HISTORY/FACTS/ISSUES:

Background:

At the November 11, 2025 Town Council meeting, Council provided design feedback on the proposed restroom facility near the Windermere Library. Residents subsequently submitted additional input on November 12, 2025. The purpose of this workshop is to review both concepts side-by-side and gather final direction before design development continues.

Overview of Options:

Option 1 – Town Council Concept:

Reflects feedback from the November 11 Town Council meeting, including:

- Removal of toddler fixtures in ADA stalls (retained only in the family restroom)
- Relocation of sinks to the front foyer and addition of two stalls to the women's side
- Removal of dual side "wings" in favor of a single storage area or internal janitor's closet
- Addition of a water bottle refill station under the covered porch
- Straightened center wall between men's and women's sides
- Reduction to one baby changing station per restroom and one in the family restroom (three total)
- Inclusion of touchless fixtures, ADA-accessible push-button entry, air conditioning, and full-height masonry walls

Option 2 – Resident Input Concept:

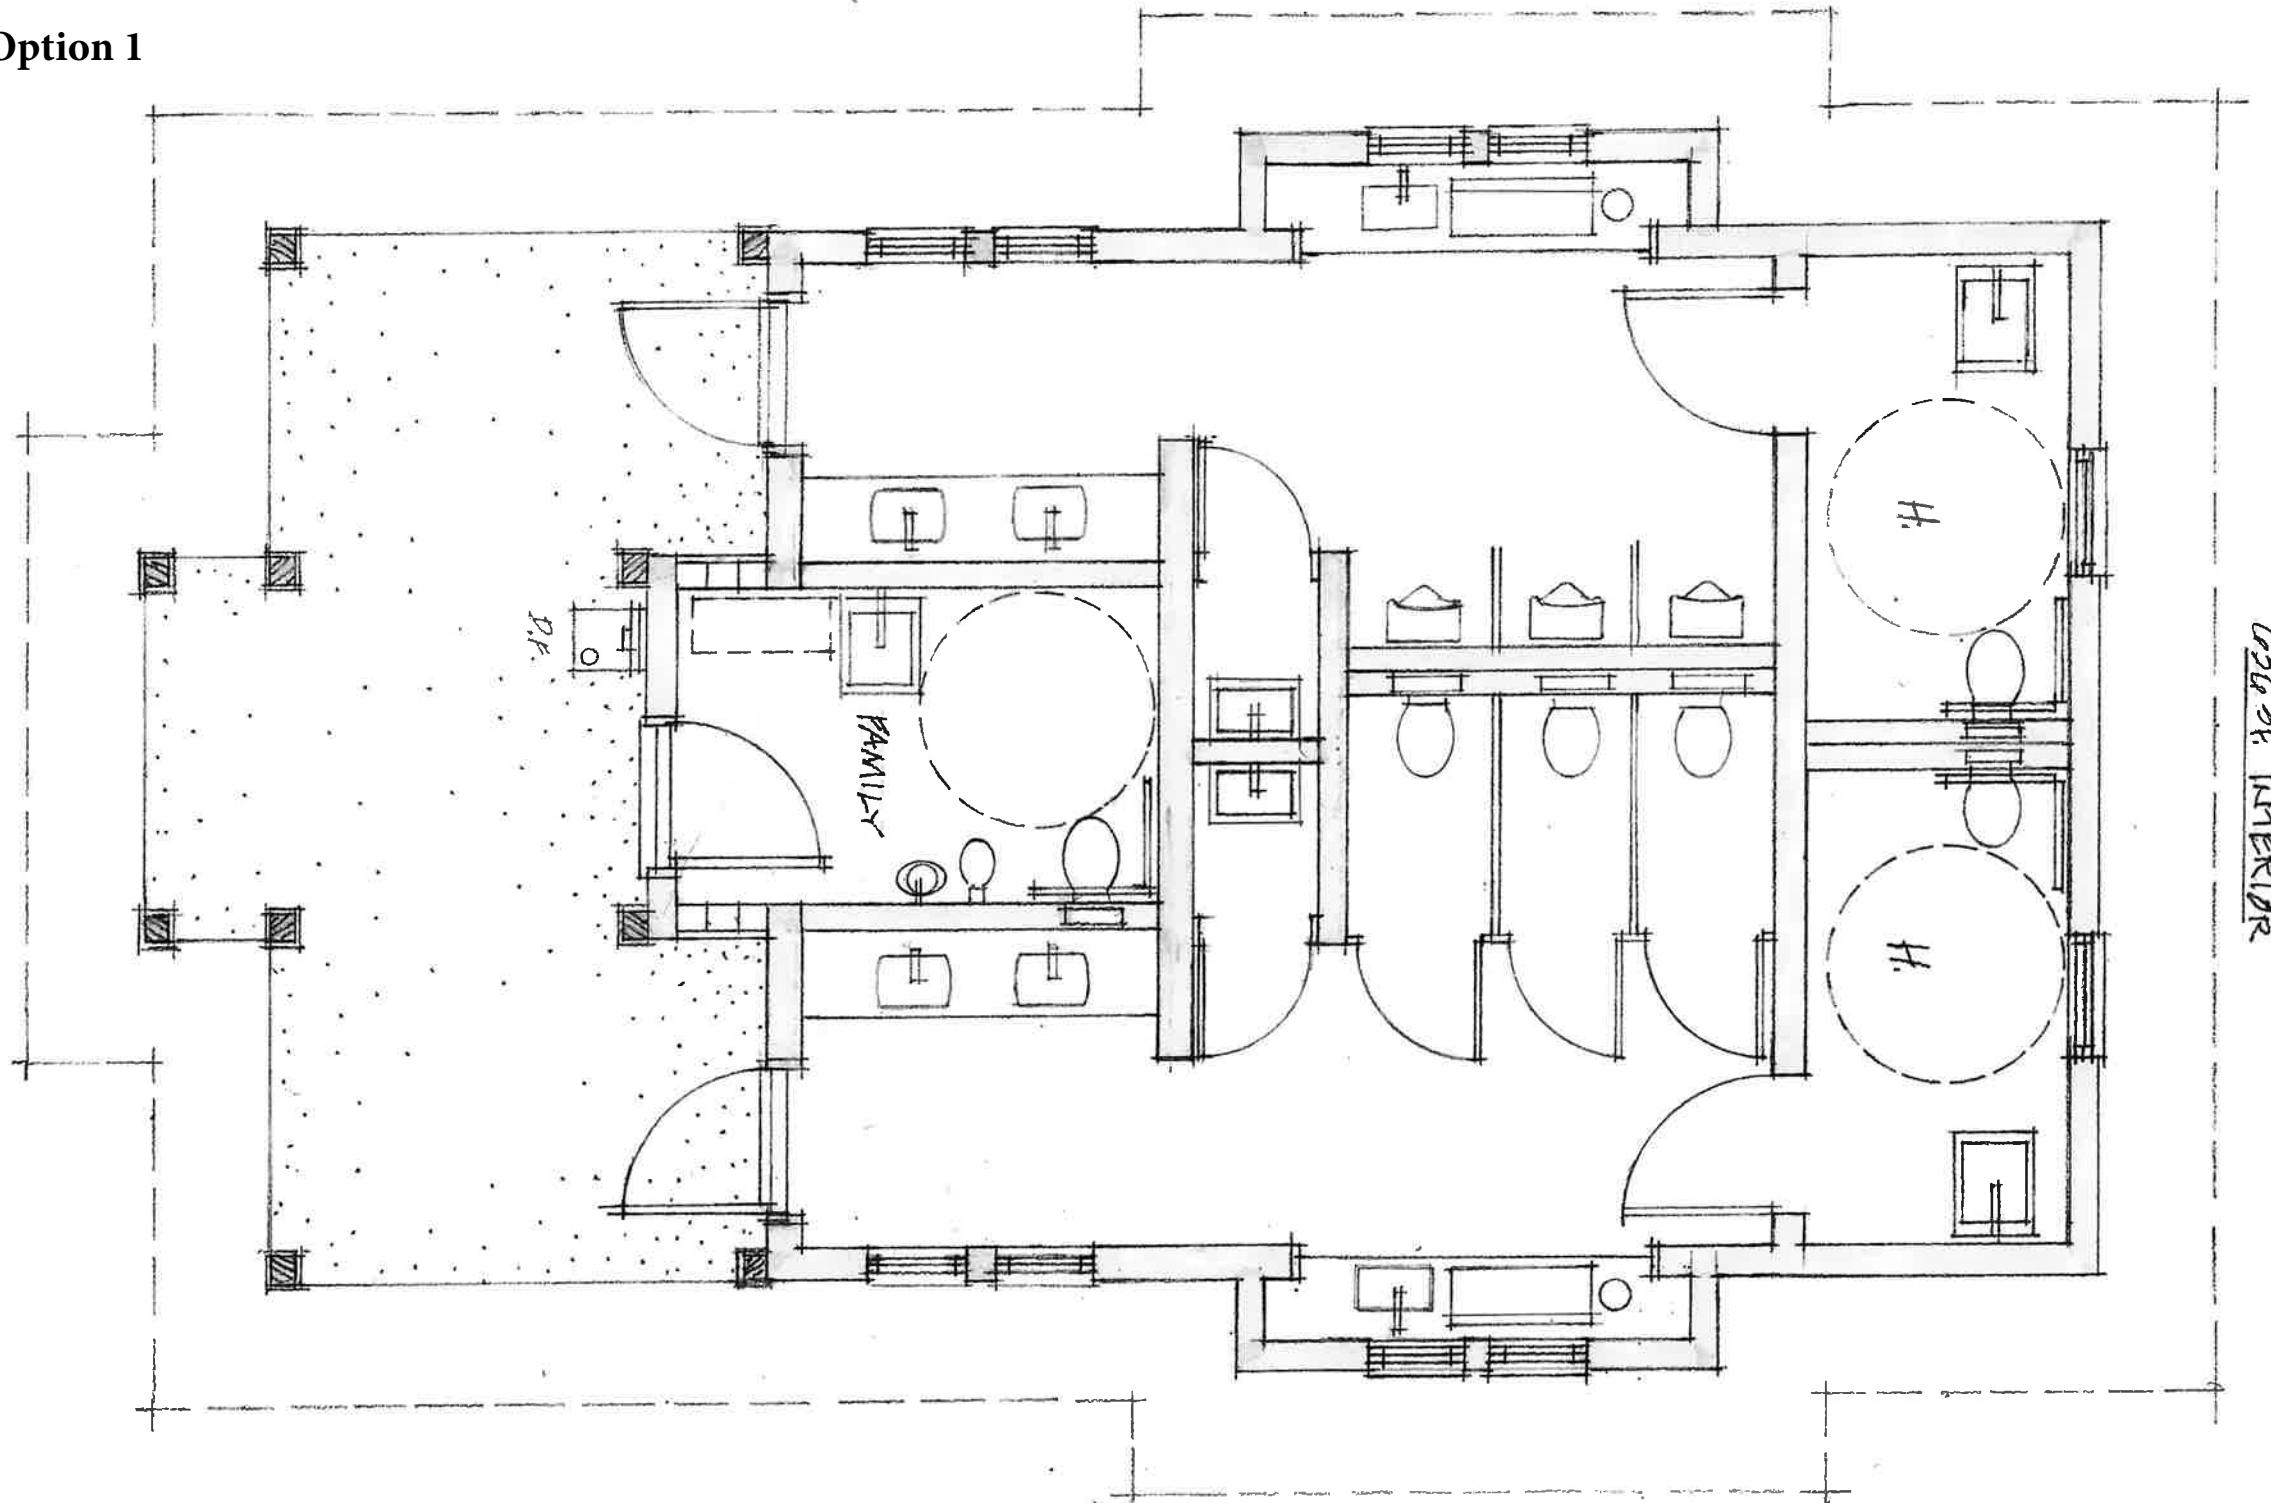

Suggests a modular-style approach with three to four single-user accessible units, each with an individual entrance from the outside.

- Units could be gender-specific or unisex
- Each includes its own baby-changing station
- Modular layout provides operational flexibility if one unit is out of service
- Porch optional; weather-protected doors recommended

Workshop Goal:

Town Council and residents will review both options displayed on easels during the workshop. Staff seeks direction on the preferred concept or a blended approach to guide the architect as Construction Documents are developed.
