities. The erosion control plan, included in the set will be the minimum requirements that the contractor must implement. The plan will be augmented by the project SWPPP, which will be submitted to the State.

Task 6: Quantity Take-off for Civil Elements – This task will involve generating quantities for the civil-related demolition elements. The quantities will include pavement removal, approximate earthwork quantities, and utility removals. A cost estimate will not be included. Quantities or Costs for structural demolition will not be included or they will be provided by others.

Task 7: SWPPP – This task involves the development of the project SWPPP that will be required during demolition and rough grading. The SWPPP will be coordinated with the City to determine how the site will remain after rough grading and submit the document to SMARTS.

Deliverables:

It is anticipated that Ardurra will be provided with the project standard border for the plan sheets in AutoCAD format and that Ardurra will produce reproducible bond sheets. The drawings will be prepared using AutoCAD. If required, Ardurra AutoCAD standards can be adjusted to match those of the City of Ontario, if required. It is assumed that specific standard requirements will be selected at project startup if an electronic submittal is required.

Ardurra anticipates no more than three (3) submittals of the following project documents:

- Civil Demolition Plan
- Rough Grading Plan
- Erosion Control Plan
- Technical specifications for civil related items
- Quantities for Civil related demolition elements
- Project SWPPP

The geotechnical report will be provided by Converse Geotechnical.

Assumptions:

- This proposal covers only the scope outlined above.
- Per the direction of the City, the project plans will be developed using available aerial imagery and the available boundary survey provided by the City. No survey information will be provided for the demolition and rough grading plans.
- The demolition plan set developed by Ardurra will only include identification of structures to be removed and utilities (water, sewer, and storm drain) to be cut, capped, and removed. This scope of work will not include specific demolition requirements for the existing structures. It will be assumed that any hazardous material assessments, testing or abatement for the existing structures will be performed and specified by others.
- The current scope of work does not anticipate submittal to any other agency other than the City of Ontario.
- Technical specifications for site removal and rough grading will be provided. Other specifications, if required, will be provided by others.
- The demolition plan will show cutting, capping, and removal of dry utilities; however, it is anticipated that the utility owners will remove their own utility unless directed otherwise by the utility owner.

Exclusions:

The following items are specifically excluded from the Ardurra scope of proposed services based on our current understanding of our scope:

- Project surveying services are not included in this scope of work
- Cost estimate
- Project utility profiles will not be included in this scope
- Necessary permit processing fees
- Environmental and Land Use permits
- Traffic/transportation engineering, including haul route plan and traffic control
- Permits associated with demolition activities
- Qualified SWPPP Practitioner (QSP) services are not included in this scope
- Hazardous assessments or services for the existing building are not included in this scope of services
- Structural engineering services are not included
- The soil characterization is limited to the tests identified in the Geotechnical Proposal (Exhibit C). Additional tests will require additional budget to perform
- The project documents will provide regulatory guidance for soil/pavement disposition only
- SWPPP fees are not included in the scope
- Realignment of the existing sewer line

Sub-consultant Scope:

Geotechnical Scope of Work: Converse Consultants (Converse) will perform the geotechnical investigation for this project and will provide a report for our use in preparing the project documents described hereon. Converse will perform 4 borings throughout the site and test the material for traces of VOCs, SVOCs, PCBs, OCPs, and Title 22 metals. Please see the geotechnical for additional assumptions and exclusions for the geotechnical scope.

Converse Consultants
Geotechnical Engineering, Environmental & Groundwater Science, Inspection & Testing Services

August 28, 2023
Revised August 30, 2023

Mr. Jose Hernandez, PE, QSD/P
Project Manager
Ardurra
3737 Birch Street, Suite 250
Newport, CA 92660

Subject: **REVISED PROPOSAL TO VERIFY SOIL CONTAMINATION AND PREPARE AN EARTHWORK RECOMMENDATION REPORT**
Demolition of the Building Located at 935 East Holt Boulevard and Grade a Pad for Future Development
City of Ontario, San Bernardino County, California
Converse Project No. 23-81-263-00 (01)

Dear Mr. Hernandez:

Converse Consultants (Converse) is pleased to submit this proposal outlining our scope of work and cost estimate to verify soil contamination and prepare an earthwork recommendation report to grade the demolished building site located 935 East Holt Boulevard, City of Ontario, San Bernardino County, California.

This proposal is based on a review of the following.

- The information you transmitted to us via email on August 23 and 29, 2023
- Discussion with you over the phone on August 24, 2023.

Our proposal dated August 28, 2023 have been revised to eliminate geology/earthquake hazard evaluation of the site.

SITE/PROJECT DESCRIPTION

We understand the City of Ontario owns a one-story warehouse/maintenance building over approximately 1.01-acre site located at 935 East Holt Boulevard, Ontario, California. Associated with the building is an asphalt concrete paved parking lot and underground utilities.

The City of Ontario (City) intends to demolish the building and abandon the existing underground utilities. The site will be graded for future use as a building pad. Also, the soils outside the building footprint will be tested for hydrocarbon related contamination.

SCOPE OF SERVICES

Our scope of work will include the following tasks.

Task 1: Project Coordination and Set-up
We will review the following documents, if available.

- As-built drawings of existing underground utilities.
- Previous geologic/geotechnical publications of the site and surrounding area.

As part of the project set-up, our staff will conduct the following.

- Prepare a field exploration plan and submit it for your review and approval.
- Conduct a site reconnaissance and stake/mark the field exploration locations such that it is accessible.
- Notifying Underground Service Alert (USA) at least 48 hours prior to drilling to clear the boring locations of any conflict with existing underground utilities.
- **Since the site has existing underground utilities, a representative from the owner MUST assist in clearing the boring locations from conflict with existing utilities. Converse will NOT be liable for damage to any unmarked utility.**
- Engage a drill rig company to drill the borings.

Task 2: Subsurface Exploration

Our subsurface exploration will consist of drilling borings within the project site. The purpose of the borings will be to:

- Estimate the extent and depths of remedial grading.
- Classify the soils within the borings.
- Collect soils samples for laboratory testing.
- Determine the excavatability of the soil.

We plan to drill a total of 4 borings, each to a depth of 15.0 feet below existing ground surface. The borings will be drilled with a truck-mounted rig (CME 75 or equivalent) equipped with 8-inch diameter hollow-stem augers for soils sampling. Soils will be continuously logged and classified by the geologist/engineer in the field by visual examination in accordance with the Unified Soil Classification System.

Both undisturbed ring samples and bulk samples of the subsurface materials will be obtained at three-foot to five-foot intervals, at changes in soil profiles, or where unusual conditions are encountered. The relatively undisturbed ring samples will be obtained using a Modified California Sampler (2.4-inch inside diameter and 3.0-inch outside diameter) lined with thin-walled sample rings. The sampler will be driven into the bottom of the borehole with successive drops of a 140-pound hammer falling 30 inches. The number of successive drops of the driving weight (“blows”) required for one foot of penetration will be shown on the boring log, in the “blow/foot” column. The soil will be retained in brass rings (2.4 inches in diameter and 1.0 inch in height) and carefully sealed in waterproof plastic containers for shipment to the laboratory. Bulk samples of representative soil types will be collected in plastic bags. Groundwater levels, where encountered in the borings, will be recorded.

The borings will be backfilled with soil cutting mixed with cement and compacted by pushing down with the augers using the drill rig weight. If construction is delayed, we recommend the owner monitor the borings and backfill any settlement or depression that might occur or provide protection around the area of the borings to prevent trip and fall injuries from occurring near in area of any potential settlement.

Note: Soils will NOT be placed in drums.

Task 3: Laboratory Testing

The laboratory testing program will depend upon the type of soils encountered during our substrate exploration and the quality of samples obtained. Analytical and Geotechnical Laboratory tests will include, but may not be limited to, the following.

Environmental Analytical Testing for Soil Sample

One composite soil sample from the soil cuttings will be submitted to a California ELAP certified laboratory under chain-of-custody control. Sample analyses will be conducted at a standard turnaround time. The samples will be analyzed as follows.

- EPA 8015M – TPH carbon chain speciation
- EPA 8260 – VOCs and Oxygenates
- EPA 8270 – SVOCs
- EPA 8082 – PCBs
- EPA 8081A – OCPs
- EPA 6010B – Title 22 metals (TTLC)

Geotechnical Tests

- In-place moisture and density
- Expansion index
- Soils corrosivity
- Collapse
- Laboratory maximum density

Task 4: Geotechnical Report

Data obtained from the exploratory borings and the laboratory testing program will be evaluated to prepare a report, which will include the following.

- Site and project description.
- Discussion of the field procedures used in the investigation.
- Logs of the exploratory borings summarizing the subsurface conditions encountered, results of laboratory testing, and a plan indicating the locations of the explorations and elevation.
- Depth to groundwater (if encountered).
- Existing pavement thickness measured at the boring locations.
- Discussion on the laboratory test results (including expansive and corrosion potential).
- Discussion of the chemical test results.
- Suitability of using on-site material for engineered fill including cut/fill recommendation.
- Excavatability of the site soils
- Remedial grading and earthwork recommendation.
- Shrinkage and subsidence coefficients.

FEE ESTIMATE

Our consulting services will be provided in accordance with our current *Schedule of Fees* and *General Conditions*, copies of which are attached and form a part of this proposal. Our cost for each phase is presented in the table below.

Task No. and Description	Cost
Task 1: Project Coordination and Set-up	$870.00
Task 2: Subsurface Exploration	$870.00
Task 3: Laboratory Testing ▪ Environmental ▪ Geotechnical	$1,000.00 $960.00
Task 4: Geotechnical Report	$3,280.00
Drill Rig Services (Prevailing Wage-Quote #9201)	$2,800.00
Total Cost	**$9,780.00**

Our cost is based on the following assumptions.

- You will provide Converse, at no cost, the as-built underground utility plans within the project limits.
- No permit will be required for our field investigation.
- Site access will be available during normal weekday working hours at no additional cost to us.
- All fieldwork will be done in one mobilization during normal weekday working hours.
- Level D personal protection will be required.
- Boreholes will be backfilled with soil cuttings mixed with cement.
- **It is understood that this project is subject to prevailing wage project as defined by California Labor Code 1770-1780.**

Our estimate includes our professional services, outside costs for subcontracted drilling services, and time to contact and verify boring locations (in the field) with Underground Service Alert. Our fees, as presented herein, do not include permit fee(s), attendance at meetings, review of the project plans, or responding to comments by regulatory agencies.

Should further investigation be required to evaluate site conditions, we will discuss the matter with you. If required, a detailed supplemental proposal will be prepared. Our services will be performed on a time-and-materials basis in accordance with the unit rates presented herein, and/or the unit rates indicated in our attached *Schedule of Fees* and *General Conditions.*

PROPOSED SCHEDULE/DELIVERABLES

We will commence our scope of work within one to 2 weeks after notice to proceed, weather permitting and depending on drill rig availability. About one day will be required to complete the fieldwork.

One electronic PDF copy of our earthwork recommendation report will be submitted 4 weeks after all fieldwork is completed.

CLOSURE

During the course of this work, we will carry worker's compensation insurance as required by the contract. Our findings and recommendations will be prepared in accordance with generally accepted professional engineering and engineering geologic principles and practices in this area of Southern California. Unless we hear differently, we will assume that these conditions are acceptable to you.

This proposal will expire 60 days from its issuance, if not accepted at that time. Our billing rates are reviewed at the beginning of each year and are subject to adjustment.

Please sign 2 copies of the Authorization and Agreement Block at the end of this proposal. Retain one copy of this proposal for your files and return one signed copy along with the retainer check to this office to formally authorize our services. Special billing instructions, including backup documentation requirements, should be mutually agreed upon and indicated in the authorization form. Subsequent additions or changes should likewise be mutually agreed upon and submitted in writing with the appropriate authorization.

If you should have any questions, or if we can provide any additional assistance, please call the undersigned at 909-474-2847. We appreciate the opportunity to be of continuing service and assistance to you on this important project.

CONVERSE CONSULTANTS

Appendix

CONVERSE CONSULTANTS
Non-Prevailing Wage Schedule of Fees
Geotechnical Personnel

Introduction
It is the objective of Converse Consultants to provide its clients with quality professional and technical services and a continuing source of professional advice and opinions. Services will be performed in a manner consistent with that level of care and skill ordinarily exercised by members of the profession currently practicing in the same locality under similar conditions. This fee schedule is valid through December 31, 2023.

Hourly Charges for Personnel
Staff assignments will depend on personnel availability, job complexity, project site location, and experience level required to satisfy the technical requirements of the project and to meet the prevailing standard of professional care.

Field Technical Services (all including vehicle and equipment)

Construction Inspector – ACI/ICC and/or AWS/CWI certified (concrete, post-tension, masonry, structural steel, fireproofing; includes concrete batch plant and local steel fabrication inspections)	$85
Non-Destructive Testing Inspector (ultrasonic, magnetic particle, dye penetrant)	85
Construction Inspector/Technician (skidmore, pull testing, torque testing, Schmidt hammer, and pachometer)	90
Coring Technician	90
Soils Technician (soil, base, asphalt concrete, and moisture emission testing)	80
Senior Soils Technician	90
Sample Pick-Up	50

Professional Services (field and office)

Staff Professional	$135
Senior Staff Professional	145
Project Professional	155
Project Manager	170
Senior Professional	170
Principal Professional	220
Principal/Consultant	235

Laboratory Testing

Laboratory Technician (See Geotechnical Laboratory Testing and Materials Testing Services fee schedules.)	Per Test
Laboratory Supervisor	$90

Office Support

Clerical/Word Processing	$80
Drafting	85
CAD Operator/Drafting Manager	90

An overtime charge of 50 percent of the above hourly rates (excluding Professional Services) will be added for time in excess of eight hours per day and for all time on Saturdays, Sundays and holidays. An overtime charge of 100 percent of the above hourly rates (excluding Professional Services) will be charged on Sunday if hours worked were seven continuous eight hours per day in one work week, not counting paid time off within the week. Travel time to and from the job site will be charged at the hourly rates for the appropriate personnel.

Expenses
1. Exploration expenses (drilling, trenching, etc.) are charged at cost plus fifteen percent.
2. Travel and subsistence expenses (transportation, room and board, etc.) for individuals on projects requiring travel and/or living 50 miles away from the project site are charged at cost plus fifteen percent.
3. Automobile and truck expenses are charged at cost plus fifteen percent (rentals) or at the current IRS mileage rate for company-owned vehicles traveling between principal office and project.
4. Other out-of-pocket direct project expenses (aerial photos, long-distance telephone calls, permits, outside printing services, tests, etc.) are charged at cost plus fifteen percent.

Invoices
1. Invoices will be submitted to the Client on a monthly basis, and a final bill will be submitted upon completion of services.
2. Payment is due upon presentation of invoice and is past-due thirty days from invoice date. In the event Client fails to make any payment to Converse when due, Converse may immediately cease work hereunder until said payment, together with a service charge at the rate of eighteen percent per annum (but not exceeding the maximum allowed by law) from the due date, has been received. Furthermore, Converse may at its sole option and discretion refuse to perform any further work irrespective of payment from Client in the event Client fails to pay Converse for services when said payments are due.
3. Client shall pay attorneys' fees or other costs incurred in collecting any delinquent amount.

General Conditions
The terms and provisions of the Converse General Conditions are incorporated into this fee schedule as though set forth in full. If a copy of the General Conditions does not accompany this fee schedule, Client should request a copy from this office.

Compensation for laboratory testing services will be made in accordance with this fee schedule which includes test report(s) and engineering time. Costs of tests not on this schedule will be by quote and/or in accordance with our current hourly fee schedule. The rates are based on non-contaminated soil. A surcharge will be charged for handling contaminated material, which will be determined based on the project.

CHEMICAL TESTS

Corrosivity (pH, resistivity, sulfates, chlorides) 220.00
Organic Content, ASTM D2974 ..... 100.00

Conditions: Unit rates presented on this fee schedule are for routinely performed geotechnical laboratory tests. Numerous other earth material physical tests can be performed in our geotechnical laboratories, including rock core, soil cement and soil lime mixture tests. Tests not listed can be quoted upon request. This fee schedule is valid through December 31, 2023.

Prices are based on the assumption that samples are uncontaminated and do not contain heavy metals, acids, carcinogens and/or volatile organics which can be measured by an organic vapor analyzer or photoionization detector with a concentration greater than 50 parts-per-million (ppm). Quoted testing fees are based on the assumption that no protective clothing will be required to handle samples. If Level D protective clothing will be required during handling of samples (as defined in Federal CFR Part 1910.120), then a 40% increase in fees presented in this schedule will be applied. Level C protective clothing will be a 60% increase in fees. Converse will not handle samples that require either Level B or Level A protection in our geotechnical laboratories. Contaminated samples will be returned to the client. Uncontaminated samples will be disposed of 30 days after presentation of test results. The client must disclose the source of samples. Samples imported from out of state will be incinerated after testing in accordance with requirements of the United States Department of Agriculture. Soil samples obtained within the State of California currently designated quarantine areas will also be incinerated in accordance with the requirement of the State of California, Department of Food and Agriculture, Division of Plant Industry, Pest Exclusion. A $5.00 incineration fee will be added to each sample that is required to be incinerated in accordance with State and Federal law.

Test results requiring plots will be presented in a publishable format generated from computer programs. Otherwise, raw test numbers will be presented. A minimum laboratory fee of $50.00 will be charged to present and mail test results. Beyond the standard U.S. Mail delivery, specialized transmittal will be charged at additional cost (e.g., Federal Express, UPS, etc.). Geotechnical testing does not include engineering and/or geologic review and analysis. Typical turnaround for geotechnical laboratory testing is two weeks (or roughly ten working days). To expedite test turnaround to five working days, a 50% increase in the fees in this schedule will be applied. Many geotechnical tests require at least one week to perform in accordance with ASTM or other standard specifications. Fees presented in this schedule for relatively undisturbed direct shear, consolidation or expansion pressure tests are based on the assumption that 2.416-inch inside diameter brass ring samples will be provided to the geotechnical laboratory for testing. Remolded specimens will be compacted in standard 2.5-inch outside diameter brass rings for direct shear, consolidation and expansion pressure tests. All fees presented in this schedule are based on the assumption that the client will deliver samples to our laboratory at no additional cost to Converse.

Invoices will be issued monthly and are payable on receipt unless otherwise agreed upon. Interest of 1.5% per month (but not exceeding the maximum allowed by law) will be payable on any amount not paid within thirty days; payment thereafter to be applied first to accrued interest and then to the principle unpaid amount. The Client shall pay any attorneys' fees or other costs incurred in collecting any delinquent amounts.

Compensation for laboratory testing services will be based on rates in accordance with this fee schedule which includes test report(s) and engineering time. Costs of tests not on this schedule will be by quote and/or in accordance with our current hourly fee schedule. Our services will be performed in accordance with the General Conditions. This fee schedule is valid through December 31, 2023.

AGGREGATES

Moisture Content, ASTM D2216 ..... 20.00
Particle Size Analysis
- Coarse, ASTM C136, each 100.00
- Coarse and Fine, ASTM C136 & C137), each 180.00

Specific Gravity & Absorption
- Coarse Aggregate, ASTM C127 ..... 100.00
- Fine Aggregate, ASTM C128 ..... 100.00
- Unit Weight per Cubic Foot, ASTM C29 ..... 75.00
- Soundness, Sodium or Magnesium, ASTM C88, each 550.00
- Potential Alkali Reactivity, ASTM D289 ..... 700.00
- Freeze Thaw Soundness 175.00
- Los Angeles Abrasion, per class, ASTM C131, C535 ..... 375.00

Wedge Tensile Test, A490 Bolts
- Under 100,000 lbs., each 130.00
- Over 100,000 lbs., each 140.00

Wedge Tensile Test, A325 Bolts
- Under 100,000 lbs., each 160.00

Tensile Test, Anchor Bolts, tested with displacement transducers, each 300.00
Nut Hardness, Proof & Cone Proof Load Test, each 60.00
Washer Hardness, each 50.00
A325 or A490, Bolt Hardness Only, each 50.00
Bolt A325 or A490 Wedge Tensile
- Under 100,000 lbs. & Hardness, each 130.00
- Over 100,000 lbs. & Hardness, each 170.00

Bolt, Nut & Washer, all tests per set with bolts
- Under 100,000 lbs. 400.00
- Over 100,000 lbs. 500.00

See *Schedule of Fees – Geotechnical Laboratory Testing* for soil testing. Hourly rates are available upon request. Field Laboratory rates are available upon request. Listed unit rates are based upon the assumption that samples will be delivered to our laboratory at no cost to Converse.

CONVERSE CONSULTANTS
General Conditions –

Right of Entry

Client warrants to Converse that it has full legal right to authorize Converse's entry upon the real property where Converse's services are to be performed ("Site" herein) and upon all property, if any, required for ingress and egress to the Site.

Client authorizes Converse to enter upon the Site and such adjoining property as is necessary to allow Converse to perform its services.

Converse will take reasonable precautions to minimize any damage to the Site; however, Client acknowledges that during the normal course of the performance of Converse's services, some damage to the Site may occur. The correction of any damage to the Site (surface or subterranean) shall be the obligation of the Client.

Information Supplied by Client

Client warrants the accuracy of any information supplied by it to Converse, acknowledges that Converse will not verify the accuracy of such information, and agrees that Converse is entitled to rely upon any such information.

Client shall immediately notify Converse in writing of any data, information or knowledge in the possession of or known to Client relating to conditions existing at the Site and shall provide Converse with the location, size and depth of any and all underground tanks, piping or structures existing upon the Site.

Client shall defend, indemnify and save harmless Converse, its officers, agents and employees from and against any and all claims, costs, suits and damages, including attorneys' fees, arising out of errors, omissions and inaccuracies in documents and information provided to Converse by Client.

Ownership of Data and Documents; Samples

All reports, boring logs, field data, field notes, laboratory test data, calculations, estimates and other documents prepared by Converse shall remain the sole property of Converse.

Client shall have the right to the use of all data, recommendations, proposals, reports, design criteria and similar information provided to it by Converse ("information" herein); provided, however, that the information shall not be used or relied upon by any party other than Client, save and except as may be required by the design and licensing requirements of the project for which the information is provided; further, such use shall be limited to the particular site and project for which the information is provided. To the extent Client utilizes Converse's information by providing or making the same available to any third party (a) Client agrees to give written notice to any such third party that it may not utilize or rely on any aspect of Converse's information and (b) Client agrees to defend, indemnify and hold Converse harmless against any and all claims, demands, costs, losses, damages and expenses, including attorneys fees, that may be asserted against or sought from Converse by any such third party.

Client's right to the use of the information is expressly conditioned upon Client's prompt payment to Converse of all sums due under the Client/Converse agreement. In the event of Client's nonpayment or partial payment of said amounts, Client agrees that it shall not use any of the information for any purpose whatsoever and shall return the same to Converse within 2 business days upon demand.

Converse will retain all samples of soil, rock or other materials obtained in the course of performing its services for a period of thirty (30) days. Thereafter, further storage or transfer of samples to Client may be made at Client's expense upon written request from Client to Converse received by Converse prior to the expiration of the 30-day period.

Converse shall retain permanent records relating to the Converse services for a period of five (5) years following submittal of Converse's report, during which period the records will be made available to Client upon reasonable notice given by Client and upon payment to Converse of an amount sufficient to reimburse Converse for its necessary and reasonable expenses in making said records available.

Standard of Care and Professional Responsibility

Client acknowledges that the services to be performed by Converse involve the use of tests, calculations, analyses and procedures which are in a constant state of development, improvement and refinement and that, as such, improvements, changes in methods, and modifications of procedures have been made in the past, are now being made, and are expected to continue to be made in the future.

Further, Client recognizes that, while necessary for investigations, commonly used exploration methods, such as drilling borings or excavating trenches, involve an inherent risk. For example, exploration on a site containing contaminated materials may result in inducing cross-contamination, the prevention of which may not be complete using presently recognized sealing methods.

Client recognizes that the state of practice, including but not limited to the practice relating to contamination or hazardous waste conditions, is changing and evolving and that standards existing at the present time may subsequently change as knowledge increases and the state of the practice continues to improve.

Client recognizes that projects containing contaminated materials may not perform as anticipated by Client, even though Converse's services are performed in accordance with the level of care and skill required of it. Further, certain governmental regulations relating to hazardous waste sites may purport to require achievement of results which cannot be accomplished in an absolute sense. It is recognized that a satisfactorily designed, constructed and maintained monitoring system may assist in the early detection of environmental changes allowing for early correction of problems. Unless it is specifically included in the scope of services to be performed by Converse, Client understands that Converse shall not perform such monitoring.

The services to be provided by Converse pursuant to the agreement to which these General Conditions are a part shall be provided in accordance with generally accepted professional engineering, environmental, and geologic practice in the area where these services are to be rendered and at the time that services are rendered. Client acknowledges that the present standard in the engineering and environmental professions does not include, and Converse does not extend to Client, a guarantee of perfection of the work contemplated hereby; further, that even in the exercise of normal and reasonable care, errors or omissions may from time to time occur. Except as expressly set forth in these General Conditions, no other warranty, express or implied, is extended by Converse.

Converse shall have no duty to supervise, coordinate or otherwise be involved in the performance of services or work by any third-party consultant, contractor or subcontractor.

Where Converse's services involve field observation of grading, filling and compaction (or any of them), it is agreed:

a. That Converse shall in no way be responsible for the manner in which such work is performed by any third party.

b. That in the event Converse is to provide periodic observation, Client acknowledges that Converse cannot be responsible for any work performed at a time or times when Converse was not performing its observation services. Converse will not provide an opinion concerning the performance of any third party, save and except to the extent that said work was in fact observed and tested by Converse during the course of construction.

c. That where Converse's services include continuous observation, Client agrees not to allow grading, filling or compaction to be performed at any time or times when Converse is not physically present upon the Site and shall restrict the amount and extent of such grading, filling and compaction to that which can be properly observed by Converse personnel present on the Site.

d. That in the event Converse is to conduct test borings for Client, Client acknowledges that the accuracy of said test borings relates only to the specific location in which the boring itself was performed and that the nature of many sites is such that differing subsurface soil characteristics can be experienced within a small distance. As such, Client acknowledges that greater accuracy is obtained when the number of test borings is increased.

Technical Limitations

Client acknowledges and agrees that: (1) it is unreasonable to expect Converse to be able to completely evaluate subsurface conditions, even after the most comprehensive exploratory program; (2) site conditions change frequently due to the passage of time, human activities, and climatic conditions and uncertainties are therefore inherent in the nature of Converse's services and impossible to avoid; (3) the identification of geotechnical and environmental conditions and the prediction of future or concealed conditions is an inexact scientific endeavor; (4) the state of the art of geotechnical and environmental practice is such that Converse cannot guarantee that its recommendations will prove adequate on this project and the Client assumes the risk of any such failure, except as otherwise provided in these General Conditions and that (5) these General Conditions contains specific LIMITATIONS OF LIABILITY.

Indemnity of Client and Limitation of Liability

Converse shall indemnify Client, its officers, directors, agents or employees from any claim, demand or liability arising from personal injury or property loss or damage caused by the sole negligence or willful misconduct of Converse.

Anything to the contrary in the agreement to which these General Conditions are attached or in these General Conditions notwithstanding, Converse's liability shall be limited to the lesser of the fees charged to Client by Converse for the services performed for Client, or the sum of fifty thousand dollars. Client may, at its option, increase the maximum amount for which Converse shall be liable by payment of an additional fee. For the maximum liability sum of one hundred thousand dollars, the additional amount to be paid shall be four percent of the total Converse fee charged hereunder; for the maximum liability sum of one million dollars, the additional amount to be paid shall be five percent of the total Converse fees charged hereunder Client acknowledges and agrees that its recovery, if any, shall be satisfied, in the first instance, from the proceeds of Converse's insurance, and to the extent of any deficiency in the available insurance proceeds, then and only then, by Converse.

Client acknowledges that Converse has agreed to charge Client a reduced fee for services in exchange for the above limitation of liability and that said reduction in fees is consideration for said limitation.

Client shall defend and save harmless Converse, its officers, directors, agents and employees from all liability, claims and demands, including expenses of suit and reasonable attorneys' fees arising from personal injuries, including disease and death, property loss or damage, injury to others (including personnel of Client, Converse or

subcontractors performing work hereunder), and air or ground pollution or environmental impairment arising out of or in any manner connected with or related to the performance of Converse's services, except where there is a judicial determination that such injury, loss or damage shall have been caused by the sole negligence or willful misconduct of Converse. Client acknowledges that Converse has charged Client a reduced fee for services to be performed by it in exchange for this hold harmless and that the reduction in fees is consideration for said hold harmless provision.

Converse will not be liable for consequential damages of any kind, nature or description.

Hazardous Waste, Pollution and Health Hazard Projects ("Hazardous Projects" Herein)

Prior to the commencement of services by Converse on any hazardous project, Client agrees to advise Converse in writing of any known hazardous waste or materials existing on or near the Site or if any of said services are to be performed in an area where dust, fumes, gas, noise, vibrations or other particulate or nonparticulate matter is in the atmosphere where it raises a potential or possible health hazard or nuisance to anyone working within the area.

Anything in these General Conditions notwithstanding, Client shall indemnify and hold Converse, its officers, directors, agents, servants and employees, harmless from any claim, demand or action brought by any party whomsoever, including employees of Converse which claim, demand or action is based upon injury or damage caused or alleged to have been caused by hazardous wastes or hazardous materials whether or not such waste or materials were known to exist prior to the commencement of services.

Client agrees to be responsible for the removal and disposal of any hazardous waste uncovered as a result of the site investigation, including drill cuttings, unless specifically included within the scope of work

It is agreed that the discovery of unanticipated hazardous materials constitutes a changed condition mandating an immediate renegotiation of the scope of services or termination of services. Converse will at all times endeavor to perform in a faithful and trustworthy manner. Client understands that Client or Converse may be required by local and/or state and/or federal statute to report the discovery of hazardous materials to a government agency. Client also understands that Converse may be required by local and/or state and/or federal statute to report the discovery of hazardous materials to a government agency, and that Converse, when practical, will do so only after notifying Client. In the event Converse discovers hazardous material that we believe poses an immediate threat to public health and safety, Converse will use its best judgment to notify appropriate emergency personnel for immediate containment. Client agrees to take no action of any kind against Converse when Converse makes a good-faith effort to fulfill its obligations.

Client's Responsibilities

Client shall immediately provide Converse with full information in writing as to Client's requirements for the services to be provided by Converse and shall designate in writing within five (5) days of the effective date of the agreement to which these General Conditions are a part, a representative to act on Client's behalf in conjunction with the services to be provided hereunder. Client shall promptly review all documents, reports, data and recommendations submitted by Converse and shall communicate with Converse concerning such reviews for the purpose of avoiding delay in the performance of the services to be rendered by Converse.

Client shall notify any third party who may perform on the Site of the standard of care being undertaken by Converse pursuant hereto and of the limitations of liability contained herein. Client shall require as a condition to the performance of any such third party a like indemnity and limitation of liability on their part against Converse.

Confidentiality

Converse shall hold all information provided to it by Client and the results of the work performed by it confidential and shall not disclose the same to any third party except where required by Governmental regulatory agencies or as otherwise required by law.

Disputes

Converse shall have the right to bring a legal action in a state or federal court against Client for any sums due or alleged to be due to it or for services rendered. Except for this right, Converse and Client agree that as an express condition to the right of either party to bring a legal action against the other, they shall first submit any dispute to mediation by a neutral person acceptable to both parties.

Each party shall bear its own attorneys' fees, costs and other expenses, except that each party shall be responsible and pay for one-half of the costs and expenses of the mediator.
In the event that legal action is required, the prevailing party shall be entitled to recover all of its costs incurred in connection therewith including, without limitation, staff time, court costs, attorneys' fees, consultant and expert witness fees and any other related expenses. In this regard, in order to make the prevailing party whole, the parties acknowledge and agree that the prevailing party shall be entitled to recover all of its costs incurred in connection with the legal action and shall not be limited to “reasonable attorneys fees” as defined in any statute or rule of court.

The obligations, responsibilities, warranties and liabilities of the parties shall be solely those expressly set forth herein. Remedies and limitations of liability shall apply regardless of whether an action is brought in contract, or is based on either party’s negligence, or another theory of law. All of the rights, remedies, obligations, terms, conditions and limitations of liability stated herein shall extend collectively to and be binding upon the parties’ partners, joint ventures, licensors, successors, assigns, insurers, and affiliates. Client and Converse agree that any legal action with respect to the services to be performed under these General Conditions shall be brought against the parties, and not against individual officers, employees or former employees of the parties. All legal actions by either party against the other for breach of these General Conditions or for the failure to perform in accordance with the applicable standard of care, however framed, that are essentially based upon such breach or failure shall be barred two (2) years from the time claimant knew or should have known of its right to make a claim, but, in any event, not later than four (4) years from substantial completion of Converse’s services.

Jobsite Safety

Converse shall be responsible for its activity and that of its employees on the Site. This shall not be construed to relieve the Client, its general contractor or any subcontractor of their obligation to maintain a safe jobsite.

Neither the professional activities nor the presence of Converse or its employees and subcontractors shall be understood to control the operations of others, nor shall it be construed to be an acceptance of the responsibility for jobsite safety.

Converse will not direct, supervise or lay out the work of the Client, contractor, or any subcontractors. Converse's services will not include a review or evaluation of the adequacy of the contractor's safety measures on or near the Site.

Schedules

Unless otherwise specified in the agreement, Converse shall be obligated to perform within a reasonable period of time. Converse shall not be responsible for delays in the completion of its services created by reason of any unforeseeable cause or causes beyond the control and/or without the fault or negligence of Converse, including but not restricted to acts of God or the public enemy, acts of the Government of the United States or of the several states, or any foreign country, or any of them acting in their sovereign capacity, acts of other contractors with Client, fire, floods, epidemics, riots, quarantine restrictions, strikes, civil insurrections, freight embargoes, and unusually severe weather.

Should completion of any portion of the services to be rendered by Converse be delayed beyond the estimated date of completion for any reason which is beyond the control of or without default or negligence of Converse, then and in that event Client and Converse shall mutually agree on the terms and conditions upon which the services may be continued or terminated.

Invoices

Converse shall submit monthly progress invoices to Client, and a final bill shall be submitted upon completion of the services. Within thirty (30) days after receipt of an invoice, Client shall pay the full amount of the invoice. If Client objects to all or any portion of any invoice, it shall so notify Converse of the same within fifteen (15) days from the date of receipt of said invoice and shall pay that portion of the invoice not in dispute, and the parties shall immediately make every effort to settle the disputed portion of the invoice.

If Client fails to make payment within thirty (30) days after receipt of an invoice, then Client shall pay an additional monthly service charge of one and one-half percent (1½ %) on all such amounts outstanding. The additional charge shall not apply to any disputed portion of any invoice resolved in favor of Client. In the event Client fails to pay any undisputed amount to Converse when due, Converse may immediately cease work until said payment together with a service charge at the rate of 1½ % per month, as specified above, from the due date has been received. Further, Converse may, at its sole option and discretion, refuse to perform any further work irrespective of payment from Client.

In the event that all or any portion of the 1½ % service charge provided for herein is deemed to be an interest charge, then and in that event said interest charge shall be limited to the maximum amount legally allowed by law.

Client acknowledges Converse’s fee schedules are revised annually and agrees that the fee schedule in effect at the time the services are performed shall apply to such services.

Insurance

Converse represents that it now carries, and will continue to carry during the term of the contract to which these General Conditions are a part, Workers Compensation insurance and that, if requested, Converse shall provide to Client certificates as evidence of the aforementioned insurance.

Assignments

Client shall not assign this contract or any portion thereof to any other person or entity without the express written consent of Converse. Nothing contained in this contract or any part thereof shall be construed to create a right in any third party whomsoever, and nothing herein shall inure to the benefit of any third party.

Severability

If any provision of these General Conditions is finally determined to be contrary to, prohibited by, or invalid under applicable laws or regulations, such provision will be renegotiated so as to give effect to the intent of the parties to the maximum possible extent. Such determination and renegotiation shall not affect of invalidate the remaining provisions or these General Conditions.

Governing Law

These General Conditions shall be governed by and construed under the laws of the State of California.

CITY OF ONTARIO *Agenda Report* **November 21, 2023**	**SECTION:** **CONSENT CALENDAR**
Department: Public Works Prepared By: Adrian Escamilla Staff Member Presenting: Tito Haes, Executive Director Public Works Reviewed By: Andrea Ampig Approved By:	Submitted To: Council/OHA Approved: _____ Continued To: _____ Denied: _____ Item No: 13

SUBJECT: **AUTHORIZE A CHANGE ORDER TO THE CONSTRUCTION CONTRACT WITH SHAW INTEGRATED & TURF SOLUTIONS, INC., FOR EMERGENCY REPAIRS AT ONTARIO POLICE DEPARTMENT C.E.T DIVISION**

RECOMMENDATION: That the City Council take the following actions:

A. Authorize the City Manager or his designee to complete and execute Change Order No. 2 to the Construction Contract No. D&C21-006 with Shaw Integrated & Turf Solutions, Inc., of Dalton, Georgia, for the emergency repairs at Ontario Police Department Community Engagement Team (C.E.T) Division in an amount of $75,990 for a total not-to-exceed contract amount of $503,233; and
B. Authorize the City Manager or his designee to execute all documents required for the completion of the project including, but not limited to, contracts, agreements, assessments, easements, reduction of retention accounts, and filing a notice of completion at the conclusion of all construction related activities.

THE FOLLOWING COUNCIL GOALS ARE BEING ACHIEVED:
Invest in the City's Infrastructure (Water, Streets, Sewers, Parks, Storm Drains and Public Facilities)

FISCAL IMPACT: The Fiscal Year 2023-24 Adopted Budget includes appropriations in the Facilities and Parks Maintenance Fund for the emergency repairs at Ontario Police Department. The total cost of the repair services is in an amount of $75,990 for a total not-to-exceed contract amount of $503,233.

BACKGROUND & ANALYSIS: The main plumbing backed up at the Ontario Police Department has damaged the carpet and other adjacent amenities in the C.E.T Division. This change order will include removal of damaged carpet, installation of MoistureTek barrier, installation of carpet, and cove base. Staff recommends authorizing a change order to the Construction Contract No. D&C21-006 with Shaw Integrated & Turf Solutions, Inc. in an amount not-to-exceed $75,990.

CHANGE ORDER

Project: **Floor Replacement at Various Facilities D&C 21-006**

Change Order Number: **# 2**

Contract Date: **December 21st, 2021**

Change Order Date: _____

To: Shaw Integrated & Turf Solutions, Inc.
Atten: Eric Taylor
PO Box 208408
Dallas Texas 75320-88408

THIS CHANGE ORDER FORM SHALL BE USED FOR ALL CHANGE ORDERS ASSOCIATED WITH THE WORK. NO ADDITIONS OR DELETIONS TO THIS FORM SHALL BE ALLOWED, EXCEPT WITH PERMISSION OF THE CITY OF ONTARIO.

The Contract is changed as follows:

- Increase contract time
- Proposal ID 191963 – CET Division (Emergency) Floor Replacement

Contractor agrees to furnish all labor, materials, equipment, and services to perform the Work, modified as described herein, in accordance with the Contract Documents as revised by this Change Order.

NOT VALID UNTIL SIGNED BY OWNER

In consideration of the change(s) described above, the Contract Price is adjusted as follows:

The original Contract Price was	$ 404,494.08
Net change by previously authorized Change Orders	$ 22,748.68
The Contract Price prior to this Change Order was	$ 427,242.76
The Contract Price will be changed by this Change Order in the amount of	$ 75,989.68
The new Contract Price including this Change Order will be	$ 503,232.44

In consideration of the change(s) describe above, the Contract Time is adjusted as follows:

The Contract Time will be: increased ☒ unchanged ☐ by	150 Days
The Contract Time prior to this Change Order was	570 Days
The new Contract Time including this Change Order will be	720 Days

(BB&K 2020)
46700.00100\33457526.1

Attachments: Proposal ID: 191963

Contractor accepts the terms and conditions stated herein as full and final settlement of any and all claims arising from this Change Order. The adjustments to the Contract Price and Contract Time in this Change Order constitutes the entire compensation and/or adjustment thereto due to Contractor, including direct, indirect, consequential, and overhead (field and home office) costs, due to Contractor arising out of or related to the change in the Work covered by this Change Order. By signing this Change Order, Contractor agrees to accept the amount of the adjustment to the Contract Price, and the adjustment of the Contract Time, as payment in full for all costs, including direct, indirect, consequential, and overhead (field and home office) costs, related to the change in the Work covered by this Change Order.

SUBJECT: **A GOODS AND SERVICES AGREEMENT WITH CONSTANT TECHNOLOGIES, INC. FOR THE BUILDOUT OF THE ONTARIO POLICE DEPARTMENT REAL TIME INFORMATION CENTER**

RECOMMENDATION: That the City Council take the following actions:

A. Authorize the City Manager or his designee to execute a Goods and Services Agreement with Constant Technologies Inc., of North Kingstown, Rhode Island, for the Ontario Police Department Real Time Information Center (RTIC) in an amount of $721,550;
B. Authorize a 10% contingency of $72,155 to address any unforeseen issues that may arise for a total not-to-exceed contract amount of $793,705; and
C. Authorize the City Manager or his designee to execute all documents required for the completion of the project including, but not limited to, contracts, agreements, assessments, easements, reduction of retention accounts, and filing a notice of completion at the conclusion of all construction related activities.

THE FOLLOWING COUNCIL GOALS ARE BEING ACHIEVED:
Focus Resources in Ontario's Commercial and Residential Neighborhoods
Invest in the City's Infrastructure (Water, Streets, Sewers, Parks, Storm Drains and Public Facilities)

FISCAL IMPACT: The Fiscal Year 2023-24 Adopted Budget includes appropriations from the Capital Improvement Projects-Measure Q Fund for this project. The total contract amount for the Goods and Services Agreement with Constant Technologies, Inc. for the Ontario Police Department RTIC is $721,550 with a 10% contingency of $72,155 for a total not-to-exceed contract amount of $793,705, funded by Measure Q.

BACKGROUND & ANALYSIS: The buildout of the RTIC at the Ontario Police Department will create a hub for the City of Ontario to bring together data, video, audio and real time information into one centralized place for monitoring. Constant Technologies, Inc. is uniquely qualified to combine turnkey display wall deployment, technology integration, and custom analyst workstations, all

specific to Real Time Information Center buildouts. Staff recommends authorizing a Goods and Service Agreement with Constant Technologies, Inc. for the Ontario Police Department RTIC in an amount not-to-exceed $721,550.

CITY MANAGER

CITY OF ONTARIO
GOODS & SERVICES AGREEMENT

This Agreement is made and entered into as of _____, by and between the City of Ontario, a municipal corporation organized under the laws of the State of California with its principal place of business at 303 East "B" Street, Ontario, California 91764-4196, County of San Bernardino, State of California ("City") and **Constant Technologies Inc.** a **Corporation** with its principal place of business at **125 Steamboat Ave North Kingstown, Rhode Island 02852** ("Vendor"). City and Vendor are sometimes individually referred to as "Party" and collectively as "Parties" in this Agreement.

RECITALS

A. Vendor desires to perform and assume responsibility for the provision of certain services and goods required by the City on the terms and conditions set forth in this Agreement. Vendor represents that it is experienced in providing similar services and goods to public clients, that it and its employees or subcontractors have all necessary licenses and permits to perform the services in the State of California and that is familiar with and understands the needs of City.

B. City desires to engage Vendor to sell to City the materials and/or equipment and/or render such services as more particularly described in this Agreement.

TERMS

1. SCOPE OF SERVICES.

1.1 General Scope of Services. Vendor promises and agrees to furnish to the City all labor, materials, tools, equipment, services, and incidental and customary work necessary to fully and adequately supply the **Ontario Police Department Real Time Information Center Audio, Video and Furnishing services** ("Services") which are more particularly described in Exhibit "A" attached hereto and incorporated herein by reference. All Services shall be subject to, and performed in accordance with, this Agreement, the exhibits attached hereto and incorporated herein by reference, and all applicable local, state and federal laws, rules and regulations.

1.2 Goods. Vendor agrees to sell to City and City agrees to purchase the materials and/or equipment ("Goods") as specified and per the specifications attached hereto and incorporated herein as Exhibit "A." Unless specifically stated otherwise, the Goods shall be new and unused and of the current production year.

2. TERM.

2.1 The term of this Agreement shall be from **October 17,2023 to December 17, 2024,** unless earlier terminated as provided herein. Vendor shall provide all Goods and complete the Services within the term of this Agreement and shall meet any other established schedules and deadlines. The Parties may, by mutual, written consent, extend the term of this Agreement if necessary to complete the work.

3. FEES AND PAYMENTS.

3.1 Compensation. Vendor shall receive compensation, including authorized reimbursements, for all Goods provided and Services rendered under this Agreement at the rates set forth in Exhibit "A" attached hereto and incorporated herein by reference. The total compensation shall not exceed **Seven Hundred Twenty – One Thousand Five Hundred Forty-Nine and 49/100 ($721,549.49)** without written approval of City's designee. Extra Work may be authorized, as described below, and if authorized, will be compensated at the rates and manner set forth in this Agreement.

3.2 Payment of Compensation. Vendor shall submit to City a monthly itemized statement which indicates work completed and hours of Services rendered by Vendor and Goods provided. The statement shall describe the amount of Services and Goods provided since the initial commencement date, or since the start of the subsequent billing periods, as appropriate, through the date of the statement. City shall, within 45 days of receiving such statement, review the statement and pay all non-disputed and approved charges thereon.

3.3 Reimbursement for Expenses. Vendor shall not be reimbursed for any expenses unless authorized in writing by City.

3.4 Extra Work. At any time during the term of this Agreement, City may request that Vendor perform Extra Work. As used herein, "Extra Work" means any work which is determined by City to be necessary for the proper completion of the Goods and Services, but which the parties did not reasonably anticipate would be necessary at the execution of this Agreement. Vendor shall not perform, nor be compensated for, Extra Work without written authorization from City's Representative.

4. RESPONSIBILITIES OF VENDOR.

4.1 Control and Payment of Subordinates; Independent Contractor. The Services shall be performed by Vendor or under its supervision. Vendor will determine the means, methods and details of performing the Services subject to the requirements of this Agreement. City retains Vendor on an independent contractor basis and not as an employee. Vendor retains the right to perform similar or different services for others during the term of this Agreement. Any additional personnel performing the Services under this Agreement on behalf of Vendor shall also not be employees of City and shall at all times be under Vendor's exclusive direction and control. Neither City, or any of its officials, officers, directors, employees or agents shall have control over the conduct of Vendor or any of Vendor's officers, employees or agents, except as set forth in this Agreement. Vendor shall pay all wages, salaries, and other amounts due such personnel in connection with their performance of providing Goods and Services under this Agreement and as required by law. Vendor shall be responsible for all reports and obligations respecting such additional personnel, including, but not limited to: social security taxes, income tax withholding, unemployment insurance, disability insurance, and workers' compensation insurance.

4.2 Schedule of Services.

4.2.1 Vendor shall perform the Services and provide Goods expeditiously, within the term of this Agreement, and in accordance with the Schedule of Goods and Services set forth in Exhibit "B" attached hereto and incorporated herein by reference ("Performance time"). Upon request of City, Vendor shall provide a more detailed schedule of anticipated performance to meet the Schedule of Goods and Services. Vendor agrees that if the Goods are not provided and/or the Services are not completed within the Performance Time, it is understood, acknowledged and agreed that the City will suffer damage.

4.2.2 Neither City nor Vendor shall be considered in default of this Agreement for delays in performance caused by circumstances beyond the reasonable control of the non-performing Party. For purposes of this Agreement, such circumstances include a Force Majeure Event. A Force Majeure Event shall mean an event that materially affects a Party's performance and is one or more of the following: (1) Acts of God or other natural disasters; (2) terrorism or other acts of a public enemy; (3) orders of governmental authorities (including, without limitation, unreasonable and unforeseeable delay in the issuance of permits or approvals by governmental authorities that are required for the services); (4) strikes and other organized labor action occurring at the site and the effects thereof on the services, only to the extent such strikes and other organized labor action are beyond the control of Vendor and its subcontractors, and to the extent the effects thereof cannot be avoided by use of replacement workers; and (5) pandemics, epidemics or quarantine restrictions. For purposes of this Section, "orders of governmental authorities," includes ordinances, emergency proclamations and orders, rules to protect the public health, welfare and safety, and other actions of a public agency applicable to the Agreement.

4.2.3 Should a Force Majeure Event occur, the non-performing Party shall, within a reasonable time of being prevented from performing, give written notice to the other Party describing the circumstances preventing continued performance and the efforts being made to resume performance of this Agreement. Force Majeure Events and/or delays, regardless of the Party responsible for the delay, shall not entitle Vendor to any additional compensation. Notwithstanding the foregoing in this section, the City may still terminate this Agreement in accordance with the termination provisions of this Agreement.

4.3 Conformance to Applicable Requirements. All work prepared by Vendor shall be subject to the approval of City.

4.4 Acceptance. The Goods shall be received subject to City's inspection and right of rejection. The Goods shall not be considered accepted until inspection, testing and/or use of the Goods is found to be in accordance with the City's specifications. Final inspection of the Goods shall be at the location specified herein, unless otherwise agreed in writing. If the Goods are found at any time to be defective in material or workmanship, or otherwise not in conformance with specifications, City shall have the right, in addition to any other rights which it may have under warranties or otherwise, to reject such Goods in whole or in part. Rejected Goods shall be held at Vendor's risk for a reasonable time thereafter and shall be returned or disposed of at Vendor's expense. No rejected Goods shall be replaced by Vendor without written instruction or authorization from City.

4.5 Coordination of Services. Vendor agrees to work closely with City staff in the performance of Services and shall be available to City's staff, consultants and other staff at all reasonable times.

4.6 Standard of Care; Performance of Employees. Vendor shall perform all Services under this Agreement in a skillful and competent manner, consistent with the standards generally recognized as being employed by professionals in the same discipline in the State of California. Vendor represents and maintains that it is skilled in the professional calling necessary to perform the Services. Vendor warrants that all employees and subcontractors shall have sufficient skill and experience to perform the Services assigned to them. Vendor represents that it, its employees and subcontractors have all licenses, permits, qualifications and approvals of whatever nature that are legally required to perform the Services, including a City business license, and that such licenses and approvals shall be maintained throughout the term of this Agreement. As provided for in the indemnification provisions of this Agreement, Vendor shall perform, at its own cost and expense and without reimbursement from the City, any services necessary to correct errors or omissions which are caused by the Vendor's failure to comply with the standard of care provided for herein. Any employee of the Vendor or its sub-Vendors who is determined by the City to be uncooperative, incompetent, a threat to the adequate or timely completion of the Services, a threat to the safety of persons or property, or any employee who fails or refuses to perform the Services in a manner acceptable to the City, shall be promptly removed by the Vendor and shall not be re-employed to perform any of the Services provided under this Agreement.

4.7 Warranty. In addition to all warranties which may be provided by law, Vendor warrants that the Goods delivered hereunder shall, (a) be free from defect of material or workmanship and conform strictly to the specifications, drawings, or sample specified or furnished; (b) conform to drawings, plans, specifications, samples or other descriptions furnished, specified, accepted or approved by City; and (c) be merchantable and fit for the purposes intended. The warranty shall be for a period of one (1) year, or such longer period as provided by a manufacturer's warranty or as agreed to by Vendor and City, from the date of final written acceptance of the Goods by City. This warranty shall survive any inspection, delivery, acceptance, or payment by City of the Goods. Vendor, at its own expense, shall repair or replace, at the option of City, any defective Goods within two (2) business days after receipt of notice from City or within four (4) hours in case of emergency, as determined by City. Vendor also warrants that the Goods are free and clear of all liens and encumbrances whatsoever, that Vendor is conveying good and marketable title to same, and that Vendor owns or has a valid license for all of the proprietary technology and intellectual property incorporated within the Goods. Vendor agrees to indemnify, defend and hold City harmless against any and all third party claims resulting from the breach or inaccuracy of any of the foregoing warranties.

4.8 Reserved.

4.9 Disputes. Should any dispute arise respecting the true value of any work done, of any work omitted, or of any extra work which Vendor may be required to do, or respecting the size of any payment to Vendor during the performance of this Contract, Vendor shall continue to perform the Work while said dispute is decided by the City. If Vendor disputes the City's decision, Vendor shall have such remedies as may be provided by law.

4.10 Laws and Regulations; Employee/Labor Certifications. Vendor shall keep itself fully informed of and in compliance with all local, state and federal laws, rules and regulations in any manner affecting its performance under this Agreement, including all Cal/OSHA requirements, and shall give all notices required by law. Vendor shall be liable for all violations of such laws and regulations in connection with this Agreement. If the Vendor performs any work knowing it to be contrary to such laws, rules and regulations and without giving written notice to the City, Vendor shall be solely responsible for all costs arising therefrom. City is a public entity

of the State of California subject to certain provisions of the Health & Safety Code, Government Code, Public Contract Code, and Labor Code of the State. It is stipulated and agreed that all provisions of the law applicable to the public contracts of a municipality are a part of this Agreement to the same extent as though set forth herein and will be complied with. These include but are not limited to the payment of prevailing wages, the stipulation that eight (8) hours' labor shall constitute a legal day's work and that no worker shall be permitted to work in excess of eight (8) hours during any one calendar day except as permitted by law. Vendor shall defend, indemnify and hold City, its officials, directors, officers, employees and agents free and harmless, pursuant to the indemnification provisions of this Agreement, from any claim or liability arising out of any failure or alleged failure to comply with such laws, rules or regulations.

4.10.1 Employment Eligibility; Vendor. By executing this Agreement, Vendor verifies that it fully complies with all requirements and restrictions of state and federal law respecting the employment of undocumented aliens, including, but not limited to, the Immigration Reform and Control Act of 1986, as may be amended from time to time. Such requirements and restrictions include, but are not limited to, examination and retention of documentation confirming the identity and immigration status of each employee of the Vendor. Vendor also verifies that it has not committed a violation of any such law within the five (5) years immediately preceding the date of execution of this Agreement, and shall not violate any such law at any time during the term of the Agreement. Vendor shall avoid any violation of any such law during the term of this Agreement by participating in an electronic verification of work authorization program operated by the United States Department of Homeland Security, by participating in an equivalent federal work authorization program operated by the United States Department of Homeland Security to verify information of newly hired employees, or by some other legally acceptable method. Vendor shall maintain records of each such verification, and shall make them available to the City or its representatives for inspection and copy at any time during normal business hours. The City shall not be responsible for any costs or expenses related to Vendor's compliance with the requirements provided for in Section 4.10 or any of its sub-sections.

4.10.2 Employment Eligibility; Subcontractors, and Consultants. To the same extent and under the same conditions as Vendor, Vendor shall require all of its subcontractors, and consultants performing any work relating to this Agreement to make the same verifications and comply with all requirements and restrictions provided for herein.

4.10.3 Employment Eligibility; Failure to Comply. Each person executing this Agreement on behalf of Vendor verifies that they are a duly authorized officer of Vendor, and understands that any of the following shall be grounds for the City to terminate the Agreement for cause: (1) failure of Vendor or its subcontractors, or consultants to meet any of the requirements provided for in Sections 4.10.1 or 4.10.2; (2) any misrepresentation or material omission concerning compliance with such requirements (including in those verifications provided to the Vendor under Section 4.10.2); or (3) failure to immediately remove from this contract any person found not to be in compliance with such requirements.

4.10.4 Labor Certification. By its signature hereunder, Vendor certifies that it is aware of the provisions of Section 3700 of the California Labor Code which require every employer to be insured against liability for Workers' Compensation or to undertake self-insurance in accordance with the provisions of that Code, and agrees to comply with such provisions before commencing the performance of the Services.

4.10.5 Equal Opportunity Employment. Vendor represents that it is an equal opportunity employer and it shall not discriminate against any subcontractor, employee or

applicant for employment because of race, religion, color, national origin, handicap, ancestry, sex or age. Such non-discrimination shall include, but not be limited to, all activities related to initial employment, upgrading, demotion, transfer, recruitment or recruitment advertising, layoff or termination. Vendor shall also comply with all relevant provisions of City's Minority Business Enterprise program, Affirmative Action Plan or other related programs or guidelines currently in effect or hereinafter enacted.

4.10.6 Air Quality. Vendor must fully comply with all applicable laws, rules and regulations in furnishing or using equipment and/or providing services, including, but not limited to, emissions limits and permitting requirements imposed by the California Air Resources Board (CARB). Vendor shall specifically be aware of the CARB limits and requirements' application to "portable equipment", which definition is considered by CARB to include any item of equipment with a fuel-powered engine. Vendor shall indemnify City against any fines or penalties imposed by CARB or any other governmental or regulatory agency for violations of applicable laws, rules and/or regulations by Vendor, its subcontractors, or others for whom Vendor is responsible under its indemnity obligations provided for in this Agreement.

4.10.7 Water Quality.

4.10.7.1 Management and Compliance. To the extent applicable, Vendor's Services must account for, and fully comply with, all local, state and federal laws, rules and regulations that may impact water quality compliance, including, without limitation, all applicable provisions of the Federal Water Pollution Control Act (33 U.S.C. §§ 1300); the California Porter-Cologne Water Quality Control Act (Cal Water Code §§ 13000-14950); laws, rules and regulations of the Environmental Protection Agency, the State Water Resources Control Board and the Santa Ana Regional Water Quality Control Board; the City's ordinances regulating discharges of storm water; and any and all regulations, policies, or permits issued pursuant to any such authority regulating the discharge of pollutants, as that term is used in the Porter-Cologne Water Quality Control Act, to any ground or surface water in the State.

4.10.7.2 Liability for Non-Compliance. Failure to comply with the laws, regulations and policies described in this Section is a violation of law that may subject Vendor or City to penalties, fines, or additional regulatory requirements. Vendor shall defend, indemnify and hold the City, its directors, officials, officers, employees, volunteers and agents free and harmless, pursuant to the indemnification provisions of this Agreement, from and against any and all fines, penalties, claims or other regulatory requirements imposed as a result of Vendor's non-compliance with the laws, regulations and policies described in this Section, unless such non-compliance is the result of the sole negligence or willful misconduct of the City, its officials, officers, agents, employees or authorized volunteers.

4.10.7.3 Training. In addition to any other standard of care requirements set forth in this Agreement, Vendor warrants that all employees and subcontractors shall have sufficient skill and experience to perform the Services assigned to them without impacting water quality in violation of the laws, regulations and policies described in this Section. Vendor further warrants that it, its employees and subcontractors will receive adequate training, as determined by City, regarding the requirements of the laws, regulations and policies described in this Section as they may relate to the Services provided under this Agreement. Upon request, City will provide Vendor with a list of training programs that meet the requirements of this paragraph.

5. PROJECT MANAGEMENT

5.1 City's Representative. The City hereby designates **Adrian Escamilla, Design and Construction Project Manager**, or his or her designee, to act as its representative for the performance of this Agreement ("City's Representative"). City's Representative shall have the power to act on behalf of the City for all purposes under this Agreement. Vendor shall not accept direction or orders from any person other than the City's Representative or his or her designee.

5.2 Vendor's Representative. Vendor hereby designates **Thomas Rivera, Account Manager**, or his or her designee, to act as its representative for the performance of this Agreement ("Vendor's Representative"). Vendor's Representative shall have full authority to represent and act on behalf of the Vendor for all purposes under this Agreement. The Vendor's Representative shall supervise and direct the Services, using his best skill and attention, and shall be responsible for all means, methods, techniques, sequences and procedures and for the satisfactory coordination of all work required under this Agreement.

6. INSURANCE.

6.1 Time for Compliance. Vendor shall not commence work under this Agreement until it has provided evidence satisfactory to the City that it has secured all insurance required under this Section. In addition, Vendor shall not allow any subcontractor to commence work on any subcontract until it has provided evidence satisfactory to the City that the subcontractor has secured all insurance required under this Section.

6.2 Minimum Requirements. Vendor shall, at its expense, procure and maintain for the duration of the Agreement insurance against claims for injuries to persons or damages to property which may arise from or in connection with the performance of the Agreement by the Vendor, its agents, representatives, employees or subcontractors. Vendor shall also require all of its subcontractors to procure and maintain the same insurance for the duration of the Agreement. Such insurance shall meet at least the following minimum levels of coverage:

6.2.1 Minimum Scope of Insurance. Coverage shall be at least as broad as the latest version of the following: (1) *General Liability*: Insurance Services Office Commercial General Liability coverage (occurrence form CG 0001); (2) *Automobile Liability*: Insurance Services Office Business Auto Coverage form number CA 0001, code 1 (any auto); and (3) *Workers' Compensation and Employer's Liability*: Workers' Compensation insurance as required by the State of California and Employer's Liability Insurance. The policy shall not contain any exclusion contrary to the Agreement, including but not limited to endorsements or provisions limiting coverage for (1) contractual liability (including but not limited to ISO CG 24 26 or 21 29); or (2) cross liability for claims or suits by one insured against another.

6.2.2 Minimum Limits of Insurance. Vendor shall maintain limits no less than: (1) *General Liability:* 2,000,000 per occurrence for bodily injury, personal injury and property damage. If Commercial General Liability Insurance or other form with general aggregate limit is used including, but not limited to, form CG 2503, either the general aggregate limit shall apply separately to this Agreement/location or the general aggregate limit shall be twice the required occurrence limit; (2) *Automobile Liability: 2,000,000* per accident for bodily injury and property damage; and (3) *Workers' Compensation and Employer's Liability:* Workers' Compensation limits as required by the Labor Code of the State of California. Employer's Liability limits of 1,000,000 per accident for bodily injury or disease. Defense costs shall be paid in addition to the limits.

6.2.3 Manufacturer of Goods. If Vendor is also the manufacturer of any equipment included in the Goods, Vendor shall carry Product Liability and/or Errors and Omissions Insurance which covers said equipment with limits of not less than $1,000,000.

6.2.4 Notices; Cancellation or Reduction of Coverage. At least fifteen (15) days prior to the expiration of any such policy, evidence showing that such insurance coverage has been renewed or extended shall be filed with the City. If such coverage is cancelled or materially reduced, Vendor shall, within ten (10) days after receipt of written notice of such cancellation or reduction of coverage, file with the City evidence of insurance showing that the required insurance has been reinstated or has been provided through another insurance company or companies. In the event any policy of insurance required under this Agreement does not comply with these specifications or is canceled and not replaced, the City has the right but not the duty to obtain the insurance it deems necessary and any premium paid by the City will be promptly reimbursed by Vendor or the City may withhold amounts sufficient to pay premium from Vendor payments. In the alternative, the City may suspend or terminate this Agreement.

6.2.5 Additional Insured. The City of Ontario, its directors, officials, officers, employees, agents, and volunteers shall be named as additional insureds on Vendor's and its subcontractors' policies of commercial general liability and automobile liability insurance using the endorsements and forms specified herein or exact equivalents.

6.3 Insurance Endorsements. The insurance policies shall contain the following provisions, or Vendor shall provide endorsements on forms supplied or approved by the City to add the following provisions to the insurance policies:

6.3.1 General Liability. The general liability policy shall include or be endorsed (amended) to state that: (1) using ISO CG forms 20 10 and 20 37, or endorsements providing the exact same coverage, the City of Ontario, its directors, officials, officers, employees, agents, and volunteers shall be covered as additional insured with respect to the Services or ongoing and complete operations performed by or on behalf of the Vendor, including materials, parts or equipment furnished in connection with such work; and (2) using ISO form 20 01, or endorsements providing the exact same coverage, the insurance coverage shall be primary insurance as respects the City, its directors, officials, officers, employees, agents, and volunteers, or if excess, shall stand in an unbroken chain of coverage excess of the Vendor's scheduled underlying coverage. Any excess insurance shall contain a provision that such coverage shall also apply on a primary and noncontributory basis for the benefit of the City, before the City's own primary insurance, deductible, or self-insurance shall be called upon to protect it as a named insured. Any insurance, deductible, or self-insurance maintained by the City, its directors, officials, officers, employees, agents, and volunteers shall be excess of the Vendor's insurance and shall not be called upon to contribute with it in any way. Notwithstanding the minimum limits set forth in Section 6.2.2, any available insurance proceeds in excess of the specified minimum limits of coverage shall be available to the parties required to be named as additional insureds pursuant to this Section 6.3.1.

6.3.2 Automobile Liability. The automobile liability policy shall include or be endorsed (amended) to state that: (1) the City, its directors, officials, officers, employees, agents, and volunteers shall be covered as additional insureds with respect to the ownership, operation, maintenance, use, loading or unloading of any auto owned, leased, hired or borrowed by the Vendor or for which the Vendor is responsible; and (2) the insurance coverage shall be primary insurance as respects the City, its directors, officials, officers, employees, agents, and volunteers, or if excess, shall stand in an unbroken chain of coverage excess of the Vendor's scheduled

underlying coverage. Any insurance, deductible, or self-insurance maintained by the City, its directors, officials, officers, employees, agents, and volunteers shall be excess of the Vendor's insurance and shall not be called upon to contribute with it in any way. Policy shall contain or be endorsed to contain such provisions. Notwithstanding the minimum limits set forth in Section 6.2.2, any available insurance proceeds in excess of the specified minimum limits of coverage shall be available to the parties required to be named as additional insureds pursuant to this Section 6.3.2.

6.3.3 Workers' Compensation and Employer's Liability Coverage. The insurer shall agree to waive all rights of subrogation against the City, its directors, officials, officers, employees, agents, and volunteers for losses paid under the terms of the insurance policy which arise from work performed by the Vendor.

6.3.4 All Coverages. Each insurance policy required by this Agreement shall be endorsed to state that: (A) coverage shall not be suspended, voided, reduced or canceled except after thirty (30) days (10 days for nonpayment of premium) prior written notice by certified mail, return receipt requested, has been given to the City; and (B) any failure to comply with reporting or other provisions of the policies, including breaches of warranties, shall not affect coverage provided to the City, its directors, officials, officers, employees, agents, and volunteers. Any failure to comply with reporting or other provisions of the policies including breaches of warranties shall not affect coverage provided to the City, its officials, officers, employees, agents and volunteers, or any other additional insureds.

6.4 Separation of Insureds; No Special Limitations; Waiver of Subrogation. All insurance required by this Section shall contain standard separation of insureds provisions. In addition, such insurance shall not contain any special limitations on the scope of protection afforded to the City, its directors, officials, officers, employees, agents, and volunteers. Requirement of specific coverage or minimum limits contained in this Section are not intended as a limitation on coverage, limits, or other requirement, or a waiver of any coverage normally provided by any insurance. All policies shall waive any right of subrogation of the insurer against the City, its officials, officers, employees, agents, and volunteers, or any other additional insureds, or shall specifically allow Vendor or others providing insurance evidence in compliance with these specifications to waive their right of recovery prior to a loss. Vendor hereby waives its own right of recovery against City, its officials, officers, employees, agents, and volunteers, or any other additional insureds, and shall require similar written express waivers and insurance clauses from each of its subcontractors.

6.5 Deductibles and Self-Insurance Retentions. Any deductibles or self-insured retentions must be declared to and approved by the City. Vendor shall guarantee that, at the option of the City, either: (1) the insurer shall reduce or eliminate such deductibles or self-insured retentions as respects the City, its directors, officials, officers, employees, agents, and volunteers; or (2) the Vendor shall procure a bond guaranteeing payment of losses and related investigation costs, claims and administrative and defense expenses.

6.6 Subcontractor Insurance Requirements. Vendor shall not allow any subcontractors to commence work on any subcontract relating to the work under the Agreement until they have provided evidence satisfactory to the City that they have secured all insurance required under this Section. If requested by Vendor, the City may approve different scopes or minimum limits of insurance for particular subcontractors. The Vendor and the City shall be named as additional insureds on all subcontractors' policies of Commercial General Liability using ISO form 20 38, or coverage at least as broad.

6.7 Acceptability of Insurers. Insurance is to be placed with insurers with a current A.M. Best's rating no less than A:VIII, licensed to do business in California, and satisfactory to the City.

6.8 Verification of Coverage. Vendor shall furnish City with original certificates of insurance and endorsements effecting coverage required by this Agreement on forms satisfactory to the City. The certificates and endorsements for each insurance policy shall be signed by a person authorized by that insurer to bind coverage on its behalf, and shall be on forms provided by the City if requested. All certificates and endorsements must be received and approved by the City before work commences. The City reserves the right to require complete, certified copies of all required insurance policies, at any time.

6.9 Reporting of Claims. Vendor shall report to the City, in addition to Vendor's insurer, any and all insurance claims submitted by Vendor in connection with the Services under this Agreement.

7. INDEMNIFICATION.

7.1 Scope of Indemnity. To the fullest extent permitted by law, Vendor shall defend, indemnify and hold the City, its officials, employees, agents and volunteers free and harmless from any and all claims, demands, causes of action, suits, actions, proceedings, costs, expenses, liability, judgments, awards, decrees, settlements, loss, damage or injury of any kind, in law or equity, regardless of whether the allegations are false, fraudulent, or groundless, to property or persons, including wrongful death, (collectively, "Claims") in any manner arising out of, pertaining to, or incident to any acts, errors or omissions, or willful misconduct of Vendor, its officials, officers, employees, subcontractors, consultants or agents arising out of or in connection with the Services, the Goods or this Agreement, including without limitation the payment of all expert witness fees, attorneys' fees and other related costs and expenses. Notwithstanding the foregoing, to the extent required by Civil Code section 2782, Vendor's indemnity obligation shall not apply to such loss or damage which is caused by the sole negligence or willful misconduct of the City.

7.2 Additional Indemnity Obligations. Vendor shall defend, with counsel of City's choosing and at Vendor's own cost, expense and risk, any and all Claims covered by this section that may be brought or instituted against City or its officials, employees, agents and volunteers. In addition, Vendor shall pay and satisfy any judgment, award or decree that may be rendered against City or its officials, employees, agents and volunteers as part of any such claim, suit, action or other proceeding. Vendor shall also reimburse City for the cost of any settlement paid by City or its officials, employees, agents and volunteers as part of any such claim, suit, action or other proceeding. Such reimbursement shall include payment for City's attorney's fees and costs, including expert witness fees. Vendor shall reimburse City and its officials, employees, agents and volunteers, for any and all legal expenses and costs incurred by each of them in connection therewith or in enforcing the indemnity herein provided. Vendor's obligation to indemnify shall survive expiration or termination of this Agreement, and shall not be restricted to insurance proceeds, if any, received by the City, its officials, employees, agents and volunteers.

8. CALIFORNIA LABOR CODE

8.1 Prevailing Wages. Vendor is aware of the requirements of California Labor Code Section 1720, et seq., and 1770, et seq., as well as California Code of Regulations, Title 8, Section 16000, et seq., ("Prevailing Wage Laws"), which require the payment of prevailing wage rates and

the performance of other requirements on "public works" and "maintenance" projects. Since the Services are being performed as part of an applicable "public works" or "maintenance" project, as defined by the Prevailing Wage Laws, and since the total compensation is $1,000 or more, Vendor agrees to fully comply with such Prevailing Wage Laws. City shall provide Vendor with a copy of the prevailing rates of per diem wages in effect at the commencement of this Agreement. Vendor shall make copies of the prevailing rates of per diem wages for each craft, classification or type of worker needed to execute the Services available to interested parties upon request, and shall post copies at the Vendor's principal place of business and at the project site. Vendor shall defend, indemnify and hold the City, its elected officials, officers, employees and agents free and harmless from any claim or liability arising out of any failure or alleged failure to comply with the Prevailing Wage Laws. It is the intent of the parties to effectuate the requirements of sections 1771, 1774, 1775, 1776, 1777.5, 1813, and 1815 of the Labor Code within this Agreement, and Vendor shall therefore comply with such Labor Code sections to the fullest extent required by law.

8.2 Registration. Since the Services are being performed as part of an applicable "public works" or "maintenance" project, then pursuant to Labor Code Sections 1725.5 and 1771.1, the Vendor and all subcontractors must be registered with the Department of Industrial Relations. Vendor shall maintain registration for the duration of this Agreement and require the same of any subcontractor. Notwithstanding the foregoing, the contractor registration requirements mandated by Labor Code Sections 1725.5 and 1771.1 shall not apply to work performed on a public works project that is exempt pursuant to the small project exemption specified in Labor Code Sections 1725.5 and 1771.1.

8.3 Compliance Monitoring. This Agreement may also be subject to compliance monitoring and enforcement by the Department of Industrial Relations. It shall be Vendor's sole responsibility to comply with all applicable registration and labor compliance requirements. Any stop orders issued by the Department of Industrial Relations against Vendor or any subcontractor that affect Vendor's performance of Services, including any delay, shall be Vendor's sole responsibility. Any delay arising out of or resulting from such stop orders shall be considered Vendor caused delay and shall not be compensable by the City. Vendor shall defend, indemnify and hold the City, its officials, officers, employees and agents free and harmless from any claim or liability arising out of stop orders issued by the Department of Industrial Relations against Vendor or any subcontractor.

9. SAFETY.

Vendor shall execute and maintain its work so as to avoid injury or damage to any person or property. In carrying out its services, the Vendor shall at all times be in compliance with all applicable local, state and federal laws, rules and regulations, and shall exercise all necessary precautions for the safety of employees appropriate to the nature of the work and the conditions under which the work is to be performed. Safety precautions as applicable shall include, but shall not be limited to: (A) adequate life protection and life saving equipment and procedures; (B) instructions in accident prevention for all employees and subcontractors, such as safe walkways, scaffolds, fall protection ladders, bridges, gang planks, confined space procedures, trenching and shoring, equipment and other safety devices, equipment and wearing apparel as are necessary or lawfully required to prevent accidents or injuries; and (C) adequate facilities for the proper inspection and maintenance of all safety measures.

10. ACCOUNTING RECORDS.

Vendor shall maintain complete and accurate records with respect to all costs and expenses incurred under this Agreement. All such records shall be clearly identifiable. Vendor shall allow a representative of City during normal business hours to examine, audit, and make transcripts or copies of such records and any other documents created pursuant to this Agreement. Vendor shall allow inspection of all work, data, documents, proceedings, and activities related to the Agreement for a period of three (3) years from the date of final payment under this Agreement.

11. TERMINATION OF AGREEMENT.

11.1 Grounds for Termination. City may, by written notice to Vendor, terminate the whole or any part of this Agreement at any time and without cause by giving written notice to Vendor of such termination, and specifying the effective date thereof, at least seven (7) days before the effective date of such termination. Upon termination, Vendor shall be compensated only for those Services and Goods which have been adequately rendered to City, and Vendor shall be entitled to no further compensation. If terminated for cause because the Vendor refused or failed to deliver the Goods, the City may obtain Goods by whatever method it may deem expedient. If City's cost of obtaining the Goods, including compensation for additional managerial and administrative services, will exceed the unpaid balance of the Goods, Vendor will be liable for and will pay the difference to City. Vendor may not terminate this Agreement except for cause. The rights and remedies of the City provided in this Section shall not be exclusive and are in addition to any other rights and remedies provided by law, equity or under this Agreement.

11.2 Effect of Termination. If this Agreement is terminated as provided herein, City may require Vendor to provide all finished or unfinished documents and data and other information of any kind prepared by Vendor in connection with the performance of the Services under this Agreement. Vendor shall be required to provide such document and other information within fifteen (15) days of the request.

11.3 Additional Services. In the event this Agreement is terminated in whole or in part as provided herein, City may procure, upon such terms and in such manner as it may determine appropriate, goods and services similar to those terminated.

12. GENERAL PROVISIONS.

12.1 Delivery of Notices. All notices permitted or required under this Agreement shall be given to the respective parties at the following address, or at such other address as the respective parties may provide in writing for this purpose:

Vendor:

Constant Technologies Inc. 125 Steamboat Ave North Kingstown, Rhode Island 02852 – Thomas Rivera – Account Manager

City:

City of Ontario
303 East "B" Street

Ontario, CA 91764-4196
Attn: **Adrian Escamilla, Design and Construction Project Manager**

Such notice shall be deemed made when personally delivered or when mailed, forty-eight (48) hours after deposit in the U.S. Mail, first class postage prepaid and addressed to the party at its applicable address. Actual notice shall be deemed adequate notice on the date actual notice occurred, regardless of the method of service.

12.2 Subcontracting. Vendor shall not subcontract any portion of the work required by this Agreement, except as expressly stated herein, without prior written approval of City. Subcontracts, if any, shall contain a provision making them subject to all provisions stipulated in this Agreement.

12.3 Governing Law; Government Code Claim Compliance. This Agreement shall be governed by the laws of the State of California. Venue shall be in San Bernardino County. In addition to any and all contract requirements pertaining to notices of and requests for compensation or payment for extra work, disputed work, claims and/or changed conditions, Vendor must comply with the claim procedures set forth in Government Code sections 900 et seq. prior to filing any lawsuit against the City. Such Government Code claims and any subsequent lawsuit based upon the Government Code claims shall be limited to those matters that remain unresolved after all procedures pertaining to extra work, disputed work, claims, and/or changed conditions have been followed by Vendor. If no such Government Code claim is submitted, or if any prerequisite contractual requirements are not otherwise satisfied as specified herein, Vendor shall be barred from bringing and maintaining a valid lawsuit against the City.

12.4 Time of Essence. Time is of the essence for each and every provision of this Agreement.

12.5 City's Right to Employ Other Vendors. City reserves right to employ other Vendors in connection with the Goods and Services provided under this Agreement.

12.6 Successors and Assigns. This Agreement shall be binding on the successors and assigns of the parties.

12.7 Assignment or Transfer. Vendor shall not assign, hypothecate or transfer, either directly or by operation of law, this Agreement or any interest herein without the prior written consent of the City. Any attempt to do so shall be null and void, and any assignees, hypothecates or transferees shall acquire no right or interest by reason of such attempted assignment, hypothecation or transfer.

12.8 Construction; References; Captions. Since the Parties or their agents have participated fully in the preparation of this Agreement, the language of this Agreement shall be construed simply, according to its fair meaning, and not strictly for or against any Party. Any term referencing time, days or period for performance shall be deemed calendar days and not work days. All references to Vendor include all personnel, employees, agents, and subcontractors of Vendor, except as otherwise specified in this Agreement. All references to City include its elected officials, officers, employees, agents, and volunteers except as otherwise specified in this Agreement. The captions of the various articles and paragraphs are for convenience and ease of reference only, and do not define, limit, augment, or describe the scope, content or intent of this Agreement.

12.9 Amendment; Modification. No supplement, modification or amendment of this Agreement shall be binding unless executed in writing and signed by both Parties.

12.10 Waiver. No waiver of any default shall constitute a waiver of any other default or breach, whether of the same or other covenant or condition. No waiver, benefit, privilege, or service voluntarily given or performed by a Party shall give the other Party any contractual rights by custom, estoppel or otherwise.

12.11 No Third Party Beneficiaries. Except to the extent expressly provided for in Section 12.7, there are no intended third party beneficiaries of any right or obligation assumed by the Parties.

12.12 Invalidity; Severability. If any portion of this Agreement is declared invalid, illegal, or otherwise unenforceable by a court of competent jurisdiction, the remaining provisions shall continue in full force and effect.

12.13 Prohibited Interests. Vendor maintains and warrants that it has not employed nor retained any company or person, other than a bona fide employee working solely for Vendor, to solicit or secure this Agreement. Further, Vendor warrants that it has not paid nor has it agreed to pay any company or person, other than a bona fide employee working solely for Vendor, any fee, commission, percentage, brokerage fee, gift or other consideration contingent upon or resulting from the award or making of this Agreement. Vendor further agrees to file, or shall cause its employees or subcontractors to file, a Statement of Economic Interest with the City's Filing Officer as required under state law in the performance of the Services. For breach or violation of this warranty, City shall have the right to rescind this Agreement without liability. For the term of this Agreement, no member, officer or employee of City, during the term of his or her service with City, shall have any direct interest in this Agreement, or obtain any present or anticipated material benefit arising therefrom.

12.14 Cooperation; Further Acts. The Parties shall fully cooperate with one another, and shall take any additional acts or sign any additional documents as may be necessary, appropriate or convenient to attain the purposes of this Agreement.

12.15 Authority to Enter Agreement. Vendor has all requisite power and authority to conduct its business and to execute, deliver, and perform the Agreement. Each Party warrants that the individuals who have signed this Agreement have the legal power, right, and authority to make this Agreement and bind each respective Party.

12.16 Counterparts. This Agreement may be signed in counterparts, each of which shall constitute an original.

12.17 Entire Agreement. This Agreement contains the entire Agreement of the parties with respect to the subject matter hereof, and supersedes all prior negotiations, understandings or agreements. This Agreement may only be modified by a writing signed by both parties.

Scope of Work

Video Displays
Video Wall shall be a 6x2 of Planar LX55M-L Clarity Matrix video wall displays with 0.8mm combined bezel width. Includes remote power supply, video controller, mounts and trim kit. Includes (1) spare display and video controller.
(1) 75" display for Conference Area
(2) 55" Auxiliary displays on ceiling mounts (maximum 300 foot cable run from Aux displays to AV rack location)

Video Sources
Video Wall Processing shall be a Haivision MCS Alpha Processor with support for the following input sources:
(4) Cable TV Tuner (owner furnished)
(8) Video feeds from owner rack content PCs. Assumes (2) quad output PCs.
(1) Video feed from owner rack Video Conferencing PC.
(6) Workstation feeds via (3) dual input encoders at adjacent desks. Assumes capture of right monitor at each workstation
(1) Loose HDMI connection for OFE Laptop plug at rear row workstation desk
(1) Loose HDMI connection for OFE Laptop plug at Conference Area Table

Failover
Failover shall be (3) OFE content PC feeds to 2x2 video wall arrays

User Interface and Control
(3) Microsoft Surface Pro tablet for user touch interface and control. (2 for RTIC, 1 for Conference Table)
(1) Microsoft Surface Hub 50" touch screen on articulating mobile cart
(3) USB extenders included for remote keyboard and mouse control of content PCs in the rack

Video Conferencing
Assumes OFE content PC running Teams, Zoom, etc. Includes (1) USB PTZ camera for video conferencing at Conference Area

Audio
(2) Table Array microphones for Conference Table
-Audio DSP for processing, control and routing of all audio signals from content sources and microphones
-Audio amplification and speakers for (2) discrete audio zone using ceiling speakers (1 zone for RTIC, 1 zone for Conference Area)
-Does not support audio from encoded PC or laptop sources.

Rack and Cabling
-Includes (1) 44RU rack for equipment.
-Includes optional Automatic Transfer Switch for redundant rack power switching. Rack UPS power units available upon request
-Includes all necessary cables, adapters, accessories and hardware
-Quote assumes AV rack located within a 200 foot cable run of RTIC video wall
1 year Constant Uptime Premier level 24/7 service and support agreement

TYPICAL CUSTOMER RESPONSIBILITIES:
• All High Voltage 120/240v electrical circuits needed for the equipment in the AV rack and for wall mounted displays.
• Cable paths from AV rack to the room and ceiling and any conduit required.
• All IT equipment for computer sources including desktop displays.
• Network drops required for all AV/IT equipment
• Network design and installation for client IT and telephone systems
• Pull all cables (provided and spec'd by CTI) that leave the furniture or rack (infrastructure cabling) including but limited to speaker wire, CAT6, fiber, microphone and control cables.

TECHNOLOGY AND HARDWARE LIMITED WARRANTY:

·Constant Technologies warrants to the original purchaser that the equipment sold as part of the integrated audio -visual system will be free of material and manufacturing defects for one year from the date of shipment, and/or transfer of ownership.
·This warranty is made only to the original purchasing entity, and only for the equipment as installed by Constant Technologies technicians.
·Warranty coverage terminates when changes, reconfigurations, or relocations are made to the equipment without the consent and supervision of Constant Technologies.
·Warranty coverage of an item also terminates when the original purchaser sells, transfers, or otherwise disposes of a covered item.
·Constant Technologies will arrange for the replacement of any warranted parts found to be defective within the terms of the warranty.
THIS TECHNOLOGY AND HARDWARE LIMITED WARRANTY DOES NOT COVER:
·Damage to equipment, or equipment malfunction, due to external causes.

·Examples include, but are not limited to accident, abuse, misuse, electrical power failure or malfunction, incorrect environmental conditions, or other Acts of God.

·Lack of compatibility with signals and/or hardware other than previously approved by, or supplied by, Constant Technologies, Inc.

·Labor, travel, and shipping expenses necessitated by faulty equipment.

CONSOLE AND TECHNOLOGY FURNITURE LIFETIME WARRANTY:

·Constant Technologies warrants to the original purchaser that our Consoles and Technical Furniture will be free from defects in workmanship, given normal use and care, for the lifetime of their use.

·Textiles, decorative trim and electrical components are warranted to be free from defects in materials and workmanship for a period of one year from date of initial shipment. Electric lifting columns are warranted to be free from defects in materials and workmanship for a period of five years from the date of initial shipment. Paint finishes are warranted to be free from defects for five years from date of initial shipment.

·This warranty applies only to products manufactured by Constant Technologies, and is made only to original purchasers acquiring products through our dealers or directly from Constant Technologies.

·Warranty coverage ends when the original purchaser sells, transfers or otherwise disposes of a covered item.

·Constant Technologies will repair or replace, at its sole discretion, any parts of the warranted products found to be defective within the terms of the warranty.

THIS CONSOLE AND TECHNOLOGY FURNITURE LIFETIME WARRANTY DOES NOT COVER:

·Damage due to external causes, including accident, abuse beyond specified tolerances, misuse, problems with electrical power improper application, negligence or installation by parties other than Constant Technologies and its authorized dealers.

·Customer's Own Material (COM) specified by the customer that is not a standard Constant Technologies offering

·Color, grains, or texture of laminate and other covering materials due to natural variations over which Constant Technologies has no control.

There are no other warranties except as expressly set forth above, neither express or implied, including any warranty of merchantability or fitness for any particular purpose. We specifically exclude and will not pay consequential or incidental damages under this warranty.

CITY OF ONTARIO *Agenda Report* **November 21, 2023**	**SECTION:** **CONSENT CALENDAR**
Department: Public Works Prepared By: Daniel P Beers Staff Member Presenting: Tito Haes, Executive Director Public Works Reviewed By: Bonnie Tam, Andrea Ampig Approved By:	Submitted To: Council/OHA Approved: _____ Continued To: _____ Denied: _____ Item No: 15

SUBJECT: **AN AMENDMENT TO THE PROFESSIONAL SERVICES AGREEMENT WITH KLEINFELDER, INC. FOR ON-CALL GEOTECHNICAL CONSULTING, MATERIALS TESTING, AND SPECIAL INSPECTION SERVICES**

RECOMMENDATION: That the City Council authorize the City Manager or his designee to execute Amendment No. 4 to the On-Call Professional Services Agreement with Kleinfelder, Inc., of Ontario, California, to provide on-call geotechnical consulting, materials testing, and special inspection services for the City Hall Expansion - Parking Structure Project in the amount of $461,981 for a total contract amount not-to-exceed $511,746.

THE FOLLOWING COUNCIL GOALS ARE BEING ACHIEVED:
Invest in the City's Infrastructure (Water, Streets, Sewers, Parks, Storm Drains and Public Facilities)

FISCAL IMPACT: The Fiscal Year 2023-24 Adopted Budget includes appropriations in the Capital Projects Fund for this project. The proposed Amendment No. 4 for the geotechnical consulting, materials testing, and special inspection services for the City Hall Expansion – Parking Structure Project is $461,981 for a total not-to-exceed contract amount of $511,746.

BACKGROUND & ANALYSIS: The City Hall Expansion includes a new Fire Station 01, Fire Administration Building, New City Hall Services Building, and a Parking Structure. Kleinfelder, Inc. completed the Phase 1 Geotechnical Survey for the City Hall Parking Structure and is familiar with the project scope. Construction of the City Hall Parking Structure will require additional geo-technical surveys along with special inspections. If approved, Staff anticipates the City Hall Parking Structure to be operational by March 2025.

AMENDMENT NO. 4 TO THE PROFESSIONAL SERVICES AGREEMENT BETWEEN THE CITY OF ONTARIO AND KLEINFELDER, INC.

1. Parties and Date.

This Amendment No. 4 to the Agreement (as defined herein) is made and entered as of _____, by and between the City of Ontario ("City") and Kleinfelder, Inc, a California Corporation ("Consultant"). City and Consultant are sometimes individually referred to as "Party" and collectively as "Parties."

2. Recitals.

2.1 Agreement. The City and Consultant have entered into an agreement entitled "On-Call Material Testing & Geotechnical Engineering Services" dated March 7, 2023 ("Agreement").

2.2 Amendment Purpose. The City and Consultant desire to amend the Agreement to add Special Inspection and additional Geotechnical Services for D&C22-012 City Hall Parking Structure and increase the not to exceed amount by **FOUR HUNDRED SIXTY-ONE THOUSAND NINE HUNDRED EIGHTY-ONE DOLLARS ($461,981.00).** The Parties have heretofore entered into the Amendment No. 1 dated April 4, 2023, Amendment No. 2 dated May 2, 2023, Amendment No. 3 dated May 17, 2023,

2.3 Amendment Authority. This Amendment No. 5 is authorized pursuant to Section 3.2.4 of the Agreement.

3. Terms.

3.1 Amendment. Section 3.2.1, Exhibit A of the Agreement is hereby amended in its entirety to read as follows:

3.2.1 Compensation. Consultant shall receive compensation, including authorized reimbursements, for all Services rendered under this Agreement at the rates set forth in Exhibit "A"

and attached hereto and incorporated herein by reference. The total compensation shall not exceed **Five Hundred Eleven Thousand Seven Hundred Forty-Six Dollars ($511,746.00)** without written approval of the City Council or City Manager, as applicable. Extra Work may be authorized, as described below, and if authorized, will be compensated at the rates and manner set forth in this Agreement.

Exhibit "A" – Scope of Services is hereby amended to add Attachment A which is hereto and incorporated herein by reference. All other previously added or deleted scope of services are retained in their entirety.

3.2 Continuing Effect of Agreement. Except as amended by this Amendment No. 4, all other provisions of the Agreement remain in full force and effect and shall govern the actions of the parties under this Amendment No. 4. From and after the date of this Amendment No. 4, whenever the term "Agreement" appears in the Agreement, it shall mean the Agreement as amended by this Amendment No. 4.

3.3 Adequate Consideration. The Parties hereto irrevocably stipulate and agree that they have each received adequate and independent consideration for the performance of the obligations they have undertaken pursuant to this Amendment No. 4.

3.4 Severability. If any portion of this Amendment No. 4 is declared invalid, illegal, or otherwise unenforceable by a court of competent jurisdiction, the remaining provisions shall continue in full force and effect.

3.5 Integration. This Amendment represents the entirety of the Parties' understanding relating to the subject of this Amendment, including written or verbal communications between the Parties, which shall have no relevance unless expressly incorporated herein. This is an integrated amendment.

[SIGNATURES ON FOLLOWING PAGE]

SIGNATURE PAGE FOR AMENDMENT NO. 5 TO PROVIDE MATERIAL TESTING AND GEOTECHNICAL ENGINEERING SERVICES BETWEEN THE CITY OF ONTARIO AND KLEINFELDER, INC.

IN WITNESS WHEREOF, the Parties have entered into this Amendment No. 5 as of the day and year first above written.

September 11, 2023
Kleinfelder Proposal No.: MW180685.001P

City of Ontario
Mr. Daniel Beers
1333 S. Bon View Avenue
Ontario, California 91761

SUBJECT: Request for Additional Authorization to Provide Special Inspection and Materials Testing Services
Parking Structure & Storm Drain Installation Project
Intersection at East D Street and North Sultana Avenue
Ontario, California 91764

Dear Mr. Beers:

Kleinfelder Inc. is pleased to present this request for additional authorization to provide special inspection and materials testing services for the subject project. Kleinfelder has recently completed a geotechnical investigation on this site which consisted of document research, performance of onsite borings, laboratory testing, engineering evaluation, and report preparation. Our knowledge of the existing site conditions provides additional benefits to the City as the project moves into construction. This request for additional authorization includes a description of our understanding of the project, our proposed scope of services, and our estimated fees.

Kleinfelder is committed to providing quality service to its clients, commensurate with their wants, needs, and desired level of risk. If a portion of this request for additional authorization does not meet your needs, or if those needs have changed, Kleinfelder stands ready to consider appropriate modifications, subject to the standards of care to which we adhere as professionals. Modifications such as changes in scope, methodology, and scheduling may result in changes to the risks assumed by the client, as well as adjustments to our fees.

The purpose of our services is to provide quality assurance inspection and testing to assess compliance with the project plans and specifications during construction. This request for additional authorization is based on our knowledge of the project and recent experience with similar type projects. The following information forms the basis of this request for additional authorization and cost estimate.

PROJECT UNDERSTANDING

Kleinfelder understands that the City of Ontario plans to construct a new 6½ -story above ground parking structure south of the proposed Fire Station No. 1 located southwest of the intersection at East D Street and North Sultana Avenue. We anticipate that the design-build parking structure will be constructed with reinforced concrete and encompass an approximately 48,750 square foot area. Additionally, the property includes an existing 24-inch storm drain line and existing drainage

Copyright 2023 Kleinfelder

620 S. Magnolia Bldg. G, Ontario, CA 91762 p | 909-.657.1716 f | 909.988.0185

system located on North Sultana Avenue. Given the redevelopment of the property, the City plans to discontinue the existing storm drain line and install a new storm drain connecting to the existing drainage infrastructure on North Sultana Avenue.

During construction, the project will require onsite testing and observation services for soil and asphalt as well as onsite inspection services during placement of rebar, masonry components, concrete, and post-tensioning. We understand onsite welding inspections for the manufactured stairs may also be required. At the time of our request for additional authorization preparation, a construction schedule, project plans, and project specifications were not available for our review.

SCOPE OF SERVICES

Kleinfelder will provide special inspection and materials testing services on an as-requested basis for the parking structure and storm drain installation project. Our services will include onsite observation, inspection, and materials testing during site grading, utility trench backfill, site and trench paving, reinforcing steel and tendon placement, Portland cement concrete placement, structural masonry placement, post-tensioning, bolting, welding, and all associated laboratory testing.

During construction we anticipate assisting the City of Ontario with contractor submittal reviews. We anticipate these reviews will include proposed Portland cement concrete mix designs. Following completion of our special inspection and materials testing services we will prepare final summary reports of our observations, inspections, and materials testing services.

Our services will be coordinated with the City's onsite representatives. The overall proposed scope of Kleinfelder services are provided in the following tasks which provide the basis of our cost estimate.

SPECIAL INSPECTION & MATERIALS TESTING SERVICES

Site Grading & Utility Trench Backfill

We will provide a field technician working under the supervision of a Geotechnical Engineer to perform observation and compaction testing services during site grading and utility trench backfill activities. This service will also include onsite observation and testing during placement of aggregate base. In general, our services will be provided on a continuous basis during site grading and utility trench backfill operations.

During construction, samples of the engineered fill soils and aggregate base will be collected for laboratory maximum density/optimum moisture content determinations. Additionally, samples of pipe bedding materials will be collected for laboratory sand equivalent value testing. We anticipate samples of aggregate base will be collected for R-value determinations, sand equivalent value, sieve analysis, and Los Angeles abrasion testing to assess conformance with data provided in the geotechnical report and/or contractor submittals.

Structure Access/Trench Paving

Our services will include preparation of the subsurface materials prior to surface paving and monitoring of the surfacing materials upon arrival to the site. Our representative will notify the City Inspector immediately should conditions exceed accepted ranges for the material type placed. In-place density testing and monitoring of construction materials will be performed continuously during placement activities. Samples of the construction materials will be collected daily for

Copyright 2023 Kleinfelder

laboratory testing. At this time, we anticipate that vehicular access to the parking structure and storm drain trench paving will consist of placement of asphalt concrete on crushed aggregate base. Field sampling and laboratory testing for asphalt paving is expected to include stability value (S-value), laboratory test maximum density (LTMD), binder content, and gradation on composite samples. Should Portland cement concrete be utilized as the surfacing material for vehicular access to the parking structure, we will perform onsite sampling and preparation of field cast specimens for laboratory compressive strength determinations.

Portland Cement Concrete Placement

Kleinfelder will provide ACI certified field technicians and ICC certified special inspectors to observe and test structural concrete. Our inspectors will observe placement, sample, and test structural concrete used in footings, columns, beams, slab-on-grade, and post tensioned decks. Our field services will include monitoring of slump, mix-design identification, temperature testing, time of batching/placement, mixing time, and casting of concrete cylinders for compression testing of structural concrete delivered to the site. We will pick up and deliver concrete specimens to our laboratory for compressive strength testing.

We have assumed that Portland cement concrete batch plant inspection will not be required. If requested, Kleinfelder can provide batch plant inspection after receiving appropriate authorization from the City. We anticipate that the contractor will provide the proper submittals for concrete that will eliminate the need for qualification testing by us, therefore our fee does not include testing of concrete aggregates for acceptance testing.

Placement of Reinforcing Steel and Tendons

Kleinfelder will provide an ICC certified special inspector to inspect placement of the reinforcing steel and post-tensioned tendons prior to placement of concrete. Reinforcing steel is checked for size, spacing, type, grade, identification, placement, and configuration. Tendons are checked for size, type, identification, spacing, profile, and alignment. Stressing of tendons will be observed on a continuous basis and stresses and elongations will be recorded. We will also collect samples of reinforcing steel and tendons which will be transported to our facility for laboratory testing as required by the project plans and specifications.

Structural Masonry Observation

During the lay-up of masonry units, our ICC certified special inspector will inspect reinforcing steel utilized during masonry construction activities for size, grade, vertical and horizonal placement, and clearances. Additionally, they will observe if cleanouts are provided for the first course of each pour if high lift method is used, mortar ingredients and batching techniques, and they will prepare mortar compression test specimens for laboratory testing.

During grouting observations, our inspector will observe the grout mix for conformance to the approved mix design, slump is in general accordance with specifications, and consolidation during placement and later during reconsolidation. Our inspector will monitor time between batching of grout, flow of grout throughout wall, grout pour height, and they will prepare grout specimens and/or prisms.

Our inspector will collect samples of mortar, grout, and composite masonry prisms following field curing for transportation to our laboratory for further curing and determination of compressive strength.

Copyright 2023 Kleinfelder

Field Welding and Bolting Inspection

During field welding observations, our ICC certified special inspector will check all welders' certifications and the Welding Procedure System (WPS). We will inspect joints for proper preparation, including bevel, root faces, and root opening. Continuous inspection will be performed on complete and partial joint penetration groove welds, multiple pass fillet welds, slot welds, and single pass fillet welds as required by the contract documents.

At this time, we anticipate that structural steel components will be fabricated in a City of Los Angeles approved fabrication shop and will reduce onsite welding inspections and eliminate the need for fabrication shop inspection services by Kleinfelder.

During high strength bolting observation, we will review type of joint specified, check bolts, nuts, and washers for compliance to project specifications, review the procedure for installation of bolts, monitor the installation of bolts to verify the selected installation procedure is properly used to tighten and torque the bolts per the project requirements.

LABORATORY TESTING SERVICES

Our laboratory testing will be conducted in general accordance with ASTM procedures. Samples collected from the job site will be secured and delivered to our local Ontario laboratory for testing as required. Our budget for materials testing includes laboratory maximum density/optimum moisture content; sieve analysis; sand equivalent value; Los Angeles abrasion; asphalt stability value; asphalt binder content and gradation; laboratory test maximum density; R-value determinations; compressive strength testing of concrete, masonry block, masonry mortar, masonry prisms, and masonry grout; tension, elongation, and bend testing of reinforcing steel; and tension and elongation for PT strands to check conformance with the project specifications.

Laboratory testing will be performed in accordance with the plans, specifications, and local jurisdictional requirements to evaluate whether the materials comply with project requirements and are suitable for their intended use. Results of laboratory testing will be reviewed and prepared in typewritten reports for submittal to the appropriate City staff, project manager, and designated team members. Results of tests indicating material not meeting minimum project requirements will be immediately communicated with the project design professionals.

PROJECT MANAGEMENT & ADMINISTRATION

Kleinfelder's Project Manager, Mr. Mike Dorsch, will coordinate our services with the City and other stakeholders. Mr. Dorsch will be supported with in-house special inspectors and technicians from our local Ontario office and laboratory having the appropriate experience and certifications necessary to perform observations, inspections, and materials testing services on the project site.

Construction Meetings

Our proposed scope of services and fee estimate includes attendance at a pre-construction conference. During this meeting we will identify the project team members, their project roles for development of a distribution list of our reports, review the construction schedule, and discuss potential construction concerns. We have also included attendance during additional construction meetings to be held during construction activities.

Copyright 2023 Kleinfelder

Technical Management

Kleinfelder will provide technical consultation. These services may include field observations, research, as requested engineering review, interpretation of laboratory results, communication, and generation of requested professional recommendations.

DFRs summarizing the work performed and conformance of the work with the project requirements will be reviewed by our project manager. Items found in non-compliance with the project requirements will be brought to the attention of the general contractor's construction superintendent, and the City's representative immediately upon findings.

Final Reports

Upon completion of the parking structure pad, a final pad report will be provided detailing in-place density and moisture results for all tests taken. At the completion of the project, a final summary report will be prepared to document all our special inspection and materials testing services.

As-Needed Additional Consultation

If needed, we can provide other services that may be required during construction, such as reviewing structural design calculations, material submittals (in addition to those previously mentioned) and responding to requests for information (RFIs). If requested, these services will be invoiced at our approved fee rates with the City of Ontario.

ASSUMPTIONS

During our request for additional authorization preparation certain assumptions were required based on the available information provided. The following assumptions were made based on the provided information:

- No construction schedule, project plans, and/or project specifications were provided at the time of request for additional authorization preparation;
- Work will be performed during normal business hours, typically between 6 AM and 5 PM;
- Overtime services will not be required (more than eight hours per day, Saturday, Sunday, holidays, etc.);
- Work is subject to payment of California Prevailing Wages;
- Laboratory and field testing will be performed is general accordance with ASTM standards;
- The cost of any equipment (i.e. scaffold, scissor lifts, telescopic booms, ladders, shoring, etc.) to gain access to any area requiring inspection or sampling of materials is not included in this request for additional authorization;
- We are not providing fabrication shop inspection and/or batch plant inspection for asphalt concrete or Portland cement concrete;
- Out of town travel (more than 50 miles from the project site) and/or lodging will not be required;
- Preparation of supplemental reports and addendum letters and review of plans and specifications are not included in our fee; and
- Responses to review agencies or additional work that may be requested by reviewing agencies are not included.

Copyright 2023 Kleinfelder

It should be noted our services will not include: (1) supervision, direction, or acceptance of the contractor's work; (2) interpretation or modification of the project plans or specifications; (3) submittal of test results or reports to any regulatory agency (unless specifically requested by the client in writing); or (4) job site safety.

ESTIMATED FEE

We propose our services be compensated on a time-and-expense basis as shown in our attached fee estimate. For the scope of work outlined above, we will use the current approved rates associated with our on-call contract with the City of Ontario. We have estimated an approximate budget of **$461,981.^{00}** for this project, as reflected in the attached time-and-expense Table 1 - Fee Estimate. It should be noted that the fee rates shown in Table 1 - Fee Estimate are inclusive of standard equipment charges. We do not anticipate using equipment that is non-standard (coring equipment, rebar locators, or other non-standard equipment) for this project.

A “show-up” fee for scheduled services that are canceled after arrival if any, will incur a two-hour minimum charge. All field inspection and testing services are based on portal-to-portal from our local Ontario office and laboratory and will be billed in accordance with the Basis of Charges on the attached Table 1 - Fee Estimate.

It should be noted that the fees above do not anticipate overtime or double time work on the project. The rates associated with overtime and double time work are 1.5 and 2.0 times the listed hourly rates in Table 1 - Fee Estimate. Overtime for our services is defined as work on the project by a single person in excess of eight hours per day. Double time for our services is defined as time worked in excess of 12 hours per day (M-F), in excess of 12 hours per day on Saturday, and all time worked on Sundays and holidays. Overtime work can significantly impact our testing and inspection budget for the project. While we will be diligent in our attempts to keep overtime to a minimum, please be aware that contractor scheduling and performance are the primary causes for overtime work. Proficient contractor performance and scheduling minimizes additional testing and inspection time, consequently resulting in lower total fees. In the event conditions arise which are beyond our control, were unknown at the time this request for additional authorization was prepared, unanticipated based on the available information, or differ significantly from the assumptions shown below, we may need to revise our scope of work and estimated fees to complete the project. Should this occur, we will contact you for authorization before exceeding the project budget.

Our estimate is provided on a time-and-expense basis. It should be noted that our total fees on the project can fluctuate for a variety of unpredicted reasons beyond our control including weather conditions, the quality and performance of the construction materials used, and the contractor’s team, as well as the contractor’s approach and scheduling of construction sequences. Jurisdictional requirements not identified at the outset of the project, or other unpredictable events that develop over the course of the project, can contribute to additional unplanned inspection or unanticipated engineering consultation not factored into our estimate.

AUTHORIZATION

We anticipate that the City of Ontario will sign the attached Request for Additional Authorization form referencing our Professional Services Agreement (Amendment Number 19). Provided that the approval for this request is consistent with previously negotiated terms and conditions, we will

Copyright 2023 Kleinfelder

execute and return an executed original copy to you for your records. If there is a need for any change in the scope of work or schedule described in this request for additional authorization or changes to the terms and conditions of those previously negotiated, please call us immediately. Changes may require revision of the proposed fee, which will be communicated to you upon assessment of the requested changes' effect on the fee.

All information gathered by Kleinfelder is considered confidential and will be released only to those specified by the construction documents, or to others upon written authorization by the client, or as required by law.

Kleinfelder offers a range of assessment and engineering services to suit the varying needs of our clients. Although risk can never be eliminated, more detailed and extensive assessment or engineering yields more information, which may help understand and manage the degree of risk. Since such detailed services involve greater expense, our clients participate in determining the level of service that provides adequate information for their purposes at an acceptable level of risk. Acceptance of this change order will indicate that the City of Ontario has reviewed the scope of services and determined that it does not need or want more services than are being proposed at this time. Any exceptions should be noted and may result in a change in fees.

LIMITATIONS

The safety of our employees is of paramount concern to Kleinfelder. You will be notified if the location of your project represents a potential safety concern to our employees. Unsafe conditions for fieldwork will require modification of our estimated scope of work and associated fees. We will advise you of the additional costs necessary to mitigate these unanticipated conditions, if applicable.

Our work will be performed in a manner consistent with that level of care and skill ordinarily exercised by other members of Kleinfelder's profession practicing in the same locality, under similar conditions and at the date the services are provided. Our conclusions, opinion and recommendations will be based on a limited number of observations and data. It is possible that conditions could vary between or beyond the data evaluated. Kleinfelder makes no guarantee or warranty, express or implied, regarding the services, communication (oral or written), report, opinion, or instrument of service provided. Even with diligent monitoring, construction defects may occur. In all cases the contractor is solely responsible for the direction and quality of the work, adherence to plans and specifications, and repair of defects.

This request for additional authorization is valid for a period of 90 days from the date of the request for additional authorization unless a longer period is specifically required in which case that time frame will apply. This request for additional authorization was prepared specifically for the client and its designated representatives and may not be provided to others without Kleinfelder's express permission.

The fee specified in this request for additional authorization is based upon the assumption that the site will be accessible to field personnel. If weather, access, or site conditions restrict our field operations, we may need to revise our fee estimate.

Copyright 2023 Kleinfelder

CLOSURE

We appreciate the opportunity to submit this request for additional authorization and look forward to working with you on this project. If there is a need for any change in the scope of service or schedule described in this request for additional authorization, or if you have any questions or require additional information, please call the undersigned at 909.657.1721.

Sincerely,

KLEINFELDER

Mike Dorsch

SUBJECT: **AN AMENDMENT TO THE ON-CALL DESIGN SERVICES AGREEMENT WITH ROBERT BORDERS AND ASSOCIATES FOR THE 208 EMPORIA 1ST FLOOR OFFICE RENOVATION PROJECT**

RECOMMENDATION: That the City Council take the following actions:

A. Authorize the City Manager or his designee to execute Amendment No. 19 to the On-Call Design Services Agreement with Robert Borders and Associates, of Costa Mesa, California, for the 208 Emporia 1st Floor Office Renovation Project in the amount of $29,620 for a total not-to-exceed contract amount of $652,462; and
B. Authorize the City Manager or his designee to execute all documents required for the completion of the project including, but not limited to, contracts, agreements, assessments, easements, reduction of retention accounts, and filing a notice of completion at the conclusion of all construction related activities.

THE FOLLOWING COUNCIL GOALS ARE BEING ACHIEVED:
Invest in the City's Infrastructure (Water, Streets, Sewers, Parks, Storm Drains and Public Facilities)

FISCAL IMPACT: The Fiscal Year 2023-24 Adopted Budget includes appropriations in the General Fund for the 208 Emporia 1st Floor Office Renovation Project. The proposed Amendment will increase the contract amount by $29,620 for a total not-to-exceed contract amount of $652,462. The total contract amount of $652,462 includes on-call work performed for various citywide projects.

BACKGROUND & ANALYSIS: There is an increased demand for Community Improvement and Code Enforcement services as the City has grown. This has led to a need for increased staff support at 208 Emporia 1st floor. To effectively house and support the increased personnel, cubicle workstations and an office are planned to be built in the existing space. Robert Borders and Associates will facilitate the redesign of the existing space and provide space planning services, preparation of construction drawings, and assistance during the bidding phase for the construction for the project.

AMENDMENT NO. 19 TO THE DESIGN SERVICES AGREEMENT BETWEEN THE CITY OF ONTARIO AND ROBERT BORDERS AND ASSOCIATES

1. Parties and Date.

This Amendment No. 19 to the Agreement (as defined herein) is made and entered as of _____, by and between the City of Ontario ("City") and ROBERT BORDERS AND ASSOCIATES, a CORPORATION, ("CONSULTANT"). City and Consultant are sometimes individually referred to as "Party" and collectively as "Parties."

2. Recitals.

2.1 Agreement. The City and Consultant have entered into an agreement entitled "DESIGN SERVICES AGREEMENT" dated October 17, 2023. ("Agreement").

2.2 Amendment Purpose. The City and Consultant desire to amend the Agreement to revise the scope of services for D&C23-008 208 Emporia 1st Floor project set forth in Amendment No. 19 – Attachment "A" and increase the not to exceed compensation amount by TWENTY NINE THOUSAND SIX HUNDRED AND TWENTY DOLLARS ($29,620.00). The Parties have heretofore entered into that Amendment No. 1 dated March 15, 2020, Amendment No. 2 dated June 22, 2020, Amendment No. 3 dated November 19, 2020, Amendment No. 4 dated December 5, 2020, Amendment No. 5 dated January 15, 2021, Amendment No. 6 dated April 6, 2021, Amendment No.7 dated August 11, 2021, Amendment No. 8 dated September 30, 2021, Amendment No. 9 dated September 30, 2021, Amendment No. 10 dated February 1, 2022, Amendment No. 11 dated October 1, 2022, Amendment No. 12 dated January 5, 2023, Amendment No. 13 dated May 17, 2023, Amendment No. 14 dated June 20, 2023, Amendment No. 15 dated June 20, 2023, Amendment No. 16 dated August 15, 2023, and Amendment No. 17 dated September 19, 2023 and Amendment No. 18 going to council November 7, 2023.

2.3 Amendment Authority. This Amendment No. 19 is authorized pursuant to Section 3.10.1 of the Agreement.

3. Terms.

3.1 Amendment. Section 3.10.1 of the Agreement is hereby amended in its entirety to read as follows:

> "Section 3.10.1 Consultant's Compensation for Basic Services. City shall pay to Consultant for the performance of all Services rendered under this Agreement, with the total not to exceed amount of Six Hundred Fifty-Two Thousand Four Hundred Sixty-Two Dollars ($652,462) ("Total Compensation"). This total compensation amount shall be based upon, and may be adjusted according to the fee schedule and related terms and conditions attached hereto as "Exhibit B" and incorporated herein by reference. The total compensation, as may be adjusted upon mutual agreement, shall constitute complete and adequate payment for Services under this Agreement."

Exhibit A is hereby deleted in its entirety and replaced with Attachment A attached hereto and incorporated herein by reference.

3.2 Continuing Effect of Agreement. Except as amended by this Amendment No. 19, all other provisions of the Agreement remain in full force and effect and shall govern the actions of the parties under this Amendment No. 19. From and after the date of this Amendment No. 19, whenever the term "Agreement" appears in the Agreement, it shall mean the Agreement as amended by this Amendment No 19.

3.3 Adequate Consideration. The Parties hereto irrevocably stipulate and agree that they have each received adequate and independent consideration for the performance of the obligations they have undertaken pursuant to this Amendment No. 19.

3.4 Severability. If any portion of this Amendment No. 19 is declared invalid, illegal, or otherwise unenforceable by a court of competent jurisdiction, the remaining provisions shall continue in full force and effect.

3.5 Integration. This Amendment represents the entirety of the Parties' understanding relating to the subject of this Amendment, including written or verbal communications between the Parties, which shall have no relevance unless expressly incorporated herein. This is an integrated amendment.

Department: Human Resources Prepared By: Amanda Elias Staff Member Presenting: Angela C. Lopez, Executive Director Human Resources Approved By:	Submitted To: Council/OHA Approved: _____ Continued To: _____ Denied: _____ Item No: 17

SUBJECT: AWARD OF PROFESSIONAL SERVICE AGREEMENTS WITH TEMPORARY STAFFING AGENCIES FOR AS-NEEDED TEMPORARY STAFFING REQUIREMENTS

RECOMMENDATION: That the City Council takes the following actions:

A. Approve and authorize the City Manager or his designee to execute a three-year Professional Services Agreement with 22nd Century Technologies, Inc. of Somerset, New Jersey, for on-call, as-needed temporary staffing requirements for a total not-to-exceed contract amount of $1,300,000;
B. Approve and authorize the City Manager or his designee to execute a three-year Professional Services Agreement with AppleOne, Inc. of Torrance, California, for on-call, as-needed temporary staffing requirements for a total not-to-exceed contract amount of $700,000;
C. Approve and authorize the City Manager or his designee to execute a three-year Professional Services Agreement with Enterprise Solutions, Inc. of Santa Clara, California, for on-call, as-needed temporary staffing requirements for a total not-to-exceed contract amount of $700,000;
D. Approve and authorize the City Manager or his designee to execute a three-year Professional Services Agreement with Resource Logistics, Inc. of East Brunswick, New Jersey, for on-call, as-needed temporary staffing requirements for a total not-to-exceed contract amount of $700,000;
E. Approve and authorize the City Manager or his designee to execute a three-year Professional Services Agreement with SoftHQ, Inc. of San Diego, California, for on-call, as-needed temporary staffing requirements for a total not-to-exceed contract amount of $1,300,000;
F. Approve and authorize the City Manager or his designee to execute a three-year Professional Services Agreement with Staffing Network, LLC of Oakbrook, Illinois, for on-call, as-needed temporary staffing requirements for a total not-to-exceed contract amount of $1,300,000; and
G. Authorize a total aggregate not-to-exceed three-year contract amount of $6,000,000 with 22nd Century Technologies, Inc., AppleOne, Inc., Enterprise Solutions, Inc., Resource Logistics, Inc., SoftHQ, Inc., Staffing Network, LLC.

THE FOLLOWING COUNCIL GOALS ARE BEING ACHIEVED:
Operate in a Businesslike Manner

FISCAL IMPACT: The proposed agreements for the six (6) temporary staffing agencies have a total not-to-exceed amount for year one (1) of $2,000,000. The total not-to-exceed amount for year two (2) is $2,000,000. The total not-to-exceed amount for year three (3) is of $2,000,000 for a total of not-to-exceed contract amount of $6,000,000. The City is not obligated to expend funds or guarantee service levels for the selected staffing agencies. Actual expenditures may vary due to unforeseen vacancies and workload changes throughout the City. Each City department will assume the fiscal responsibility of actively monitoring their budgets while still meeting staffing needs effectively. This action ensures that departmental expenditures related to temporary staffing services remain within the agency's annual budgets.

BACKGROUND & ANALYSIS: The City spent a total of $1,644,000 during Fiscal Year 2022-2023 on temporary staffing services. These costs were split among two (2) temporary staffing agencies and were incurred by various City departments utilizing the services. The City requires the ongoing use of temporary staffing agencies to fulfill operational needs for short-term increases in service demands, extended employee absences due to illness, and to fill vacancies in critical positions while recruitments are in progress. On January 30, 2023, the City solicited proposals for City-Wide Temporary Staffing Services. The purpose of the Request for Proposals (RFP) was to develop an approved list of temporary staffing agencies that will work directly with the City to provide quality temporary personnel in a timely manner at established rates. As of March 1, 2023, the City received 42 proposals in response to the RFP. The evaluation committee, comprised of staff from the Human Resources, Public Works, and Community Life & Culture Agencies, recommended Agreements with six (6) of the 42 temporary staffing agencies. The proposals were evaluated on the following criteria:

1. Clarity and conformance of proposal to RFP
2. Content of the proposal
3. Proposer's experience and performance
4. Staffing Resources
5. Fee proposal
6. References' comments

Establishing Agreements with multiple temporary staffing agencies is recommended to ensure timely and high-quality services. The non-exclusive Agreements will be for a period of three years with the option to extend any or all the Agreements for two (2) successive one (1) year extensions, subject to budget appropriations. The City may terminate any of these Agreements with seven (7) days written notice.

The table below displays the mark-up rates charged by temporary staffing agencies for different skill categories. These rates will remain fixed for the duration of the Agreements.

	Clerical/Admin. Office Staff	Information Technology	Light Industrial
22nd Century Technologies, Inc.	30%	30%	30%
AppleOne, Inc.	48%	55%	N/A
Enterprise Solutions, Inc.	40%	40%	N/A
Resource Logistics, Inc.	32%	38%	N/A
SoftHQ, Inc.	40%	40%	40%
Staffing Network, LLC	47%	47%	52%

*Light Industrial temporary positions include maintenance worker, custodial (janitor), and integrated waste collector.

CITY MANAGER

CITY OF ONTARIO
PROFESSIONAL SERVICES AGREEMENT

1. PARTIES AND DATE.

This Agreement is made and entered as of _____, by and between the City of Ontario, a municipal corporation organized under the laws of the State of California with its principal place of business at 303 East "B" Street, Ontario, California 91764-4196, County of San Bernardino, State of California ("City") and **22nd Century Technologies, Inc**., a Corporation, with its principal place of business at **1 Executive Drive, Suite 285, Somerset, NJ 08873** ("Consultant"). City and Consultant are sometimes individually referred to herein as "Party" and collectively as "Parties."

2. RECITALS.

2.1 Consultant.

Consultant desires to perform and assume responsibility for the provision of certain professional services required by the City on the terms and conditions set forth in this Agreement. Consultant represents that it is experienced in providing temporary staffing services to public clients, is licensed in the State of California, and is familiar with the plans of City.

2.2 Project.

City desires to engage Consultant to render such professional services for **temporary staffing services for the City on an as-needed basis** ("Project") as set forth in this Agreement.

3. TERMS.

3.1 Scope of Services and Term.

3.1.1 General Scope of Services. Consultant promises and agrees to furnish to the City all labor, materials, tools, equipment, services, and incidental and customary work necessary to fully and adequately supply the professional temporary staffing consulting services necessary for the Project ("Services"). The Services are more particularly described in Exhibit "A" attached hereto and incorporated herein by reference. All Services shall be subject to, and performed in accordance with, this Agreement, the exhibits attached hereto and incorporated

herein by reference, and all applicable local, state and federal laws, rules and regulations.

3.1.2 Term. The term of this Agreement shall be from **November 21, 2023** to **November 21, 2026**, unless earlier terminated as provided herein. The City shall have the unilateral option, at its sole discretion, to renew this Agreement automatically for no more than two (2) additional one-year terms, unless earlier terminated as provided herein. Consultant shall complete the Services within the term of this Agreement and shall meet any other established schedules and deadlines. The Parties may, by mutual, written consent, extend the term of this Agreement if necessary to complete the Services.

3.2 Compensation.

3.2.1 Compensation. Consultant shall receive compensation, including authorized reimbursements, for all Services rendered under this Agreement at the rates set forth in Exhibit "C" attached hereto and incorporated herein by reference. The total compensation shall not exceed **One Million Three Hundred Thousand Dollars and Zero Cents** (**$1,300,000**) without written approval of the City Council or City Manager, as applicable. Extra Work may be authorized, as described below, and if authorized, will be compensated at the rates and manner set forth in this Agreement.

3.2.2 Payment of Compensation. Consultant shall submit to City a monthly invoice which indicates work completed and hours of Services rendered by Consultant. The invoice shall describe the amount of Services provided since the initial commencement date, or since the start of the subsequent billing periods, as appropriate, through the date of the invoice. City shall, within 30 days of receiving such invoice, review the invoice and pay all non-disputed and approved charges. If the City disputes any of Consultant's fees, the City shall give written notice to Consultant within thirty (30) days of receipt of an invoice of any disputed fees set forth therein. Payment shall not constitute acceptance of any Services completed by Consultant. The making of final payment shall not constitute a waiver of any claims by the City for any reason whatsoever.

3.2.3 Reimbursement for Expenses. Consultant shall not be reimbursed for any expenses unless authorized in writing by City, or included in Exhibit "C" of this Agreement.

3.2.4 Extra Work. At any time during the term of this Agreement, City may request that Consultant perform Extra Work. As used herein, "Extra Work" means any work which is determined by City to be necessary for the proper completion of the Project, but which the Parties did not reasonably anticipate would be necessary at the execution of this Agreement. Consultant shall not perform, nor be compensated for, Extra Work without written authorization from the City.

3.3 Responsibilities of Consultant.

3.3.1 Independent Contractor; Control and Payment of Subordinates. The Services shall be performed by Consultant or under its supervision. Consultant will determine the means, methods and details of performing the Services subject to the requirements of this Agreement. City retains Consultant on an independent contractor basis and not as an employee. Any personnel performing the Services on behalf of Consultant shall not be employees of City and shall at all times be under Consultant's exclusive direction and control. Neither City, or any of its officials, officers, directors, employees or agents shall have control over the conduct of

Consultant or any of Consultants officers, employees or agents, except as set forth in this Agreement. Consultant shall pay all wages, salaries, and other amounts due such personnel in connection with their performance of Services under this Agreement and as required by law. Consultant shall be responsible for all reports and obligations respecting such additional personnel, including, but not limited to: social security taxes, income tax withholding, unemployment insurance, disability insurance, and workers' compensation insurance.

3.3.2 Schedule of Services. Consultant shall perform the Services in a prompt and timely manner and in accordance with the Schedule of Services set forth in Exhibit "B" attached hereto and incorporated herein by reference. Consultant represents that it has the professional and technical personnel required to perform the Services expeditiously. Upon request of City, Consultant shall provide a more detailed schedule of anticipated performance to meet the Schedule of Services.

3.3.3 Conformance to Applicable Requirements. All work prepared by Consultant shall be subject to the approval of City.

3.3.4 Substitution of Key Personnel. Consultant has represented to City that certain key personnel will perform and coordinate the Services under this Agreement. Should one or more of such personnel become unavailable, Consultant may substitute other personnel of at least equal competence upon written approval of City. In the event that City and Consultant cannot agree as to the substitution of key personnel, City shall be entitled to terminate this Agreement for cause. The key personnel for performance of this Agreement are as follows: **Isha Sharma, Contract Manager.**

3.3.5 City's Representative. The City hereby designates **Angela Lopez, Executive Director Human Resources/Risk Management**, or his/her designee, to act as its representative in all matters pertaining to the administration and performance of this Agreement ("City's Representative"). City's Representative shall have the power to act on behalf of the City for review and approval of all products submitted by Consultant but not the authority to enlarge the Scope of Services or change the total compensation due to Consultant under this Agreement. The City Manager shall be authorized to act on City's behalf and to execute all necessary documents which enlarge the Scope of Services or change the Consultant's total compensation subject to the provisions contained in this Agreement. Consultant shall not accept direction or orders from any person other than the City Manager, City's Representative or his/her designee.

3.3.6 Consultant's Representative. Consultant hereby designates **Isha Sharma, Contract Manager**, or his/her designee, to act as its representative for the performance of this Agreement ("Consultant's Representative"). Consultant's Representative shall have full authority to represent and act on behalf of the Consultant for all purposes under this Agreement. The Consultant's Representative shall supervise and direct the Services, using his/her best skill and attention, and shall be responsible for all means, methods, techniques, sequences, and procedures and for the satisfactory coordination of all portions of the Services under this Agreement.

3.3.7 Coordination of Services. Consultant agrees to work closely with City staff in the performance of Services and shall be available to City's staff, consultants and other staff at all reasonable times.

3.3.8 Standard of Care; Performance of Employees. Consultant shall perform all

Services under this Agreement in a skillful and competent manner, consistent with the standards generally recognized as being employed by professionals in the same discipline in the State of California. Consultant represents and maintains that it is skilled in the professional calling necessary to perform the Services. Consultant warrants that all employees and subconsultants shall have sufficient skill and experience to perform the Services assigned to them. Consultant represents that it, its employees and subconsultants have all licenses, permits, qualifications and approvals of whatever nature that are legally required to perform the Services, and that such licenses and approvals shall be maintained throughout the term of this Agreement. Consultant shall perform, at its own cost and expense and without reimbursement from the City, any services necessary to correct errors or omissions which are caused by the Consultant's failure to comply with the standard of care provided for herein. Any employee of the Consultant or its subconsultants who is determined by the City to be uncooperative, incompetent, a threat to the adequate or timely completion of the Project, a threat to the safety of persons or property, or any employee who fails or refuses to perform the Services in a manner acceptable to the City, shall be promptly removed from the Project by the Consultant and shall not be re-employed to perform any of the Services or to work on the Project.

3.3.9 Period of Performance.

3.3.9.1 Consultant shall perform and complete all Services under this Agreement within the term set forth in Section 3.1.2 above ("Performance Time"). Consultant shall also perform the Services in strict accordance with any completion schedule or Project milestones described in Exhibits "A" or "B" attached hereto, or which may be separately agreed upon in writing by the City and Consultant ("Performance Milestones"). Consultant agrees that if the Services are not completed within the aforementioned Performance Time and/or pursuant to any such Performance Milestones developed pursuant to provisions of this Agreement, it is understood, acknowledged and agreed that the City will suffer damage.

3.3.9.2 Neither City nor Consultant shall be considered in default of this Agreement for delays in performance caused by circumstances beyond the reasonable control of the non-performing Party. For purposes of this Agreement, such circumstances include a Force Majeure Event. A Force Majeure Event shall mean an event that materially affects a Party's performance and is one or more of the following: (1) Acts of God or other natural disasters; (2) terrorism or other acts of a public enemy; (3) orders of governmental authorities (including, without limitation, unreasonable and unforeseeable delay in the issuance of permits or approvals by governmental authorities that are required for the services); (4) strikes and other organized labor action occurring at the site and the effects thereof on the services, only to the extent such strikes and other organized labor action are beyond the control of Consultant and its subcontractors, and to the extent the effects thereof cannot be avoided by use of replacement workers; and (5) pandemics, epidemics or quarantine restrictions. For purposes of this section, "orders of governmental authorities," includes ordinances, emergency proclamations and orders, rules to protect the public health, welfare and safety, and other actions of a public agency applicable to the services and Agreement.

3.3.9.3 Should a Force Majeure Event occur, the non-performing Party shall, within a reasonable time of being prevented from performing, give written notice to the other Party describing the circumstances preventing continued performance and the efforts being made to resume performance of this Agreement. Force Majeure Events and/or delays, regardless of the Party responsible for the delay, shall not entitle Consultant to any additional compensation.

Notwithstanding the foregoing in this section, the City may still terminate this Agreement in accordance with the termination provisions of this Agreement.

3.3.10 Laws and Regulations; Employee/Labor Certification.

3.3.10.1 Compliance with Laws. Consultant shall keep itself fully informed of and in compliance with all local, state and federal laws, rules and regulations in any manner affecting the performance of the Project or the Services, including all Cal/OSHA requirements, and shall give all notices required by law. Consultant shall be liable for all violations of such laws and regulations in connection with the Services and this Agreement. All violations of such laws and regulations shall be grounds for the City to terminate the Agreement for cause.

3.3.10.2 Employment Eligibility; Consultant. Consultant certifies that it fully complies with all requirements and restrictions of state and federal law respecting the employment of undocumented aliens, including, but not limited to, the Immigration Reform and Control Act of 1986, as may be amended from time to time and shall require all subconsultants and sub-subconsultants to comply with the same. Consultant certifies that it has not committed a violation of any such law within the five (5) years immediately preceding the date of execution of this Agreement, and shall not violate any such law at any time during the term of the Agreement.

3.3.10.3 Equal Opportunity Employment. Consultant represents that it is an equal opportunity employer and it shall not discriminate against any subconsultant, employee or applicant for employment because of race, religion, color, national origin, handicap, ancestry, sex or age. Such non-discrimination shall include, but not be limited to, all activities related to initial employment, upgrading, demotion, transfer, recruitment or recruitment advertising, layoff or termination. Consultant shall also comply with all relevant provisions of City's Minority Business Enterprise program, Affirmative Action Plan or other related programs or guidelines currently in effect or hereinafter enacted.

3.3.10.4 Air Quality. To the extent applicable, Consultant must fully comply with all applicable laws, rules and regulations in furnishing or using equipment and/or providing services, including, but not limited to, emissions limits and permitting requirements imposed by the South Coast Air Quality Management District (SCAQMD) and/or California Air Resources Board (CARB). Consultant shall indemnify City against any fines or penalties imposed by SCAQMD, CARB, or any other governmental or regulatory agency for violations of applicable laws, rules and/or regulations by Consultant, its subconsultants, or others for whom Consultant is responsible under its indemnity obligations provided for in this Agreement.

3.3.10.5 Water Quality Management and Compliance. Consultant shall keep itself and all subcontractors, staff, and employees fully informed of and in compliance with all local, state and federal laws, rules and regulations that may impact, or be implicated by the performance of the Services including, without limitation, all applicable provisions of the City's ordinances regulating water quality and storm water; the Federal Water Pollution Control Act (33 U.S.C. § 1251, *et seq.*); the California Porter-Cologne Water Quality Control Act (Water Code § 13000 *et seq*.); and any and all regulations, policies, or permits issued pursuant to any such authority. Consultant must additionally comply with the lawful requirements of the City, and any other municipality, drainage district, or other local agency with jurisdiction over the location where the Services are to be conducted, regulating water quality and storm water discharges. City may seek damages from Consultant for delay in completing the Services caused by Consultant's

failure to comply with the laws, regulations and policies described in this Section, or any other relevant water quality law, regulation, or policy.

3.3.10.6 Safety. Consultant shall execute and maintain its work so as to avoid injury or damage to any person or property. In carrying out its Services, the Consultant shall at all times be in compliance with all applicable local, state and federal laws, rules and regulations, and shall exercise all necessary precautions for the safety of employees appropriate to the nature of the work and the conditions under which the work is to be performed.

3.3.11 Insurance.

3.3.11.1 Time for Compliance. Consultant shall not commence work under this Agreement until it has provided evidence satisfactory to the City that it has secured all insurance required under this section. In addition, Consultant shall not allow any subconsultant to commence work on any subcontract until it has provided evidence satisfactory to the City that the subconsultant has secured all insurance required under this section. Failure to provide and maintain all required insurance shall be grounds for the City to terminate this Agreement for cause.

3.3.11.2 Types of Insurance Required. As a condition precedent to the effectiveness of this Agreement for work to be performed hereunder, and without limiting the indemnity provisions of the Agreement, the Consultant, in partial performance of its obligations under such Agreement, shall procure and maintain in full force and effect during the term of the Agreement the following policies of insurance. If the existing policies do not meet the insurance requirements set forth herein, Consultant agrees to amend, supplement or endorse the policies to do so.

(A) Commercial General Liability: Commercial General Liability Insurance which affords coverage at least as broad as Insurance Services Office "occurrence" form CG 00 01, or the exact equivalent, with limits of not less than $2,000,000 per occurrence and no less than $4,000,000 in the general aggregate. Defense costs shall be paid in addition to the limits. The policy shall contain no endorsements or provisions (1) limiting coverage for contractual liability; (2) excluding coverage for claims or suits by one insured against another (cross-liability); (3) products/completed operations liability; or (4) containing any other exclusion(s) contrary to the terms or purposes of this Agreement.

(B) Automobile Liability Insurance: Automobile Liability Insurance with coverage at least as broad as Insurance Services Office Form CA 00 01 covering "Any Auto" (Symbol 1), or the exact equivalent, covering bodily injury and property damage for all activities with limits of not less than $2,000,000 combined limit for each occurrence.

(C) Workers' Compensation: Workers' Compensation Insurance, as required by the State of California and Employer's Liability Insurance with a limit of not less than $1,000,000 per accident for bodily injury and disease.

(D) Professional Liability (Errors & Omissions): Professional Liability insurance or Errors & Omissions insurance appropriate to Consultant's profession with limits of not less than $2,000,000. Covered professional services shall specifically include all work to be performed under the Agreement and delete any exclusions that may potentially affect the work to be performed (for example, any exclusions relating to lead, asbestos, pollution, testing, underground storage tanks, laboratory analysis, soil work, etc.). If coverage is written on

a claims-made basis, the retroactive date shall precede the effective date of the initial Agreement and continuous coverage will be maintained or an extended reporting period will be exercised for a period of at least five (5) years from termination or expiration of this Agreement.

3.3.11.3 Insurance Endorsements. Required insurance policies shall contain the following provisions, or Consultant shall provide endorsements on forms approved by the City to add the following provisions to the insurance policies:

(A) Commercial General Liability: (1) Additional Insured: The City, its officials, officers, employees, agents, and volunteers shall be additional insureds with regard to liability and defense of suits or claims arising out of the performance of the Agreement. Additional Insured Endorsements shall not (1) be restricted to "ongoing operations"; (2) exclude "contractual liability"; (3) restrict coverage to "sole" liability of Consultant; or (4) contain any other exclusions contrary to the terms or purposes of this Agreement. For all policies of Commercial General Liability insurance, Consultant shall provide endorsements in the form of ISO CG 20 10 10 01 and 20 37 10 01 (or endorsements providing the exact same coverage) to effectuate this requirement. (2) Cancellation: Required insurance policies shall not be canceled or the coverage reduced until a thirty (30) day written notice of cancellation has been served upon the City except ten (10) days shall be allowed for non-payment of premium.

(B) Automobile Liability: (1) Additional Insured: The City, its directors, officials, officers, employees, agents, and volunteers shall be covered as additional insureds with respect to the ownership, operation, maintenance, use, loading or unloading of any auto owned, leased, hired or borrowed by the Vendor or for which the Vendor is responsible. (2) Cancellation: Required insurance policies shall not be canceled or the coverage reduced until a thirty (30) day written notice of cancellation has been served upon the City except ten (10) days shall be allowed for non-payment of premium.

(C) Professional Liability (Errors & Omissions): 1) Cancellation: Required insurance policies shall not be canceled or the coverage reduced until a thirty (30) day written notice of cancellation has been served upon the City except ten (10) days shall be allowed for non-payment of premium. (2) This insurance shall be written on a policy form coverage specifically designed to protect against acts, errors or omissions of the Consultant. “Covered Professional Services” as designated in the policy must specifically include work performed under this Agreement. The policy must “pay on behalf of” the insured and include a provision establishing the insurer’s duty to defend.

(D) Workers' Compensation: (1) Cancellation: Required insurance policies shall not be canceled or the coverage reduced until a thirty (30) day written notice of cancellation has been served upon the City except ten (10) days shall be allowed for non-payment of premium. (2) Waiver of Subrogation: A waiver of subrogation stating that the insurer waives all rights of subrogation against the City, its officials, officers, employees, agents, and volunteers.

3.3.11.4 Primary and Non-Contributing Insurance. All policies of Commercial General Liability and Automobile Liability insurance shall be primary and any other insurance, deductible, or self-insurance maintained by the City, its officials, officers, employees, agents, or volunteers shall not contribute with this primary insurance. Policies shall contain or be endorsed to contain such provisions.

3.3.11.5 Waiver of Subrogation. All required insurance coverages, except for the professional liability coverage, shall contain or be endorsed to waiver of subrogation in favor of the City, its officials, officers, employees, agents, and volunteers or shall specifically allow Consultant or others providing insurance evidence in compliance with these specifications to waive their right of recovery prior to a loss. Consultant hereby waives its own right of recovery against City, and shall require similar written express waivers and insurance clauses from each of its subconsultants.

3.3.11.6 Deductibles and Self-Insured Retentions. Any deductible or self-insured retention must be approved in writing by the City and shall protect the City, its officials, officers, employees, agents, and volunteers in the same manner and to the same extent as they would have been protected had the policy or policies not contained a deductible or self-insured retention.

3.3.11.7 Evidence of Insurance. The Consultant, concurrently with the execution of the Agreement, and as a condition precedent to the effectiveness thereof, shall deliver either certified copies of the required policies, or original certificates on forms approved by the City, together with all endorsements affecting each policy. Required insurance policies shall not be in compliance if they include any limiting provision or endorsement that has not been submitted to the City for approval. The certificates and endorsements for each insurance policy shall be signed by a person authorized by that insurer to bind coverage on its behalf. At least fifteen (15 days) prior to the expiration of any such policy, evidence of insurance showing that such insurance coverage has been renewed or extended shall be filed with the City. If such coverage is cancelled or reduced and not replaced immediately so as to avoid a lapse in the required coverage, Consultant shall, within ten (10) days after receipt of written notice of such cancellation or reduction of coverage, file with the City evidence of insurance showing that the required insurance has been reinstated or has been provided through another insurance company or companies.

3.3.11.8 Acceptability of Insurers. Each such policy shall be from a company or companies with a current A.M. Best's rating of no less than A:VII and authorized to transact business of insurance in the State of California, or otherwise allowed to place insurance through surplus line brokers under applicable provisions of the California Insurance Code or any federal law.

3.3.11.9 Enforcement of Agreement Provisions (non estoppel). Consultant acknowledges and agrees that actual or alleged failure on the part of the City to inform Consultant of non-compliance with any requirement imposes no additional obligation on the City nor does it waive any rights hereunder.

3.3.11.10 Requirements Not Limiting. Requirement of specific coverage or minimum limits contained in this Section are not intended as a limitation on coverage, limits, or other requirement, or a waiver of any coverage normally provided by any insurance.

3.3.11.11 Additional Insurance Provisions

(A) The foregoing requirements as to the types and limits of insurance coverage to be maintained by Consultant, and any approval of said insurance by the City, is not intended to and shall not in any manner limit or qualify the liabilities and obligations

otherwise assumed by the Consultant pursuant to this Agreement, including but not limited to, the provisions concerning indemnification.

(B) If at any time during the life of the Agreement, any policy of insurance required under this Agreement does not comply with these specifications or is canceled and not replaced, City has the right but not the duty to obtain the insurance it deems necessary and any premium paid by City will be promptly reimbursed by Consultant or City will withhold amounts sufficient to pay premium from Consultant payments. In the alternative, City may cancel this Agreement.

(C) The City may require the Consultant to provide complete copies of all insurance policies in effect for the duration of the Project.

(D) Neither the City nor any of its officials, officers, employees, agents or volunteers shall be personally responsible for any liability arising under or by virtue of this Agreement.

(E) The limits set forth herein shall apply separately to each insured against whom claims are made or suits are brought, except with respect to the limits of liability. Further the limits set forth herein shall not be construed to relieve the Consultant from liability in excess of such coverage, nor shall it limit the Consultant's indemnification obligations to the City and shall not preclude the City from taking such other actions available to the City under other provisions of the Agreement or law.

(F) Consultant shall report to the City, in addition to Consultant's insurer, any and all insurance claims submitted by Consultant in connection with the Services under this Agreement.

3.3.11.12 Insurance for Subconsultants. Consultant shall include all subconsultants engaged in any work for Consultant relating to this Agreement as additional insureds under the Consultant's policies, or the Consultant shall be responsible for causing subconsultants to purchase the appropriate insurance in compliance with the terms of these Insurance Requirements, including adding the City, its officials, officers, employees, agents, and volunteers as additional insureds to the subconsultant's policies. All policies of Commercial General Liability insurance provided by Consultant's subconsultants performing work relating to this Agreement shall be endorsed to name the City, its officials, officers, employees, agents and volunteers as additional insureds using endorsement form ISO CG 20 38 04 13 or an endorsement providing equivalent coverage. Consultant shall not allow any subconsultant to commence work on any subcontract relating to this Agreement until it has received satisfactory evidence of subconsultant's compliance with all insurance requirements under this Agreement, to the extent applicable. The Consultant shall provide satisfactory evidence of compliance with this section upon request of the City.

3.4 Labor Code Requirements.

3.4.1 Prevailing Wages. Consultant is aware of the requirements of California Labor Code Section 1720, et seq., and 1770, et seq., as well as California Code of Regulations, Title 8, Section 16000, et seq., ("Prevailing Wage Laws"), which require the payment of prevailing wage rates and the performance of other requirements on "public works" and "maintenance" projects. If the Services are being performed as part of an applicable "public works" or

"maintenance" project, as defined by the Prevailing Wage Laws, and if the total compensation is $1,000 or more, Consultant agrees to fully comply with such Prevailing Wage Laws. City shall provide Consultant with a copy of the prevailing rates of per diem wages in effect at the commencement of this Agreement. Consultant shall make copies of the prevailing rates of per diem wages for each craft, classification or type of worker needed to execute the Services available to interested parties upon request, and shall post copies at the Consultant's principal place of business and at the project site. It is the intent of the parties to effectuate the requirements of sections 1771, 1774, 1775, 1776, 1777.5, 1813, and 1815 of the Labor Code within this Agreement, and Consultant shall therefore comply with such Labor Code sections to the fullest extent required by law. Consultant shall defend, indemnify and hold the City, its officials, officers, employees, agents, and volunteers free and harmless from any claim or liability arising out of any failure or alleged failure to comply with the Prevailing Wage Laws.

3.4.2 Registration/DIR Compliance. If the Services are being performed on a public works project of over $25,000 when the project is for construction, alteration, demolition, installation, or repair work, or a public works project of over $15,000 when the project is for maintenance work, in addition to the foregoing, then pursuant to Labor Code sections 1725.5 and 1771.1, the Consultant and all subconsultants must be registered with the Department of Industrial Relations ("DIR"). Consultant shall maintain registration for the duration of the Project and require the same of any subconsultants.

3.4.3 Compliance Monitoring. This Project may also be subject to compliance monitoring and enforcement by the DIR. It shall be Consultant's sole responsibility to comply with all applicable registration and labor compliance requirements, including the submission of payroll records directly to the DIR. Any stop orders issued by the DIR against Consultant or any subconsultant that affect Consultant's performance of services, including any delay, shall be Consultant's sole responsibility. Any delay arising out of or resulting from such stop orders shall be considered Consultant caused delay and shall not be compensable by the City. Consultant shall defend, indemnify and hold the City, its officials, officers, employees and agents free and harmless from any claim or liability arising out of stop orders issued by the DIR against Consultant or any subconsultant.

3.4.4 Labor Certification. By its signature hereunder, Consultant certifies that it is aware of the provisions of Section 3700 of the California Labor Code which require every employer to be insured against liability for Worker's Compensation or to undertake self-insurance in accordance with the provisions of that Code, and agrees to comply with such provisions before commencing the performance of the Services.

3.5 Termination of Agreement.

3.5.1.1 Grounds for Termination. City may, by written notice to Consultant, terminate the whole or any part of this Agreement at any time and without cause by giving written notice to Consultant of such termination, and specifying the effective date thereof, at least seven (7) days before the effective date of such termination. Upon termination, Consultant shall be compensated only for those Services which have been adequately rendered to City, and Consultant shall be entitled to no further compensation. Consultant may not terminate this Agreement except for cause. The rights and remedies of the City provided in this section shall not be exclusive and are in addition to any other rights and remedies provided by law, equity or under this Agreement.

3.5.1.2 Effect of Termination. If this Agreement is terminated as provided herein, City may require Consultant to provide all finished or unfinished Documents and Data and other information of any kind prepared by Consultant in connection with the performance of Services under this Agreement. Consultant shall be required to provide such document and other information within fifteen (15) days of the request.

3.5.1.3 Additional Services. In the event this Agreement is terminated in whole or in part as provided herein, City may procure, upon such terms and in such manner as it may determine appropriate, services similar to those terminated.

3.6 Indemnification.

3.6.1 To the fullest extent permitted by law, Consultant shall defend (with counsel of City's choosing), indemnify and hold the City, its officials, officers, employees, volunteers, and agents free and harmless from any and all claims, demands, causes of action, costs, expenses, liability, loss, damage or injury of any kind, in law or equity, to property or persons, including wrongful death, in any manner arising out of, pertaining to, or incident to any acts, errors or omissions, or willful misconduct of Consultant, its officials, officers, employees, subcontractors, consultants or agents in connection with the performance of the Consultant's Services, the Project or this Agreement, including without limitation the payment of all damages, expert witness fees and attorney's fees and other related costs and expenses except such loss or damage caused by the sole negligence or willful misconduct of the City. Consultant's obligation to indemnify shall survive expiration or termination of this Agreement and shall not be restricted to insurance proceeds, if any, received by Consultant, the City, its officials, officers, employees, agents, or volunteers.

3.6.2 If Consultant's obligation to defend, indemnify, and/or hold harmless arises out of Consultant's performance as a "design professional" (as that term is defined under Civil Code section 2782.8), then, and only to the extent required by Civil Code section 2782.8, which is fully incorporated herein, Consultant's indemnification obligation shall be limited to claims that arise out of, pertain to, or relate to the negligence, recklessness, or willful misconduct of the Consultant, and, upon Consultant obtaining a final adjudication by a court of competent jurisdiction, Consultant's liability for such claim, including the cost to defend, shall not exceed the Consultant's proportionate percentage of fault.

3.7 General Provisions.

3.7.1 Accounting Records. Consultant shall maintain complete and accurate records with respect to all costs and expenses incurred under this Agreement. All such records shall be clearly identifiable. Consultant shall allow a representative of City during normal business hours to examine, audit, and make transcripts or copies of such records and any other documents created pursuant to this Agreement. Consultant shall allow inspection of all work, data, documents, proceedings, and activities related to the Agreement for a period of three (3) years from the date of final payment under this Agreement.

3.7.2 Independent Contractors and Subcontracting.

3.7.2.1 Use of Consultants. Consultant is aware of statutory and case law regarding classification of workers as independent contractors, including California Labor Code Section 2750.3 and Dynamex Operations West, Inc. v. Superior Court, 4 Cal. 5th 903

(2018). To ensure that Consultant is in compliance with the California Labor Code, Consultant shall only utilize its employees to provide the Services. Consultant may not provide the services through any independent contractor, subcontractor or subconsultant ("Subcontractor(s)") unless approved by the City as set forth in Section 3.7.2.2 below. Consultant represents and warrants that all personnel who perform the Services on Consultant's behalf are Consultant's employees, and that Consultant complies with all applicable laws, rules and regulations governing its employees, including, but not limited to, the California Labor Code, Unemployment Insurance Code and all applicable Industrial Welfare Commission Wage Orders.

3.7.2.2 Prior Approval Required. Consultant shall not use any Subcontractor to provide the Services, or any portion of the work required by this Agreement, without prior written approval of City. In the event that City authorizes Consultant to use a Subcontractor, Consultant shall enter into a written agreement with the Subcontractor, which must include all provisions of the Agreement, including a restriction on the Subcontractor's use of further independent contractors, subcontractors or subconsultants without the City's prior written consent.

3.7.3 Delivery of Notices. All notices permitted or required under this Agreement shall be given to the respective parties at the following address, or at such other address as the respective parties may provide in writing for this purpose:

Consultant:	**22nd Century Technologies, Inc.** **1 Executive Drive, Suite 285** **Somerset, NJ 08873** **ATTN: Isha Sharma, Contract Manager**
City:	City of Ontario 303 East "B" Street Ontario, CA 91764 ATTN: **Angela Lopez, Executive Director Human Resources/Risk Management**

Such notice shall be deemed made when personally delivered or when mailed, forty-eight (48) hours after deposit in the U.S. Mail, first class postage prepaid and addressed to the party at its applicable address. Actual notice shall be deemed adequate notice on the date actual notice occurred, regardless of the method of service.

3.7.4 Ownership of Materials and Confidentiality.

3.7.4.1 Documents & Data; Licensing of Intellectual Property. This Agreement creates a non-exclusive and perpetual license for City to copy, use, modify, reuse, or sublicense any and all copyrights, designs, and other intellectual property embodied in plans, specifications, studies, drawings, estimates, and other documents or works of authorship fixed in any tangible medium of expression, including but not limited to, physical drawings or data magnetically or otherwise recorded on computer diskettes, which are prepared or caused to be prepared by Consultant under this Agreement ("Documents & Data"). All Documents & Data shall be and remain the property of City, and shall not be used in whole or in substantial part by Consultant on other projects without the City's express written permission. Within thirty (30) days following the completion, suspension, abandonment or termination of this Agreement, Consultant shall provide to City reproducible copies of all Documents & Data, in a form and amount required

by City. City reserves the right to select the method of document reproduction and to establish where the reproduction will be accomplished. The reproduction expense shall be borne by City at the actual cost of duplication. In the event of a dispute regarding the amount of compensation to which the Consultant is entitled under the termination provisions of this Agreement, Consultant shall provide all Documents & Data to City upon payment of the undisputed amount. Consultant shall have no right to retain or fail to provide to City any such documents pending resolution of the dispute. In addition, Consultant shall retain copies of all Documents & Data on file for a minimum of fifteen (15) years following completion of the Project, and shall make copies available to City upon the payment of actual reasonable duplication costs. Before destroying the Documents & Data following this retention period, Consultant shall make a reasonable effort to notify City and provide City with the opportunity to obtain the documents.

3.7.4.2 Subconsultants. Consultant shall require all subconsultants to agree in writing that City is granted a non-exclusive and perpetual license for any Documents & Data the subconsultant prepares under this Agreement. Consultant represents and warrants that Consultant has the legal right to license any and all Documents & Data. Consultant makes no such representation and warranty in regard to Documents & Data which were prepared by design professionals other than Consultant or its subconsultants, or those provided to Consultant by the City.

3.7.4.3 Right to Use. City shall not be limited in any way in its use or reuse of the Documents and Data or any part of them at any time for purposes of this Project or another project, provided that any such use not within the purposes intended by this Agreement or on a project other than this Project without employing the services of Consultant shall be at City's sole risk. If City uses or reuses the Documents & Data on any project other than this Project, it shall remove the Consultant's seal from the Documents & Data and indemnify and hold harmless Consultant and its officers, directors, agents and employees from claims arising out of the negligent use or re-use of the Documents & Data on such other project. Consultant shall be responsible and liable for its Documents & Data, pursuant to the terms of this Agreement, only with respect to the condition of the Documents & Data at the time they are provided to the City upon completion, suspension, abandonment or termination. Consultant shall not be responsible or liable for any revisions to the Documents & Data made by any party other than Consultant, a party for whom the Consultant is legally responsible or liable, or anyone approved by the Consultant.

3.7.4.4 Indemnification. Consultant shall defend, indemnify and hold the City, its directors, officials, officers, employees, volunteers and agents free and harmless, pursuant to the indemnification provisions of this Agreement, for any alleged infringement of any patent, copyright, trade secret, trade name, trademark, or any other proprietary right of any person or entity in consequence of the use on the Project by City of the Documents & Data, including any method, process, product, or concept specified or depicted.

3.7.4.5 Confidentiality. All ideas, memoranda, specifications, plans, procedures, drawings, descriptions, computer program data, input record data, written information, and other Documents & Data either created by or provided to Consultant in connection with the performance of this Agreement shall be held confidential by Consultant. Such materials shall not, without the prior written consent of City, be used by Consultant for any purposes other than the performance of the Services. Nor shall such materials be disclosed to any person or entity not connected with the performance of the Services or the Project. Nothing furnished to Consultant which is otherwise known to Consultant or is generally known, or has

become known, to the related industry shall be deemed confidential. Consultant shall not use City's name or insignia, photographs of the Project, or any publicity pertaining to the Services or the Project in any magazine, trade paper, newspaper, television or radio production or other similar medium without the prior written consent of City.

3.7.4.6 Confidential Information. The City shall refrain from releasing Consultant's proprietary information ("Proprietary Information") unless the City's legal counsel determines that the release of the Proprietary Information is required by the California Public Records Act or other applicable state or federal law, or order of a court of competent jurisdiction, in which case the City shall notify Consultant of its intention to release Proprietary Information. Consultant shall have five (5) working days after receipt of the release notice to give City written notice of Consultant's objection to the City's release of Proprietary Information. Consultant shall indemnify, defend and hold harmless the City, and its officers, directors, employees, and agents from and against all liability, loss, cost or expense (including attorney's fees) arising out of a legal action brought to compel the release of Proprietary Information. City shall not release the Proprietary Information after receipt of an objection notice unless either: (1) Consultant fails to fully indemnify, defend (with City's choice of legal counsel), and hold City harmless from any legal action brought to compel such release; and/or (2) a final and non-appealable order by a court of competent jurisdiction requires that City release such information.

3.7.5 Cooperation; Further Acts. The Parties shall fully cooperate with one another, and shall take any additional acts or sign any additional documents as may be necessary, appropriate or convenient to attain the purposes of this Agreement.

3.7.6 Entire Agreement. This Agreement contains the entire agreement of the Parties with respect to the subject matter hereof, and supersedes all prior negotiations, understandings or agreements.

3.7.7 Attorneys' Fees. If either party commences an action against the other party, either legal, administrative or otherwise, arising out of or in connection with this Agreement, the prevailing party in such litigation shall be entitled to have and recover from the losing party reasonable attorneys' fees and all costs of such action.

3.7.8 Governing Law. This Agreement shall be governed by the laws of the State of California. Venue shall be in San Bernardino County. In addition to any and all contract requirements pertaining to notices of and requests for compensation or payment for extra work, disputed work, claims and/or changed conditions, Consultant must comply with the claim procedures set forth in Government Code sections 900 et seq. prior to filing any lawsuit against the City. Such Government Code claims and any subsequent lawsuit based upon the Government Code claims shall be limited to those matters that remain unresolved after all procedures pertaining to extra work, disputed work, claims, and/or changed conditions have been followed by Consultant. If no such Government Code claim is submitted, or if any prerequisite contractual requirements are not otherwise satisfied as specified herein, Consultant shall be barred from bringing and maintaining a valid lawsuit against the City.

3.7.9 Time of Essence. Time is of the essence for each and every provision of this Agreement.

3.7.10 City's Right to Employ Other Consultants. City reserves right to employ other consultants in connection with this Project.

3.7.11 Successors and Assigns. This Agreement shall be binding on the successors and assigns of the parties.

3.7.12 Assignment or Transfer. Consultant shall not assign, sublet, or transfer this Agreement or any rights under or interest in this Agreement without the written consent of the City, which may be withheld for any reason. Any attempt to so assign or so transfer without such consent shall be void and without legal effect and shall constitute grounds for termination. Consultant shall not subcontract any portion of the Services required by this Agreement, except as expressly stated herein, without prior written approval of City. Subcontracts, if any, shall contain a provision making them subject to all provisions stipulated in this Agreement.

3.7.13 Construction; References; Captions. Since the Parties or their agents have participated fully in the preparation of this Agreement, the language of this Agreement shall be construed simply, according to its fair meaning, and not strictly for or against any Party. Any term referencing time, days or period for performance shall be deemed calendar days and not work days. All references to Consultant include all personnel, employees, agents, and subconsultants of Consultant, except as otherwise specified in this Agreement. All references to City include its elected officials, officers, employees, agents, and volunteers except as otherwise specified in this Agreement. The captions of the various articles and paragraphs are for convenience and ease of reference only, and do not define, limit, augment, or describe the scope, content, or intent of this Agreement.

3.7.14 Amendment; Modification. No supplement, modification, or amendment of this Agreement shall be binding unless executed in writing and signed by both Parties.

3.7.15 Waiver. No waiver of any default shall constitute a waiver of any other default or breach, whether of the same or other covenant or condition. No waiver, benefit, privilege, or service voluntarily given or performed by a Party shall give the other Party any contractual rights by custom, estoppel, or otherwise.

3.7.16 No Third-Party Beneficiaries. There are no intended third party beneficiaries of any right or obligation assumed by the Parties.

3.7.17 Invalidity; Severability. If any portion of this Agreement is declared invalid, illegal, or otherwise unenforceable by a court of competent jurisdiction, the remaining provisions shall continue in full force and effect.

3.7.18 Prohibited Interests. Consultant maintains and warrants that it has not employed nor retained any company or person, other than a bona fide employee working solely for Consultant, to solicit or secure this Agreement. Consultant warrants that it has not paid nor has it agreed to pay any company or person, other than a bona fide employee working solely for Consultant, any fee, commission, percentage, brokerage fee, gift or other consideration contingent upon or resulting from the award or making of this Agreement. Consultant further agrees to file, or shall cause its employees or subconsultants to file, a Statement of Economic Interest with the City's Filing Officer as required under state law in the performance of the Services. For breach or violation of this warranty, City shall have the right to rescind this Agreement without liability. For the term of this Agreement, no member, officer or employee of City, during the term of his or her service with City, shall have any direct interest in this Agreement, or obtain any present or anticipated material benefit arising therefrom.

3.7.19 Authority to Enter Agreement. Consultant has all requisite power and authority to conduct its business and to execute, deliver, and perform the Agreement. Each Party warrants that the individuals who have signed this Agreement have the legal power, right, and authority to make this Agreement and bind each respective Party.

3.7.20 Counterparts. This Agreement may be signed in counterparts, each of which shall constitute an original.

3.7.21 Survival. All rights and obligations hereunder that by their nature are to continue after any expiration or termination of this Agreement, including, but not limited to, the indemnification obligations, shall survive any such expiration or termination.

CITY OF ONTARIO
PROFESSIONAL SERVICES AGREEMENT

1. PARTIES AND DATE.

This Agreement is made and entered as of _____, by and between the City of Ontario, a municipal corporation organized under the laws of the State of California with its principal place of business at 303 East "B" Street, Ontario, California 91764-4196, County of San Bernardino, State of California ("City") and **Staffing Network, LLC**, a Corporation, with its principal place of business at **1815 S. Meyers Road, Suite 600, Oakbrook, IL 60181** ("Consultant"). City and Consultant are sometimes individually referred to herein as "Party" and collectively as "Parties."

2. RECITALS.

2.1 Consultant.

Consultant desires to perform and assume responsibility for the provision of certain professional services required by the City on the terms and conditions set forth in this Agreement. Consultant represents that it is experienced in providing temporary staffing services to public clients, is licensed in the State of California, and is familiar with the plans of City.

2.2 Project.

City desires to engage Consultant to render such professional services for **temporary staffing services for the City on an as-needed basis** ("Project") as set forth in this Agreement.

3. TERMS.

3.1 Scope of Services and Term.

3.1.1 General Scope of Services. Consultant promises and agrees to furnish to the City all labor, materials, tools, equipment, services, and incidental and customary work necessary to fully and adequately supply the professional temporary staffing consulting services necessary for the Project ("Services"). The Services are more particularly described in Exhibit "A" attached hereto and incorporated herein by reference. All Services shall be subject to, and performed in accordance with, this Agreement, the exhibits attached hereto and incorporated herein by reference, and all applicable local, state and federal laws, rules and regulations.

3.1.2 Term. The term of this Agreement shall be from **November 21, 2023** to **November 21, 2026**, unless earlier terminated as provided herein. The City shall have the unilateral option, at its sole discretion, to renew this Agreement automatically for no more than two (2) additional one-year terms, unless earlier terminated as provided herein. Consultant shall complete the Services within the term of this Agreement and shall meet any other established schedules and deadlines. The Parties may, by mutual, written consent, extend the term of this Agreement if necessary to complete the Services.

3.2 Compensation.

3.2.1 Compensation. Consultant shall receive compensation, including authorized reimbursements, for all Services rendered under this Agreement at the rates set forth in Exhibit "C" attached hereto and incorporated herein by reference. The total compensation shall not exceed **One Million Three Hundred Thousand Dollars and Zero Cents** (**$1,300,000**) without written approval of the City Council or City Manager, as applicable. Extra Work may be authorized, as described below, and if authorized, will be compensated at the rates and manner set forth in this Agreement.

3.2.2 Payment of Compensation. Consultant shall submit to City a monthly invoice which indicates work completed and hours of Services rendered by Consultant. The invoice shall describe the amount of Services provided since the initial commencement date, or since the start of the subsequent billing periods, as appropriate, through the date of the invoice. City shall, within 30 days of receiving such invoice, review the invoice and pay all non-disputed and approved charges. If the City disputes any of Consultant's fees, the City shall give written notice to Consultant within thirty (30) days of receipt of an invoice of any disputed fees set forth therein. Payment shall not constitute acceptance of any Services completed by Consultant. The making of final payment shall not constitute a waiver of any claims by the City for any reason whatsoever.

3.2.3 Reimbursement for Expenses. Consultant shall not be reimbursed for any expenses unless authorized in writing by City, or included in Exhibit "C" of this Agreement.

3.2.4 Extra Work. At any time during the term of this Agreement, City may request that Consultant perform Extra Work. As used herein, "Extra Work" means any work which is determined by City to be necessary for the proper completion of the Project, but which the Parties did not reasonably anticipate would be necessary at the execution of this Agreement. Consultant shall not perform, nor be compensated for, Extra Work without written authorization from the City.

3.3 Responsibilities of Consultant.

3.3.1 Independent Contractor; Control and Payment of Subordinates. The Services shall be performed by Consultant or under its supervision. Consultant will determine the means, methods and details of performing the Services subject to the requirements of this Agreement. City retains Consultant on an independent contractor basis and not as an employee. Any personnel performing the Services on behalf of Consultant shall not be employees of City and shall at all times be under Consultant's exclusive direction and control. Neither City, or any of its officials, officers, directors, employees or agents shall have control over the conduct of Consultant or any of Consultants officers, employees or agents, except as set forth in this Agreement. Consultant shall pay all wages, salaries, and other amounts due such personnel in

connection with their performance of Services under this Agreement and as required by law. Consultant shall be responsible for all reports and obligations respecting such additional personnel, including, but not limited to: social security taxes, income tax withholding, unemployment insurance, disability insurance, and workers' compensation insurance.

3.3.2 Schedule of Services. Consultant shall perform the Services in a prompt and timely manner and in accordance with the Schedule of Services set forth in Exhibit "B" attached hereto and incorporated herein by reference. Consultant represents that it has the professional and technical personnel required to perform the Services expeditiously. Upon request of City, Consultant shall provide a more detailed schedule of anticipated performance to meet the Schedule of Services.

3.3.3 Conformance to Applicable Requirements. All work prepared by Consultant shall be subject to the approval of City.

3.3.4 Substitution of Key Personnel. Consultant has represented to City that certain key personnel will perform and coordinate the Services under this Agreement. Should one or more of such personnel become unavailable, Consultant may substitute other personnel of at least equal competence upon written approval of City. In the event that City and Consultant cannot agree as to the substitution of key personnel, City shall be entitled to terminate this Agreement for cause. The key personnel for performance of this Agreement are as follows: **Rebecca Coronel, Vice President of Operations.**

3.3.5 City's Representative. The City hereby designates **Angela Lopez, Executive Director Human Resources/Risk Management**, or his/her designee, to act as its representative in all matters pertaining to the administration and performance of this Agreement ("City's Representative"). City's Representative shall have the power to act on behalf of the City for review and approval of all products submitted by Consultant but not the authority to enlarge the Scope of Services or change the total compensation due to Consultant under this Agreement. The City Manager shall be authorized to act on City's behalf and to execute all necessary documents which enlarge the Scope of Services or change the Consultant's total compensation subject to the provisions contained in this Agreement. Consultant shall not accept direction or orders from any person other than the City Manager, City's Representative or his/her designee.

3.3.6 Consultant's Representative. Consultant hereby designates **Rebecca Coronel, Vice President of Operations**, or his/her designee, to act as its representative for the performance of this Agreement ("Consultant's Representative"). Consultant's Representative shall have full authority to represent and act on behalf of the Consultant for all purposes under this Agreement. The Consultant's Representative shall supervise and direct the Services, using his/her best skill and attention, and shall be responsible for all means, methods, techniques, sequences, and procedures and for the satisfactory coordination of all portions of the Services under this Agreement.

3.3.7 Coordination of Services. Consultant agrees to work closely with City staff in the performance of Services and shall be available to City's staff, consultants and other staff at all reasonable times.

3.3.8 Standard of Care; Performance of Employees. Consultant shall perform all Services under this Agreement in a skillful and competent manner, consistent with the standards generally recognized as being employed by professionals in the same discipline in the State of

California. Consultant represents and maintains that it is skilled in the professional calling necessary to perform the Services. Consultant warrants that all employees and subconsultants shall have sufficient skill and experience to perform the Services assigned to them. Consultant represents that it, its employees and subconsultants have all licenses, permits, qualifications and approvals of whatever nature that are legally required to perform the Services, and that such licenses and approvals shall be maintained throughout the term of this Agreement. Consultant shall perform, at its own cost and expense and without reimbursement from the City, any services necessary to correct errors or omissions which are caused by the Consultant's failure to comply with the standard of care provided for herein. Any employee of the Consultant or its subconsultants who is determined by the City to be uncooperative, incompetent, a threat to the adequate or timely completion of the Project, a threat to the safety of persons or property, or any employee who fails or refuses to perform the Services in a manner acceptable to the City, shall be promptly removed from the Project by the Consultant and shall not be re-employed to perform any of the Services or to work on the Project.

3.3.9 Period of Performance.

3.3.9.1 Consultant shall perform and complete all Services under this Agreement within the term set forth in Section 3.1.2 above ("Performance Time"). Consultant shall also perform the Services in strict accordance with any completion schedule or Project milestones described in Exhibits "A" or "B" attached hereto, or which may be separately agreed upon in writing by the City and Consultant ("Performance Milestones"). Consultant agrees that if the Services are not completed within the aforementioned Performance Time and/or pursuant to any such Performance Milestones developed pursuant to provisions of this Agreement, it is understood, acknowledged and agreed that the City will suffer damage.

3.3.9.2 Neither City nor Consultant shall be considered in default of this Agreement for delays in performance caused by circumstances beyond the reasonable control of the non-performing Party. For purposes of this Agreement, such circumstances include a Force Majeure Event. A Force Majeure Event shall mean an event that materially affects a Party's performance and is one or more of the following: (1) Acts of God or other natural disasters; (2) terrorism or other acts of a public enemy; (3) orders of governmental authorities (including, without limitation, unreasonable and unforeseeable delay in the issuance of permits or approvals by governmental authorities that are required for the services); (4) strikes and other organized labor action occurring at the site and the effects thereof on the services, only to the extent such strikes and other organized labor action are beyond the control of Consultant and its subcontractors, and to the extent the effects thereof cannot be avoided by use of replacement workers; and (5) pandemics, epidemics or quarantine restrictions. For purposes of this section, "orders of governmental authorities," includes ordinances, emergency proclamations and orders, rules to protect the public health, welfare and safety, and other actions of a public agency applicable to the services and Agreement.

3.3.9.3 Should a Force Majeure Event occur, the non-performing Party shall, within a reasonable time of being prevented from performing, give written notice to the other Party describing the circumstances preventing continued performance and the efforts being made to resume performance of this Agreement. Force Majeure Events and/or delays, regardless of the Party responsible for the delay, shall not entitle Consultant to any additional compensation. Notwithstanding the foregoing in this section, the City may still terminate this Agreement in accordance with the termination provisions of this Agreement.

3.3.10 Laws and Regulations; Employee/Labor Certification.

3.3.10.1 Compliance with Laws. Consultant shall keep itself fully informed of and in compliance with all local, state and federal laws, rules and regulations in any manner affecting the performance of the Project or the Services, including all Cal/OSHA requirements, and shall give all notices required by law. Consultant shall be liable for all violations of such laws and regulations in connection with the Services and this Agreement. All violations of such laws and regulations shall be grounds for the City to terminate the Agreement for cause.

3.3.10.2 Employment Eligibility; Consultant. Consultant certifies that it fully complies with all requirements and restrictions of state and federal law respecting the employment of undocumented aliens, including, but not limited to, the Immigration Reform and Control Act of 1986, as may be amended from time to time and shall require all subconsultants and sub-subconsultants to comply with the same. Consultant certifies that it has not committed a violation of any such law within the five (5) years immediately preceding the date of execution of this Agreement, and shall not violate any such law at any time during the term of the Agreement.

3.3.10.3 Equal Opportunity Employment. Consultant represents that it is an equal opportunity employer and it shall not discriminate against any subconsultant, employee or applicant for employment because of race, religion, color, national origin, handicap, ancestry, sex or age. Such non-discrimination shall include, but not be limited to, all activities related to initial employment, upgrading, demotion, transfer, recruitment or recruitment advertising, layoff or termination. Consultant shall also comply with all relevant provisions of City's Minority Business Enterprise program, Affirmative Action Plan or other related programs or guidelines currently in effect or hereinafter enacted.

3.3.10.4 Air Quality. To the extent applicable, Consultant must fully comply with all applicable laws, rules and regulations in furnishing or using equipment and/or providing services, including, but not limited to, emissions limits and permitting requirements imposed by the South Coast Air Quality Management District (SCAQMD) and/or California Air Resources Board (CARB). Consultant shall indemnify City against any fines or penalties imposed by SCAQMD, CARB, or any other governmental or regulatory agency for violations of applicable laws, rules and/or regulations by Consultant, its subconsultants, or others for whom Consultant is responsible under its indemnity obligations provided for in this Agreement.

3.3.10.5 Water Quality Management and Compliance. Consultant shall keep itself and all subcontractors, staff, and employees fully informed of and in compliance with all local, state and federal laws, rules and regulations that may impact, or be implicated by the performance of the Services including, without limitation, all applicable provisions of the City's ordinances regulating water quality and storm water; the Federal Water Pollution Control Act (33 U.S.C. § 1251, *et seq.*); the California Porter-Cologne Water Quality Control Act (Water Code § 13000 *et seq*.); and any and all regulations, policies, or permits issued pursuant to any such authority. Consultant must additionally comply with the lawful requirements of the City, and any other municipality, drainage district, or other local agency with jurisdiction over the location where the Services are to be conducted, regulating water quality and storm water discharges. City may seek damages from Consultant for delay in completing the Services caused by Consultant's failure to comply with the laws, regulations and policies described in this Section, or any other relevant water quality law, regulation, or policy.

3.3.10.6 Safety. Consultant shall execute and maintain its work so as to avoid injury or damage to any person or property. In carrying out its Services, the Consultant shall at all times be in compliance with all applicable local, state and federal laws, rules and regulations, and shall exercise all necessary precautions for the safety of employees appropriate to the nature of the work and the conditions under which the work is to be performed.

3.3.11 Insurance.

3.3.11.1 Time for Compliance. Consultant shall not commence work under this Agreement until it has provided evidence satisfactory to the City that it has secured all insurance required under this section. In addition, Consultant shall not allow any subconsultant to commence work on any subcontract until it has provided evidence satisfactory to the City that the subconsultant has secured all insurance required under this section. Failure to provide and maintain all required insurance shall be grounds for the City to terminate this Agreement for cause.

3.3.11.2 Types of Insurance Required. As a condition precedent to the effectiveness of this Agreement for work to be performed hereunder, and without limiting the indemnity provisions of the Agreement, the Consultant, in partial performance of its obligations under such Agreement, shall procure and maintain in full force and effect during the term of the Agreement the following policies of insurance. If the existing policies do not meet the insurance requirements set forth herein, Consultant agrees to amend, supplement or endorse the policies to do so.

(A) Commercial General Liability: Commercial General Liability Insurance which affords coverage at least as broad as Insurance Services Office "occurrence" form CG 00 01, or the exact equivalent, with limits of not less than $2,000,000 per occurrence and no less than $4,000,000 in the general aggregate. Defense costs shall be paid in addition to the limits. The policy shall contain no endorsements or provisions (1) limiting coverage for contractual liability; (2) excluding coverage for claims or suits by one insured against another (cross-liability); (3) products/completed operations liability; or (4) containing any other exclusion(s) contrary to the terms or purposes of this Agreement.

(B) Automobile Liability Insurance: Automobile Liability Insurance with coverage at least as broad as Insurance Services Office Form CA 00 01 covering "Any Auto" (Symbol 1), or the exact equivalent, covering bodily injury and property damage for all activities with limits of not less than $2,000,000 combined limit for each occurrence.

(C) Workers' Compensation: Workers' Compensation Insurance, as required by the State of California and Employer's Liability Insurance with a limit of not less than $1,000,000 per accident for bodily injury and disease.

(D) Professional Liability (Errors & Omissions): Professional Liability insurance or Errors & Omissions insurance appropriate to Consultant’s profession with limits of not less than $2,000,000. Covered professional services shall specifically include all work to be performed under the Agreement and delete any exclusions that may potentially affect the work to be performed (for example, any exclusions relating to lead, asbestos, pollution, testing, underground storage tanks, laboratory analysis, soil work, etc.). If coverage is written on a claims-made basis, the retroactive date shall precede the effective date of the initial Agreement and continuous coverage will be maintained or an extended reporting period will be exercised for a period of at least five (5) years from termination or expiration of this Agreement.

3.3.11.3 Insurance Endorsements. Required insurance policies shall contain the following provisions, or Consultant shall provide endorsements on forms approved by the City to add the following provisions to the insurance policies:

(A) Commercial General Liability: (1) Additional Insured: The City, its officials, officers, employees, agents, and volunteers shall be additional insureds with regard to liability and defense of suits or claims arising out of the performance of the Agreement. Additional Insured Endorsements shall not (1) be restricted to "ongoing operations"; (2) exclude "contractual liability"; (3) restrict coverage to "sole" liability of Consultant; or (4) contain any other exclusions contrary to the terms or purposes of this Agreement. For all policies of Commercial General Liability insurance, Consultant shall provide endorsements in the form of ISO CG 20 10 10 01 and 20 37 10 01 (or endorsements providing the exact same coverage) to effectuate this requirement. (2) Cancellation: Required insurance policies shall not be canceled or the coverage reduced until a thirty (30) day written notice of cancellation has been served upon the City except ten (10) days shall be allowed for non-payment of premium.

(B) Automobile Liability: (1) Additional Insured: The City, its directors, officials, officers, employees, agents, and volunteers shall be covered as additional insureds with respect to the ownership, operation, maintenance, use, loading or unloading of any auto owned, leased, hired or borrowed by the Vendor or for which the Vendor is responsible. (2) Cancellation: Required insurance policies shall not be canceled or the coverage reduced until a thirty (30) day written notice of cancellation has been served upon the City except ten (10) days shall be allowed for non-payment of premium.

(C) Professional Liability (Errors & Omissions): 1) Cancellation: Required insurance policies shall not be canceled or the coverage reduced until a thirty (30) day written notice of cancellation has been served upon the City except ten (10) days shall be allowed for non-payment of premium. (2) This insurance shall be written on a policy form coverage specifically designed to protect against acts, errors or omissions of the Consultant. “Covered Professional Services” as designated in the policy must specifically include work performed under this Agreement. The policy must “pay on behalf of” the insured and include a provision establishing the insurer’s duty to defend.

(D) Workers' Compensation: (1) Cancellation: Required insurance policies shall not be canceled or the coverage reduced until a thirty (30) day written notice of cancellation has been served upon the City except ten (10) days shall be allowed for non-payment of premium. (2) Waiver of Subrogation: A waiver of subrogation stating that the insurer waives all rights of subrogation against the City, its officials, officers, employees, agents, and volunteers.

3.3.11.4 Primary and Non-Contributing Insurance. All policies of Commercial General Liability and Automobile Liability insurance shall be primary and any other insurance, deductible, or self-insurance maintained by the City, its officials, officers, employees, agents, or volunteers shall not contribute with this primary insurance. Policies shall contain or be endorsed to contain such provisions.

3.3.11.5 Waiver of Subrogation. All required insurance coverages, except for the professional liability coverage, shall contain or be endorsed to waiver of subrogation in favor of the City, its officials, officers, employees, agents, and volunteers or shall specifically allow Consultant or others providing insurance evidence in compliance with these specifications

to waive their right of recovery prior to a loss. Consultant hereby waives its own right of recovery against City, and shall require similar written express waivers and insurance clauses from each of its subconsultants.

3.3.11.6 Deductibles and Self-Insured Retentions. Any deductible or self-insured retention must be approved in writing by the City and shall protect the City, its officials, officers, employees, agents, and volunteers in the same manner and to the same extent as they would have been protected had the policy or policies not contained a deductible or self-insured retention.

3.3.11.7 Evidence of Insurance. The Consultant, concurrently with the execution of the Agreement, and as a condition precedent to the effectiveness thereof, shall deliver either certified copies of the required policies, or original certificates on forms approved by the City, together with all endorsements affecting each policy. Required insurance policies shall not be in compliance if they include any limiting provision or endorsement that has not been submitted to the City for approval. The certificates and endorsements for each insurance policy shall be signed by a person authorized by that insurer to bind coverage on its behalf. At least fifteen (15 days) prior to the expiration of any such policy, evidence of insurance showing that such insurance coverage has been renewed or extended shall be filed with the City. If such coverage is cancelled or reduced and not replaced immediately so as to avoid a lapse in the required coverage, Consultant shall, within ten (10) days after receipt of written notice of such cancellation or reduction of coverage, file with the City evidence of insurance showing that the required insurance has been reinstated or has been provided through another insurance company or companies.

3.3.11.8 Acceptability of Insurers. Each such policy shall be from a company or companies with a current A.M. Best's rating of no less than A:VII and authorized to transact business of insurance in the State of California, or otherwise allowed to place insurance through surplus line brokers under applicable provisions of the California Insurance Code or any federal law.

3.3.11.9 Enforcement of Agreement Provisions (non estoppel). Consultant acknowledges and agrees that actual or alleged failure on the part of the City to inform Consultant of non-compliance with any requirement imposes no additional obligation on the City nor does it waive any rights hereunder.

3.3.11.10 Requirements Not Limiting. Requirement of specific coverage or minimum limits contained in this Section are not intended as a limitation on coverage, limits, or other requirement, or a waiver of any coverage normally provided by any insurance.

3.3.11.11 Additional Insurance Provisions

(A) The foregoing requirements as to the types and limits of insurance coverage to be maintained by Consultant, and any approval of said insurance by the City, is not intended to and shall not in any manner limit or qualify the liabilities and obligations otherwise assumed by the Consultant pursuant to this Agreement, including but not limited to, the provisions concerning indemnification.

(B) If at any time during the life of the Agreement, any policy of insurance required under this Agreement does not comply with these specifications or is canceled

and not replaced, City has the right but not the duty to obtain the insurance it deems necessary and any premium paid by City will be promptly reimbursed by Consultant or City will withhold amounts sufficient to pay premium from Consultant payments. In the alternative, City may cancel this Agreement.

(C) The City may require the Consultant to provide complete copies of all insurance policies in effect for the duration of the Project.

(D) Neither the City nor any of its officials, officers, employees, agents or volunteers shall be personally responsible for any liability arising under or by virtue of this Agreement.

(E) The limits set forth herein shall apply separately to each insured against whom claims are made or suits are brought, except with respect to the limits of liability. Further the limits set forth herein shall not be construed to relieve the Consultant from liability in excess of such coverage, nor shall it limit the Consultant's indemnification obligations to the City and shall not preclude the City from taking such other actions available to the City under other provisions of the Agreement or law.

(F) Consultant shall report to the City, in addition to Consultant's insurer, any and all insurance claims submitted by Consultant in connection with the Services under this Agreement.

3.3.11.12 Insurance for Subconsultants. Consultant shall include all subconsultants engaged in any work for Consultant relating to this Agreement as additional insureds under the Consultant's policies, or the Consultant shall be responsible for causing subconsultants to purchase the appropriate insurance in compliance with the terms of these Insurance Requirements, including adding the City, its officials, officers, employees, agents, and volunteers as additional insureds to the subconsultant's policies. All policies of Commercial General Liability insurance provided by Consultant's subconsultants performing work relating to this Agreement shall be endorsed to name the City, its officials, officers, employees, agents and volunteers as additional insureds using endorsement form ISO CG 20 38 04 13 or an endorsement providing equivalent coverage. Consultant shall not allow any subconsultant to commence work on any subcontract relating to this Agreement until it has received satisfactory evidence of subconsultant's compliance with all insurance requirements under this Agreement, to the extent applicable. The Consultant shall provide satisfactory evidence of compliance with this section upon request of the City.

3.4 Labor Code Requirements.

3.4.1 Prevailing Wages. Consultant is aware of the requirements of California Labor Code Section 1720, et seq., and 1770, et seq., as well as California Code of Regulations, Title 8, Section 16000, et seq., ("Prevailing Wage Laws"), which require the payment of prevailing wage rates and the performance of other requirements on "public works" and "maintenance" projects. If the Services are being performed as part of an applicable "public works" or "maintenance" project, as defined by the Prevailing Wage Laws, and if the total compensation is $1,000 or more, Consultant agrees to fully comply with such Prevailing Wage Laws. City shall provide Consultant with a copy of the prevailing rates of per diem wages in effect at the commencement of this Agreement. Consultant shall make copies of the prevailing rates of per diem wages for each craft, classification or type of worker needed to execute the Services

available to interested parties upon request, and shall post copies at the Consultant's principal place of business and at the project site. It is the intent of the parties to effectuate the requirements of sections 1771, 1774, 1775, 1776, 1777.5, 1813, and 1815 of the Labor Code within this Agreement, and Consultant shall therefore comply with such Labor Code sections to the fullest extent required by law. Consultant shall defend, indemnify and hold the City, its officials, officers, employees, agents, and volunteers free and harmless from any claim or liability arising out of any failure or alleged failure to comply with the Prevailing Wage Laws.

3.4.2 Registration/DIR Compliance. If the Services are being performed on a public works project of over $25,000 when the project is for construction, alteration, demolition, installation, or repair work, or a public works project of over $15,000 when the project is for maintenance work, in addition to the foregoing, then pursuant to Labor Code sections 1725.5 and 1771.1, the Consultant and all subconsultants must be registered with the Department of Industrial Relations ("DIR"). Consultant shall maintain registration for the duration of the Project and require the same of any subconsultants.

3.4.3 Compliance Monitoring. This Project may also be subject to compliance monitoring and enforcement by the DIR. It shall be Consultant's sole responsibility to comply with all applicable registration and labor compliance requirements, including the submission of payroll records directly to the DIR. Any stop orders issued by the DIR against Consultant or any subconsultant that affect Consultant's performance of services, including any delay, shall be Consultant's sole responsibility. Any delay arising out of or resulting from such stop orders shall be considered Consultant caused delay and shall not be compensable by the City. Consultant shall defend, indemnify and hold the City, its officials, officers, employees and agents free and harmless from any claim or liability arising out of stop orders issued by the DIR against Consultant or any subconsultant.

3.4.4 Labor Certification. By its signature hereunder, Consultant certifies that it is aware of the provisions of Section 3700 of the California Labor Code which require every employer to be insured against liability for Worker's Compensation or to undertake self-insurance in accordance with the provisions of that Code, and agrees to comply with such provisions before commencing the performance of the Services.

3.5 Termination of Agreement.

3.5.1.1 Grounds for Termination. City may, by written notice to Consultant, terminate the whole or any part of this Agreement at any time and without cause by giving written notice to Consultant of such termination, and specifying the effective date thereof, at least seven (7) days before the effective date of such termination. Upon termination, Consultant shall be compensated only for those Services which have been adequately rendered to City, and Consultant shall be entitled to no further compensation. Consultant may not terminate this Agreement except for cause. The rights and remedies of the City provided in this section shall not be exclusive and are in addition to any other rights and remedies provided by law, equity or under this Agreement.

3.5.1.2 Effect of Termination. If this Agreement is terminated as provided herein, City may require Consultant to provide all finished or unfinished Documents and Data and other information of any kind prepared by Consultant in connection with the performance of Services under this Agreement. Consultant shall be required to provide such document and other information within fifteen (15) days of the request.

3.5.1.3 Additional Services. In the event this Agreement is terminated in whole or in part as provided herein, City may procure, upon such terms and in such manner as it may determine appropriate, services similar to those terminated.

3.6 Indemnification.

3.6.1 To the fullest extent permitted by law, Consultant shall defend (with counsel of City's choosing), indemnify and hold the City, its officials, officers, employees, volunteers, and agents free and harmless from any and all claims, demands, causes of action, costs, expenses, liability, loss, damage or injury of any kind, in law or equity, to property or persons, including wrongful death, in any manner arising out of, pertaining to, or incident to any acts, errors or omissions, or willful misconduct of Consultant, its officials, officers, employees, subcontractors, consultants or agents in connection with the performance of the Consultant's Services, the Project or this Agreement, including without limitation the payment of all damages, expert witness fees and attorney's fees and other related costs and expenses except such loss or damage caused by the sole negligence or willful misconduct of the City. Consultant's obligation to indemnify shall survive expiration or termination of this Agreement and shall not be restricted to insurance proceeds, if any, received by Consultant, the City, its officials, officers, employees, agents, or volunteers.

3.6.2 If Consultant's obligation to defend, indemnify, and/or hold harmless arises out of Consultant's performance as a "design professional" (as that term is defined under Civil Code section 2782.8), then, and only to the extent required by Civil Code section 2782.8, which is fully incorporated herein, Consultant's indemnification obligation shall be limited to claims that arise out of, pertain to, or relate to the negligence, recklessness, or willful misconduct of the Consultant, and, upon Consultant obtaining a final adjudication by a court of competent jurisdiction, Consultant's liability for such claim, including the cost to defend, shall not exceed the Consultant's proportionate percentage of fault.

3.7 General Provisions.

3.7.1 Accounting Records. Consultant shall maintain complete and accurate records with respect to all costs and expenses incurred under this Agreement. All such records shall be clearly identifiable. Consultant shall allow a representative of City during normal business hours to examine, audit, and make transcripts or copies of such records and any other documents created pursuant to this Agreement. Consultant shall allow inspection of all work, data, documents, proceedings, and activities related to the Agreement for a period of three (3) years from the date of final payment under this Agreement.

3.7.2 Independent Contractors and Subcontracting.

3.7.2.1 Use of Consultants. Consultant is aware of statutory and case law regarding classification of workers as independent contractors, including California Labor Code Section 2750.3 and Dynamex Operations West, Inc. v. Superior Court, 4 Cal. 5th 903 (2018). To ensure that Consultant is in compliance with the California Labor Code, Consultant shall only utilize its employees to provide the Services. Consultant may not provide the services through any independent contractor, subcontractor or subconsultant ("Subcontractor(s)") unless approved by the City as set forth in Section 3.7.2.2 below. Consultant represents and warrants that all personnel who perform the Services on Consultant's behalf are Consultant's employees, and that Consultant complies with all applicable laws, rules and regulations governing its

employees, including, but not limited to, the California Labor Code, Unemployment Insurance Code and all applicable Industrial Welfare Commission Wage Orders.

3.7.2.2 Prior Approval Required. Consultant shall not use any Subcontractor to provide the Services, or any portion of the work required by this Agreement, without prior written approval of City. In the event that City authorizes Consultant to use a Subcontractor, Consultant shall enter into a written agreement with the Subcontractor, which must include all provisions of the Agreement, including a restriction on the Subcontractor's use of further independent contractors, subcontractors or subconsultants without the City's prior written consent.

3.7.3 Delivery of Notices. All notices permitted or required under this Agreement shall be given to the respective parties at the following address, or at such other address as the respective parties may provide in writing for this purpose:

Consultant: **Staffing Network, LLC**
1815 S. Meyers Place, Suite 600
Oakbrook, IL 60181
ATTN: Rebecca Coronel, Vice President of Operations

City: City of Ontario
303 East "B" Street
Ontario, CA 91764
ATTN: **Angela Lopez, Executive Director Human Resources/Risk Management**

Such notice shall be deemed made when personally delivered or when mailed, forty-eight (48) hours after deposit in the U.S. Mail, first class postage prepaid and addressed to the party at its applicable address. Actual notice shall be deemed adequate notice on the date actual notice occurred, regardless of the method of service.

3.7.4 Ownership of Materials and Confidentiality.

3.7.4.1 Documents & Data; Licensing of Intellectual Property. This Agreement creates a non-exclusive and perpetual license for City to copy, use, modify, reuse, or sublicense any and all copyrights, designs, and other intellectual property embodied in plans, specifications, studies, drawings, estimates, and other documents or works of authorship fixed in any tangible medium of expression, including but not limited to, physical drawings or data magnetically or otherwise recorded on computer diskettes, which are prepared or caused to be prepared by Consultant under this Agreement ("Documents & Data"). All Documents & Data shall be and remain the property of City, and shall not be used in whole or in substantial part by Consultant on other projects without the City's express written permission. Within thirty (30) days following the completion, suspension, abandonment or termination of this Agreement, Consultant shall provide to City reproducible copies of all Documents & Data, in a form and amount required by City. City reserves the right to select the method of document reproduction and to establish where the reproduction will be accomplished. The reproduction expense shall be borne by City at the actual cost of duplication. In the event of a dispute regarding the amount of compensation to which the Consultant is entitled under the termination provisions of this Agreement, Consultant shall provide all Documents & Data to City upon payment of the undisputed amount. Consultant shall have no right to retain or fail to provide to City any such documents pending resolution of

the dispute. In addition, Consultant shall retain copies of all Documents & Data on file for a minimum of fifteen (15) years following completion of the Project, and shall make copies available to City upon the payment of actual reasonable duplication costs. Before destroying the Documents & Data following this retention period, Consultant shall make a reasonable effort to notify City and provide City with the opportunity to obtain the documents.

3.7.4.2 Subconsultants. Consultant shall require all subconsultants to agree in writing that City is granted a non-exclusive and perpetual license for any Documents & Data the subconsultant prepares under this Agreement. Consultant represents and warrants that Consultant has the legal right to license any and all Documents & Data. Consultant makes no such representation and warranty in regard to Documents & Data which were prepared by design professionals other than Consultant or its subconsultants, or those provided to Consultant by the City.

3.7.4.3 Right to Use. City shall not be limited in any way in its use or reuse of the Documents and Data or any part of them at any time for purposes of this Project or another project, provided that any such use not within the purposes intended by this Agreement or on a project other than this Project without employing the services of Consultant shall be at City's sole risk. If City uses or reuses the Documents & Data on any project other than this Project, it shall remove the Consultant's seal from the Documents & Data and indemnify and hold harmless Consultant and its officers, directors, agents and employees from claims arising out of the negligent use or re-use of the Documents & Data on such other project. Consultant shall be responsible and liable for its Documents & Data, pursuant to the terms of this Agreement, only with respect to the condition of the Documents & Data at the time they are provided to the City upon completion, suspension, abandonment or termination. Consultant shall not be responsible or liable for any revisions to the Documents & Data made by any party other than Consultant, a party for whom the Consultant is legally responsible or liable, or anyone approved by the Consultant.

3.7.4.4 Indemnification. Consultant shall defend, indemnify and hold the City, its directors, officials, officers, employees, volunteers and agents free and harmless, pursuant to the indemnification provisions of this Agreement, for any alleged infringement of any patent, copyright, trade secret, trade name, trademark, or any other proprietary right of any person or entity in consequence of the use on the Project by City of the Documents & Data, including any method, process, product, or concept specified or depicted.

3.7.4.5 Confidentiality. All ideas, memoranda, specifications, plans, procedures, drawings, descriptions, computer program data, input record data, written information, and other Documents & Data either created by or provided to Consultant in connection with the performance of this Agreement shall be held confidential by Consultant. Such materials shall not, without the prior written consent of City, be used by Consultant for any purposes other than the performance of the Services. Nor shall such materials be disclosed to any person or entity not connected with the performance of the Services or the Project. Nothing furnished to Consultant which is otherwise known to Consultant or is generally known, or has become known, to the related industry shall be deemed confidential. Consultant shall not use City's name or insignia, photographs of the Project, or any publicity pertaining to the Services or the Project in any magazine, trade paper, newspaper, television or radio production or other similar medium without the prior written consent of City.

3.7.4.6 Confidential Information. The City shall refrain from releasing Consultant's proprietary information ("Proprietary Information") unless the City's legal counsel determines that the release of the Proprietary Information is required by the California Public Records Act or other applicable state or federal law, or order of a court of competent jurisdiction, in which case the City shall notify Consultant of its intention to release Proprietary Information. Consultant shall have five (5) working days after receipt of the release notice to give City written notice of Consultant's objection to the City's release of Proprietary Information. Consultant shall indemnify, defend and hold harmless the City, and its officers, directors, employees, and agents from and against all liability, loss, cost or expense (including attorney's fees) arising out of a legal action brought to compel the release of Proprietary Information. City shall not release the Proprietary Information after receipt of an objection notice unless either: (1) Consultant fails to fully indemnify, defend (with City's choice of legal counsel), and hold City harmless from any legal action brought to compel such release; and/or (2) a final and non-appealable order by a court of competent jurisdiction requires that City release such information.

3.7.5 Cooperation; Further Acts. The Parties shall fully cooperate with one another, and shall take any additional acts or sign any additional documents as may be necessary, appropriate or convenient to attain the purposes of this Agreement.

3.7.6 Entire Agreement. This Agreement contains the entire agreement of the Parties with respect to the subject matter hereof, and supersedes all prior negotiations, understandings or agreements.

3.7.7 Attorneys' Fees. If either party commences an action against the other party, either legal, administrative or otherwise, arising out of or in connection with this Agreement, the prevailing party in such litigation shall be entitled to have and recover from the losing party reasonable attorneys' fees and all costs of such action.

3.7.8 Governing Law. This Agreement shall be governed by the laws of the State of California. Venue shall be in San Bernardino County. In addition to any and all contract requirements pertaining to notices of and requests for compensation or payment for extra work, disputed work, claims and/or changed conditions, Consultant must comply with the claim procedures set forth in Government Code sections 900 et seq. prior to filing any lawsuit against the City. Such Government Code claims and any subsequent lawsuit based upon the Government Code claims shall be limited to those matters that remain unresolved after all procedures pertaining to extra work, disputed work, claims, and/or changed conditions have been followed by Consultant. If no such Government Code claim is submitted, or if any prerequisite contractual requirements are not otherwise satisfied as specified herein, Consultant shall be barred from bringing and maintaining a valid lawsuit against the City.

3.7.9 Time of Essence. Time is of the essence for each and every provision of this Agreement.

3.7.10 City's Right to Employ Other Consultants. City reserves right to employ other consultants in connection with this Project.

3.7.11 Successors and Assigns. This Agreement shall be binding on the successors and assigns of the parties.

3.7.12 Assignment or Transfer. Consultant shall not assign, sublet, or transfer this

Agreement or any rights under or interest in this Agreement without the written consent of the City, which may be withheld for any reason. Any attempt to so assign or so transfer without such consent shall be void and without legal effect and shall constitute grounds for termination. Consultant shall not subcontract any portion of the Services required by this Agreement, except as expressly stated herein, without prior written approval of City. Subcontracts, if any, shall contain a provision making them subject to all provisions stipulated in this Agreement.

3.7.13 Construction; References; Captions. Since the Parties or their agents have participated fully in the preparation of this Agreement, the language of this Agreement shall be construed simply, according to its fair meaning, and not strictly for or against any Party. Any term referencing time, days or period for performance shall be deemed calendar days and not work days. All references to Consultant include all personnel, employees, agents, and subconsultants of Consultant, except as otherwise specified in this Agreement. All references to City include its elected officials, officers, employees, agents, and volunteers except as otherwise specified in this Agreement. The captions of the various articles and paragraphs are for convenience and ease of reference only, and do not define, limit, augment, or describe the scope, content, or intent of this Agreement.

3.7.14 Amendment; Modification. No supplement, modification, or amendment of this Agreement shall be binding unless executed in writing and signed by both Parties.

3.7.15 Waiver. No waiver of any default shall constitute a waiver of any other default or breach, whether of the same or other covenant or condition. No waiver, benefit, privilege, or service voluntarily given or performed by a Party shall give the other Party any contractual rights by custom, estoppel, or otherwise.

3.7.16 No Third-Party Beneficiaries. There are no intended third party beneficiaries of any right or obligation assumed by the Parties.

3.7.17 Invalidity; Severability. If any portion of this Agreement is declared invalid, illegal, or otherwise unenforceable by a court of competent jurisdiction, the remaining provisions shall continue in full force and effect.

3.7.18 Prohibited Interests. Consultant maintains and warrants that it has not employed nor retained any company or person, other than a bona fide employee working solely for Consultant, to solicit or secure this Agreement. Consultant warrants that it has not paid nor has it agreed to pay any company or person, other than a bona fide employee working solely for Consultant, any fee, commission, percentage, brokerage fee, gift or other consideration contingent upon or resulting from the award or making of this Agreement. Consultant further agrees to file, or shall cause its employees or subconsultants to file, a Statement of Economic Interest with the City's Filing Officer as required under state law in the performance of the Services. For breach or violation of this warranty, City shall have the right to rescind this Agreement without liability. For the term of this Agreement, no member, officer or employee of City, during the term of his or her service with City, shall have any direct interest in this Agreement, or obtain any present or anticipated material benefit arising therefrom.

3.7.19 Authority to Enter Agreement. Consultant has all requisite power and authority to conduct its business and to execute, deliver, and perform the Agreement. Each Party warrants that the individuals who have signed this Agreement have the legal power, right, and authority to make this Agreement and bind each respective Party.

3.7.20 Counterparts. This Agreement may be signed in counterparts, each of which shall constitute an original.

3.7.21 Survival. All rights and obligations hereunder that by their nature are to continue after any expiration or termination of this Agreement, including, but not limited to, the indemnification obligations, shall survive any such expiration or termination.

CITY OF ONTARIO
PROFESSIONAL SERVICES AGREEMENT

1. PARTIES AND DATE.

This Agreement is made and entered as of _____, by and between the City of Ontario, a municipal corporation organized under the laws of the State of California with its principal place of business at 303 East "B" Street, Ontario, California 91764-4196, County of San Bernardino, State of California ("City") and **AppleOne, Inc**., a Corporation, with its principal place of business at **1999 W. 190th Street, Torrance, CA 90504** ("Consultant"). City and Consultant are sometimes individually referred to herein as "Party" and collectively as "Parties."

2. RECITALS.

2.1 Consultant.

Consultant desires to perform and assume responsibility for the provision of certain professional services required by the City on the terms and conditions set forth in this Agreement. Consultant represents that it is experienced in providing temporary staffing services to public clients, is licensed in the State of California, and is familiar with the plans of City.

2.2 Project.

City desires to engage Consultant to render such professional services for **temporary staffing services for the City on an as-needed basis** ("Project") as set forth in this Agreement.

3. TERMS.

3.1 Scope of Services and Term.

3.1.1 General Scope of Services. Consultant promises and agrees to furnish to the City all labor, materials, tools, equipment, services, and incidental and customary work necessary to fully and adequately supply the professional temporary staffing consulting services necessary for the Project ("Services"). The Services are more particularly described in Exhibit "A" attached hereto and incorporated herein by reference. All Services shall be subject to, and performed in accordance with, this Agreement, the exhibits attached hereto and incorporated herein by reference, and all applicable local, state and federal laws, rules and regulations.

3.1.2 Term. The term of this Agreement shall be from **November 21, 2023** to **November 21, 2026**, unless earlier terminated as provided herein. The City shall have the unilateral option, at its sole discretion, to renew this Agreement automatically for no more than two (2) additional one-year terms, unless earlier terminated as provided herein. Consultant shall complete the Services within the term of this Agreement and shall meet any other established schedules and deadlines. The Parties may, by mutual, written consent, extend the term of this Agreement if necessary to complete the Services.

3.2 Compensation.

3.2.1 Compensation. Consultant shall receive compensation, including authorized reimbursements, for all Services rendered under this Agreement at the rates set forth in Exhibit "C" attached hereto and incorporated herein by reference. The total compensation shall not exceed **Seven Hundred Thousand Dollars and Zero Cents** (**$700,000**) without written approval of the City Council or City Manager, as applicable. Extra Work may be authorized, as described below, and if authorized, will be compensated at the rates and manner set forth in this Agreement.

3.2.2 Payment of Compensation. Consultant shall submit to City a monthly invoice which indicates work completed and hours of Services rendered by Consultant. The invoice shall describe the amount of Services provided since the initial commencement date, or since the start of the subsequent billing periods, as appropriate, through the date of the invoice. City shall, within 30 days of receiving such invoice, review the invoice and pay all non-disputed and approved charges. If the City disputes any of Consultant's fees, the City shall give written notice to Consultant within thirty (30) days of receipt of an invoice of any disputed fees set forth therein. Payment shall not constitute acceptance of any Services completed by Consultant. The making of final payment shall not constitute a waiver of any claims by the City for any reason whatsoever.

3.2.3 Reimbursement for Expenses. Consultant shall not be reimbursed for any expenses unless authorized in writing by City, or included in Exhibit "C" of this Agreement.

3.2.4 Extra Work. At any time during the term of this Agreement, City may request that Consultant perform Extra Work. As used herein, "Extra Work" means any work which is determined by City to be necessary for the proper completion of the Project, but which the Parties did not reasonably anticipate would be necessary at the execution of this Agreement. Consultant shall not perform, nor be compensated for, Extra Work without written authorization from the City.

3.3 Responsibilities of Consultant.

3.3.1 Independent Contractor; Control and Payment of Subordinates. The Services shall be performed by Consultant or under its supervision. Consultant will determine the means, methods and details of performing the Services subject to the requirements of this Agreement. City retains Consultant on an independent contractor basis and not as an employee. Any personnel performing the Services on behalf of Consultant shall not be employees of City and shall at all times be under Consultant's exclusive direction and control. Neither City, or any of its officials, officers, directors, employees or agents shall have control over the conduct of Consultant or any of Consultants officers, employees or agents, except as set forth in this Agreement. Consultant shall pay all wages, salaries, and other amounts due such personnel in

connection with their performance of Services under this Agreement and as required by law. Consultant shall be responsible for all reports and obligations respecting such additional personnel, including, but not limited to: social security taxes, income tax withholding, unemployment insurance, disability insurance, and workers' compensation insurance.

3.3.2 Schedule of Services. Consultant shall perform the Services in a prompt and timely manner and in accordance with the Schedule of Services set forth in Exhibit "B" attached hereto and incorporated herein by reference. Consultant represents that it has the professional and technical personnel required to perform the Services expeditiously. Upon request of City, Consultant shall provide a more detailed schedule of anticipated performance to meet the Schedule of Services.

3.3.3 Conformance to Applicable Requirements. All work prepared by Consultant shall be subject to the approval of City.

3.3.4 Substitution of Key Personnel. Consultant has represented to City that certain key personnel will perform and coordinate the Services under this Agreement. Should one or more of such personnel become unavailable, Consultant may substitute other personnel of at least equal competence upon written approval of City. In the event that City and Consultant cannot agree as to the substitution of key personnel, City shall be entitled to terminate this Agreement for cause. The key personnel for performance of this Agreement are as follows: **Milton J. Perkins, Vice President.**

3.3.5 City's Representative. The City hereby designates **Angela Lopez, Executive Director Human Resources/Risk Management**, or his/her designee, to act as its representative in all matters pertaining to the administration and performance of this Agreement ("City's Representative"). City's Representative shall have the power to act on behalf of the City for review and approval of all products submitted by Consultant but not the authority to enlarge the Scope of Services or change the total compensation due to Consultant under this Agreement. The City Manager shall be authorized to act on City's behalf and to execute all necessary documents which enlarge the Scope of Services or change the Consultant's total compensation subject to the provisions contained in this Agreement. Consultant shall not accept direction or orders from any person other than the City Manager, City's Representative or his/her designee.

3.3.6 Consultant's Representative. Consultant hereby designates **Milton J. Perkins, Vice President**, or his/her designee, to act as its representative for the performance of this Agreement ("Consultant's Representative"). Consultant's Representative shall have full authority to represent and act on behalf of the Consultant for all purposes under this Agreement. The Consultant's Representative shall supervise and direct the Services, using his/her best skill and attention, and shall be responsible for all means, methods, techniques, sequences, and procedures and for the satisfactory coordination of all portions of the Services under this Agreement.

3.3.7 Coordination of Services. Consultant agrees to work closely with City staff in the performance of Services and shall be available to City's staff, consultants and other staff at all reasonable times.

3.3.8 Standard of Care; Performance of Employees. Consultant shall perform all Services under this Agreement in a skillful and competent manner, consistent with the standards generally recognized as being employed by professionals in the same discipline in the State of

California. Consultant represents and maintains that it is skilled in the professional calling necessary to perform the Services. Consultant warrants that all employees and subconsultants shall have sufficient skill and experience to perform the Services assigned to them. Consultant represents that it, its employees and subconsultants have all licenses, permits, qualifications and approvals of whatever nature that are legally required to perform the Services, and that such licenses and approvals shall be maintained throughout the term of this Agreement. Consultant shall perform, at its own cost and expense and without reimbursement from the City, any services necessary to correct errors or omissions which are caused by the Consultant's failure to comply with the standard of care provided for herein. Any employee of the Consultant or its subconsultants who is determined by the City to be uncooperative, incompetent, a threat to the adequate or timely completion of the Project, a threat to the safety of persons or property, or any employee who fails or refuses to perform the Services in a manner acceptable to the City, shall be promptly removed from the Project by the Consultant and shall not be re-employed to perform any of the Services or to work on the Project.

3.3.9 Period of Performance.

3.3.9.1 Consultant shall perform and complete all Services under this Agreement within the term set forth in Section 3.1.2 above ("Performance Time"). Consultant shall also perform the Services in strict accordance with any completion schedule or Project milestones described in Exhibits "A" or "B" attached hereto, or which may be separately agreed upon in writing by the City and Consultant ("Performance Milestones"). Consultant agrees that if the Services are not completed within the aforementioned Performance Time and/or pursuant to any such Performance Milestones developed pursuant to provisions of this Agreement, it is understood, acknowledged and agreed that the City will suffer damage.

3.3.9.2 Neither City nor Consultant shall be considered in default of this Agreement for delays in performance caused by circumstances beyond the reasonable control of the non-performing Party. For purposes of this Agreement, such circumstances include a Force Majeure Event. A Force Majeure Event shall mean an event that materially affects a Party's performance and is one or more of the following: (1) Acts of God or other natural disasters; (2) terrorism or other acts of a public enemy; (3) orders of governmental authorities (including, without limitation, unreasonable and unforeseeable delay in the issuance of permits or approvals by governmental authorities that are required for the services); (4) strikes and other organized labor action occurring at the site and the effects thereof on the services, only to the extent such strikes and other organized labor action are beyond the control of Consultant and its subcontractors, and to the extent the effects thereof cannot be avoided by use of replacement workers; and (5) pandemics, epidemics or quarantine restrictions. For purposes of this section, "orders of governmental authorities," includes ordinances, emergency proclamations and orders, rules to protect the public health, welfare and safety, and other actions of a public agency applicable to the services and Agreement.

3.3.9.3 Should a Force Majeure Event occur, the non-performing Party shall, within a reasonable time of being prevented from performing, give written notice to the other Party describing the circumstances preventing continued performance and the efforts being made to resume performance of this Agreement. Force Majeure Events and/or delays, regardless of the Party responsible for the delay, shall not entitle Consultant to any additional compensation. Notwithstanding the foregoing in this section, the City may still terminate this Agreement in accordance with the termination provisions of this Agreement.

3.3.10 Laws and Regulations; Employee/Labor Certification.

3.3.10.1 Compliance with Laws. Consultant shall keep itself fully informed of and in compliance with all local, state and federal laws, rules and regulations in any manner affecting the performance of the Project or the Services, including all Cal/OSHA requirements, and shall give all notices required by law. Consultant shall be liable for all violations of such laws and regulations in connection with the Services and this Agreement. All violations of such laws and regulations shall be grounds for the City to terminate the Agreement for cause.

3.3.10.2 Employment Eligibility; Consultant. Consultant certifies that it fully complies with all requirements and restrictions of state and federal law respecting the employment of undocumented aliens, including, but not limited to, the Immigration Reform and Control Act of 1986, as may be amended from time to time and shall require all subconsultants and sub-subconsultants to comply with the same. Consultant certifies that it has not committed a violation of any such law within the five (5) years immediately preceding the date of execution of this Agreement, and shall not violate any such law at any time during the term of the Agreement.

3.3.10.3 Equal Opportunity Employment. Consultant represents that it is an equal opportunity employer and it shall not discriminate against any subconsultant, employee or applicant for employment because of race, religion, color, national origin, handicap, ancestry, sex or age. Such non-discrimination shall include, but not be limited to, all activities related to initial employment, upgrading, demotion, transfer, recruitment or recruitment advertising, layoff or termination. Consultant shall also comply with all relevant provisions of City's Minority Business Enterprise program, Affirmative Action Plan or other related programs or guidelines currently in effect or hereinafter enacted.

3.3.10.4 Air Quality. To the extent applicable, Consultant must fully comply with all applicable laws, rules and regulations in furnishing or using equipment and/or providing services, including, but not limited to, emissions limits and permitting requirements imposed by the South Coast Air Quality Management District (SCAQMD) and/or California Air Resources Board (CARB). Consultant shall indemnify City against any fines or penalties imposed by SCAQMD, CARB, or any other governmental or regulatory agency for violations of applicable laws, rules and/or regulations by Consultant, its subconsultants, or others for whom Consultant is responsible under its indemnity obligations provided for in this Agreement.

3.3.10.5 Water Quality Management and Compliance. Consultant shall keep itself and all subcontractors, staff, and employees fully informed of and in compliance with all local, state and federal laws, rules and regulations that may impact, or be implicated by the performance of the Services including, without limitation, all applicable provisions of the City's ordinances regulating water quality and storm water; the Federal Water Pollution Control Act (33 U.S.C. § 1251, *et seq.*); the California Porter-Cologne Water Quality Control Act (Water Code § 13000 *et seq*.); and any and all regulations, policies, or permits issued pursuant to any such authority. Consultant must additionally comply with the lawful requirements of the City, and any other municipality, drainage district, or other local agency with jurisdiction over the location where the Services are to be conducted, regulating water quality and storm water discharges. City may seek damages from Consultant for delay in completing the Services caused by Consultant's failure to comply with the laws, regulations and policies described in this Section, or any other relevant water quality law, regulation, or policy.

3.3.10.6 Safety. Consultant shall execute and maintain its work so as to avoid injury or damage to any person or property. In carrying out its Services, the Consultant shall at all times be in compliance with all applicable local, state and federal laws, rules and regulations, and shall exercise all necessary precautions for the safety of employees appropriate to the nature of the work and the conditions under which the work is to be performed.

3.3.11 Insurance.

3.3.11.1 Time for Compliance. Consultant shall not commence work under this Agreement until it has provided evidence satisfactory to the City that it has secured all insurance required under this section. In addition, Consultant shall not allow any subconsultant to commence work on any subcontract until it has provided evidence satisfactory to the City that the subconsultant has secured all insurance required under this section. Failure to provide and maintain all required insurance shall be grounds for the City to terminate this Agreement for cause.

3.3.11.2 Types of Insurance Required. As a condition precedent to the effectiveness of this Agreement for work to be performed hereunder, and without limiting the indemnity provisions of the Agreement, the Consultant, in partial performance of its obligations under such Agreement, shall procure and maintain in full force and effect during the term of the Agreement the following policies of insurance. If the existing policies do not meet the insurance requirements set forth herein, Consultant agrees to amend, supplement or endorse the policies to do so.

(A) Commercial General Liability: Commercial General Liability Insurance which affords coverage at least as broad as Insurance Services Office "occurrence" form CG 00 01, or the exact equivalent, with limits of not less than $2,000,000 per occurrence and no less than $4,000,000 in the general aggregate. Defense costs shall be paid in addition to the limits. The policy shall contain no endorsements or provisions (1) limiting coverage for contractual liability; (2) excluding coverage for claims or suits by one insured against another (cross-liability); (3) products/completed operations liability; or (4) containing any other exclusion(s) contrary to the terms or purposes of this Agreement.

(B) Automobile Liability Insurance: Automobile Liability Insurance with coverage at least as broad as Insurance Services Office Form CA 00 01 covering "Any Auto" (Symbol 1), or the exact equivalent, covering bodily injury and property damage for all activities with limits of not less than $2,000,000 combined limit for each occurrence.

(C) Workers' Compensation: Workers' Compensation Insurance, as required by the State of California and Employer's Liability Insurance with a limit of not less than $1,000,000 per accident for bodily injury and disease.

(D) Professional Liability (Errors & Omissions): Professional Liability insurance or Errors & Omissions insurance appropriate to Consultant's profession with limits of not less than $2,000,000. Covered professional services shall specifically include all work to be performed under the Agreement and delete any exclusions that may potentially affect the work to be performed (for example, any exclusions relating to lead, asbestos, pollution, testing, underground storage tanks, laboratory analysis, soil work, etc.). If coverage is written on a claims-made basis, the retroactive date shall precede the effective date of the initial Agreement and continuous coverage will be maintained or an extended reporting period will be exercised for a period of at least five (5) years from termination or expiration of this Agreement.

3.3.11.3 Insurance Endorsements. Required insurance policies shall contain the following provisions, or Consultant shall provide endorsements on forms approved by the City to add the following provisions to the insurance policies:

(A) Commercial General Liability: (1) Additional Insured: The City, its officials, officers, employees, agents, and volunteers shall be additional insureds with regard to liability and defense of suits or claims arising out of the performance of the Agreement. Additional Insured Endorsements shall not (1) be restricted to "ongoing operations"; (2) exclude "contractual liability"; (3) restrict coverage to "sole" liability of Consultant; or (4) contain any other exclusions contrary to the terms or purposes of this Agreement. For all policies of Commercial General Liability insurance, Consultant shall provide endorsements in the form of ISO CG 20 10 10 01 and 20 37 10 01 (or endorsements providing the exact same coverage) to effectuate this requirement. (2) Cancellation: Required insurance policies shall not be canceled or the coverage reduced until a thirty (30) day written notice of cancellation has been served upon the City except ten (10) days shall be allowed for non-payment of premium.

(B) Automobile Liability: (1) Additional Insured: The City, its directors, officials, officers, employees, agents, and volunteers shall be covered as additional insureds with respect to the ownership, operation, maintenance, use, loading or unloading of any auto owned, leased, hired or borrowed by the Vendor or for which the Vendor is responsible. (2) Cancellation: Required insurance policies shall not be canceled or the coverage reduced until a thirty (30) day written notice of cancellation has been served upon the City except ten (10) days shall be allowed for non-payment of premium.

(C) Professional Liability (Errors & Omissions): 1) Cancellation: Required insurance policies shall not be canceled or the coverage reduced until a thirty (30) day written notice of cancellation has been served upon the City except ten (10) days shall be allowed for non-payment of premium. (2) This insurance shall be written on a policy form coverage specifically designed to protect against acts, errors or omissions of the Consultant. “Covered Professional Services” as designated in the policy must specifically include work performed under this Agreement. The policy must “pay on behalf of” the insured and include a provision establishing the insurer’s duty to defend.

(D) Workers' Compensation: (1) Cancellation: Required insurance policies shall not be canceled or the coverage reduced until a thirty (30) day written notice of cancellation has been served upon the City except ten (10) days shall be allowed for non-payment of premium. (2) Waiver of Subrogation: A waiver of subrogation stating that the insurer waives all rights of subrogation against the City, its officials, officers, employees, agents, and volunteers.

3.3.11.4 Primary and Non-Contributing Insurance. All policies of Commercial General Liability and Automobile Liability insurance shall be primary and any other insurance, deductible, or self-insurance maintained by the City, its officials, officers, employees, agents, or volunteers shall not contribute with this primary insurance. Policies shall contain or be endorsed to contain such provisions.

3.3.11.5 Waiver of Subrogation. All required insurance coverages, except for the professional liability coverage, shall contain or be endorsed to waiver of subrogation in favor of the City, its officials, officers, employees, agents, and volunteers or shall specifically allow Consultant or others providing insurance evidence in compliance with these specifications

to waive their right of recovery prior to a loss. Consultant hereby waives its own right of recovery against City, and shall require similar written express waivers and insurance clauses from each of its subconsultants.

3.3.11.6 Deductibles and Self-Insured Retentions. Any deductible or self-insured retention must be approved in writing by the City and shall protect the City, its officials, officers, employees, agents, and volunteers in the same manner and to the same extent as they would have been protected had the policy or policies not contained a deductible or self-insured retention.

3.3.11.7 Evidence of Insurance. The Consultant, concurrently with the execution of the Agreement, and as a condition precedent to the effectiveness thereof, shall deliver either certified copies of the required policies, or original certificates on forms approved by the City, together with all endorsements affecting each policy. Required insurance policies shall not be in compliance if they include any limiting provision or endorsement that has not been submitted to the City for approval. The certificates and endorsements for each insurance policy shall be signed by a person authorized by that insurer to bind coverage on its behalf. At least fifteen (15 days) prior to the expiration of any such policy, evidence of insurance showing that such insurance coverage has been renewed or extended shall be filed with the City. If such coverage is cancelled or reduced and not replaced immediately so as to avoid a lapse in the required coverage, Consultant shall, within ten (10) days after receipt of written notice of such cancellation or reduction of coverage, file with the City evidence of insurance showing that the required insurance has been reinstated or has been provided through another insurance company or companies.

3.3.11.8 Acceptability of Insurers. Each such policy shall be from a company or companies with a current A.M. Best's rating of no less than A:VII and authorized to transact business of insurance in the State of California, or otherwise allowed to place insurance through surplus line brokers under applicable provisions of the California Insurance Code or any federal law.

3.3.11.9 Enforcement of Agreement Provisions (non estoppel). Consultant acknowledges and agrees that actual or alleged failure on the part of the City to inform Consultant of non-compliance with any requirement imposes no additional obligation on the City nor does it waive any rights hereunder.

3.3.11.10 Requirements Not Limiting. Requirement of specific coverage or minimum limits contained in this Section are not intended as a limitation on coverage, limits, or other requirement, or a waiver of any coverage normally provided by any insurance.

3.3.11.11 Additional Insurance Provisions

(A) The foregoing requirements as to the types and limits of insurance coverage to be maintained by Consultant, and any approval of said insurance by the City, is not intended to and shall not in any manner limit or qualify the liabilities and obligations otherwise assumed by the Consultant pursuant to this Agreement, including but not limited to, the provisions concerning indemnification.

(B) If at any time during the life of the Agreement, any policy of insurance required under this Agreement does not comply with these specifications or is canceled

and not replaced, City has the right but not the duty to obtain the insurance it deems necessary and any premium paid by City will be promptly reimbursed by Consultant or City will withhold amounts sufficient to pay premium from Consultant payments. In the alternative, City may cancel this Agreement.

(C) The City may require the Consultant to provide complete copies of all insurance policies in effect for the duration of the Project.

(D) Neither the City nor any of its officials, officers, employees, agents or volunteers shall be personally responsible for any liability arising under or by virtue of this Agreement.

(E) The limits set forth herein shall apply separately to each insured against whom claims are made or suits are brought, except with respect to the limits of liability. Further the limits set forth herein shall not be construed to relieve the Consultant from liability in excess of such coverage, nor shall it limit the Consultant's indemnification obligations to the City and shall not preclude the City from taking such other actions available to the City under other provisions of the Agreement or law.

(F) Consultant shall report to the City, in addition to Consultant's insurer, any and all insurance claims submitted by Consultant in connection with the Services under this Agreement.

3.3.11.12 Insurance for Subconsultants. Consultant shall include all subconsultants engaged in any work for Consultant relating to this Agreement as additional insureds under the Consultant's policies, or the Consultant shall be responsible for causing subconsultants to purchase the appropriate insurance in compliance with the terms of these Insurance Requirements, including adding the City, its officials, officers, employees, agents, and volunteers as additional insureds to the subconsultant's policies. All policies of Commercial General Liability insurance provided by Consultant's subconsultants performing work relating to this Agreement shall be endorsed to name the City, its officials, officers, employees, agents and volunteers as additional insureds using endorsement form ISO CG 20 38 04 13 or an endorsement providing equivalent coverage. Consultant shall not allow any subconsultant to commence work on any subcontract relating to this Agreement until it has received satisfactory evidence of subconsultant's compliance with all insurance requirements under this Agreement, to the extent applicable. The Consultant shall provide satisfactory evidence of compliance with this section upon request of the City.

3.4 Labor Code Requirements.

3.4.1 Prevailing Wages. Consultant is aware of the requirements of California Labor Code Section 1720, et seq., and 1770, et seq., as well as California Code of Regulations, Title 8, Section 16000, et seq., ("Prevailing Wage Laws"), which require the payment of prevailing wage rates and the performance of other requirements on "public works" and "maintenance" projects. If the Services are being performed as part of an applicable "public works" or "maintenance" project, as defined by the Prevailing Wage Laws, and if the total compensation is $1,000 or more, Consultant agrees to fully comply with such Prevailing Wage Laws. City shall provide Consultant with a copy of the prevailing rates of per diem wages in effect at the commencement of this Agreement. Consultant shall make copies of the prevailing rates of per diem wages for each craft, classification or type of worker needed to execute the Services

available to interested parties upon request, and shall post copies at the Consultant's principal place of business and at the project site. It is the intent of the parties to effectuate the requirements of sections 1771, 1774, 1775, 1776, 1777.5, 1813, and 1815 of the Labor Code within this Agreement, and Consultant shall therefore comply with such Labor Code sections to the fullest extent required by law. Consultant shall defend, indemnify and hold the City, its officials, officers, employees, agents, and volunteers free and harmless from any claim or liability arising out of any failure or alleged failure to comply with the Prevailing Wage Laws.

3.4.2 Registration/DIR Compliance. If the Services are being performed on a public works project of over $25,000 when the project is for construction, alteration, demolition, installation, or repair work, or a public works project of over $15,000 when the project is for maintenance work, in addition to the foregoing, then pursuant to Labor Code sections 1725.5 and 1771.1, the Consultant and all subconsultants must be registered with the Department of Industrial Relations ("DIR"). Consultant shall maintain registration for the duration of the Project and require the same of any subconsultants.

3.4.3 Compliance Monitoring. This Project may also be subject to compliance monitoring and enforcement by the DIR. It shall be Consultant's sole responsibility to comply with all applicable registration and labor compliance requirements, including the submission of payroll records directly to the DIR. Any stop orders issued by the DIR against Consultant or any subconsultant that affect Consultant's performance of services, including any delay, shall be Consultant's sole responsibility. Any delay arising out of or resulting from such stop orders shall be considered Consultant caused delay and shall not be compensable by the City. Consultant shall defend, indemnify and hold the City, its officials, officers, employees and agents free and harmless from any claim or liability arising out of stop orders issued by the DIR against Consultant or any subconsultant.

3.4.4 Labor Certification. By its signature hereunder, Consultant certifies that it is aware of the provisions of Section 3700 of the California Labor Code which require every employer to be insured against liability for Worker's Compensation or to undertake self-insurance in accordance with the provisions of that Code, and agrees to comply with such provisions before commencing the performance of the Services.

3.5 Termination of Agreement.

3.5.1.1 Grounds for Termination. City may, by written notice to Consultant, terminate the whole or any part of this Agreement at any time and without cause by giving written notice to Consultant of such termination, and specifying the effective date thereof, at least seven (7) days before the effective date of such termination. Upon termination, Consultant shall be compensated only for those Services which have been adequately rendered to City, and Consultant shall be entitled to no further compensation. Consultant may not terminate this Agreement except for cause. The rights and remedies of the City provided in this section shall not be exclusive and are in addition to any other rights and remedies provided by law, equity or under this Agreement.

3.5.1.2 Effect of Termination. If this Agreement is terminated as provided herein, City may require Consultant to provide all finished or unfinished Documents and Data and other information of any kind prepared by Consultant in connection with the performance of Services under this Agreement. Consultant shall be required to provide such document and other information within fifteen (15) days of the request.

3.5.1.3 Additional Services. In the event this Agreement is terminated in whole or in part as provided herein, City may procure, upon such terms and in such manner as it may determine appropriate, services similar to those terminated.

3.6 Indemnification.

3.6.1 To the fullest extent permitted by law, Consultant shall defend (with counsel of City's choosing), indemnify and hold the City, its officials, officers, employees, volunteers, and agents free and harmless from any and all claims, demands, causes of action, costs, expenses, liability, loss, damage or injury of any kind, in law or equity, to property or persons, including wrongful death, in any manner arising out of, pertaining to, or incident to any acts, errors or omissions, or willful misconduct of Consultant, its officials, officers, employees, subcontractors, consultants or agents in connection with the performance of the Consultant's Services, the Project or this Agreement, including without limitation the payment of all damages, expert witness fees and attorney's fees and other related costs and expenses except such loss or damage caused by the sole negligence or willful misconduct of the City. Consultant's obligation to indemnify shall survive expiration or termination of this Agreement and shall not be restricted to insurance proceeds, if any, received by Consultant, the City, its officials, officers, employees, agents, or volunteers.

3.6.2 If Consultant's obligation to defend, indemnify, and/or hold harmless arises out of Consultant's performance as a "design professional" (as that term is defined under Civil Code section 2782.8), then, and only to the extent required by Civil Code section 2782.8, which is fully incorporated herein, Consultant's indemnification obligation shall be limited to claims that arise out of, pertain to, or relate to the negligence, recklessness, or willful misconduct of the Consultant, and, upon Consultant obtaining a final adjudication by a court of competent jurisdiction, Consultant's liability for such claim, including the cost to defend, shall not exceed the Consultant's proportionate percentage of fault.

3.7 General Provisions.

3.7.1 Accounting Records. Consultant shall maintain complete and accurate records with respect to all costs and expenses incurred under this Agreement. All such records shall be clearly identifiable. Consultant shall allow a representative of City during normal business hours to examine, audit, and make transcripts or copies of such records and any other documents created pursuant to this Agreement. Consultant shall allow inspection of all work, data, documents, proceedings, and activities related to the Agreement for a period of three (3) years from the date of final payment under this Agreement.

3.7.2 Independent Contractors and Subcontracting.

3.7.2.1 Use of Consultants. Consultant is aware of statutory and case law regarding classification of workers as independent contractors, including California Labor Code Section 2750.3 and Dynamex Operations West, Inc. v. Superior Court, 4 Cal. 5th 903 (2018). To ensure that Consultant is in compliance with the California Labor Code, Consultant shall only utilize its employees to provide the Services. Consultant may not provide the services through any independent contractor, subcontractor or subconsultant ("Subcontractor(s)") unless approved by the City as set forth in Section 3.7.2.2 below. Consultant represents and warrants that all personnel who perform the Services on Consultant's behalf are Consultant's employees, and that Consultant complies with all applicable laws, rules and regulations governing its

employees, including, but not limited to, the California Labor Code, Unemployment Insurance Code and all applicable Industrial Welfare Commission Wage Orders.

3.7.2.2 Prior Approval Required. Consultant shall not use any Subcontractor to provide the Services, or any portion of the work required by this Agreement, without prior written approval of City. In the event that City authorizes Consultant to use a Subcontractor, Consultant shall enter into a written agreement with the Subcontractor, which must include all provisions of the Agreement, including a restriction on the Subcontractor's use of further independent contractors, subcontractors or subconsultants without the City's prior written consent.

3.7.3 Delivery of Notices. All notices permitted or required under this Agreement shall be given to the respective parties at the following address, or at such other address as the respective parties may provide in writing for this purpose:

Consultant: **AppleOne, Inc.**
1999 W. 190th Street
Torrance, CA 90504
ATTN: Milton J. Perkins, Vice President

City: City of Ontario
303 East "B" Street
Ontario, CA 91764
ATTN: **Angela Lopez, Executive Director Human Resources/Risk Management**

Such notice shall be deemed made when personally delivered or when mailed, forty-eight (48) hours after deposit in the U.S. Mail, first class postage prepaid and addressed to the party at its applicable address. Actual notice shall be deemed adequate notice on the date actual notice occurred, regardless of the method of service.

3.7.4 Ownership of Materials and Confidentiality.

3.7.4.1 Documents & Data; Licensing of Intellectual Property. This Agreement creates a non-exclusive and perpetual license for City to copy, use, modify, reuse, or sublicense any and all copyrights, designs, and other intellectual property embodied in plans, specifications, studies, drawings, estimates, and other documents or works of authorship fixed in any tangible medium of expression, including but not limited to, physical drawings or data magnetically or otherwise recorded on computer diskettes, which are prepared or caused to be prepared by Consultant under this Agreement ("Documents & Data"). All Documents & Data shall be and remain the property of City, and shall not be used in whole or in substantial part by Consultant on other projects without the City's express written permission. Within thirty (30) days following the completion, suspension, abandonment or termination of this Agreement, Consultant shall provide to City reproducible copies of all Documents & Data, in a form and amount required by City. City reserves the right to select the method of document reproduction and to establish where the reproduction will be accomplished. The reproduction expense shall be borne by City at the actual cost of duplication. In the event of a dispute regarding the amount of compensation to which the Consultant is entitled under the termination provisions of this Agreement, Consultant shall provide all Documents & Data to City upon payment of the undisputed amount. Consultant shall have no right to retain or fail to provide to City any such documents pending resolution of

the dispute. In addition, Consultant shall retain copies of all Documents & Data on file for a minimum of fifteen (15) years following completion of the Project, and shall make copies available to City upon the payment of actual reasonable duplication costs. Before destroying the Documents & Data following this retention period, Consultant shall make a reasonable effort to notify City and provide City with the opportunity to obtain the documents.

3.7.4.2 Subconsultants. Consultant shall require all subconsultants to agree in writing that City is granted a non-exclusive and perpetual license for any Documents & Data the subconsultant prepares under this Agreement. Consultant represents and warrants that Consultant has the legal right to license any and all Documents & Data. Consultant makes no such representation and warranty in regard to Documents & Data which were prepared by design professionals other than Consultant or its subconsultants, or those provided to Consultant by the City.

3.7.4.3 Right to Use. City shall not be limited in any way in its use or reuse of the Documents and Data or any part of them at any time for purposes of this Project or another project, provided that any such use not within the purposes intended by this Agreement or on a project other than this Project without employing the services of Consultant shall be at City's sole risk. If City uses or reuses the Documents & Data on any project other than this Project, it shall remove the Consultant's seal from the Documents & Data and indemnify and hold harmless Consultant and its officers, directors, agents and employees from claims arising out of the negligent use or re-use of the Documents & Data on such other project. Consultant shall be responsible and liable for its Documents & Data, pursuant to the terms of this Agreement, only with respect to the condition of the Documents & Data at the time they are provided to the City upon completion, suspension, abandonment or termination. Consultant shall not be responsible or liable for any revisions to the Documents & Data made by any party other than Consultant, a party for whom the Consultant is legally responsible or liable, or anyone approved by the Consultant.

3.7.4.4 Indemnification. Consultant shall defend, indemnify and hold the City, its directors, officials, officers, employees, volunteers and agents free and harmless, pursuant to the indemnification provisions of this Agreement, for any alleged infringement of any patent, copyright, trade secret, trade name, trademark, or any other proprietary right of any person or entity in consequence of the use on the Project by City of the Documents & Data, including any method, process, product, or concept specified or depicted.

3.7.4.5 Confidentiality. All ideas, memoranda, specifications, plans, procedures, drawings, descriptions, computer program data, input record data, written information, and other Documents & Data either created by or provided to Consultant in connection with the performance of this Agreement shall be held confidential by Consultant. Such materials shall not, without the prior written consent of City, be used by Consultant for any purposes other than the performance of the Services. Nor shall such materials be disclosed to any person or entity not connected with the performance of the Services or the Project. Nothing furnished to Consultant which is otherwise known to Consultant or is generally known, or has become known, to the related industry shall be deemed confidential. Consultant shall not use City's name or insignia, photographs of the Project, or any publicity pertaining to the Services or the Project in any magazine, trade paper, newspaper, television or radio production or other similar medium without the prior written consent of City.

3.7.4.6 Confidential Information. The City shall refrain from releasing Consultant's proprietary information ("Proprietary Information") unless the City's legal counsel determines that the release of the Proprietary Information is required by the California Public Records Act or other applicable state or federal law, or order of a court of competent jurisdiction, in which case the City shall notify Consultant of its intention to release Proprietary Information. Consultant shall have five (5) working days after receipt of the release notice to give City written notice of Consultant's objection to the City's release of Proprietary Information. Consultant shall indemnify, defend and hold harmless the City, and its officers, directors, employees, and agents from and against all liability, loss, cost or expense (including attorney's fees) arising out of a legal action brought to compel the release of Proprietary Information. City shall not release the Proprietary Information after receipt of an objection notice unless either: (1) Consultant fails to fully indemnify, defend (with City's choice of legal counsel), and hold City harmless from any legal action brought to compel such release; and/or (2) a final and non-appealable order by a court of competent jurisdiction requires that City release such information.

3.7.5 Cooperation; Further Acts. The Parties shall fully cooperate with one another, and shall take any additional acts or sign any additional documents as may be necessary, appropriate or convenient to attain the purposes of this Agreement.

3.7.6 Entire Agreement. This Agreement contains the entire agreement of the Parties with respect to the subject matter hereof, and supersedes all prior negotiations, understandings or agreements.

3.7.7 Attorneys' Fees. If either party commences an action against the other party, either legal, administrative or otherwise, arising out of or in connection with this Agreement, the prevailing party in such litigation shall be entitled to have and recover from the losing party reasonable attorneys' fees and all costs of such action.

3.7.8 Governing Law. This Agreement shall be governed by the laws of the State of California. Venue shall be in San Bernardino County. In addition to any and all contract requirements pertaining to notices of and requests for compensation or payment for extra work, disputed work, claims and/or changed conditions, Consultant must comply with the claim procedures set forth in Government Code sections 900 et seq. prior to filing any lawsuit against the City. Such Government Code claims and any subsequent lawsuit based upon the Government Code claims shall be limited to those matters that remain unresolved after all procedures pertaining to extra work, disputed work, claims, and/or changed conditions have been followed by Consultant. If no such Government Code claim is submitted, or if any prerequisite contractual requirements are not otherwise satisfied as specified herein, Consultant shall be barred from bringing and maintaining a valid lawsuit against the City.

3.7.9 Time of Essence. Time is of the essence for each and every provision of this Agreement.

3.7.10 City's Right to Employ Other Consultants. City reserves right to employ other consultants in connection with this Project.

3.7.11 Successors and Assigns. This Agreement shall be binding on the successors and assigns of the parties.

3.7.12 Assignment or Transfer. Consultant shall not assign, sublet, or transfer this

Agreement or any rights under or interest in this Agreement without the written consent of the City, which may be withheld for any reason. Any attempt to so assign or so transfer without such consent shall be void and without legal effect and shall constitute grounds for termination. Consultant shall not subcontract any portion of the Services required by this Agreement, except as expressly stated herein, without prior written approval of City. Subcontracts, if any, shall contain a provision making them subject to all provisions stipulated in this Agreement.

3.7.13 Construction; References; Captions. Since the Parties or their agents have participated fully in the preparation of this Agreement, the language of this Agreement shall be construed simply, according to its fair meaning, and not strictly for or against any Party. Any term referencing time, days or period for performance shall be deemed calendar days and not work days. All references to Consultant include all personnel, employees, agents, and subconsultants of Consultant, except as otherwise specified in this Agreement. All references to City include its elected officials, officers, employees, agents, and volunteers except as otherwise specified in this Agreement. The captions of the various articles and paragraphs are for convenience and ease of reference only, and do not define, limit, augment, or describe the scope, content, or intent of this Agreement.

3.7.14 Amendment; Modification. No supplement, modification, or amendment of this Agreement shall be binding unless executed in writing and signed by both Parties.

3.7.15 Waiver. No waiver of any default shall constitute a waiver of any other default or breach, whether of the same or other covenant or condition. No waiver, benefit, privilege, or service voluntarily given or performed by a Party shall give the other Party any contractual rights by custom, estoppel, or otherwise.

3.7.16 No Third-Party Beneficiaries. There are no intended third party beneficiaries of any right or obligation assumed by the Parties.

3.7.17 Invalidity; Severability. If any portion of this Agreement is declared invalid, illegal, or otherwise unenforceable by a court of competent jurisdiction, the remaining provisions shall continue in full force and effect.

3.7.18 Prohibited Interests. Consultant maintains and warrants that it has not employed nor retained any company or person, other than a bona fide employee working solely for Consultant, to solicit or secure this Agreement. Consultant warrants that it has not paid nor has it agreed to pay any company or person, other than a bona fide employee working solely for Consultant, any fee, commission, percentage, brokerage fee, gift or other consideration contingent upon or resulting from the award or making of this Agreement. Consultant further agrees to file, or shall cause its employees or subconsultants to file, a Statement of Economic Interest with the City's Filing Officer as required under state law in the performance of the Services. For breach or violation of this warranty, City shall have the right to rescind this Agreement without liability. For the term of this Agreement, no member, officer or employee of City, during the term of his or her service with City, shall have any direct interest in this Agreement, or obtain any present or anticipated material benefit arising therefrom.

3.7.19 Authority to Enter Agreement. Consultant has all requisite power and authority to conduct its business and to execute, deliver, and perform the Agreement. Each Party warrants that the individuals who have signed this Agreement have the legal power, right, and authority to make this Agreement and bind each respective Party.

3.7.20 Counterparts. This Agreement may be signed in counterparts, each of which shall constitute an original.

3.7.21 Survival. All rights and obligations hereunder that by their nature are to continue after any expiration or termination of this Agreement, including, but not limited to, the indemnification obligations, shall survive any such expiration or termination.

CITY OF ONTARIO
PROFESSIONAL SERVICES AGREEMENT

1. PARTIES AND DATE.

This Agreement is made and entered as of _____, by and between the City of Ontario, a municipal corporation organized under the laws of the State of California with its principal place of business at 303 East "B" Street, Ontario, California 91764-4196, County of San Bernardino, State of California ("City") and **Enterprise Solutions, Inc**., a Corporation, with its principal place of business at **5201 Great America Parkway, Suite 320, Santa Clara, CA 95054** ("Consultant"). City and Consultant are sometimes individually referred to herein as "Party" and collectively as "Parties."

2. RECITALS.

2.1 Consultant.

Consultant desires to perform and assume responsibility for the provision of certain professional services required by the City on the terms and conditions set forth in this Agreement. Consultant represents that it is experienced in providing temporary staffing services to public clients, is licensed in the State of California, and is familiar with the plans of City.

2.2 Project.

City desires to engage Consultant to render such professional services for **temporary staffing services for the City on an as-needed basis** ("Project") as set forth in this Agreement.

3. TERMS.

3.1 Scope of Services and Term.

3.1.1 General Scope of Services. Consultant promises and agrees to furnish to the City all labor, materials, tools, equipment, services, and incidental and customary work necessary to fully and adequately supply the professional temporary staffing consulting services necessary for the Project ("Services"). The Services are more particularly described in Exhibit "A" attached hereto and incorporated herein by reference. All Services shall be subject to, and performed in accordance with, this Agreement, the exhibits attached hereto and incorporated

herein by reference, and all applicable local, state and federal laws, rules and regulations.

3.1.2 Term. The term of this Agreement shall be from **November 21, 2023** to **November 21, 2026**, unless earlier terminated as provided herein. The City shall have the unilateral option, at its sole discretion, to renew this Agreement automatically for no more than two (2) additional one-year terms, unless earlier terminated as provided herein. Consultant shall complete the Services within the term of this Agreement and shall meet any other established schedules and deadlines. The Parties may, by mutual, written consent, extend the term of this Agreement if necessary to complete the Services.

3.2 Compensation.

3.2.1 Compensation. Consultant shall receive compensation, including authorized reimbursements, for all Services rendered under this Agreement at the rates set forth in Exhibit "C" attached hereto and incorporated herein by reference. The total compensation shall not exceed **Seven Hundred Thousand Dollars and Zero Cents** (**$700,000**) without written approval of the City Council or City Manager, as applicable. Extra Work may be authorized, as described below, and if authorized, will be compensated at the rates and manner set forth in this Agreement.

3.2.2 Payment of Compensation. Consultant shall submit to City a monthly invoice which indicates work completed and hours of Services rendered by Consultant. The invoice shall describe the amount of Services provided since the initial commencement date, or since the start of the subsequent billing periods, as appropriate, through the date of the invoice. City shall, within 30 days of receiving such invoice, review the invoice and pay all non-disputed and approved charges. If the City disputes any of Consultant's fees, the City shall give written notice to Consultant within thirty (30) days of receipt of an invoice of any disputed fees set forth therein. Payment shall not constitute acceptance of any Services completed by Consultant. The making of final payment shall not constitute a waiver of any claims by the City for any reason whatsoever.

3.2.3 Reimbursement for Expenses. Consultant shall not be reimbursed for any expenses unless authorized in writing by City, or included in Exhibit "C" of this Agreement.

3.2.4 Extra Work. At any time during the term of this Agreement, City may request that Consultant perform Extra Work. As used herein, "Extra Work" means any work which is determined by City to be necessary for the proper completion of the Project, but which the Parties did not reasonably anticipate would be necessary at the execution of this Agreement. Consultant shall not perform, nor be compensated for, Extra Work without written authorization from the City.

3.3 Responsibilities of Consultant.

3.3.1 Independent Contractor; Control and Payment of Subordinates. The Services shall be performed by Consultant or under its supervision. Consultant will determine the means, methods and details of performing the Services subject to the requirements of this Agreement. City retains Consultant on an independent contractor basis and not as an employee. Any personnel performing the Services on behalf of Consultant shall not be employees of City and shall at all times be under Consultant's exclusive direction and control. Neither City, or any of its officials, officers, directors, employees or agents shall have control over the conduct of

Consultant or any of Consultants officers, employees or agents, except as set forth in this Agreement. Consultant shall pay all wages, salaries, and other amounts due such personnel in connection with their performance of Services under this Agreement and as required by law. Consultant shall be responsible for all reports and obligations respecting such additional personnel, including, but not limited to: social security taxes, income tax withholding, unemployment insurance, disability insurance, and workers' compensation insurance.

3.3.2 Schedule of Services. Consultant shall perform the Services in a prompt and timely manner and in accordance with the Schedule of Services set forth in Exhibit "B" attached hereto and incorporated herein by reference. Consultant represents that it has the professional and technical personnel required to perform the Services expeditiously. Upon request of City, Consultant shall provide a more detailed schedule of anticipated performance to meet the Schedule of Services.

3.3.3 Conformance to Applicable Requirements. All work prepared by Consultant shall be subject to the approval of City.

3.3.4 Substitution of Key Personnel. Consultant has represented to City that certain key personnel will perform and coordinate the Services under this Agreement. Should one or more of such personnel become unavailable, Consultant may substitute other personnel of at least equal competence upon written approval of City. In the event that City and Consultant cannot agree as to the substitution of key personnel, City shall be entitled to terminate this Agreement for cause. The key personnel for performance of this Agreement are as follows: **Sudesh Verma, Senior Proposal Manager.**

3.3.5 City's Representative. The City hereby designates **Angela Lopez, Executive Director Human Resources/Risk Management**, or his/her designee, to act as its representative in all matters pertaining to the administration and performance of this Agreement ("City's Representative"). City's Representative shall have the power to act on behalf of the City for review and approval of all products submitted by Consultant but not the authority to enlarge the Scope of Services or change the total compensation due to Consultant under this Agreement. The City Manager shall be authorized to act on City's behalf and to execute all necessary documents which enlarge the Scope of Services or change the Consultant's total compensation subject to the provisions contained in this Agreement. Consultant shall not accept direction or orders from any person other than the City Manager, City's Representative or his/her designee.

3.3.6 Consultant's Representative. Consultant hereby designates **Sudesh Verma, Senior Proposal Manager**, or his/her designee, to act as its representative for the performance of this Agreement ("Consultant's Representative"). Consultant's Representative shall have full authority to represent and act on behalf of the Consultant for all purposes under this Agreement. The Consultant's Representative shall supervise and direct the Services, using his/her best skill and attention, and shall be responsible for all means, methods, techniques, sequences, and procedures and for the satisfactory coordination of all portions of the Services under this Agreement.

3.3.7 Coordination of Services. Consultant agrees to work closely with City staff in the performance of Services and shall be available to City's staff, consultants and other staff at all reasonable times.

3.3.8 Standard of Care; Performance of Employees. Consultant shall perform all

Services under this Agreement in a skillful and competent manner, consistent with the standards generally recognized as being employed by professionals in the same discipline in the State of California. Consultant represents and maintains that it is skilled in the professional calling necessary to perform the Services. Consultant warrants that all employees and subconsultants shall have sufficient skill and experience to perform the Services assigned to them. Consultant represents that it, its employees and subconsultants have all licenses, permits, qualifications and approvals of whatever nature that are legally required to perform the Services, and that such licenses and approvals shall be maintained throughout the term of this Agreement. Consultant shall perform, at its own cost and expense and without reimbursement from the City, any services necessary to correct errors or omissions which are caused by the Consultant's failure to comply with the standard of care provided for herein. Any employee of the Consultant or its subconsultants who is determined by the City to be uncooperative, incompetent, a threat to the adequate or timely completion of the Project, a threat to the safety of persons or property, or any employee who fails or refuses to perform the Services in a manner acceptable to the City, shall be promptly removed from the Project by the Consultant and shall not be re-employed to perform any of the Services or to work on the Project.

3.3.9 Period of Performance.

3.3.9.1 Consultant shall perform and complete all Services under this Agreement within the term set forth in Section 3.1.2 above ("Performance Time"). Consultant shall also perform the Services in strict accordance with any completion schedule or Project milestones described in Exhibits "A" or "B" attached hereto, or which may be separately agreed upon in writing by the City and Consultant ("Performance Milestones"). Consultant agrees that if the Services are not completed within the aforementioned Performance Time and/or pursuant to any such Performance Milestones developed pursuant to provisions of this Agreement, it is understood, acknowledged and agreed that the City will suffer damage.

3.3.9.2 Neither City nor Consultant shall be considered in default of this Agreement for delays in performance caused by circumstances beyond the reasonable control of the non-performing Party. For purposes of this Agreement, such circumstances include a Force Majeure Event. A Force Majeure Event shall mean an event that materially affects a Party's performance and is one or more of the following: (1) Acts of God or other natural disasters; (2) terrorism or other acts of a public enemy; (3) orders of governmental authorities (including, without limitation, unreasonable and unforeseeable delay in the issuance of permits or approvals by governmental authorities that are required for the services); (4) strikes and other organized labor action occurring at the site and the effects thereof on the services, only to the extent such strikes and other organized labor action are beyond the control of Consultant and its subcontractors, and to the extent the effects thereof cannot be avoided by use of replacement workers; and (5) pandemics, epidemics or quarantine restrictions. For purposes of this section, "orders of governmental authorities," includes ordinances, emergency proclamations and orders, rules to protect the public health, welfare and safety, and other actions of a public agency applicable to the services and Agreement.

3.3.9.3 Should a Force Majeure Event occur, the non-performing Party shall, within a reasonable time of being prevented from performing, give written notice to the other Party describing the circumstances preventing continued performance and the efforts being made to resume performance of this Agreement. Force Majeure Events and/or delays, regardless of the Party responsible for the delay, shall not entitle Consultant to any additional compensation.

Notwithstanding the foregoing in this section, the City may still terminate this Agreement in accordance with the termination provisions of this Agreement.

3.3.10 Laws and Regulations; Employee/Labor Certification.

3.3.10.1 Compliance with Laws. Consultant shall keep itself fully informed of and in compliance with all local, state and federal laws, rules and regulations in any manner affecting the performance of the Project or the Services, including all Cal/OSHA requirements, and shall give all notices required by law. Consultant shall be liable for all violations of such laws and regulations in connection with the Services and this Agreement. All violations of such laws and regulations shall be grounds for the City to terminate the Agreement for cause.

3.3.10.2 Employment Eligibility; Consultant. Consultant certifies that it fully complies with all requirements and restrictions of state and federal law respecting the employment of undocumented aliens, including, but not limited to, the Immigration Reform and Control Act of 1986, as may be amended from time to time and shall require all subconsultants and sub-subconsultants to comply with the same. Consultant certifies that it has not committed a violation of any such law within the five (5) years immediately preceding the date of execution of this Agreement, and shall not violate any such law at any time during the term of the Agreement.

3.3.10.3 Equal Opportunity Employment. Consultant represents that it is an equal opportunity employer and it shall not discriminate against any subconsultant, employee or applicant for employment because of race, religion, color, national origin, handicap, ancestry, sex or age. Such non-discrimination shall include, but not be limited to, all activities related to initial employment, upgrading, demotion, transfer, recruitment or recruitment advertising, layoff or termination. Consultant shall also comply with all relevant provisions of City's Minority Business Enterprise program, Affirmative Action Plan or other related programs or guidelines currently in effect or hereinafter enacted.

3.3.10.4 Air Quality. To the extent applicable, Consultant must fully comply with all applicable laws, rules and regulations in furnishing or using equipment and/or providing services, including, but not limited to, emissions limits and permitting requirements imposed by the South Coast Air Quality Management District (SCAQMD) and/or California Air Resources Board (CARB). Consultant shall indemnify City against any fines or penalties imposed by SCAQMD, CARB, or any other governmental or regulatory agency for violations of applicable laws, rules and/or regulations by Consultant, its subconsultants, or others for whom Consultant is responsible under its indemnity obligations provided for in this Agreement.

3.3.10.5 Water Quality Management and Compliance. Consultant shall keep itself and all subcontractors, staff, and employees fully informed of and in compliance with all local, state and federal laws, rules and regulations that may impact, or be implicated by the performance of the Services including, without limitation, all applicable provisions of the City's ordinances regulating water quality and storm water; the Federal Water Pollution Control Act (33 U.S.C. § 1251, *et seq.*); the California Porter-Cologne Water Quality Control Act (Water Code § 13000 *et seq*.); and any and all regulations, policies, or permits issued pursuant to any such authority. Consultant must additionally comply with the lawful requirements of the City, and any other municipality, drainage district, or other local agency with jurisdiction over the location where the Services are to be conducted, regulating water quality and storm water discharges. City may seek damages from Consultant for delay in completing the Services caused by Consultant's

failure to comply with the laws, regulations and policies described in this Section, or any other relevant water quality law, regulation, or policy.

3.3.10.6 Safety. Consultant shall execute and maintain its work so as to avoid injury or damage to any person or property. In carrying out its Services, the Consultant shall at all times be in compliance with all applicable local, state and federal laws, rules and regulations, and shall exercise all necessary precautions for the safety of employees appropriate to the nature of the work and the conditions under which the work is to be performed.

3.3.11 Insurance.

3.3.11.1 Time for Compliance. Consultant shall not commence work under this Agreement until it has provided evidence satisfactory to the City that it has secured all insurance required under this section. In addition, Consultant shall not allow any subconsultant to commence work on any subcontract until it has provided evidence satisfactory to the City that the subconsultant has secured all insurance required under this section. Failure to provide and maintain all required insurance shall be grounds for the City to terminate this Agreement for cause.

3.3.11.2 Types of Insurance Required. As a condition precedent to the effectiveness of this Agreement for work to be performed hereunder, and without limiting the indemnity provisions of the Agreement, the Consultant, in partial performance of its obligations under such Agreement, shall procure and maintain in full force and effect during the term of the Agreement the following policies of insurance. If the existing policies do not meet the insurance requirements set forth herein, Consultant agrees to amend, supplement or endorse the policies to do so.

(A) Commercial General Liability: Commercial General Liability Insurance which affords coverage at least as broad as Insurance Services Office "occurrence" form CG 00 01, or the exact equivalent, with limits of not less than $2,000,000 per occurrence and no less than $4,000,000 in the general aggregate. Defense costs shall be paid in addition to the limits. The policy shall contain no endorsements or provisions (1) limiting coverage for contractual liability; (2) excluding coverage for claims or suits by one insured against another (cross-liability); (3) products/completed operations liability; or (4) containing any other exclusion(s) contrary to the terms or purposes of this Agreement.

(B) Automobile Liability Insurance: Automobile Liability Insurance with coverage at least as broad as Insurance Services Office Form CA 00 01 covering "Any Auto" (Symbol 1), or the exact equivalent, covering bodily injury and property damage for all activities with limits of not less than $2,000,000 combined limit for each occurrence.

(C) Workers' Compensation: Workers' Compensation Insurance, as required by the State of California and Employer's Liability Insurance with a limit of not less than $1,000,000 per accident for bodily injury and disease.

(D) Professional Liability (Errors & Omissions): Professional Liability insurance or Errors & Omissions insurance appropriate to Consultant’s profession with limits of not less than $2,000,000. Covered professional services shall specifically include all work to be performed under the Agreement and delete any exclusions that may potentially affect the work to be performed (for example, any exclusions relating to lead, asbestos, pollution, testing, underground storage tanks, laboratory analysis, soil work, etc.). If coverage is written on

a claims-made basis, the retroactive date shall precede the effective date of the initial Agreement and continuous coverage will be maintained or an extended reporting period will be exercised for a period of at least five (5) years from termination or expiration of this Agreement.

3.3.11.3 Insurance Endorsements. Required insurance policies shall contain the following provisions, or Consultant shall provide endorsements on forms approved by the City to add the following provisions to the insurance policies:

(A) Commercial General Liability: (1) Additional Insured: The City, its officials, officers, employees, agents, and volunteers shall be additional insureds with regard to liability and defense of suits or claims arising out of the performance of the Agreement. Additional Insured Endorsements shall not (1) be restricted to "ongoing operations"; (2) exclude "contractual liability"; (3) restrict coverage to "sole" liability of Consultant; or (4) contain any other exclusions contrary to the terms or purposes of this Agreement. For all policies of Commercial General Liability insurance, Consultant shall provide endorsements in the form of ISO CG 20 10 10 01 and 20 37 10 01 (or endorsements providing the exact same coverage) to effectuate this requirement. (2) Cancellation: Required insurance policies shall not be canceled or the coverage reduced until a thirty (30) day written notice of cancellation has been served upon the City except ten (10) days shall be allowed for non-payment of premium.

(B) Automobile Liability: (1) Additional Insured: The City, its directors, officials, officers, employees, agents, and volunteers shall be covered as additional insureds with respect to the ownership, operation, maintenance, use, loading or unloading of any auto owned, leased, hired or borrowed by the Vendor or for which the Vendor is responsible. (2) Cancellation: Required insurance policies shall not be canceled or the coverage reduced until a thirty (30) day written notice of cancellation has been served upon the City except ten (10) days shall be allowed for non-payment of premium.

(C) Professional Liability (Errors & Omissions): 1) Cancellation: Required insurance policies shall not be canceled or the coverage reduced until a thirty (30) day written notice of cancellation has been served upon the City except ten (10) days shall be allowed for non-payment of premium. (2) This insurance shall be written on a policy form coverage specifically designed to protect against acts, errors or omissions of the Consultant. “Covered Professional Services” as designated in the policy must specifically include work performed under this Agreement. The policy must “pay on behalf of” the insured and include a provision establishing the insurer’s duty to defend.

(D) Workers' Compensation: (1) Cancellation: Required insurance policies shall not be canceled or the coverage reduced until a thirty (30) day written notice of cancellation has been served upon the City except ten (10) days shall be allowed for non-payment of premium. (2) Waiver of Subrogation: A waiver of subrogation stating that the insurer waives all rights of subrogation against the City, its officials, officers, employees, agents, and volunteers.

3.3.11.4 Primary and Non-Contributing Insurance. All policies of Commercial General Liability and Automobile Liability insurance shall be primary and any other insurance, deductible, or self-insurance maintained by the City, its officials, officers, employees, agents, or volunteers shall not contribute with this primary insurance. Policies shall contain or be endorsed to contain such provisions.

3.3.11.5 Waiver of Subrogation. All required insurance coverages, except for the professional liability coverage, shall contain or be endorsed to waiver of subrogation in favor of the City, its officials, officers, employees, agents, and volunteers or shall specifically allow Consultant or others providing insurance evidence in compliance with these specifications to waive their right of recovery prior to a loss. Consultant hereby waives its own right of recovery against City, and shall require similar written express waivers and insurance clauses from each of its subconsultants.

3.3.11.6 Deductibles and Self-Insured Retentions. Any deductible or self-insured retention must be approved in writing by the City and shall protect the City, its officials, officers, employees, agents, and volunteers in the same manner and to the same extent as they would have been protected had the policy or policies not contained a deductible or self-insured retention.

3.3.11.7 Evidence of Insurance. The Consultant, concurrently with the execution of the Agreement, and as a condition precedent to the effectiveness thereof, shall deliver either certified copies of the required policies, or original certificates on forms approved by the City, together with all endorsements affecting each policy. Required insurance policies shall not be in compliance if they include any limiting provision or endorsement that has not been submitted to the City for approval. The certificates and endorsements for each insurance policy shall be signed by a person authorized by that insurer to bind coverage on its behalf. At least fifteen (15 days) prior to the expiration of any such policy, evidence of insurance showing that such insurance coverage has been renewed or extended shall be filed with the City. If such coverage is cancelled or reduced and not replaced immediately so as to avoid a lapse in the required coverage, Consultant shall, within ten (10) days after receipt of written notice of such cancellation or reduction of coverage, file with the City evidence of insurance showing that the required insurance has been reinstated or has been provided through another insurance company or companies.

3.3.11.8 Acceptability of Insurers. Each such policy shall be from a company or companies with a current A.M. Best's rating of no less than A:VII and authorized to transact business of insurance in the State of California, or otherwise allowed to place insurance through surplus line brokers under applicable provisions of the California Insurance Code or any federal law.

3.3.11.9 Enforcement of Agreement Provisions (non estoppel). Consultant acknowledges and agrees that actual or alleged failure on the part of the City to inform Consultant of non-compliance with any requirement imposes no additional obligation on the City nor does it waive any rights hereunder.

3.3.11.10 Requirements Not Limiting. Requirement of specific coverage or minimum limits contained in this Section are not intended as a limitation on coverage, limits, or other requirement, or a waiver of any coverage normally provided by any insurance.

3.3.11.11 Additional Insurance Provisions

(A) The foregoing requirements as to the types and limits of insurance coverage to be maintained by Consultant, and any approval of said insurance by the City, is not intended to and shall not in any manner limit or qualify the liabilities and obligations

otherwise assumed by the Consultant pursuant to this Agreement, including but not limited to, the provisions concerning indemnification.

(B) If at any time during the life of the Agreement, any policy of insurance required under this Agreement does not comply with these specifications or is canceled and not replaced, City has the right but not the duty to obtain the insurance it deems necessary and any premium paid by City will be promptly reimbursed by Consultant or City will withhold amounts sufficient to pay premium from Consultant payments. In the alternative, City may cancel this Agreement.

(C) The City may require the Consultant to provide complete copies of all insurance policies in effect for the duration of the Project.

(D) Neither the City nor any of its officials, officers, employees, agents or volunteers shall be personally responsible for any liability arising under or by virtue of this Agreement.

(E) The limits set forth herein shall apply separately to each insured against whom claims are made or suits are brought, except with respect to the limits of liability. Further the limits set forth herein shall not be construed to relieve the Consultant from liability in excess of such coverage, nor shall it limit the Consultant's indemnification obligations to the City and shall not preclude the City from taking such other actions available to the City under other provisions of the Agreement or law.

(F) Consultant shall report to the City, in addition to Consultant's insurer, any and all insurance claims submitted by Consultant in connection with the Services under this Agreement.

3.3.11.12 Insurance for Subconsultants. Consultant shall include all subconsultants engaged in any work for Consultant relating to this Agreement as additional insureds under the Consultant's policies, or the Consultant shall be responsible for causing subconsultants to purchase the appropriate insurance in compliance with the terms of these Insurance Requirements, including adding the City, its officials, officers, employees, agents, and volunteers as additional insureds to the subconsultant's policies. All policies of Commercial General Liability insurance provided by Consultant's subconsultants performing work relating to this Agreement shall be endorsed to name the City, its officials, officers, employees, agents and volunteers as additional insureds using endorsement form ISO CG 20 38 04 13 or an endorsement providing equivalent coverage. Consultant shall not allow any subconsultant to commence work on any subcontract relating to this Agreement until it has received satisfactory evidence of subconsultant's compliance with all insurance requirements under this Agreement, to the extent applicable. The Consultant shall provide satisfactory evidence of compliance with this section upon request of the City.

3.4 Labor Code Requirements.

3.4.1 Prevailing Wages. Consultant is aware of the requirements of California Labor Code Section 1720, et seq., and 1770, et seq., as well as California Code of Regulations, Title 8, Section 16000, et seq., ("Prevailing Wage Laws"), which require the payment of prevailing wage rates and the performance of other requirements on "public works" and "maintenance" projects. If the Services are being performed as part of an applicable "public works" or

"maintenance" project, as defined by the Prevailing Wage Laws, and if the total compensation is $1,000 or more, Consultant agrees to fully comply with such Prevailing Wage Laws. City shall provide Consultant with a copy of the prevailing rates of per diem wages in effect at the commencement of this Agreement. Consultant shall make copies of the prevailing rates of per diem wages for each craft, classification or type of worker needed to execute the Services available to interested parties upon request, and shall post copies at the Consultant's principal place of business and at the project site. It is the intent of the parties to effectuate the requirements of sections 1771, 1774, 1775, 1776, 1777.5, 1813, and 1815 of the Labor Code within this Agreement, and Consultant shall therefore comply with such Labor Code sections to the fullest extent required by law. Consultant shall defend, indemnify and hold the City, its officials, officers, employees, agents, and volunteers free and harmless from any claim or liability arising out of any failure or alleged failure to comply with the Prevailing Wage Laws.

3.4.2 Registration/DIR Compliance. If the Services are being performed on a public works project of over $25,000 when the project is for construction, alteration, demolition, installation, or repair work, or a public works project of over $15,000 when the project is for maintenance work, in addition to the foregoing, then pursuant to Labor Code sections 1725.5 and 1771.1, the Consultant and all subconsultants must be registered with the Department of Industrial Relations ("DIR"). Consultant shall maintain registration for the duration of the Project and require the same of any subconsultants.

3.4.3 Compliance Monitoring. This Project may also be subject to compliance monitoring and enforcement by the DIR. It shall be Consultant's sole responsibility to comply with all applicable registration and labor compliance requirements, including the submission of payroll records directly to the DIR. Any stop orders issued by the DIR against Consultant or any subconsultant that affect Consultant's performance of services, including any delay, shall be Consultant's sole responsibility. Any delay arising out of or resulting from such stop orders shall be considered Consultant caused delay and shall not be compensable by the City. Consultant shall defend, indemnify and hold the City, its officials, officers, employees and agents free and harmless from any claim or liability arising out of stop orders issued by the DIR against Consultant or any subconsultant.

3.4.4 Labor Certification. By its signature hereunder, Consultant certifies that it is aware of the provisions of Section 3700 of the California Labor Code which require every employer to be insured against liability for Worker's Compensation or to undertake self-insurance in accordance with the provisions of that Code, and agrees to comply with such provisions before commencing the performance of the Services.

3.5 Termination of Agreement.

3.5.1.1 Grounds for Termination. City may, by written notice to Consultant, terminate the whole or any part of this Agreement at any time and without cause by giving written notice to Consultant of such termination, and specifying the effective date thereof, at least seven (7) days before the effective date of such termination. Upon termination, Consultant shall be compensated only for those Services which have been adequately rendered to City, and Consultant shall be entitled to no further compensation. Consultant may not terminate this Agreement except for cause. The rights and remedies of the City provided in this section shall not be exclusive and are in addition to any other rights and remedies provided by law, equity or under this Agreement.

3.5.1.2 Effect of Termination. If this Agreement is terminated as provided herein, City may require Consultant to provide all finished or unfinished Documents and Data and other information of any kind prepared by Consultant in connection with the performance of Services under this Agreement. Consultant shall be required to provide such document and other information within fifteen (15) days of the request.

3.5.1.3 Additional Services. In the event this Agreement is terminated in whole or in part as provided herein, City may procure, upon such terms and in such manner as it may determine appropriate, services similar to those terminated.

3.6 Indemnification.

3.6.1 To the fullest extent permitted by law, Consultant shall defend (with counsel of City's choosing), indemnify and hold the City, its officials, officers, employees, volunteers, and agents free and harmless from any and all claims, demands, causes of action, costs, expenses, liability, loss, damage or injury of any kind, in law or equity, to property or persons, including wrongful death, in any manner arising out of, pertaining to, or incident to any acts, errors or omissions, or willful misconduct of Consultant, its officials, officers, employees, subcontractors, consultants or agents in connection with the performance of the Consultant's Services, the Project or this Agreement, including without limitation the payment of all damages, expert witness fees and attorney's fees and other related costs and expenses except such loss or damage caused by the sole negligence or willful misconduct of the City. Consultant's obligation to indemnify shall survive expiration or termination of this Agreement and shall not be restricted to insurance proceeds, if any, received by Consultant, the City, its officials, officers, employees, agents, or volunteers.

3.6.2 If Consultant's obligation to defend, indemnify, and/or hold harmless arises out of Consultant's performance as a "design professional" (as that term is defined under Civil Code section 2782.8), then, and only to the extent required by Civil Code section 2782.8, which is fully incorporated herein, Consultant's indemnification obligation shall be limited to claims that arise out of, pertain to, or relate to the negligence, recklessness, or willful misconduct of the Consultant, and, upon Consultant obtaining a final adjudication by a court of competent jurisdiction, Consultant's liability for such claim, including the cost to defend, shall not exceed the Consultant's proportionate percentage of fault.

3.7 General Provisions.

3.7.1 Accounting Records. Consultant shall maintain complete and accurate records with respect to all costs and expenses incurred under this Agreement. All such records shall be clearly identifiable. Consultant shall allow a representative of City during normal business hours to examine, audit, and make transcripts or copies of such records and any other documents created pursuant to this Agreement. Consultant shall allow inspection of all work, data, documents, proceedings, and activities related to the Agreement for a period of three (3) years from the date of final payment under this Agreement.

3.7.2 Independent Contractors and Subcontracting.

3.7.2.1 Use of Consultants. Consultant is aware of statutory and case law regarding classification of workers as independent contractors, including California Labor Code Section 2750.3 and Dynamex Operations West, Inc. v. Superior Court, 4 Cal. 5th 903

(2018). To ensure that Consultant is in compliance with the California Labor Code, Consultant shall only utilize its employees to provide the Services. Consultant may not provide the services through any independent contractor, subcontractor or subconsultant ("Subcontractor(s)") unless approved by the City as set forth in Section 3.7.2.2 below. Consultant represents and warrants that all personnel who perform the Services on Consultant's behalf are Consultant's employees, and that Consultant complies with all applicable laws, rules and regulations governing its employees, including, but not limited to, the California Labor Code, Unemployment Insurance Code and all applicable Industrial Welfare Commission Wage Orders.

3.7.2.2 Prior Approval Required. Consultant shall not use any Subcontractor to provide the Services, or any portion of the work required by this Agreement, without prior written approval of City. In the event that City authorizes Consultant to use a Subcontractor, Consultant shall enter into a written agreement with the Subcontractor, which must include all provisions of the Agreement, including a restriction on the Subcontractor's use of further independent contractors, subcontractors or subconsultants without the City's prior written consent.

3.7.3 Delivery of Notices. All notices permitted or required under this Agreement shall be given to the respective parties at the following address, or at such other address as the respective parties may provide in writing for this purpose:

Consultant:	**Enterprise Solutions, Inc.** **5201 Great American Parkway, Suite 320** **Santa Clara, CA 95054** **ATTN: Sudesh Verma, Senior Proposal Manager**
City:	City of Ontario 303 East "B" Street Ontario, CA 91764 ATTN: **Angela Lopez, Executive Director Human Resources/Risk Management**

Such notice shall be deemed made when personally delivered or when mailed, forty-eight (48) hours after deposit in the U.S. Mail, first class postage prepaid and addressed to the party at its applicable address. Actual notice shall be deemed adequate notice on the date actual notice occurred, regardless of the method of service.

3.7.4 Ownership of Materials and Confidentiality.

3.7.4.1 Documents & Data; Licensing of Intellectual Property. This Agreement creates a non-exclusive and perpetual license for City to copy, use, modify, reuse, or sublicense any and all copyrights, designs, and other intellectual property embodied in plans, specifications, studies, drawings, estimates, and other documents or works of authorship fixed in any tangible medium of expression, including but not limited to, physical drawings or data magnetically or otherwise recorded on computer diskettes, which are prepared or caused to be prepared by Consultant under this Agreement ("Documents & Data"). All Documents & Data shall be and remain the property of City, and shall not be used in whole or in substantial part by Consultant on other projects without the City's express written permission. Within thirty (30) days following the completion, suspension, abandonment or termination of this Agreement, Consultant shall provide to City reproducible copies of all Documents & Data, in a form and amount required

by City. City reserves the right to select the method of document reproduction and to establish where the reproduction will be accomplished. The reproduction expense shall be borne by City at the actual cost of duplication. In the event of a dispute regarding the amount of compensation to which the Consultant is entitled under the termination provisions of this Agreement, Consultant shall provide all Documents & Data to City upon payment of the undisputed amount. Consultant shall have no right to retain or fail to provide to City any such documents pending resolution of the dispute. In addition, Consultant shall retain copies of all Documents & Data on file for a minimum of fifteen (15) years following completion of the Project, and shall make copies available to City upon the payment of actual reasonable duplication costs. Before destroying the Documents & Data following this retention period, Consultant shall make a reasonable effort to notify City and provide City with the opportunity to obtain the documents.

3.7.4.2 Subconsultants. Consultant shall require all subconsultants to agree in writing that City is granted a non-exclusive and perpetual license for any Documents & Data the subconsultant prepares under this Agreement. Consultant represents and warrants that Consultant has the legal right to license any and all Documents & Data. Consultant makes no such representation and warranty in regard to Documents & Data which were prepared by design professionals other than Consultant or its subconsultants, or those provided to Consultant by the City.

3.7.4.3 Right to Use. City shall not be limited in any way in its use or reuse of the Documents and Data or any part of them at any time for purposes of this Project or another project, provided that any such use not within the purposes intended by this Agreement or on a project other than this Project without employing the services of Consultant shall be at City's sole risk. If City uses or reuses the Documents & Data on any project other than this Project, it shall remove the Consultant's seal from the Documents & Data and indemnify and hold harmless Consultant and its officers, directors, agents and employees from claims arising out of the negligent use or re-use of the Documents & Data on such other project. Consultant shall be responsible and liable for its Documents & Data, pursuant to the terms of this Agreement, only with respect to the condition of the Documents & Data at the time they are provided to the City upon completion, suspension, abandonment or termination. Consultant shall not be responsible or liable for any revisions to the Documents & Data made by any party other than Consultant, a party for whom the Consultant is legally responsible or liable, or anyone approved by the Consultant.

3.7.4.4 Indemnification. Consultant shall defend, indemnify and hold the City, its directors, officials, officers, employees, volunteers and agents free and harmless, pursuant to the indemnification provisions of this Agreement, for any alleged infringement of any patent, copyright, trade secret, trade name, trademark, or any other proprietary right of any person or entity in consequence of the use on the Project by City of the Documents & Data, including any method, process, product, or concept specified or depicted.

3.7.4.5 Confidentiality. All ideas, memoranda, specifications, plans, procedures, drawings, descriptions, computer program data, input record data, written information, and other Documents & Data either created by or provided to Consultant in connection with the performance of this Agreement shall be held confidential by Consultant. Such materials shall not, without the prior written consent of City, be used by Consultant for any purposes other than the performance of the Services. Nor shall such materials be disclosed to any person or entity not connected with the performance of the Services or the Project. Nothing furnished to Consultant which is otherwise known to Consultant or is generally known, or has

become known, to the related industry shall be deemed confidential. Consultant shall not use City's name or insignia, photographs of the Project, or any publicity pertaining to the Services or the Project in any magazine, trade paper, newspaper, television or radio production or other similar medium without the prior written consent of City.

3.7.4.6 Confidential Information. The City shall refrain from releasing Consultant's proprietary information ("Proprietary Information") unless the City's legal counsel determines that the release of the Proprietary Information is required by the California Public Records Act or other applicable state or federal law, or order of a court of competent jurisdiction, in which case the City shall notify Consultant of its intention to release Proprietary Information. Consultant shall have five (5) working days after receipt of the release notice to give City written notice of Consultant's objection to the City's release of Proprietary Information. Consultant shall indemnify, defend and hold harmless the City, and its officers, directors, employees, and agents from and against all liability, loss, cost or expense (including attorney's fees) arising out of a legal action brought to compel the release of Proprietary Information. City shall not release the Proprietary Information after receipt of an objection notice unless either: (1) Consultant fails to fully indemnify, defend (with City's choice of legal counsel), and hold City harmless from any legal action brought to compel such release; and/or (2) a final and non-appealable order by a court of competent jurisdiction requires that City release such information.

3.7.5 Cooperation; Further Acts. The Parties shall fully cooperate with one another, and shall take any additional acts or sign any additional documents as may be necessary, appropriate or convenient to attain the purposes of this Agreement.

3.7.6 Entire Agreement. This Agreement contains the entire agreement of the Parties with respect to the subject matter hereof, and supersedes all prior negotiations, understandings or agreements.

3.7.7 Attorneys' Fees. If either party commences an action against the other party, either legal, administrative or otherwise, arising out of or in connection with this Agreement, the prevailing party in such litigation shall be entitled to have and recover from the losing party reasonable attorneys' fees and all costs of such action.

3.7.8 Governing Law. This Agreement shall be governed by the laws of the State of California. Venue shall be in San Bernardino County. In addition to any and all contract requirements pertaining to notices of and requests for compensation or payment for extra work, disputed work, claims and/or changed conditions, Consultant must comply with the claim procedures set forth in Government Code sections 900 et seq. prior to filing any lawsuit against the City. Such Government Code claims and any subsequent lawsuit based upon the Government Code claims shall be limited to those matters that remain unresolved after all procedures pertaining to extra work, disputed work, claims, and/or changed conditions have been followed by Consultant. If no such Government Code claim is submitted, or if any prerequisite contractual requirements are not otherwise satisfied as specified herein, Consultant shall be barred from bringing and maintaining a valid lawsuit against the City.

3.7.9 Time of Essence. Time is of the essence for each and every provision of this Agreement.

3.7.10 City's Right to Employ Other Consultants. City reserves right to employ other consultants in connection with this Project.

3.7.11 Successors and Assigns. This Agreement shall be binding on the successors and assigns of the parties.

3.7.12 Assignment or Transfer. Consultant shall not assign, sublet, or transfer this Agreement or any rights under or interest in this Agreement without the written consent of the City, which may be withheld for any reason. Any attempt to so assign or so transfer without such consent shall be void and without legal effect and shall constitute grounds for termination. Consultant shall not subcontract any portion of the Services required by this Agreement, except as expressly stated herein, without prior written approval of City. Subcontracts, if any, shall contain a provision making them subject to all provisions stipulated in this Agreement.

3.7.13 Construction; References; Captions. Since the Parties or their agents have participated fully in the preparation of this Agreement, the language of this Agreement shall be construed simply, according to its fair meaning, and not strictly for or against any Party. Any term referencing time, days or period for performance shall be deemed calendar days and not work days. All references to Consultant include all personnel, employees, agents, and subconsultants of Consultant, except as otherwise specified in this Agreement. All references to City include its elected officials, officers, employees, agents, and volunteers except as otherwise specified in this Agreement. The captions of the various articles and paragraphs are for convenience and ease of reference only, and do not define, limit, augment, or describe the scope, content, or intent of this Agreement.

3.7.14 Amendment; Modification. No supplement, modification, or amendment of this Agreement shall be binding unless executed in writing and signed by both Parties.

3.7.15 Waiver. No waiver of any default shall constitute a waiver of any other default or breach, whether of the same or other covenant or condition. No waiver, benefit, privilege, or service voluntarily given or performed by a Party shall give the other Party any contractual rights by custom, estoppel, or otherwise.

3.7.16 No Third-Party Beneficiaries. There are no intended third party beneficiaries of any right or obligation assumed by the Parties.

3.7.17 Invalidity; Severability. If any portion of this Agreement is declared invalid, illegal, or otherwise unenforceable by a court of competent jurisdiction, the remaining provisions shall continue in full force and effect.

3.7.18 Prohibited Interests. Consultant maintains and warrants that it has not employed nor retained any company or person, other than a bona fide employee working solely for Consultant, to solicit or secure this Agreement. Consultant warrants that it has not paid nor has it agreed to pay any company or person, other than a bona fide employee working solely for Consultant, any fee, commission, percentage, brokerage fee, gift or other consideration contingent upon or resulting from the award or making of this Agreement. Consultant further agrees to file, or shall cause its employees or subconsultants to file, a Statement of Economic Interest with the City's Filing Officer as required under state law in the performance of the Services. For breach or violation of this warranty, City shall have the right to rescind this Agreement without liability. For the term of this Agreement, no member, officer or employee of City, during the term of his or her service with City, shall have any direct interest in this Agreement, or obtain any present or anticipated material benefit arising therefrom.

3.7.19 Authority to Enter Agreement. Consultant has all requisite power and authority to conduct its business and to execute, deliver, and perform the Agreement. Each Party warrants that the individuals who have signed this Agreement have the legal power, right, and authority to make this Agreement and bind each respective Party.

3.7.20 Counterparts. This Agreement may be signed in counterparts, each of which shall constitute an original.

3.7.21 Survival. All rights and obligations hereunder that by their nature are to continue after any expiration or termination of this Agreement, including, but not limited to, the indemnification obligations, shall survive any such expiration or termination.

CITY OF ONTARIO
PROFESSIONAL SERVICES AGREEMENT

1. PARTIES AND DATE.

This Agreement is made and entered as of _____, by and between the City of Ontario, a municipal corporation organized under the laws of the State of California with its principal place of business at 303 East "B" Street, Ontario, California 91764-4196, County of San Bernardino, State of California ("City") and **Resource Logistics, Inc**., a Corporation, with its principal place of business at **39 Milltown Road, East Brunswick, NJ 08816** are sometimes individually referred to herein as "Party" and collectively as "Parties."

2. RECITALS.

2.1 Consultant.

Consultant desires to perform and assume responsibility for the provision of certain professional services required by the City on the terms and conditions set forth in this Agreement. Consultant represents that it is experienced in providing temporary staffing services to public clients, is licensed in the State of California, and is familiar with the plans of City.

2.2 Project.

City desires to engage Consultant to render such professional services for **temporary staffing services for the City on an as-needed basis** ("Project") as set forth in this Agreement.

3. TERMS.

3.1 Scope of Services and Term.

3.1.1 General Scope of Services. Consultant promises and agrees to furnish to the City all labor, materials, tools, equipment, services, and incidental and customary work necessary to fully and adequately supply the professional temporary staffing consulting services necessary for the Project ("Services"). The Services are more particularly described in Exhibit "A" attached hereto and incorporated herein by reference. All Services shall be subject to, and performed in accordance with, this Agreement, the exhibits attached hereto and incorporated herein by reference, and all applicable local, state and federal laws, rules and regulations.

3.1.2 Term. The term of this Agreement shall be from **November 21, 2023** to **November 21, 2026**, unless earlier terminated as provided herein. The City shall have the unilateral option, at its sole discretion, to renew this Agreement automatically for no more than two (2) additional one-year terms, unless earlier terminated as provided herein. Consultant shall complete the Services within the term of this Agreement and shall meet any other established schedules and deadlines. The Parties may, by mutual, written consent, extend the term of this Agreement if necessary to complete the Services.

3.2 Compensation.

3.2.1 Compensation. Consultant shall receive compensation, including authorized reimbursements, for all Services rendered under this Agreement at the rates set forth in Exhibit "C" attached hereto and incorporated herein by reference. The total compensation shall not exceed **Seven Hundred Thousand Dollars and Zero Cents** (**$700,000**) without written approval of the City Council or City Manager, as applicable. Extra Work may be authorized, as described below, and if authorized, will be compensated at the rates and manner set forth in this Agreement.

3.2.2 Payment of Compensation. Consultant shall submit to City a monthly invoice which indicates work completed and hours of Services rendered by Consultant. The invoice shall describe the amount of Services provided since the initial commencement date, or since the start of the subsequent billing periods, as appropriate, through the date of the invoice. City shall, within 30 days of receiving such invoice, review the invoice and pay all non-disputed and approved charges. If the City disputes any of Consultant's fees, the City shall give written notice to Consultant within thirty (30) days of receipt of an invoice of any disputed fees set forth therein. Payment shall not constitute acceptance of any Services completed by Consultant. The making of final payment shall not constitute a waiver of any claims by the City for any reason whatsoever.

3.2.3 Reimbursement for Expenses. Consultant shall not be reimbursed for any expenses unless authorized in writing by City, or included in Exhibit "C" of this Agreement.

3.2.4 Extra Work. At any time during the term of this Agreement, City may request that Consultant perform Extra Work. As used herein, "Extra Work" means any work which is determined by City to be necessary for the proper completion of the Project, but which the Parties did not reasonably anticipate would be necessary at the execution of this Agreement. Consultant shall not perform, nor be compensated for, Extra Work without written authorization from the City.

3.3 Responsibilities of Consultant.

3.3.1 Independent Contractor; Control and Payment of Subordinates. The Services shall be performed by Consultant or under its supervision. Consultant will determine the means, methods and details of performing the Services subject to the requirements of this Agreement. City retains Consultant on an independent contractor basis and not as an employee. Any personnel performing the Services on behalf of Consultant shall not be employees of City and shall at all times be under Consultant's exclusive direction and control. Neither City, or any of its officials, officers, directors, employees or agents shall have control over the conduct of Consultant or any of Consultants officers, employees or agents, except as set forth in this Agreement. Consultant shall pay all wages, salaries, and other amounts due such personnel in

connection with their performance of Services under this Agreement and as required by law. Consultant shall be responsible for all reports and obligations respecting such additional personnel, including, but not limited to: social security taxes, income tax withholding, unemployment insurance, disability insurance, and workers' compensation insurance.

3.3.2 Schedule of Services. Consultant shall perform the Services in a prompt and timely manner and in accordance with the Schedule of Services set forth in Exhibit "B" attached hereto and incorporated herein by reference. Consultant represents that it has the professional and technical personnel required to perform the Services expeditiously. Upon request of City, Consultant shall provide a more detailed schedule of anticipated performance to meet the Schedule of Services.

3.3.3 Conformance to Applicable Requirements. All work prepared by Consultant shall be subject to the approval of City.

3.3.4 Substitution of Key Personnel. Consultant has represented to City that certain key personnel will perform and coordinate the Services under this Agreement. Should one or more of such personnel become unavailable, Consultant may substitute other personnel of at least equal competence upon written approval of City. In the event that City and Consultant cannot agree as to the substitution of key personnel, City shall be entitled to terminate this Agreement for cause. The key personnel for performance of this Agreement are as follows: **Deepak Arora, COO/Director.**

3.3.5 City's Representative. The City hereby designates **Angela Lopez, Executive Director Human Resources/Risk Management**, or his/her designee, to act as its representative in all matters pertaining to the administration and performance of this Agreement ("City's Representative"). City's Representative shall have the power to act on behalf of the City for review and approval of all products submitted by Consultant but not the authority to enlarge the Scope of Services or change the total compensation due to Consultant under this Agreement. The City Manager shall be authorized to act on City's behalf and to execute all necessary documents which enlarge the Scope of Services or change the Consultant's total compensation subject to the provisions contained in this Agreement. Consultant shall not accept direction or orders from any person other than the City Manager, City's Representative or his/her designee.

3.3.6 Consultant's Representative. Consultant hereby designates **Deepak Arora, COO/Director**, or his/her designee, to act as its representative for the performance of this Agreement ("Consultant's Representative"). Consultant's Representative shall have full authority to represent and act on behalf of the Consultant for all purposes under this Agreement. The Consultant's Representative shall supervise and direct the Services, using his/her best skill and attention, and shall be responsible for all means, methods, techniques, sequences, and procedures and for the satisfactory coordination of all portions of the Services under this Agreement.

3.3.7 Coordination of Services. Consultant agrees to work closely with City staff in the performance of Services and shall be available to City's staff, consultants and other staff at all reasonable times.

3.3.8 Standard of Care; Performance of Employees. Consultant shall perform all Services under this Agreement in a skillful and competent manner, consistent with the standards generally recognized as being employed by professionals in the same discipline in the State of

California. Consultant represents and maintains that it is skilled in the professional calling necessary to perform the Services. Consultant warrants that all employees and subconsultants shall have sufficient skill and experience to perform the Services assigned to them. Consultant represents that it, its employees and subconsultants have all licenses, permits, qualifications and approvals of whatever nature that are legally required to perform the Services, and that such licenses and approvals shall be maintained throughout the term of this Agreement. Consultant shall perform, at its own cost and expense and without reimbursement from the City, any services necessary to correct errors or omissions which are caused by the Consultant's failure to comply with the standard of care provided for herein. Any employee of the Consultant or its subconsultants who is determined by the City to be uncooperative, incompetent, a threat to the adequate or timely completion of the Project, a threat to the safety of persons or property, or any employee who fails or refuses to perform the Services in a manner acceptable to the City, shall be promptly removed from the Project by the Consultant and shall not be re-employed to perform any of the Services or to work on the Project.

3.3.9 Period of Performance.

3.3.9.1 Consultant shall perform and complete all Services under this Agreement within the term set forth in Section 3.1.2 above ("Performance Time"). Consultant shall also perform the Services in strict accordance with any completion schedule or Project milestones described in Exhibits "A" or "B" attached hereto, or which may be separately agreed upon in writing by the City and Consultant ("Performance Milestones"). Consultant agrees that if the Services are not completed within the aforementioned Performance Time and/or pursuant to any such Performance Milestones developed pursuant to provisions of this Agreement, it is understood, acknowledged and agreed that the City will suffer damage.

3.3.9.2 Neither City nor Consultant shall be considered in default of this Agreement for delays in performance caused by circumstances beyond the reasonable control of the non-performing Party. For purposes of this Agreement, such circumstances include a Force Majeure Event. A Force Majeure Event shall mean an event that materially affects a Party's performance and is one or more of the following: (1) Acts of God or other natural disasters; (2) terrorism or other acts of a public enemy; (3) orders of governmental authorities (including, without limitation, unreasonable and unforeseeable delay in the issuance of permits or approvals by governmental authorities that are required for the services); (4) strikes and other organized labor action occurring at the site and the effects thereof on the services, only to the extent such strikes and other organized labor action are beyond the control of Consultant and its subcontractors, and to the extent the effects thereof cannot be avoided by use of replacement workers; and (5) pandemics, epidemics or quarantine restrictions. For purposes of this section, "orders of governmental authorities," includes ordinances, emergency proclamations and orders, rules to protect the public health, welfare and safety, and other actions of a public agency applicable to the services and Agreement.

3.3.9.3 Should a Force Majeure Event occur, the non-performing Party shall, within a reasonable time of being prevented from performing, give written notice to the other Party describing the circumstances preventing continued performance and the efforts being made to resume performance of this Agreement. Force Majeure Events and/or delays, regardless of the Party responsible for the delay, shall not entitle Consultant to any additional compensation. Notwithstanding the foregoing in this section, the City may still terminate this Agreement in accordance with the termination provisions of this Agreement.

3.3.10 Laws and Regulations; Employee/Labor Certification.

3.3.10.1 Compliance with Laws. Consultant shall keep itself fully informed of and in compliance with all local, state and federal laws, rules and regulations in any manner affecting the performance of the Project or the Services, including all Cal/OSHA requirements, and shall give all notices required by law. Consultant shall be liable for all violations of such laws and regulations in connection with the Services and this Agreement. All violations of such laws and regulations shall be grounds for the City to terminate the Agreement for cause.

3.3.10.2 Employment Eligibility; Consultant. Consultant certifies that it fully complies with all requirements and restrictions of state and federal law respecting the employment of undocumented aliens, including, but not limited to, the Immigration Reform and Control Act of 1986, as may be amended from time to time and shall require all subconsultants and sub-subconsultants to comply with the same. Consultant certifies that it has not committed a violation of any such law within the five (5) years immediately preceding the date of execution of this Agreement, and shall not violate any such law at any time during the term of the Agreement.

3.3.10.3 Equal Opportunity Employment. Consultant represents that it is an equal opportunity employer and it shall not discriminate against any subconsultant, employee or applicant for employment because of race, religion, color, national origin, handicap, ancestry, sex or age. Such non-discrimination shall include, but not be limited to, all activities related to initial employment, upgrading, demotion, transfer, recruitment or recruitment advertising, layoff or termination. Consultant shall also comply with all relevant provisions of City's Minority Business Enterprise program, Affirmative Action Plan or other related programs or guidelines currently in effect or hereinafter enacted.

3.3.10.4 Air Quality. To the extent applicable, Consultant must fully comply with all applicable laws, rules and regulations in furnishing or using equipment and/or providing services, including, but not limited to, emissions limits and permitting requirements imposed by the South Coast Air Quality Management District (SCAQMD) and/or California Air Resources Board (CARB). Consultant shall indemnify City against any fines or penalties imposed by SCAQMD, CARB, or any other governmental or regulatory agency for violations of applicable laws, rules and/or regulations by Consultant, its subconsultants, or others for whom Consultant is responsible under its indemnity obligations provided for in this Agreement.

3.3.10.5 Water Quality Management and Compliance. Consultant shall keep itself and all subcontractors, staff, and employees fully informed of and in compliance with all local, state and federal laws, rules and regulations that may impact, or be implicated by the performance of the Services including, without limitation, all applicable provisions of the City's ordinances regulating water quality and storm water; the Federal Water Pollution Control Act (33 U.S.C. § 1251, *et seq.*); the California Porter-Cologne Water Quality Control Act (Water Code § 13000 *et seq*.); and any and all regulations, policies, or permits issued pursuant to any such authority. Consultant must additionally comply with the lawful requirements of the City, and any other municipality, drainage district, or other local agency with jurisdiction over the location where the Services are to be conducted, regulating water quality and storm water discharges. City may seek damages from Consultant for delay in completing the Services caused by Consultant's failure to comply with the laws, regulations and policies described in this Section, or any other relevant water quality law, regulation, or policy.

3.3.10.6 Safety. Consultant shall execute and maintain its work so as to avoid injury or damage to any person or property. In carrying out its Services, the Consultant shall at all times be in compliance with all applicable local, state and federal laws, rules and regulations, and shall exercise all necessary precautions for the safety of employees appropriate to the nature of the work and the conditions under which the work is to be performed.

3.3.11 Insurance.

3.3.11.1 Time for Compliance. Consultant shall not commence work under this Agreement until it has provided evidence satisfactory to the City that it has secured all insurance required under this section. In addition, Consultant shall not allow any subconsultant to commence work on any subcontract until it has provided evidence satisfactory to the City that the subconsultant has secured all insurance required under this section. Failure to provide and maintain all required insurance shall be grounds for the City to terminate this Agreement for cause.

3.3.11.2 Types of Insurance Required. As a condition precedent to the effectiveness of this Agreement for work to be performed hereunder, and without limiting the indemnity provisions of the Agreement, the Consultant, in partial performance of its obligations under such Agreement, shall procure and maintain in full force and effect during the term of the Agreement the following policies of insurance. If the existing policies do not meet the insurance requirements set forth herein, Consultant agrees to amend, supplement or endorse the policies to do so.

(A) Commercial General Liability: Commercial General Liability Insurance which affords coverage at least as broad as Insurance Services Office "occurrence" form CG 00 01, or the exact equivalent, with limits of not less than $2,000,000 per occurrence and no less than $4,000,000 in the general aggregate. Defense costs shall be paid in addition to the limits. The policy shall contain no endorsements or provisions (1) limiting coverage for contractual liability; (2) excluding coverage for claims or suits by one insured against another (cross-liability); (3) products/completed operations liability; or (4) containing any other exclusion(s) contrary to the terms or purposes of this Agreement.

(B) Automobile Liability Insurance: Automobile Liability Insurance with coverage at least as broad as Insurance Services Office Form CA 00 01 covering "Any Auto" (Symbol 1), or the exact equivalent, covering bodily injury and property damage for all activities with limits of not less than $2,000,000 combined limit for each occurrence.

(C) Workers' Compensation: Workers' Compensation Insurance, as required by the State of California and Employer's Liability Insurance with a limit of not less than $1,000,000 per accident for bodily injury and disease.

(D) Professional Liability (Errors & Omissions): Professional Liability insurance or Errors & Omissions insurance appropriate to Consultant’s profession with limits of not less than $2,000,000. Covered professional services shall specifically include all work to be performed under the Agreement and delete any exclusions that may potentially affect the work to be performed (for example, any exclusions relating to lead, asbestos, pollution, testing, underground storage tanks, laboratory analysis, soil work, etc.). If coverage is written on a claims-made basis, the retroactive date shall precede the effective date of the initial Agreement and continuous coverage will be maintained or an extended reporting period will be exercised for a period of at least five (5) years from termination or expiration of this Agreement.

3.3.11.3 Insurance Endorsements. Required insurance policies shall contain the following provisions, or Consultant shall provide endorsements on forms approved by the City to add the following provisions to the insurance policies:

(A) Commercial General Liability: (1) Additional Insured: The City, its officials, officers, employees, agents, and volunteers shall be additional insureds with regard to liability and defense of suits or claims arising out of the performance of the Agreement. Additional Insured Endorsements shall not (1) be restricted to "ongoing operations"; (2) exclude "contractual liability"; (3) restrict coverage to "sole" liability of Consultant; or (4) contain any other exclusions contrary to the terms or purposes of this Agreement. For all policies of Commercial General Liability insurance, Consultant shall provide endorsements in the form of ISO CG 20 10 10 01 and 20 37 10 01 (or endorsements providing the exact same coverage) to effectuate this requirement. (2) Cancellation: Required insurance policies shall not be canceled or the coverage reduced until a thirty (30) day written notice of cancellation has been served upon the City except ten (10) days shall be allowed for non-payment of premium.

(B) Automobile Liability: (1) Additional Insured: The City, its directors, officials, officers, employees, agents, and volunteers shall be covered as additional insureds with respect to the ownership, operation, maintenance, use, loading or unloading of any auto owned, leased, hired or borrowed by the Vendor or for which the Vendor is responsible. (2) Cancellation: Required insurance policies shall not be canceled or the coverage reduced until a thirty (30) day written notice of cancellation has been served upon the City except ten (10) days shall be allowed for non-payment of premium.

(C) Professional Liability (Errors & Omissions): 1) Cancellation: Required insurance policies shall not be canceled or the coverage reduced until a thirty (30) day written notice of cancellation has been served upon the City except ten (10) days shall be allowed for non-payment of premium. (2) This insurance shall be written on a policy form coverage specifically designed to protect against acts, errors or omissions of the Consultant. “Covered Professional Services” as designated in the policy must specifically include work performed under this Agreement. The policy must “pay on behalf of” the insured and include a provision establishing the insurer’s duty to defend.

(D) Workers' Compensation: (1) Cancellation: Required insurance policies shall not be canceled or the coverage reduced until a thirty (30) day written notice of cancellation has been served upon the City except ten (10) days shall be allowed for non-payment of premium. (2) Waiver of Subrogation: A waiver of subrogation stating that the insurer waives all rights of subrogation against the City, its officials, officers, employees, agents, and volunteers.

3.3.11.4 Primary and Non-Contributing Insurance. All policies of Commercial General Liability and Automobile Liability insurance shall be primary and any other insurance, deductible, or self-insurance maintained by the City, its officials, officers, employees, agents, or volunteers shall not contribute with this primary insurance. Policies shall contain or be endorsed to contain such provisions.

3.3.11.5 Waiver of Subrogation. All required insurance coverages, except for the professional liability coverage, shall contain or be endorsed to waiver of subrogation in favor of the City, its officials, officers, employees, agents, and volunteers or shall specifically allow Consultant or others providing insurance evidence in compliance with these specifications

to waive their right of recovery prior to a loss. Consultant hereby waives its own right of recovery against City, and shall require similar written express waivers and insurance clauses from each of its subconsultants.

3.3.11.6 Deductibles and Self-Insured Retentions. Any deductible or self-insured retention must be approved in writing by the City and shall protect the City, its officials, officers, employees, agents, and volunteers in the same manner and to the same extent as they would have been protected had the policy or policies not contained a deductible or self-insured retention.

3.3.11.7 Evidence of Insurance. The Consultant, concurrently with the execution of the Agreement, and as a condition precedent to the effectiveness thereof, shall deliver either certified copies of the required policies, or original certificates on forms approved by the City, together with all endorsements affecting each policy. Required insurance policies shall not be in compliance if they include any limiting provision or endorsement that has not been submitted to the City for approval. The certificates and endorsements for each insurance policy shall be signed by a person authorized by that insurer to bind coverage on its behalf. At least fifteen (15 days) prior to the expiration of any such policy, evidence of insurance showing that such insurance coverage has been renewed or extended shall be filed with the City. If such coverage is cancelled or reduced and not replaced immediately so as to avoid a lapse in the required coverage, Consultant shall, within ten (10) days after receipt of written notice of such cancellation or reduction of coverage, file with the City evidence of insurance showing that the required insurance has been reinstated or has been provided through another insurance company or companies.

3.3.11.8 Acceptability of Insurers. Each such policy shall be from a company or companies with a current A.M. Best's rating of no less than A:VII and authorized to transact business of insurance in the State of California, or otherwise allowed to place insurance through surplus line brokers under applicable provisions of the California Insurance Code or any federal law.

3.3.11.9 Enforcement of Agreement Provisions (non estoppel). Consultant acknowledges and agrees that actual or alleged failure on the part of the City to inform Consultant of non-compliance with any requirement imposes no additional obligation on the City nor does it waive any rights hereunder.

3.3.11.10 Requirements Not Limiting. Requirement of specific coverage or minimum limits contained in this Section are not intended as a limitation on coverage, limits, or other requirement, or a waiver of any coverage normally provided by any insurance.

3.3.11.11 Additional Insurance Provisions

(A) The foregoing requirements as to the types and limits of insurance coverage to be maintained by Consultant, and any approval of said insurance by the City, is not intended to and shall not in any manner limit or qualify the liabilities and obligations otherwise assumed by the Consultant pursuant to this Agreement, including but not limited to, the provisions concerning indemnification.

(B) If at any time during the life of the Agreement, any policy of insurance required under this Agreement does not comply with these specifications or is canceled

and not replaced, City has the right but not the duty to obtain the insurance it deems necessary and any premium paid by City will be promptly reimbursed by Consultant or City will withhold amounts sufficient to pay premium from Consultant payments. In the alternative, City may cancel this Agreement.

(C) The City may require the Consultant to provide complete copies of all insurance policies in effect for the duration of the Project.

(D) Neither the City nor any of its officials, officers, employees, agents or volunteers shall be personally responsible for any liability arising under or by virtue of this Agreement.

(E) The limits set forth herein shall apply separately to each insured against whom claims are made or suits are brought, except with respect to the limits of liability. Further the limits set forth herein shall not be construed to relieve the Consultant from liability in excess of such coverage, nor shall it limit the Consultant's indemnification obligations to the City and shall not preclude the City from taking such other actions available to the City under other provisions of the Agreement or law.

(F) Consultant shall report to the City, in addition to Consultant's insurer, any and all insurance claims submitted by Consultant in connection with the Services under this Agreement.

3.3.11.12 Insurance for Subconsultants. Consultant shall include all subconsultants engaged in any work for Consultant relating to this Agreement as additional insureds under the Consultant's policies, or the Consultant shall be responsible for causing subconsultants to purchase the appropriate insurance in compliance with the terms of these Insurance Requirements, including adding the City, its officials, officers, employees, agents, and volunteers as additional insureds to the subconsultant's policies. All policies of Commercial General Liability insurance provided by Consultant's subconsultants performing work relating to this Agreement shall be endorsed to name the City, its officials, officers, employees, agents and volunteers as additional insureds using endorsement form ISO CG 20 38 04 13 or an endorsement providing equivalent coverage. Consultant shall not allow any subconsultant to commence work on any subcontract relating to this Agreement until it has received satisfactory evidence of subconsultant's compliance with all insurance requirements under this Agreement, to the extent applicable. The Consultant shall provide satisfactory evidence of compliance with this section upon request of the City.

3.4 Labor Code Requirements.

3.4.1 Prevailing Wages. Consultant is aware of the requirements of California Labor Code Section 1720, et seq., and 1770, et seq., as well as California Code of Regulations, Title 8, Section 16000, et seq., ("Prevailing Wage Laws"), which require the payment of prevailing wage rates and the performance of other requirements on "public works" and "maintenance" projects. If the Services are being performed as part of an applicable "public works" or "maintenance" project, as defined by the Prevailing Wage Laws, and if the total compensation is $1,000 or more, Consultant agrees to fully comply with such Prevailing Wage Laws. City shall provide Consultant with a copy of the prevailing rates of per diem wages in effect at the commencement of this Agreement. Consultant shall make copies of the prevailing rates of per diem wages for each craft, classification or type of worker needed to execute the Services

available to interested parties upon request, and shall post copies at the Consultant's principal place of business and at the project site. It is the intent of the parties to effectuate the requirements of sections 1771, 1774, 1775, 1776, 1777.5, 1813, and 1815 of the Labor Code within this Agreement, and Consultant shall therefore comply with such Labor Code sections to the fullest extent required by law. Consultant shall defend, indemnify and hold the City, its officials, officers, employees, agents, and volunteers free and harmless from any claim or liability arising out of any failure or alleged failure to comply with the Prevailing Wage Laws.

3.4.2 Registration/DIR Compliance. If the Services are being performed on a public works project of over $25,000 when the project is for construction, alteration, demolition, installation, or repair work, or a public works project of over $15,000 when the project is for maintenance work, in addition to the foregoing, then pursuant to Labor Code sections 1725.5 and 1771.1, the Consultant and all subconsultants must be registered with the Department of Industrial Relations ("DIR"). Consultant shall maintain registration for the duration of the Project and require the same of any subconsultants.

3.4.3 Compliance Monitoring. This Project may also be subject to compliance monitoring and enforcement by the DIR. It shall be Consultant's sole responsibility to comply with all applicable registration and labor compliance requirements, including the submission of payroll records directly to the DIR. Any stop orders issued by the DIR against Consultant or any subconsultant that affect Consultant's performance of services, including any delay, shall be Consultant's sole responsibility. Any delay arising out of or resulting from such stop orders shall be considered Consultant caused delay and shall not be compensable by the City. Consultant shall defend, indemnify and hold the City, its officials, officers, employees and agents free and harmless from any claim or liability arising out of stop orders issued by the DIR against Consultant or any subconsultant.

3.4.4 Labor Certification. By its signature hereunder, Consultant certifies that it is aware of the provisions of Section 3700 of the California Labor Code which require every employer to be insured against liability for Worker's Compensation or to undertake self-insurance in accordance with the provisions of that Code, and agrees to comply with such provisions before commencing the performance of the Services.

3.5 Termination of Agreement.

3.5.1.1 Grounds for Termination. City may, by written notice to Consultant, terminate the whole or any part of this Agreement at any time and without cause by giving written notice to Consultant of such termination, and specifying the effective date thereof, at least seven (7) days before the effective date of such termination. Upon termination, Consultant shall be compensated only for those Services which have been adequately rendered to City, and Consultant shall be entitled to no further compensation. Consultant may not terminate this Agreement except for cause. The rights and remedies of the City provided in this section shall not be exclusive and are in addition to any other rights and remedies provided by law, equity or under this Agreement.

3.5.1.2 Effect of Termination. If this Agreement is terminated as provided herein, City may require Consultant to provide all finished or unfinished Documents and Data and other information of any kind prepared by Consultant in connection with the performance of Services under this Agreement. Consultant shall be required to provide such document and other information within fifteen (15) days of the request.

3.5.1.3 Additional Services. In the event this Agreement is terminated in whole or in part as provided herein, City may procure, upon such terms and in such manner as it may determine appropriate, services similar to those terminated.

3.6 Indemnification.

3.6.1 To the fullest extent permitted by law, Consultant shall defend (with counsel of City's choosing), indemnify and hold the City, its officials, officers, employees, volunteers, and agents free and harmless from any and all claims, demands, causes of action, costs, expenses, liability, loss, damage or injury of any kind, in law or equity, to property or persons, including wrongful death, in any manner arising out of, pertaining to, or incident to any acts, errors or omissions, or willful misconduct of Consultant, its officials, officers, employees, subcontractors, consultants or agents in connection with the performance of the Consultant's Services, the Project or this Agreement, including without limitation the payment of all damages, expert witness fees and attorney's fees and other related costs and expenses except such loss or damage caused by the sole negligence or willful misconduct of the City. Consultant's obligation to indemnify shall survive expiration or termination of this Agreement and shall not be restricted to insurance proceeds, if any, received by Consultant, the City, its officials, officers, employees, agents, or volunteers.

3.6.2 If Consultant's obligation to defend, indemnify, and/or hold harmless arises out of Consultant's performance as a "design professional" (as that term is defined under Civil Code section 2782.8), then, and only to the extent required by Civil Code section 2782.8, which is fully incorporated herein, Consultant's indemnification obligation shall be limited to claims that arise out of, pertain to, or relate to the negligence, recklessness, or willful misconduct of the Consultant, and, upon Consultant obtaining a final adjudication by a court of competent jurisdiction, Consultant's liability for such claim, including the cost to defend, shall not exceed the Consultant's proportionate percentage of fault.

3.7 General Provisions.

3.7.1 Accounting Records. Consultant shall maintain complete and accurate records with respect to all costs and expenses incurred under this Agreement. All such records shall be clearly identifiable. Consultant shall allow a representative of City during normal business hours to examine, audit, and make transcripts or copies of such records and any other documents created pursuant to this Agreement. Consultant shall allow inspection of all work, data, documents, proceedings, and activities related to the Agreement for a period of three (3) years from the date of final payment under this Agreement.

3.7.2 Independent Contractors and Subcontracting.

3.7.2.1 Use of Consultants. Consultant is aware of statutory and case law regarding classification of workers as independent contractors, including California Labor Code Section 2750.3 and Dynamex Operations West, Inc. v. Superior Court, 4 Cal. 5th 903 (2018). To ensure that Consultant is in compliance with the California Labor Code, Consultant shall only utilize its employees to provide the Services. Consultant may not provide the services through any independent contractor, subcontractor or subconsultant ("Subcontractor(s)") unless approved by the City as set forth in Section 3.7.2.2 below. Consultant represents and warrants that all personnel who perform the Services on Consultant's behalf are Consultant's employees, and that Consultant complies with all applicable laws, rules and regulations governing its

employees, including, but not limited to, the California Labor Code, Unemployment Insurance Code and all applicable Industrial Welfare Commission Wage Orders.

3.7.2.2 Prior Approval Required. Consultant shall not use any Subcontractor to provide the Services, or any portion of the work required by this Agreement, without prior written approval of City. In the event that City authorizes Consultant to use a Subcontractor, Consultant shall enter into a written agreement with the Subcontractor, which must include all provisions of the Agreement, including a restriction on the Subcontractor's use of further independent contractors, subcontractors or subconsultants without the City's prior written consent.

3.7.3 Delivery of Notices. All notices permitted or required under this Agreement shall be given to the respective parties at the following address, or at such other address as the respective parties may provide in writing for this purpose:

Consultant: **Resource Logistics, Inc.**
39 Milltown Road
East Brunswick, NJ 08816
ATTN: Deepak Arora, COO/Director

City: City of Ontario
303 East "B" Street
Ontario, CA 91764
ATTN: **Angela Lopez, Executive Director Human Resources/Risk Management**

Such notice shall be deemed made when personally delivered or when mailed, forty-eight (48) hours after deposit in the U.S. Mail, first class postage prepaid and addressed to the party at its applicable address. Actual notice shall be deemed adequate notice on the date actual notice occurred, regardless of the method of service.

3.7.4 Ownership of Materials and Confidentiality.

3.7.4.1 Documents & Data; Licensing of Intellectual Property. This Agreement creates a non-exclusive and perpetual license for City to copy, use, modify, reuse, or sublicense any and all copyrights, designs, and other intellectual property embodied in plans, specifications, studies, drawings, estimates, and other documents or works of authorship fixed in any tangible medium of expression, including but not limited to, physical drawings or data magnetically or otherwise recorded on computer diskettes, which are prepared or caused to be prepared by Consultant under this Agreement ("Documents & Data"). All Documents & Data shall be and remain the property of City, and shall not be used in whole or in substantial part by Consultant on other projects without the City's express written permission. Within thirty (30) days following the completion, suspension, abandonment or termination of this Agreement, Consultant shall provide to City reproducible copies of all Documents & Data, in a form and amount required by City. City reserves the right to select the method of document reproduction and to establish where the reproduction will be accomplished. The reproduction expense shall be borne by City at the actual cost of duplication. In the event of a dispute regarding the amount of compensation to which the Consultant is entitled under the termination provisions of this Agreement, Consultant shall provide all Documents & Data to City upon payment of the undisputed amount. Consultant shall have no right to retain or fail to provide to City any such documents pending resolution of

the dispute. In addition, Consultant shall retain copies of all Documents & Data on file for a minimum of fifteen (15) years following completion of the Project, and shall make copies available to City upon the payment of actual reasonable duplication costs. Before destroying the Documents & Data following this retention period, Consultant shall make a reasonable effort to notify City and provide City with the opportunity to obtain the documents.

3.7.4.2 Subconsultants. Consultant shall require all subconsultants to agree in writing that City is granted a non-exclusive and perpetual license for any Documents & Data the subconsultant prepares under this Agreement. Consultant represents and warrants that Consultant has the legal right to license any and all Documents & Data. Consultant makes no such representation and warranty in regard to Documents & Data which were prepared by design professionals other than Consultant or its subconsultants, or those provided to Consultant by the City.

3.7.4.3 Right to Use. City shall not be limited in any way in its use or reuse of the Documents and Data or any part of them at any time for purposes of this Project or another project, provided that any such use not within the purposes intended by this Agreement or on a project other than this Project without employing the services of Consultant shall be at City's sole risk. If City uses or reuses the Documents & Data on any project other than this Project, it shall remove the Consultant's seal from the Documents & Data and indemnify and hold harmless Consultant and its officers, directors, agents and employees from claims arising out of the negligent use or re-use of the Documents & Data on such other project. Consultant shall be responsible and liable for its Documents & Data, pursuant to the terms of this Agreement, only with respect to the condition of the Documents & Data at the time they are provided to the City upon completion, suspension, abandonment or termination. Consultant shall not be responsible or liable for any revisions to the Documents & Data made by any party other than Consultant, a party for whom the Consultant is legally responsible or liable, or anyone approved by the Consultant.

3.7.4.4 Indemnification. Consultant shall defend, indemnify and hold the City, its directors, officials, officers, employees, volunteers and agents free and harmless, pursuant to the indemnification provisions of this Agreement, for any alleged infringement of any patent, copyright, trade secret, trade name, trademark, or any other proprietary right of any person or entity in consequence of the use on the Project by City of the Documents & Data, including any method, process, product, or concept specified or depicted.

3.7.4.5 Confidentiality. All ideas, memoranda, specifications, plans, procedures, drawings, descriptions, computer program data, input record data, written information, and other Documents & Data either created by or provided to Consultant in connection with the performance of this Agreement shall be held confidential by Consultant. Such materials shall not, without the prior written consent of City, be used by Consultant for any purposes other than the performance of the Services. Nor shall such materials be disclosed to any person or entity not connected with the performance of the Services or the Project. Nothing furnished to Consultant which is otherwise known to Consultant or is generally known, or has become known, to the related industry shall be deemed confidential. Consultant shall not use City's name or insignia, photographs of the Project, or any publicity pertaining to the Services or the Project in any magazine, trade paper, newspaper, television or radio production or other similar medium without the prior written consent of City.

3.7.4.6 Confidential Information. The City shall refrain from releasing Consultant's proprietary information ("Proprietary Information") unless the City's legal counsel determines that the release of the Proprietary Information is required by the California Public Records Act or other applicable state or federal law, or order of a court of competent jurisdiction, in which case the City shall notify Consultant of its intention to release Proprietary Information. Consultant shall have five (5) working days after receipt of the release notice to give City written notice of Consultant's objection to the City's release of Proprietary Information. Consultant shall indemnify, defend and hold harmless the City, and its officers, directors, employees, and agents from and against all liability, loss, cost or expense (including attorney's fees) arising out of a legal action brought to compel the release of Proprietary Information. City shall not release the Proprietary Information after receipt of an objection notice unless either: (1) Consultant fails to fully indemnify, defend (with City's choice of legal counsel), and hold City harmless from any legal action brought to compel such release; and/or (2) a final and non-appealable order by a court of competent jurisdiction requires that City release such information.

3.7.5 Cooperation; Further Acts. The Parties shall fully cooperate with one another, and shall take any additional acts or sign any additional documents as may be necessary, appropriate or convenient to attain the purposes of this Agreement.

3.7.6 Entire Agreement. This Agreement contains the entire agreement of the Parties with respect to the subject matter hereof, and supersedes all prior negotiations, understandings or agreements.

3.7.7 Attorneys' Fees. If either party commences an action against the other party, either legal, administrative or otherwise, arising out of or in connection with this Agreement, the prevailing party in such litigation shall be entitled to have and recover from the losing party reasonable attorneys' fees and all costs of such action.

3.7.8 Governing Law. This Agreement shall be governed by the laws of the State of California. Venue shall be in San Bernardino County. In addition to any and all contract requirements pertaining to notices of and requests for compensation or payment for extra work, disputed work, claims and/or changed conditions, Consultant must comply with the claim procedures set forth in Government Code sections 900 et seq. prior to filing any lawsuit against the City. Such Government Code claims and any subsequent lawsuit based upon the Government Code claims shall be limited to those matters that remain unresolved after all procedures pertaining to extra work, disputed work, claims, and/or changed conditions have been followed by Consultant. If no such Government Code claim is submitted, or if any prerequisite contractual requirements are not otherwise satisfied as specified herein, Consultant shall be barred from bringing and maintaining a valid lawsuit against the City.

3.7.9 Time of Essence. Time is of the essence for each and every provision of this Agreement.

3.7.10 City's Right to Employ Other Consultants. City reserves right to employ other consultants in connection with this Project.

3.7.11 Successors and Assigns. This Agreement shall be binding on the successors and assigns of the parties.

3.7.12 Assignment or Transfer. Consultant shall not assign, sublet, or transfer this

Agreement or any rights under or interest in this Agreement without the written consent of the City, which may be withheld for any reason. Any attempt to so assign or so transfer without such consent shall be void and without legal effect and shall constitute grounds for termination. Consultant shall not subcontract any portion of the Services required by this Agreement, except as expressly stated herein, without prior written approval of City. Subcontracts, if any, shall contain a provision making them subject to all provisions stipulated in this Agreement.

3.7.13 Construction; References; Captions. Since the Parties or their agents have participated fully in the preparation of this Agreement, the language of this Agreement shall be construed simply, according to its fair meaning, and not strictly for or against any Party. Any term referencing time, days or period for performance shall be deemed calendar days and not work days. All references to Consultant include all personnel, employees, agents, and subconsultants of Consultant, except as otherwise specified in this Agreement. All references to City include its elected officials, officers, employees, agents, and volunteers except as otherwise specified in this Agreement. The captions of the various articles and paragraphs are for convenience and ease of reference only, and do not define, limit, augment, or describe the scope, content, or intent of this Agreement.

3.7.14 Amendment; Modification. No supplement, modification, or amendment of this Agreement shall be binding unless executed in writing and signed by both Parties.

3.7.15 Waiver. No waiver of any default shall constitute a waiver of any other default or breach, whether of the same or other covenant or condition. No waiver, benefit, privilege, or service voluntarily given or performed by a Party shall give the other Party any contractual rights by custom, estoppel, or otherwise.

3.7.16 No Third-Party Beneficiaries. There are no intended third party beneficiaries of any right or obligation assumed by the Parties.

3.7.17 Invalidity; Severability. If any portion of this Agreement is declared invalid, illegal, or otherwise unenforceable by a court of competent jurisdiction, the remaining provisions shall continue in full force and effect.

3.7.18 Prohibited Interests. Consultant maintains and warrants that it has not employed nor retained any company or person, other than a bona fide employee working solely for Consultant, to solicit or secure this Agreement. Consultant warrants that it has not paid nor has it agreed to pay any company or person, other than a bona fide employee working solely for Consultant, any fee, commission, percentage, brokerage fee, gift or other consideration contingent upon or resulting from the award or making of this Agreement. Consultant further agrees to file, or shall cause its employees or subconsultants to file, a Statement of Economic Interest with the City's Filing Officer as required under state law in the performance of the Services. For breach or violation of this warranty, City shall have the right to rescind this Agreement without liability. For the term of this Agreement, no member, officer or employee of City, during the term of his or her service with City, shall have any direct interest in this Agreement, or obtain any present or anticipated material benefit arising therefrom.

3.7.19 Authority to Enter Agreement. Consultant has all requisite power and authority to conduct its business and to execute, deliver, and perform the Agreement. Each Party warrants that the individuals who have signed this Agreement have the legal power, right, and authority to make this Agreement and bind each respective Party.

3.7.20 Counterparts. This Agreement may be signed in counterparts, each of which shall constitute an original.

3.7.21 Survival. All rights and obligations hereunder that by their nature are to continue after any expiration or termination of this Agreement, including, but not limited to, the indemnification obligations, shall survive any such expiration or termination.

CITY OF ONTARIO
PROFESSIONAL SERVICES AGREEMENT

1. PARTIES AND DATE.

This Agreement is made and entered as of _____, by and between the City of Ontario, a municipal corporation organized under the laws of the State of California with its principal place of business at 303 East "B" Street, Ontario, California 91764-4196, County of San Bernardino, State of California ("City") and **SoftHQ, Inc**., a Corporation, with its principal place of business at **6494 Weathers Place, Suite 200, San Diego, CA 92121** ("Consultant"). City and Consultant are sometimes individually referred to herein as "Party" and collectively as "Parties."

2. RECITALS.

2.1 Consultant.

Consultant desires to perform and assume responsibility for the provision of certain professional services required by the City on the terms and conditions set forth in this Agreement. Consultant represents that it is experienced in providing temporary staffing services to public clients, is licensed in the State of California, and is familiar with the plans of City.

2.2 Project.

City desires to engage Consultant to render such professional services for **temporary staffing services for the City on an as-needed basis** ("Project") as set forth in this Agreement.

3. TERMS.

3.1 Scope of Services and Term.

3.1.1 General Scope of Services. Consultant promises and agrees to furnish to the City all labor, materials, tools, equipment, services, and incidental and customary work necessary to fully and adequately supply the professional temporary staffing consulting services necessary for the Project ("Services"). The Services are more particularly described in Exhibit "A" attached hereto and incorporated herein by reference. All Services shall be subject to, and performed in accordance with, this Agreement, the exhibits attached hereto and incorporated herein by reference, and all applicable local, state and federal laws, rules and regulations.

3.1.2 Term. The term of this Agreement shall be from **November 21, 2023** to **November 21, 2026**, unless earlier terminated as provided herein. The City shall have the unilateral option, at its sole discretion, to renew this Agreement automatically for no more than two (2) additional one-year terms, unless earlier terminated as provided herein. Consultant shall complete the Services within the term of this Agreement and shall meet any other established schedules and deadlines. The Parties may, by mutual, written consent, extend the term of this Agreement if necessary to complete the Services.

3.2 Compensation.

3.2.1 Compensation. Consultant shall receive compensation, including authorized reimbursements, for all Services rendered under this Agreement at the rates set forth in Exhibit "C" attached hereto and incorporated herein by reference. The total compensation shall not exceed **One Million Three Hundred Thousand Dollars and Zero Cents** (**$1,300,000**) without written approval of the City Council or City Manager, as applicable. Extra Work may be authorized, as described below, and if authorized, will be compensated at the rates and manner set forth in this Agreement.

3.2.2 Payment of Compensation. Consultant shall submit to City a monthly invoice which indicates work completed and hours of Services rendered by Consultant. The invoice shall describe the amount of Services provided since the initial commencement date, or since the start of the subsequent billing periods, as appropriate, through the date of the invoice. City shall, within 30 days of receiving such invoice, review the invoice and pay all non-disputed and approved charges. If the City disputes any of Consultant's fees, the City shall give written notice to Consultant within thirty (30) days of receipt of an invoice of any disputed fees set forth therein. Payment shall not constitute acceptance of any Services completed by Consultant. The making of final payment shall not constitute a waiver of any claims by the City for any reason whatsoever.

3.2.3 Reimbursement for Expenses. Consultant shall not be reimbursed for any expenses unless authorized in writing by City, or included in Exhibit "C" of this Agreement.

3.2.4 Extra Work. At any time during the term of this Agreement, City may request that Consultant perform Extra Work. As used herein, "Extra Work" means any work which is determined by City to be necessary for the proper completion of the Project, but which the Parties did not reasonably anticipate would be necessary at the execution of this Agreement. Consultant shall not perform, nor be compensated for, Extra Work without written authorization from the City.

3.3 Responsibilities of Consultant.

3.3.1 Independent Contractor; Control and Payment of Subordinates. The Services shall be performed by Consultant or under its supervision. Consultant will determine the means, methods and details of performing the Services subject to the requirements of this Agreement. City retains Consultant on an independent contractor basis and not as an employee. Any personnel performing the Services on behalf of Consultant shall not be employees of City and shall at all times be under Consultant's exclusive direction and control. Neither City, or any of its officials, officers, directors, employees or agents shall have control over the conduct of Consultant or any of Consultants officers, employees or agents, except as set forth in this Agreement. Consultant shall pay all wages, salaries, and other amounts due such personnel in

connection with their performance of Services under this Agreement and as required by law. Consultant shall be responsible for all reports and obligations respecting such additional personnel, including, but not limited to: social security taxes, income tax withholding, unemployment insurance, disability insurance, and workers' compensation insurance.

3.3.2 Schedule of Services. Consultant shall perform the Services in a prompt and timely manner and in accordance with the Schedule of Services set forth in Exhibit "B" attached hereto and incorporated herein by reference. Consultant represents that it has the professional and technical personnel required to perform the Services expeditiously. Upon request of City, Consultant shall provide a more detailed schedule of anticipated performance to meet the Schedule of Services.

3.3.3 Conformance to Applicable Requirements. All work prepared by Consultant shall be subject to the approval of City.

3.3.4 Substitution of Key Personnel. Consultant has represented to City that certain key personnel will perform and coordinate the Services under this Agreement. Should one or more of such personnel become unavailable, Consultant may substitute other personnel of at least equal competence upon written approval of City. In the event that City and Consultant cannot agree as to the substitution of key personnel, City shall be entitled to terminate this Agreement for cause. The key personnel for performance of this Agreement are as follows: **Kranti Ponnam, President.**

3.3.5 City's Representative. The City hereby designates **Angela Lopez, Executive Director Human Resources/Risk Management**, or his/her designee, to act as its representative in all matters pertaining to the administration and performance of this Agreement ("City's Representative"). City's Representative shall have the power to act on behalf of the City for review and approval of all products submitted by Consultant but not the authority to enlarge the Scope of Services or change the total compensation due to Consultant under this Agreement. The City Manager shall be authorized to act on City's behalf and to execute all necessary documents which enlarge the Scope of Services or change the Consultant's total compensation subject to the provisions contained in this Agreement. Consultant shall not accept direction or orders from any person other than the City Manager, City's Representative or his/her designee.

3.3.6 Consultant's Representative. Consultant hereby designates **Kranti Ponnam, President**, or his/her designee, to act as its representative for the performance of this Agreement ("Consultant's Representative"). Consultant's Representative shall have full authority to represent and act on behalf of the Consultant for all purposes under this Agreement. The Consultant's Representative shall supervise and direct the Services, using his/her best skill and attention, and shall be responsible for all means, methods, techniques, sequences, and procedures and for the satisfactory coordination of all portions of the Services under this Agreement.

3.3.7 Coordination of Services. Consultant agrees to work closely with City staff in the performance of Services and shall be available to City's staff, consultants and other staff at all reasonable times.

3.3.8 Standard of Care; Performance of Employees. Consultant shall perform all Services under this Agreement in a skillful and competent manner, consistent with the standards generally recognized as being employed by professionals in the same discipline in the State of

California. Consultant represents and maintains that it is skilled in the professional calling necessary to perform the Services. Consultant warrants that all employees and subconsultants shall have sufficient skill and experience to perform the Services assigned to them. Consultant represents that it, its employees and subconsultants have all licenses, permits, qualifications and approvals of whatever nature that are legally required to perform the Services, and that such licenses and approvals shall be maintained throughout the term of this Agreement. Consultant shall perform, at its own cost and expense and without reimbursement from the City, any services necessary to correct errors or omissions which are caused by the Consultant's failure to comply with the standard of care provided for herein. Any employee of the Consultant or its subconsultants who is determined by the City to be uncooperative, incompetent, a threat to the adequate or timely completion of the Project, a threat to the safety of persons or property, or any employee who fails or refuses to perform the Services in a manner acceptable to the City, shall be promptly removed from the Project by the Consultant and shall not be re-employed to perform any of the Services or to work on the Project.

3.3.9 Period of Performance.

3.3.9.1 Consultant shall perform and complete all Services under this Agreement within the term set forth in Section 3.1.2 above ("Performance Time"). Consultant shall also perform the Services in strict accordance with any completion schedule or Project milestones described in Exhibits "A" or "B" attached hereto, or which may be separately agreed upon in writing by the City and Consultant ("Performance Milestones"). Consultant agrees that if the Services are not completed within the aforementioned Performance Time and/or pursuant to any such Performance Milestones developed pursuant to provisions of this Agreement, it is understood, acknowledged and agreed that the City will suffer damage.

3.3.9.2 Neither City nor Consultant shall be considered in default of this Agreement for delays in performance caused by circumstances beyond the reasonable control of the non-performing Party. For purposes of this Agreement, such circumstances include a Force Majeure Event. A Force Majeure Event shall mean an event that materially affects a Party's performance and is one or more of the following: (1) Acts of God or other natural disasters; (2) terrorism or other acts of a public enemy; (3) orders of governmental authorities (including, without limitation, unreasonable and unforeseeable delay in the issuance of permits or approvals by governmental authorities that are required for the services); (4) strikes and other organized labor action occurring at the site and the effects thereof on the services, only to the extent such strikes and other organized labor action are beyond the control of Consultant and its subcontractors, and to the extent the effects thereof cannot be avoided by use of replacement workers; and (5) pandemics, epidemics or quarantine restrictions. For purposes of this section, "orders of governmental authorities," includes ordinances, emergency proclamations and orders, rules to protect the public health, welfare and safety, and other actions of a public agency applicable to the services and Agreement.

3.3.9.3 Should a Force Majeure Event occur, the non-performing Party shall, within a reasonable time of being prevented from performing, give written notice to the other Party describing the circumstances preventing continued performance and the efforts being made to resume performance of this Agreement. Force Majeure Events and/or delays, regardless of the Party responsible for the delay, shall not entitle Consultant to any additional compensation. Notwithstanding the foregoing in this section, the City may still terminate this Agreement in accordance with the termination provisions of this Agreement.

3.3.10 Laws and Regulations; Employee/Labor Certification.

3.3.10.1 Compliance with Laws. Consultant shall keep itself fully informed of and in compliance with all local, state and federal laws, rules and regulations in any manner affecting the performance of the Project or the Services, including all Cal/OSHA requirements, and shall give all notices required by law. Consultant shall be liable for all violations of such laws and regulations in connection with the Services and this Agreement. All violations of such laws and regulations shall be grounds for the City to terminate the Agreement for cause.

3.3.10.2 Employment Eligibility; Consultant. Consultant certifies that it fully complies with all requirements and restrictions of state and federal law respecting the employment of undocumented aliens, including, but not limited to, the Immigration Reform and Control Act of 1986, as may be amended from time to time and shall require all subconsultants and sub-subconsultants to comply with the same. Consultant certifies that it has not committed a violation of any such law within the five (5) years immediately preceding the date of execution of this Agreement, and shall not violate any such law at any time during the term of the Agreement.

3.3.10.3 Equal Opportunity Employment. Consultant represents that it is an equal opportunity employer and it shall not discriminate against any subconsultant, employee or applicant for employment because of race, religion, color, national origin, handicap, ancestry, sex or age. Such non-discrimination shall include, but not be limited to, all activities related to initial employment, upgrading, demotion, transfer, recruitment or recruitment advertising, layoff or termination. Consultant shall also comply with all relevant provisions of City's Minority Business Enterprise program, Affirmative Action Plan or other related programs or guidelines currently in effect or hereinafter enacted.

3.3.10.4 Air Quality. To the extent applicable, Consultant must fully comply with all applicable laws, rules and regulations in furnishing or using equipment and/or providing services, including, but not limited to, emissions limits and permitting requirements imposed by the South Coast Air Quality Management District (SCAQMD) and/or California Air Resources Board (CARB). Consultant shall indemnify City against any fines or penalties imposed by SCAQMD, CARB, or any other governmental or regulatory agency for violations of applicable laws, rules and/or regulations by Consultant, its subconsultants, or others for whom Consultant is responsible under its indemnity obligations provided for in this Agreement.

3.3.10.5 Water Quality Management and Compliance. Consultant shall keep itself and all subcontractors, staff, and employees fully informed of and in compliance with all local, state and federal laws, rules and regulations that may impact, or be implicated by the performance of the Services including, without limitation, all applicable provisions of the City's ordinances regulating water quality and storm water; the Federal Water Pollution Control Act (33 U.S.C. § 1251, *et seq.*); the California Porter-Cologne Water Quality Control Act (Water Code § 13000 *et seq*.); and any and all regulations, policies, or permits issued pursuant to any such authority. Consultant must additionally comply with the lawful requirements of the City, and any other municipality, drainage district, or other local agency with jurisdiction over the location where the Services are to be conducted, regulating water quality and storm water discharges. City may seek damages from Consultant for delay in completing the Services caused by Consultant's failure to comply with the laws, regulations and policies described in this Section, or any other relevant water quality law, regulation, or policy.

3.3.10.6 Safety. Consultant shall execute and maintain its work so as to avoid injury or damage to any person or property. In carrying out its Services, the Consultant shall at all times be in compliance with all applicable local, state and federal laws, rules and regulations, and shall exercise all necessary precautions for the safety of employees appropriate to the nature of the work and the conditions under which the work is to be performed.

3.3.11 Insurance.

3.3.11.1 Time for Compliance. Consultant shall not commence work under this Agreement until it has provided evidence satisfactory to the City that it has secured all insurance required under this section. In addition, Consultant shall not allow any subconsultant to commence work on any subcontract until it has provided evidence satisfactory to the City that the subconsultant has secured all insurance required under this section. Failure to provide and maintain all required insurance shall be grounds for the City to terminate this Agreement for cause.

3.3.11.2 Types of Insurance Required. As a condition precedent to the effectiveness of this Agreement for work to be performed hereunder, and without limiting the indemnity provisions of the Agreement, the Consultant, in partial performance of its obligations under such Agreement, shall procure and maintain in full force and effect during the term of the Agreement the following policies of insurance. If the existing policies do not meet the insurance requirements set forth herein, Consultant agrees to amend, supplement or endorse the policies to do so.

(A) Commercial General Liability: Commercial General Liability Insurance which affords coverage at least as broad as Insurance Services Office "occurrence" form CG 00 01, or the exact equivalent, with limits of not less than $2,000,000 per occurrence and no less than $4,000,000 in the general aggregate. Defense costs shall be paid in addition to the limits. The policy shall contain no endorsements or provisions (1) limiting coverage for contractual liability; (2) excluding coverage for claims or suits by one insured against another (cross-liability); (3) products/completed operations liability; or (4) containing any other exclusion(s) contrary to the terms or purposes of this Agreement.

(B) Automobile Liability Insurance: Automobile Liability Insurance with coverage at least as broad as Insurance Services Office Form CA 00 01 covering "Any Auto" (Symbol 1), or the exact equivalent, covering bodily injury and property damage for all activities with limits of not less than $2,000,000 combined limit for each occurrence.

(C) Workers' Compensation: Workers' Compensation Insurance, as required by the State of California and Employer's Liability Insurance with a limit of not less than $1,000,000 per accident for bodily injury and disease.

(D) Professional Liability (Errors & Omissions): Professional Liability insurance or Errors & Omissions insurance appropriate to Consultant's profession with limits of not less than $2,000,000. Covered professional services shall specifically include all work to be performed under the Agreement and delete any exclusions that may potentially affect the work to be performed (for example, any exclusions relating to lead, asbestos, pollution, testing, underground storage tanks, laboratory analysis, soil work, etc.). If coverage is written on a claims-made basis, the retroactive date shall precede the effective date of the initial Agreement and continuous coverage will be maintained or an extended reporting period will be exercised for a period of at least five (5) years from termination or expiration of this Agreement.

3.3.11.3 Insurance Endorsements. Required insurance policies shall contain the following provisions, or Consultant shall provide endorsements on forms approved by the City to add the following provisions to the insurance policies:

(A) Commercial General Liability: (1) Additional Insured: The City, its officials, officers, employees, agents, and volunteers shall be additional insureds with regard to liability and defense of suits or claims arising out of the performance of the Agreement. Additional Insured Endorsements shall not (1) be restricted to "ongoing operations"; (2) exclude "contractual liability"; (3) restrict coverage to "sole" liability of Consultant; or (4) contain any other exclusions contrary to the terms or purposes of this Agreement. For all policies of Commercial General Liability insurance, Consultant shall provide endorsements in the form of ISO CG 20 10 10 01 and 20 37 10 01 (or endorsements providing the exact same coverage) to effectuate this requirement. (2) Cancellation: Required insurance policies shall not be canceled or the coverage reduced until a thirty (30) day written notice of cancellation has been served upon the City except ten (10) days shall be allowed for non-payment of premium.

(B) Automobile Liability: (1) Additional Insured: The City, its directors, officials, officers, employees, agents, and volunteers shall be covered as additional insureds with respect to the ownership, operation, maintenance, use, loading or unloading of any auto owned, leased, hired or borrowed by the Vendor or for which the Vendor is responsible. (2) Cancellation: Required insurance policies shall not be canceled or the coverage reduced until a thirty (30) day written notice of cancellation has been served upon the City except ten (10) days shall be allowed for non-payment of premium.

(C) Professional Liability (Errors & Omissions): 1) Cancellation: Required insurance policies shall not be canceled or the coverage reduced until a thirty (30) day written notice of cancellation has been served upon the City except ten (10) days shall be allowed for non-payment of premium. (2) This insurance shall be written on a policy form coverage specifically designed to protect against acts, errors or omissions of the Consultant. “Covered Professional Services” as designated in the policy must specifically include work performed under this Agreement. The policy must “pay on behalf of” the insured and include a provision establishing the insurer’s duty to defend.

(D) Workers' Compensation: (1) Cancellation: Required insurance policies shall not be canceled or the coverage reduced until a thirty (30) day written notice of cancellation has been served upon the City except ten (10) days shall be allowed for non-payment of premium. (2) Waiver of Subrogation: A waiver of subrogation stating that the insurer waives all rights of subrogation against the City, its officials, officers, employees, agents, and volunteers.

3.3.11.4 Primary and Non-Contributing Insurance. All policies of Commercial General Liability and Automobile Liability insurance shall be primary and any other insurance, deductible, or self-insurance maintained by the City, its officials, officers, employees, agents, or volunteers shall not contribute with this primary insurance. Policies shall contain or be endorsed to contain such provisions.

3.3.11.5 Waiver of Subrogation. All required insurance coverages, except for the professional liability coverage, shall contain or be endorsed to waiver of subrogation in favor of the City, its officials, officers, employees, agents, and volunteers or shall specifically allow Consultant or others providing insurance evidence in compliance with these specifications

to waive their right of recovery prior to a loss. Consultant hereby waives its own right of recovery against City, and shall require similar written express waivers and insurance clauses from each of its subconsultants.

3.3.11.6 Deductibles and Self-Insured Retentions. Any deductible or self-insured retention must be approved in writing by the City and shall protect the City, its officials, officers, employees, agents, and volunteers in the same manner and to the same extent as they would have been protected had the policy or policies not contained a deductible or self-insured retention.

3.3.11.7 Evidence of Insurance. The Consultant, concurrently with the execution of the Agreement, and as a condition precedent to the effectiveness thereof, shall deliver either certified copies of the required policies, or original certificates on forms approved by the City, together with all endorsements affecting each policy. Required insurance policies shall not be in compliance if they include any limiting provision or endorsement that has not been submitted to the City for approval. The certificates and endorsements for each insurance policy shall be signed by a person authorized by that insurer to bind coverage on its behalf. At least fifteen (15 days) prior to the expiration of any such policy, evidence of insurance showing that such insurance coverage has been renewed or extended shall be filed with the City. If such coverage is cancelled or reduced and not replaced immediately so as to avoid a lapse in the required coverage, Consultant shall, within ten (10) days after receipt of written notice of such cancellation or reduction of coverage, file with the City evidence of insurance showing that the required insurance has been reinstated or has been provided through another insurance company or companies.

3.3.11.8 Acceptability of Insurers. Each such policy shall be from a company or companies with a current A.M. Best's rating of no less than A:VII and authorized to transact business of insurance in the State of California, or otherwise allowed to place insurance through surplus line brokers under applicable provisions of the California Insurance Code or any federal law.

3.3.11.9 Enforcement of Agreement Provisions (non estoppel). Consultant acknowledges and agrees that actual or alleged failure on the part of the City to inform Consultant of non-compliance with any requirement imposes no additional obligation on the City nor does it waive any rights hereunder.

3.3.11.10 Requirements Not Limiting. Requirement of specific coverage or minimum limits contained in this Section are not intended as a limitation on coverage, limits, or other requirement, or a waiver of any coverage normally provided by any insurance.

3.3.11.11 Additional Insurance Provisions

(A) The foregoing requirements as to the types and limits of insurance coverage to be maintained by Consultant, and any approval of said insurance by the City, is not intended to and shall not in any manner limit or qualify the liabilities and obligations otherwise assumed by the Consultant pursuant to this Agreement, including but not limited to, the provisions concerning indemnification.

(B) If at any time during the life of the Agreement, any policy of insurance required under this Agreement does not comply with these specifications or is canceled

and not replaced, City has the right but not the duty to obtain the insurance it deems necessary and any premium paid by City will be promptly reimbursed by Consultant or City will withhold amounts sufficient to pay premium from Consultant payments. In the alternative, City may cancel this Agreement.

(C) The City may require the Consultant to provide complete copies of all insurance policies in effect for the duration of the Project.

(D) Neither the City nor any of its officials, officers, employees, agents or volunteers shall be personally responsible for any liability arising under or by virtue of this Agreement.

(E) The limits set forth herein shall apply separately to each insured against whom claims are made or suits are brought, except with respect to the limits of liability. Further the limits set forth herein shall not be construed to relieve the Consultant from liability in excess of such coverage, nor shall it limit the Consultant's indemnification obligations to the City and shall not preclude the City from taking such other actions available to the City under other provisions of the Agreement or law.

(F) Consultant shall report to the City, in addition to Consultant's insurer, any and all insurance claims submitted by Consultant in connection with the Services under this Agreement.

3.3.11.12 Insurance for Subconsultants. Consultant shall include all subconsultants engaged in any work for Consultant relating to this Agreement as additional insureds under the Consultant's policies, or the Consultant shall be responsible for causing subconsultants to purchase the appropriate insurance in compliance with the terms of these Insurance Requirements, including adding the City, its officials, officers, employees, agents, and volunteers as additional insureds to the subconsultant's policies. All policies of Commercial General Liability insurance provided by Consultant's subconsultants performing work relating to this Agreement shall be endorsed to name the City, its officials, officers, employees, agents and volunteers as additional insureds using endorsement form ISO CG 20 38 04 13 or an endorsement providing equivalent coverage. Consultant shall not allow any subconsultant to commence work on any subcontract relating to this Agreement until it has received satisfactory evidence of subconsultant's compliance with all insurance requirements under this Agreement, to the extent applicable. The Consultant shall provide satisfactory evidence of compliance with this section upon request of the City.

3.4 Labor Code Requirements.

3.4.1 Prevailing Wages. Consultant is aware of the requirements of California Labor Code Section 1720, et seq., and 1770, et seq., as well as California Code of Regulations, Title 8, Section 16000, et seq., ("Prevailing Wage Laws"), which require the payment of prevailing wage rates and the performance of other requirements on "public works" and "maintenance" projects. If the Services are being performed as part of an applicable "public works" or "maintenance" project, as defined by the Prevailing Wage Laws, and if the total compensation is $1,000 or more, Consultant agrees to fully comply with such Prevailing Wage Laws. City shall provide Consultant with a copy of the prevailing rates of per diem wages in effect at the commencement of this Agreement. Consultant shall make copies of the prevailing rates of per diem wages for each craft, classification or type of worker needed to execute the Services

available to interested parties upon request, and shall post copies at the Consultant's principal place of business and at the project site. It is the intent of the parties to effectuate the requirements of sections 1771, 1774, 1775, 1776, 1777.5, 1813, and 1815 of the Labor Code within this Agreement, and Consultant shall therefore comply with such Labor Code sections to the fullest extent required by law. Consultant shall defend, indemnify and hold the City, its officials, officers, employees, agents, and volunteers free and harmless from any claim or liability arising out of any failure or alleged failure to comply with the Prevailing Wage Laws.

3.4.2 Registration/DIR Compliance. If the Services are being performed on a public works project of over $25,000 when the project is for construction, alteration, demolition, installation, or repair work, or a public works project of over $15,000 when the project is for maintenance work, in addition to the foregoing, then pursuant to Labor Code sections 1725.5 and 1771.1, the Consultant and all subconsultants must be registered with the Department of Industrial Relations ("DIR"). Consultant shall maintain registration for the duration of the Project and require the same of any subconsultants.

3.4.3 Compliance Monitoring. This Project may also be subject to compliance monitoring and enforcement by the DIR. It shall be Consultant's sole responsibility to comply with all applicable registration and labor compliance requirements, including the submission of payroll records directly to the DIR. Any stop orders issued by the DIR against Consultant or any subconsultant that affect Consultant's performance of services, including any delay, shall be Consultant's sole responsibility. Any delay arising out of or resulting from such stop orders shall be considered Consultant caused delay and shall not be compensable by the City. Consultant shall defend, indemnify and hold the City, its officials, officers, employees and agents free and harmless from any claim or liability arising out of stop orders issued by the DIR against Consultant or any subconsultant.

3.4.4 Labor Certification. By its signature hereunder, Consultant certifies that it is aware of the provisions of Section 3700 of the California Labor Code which require every employer to be insured against liability for Worker's Compensation or to undertake self-insurance in accordance with the provisions of that Code, and agrees to comply with such provisions before commencing the performance of the Services.

3.5 Termination of Agreement.

3.5.1.1 Grounds for Termination. City may, by written notice to Consultant, terminate the whole or any part of this Agreement at any time and without cause by giving written notice to Consultant of such termination, and specifying the effective date thereof, at least seven (7) days before the effective date of such termination. Upon termination, Consultant shall be compensated only for those Services which have been adequately rendered to City, and Consultant shall be entitled to no further compensation. Consultant may not terminate this Agreement except for cause. The rights and remedies of the City provided in this section shall not be exclusive and are in addition to any other rights and remedies provided by law, equity or under this Agreement.

3.5.1.2 Effect of Termination. If this Agreement is terminated as provided herein, City may require Consultant to provide all finished or unfinished Documents and Data and other information of any kind prepared by Consultant in connection with the performance of Services under this Agreement. Consultant shall be required to provide such document and other information within fifteen (15) days of the request.

3.5.1.3 Additional Services. In the event this Agreement is terminated in whole or in part as provided herein, City may procure, upon such terms and in such manner as it may determine appropriate, services similar to those terminated.

3.6 Indemnification.

3.6.1 To the fullest extent permitted by law, Consultant shall defend (with counsel of City's choosing), indemnify and hold the City, its officials, officers, employees, volunteers, and agents free and harmless from any and all claims, demands, causes of action, costs, expenses, liability, loss, damage or injury of any kind, in law or equity, to property or persons, including wrongful death, in any manner arising out of, pertaining to, or incident to any acts, errors or omissions, or willful misconduct of Consultant, its officials, officers, employees, subcontractors, consultants or agents in connection with the performance of the Consultant's Services, the Project or this Agreement, including without limitation the payment of all damages, expert witness fees and attorney's fees and other related costs and expenses except such loss or damage caused by the sole negligence or willful misconduct of the City. Consultant's obligation to indemnify shall survive expiration or termination of this Agreement and shall not be restricted to insurance proceeds, if any, received by Consultant, the City, its officials, officers, employees, agents, or volunteers.

3.6.2 If Consultant's obligation to defend, indemnify, and/or hold harmless arises out of Consultant's performance as a "design professional" (as that term is defined under Civil Code section 2782.8), then, and only to the extent required by Civil Code section 2782.8, which is fully incorporated herein, Consultant's indemnification obligation shall be limited to claims that arise out of, pertain to, or relate to the negligence, recklessness, or willful misconduct of the Consultant, and, upon Consultant obtaining a final adjudication by a court of competent jurisdiction, Consultant's liability for such claim, including the cost to defend, shall not exceed the Consultant's proportionate percentage of fault.

3.7 General Provisions.

3.7.1 Accounting Records. Consultant shall maintain complete and accurate records with respect to all costs and expenses incurred under this Agreement. All such records shall be clearly identifiable. Consultant shall allow a representative of City during normal business hours to examine, audit, and make transcripts or copies of such records and any other documents created pursuant to this Agreement. Consultant shall allow inspection of all work, data, documents, proceedings, and activities related to the Agreement for a period of three (3) years from the date of final payment under this Agreement.

3.7.2 Independent Contractors and Subcontracting.

3.7.2.1 Use of Consultants. Consultant is aware of statutory and case law regarding classification of workers as independent contractors, including California Labor Code Section 2750.3 and Dynamex Operations West, Inc. v. Superior Court, 4 Cal. 5th 903 (2018). To ensure that Consultant is in compliance with the California Labor Code, Consultant shall only utilize its employees to provide the Services. Consultant may not provide the services through any independent contractor, subcontractor or subconsultant ("Subcontractor(s)") unless approved by the City as set forth in Section 3.7.2.2 below. Consultant represents and warrants that all personnel who perform the Services on Consultant's behalf are Consultant's employees, and that Consultant complies with all applicable laws, rules and regulations governing its

employees, including, but not limited to, the California Labor Code, Unemployment Insurance Code and all applicable Industrial Welfare Commission Wage Orders.

3.7.2.2 Prior Approval Required. Consultant shall not use any Subcontractor to provide the Services, or any portion of the work required by this Agreement, without prior written approval of City. In the event that City authorizes Consultant to use a Subcontractor, Consultant shall enter into a written agreement with the Subcontractor, which must include all provisions of the Agreement, including a restriction on the Subcontractor's use of further independent contractors, subcontractors or subconsultants without the City's prior written consent.

3.7.3 Delivery of Notices. All notices permitted or required under this Agreement shall be given to the respective parties at the following address, or at such other address as the respective parties may provide in writing for this purpose:

Consultant: **SoftHQ, Inc.**
6494 Weathers Place, Suite 200,
San Diego, CA 32121
ATTN: Kranti Ponnam, President

City: City of Ontario
303 East "B" Street
Ontario, CA 91764
ATTN: **Angela Lopez, Executive Director Human Resources/Risk Management**

Such notice shall be deemed made when personally delivered or when mailed, forty-eight (48) hours after deposit in the U.S. Mail, first class postage prepaid and addressed to the party at its applicable address. Actual notice shall be deemed adequate notice on the date actual notice occurred, regardless of the method of service.

3.7.4 Ownership of Materials and Confidentiality.

3.7.4.1 Documents & Data; Licensing of Intellectual Property. This Agreement creates a non-exclusive and perpetual license for City to copy, use, modify, reuse, or sublicense any and all copyrights, designs, and other intellectual property embodied in plans, specifications, studies, drawings, estimates, and other documents or works of authorship fixed in any tangible medium of expression, including but not limited to, physical drawings or data magnetically or otherwise recorded on computer diskettes, which are prepared or caused to be prepared by Consultant under this Agreement ("Documents & Data"). All Documents & Data shall be and remain the property of City, and shall not be used in whole or in substantial part by Consultant on other projects without the City's express written permission. Within thirty (30) days following the completion, suspension, abandonment or termination of this Agreement, Consultant shall provide to City reproducible copies of all Documents & Data, in a form and amount required by City. City reserves the right to select the method of document reproduction and to establish where the reproduction will be accomplished. The reproduction expense shall be borne by City at the actual cost of duplication. In the event of a dispute regarding the amount of compensation to which the Consultant is entitled under the termination provisions of this Agreement, Consultant shall provide all Documents & Data to City upon payment of the undisputed amount. Consultant shall have no right to retain or fail to provide to City any such documents pending resolution of

the dispute. In addition, Consultant shall retain copies of all Documents & Data on file for a minimum of fifteen (15) years following completion of the Project, and shall make copies available to City upon the payment of actual reasonable duplication costs. Before destroying the Documents & Data following this retention period, Consultant shall make a reasonable effort to notify City and provide City with the opportunity to obtain the documents.

3.7.4.2 Subconsultants. Consultant shall require all subconsultants to agree in writing that City is granted a non-exclusive and perpetual license for any Documents & Data the subconsultant prepares under this Agreement. Consultant represents and warrants that Consultant has the legal right to license any and all Documents & Data. Consultant makes no such representation and warranty in regard to Documents & Data which were prepared by design professionals other than Consultant or its subconsultants, or those provided to Consultant by the City.

3.7.4.3 Right to Use. City shall not be limited in any way in its use or reuse of the Documents and Data or any part of them at any time for purposes of this Project or another project, provided that any such use not within the purposes intended by this Agreement or on a project other than this Project without employing the services of Consultant shall be at City's sole risk. If City uses or reuses the Documents & Data on any project other than this Project, it shall remove the Consultant's seal from the Documents & Data and indemnify and hold harmless Consultant and its officers, directors, agents and employees from claims arising out of the negligent use or re-use of the Documents & Data on such other project. Consultant shall be responsible and liable for its Documents & Data, pursuant to the terms of this Agreement, only with respect to the condition of the Documents & Data at the time they are provided to the City upon completion, suspension, abandonment or termination. Consultant shall not be responsible or liable for any revisions to the Documents & Data made by any party other than Consultant, a party for whom the Consultant is legally responsible or liable, or anyone approved by the Consultant.

3.7.4.4 Indemnification. Consultant shall defend, indemnify and hold the City, its directors, officials, officers, employees, volunteers and agents free and harmless, pursuant to the indemnification provisions of this Agreement, for any alleged infringement of any patent, copyright, trade secret, trade name, trademark, or any other proprietary right of any person or entity in consequence of the use on the Project by City of the Documents & Data, including any method, process, product, or concept specified or depicted.

3.7.4.5 Confidentiality. All ideas, memoranda, specifications, plans, procedures, drawings, descriptions, computer program data, input record data, written information, and other Documents & Data either created by or provided to Consultant in connection with the performance of this Agreement shall be held confidential by Consultant. Such materials shall not, without the prior written consent of City, be used by Consultant for any purposes other than the performance of the Services. Nor shall such materials be disclosed to any person or entity not connected with the performance of the Services or the Project. Nothing furnished to Consultant which is otherwise known to Consultant or is generally known, or has become known, to the related industry shall be deemed confidential. Consultant shall not use City's name or insignia, photographs of the Project, or any publicity pertaining to the Services or the Project in any magazine, trade paper, newspaper, television or radio production or other similar medium without the prior written consent of City.

3.7.4.6 Confidential Information. The City shall refrain from releasing Consultant's proprietary information ("Proprietary Information") unless the City's legal counsel determines that the release of the Proprietary Information is required by the California Public Records Act or other applicable state or federal law, or order of a court of competent jurisdiction, in which case the City shall notify Consultant of its intention to release Proprietary Information. Consultant shall have five (5) working days after receipt of the release notice to give City written notice of Consultant's objection to the City's release of Proprietary Information. Consultant shall indemnify, defend and hold harmless the City, and its officers, directors, employees, and agents from and against all liability, loss, cost or expense (including attorney's fees) arising out of a legal action brought to compel the release of Proprietary Information. City shall not release the Proprietary Information after receipt of an objection notice unless either: (1) Consultant fails to fully indemnify, defend (with City's choice of legal counsel), and hold City harmless from any legal action brought to compel such release; and/or (2) a final and non-appealable order by a court of competent jurisdiction requires that City release such information.

3.7.5 Cooperation; Further Acts. The Parties shall fully cooperate with one another, and shall take any additional acts or sign any additional documents as may be necessary, appropriate or convenient to attain the purposes of this Agreement.

3.7.6 Entire Agreement. This Agreement contains the entire agreement of the Parties with respect to the subject matter hereof, and supersedes all prior negotiations, understandings or agreements.

3.7.7 Attorneys' Fees. If either party commences an action against the other party, either legal, administrative or otherwise, arising out of or in connection with this Agreement, the prevailing party in such litigation shall be entitled to have and recover from the losing party reasonable attorneys' fees and all costs of such action.

3.7.8 Governing Law. This Agreement shall be governed by the laws of the State of California. Venue shall be in San Bernardino County. In addition to any and all contract requirements pertaining to notices of and requests for compensation or payment for extra work, disputed work, claims and/or changed conditions, Consultant must comply with the claim procedures set forth in Government Code sections 900 et seq. prior to filing any lawsuit against the City. Such Government Code claims and any subsequent lawsuit based upon the Government Code claims shall be limited to those matters that remain unresolved after all procedures pertaining to extra work, disputed work, claims, and/or changed conditions have been followed by Consultant. If no such Government Code claim is submitted, or if any prerequisite contractual requirements are not otherwise satisfied as specified herein, Consultant shall be barred from bringing and maintaining a valid lawsuit against the City.

3.7.9 Time of Essence. Time is of the essence for each and every provision of this Agreement.

3.7.10 City's Right to Employ Other Consultants. City reserves right to employ other consultants in connection with this Project.

3.7.11 Successors and Assigns. This Agreement shall be binding on the successors and assigns of the parties.

3.7.12 Assignment or Transfer. Consultant shall not assign, sublet, or transfer this

Agreement or any rights under or interest in this Agreement without the written consent of the City, which may be withheld for any reason. Any attempt to so assign or so transfer without such consent shall be void and without legal effect and shall constitute grounds for termination. Consultant shall not subcontract any portion of the Services required by this Agreement, except as expressly stated herein, without prior written approval of City. Subcontracts, if any, shall contain a provision making them subject to all provisions stipulated in this Agreement.

3.7.13 Construction; References; Captions. Since the Parties or their agents have participated fully in the preparation of this Agreement, the language of this Agreement shall be construed simply, according to its fair meaning, and not strictly for or against any Party. Any term referencing time, days or period for performance shall be deemed calendar days and not work days. All references to Consultant include all personnel, employees, agents, and subconsultants of Consultant, except as otherwise specified in this Agreement. All references to City include its elected officials, officers, employees, agents, and volunteers except as otherwise specified in this Agreement. The captions of the various articles and paragraphs are for convenience and ease of reference only, and do not define, limit, augment, or describe the scope, content, or intent of this Agreement.

3.7.14 Amendment; Modification. No supplement, modification, or amendment of this Agreement shall be binding unless executed in writing and signed by both Parties.

3.7.15 Waiver. No waiver of any default shall constitute a waiver of any other default or breach, whether of the same or other covenant or condition. No waiver, benefit, privilege, or service voluntarily given or performed by a Party shall give the other Party any contractual rights by custom, estoppel, or otherwise.

3.7.16 No Third-Party Beneficiaries. There are no intended third party beneficiaries of any right or obligation assumed by the Parties.

3.7.17 Invalidity; Severability. If any portion of this Agreement is declared invalid, illegal, or otherwise unenforceable by a court of competent jurisdiction, the remaining provisions shall continue in full force and effect.

3.7.18 Prohibited Interests. Consultant maintains and warrants that it has not employed nor retained any company or person, other than a bona fide employee working solely for Consultant, to solicit or secure this Agreement. Consultant warrants that it has not paid nor has it agreed to pay any company or person, other than a bona fide employee working solely for Consultant, any fee, commission, percentage, brokerage fee, gift or other consideration contingent upon or resulting from the award or making of this Agreement. Consultant further agrees to file, or shall cause its employees or subconsultants to file, a Statement of Economic Interest with the City's Filing Officer as required under state law in the performance of the Services. For breach or violation of this warranty, City shall have the right to rescind this Agreement without liability. For the term of this Agreement, no member, officer or employee of City, during the term of his or her service with City, shall have any direct interest in this Agreement, or obtain any present or anticipated material benefit arising therefrom.

3.7.19 Authority to Enter Agreement. Consultant has all requisite power and authority to conduct its business and to execute, deliver, and perform the Agreement. Each Party warrants that the individuals who have signed this Agreement have the legal power, right, and authority to make this Agreement and bind each respective Party.

3.7.20 Counterparts. This Agreement may be signed in counterparts, each of which shall constitute an original.

3.7.21 Survival. All rights and obligations hereunder that by their nature are to continue after any expiration or termination of this Agreement, including, but not limited to, the indemnification obligations, shall survive any such expiration or termination.

CITY OF ONTARIO *Agenda Report* **November 21, 2023**	**SECTION:** **CONSENT CALENDAR**
Department: Broadband Operations Prepared By: Judy Witrago Staff Member Presenting: Jimmy Chang, Broadband General Manager Approved By:	Submitted To: Council/OHA Approved: _____ Continued To: _____ Denied: _____ Item No: 18

SUBJECT: AUTHORIZE A CHANGE ORDER TO THE CONSTRUCTION CONTRACT WITH SERVITEK ELECTRIC, INC. FOR THE CDBG CITY FIBER CONDUIT INSTALLATION WEST RING SEGMENT 2

RECOMMENDATION: That the City Council approve a Change Order to the Construction Contract with Servitek Electric, Inc. of Walnut, California, to increase the total authorized expenditure by $21,176 for the CDBG City Fiber Conduit Installation West Ring Segment 2 Project, for a revised total contract not-to-exceed amount of $821,281.

THE FOLLOWING COUNCIL GOALS ARE BEING ACHIEVED:
Invest in the Growth and Evolution of the City's Economy
Operate in a Businesslike Manner
Invest in the City's Infrastructure (Water, Streets, Sewers, Parks, Storm Drains and Public Facilities)

FISCAL IMPACT: The Fiscal Year 2023-24 Adopted Budget includes appropriations in the Broadband/Fiber Fund for the construction of City fiber conduit installation. The proposed Change Order will increase the contract by $21,176 for a total not-to-exceed contract amount of $821,281.

BACKGROUND & ANALYSIS: On March 21, 2023, a Construction Contract was awarded to Servitek Electric Inc. for fiber optic conduit installation services in the amount of $731,914 plus a 10% contingency of $73,191, for a total expenditure of $805,105.

During construction in various locations of the project area, it was discovered that the restoration work for sidewalks, driveway approaches, and roadway curbs did not meet the requirements defined by the City's Engineering Department. In several instances, the original project plans indicated the need to replace single sidewalk panels, while the City's standards dictate the replacement of multiple panels. Moreover, the presence of sidewalks featuring rolled curbs and larger-than-standard sidewalk panel sizes has expanded the scope of restoration work within the right-of-way areas. These unexpected conditions have led to the identification of additional required restoration, which are addressed in this Change Order.

CHANGE ORDER

Project: CDBG City Fiber Conduit Installation West Ring Segment 2

Change Order Number: 1

Change Order Date: November 21, 2023

Contract Date: **04/21/2023 – 04/21/2024**

To: Servitek Electric, Inc.
385 S Lemon Ave. #E243
Walnut, CA 91789
Geoff Reyes

THIS CHANGE ORDER FORM SHALL BE USED FOR ALL CHANGE ORDERS ASSOCIATED WITH THE WORK. NO ADDITIONS OR DELETIONS TO THIS FORM SHALL BE ALLOWED, EXCEPT WITH PERMISSION OF THE CITY OF ONTARIO.

The Contract is changed as follows:

INCREASE IN CONTRACT ITEM QUANTITIES AT CONTRACT PRICE

Bid Item	Description	UOM	UNIT COST	TOTAL UNITS	AMOUNT
22	(512-513) Asphalt Removal and Restoration	SQFT	$24.99	799	$19,167.01

EXTRA WORK AT AGREED UPON LUMP SUM

Bid Item	Description	UOM	UNIT COST	TOTAL UNITS	AMOUNT
	Street Lighting Traffic Control	LS	$2,000.00	1	$2,000.00

Contractor agrees to furnish all labor, materials, equipment and services to perform the Work, modified as described herein, in accordance with the Contract Documents as revised by this Change Order.

NOT VALID UNTIL SIGNED BY OWNER

(BB&K 2020)
46700.00100\33457526.1

In consideration of the change(s) described above, the Contract Price is adjusted as follows:

The original Contract Price was	$ 805,105.00
Net change by previously authorized Change Orders	$ 0
The Contract Price prior to this Change Order was	$ 0
The Contract Price will be changed by this Change Order in the amount of	$ 21,176.00
The new Contract Price including this Change Order will be	$ 826,281.00

In consideration of the change(s) describe above, the Contract Time is adjusted as follows:

The Contract Time will be: increased ☐ decreased ☐ unchanged ☒ by	0 Days
The Contract Time prior to this Change Order was	0 Days
The new Contract Time including this Change Order will be	0 Days

Attachments: Contract Change Order Proposal.

Contractor accepts the terms and conditions stated herein as full and final settlement of any and all claims arising from this Change Order. The adjustments to the Contract Price and Contract Time in this Change Order constitutes the entire compensation and/or adjustment thereto due to Contractor, including direct, indirect, consequential, and overhead (field and home office) costs, due to Contractor arising out of or related to the change in the Work covered by this Change Order. By signing this Change Order, Contractor agrees to accept the amount of the adjustment to the Contract Price, and the adjustment of the Contract Time, as payment in full for all costs, including direct, indirect, consequential, and overhead (field and home office) costs, related to the change in the Work covered by this Change Order.

Department: Utilities Prepared By: Thomas Lambertson Staff Member Presenting: Scott Burton, Utilities General Manager Reviewed By: Dennice Raygoza, Albert G Gastelum, Michael Sigsbee Approved By:	Submitted To: Council/OHA Approved: _____ Continued To: _____ Denied: _____ Item No: 19

SUBJECT: **A PROFESSIONAL SERVICES AGREEMENT WITH AKM CONSULTING ENGINEERS FOR THE 2023 POTABLE WATER, RECYCLED WATER, SEWER MASTER PLAN UPDATES, AND SEWER SYSTEM MANAGEMENT PLAN AND AUDIT**

RECOMMENDATION: That the City Council approve and authorize the City Manager, or his designee, to execute a Professional Services Agreement with AKM Consulting Engineers, of Irvine, California, to provide engineering services for the Potable Water, Recycled Water, Sewer Master Plan Updates, and Sewer System Management Plan and Audit for $1,646,784 plus a 10% contingency of $164,678 for a total not-to-exceed contract amount of $1,811,462, and a term from November 21, 2023 to November 21, 2025.

THE FOLLOWING COUNCIL GOALS ARE BEING ACHIEVED:
Invest in the Growth and Evolution of the City's Economy
Operate in a Businesslike Manner
Invest in the City's Infrastructure (Water, Streets, Sewers, Parks, Storm Drains and Public Facilities)
Ensure the Development of a Well Planned, Balanced, and Self-Sustaining Community in Ontario Ranch

FISCAL IMPACT: The proposed Agreement is for $1,646,784 plus a 10% contingency of $164,678 for a total not-to-exceed contract amount of $1,811,462. The term of the Agreement will be from November 21, 2023 to November 21, 2025. Funding for this work will be shared between the Capital Water Fund, the Sewer Capital Fund, and the Water and Sewer Regional Development Impact Fee (DIF) Fund (DIF Project No.'s WT-27 and SW-27).

The Fiscal Year 2023-24 Adopted Budged includes appropriations from the Water and Sewer Capital Fund to cover a portion of the cost for engineering services for the Potable Water, Recycled Water, Sewer Master Plan Updates, and Sewer System Management Plan and Audit. If approved, additional appropriations in the Water Capital Fund, Sewer Capital Fund, and Water and Sewer Regional Development Impact Fee Fund will be requested at the next quarterly budget update as needed. There is no impact to the General Fund.

BACKGROUND & ANALYSIS: The City's water system includes approximately 680 miles of existing main lines (potable and recycled water), 75 million gallons of reservoir storage, and 22 active wells. The sewer system includes approximately 450 miles of existing main lines and 3 lift stations. The Potable Water Master Plan (WMP) and Recycled Water Master Plan (RWMP) identifies water production, transmission, and distribution system improvements, and the Sewer Master Plan (SMP) identifies the collection and transport system improvements necessary to serve existing and future residents and businesses of the City, all of which is undergoing significant expansion in Ontario Ranch. The hydraulic modeling and analysis of the water and sewer system determines near, and long-term capital improvement needs and subsequent investments. An update to the master plans is required to align the capital needs with the land use changes and densification made in the current 2050 Ontario Plan (TOP), adopted in 2022.

The WMP and RWMP updates will review changing water demands resulting from the 2050 TOP land use changes as well as recent and emerging water use efficiency standards, including State mandated conservation goals, and will include updated water demand factors in the hydraulic analysis. The SMP will similarly review changing sewer demands based on similar factors to determine updated flow and peaking factors in the sewer hydraulic analysis. Within the existing system, operational challenges, and trends (such as water main leaks and sewage spills) are factored into the capital improvement program. Within Ontario Ranch and other rapidly changing areas of the City, the master plan updates will reflect the latest infrastructure conditions and planning for expansion. The existing WMP, RWMP, and SMP were last prepared by AKM Consulting Engineers and adopted by City Council in 2012. Demand factors and hydraulic data were reevaluated by AKM Consulting Engineers and Stantec between 2017 and 2020 based on changing conditions but were not adopted pending the update to the 2050 TOP.

The State Water Resources Control Board adopted Order WQ 2022-0103-DWQ (Statewide Waste Discharge Requirements General Order for Sanitary Sewer Systems) on December 6, 2022, which became effective on June 5, 2023. The Order requires the City to conduct an internal audit and update its Sewer System Management Plan (SSMP) at a minimum once every three years. The City's SSMP was last audited February 11, 2021, and updated in April 2021. The SSMP describes the activities that an agency uses to effectively manage their wastewater collection system to properly manage, operate, and maintain all parts of the sanitary sewer system, to reduce, prevent, and mitigate sanitary sewer overflows. The audit evaluates the effectiveness of the SSMP to identify deficiencies (if any) and steps to correct them.

On August 22, 2023, two (2) bids were received through the City's electronic bid management system for Bid No. 1675, Potable Water and Recycled Water Master Plan Updates and Bid No. 1674 Sewer Master Plan Update. Companies that submitted bid are as follows:

Bidder	**Location**
AKM Consulting Engineers	Irvine, CA
Ardurra Group Inc.	Newport Beach, CA

Staff has reviewed the proposals, and negotiated engineering services for the WMP, RWMP, SMP updates, and included the SSMP Update and Audit. Based on their proposal, engineering expertise, knowledge of the City's systems, successful completion of this type of work in the past, and capability to perform the work in a timely manner, it is recommended to award the Professional Services Agreement to AKM Consulting Engineers.

CITY MANAGER

CITY OF ONTARIO
PROFESSIONAL SERVICES AGREEMENT

1. PARTIES AND DATE.

This Agreement is made and entered as of _____, by and between the City of Ontario, a municipal corporation organized under the laws of the State of California with its principal place of business at 303 East "B" Street, Ontario, California 91764-4196, County of San Bernardino, State of California ("City") and **AKM Consulting Engineers, a Corporation**, with its principal place of business at **553 Wald, Irvine, CA 92618** ("Consultant"). City and Consultant are sometimes individually referred to herein as "Party" and collectively as "Parties."

2. RECITALS.

2.1 Consultant.

Consultant desires to perform and assume responsibility for the provision of certain professional services required by the City on the terms and conditions set forth in this Agreement. Consultant represents that it is experienced in providing professional engineering services to public clients, is licensed in the State of California, and is familiar with the plans of City.

2.2 Project.

City desires to engage Consultant to render such professional services for the **2023 Potable Water, Recycled Water, Sewer Master Plan Updates, and Sewer System Management Plan and Audit** project ("Project") as set forth in this Agreement.

3. TERMS.

3.1 Scope of Services and Term.

3.1.1 General Scope of Services. Consultant promises and agrees to furnish to the City all labor, materials, tools, equipment, services, and incidental and customary work necessary to fully and adequately supply the professional engineering consulting services necessary for the Project ("Services"). The Services are more particularly described in Exhibit "A" attached hereto and incorporated herein by reference. All Services shall be subject to, and performed in accordance with, this Agreement, the exhibits attached hereto and incorporated herein by reference, and all applicable local, state and federal laws, rules and regulations.

3.1.2 Term. The term of this Agreement shall be from **November 21, 2023 to November 21, 2025**, unless earlier terminated as provided herein. Consultant shall complete the Services within the term of this Agreement, and shall meet any other established schedules and deadlines. The Parties may, by mutual, written consent, extend the term of this Agreement if necessary to complete the Services.

3.2 Compensation.

3.2.1 Compensation. Consultant shall receive compensation, including authorized reimbursements, for all Services rendered under this Agreement at the rates set forth in Exhibit "C" attached hereto and incorporated herein by reference. The total compensation shall not exceed **One Million Six Hundred Forty Six Thousand Seven Hundred Eighty Four Dollars and Zero Cents** (**$1,646,784.00**) without written approval of the City Council or City Manager, as applicable. Extra Work may be authorized, as described below, and if authorized, will be compensated at the rates and manner set forth in this Agreement.

3.2.2 Payment of Compensation. Consultant shall submit to City a monthly invoice which indicates work completed and hours of Services rendered by Consultant. The invoice shall describe the amount of Services provided since the initial commencement date, or since the start of the subsequent billing periods, as appropriate, through the date of the invoice. City shall, within 30 days of receiving such invoice, review the invoice and pay all non-disputed and approved charges. If the City disputes any of Consultant's fees, the City shall give written notice to Consultant within thirty (30) days of receipt of an invoice of any disputed fees set forth therein. Payment shall not constitute acceptance of any Services completed by Consultant. The making of final payment shall not constitute a waiver of any claims by the City for any reason whatsoever.

3.2.3 Reimbursement for Expenses. Consultant shall not be reimbursed for any expenses unless authorized in writing by City, or included in Exhibit "C" of this Agreement.

3.2.4 Extra Work. At any time during the term of this Agreement, City may request that Consultant perform Extra Work. As used herein, "Extra Work" means any work which is determined by City to be necessary for the proper completion of the Project, but which the Parties did not reasonably anticipate would be necessary at the execution of this Agreement. Consultant shall not perform, nor be compensated for, Extra Work without written authorization from the City.

3.3 Responsibilities of Consultant.

3.3.1 Independent Contractor; Control and Payment of Subordinates. The Services shall be performed by Consultant or under its supervision. Consultant will determine the means, methods and details of performing the Services subject to the requirements of this Agreement. City retains Consultant on an independent contractor basis and not as an employee. Any personnel performing the Services on behalf of Consultant shall not be employees of City and shall at all times be under Consultant's exclusive direction and control. Neither City, or any of its officials, officers, directors, employees or agents shall have control over the conduct of Consultant or any of Consultants officers, employees or agents, except as set forth in this Agreement. Consultant shall pay all wages, salaries, and other amounts due such personnel in connection with their performance of Services under this Agreement and as required by law. Consultant shall be responsible for all reports and obligations respecting such additional

personnel, including, but not limited to: social security taxes, income tax withholding, unemployment insurance, disability insurance, and workers' compensation insurance.

3.3.2 Schedule of Services. Consultant shall perform the Services in a prompt and timely manner and in accordance with the Schedule of Services set forth in Exhibit "B" attached hereto and incorporated herein by reference. Consultant represents that it has the professional and technical personnel required to perform the Services expeditiously. Upon request of City, Consultant shall provide a more detailed schedule of anticipated performance to meet the Schedule of Services.

3.3.3 Conformance to Applicable Requirements. All work prepared by Consultant shall be subject to the approval of City.

3.3.4 Substitution of Key Personnel. Consultant has represented to City that certain key personnel will perform and coordinate the Services under this Agreement. Should one or more of such personnel become unavailable, Consultant may substitute other personnel of at least equal competence upon written approval of City. In the event that City and Consultant cannot agree as to the substitution of key personnel, City shall be entitled to terminate this Agreement for cause. The key personnel for performance of this Agreement are as follows: **Zeki Kayiran, P.E., Principal-in-Charge**.

3.3.5 City's Representative. The City hereby designates **Dennis Mejia, P.E., Utilities Engineering Division Manager**, or his/her designee, to act as its representative in all matters pertaining to the administration and performance of this Agreement ("City's Representative"). City's Representative shall have the power to act on behalf of the City for review and approval of all products submitted by Consultant but not the authority to enlarge the Scope of Services or change the total compensation due to Consultant under this Agreement. The City Manager shall be authorized to act on City's behalf and to execute all necessary documents which enlarge the Scope of Services or change the Consultant's total compensation subject to the provisions contained in this Agreement. Consultant shall not accept direction or orders from any person other than the City Manager, City's Representative or his/her designee.

3.3.6 Consultant's Representative. Consultant hereby designates **Zeki Kayiran, P.E., Principal-in-Charge**, or his/her designee, to act as its representative for the performance of this Agreement ("Consultant's Representative"). Consultant's Representative shall have full authority to represent and act on behalf of the Consultant for all purposes under this Agreement. The Consultant's Representative shall supervise and direct the Services, using his/her best skill and attention, and shall be responsible for all means, methods, techniques, sequences, and procedures and for the satisfactory coordination of all portions of the Services under this Agreement.

3.3.7 Coordination of Services. Consultant agrees to work closely with City staff in the performance of Services and shall be available to City's staff, consultants and other staff at all reasonable times.

3.3.8 Standard of Care; Performance of Employees. Consultant shall perform all Services under this Agreement in a skillful and competent manner, consistent with the standards generally recognized as being employed by professionals in the same discipline in the State of California. Consultant represents and maintains that it is skilled in the professional calling necessary to perform the Services. Consultant warrants that all employees and subconsultants

shall have sufficient skill and experience to perform the Services assigned to them. Consultant represents that it, its employees and subconsultants have all licenses, permits, qualifications and approvals of whatever nature that are legally required to perform the Services, and that such licenses and approvals shall be maintained throughout the term of this Agreement. Consultant shall perform, at its own cost and expense and without reimbursement from the City, any services necessary to correct errors or omissions which are caused by the Consultant's failure to comply with the standard of care provided for herein. Any employee of the Consultant or its subconsultants who is determined by the City to be uncooperative, incompetent, a threat to the adequate or timely completion of the Project, a threat to the safety of persons or property, or any employee who fails or refuses to perform the Services in a manner acceptable to the City, shall be promptly removed from the Project by the Consultant and shall not be re-employed to perform any of the Services or to work on the Project.

3.3.9 Period of Performance.

3.3.9.1 Consultant shall perform and complete all Services under this Agreement within the term set forth in Section 3.1.2 above ("Performance Time"). Consultant shall also perform the Services in strict accordance with any completion schedule or Project milestones described in Exhibits "A" or "B" attached hereto, or which may be separately agreed upon in writing by the City and Consultant ("Performance Milestones"). Consultant agrees that if the Services are not completed within the aforementioned Performance Time and/or pursuant to any such Performance Milestones developed pursuant to provisions of this Agreement, it is understood, acknowledged and agreed that the City will suffer damage.

3.3.9.2 Neither City nor Consultant shall be considered in default of this Agreement for delays in performance caused by circumstances beyond the reasonable control of the non-performing Party. For purposes of this Agreement, such circumstances include a Force Majeure Event. A Force Majeure Event shall mean an event that materially affects a Party's performance and is one or more of the following: (1) Acts of God or other natural disasters; (2) terrorism or other acts of a public enemy; (3) orders of governmental authorities (including, without limitation, unreasonable and unforeseeable delay in the issuance of permits or approvals by governmental authorities that are required for the services); (4) strikes and other organized labor action occurring at the site and the effects thereof on the services, only to the extent such strikes and other organized labor action are beyond the control of Consultant and its subcontractors, and to the extent the effects thereof cannot be avoided by use of replacement workers; and (5) pandemics, epidemics or quarantine restrictions. For purposes of this section, "orders of governmental authorities," includes ordinances, emergency proclamations and orders, rules to protect the public health, welfare and safety, and other actions of a public agency applicable to the services and Agreement.

3.3.9.3 Should a Force Majeure Event occur, the non-performing Party shall, within a reasonable time of being prevented from performing, give written notice to the other Party describing the circumstances preventing continued performance and the efforts being made to resume performance of this Agreement. Force Majeure Events and/or delays, regardless of the Party responsible for the delay, shall not entitle Consultant to any additional compensation. Notwithstanding the foregoing in this section, the City may still terminate this Agreement in accordance with the termination provisions of this Agreement.

3.3.10 Laws and Regulations; Employee/Labor Certification.

3.3.10.1 Compliance with Laws. Consultant shall keep itself fully informed of and in compliance with all local, state and federal laws, rules and regulations in any manner affecting the performance of the Project or the Services, including all Cal/OSHA requirements, and shall give all notices required by law. Consultant shall be liable for all violations of such laws and regulations in connection with the Services and this Agreement. All violations of such laws and regulations shall be grounds for the City to terminate the Agreement for cause.

3.3.10.2 Employment Eligibility; Consultant. Consultant certifies that it fully complies with all requirements and restrictions of state and federal law respecting the employment of undocumented aliens, including, but not limited to, the Immigration Reform and Control Act of 1986, as may be amended from time to time and shall require all subconsultants and sub-subconsultants to comply with the same. Consultant certifies that it has not committed a violation of any such law within the five (5) years immediately preceding the date of execution of this Agreement, and shall not violate any such law at any time during the term of the Agreement.

3.3.10.3 Equal Opportunity Employment. Consultant represents that it is an equal opportunity employer and it shall not discriminate against any subconsultant, employee or applicant for employment because of race, religion, color, national origin, handicap, ancestry, sex or age. Such non-discrimination shall include, but not be limited to, all activities related to initial employment, upgrading, demotion, transfer, recruitment or recruitment advertising, layoff or termination. Consultant shall also comply with all relevant provisions of City's Minority Business Enterprise program, Affirmative Action Plan or other related programs or guidelines currently in effect or hereinafter enacted.

3.3.10.4 Air Quality. To the extent applicable, Consultant must fully comply with all applicable laws, rules and regulations in furnishing or using equipment and/or providing services, including, but not limited to, emissions limits and permitting requirements imposed by the South Coast Air Quality Management District (SCAQMD) and/or California Air Resources Board (CARB). Consultant shall indemnify City against any fines or penalties imposed by SCAQMD, CARB, or any other governmental or regulatory agency for violations of applicable laws, rules and/or regulations by Consultant, its subconsultants, or others for whom Consultant is responsible under its indemnity obligations provided for in this Agreement.

3.3.10.5 Water Quality Management and Compliance. Consultant shall keep itself and all subcontractors, staff, and employees fully informed of and in compliance with all local, state and federal laws, rules and regulations that may impact, or be implicated by the performance of the Services including, without limitation, all applicable provisions of the City's ordinances regulating water quality and storm water; the Federal Water Pollution Control Act (33 U.S.C. § 1251, *et seq.*); the California Porter-Cologne Water Quality Control Act (Water Code § 13000 *et seq*.); and any and all regulations, policies, or permits issued pursuant to any such authority. Consultant must additionally comply with the lawful requirements of the City, and any other municipality, drainage district, or other local agency with jurisdiction over the location where the Services are to be conducted, regulating water quality and storm water discharges. City may seek damages from Consultant for delay in completing the Services caused by Consultant's failure to comply with the laws, regulations and policies described in this Section, or any other relevant water quality law, regulation, or policy.

3.3.10.6 Safety. Consultant shall execute and maintain its work so as to avoid injury or damage to any person or property. In carrying out its Services, the Consultant shall at all times be in compliance with all applicable local, state and federal laws, rules and

regulations, and shall exercise all necessary precautions for the safety of employees appropriate to the nature of the work and the conditions under which the work is to be performed.

3.3.11 Insurance.

3.3.11.1 Time for Compliance. Consultant shall not commence work under this Agreement until it has provided evidence satisfactory to the City that it has secured all insurance required under this section. In addition, Consultant shall not allow any subconsultant to commence work on any subcontract until it has provided evidence satisfactory to the City that the subconsultant has secured all insurance required under this section. Failure to provide and maintain all required insurance shall be grounds for the City to terminate this Agreement for cause.

3.3.11.2 Types of Insurance Required. As a condition precedent to the effectiveness of this Agreement for work to be performed hereunder, and without limiting the indemnity provisions of the Agreement, the Consultant, in partial performance of its obligations under such Agreement, shall procure and maintain in full force and effect during the term of the Agreement the following policies of insurance. If the existing policies do not meet the insurance requirements set forth herein, Consultant agrees to amend, supplement or endorse the policies to do so.

(A) Commercial General Liability: Commercial General Liability Insurance which affords coverage at least as broad as Insurance Services Office "occurrence" form CG 00 01, or the exact equivalent, with limits of not less than $2,000,000 per occurrence and no less than $4,000,000 in the general aggregate. Defense costs shall be paid in addition to the limits. The policy shall contain no endorsements or provisions (1) limiting coverage for contractual liability; (2) excluding coverage for claims or suits by one insured against another (cross-liability); (3) products/completed operations liability; or (4) containing any other exclusion(s) contrary to the terms or purposes of this Agreement.

(B) Automobile Liability Insurance: Automobile Liability Insurance with coverage at least as broad as Insurance Services Office Form CA 00 01 covering "Any Auto" (Symbol 1), or the exact equivalent, covering bodily injury and property damage for all activities with limits of not less than $2,000,000 combined limit for each occurrence.

(C) Workers' Compensation: Workers' Compensation Insurance, as required by the State of California and Employer's Liability Insurance with a limit of not less than $1,000,000 per accident for bodily injury and disease.

(D) Professional Liability (Errors & Omissions): Professional Liability insurance or Errors & Omissions insurance appropriate to Consultant's profession with limits of not less than $2,000,000. Covered professional services shall specifically include all work to be performed under the Agreement and delete any exclusions that may potentially affect the work to be performed (for example, any exclusions relating to lead, asbestos, pollution, testing, underground storage tanks, laboratory analysis, soil work, etc.). If coverage is written on a claims-made basis, the retroactive date shall precede the effective date of the initial Agreement and continuous coverage will be maintained or an extended reporting period will be exercised for a period of at least five (5) years from termination or expiration of this Agreement.

3.3.11.3 Insurance Endorsements. Required insurance policies shall contain the following provisions, or Consultant shall provide endorsements on forms approved by the City to add the following provisions to the insurance policies:

(A) Commercial General Liability: (1) Additional Insured: The City, its officials, officers, employees, agents, and volunteers shall be additional insureds with regard to liability and defense of suits or claims arising out of the performance of the Agreement. Additional Insured Endorsements shall not (1) be restricted to "ongoing operations"; (2) exclude "contractual liability"; (3) restrict coverage to "sole" liability of Consultant; or (4) contain any other exclusions contrary to the terms or purposes of this Agreement. For all policies of Commercial General Liability insurance, Consultant shall provide endorsements in the form of ISO CG 20 10 10 01 and 20 37 10 01 (or endorsements providing the exact same coverage) to effectuate this requirement. (2) Cancellation: Required insurance policies shall not be canceled or the coverage reduced until a thirty (30) day written notice of cancellation has been served upon the City except ten (10) days shall be allowed for non-payment of premium.

(B) Automobile Liability: (1) Additional Insured: The City, its directors, officials, officers, employees, agents, and volunteers shall be covered as additional insureds with respect to the ownership, operation, maintenance, use, loading or unloading of any auto owned, leased, hired or borrowed by the Vendor or for which the Vendor is responsible. (2) Cancellation: Required insurance policies shall not be canceled or the coverage reduced until a thirty (30) day written notice of cancellation has been served upon the City except ten (10) days shall be allowed for non-payment of premium.

(C) Professional Liability (Errors & Omissions): (1) Cancellation: Required insurance policies shall not be canceled or the coverage reduced until a thirty (30) day written notice of cancellation has been served upon the City except ten (10) days shall be allowed for non-payment of premium. (2) This insurance shall be written on a policy form coverage specifically designed to protect against acts, errors or omissions of the Consultant. “Covered Professional Services” as designated in the policy must specifically include work performed under this Agreement. The policy must “pay on behalf of” the insured and include a provision establishing the insurer’s duty to defend.

(D) Workers' Compensation: (1) Cancellation: Required insurance policies shall not be canceled or the coverage reduced until a thirty (30) day written notice of cancellation has been served upon the City except ten (10) days shall be allowed for non-payment of premium. (2) Waiver of Subrogation: A waiver of subrogation stating that the insurer waives all rights of subrogation against the City, its officials, officers, employees, agents, and volunteers.

3.3.11.4 Primary and Non-Contributing Insurance. All policies of Commercial General Liability and Automobile Liability insurance shall be primary and any other insurance, deductible, or self-insurance maintained by the City, its officials, officers, employees, agents, or volunteers shall not contribute with this primary insurance. Policies shall contain or be endorsed to contain such provisions.

3.3.11.5 Waiver of Subrogation. All required insurance coverages, except for the professional liability coverage, shall contain or be endorsed to waiver of subrogation in favor of the City, its officials, officers, employees, agents, and volunteers or shall specifically allow Consultant or others providing insurance evidence in compliance with these specifications

to waive their right of recovery prior to a loss. Consultant hereby waives its own right of recovery against City, and shall require similar written express waivers and insurance clauses from each of its subconsultants.

3.3.11.6 Deductibles and Self-Insured Retentions. Any deductible or self-insured retention must be approved in writing by the City and shall protect the City, its officials, officers, employees, agents, and volunteers in the same manner and to the same extent as they would have been protected had the policy or policies not contained a deductible or self-insured retention.

3.3.11.7 Evidence of Insurance. The Consultant, concurrently with the execution of the Agreement, and as a condition precedent to the effectiveness thereof, shall deliver either certified copies of the required policies, or original certificates on forms approved by the City, together with all endorsements affecting each policy. Required insurance policies shall not be in compliance if they include any limiting provision or endorsement that has not been submitted to the City for approval. The certificates and endorsements for each insurance policy shall be signed by a person authorized by that insurer to bind coverage on its behalf. At least fifteen (15 days) prior to the expiration of any such policy, evidence of insurance showing that such insurance coverage has been renewed or extended shall be filed with the City. If such coverage is cancelled or reduced and not replaced immediately so as to avoid a lapse in the required coverage, Consultant shall, within ten (10) days after receipt of written notice of such cancellation or reduction of coverage, file with the City evidence of insurance showing that the required insurance has been reinstated or has been provided through another insurance company or companies.

3.3.11.8 Acceptability of Insurers. Each such policy shall be from a company or companies with a current A.M. Best's rating of no less than A:VII and authorized to transact business of insurance in the State of California, or otherwise allowed to place insurance through surplus line brokers under applicable provisions of the California Insurance Code or any federal law.

3.3.11.9 Enforcement of Agreement Provisions (non estoppel). Consultant acknowledges and agrees that actual or alleged failure on the part of the City to inform Consultant of non-compliance with any requirement imposes no additional obligation on the City nor does it waive any rights hereunder.

3.3.11.10 Requirements Not Limiting. Requirement of specific coverage or minimum limits contained in this Section are not intended as a limitation on coverage, limits, or other requirement, or a waiver of any coverage normally provided by any insurance.

3.3.11.11 Additional Insurance Provisions

(A) The foregoing requirements as to the types and limits of insurance coverage to be maintained by Consultant, and any approval of said insurance by the City, is not intended to and shall not in any manner limit or qualify the liabilities and obligations otherwise assumed by the Consultant pursuant to this Agreement, including but not limited to, the provisions concerning indemnification.

(B) If at any time during the life of the Agreement, any policy of insurance required under this Agreement does not comply with these specifications or is canceled

and not replaced, City has the right but not the duty to obtain the insurance it deems necessary and any premium paid by City will be promptly reimbursed by Consultant or City will withhold amounts sufficient to pay premium from Consultant payments. In the alternative, City may cancel this Agreement.

(C) The City may require the Consultant to provide complete copies of all insurance policies in effect for the duration of the Project.

(D) Neither the City nor any of its officials, officers, employees, agents or volunteers shall be personally responsible for any liability arising under or by virtue of this Agreement.

(E) The limits set forth herein shall apply separately to each insured against whom claims are made or suits are brought, except with respect to the limits of liability. Further the limits set forth herein shall not be construed to relieve the Consultant from liability in excess of such coverage, nor shall it limit the Consultant's indemnification obligations to the City and shall not preclude the City from taking such other actions available to the City under other provisions of the Agreement or law.

(F) Consultant shall report to the City, in addition to Consultant's insurer, any and all insurance claims submitted by Consultant in connection with the Services under this Agreement.

3.3.11.12 Insurance for Subconsultants. Consultant shall include all subconsultants engaged in any work for Consultant relating to this Agreement as additional insureds under the Consultant's policies, or the Consultant shall be responsible for causing subconsultants to purchase the appropriate insurance in compliance with the terms of these Insurance Requirements, including adding the City, its officials, officers, employees, agents, and volunteers as additional insureds to the subconsultant's policies. All policies of Commercial General Liability insurance provided by Consultant's subconsultants performing work relating to this Agreement shall be endorsed to name the City, its officials, officers, employees, agents and volunteers as additional insureds using endorsement form ISO CG 20 38 04 13 or an endorsement providing equivalent coverage. Consultant shall not allow any subconsultant to commence work on any subcontract relating to this Agreement until it has received satisfactory evidence of subconsultant's compliance with all insurance requirements under this Agreement, to the extent applicable. The Consultant shall provide satisfactory evidence of compliance with this section upon request of the City.

3.4 Labor Code Requirements.

3.4.1 Prevailing Wages. Consultant is aware of the requirements of California Labor Code Section 1720, et seq., and 1770, et seq., as well as California Code of Regulations, Title 8, Section 16000, et seq., ("Prevailing Wage Laws"), which require the payment of prevailing wage rates and the performance of other requirements on "public works" and "maintenance" projects. If the Services are being performed as part of an applicable "public works" or "maintenance" project, as defined by the Prevailing Wage Laws, and if the total compensation is $1,000 or more, Consultant agrees to fully comply with such Prevailing Wage Laws. City shall provide Consultant with a copy of the prevailing rates of per diem wages in effect at the commencement of this Agreement. Consultant shall make copies of the prevailing rates of per diem wages for each craft, classification or type of worker needed to execute the Services

available to interested parties upon request, and shall post copies at the Consultant's principal place of business and at the project site. It is the intent of the parties to effectuate the requirements of sections 1771, 1774, 1775, 1776, 1777.5, 1813, and 1815 of the Labor Code within this Agreement, and Consultant shall therefore comply with such Labor Code sections to the fullest extent required by law. Consultant shall defend, indemnify and hold the City, its officials, officers, employees, agents, and volunteers free and harmless from any claim or liability arising out of any failure or alleged failure to comply with the Prevailing Wage Laws.

3.4.2 Registration/DIR Compliance. If the Services are being performed on a public works project of over $25,000 when the project is for construction, alteration, demolition, installation, or repair work, or a public works project of over $15,000 when the project is for maintenance work, in addition to the foregoing, then pursuant to Labor Code sections 1725.5 and 1771.1, the Consultant and all subconsultants must be registered with the Department of Industrial Relations ("DIR"). Consultant shall maintain registration for the duration of the Project and require the same of any subconsultants.

3.4.3 Compliance Monitoring. This Project may also be subject to compliance monitoring and enforcement by the DIR. It shall be Consultant's sole responsibility to comply with all applicable registration and labor compliance requirements, including the submission of payroll records directly to the DIR. Any stop orders issued by the DIR against Consultant or any subconsultant that affect Consultant's performance of services, including any delay, shall be Consultant's sole responsibility. Any delay arising out of or resulting from such stop orders shall be considered Consultant caused delay and shall not be compensable by the City. Consultant shall defend, indemnify and hold the City, its officials, officers, employees and agents free and harmless from any claim or liability arising out of stop orders issued by the DIR against Consultant or any subconsultant.

3.4.4 Labor Certification. By its signature hereunder, Consultant certifies that it is aware of the provisions of Section 3700 of the California Labor Code which require every employer to be insured against liability for Worker's Compensation or to undertake self-insurance in accordance with the provisions of that Code, and agrees to comply with such provisions before commencing the performance of the Services.

3.5 Termination of Agreement.

3.5.1.1 Grounds for Termination. City may, by written notice to Consultant, terminate the whole or any part of this Agreement at any time and without cause by giving written notice to Consultant of such termination, and specifying the effective date thereof, at least seven (7) days before the effective date of such termination. Upon termination, Consultant shall be compensated only for those Services which have been adequately rendered to City, and Consultant shall be entitled to no further compensation. Consultant may not terminate this Agreement except for cause. The rights and remedies of the City provided in this section shall not be exclusive and are in addition to any other rights and remedies provided by law, equity or under this Agreement.

3.5.1.2 Effect of Termination. If this Agreement is terminated as provided herein, City may require Consultant to provide all finished or unfinished Documents and Data and other information of any kind prepared by Consultant in connection with the performance of Services under this Agreement. Consultant shall be required to provide such document and other information within fifteen (15) days of the request.

3.5.1.3 Additional Services. In the event this Agreement is terminated in whole or in part as provided herein, City may procure, upon such terms and in such manner as it may determine appropriate, services similar to those terminated.

3.6 Indemnification.

3.6.1 To the fullest extent permitted by law, Consultant shall defend (with counsel of City's choosing), indemnify and hold the City, its officials, officers, employees, volunteers, and agents free and harmless from any and all claims, demands, causes of action, costs, expenses, liability, loss, damage or injury of any kind, in law or equity, to property or persons, including wrongful death, in any manner arising out of, pertaining to, or incident to any acts, errors or omissions, or willful misconduct of Consultant, its officials, officers, employees, subcontractors, consultants or agents in connection with the performance of the Consultant's Services, the Project or this Agreement, including without limitation the payment of all damages, expert witness fees and attorney's fees and other related costs and expenses except such loss or damage caused by the sole negligence or willful misconduct of the City. Consultant's obligation to indemnify shall survive expiration or termination of this Agreement and shall not be restricted to insurance proceeds, if any, received by Consultant, the City, its officials, officers, employees, agents, or volunteers.

3.6.2 If Consultant's obligation to defend, indemnify, and/or hold harmless arises out of Consultant's performance as a "design professional" (as that term is defined under Civil Code section 2782.8), then, and only to the extent required by Civil Code section 2782.8, which is fully incorporated herein, Consultant's indemnification obligation shall be limited to claims that arise out of, pertain to, or relate to the negligence, recklessness, or willful misconduct of the Consultant, and, upon Consultant obtaining a final adjudication by a court of competent jurisdiction, Consultant's liability for such claim, including the cost to defend, shall not exceed the Consultant's proportionate percentage of fault.

3.7 General Provisions.

3.7.1 Accounting Records. Consultant shall maintain complete and accurate records with respect to all costs and expenses incurred under this Agreement. All such records shall be clearly identifiable. Consultant shall allow a representative of City during normal business hours to examine, audit, and make transcripts or copies of such records and any other documents created pursuant to this Agreement. Consultant shall allow inspection of all work, data, documents, proceedings, and activities related to the Agreement for a period of three (3) years from the date of final payment under this Agreement.

3.7.2 Independent Contractors and Subcontracting.

3.7.2.1 Use of Consultants. Consultant is aware of statutory and case law regarding classification of workers as independent contractors, including California Labor Code Section 2750.3 and Dynamex Operations West, Inc. v. Superior Court, 4 Cal. 5th 903 (2018). To ensure that Consultant is in compliance with the California Labor Code, Consultant shall only utilize its employees to provide the Services. Consultant may not provide the services through any independent contractor, subcontractor or subconsultant ("Subcontractor(s)") unless approved by the City as set forth in Section 3.7.2.2 below. Consultant represents and warrants that all personnel who perform the Services on Consultant's behalf are Consultant's employees, and that Consultant complies with all applicable laws, rules and regulations governing its

employees, including, but not limited to, the California Labor Code, Unemployment Insurance Code and all applicable Industrial Welfare Commission Wage Orders.

3.7.2.2 Prior Approval Required. Consultant shall not use any Subcontractor to provide the Services, or any portion of the work required by this Agreement, without prior written approval of City. In the event that City authorizes Consultant to use a Subcontractor, Consultant shall enter into a written agreement with the Subcontractor, which must include all provisions of the Agreement, including a restriction on the Subcontractor's use of further independent contractors, subcontractors or subconsultants without the City's prior written consent.

3.7.3 Delivery of Notices. All notices permitted or required under this Agreement shall be given to the respective parties at the following address, or at such other address as the respective parties may provide in writing for this purpose:

Consultant:	AKM Consulting Engineers 553 Wald Irvine, CA 92618 ATTN: Diann Pay, P.E., Project Manager
City:	City of Ontario 303 East "B" Street Ontario, CA 91764 ATTN: Dennis Mejia, P.E., Utilities Engineering Division Manager
With Copy To:	City of Ontario 303 East "B" Street Ontario, CA 91764 ATTN: Records Management

Such notice shall be deemed made when personally delivered or when mailed, forty-eight (48) hours after deposit in the U.S. Mail, first class postage prepaid and addressed to the party at its applicable address. Actual notice shall be deemed adequate notice on the date actual notice occurred, regardless of the method of service.

3.7.4 Ownership of Materials and Confidentiality.

3.7.4.1 Documents & Data; Licensing of Intellectual Property. This Agreement creates a non-exclusive and perpetual license for City to copy, use, modify, reuse, or sublicense any and all copyrights, designs, and other intellectual property embodied in plans, specifications, studies, drawings, estimates, and other documents or works of authorship fixed in any tangible medium of expression, including but not limited to, physical drawings or data magnetically or otherwise recorded on computer diskettes, which are prepared or caused to be prepared by Consultant under this Agreement ("Documents & Data"). All Documents & Data shall be and remain the property of City, and shall not be used in whole or in substantial part by Consultant on other projects without the City's express written permission. Within thirty (30) days following the completion, suspension, abandonment or termination of this Agreement, Consultant shall provide to City reproducible copies of all Documents & Data, in a form and amount required by City. City reserves the right to select the method of document reproduction and to establish

where the reproduction will be accomplished. The reproduction expense shall be borne by City at the actual cost of duplication. In the event of a dispute regarding the amount of compensation to which the Consultant is entitled under the termination provisions of this Agreement, Consultant shall provide all Documents & Data to City upon payment of the undisputed amount. Consultant shall have no right to retain or fail to provide to City any such documents pending resolution of the dispute. In addition, Consultant shall retain copies of all Documents & Data on file for a minimum of fifteen (15) years following completion of the Project, and shall make copies available to City upon the payment of actual reasonable duplication costs. Before destroying the Documents & Data following this retention period, Consultant shall make a reasonable effort to notify City and provide City with the opportunity to obtain the documents.

3.7.4.2 Subconsultants. Consultant shall require all subconsultants to agree in writing that City is granted a non-exclusive and perpetual license for any Documents & Data the subconsultant prepares under this Agreement. Consultant represents and warrants that Consultant has the legal right to license any and all Documents & Data. Consultant makes no such representation and warranty in regard to Documents & Data which were prepared by design professionals other than Consultant or its subconsultants, or those provided to Consultant by the City.

3.7.4.3 Right to Use. City shall not be limited in any way in its use or reuse of the Documents and Data or any part of them at any time for purposes of this Project or another project, provided that any such use not within the purposes intended by this Agreement or on a project other than this Project without employing the services of Consultant shall be at City's sole risk. If City uses or reuses the Documents & Data on any project other than this Project, it shall remove the Consultant's seal from the Documents & Data and indemnify and hold harmless Consultant and its officers, directors, agents and employees from claims arising out of the negligent use or re-use of the Documents & Data on such other project. Consultant shall be responsible and liable for its Documents & Data, pursuant to the terms of this Agreement, only with respect to the condition of the Documents & Data at the time they are provided to the City upon completion, suspension, abandonment or termination. Consultant shall not be responsible or liable for any revisions to the Documents & Data made by any party other than Consultant, a party for whom the Consultant is legally responsible or liable, or anyone approved by the Consultant.

3.7.4.4 Indemnification. Consultant shall defend, indemnify and hold the City, its directors, officials, officers, employees, volunteers and agents free and harmless, pursuant to the indemnification provisions of this Agreement, for any alleged infringement of any patent, copyright, trade secret, trade name, trademark, or any other proprietary right of any person or entity in consequence of the use on the Project by City of the Documents & Data, including any method, process, product, or concept specified or depicted.

3.7.4.5 Confidentiality. All ideas, memoranda, specifications, plans, procedures, drawings, descriptions, computer program data, input record data, written information, and other Documents & Data either created by or provided to Consultant in connection with the performance of this Agreement shall be held confidential by Consultant. Such materials shall not, without the prior written consent of City, be used by Consultant for any purposes other than the performance of the Services. Nor shall such materials be disclosed to any person or entity not connected with the performance of the Services or the Project. Nothing furnished to Consultant which is otherwise known to Consultant or is generally known, or has become known, to the related industry shall be deemed confidential. Consultant shall not use

City's name or insignia, photographs of the Project, or any publicity pertaining to the Services or the Project in any magazine, trade paper, newspaper, television or radio production or other similar medium without the prior written consent of City.
